*An Equal Opportunity  
Employer*

December, 2009

**The Minnesota State Board of Investment (SBI) is pleased to present its report for the fiscal year ending June 30, 2009.**

**Investment Environment**

During fiscal year 2009, U.S. capital markets experienced one of the most difficult and volatile periods in recent history. The U.S. equity markets returned -26.6% for the fiscal year, as measured by the Russell 3000 Index. Constrained wages, a weak jobs market, falling home values and constrained access to credit continued to pressure consumers and business. The credit problems at financial institutions continued while the Fed began to announce concerns about inflation risks.

The Morgan Stanley Capital International (MSCI) All Country World Index excluding the United States (ACWI ex U.S.), which represents the developed and emerging international markets outside the U.S., returned -30.9% for the fiscal year. The international markets suffered for a second year from an uncertain global economic outlook and worldwide inflation concerns.

The U.S. bond market, as measured by the Barclays Capital Aggregate Bond Index, rose 6.0% during the fiscal year. The sub-prime mortgage crisis spilled into the broader financial market, causing a credit crisis and a liquidity freeze. Investors' need for safety drove a flight to quality that drove up Treasury prices and caused Treasury yields to plummet and yields on spread products to widen dramatically.

**Fiscal Year 2009 Changes and Results**

At the end of fiscal year 2009, the Post Retirement Fund merged with the Basic Retirement Funds, to formally become the Combined Funds. For more details on the merger, see page 5.

**SBI Results**

Within this investment environment, the retirement assets under the Board's control performed as follows:

- The Combined Funds returned -18.8% during fiscal year 2009. Over the latest ten year period, the Funds have experienced an annualized return of 2.4%. (See page 9.)
- The lifetime benefit increase for fiscal year 2009 will be 2.5%. The increase will be payable to eligible retirees effective January 1, 2010.

**On June 30, 2009, assets under management totaled \$47.9 billion.** This total is the aggregate of numerous separate pension funds, trust funds and cash accounts, each with different investment objectives. In establishing a comprehensive management program, the Board develops an investment strategy for each fund which reflects its unique requirements. **The primary purpose of this annual report is to communicate the investment goals, policies and performance of each fund managed by the Board.** Through the investment programs presented in this report, the Minnesota State Board of Investment seeks to enhance the management and performance of the assets under its control.

Sincerely,

Howard Bicker  
Executive Director

## **State Board of Investment**

**Governor Tim Pawlenty, Chair**  
**State Auditor Rebecca Otto**  
**Secretary of State Mark Ritchie**  
**State Attorney General Lori Swanson**

### **Investment Advisory Council**

The Legislature has established a seventeen member Investment Advisory Council to advise the Board and its staff on investment-related matters.

The mission statement of the Investment Advisory Council is: The IAC fulfills its statutory duty to the SBI by providing advice and independent due diligence review of the investment policy and implementation recommendations that guide the SBI's investment of assets.

The Board appoints ten members experienced in finance and investment. These members traditionally have come from the Minneapolis and St. Paul corporate investment community.

The Commissioner of Finance and the Executive Directors of the three statewide retirement systems are permanent members of the Council.

Two active employee representatives and one retiree representative are appointed to the Council by the Governor.

All proposed investment policies are reviewed by the IAC before they are presented to the Board for action.

### **Members of the Council**

*Jeffery Bailey, Chair*  
Director-Benefits Finance  
Target Corporation

*Malcolm W. McDonald, Vice Chair*  
Director & Corporate Secretary

As of December 2009

## Introduction

**The Minnesota State Board of Investment is responsible for the investment management of various retirement funds, trust funds and cash accounts. On June 30, 2009, the market value of all assets was \$47.9 billion.**

### **Constitutional and Statutory Authority**

The Minnesota State Board of Investment (SBI) is established by Article XI of the Minnesota Constitution to invest all state funds. Its membership as specified in the Constitution is comprised of the Governor (who is designated as chair of the Board), State Auditor, Secretary of State and State Attorney General.

All investments undertaken by the SBI are governed by the prudent person rule and other standards codified in *Minnesota Statutes*, Chapter 11A and Chapter 356A.

### **Prudent Person Rule**

The prudent person rule, as codified in *Minnesota Statutes* Section 11A.09, requires all members of the Board, Investment Advisory Council, and SBI staff to “...act in good faith and ...exercise that degree of judgment and care, under circumstances then prevailing, which persons of prudence, discretion and intelligence exercise in the management of their own affairs, not for speculation, but for investment, considering the probable safety of their capital as well as the probable income to be derived therefrom.” *Minnesota Statutes* Section 356A.04 contains similar codification of the prudent person rule applicable to the investment of pension fund assets.

### **Authorized Investments**

In addition to the prudent person rule, *Minnesota Statutes* Section 11A.24 contains a specific list of asset classes available for investment

including common stocks, bonds, short term securities, real estate, private equity, and resource funds. The statutes prescribe the maximum percentage of fund assets that may be invested in various asset classes and contain specific restrictions to ensure the quality of the investments.

### **Investment Policies**

Within the requirements defined by state law, the State Board of Investment, in conjunction with SBI staff and the Investment Advisory Council, establishes investment policies for all funds under its control. These investment policies are tailored to the particular needs of each fund and specify investment objectives, risk tolerance, asset allocation, investment management structure and specific performance standards.

The Board has adopted guidelines concerning investments in stock markets outside the U.S. The guidelines do not prohibit investment in any market, but do require that additional notification and/or presentation be provided to SBI staff or the SBI Administrative Committee in certain cases (refer to page 48 for more information on these guidelines.)

The Board, its staff, and the Investment Advisory Council have conducted detailed analyses that address investment objectives, asset allocation policy and management structure of each of the funds under the SBI's control. The studies guide

the on-going management of these funds and are updated periodically.

### **Important Notes**

Readers should note that the SBI's returns in this report are shown **after** transactions costs and fees are deducted. Performance is computed and reported after all applicable charges to assure that the Board's focus is on true net returns.

Due to the large number of individual securities owned by the funds managed by the SBI, this report contains only summarized asset listings. **A complete list of securities is available upon request from the State Board of Investment.**

## ***Funds Under Management***

***Market Value  
June 30, 2009\****

### ***Combined Funds***

***\$35.9 billion***

The Combined Funds represent the assets for both the active and retired public employees in nine statewide retirement plans:

Teachers Retirement Fund	\$13.8 billion
Public Employees Retirement Fund	10.1 billion
State Employees Retirement Fund	6.9 billion
Public Employees Police and Fire Fund	3.9 billion
Correctional Employees Fund	455 million
Highway Patrol Retirement Fund	449 million
Public Employees Correctional Fund	165 million
Judges Retirement Fund	114 million
Legislative Retirement Fund	21 million

### ***Minneapolis Employees Retirement Fund (MERF)***

***\$0.8 billion***

### ***Supplemental Investment Fund (SIF)***

***\$0.9 billion***

The Supplemental Investment Fund includes assets of the unclassified state employees retirement plan, other defined contribution retirement plans, and various retirement programs for local police and firefighters. Participants may choose among seven separate accounts with different investment objectives designed to meet a wide range of participant needs and objectives.

Income Share Account	stocks and bonds	\$194 million
Common Stock Index Account	passively managed stocks	197 million
Growth Share Account	actively managed stocks	81 million
Bond Market Account	actively managed bonds	96 million
International Share Account	non-U.S. stocks	90 million
Fixed Interest Account	stable value investments	95 million
Money Market Account	short-term debt securities	174 million

### ***Non-Retirement Funds***

***\$1.8 billion***

#### ***Assigned Risk Plan***

***\$0.3 billion***

The Minnesota Workers Compensation Assigned Risk Plan provides worker compensation insurance for companies unable to obtain coverage through private carriers.

#### ***Permanent School Fund***

***\$0.6 billion***

The Permanent School Fund is a trust established for the benefit of Minnesota public schools.

#### ***Environmental Trust Fund***

***\$0.4 billion***

The Environmental Trust Fund is a trust established for the protection and enhancement of Minnesota's environment. It is funded with a portion of the proceeds from the state's lottery.

#### ***Other Post Employment Benefits Funds (OPEB'S)***

***\$0.2 billion***

#### ***Miscellaneous Accounts***

***\$0.3 billion***

## **Funds Under Management**

**Market Value  
June 30, 2009\***

### **State Deferred Compensation Plan**

**\$3.1 billion**

The State Deferred Compensation Plan offers eleven mutual funds, a money market fund, and a fixed interest (stable value) fund.

The assets for each offering are shown below. Benchmarks are shown in parentheses.

#### **Large Cap Equity:**

Janus Twenty (S&P 500)	\$356 million
Legg Mason Partners Appr I (S&P 500)	96 million
Vanguard Institutional Index Plus (S&P 500)	304 million

#### **Mid Cap Equity:**

Vanguard Mid-Cap Index (MSCI US Mid-Cap 450)	105 million
----------------------------------------------	-------------

#### **Small Cap Equity:**

T. Rowe Price Small-Cap Stock (Russell 2000)	260 million
----------------------------------------------	-------------

#### **Balanced:**

Dodge & Cox Balanced Fund (60% S&P 500/40% Barclays Capital Aggregate)	203 million
Vanguard Balanced Index Inst. Fund (60% MSCI US Broad Market, 40% Barclays Capital Aggregate)	140 million

#### **Bond:**

Dodge & Cox Income Fund (Barclays Capital Aggregate)	105 million
Vanguard Total Bond Market Index Inst. (Barclays Capital Aggregate)	92 million

#### **International:**

Fidelity Diversified International (MSCI EAFE-Free)	188 million
Vanguard Inst. Dev. Markets Index Fund (MSCI EAFE)	59 million

#### **Stable Value:**

SIF Fixed Interest	1.1 billion
SIF Money Market	103 million

### **State Cash Accounts**

**\$5.4 billion**

These accounts are the cash balances of state government funds, including the Invested Treasurers Cash Fund, transportation funds, and miscellaneous cash accounts. Assets are invested in high quality, liquid, debt securities.

### **Total Assets Under SBI Management**

**\$47.9 billion**

\* Totals may not add due to rounding.

**Figure 1.**  
**PERFORMANCE OF CAPITAL MARKETS**  
**Cumulative returns**

## Combined Funds

**The Combined Funds represent the assets of both active and retired public employees who participate in the defined benefit plans of three state-wide retirement systems: Teachers Retirement Association (TRA), Public Employees Retirement Association (PERA) and the Minnesota State Retirement System (MSRS). On June 30, 2009, the Combined Funds covered 525,000 active and retired employees and had a market value of \$35.9 billion.**

### Background

Through the end of fiscal year 2009, the retirement assets under the authority of the Minnesota State Board of Investment were managed and accounted for (as specified in statute) as two pools of assets, with distinct asset allocation policies. One pool of assets, the Basic Retirement Funds (Basics), was made up of the assets of active employees, and the other pool of assets, the Post Retirement Fund (Post), was made up of assets of retired employees. The funds previously were “combined” for reporting and comparison purposes only.

The 2008 Legislature enacted legislation that established specific minimum funding levels for the Post Retirement Fund. The legislation mandated that if the funding level of the Post fell below 80 percent, the Post and Basic Funds would merge at the end of the following fiscal year. This event was triggered, and the Post was merged with the Basics on June 30, 2009. In order to effect this transaction on June 30<sup>th</sup>, as required by the legislation, the Post was transferred using a value as of the close of business on June 29, 2009. As a result, the Post had a market value of \$0 as of the last day of the fiscal year, June 30, 2009.

Going forward the assets will be managed and reported on as one pool defined in statute as the Combined

Funds. Figure 2 identifies the nine different retirement funds which comprise the Combined Funds.

### Investment Objectives

One overriding responsibility of the State Board of Investment (SBI) with respect to the management of the Combined Funds is to ensure that sufficient funds are available to finance promised benefits.

### Actuarial Assumed Return

Employee and employer contribution rates are specified in state law as a percentage of an employee’s salary. The rates are set so that contributions plus expected investment earnings will cover the projected cost of promised pension benefits. In order to meet these projected pension costs, the Combined Retirement Funds must generate investment returns of at least 8.5% on an annualized basis, over time.

### Time Horizon

Normally, pension assets will accumulate in the Combined Funds for 30 to 40 years during an employee’s years of active service. A typical retiree can be expected to draw benefits for an additional 15 to 20 years. This provides the Combined Funds with a long investment time horizon and permits the Board to take advantage of the long run return opportunities offered by common stocks and other equity investments in order to meet the actuarial return target.

### Benefit Increase

Each year retirees receive a 2.5% benefit increase. Prior to the merger of the Basic and Post Funds, a benefit increase was calculated based on an inflation component and an investment return component. (See prior annual reports for a complete description.)

**Figure 2. Composition of Combined Funds as of June 30, 2009**

Teachers Retirement Fund	38.4%
Public Employees Retirement Fund	28.1
State Employees Retirement Fund	19.2
Public Employees Police and Fire Fund	11.0
Correctional Employees Fund	1.3
Highway Patrol Retirement Fund	1.2
Legislative Retirement Fund	0.1
Judges Retirement Fund	0.3
Public Employees Correctional Fund	0.4
Total	100.0%

## Combined Funds

### Asset Allocation

The allocation of assets among stocks, bonds, alternative investments and cash has a dramatic impact on investment results. In fact, asset allocation decisions overwhelm the impact of individual security selection within a total portfolio. The asset allocation of the Combined Funds is reviewed periodically.

As illustrated in Figure 1, historical evidence indicates that U.S. common stocks will provide the greatest opportunity to maximize investment returns over the long-term. As a result, the Board has chosen to incorporate a large commitment to common stocks in the asset allocation policy for the retirement funds. In order to limit the short run volatility of returns exhibited by common stocks, the Board includes

Figure 4. Combined Funds Historical Asset Mix FY 2005-2009

other asset classes such as bonds, real estate, and resource investments in the total portfolio. This diversification is intended to reduce wide fluctuations in investment returns on a year to year basis and should not impair the Funds' ability to meet or exceed the actuarial return targets over the long-term.

### Long-Term Allocation Policy

The Combined Funds has a policy asset allocation which differs somewhat from the historic policy asset allocation of either the Basics or the Post. It is based on the investment objectives of the Combined Funds and the expected long run performance of the capital markets. The new policy asset allocation of the Combined Funds was approved by the Board in December 2008, and is as follows:

Domestic Stocks	45%
International Stocks	15
Bonds	18
Alternative Assets	20
Unallocated Cash	2

The unfunded allocation to alternative investments is held in bonds until it is needed for investment. As a result, the actual amount invested in bonds at any time can be above the target allocation.

Figure 3. Combined Funds Asset Mix Comparison as of June 30, 2009

	Combined Funds	Median Allocation in TUCS*
Domestic Equity	44.6%	34.3%
International Equity	16.3	14.6
Bonds	22.3	29.6
Alternatives**	14.8	11.4
Cash	2.0	3.6

\* Represents the median allocation by asset class, and does not add to 100%.

\*\* TUCS may include assets other than alternatives.

Figure 3 presents the actual asset mix of the Combined Funds at the end of fiscal year 2009. Historical asset mix data are displayed in Figure 4.

Historically, there have been changes to the policy asset allocations of both the Basics and Post Funds. During fiscal year 2004 the Board revised its long term asset allocation targets for the Post Fund. The allocation

## Combined Funds

target for alternative investments in the Post Fund was increased from 5% to 12%, while decreasing domestic equity from 50% to 45% and decreasing fixed income from 27% to 25%. At that time, the Board also provisionally revised the asset allocation targets for the Basic Funds. Upon the Post Fund achieving its alternative investment target, the Basics Funds' alternative allocation target was authorized to increase from 15% to 20% by decreasing the fixed income target from 24% to 19%. This allocation change to the Basic Funds was triggered and became effective July 1, 2008.

Additionally, in fiscal year 2004, the Basic Funds were authorized to invest in yield-oriented investments in alternative assets and the Post Fund was authorized to invest in private equity, real estate and resource investments, as well as yield-oriented investments, as part of the allocation to alternative investments.

### **Asset Mix Compared to Other Pension Funds**

The Board finds it instructive to review asset mix and performance of the Combined Funds relative to other pension fund investors. The comparison universe used by the SBI is the Master Trust portion of the Trust Universe Comparison Service (TUCS). This universe contains information on public and corporate pension and trust funds with over \$1 billion and a diversified asset mix.

**It is important to note that the historical data on the Combined Funds presented in this report reflect only the Basic Retirement Funds through fiscal year 1993. Both the Basic and Post Funds are included in the data for the Combined Funds after that date.**

This distinction is necessary due to the different asset allocation strategies employed by the two funds in the past. The Basic Funds have always been managed to maximize total rates of return over the long-term and, therefore, the asset allocation has historically included a substantial stock segment. In contrast, until the post retirement benefit increase formula was changed in 1993, the Post Retirement Fund was managed to maximize current income which necessitated a large commitment to bonds. As a result, the investment goals of the two funds were incompatible for analytical purposes until fiscal year 1994.

Comparisons of the Combined Funds' actual asset mix to the median allocation to stocks, bonds and other assets of the funds in TUCS on June 30, 2009 are also displayed in Figure 3.

The Combined Funds were overweighted in domestic equities, international equities, and alternative investments relative to the median allocation in TUCS, and were underweighted in bonds and cash.

### **Total Return Vehicles**

The SBI invests the majority of the Combined Funds' assets in **common stocks** (both domestic and international.) A large allocation is consistent with the investment time horizon of the Combined Funds and the advantageous long-term risk-return characteristics of common stocks. Including international stocks in the asset mix allows the SBI to diversify holdings across world markets and offers the opportunity to enhance returns and reduce the volatility of the total portfolio. The rationale underlying the inclusion of **private equity** (e.g., venture capital and leverage buyouts) is similar.

The Board recognizes that this sizable policy allocation to common stock and private equity likely will produce more volatile portfolio returns than a more conservative policy focused on fixed income securities. It is understood that this policy may result in quarters, or even years, of disappointing results. Nevertheless, the long run return benefits of this policy are expected to compensate for the additional volatility.

### **Diversification Vehicles**

The Board includes other asset classes in the Combined Funds to provide some insulation against highly inflationary or deflationary environments and to diversify the portfolio sufficiently to avoid excessive return volatility.

**Real Estate and resource** (oil and gas) investments provide an inflation hedge that other financial assets cannot offer. In periods of rapidly rising prices, these assets have appreciated in value at a rate at least equal to the inflation rate. Under more normal financial conditions, such as low to moderate inflation, the returns on these assets are not highly correlated with common stocks. As a result, inclusion of these assets in the Combined Funds serves to dampen return volatility.

The allocation to **bonds** acts as a hedge against a deflationary economic environment. In the event of substantial deflation, high quality fixed income assets are expected to protect principal and generate significant capital gains. Bonds, like real estate and resource funds, under normal financial conditions, help to diversify the Combined Funds, thereby controlling return volatility.

## Combined Funds

### *Yield oriented alternative*

investments provide the opportunity for higher long term returns than those typically available from bonds yet still generate sufficient current income. Typically, these investments (e.g., subordinated debt, mezzanine debt, or resource income investments such as producing properties) are structured more like fixed income securities with the opportunity to participate in the appreciation of the underlying assets. While these investments may have an equity component, they display a return pattern more like a bond. Therefore, they will help reduce the volatility of the total portfolio, but should also generate higher returns relative to more traditional bond investments.

### *Investment Management*

All assets in the Combined Funds are managed externally by investment management firms retained by contract. More information on the structure, management and performance of the various investment pools is included in the **Investment Pool** section of this report.

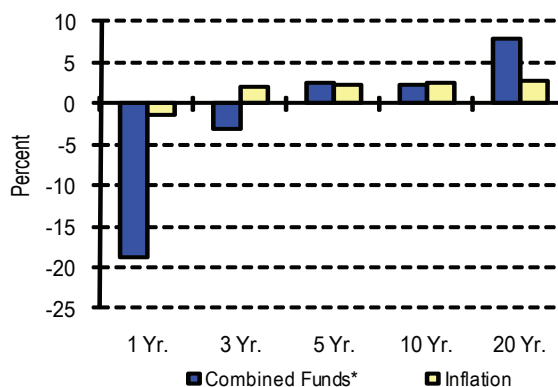

### *Return Objectives*

The Board measures the performance of the Combined Funds relative to the following total rate of return objectives:

—**Provide Real Returns.** Over a twenty year period, the Combined Funds are expected to produce returns that exceed inflation by 3-5 percentage points on an annualized basis.

—**Match or Exceed Market Returns.** Over a ten year period, the Combined Funds are expected to match or exceed a composite of market indices weighted using the asset mix of the Combined Funds.

Figure 5. Combined Funds Performance vs. Inflation

	1 Yr.	3 Yr.	5 Yr.	Annualized 10 Yr.	20 Yr.
Combined Funds*	-18.8%	-3.0%	2.6%	2.4%	7.8%
Inflation	-1.4	2.1	2.4	2.6	2.8

\* Includes Basic Funds only through 6/30/93, Basic and Post Funds thereafter.

*Performance is reported net of all fees and costs to assure that the Board's focus is on true net return.*

### *Investment Results*

#### **Comparison to Inflation**

Over the last twenty years, the Combined Funds exceeded inflation by 5.0 percentage points. Historical results compared to inflation are shown in Figure 5.

#### **Comparison to Market Returns**

The Combined Funds' performance is also evaluated relative to a composite of market indices which is weighted in a manner that reflects the actual asset allocation of the Combined Funds. Performance relative to this standard will measure two effects:

- The ability of the managers selected by the SBI, in aggregate, to add value to the returns available from the broad capital markets.
- The impact of the SBI's re-balancing activity. The SBI rebalances the total fund when market movements take the stock (domestic and international,) bond, or cash segments above or below long term asset allocation targets. This policy imposes a low risk discipline of "buy low-sell high" among asset classes on a total fund basis.

## Combined Funds

Figure 6. Combined Funds Performance vs. Composite Index FY2005-2009

	Annualized								
	2005	2006	2007	2008	2009	3 Yr.	5 Yr.	10 Yr.	20 Yr.
Combined Funds*	10.7%	12.3%	18.3%	-5.0%	-18.8%	-3.0%	2.6%	2.4%	7.8%
Composite Index	10.5	12.2	18.0	-3.9	-18.4	-2.6	2.8	2.4	7.6

Performance results and a breakdown of the composite index are shown in Figures 6 and 7. The Combined Funds matched the composite index over the last ten years and, therefore met the stated performance goal. The Funds trailed the composite index by 0.2 percentage points over the last five years and by 0.4 percentage points over the most recent fiscal year. These results are largely a measure of value added or lost from active management after all fees and expenses have been taken into consideration.

### Comparison to Other Funds

While the SBI is concerned with how its returns compare to other pension investors, universe comparison data should be used with great care. There are two primary reasons why such comparisons will provide an “apples-to-oranges” look at performance:

—**Differing Allocations.** Asset allocation has a dominant effect on returns. The allocation to stocks among the funds in TUCS typically ranges from 20-90%, a wide range for meaningful comparison. In addition, it appears that many funds do not include alternative asset holdings in their reports to TUCS. This further distorts comparisons among funds.

—**Differing Goals/Liabilities.** Each pension fund structures its portfolio to meet its own liabilities and risk tolerance. This may result in different choices on asset mix. Since asset mix will largely determine investment results, a universe ranking may not be relevant to a discussion of how well a plan sponsor is meeting its long-term liabilities.

Figure 7. Composite Index for Period Ending on June 30, 2009

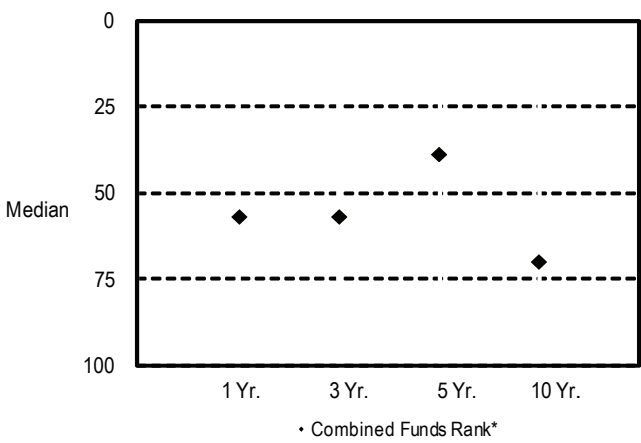

Asset Class	Market Index	Composite Index Wts. *
Domestic Stocks	Russell 3000	46.1%
Int'l Stocks	MSCI ACWI Free ex. U.S.	15.0
Domestic Bonds	Barclays Capital Aggregate	21.8
Alternative Investments	Alternative Investments	15.2
Unallocated Cash	3 Month T-Bills	1.9
Total		100.0%

\* Weights are reset in the composite at the start of each month to reflect the combined allocation policies of the Basic and Post Funds.

Combined Funds

With these considerations in mind, the performance of the Combined Funds compared to other public and corporate pension funds with over \$1 billion in assets in the Master Trust portion of TUCS is displayed in Figure 8. It shows that the Combined Funds have ranked above the median over the last five year period but below the median over the last ten year period.

Figure 8. Combined Funds Performance Compared to Other Pension Funds

## Investment Pools

**To gain greater operating efficiency, external managers are grouped into several “Investment Pools” which are segregated by asset class. The various retirement funds participate in one or more of the pools corresponding to their individual asset allocation strategies.**

The Combined Funds and Supplemental Investment Fund share many of the same stock and bond managers. This is accomplished by grouping managers by asset class into several Investment Pools. The individual funds participate in the Investment Pools by purchasing “units” which function much like shares of a mutual fund.

This investment management structure allows the State Board of Investment (SBI) to gain greater operating efficiency within asset classes and to keep management costs as low as possible for all participants.

### Domestic Stock Pool

The Basic Retirement Funds participated in the Domestic Stock Pool since its inception in January 1984. The Post Retirement Fund participated in the Pool since July 1993. The Funds merged to become the Combined Funds on June 30, 2009. In addition, the Growth Share Account, Common Stock Index Account, and the stock portion of the Income Share Account in the Supplemental Investment Fund participate in the Pool.

The following is the dollar value as of June 30, 2009 of each fund's participation in the Pool:

Combined Funds      \$16.0 billion  
(active, passive and semi-passive)

Growth Share Account (active and semi-passive)	\$81 million
Common Stock Index Account (passive)	\$197 million
Stock portion of the Income Share Account (passive)	\$112 million

#### Management Structure

The SBI uses a three-part approach to the management of the Domestic Stock Pool:

— **Active Management.** At the end of fiscal year 2009, approximately 25% of the Domestic Stock Pool was actively managed by a group of 23 external money managers. The assets allocated to each of the managers ranged from \$35 million to \$370 million.

— **Semi-Passive Management.** At the end of fiscal year 2009, approximately 36% of the Domestic Stock Pool was managed by a group of three semi-passive external money managers with portfolios ranging from \$1.7 billion to \$2.2 billion.

— **Passive Management.** At the end of fiscal year 2009, approximately 39% of the Stock Pool was managed passively by a single manager with a portfolio of \$6.6 billion.

The goal of the Domestic Stock Pool is to outperform the asset class target, which is the Russell 3000 Index. The Russell 3000 Index can be segmented into sub-indexes or Russell style indexes.

Assets of the pool are allocated based on the Russell style indexes in proportion to the style weighting within the Russell 3000. Assets within each style are then allocated to each manager within the designated style. This allocation is done to minimize the style bias within the Domestic Stock Pool.

Each **active manager** is expected to add incremental value over the long run relative to the Russell style index which reflects its investment approach or style.

The **semi-passive managers** are also expected to add value relative to the Russell 1000 Index. However, they employ a strategy that more closely tracks the benchmark than the active management.

The **passive manager** in the Domestic Stock Pool manages its portfolio to consistently and inexpensively track the Russell 3000 index.

A description of each domestic stock manager's investment approach is included in the **Investment Manager Summaries** section.

#### FY 2009 Changes

During fiscal year 2009, several changes were made to the manager

## Investment Pools

structure. One manager was terminated for organizational concerns, loss of accounts, and performance. That manager was Cohen, Klingenstein & Marks. One manager, Voyageur Asset Management, made the decision to discontinue normal business operations and their portfolio was liquidated in June. Additionally, RiverSource Investments LLC/Kenwood Capital announced their decision in June to discontinue normal business operations at the end of July. Their portfolio was liquidated at the beginning of fiscal year 2010.

### Investment Performance

A comprehensive monitoring system has been established to ensure that the many elements of the Domestic Stock Pool conform to the SBI's investment policies. Published performance benchmarks are used for each domestic stock manager. These benchmarks enable the SBI to evaluate the managers' results, both individually and in aggregate, with respect to risk incurred and returns achieved.

Two primary long run **risk objectives** have been established for the domestic stock managers:

— **Investment Approach.** Each manager (active, semi-passive, or passive) is expected to hold a portfolio that is consistent, in terms of risk characteristics, with the manager's stated investment approach. In the short run, the active stock managers may depart from their risk targets as part of their specific investment strategies.

— **Diversification.** The passive and semi-passive managers are expected to hold highly diversified portfolios, while each active domestic stock manager

is expected to hold a portfolio appropriately diversified for the particular investment strategy and style.

The domestic stock managers successfully fulfilled their long-term risk objectives during fiscal year 2009. In general, the managers constructed portfolios consistent with their stated investment approaches and maintained levels of diversification that were appropriate for their respective active, semi-passive and passive approaches.

The Board's **return objectives** for active and semi-passive stock managers are measured against the published Russell style indices that represent the managers' specific investment approaches. These indices take into account the equity market forces that impact

certain investment styles. Thus, a Russell style index or benchmark is a more appropriate return target against which to judge a manager's performance than a broad market index.

Active managers are expected to exceed their benchmark by an amount appropriate for their active risk level. This active risk level varies by manager and is influenced by the manager's stated strategy and style.

In aggregate, the Domestic Stock Pool underperformed the Russell 3000 Index by 0.3 percentage point for the fiscal year. The active managers underperformed their respective benchmarks. Relative to the aggregate benchmark, the underperformance of the active manager group was due to negative

Figure 9. Domestic Stock Pool Performance FY 2005-2009

## Investment Pools

stock selection across several sectors particularly Other Energy, Technology and Producer Durables. This was a challenging period for all managers as the markets experienced high volatility and flight to safety during a severe recession.

Figure 9 provides more detail on the historical performance of the entire pool. Manager performance relative to the respective benchmarks was mixed. Nine active managers outperformed and fourteen underperformed the benchmark. One semi-passive manager outperformed and two semi-passive managers underperformed the benchmark. The passive manager outperformed its target, the Russell 3000 index. Individual manager performance for fiscal year 2009 is shown in Figure 10.

Historical information on individual manager performance and portfolio characteristics is included in the **Statistical Data** section. Section II of the Annual Report provides **Summarized Asset Listings** for each manager and the Pool in aggregate.

### Bond Pool

The Basic Retirement Funds have participated in the Bond Pool since its inception in July 1984. The Post Retirement Fund has participated in the Pool since July 1993. The funds merged to become the Combined Funds on June 30, 2009. In addition, the Bond Market Account in the Supplemental Investment Fund has utilized portions of the Pool since July 1986.

## Investment Pools

The following is the dollar value as of June 30, 2009 of each fund's participation in the Pool:

Combined Funds       \$7.9 billion  
(active and semi-passive)

Bond Market           \$96 million  
Account  
(active and semi-passive)

### Investment Management

The SBI uses a two-part approach for the management of the Bond Pool:

— **Active Management.** The target is to have no more than half of the Bond Pool managed actively. At the end of fiscal year 2009, approximately 51% of the Bond Pool was actively managed by five external money managers with portfolios of \$700 million to \$1.1 billion each.

— **Semi-Passive Management.** The target is to have at least half of the assets of the Bond Pool managed semi-passively. At the end of fiscal year 2009, approximately 49% of the bond segment was invested by three managers with portfolios of approximately \$1.4 billion each.

The group of **active** bond managers is retained for its blend of investment styles. Each active manager has the goal of outperforming the Barclays Capital Aggregate Bond Index by focusing on high quality fixed income securities across all sectors of the market. The managers vary, however, in the emphasis they place on interest rate anticipation (duration) and in the manner in which they approach security selection and sector weighting decisions. In keeping with the objective of utilizing the Bond Pool as a deflation hedge, the active managers are restricted regarding the duration of their portfolios. This

requirement is designed to prevent the dilution of the deflation hedge of the total pool due to an excessively short-lived position. In addition, the duration restriction helps to avoid extreme variability in total returns relative to the benchmark. The SBI constrains the duration range of the active managers' portfolios to a band of plus or minus two years around the duration of the Barclays Capital Aggregate. The active bond managers focus on high quality (BBB or better) rated bonds. Some managers have been granted authority to invest a limited portion of their portfolios in BB and B rated dollar denominated debt or in non-dollar denominated issues. The managers use this additional authority on a tactical basis.

The goal of the **semi-passive** managers is to add incremental value relative to the Barclays Capital Aggregate Bond Index through superior bond selection and sector allocation rather than through

interest rate exposure. Semi-passive managers' portfolios are constrained to plus or minus 0.2 years around the duration of the Barclays Capital Aggregate. One manager has been granted authority to invest a limited portion of their portfolio in BB and B rated dollar denominated debt or in non-dollar denominated issues. The manager uses this additional authority on a tactical basis. A description of each bond manager's investment approach is included in the **Investment Manager Summaries** section.

### FY 2009 Changes

During fiscal year 2009, Morgan Stanley Investment Management was terminated and Pacific Investment Management Company (PIMCO) was hired.

### Investment Performance

The SBI constrains the **risk** of the active bond managers' portfolios to ensure that they fulfill their deflation hedge and total fund diversification

Figure 11. Bond Pool Performance FY 2005-2009

	Annualized							
	2005	2006	2007	2008	2009	3 Yr.	5 Yr.	10 Yr.
<b>Bond Pool</b>	7.1%	-0.2%	6.3%	4.3%	2.5%	4.3%	4.0%	5.6%
Asset Class Target*	6.8	-0.8	6.1	7.1	6.0	6.4	5.0	6.0

\* The Bond Pool asset class target has been the Barclays Capital Aggregate Bond Index since July 1994.

## Investment Pools

roles. As noted earlier, the managers are restricted in terms of the duration of their portfolios and the quality of their fixed income investments. The active and semi-passive bond managers successfully fulfilled their long-term risk objectives during fiscal year 2009. The managers constructed portfolios consistent with stated investment approaches and maintained appropriate levels of quality and duration.

The **returns** of each of the bond managers are compared to the Barclays Capital Aggregate. Individual active managers are expected to exceed the target by 0.25 percentage point annualized, over time, and each semi-passive manager is expected to exceed the target by 0.10 percentage point annualized, over time. In total, the pool underperformed the Barclays Capital Aggregate by 3.5% for the recent fiscal year. Relative to

the benchmark, the pool suffered from underweighting Treasuries, overweighting mortgage-backed securities (which underperformed during the current subprime crisis,) and in some cases overweighting the corporate bond sector.

Performance over the long-term is slightly below expectations. The pool underperformed the asset class target by 0.40 percentage point over the ten year period ending June 30, 2009. In general, the managers had performed well over the long-term until the 2008 and 2009 fiscal years. The underperformance during this period was severe enough to drag long-term performance below the benchmark. As mentioned previously, overweight exposure to the mortgage-backed securities sector was the main contributor to short and long-term underperformance. Three of four active managers retained for the

full fiscal year underperformed the benchmark. The three semi-passive managers underperformed as well.

Figure 11 shows historical performance for the entire pool. Individual manager performance for fiscal year 2009 is shown in Figure 12. Historical information on individual manager performance and portfolio characteristics is included in the **Statistical Data** section. Section II of this report provides **Summarized Asset Listings** for each manager and the pool in aggregate.

## International Stock Pool

The SBI began its international stock program in October 1992. The Basic Retirement Funds have participated in the International Stock Pool since its inception. The Post Retirement Fund began utilizing the Pool in October 1993. The funds merged to become the Combined Funds on June 30, 2009. The International Share Account in the Supplemental Investment Fund has participated in the Pool since September 1994.

The following is the dollar value on June 30, 2009 of each fund's participation in the International Stock Pool:

Combined Funds      \$5.9 billion  
(active, passive and semi-passive)

International  
Share Account      \$90 million  
(active, passive and semi-passive)

## Investment Pools

### Management Structure

Currently, the SBI uses a three part approach to the management structure of the International Stock Pool:

— **Active Management.** The target is to have at least one-third of the International Stock Pool managed actively. At the end of fiscal year 2009, approximately 49% of the Pool was actively managed by a group of 10 external managers with portfolios ranging from \$175 to over \$500 million each. Seven of these managers manage portfolios in the developed markets and three manage portfolios in the emerging markets.

— **Semi-Passive Management.** The target is to have no more than 33% of the International Stock Pool managed semi-passively. At the end of fiscal year 2009, 10% of the Pool was semi-passively managed by a group of three external managers with portfolios ranging from \$194 to \$209 million each.

— **Passive Management.** The target is to have at least 25% of the International Stock Pool managed passively. At the end of fiscal year 2009, approximately 41% of the International Stock Pool was passively managed by a single manager with a portfolio of \$2.5 billion.

As of July 1, 1999, the SBI began using the combined market capitalization weights of the Morgan Stanley Capital International (MSCI) developed and emerging markets indices as target weights for the developed versus emerging markets within the International Stock Portfolio. Seven of the ten **active** managers and the three **semi-passive** managers invest entirely

in developed markets, and use a variety of investment approaches in an effort to maximize value added to the MSCI World ex U.S. index, over time. These managers address currency management as part of their investment process. Their views on currency may be factored into their country and security selection, or they may explicitly hedge currency exposure on an opportunistic basis, or seek to add value by actively managing currency positions. Three of the ten **active** managers invest entirely in emerging markets. They are expected to add incremental value, over time, relative to the MSCI Emerging Markets Free index of markets in developing countries throughout the world.

The **passive** manager in the International Stock Pool designs its portfolio to consistently and inexpensively track the developed markets MSCI World ex U.S. index.

A description of each international stock manager's investment approach is included in the **Investment Manager Summaries** section.

### FY 2009 Changes

During fiscal year 2009, the Board terminated one active developed markets equity manager: UBS Global Asset Management.

### Investment Performance

Similar to the Domestic Stock Pool, two long term **risk objectives** have been established for the international equity managers:

— **Investment Approach.** Each manager (active or passive) is expected to hold a portfolio that is consistent with the manager's stated investment approach.

— **Diversification.** While the index manager is expected to hold a

Figure 13. International Stock Pool Performance FY 2005-2009

	Annualized							
	2005	2006	2007	2008	2009	3 Yr.	5 Yr.	10 Yr.
Int'l. Stock Pool	15.7%	28.2%	30.3%	-6.6%	-31.0%	-5.7%	4.5%	2.6%

## Investment Pools

well diversified portfolio which closely tracks its target index and the semi-passive managers are expected to hold risk-adjusted portfolios which modestly outperform the index, each active manager is expected to hold a portfolio which represents their best ideas through active bets.

The international stock managers successfully fulfilled their long-term risk objectives during fiscal year 2009. In general, the managers constructed portfolios consistent with their stated investment approaches and maintained appropriate levels of diversification.

The Board's *return objectives* for the International Stock Program are

stated relative to the Morgan Stanley Capital International (MSCI) indices.

The indices are capitalization weighted and measured in U.S. dollar terms, with currencies unhedged. Individual active managers are expected to exceed their benchmark by an amount appropriate for their level of active risk. The active risk level varies by manager and is influenced by the manager's stated strategy and style.

Performance results for the International Stock Pool are shown in Figure 13. In aggregate, performance over the last ten year period exceeded the benchmark by 0.2 percentage point and performance over the last five year

period matched the benchmark. The Pool underperformed the target for the fiscal year.

Individual manager performance during fiscal year 2009 is shown in Figure 14. During the fiscal year, equity markets worldwide experienced the deepest financial crisis in the post-war era due to the unwinding of a multi-year cycle of financial excesses. As a result, most financial assets were hard hit, parts of the global financial system teetered on the brink of collapse, and developed economies were pulled into recession. Unprecedented and coordinated actions to support financial institutions and to supply monetary easing were taken by governments worldwide. Nearly all markets and sectors outside the U.S. declined significantly. The U.S. dollar strengthened versus most major currencies, further diminishing returns for U.S.-based investors, as investors fled to its safety in turbulent times. The exception was the Japanese Yen which appreciated considerably versus the U.S. dollar amid the sustained unwinding of leverage and carry trades. Commodities fell sharply as economies weakened.

Defensive sectors such as healthcare, telecommunications, and utilities were favored in both the developed and emerging markets. The relative performance of the active managers was mixed. Four of the seven active developed markets managers outperformed their respective benchmarks for the year. One of the three active emerging markets managers outperformed the MSCI Emerging Markets Free index. All of the three semi-passive developed markets managers underperformed for the year. Finally, the passively managed portion of the program exceeded its benchmark by 0.1 percentage point for the year relative to the MSCI World ex U.S. index.

## Investment Pools

More information on the performance and portfolio composition of individual managers is included in the **Statistical Data** section. Section II of this report provides **Summarized Asset Listings** for each manager and the Pool in aggregate.

### Alternative Investment Pool

Like the stock and bond segments, alternative assets (real estate, private equity, resource funds and yield-oriented investments) are also managed on a pooled basis. In July 2003, separate pools that had been established for the Basic and Post Retirement Funds were combined to create one alternative investment pool. In June 2009, the Basic and Post Retirement Funds were combined to create the Combined Funds.

#### Statutory Constraints

The statutory constraints for the Combined Funds are as follows: Generally, each investment must involve at least four other investors and the SBI's participation in an investment may not exceed 20% of the total investment.

### Management Structure

The Combined Funds have participated in the Alternative Investment Pool since its inception in July 2003. The Alternative Investment Pool was created in July 2003 from separate pools that had been previously established for the Combined Funds.

Given their long investment time horizon, the Combined Funds are especially well suited for alternative investments. Up to 20% of the market value of the Combined Funds is targeted for alternative

investments compared to an actual invested percentage of 14.8% as of June 30, 2009. Market value plus unfunded commitments can be 1.5 times the market value allocation.

A breakdown of the Combined Funds segment is shown in Figure 15. As of June 30, 2009, the market value of current alternative investments was \$5.3 billion, or 14.8% of the Combined Funds.

Descriptions of each of the Funds' alternative investments are included in the **Investment Manager Summaries** section.

#### Real Estate

The real estate investment strategy calls for the establishment and maintenance of a broadly diversified real estate portfolio comprised of investments that provide overall diversification by property type and location. The main components of this portfolio consist of investments in open-end commingled funds and closed-end commingled funds. The remaining portion of the portfolio can include investments in less diversified, more focused (specialty) commingled funds and REITs.

Prospective real estate managers are reviewed and selected based on the manager's experience, investment strategy and performance history. During fiscal year 2009, the SBI did not make any new real estate commitments. The SBI will continue to review real estate managers for possible inclusion in the pool.

#### Private Equity

The private equity investment strategy, which includes leveraged buyouts and venture capital, is to establish and maintain a broadly diversified private equity portfolio comprised of investments that provide diversification by industry type, stage of corporate development and location.

Prospective private equity managers are reviewed and selected based, primarily, on the manager's experience, investment strategy, diversification potential and performance history.

During fiscal year 2009, the SBI approved and closed on commitments with Hellman & Friedman and Lexington Capital Partners. The SBI will continue to review and add new private equity investments as attractive opportunities are identified to replenish commitments that will expire within the next five years.

#### Resource Funds

The strategy for resource investments is to establish and maintain a portfolio of resource investment vehicles that provide an inflation hedge and additional diversification. Resource investments will include oil and gas investments, energy service industry investments and other investments that are diversified by geographic area as well as by type.

Resource investments are selected based on the manager's experience, investment strategy and performance history. During fiscal year 2009, the SBI approved and closed on commitments with First Reserve. The SBI will continue to review resource investments for possible inclusion in the pool.

#### Yield-Oriented

The strategy for yield-oriented investments will target funds that typically provide a current return and may have an equity component. Structures such as subordinated debt investments and mezzanine investments are typical yield-oriented investments. Yield-oriented investments will provide diversification by including investments in the private equity, resource, and real estate categories.

## Investment Pools

Figure 15. Alternative Investment Asset Mix as of June 30, 2009

Note: Percentages may differ slightly due to rounding of values.

Managers are selected based on the manager's performance, experience and investment strategy.

New investments were approved and closed on during fiscal year 2009 with Prudential Capital Partners. The SBI will continue to review yield-oriented investment opportunities for inclusion in the pool.

preclude comprehensive performance evaluation. In the future, as markets for these asset classes become more institutionalized, the SBI hopes to integrate appropriate performance standards for these assets into its performance analysis.

A listing of individual investment funds can be found in the **Statistical Data** Section.

### Investment Performance

The SBI reviews performance of its alternative investments relative to inflation, as measured by changes in the Consumer Price Index (CPI). For the fiscal year ending June 30, 2009, the Alternative Investment Pool provided a negative contribution to overall fund performance for the Combined Funds. The Pool provided a -18.0% return in fiscal year 2009 and has provided a 12.7% return annualized over the past ten years. Performance of the Alternative Investment Pool is shown in Figure 16 for the period ending June 30, 2009.

At this time, benchmarks have not been established for the alternative investment fund managers. The long-term nature of these investments and the lack of comprehensive data on the returns provided by the alternative investment markets

Figure 16 . Alternative Investments FY 2005-2009

	Annualized							
	2005	2006	2007	2008	2009	3 Yr.	5 Yr.	10 Yr.
Alt. Investments	27.2%	43.7%	25.6%	13.4%	-18.0%	5.3%	16.4%	12.7%
Inflation	2.5	3.1	2.7	5.0	-1.4	2.1	2.4	2.6

## ***Minneapolis Employees Retirement Fund***

***On October 1, 2008 the Minneapolis Employees Retirement Fund (MERF) Board appointed the SBI to be the investment manager of all MERF assets as authorized by Minnesota Statutes, Chapter 422A.05. The MERF Board retains the responsibility for all administrative issues and establishes the Fund's investment objectives and asset allocation policy. On June 30, 2009, the market value of the Fund was \$834 million.***

### ***Asset Allocation***

As noted above, the MERF Board is responsible for setting the asset allocation policy for the Fund. The target allocation and actual allocation information as of June 30, 2009 is shown below.

	<b>Target Allocation</b>	<b>Actual Allocation</b>
Dom. Eq.	49.0%	46.0%
Int'l. Eq.	21.0	20.3
Bonds	29.0	31.0
Cash	1.0	2.7

### ***Investment Performance***

Nine month performance through June 30, 2009 for MERF was -9.5%.

### ***Investment Management***

The SBI serves as an investment manager for the Fund. MERF participates in the same investment pools that are used by the Combined Funds, with the exception of the alternative investment pool. State law does not allow MERF to invest in the alternative investment pool. The bond and equity segments are managed to add incremental value through sector and security selection.

## Supplemental Investment Fund

***The Supplemental Investment Fund is an investment program that offers a range of investment options to state and local public employees. The Fund serves approximately 69,000 individuals who participate in defined contribution or supplemental retirement savings plans. On June 30, 2009, the market value of the entire Fund was \$928 million.***

The Supplemental Investment Fund (SIF) provides investment vehicles for a variety of retirement plans. It functions as the sole investment manager for all assets of the Unclassified Employees Retirement Plan, Public Employees Defined Contribution Plan, Hennepin County Supplemental Retirement Plan, and the Health Care Savings Plan. The State Deferred Compensation Plan uses the Fixed Interest Account and the Money Market Account as investment options for its participants. The value of the State Deferred Compensation Plan's SIF investments are included only in the deferred compensation market values. All accounts in the SIF, except the Fixed Interest Account, are available to local volunteer fire relief associations.

### Fund Structure

A wide diversity of investment goals exists among the SIF's participants. In order to meet those needs, the Supplemental Investment Fund is structured much like a "family of mutual funds." Participants may allocate their investments among one or more accounts that are appropriate for their need within statutory requirements and rules established by the participating organizations. Participation in the SIF is accomplished through the purchase or sale of shares in each Account.

### Fund Management

The Supplemental Investment Fund offers seven investment options (See Figure 17). The objectives, asset allocation, management and performance of each account in the Fund are explained in the following sections.

#### Share Values

A share value is established for each account in the SIF, and participants buy or sell shares, based on the most recent share value.

In the Income Share Account, the Growth Share Account, the Common Stock Index Account, the International Share Account and the

Bond Market Account, shares are priced based on the market value of each Account. Performance of these accounts are a function of the income and capital appreciation (or depreciation) generated by the securities in the Accounts.

In the Money Market Account, share values remain constant and the accrued interest income is credited to the Account through the purchase of additional shares.

In the Fixed Interest Account, shares are priced based on the blended crediting rate of the investments in the Account. Performance is calculated based on changes in these prices.

**Figure 17. Accounts in the Supplemental Fund**

<b>Income Share</b>	a balanced portfolio of U.S. common stocks, fixed income, and cash.
<b>Growth Share</b>	an actively managed portfolio of U.S. common stocks.
<b>Common Stock Index</b>	a passively managed portfolio of U.S. common stocks.
<b>International Share</b>	a portfolio of actively, semi-passively, and passively managed non-U.S. stocks.
<b>Bond Market</b>	a portfolio of both actively and semi-passively managed fixed income securities.
<b>Money Market</b>	a portfolio of short-term, liquid debt securities.
<b>Fixed Interest</b>	a portfolio of stable value instruments, including security backed contracts, insurance company investment contracts and bank investment contracts.

## Supplemental Investment Fund

As of July 1, 2009, shares in the SIF Accounts are priced daily for all plans.

The investment returns shown in this report are calculated using a time-weighted rate of return formula. *These returns are net of investment management fees and transaction*

*costs. They do not, however, reflect administrative expenses that may be deducted by the retirement systems to defray administrative costs.*

The distribution of assets in the Supplemental Investment Fund as of June 30, 2009 is shown by Account in Figure 18 and by Plan in Figure 19.

Figure 18. Composition by Account as of June 30, 2009

Figure 19. Participation by Plan as of June 30, 2009

Note: Percentages may differ slightly due to rounding of values.

## Supplemental Investment Fund

### Income Share Account

#### Objective

The investment objectives of the Income Share Account resemble those of the Combined Funds. The Account seeks to earn a high rate of return both from capital appreciation (increases in market value) and current yield (dividends from stock and interest on bonds). The Income Share Account pursues this objective within the constraints of protecting against adverse financial environments and limiting short-run portfolio return volatility.

The SBI invests the Income Share Account in a balanced portfolio of common stocks and fixed income securities with the following long-term asset mix: 60% domestic common stocks, 35% bonds, 5% cash equivalents.

Domestic common stocks provide the potential for significant long-term capital appreciation, while bonds provide both a hedge against deflation and the diversification needed to limit excessive portfolio return volatility.

At the close of fiscal year 2009, the value of the Income Share Account was \$194 million.

#### Management

The Income Share Account's investment management structure combines internal and external management. SBI staff manage the fixed income segment. The common stock segment is managed externally as part of a passively managed index fund designed to track the returns of the Russell 3000 Index. The manager for this portion of the Account is Barclays Global Investors.

#### Performance

As with the other SBI funds which utilize a multi-manager investment structure, the Board evaluates the performance of the Income Share Account on two levels:

- **Total Account.** The Income Share Account is expected to exceed the returns of a composite of market indices weighted in the same proportion as its long-term asset allocation.
- **Individual Manager.** The passive stock manager is expected to closely track the performance of the Russell 3000. The internal bond manager for the Account is expected to exceed the performance of the Barclays Capital Aggregate Bond Index.

The Income Share Account provided a return of -13.5% for fiscal year 2009, exceeding its benchmark by 2.3 percentage points. Over the most recent ten years, the Income Share Account exceeded its benchmark. Figure 20 shows a ten year history of performance results.

Figure 20. Income Share Account FY 2005-2009

## Supplemental Investment Fund

### Growth Share Account

#### Objective

The investment objective of the Growth Share Account is to generate high returns from capital appreciation. To achieve this objective, the Account is invested primarily in U.S. common stock.

At the close of fiscal year 2009, the value of the Growth Share Account was \$81 million.

#### Management

The assets of the Growth Share Account are invested by the external active and semi-passive domestic equity managers. This allocation reflects a more aggressive investment than is available through passive management. The Account may hold a small amount of cash that represents new contributions received prior to their investment in the market and cash that may be held by the individual managers in the Account.

#### Performance

As with the Income Share Account, the Board evaluates the performance of the Growth Share Account on two levels:

— **Total Account.** The Growth Share Account is expected to exceed the returns of the Russell 3000 Index.

— **Individual Manager.**

Performance objectives for the individual managers are described in the **Investment Pools** section of this report.

The Growth Share Account provided a return of -27.1% for the fiscal year, trailing its benchmark by 0.5 percentage point. Individual manager performance relative to their benchmarks was mixed. See the discussion in the Investment Pools

section concerning the Domestic Stock Pool. Over the last ten year period, the Account trailed its benchmark by 0.5 percentage point. A ten year history of performance results is shown in Figure 21.

Figure 21. Growth Share Account FY 2005-2009

	Annualized							
	2005	2006	2007	2008	2009	3 Yr.	5 Yr.	10 Yr.

Benchmark*	8.1	9.6	20.1	-12.7	-26.6	-8.3	-1.8	-1.8

\* Russell 3000 since 10/1/03. 100% Wilshire 5000 Investable from July 1999 to September 2003.

## Supplemental Investment Fund

### Common Stock Index Account

#### Objective

The investment objective of the Common Stock Index Account is to generate returns that track the performance of the broad U.S. common stock market as represented by the Russell 3000 Index. To accomplish this objective, the SBI allocates all the assets of the Account to passively managed domestic stocks. At the end of fiscal year 2009, the Account had a market value of \$197 million.

#### Management

The Account participates in the passive portfolio of the Domestic Stock Pool, which is managed by Barclays Global Investors.

#### Performance

The performance objective of the Common Stock Index Account is to track the performance of the Russell 3000. The SBI recognizes that the Account's returns may deviate slightly from those of the Russell 3000 due to the effects of management fees, trading costs and cash flows.

During fiscal year 2009, the Common Stock Index Account produced a return of -26.4%, which outperformed the Russell 3000 by 0.2 percentage point. Over the most recent ten year period, the Account outperformed the Account benchmark by 0.2 percentage point. Total Account results for the last ten years are shown in Figure 22.

Figure 22. Common Stock Index Account FY 2005-2009

	Annualized							
	2005	2006	2007	2008	2009	3 Yr.	5 Yr.	10 Yr.

\* Russell 3000 since 10/1/03. Wilshire 5000 Investable from 7/1/00 to 9/30/03. Wilshire 5000 through 6/30/00.

## Supplemental Investment Fund

### International Share Account

#### Objective

The investment objective of the International Share Account is to earn a high rate of return by investing in the stock of companies outside the U.S.

Typically, a majority of the Account is invested in the five largest international markets (Japan, United Kingdom, France, Canada and Germany). Most of the remainder is invested in other well established markets in Europe and the Pacific region. In addition, approximately twenty percent of the Account is invested in developing countries or “emerging markets” around the world including those in Latin America, Asia, Eastern Europe, the Middle East and Africa. At the end of fiscal year 2009, the Account had a market value of \$90 million.

#### Management

The structure of the International Share Account combines active, semi-passive, and passive management. Approximately half of the Account is actively managed by several developed and emerging markets stock managers that use a variety of investment styles and approaches. These managers buy and sell stocks in an attempt to maximize market value. The remainder of the Account is passively and semi-passively managed and is designed to consistently track the return of 22 markets included in the Morgan Stanley Capital International Index of the World ex United States, a developed markets index. The Account uses the same managers used by the Combined Funds in the International Stock Pool.

#### Performance

The Board evaluates the performance of the International Share Account on two levels:

— **Total Account.** The International Share Account is expected to exceed the returns of its index, which is the Morgan Stanley Capital International (MSCI) All Country World Index ex-USA (ACWI Free ex-U.S.).

— **Individual Manager.** Performance objectives for the individual managers are described in the **Investment Pools** section of this report.

The International Share Account is expected to exceed the performance of MSCI ACWI Free ex-U.S index, which includes both developed and emerging markets. During

fiscal year 2009, the International Share Account produced a return of -30.8%, which was 0.1 percentage point above the MSCI ACWI ex-U.S. index. Over the most recent ten year period, the International Share Account exceeded its benchmark by 0.4 percentage point.

See the discussion on performance of the international managers in the Investment Pools section of this report. Total Account results for the last ten years are shown in Figure 23.

Figure 23. International Share Account FY 2005-2009

	Annualized							
	2005	2006	2007	2008	2009	3 Yr.	5 Yr.	10 Yr.

\* The International Equity Asset Class Target is MSCI ACWI ex-U.S. (net) since 10/1/03.

## Supplemental Investment Fund

### Bond Market Account

#### Objective

The objective of the Bond Market Account is to earn high rates of return from fixed income securities. The Account is invested primarily in investment-grade government bonds, corporate bonds and mortgage securities with intermediate to long maturities. A small portion of the Account, not expected to exceed ten percent, is invested in below investment grade and non-U.S. securities. The Account is a more conservative investment alternative than the Accounts described in the previous sections. At the end of fiscal year 2009, the market value of the Account was \$96 million.

The Account earns investment returns through interest income and capital appreciation. Because bond prices move inversely with interest rates, the Account entails some risk for investors. However, historically it represents a lower risk alternative than the investment options that include common stocks.

#### Management

The Bond Market Account invests in the Bond Pool used by the Combined Funds. The Bond Pool retains both active and semi-passive managers.

#### Performance

The Board evaluates the performance of the Bond Market Account on two levels:

— **Total Account.** The Account is expected to exceed the returns of the Barclays Capital Aggregate Bond Index.

— **Individual Manager.**

Performance objectives for the individual managers are described in the **Investment Pools** section of this report.

The Bond Market Account is expected to exceed the performance of the bond market, as represented by the Barclays Capital Aggregate Bond Index. For fiscal year 2009, the Account underperformed by 3.6 percentage points. For the most recent ten year period, the Account trailed its benchmark by 0.3 percentage point. See the discussion regarding bond manager performance in the Investment Pools section. Total Account results for the last ten years are shown in Figure 24.

Figure 24. Bond Market Account FY 2005-2009

Barclays Capital Agg.	6.8	-0.8	6.1	7.1	6.0	6.4	5.0	6.0

## Supplemental Investment Fund

### Money Market Account

#### Objective

The Money Market Account invests solely in short-term, liquid debt securities backed by the U.S. Treasury. The Account's investment objectives are to preserve capital and offer competitive money market returns. At the end of fiscal year 2009, the Money Market Account had a market value of \$174 million.

#### Management

The Account uses the same cash manager as the Combined Funds, which is State Street Bank & Trust Company.

#### Performance

The Account is expected to produce returns competitive with those available from short-term debt securities. The Money Market Account exceeded that target in fiscal year 2009 by 0.7 percentage point. Over the most recent ten year period, the Account exceeded its target by 0.4 percentage point. Total Account results for the last ten years are shown in Figure 25.

Figure 25. Money Market Account FY 2005-2009

3 Month T-Bills	2.2	4.1	5.1	3.1	0.6	2.9	3.0	3.1

## Supplemental Investment Fund

### Fixed Interest Account

#### Objective

The investment objectives of the Fixed Interest Account are to protect investors from loss of their original investment and to provide competitive interest rates using somewhat longer-term investments than typically found in a money market account. At the end of fiscal year 2009, the Account totaled \$95 million.

#### Management

The assets in the Account are invested primarily in well-diversified portfolios of high-quality investment grade fixed income securities. The Account also invests in investment contracts issued by banks and insurance companies, including non-U.S. financial institutions, that provide principal protection for the diversified bond portfolios regardless of daily market changes. Instruments in the Account typically have maturities of 2 to 4 years. Performance reflects the blended interest rate available from all investments in the pool along with any cash held for liquidity purposes.

The manager for the Account is Galliard Capital Management, a unit of Wells Fargo Bank.

Performance results for the Fixed Interest Account are shown in Figure 26.

#### Performance

The Fixed Interest Account is expected to exceed the returns of its custom benchmark, the 3-year Constant Maturity Treasury plus 45 basis points (0.45%). During fiscal year 2009, the Fixed Interest Account provided a return of 4.7%, which was 2.6 percentage points above its benchmark. Over the

most recent ten year period, the Fixed Interest Account exceeded its benchmark by 1.0 percentage point.

Benchmark*	3.8	5.0	5.1	3.5	2.1	3.6	3.9	4.1

\* 3 Year Constant Maturity Treasury plus 45 basis points.

## **State Deferred Compensation Plan (457b Plan)**

***The State Deferred Compensation Plan (Plan) provides public employees with a tax-sheltered retirement savings program that is a supplemental plan to their primary retirement plan. (In most cases, the primary plan is TRA, PERA, or MSRS.) On June 30, 2009 the market value of the State Deferred Compensation Plan was \$3.1 billion.***

### **Program Structure**

The State Deferred Compensation Plan offers plan participants three sets of investment options. The first is a set of actively managed options that includes six mutual funds, a money market account, and a fixed interest account option. The second is a set of five passively managed mutual funds. The third is a mutual fund window which offers hundreds of funds. The SBI has no direct management responsibilities for funds within the mutual fund window.

#### **Actively Managed Options**

The Plan offers a range of actively managed options that allows participants the flexibility to create an investment program that satisfies their needs.

#### **Large-Cap Equity**

One option is a concentrated fund of large cap stocks. The fund is expected to outperform the S&P 500 over time. Currently, Janus Twenty is the mutual fund offered.

Another option is a diversified portfolio of large cap stocks that is expected to outperform the S&P 500 over time. Currently, Legg Mason Partners Appreciation I is the mutual fund offered.

#### **Small-Cap Equity**

This option invests primarily in companies with small market capitalizations. The fund is expected to outperform the Russell 2000 over time. T. Rowe Price Small-Cap Stock Fund is the fund currently offered.

#### **Balanced Fund**

This option is a mix of stocks and bonds in the same fund. The fund invests in mid to large-cap stocks and in high quality bonds. The fund is expected to outperform a weighted benchmark of 60% S&P 500 and 40% Barclays Capital Aggregate. The fund currently offered is the Dodge & Cox Balanced Fund.

#### **Bond Fund**

This option invests primarily in investment grade securities in the U.S. bond market. The fund is expected to outperform the Barclays Capital Aggregate over time. The fund currently offered is the Dodge & Cox Income Fund.

#### **International Equity**

This option invests primarily in stocks of companies in developed countries located outside the United States. The fund is expected to outperform the Morgan Stanley Capital International (MSCI) Index of

Europe, Australasia and the Far East (EAFE) over time. The fund currently offered is the Fidelity Diversified International Fund.

#### **Money Market**

This option invests in short-term U.S. Treasury and agency debt instruments and is expected to outperform the return on three month U.S. Treasury bills. This option is the SIF Money Market Account invested by State Street Bank & Trust.

#### **Fixed Interest**

This option is invested in the SIF Fixed Interest Account which is a well-diversified portfolio of high-quality fixed income securities with strong credit ratings. The option also invests in contracts issued by highly rated insurance companies and banks which are structured to provide principal protection for the option's diversified bond portfolios, regardless of daily market changes.

In March 2008 the SBI merged the Minnesota Fixed Fund into this option. The investment contracts with Great-West Life, Minnesota Life and Principal Life were absorbed into the Fixed Interest portfolio.

## **State Deferred Compensation Plan (457b Plan)**

The option is expected to outperform the return of the three year Constant Maturity Treasury plus 45 basis points (0.45%), over time. Currently, Galliard Capital Management, Inc. manages the option.

### ***Passively Managed Options***

The plan offers a range of passively managed options that allows participants the flexibility to create an investment program that satisfies their needs.

#### ***Large-Cap Equity***

This option is a passive domestic stock portfolio that tracks the S&P 500. The fund currently offered is the Vanguard Institutional Index Plus Fund.

#### ***Mid-Cap Equity***

This option invests in companies with medium market capitalizations that track the MSCI U.S. Midcap 450 index. The fund currently offered is the Vanguard Mid Capitalization Index Institutional Fund.

#### ***Balanced Fund***

This option is a mix of stocks and bonds. The fund is expected to track a weighted benchmark of 60% MSCI U.S. Broad Market Index and 40% Barclays Capital Aggregate Bond Index. The fund currently offered is the Vanguard Balanced Index Fund.

#### ***Bond Fund***

This option invests in a broad range of U.S. fixed income securities. The fund is expected to track the performance of the Barclays Capital Aggregate

Bond Index. The fund currently offered is the Vanguard Total Bond Market Index Fund.

#### ***International Equity***

This option invests in international equities and is expected to track the MSCI index of Europe, Australasia and the Far East (EAFE). The fund currently offered is the Vanguard Institutional Developed Market Fund.

Performance results for the mutual fund investment options for fiscal year 2009 are shown in Figure 27.

(1) Returns do not include the MSRS administrative fee.

(2) Since retention by SBI. Vanguard Mid-Cap Index Fund retained January 2004; Legg Mason, Vanguard Inst. Dev. Mkt., Vanguard Balanced, Vanguard Total Bond Mkt. retained December 2003; Dodge & Cox Balanced Fund retained in October 2003; all others, July 1999.

## Assigned Risk Plan

**The Minnesota Workers Compensation Assigned Risk Plan was established in 1983 to provide workers' compensation coverage to Minnesota employers rejected by a private insurance carrier. On June 30, 2009, the market value of the Plan's portfolio was \$303 million.**

The Assigned Risk Plan operates as a non-profit, tax-exempt entity and is administered by the Department of Commerce. The Plan provides disability income, medical expenses, retraining expenses and death benefits, with payments being made either periodically or in lump sum.

### Investment Objectives

The SBI recognizes that the Assigned Risk Plan has limited tolerance for risk due to erratic cash flows, no allowance for surplus, and generally short duration liabilities.

Therefore, the SBI has established two investment objectives for the Plan:

- to minimize mismatch between assets and liabilities
- to provide sufficient liquidity (cash) for payment of on-going claims and operating expenses

Performance relative to these objectives is measured against a composite index that reflects the asset allocation of the portfolio.

### Asset Allocation

The SBI believes that due to the uncertainty of premium and liability cash flows, the Plan should be invested very conservatively.

The **bond** segment is invested to fund the shorter-term liabilities (less than 10 years) and the common stock segment is invested to fund the longer-term liabilities. The result is a high fixed income allocation which minimizes the possibility of a future fund deficit. The smaller **stock** exposure provides higher expected returns and hedges some of the inflation risk associated with the liability stream.

The asset allocation may fluctuate in response to changes in the liability stream projected by the Plan's actuary and further analysis by the SBI staff.

Figure 28 presents the actual asset mix of the Assigned Risk Plan at the end of fiscal year 2009. The current long term asset allocation targets for the Plan are as follows:

Domestic Stocks	20%
Domestic Bonds	80

### Investment Management

Voyageur Asset Management manages the bond segment of the Assigned Risk Plan, and GE Asset Management manages the equity segment of the Plan.

### Bond Segment

The bond segment is designed to fund the shorter-term liabilities of the Plan with a target duration of 3 years. The segment is actively managed to add incremental value through sector, security, and yield curve decisions.

Figure 28. Assigned Risk Plan Asset Mix as of June 30, 2009

Note: Percentages may differ slightly due to rounding of values.

## Assigned Risk Plan

### Stock Segment

The stock segment is structured to fund the longer-term liabilities of the Plan. Currently, the equity segment is managed with a broadly diversified portfolio of high quality, large capitalization companies.

### Investment Performance

Due to the focus on liability matching, the composition of the Assigned Risk Plan's investment portfolio is conservatively structured. While active management is utilized, return enhancement plays a secondary role.

The Assigned Risk Plan is measured against a composite index which is weighted to reflect the asset allocation of the Plan:

- the target for the fixed income component is a custom benchmark which reflects the duration target established for the bond segment (approximately 3 years).
- the target for the equity component is the S&P 500.

During fiscal year 2009, the **bond** segment underperformed its benchmark by 5.6 percentage points. An overweight to the mortgage-backed securities sector was the primary contributor to the fiscal year underperformance. The **stock** segment outperformed its benchmark by 4.7 percentage points.

**Overall**, the Assigned Risk Plan provided a return of -3.4% for fiscal year 2009, trailing its composite index by 2.9 percentage points. For the most recent ten year period, the Account underperformed its composite index by 0.7 percentage point.

Historical performance results are presented in Figure 29.

Figure 29. Assigned Risk Plan Performance FY 2005-2009

	Annualized							
	2005	2006	2007	2008	2009	3 Yr.	5 Yr.	10 Yr.

Benchmark	4.9	0.2	5.7	8.6	6.7	7.0	5.2	5.7

\* Weighted 20% stocks, 80% bonds.

## Permanent School Fund

**The Permanent School Fund is a trust fund created by the Minnesota State Constitution and designated as a long-term source of revenue for public schools. Proceeds from land sales, mining royalties, timber sales, lake shore and other leases are invested in the Fund. Income generated by the Fund's assets is used to offset state school aid payments. On June 30, 2009, the market value of the Fund was \$614 million.**

### Investment Objective

The State Board of Investment invests the Permanent School Fund to produce a growing level of spendable income, within the constraints of maintaining adequate portfolio quality and liquidity, that will assist in providing state aid to schools.

### Investment Constraints

The Fund's investment objectives are influenced by the legal provisions under which its investments must be managed. These provisions require that the Fund's principal remain inviolate. Any net realized capital gains from stock or bond investments must be added to the principal. Moreover, if the Fund realizes net

capital losses, these losses must be offset against interest and dividend income before such income can be distributed. Finally, all interest and dividend income must be distributed in the year in which it is earned.

### Asset Allocation

In order to produce a growing level of spendable income, the Fund is invested to grow over time, and, therefore, has exposure to equities. The current asset allocation is 50% stock/48% fixed income/2% cash.

Prior to FY 1998, the Permanent School Fund had been invested entirely in fixed income securities for more than a decade. While this

asset allocation maximized current income, it limited the long term growth of the Fund and caused the income stream to lose value in inflation adjusted terms, over time.

To solve both issues, a proposal to introduce equities to the Fund's asset mix was discussed. Since this modification would reduce short term income and have budgetary implications for the state, the consent of the executive and legislative branches was necessary.

A proposal to introduce equities was presented during fiscal year 1997. It was favorably received by the Legislature and incorporated into the K-12 education finance bill. As a result, the Fund allocation was shifted to a 50% stock/48% fixed income/2% cash allocation during July 1997.

Figure 30 presents the actual asset mix of the Permanent School Fund at the end of fiscal year 2009.

**Figure 30. Permanent School Fund Asset Mix as of June 30, 2009**

Note: Percentages may differ slightly due to rounding of values.

### Investment Management

SBI staff internally manages all assets of the Permanent School Fund. Given the unique constraints of the Fund, management by SBI staff is considered to be the most cost effective at this time.

## Permanent School Fund

### Stock Segment

The stock segment of the Fund is passively managed to track the performance of the S&P 500.

### Bond Segment

The bond segment is actively managed to add incremental value through sector, security and yield curve decisions and its performance is measured against the Barclays Capital Aggregate Bond Index.

### Investment Performance

The **stock** segment of the Permanent School Fund outperformed its benchmark, the S&P 500, by 0.3 percentage point during the fiscal year. By investing in all of the stocks in the benchmark at their index weighting, the segment attempts to track the benchmark return on a monthly and annual basis. The portfolio is periodically rebalanced to maintain an acceptable tracking error relative to the benchmark.

The **bond** segment outperformed its benchmark by 2.5 percentage points during the current fiscal year.

**Overall**, the Permanent School Fund provided a return of -9.3% for fiscal year 2009, outperforming its composite index by 1.9 percentage points.

Total account results for the last three, five and ten years are shown in Figure 31.

### Spendable Income

Spendable income generated by the portfolio over the last five fiscal years is shown below:

Fiscal Year	Millions
2005	\$19
2006	\$22
2007	\$25
2008	\$28
2009	\$27

## Environmental Trust Fund

**The Environmental Trust Fund was established in 1988 by the Minnesota Legislature to provide a long-term, consistent and stable source of funding for activities that protect and enhance the environment. On June 30, 2009, the market value of the Fund was \$402 million.**

By statute, the State Board of Investment invests the assets of the Environmental Trust Fund. The Legislature funds environmental projects from a portion of the market value of the Fund.

### Investment Objective

The Environmental Trust Fund's investment objective is long-term growth in order to produce a growing level of spending within the constraints of maintaining adequate portfolio quality and liquidity.

### Investment Constraints

A constitutional amendment passed in November 1998 continues the mandate that 40 percent of the net proceeds from the state lottery be credited to the Fund through 2025.

The amendment provides for spending 5.5 percent of the Fund's market value annually. The amendment eliminated accounting restrictions on capital gains and losses and the provision that the principal must remain inviolate.

### Asset Allocation

After the constitutional amendment was adopted in November 1998, SBI staff worked with the Legislative Citizen Commission on Minnesota Resources to establish an asset allocation policy that is consistent with the Commission's goals for spending and growth of the Fund. The SBI uses a 70% stock, 28%

fixed income and 2% cash asset allocation for the Fund. The allocation positions the Fund for the best long-term growth potential while meeting the objective of the Fund to produce a growing level of spending.

Figure 32 presents the actual asset mix of the Fund at the end of fiscal year 2008. The current long term asset allocation targets for the Fund are:

Domestic Stocks	70%
Domestic Bonds	28
Cash	2

### Investment Management

SBI staff internally manages all assets of the Environmental Trust Fund. Given the unique constraints of the Fund, management by SBI staff is considered to be the most cost effective at this time.

### Stock Segment

The stock segment of the Fund is passively managed to track the performance of the S&P 500.

### Bond Segment

The bond segment is actively managed to add incremental value through sector, security and yield curve decisions and its performance is measured against the Barclays Capital Aggregate Bond Index.

Figure 32. Environmental Trust Fund Asset Mix as of June 30, 2009

Note: Percentages may differ slightly due to rounding of values.

## Environmental Trust Fund

### Investment Performance

During the fiscal year, the **stock** segment outperformed its S&P 500 benchmark by 0.4 percentage point. By investing in all of the stocks in the benchmark at their index weighting, the segment attempts to track the benchmark return on a monthly and annual basis. The portfolio is periodically rebalanced to maintain an acceptable tracking error relative to the benchmark subject to keeping trading costs at a minimum.

The **bond** segment outperformed its benchmark by 2.3 percentage points during the fiscal year.

**Overall**, the Environmental Trust Fund provided a return of -15.6% for fiscal year 2009, outperforming its composite index by 1.8 percentage points. For the most recent three-year period, the Fund exceeded its composite benchmark by 0.7 percentage point. The Fund experienced modest outperformance over the last five and ten years due to the incremental value added by both the stock and bond segments.

Performance results are presented in Figure 33.

Spendable income generated by the Fund over the last five fiscal years is shown below:

Fiscal Year	Millions
2005	\$15
2006	\$19
2007	\$19
2008	\$22
2009	\$23

## Closed Landfill Investment Fund

**The Closed Landfill Investment Fund is a trust fund created by the Legislature to invest money to pay for the long-term costs of maintaining the integrity of landfills in Minnesota once they are closed. On June 30, 2009 the market value of the Fund was \$37.7 million.**

### Investment Objective

The investment objective of the Closed Landfill Investment Fund is to generate high returns from capital appreciation. The Fund will be used by the Commissioner of the Pollution Control Agency to pay for the long-term costs of maintaining the integrity of landfills in Minnesota once they are closed. By statute, the assets of the Fund are unavailable for expenditure until after fiscal year 2020.

### Asset Allocation

Since July 1999, the Closed Landfill Investment Fund has been invested entirely in common stock. Given the long time horizon of this Fund and the lack of need for any short or mid-term withdrawals, this strategy will maximize the long-term gain of the Fund.

### Investment Management

SBI staff internally manages all assets of the Closed Landfill Investment Fund. The assets are managed to passively track the performance of the S&P 500 index.

### Investment Performance

The Closed Landfill Investment Fund outperformed its benchmark, the S&P 500, by 0.4 percentage point during the fiscal year. By investing in all the stocks in the benchmark at their index weighting, the segment attempts to track the benchmark return on a monthly and annual basis. Performance results are shown in Figure 34.

Figure 34. Closed Landfill Fund FY2005-2009

S&P 500	6.3	8.6	20.6	-13.1	-26.2	-8.2	-2.2	-2.3

## Cash Management and Related Programs

**The State Board of Investment manages the cash balances in more than 400 state agency accounts with the objectives of preserving capital and providing competitive money market returns. On June 30, 2009, the total value of these accounts was \$5.4 billion.**

### Internal Cash Pools

The SBI invests these cash accounts in short-term, liquid, high quality debt securities on a non-leveraged basis. These investments can include U.S. Treasury and Agency issues, repurchase agreements, bankers acceptances, high grade corporates, and commercial paper. On June 30, 2009, the combined value of all agency cash balances was \$5.4 billion.

#### Pool Structure

Most of the cash accounts are managed by SBI staff through two pooled investment vehicles, which operate much like money market mutual funds:

- **Treasurer's Cash Pool.** This pool contains cash balances from the Invested Treasurer's Cash and other accounts necessary for the operation of state agencies. The Treasurer's Cash Pool had an average daily balance of \$4.97 billion during the year.
- **Trust Fund Pool.** This pool contains cash balances of trust fund and retirement-related accounts that are managed internally. The Trust Fund Pool had an average daily balance of \$84.7 million during the year.

Staff also manages approximately \$500 million of assets in separately managed dedicated accounts because of special legal restrictions. The vast majority of these assets are

related to state or state agency debt issuance including debt service reserves and proceeds.

#### Investment Performance

The SBI measures the performance of both pools against customized benchmarks which reflect the maturity structure of each pool.

For fiscal year 2009, the Trust Fund Pool matched its benchmark and the Treasurer's Cash Pool outperformed its benchmark. Both pools outperformed the total return on 3 Month Treasury Bills.

<b>Trust Fund Pool</b>	<b>0.9%</b>
Benchmark	0.9
<b>Treasurer's Cash Pool</b>	<b>2.9</b>
Benchmark	0.9
3 Month Treasury Bills	0.6

Since January 1997, the Trust Fund Pool is measured against the iMoneyNet's All Taxable Money Fund Index.

Since January 2003, the Treasurer's Cash Pool is measured against the iMoneyNet's All Taxable Money Fund Index.

#### Treasurer's Cash Pool

On June 30, 2009, the Treasurer's Cash Pool was dominated by high quality corporate commercial paper holdings. The composition of the pool is shown in Figure 35. At the end of the fiscal year, the pool had a current yield of 1.38% and an average maturity of 205 days.

Figure 35. Invested Treas. Cash Fund Distribution as of June 30, 2009

Note: Percentages may differ slightly due to rounding of values.

## ***Cash Management and Related Programs***

### ***Securities Lending Program***

The SBI participates in securities lending programs in which securities held by the SBI are loaned to banks and security dealers for a daily fee. These loans are fully collateralized. Currently, the majority of the SBI's securities lending activity is undertaken by the SBI's master custodian bank, State Street Bank and Trust. State Street Bank generated additional income of approximately \$60.3 million during fiscal year 2009.

An additional lending program began during fiscal year 2000 with Wells Fargo (custodian for the Treasurer's Cash Pool.) This program generated additional income of approximately \$372 thousand during fiscal year 2009.

### ***Certificate of Deposit Program***

The SBI manages a certificate of deposit (CD) program in which it purchases CD's from Minnesota financial institutions. The SBI receives a market rate of return on these investments, using the average secondary CD market rate quoted by the New York Federal Reserve Bank.

The SBI's Certificate of Deposit program provides a reliable source of capital to Minnesota financial institutions, regardless of size, many of which do not have access to the national CD market. The Board designed the program so that no single institution is favored in the allocation of assets. Only the cash reserves of the retirement funds are used in the program.

During fiscal year 2009, the SBI purchased over \$209.7 million of CD's from Minnesota financial institutions. Since it began the program in 1980, the SBI has purchased over \$5 billion of CD's from approximately 500 financial institutions throughout the state.

### ***Securities Repurchase Program***

In recent years, community banks throughout Minnesota have experienced an increased need for funds due to a reduction in local deposits and a reduced ability to sell investments held in bank portfolios due to changes in federal accounting requirements. The SBI created the Securities Repurchase Program to help meet the increased needs of banks throughout the state.

Under the program, the SBI temporarily buys securities such as Treasuries and Governments from banks under a repurchase agreement (repo). At the end of the agreement period, the securities are returned to the selling banks (i.e. "repurchased") and the bank pays the SBI principal and interest.

The transactions are fully collateralized and range in size from \$100,000 to \$2 million per institution. For ease of administration, the program uses the same rates, offering dates and maturity dates as the SBI's CD program.

During fiscal year 2009, the SBI purchased \$15 million in repos from Minnesota financial institutions.

## Other Deferred Compensation and Long Term Savings Programs

In addition to the statewide 457b plan, the SBI has responsibilities for several other deferred compensation-related and long term savings programs:

- The SBI approves investment product providers for the Minnesota State Colleges and Universities (MnSCU) and the Minnesota Historical Society for their IRC 401(a) defined contribution retirement plans.
- The SBI is responsible for selecting the investment provider for the Minnesota College Savings Plan. The Minnesota Office of Higher Education (MOHE) is responsible for the overall administration of the MN College Savings Plan (529 Plan).

The investment product providers currently used by these programs are shown in Figure 36.

**Figure 36. Investment Product Providers Selected or Approved by the SBI**

## Major Policy Initiatives

### Legislative Update

Several bills of interest to the SBI were passed during the 2009 legislative session.

Laws of Minnesota 2009, Chapter 90 requires the SBI to take a series of steps to identify companies that do business in Iran, communicate with those companies, and divest stock over a specified period of time if the companies continue their business activities in Iran.

Laws of Minnesota 2009, Chapter 169, Section 9 creates a statewide voluntary plan for local relief associations. Local relief associations may choose to join the statewide plan which will be trustee by PERA. Investments will be in a new account in the Supplemental Investment Fund. The plan is effective August 1, 2009. The SBI must establish a new SIF account and determine its asset allocation and create a procedure to evaluate the assets of each volunteer fire plan that seeks to join the plan.

Laws of Minnesota 2009, Chapter 36, Article 3, Section 5 creates the Stillwater Lift Bridge trust fund. The SBI will invest the assets of the trust upon consultation with the commissioner of transportation. Only a modest amount of assets will be committed to the trust fund in fiscal 2010.

As a result of legislation passed in 2008, the Post Retirement Investment Fund was merged with the Basic Funds. As of June 30, 2009, the Post Fund no longer exists, and the SBI invests the assets of the retirement systems in the Combined Funds. Laws of Minnesota 2009, Chapter 169, Article 1 repeals several sections in Chapter 11A that dealt with the Post Fund.

### Police and Fire Fund Activity

#### Mergers with PERA

Under state law, local police and salaried firefighter plans may consolidate with the Public Employees Retirement Association (PERA). When a merger is approved, assets are transferred from the local plan to the State Board of Investment (SBI).

By statute, the Executive Director of the SBI has authority to accept assets in-kind or to require that individual holdings be converted to cash prior to the transfer. Since the investments made by local plans are similar to those made by the SBI, most assets can be transferred at their stated market value.

Since 1987, 44 plans with total assets of \$603 million have merged with PERA. After consolidation, these assets are managed as part of the Basic and Post Retirement Funds. (Please note that there remain several local police salaried firefighter plans that have not merged with PERA. These plans also have the statutory authority to invest in the Supplemental Investment Fund (SIF).)

#### Volunteer Fire Plans Investment

Volunteer firefighter retirement plans are not eligible to be consolidated with PERA. They may invest their assets with the SBI through the Supplemental Investment Fund. There are more than 700 local volunteer firefighter plans with investment authority.

As of the end of fiscal year 2009, there were 235 plans participating in the SIF.

The number of volunteer firefighter plans that may select the SBI in

the future will be affected by the creation of the new voluntary statewide plan.

#### Local Plan Performance Reports

The SBI provides the local plans that participate in the SIF reports displaying their annual returns and market values from the SIF in compliance with *Minnesota Statutes*, Chapter 356. The local plans are responsible for providing their specific data to the Office of the State Auditor.

### Other Post Employment Health Benefits

Under the provisions of Laws of Minnesota 2008, Chapter 154, Article 10, section 8, local units of government including school districts may choose PERA as trustee to administer post employment health benefits. Assets of these accounts are invested by the SBI in the same internally managed investment pools in which the Permanent School Fund and Environmental Trust Fund are invested.

As of June 30, 2009, there were 19 entities that have these investment accounts with the SBI. Staff anticipate that the number of these accounts will increase in the future.

The SBI is required to report annually the returns provided on assets invested by the City of Duluth for this purpose. Duluth made its first investment with the SBI July 2007. As of June 30, 2009, returns for Duluth were as follows:

	1 Yr.	2 Yr.
Equities	-25.8 %	-19.7%
Fixed Income	8.3	7.6
Total	-7.4	-5.3

# Major Policy Initiatives

## Mandate on Northern Ireland

### Requirements

The SBI is responsible for implementing certain statutory provisions concerning its investments in U.S. companies with operations in Northern Ireland. The statute requires the State Board of Investment (SBI) to:

- Annually compile a list of U.S. corporations with operations in Northern Ireland in which the SBI invests.
- Annually determine whether those corporations have taken affirmative action to eliminate religious or ethnic discrimination. The statute lists nine goals modeled after the MacBride Principles.
- Sponsor, co-sponsor and support resolutions that encourage U.S. companies to pursue affirmative action in Northern Ireland, where feasible.

The statute does not require the SBI to divest existing holdings in any companies and does not restrict future investments by the SBI.

### Implementation

The SBI uses the services of RiskMetrics Group, Washington D.C., to monitor corporate activity in Northern Ireland. In January 2009, the SBI held stocks or bonds in 64 of 69 corporations identified by RiskMetrics as having operations in Northern Ireland.

### Shareholder Resolutions

The SBI filed shareholder resolutions at four companies for the 2009 proxy season. The resolutions asked the corporations to sign the MacBride Principles and to implement affirmative action programs. The proposal filed at TJX Cos. was withdrawn after the company endorsed the Principles. The voting results for the three remaining proposals are shown below.

BE Aerospace	7.6%
Crane Company	8.6%
Manpower	11.5%

## Major Policy Initiatives

### Tobacco Issues

At its September 1998 meeting, the Board adopted a resolution that required each active and semi-passive equity manager to divest by September 2001 shares of any company which obtained more than 15 percent of its revenues from the manufacture of consumer tobacco products. Staff notified each active and semi-passive equity manager of the policy.

At the close of fiscal year 2001, the SBI had divested from its active portfolios all shares of companies covered by its divestment resolution.

#### **Directives to Stock Managers**

At its December 1997 meeting, the Board adopted a resolution requiring the SBI's stock managers to provide written justification to SBI staff if a manager made new or additional purchases of stock in companies which obtained more than 50% of their revenues from the sale of tobacco.

At its June 1998 meeting, the Board took further action regarding SBI investment in tobacco-related stocks.

The first resolution required the SBI active and semi-passive equity managers to discontinue purchases of shares of any company that generated more than 15 percent of its revenue from the manufacture of consumer tobacco products. The second resolution required the SBI staff to prepare and submit to the Board a plan for divestiture of shares of any company that generated more than 15 percent of its revenue from the manufacture of consumer tobacco products held in the SBI's actively and semi-passively managed equity portfolios. The

policy requiring divestment follows directly from the latter resolution.

#### **Shareholder Resolutions**

In previous years, the SBI cosponsored a number of tobacco related shareholder resolutions. The SBI chose not to cosponsor any tobacco related resolutions for the 2009 proxy season.

### Pharmaceutical Company Issues

At its March 2004 meeting the State Board of Investment adopted a resolution authorizing a shareholder proposal to pharmaceutical companies. The Board's resolution directed the Proxy Committee to sponsor, cosponsor or support shareholder resolutions at six pharmaceutical companies concerning pricing of and access to prescription drugs, and legal issues surrounding the limiting of products to Canadian wholesalers.

At its September 2004 meeting the Board approved a recommendation from the Proxy Committee to submit a resolution concerning access to drugs from Canada. The resolution, which requested the target company to report to its shareholders on the issue, was sent to four domestic pharmaceutical companies for placement in the companies' 2005 proxy materials.

#### **Shareholder Resolutions**

In November 2005 and 2006, the Proxy Voting Committee approved the resubmission of the same resolution to the same four companies: Eli Lilly and Company; Merck & Co., Inc.; Pfizer; and Wyeth.

For the 2007 proxy season, Eli Lilly, Merck and Pfizer each received permission from the SEC to omit the resolution from its proxy materials. Wyeth accepted the submission and placed the resolution in its 2007 proxy materials. The resolution received 29.3% affirmative vote.

For the 2008 proxy season, the Proxy Voting Committee approved the resubmission of the same proposal to the same four companies. All four companies received approval from the SEC to omit the proposal.

The Committee chose not to submit proposals for the 2009 proxy season.

### Sudan Issues

Laws of Minnesota 2007, Chapter 117 concerns the SBI's investment in companies with operations in Sudan. The legislation calls for the SBI to make its best efforts to identify all "scrutinized companies" in which the SBI has direct or indirect holdings or could possibly have holdings in the future.

The SBI has adopted use of the list of companies from the Sudan Divestment Task Force for implementing the 2007 law. Staff periodically sends a list of restricted Sudan companies to managers and has required divestment of holdings in compliance with Chapter 117. Staff reports to the Board each quarter on its actions to implement the law. With the reorganization of the Sudan Divestment Task Force into the Conflict Risk Network, staff receives Sudan information from the Conflict Risk Network.

## Major Policy Initiatives

### Proxy Voting

As a stockholder, the State Board of Investment (SBI) is entitled to participate in corporate annual meetings through direct attendance or casting its votes by proxy. Through proxy voting, the Board directs company representatives to vote its shares in a particular way on resolutions under consideration at annual meetings. These resolutions range from routine issues, such as those involving the election of corporate directors and ratification of auditors, to matters such as merger proposals and corporate social responsibility issues. In effect, as a shareholder the SBI can participate in shaping corporate policies and practices.

#### Voting Process

The Board recognizes its fiduciary responsibility to cast votes on proxy issues. Except for the shares held by the international managers, the SBI does not delegate the duty to its external investment managers. Rather, the SBI actively votes all shares according to guidelines established by its Proxy Committee.

The Board delegates proxy voting responsibilities to its Proxy Committee which is comprised of a designee of each Board member. The four member Committee meets only if it has a quorum and casts votes on proxy issues based on a majority vote of those present. In the unusual event that it reaches a tie vote or a quorum is not present, the Committee will cast a vote to abstain.

### Voting Guidelines

The Committee has formulated guidelines by which it votes on a wide range of corporate governance and social responsibility issues. Each year the Proxy Committee reviews existing guidelines and determines which issues it will review on a case-by-case basis.

#### Corporate Governance Issues

The voting guidelines for major corporate governance issues are summarized below:

##### Routine Matters

In general, the SBI supports management on routine matters such as uncontested election of directors; selection of auditors; and limits on director and officer liability or increases in director and officer indemnification permitted under the laws of the state of incorporation.

##### Shareholder Rights Issues

In general, the SBI opposes proposals that would restrict shareholder ability to effect change. Such proposals include instituting super-majority requirements to ratify certain actions or events; creating classified boards; barring shareholders from participating in the determination of the rules governing the board's actions (e.g. quorum requirements and the duties of directors); prohibiting or limiting shareholder action by written consent; and granting certain stockholders superior voting rights over other stockholders.

In general, the SBI supports proposals that preserve or enhance shareholder rights to effect change. Such proposals include requiring

shareholder approval of poison pill plans; repealing classified boards; adopting secret ballot of proxy votes; reinstating cumulative voting; and adopting anti-greenmail provisions.

#### Executive Compensation

In general, the SBI supports efforts to have boards of directors comprised of a majority of independent directors, to have compensation committees made up entirely of independent directors, and to have executive compensation linked to a company's long-term performance.

#### Buyout Proposals

In general, the SBI supports friendly takeovers and management buyouts.

#### Special Cases

The Proxy Committee evaluates hostile takeovers, contested election of directors, and re-capitalization plans on a case-by-case basis.

#### Social Responsibility Issues

The voting guidelines for major social responsibility issues are shown below:

##### Northern Ireland

The SBI supports resolutions that call for the adoption of the MacBride Principles as a means to encourage equal employment opportunities in Northern Ireland.

##### Tobacco and Liquor

In general, the SBI supports a variety of tobacco and liquor related resolutions including those that call for corporations to limit their promotion of tobacco and liquor products and to report on their involvement in tobacco issues.

## Major Policy Initiatives

### Environmental Protection

In general, the SBI supports resolutions that require a corporation to report or disclose to shareholders company efforts in the environmental arena. In addition, the SBI supports resolutions that request a corporation to report on progress toward achieving the objectives of the Ceres Principles (formerly known as the Valdez Principles,) an environmental code of conduct for corporations.

### Other Social Responsibility Issues

In general, the SBI supports proposals that require a company to report or disclose to shareholders company efforts concerning a variety of social responsibility issues. In the past, these reporting resolutions have included issues such as affirmative action programs, animal testing procedures and nuclear plant safety procedures.

### Summary of FY 2009 Proposals

During fiscal year 2009 the SBI voted proxies for approximately 1,500 U.S. corporations.

As in past years, the issues on corporate ballots included a broad range of proposals in the *corporate governance* area, as reflected in information provided by RiskMetrics Group, Washington, D.C.:

— Shareholders submitted 45 proposals requesting majority vote to elect directors. This proposal received an average support of 58.4%.

— Shareholders submitted 30 proposals requesting that companies have an independent board chairman. The proposal received average support of 36.7%.

— Resolutions requesting an advisory vote on executive pay were on 69 ballots with an average support of 45.4%.

— Other proposals included the repeal of classified boards which were supported by an average of 65.1% of shares voted; proposals to require retention period for stock awards received support from an average of 26.2% of shares voted; cumulative voting which was supported by an average of 34.7% of shares voted; proposals to rescind supermajority approval requirements received average support of 67.2% of shares voted.

In the *social responsibility* area, the environment, global labor standards, fair employment issues, health care reform, and political giving were the major issues, as reflected in information provided by RiskMetrics:

— A variety of environmental issues received 36 resolutions and received average support ranging from 8.4% to 19.3%.

— Reporting on political contributions received 32 proposals with an average support level of 29.2%.

— Equal employment issues received 10 resolutions with an average support of 33.8%.

— Human rights issues received 16 resolutions with an average support range of 4.1% to 19.9%.

— Global Labor Standards received 4 proposals this year with an average support of 15.3%.

— Healthcare reform issues received 21 proposals with an average support of 5.4%.

## Major Policy Initiatives

### Guidelines on International Investing

As noted in prior sections of this report, the State Board of Investment (SBI) made its first international stock investments in 1992. The benefits of international investing include: increased investment opportunity, greater diversification and potential for higher return. Approximately one-half of the world's markets, by market capitalization, lie outside the U.S.

The United Kingdom, Japan, France and Canada comprise more than half of the value of the international markets. Together with eighteen (18) other countries in Europe, and the Pacific Basin, these countries comprise the developed international stock markets. Many of the emerging markets in Latin America, Eastern Europe, the Middle East, Africa and Asia may require special investment considerations and/or limitations on investment.

### Guidelines

Based on information compiled from U.S. State Department reports, countries are grouped into three broad categories as indicated below by groups I, II and III. *It is important to note that the guidelines listed below do not prohibit an active stock manager from purchasing the stock of any country.* Rather, they require additional notification by the manager regarding the firm's investment strategy for investments to countries in Groups II and III.

**Group I.** These countries have legal structures that generally respect the rights of workers and human rights. Because these countries have strong

protections for workers and human rights, there is little concern that economic and social disruptions may occur which would have an adverse effect on financial markets. As a result, active stock managers are authorized to invest in companies domiciled in these countries without additional notification to the SBI.

**Group II.** These countries have legal protections for workers and human rights, but violations have been cited in the State Department reports. It is thought that violations of this type may lead to economic and social disruption in these countries, which may have an adverse effect on their financial markets. An active stock manager may, however, invest in companies domiciled in the countries shown under "Group II" if the manager believes that it would be a breach of fiduciary responsibility not to do so. If a manager chooses to invest in one or more of these markets, the manager must notify the SBI in writing.

**Group III.** These countries lack basic protections for workers and human rights and do not appear to be making progress in establishing an appropriate legal structure to address these issues. The potential for economic, political and social unrest is seen to be greater in these countries, which may adversely affect the stability of these financial markets. An active stock manager may, however, invest in companies domiciled in countries shown under "Group III" if the manager believes that it would be a breach of fiduciary responsibility not to do so. If a manager chooses to invest in one or more of these markets, the manager must notify the SBI in writing of its reasons for the decision to do so.

### Review Process

The Board established an International Investing Guidelines Task Force to recommend guidelines that address these limitations as well as other concerns related to international investing.

When the Task Force made its original report to the Board in December 1992, they expected that the country groupings would be updated periodically to reflect changes in the world markets. The Board has adopted the following review process regarding the country guidelines:

- Staff will review reports from the US State Department regarding worker and human rights issues and designate countries "Group I, II or III" using the existing policy guidelines adopted by the Board.

Staff will report on the countries included in the International Program asset class target which will be reviewed by the SBI Administrative Committee. Figure 37 displays the country groupings.

## Investment Manager Summaries

### **Domestic Equity Program Managers**

#### **Active Managers**

##### **Large Cap Core (Russell 1000)**

###### **Mellon Capital Management**

Mellon's investment decisions are quantitatively driven and controlled. The firm believes that consistent application of integrated multiple valuation models produces superior investment results. The firm's stock selection model is comprised of multiple measures, each of which falls into one of the following groups: relative value, future value, earnings momentum, price action, management signals, and quality/sustainability metrics.

Mellon seeks to add value by focusing on buying and selling the right stock rather than attempting to time the market or pick the right sector or industry groups. Mellon was retained by the SBI as an active manager in April 1989.

###### **New Amsterdam Partners**

New Amsterdam Partners believes that investment results are evaluated by actual return, and therefore, investment opportunities should be evaluated by expected return. The investment process combines quantitative analysis with a fundamental overlay. The firm describes its style as growth at a reasonable price (GARP). The strategy seeks to identify and capitalize on mispriced securities. A proprietary quantitative model generates expected returns for stocks. The 100 stocks with the highest expected returns are subjected to further examination

and fundamental analysis. New Amsterdam was retained by the SBI in April 1994.

###### **UBS Global Asset Management (formerly Brinson Partners)**

UBS focuses on price to value as the cornerstone of their investment process. They discount all future cash flows of a company to calculate the intrinsic value from an owner's perspective, and then compare that value estimate to the current stock price. The resulting price to value differences, applied over a broad range of companies, become the building blocks of the security selection process. Portfolio construction focuses on market sensitivity, common factor exposures, industry weightings, and individual stock selection. UBS was retained by the SBI in July 1993.

---

##### **Large Cap Growth (Russell 1000 Growth)**

###### **AllianceBernstein L.P.**

Alliance manages a concentrated portfolio of approximately 50 to 70 stocks that seeks to generate its premium through superior stock selection - a function of research insight and investment action. Using the research predominantly produced by Alliance's analysts, Alliance strives to buy companies with growth potential likely to outpace market expectations, usually due to a combination of a unique product or service offering, high barriers to entry and managements' ability to execute corporate strategies. They focus on maintaining portfolio characteristics consistent with the large-cap-growth style. This approach has allowed them to deliver strong performance to clients over time. The firm was retained by the SBI in March 1983.

###### **Enhanced Investment Technologies, LLC (INTECH)**

INTECH's unique investment process is based on the mathematical foundation of Stochastic Portfolio Theory and seeks to build diversified portfolios that offer the potential to generate long-term returns in excess of the Russell 1000 Growth Index, while reducing the risk of significant underperformance relative to the Index. INTECH does not pick individual stocks or forecast stock alphas, but uses natural stock price volatility and correlation characteristics to generate excess return. Essentially, the firm adjusts the capitalization weights of the Russell 1000 Growth Index to potentially more efficient combinations. The investment process begins with the universe of securities in the Russell 1000 Growth Index. The process then runs a stock screen to eliminate stocks that are too expensive to trade (tend to be the smaller stocks within the benchmark.) Risk controls aimed at mitigating portfolio risk are embedded in the investment process and include active-weight range limits around the benchmark holdings, a constraint on beta, a limited size exposure, and maximizing the information ratio. Once the target weights are determined and the portfolio is constructed, it is then rebalanced to those target proportions and re-optimized on a regular basis. The portfolio is continually evaluated to ensure that diversification and return characteristics are consistent with the investment objectives and underlying mathematical theorem. INTECH was retained by SBI as an active manager in January 2005.

###### **Jacobs Levy Equity Management**

Jacobs Levy believes the market is a complex system, permeated with inefficiencies that offer

## **Investment Manager Summaries**

opportunities for profitable active investment and that can be detected and fully exploited only with intensive statistical modeling. The investment approach combines human insight and intuition, finance and behavioral theory, and leading-edge quantitative and statistical methods. The firm's proprietary systems have been engineered to be integrated across all investment functions, from security selection, portfolio construction, and trading, through performance attribution and guideline compliance. Expected returns for each security in the investment universe are generated from numerous models and become the inputs for the proprietary portfolio optimizer. The optimizer is run daily with the objective of constructing portfolios that can provide consistent outperformance relative to the underlying benchmark, with strict control of portfolio risk. Extensive automated data scrubbing and human fact checking are conducted daily. Liquidity, trading costs, and investor guidelines are incorporated within the optimization process. Jacobs Levy was retained by the SBI as an active manager in January 2005.

### **Knelman Asset Management LLC**

Knelman's approach emphasizes earnings growth as the fundamental driver of stock prices over time. Knelman invests in companies exhibiting substantial growth opportunities, strong business models, solid management teams, and the probability for positive earnings surprises. The investment process combines quantitative, qualitative and valuation criteria. The quantitative component addresses fundamentals and is focused on operating trends. Qualitative analysis involves confirmation of company fundamentals through discussions

with company contacts and related parties. Valuation models focus on relative rankings of the fundamentals within the industry, the market overall and the company itself. Knelman was retained by the SBI as an active manager in January 2005.

### **Sands Capital Management, LLC**

Sands invests in concentrated portfolios of high-quality, seasoned, growing businesses. Bottom-up, company-focused, long-term oriented research is the cornerstone of the investment process. To be included in the stock universe, companies must demonstrate superior historical and projected sales and earnings growth; have the potential for wealth creation; and reside in growing sectors. The team then narrows the opportunity set by identifying potential leaders in attractive business spaces. The strategy focuses on six (6) key investment criteria: 1) sustainable above average earnings growth; 2) leadership position in a promising business space; 3) significant competitive advantages or unique business franchise; 4) management with a clear mission and value added focus; 5) financial strength; and 6) rational valuation relative to the overall market and the company's business prospects. Sands was retained by the SBI as an active manager in January 2005.

### **Winslow Capital Management, Inc.**

Winslow believes that investing in companies with above-average earnings growth (in a normal economy; cash flow growth in recession) provides the best opportunity for achieving superior portfolio returns over the long term. The investment philosophy is founded on bottom up, fundamental research. The strategy identifies companies that can grow earnings

above consensus expectations to build portfolios with forward weighted earnings growth in the range of 15-20% annually. A quantitative screen is employed for factors such as revenue and earnings growth, return on invested capital, earnings consistency, earnings revisions, low financial leverage and high free cash flow rates relative to net income. Resulting companies are subjected to a qualitative assessment within the context of industry sectors. Detailed examination of income statements, cash flow and balance sheet projections is conducted, along with a judgment on the quality of management. Attractively valued stocks are chosen based on P/E relative to the benchmark, sector peers, the company's sustainable future growth rate and return on invested capital. Final portfolio construction includes diversification by economic sectors, earnings growth rates, price/earnings ratios and market capitalizations. Winslow was retained by the SBI as an active manager in January 2005.

### **Zevenbergen Capital**

Zevenbergen Capital's investment philosophy is founded on the principles that superior fundamentals drive stock price appreciation and exceptional management combined with balance sheet strength provides capital protection. The firm employs a forward looking, bottom-up investment process designed for long-term results. Portfolios are constructed with companies presenting established and prospective revenue, cash flow and earnings growth, while diversification and risk control are accomplished through a blend of company size, expected growth rates, and appropriate portfolio weightings. The firm remains fully invested to ensure market participation. Zevenbergen was retained by the SBI in April 1994.

## **Investment Manager Summaries**

### **Large Cap Value (Russell 1000 Value)**

#### **Barrow, Hanley, Mewhinney & Strauss, Inc. (BHMS)**

BHMS believes that markets are inefficient, and can best be exploited through adherence to a value-oriented investment process dedicated to the selection of securities on a bottom-up basis. The overall portfolio will always reflect all three value characteristics: price/earnings and price/book ratios below the market and dividend yields above the market. The stocks must also be attractive according to the firm's dividend discount and relative return models. Analysts provide fundamental analysis in the final step of their investment process. BHMS was retained by the SBI in April 2004.

#### **Earnest Partners**

Earnest Partners utilizes a proprietary valuation and performance model, and rigorous fundamental review to identify stocks with the most attractive relative returns. They have identified six performance drivers – valuation measures, operating trends, market trends, growth measures, profitability measures and macroeconomic measures – and have done extensive research to determine which combination of performance drivers, or return patterns, precede outperformance for stocks in each sector. The firm's fundamental review generally includes conversations with the company's management team and industry specialists, a review of the company's financial reports, analysis of industry and company-specific studies, as well as independent field research. They control risk using a statistical approach designed to measure and control the prospects of substantially underperforming the benchmark. The portfolio is

diversified across industry groups. Earnest Partners was retained by the SBI in July 2000.

#### **Lord Abbett & Co.**

Lord Abbett's strategy is based on a relative value approach and utilizes bottom-up, fundamental research as its alpha driver. They apply formal valuation analysis, with emphasis on normalized earnings, to narrow the universe of candidate securities and focus their fundamental research effort. Research analysts and portfolio managers conduct research independently on compelling stocks in their assigned industries, in an effort to identify those with the strongest fundamentals together with the most attractive valuations. The analysts' primary focus is on the timely recognition of change, or a catalyst, that might cause fundamentals and financial performance to improve over a 12-18 month time horizon. Lord Abbett was retained by the SBI in April 2004.

#### **LSV Asset Management**

LSV's philosophy is that superior long-term results can be achieved by systematically exploiting the judgmental biases and behavioral weaknesses that influence the decisions of many investors. They use quantitative techniques to rank securities based on fundamental measures of value, past performance, and indicators of near-term appreciation potential. Their risk control discipline limits the portfolio's industry and sector concentrations. LSV was retained by the SBI in April 2004.

#### **Systematic Financial Management**

Systematic Financial Management believes that stock prices follow earnings cycles. Superior returns

are achievable by purchasing attractively valued stocks with positive earnings catalysts that are reflective of improving fundamentals. Systematic invests in companies trading at compelling valuations that are exceeding investor expectations, increasing sales and improving margins, and generating strong free cash flow. The investment process involves a strong blend of quantitative screening and fundamental financial analysis coupled with a rigorous monitoring of all holdings. Systematic was retained by the SBI in April 2004.

---

### **Small Cap Growth (Russell 2000 Growth)**

#### **McKinley Capital Management**

McKinley uses a quantitatively driven investment process to systematically search for and identify signs of accelerating growth. The primary model includes linear regression to identify common stocks that are inefficiently priced relative to the market while adjusting each security for standard deviation. The candidates are then filtered and scrutinized for liquidity factors and earnings acceleration. The earnings model identifies securities with strong earnings acceleration. The qualitative review begins after the quantitative process has identified candidates for possible inclusion in the portfolio. The purpose of the qualitative analysis is to confirm that the earnings picture revealed through the quantitative analysis is both reasonable and sustainable. New ideas are taken from the quantitative screening process and confirmed through the qualitative review. McKinley was retained by the SBI in January 2004.

## **Investment Manager Summaries**

### **Next Century Growth Investors**

Next Century Growth's (NCG) goal is to invest in the highest quality and fastest growing companies in America. They believe that growth opportunities exist regardless of the economic cycle. NCG uses fundamental analysis to identify companies that will surpass consensus earnings estimates. Their investment process focuses on growth companies that have superior top line revenue growth (15% or greater,) an expanding market opportunity, strong management, and are well poised to outperform the market. NCG believes in broad industry diversification; sector exposures are limited to twice the benchmark weighting and individual positions to five percent. Next Century was retained by the SBI in July 2000.

### **Turner Investment Partners**

Turner manages a small cap growth portfolio with the philosophy that earnings expectations drive stock prices. They pursue a bottom-up strategy that blends quantitative, fundamental, and technical analysis. They screen securities within sector and market capitalization groups using factors appropriate for each specific group. Companies are ranked within sectors based on multiple earnings growth and valuation factors. The goal of fundamental analysis is to evaluate how a company's future earnings will compare with consensus earnings expectations. Technical analysis is used to evaluate trends in trading volume and price, and to identify attractive entry and exit points. The SBI retained Turner in January 2004.

---

### **Small Cap Value (Russell 2000 Value)**

#### **Goldman Sachs Asset Management**

Goldman Sachs manages a small cap value portfolio using a strong valuation discipline to purchase well-positioned, cash generating businesses run by shareholder-oriented management teams. Portfolio managers are organized by industry, and use industry-specific valuation measures to evaluate companies within their area. They decompose the historical financial reports, meet with management to evaluate their competitive position within the industry, and evaluate each company's valuation attractiveness relative to other comparable companies within the sector. Goldman Sachs was retained by the SBI in January 2004.

#### **Hotchkis and Wiley Capital Management**

Hotchkis and Wiley manages a small cap value portfolio, in which they seek to exploit mispriced securities in the small cap market by investing in "undiscovered" and "out of favor" companies. They invest in stocks of which the present value of the company's future cash flows exceeds the current market price. Industry analysts determine a company's normal earnings power, or sustainable earnings level under equilibrium economic and competitive market conditions, which becomes the basis for security valuation. Hotchkis and Wiley was retained by the SBI in January 2004.

#### **Martingale Asset Management**

Martingale manages a small cap value portfolio with the philosophy that they can exploit the long-term link between undervalued company fundamentals and current

market prices to achieve superior investment returns. They use a quantitative process to identify stocks with low price/earnings ratios and high cash flow to price versus peers. The process examines multiple characteristics of quality, value and momentum. Value traps are avoided by favoring stocks with positive relative strength and earnings estimate revisions versus peers. Each stock is given a score or ranking. Martingale builds a portfolio of the highest ranked stocks while controlling industry and sector weights, and ensuring the average company size resembles the benchmark. Martingale was retained by the SBI in January 2004.

#### **Peregrine Capital Management, Inc.**

Peregrine's Small Cap Value investment process begins with their proprietary valuation analysis, which is designed to identify the small cap value stocks most likely to outperform. The valuation analysis identifies the most underpriced securities on a sector-by-sector basis. The firm analyzes over sixty fundamental factors to identify the most relevant factors in each sector. The focus of the team's fundamental research is to determine if one or more of the style's "Value Buy Criteria" are present – these include resolvable short-term problems, unrecognized assets, take-over potential, fundamental undervaluation and catalysts for change. The portfolio is diversified and sector weights are aligned closely to the benchmark. This allows stock selection to drive performance. Peregrine was retained by the SBI in July 2000.

## Investment Manager Summaries

### **RiverSource Investments, LLC/ Kenwood Capital (formerly American Express Asset Management)**

Kenwood's small cap value product seeks to own a portfolio of stocks that represents the best opportunities in each sector based on valuation and indicators of improving cash flow and earnings. They look for higher quality stocks that are undervalued based on demonstrable fundamentals, rather than distressed value stocks. Their quantitative appraisal model ranks stocks on their potential excess return. The appraisal model incorporates a dozen or so sector models with weightings that vary over time in relation to the stock attributes that are most important in determining relative performance. American Express/Kenwood was retained by the SBI in January 2004.

Kenwood's decision to discontinue normal business operations as of July 31, 2009 and the liquidation of the account ended the responsibility of Kenwood to provide the SBI with investment management services effective July 7, 2009.

---

### **Semi-Passive Managers**

#### **Semi-Passive Managers (Russell 1000)**

##### **Barclays Global Investors**

Barclays uses a Core Alpha Model which disaggregates individual equity returns for each of the stocks in their universe into three inputs: relative value, earnings quality and sentiment. The relative value criteria assesses intrinsic value relative to market price. Earnings quality criteria help identify companies likely to sustain earnings growth and avoid negative surprises.

Sentiment criteria help identify market participants' beliefs regarding valuation. The strategy seeks to minimize investment and operational risks not associated with adding value. Implementation costs are also considered when rebalancing return potential with risk profile of trades. The firm was retained by the SBI for semi-passive management in January 1995.

##### **Mellon Capital Management**

Mellon adds incremental value to a benchmark by buying stocks quantitatively ranked the highest and selling stocks ranked the lowest, while maintaining the portfolio's systematic risk and industry weightings at levels similar to the benchmark. Mellon attempts to allocate most of the total risk level set by the client specifically to stock selection. The firm always remains fully invested. The SBI retained Mellon as a semi-passive manager in January 1995.

##### **J.P. Morgan Investment Management Company**

J.P. Morgan believes that superior stock selection is necessary to achieve excellent investment results. To accomplish this objective, they use fundamental research and a systematic valuation model. Analysts forecast earnings and dividends for the stock universe and enter these into a stock valuation model that calculates a dividend discount rate for each security. The stocks are ranked according to this valuation measure within their economic sectors. Stocks most undervalued are placed in the first quintile. The portfolio takes overweight positions in stocks in the first and second quintiles, while underweighting stocks in the fourth and fifth quintiles. In addition, the

portfolio will closely approximate the sectors and style of the benchmark. The portfolio remains fully invested at all times. The firm was retained by the SBI in January 1995.

---

### **Passive Manager**

#### **Passive Manager (R3000)**

##### **Barclays Global Investors**

For the passive account, Barclays seeks to minimize tracking error, transaction costs and investment and operational risks. The portfolio is managed against the asset class target (Russell 3000 index) using a proprietary optimization process that integrates a transaction cost model. The resulting portfolio closely matches the characteristics of the benchmark with less exposure to illiquid stocks. Barclays was retained by the SBI for passive management in July 1995.

**Portfolio statistics for each of the domestic equity managers can be found in the Statistical Data section of this report.**

---

### **International Program Managers**

#### **Active Developed Markets**

##### **Acadian Asset Management**

Acadian employs structured stock and region/industry valuation models that are customized to each region. These models are designed to capture a broad range of characteristics associated with outperforming stocks. Acadian uses stock factors to predict how well each stock in the 25,000-stock universe will perform relative to its region/industry

## **Investment Manager Summaries**

zone. These factors are based on valuation, earnings, quality and price data. Acadian also applies separate models to forecast region/industry level returns, in order to predict how well each stock's region/industry zone will perform relative to others, and then add that forecast to each stock's forecast. The investment process combines and weights the values of all the factors, utilizing a proprietary method to determine a return forecast for each stock. The end result is a ranking of the entire 25,000-stock universe from most to least attractive.

Acadian then uses a sophisticated portfolio optimization system to trade off the expected return of the stocks with such considerations as the client's benchmark index, desired level of risk, transaction cost estimates and other requirements. Portfolios are normally fully invested, with a minimal amount of cash. Country and sector weights fall out of the bottom-up stock selection process, with overall portfolio risk control ensuring the desired level of diversification. The last step of the process is a careful review of optimized portfolios by the investment team before trading, to ensure the portfolio meets the client's investment goals. Acadian was retained by the SBI in July 2005.

### **INVESCO Global Asset Management**

INVESCO employs a systematic process that identifies undervalued-companies, combined with a consistently applied portfolio design process to control the predictability and consistency of returns. INVESCO managers believe they can add value by identifying and investing in stocks which are attractively priced relative to the sustainable growth potential of the company. Portfolios are constructed on a bottom-up basis. They select

individual companies rather than countries, themes, or industry groups. This is the first of four cornerstones of their investment approach. Secondly, they conduct financial analysis on a broad universe of non-U.S. companies, with key financial data adjusted to be comparable across countries and currencies. Third, INVESCO believes that using the firm's own local investment professionals enhances fundamental company research. Finally, they manage risk and ensure broad diversification relative to the clients' benchmark utilizing a statistics-based portfolio construction approach instead of utilizing country or industry constraints. INVESCO was retained by the SBI in February 2000.

### **J.P. Morgan Investment Management Company**

J.P. Morgan's international equity process focuses on stock selection as the primary source of added value, seeking to build a portfolio diversified by both sector and region. Approximately 150 investors are based locally in regional markets, providing insights on 1300 companies. Each regional team ranks companies within local markets, 1(best) to 5(worst). Local teams both undertake research and manage local portfolios. The most attractive names on a regional basis, primarily those ranked 1 and 2, are then further analyzed by a team of London-based Global Sector Specialists. They seek to provide global industry insights and build on the local market analysis already undertaken. The team seeks to identify the most attractive names within each sector, ranking companies A (best) to D (worst). The final stage of the investment process rests with a team of senior portfolio managers, who are

responsible for constructing risk controlled portfolios, capturing the best thinking of both the local and global teams. The emphasis is on delivering alpha through bottom-up stock picking. J.P. Morgan was retained by the SBI in July 2005.

### **Marathon Asset Management**

Marathon uses a blend of qualitative disciplines to construct portfolios. The resulting style and emphasis of the portfolio may vary over time and by market, depending on Marathon's perception of what represents the best value opportunity. Since the firm believes that profitability is inversely proportional to competition, Marathon is attracted to industries where the level of competition is declining. They will hold a sector position as long as the level of competition does not increase. At the stock level, Marathon tracks a company's competitive position relative to the attractiveness of their products or services and determines whether the company is following an appropriate capital reinvestment strategy for their current competitive position. Marathon was retained by the SBI in November 1993.

### **McKinley Capital Management**

Using proprietary quantitative models, McKinley's investment process searches for and identifies signs of accelerating growth. The initial universe consists of 30,000 publicly traded non-U.S. stocks, from all capitalization categories in more than 60 countries. The primary model includes a linear regression model to identify stocks that are inefficiently priced in US dollars relative to the market while adjusting each security for standard deviation. The ratio of alpha to standard deviation (risk adjusted relative return) is the primary screening

## **Investment Manager Summaries**

value. The remaining candidates then pass through liquidity and strength of earnings tests. The earnings tests identify securities with strong earnings acceleration.

In the final portfolio construction process, McKinley examines a variety of qualitative factors which could ultimately impact earnings. These include a qualitative data check and street research analysis of economic factors, specific industry themes and company fundamentals. The final portfolio will hold between 35-50 stocks, providing diversification and risk control by issue, industry, sector and country. McKinley was retained by the SBI in July 2005.

### ***Pyramis Global Advisors Trust Company (formerly Fidelity Mgmt. Trust Co.)***

Pyramis' International Growth strategy is a core, growth-oriented strategy that provides diversified exposure to the developed international markets benchmark. The investment process combines active stock selection and regional asset allocation. Four portfolio managers in London, Tokyo, Hong Kong, and Boston construct regional sub-portfolios, selecting stocks based on Pyramis analysts' bottom-up research and their own judgment and expertise. The four regional portfolios are combined according to the policy determined by Pyramis' Asset Allocation Group (AAG). The AAG is comprised of senior investment professionals who base their decision from micro-economic data derived from portfolio manager inputs, analysts' field research, and proprietary data on liquidity, market activity, and fund flows. Portfolio guidelines seek to ensure risk is commensurate with the performance target and to focus active risk on stock selection. Resulting portfolios

typically contain between 200-250 holdings. Pyramis was retained by the SBI in July 2005.

### ***RiverSource Investments, LLC (formerly American Express Asset Management)***

RiverSource's objective is to focus on key forces of change in the markets and the companies that will benefit. They believe that a good understanding of the likely impact of these changes at a company level, complemented with an appreciation of the ability of management to exploit these changes, creates significant opportunities to pick winners and avoid losers. Companies are analyzed within a macroeconomic and global sector/thematic framework. "Top down" views on macroeconomics and trends in global sectors combine with "bottom-up" company analysis along regional and global sector lines. Analysts propose a rating of A through to E for approximately 150-200 stocks in each region reflecting the expected performance on a 12-month view. RiverSource was retained by the SBI in February 2000. In December 2003, the Threadneedle team replaced the original investment team.

---

### ***Semi-Passive Developed Markets***

#### ***AQR Capital Management***

AQR employs a disciplined quantitative approach emphasizing both top-down country/currency allocation and bottom-up security selection decisions to generate excess returns. AQR's investment philosophy is based on the fundamental concepts of value and momentum. AQR's international equity product incorporates stock selection, country selection, and

currency selection models as the primary alpha sources. Dynamic strategy allocation (between the three primary alpha sources) and style weighting are employed as secondary alpha sources. AQR was retained by the SBI in July 2005.

### ***Pyramis Global Advisors Trust Company (formerly Fidelity Mgmt. Trust Co.)***

Pyramis' Select International strategy combines active stock selection with quantitative risk control to provide consistent excess returns above the benchmark index while minimizing relative volatility and risk. Pyramis' investment philosophy is based on the premise that international markets are semi-efficient and pricing anomalies exist. Research conducted by the firm's international equity analysts and portfolio managers provides the basis for stock selection and portfolio construction.

By combining five regional sub-portfolios in the U.K., Canada, Continental Europe, Japan, and the Pacific Basin ex Japan, the portfolio manager produces a portfolio made up of the best ideas of the firm's research analysts located throughout the world. Each regional portfolio is created so that stock selection is the largest contributor to active return while systematic, sector, and factor risks are minimized. The portfolio manager uses a combination of proprietary and third-party optimization models to monitor and control risk within each regional module. Resulting portfolios typically contain between 275-325 holdings. Pyramis was retained by the SBI in July 2005.

### **State Street Global Advisors**

The International Alpha Strategy seeks to create value through superior security selection. Stocks are quantitatively ranked by region according to those factors which have been shown to identify mispricing: value, sentiment and earnings growth. The stock scores derived in this fashion are translated into forecasts of stock outperformance. The regional portfolio managers review all suggestions in terms of selections and weightings. A separate process projects transaction costs for each stock. Proprietary portfolio construction software is then used to generate a recommended buy/sell list based on the trade off between expected outperformance and the trading costs.

State Street Global Advisor's risk management process permits multiple and simultaneous risk penalties and implies that, as industry, country and capitalization deviations become greater and greater, the incremental expected return from a stock must increase in order to compensate for the greater benchmark relative risk. They also impose country, sector, industry, and security specific bands relative to the benchmark as an additional risk management tool and manage other exposures such as capitalization, beta and yield to be similar to that of the underlying benchmark. The investment process creates core portfolios that provide clients with stringent risk control, the return of the asset class, and the benefit of active management. SSgA was retained by the SBI in July 2005.

---

### **Passive Developed Markets**

#### **State Street Global Advisors**

State Street manages an international index portfolio designed to track the Morgan Stanley Capital International Index of the World ex. United States. State Street uses a full replication strategy to construct the index by country. Stock index and country futures, approved by the Commodity Futures Trading Commission, are also used to minimize tracking error and allow for cash in flow and out flow. State Street was retained by the SBI in October 1992.

---

### **Active Emerging Markets**

#### **AllianceBernstein L.P.**

AllianceBernstein's emerging markets equity process focuses on fundamental research-driven stock selection, which is structured by industry within the emerging markets regions. AllianceBernstein's three regional portfolio management and research teams, focused on Asia, Eastern Europe/Middle East/Africa and Latin America, construct portfolios within their respective regions. These regional portfolios are aggregated to establish AllianceBernstein's total emerging markets exposure in the portfolio. AllianceBernstein believes that investment success in the emerging markets stems from investing in those companies in each region with quality managements in growth businesses, with superior fundamentals and improving corporate governance. AllianceBernstein further believes that these companies can best be identified through rigorous fundamental research, conducted by internal, on-the-ground analysts. Although the investment philosophy emphasizes bottom-up stock selection, parameters are established

at the portfolio level to manage risk. Exposures by region are maintained close to the benchmark weights, and deviations are made when an excess or a lack of opportunities exist within a particular region. Maximum position constraints are imposed at the stock and country level, and industry exposures are generally a by-product of stock selection. The SBI retained AllianceBernstein in January 2001.

#### **Capital International, Inc.**

Capital International, Inc. has a long history of investing in emerging markets for its affiliate, Capital Guardian Trust Company, one of the Capital Group Companies. Capital is distinguished by its extensive commitment to fundamental research, with a large team of experienced analysts focused on gathering in-depth information first-hand on companies throughout the world. Their philosophy can best be described as value-oriented with research efforts focused on trying to identify the difference between the underlying value of a company and the price of its securities in its home market. This basic, fundamental approach is blended with macroeconomic and political judgments on the outlook for economies, industries, currencies and markets. A critical ingredient in this blending process is the recognition that the relative importance of each factor will vary from time to time, and none can be treated as being of paramount importance at all times. The account is divided among six portfolio managers and a research portfolio. The research portfolio is managed by a team of research analysts who select stocks within the sectors they cover. All portfolio managers are free to make their own decisions (within risk control limits) as to sector, quality emphasis, cash reserves, and issue selection. The

## Investment Manager Summaries

SBI retained Capital International, Inc. in January 2001.

### **Morgan Stanley Investment Management**

Morgan Stanley Investment Management is an emerging markets specialist. Their belief is that the emerging markets are a distinct asset class offering a diverse set of investment opportunities. As both macroeconomic and stock-specific factors drive the emerging markets, Morgan Stanley integrates both top-down country allocation and bottom-up stock selection in order to produce superior performance over the medium to long term. Effective investment management requires a dedicated manager who utilizes a set of investment tools tailored to the return and risk potential of this asset class. Morgan Stanley's core investment style combines growth and value as both are potential drivers of performance in emerging markets investing. They believe that growth-oriented companies trading at attractive valuations offer the best return prospects in the emerging markets. Morgan Stanley Investment Management was retained by the SBI for emerging market management in January 2001.

**Portfolio statistics for each of the international managers can be found in the Statistical Data section of this report.**

---

## **Fixed Income Program Managers**

### **Active**

#### **Aberdeen Asset Management, Inc. (formerly Deutsche Asset Management)**

Aberdeen believes there are significant pricing inefficiencies inherent in bond markets and that diligent credit analysis, security structure evaluation, and relative value assessment can be used to exploit these inefficiencies. The firm avoids interest rate forecasting and sector rotation because they believe these strategies will not deliver consistent out performance versus the benchmark over time. The firm's value added is derived primarily from individual security selection. Portfolio managers and analysts research bonds within their sector of expertise to determine the intrinsic value of each bond. The result is a portfolio that is constructed from the bottom-up, bond by bond. Sector weightings are a by-product of the bottom-up security selection. Aberdeen was retained by the SBI in February 2000.

#### **Dodge & Cox Investment Management**

Dodge & Cox manages a high quality (typically AA or better weighted average quality,) diversified portfolio of securities that are selected through fundamental analysis. The firm believes that by combining fundamental research with a long-term investment horizon it is possible to uncover and act upon inefficiencies in the valuation of market sectors and individual securities. When this fundamental research effort is combined with a disciplined program of risk analysis, attractive returns are possible over

the long-term. In seeking above average returns, Dodge & Cox emphasizes individual security selection, strives to build portfolios that have a higher yield than the broad bond market, and analyzes portfolio and individual security risk. Dodge & Cox was retained by the SBI in February 2000.

#### **Pacific Investment Management Co. LLC (PIMCO)**

PIMCO's investment approach seeks to outperform a client's benchmark on a consistent basis, while maintaining overall risk similar to the index. PIMCO's approach to investing has three key principles: the utilization of multiple strategies, a long-term orientation and bond selection from a broad universe. PIMCO's investment process starts with an annual Secular Forum. The goal of this Forum is to look beyond the current business cycle and determine how secular forces will play out over the next 3 to 5 years. Quarterly, PIMCO holds Economic Forums to evaluate growth and inflation over the next 6 to 9 months. Following PIMCO's Secular and Economic Forums, the PIMCO Investment Committee (IC) develops key portfolio strategies. They consider both the "top-down" conclusions emanating from PIMCO's Forum, as well as the "bottom-up" market intelligence provided by PIMCO's teams of sector specialist portfolio managers. Through an interactive series of meetings, the IC defines a set of consistent strategies that are then implemented by sector specialists who do in-depth research and recommend individual securities to the portfolio manager to be included in the portfolio. PIMCO was retained by the SBI in September 2008.

## Investment Manager Summaries

### **RiverSource Investments, LLC (formerly American Express Asset Management)**

RiverSource manages portfolios using a bottom-up, relative value approach in combination with a top-down, macro outlook that guides the firm's relative value decisions. The firm employs in-depth fundamental research and credit analysis combined with proprietary valuation disciplines to identify individual relative value opportunities across market sectors. The duration and maturity structure of the portfolio are managed using a rigorous quantitative approach centered on the firm's proprietary interest rate forecasting models. RiverSource is committed to diversification of sources of active risk in the portfolios it manages, and believes that proper diversification combined with consistent evaluation of risk-reward trade-offs leads to superior risk-adjusted performance. RiverSource was retained by the SBI in July 1993.

### **Western Asset Management**

Western emphasizes the use of multiple strategies and active sector and issue selection, while constraining overall interest rate risk relative to the benchmark. Multiple strategies are proportioned so that results do not depend on one or two opportunities, and no single adverse market event would have an overwhelming effect. This approach adds consistent value over time and can reduce volatility. Long term value investing is Western Asset's fundamental approach. In making their sector decision, the firm seeks out the greatest long-term value by analyzing all fixed income market sectors and their economic expectations. Individual issues are identified based on relative credit strength, liquidity,

issue structure, event risk, covenant protection, and market valuation. Western believes that successful interest rate forecasting is extremely difficult to accomplish consistently and consequently keeps portfolio duration within a narrow band around the benchmark. Western was retained by the SBI in July 1984.

---

### **Semi-Passive**

#### **BlackRock Financial Management**

BlackRock manages a semi-passive index portfolio that closely tracks the Barclays Capital Aggregate. BlackRock's strategy is a controlled-duration, sector rotation style, which can be described as active management with tighter duration, sector, and quality constraints. BlackRock seeks to add value through: 1) controlling portfolio duration within a narrow band relative to the benchmark, 2) relative value sector/sub-sector rotation and security selection, 3) rigorous quantitative analysis of the valuation of each security and of the portfolio as a whole, 4) intense credit analysis and review, and 5) the judgment of experienced portfolio managers. Advanced risk analytics measure the potential impact of various sector and security strategies to ensure consistent value added and controlled volatility. BlackRock was retained by the SBI in April 1996.

#### **Goldman Sachs Asset Management**

Goldman manages a semi-passive portfolio that closely tracks the Barclays Capital Aggregate. Goldman manages the portfolio within a risk-controlled framework. The firm relies primarily on sector allocation and security selection strategies to generate incremental return relative to the benchmark.

To a lesser degree, term structure and highly controlled interest rate anticipation strategies are also implemented. Portfolios are diversified among various sectors and individual securities. Goldman combines long-term strategic investments with short-term tactical trading opportunities. Strategic investments are based on fundamental and quantitative sector research and seek to optimize the long-term risk/return profile of portfolios. Tactical trades between sectors and securities within sectors are implemented to take advantage of short-term market anomalies. Goldman was retained by the SBI in July 1993.

### **Neuberger Berman Fixed Income LLC (formerly Lincoln Capital and Lehman Brothers Asset Management, LLC)**

Neuberger manages a semi-passive portfolio that closely tracks the Barclays Capital Aggregate. Neuberger's process relies on a combination of quantitative tools and active management judgment. Explicit quantification and management of risks are at the heart of their investment process. Neuberger uses proprietary risk exposure analysis to analyze 25 interest rate factors, and over 43 spread-related factors, including those relating to credit quality, sector classification and sub-sector representations. Neuberger analyzes every bond in the index for all relevant factors, and capitalization weights the results to calculate index level risk exposures. For each interest rate factor, the portfolio is very closely matched to the index such that the expected return for the portfolio matches that of the index for any change in interest rates. For each spread factor, the portfolio can deviate slightly from the index as a means of seeking value-added.

## Investment Manager Summaries

Setting active risk exposures that must fall within pre-established limits controls risk. To manage credit risk, corporate holdings are diversified across a large number of issues. Neuberger was retained by the SBI in July 1988.

**Portfolio statistics for each of the bond managers can be found in the Statistical Data section of this report.**

The Fund serves as a vehicle for investment in the oil field service (OFS) and equipment industry. The General Partner is located in Houston, Texas. Fund IV was formed in 1998 and is in the process of liquidating its holdings at the end of its ten year term.

### **T. Rowe Price**

T. Rowe Price, a Baltimore-based money management firm, was selected to manage stock distributions from the SBI's alternative investment limited partnerships. T. Rowe Price has extensive research capabilities in the small capitalization company area. In addition, the firm has a large trading staff with particular expertise in the trading of small capitalization and illiquid stocks.

### **TCW Asset Management Company**

#### **Fund: TCW Energy XIV**

TCW Energy XIV was formed in 2007 for the purpose of making mezzanine and equity investments in energy and energy-related infrastructure projects and companies on a global basis. The Fund operates from offices in Los Angeles, Houston, New York and London and has an expected term of 12 years.

---

### **Yield-Oriented**

### **BlackRock Financial Management**

#### **Fund: Carbon Capital**

Carbon Capital was formed in 2001 and has an eight year term. Based in New York, the fund will focus on mezzanine real estate loans secured by commercial property assets, primarily in the U.S.

### **Citicorp Capital Investors, Ltd.**

#### **Funds: Citicorp Mezzanine Partners Citicorp Mezzanine**

##### **Partners III**

Citicorp Mezzanine Partners and Citicorp Mezzanine Partners III are limited partnerships formed in 1995 and 1999, respectively, by Citicorp Capital Investors Ltd. of New York, New York. The Funds will invest in a broad range of transactions utilizing subordinated debt and equity securities. The Funds have expected terms of 10 years and are in the process of liquidating their holdings.

### **Credit Suisse**

#### **Funds: DLJ Investment Partners II DLJ Investment Partners III**

DLJ Investment Partners II and III are limited partnerships formed in 1999 and 2006 with expected terms of ten years. Based in New York, the Funds will invest in a variety of securities, including subordinated debt with warrants, preferred stock with warrants, common stock or other securities, including interests in joint ventures.

### **Equinox Investment Partners**

#### **Fund: KB Mezzanine Fund II**

KB Mezzanine Fund II is a limited partnership formed in 1994 by Kleinwort Benson Group, a leading London-based merchant banking firm. In 1996, the fund manager reorganized and changed its name to Equinox Investment Partners. Fund II invests in a broad range of transactions including utilizing subordinated debt and equity securities. The SBI committed to the fund in 1994. The fund has an 8 year term and is currently liquidating investments.

### **Gold Hill Venture Lending Partners**

#### **Funds: Gold Hill Venture Lending Gold Hill 2008**

Gold Hill Venture Lending and Gold Hill 2008 were formed in 2004 and 2008, respectively. The Funds are expected to generate returns through secured loans, gains on the sales of securities acquired upon the exercise of warrants, and through the disposition of direct equity investments. Prior to forming Gold Hill, the partners executed a similar mandate for Silicon Valley Bank, and they expect to continue a close relationship for purposes of deal-sourcing. Gold Hill has offices in Santa Clara and Boston, and has an expected term of ten years.

### **Goldman Sachs Mezzanine Partners**

#### **Funds: GS Mezzanine Partners II GS Mezzanine Partners III GS Mezzanine Partners 2006 GS Mezzanine Partners V**

GS Mezzanine Partners II, III, 2006 and V are limited partnerships formed in 2000, 2003, 2006 and 2007 respectively, with expected terms of ten years. Based in New York, the Funds' investment objectives are to achieve long-term capital appreciation and current returns through investments in mezzanine securities. These securities will principally include fixed income securities such as debt and preferred stock, often with an equity component, such as warrants, options, a convertible feature, or common stock associated with the debt or preferred stock purchase.

### **GTCR Golder Rauner**

#### **Fund: GTCR Capital Partners**

GTCR Capital Partners is a limited partnership formed in 1999 with an expected term of ten years. Based in Chicago, the Fund will make

## Investment Manager Summaries

mezzanine investments primarily in companies in which a GTCR Equity Fund invests or has invested. GTCR invests in consolidating, fragmented industries by teaming with top executives to build companies through acquisition and internal growth.

### **Merit Capital Partners (William Blair Mezzanine Partners)**

**Funds:** William Blair Mezzanine Capital Partners III  
Merit Capital Partners IV

William Blair Mezzanine Capital Partners III and Merit Capital Partners IV are limited partnerships formed in 1999 and 2004 with expected terms of ten years. Based in Chicago, the Funds will invest primarily in fixed rate subordinated debt securities. These securities generally will be purchased with a significant equity component in the form of warrants, common stock or contingent interest.

### **Merit Energy Company**

**Funds:** Merit Energy Partners B, C, D, E and F

Merit Energy Partners B, C, D, E, and F were formed in 1996, 1998, 2000, 2003 and 2005, respectively, and each fund has an eight year initial term. Based in Dallas, TX, the funds will focus on resource investments in producing oil and gas properties. Funds B and C are currently in the post-investment distribution mode.

### **Prudential Capital Group**

**Funds:** Prudential Capital Partners  
Prudential Capital Partners II  
Prudential Capital Partners III

Prudential Capital Partners I, II, and III were formed in 2001, 2005, and

2009, respectively, with 10-year terms. Based in Chicago, the Funds will make mezzanine investments, typically including convertible debt, preferred stock and warrants, with a specific focus on middle market companies.

### **Quadrant**

**Funds:** Institutional Commercial Mortgage Fund IV  
Institutional Commercial Mortgage Fund V

Institutional Commercial Mortgage Funds IV and V are funds formed in 1997 and 1999, respectively, with ten year terms. Based in Atlanta, GA, the funds focus on mortgage investment in real estate located throughout the U.S. Currently, the funds are in the process of liquidating investments.

### **Summit Partners**

**Funds:** Summit Subordinated Debt Fund I  
Summit Subordinated Debt Fund II  
Summit Subordinated Debt Fund III  
Summit Subordinated Debt Fund IV

Summit Subordinated Debt Funds I, II, III and IV are limited partnerships formed in 1994, 1996, 2004 and 2007, respectively, with ten year terms. The funds will invest in many of the same companies as the Summit Venture funds. Investments by those partnerships will principally take the form of subordinated debt with equity features. These yield-oriented investments will provide current income over the life of the investment with the potential for additional returns. Fund I and II are currently liquidating investments.

### **T. Rowe Price**

T. Rowe Price, a Baltimore-based money management firm, was selected to manage stock distributions from the Board's alternative investment limited partnerships. T. Rowe Price has extensive research capabilities in the small capitalization company area. In addition, the firm has a large trading staff with particular expertise in the trading of small capitalization and illiquid stocks.

### **TCW/Crescent Mezzanine**

**Funds:** TCW/Crescent Mezzanine Partners I  
TCW/Crescent Mezzanine Partners II  
TCW/Crescent Mezzanine Partners III

TCW/Crescent Mezzanine Partners I, II, and III are Los Angeles based limited partnerships formed in 1996, 1998, and 2001, respectively. The Funds will make mezzanine investments including subordinated debt with equity participations primarily in profitable, middle market companies. Funds I and II are currently liquidating investments and Fund III is expected to terminate in 2011.

### **Windjammer Capital Investors**

**Funds:** Windjammer Mezzanine and Equity Fund II  
Windjammer Senior Equity Fund III

Windjammer Funds II and III are limited partnerships formed in 2000 and 2005 with expected terms of ten years. The Funds will provide subordinated debt and/or preferred stock accompanied by warrants or other forms of equity participation and, in certain instances, common stock to middle market companies. The Funds will seek to generate both current income and substantial capital gains while limiting risk.

## **Investment Manager Summaries**

### **Assigned Risk Plan Managers**

#### **GE Asset Management**

GE Asset Management manages the stock portfolio for the Assigned Risk Plan. Their strategy is to maintain a style-neutral position between value and growth stocks and focus on fundamental, bottom-up stock selection to add value. This strategy is accomplished by combining the expertise of three portfolio managers, each with different styles ranging from value to growth, supported by a staff of industry analysts. Each analyst is responsible for one or more industries and together provide analytical coverage across the full spectrum of industries. The three portfolios are combined to create a well-diversified portfolio while neutralizing the style bet. GE Asset Management was retained by the SBI in January 1995.

#### **Voyageur Asset Management**

Voyageur manages the fixed income portfolio for the Assigned Risk Plan. The main objective for the portfolio is to provide cash for the payment of workers compensation claims on the required dates. Because of the uncertainty of premium and liability cash flows, the fund is invested conservatively. Voyageur uses a top-down approach to bond selection. They focus on sector analysis and security selection. Yield curve and duration analysis are secondary considerations. Voyageur has managed the bond portfolio since July 1991.

---

### **Stable Value Manager**

#### **Galliard Capital Management, Inc.**

Galliard Capital Management manages the Fixed Interest Account in the Supplemental Investment Fund. The stable value fund is managed to protect principal and provide competitive interest rates using instruments somewhat longer than typically found in money market-type accounts. The manager invests cash flows to optimize yields. The manager invests the Account in well diversified portfolios of high quality investment grade fixed income securities. The manager also invests in investment contracts with U.S. and non-U.S. financial institutions that provide principal protection for the diversified bond portfolios regardless of daily market changes. To maintain necessary liquidity, the manager invests a portion of the portfolio in its Stable Return Fund and in cash equivalents. The Stable Return Fund is a large, daily priced fund consisting of a wide range of stable value instruments that is available to retirement plans of all sizes. The firm was retained by the SBI in November 1994.

---

### **State Deferred Compensation Plan Non-SIF Mutual Fund Managers**

#### **Janus Twenty Fund**

The fund is an actively managed large cap equity option. The investment objective of this fund is long-term growth of capital from increases in the market value of the stocks it owns. The fund will concentrate its investments in holdings of about thirty common stocks. This non-diversified fund seeks to invest in companies that

the portfolio manager believes have strong current financial positions and offer growth potential. The fund was retained by the SBI in July 1999.

#### **Legg Mason Partners Appreciation I Fund**

The fund is an actively managed large cap equity option. The manager seeks to build a portfolio providing low volatility and consistent returns by investing in a blend of value and growth stocks. The manager selects dividend-paying blue chip stocks at reasonable valuations and growth stocks that have been discounted by the market. The manager will hold significant cash positions if the market is judged to be too pricey. The fund was retained by the SBI in December 2003.

#### **T. Rowe Price Small Cap Stock Fund**

The strategy of this fund is to invest primarily in stocks of small to medium-sized companies that are believed to offer either superior earnings growth or appear undervalued. The fund normally invests at least 80% of assets in equities traded in the U.S. over-the-counter market. The manager does not favor making big bets on any particular sector or any particular stock. The fund's combination of growth and value stocks offers investors relatively more stable performance compared to other small cap stock funds. The fund was retained by the SBI in July 1999.

#### **Dodge & Cox Balanced Fund**

The fund offers a mix of stocks and bonds to investors seeking diversification in one investment option. The manager typically has

## **Investment Manager Summaries**

a mix of 60 percent to 65 percent stocks and 30 percent to 35 percent bonds, and changes the mix between stocks and bonds slowly. The manager follows a disciplined value approach for the equity portfolio and has a larger exposure to mid-cap stocks than other balanced mutual funds. The manager emphasizes mid-quality corporate bonds and attractively priced mortgage-backed securities in the bond portfolio. The duration of the bond portfolio is kept close to that of the overall bond market. The fund was retained by the SBI in October 2003.

### ***Dodge & Cox Income Fund***

The objective of this fund is a high and stable rate of current income with capital appreciation being a secondary consideration. This portfolio invests primarily in intermediate term, investment-grade quality corporate and mortgage bonds and, to a lesser extent, government issues. While it invests primarily in the U. S. bond market, the fund may invest a small portion of assets in dollar-denominated foreign securities. The duration of the portfolio is kept near that of the bond market as a whole. The fund was retained by the SBI in July 1999.

### ***Fidelity Diversified International Fund***

The goal of this fund is capital appreciation by investing in securities of companies located outside the United States. While the fund invests primarily in stocks, investments are made in larger companies located in developed countries. The manager uses a bottom-up stock selection process based on the extensive fundamental research available from the company's many security analysts. Sector and country weightings are reviewed for risk control. The manager also uses a

rigorous computer-aided quantitative analysis supplemented by relevant economic and regulatory factors. The manager rarely invests in currency to protect the account from exchange fluctuations. The fund was retained by the SBI in July 1999.

### ***Vanguard Institutional Index Plus Fund***

The passively managed fund tracks the S&P 500 index. This fund attempts to provide investment results, before fund expenses, that parallel the performance of the Standard & Poor's 500 index. The fund invests in all 500 stocks in the S&P 500 index in approximately the same proportions as they are represented in the index. The fund may use futures and options for temporary purposes, but generally remains fully invested in common stocks. The fund was retained by the SBI in July 1999.

### ***Vanguard Mid Capitalization Index Institutional Fund***

The fund is passively managed to track the performance of the MSCI US Mid Cap 450 index, an index of stocks of medium-size U.S. companies. The manager holds positions in all companies in the index and uses futures and options for handling cash needs. The fund was retained by the SBI in January 2004.

### ***Vanguard Balanced Index Fund Institutional***

The fund portfolio provides a diversified portfolio of stocks and bonds by investing in a mix of 60 percent stocks and 40 percent bonds.

The manager does not change the asset mix. The fund is passively managed with the equity portfolio invested to track the returns of the MSCI US Broad Market index, which encompasses stocks of companies of all sizes, and the bond portfolio invested to track the returns of the Barclays Capital Aggregate Bond index. The fund was retained by the SBI in December 2003.

### ***Vanguard Total Bond Market Index Fund Institutional***

The fund is passively managed to track the performance of the Barclays Capital Aggregate Bond index. The manager uses an index sampling technique to invest in investment-grade corporate, U.S. Treasury, mortgage-backed and asset-backed securities of varying maturities in order to create a portfolio of intermediate duration like the Barclays Capital Aggregate. The fund was retained by the SBI in December 2003.

### ***Vanguard Institutional Developed Markets Index Fund***

The fund is passively managed to track the returns of the MSCI EAFE index. The fund is invested in the Vanguard European Stock Index Fund and the Vanguard Pacific Stock Index Fund. The fund has minimal exposure to emerging markets. The European Stock Index Fund tracks the MSCI Europe index, a capitalization weighted benchmark of the region's largest stocks and markets. The Pacific Stock Index Fund tracks the MSCI Pacific index, which includes mostly large companies from Japan, Australia, Hong Kong, Singapore and New Zealand. The fund was retained by the SBI in December 2003.

---

***State Deferred Compensation  
Plan Insurance Company  
Investment Contract Managers***

In March 2008, the SBI merged the Deferred Compensation Plan's Minnesota Fixed Fund into the Supplemental Investment Fund Fixed Interest Account. Galliard, the manager of the Fixed Interest Account (see "Stable Value Manager"), absorbed into its portfolio the investment contracts of the three insurance companies that invested the assets of the now defunct Minnesota Fixed Fund. These companies are Principal Life, Des Moines, Iowa; Minnesota Life, St. Paul, Minnesota; and Great-West Life, Denver, Colorado. As these insurance contracts mature on a quarterly basis, Galliard reinvests the proceeds in the Fixed Interest Account fixed income portfolios.

---

### Stock Manager Risk Factor Exposure Glossary

The following definitions describe the risk factors that the State Board of Investment (SBI) uses in monitoring its stock managers. The terms are referred to in the Risk Factor Exposure table that follows this glossary.

SBI analysis of a stock manager's portfolio, in part, utilizes the BARRA E3 model. The BARRA model contains a number of risk factors that the SBI has found to correlate highly with a manager's investment style. That is, a manager tends to exhibit consistent exposures to many of these risk factors over time. The benchmark construction process includes identifying these persistent exposures and capturing them in the benchmark portfolio.

Factor exposures are calibrated relative to an estimation universe of the top 1,500 stocks ranked by capitalization plus smaller companies chosen to ensure a reasonable number of companies in each industry. An exposure level of 0 for a particular stock to a particular factor indicates that the stock has the same exposure as the capitalization-weighted average of the stocks in the estimation universe. Around that zero exposure, deviations are measured in standard deviation units. Thus, an exposure level of +1 indicates that the stock has a greater exposure to the factor than roughly 68% of the stocks in the estimation universe.

#### **Beta**

Forecasts the sensitivity of a stock's return to the return on the market portfolio. The BARRA E3 beta is a forecasted beta, based on a company's exposure to a number of common risk factors and industries.

#### **Volatility (Vlty.)**

Captures relative volatility using measures of both long-term historical volatility and near-term volatility. Other proxies for volatility, corrections for thin trading and changes in volatility are also included in this descriptor.

#### **Momentum (Mom.)**

Indicates common variation in returns related to recent stock price behavior. Stocks that had positive excess returns in the recent past are grouped separately from those that displayed negative excess returns.

#### **Size**

Measures differences in stock returns due to differences in the market capitalization of companies.

#### **Size Nonlinearity (Size Non.)**

Describes deviations from linearity in the relationship between returns and a measure of market capitalization.

#### **Trading Activity (Trad. Acvty.)**

Measures the amount of relative trading in each stock. Stocks that are highly traded are likely to be those with greater institutional interest. Such stocks may display different returns behavior compared with those that are not widely held by institutions.

#### **Growth**

Uses historical growth and profitability measures to predict future earnings growth.

#### **Earnings Yield (E/Y)**

Combines current and historical earnings-to-price ratios with a measure of analyst-predicted earnings-to-price. Stocks with similar values of earnings yield behave in a similar fashion with respect to their returns.

#### **Value**

Distinguishes between value stocks and growth stocks using the ratio of book value of equity to market capitalization.

#### **Earnings Variability (Earn. Var.)**

Measures the variability in earnings and cash flows using both historical measures and analyst predictions.

#### **Leverage (Lev.)**

Indicates the financial leverage of a company using debt-to-total assets and other measures.

#### **Current Sensitivity (Curr. Sens.)**

Measures the sensitivity of a company's stock return to the return on a basket of foreign currencies.

#### **Dividend Yield (Div. Yld.)**

Predicts dividend yield using the past history of dividends and the market price behavior of the stock.

#### **Average Turnover (Avg T/O)**

Measures the total equity asset sales divided by the average value of the equity assets in the manager's portfolio. The reported number represents the median of twelve trailing monthly calculations.

#### **Equity Allocation (Eqty. Alloc.)**

Measures the percent of the manager's total portfolio invested in common stocks, preferred stocks and convertible securities.

## **Statistical Data**

### ***Bond Manager Portfolio Characteristics Glossary***

The bond manager portfolio statistics glossary is designed to define terminology the State Board of Investment uses in evaluating a bond manager's investment philosophy, risk characteristics and performance data. The definitions refer to categories shown in the Portfolio Characteristics table that follows this glossary.

#### ***Number of Issues (# of Issues)***

The number of different bond issues held in the manager's portfolio.

#### ***Average Quality Weightings (Avg. Qual.)***

The average rating given the portfolio's securities by a rating agency which can be any combination of: Moody's, S&P, or Fitch. A security's rating indicates the financial strength of its issuer and other factors related to the likelihood of full and timely payment of interest and principal.

#### ***Coupon***

The annual interest payment received on the manager's total portfolio stated as a percent of the portfolio's face value.

#### ***Yield to Maturity (Yield to Mat.)***

The compounded annualized return that the manager's total portfolio would produce if it were held to maturity and all cash flows were reinvested at an interest rate equal to the yield to maturity.

#### ***Duration***

A measure of the interest rate exposure of the total portfolio. Duration is a weighted average maturity where the time in the future that each cash flow is received is weighted by the proportion that the present value of the cash flow contributes to the total present value (or price) of the total portfolio.

#### ***Term to maturity (Term. to Mat.)***

A measure of the average life of the total portfolio. Term to maturity is the number of years remaining until the average bond in the portfolio makes its final cash payment.

#### Definitions:

**Local Returns** - The return in local currency for each country in the portfolio relative to the benchmark.

Country Allocation - The portion of return that can be attributed to over/underweighting countries relative to the benchmark. Country selection will be positive if the manager has overweighted countries that performed well and underweighted countries that did not perform well.

Stock Selection - The portion of return that can be attributed to the selection of securities within a country relative to the benchmark. Stock selection will be positive if a portfolio's local country return is greater than the benchmark.

Timing - The geometric amount of the relative local returns that cannot be accounted for by the Country Allocation or the Stock Selection. A timing number generally results from periods of high activity where the manager has reallocated across different countries.

**Currency Returns** - The relative difference between the base currency return and the local currency return.

Currency Selection - The geometric portion of the relative currency returns that can generally be attributed to significant flows between countries during periods of volatile exchange rates. Currency selection will be positive if a portfolio's currency return is greater than the benchmark.

Currency Allocation - The geometric portion of the relative currency returns that can be attributed to over/underweighting currencies relative to the benchmark. Currency allocation will be positive if the manager has overweighted currencies that performed well and underweighted currencies that did not perform well.

Hedging Activity - The geometric difference between the currency return of the manager's hedged portfolio and the currency return of the unhedged portfolio.

Timing - The geometric amount of the relative currency returns that cannot be accounted for Currency Selection and Allocation, and Hedging Activity. A timing number generally results from periods of high activity where the manager has reallocated across different countries.

**Base Return** - The return after conversion from local currencies to U.S. dollars.

Relative Value Added - The geometric difference between the portfolio's base return and the benchmark's base return.

Stock Selection - The portion of return that can be attributed to the selection of securities within a country relative to the benchmark. Stock selection will be positive if a portfolio's local country return is greater than the benchmark.

Timing - The geometric amount of the relative local returns that cannot be accounted for by the Country Allocation or the Stock Selection. A timing number generally results from periods of high activity where the manager has reallocated across different countries.

**Currency Returns** - The relative difference between the base currency return and the local currency return.

Currency Selection - The geometric portion of the relative currency returns that can generally be attributed to significant flows between countries during periods of volatile exchange rates. Currency selection will be positive if a portfolio's currency return is greater than the benchmark.

Currency Allocation - The geometric portion of the relative currency returns that can be attributed to over/underweighting currencies relative to the benchmark. Currency allocation will be positive if the manager has overweighted currencies that performed well and underweighted currencies that did not perform well.

Hedging Activity - The geometric difference between the currency return of the manager's hedged portfolio and the currency return of the unhedged portfolio.

Timing - The geometric amount of the relative currency returns that cannot be accounted for Currency Selection and Allocation, and Hedging Activity. A timing number generally results from periods of high activity where the manager has reallocated across different countries.

**Base Return** - The return after conversion from local currencies to U.S. dollars.

Relative Value Added - The geometric difference between the portfolio's base return and the benchmark's base return.

### Time-Weighted Rate of Return and Daily Performance Methodology

A time-weighted rate of return performance calculation methodology was used for all MSBI accounts through June 30, 2008. This type of performance calculation is based on month-end portfolio valuations. As of July 1, 2008, the MSBI began using a daily performance calculation methodology, based on daily portfolio values, for all funds except the Supplementals which were daily valued as of July 1, 2009. As with time weighted rate of return performance measurement, daily performance measurement includes the effect of income, realized and unrealized market value changes, and nets out the influence of contributions and distributions. (Cash flows do not need to be time weighted with daily valuation.)

#### Time Weighted Rate of Return

Time-weighted total rate of return performance measurement includes the effect of income earned as well as realized and unrealized portfolio market value changes. In addition, the time-weighted total rate of return nets out the influence of contributions made to and distributions taken from the manager or fund. These are variables over which the manager or fund generally has no control.

The calculation of a portfolio's true time-weighted return requires that the portfolio be valued every time that there is a capital flow in or out. Because most portfolios are not valued that frequently, it is usually necessary to estimate the time-weighted total rates of return by approximating the required valuations.

In 1968, the Bank Administration Institute (BAI) commissioned a study, conducted by the University of Chicago, which considered desirable methods of estimating time-weighted returns. The BAI report is considered to be the definitive work in the field of performance measurement because of the academic reputations and thorough scientific efforts of its authors.

When monthly data are available, the BAI study recommends employing a technique called the linked internal rate of return (LIRR). State Street Bank, the SBI's performance measurement consultant, calculates the LIRR by solving the following equation for R:

$$VB * (1 + R) + \sum_{i=1}^n Ci * (1 + R)^{ti} = VE$$

Where:

VB = Value of the fund at the beginning of the month

VE = Value of the fund at the end of the month

Ci = Net cash flow on the ith day of the month

n = Number of cash flows in the month

R = Internal rate of return

ti = Time from cash flow i to the end of the period, expressed as a percentage of the total number of days in the month

The internal rate of return, R, is a proxy for the true time-weighted return over the month. It approximates the interim valuations by assuming a uniform growth of the invested assets throughout the period.

The IRR's calculated for each month can be linked together to estimate the time-weighted return for a longer period. For example, given three consecutive monthly IRR's (R1, R2, and R3), the quarterly time-weighted return (TWRQ) is:

$$TWRQ = (1 + R1) * (1 + R2) * (1 + R3) - 1$$

State Street's performance methodology is also in compliance with the mandatory requirements of the CFA Institute.

#### Daily Performance Methodology

The performance for each portfolio and composite is computed by determining the value added for that day, or change in market value adjusted for external flows, over the day's beginning value adjusted for flows. The formula can be written as:

$$r = [(EMV - BMV - NCF) / (BMV + NCF)] * 100, \text{ where:}$$

EMV = End of day market value

BMV = End of prior day market value

NCF = Net Cash Flows (net of inflows and outflows)

Month to date returns, are computed by geometrically linking the daily results as follows:

$$R = \{[(1+r1) * (1+r2) * (1+r3) * \dots(1+r31)] - 1\} * 100$$

Returns for periods greater than one month are computed by linking the monthly results.

The difference in calculating a Gross of Manager fee return compared to a Net of Manager fee return is the different treatment of the manager fees. They are considered to be cash flows in the Gross calculation, but not in the Net calculation. Therefore, the Gross return should always be greater than the Net return. The reason being that in the Gross calculation, the fee is added back in the numerator and subtracted from the denominator of the equation, both of which have a positive effect on the return.

### Independent Auditor's Report

Members of the Minnesota State Board of Investment  
and  
Howard J. Bicker, Executive Director  
Minnesota State Board of Investment

We have audited the accompanying financial statements of the State of Minnesota's Supplemental Investment Fund and the Post Retirement Investment Fund as of and for the year ended June 30, 2009, as shown on pages 112 - 119. These financial statements are the responsibility of the Minnesota State Board of Investment's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The financial statements present only the Supplemental Investment Fund and the Post Retirement Investment Fund of the State of Minnesota and are not intended to present fairly the financial position and results of operation of the State Board of Investment or the State of Minnesota in conformity with accounting principles generally accepted in the United States of America.

In our opinion, the financial statements of the Supplemental Investment Fund and the Post Retirement Investment Fund, referred to above, present fairly, in all material respects, the net assets as of June 30, 2009, and the changes in net assets and results of operations for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

As disclosed in Note 8 to the financial statements, due to the dissolution of the Post Retirement Investment Fund, the State Board of Investment transferred the fund's assets back to each participating public retirement plan on June 30, 2009, in accordance with *Minnesota Statutes* 2008, 11A.181.09.

Members of the Minnesota State Board of Investment  
Howard J. Bicker, Executive Director  
Page 2

In accordance with *Government Auditing Standards*, we will also issue our report dated December 30, 2009, on our consideration of the Minnesota State Board of Investment's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements, and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

Our audit was conducted for the purpose of forming an opinion on the financial statements of the State of Minnesota's Supplemental Investment Fund and the Post retirement Investment Fund. The supporting schedules on pages 121 - 170 are presented for the purpose of additional analysis and are not a required part of the financial statements of the Supplemental Investment and Post Retirement Funds of the State of Minnesota. These supporting schedules and the financial information on pages 1 through 108 have not been subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on them.

  
James R. Nobles  
Legislative Auditor

  
Cecile M. Ferkul, CPA, CISA  
Deputy Legislative Auditor

# NOTES TO THE FINANCIAL STATEMENTS

## JUNE 30, 2009

### 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

**Financial Reporting Entity and Basis of Presentation:** This report includes financial statements for the Supplemental Investment, and Post Retirement Trust funds of the State of Minnesota, which are administered by the State Board of Investment under authority of *Minnesota Statutes Chapter 11A*.

The financial statements presented for these funds are based on the preferred accounting practices described in the **American Institute of Certified Public Accountants** audit guide, "**Audits of Investment Companies**". These practices, and the significant accounting policies which follow, conform with generally accepted accounting principles.

**Authorized Investments:** *Minnesota Statutes, Section 11A.24* broadly restricts investments to obligations and stocks of the U.S. and Canadian governments, their agencies and their registered corporations; short term obligations of specified high quality, international securities; restricted participation as a limited partner in venture capital, real estate or resource equity investments; and restricted participation in registered mutual funds.

**GASB 40: Deposit and Investment Risk Disclosures** was issued in March 2003. This standard establishes and modifies disclosure requirements for deposit and investment risks including credit risk, interest rate risk, and foreign currency risk. SBI implemented this statement during the fiscal year ended June 30, 2005.

**Security Valuation:** All securities are valued at fair value except for U.S. Government short-term securities and commercial paper, which are valued at fair value less accrued interest. Accrued short-term interest is recognized as income as part of "Short-Term Gain". For long-term fixed income securities the SBI uses the Financial Times - Interactive Data Services valuation system. This pricing service is capable of providing prices for both actively traded and privately placed bonds. For equity securities the State Board uses a valuation service provided by Reuters. The basis for determining the fair value of investments that are not based on market quotations includes audited financial statements, analysis of future cash flows, and independent appraisals.

**Recognition of Security Transactions:** Security transactions are accounted for on the date the securities are purchased or sold.

**Income Recognition:** Pool dividend income is recorded on the ex-dividend date. Pool interest and dividend income are

accrued monthly. Short-term interest is accrued monthly and is presented as "Accrued Short-Term Gain".

**Amortization of Fixed Income Securities:** Premiums and discounts on fixed income purchases are amortized over the remaining life of the security using the "Effective Interest Method".

**Loaning Securities:** State Statutes do not prohibit the SBI from participating in security lending. As such, domestic and international corporate securities as well as certain US Government and Government Agency securities are loaned out by the State Board to banks and brokers for additional income. Collateral in the amount of 100% of the fair value of the security loaned is required.

During the Fiscal Year, SBI and the borrowers maintained the right to terminate all securities lending transactions on demand. The cash collateral received on each loan was invested in a separate investment pool. As of June 30, 2009, the investments of cash collateral had an average duration of 37 days and a weighted average maturity of 201 days. Since the loans are terminable at will, their duration is not matched to the duration of investments made with cash collateral. On June 30, 2009 Minnesota had no credit risk exposure to borrowers. The collateral held and the fair value of securities on loan for the State Board as of June 30, 2009 for the SBI Supplemental Investment Fund were \$126,551,002 and \$122,077,245 respectively.

The SBI utilizes State Street Bank (SSB) to manage its Securities Lending program. SSB provides the SBI indemnification in the event a borrower defaults by failing to return a loaned security.

### 2. PORTFOLIO LISTING

Asset listings summarizing the securities held by these funds can be found starting on page 151 of this report. A complete listing is available by contacting the State Board's office. Fixed income and equity securities are presented at fair value.

### 3. COST OF INVESTMENTS

At June 30, 2009, the cost of investments for the Trust Funds, excluding security lending collateral, was:

Supplemental Investment Fund	\$ 1,123,295,402
Post Retirement Trust Fund	\$ 0

### 4. LOANED SECURITIES

4(a) The fair value of loaned securities outstanding at June 30, 2009, in the Supplemental fund was:

Supplemental Investment Fund	\$ 122,077,245
------------------------------	----------------

## NOTES TO THE FINANCIAL STATEMENTS

### JUNE 30, 2009

4(b) In accordance with GASB 28, Accounting and Financial Reporting for Security Lending Transactions, the amount of cash collateral is concurrently an asset and a liability at the balance sheet date.

Non-cash collateral is considered an asset and a liability only if the lender has the right to sell collateral absent of borrower default. There is no such right in our case.

4(c) In accordance with GASB 28, Accounting and Financial Reporting for Security Lending Transactions, gross lending income, borrower rebate and agent fees must be reported on the face of the Statement of Operations.

#### 5. DERIVATIVE INSTRUMENTS

In accordance with GASB Technical Bulletin 2003-1, effective June 15, 2003, MSBI has reported derivative activity at fair value on these financial statements. Derivative activity is conducted through contracts traded on government regulated exchanges. Its primary purpose is to improve performance or to expose cash and specified short term securities to market conditions without the expense of purchasing the actual security.

At June 30, 2009, the SBI Supplemental Investment Fund held outstanding long positions with a notional value of \$8,359,841 and estimated fair value of (\$107,355) along with short positions with a notional value of (\$1,469,617) and estimated fair value of (\$1,133). The fair value of these contracts is a component of Unrealized Gain/Loss.

At June 30, 2009, the SBI Supplemental Investment Fund had \$8,729,947 in open trades for TBA Mortgage-Backed Securities. The fair value of this component is included in Fixed Income Securities with an off-setting amount in security purchases payable of \$8,667,129 and an Unrealized Gain/(Loss) of \$62,727.23.

#### 6. POOLED INVESTMENT ACCOUNTS

The State Board of Investment manages five pooled investment accounts for the Investment Trust Funds, the Supplemental Investment Fund and the Defined Benefit Pension Funds of the State of Minnesota. SBI's master custodian, State Street Bank and Trust holds the assets of the pooled accounts. Financial information on these pooled accounts is shown on pages 140 to 148 of this report.

SBI considers the pools to be the owners of the investments and that the participants, such as the Supplemental fund, own a proportionate share of the pool. Policies relating to the management of the investments apply to the pools with the participants invested based on objectives of the pools. The schedules shown in note seven reflect the Supplemental funds proportionate share of pooled investments.

Deposit and investment risk disclosures are abbreviated in this note. For expanded discussion of the Statutory, Board,

and contractual guidelines followed to limit investment risk by external and internal managers of the pooled investments see the Introduction and Investment Pools sections of this 2009 Annual Report.

#### Interest Rate Risk – Investments

Interest rate risk is the risk that changes in interest rates of debt instruments could adversely affect the fair value of an investment. Per its constitutional authority and governance by elected State officials that comprise the Board, the Board issues investment guidelines and limitations regarding interest rate risk that are incorporated into the contracts between investment managers and SBI. Debt securities are constrained around the quality rating, sector mix and duration of the Lehman Aggregate Bond Index allowing for an average duration of +/- 0.2 years for semi-passive managers and +/- 2.0 years for active managers. Interest rate risk information is presented using the weighted average maturity method, which expresses investment time horizons, the period when investments become due and payable, in years or months, weighted to reflect the dollar size of individual investments within investment types.

#### Credit Risk of Debt Security Investments

Credit risk is the risk that an issuer or counterparty to an investment will be unable to fulfill its obligations. Minnesota Statutes limit investment in debt securities to the top four quality ratings categories by a nationally recognized rating agency. The SBI credit policy is not more stringent than the statutory requirements. Within the contracts between SBI and investment managers are guidelines and limitations regarding interest rate risk, such as, any debt security with a grade quality rating issued by Moodys, S&P, or Finch or with specific written authorization qualifies for investment. The quality ratings in Table 1 follow the GASB 40 convention of choosing the lowest investment rating reported by Moodys or S&P.

#### Concentration of Credit Risk - Investments

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer. The investment guidelines issued to investment managers by the State Board require investment across all sectors of the market. Unrated or below investment grade corporate obligations are limited to less than five percent of the value of the acquiring fund, 50% of an issue and 25% of the issuer's obligations. Investments in corporate stock may not exceed five percent of the total outstanding of any one corporation.

For the Supplemental Investment Funds none of the issuers produced exposure greater than five percent of the Funds' values.

## NOTES TO THE FINANCIAL STATEMENTS

### JUNE 30, 2009

#### Foreign Currency Risk – Investments

Foreign currency risk is the risk that changes in exchange rates between the U.S. dollar and foreign currencies could adversely affect the fair value of an investment. Investment managers with authority to invest in foreign securities are

given authority to hedge foreign currency through forward contracts in order to avoid currency losses. The Supplemental Investment funds exposure to foreign currency risk is presented in Table 2 below.

#### 7. SUPPLEMENTAL INVESTMENT FUND

The Supplemental Investment Fund serves as an investment vehicle for the various state and locally administered pension plans. During Fiscal Year 2009 the fund included seven separate accounts with different investment objectives. Financial information on the individual accounts is shown on pages **122 to 139** of this report. Participation in the Supplemental Investment Fund accounts is determined in accordance with various statutory requirements.

The SBI invests the assets of the Supplemental Investment Fund as discussed in the Supplemental Investment Fund section of this report. The investment allocation is a factor of the investment decisions of the participants and the investment objectives of the funds they select. Debt securities comprise 13% of this allocation. Assets of the Supplemental Investment Fund are comprised of shares of the investment pools managed by SBI. The tables below represent the Supplemental Investment Fund's participation in the pooled investment accounts.

**Table 1**

#### **Debt Securities Credit Quality and Exposure of the Supplemental Funds' Share of the Pooled Investment Accounts as of June 30, 2009 (In Thousands)**

**NOTES TO THE FINANCIAL STATEMENTS**  
**JUNE 30, 2009**

**8. POST RETIREMENT INVESTMENT FUND**

On June 30, 2009, the assets of the Post Retirement Investment Fund (POST) were transferred back to the participating plans in accordance with Minnesota Statutes Section 11A.181. On June 29, 2009, the assets and accrued earnings of the Post Retirement fund were valued by State Street Bank in accordance with generally accepted accounting principles. The \$16,711,638,000 in investments and \$441,000 in accrued income was distributed to the participating plans based on their participation in the POST fund per Minnesota Statutes Section 11A.18 Subd. 7 at net participation at fair market value.

## NOTES TO THE SUPPLEMENTAL FINANCIAL STATEMENTS

### JUNE 30, 2009

#### 1. PORTFOLIO LISTING:

Asset listings summarizing securities held by these funds can be found starting on page **151** of this report. Fixed income and equity securities are presented at fair value.

#### 2. COST OF INVESTMENTS:

At June 30, 2009 the cost plus accrued income of investments for the Minnesota Pooled Investment Accounts and the individual accounts of the Minnesota Supplemental Investment Fund, excluding security lending collateral, was:

#### MINNESOTA POOLED INVESTMENT ACCOUNTS

##### DOMESTIC ACCOUNTS

Equity Account	\$ 17,605,741,236
Bond Account	\$ 8,789,350,124
Alternative Investment Accounts	\$ 5,438,726,935

##### INTERNATIONAL ACCOUNTS

Equity Account	\$ 6,002,790,182
----------------	------------------

#### SUPPLEMENTAL INVESTMENT FUND

Income Share Account	\$ 210,187,645
Growth Share Account	\$ 134,843,247
International Share Account	\$ 131,993,920
Money Market Account	\$ 174,100,514
Stock Index Account	\$ 276,655,145
Bond Market Account	\$ 100,885,996
Fixed Interest Account	\$ 94,628,935

#### 3. LOANED SECURITIES:

The fair value of loaned securities outstanding at June 30, 2009 for the Minnesota Pooled Investment Accounts included in the total investments figure was:

Equity Account (Domestic)	\$ 2,296,850,870
Equity Index Account (Domestic)	\$ 1,373,300,080
Bond Account (Domestic)	\$ 1,215,085,306
International Equity Account	\$ 1,501,780,393

The fair value for non-pooled investment accounts includes:

Money Market Account	\$ 35,210,447
Income share Account Fixed Income	\$ 3,118,908

#### 4. UNDISTRIBUTED INCOME:

The Undistributed Dedicated Income of the pooled investments consists of the net increase (decrease) in the fair value of investments plus the difference between cash basis used in the Minnesota Statutes 11A.14 Subd. 12 distribution and the fair value accrual basis used in these financials.

\* Manager Terminated in Fiscal '09  
~ Manager Terminated June 30, 2008

- (1) Most active stock managers, with the exception of those managing small portfolios, are compensated on a performance-based fee formula. Four fee options are available and fees earned range from zero to twice the manager's base fee, depending on the manager's performance relative to an established benchmark.
- (2) Active bond managers and semi-passive bond managers are compensated based on a specified percentage of assets under management.

Notes applicable to all Summarized Asset Listings:

The data source for the Summarized Asset Listings was State Street Bank & Trust, the SBI's custodian.

Market value figures in the Summarized Asset Listings may not reconcile to the amounts shown for various Accounts in the Financial Statements due to minor pricing differences between Financial Control Systems and State Street Bank as well as trade adjustments that were reflected in the Financial Statements.

Percentage totals may not add due to rounding.
