Minnesota House of Representatives Margaret Anderson Kelliher, Speaker

2009 State Fair Poll Results

By slight margin, budget cuts favored over tax increases Medical marijuana use, open budget talks both get high marks

Following a contentious 2009 legislative session that ended with Gov. Tim Pawlenty balancing the anticipated \$4.8 billion state budget deficit through unallotment, polltakers generally prefer budget cuts over tax increases as a budget solution — albeit by a slight margin.

Of the 8,746 people participating in the 2009 House of Representatives State Fair Poll, 47.5 percent generally support cuts to balance the state budget. Nearly 44 percent support tax increases. When asked the identical question in last year's poll, voters generally supported budget cuts over tax increases 46.5 percent to 43 percent.

By nearly eight percentage points, polltakers believe the governor should not have the power to use unallotment to prevent an anticipated budget deficit.

Conducted by nonpartisan House Public Information Services, the poll is an informal, unscientific survey of issues discussed in prior legislative sessions and may again be topics of discussion in the upcoming session scheduled to begin Feb. 4.

More than three-quarters of polltakers believe the legislative process should be more transparent by requiring budget negotiations between the governor and legislative leaders be done in a public setting.

Almost 70 percent of ballot casters believe terminally ill patients should be able to use medical marijuana to ease their suffering.

Polltakers also strongly believe:

• homeowners should be entitled to attorney fees and other costs related to the legal action against a builder or contractor to have a warranty enforced (81 percent);

- speeding violations should not be placed on a person's driving record if the driver was traveling no more than 10 mph over the speed limit in a 60 mph zone (74.7 percent);
- a local disaster assistance fund should be established to help local governments deal with the aftermath of a tornado, flood or other natural disaster (70.8 percent); and
- charter school students should be allowed to participate in an activity in their resident school district if the activity is not offered by the charter school (68.3 percent).

By a 2-to-1 ratio, polltakers said voter approval should be required before any public money is used for a new or refurbished Minnesota Vikings' stadium. The team's lease expires at the Metrodome after the 2011 season.

Nearly 57 percent of voters believe Minnesota should join 31 other states and allow voters to cast ballots as early as two weeks before Election Day. Fifty-one percent believe that when a person registers for a driver's license or state identification card it should automatically allow them to vote.

Slightly more than half of respondents oppose a staterun casino inside the ticketed area at Minneapolis-St. Paul International Airport; and nearly the same oppose allowing Minnesotans to fish with two rods at once.

Here's a look at the questions and results. All percentages are rounded to the nearest one-tenth. Totals are for those that actually voted on the question.
