

February 2011

This annual report summarizes new affordable housing added each year by Twin Cities area cities and townships.

Every year the Metropolitan Council determines a price-point for new owneroccupied housing that is affordable to households at 80 percent of area median family income, as calculated by the U.S. Department of Housing and Urban Development, at the prevailing home mortgage interest rates (estimated to be 5.25 percent for a 30-year fixed-rate home loan in 2009). This definition assumes that households earning 80 percent of the region's median income can afford mortgage costs (mortgage payments, taxes, insurance and related housing costs) without spending more than 30 percent of their income. The area median income (AMI) for 2009 was \$83,900; 80 percent of AMI was \$67,200. The Council considered owner-occupied units affordable if the price was less than \$233,300.

For affordable rental price-points, the Metropolitan Council used the maximum monthly rent limits permitted in the Minneapolis-St. Paul metropolitan statistical area units built to serve households at 50 percent of AMI or \$41,950 in 2009 (\$733/ month for an efficiency or single-room occupancy unit, \$786/month for a onebedroom unit, \$943/month for a twobedroom unit, and \$1,090/month for a threebedroom unit, \$1,216 for a four-bedroom or larger unit).

For more information on the methodology, see Appendix A on p. 9.

Percent of Units Added that were Affordable, 2009

- Overall in 2009, there were 1,527 new affordable units (owner- and renteroccupied units combined) added in the Twin Cities region; 33 percent of all housing added in 2009 was affordable. This was an increase from the 26 percent calculated in 2008.
- Twenty-eight percent of all rental units added were affordable. This was a decrease from the 32 percent calculated in 2008.
- 358 new affordable rental units were added. More than half were built in Minneapolis.
- Thirty-five percent of all new owner-occupied housing units added were affordable. This was an increase from the 23 percent calculated in 2008.
- 1,169 new affordable owner-occupied units were added. Sixty-nine percent were built in developing communities.
- From 1996 through 2009, there were 50,500 new affordable units (owner- and renter-occupied units combined) added in the Twin Cities region; 26 percent of all new housing added was affordable.
- From 1996 through 2009, 11,090 affordable rental units were added, or 31 percent of all rental units added.
- From 1996 through 2009, 39,410 new affordable owner-occupied housing units were added, or 24 percent of all new owner-occupied housing units added.

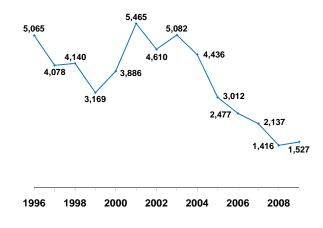

Affordable Housing Production in the Twin Cities

February 2011

Total New Affordable Housing Permitted in 2009

In 2009, there were 1,527 new affordable units (owner-occupied and rental units combined) added to the Twin Cities region, which means one-third (33 percent) of the housing added in 2009 was affordable. This was an increase from the 26 percent calculated in 2008.

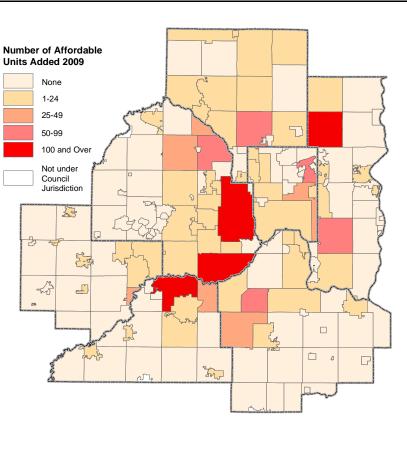

The number of affordable units produced by the region has steadily decreased every year from 2003 until 2008. In 2009, this trend was halted. In 2008, 1,416 affordable units were added. This was the lowest total number of affordable units reported in the 14 years of the Metropolitan Council's survey. In 2009, there were 1,527 affordable units added, which is an eight percent increase from 2008. This gain occurred despite 2009 having the lowest number of residential building permits on record (4,328 units).

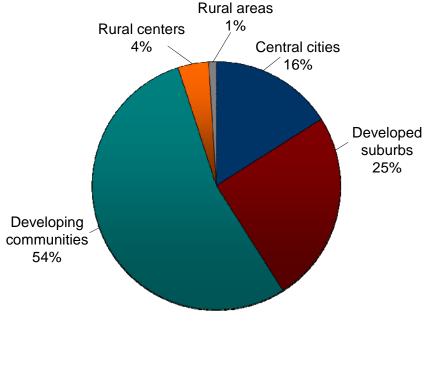

The majority (54 percent) of the new affordable units in 2009 were built in the developing communities with 831 units being added. The developed suburbs had 379 new affordable units added (25 percent). The central cities had 239 new affordable units added (16 percent). The rural centers had 66 new affordable units added (4 percent). Other rural communities added 12 new affordable units (1 percent).

The top 10 communities producing new affordable units during 2009 were:

Minneapolis	218	Woodbury	86
Shakopee	169	Blaine	77
Bloomington	105	Apple Valley	62
Hugo	100	White Bear Lake	61
Brooklyn Park	94	Savage	47

Affordable Housing Production in the Twin Cities

February 2011

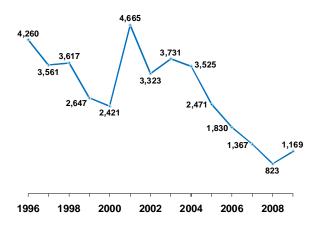

New Affordable Owner-Occupied Housing Permitted in 2009

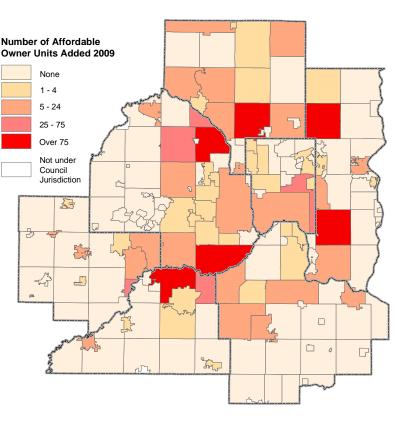

Over 35 percent of the new owner-occupied housing units permitted in 2009 were affordable to households earning 80 percent of area median income. This was an increase from the 23 percent calculated in 2008, and the highest affordability rate since 2001 (36 percent). Forty-seven communities showed gains in affordable owner-occupied units from the previous year. Shakopee (169 units), Bloomington (105 units) and Hugo (100 units) all produced 100 or more affordable owner-occupied housing units.

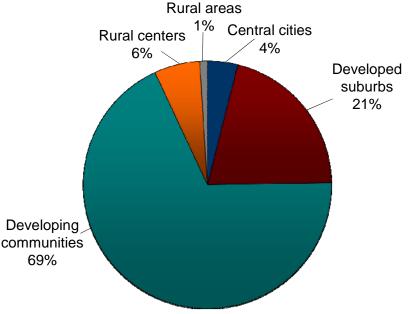

Of all the new affordable owner-occupied units added in 2009 (1,169 units), 69 percent were built in the developing communities. The developed suburbs contributed 21 percent of the total. The central cities added 4 percent of the total. The rural centers added 6 percent of the total, while other rural areas added 1 percent.

The top 10 communities producing new affordable owner-occupied units in 2009 were:

Shakopee	169
Bloomington	105
Hugo	100
Brooklyn Park	94
Woodbury	86
Blaine	77
Savage	47
Maple Grove	45
Maplewood	34
Carver	29
Champlin	29

Affordable Housing Production in the Twin Cities

February 2011

New Affordable Rental Housing Permitted in 2009

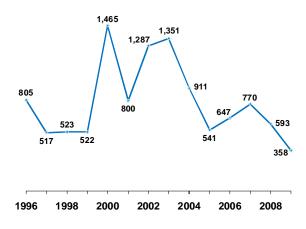

Almost 28 percent of the new rental housing units permitted in 2009 were affordable to households earning 50 percent of area median income. This was a decrease from the 32 percent calculated in 2008.

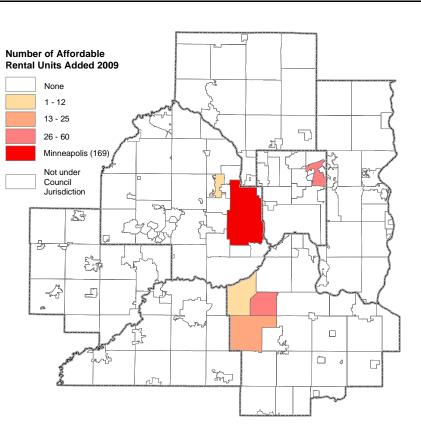

There were only six communities that produced affordable rental units in 2009. Of these, five communities showed gains in affordable rental units from the previous year. Minneapolis had the largest number of affordable rental units, with 196.

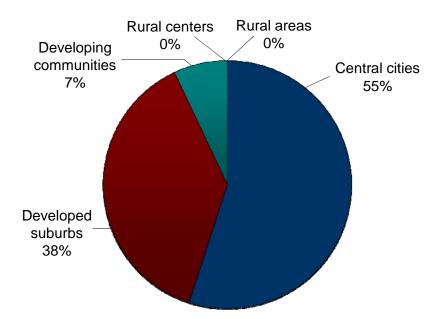

The stock of new affordable rental units added in 2009 (358 units) was the lowest amount on record since 1996. Of the 358 affordable rental units added in 2009, 55 percent were built in the central cities (entirely in Minneapolis). The developed suburbs added 38 percent of the total, while the developing communities (Lakeville) were at 7 percent. The rural centers and other rural areas added no affordable rental units in 2009.

The communities producing new affordable rental units in 2009 were:

Minneapolis	196
Apple Valley	60
White Bear Lake	60
Lakeville	25
Crystal	12
Burnsville	5

Affordable Housing Production in the Twin Cities

February 2011

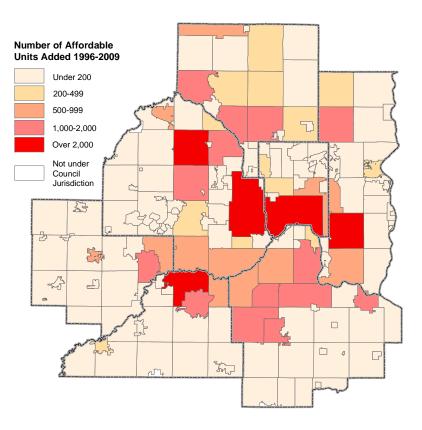

Production of New Affordable Housing, 1996-2009

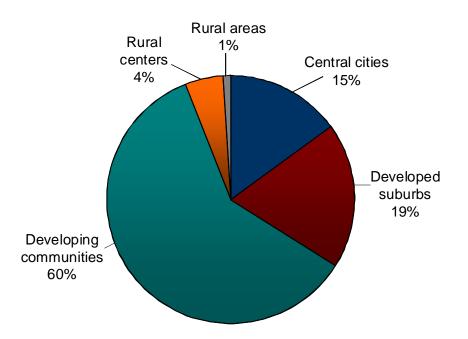

In their responses to the survey, communities reported the addition of 197,149 new housing units between 1996 and 2009. Of these, 50,500 were deemed affordable according to the Council's annual affordability limits. Almost 26 percent of the new housing units reported from 1996 to 2009 were deemed affordable. These units include 11,090 new affordable rental units out of the 35,393 total new rental units constructed, and 39,410 new affordable owner-occupied units out of the 161,756 total new owner-occupied units constructed.

The majority (60 percent) of the new affordable units constructed from 1996 to 2009 were built in the developing communities, with 30,369 units being added. The developed suburbs had 9,779 new affordable housing units added, or 19 percent of all new affordable units added. The central cities had 7,500 new affordable housing units added or 15 percent of all new affordable housing added. The rural centers had 2,210 new affordable housing units added or 4 percent of all new affordable housing added. Rural communities added 642 new affordable units or 1 percent of all new affordable housing added.

The top ten communities producing new affordable housing units since 1996 are:

Minneapolis	5,000
Shakopee	2,830
St. Paul	2,500
Maple Grove	2,265
Woodbury	2,152
Lakeville	1,682
Blaine	1,681
Farmington	1,676
Inver Grove Heights	1,441
Hugo	1,389

Affordable Housing Production in the Twin Cities

February 2011

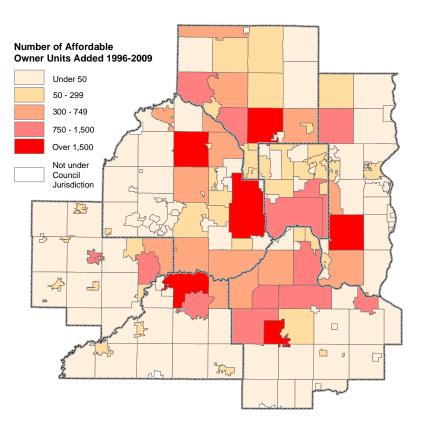

Production of New Affordable Owner-Occupied Housing, 1996-2009

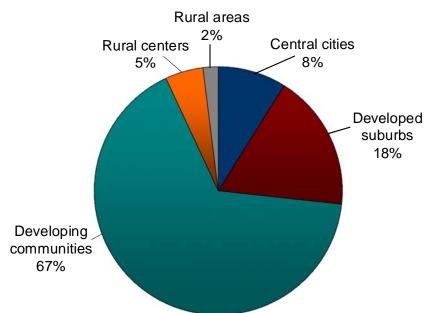

Twenty-four percent of the new owner-occupied housing units reported from 1996 to 2009 were deemed to be affordable.

Of all the new affordable owner-occupied units added to the region (39,410 units) from 1996 to 2009, 67 percent were built in the developing communities. The developed suburbs contributed 18 percent of the total while the central cities added 8 percent of the total. The rural centers added 5 percent, and the other rural communities added 2 percent of the new affordable owner-occupied units during these years.

The top ten communities producing new affordable owner-occupied units since 1996 are:

Shakopee	2,682
Minneapolis	2,147
Woodbury	1,944
Maple Grove	1,921
Farmington	1,575
Blaine	1,547
Lakeville	1,420
Hugo	1,389
Ramsey	1,249
St. Paul	1,188

February 2011

MetroStats

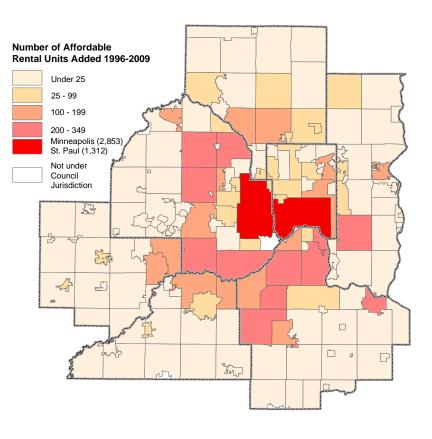

Production of New Affordable Rental Housing, 1996-2009

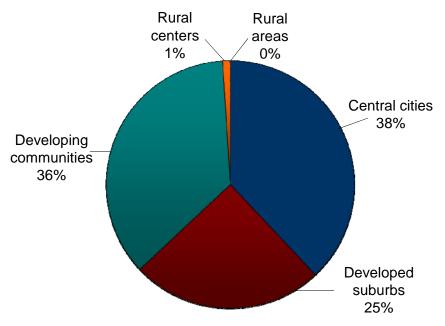

Thirty-one percent of the new rental housing units added from 1996 to 2009 were deemed to be affordable.

Of all the new affordable rental units added (11,090 units) from 1996 to 2009, 38 percent were built in the central cities. The developing communities contributed 36 percent of the total, while the developed suburbs added 25 percent of the total. Rural centers added 1 percent of the total while the other rural communities added a negligible number (less than 1 percent).

The top ten communities producing affordable rental units since 1996 are:

Minneapolis	2,853
St. Paul	1,312
Brooklyn Park	349
Maple Grove	344
Apple Valley	306
Inver Grove Heights	306
Eden Prairie	290
Plymouth	284
Lakeville	262
Hastings	249

Regional Goals and Production Levels of Affordable Units, 1996-2009

Participants in the Livable Communities Act (LCA) program have negotiated goals that represent the addition of 100,821 affordable units for the region by 2010 (84,981 owner-occupied units and 15,840 rental units). Even if production continues at the pace it has for the last thirteen years, the region will fall short of the goals by over 47,000 units.

These numbers are intended to help communities understand the significant number of new affordable units that would need to be added if they were to achieve their 2010 LCA housing goals. The number of residential units permitted overall has decreased every year since 2004. The 4,328 housing units reported in the Metropolitan Council's Annual Survey of Building Permits in 2009 was 16 percent lower than the previous lowest recorded total in 2008.

Affordable Housing Units	New Affordable Units Reported, 1996-2008	New Affordable Units Reported, 2009	Total New Affordable Units Reported, 1996-2009	1996-2010 Goals
Owner-occupied	38,241	1,169	39,410	84,981
Rental	10,732	358	11,090	15,840
All	48,973	1,527	50,500	100,821

If the production of affordable owner-occupied units in 2010 continued at the 2009 pace, the region's communities will fall short of their negotiated LCA goals of nearly 85,000 owner-occupied affordable units by over 44,000 units.

If the production of affordable rental units continued in 2010 at the 2009 pace, the region's communities will fall short of their negotiated LCA goals of nearly 16,000 affordable rental units by over 4,000 units.

February 2011

MetroStats

Appendix A: Data Sources and Definitions

Data Sources

Metropolitan Council's Annual Residential Construction Survey: The Metropolitan Council conducts an annual survey of each city and township in the Twin Cities to track the number of units by type (single-family, townhouse, duplex/triplex/quads and multifamily) that municipalities permit. This survey includes questions about units that have been removed from the housing stock each year. The residential construction survey has a nearly 100 percent response rate.

Affordable Housing Production Survey: Data on the number of new permitted units that are affordable and the number intended for owner- or renter-occupancy are collected through the Metropolitan Council's annual Affordable Housing Production survey.

Other Sources: The Metropolitan Council utilizes various sources of data to monitor residential building activity. In addition to the Annual Residential Construction Survey and the Affordable Housing Production Survey, other sources of data include monthly residential building reports from the U.S. Department of Commerce, sales of existing units from the Minneapolis Area Association of Realtors (MAAR), rental data from Minnesota Housing, GVA Marquette and the Dakota County Community Development Agency (CDA).

Methodology for Identifying Affordable Units

Each year, respondents to the survey are asked to estimate how many of the new units built in their jurisdiction meet the Council's affordability limits or thresholds. Some are able to provide sale price information, but others cannot.

In 1996 and 1997, many communities filling out the survey utilized building permit valuations as indicators of affordability status. These valuations were readily accessible for the communities, but they often excluded the price of lots and some finishing costs, such as landscaping and wall and floor coverings. Therefore, the building permit valuations may have underestimated the cost of the housing unit.

In 1998, communities completing the survey were asked to add an average lot price to permit valuations in order to estimate the final cost. While these adjusted costs were not exact, they more closely reflected the market value of new homes. This practice of applying an additional lot price to the permit value continued until 2001.

Beginning in 2002, county assessor data were used to estimate the price of each new housing unit added. The county assessor data contain many attributes regarding residential and commercial properties, including the selling price or market value of each housing unit within the county. The selling price was used first, and if it was not available, the market value was then used. These two attributes were used extensively to establish whether a unit met the affordability threshold or not.

Starting in 2004, data from Minnesota Housing on developments receiving Housing Tax Credits and HousingLink's Housing Counts were used to estimate the number of affordable rental units added. These databases include many attributes including the total number of tax credit units by municipality, development name, project type, and project inception date. These fields were used to validate the number of rental units that met the affordable rental thresholds.

In general, these affordable housing numbers can be fluid from one year to the next. Changes in the numbers are reflective of not only market activity but also the input of new data sources. As new data sources become available, better quality of data can be presented in this report.
