State Forest Nursery Program

Fiscal Year 2011 Executive Summary

Fiscal Year (FY) 2011 demonstrated a continued recovery in seedling sales by the State Forest Nursery Program (SFNP). The improvement in sales to slightly more than 6.8 million tree seedlings resulted in FY11 revenues that were within \$72,000 (3.4 percent) of covering all costs. Accounts receivables of over \$200,000 still waiting for payment at the end of the fiscal year indicate that FY11 billable revenues actually exceeded production costs by 10 percent.

The increase in FY11 seedling sales was directly linked to an increase in conifer seedling orders by public land management agencies. Public land sales constituted 66 percent of seedling sales in FY11 compared to 61 percent in FY10. Sales to private landowners have continued a slow but steady three-year decline after a drastic drop (57 percent) in private land sales from 4.2 million tree seedlings in FY08 to 2.4 million in FY09.

The 2011 Legislature passed legislation that would alter the structure and purpose of the SFNP. The legislative language stated:

2011 1st Special Session Chapter 2: Article 4 STATUTORY CHANGES

Sec. 30. STATE TREE NURSERY PROGRAM RESTRUCTURING; REPORT REQUIRED.

(a) Beginning July 1, 2011, the commissioner of natural resources shall limit all new plantings at the Badoura State Nursery to the planting of stock for research or use on public lands or private conservation lands with permanent protection. Excess plant material may be sold or traded to private wholesale nurseries.

(b) By January 15, 2012, the commissioner of natural resources shall submit a budget and financial plan for the state nurseries to the chairs and ranking minority members of the house of representatives and senate committees and divisions with jurisdiction over environment and natural resources policy and finance. The plan shall include a long-term business plan to operate the Badoura State Nursery in a manner that is self-sufficient. The plan shall also include options for the General C.C. Andrews State Nursery.

This legislation requires the SFNP to implement a business plan for Badoura Nursery. This plan will restructure nursery operations to become fiscally self-sufficient based on native seed and seedling sales made to support the management of “public lands or private conservation lands with permanent protection.” It is estimated that this will require the SFNP to restructure to a reduced seeding and production goal of approximately 3.5 million seedlings. No further seeding has been or will be done at the General Andrews Nursery facility and it will be repurposed. The required business plan was developed and submitted to the Legislature on January 13, 2012. The report can be accessed at

<http://files.dnr.state.mn.us/aboutdnr/reports/legislative/StateForestNurseryProgramBusinessPlan-Jan2012.pdf>.

The balance forward in the Forest Nursery Account as shown in Table 5 remains at \$1,013,759. The balance in the Forest Nursery Account is anticipated to be adequate to maintain the self-sufficiency of the SFNP in FY12.

Introduction

Minnesota's state forest nurseries began producing conservation-grade seedlings for reforestation in the early 1930s. Their most recent milestones include 80 years of operation and more than 1 billion seedlings produced. Since 2008, the turbulent economic situation both nationally and in Minnesota has resulted in unpredictable fluctuations in nursery sales. There was a positive trend in Fiscal Year 2011, with an 11 percent increase in sales over the previous year. This increase was primarily due to greater conifer orders by public land customers. There currently are two state-operated forest nurseries: Badoura Nursery, located 10 miles south of Akeley, and General Andrews Nursery, located three miles north of Willow River.

The Department of Natural Resources is required by law (*Minnesota Statutes*, section 89.36, subd. 4) to annually submit to the Legislature a report on state forest nursery seedling production:

89.36 PRODUCING AND PROCURING PLANTING STOCK

Subd. 4. **Annual report.** The commissioner (of natural resources) shall submit an annual report to the legislature (by April 15 of each year) relating to the production of planting stock at state nurseries. The report must include the following:

- (1) sale figures;
- (2) income figures; and
- (3) expenses for operations and administration.

Copies of the report must be filed with the Legislative Reference Library and made available to the public. The commissioner shall also provide any additional information requested by the Legislature relating to the production of planting stock at state nurseries. *Minnesota Statutes*, section 89.36, subd.1 also requires the state forest nurseries to limit their production to not more than 10 million seedlings each year. In addition to seedlings produced, the state forest nurseries have annually purchased between 100,000 and 1 million seedlings from private producers for resale to their customers. Seedlings purchased from the state forest nurseries are to be used to establish or reforest wood lots, windbreaks, and shelterbelts or used for erosion control, soil and water conservation, environmental education, or permanent food and cover for wildlife.

TOTAL STOCK SOLD AND REPLACED	6,806,500

Basis of Accounting

The State Forest Nursery Program is operated on a fiscal self-sufficiency basis so over time, the revenues must cover expenditures. Some seedlings take up to five years to produce. Each year of production, costs are incurred; however, approximately 70 percent of the total cost is incurred in the last year of production for lifting, packing, and shipping. In a given year, sales are defined as the revenues from seedlings *delivered* to customers that year from July 1 through June 30. The costs reported for that year are the production costs for all the seedlings in the inventory, not just for those seedlings sold. Nursery production is capped by statute at 10 million seedlings produced for sale per year. In addition, a limited amount of seedlings is purchased from outside sources for resale to create unique habitat packages or meet demand. As a consequence of the above, a small surplus or deficit may occur in a given year, but over time it must balance.

89.36 PRODUCING AND PROCURING PLANTING STOCK

Subdivision 1. **Production at state nurseries.** The commissioner of natural resources may produce tree planting stock for the purposes of sections 89.35 to 89.39 upon any lands under control of the commissioner which may be deemed suitable and available therefore so far as not inconsistent with other uses to which such lands may be dedicated by law. The commissioner may not produce more than 10,000,000 units of planting stock annually, after January 1, 2003.

Subd. 2. **Purchase of stock.** The commissioner of natural resources may purchase tree planting stock for the purposes herein authorized under the provisions of sections 89.35 to 89.39, or any other applicable law now or hereafter in force.

In a given fiscal year, a significant portion of the "sales" has not been paid into the Forest Nursery Account and realized as cash receipts. So, as of the close of the year, an accounts receivable balance is carried. In addition, receipts from prior years' sales have been realized. Therefore, the cash receipts showing in the state accounting system (MAPS) should not be expected to tie to sales for that fiscal year.

The 2005 Legislature (Special Session) added to statute that up to \$250,000 per year could be used from the Forest Nursery Account for forestry education and technical assistance. In Fiscal Year 2011, no monies were used from the Forest Nursery Account for these purposes.

89.37 DISTRIBUTING PLANTING STOCK

Subd. 4. **Proceeds of sale.** All money received in payment for tree planting stock supplied under this section shall be deposited in the state treasury and credited to a forest nursery account and are available to the commissioner of natural resources for the purposes of sections 89.35 to 89.37, including up to \$250,000 per year for forestry education and technical assistance.
