MnDOT RESEARCH SERVICES & LIBRARY

FY2013 AT-A-GLANCE

July 1, 2012, through June 30, 2013

Director's Message

LINDA TAYLOR
Director
MnDOT Research Services & Library
Linda.Taylor@state.mn.us

Welcome to the new, enhanced *MnDOT Research Services & Library At-A-Glance* for FY2013. This document serves as a quick-reference guide to our research program.

Over the last year, we have conducted surveys, interviews and workshops to help us better understand our customers' needs. Based on their input, we have replaced our annual report with this expanded version of the *At-A-Glance*, which now includes FY2013 project highlights, an overview of the research process and information about our Transportation Research Synthesis program.

We welcome your feedback on these changes. For more information about the projects and services described in this report, please feel free to contact me or any Research Services & Library staff member.

FY2013 Research Highlights

Improving Traffic Signal Timing with SMART-SIGNAL

Traffic & Safety — The Systematic Monitoring of Arterial Road Traffic and Signals (SMART-SIGNAL) system collects arterial traffic data by leveraging existing traffic signal infrastructure such as in-pavement sensors at vehicle-activated stoplights. This information can be used to improve traffic flow. In this project, researchers updated this system by making field hardware more compact and easier to install. They also developed a Web-based interface for traffic control center software, allowing the generation of real-time arterial performance measures and historical statistical reports. Investigators implemented the refined system at 13 intersections along Trunk Highway 13 in Burnsville, Minnesota. [Technical Summary 2013-06](#)

How Does Transportation Affect Quality of Life?

Policy & Planning — This project sought Minnesota citizen input through focus groups and mail surveys to define quality of life, identify the role transportation-related factors play in it and investigate how MnDOT is performing on those factors. Accessibility, safety, maintenance and mobility were rated the most important factors. Overall, Minnesota residents were fairly well-satisfied with MnDOT services, with 84 percent rating performance at least 5 on a 7-point scale. [Technical Summary 2013-05](#)

Developing a Low-Cost, Portable Weigh-in-Motion System

Policy & Planning — Installing permanent weigh-in-motion (WIM) stations on local roads is very expensive and requires recurring costs of maintenance trips, electricity and communication. In this cutting-edge project, researchers developed an easy-to-install portable system to be used for short-duration traffic counting operations. The study showed that it is possible to build and deploy a durable system with data quality similar to that of much more expensive permanent WIM systems. The system is demonstrated in a [Research Services & Library video](#). [Technical Summary 2012-38](#)

Helping Local Agencies with Complete Streets

Multimodal — A Complete Streets approach to transportation infrastructure design and maintenance takes into account the needs and safety of motorists as well as pedestrians, bicyclists and transit riders. This means planning for walkways, bike lanes and other infrastructure elements. While such an approach was already in use informally by many local agencies, they needed a guide to share best practices in this area and to help them create a program optimal to their agency characteristics and needs. This project compiled sample Complete Streets policy language from agencies in Minnesota, systems for classifying roadways that are appropriate for use in context-sensitive planning and a worksheet to help develop specific project plans. [Implementation Product 2013RIC02](#)

How We Can Help You

MnDOT Research Services & Library is here to help you solve transportation problems. Here's how:

Defining the Problem. Before starting a research project, we can flesh out existing research for you with a literature search or a Transportation Research Synthesis. (See page 22.)

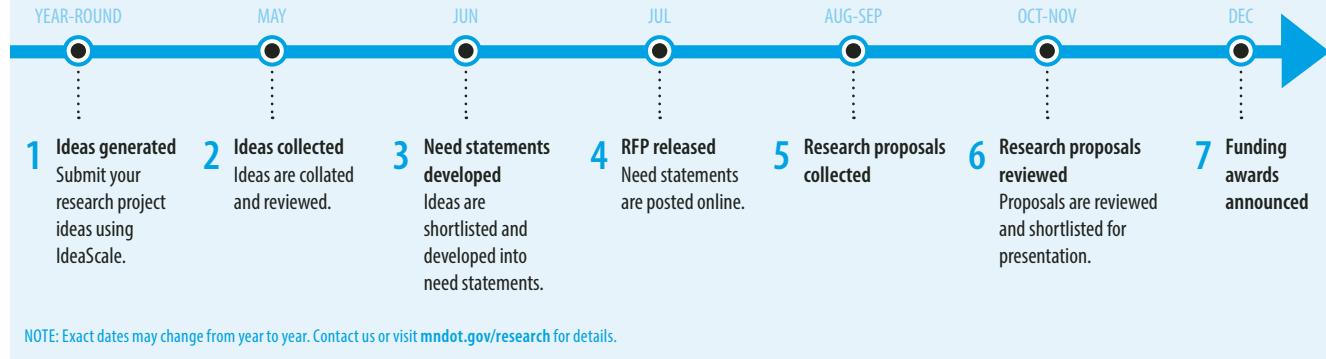

Kick-Starting Your Project. We can help you articulate your research needs, develop a need statement, issue a request for proposals and finalize the project work plans.

Managing the Research. From start to finish, our staff will help manage your research project by tracking timelines and deliverables, managing contracts, and handling invoices and amendment requests.

Implementing the Results. We will help identify opportunities to implement the research results and develop marketing and communications materials for your project.

Figure 1. Overview of MnDOT's Annual Research RFP Process

From idea to project

RESEARCH SERVICES & LIBRARY ROLES

Technical Advisory Panel (TAP)	The TAP guides the research, reviewing and approving all deliverables. Typically four to six people serve on each TAP, and if you're requesting the research, you're most likely a good candidate to be one of them. Research Services & Library will coach you through the process with documentation and resources like our Technical Advisory Panels video series . Additionally, other stakeholders may attend TAP meetings to stay informed of project progress, though these "friends of the TAP" don't influence project scope or task approvals.
Technical Liaison (TL)	The TL represents the sponsoring agency's (MnDOT or LRRB) interest. The TL helps develop the initial need into a contract; helps the Principal Investigator create deliverables; and approves the deliverables, work plan and amendment requests. As requestor of the project, you may be the best person to guide the overall direction and scope of the contract and to provide technical guidance, or Research Services & Library can help you find an optimal TL.
Project Advisor (PA)	The PA is a senior Research Services & Library representative who facilitates project startup and provides a link between the TAP and other related efforts occurring within the LRRB, MnDOT and national programs. The PA may or may not be a TAP member.
Project Coordinator (PC)	The PC is the Research Services & Library team member who ensures that contract provisions are followed and that deliverables are submitted and approved on schedule and within budget. The PC works with the TL to help manage projects throughout their life cycles. The PC also coordinates the activities of project TAPs. Each PC reports to a particular PA, and PCs are typically assigned to particular topic areas to help ensure continuity over potentially related projects.
Principal Investigator (PI)	The PI is the contractor/researcher responsible for developing the project and completing contract obligations. With TAP guidance and input, the PI designs, develops and performs tasks to carry out contract deliverables.

FY2013 Budget Summary

Research Services & Library managed more than \$10.5 million in research funds in FY2013. Figure 2 shows the sources of these funds, which were distributed across research topic areas as shown in Figure 3.

State Planning and Research (SP&R) Program. The Federal Highway Administration (FHWA) provides SP&R funding, at least 25 percent of which must go to state-specific research needs. The SP&R program supports funding for federal programs, pooled fund projects and single-state projects. Figure 4 illustrates the distribution of these funds.

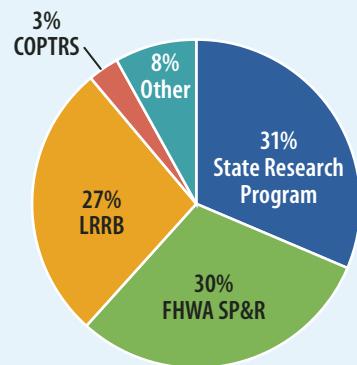

MnDOT's State Research Program (SRP). SRP funds come from the Minnesota state government to ensure that agency research needs are addressed and to support MnDOT's strategic directions. SRP funds are often used to match dollars from other funding sources, including FHWA SP&R, the University of Minnesota's Center for Transportation Studies (CTS) and the Intelligent Transportation Systems (ITS) Institute.

Local Road Research Board (LRRB). Research Services & Library administers the budget and research program for the LRRB, an organization created in 1959 to facilitate transportation research and information sharing among Minnesota city and county engineers.

Cooperative Program for Transportation Research and Studies (COPTRS). COPTRS was established in 1983 to foster cooperation in basic and applied sciences and engineering to solve transportation problems and speed technology transfer. Funding for this program is determined by legislative action.

Figure 2.

FY2013 Research Funds by Funding Source

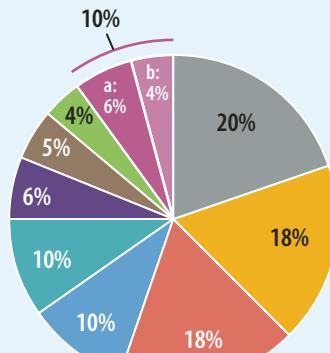

State Research Program	\$ 3,284,000
FHWA State Planning and Research (Part II)	\$ 3,190,840
Local Road Research Board	\$ 2,902,378
Cooperative Program for Transportation Research and Studies	\$ 363,000
Other*	\$ 876,443
Total	\$ 10,616,661

*Includes contributions from other MnDOT offices and districts along with the Twin Cities Metropolitan Council and the ITS Institute.

Figure 3.

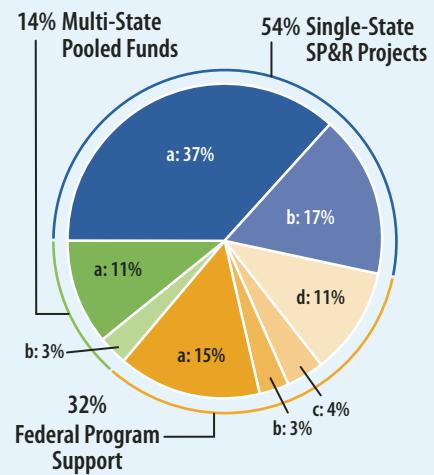

FY2013 Research Funds Allocated by Topic Area

Dedicated Programs (CTS & LTAP)	\$ 1,630,625
Traffic & Safety	\$ 1,486,369
Materials & Construction	\$ 1,473,417
Maintenance Operations & Security	\$ 873,845
Bridges & Structures	\$ 812,282
Policy & Planning	\$ 471,121
Multimodal	\$ 412,312
Environmental	\$ 346,567
Total	\$ 8,343,585

Figure 4.

FY2013 SP&R Part II Funding Distribution

Federal Program Support	\$ 1,437,389
a: NCHRP	\$ 659,419
b: TRB	\$ 119,482
c: AASHTO	\$ 163,707
d: SHRP 2	\$ 494,781
Multi-State Pooled Funds	\$ 634,200
a: Participation in Pooled Funds	\$ 511,700
Led by Other States	\$ 122,500
b: MnDOT-Led Pooled Funds	
Total	\$ 4,496,541

MnDOT FY2013 Research

THESE TABLES ARE ORGANIZED BY RESEARCH TOPIC AREA:

RESEARCH PROJECTS:

- Completed research reports and Transportation Research Syntheses that were released in fiscal year 2013: July 2012 to June 2013
- Research contracts with end dates during FY2013 that did not result in a final report
- Other research contracts active during FY2013, including some tasks or contracts that are part of larger programs that MnDOT tracks individually

POOLED FUND TABLES*:

- Multi-state transportation pooled fund studies led by MnDOT
- Other multi-state transportation pooled fund studies in which MnDOT participates, either through an FY2013 contribution or through past contributions that are still producing value for Minnesota.

*Project titles are active hyperlinks in the online PDF version of this document.

FY2013 RESEARCH SERVICES & LIBRARY KEY STATISTICS

Total active contracts for research and implementation	252
Completed research reports	46
Technical Summaries	45
Transportation Research Syntheses	18
Research Services website visits	37,427
Total active MnDOT-supported pooled fund projects	45
MnDOT-led pooled funds	12
Pooled funds led by other states	33

Transportation Research Syntheses

Transportation Research Syntheses are short-turnaround research reports that address a specific research topic. They include summaries of completed and in-progress research, or reports about the state of the practice among departments of transportation (DOTs). Transportation Research Syntheses go beyond the scope of literature searches; they can include interviews or surveys, and the resources found are clearly organized and summarized—with contact names, Web links and other specifications.

Transportation Research Syntheses Completed in FY2013

- TRS1309 Quantifying the Economic Impact of Bicycling: A Literature Review with Implications for Minnesota
- TRS1308 Bridge Safety Inspection and NBIS Bridge Inspection Program Administration
- TRS1307 Cost Sharing Policies of State Transportation Agencies
- TRS1306 Pedestrian Snow Removal Best Practices and Lessons Learned
- TRS1305 Asset Management for Retaining Walls
- TRS1304 The Use of Life-Cycle Cost Analysis to Evaluate Public-Private Partnerships
- TRS1303 Mobile Traffic Signals in Lieu of Flaggers for Moving Operations
- TRS1302 Culvert Designs for Aquatic Organism Passage: Culvert Design Practices Incorporating Sediment Transport
- TRS1301 Performance-Based Specifications for Temporary Erosion and Sediment Control during Construction: A Survey of State Practice
- TRS1212 Ultra-Thin Polymer Concrete Overlays for Bridge Decks
- TRS1211 State Highway System Classification and Investment: A Survey of State Practice
- TRS1210 Integrated Corridor Management: A Review on the Theory and Practice
- TRS1209 Culvert Repair Best Practices, Specifications and Special Provisions
- TRS1208 Power Sources for Automatic Traffic Recorders
- TRS1207 Collecting and Managing Traffic Data on Local Roads
- TRS1206 Traffic Forecasting on Trunk Highways in Nonmetropolitan Areas: A Survey of State Practice
- TRS1205 Mitigating Highway Construction Impacts with Transit
- TRS1204 Methods for Setting Posted Speed Limits

How can a TRS help me?

- Investigate a problem without starting from scratch.
- Find out what other state DOTs are doing: designs, specifications, manuals and procedures.
- Review the latest and greatest on any issue that affects state DOTs.
- Receive a clear, concise report with all the relevant findings in one place.
- Save yourself a bunch of time.

To request a TRS

Contact Shirlee Sherkow at 651-366-3783 or Shirlee.Sherkow@state.mn.us.

Call today and get your report in four to eight weeks!

[Visit MnDOT's website to access the TRS Request Form.](#)

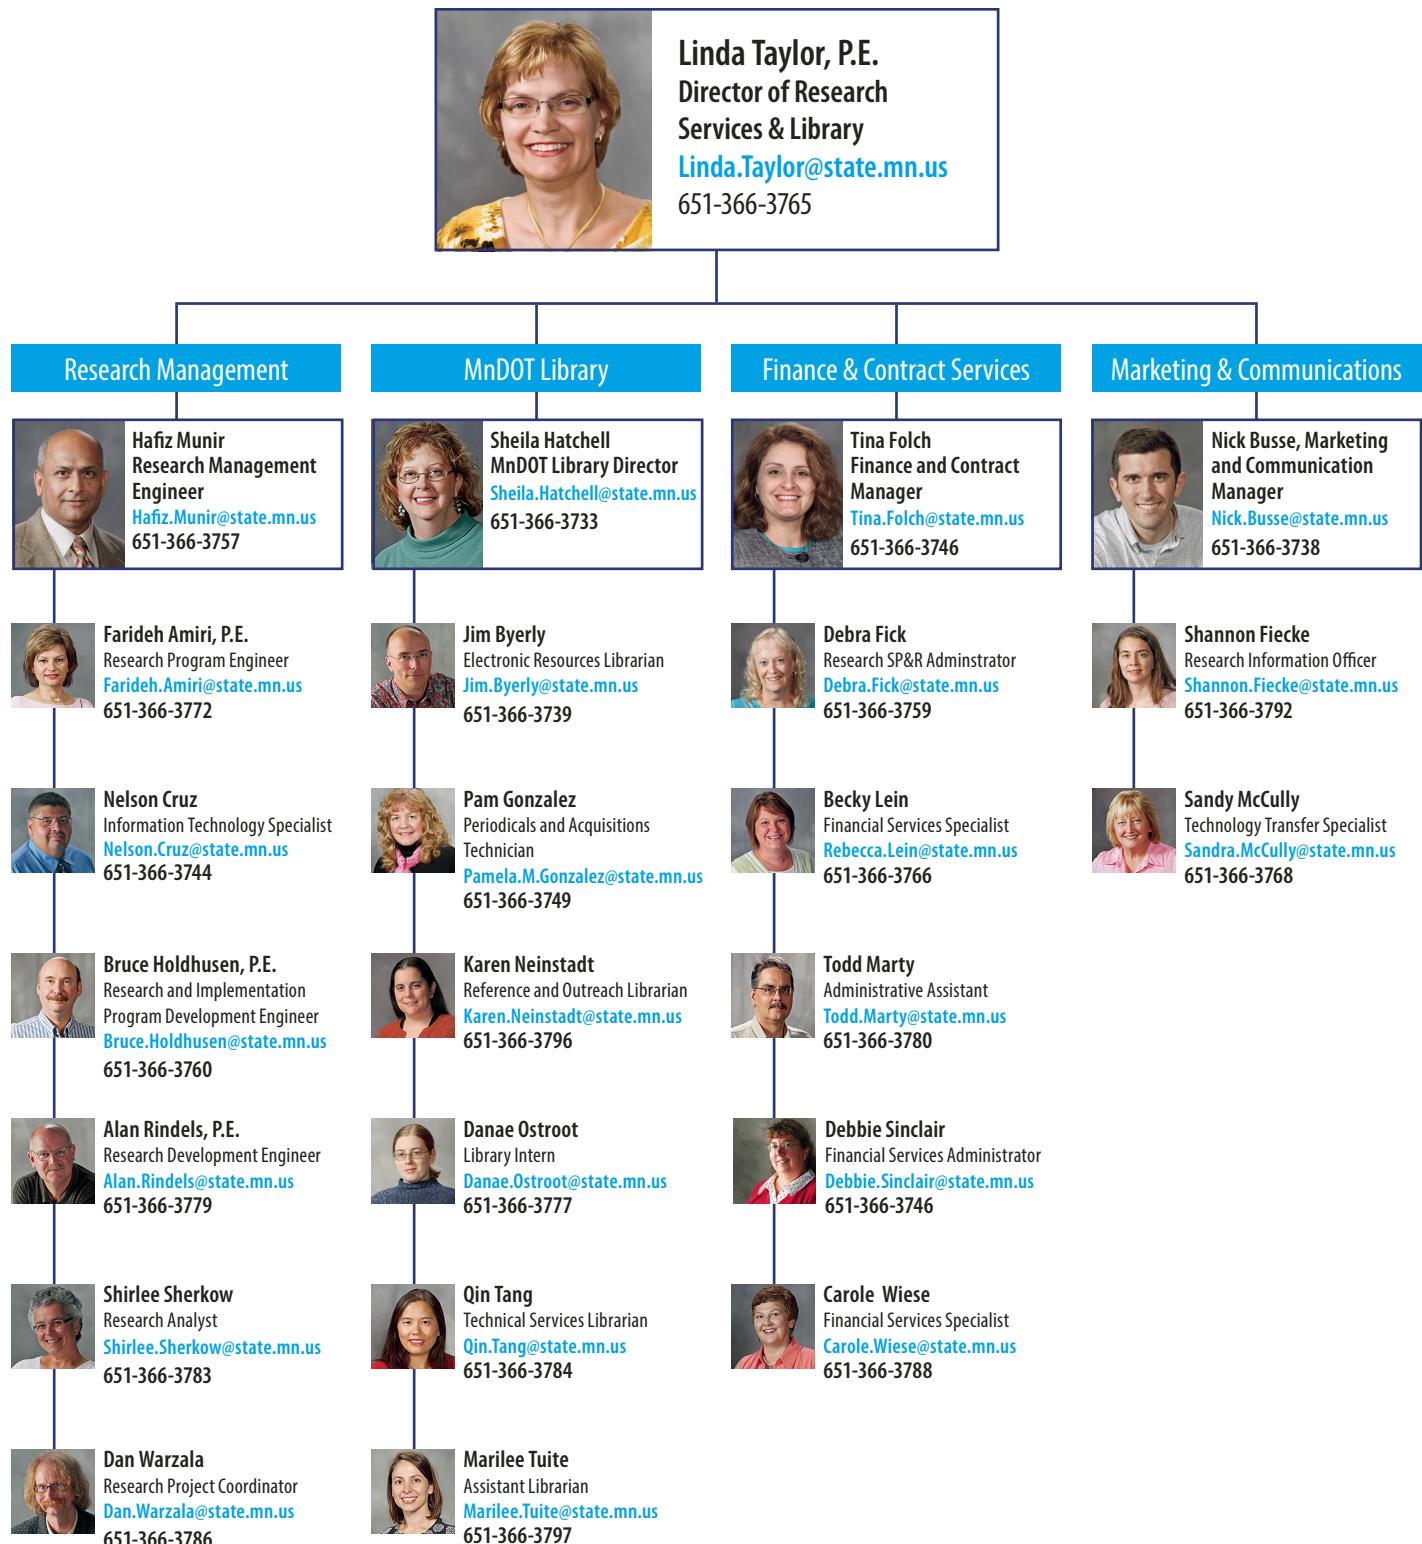

[TRS1305, Asset Management for Retaining Walls](#), provided valuable information about how DOTs track and maintain the many barriers that keep soil from eroding onto roadways. Information gathered for this TRS included asset data collection techniques, inspection guidelines and schedules, life span estimates for several wall types in various conditions and risk management strategies.

"The final product was great, with organized and thorough information. I've read all the referenced documents and contacted a couple of the experts referenced in the TRS. Having the TRS has saved me days of research and writing."

—Trisha Nelson, Infrastructure Asset Management Engineer,
MnDOT Metro District

Research Services & Library Staff

TRANSPORTATION RESEARCH INNOVATION GROUP (TRIG) DIVISION REPRESENTATIVES

MnDOT's TRIG is the governing board for the State Research Program. TRIG is composed of representatives from each MnDOT office and district, and meets quarterly to recommend research investments.

Name	Represents
Specialty Offices	
Lynn Clarkowski	Environmental Stewardship
Nancy Daubenberger	Bridges & Structures
Glenn Engstrom	Materials & Road Research
Mark Gieseke	Transportation System Management
