Report to the Legislature

As required by

Minnesota

Statutes, section

120B.13

Cost of Report Preparation

Minnesota Statutes, section 3.197 requires the following:

"A report to the legislature must contain, at the beginning of the report, the cost of preparing the report, including any costs incurred by another agency or another level of government."

The following provides estimated costs incurred in the preparation of this report.

This report required the collection of some information that the Department of Education (MDE) does not collect as part of its normal business functions as well as some that it does. It was therefore necessary to gather, combine and analyze information in order to prepare this report. The cost of preparing this report includes estimates of MDE information collection costs as well as the estimated costs of the providers of the information.

Funding for this report:

Special funding was not appropriated to cover the costs of preparing this report.

Minnesota Department of Education Costs:

The following is an estimate of the cost incurred by MDE: \$7,589.10

Most of these costs involved staff time collecting and analyzing a variety of data sources, as well as writing the report. Incidental costs include paper, copying and other office supplies.

TOTAL ESTIMATED COST FOR PREPARING THIS REPORT: \$7,589.10

2014 Report to the Legislature

Rigorous Course Taking

Rigorous Course Taking: Overview of Legislation

The Minnesota Legislature has appropriated funding to support the development of Advanced Placement, International Baccalaureate, Concurrent Enrollment, and Postsecondary Enrollment Options. These programs, designed to offer pathways, opportunities and preparation for the world beyond high school, continue to increase in both student enrollment and success for Minnesota students. In FY 2012-2013, the legislative appropriation for the Advanced Placement (AP) and International Baccalaureate (IB) programs was \$4,500,000, with \$500,000 of that funding earmarked specifically for teacher training in those programs. In addition, the appropriation specified, “The advanced placement program shall receive 75 percent of the appropriation each year and the international baccalaureate program shall receive 25 percent of the appropriation each year.” [View Minnesota Statutes, section 120B.13](#) (see [Appendix A](#). Advanced Placement and International Baccalaureate Programs).

Courses taken through the Postsecondary Enrollment Options (PSEO) program and through concurrent enrollment programs are also supported through separate funding formulas, with PSEO payments made to postsecondary institutions, and concurrent enrollment reimbursements provided directly to participating school districts. [View Minnesota Statutes, section 124D.09 and 124D.091](#).

This report will describe specifics and progress of each of the four above mentioned programs: Advanced Placement (AP), International Baccalaureate (IB), Postsecondary Enrollment Option (PSEO) and Concurrent Enrollment.

Advanced Placement (AP) Program Description

The Advanced Placement Program is a cooperative educational endeavor between secondary schools and colleges and universities. Since its inception in 1955, the College Board Program has provided motivated high school students with the opportunity to take college-level courses in a high school setting. The program consists of 34 college-level courses and standardized exams that assess proficiency in these courses. The College Board supports secondary schools by providing facilitated teacher training and a curriculum of high academic intensity and quality that enables students to meet the standards for college-level learning in these subjects. Most colleges and universities in the United States, as well as institutions in 30 other countries, use AP exam results in the admissions process as a designation of a student’s ability to succeed in rigorous curricula. Colleges award credit and/or placement into higher-level college courses so that college entrants can move directly into the courses that match their level of academic preparation.

Advanced Placement is open to any secondary school that is willing to organize one or more courses, foster teacher development and administer the AP Exams. All AP exams (except Studio Art, which is a portfolio assessment) consist of dozens of multiple-choice questions, scored by machine, and free-response questions (essays, translations, problems), which are scored at the annual AP Reading by more than 10,000 college faculty and secondary AP teachers, using scoring standards and rubrics developed by college faculty and experienced AP teachers.

All schools wishing to label a course “AP” must first receive authorization by completing the AP audit process, which involves submitting a copy of the course syllabus for review by college faculty. The AP course audit provides clear guidelines on curricular and resource requirements that must be in place and helps colleges better interpret courses marked “AP” on students’ transcripts. For further information about the program, [Visit the College Board website](#) for more information about Advanced Placement.

Minnesota is in its 22nd year of providing AP exam fee support for students. In 2013, 279 public and non-public schools offered AP courses. The number of students testing and exams taken in FY 2013 continued to demonstrate significant gains, on AP exams and student participation.

The mission of the AP Program overall is to prepare students for academic success in college and beyond. Though still underrepresented in AP classrooms, in 2013 more minority students experienced success in AP than ever before, with the number of African American and Hispanic/Latino students taking AP exams more than doubling in the last 10 years.

According to the College Board, 20.3 percent of Minnesota public high school graduates scored a 3 or higher on an AP exam, ranking Minnesota in the top 17 states, exceeding the national average of 20.1 percent. In addition, Minnesota is in the top ten percent of the U.S., with 10.4 percent increase since 2003 in the percentage of Minnesota public high school graduates scoring 3+, exceeding the national average of 7.9 percent increase.

Minnesota Advanced Placement Program Participation

AP exam subsidies were again available for public and non-public school students. In 2013, the state reimbursed \$53 per exam for category one students (fee-reduced, low-income) and \$50 per exam for exams taken by category two students (non-fee-reduced). The College Board waived \$28 per exam for all fee-reduced students and, if schools also waived their \$8 exam administration rebate from the College Board, the state reimbursement covered the entire cost of these exams. The charts below provide a snapshot of the Minnesota student performance in 2013 on AP exams as well as an overview of the 2013 Minnesota AP test takers, disaggregated by score, gender, and ethnicity.

Overview AP Test Scores 2013

Advanced Placement Tests	Total	Score of 1	Score of 2	Score of 3	Score of 4	Score of 5	Percent of 3 +
Total Number	64,705	8,812	13,864	17,754	14,758	9,517	64.9% (42,029)

Overview of AP Test Takers 2013

Gender	Total	Percent
Male	18,012	46.5%
Female	20,757	53.5%
Total AP test takers:	38,769	

The charts below details participation in AP programs over the last six years. Of note are increases in participation by students of color (43.5 percent increase), low-income students, and non-public students. With this growth, the chart also shows that there is increased participation in teacher training opportunities as these programs grow.

In May 2013, 38,769 students took 64,705 exams with 42,029 exams (or 64.9 percent) earning a score of three or above on a five point scale, indicating proficiency. Based on students' opportunity to earn at least three college credits for each AP Exam score of three or higher, the resulting value to Minnesota families through credits earned at Minnesota postsecondary institutions is potentially \$23,201,112 at MnSCU institutions (average \$184/credit x 3 credit course x 42,031), and \$58,507,152 at the University of Minnesota (average \$464/credit x 3 credit course x 42,031).

See [Appendix B](#). Advanced Placement Public School Reimbursements and [Appendix C](#). Advanced Placement Non-Public School Reimbursements.

In the past six years, high schools in Minnesota have increased the number of students gaining access to and experiencing success in AP, and the population of AP exam takers is increasingly diverse.

AP Student Demographics	FY 08	FY 09	FY 10	FY11	FY12	FY13	Percent Increase (2007-2013)

AP Exam Profile

An AP exam score of three or higher can often translate into college credit once a student enters a postsecondary program. Minnesota data indicates annual significant increases in exam participation along with steady growth in the number of exams scoring three or higher.

Minnesota data has shown improvement over time in the performance on AP exams. The chart below disaggregates the passing scores by race in 2013.

(Data Source: College Board)

AP scores 3+	3	4	5	Total
Not Stated	258	142	98	498
American Indian or Alaska Native	51	34	14	99
Asian, Asian American, or Pacific Islander	1269	1233	1018	3520
Black or African American	391	207	76	674
Mexican or Mexican American	164	117	45	326
Puerto Rican	24	13	15	52
Other Hispanic, Latino, or Latin American	171	115	87	373
White	13245	10922	6799	30966
Other	349	298	202	849
Total all groups	15922	13081	8354	37357

Also, in 2013, 398 public school students taking AP exams self-identified as Limited-English proficient. This number has increased 130 percent since 2006.

AP Exam Participants	2006-07	2007-08	2008-09	2009-10	2010-11	2011-12	2012-13
Limited-English Proficient	173	177	170	186	159	168	398

International Baccalaureate (IB) Program Description

The International Baccalaureate Organization (IBO) is a non-profit, Swiss educational foundation established in 1968. The Diploma Program (DP) was developed by a group of schools seeking to establish a common curriculum and university entry credentials for geographically mobile students. The IBO offers four programs of international education that span the primary, middle and secondary school years. The Primary Years Program (PYP) is designed for students aged three-12, the Middle Years Program (MYP) for students aged 11-16, the Diploma Program (DP) for students aged 16-18, and the IB Career-Related Certificate (IBCC) is a program for high school students to engage in career-related learning. The DP, MYP and PYP schools go through an extensive application process to become authorized IB World Schools.

These four programs intend to serve students from age three to 19 in developing the intellectual, personal, emotional and social skills to live, learn and work in a rapidly globalizing world. The IB programs are designed to provide a broad and balanced education that includes science and the humanities, languages and mathematics, technology and the arts. The programs are designed to teach students to think critically, encourage them to draw connections between areas of knowledge, and to use problem-solving techniques and concepts from many disciplines. The goal is to instill a sense of responsibility towards others and towards the environment, as well as give students an increased awareness and understanding of their own culture and of other cultures, values and ways of life. The IB works with 3,482 schools in 144 countries worldwide, including 2,419 programs North, South and Central America, with 1,600 in the United States alone.

The Diploma Program (DP) is a comprehensive two-year international curriculum available in English, French and Spanish. The DP offers 157 exams in 51 disciplines that generally allow students to fulfill the requirements of their national or state education systems. Students who participate in the full Diploma Program are required to study and examine in six different academic subjects. At least three of the six subjects are taken at the higher level where students study the subject area in depth for two academic years totaling 240 hours. Challenging, standard level IB courses span one academic year and total a minimum of 150 hours. Students who are not diploma candidates can choose to take individual IB courses and subsequent exams to earn IB certificates.

The format of exams is both written and oral and includes essay, multiple choice and short answer questions. In some subject areas, students also prepare a portfolio for assessment. Each subject has at least two exam periods for different types of exams for a total of four hours of examination. Each examined subject is graded on a scale of one to seven (maximum). The award of the diploma requires a minimum total of 24 points and satisfactory completion of the following three additional requirements:

- The Extended Essay is approximately 4,000 words, requiring students to write an independent, original research paper in one of the six subject areas;
- A critical thinking course known as Theory of Knowledge explores the relationships among the various disciplines and ensures that students engage in critical reflection and analysis of the knowledge acquired within and beyond the classroom; and,
- A minimum of 150 hours participation in Creativity, Action and Service (CAS), which are extracurricular community-action service, artistic and physical activities.

[View more information about the International Baccalaureate on their website](http://www.ibo.org) (http://www.ibo.org).

Minnesota International Baccalaureate Program Participation

In 2013, 59 IB programs were in place in 53 'Authorized' Minnesota schools. IB Authorized schools encompasses 20 Diploma Program (DP) schools, 15 Middle Years Programs (MYP) present in 23 schools (both middle schools and high schools), 22 Primary Year Program (PYP) schools and two IB Career-Related Certificate (IBCC) program schools. Additionally, sixteen schools were involved in teacher training and program development, associated with the 'Application' and 'Candidate' levels, and are seeking authorization by the International Baccalaureate Organization (IBO). Participating schools receive support and guidance through the Minnesota Department of Education (MDE), Minnesota Association of IB World Schools (MAIB), the International Baccalaureate of the Americas (IBA), and the International Baccalaureate Organization (IBO). ([Appendix D](#). International Baccalaureate Schools Reimbursements FY 13)

See [Appendix E](#) for a list of Minnesota International Baccalaureate Schools.

In 2013, the number of students testing at the Diploma Program (DP) level increased 12.5 percent, from 2,799 to 3,150. These students took 7,373 exams, compared to 6,144 exams in 2012, or a 20 percent increase. Last year 3,917 of those exams (53.1 percent) earned a score of four or better on a scale of one-seven. Students can elect to take individual IB courses or the full IB diploma. In 2013, 287 Minnesota students earned the full IB diploma.

DP Schools	2008	2009	2010	2011	2012	2013	Percent Increase 2007-2012

Diplomas Earned	158	157	144	173	191	287	82%

Data Source: International Baccalaureate

Brooklyn Center, South Saint Paul and Fridley Public Schools have district-wide IB programs that serve all elementary and middle school students in those districts. In addition, approximately one-third of all Minnesota IB schools are in Minneapolis (11) and St Paul (10). Of the 28 districts, charter and private schools with IB programs in Minnesota, all but two (Grand Rapids and St. John's Prep School) are located in the greater metropolitan area.

In order to become an authorized IB school, a school or district must go through five specific steps including a feasibility study/strategic planning process, comprehensive schools changes to curriculum, instruction, and professional development that occurs during the two step application process from Applicant to Candidate status. After this has been completed, schools undergo a site visit from the IB Americas. After a successful visit, the school then achieves the Authorized IB World School status. Follow up visits are required to maintain their IB authorization.

In 1992, International Baccalaureate developed a Middle Years Program (MYP), which offers a broad academic base along with Approaches to Learning and other areas of interaction for students in grades 6-10. The MYP can be a stand-alone program or part of the pre-IB preparation for the Diploma Program. In Minnesota in 2013, there were 15 Middle Years Programs (MYP) in 23 schools, all of them located in the greater metropolitan area.

The Primary Years Program (PYP) was developed in 1997. It offers an inquiry-based program for students in pre K-5th grade. As of FY 2013, 22 schools were authorized to offer the PYP. All Minnesota PYP schools offer the full PYP to all students. The PYP and MYP schools also go through a comprehensive process to become authorized. Both the MYP and the PYP are school-wide models that serve all students. A complete list of Minnesota IB schools is provided at the end of this report.

The IB programs in Minnesota have evidenced significant growth each year in the numbers of students of color and low-income students taking IB exams. The following charts below provide a profile of the IB landscape in Minnesota.

IB Funding	FY 08	FY 09	FY 10	FY 11	FY12	FY13	Percent increase (2008-12)

* Data not available

Minnesota is in its 22nd year of providing IB exam fee support for students. In 2013, 60 public and non-public schools provided IB programs. The number of students testing and exams taken in FY 2013 continued to demonstrate significant gains. In May 2013, 3,150 students took 7,373 exams with 3,917 exams (or 53 percent) earning a score of four or above on a seven point scale, indicating proficiency. The resulting value to Minnesota families through credits earned at Minnesota postsecondary institutions is potentially \$1,970,088 at MnSCU institutions (average \$184 per credit), and \$4,968,048 at the University of Minnesota (average \$464 per credit).

A demographic breakdown of both students who tested and the number of exams taken indicates a greater percent increase over the six year period among students of color as compared to white students, with the greatest increase in the American Indian population. (Data Source: International Baccalaureate).

See [Appendix E](#) for IB participation by school.

Teacher Training and Exams: Advanced Placement and International Baccalaureate

During the 2012-2013 fiscal year, in-depth teacher training was conducted by certified AP and IB trainers and providers. The training, provided through the College Board (AP) and International Baccalaureate (IB), is designed to prepare teachers to deliver rigorous college level curriculum in the secondary setting and challenging academic experiences in the middle and primary grades.

In support of Advanced Placement, the Minnesota Department of Education (MDE) has worked closely with the Minnesota Advanced Placement Advisory Board (MnAPAC), Augsburg College and Carleton College to facilitate in-depth training for AP teachers. In the summer of FY 2013, Carleton trained 358 teachers and Augsburg trained 119 teachers during the Advanced Placement Summer Institutes. Twenty-six AP teachers received out-of-state training. In addition, 547 teachers attended workshops at the University of Minnesota. In total 1,509 participants took part in these opportunities funded through this legislative appropriation. In 2010, 2011, 2012 and 2013, an additional day of training was added to the AP summer institutes to provide AP teachers with the option of learning digital tools and strategies to enhance their current lessons.

The MDE's support of IB teacher training is conducted through coordination with the IBO, the IB Americas, and the Minnesota Association of IB World Schools (MAIB). IB teacher training is primarily offered at out-of-state sites. In FY 13, Minnesota was selected as a host site by IBO for the multi-level training and 162 teachers attended this local training. During 2013, out-of state IB training was attended by 328 teachers, and 472 teachers participated in workshops and professional networking opportunities coordinated by the Minnesota Association of IB World Schools. Additionally, 273 teachers attended special on-site trainings offered in partnerships with specific districts and the International Baccalaureate. Thirty-six teachers participated in online training. A total of 1,271 participants attended some form of professional development for the IB.

AP and IB exam fees for public and non-public students are subsidized by legislative action. Specific direction is given to pay all exam fees for low-income students. Combining the two programs, 41,919 students took 72,078 AP and IB exams in Minnesota in 2013, an increase of 4.3 percent in participating students, and 5.7 percent in number of exams taken. Of those, districts reported that 4,738 of participating students qualified as low-income, an increase of 14.7 percent from 2012; and these students took 7,597 exams, an increase of 16 percent from 2012. Minnesota is continuing to move in the right direction in closing the opportunity gap for underrepresented students in these programs.

IB Teacher Training	FY 08	FY 09	FY 10	FY 11	FY12	FY13	Percent increase (2007-13)
Total Teacher Training	403	820	1,018	1,294	1,254	1,271	215%

Expenditures: Advanced Placement and International Baccalaureate

Since 2006, the Legislature has appropriated \$4,500,000 each year, to fund the costs of student exam fees and teacher training, with 75 percent of the appropriation designated for AP programs and 25 percent designated for IB programs. Additionally, at least \$500,000 each year is to be used to provide teacher training and support for AP and IB programs. Minnesota Statutes, section 120B.13 also directs the commissioner to pay all AP and IB exams fees for low-income students and to pay a portion of the exam fees for other public and non-public students. The Minnesota Department of Education (MDE) was directed to work in consultation with the Minnesota AP Advisory Council and the Minnesota Association of IB World Schools to determine the manner in which the allocated funding would be distributed.

In 2013 AP Teacher Scholarships were available up to \$600 for in-state teacher training and up to \$1,000 for out-of-state training. Scholarships subsidize costs related to tuition, travel, room and board for AP teachers who attended training. The following criteria are used to determine out-of-state travel for AP: (1) training was not available in Minnesota or (2) dates at Carleton or Augsburg were not feasible for participants.

International Baccalaureate teacher training in 2013 was offered both in-state and out of state. In-state support programs and workshops were offered in Minnesota through the Minnesota Association of IB World Schools. A total of 1,271 teachers attended various types of professional development of which 328 teachers attended in-depth out-of state training.

AP Exam fees were subsidized at a rate of \$53 per student, per exam for students of low-income families applying for fee reductions that are provided by the College Board. Other students were subsidized at a rate of \$50 per student, per exam. Schools use free and reduced price lunch eligibility as the criteria for determining low-income students that qualify for the fee reduction. The College Board provided the \$28 fee reduction and the school is expected to waive the \$8 fee for students. AP exam fees totaled \$3,294,614 for 38,769 students taking 64,705 exams and IB exams fees totaled \$814,516 for 3,150 students taking 7,373 exams. This funding covered the partial cost of AP and IB exams for non-low-income students and 100 percent of the cost for students who qualified under the federal guidelines for eligibility for free or reduced lunch.

IB Exam fee subsidies for low-income students (based on eligibility for free or reduced-price lunch) were subsidized at the full cost of \$255 for the first exam and full cost of \$104 for each additional exam per student. All other student exams were funded at \$100 for the first exam and \$45 for each additional exam.

The payment schedule for exams has varied over time. The state reimburses all AP and IB schools for exams and teacher training after exams have been ordered and teacher training has been completed. Schools submit a copy of their invoice for exams and application for reimbursement to MDE. The budget for FY 2013 was \$4,500,000. Expenditures for teacher training and support programs were \$642,732.16. The amount expended for exams for both programs totaled \$4,109,130, with expenditures for exams and teacher training for AP totaling \$3,617,685.25 and \$1,134,176.91 for IB, bringing the total expenditures for FY 2013 to \$4,831,962.16.

AP and IB Program Allocations and Combined Expenditures (2007-2013)

AP and IB	FY 08	FY 09	FY 10	FY 11	FY12	FY13

**Funding was dedicated to exams and authorized training only for FY 08, FY12 and FY13 for IB.

College Credits and Policies

Participating colleges in more than 30 countries receive AP grades and grant credit or appropriate placement to students who have done well on AP examinations. The IB Diploma is accepted as an admissions credential at more than 1,000 North American Colleges and in more than 100 countries.

More than 90 percent of U.S. colleges and universities have an AP and IB policy granting incoming students academic credit, placement or both, for qualifying grades on AP or IB exams. Most public and private institutions in Minnesota have AP and IB credit policies. These courses are equivalent to college freshman level courses and with enough qualifying grades, students often enter college with a sophomore level standing.

As articulated in Minnesota Statutes, section 120B.13, Subdivision 3a,

“The colleges and universities of the Minnesota State Colleges and Universities system must award, and the University of Minnesota and private postsecondary institutions are encouraged to award, college credit to high school students who receive a score of three or higher on an advanced placement or four or higher on the international baccalaureate program examination.”

Minnesota State Colleges and Universities (MnSCU) has adopted a policy establishing common practices among higher education institutions for awarding credit for scores of 3-5 in AP and scores of four-seven in IB. In Minnesota, 61 colleges and universities acknowledge Advanced Placement exam scores and 47 colleges and universities acknowledge International Baccalaureate exam scores. Large numbers of Minnesota high school graduates who participate in the AP and IB Programs are attending colleges out of state.

Administration: AP and IB Programs

The Minnesota Department of Education is responsible for the administration of AP and IB program components as funded by legislation. The intent of the legislated funding is to assist public and non-public students in paying for AP and IB exam fees as well as providing essential teacher training for both programs.

MDE Staff Responsibilities:

- Communicate opportunities for exam fee subsidies to all Minnesota schools and students;
- Gather data from individual public and non-public schools regarding their AP and IB programs, including the number of students tested, exams taken, courses offered and teachers teaching an AP or IB course;
- Work with the College Board to create invoice forms for payment of AP fees;
- Work with the public and non-public schools to pay for exam fees for all AP and IB exams; and,
- Prepare documentation to provide direct payment of exam subsidies to AP and IB districts.
- Consult and coordinate with the Minnesota Advanced Placement Advisory Council and the College Board to create training programs.
- Consult and coordinate with the Minnesota Association of IB World Schools (MAIB) and the International Baccalaureate of the Americas (IBA) to identify training sites and direct teachers to the appropriate levels.
- Assist in the development, promotion, and evaluation of the teacher trainings.
- Work with the College Board and MAIB to support teachers and provide follow-up to training experiences.
- Process reimbursements for out-of-state and in-state training opportunities attended by educators.
- Process reimbursements to school districts for student exam fees.
- Prepare and maintain the AP and IB budgets;
- Prepare annual reports to the legislature and respond to legislative inquiries;
- Work with Minnesota public and private universities and colleges to prepare credit policies for courses earned through Advanced Placement and International Baccalaureate Exams;
- Provide information and present at conferences about these programs to groups of interested parents, educators and students;
- Respond to phone and e-mail requests from program coordinators, teachers, parents and students;
- Communicate regularly with AP and IB coordinators regarding program information, program start-up, application processes and payments to their school or district; and,
- Gather and report data to the media, higher education, secondary schools, and other organizations regarding student participation in AP and IB programs.

Recent Trends: AP and IB Programs

1. Increasing alignment and rigor in courses prior to high school

In an effort to increase the number of underrepresented and first generation students enrolling in and succeeding in postsecondary opportunities, they need preparation for and access to rigorous college-level work while still in high school. Additionally, students in middle school or earlier need access to support programs designed to motivate and prepare them for these courses. Minnesota school districts are increasing their efforts to offer aligned programs designed to enhance critical knowledge and thinking skills at the middle level or earlier. International Baccalaureate offers the middle years (MYP) and the primary years programs (PYP), while the College Board has developed both curriculum (Springboard) and assessments (AP-Potential) designed to support and identify students with the potential to succeed in rigorous courses. An increasing number of Minnesota districts and teachers are participating in professional development opportunities (Pre-AP) that intend to support vertical teaming and enhance the critical thinking skills required for student success in these courses and at the postsecondary level. In 2013, 40 percent more Minnesota students took 47 percent more exams than Minnesota students did in 2007. Additionally many districts are adding courses and programs designed to address “college knowledge” skills and behaviors at the middle level. Examples include the AVID program- Advancement Via Individual Determination and Ramp Up to Readiness.

2. Promoting equity in rigorous courses

Both the AP and the IB Programs are committed to increasing student diversity in rigorous classrooms while simultaneously increasing their success. Although progress has been made to close equity gaps in participation and success among underserved minority and low-income students, challenges remain in Minnesota. Our data continues to indicate that more underserved students from all demographic groups are participating in these programs, but their numbers are not yet representative of their numbers in our overall population. We have made strong progress as a state.

3. Funding.

Minnesota’s legislative appropriation has provided critical support for the AP and IB programs. Projecting for 2014 and beyond, the continued growth in exam taking and increasing number of students engaged in both AP and IB will be difficult to maintain, however, if the appropriations for these programs remains flat. The amount available for individual exam reimbursements will decrease as the number of student exams increases, potentially impacting the participation of low income students.

A federal Advanced Placement Incentive Program grant has allowed Minnesota to build an [access and equity website](http://www.readysetgompn.org) (www.readysetgompn.org). This site is designed to utilize the power of technology to inform, support, and engage underrepresented students and their families in participating and succeeding in rigorous courses and postsecondary opportunities. We intend to continue to expand the use of this site, utilizing digital tools to increase the successful participation of all students in courses leading to postsecondary success.

Recommendations: Advanced Placement and International Baccalaureate

As the AP and IB Programs in Minnesota continue to expand, there is an ongoing need to provide challenging learning opportunities for all learners; to support teachers delivering this level of program rigor; and to encourage schools to initiate and/or expand AP and IB programs. Challenging, rigorous learning opportunities are essential to preparing students for success in postsecondary institutions. State accountability requires public reporting for student achievement, but in addition, Minnesota is reporting advanced academic opportunities, including AP and IB course information.

Specific recommendations for enhancing AP and IB programs in Minnesota include:

- Maintain and increase legislative support for student exams and teacher training;
- Utilize MDE's working relationship with the College Board and International Baccalaureate Organization to maximize opportunities for Minnesota students and families;
- Increase access to AP courses among students in rural communities through regionally-based and online teacher training opportunities;
- Expand efforts to address the specific needs of underrepresented students, particularly African American and Hispanic males, through small, grant-based pilot programs and outreach to parent and community groups;
- Foster growth in Pre-AP and IB middle year and primary year programs;
- Increase offerings that prepare teachers for delivering rigorous courses;
- Support the development and expansion of AP and IB online courses and digital technology training to enhance face-to-face courses;
- Focus on increased student achievement and access to both programs.
- Support middle level and earlier programs designed to prepare all students for success in high school and beyond.

Postsecondary Enrollment Options (PSEO) Program Description

In 1985, Minnesota became the first state in the nation to pass legislation to support course taking at the postsecondary level by eligible high school juniors and seniors. The Postsecondary Enrollment Options (PSEO) program in Minnesota allows high school students to enroll in courses taught by college professors on college campuses, with each participating postsecondary institution setting its own enrollment requirements for admission. The program provides students with a greater variety of class offerings and the opportunity to pursue more challenging coursework than may be available at the high school. Students may enroll on a part-time or full-time basis. PSEO allows high school students to earn college credit at little or no cost and, after graduation from high school, to potentially enter into postsecondary institutions with some requirements already met. The postsecondary institutions generate a separate college transcript with their college courses and grades for the participating high school students. Legislation passed in 2012 allows eligible 10th grade students to enroll in one PSEO Career and Technical Education course (CTE), and if successful, continued participation in additional courses.

Any public, nonpublic, home school or American Indian-controlled tribal contract or grant student classified as an 11th or 12th grader and accepted by a postsecondary institution, may enroll either full- or part-time in nonsectarian courses or programs at that postsecondary institution. Students participating in cultural exchange programs are not eligible.

Eligible institutions include the University of Minnesota and its branches; all state universities, community colleges and technical colleges; private, Minnesota, two- or four-year, residential, degree granting, liberal arts colleges; non-profit, degree granting trade schools; or accredited opportunities industrialization centers in Minnesota.

The PSEO program is funded through legislative direction under MN Statute §124D.09. There is no cost for students to participate in this program. The state or school districts pay for tuition, books and lab fees at the postsecondary institution when students participate in PSEO.

Postsecondary Enrollment Options (PSEO) Program Participation

Eighty-four Minnesota colleges and universities participated in PSEO during the 2012-2013 school year. PSEO participation by public high school students has remained basically static between FY 2007 and 2013, experiencing a small decrease during that time period. Though participation has remained somewhat static overall, low-income enrollment has increased by almost 62 percent, and accounts for almost 19 percent of participants. Additionally, participation in PSEO by black students has increased by 27 percent since 2007, although these students account for only 5.9 percent of the total participants, and participation by Hispanic students has dramatically increased by 175 percent, and accounts for less than 3.3 percent of the total participants. The majority of participating students (83 percent) are white.

PSEO Participants	FY 07 (2006-07)	FY 08 (2007-08)	FY 09 (2008-09)	FY 10 (2009-10)	FY 11 (2010-11)	FY 12 (2011-12)	FY 13 (2012-13)	Percent Increase (2007-13)

Source: The Minnesota Automated Reporting Student System (MARSS)

Minnesota statute appropriates funding for public, private and homeschooled students to participate in PSEO. In 2012-13, the average reimbursement per enrolled student was \$3,035, or \$183/credit. This has increased a small amount since 2007-8, when the average reimbursement was \$2,859 per student, or \$178/credit. In 2013, public school students accounted for 73 percent of those enrolled in PSEO, homeschooled students were 19 percent of enrollees, and nonpublic/private school students made up 8 percent of the PSEO population.

Year	Traditional (Nonpublic/private)	Home School	Public	Total	Average Credits Per Participant	Amount Paid to PSEO Institutions
07-08	529	1,210	5,807	7,546	16.06	21,530,395.10

See [Appendix F](#) for postsecondary enrollment by institutions and the total number of credits and expenditures.

Recommendations: Postsecondary Enrollment Options (PSEO) Program

1. [Minnesota Statutes, section 124D.09, subdivision 7](#) requires districts to provide general information about postsecondary enrollment options to all students in grades 8, 9, 10, and 11 by March 1 of each year. The manner of distributing this information varies from district to district. Additional efforts are needed to intentionally reach families, especially those from low-income backgrounds and those representing communities of color.
2. Legislation in 2012 increased the opportunity for eligible students in grades 9 and 10 to enroll in postsecondary career and technical education courses. Research on the impact of this expansion is needed to help inform additional programming.

Concurrent Enrollment Program Description

Concurrent enrollment serves high school students enrolled in a postsecondary course taught during the regular school day and offered through a partnership between a high school and a college or university. Qualified high school instructors or college faculty teach the courses, which are offered at the secondary school or another location, according to an agreement between a public school board and the eligible postsecondary institution (Minnesota Statutes, section 124D.091, Subdivision 10). The same assessment methods and content are used as the equivalent sections taught on the college campus. Students can earn high school and college credit upon successful completion of the course or courses. Students earn a grade based on their work over the entire term of the course and on multiple and varied assessments. College/university credit is granted for successful completion of the course, rather than on the results of a single high stakes test.

Minnesota does not have restrictions or requirements on who can teach a concurrent enrollment course; institutional/system policies and union contracts provide the regulations and policies that currently inform the eligibility of instructors. The state currently does not require specific training or professional development for teachers prior to teaching a concurrent enrollment course. NACEP standards, however, require accredited programs to provide “annual discipline-specific professional development activities and ongoing collegial interaction to address course content, course delivery, assessment, evaluation, and/or research development in the field.”

Oversight and funding

Accreditation of postsecondary institutions through the Higher Learning Commission (HLC) and the National Alliance for Concurrent Enrollment Partnerships (NACEP) address questions of quality and rigor in most Minnesota concurrent enrollment programs. These accrediting bodies ensure that concurrent enrollment courses offered in high schools are the same courses as are offered on the sponsoring postsecondary institution campus, and that students in the high schools are held to the same academic standards as students on campus. Twelve concurrent enrollment programs are currently accredited by NACEP, which has been accrediting concurrent enrollment programs since 2005. Beginning in 2014, the Higher Learning Commission will include a review of concurrent enrollment practices as part of its regular review of a postsecondary institution.

NACEP Accreditation Standards and HLC Accreditation Criteria are similar and cover areas such as teacher credentials and preparation, rigor of courses and curricular standards, expectations for student learning and learning outcomes, access to learning resources, and monitoring and oversight. NACEP accreditation also requires program evaluation and student surveys to monitor transferability of credits earned through concurrent enrollment.

The state reimbursement provides funding to districts to defray the cost of offering college/university courses in high schools. Districts are eligible for concurrent enrollment aid if the concurrent enrollment program is accredited by NACEP, in the process of being accredited, or provides clear evidence of comparable standards. The Minnesota Department of Education monitors compliance with this statute by requiring non-NACEP accredited programs to sign a letter of assurances indicating the program meets this requirement.

The concurrent enrollment appropriation supports funding of up to \$150 per student, out of a two million dollar appropriation, to districts that offer a concurrent enrollment course according to an agreement under Minnesota Statutes, section 124D.09, subdivisions 10 and 16. Reimbursement amounts are pro-rated based on total concurrent enrollment participation across the state. In FY13, the pro-rated reimbursement was \$35.37/student/course.

Teacher credentials and preparation

By requiring that concurrent enrollment programs be NACEP-accredited or meet comparable standards, the state requires that concurrent enrollment teachers be “approved by the respective college/university academic department and meet the academic department’s requirements for teaching the college/university courses.” Accredited programs or those meeting comparable standards must also provide “annual discipline-specific professional development activities and ongoing collegial interaction to address course content, course delivery, assessment, evaluation, and/or research development in the field.” The Higher Learning Commission also expects that postsecondary institutions require “the same level of credentials and qualifications for faculty in dual credit courses or programs that it does for its regular higher-education courses.”

In general, two-year postsecondary institutions require high school teachers to have a master’s degree in the field or a master’s degree plus 16 graduate credits in the field being taught (in some cases teachers may be exempted from this requirement for “exceptional experience.”) High school teachers teaching courses from four-year postsecondary institutions are evaluated for a combination of relevant education and experience; the specific combination varies depending on the course and the practices of the university offering the course.

These differences in concurrent enrollment teacher requirements derive from two models for higher education. The community college system uses a “direct instruction” model where faculty develop and teach their own courses. The university uses a “teaching assistant” model, where university faculty design courses and curriculum but select, train, and support high school teachers (acting as teaching assistants) to facilitate instruction.

Transferability of credits

The transferability of the credits to other postsecondary institutions is determined by the receiving postsecondary institution. MnSCU and the University of Minnesota have agreements in place, such as the Minnesota Transfer Curriculum, that provide for the transfer of credits between these institutions. Other postsecondary institutions nationwide determine how they will recognize credits earned through other postsecondary institutions, including credits earned through concurrent enrollment programs. NACEP accreditation requires that the courses offered through a concurrent enrollment program be recorded on official college or university transcripts. The courses are not identified as concurrent enrollment courses and students rarely report difficulty in having their credit recognized as the result of the credit being earned through concurrent enrollment.

Additional concurrent enrollment programs, involving active partnerships and agreements between high schools and postsecondary institutions, are occurring across the state. They have not sought state reimbursement, and therefore are not included or counted in this report.

Concurrent Enrollment Program Participation

Concurrent Enrollment Eligible for Aid	FY 09 (2008-09)	FY 10 (2009-10)	FY 11 (2010-11)	FY 12 (2011-12)	FY 13 (2012-13)	Percent increase 2009-2013

Recommendations: Concurrent Enrollment Program

Concurrent enrollment is an increasingly popular option for Minnesota high schools seeking to offer postsecondary opportunities for their students on the high school campus. Greater efforts need to be made to increase the enrollment of students of color in these classes. The ability to offer high quality, concurrent enrollment courses to high school students requires effective communication and partnership between systems. Strategies to support and expand the necessary collaborative professional development between high school and postsecondary faculty should be sought. Additional efforts to promote and support these innovative initiatives are needed.

To ensure quality and accountability:

1. Provide for greater oversight of non-NACEP accredited concurrent enrollment programs by requiring concurrent enrollment program administrators as well as appropriate system-level administrators from MNSCU or the U of M to sign a letter of assurances indicating the program meets standards comparable to NACEP Accreditation Standards and Higher Learning Commission Accreditation Criteria. This mirrors NACEP's accreditation process which requires official letters verifying compliance with certain standards.
2. Convene a Concurrent Enrollment Advisory Board to develop recommendations for systematically addressing the shortage of high school teachers that currently meet the qualifications to teach college/university courses through concurrent enrollment. The board should include, at a minimum, representatives from graduate teacher programs, the Minnesota Board of Teaching, MNSCU, U of M, and concurrent enrollment programs.
3. Provide increased funding for concurrent enrollment.

To eliminate artificial barriers to participation:

1. Ensure that eligibility criteria for participating in concurrent enrollment includes indicators of a student's ability to succeed in a postsecondary course or subject, rather than relying solely on indicators of overall academic standing such as GPA or class rank.
2. Subject or course indicators might include, for example, performance in prior related courses.

To improve understanding about changes over time in accelerated learning programs:

1. Support regular surveys of concurrent enrollment programs about trends.
2. Support Minnesota postsecondary institutions' surveys about transferability of credits earned through concurrent enrollment.

See [Appendix H](#) for Concurrent Enrollment by Institutions and the total number of credits.

Overall Findings: Dual Credit Programs in Minnesota

In 2012-2013, total participation in dual credit programs increased while statewide high school enrollment declined slightly. AP and IB program participation (measured by the number of students taking exams) increased by more than 40 percent between 2007 and 2013; AP and IB exams taken increased by 50 percent during this same time period. PSEO participation (measured by the number of students taking classes) moderately increased over the same five-year period (18.3 percent), from 5,842 to 6,915 public school students. Concurrent Enrollment also experienced an increase in participation (24.2 percent) between 2008 and 2013, from 18,980 to 23,583.

What are the implications for Minnesota's achievement gap? Although the percentage of students of color increased significantly in all programs, the percentages remained lower than the overall percentage of students of color in the state (23 percent). This was the case for AP (17 percent students of color in 2013), PSEO (also 17 percent in 2013), and Concurrent Enrollment (10 percent in 2013). The exception was IB, which had 38 percent students of color in the program in 2013.

As with racial diversity, socioeconomic diversity for all of the programs increased significantly but remained at or lower than the average for the state. The average enrollment for the state was 37 percent* in the Free and Reduced Lunch program over the past six years. The percentage of low-income (2012-2013) student participation in AP was 9 percent, in IB- 29 percent, in PSEO-19 percent, and in Concurrent Enrollment-16 percent.

**Approximation*

Recommendations: Dual Credit Programs

Minnesota schools have demonstrated that the legislative support provided to dual credit programs has increased participation, opportunities and raised expectations for Minnesota students. Secondary teachers who have participated in AP and IB professional development opportunities have reported their involvement has helped hone their instructional skills, infused rigor into their classes, and provided a source of professional renewal and growth that is highly beneficial to their students. Support for intentional and collaborative professional development opportunities between postsecondary and secondary concurrent enrollment faculty would also have this effect as well as assist in the alignment of secondary and postsecondary curriculum and expectations.

The expansion of pre-AP programs and growth in number of IB Middle Year Program and Primary Year Program schools demonstrates the value districts, as well as individual schools, are placing on providing rigor in the early years to prepare students to successfully engage in AP and IB in high school and attain their postsecondary goals. Programs intending to increase awareness of college and career opportunities and requirements as well as the development of the behaviors and skills necessary for success in rigorous programs need to occur before high school. Programs and supports at the middle level should be expanded and supported.

Additional recommendations include:

- Provide timely and clear information to all students, and their parents about the availability of dual credit opportunities as well as the impact they may have on future opportunities, especially targeting low-income, first generation and families of color;
- Enhance pathways to postsecondary through supporting collaborations and partnerships between high schools and postsecondary institutions (e.g. “early college”);
- Provide support for postsecondary faculty to work with high school faculty to develop aligned interventions and focused support for students while still in high school;
- Provide support for pilot dual credit programs offered at the high school that intend to increase participation of underrepresented groups;
- Provide support to pilot college and career readiness programs offered at the middle school that intend to increase the awareness, readiness and participation of underrepresented groups;
- Conduct additional research, comparing two and four year college graduates who did and did not participate in dual credit courses, to learn more about the impact of these programs on students’ postsecondary careers.

Appendix A. Advanced Placement and International Baccalaureate Programs

Minnesota Statutes, section 120B.13, Article 2

Section 13. 2011 Minnesota Statutes, section 120B.13, subdivision 1, is amended to read:

120B.13 ADVANCED PLACEMENT AND INTERNATIONAL BACCALAUREATE PROGRAMS

Subdivision 1. Program structure; training programs for teachers.

Critical to schools' educational success is ongoing advanced placement and international baccalaureate-approved teacher training. A secondary teacher assigned by a district to teach an advanced placement or international baccalaureate course or other interested educator may participate in a training program offered by The College Board or International Baccalaureate North America, Inc. The state may pay a portion of the tuition, room, board, and out-of-state travel costs a teacher or other interested educator incurs in participating in a training program. The commissioner shall determine application procedures and deadlines, select teachers and other interested educators to participate in the training program, and determine the payment process and amount of the subsidy. The procedures determined by the commissioner shall, to the extent possible, ensure that advanced placement and international baccalaureate courses become available in all parts of the state and that a variety of course offerings are available in school districts. This subdivision does not prevent teacher or other interested educator participation in training programs offered by The College Board or International Baccalaureate North America, Inc., when tuition is paid by a source other than the state.

Subdivision 2. Support programs.

The commissioner shall provide support programs during the school year for teachers who attended the training programs and teachers experienced in teaching advanced placement or international baccalaureate courses. The support programs shall provide teachers with opportunities to share instructional ideas with other teachers. The state may pay the costs of participating in the support programs, including substitute teachers, if necessary, and program affiliation costs.

Subdivision 3. Subsidy for examination fees.

The state may pay all or part of the fee for advanced placement or international baccalaureate examinations. The commissioner shall pay all examination fees for all public and nonpublic students of low-income families, as defined by the commissioner, and to the limit of the available appropriation, shall also pay a portion or all of the examination fees for other public and nonpublic students sitting for an advanced placement examination, international baccalaureate examination, or both. The commissioner shall determine procedures for state payments of fees.

Subdivision 3a. College credit.

The colleges and universities of the Minnesota State Colleges and Universities system must award, and the University of Minnesota and private postsecondary institutions are encouraged to award, college credit to high school students who receive a score of three or higher on an advanced placement or four or higher on the international baccalaureate program examination.

Subdivision 4. Rigorous course taking information; AP, IB, and PSEO.

The commissioner shall submit the following information on rigorous course taking to the education committees of the legislature each year by February 1:

- (1) the number of pupils enrolled in postsecondary enrollment options under section 124D.09, including concurrent enrollment, advanced placement, and international baccalaureate courses in each school district;
- (2) the number of teachers in each district attending training programs offered by the college board, International Baccalaureate North America, Inc., or Minnesota concurrent enrollment programs;
- (3) the number of teachers in each district participating in support programs;
- (4) recent trends in the field of postsecondary enrollment options under section 124D.09, including concurrent enrollment, advanced placement, and international baccalaureate programs;
- (5) expenditures for each category in this section and under sections 124D.09 and 124D.091; and
- (6) other recommendations for the state program or the postsecondary enrollment options under section 124D.09, including concurrent enrollment.

Appropriations

Session Laws 2011, 87th Legislature, 2011 1st Special Session chapter 11, article 2, section 50, subdivision 12

Subdivision 12. Examination fees; teacher training and support programs.

(a) For students' advanced placement and international baccalaureate examination fees under Minnesota Statutes, section 120B.13, subdivision 3, and the training and related costs for teachers and other interested educators under Minnesota Statutes, section 120B.13, subdivision 1:

\$4,500,000 2012

\$4,500,000 2013

(b) The advanced placement program shall receive 75 percent of the appropriation each year and the international baccalaureate program shall receive 25 percent of the appropriation each year. The department, in consultation with representatives of the advanced placement and international baccalaureate programs selected by the Advanced Placement Advisory Council and the Minnesota Association of IB World Schools, respectively, shall determine the amounts of the expenditures each year for examination fees and training and support programs for each program.

(c) Notwithstanding Minnesota Statutes, section 120B.13, subdivision 1, at least \$500,000 each year is for teachers to attend subject matter summer training programs and follow-up support workshops approved by the advanced placement or international baccalaureate programs. The amount of the subsidy for each teacher attending an advanced placement or international baccalaureate summer training program or workshop shall be the same. The commissioner shall determine the payment process and the amount of the subsidy.

(d) The commissioner shall pay all examination fees for all students of low-income families under Minnesota Statutes, section 120B.13, subdivision 3, and to the extent of available appropriations shall also pay examination fees for students sitting for an advanced placement examination, international baccalaureate examination, or both. Any balance in the first year does not cancel but is available in the second year.
