## Description of the Office of the State Auditor

The mission of the Office of the State Auditor is to oversee local government finances for Minnesota taxpayers by helping to ensure financial integrity and accountability in local governmental financial activities.

Through financial, compliance, and special audits, the State Auditor oversees and ensures that local government funds are used for the purposes intended by law and that local governments hold themselves to the highest standards of financial accountability.

The State Auditor performs approximately 150 financial and compliance audits per year and has oversight responsibilities for over 3,300 local units of government throughout the state. The office currently maintains five divisions:

**Audit Practice** - conducts financial and legal compliance audits of local governments;

**Government Information** - collects and analyzes financial information for cities, towns, counties, and special districts;

**Legal/Special Investigations** - provides legal analysis and counsel to the Office and responds to outside inquiries about Minnesota local government law as well as investigates allegations of misfeasance, malfeasance, and nonfeasance in local government;

**Pension** - monitors investment, financial, and actuarial reporting for approximately 730 public pension funds; and

**Tax Increment Financing** - promotes compliance and accountability in local governments' use of tax increment financing through financial and compliance audits.

The State Auditor serves on the State Executive Council, State Board of Investment, Land Exchange Board, Public Employees Retirement Association Board, Minnesota Housing Finance Agency, and the Rural Finance Authority Board.

## Scope and Methodology

---

This publication is intended to help local government officials, policy makers, and the public understand city financial operations. The report summarizes, through data tables and charts, the financial operations of the 848 Minnesota cities that provided their financial information to the Office of the State Auditor for calendar year 2010.<sup>1</sup> Minnesota cities are required to submit annual financial reports to the Office of the State Auditor pursuant to Minn. Stat. §§ 6.74-.75 and §§ 471.697-.698.<sup>2</sup>

The data tables presented in this report are divided into governmental funds and proprietary funds. The governmental funds consist of the General, Special Revenue, Capital Projects, Permanent, and Debt Service Funds. The first section of the report provides an overview of all cities and compares cities over and under 2,500 in population. The second section of the report presents a detailed overview of the financial operations of cities over 2,500 in population (large cities). The third section provides a detailed overview of the financial operations of cities under 2,500 in population (small cities).<sup>3</sup>

Following the overviews, Tables 6 and 7 present a summary of the activities in the governmental funds of all cities. Tables 8 through 11 present a summary of the governmental funds of cities over 2,500 in population. Tables 12 through 14 present a summary of the governmental funds of cities under 2,500 in population.<sup>4</sup> Tables 15 through 17 present the data by individual city.

Table 18 lists the bonded and other long-term debt outstanding as of December 31, 2010, by individual city. Other long-term debt refers to liabilities such as long-term lease agreements, installment purchase contracts, and notes.

Tables 19 and 20 present an analysis of the 2009 and 2010 unreserved fund balances in the General and Special Revenue Funds of all cities reporting on a modified accrual basis. Table 19 details the actual unreserved fund balances, the percent change in unreserved fund balances from 2009 to 2010, and a comparison to 2010 total current expenditures. Table 20 presents the fund balance data sorted by unreserved fund balances as a percent of total current expenditures.

---

<sup>1</sup>The report only provides information on 848 of the cities because 6 cities failed to provide their financial information to the Office of the State Auditor in time for this publication.

<sup>2</sup>In addition to the 6 cities that did not provide their financial data in time to be in this report, another 14 failed to comply with the reporting requirements of Minn. Stat. §§ 6.74-.75 and §§ 471.697-.698. Failure to comply with these reporting requirements results in the Office of the State Auditor decertifying a city's eligibility to receive Local Government Aid (LGA).

<sup>3</sup>City classifications are designated based on the decennial census. This report uses the new class designations based on the 2010 census population figures. Four cities formerly classified as large cities (classes 1 – 4) are now classified as small cities (class 5). The four cities are: Appleton, Olivia, Rockville, and Spring Valley. Sixteen cities changed from class 5 cities to class 4 (large) cities. The 16 cities are: Albany, Barnesville, Carver, Chatfield, Cohasset, Dodge Center, Foley, Hanover, Isanti, Lake Crystal, Lonsdale, Montrose, Moose Lake, Pine Island, Rush City, and Sandstone. The data for previous years was not amended to account for the changes in city classifications. As a result, some of the year-to-year changes may be affected by the change in the composition of cities in each group.

<sup>4</sup>Due to rounding, percentages shown for totals may not equal the sum of the individual percentages.

Cities using a modified accrual basis of accounting report separate fund balances for all of their governmental funds and denote the amounts that are reserved and unreserved. Cities using a cash basis of accounting report a single cash balance for all governmental funds at the end of the fiscal year. An analysis of unreserved fund balances for cities using a cash basis of accounting is therefore not appropriate, and is not provided. Appendix A provides a more detailed discussion of fund balances.

Table 21 shows municipal enterprises by city. Minnesota cities operate many types of public service enterprises. These enterprises furnish a variety of services and operate wholly or primarily with revenues derived from the sale of goods or services.

In addition to this publication, the Office of the State Auditor maintains an interactive database containing several years of data that can be accessed through the website at: [www.auditor.state.mn.us](http://www.auditor.state.mn.us).

<b>Cities Failing to Report Their Financial Information in 2010</b>

### **Accounting Difference for Cities Over and Under 2,500 in Population**

For cities in Minnesota, the classification as over or under 2,500 in population helps to determine the type of governmental accounting to which they must adhere. All cities over 2,500 in population must have a financial statement in compliance with generally accepted accounting principles (GAAP), which is a modified accrual basis of accounting. The modified accrual basis of accounting recognizes an economic transaction or event as revenues in the operating statement when the revenues are both measurable and available to liquidate liabilities of the current period. Available means collectible in the current period or soon enough thereafter to be used to pay liabilities of the current period. Similarly, expenditures are generally recognized when an event or transaction is expected to draw on current expendable resources.

Cities under 2,500 in population may opt to use a cash basis of accounting. In 2010, 356 of the 623 small cities that reported their financial information (57 percent) opted to use a cash basis of accounting.<sup>5</sup> Cash basis accounting provides for the recording of receipts (revenues) when received in cash and the recording of disbursements (expenditures) when paid in cash.

---

<sup>5</sup>There are 629 small cities but the figure listed here reflects only the 623 cities that provided their 2010 financial information to the Office of the State Auditor.

---

## **Executive Summary**

---

### **Current Trends – All Cities**

- Total revenues of the governmental funds for all Minnesota cities totaled \$4.76 billion in 2010. This represents an increase of 2 percent over 2009 revenues. Total revenues of cities over 2,500 in population increased 3 percent, and revenues of cities under 2,500 in population decreased 8 percent (pg. 5).
- Total expenditures of the governmental funds for all cities totaled \$5.47 billion in 2010. This represents an increase of 2 percent over 2009. Total expenditures of cities over 2,500 in population increased 3 percent, while total expenditures for cities under 2,500 in population decreased 9 percent (pg. 5).
- The largest expenditure categories for both groups of cities are streets and highways and public safety. For large cities, streets and highways accounted for 20 percent of total expenditures, and public safety accounted for 26 percent. For small cities, streets and highways accounted for 22 percent of total expenditures, and public safety accounted for 21 percent (pgs. 5-6).
- In 2010, unreserved fund balances as a percent of current expenditures averaged 45.1 percent for large cities (down from 50 percent in 2009), compared to 106 percent for small cities (up from 102 percent in 2009) (pg. 6).
- In 2010, small cities carried long-term debt of \$1.13 billion, or \$2,957 per capita, compared to \$8.60 billion, or \$2,174 per capita, for large cities (pg. 6).

### **Current Trends – Cities Over and Under 2,500 in Population**

- Among large cities, the categories of revenues with the largest increases were federal grants (49 percent) and licenses and permits (6 percent). Those with the largest decreases were interest earnings (-17 percent), county and local grants (-9 percent), and state grants (-5 percent) (pg. 11).
- For small cities, federal grants, which grew 42 percent between 2009 and 2010, were the only source of revenues that increased. All other sources of revenues saw decreases ranging from 4 percent (all other revenues) to 40 percent (local unit grants) (pg. 18).

## **Ten-Year Trends – All Cities**

### **Governmental Revenues**

- Over the ten-year period of 2001 to 2010, an examination of city finances shows that when adjusted for inflation<sup>6</sup>, 2010 revenue levels are below 2001 levels. Inflation-adjusted total city revenues decreased 10 percent between 2001 and 2010 (pg. 7).
- Between 2001 and 2010, actual revenues derived from property taxes grew 100 percent, compared to 7 percent for revenues derived from intergovernmental sources. Additional analysis of actual intergovernmental revenues shows uneven trends over the ten-year period; federal grants increased 151 percent, state grants decreased 13 percent, and local grants increased 5 percent (pg. 7).
- Between 2001 and 2010, the proportion of total revenues derived from property taxes grew from 24 percent in 2001 to 38 percent in 2010. During this same time frame, revenues derived from intergovernmental sources decreased from 31 percent of total revenues to 26 percent (pg. 7).

### **Governmental Expenditures**

- Actual total city expenditures grew from \$4.47 billion in 2001 to \$5.47 billion in 2010. This represents an increase of 23 percent. Over the ten-year period of 2001 to 2010, an examination of city finances shows that, when adjusted for inflation, 2010 expenditure levels are below 2001 levels and decreased 13 percent over the ten-year period (pg. 9).
- Over the ten-year period, when adjusted for inflation, total current expenditures grew 8 percent, while capital outlays and debt service decreased by 45 percent and 13 percent, respectively (pg. 10).

---

<sup>6</sup>“Adjusted for inflation” and “constant dollars” refer to data adjusted for inflation using the Implicit Price Deflator for State and Local Governments setting 2001 as the base year (N.I.P.A. Table 1.1.9, January 2012).

---

## **Comparison and Overview**

---

### **2010 Finances for All Minnesota Cities**

#### **Revenues**

Total revenues of the governmental funds for all Minnesota cities totaled \$4.76 billion in 2010. This represents an increase of 2 percent over 2009 revenues. Total revenues of cities over 2,500 in population increased 3 percent, and revenues of cities under 2,500 in population decreased 8 percent.

There are two central differences between cities over and under 2,500 in population as to how they fund services. Cities under 2,500 in population (small cities) are much more dependent on intergovernmental revenues than cities over 2,500 (large cities). In 2010, intergovernmental revenues accounted for 39 percent of total revenues for small cities, compared to 25 percent for large cities. Among all cities, intergovernmental revenues accounted for 26 percent of total revenues.

The second difference is the reliance on tax revenues. Because large cities receive a much smaller portion of their revenues from intergovernmental sources, they more commonly utilize tax revenue streams such as tax increments, franchise, lodging, and local sales taxes. As a whole, 2010 tax revenue from all sources accounted for 50 percent of large city revenues, compared to 35 percent of small city revenues. Large cities also generate more tax increment revenues than small cities. Revenue derived from tax increment accounted for 3 percent of small city total revenues, compared to 5 percent for large cities.

Property taxes account for a similar share of total revenues for these two groups of cities. For large cities, property taxes accounted for 39 percent of total revenues, compared to 32 percent for small cities. For all cities, property taxes accounted for 38 percent of total revenues.

On a per capita basis, large cities had total revenues of \$1,102, and small cities had total revenues of \$1,055.

#### **Expenditures**

Total expenditures of the governmental funds for all cities totaled \$5.47 billion in 2010. This represents an increase of 2 percent over 2009. Total expenditures of cities over 2,500 in population increased 3 percent, while total expenditures for cities under 2,500 in population decreased 9 percent.

The spending priorities of cities under 2,500 in population differ from those cities over 2,500 in population. For example, small cities tend to direct a greater percentage of their resources to general government (16 percent) and less to culture and recreation (8 percent) than cities over 2,500 (10 percent and 13 percent, respectively). The largest expenditure categories for both groups of cities are streets and highways and public safety. For large cities, streets and highways

accounted for 20 percent of total expenditures, and public safety accounted for 26 percent. For small cities, streets and highways accounted for 22 percent of total expenditures, and public safety accounted for 21 percent.

## **Long-Term Debt**

Another area where small and large cities (under and over 2,500 in population) differ is in their use of debt. Overall, small cities tend to carry a greater debt burden than large cities. In 2010, small cities carried long-term debt of \$1.13 billion, or \$2,957 per capita, compared to \$8.60 billion, or \$2,174 per capita, for large cities. While there is no single reason for the higher level of indebtedness per capita among the smaller cities, a primary reason is that the high costs of projects such as wastewater treatment facilities and water and sewer line replacement are spread across fewer people.

## **Unreserved Fund Balances of the General and Special Revenue Funds**

A clear difference between the two city types is in the level of unreserved fund balances. Small cities maintain significantly higher fund balances than large cities. In 2010, unreserved fund balances as a percent of current expenditures averaged 45.1 percent for large cities (down from 50 percent in 2009), compared to 106 percent for small cities (up from 102 percent in 2009).

Among the 267 small cities that reported a fund balance in 2010, 146 (55 percent) had an unreserved fund balance greater than 100 percent of total current expenditures. Among the 225 large cities, 39 cities (17 percent) had an unreserved fund balance greater than 100 percent of total current expenditures. In 2010, unreserved fund balances as a percent of total current expenditures among small cities ranged from -144 percent in Bigelow to 433 percent in Stockton. Among large cities, the range was from -12 percent in Caledonia to 364 percent in Bayport.

The Office of the State Auditor recommends that at year-end, local governments maintain an unreserved fund balance in their General Fund and Special Revenue Funds of approximately 35 to 50 percent of operating revenues, or no less than five months of operating expenditures. If the local government's unreserved fund balance is less than or greater than this recommendation, the local government should be able to explain the reason for the difference.

The Office of the State Auditor recommends that each local government establish a formal policy on the level of unreserved fund balance that should be maintained in the General Fund and Special Revenue Funds. The policy should be set by the governing body and should provide both a time frame and a specific plan for increasing or decreasing the level of unreserved fund balance. If the fund balance does not match the policy, a plan should be developed by the governing body that will allow for compliance with the policy.

## Ten-Year Trends

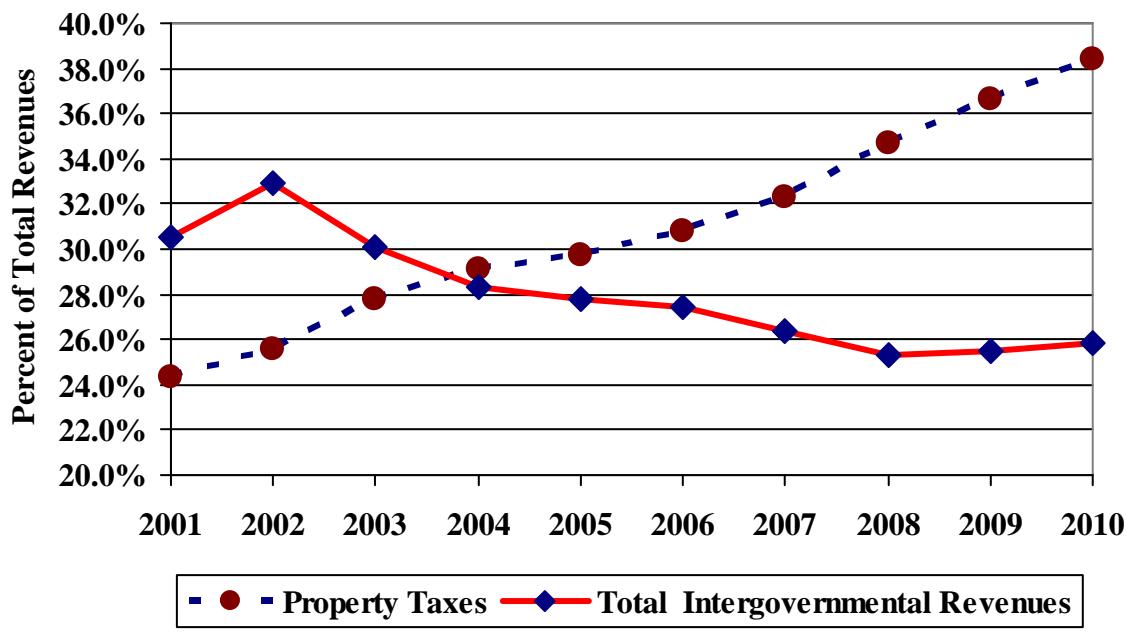

### Governmental Revenues

Over the ten-year period of 2001 to 2010, an examination of city finances shows that when adjusted for inflation<sup>7</sup>, 2010 revenue levels are below 2001 levels. Inflation-adjusted total city revenues decreased 10 percent between 2001 and 2010.

Between 2001 and 2010, actual revenues derived from property taxes grew 100 percent, compared to 7 percent for revenues derived from intergovernmental sources. Additional analysis of actual intergovernmental revenues shows uneven trends over the ten-year period; federal grants increased 151 percent, state grants decreased 13 percent, and local grants increased 5 percent. When revenues are adjusted for inflation, the ten-year period shows a 46 percent increase in property tax revenues, while intergovernmental revenues decreased 22 percent.

In addition, the proportion of total revenues derived from property taxes grew from 24 percent in 2001 to 38 percent in 2010. During this same time frame, revenues derived from intergovernmental sources decreased from 31 percent of total revenues to 26 percent. Figure 1 below shows that, as intergovernmental revenues to cities have slowed, the result has been a greater reliance on revenues derived from property taxes.

**Figure 1: Primary Sources of City Revenues as a Percent of Total Revenues - 2001 to 2010**

<sup>7</sup>“Adjusted for inflation” and “constant dollars” refer to data adjusted for inflation using the Implicit Price Deflator for State and Local Governments setting 2001 as the base year (N.I.P.A. Table 1.1.9, January 2012).

An examination of city revenues from 2001 to 2010 shows that, in actual dollars, revenues grew from \$3.80 billion in 2001 to \$4.76 billion in 2010, an increase of 26 percent. When adjusted for inflation, 2010 revenues are 10 percent less than in 2001. Figure 2 below illustrates this trend.

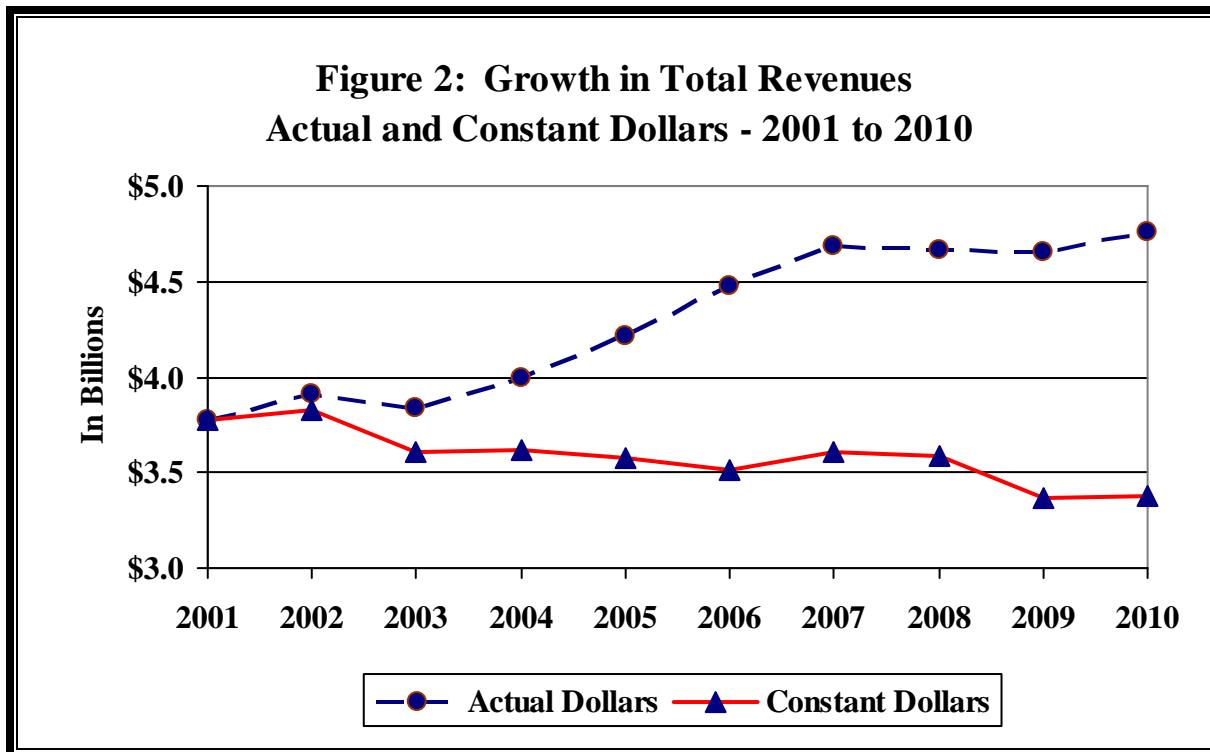

Table 1 on the following page provides a summary of the trend in city revenues from 2001 to 2010 when adjusted for inflation. Taxes and federal grants were the only sources of revenues to show significant growth over this period, increasing 18 and 78 percent, respectively. The large increase in federal grants was due in part to the American Recovery and Reinvestment Act (ARRA). Seven categories of revenues showed double-digit declines over the ten-year period including interest earnings (-72 percent), all other revenues (-44 percent), state grants (-38 percent), licenses and permits (-32 percent), local unit grants (-26 percent), fines and forfeits (-18 percent), and special assessments (-12 percent).

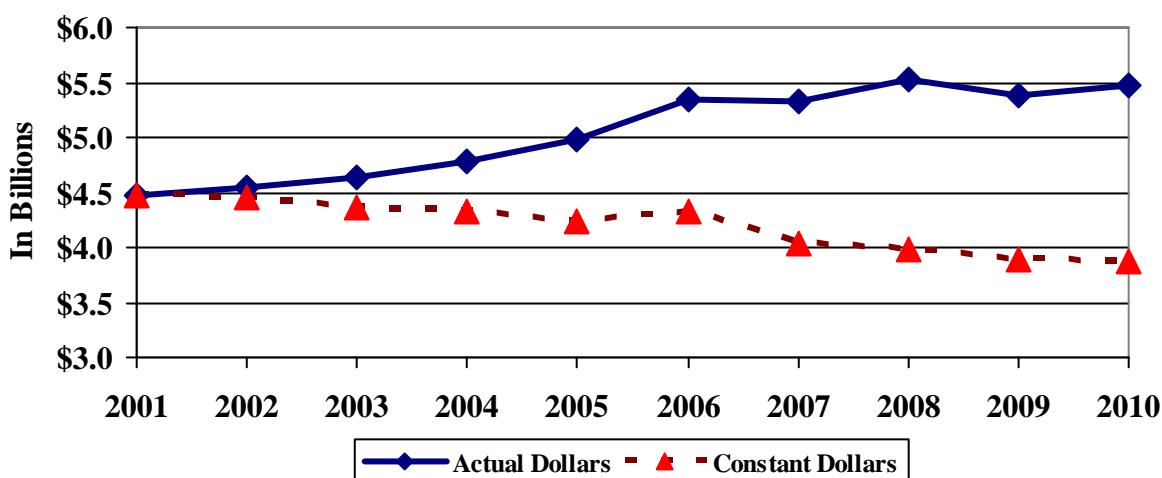

**Table 1: Total City Revenues in Constant Dollars**

Revenues	2001	2005	2006	2010	2001 - 05	2006 - 10	10-Year Change
					5-Year Change	5-Year Change	
Taxes	\$1,407,020,733	\$1,461,188,434	\$1,509,285,629	\$1,655,528,621	3.8%	9.7%	17.7%
Special Assessments	232,312,698	247,829,806	233,622,960	205,075,787	6.7%	-12.2%	-11.7%

<b>Total Revenues</b>	<b>\$3,766,405,508</b>	<b>\$3,576,056,755</b>	<b>\$3,615,514,487</b>	<b>\$3,382,075,593</b>	<b>-5.1%</b>	<b>-6.5%</b>	<b>-10.2%</b>

## Governmental Expenditures

Actual total city expenditures grew from \$4.47 billion in 2001 to \$5.47 billion in 2010. This represents an increase of 23 percent. Over the ten-year period of 2001 to 2010, an examination of city finances shows that, when adjusted for inflation, 2010 expenditure levels are below 2001 levels and decreased 13 percent over the ten-year period. Figure 3 below shows the contrast between expenditures in actual and constant dollars.

**Figure 3: Growth in Total Expenditures  
Actual and Constant Dollars - 2001 to 2010**

When the three components of city spending (total current expenditures, total capital outlays, and total debt service) are looked at individually, only total current expenditures showed growth when adjusted for inflation. Over the ten-year period, when adjusted for inflation, total current expenditures grew 8 percent, while capital outlays and debt service decreased by 45 percent and 13 percent, respectively.

Table 2 below provides a summary of expenditures from 2001 to 2010 in constant dollars. The only category showing growth over the ten-year period was public safety, which increased 11 percent. All other categories of expenditures decreased over this period.

**Table 2: Total City Expenditures in Constant Dollars**

Expenditures	2001	2005	2006	2010	2001 - 05 5-Year Change	2006 - 10 5-Year Change	2006 - 10 10-Year Change
General Government	\$453,840,673	\$430,152,810	\$458,861,695	\$396,213,784	-5.2%	-13.7%	-12.7%
Public Safety	895,556,616	965,388,997	968,008,007	991,886,782	7.8%	2.5%	10.8%
Streets and Highways	894,112,256	940,941,219	1,038,203,404	785,357,238	5.2%	-24.4%	-12.2%

# Overview of Cities Over 2,500 in Population

## Total Governmental Revenues

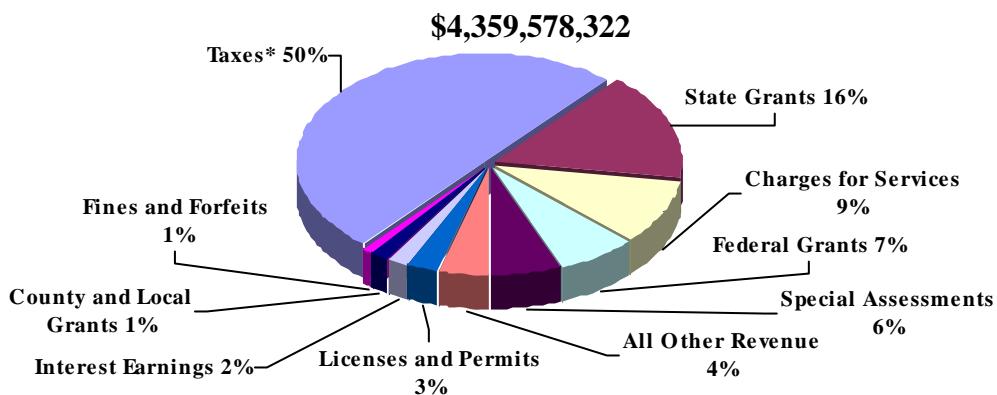

In 2010, cities over 2,500 in population, or large cities, had total governmental revenues of \$4.36 billion. This represents an increase of 3.0 percent from 2009 levels. The increase, in part, reflects the addition of 16 cities that were reclassified as large cities due to the 2010 census. The primary revenue sources for large cities were taxes and state grants, which accounted for 66 percent of all city revenues.

Among the various categories of large city revenues, six showed increases, while four showed decreases. The categories with the largest increases were federal grants (49 percent) and licenses and permits (6 percent). Those with the largest decreases were interest earnings (-17 percent), county and local grants (-9 percent), and state grants (-5 percent). The increase in federal grants reflects funds made available to cities through the American Recovery and Reinvestment Act. The decline in interest earnings reflected the continued challenging investment environment in 2010. The decrease in county and local grants was the result of the completion of projects in several cities that were, in part, funded by other local governments that benefitted from the improvement.

Although the relative shares of total governmental revenues generally change very little from year to year, an exception over the past several years has been the category of property taxes. Over the past five years, property taxes as a percent of total revenues increased from 31 percent in 2006 to 39 percent in 2010. The increased reliance on property tax revenues has offset flat growth in intergovernmental revenues and a large decline in interest earnings over this period.

Figure 4 below shows the relative shares of total governmental revenues by source. Underlying data for this figure as well as five-year trends can be found in Table 8 on page 28.

**Figure 4: 2010 Total Governmental Revenues - Cities  
Over 2,500 in Population\*\***

\*This category includes property, hotel/motel, sales, franchise, gravel, and gambling taxes, as well as tax increments.

\*\*Due to rounding, the sum of the percentages is less than 100 percent.

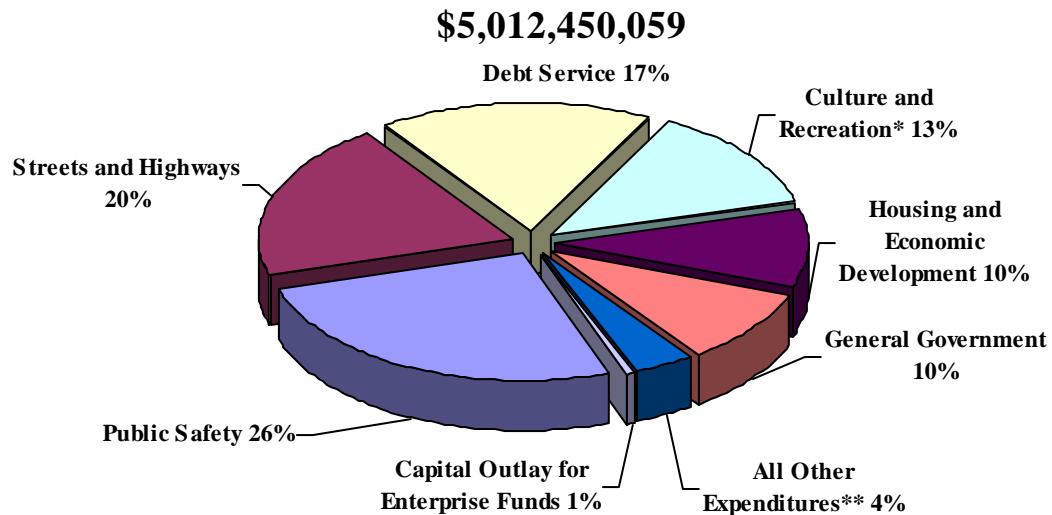

## Total Governmental Expenditures

Cities provide a variety of services. Most expenditures related to these services are accounted for in governmental funds. The governmental funds are classified as the General, Special Revenue, Capital Projects, Permanent, and Debt Service Funds. In 2010, cities over 2,500 in population expended \$5.01 billion from these various governmental funds to provide city services. This represents an increase of 3 percent over 2009 total governmental expenditures. Total governmental expenditures include current expenditures, capital outlays, and debt service. Current expenditures accounted for 62 percent of total governmental expenditures, while capital outlay accounted for 21 percent, and debt service accounted for 17 percent.

The largest category of current expenditures for cities over 2,500 in population was public safety, while streets and highways was the largest capital outlay expenditure. Public safety accounted for 39 percent of all current expenditures--more than triple that of any other category. Streets and highways accounted for 59 percent of all capital expenditures, over four times greater than any other category of capital outlay.

Figure 5 shows the relative shares of total governmental expenditures by function. The underlying data for this figure is detailed in Table 9 on page 29.

**Figure 5: 2010 Total Governmental Expenditures - Cities  
Over 2,500 in Population\*\*\***

\*This category represents expenditures for libraries and parks and recreation.

\*\*This category includes expenditures for airport, cemetery, conservation of natural resources, health, sanitation, transit, unallocated insurance, unallocated pension, and all other unallocated.

\*\*\*Due to rounding, the sum of the percentages is greater than 100 percent.

## **Capital Outlay Expenditures**

Cities over 2,500 in population expended \$1.03 billion on capital investments in 2010. This represents a decrease of 6 percent from the level expended in 2009. Capital outlay expenditures are more likely than current expenditures to vary significantly from one year to the next. The reason for this is that capital projects tend to be large in size, but the associated costs are short-term. Table 3 below shows total capital outlays in actual dollars and per capita for large cities.

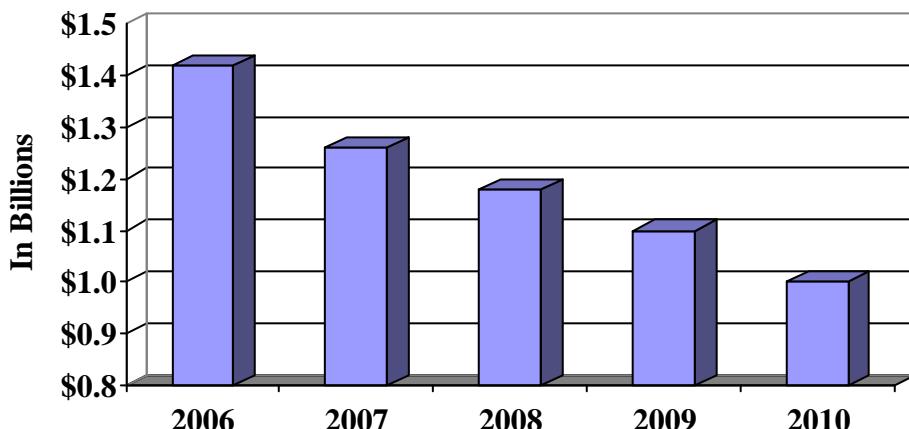

**Table 3: Total Capital Outlay Expenditures in Actual Dollars and Per Capita**

Year	Total Capital Outlay (actual dollars)	Per Capita*
2006	\$1,418,495,255	\$371
2007	\$1,258,328,908	\$328
2008	\$1,184,065,833	\$303
2009	\$1,097,801,667	\$280
2010	\$1,030,476,850	\$260

\*Per capita amounts are based on the total population of cities with over 2,500 in population that reported their financial information.

Figure 6 below illustrates the trend in capital outlay expenditures for the years 2006 to 2010.

**Figure 6: Capital Outlay Expenditures  
Cities Over 2,500 in Population - 2006 to 2010**

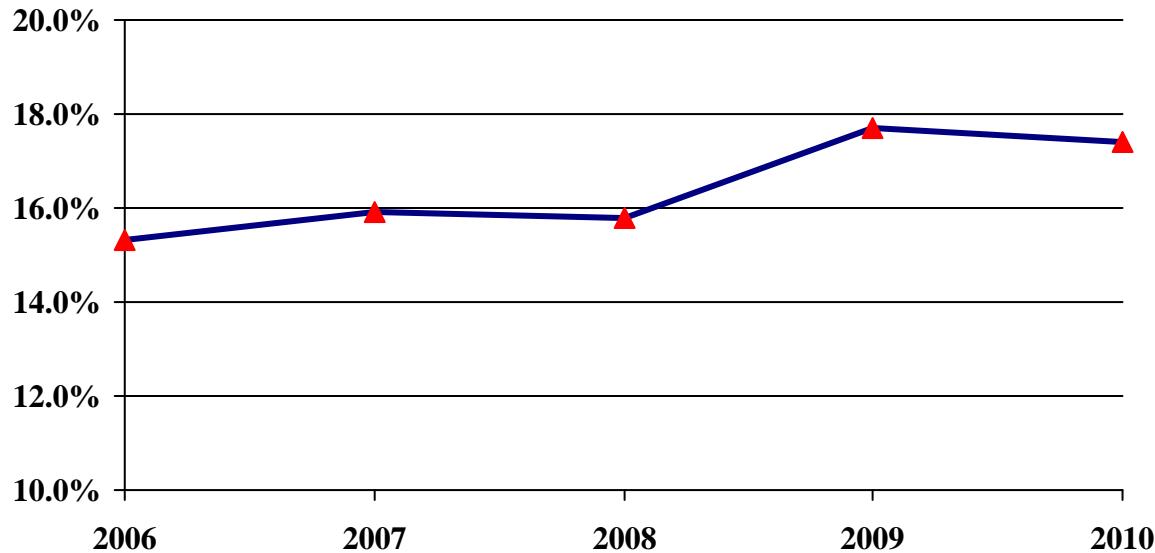

## **Debt Service**

In 2010, large cities expended a total of \$866.9 million on debt service, which represented 17 percent of total expenditures. Debt service includes expenditures for the principal and interest payments of debt incurred by cities. Between 2009 and 2010, large city debt service expenditures increased \$4.3 million, or 0.5 percent.

Figure 7 below shows the trend in the percentage of total expenditures allocated to debt service.

**Figure 7: Debt Service as a Percentage of Total Expenditures - Cities Over 2,500 in Population - 2006 to 2010**

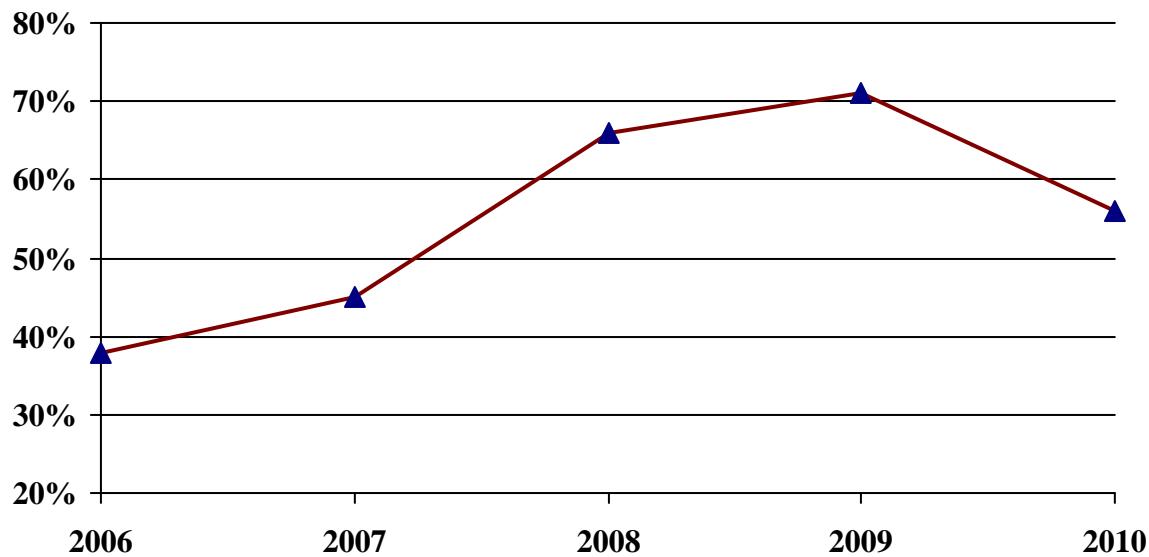

## Municipal Enterprises

In addition to governmental funds, many cities establish enterprise funds to account for services that are financed and operated in a manner similar to private business enterprises. These enterprises generally are intended to be self-sustaining through fees and user charges. Although some enterprises may earn a net profit, most have the objective of breaking even. However, some municipalities choose to subsidize an enterprise that benefits the community as a whole. Enterprise fund accounting is also used to provide more detailed financial information on operations where there are public policy, accountability, management control, and other concerns. The most common enterprises created by large cities are for recreation, sewer, and water activities.

In aggregate, large city municipal enterprises reported a net income of \$191.6 million and net transfers (transfers out minus transfers in) of \$106.7 million in 2010. This represents a decrease of 10 percent in net income and a 30 percent decrease in net transfers. An example of this type of transfer is when city officials transfer excess reserves from the Water Utility Enterprise Fund to the General Fund. Overall, net transfers represented 56 percent of net profits among large city enterprises. Figure 8 below examines the five-year trend for large cities in net transfers from enterprise funds as a percent of their net income.

**Figure 8: Large City Enterprise Fund Net Transfers as a Percent of Net Income - 2006 to 2010**

## Outstanding Long-Term Indebtedness

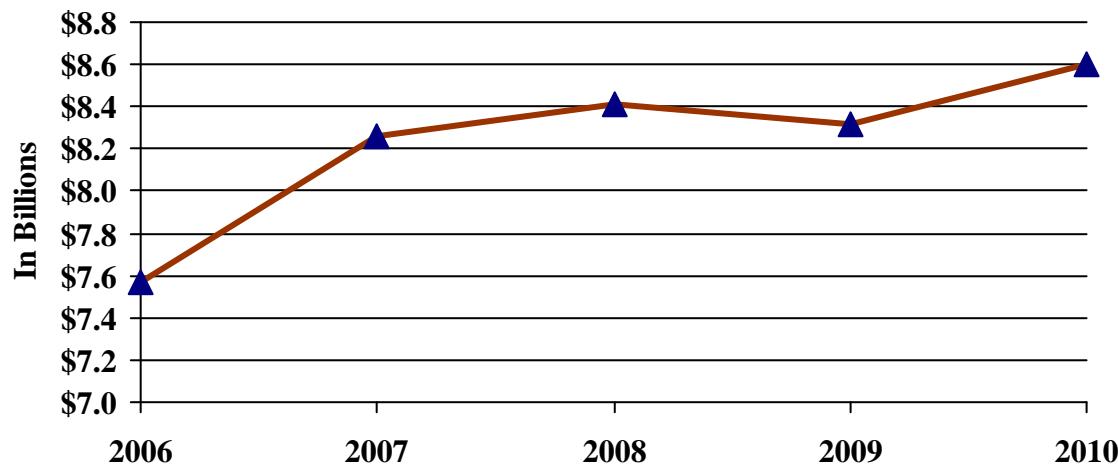

Cities over 2,500 in population carried long-term debt of \$8.60 billion, or \$2,174 per capita, at the end of 2010. This represents an increase of 3 percent over the 2009 level. Cities incur long-term debt through various ways such as the issuance of bonds and notes, certificates of indebtedness, and tax anticipation certificates. Long-term lease agreements are also classified as long-term debt. Cities may only borrow to finance capital projects and purchases but are restricted by law from borrowing for current expenditures. The amount of outstanding debt affects a city's current expenditures because cities must make principal and interest payments to service the debt. Table 4 below shows the outstanding bonded indebtedness for 2009 and 2010.

**Table 4: Two-Year Summary of Outstanding Bonded Indebtedness**

	<b>2009 Amount</b>	<b>2010 Amount</b>
General Obligation	\$1,333,996,584	\$1,426,633,532
General Obligation Tax Increment	685,069,012	533,236,327
Revenue Tax Increment	79,109,669	77,602,340
Special Assessment	1,980,401,260	2,050,985,558
General Obligation Revenue	1,931,452,951	1,998,953,153
Revenue	1,125,486,375	1,076,992,304
All Other	<u>100,555,779</u>	<u>109,378,625</u>
<b>Total Bonded Indebtedness</b>	<b><u>\$7,236,071,630</u></b>	<b><u>\$7,273,781,839</u></b>

Figure 9 below shows the five-year trend of outstanding long-term debt for cities over 2,500 in population.

**Figure 9: Outstanding Long-Term Indebtedness\* for Cities Over 2,500 in Population - 2006 to 2010**

\*Includes bonds and other types of debt such as certificates of indebtedness, long-term leases, and notes.

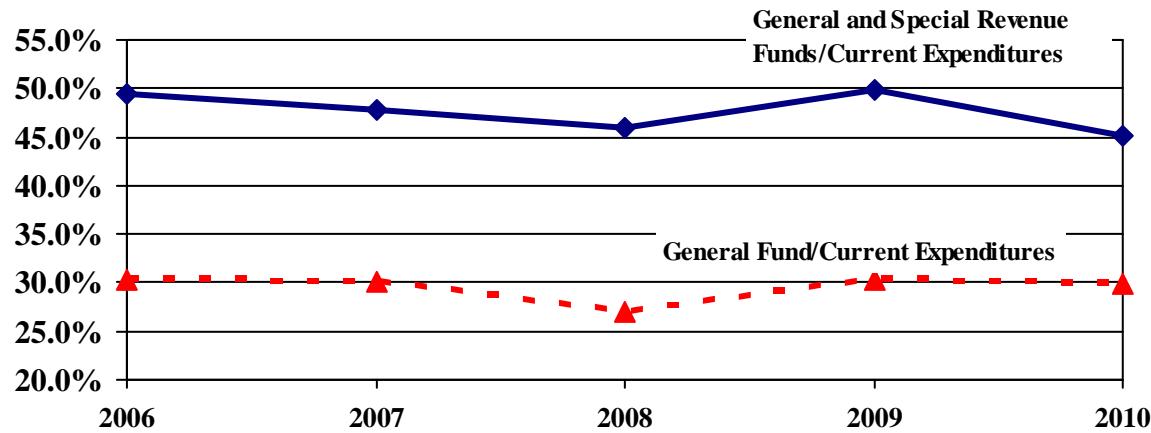

## Unreserved Fund Balances of the General and Special Revenue Funds

The unreserved fund balances of large cities' General and Special Revenue Funds totaled \$1.41 billion in 2010. This represents a decrease of 5 percent from the level reported in 2009. Cities should have relatively large fund balances at the end of the year (December 31) because they must rely on them to meet expenditures during the first five months of the next fiscal year until they receive the first property tax and state aid payments. Appendix A on page 305 provides an in-depth explanation of city fund balances.

Comparing cities' unreserved fund balances to their total current expenditures helps put the fund balances into perspective and provides insight on the relative financial health of Minnesota's cities. Large city unreserved fund balances as a percent of total current expenditures averaged 45 percent in 2010, compared to 50 percent in 2009. The decrease in the ratio of unreserved fund balances to total current expenditures was caused by an increase in current expenditures coupled with a substantial decrease in unreserved fund balances in the Special Revenue Funds. If cities in this category are divided into their class number, it is interesting to note that, as population decreases, the average increases. Class 1 (first class) cities average 21 percent of their unreserved fund balances as a percent of total current expenditures, while class 3 cities (populations 10,000 to 20,000) average 80 percent (see Appendix A for further information and recommendations on city unreserved fund balances).

Figure 10 below shows the five-year trend of the unreserved fund balances as a percent of total current expenditures for large cities. One line shows the combined unreserved fund balance of the General and Special Revenue Funds as a percent of total current expenditures, and the other shows only the unreserved fund balance of the General Fund as a percent of total current expenditures.

**Figure 10: Unreserved Fund Balances of the General and Special Revenue Funds as a Percent of Total Current Expenditures for Cities Over 2,500 in Population - 2006 to 2010**

# Overview of Cities Under 2,500 in Population

## Total Governmental Revenues

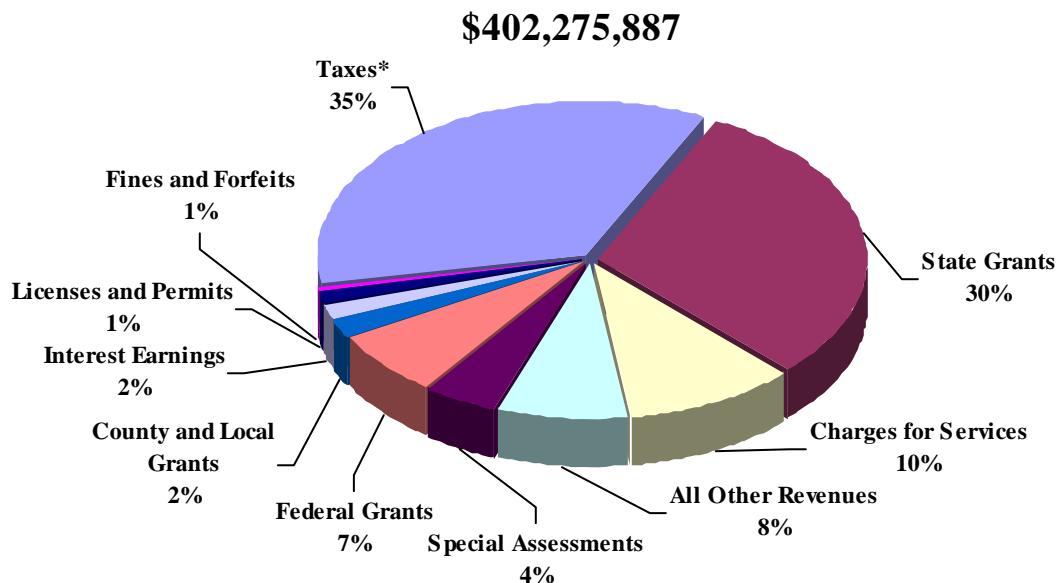

In 2010, cities under 2,500 in population, or small cities, had total governmental revenues of \$402.3 million to finance city services. This represents a decrease of 8 percent from 2009.

Federal grants, which grew 42 percent between 2009 and 2010, were the only source of revenues that increased for small cities. All other sources of revenues saw decreases ranging from 4 percent (all other revenues) to 40 percent (local unit grants). Much of the decrease is attributable to the net loss of 12 cities from the under 2,500 in population cities group due to the 2010 census.

The main sources of revenues for small cities in 2010 were state grants and taxes, which together accounted for 65 percent of all revenues. The share of total revenues derived from federal grants increased from 4 percent to 7 percent between 2009 and 2010.

Figure 11 below shows the relative shares of total governmental revenues by source. The underlying data for this figure is in Table 12 on page 33.

**Figure 11: 2010 Total Governmental Revenues - Cities Under 2,500 in Population**

\*This category includes property, hotel/motel, sales, franchise, gravel, and gambling taxes, as well as tax increments.

## Total Governmental Expenditures

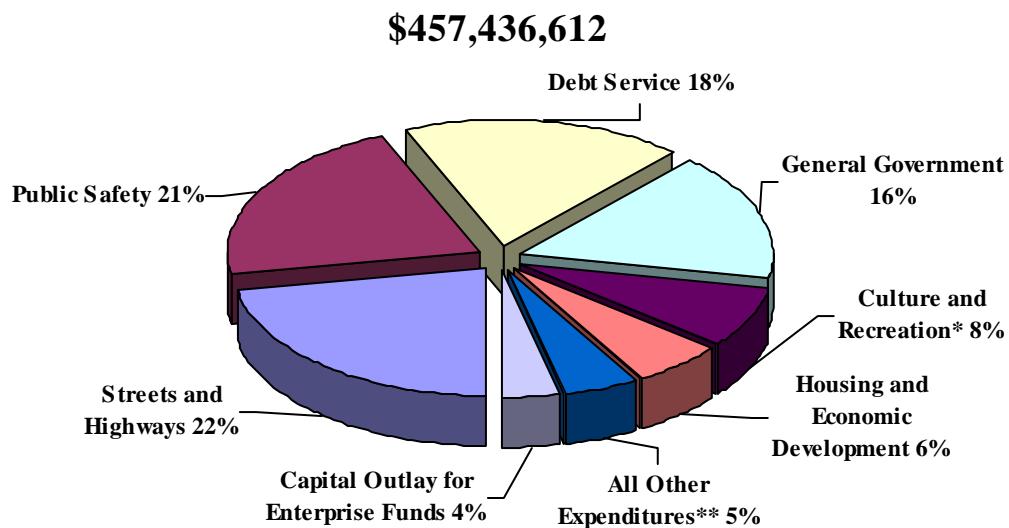

Most city services are accounted for in governmental funds. The governmental funds are made up of the General, Special Revenue, Capital Projects, Permanent, and Debt Service Funds. In 2010, cities under 2,500 in population expended \$457.4 million from governmental funds to provide city services. This represents a decrease of 9 percent from 2009 total governmental expenditures.

Between 2009 and 2010, only three categories of expenditures increased: sanitation (9 percent), airports (4 percent), and libraries (0.3 percent). All other categories showed year-to-year declines ranging from 62 percent (health) to 2 percent (parks and recreation).

In 2010, the four largest expenditure categories for cities under 2,500 in population were streets and highways, public safety, debt service, and general government. These four categories together accounted for 78 percent of all expenditures in 2010.

Figure 12 below shows the relative shares of total governmental expenditures of small cities by function. The underlying data for this figure is in Table 12 on page 33.

**Figure 12: 2010 Total Governmental Expenditures -  
Cities Under 2,500 in Population\*\***

\*This category represents expenditures for libraries and parks and recreation.

\*\*This category includes expenditures for airport, cemetery, conservation of natural resources, health, sanitation, transit, unallocated insurance, unallocated pension, and all other unallocated.

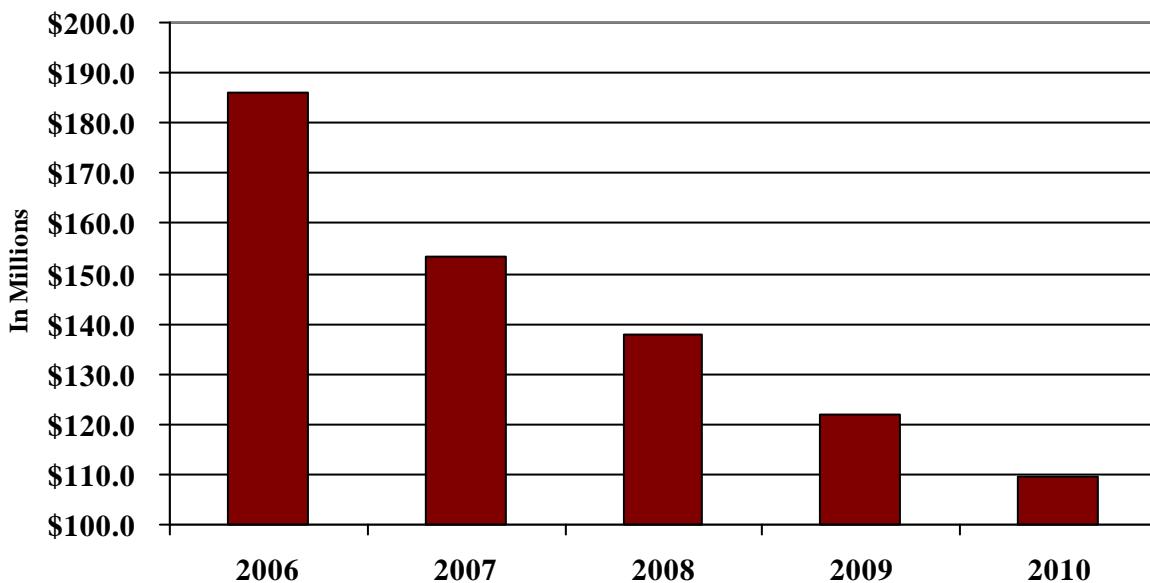

## **Capital Outlay Expenditures**

Capital outlay expenditures account for the purchase, construction, or permanent improvements of buildings, equipment, machinery, and land. Small cities expended \$109.7 million on capital outlay in 2010. This represents a decrease of 10 percent from the level expended in 2009. This was the fourth consecutive year of double-digit decreases in capital outlay expenditures.

Capital outlay expenditures are more likely than current expenditures to vary significantly from one year to the next. The reason for this is that capital projects tend to be large in size, but the associated costs are short-term. Some of the factors that influence the level of capital investments include: demands for public meeting places and facilities; the need to replace aging infrastructure; public safety concerns; infrastructure improvements for new developments; and damage to public facilities caused by fire, floods, and storms.

Figure 13 below illustrates the trend in capital outlay expenditures of small cities for the years 2006 through 2010.

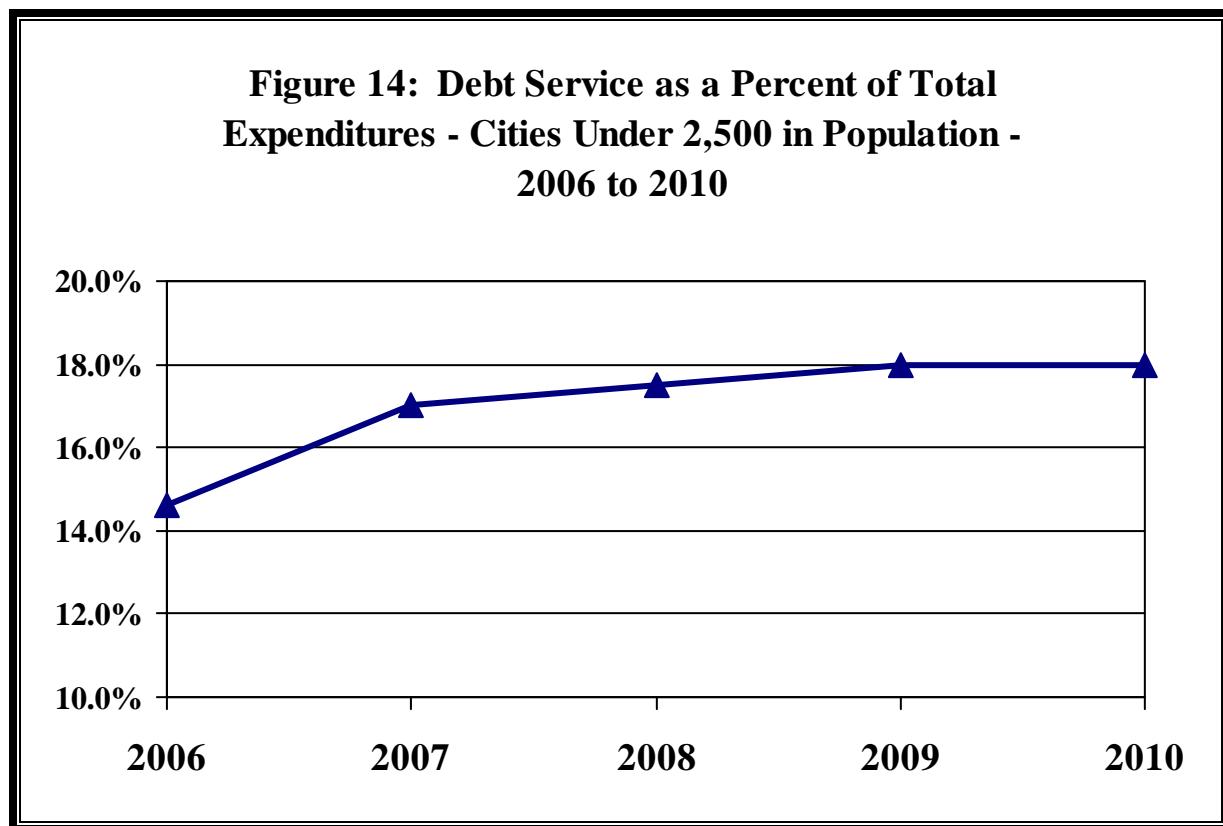

**Figure 13: Total Capital Outlay Expenditures  
Cities Under 2,500 in Population - 2006 to 2010**

## **Debt Service**

Debt service includes expenditures for the principal and interest payments on debt incurred by cities. In 2010, small cities expended a total of \$82.7 million on debt service. This represented a decrease of 8 percent from 2009. Overall, debt service expenditures accounted for 18 percent of total expenditures for small cities.

Figure 14 below shows the five-year trend in the percent of total expenditures allocated to debt service.

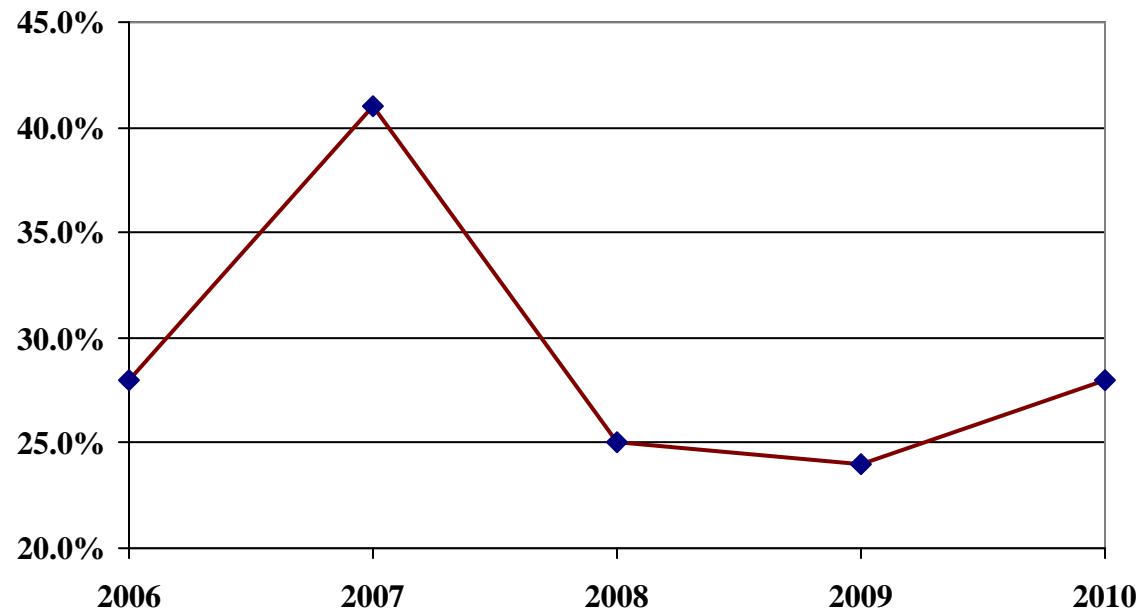

## Municipal Enterprises

The total net income of small city enterprises in 2010 was \$26.8 million, and the net amount transferred to other funds was \$7.5 million. This represents a decrease in net income of 43 percent and a decrease in net transfers (transfers out minus transfers in) of 33 percent between 2009 and 2010.

In 2010, the municipal enterprises of small cities transferred 28 percent of their net income to other funds, compared to 24 percent in 2009. There has been a general downward trend in this percentage over the last five years, except for a sharp spike in 2007 caused by the sale of a large enterprise asset and the subsequent transfer of the proceeds.

Figure 15 below examines the five-year trend in net transfers from enterprise funds as a percent of net income.

**Figure 15: Small City Enterprise Fund Net Transfers as a Percent of Net Income - 2006 to 2010**

## Outstanding Long-Term Indebtedness

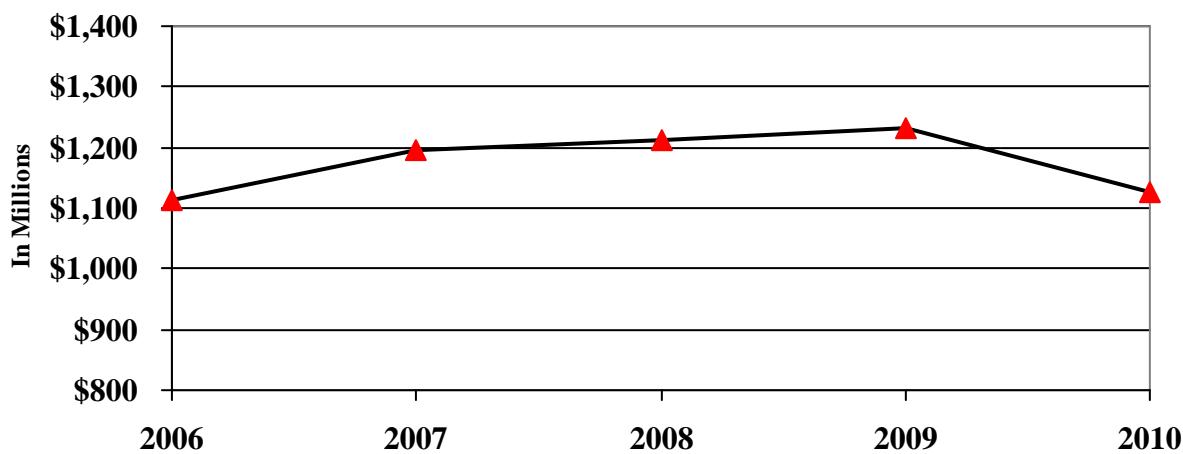

Cities under 2,500 in population carried long-term debt totaling \$1.13 billion at the close of 2010. This represents a 9 percent decrease from the level in 2009. On a per capita basis, small cities carried \$2,957 in long-term debt, compared to \$2,174 for large cities. While there is no single reason for the higher level of indebtedness per capita among the smaller cities, a primary reason is that the high costs of projects, such as water and sewer line replacement, are spread across fewer people.

Table 5 below looks at outstanding bonded indebtedness for 2009 and 2010.

<b>Table 5: Two-Year Summary of Outstanding Bonded Indebtedness</b>		
	<b>2009 Amount</b>	<b>2010 Amount</b>
General Obligation	\$109,540,314	\$106,046,803
General Obligation Tax Increment	28,926,582	24,444,455
Revenue Tax Increment	2,349,290	1,847,847
Special Assessment	329,502,777	284,427,916
General Obligation Revenue	361,263,861	352,452,243
Revenue	106,188,558	93,377,106
All Other	2,734,432	2,054,327
<b>Total Bonded Indebtedness</b>	<b>\$940,505,814</b>	<b>\$864,650,697</b>

## ENTERPRISE FUND FOOTNOTES

- [\*] The accrual basis of accounting is used; however, no depreciation is shown.
- [0] Information is taken from a cash receipts and disbursements statement.
- [1] The water utility operations include the sewer and refuse disposal enterprise fund operations.
- [2] The water utility operations include the refuse disposal enterprise fund operations.
- [3] The water utility operations include the sewer enterprise fund operations.
- [4] The electric utility operations include the water enterprise fund operations.
- [5] Water is purchased from the City of St. Paul.
- [6] The electric utility operations include the sewer enterprise fund operations.
- [7] The enterprise is a joint powers agreement.
- [8] The electric utility operations include the heat enterprise fund operations.
- [9] The electric utility operations include the gas enterprise fund operations.
- [10] The electric utility operations include the cable T.V. enterprise fund operations.
- [11] The hospital operations include the nursing home operations.
- [12] The enterprise fund fiscal year-end is April 30.
- [13] The enterprise fund fiscal year-end is June 30.
- [14] The enterprise fund fiscal year-end is September 30.
- [15] The operations were shown in the special revenue funds; an enterprise fund treatment is required.
- [16] The municipal liquor store discontinued on-sale operations during the current year.
- [17] The electric utility operations include the refuse disposal enterprise fund operations.
- [18] The sewer utility operations include the refuse disposal enterprise fund operations.
- [19] The debt payments are also shown in the governmental funds.
- [20] The facility is under construction.
- [21] The enterprise fund discontinued operations during the current year.
- [22] Non-operating income includes the gain on the sale of fixed assets.
- [23] The enterprise fund is shown on the modified accrual basis of accounting.

## **ENTERPRISE FUND FOOTNOTES** **(CONTINUED)**

- [24] The operation was shown in the governmental funds. The Office of the State Auditor requires that this type of operation is shown as an enterprise fund.
- [25] The operations were transferred to the governmental funds.
- [26] The hospital operations include the clinic enterprise fund operations.
- [27] The water utility operations include the recycling enterprise fund operations.
- [28] The gas utility operations include Circle Pines and Lino Lakes.
- [29] The enterprise is a discretely presented component unit.
- [30] The electric utility operations include the refuse, sewer, and water enterprise fund operations.
- [99] This entity failed to report in time for this publication.

## **APPENDIX A**

### **FACTORS INFLUENCING GENERAL AND SPECIAL REVENUE UNRESERVED FUND BALANCES**

This page left blank intentionally

---

## **Appendix A - Factors Influencing General and Special Revenue Unreserved Fund Balances**

---

Minnesota cities report their fund balances at the close of their fiscal year (which runs concurrent with the calendar year). This creates an impression that cities have excessive amounts of revenue held in reserve. In reality, city fund balances should be relatively large at the end of the year because of local government cash-flow cycles. Cities must rely on their fund balances to meet expenses during the first five months of the next fiscal year, until they receive the first property tax payments (May) and aid payments from the state (July).

Unlike state government, which collects income tax withholding and sales tax receipts regularly throughout the year, Minnesota's cities do not have a constant flow of revenue from which they are able to fund local government operations. Property tax levies, state aid, and property tax credits comprise the majority of city discretionary revenues. Minnesota statutes govern the flow of these major revenue sources into city treasuries:

- Counties distribute the cities' share of the first half of property tax levies in late May and early June. Cities receive the first half of their state aid and property tax credits from the state in July of each year.
- Counties distribute the cities' share of the second half of property tax levies in late October and early November.
- Cities receive the second half of their state aid and property tax credits from the state in December of each year.

Given this state-controlled flow of revenue, city fund balances (which are measured on December 31) are the primary sources of funds available to cities for their operating expenses during the first five months of the next fiscal year. An adequate fund balance will provide a local government with the cash flow required to finance expenditures without short-term borrowing.

### **Unique Circumstances of Each Jurisdiction Determine the Size of Fund Balance Needed**

While cities must rely on the fund balances for cash flow purposes during the first five months of a year, the unique circumstances of each local government will determine the size of a fund balance that must be maintained to avoid the need for short-term borrowing and to operate effectively.

Numerous factors must be considered in determining the size of a fund balance necessary for a city to avoid short-term borrowing:

- If cities receive relatively large amounts of revenue from sources such as fees, fines, charges for services, other intergovernmental grants and aids, or interest on investments during the first five months of the calendar year, then they will be less dependent on their fund balances for cash flow purposes.
- Cities are often able to delay certain purchases until after the initial property tax and state aid payments are received. While payments for employee salaries, wages, and most benefits cannot be delayed during the first five months of the year, purchases of supplies and capital equipment may be delayed.

The individual cash flow needs of a city will determine the minimum fund balance that is necessary for a city to operate effectively. Cities that are able to generate significant revenues from sources other than property taxes and state aid payments may require relatively smaller fund balances to support their cash flow requirements. Conversely, cities that rely heavily on property taxes and state aid for the majority of their revenues will need larger fund balances to meet their cash flow needs from January through June of every calendar year.

While there are many factors that help determine the minimum fund balance needed to maintain financial health, the Office of the State Auditor recommends that at year-end, local governments maintain an unreserved fund balance in their General Fund and Special Revenue Funds of approximately 35 to 50 percent of operating revenues, or no less than five months of operating expenditures.<sup>8</sup> If the local government's unreserved fund balance is less than or greater than this recommendation, the local government should be able to explain the reason for the difference.

The Office of the State Auditor recommends that each local government establish a formal policy on the level of unreserved fund balance that should be maintained in the General Fund and Special Revenue funds. The policy should be set by the governing body and should provide both a time frame and a specific plan for increasing or decreasing the level of unreserved fund balance. If the fund balance does not match the policy, a plan should be developed by the governing body that will allow for compliance with the policy.

---

<sup>8</sup>Although this section discusses only two types of fund balances, Minnesota cities actually report three different classifications of fund balances in the General and Special Revenue Funds. The ***unreserved, undesignated fund balances*** include all funds remaining at the close of the fiscal year for which no legally binding commitment has been made, nor has the governing body passed a resolution designating those funds for a specific purpose. The ***unreserved, designated fund balances*** include all funds remaining at the close of the fiscal year for which no legally binding commitment has been made; however, these funds have been designated by the governing body for a specific future use. The ***reserved fund balances*** include all funds remaining at the close of the fiscal year for which there is a legally binding external commitment of those funds, such as a signed contract for services or equipment.

## **GLOSSARY**

This page left blank intentionally

## Glossary

**BORROWING** - These revenues reflect the sale of bonds and notes, certificates of indebtedness, and tax anticipation certificates. Cities are restricted by law from borrowing for current expenses.

**CAPITAL OUTLAY** - These expenditures include the purchase, construction, or permanent improvements of buildings, equipment, machinery, and land. Capital outlay varies from year to year based on the needs and resources of the cities.

**CAPITAL OUTLAY FOR ENTERPRISE FUNDS** - These fund include expenditures from governmental funds for improvements to public service enterprises, such as sewer and water mains.

**CAPITAL PROJECTS FUND** - A fund created to account for the financial resources that are used for the acquisition or construction of a fixed asset.

**CASH BASIS OF ACCOUNTING** - The basis of accounting that recognizes transactions or events when related cash amounts are received or disbursed.

**CHARGES FOR SERVICES** - These revenues reflect fees for activities of the governmental funds. These include rent of city hall by individuals or organizations, police and fire contracts, fire calls, recreation fees, park dedication fees, etc.

**DEBT SERVICE EXPENDITURES** - These expenditures reflect the annual costs of servicing the outstanding debt of the local government. These costs include principal, interest, and some fiscal charges.

**DEBT SERVICE FUND** - A fund to account for the collection of resources and payment of principal and interest from long-term debt.

**ENTERPRISE FUND** - A fund established to account for operations financed and operated in a manner similar to private business. Examples include water, sewer, and electric utilities. The expenses of providing services are primarily financed by user charges.

**FINES AND FORFEITS** - These revenues reflect receipts from the payment of penalties for law violations, non-observance of contracts, and forfeited deposits.

**FRANCHISE TAXES** - These revenues reflect proceeds from taxes imposed on public utilities, usually involving elements of a monopoly (e.g., electric utilities, gas utilities, and cable T.V.), for use of public property.

**GENERAL FUND** - The fund used to account for all financial resources not required to be accounted for in another fund. This fund is the main operating fund.

**GENERAL GOVERNMENT EXPENDITURES** - These expenditures reflect the costs associated with running a local government. Expenditures in this category include salaries, ages, and benefits of legislative, judicial, and administrative personnel; supplies; and city hall maintenance.

## Glossary

**GOVERNMENTAL FUNDS** - These are the funds through which most governmental activities are financed. The five governmental fund types are: General, Special Revenue, Debt Service, Permanent, and Capital Projects.

**GRAVEL TAX** - These revenues are derived from taxes imposed by the local government for aggregate material removal.

**HEALTH** - These expenditures are for the maintenance of vital statistics, restaurant inspection, communicable disease control, and various health services and clinics.

**HOUSING AND REDEVELOPMENT AUTHORITIES (HRA) AND ECONOMIC DEVELOPMENT AUTHORITIES (EDA)** - These expenditures are for development and redevelopment activities in blighted or otherwise economically disadvantaged areas. Activities may include low-interest loans to individuals and businesses, cleanup of hazardous sites, rehabilitation of substandard housing and other physical facilities, and additional types of assistance to those wanting to provide housing and economic opportunity within a disadvantaged area.

**INTEREST ON INVESTMENTS** - These revenues reflect interest earned on checking and savings accounts, CDs, money market funds, and bonds. This category also includes dividends. In addition, the net increase or decrease in the fair value of investments is recorded here.

**LICENSES AND PERMITS** - These revenues reflect receipts from liquor licenses, cigarette licenses, other business licenses, street use permits, building permits, and other non-business licenses and permits.

**MISCELLANEOUS EXPENDITURES** - These expenditures reflect the costs of activities that were not allocated to a specific function. Some activities included in this category are pension and insurance costs not allocated to a specific department.

**MISCELLANEOUS REVENUES** - These revenues refer to refunds, reimbursements, donations, and lease payments.

**MODIFIED ACCRUAL BASIS OF ACCOUNTING** - This is a basis of accounting where: (a) revenues are recognized in the accounting period in which they become available and measurable; and (b) expenditures are recognized in the accounting period in which the fund liability is incurred, if measurable, except for unmatured interest on general long-term debt and certain similar accrued obligations, which should be recognized when due.

**NET TAX LEVY** - The city net property taxes, after adjustments for state property tax relief aids such as Market Value Credits are applied, which are required to be paid by the property owners of the city.

**OTHER FINANCING SOURCES** - The long-term debt proceeds, sale of fixed assets, and transfers from other funds.

## Glossary

**OTHER FINANCING USES** - This category includes activities such as transfers from one fund to another and transactions involved in the issuance of refunding bonds. For example, in an advance refunding, bond proceeds are deposited with an escrow agent and invested until they are used to pay principal and interest on the old debt at a future time.

**OUTSTANDING LONG-TERM DEBT** - This category refers to the long-term debt that a local government has incurred to finance its capital projects. Examples of long-term debt include various types of bonds and other obligations such as notes and long-term leases.

**PARKS AND RECREATION** - These expenditures reflect park maintenance, mowing, planting, and removal of trees. Recreation expenditures include festivals, bands, museums, community centers, cable T.V., baseball fields, organized recreation activities, etc.

**PUBLIC SAFETY EXPENDITURES** - These expenditures reflect the costs related to the protection of persons and property. This category combines several distinct city departments, including police, fire, ambulance services, and other protection. They are combined here because cities allocate similar responsibilities differently among these departments.

**SANITATION** - These expenditures reflect the costs of refuse collection and disposal, recycling, as well as weed and pest control. Some cities provide sanitation services through enterprise funds.

**SPECIAL ASSESSMENTS** - These revenues refer to levies made against certain properties to defray all or part of the costs of a specific improvement, such as new sewer and water mains, deemed to benefit primarily those properties. The amount includes the penalties and interest paid on the assessments.

**SPECIAL REVENUE FUNDS** - Special Revenue Funds are used to account for the proceeds of specific revenue sources that are restricted to expenditures for a specific purpose.

**STREETS AND HIGHWAYS EXPENDITURES** - These expenditures reflect the costs associated with the maintenance and repair of local highways, streets, bridges, and street equipment. Common expenditures include patching, seal coating, and snow removal. Expenditures for road construction are not included in current expenditures but are accounted for as capital outlay.

**TAX CAPACITY** - Tax capacity is the value assigned to the property used to calculate the property taxes.

**TAX INCREMENTS** - These revenues are what cities generate when they establish tax increment financing (TIF) districts. In a TIF district, the increase in property tax revenues in the redeveloped area are used to pay the costs of development and redevelopment in the district rather than the general services of the city, county, and school district.

**TAXABLE TAX CAPACITY** - This category represents the tax capacity, less the tax increment district value, less the fiscal disparities contribution value, plus the fiscal disparities distribution value.

## Glossary

**TOTAL CURRENT EXPENDITURES** - This category reflects the total of all expenses related to current operations.

**TOTAL EXPENDITURES** - This category includes current operating expenses, capital outlays, and debt service principal and interest payments.

**TOTAL REVENUES** - This category reflects all sources of revenues that increase the amount of available resources without creating a liability or a future payment. Borrowing and transfers between funds are not included in total revenues.

**TRANSFERS - ENTERPRISE FUNDS** - This category accounts for the transfer of available resources to or from public service enterprises. An example of this transfer is a water utility transferring money to the General Fund.

**TRANSFERS - GOVERNMENTAL FUNDS** - This category accounts for the transfer of money between governmental fund types.

**UNALLOCATED INSURANCE** - These expenditures refer to insurance premiums that are not allocated to a specific function of government.

**UNALLOCATED PENSION CONTRIBUTIONS** - These expenditures refer to contributions to pension plans that are not allocated to a specific function of government.
