

Safe at Home

MINNESOTA SECRETARY OF STATE

Mark Ritchie

Safe at Home Program Participation Annual Report January 2012

(January 1, 2011 - December 31, 2011)

Safe at Home Program Overview

The Safe at Home address confidentiality program is managed by the Office of the Minnesota Secretary of State. The program, which began September 1, 2007, is open to survivors of domestic violence, sexual assault, stalking, and those who otherwise fear for their safety including law enforcement and judicial personnel. Participants in Safe at Home are assigned a designated address (a P.O. Box in St. Paul) that can be used for all of their interactions with others. The designated address allows the participant to go about their daily life without disclosing their actual home, employment, or school address. All private and public entities in the state of Minnesota must accept the Safe at Home address as a participant's actual address. Safe at Home receives participants' mail and forwards all of their First Class Mail to them, and assists them with their interactions with third parties should problems arise when giving the Safe at Home address to others. Staff also works with third party stakeholders to ensure legal compliance and to make sure their business practices accommodate the safety needs of Safe at Home participants.

Safe at Home Program Participation

	12/31/2008	12/31/2009	12/31/2010	12/31/2011
Number of Program Participants	111	396	634	958

Total People Served January 1, 2011 - December 31, 2011	1198
Total People Served Since Program Inception	1496

Safe at Home Application Assistants

Safe at Home is a successful private sector/government agency partnership that utilizes limited state resources to recruit, train and monitor application assistants from local community-based organizations throughout Minnesota. To enroll in Safe at Home, individuals must meet face to face with trained application assistants, who are victim advocates employed by community-based organizations that have chosen to voluntarily partner with Safe at Home. The Office of the Secretary of State provides training to, tracks contact information for, and monitors the status of all application assistants who assist eligible people to enroll in Safe at Home. Due to turnover at community-based organizations and Safe at Home's program growth, trainings for application assistants are ongoing. Continued education is also provided to teach application assistants about legislative changes to the program and to keep enrollment skills fresh. Page three of this report shows a geographical breakdown of the 73 counties served by the community-based organizations where the application assistants are employed.

Application Assistant Activity

Number of Application Assistants As of December 31, 2011 <i>Note: Application Assistants are employees of community-based organizations.</i>	184
Number of Application Assistants Provided Initial Training or Continued Education January 1, 2011 - December 31, 2011	100
