FOREWORD

The Educational Cooperative Service Unit of the Metropolitan Twin Cities Area is pleased to present the 2003 - 2024 Class Size Study, the thirty-ninth in a series of annual reports published by this agency and, previously, by the Educational Research and Development Council.

The data reported herein describe both regional and local norms. We wish to emphasize the danger of making assumptions about a district's staffing pattern based on class size statistics alone.

We hope that the information contained in this report will be useful to decision makers and interested citizens served by Metro ECSU. Questions or comments about this report should be directed to Gary Gibson (612-638-1514).

Chapter 1

INTRODUCTION

This year's Annual Class Size Study represents the thirty-ninth in a series of class size reports published by the Educational Cooperative Service Unit (Metro ECSU) and, previously, by the Educational Research and Development Council (ERDC). The report describes class size statistics for the school districts of the ECSU of the Metropolitan Twin Cities Area. To enable the reader to interpret this report accurately, it is necessary to describe the report briefly in terms of data collection and reporting procedures.

Sources of Data

The class size questionnaire was modeled after the instrument used in past years. (Appendix B contains a copy of the questionnaire.) A contact person in each district was responsible for collecting data from each building in the district, aggregating the data in a composite form, and returning the data to the ECSU for data processing. Instructions for determining and reporting class size are also included in Appendix B.

After the data were collected from all participating districts, a proof copy of the tables was made and sent to each district for review prior to final printing of the report.

Organization of the Report

This year's Class Size Study contains a glossary (Chapter 2) which should be read prior to the review of the tables. Chapter 3 contains regional statistical highlights for the Metropolitan Area. The highlights represent regional norms for all class size categories and are calculated by aggregating local data. Chapters 4, 5, and 6 report each part focusing on the elementary, junior secondary, or senior secondary program. It should be noted that consistent grade groupings have not been used for each district.

Chapter 8 reports descriptive statistics according to selected grade groupings for each school district. Data were reported excluding special education students, including special education students, and for special education students only.

Appendix A reports written comments submitted by local staff. Appendix B contains the instrument used to collect the class size data.

Limitations

The following considerations should be taken into account when reviewing data in the Annual Class Size Study:

- Class size data included in this report are October 1 counts.
- At the junior and senior secondary levels, no attempt has been made to include all subjects offered by all schools; only subject areas that are typically offered at the secondary level have been included.
- Data from modular scheduled schools are not included.

The information in this report represents a single year's view of the class size patterns of the participating school districts. Making comparative inferences for the future would not be judicious. Even with historical data available for trend analysis, the factors associated with class size trends produce variations among districts that are to be expected, but difficult to predict. This limitation does not suggest, however, that lay citizens, school practitioners, and school theorists should not carefully analyze past trends and present conditions for the purpose of planning for the future.

In addition, it is tempting to interpret interdistrict comparisons in terms of relationships which suggest cause and effect. The reader should be careful in making comparisons. Class size data among school districts will be different because of many factors, including educational philosophy, school facility design, school district organizations, economic stability, school district size, management methods, and utilization of specialists or paraprofessionals in conjunction with professional staff. Although the descriptions contained within the tables of this report demonstrate normative comparisons, the data reported simply describe what exists, not why differences exist among the districts.

Chapter 2

GLOSSARY

1. Average (Mean) Class Size

Average (Mean) Class Size represents the class size which equals the arithmetic average of class sizes reported. The average is the total of reported class sizes divided by the number of classes reported. Averages are reported to the nearest one hundredth.

2. Class Size

Class Size refers to the number of students in a group or class organized for the purpose of instruction.

3. Class Size Range

Class Size Range represents the maximum and minimum class sizes reported for a given grade or subject area.

4. Elementary

This grouping may include the following grades: pre-K, K, 1, 2, 3, 4, 5, 6. Combination grades/ungraded (elementary) and special education classes may also be included. Depending on individual district grade organization, "elementary" may not include grades 5 or 6. Refer to Tables 1a and 1b for a listing of the participating school districts and their corresponding grade organizations.

5. Grade Organization Patterns

Grade Organization Patterns refers to grade structures within districts, e.g., K-6, 7-9, 10-12; K-5, 6-8, 9-12; etc. Table 1a reports the grade organization pattern for districts in the region.

6. Junior Secondary

This grouping includes students in middle schools, junior high schools, or the first part of a six-year secondary programs, i.e., a secondary school consisting of grades 7-12. Refer to Tables 1a and 1b for a listing of the participating school districts and their corresponding grade organizations.

7. Senior Secondary

This grouping includes students at the senior high school level or in the second part of a six-year program, i.e., a secondary school consisting of grades 7-12. Refer to Tables 1a and 1b for a listing of area school districts and their corresponding grade organizations.

8. Special Education

Special Education Classes: A definition

Setting III: Separate Class

Learners receiving education programs in a separate class include children and youth with disabilities receiving special education and related services OUTSIDE THE REGULAR CLASSROOM for more than 60 percent of the school day. Does not include pupils who receive education programs in public or private separate day or residential facilities.

Setting IV: Public Separate Day School

Learners receiving education programs in public separate day school facilities include children and youth with disabilities receiving special education and related services for greater than 50 percent of the school day in separate facilities. Do not include "mainstreamed" students, students in residential facilities, or students receiving part and half-time direct services in coordination with regular teachers.

Chapter 3

REGIONAL CLASS SIZE STATISTICS

Averages and class size ranges for the region as a whole are reported in this chapter.

Table 1. Elementary Class Sizes - Regionwide

Chapter 4

ELEMENTARY CLASS SIZE STATISTICS

In this chapter, elementary class size data are reported for each participating district for grades pre-K, K, 1, 2, 3, 4, 5, 6, multi-age groups/combination grades, and Special Education.

Table 8 reports the average class sizes for each school district. Districts are ranked from low to high according to the average calculated.

Table 9 reports class size maximums and minimums for each school district. Districts are ranked from high to low based upon the maximum class size, not the difference between the maximum and minimum class sizes.

Chapter 5

JUNIOR SECONDARY CLASS SIZE STATISTICS

In this chapter, junior secondary class size data are reported for each participating district in selected subject areas.

Tables 10 reports the average class sizes for each school district. Districts are ranked from low to high according to the median or average calculated.

Table 11 reports class size maximums and minimums for each school district. Districts are ranked from high to low based upon the maximum class size, not the difference between the maximum and minimum class sizes.

SENIOR SECONDARY CLASS SIZE STATISTICS

In this chapter, senior secondary class size data are reported for each participating district in selected subject areas.

Table 11 reports the average class sizes for each school district. Districts are ranked from low to high according to the average calculated.

Table 12 reports class size maximums and minimums for each school district. Districts are ranked from high to low based upon the maximum class size, not the difference between the maximum and minimum class sizes.

Chapter 7

CLASS SIZE STATISTICS REPORTED BY SELECTED GRADE GROUPINGS

This chapter reports average class size data by selected grade groupings (i.e., K, 1-3, 4-6, K-6, Junior Secondary, Senior Secondary, Junior/Senior Secondary) for class sizes excluding special education, including special education, and for special education students only. Districts are ranked from low to high according to the size of average calculated.

TABLE 14 - AVERAGE CLASS SIZE - BY GRADE GROUP (EXCLUDING SPECIAL ED)
