

MINNESOTA
PETROLEUM TAXES
ANNUAL REPORT

MINNESOTA • REVENUE

2009 Report on Petroleum Taxes

Introduction

The mission of the Petroleum Unit is to achieve compliance with the laws pertaining to the taxes and fees we administer. Most revenues collected are dedicated to specific purposes:

The motor vehicle gasoline and special fuel taxes, approximately \$756 million collected during 2009, are dedicated to the **Highway User Tax Distribution Fund**.

Taxes totaling approximately \$3.6 million collected during the past year on aviation gasoline and jet fuel were transferred to the **Aviation Fuel Tax Fund**.

The Cleanup Fee, which amounted to approximately \$22 million during the year, is used to **clean up spills from leaking storage tanks**. This fee is imposed for periods of four consecutive months and is imposed when the fund level goes below \$4 million.

Inspection fees amounting to \$3.9 million are used partially for activities performed by the **Department of Commerce, Weights and Measures Division**, and to provide funding to **improve the efficiency of heating units in low income housing**. The remainder goes into the **General Fund**.

Propane Fees amounting to \$391,694 are also used to provide funding to **improve the efficiency of heating units in low income housing**.

Approximately \$14,475 in license fees are placed in the **General Fund**.

The Petroleum Tax Unit

The Petroleum Tax Unit collects state taxes on gasoline, special fuel, aviation special fuel and aviation gasoline, and collects inspection and cleanup fees on petroleum products received in Minnesota. It licenses distributors, special fuel dealers and bulk purchasers, and issues certain gasoline and special fuel tax refunds.

The Petroleum Tax Unit is comprised of the following units which perform a wide range of activities:

The License Unit issues new distributor and special fuel licenses.

The Document Processing Unit receives, records and pre-audits returns from distributors, special fuel dealers and bulk purchasers; and prepares and maintains

records of receipts and disbursements, including additional tax and overpayment notices and related correspondence.

The Computer Support Unit provides assistance in developing and maintaining all computer systems.

The Office Audit Unit audits terminal reports and distributor and special fuel tax returns, initiates assessments and credits, maintains files on licensed accounts, processes aviation and miscellaneous refund claims, and answers questions on adjustments and reporting procedures.

The Field Audit Unit performs field audits of licensed distributors, special fuel dealers, bulk purchasers and interstate trucking companies, and reviews

refund claims. It assists clientele in setting up record keeping systems, and detects and assesses taxes due from unlicensed accounts consuming or selling petroleum products on which the tax has not been paid or accrued.

The Field Audit Unit also administers the dyed fuel program, which includes checking licensed vehicles throughout the state.

License Summary

Distributors of petroleum products	469
Special fuel dealers and bulk purchasers	180
Total	649

Receipts and Collections, 1989–2009

1960	5¢	1,866,907.60	1,438,856.95

The method for collecting the aviation taxes changed in 1984. Prior to 1984, the rate for aviation fuels was 5 cents per gallon, but the full gasoline tax was charged, and the purchaser had to apply for a refund of the difference. Then, starting in 1984, purchasers were charged only the aviation fuel rate, and only those using more than 50,000 gallons per year have a need to apply for a refund based on the graduated refund scale. Starting in 2000, the amount shown as tax collected is the net amount after refunds were taken by major airlines as credits on their tax returns.

Petroleum Taxes in Minnesota was prepared by the Petroleum Tax Unit of the Minnesota Department of Revenue.
