2014

Minnesota State Transportation Improvement Program (STIP) 2015-2018

Recommended for Approval by:

MnDOT's Transportation Program Investment Committee

Susan M. Mulvihill, P.E.
Deputy Commissioner
Chief Engineer

Tracy Hatch
Deputy Commissioner
Chief Operating Officer
Chief Financial Officer

Approved by:
MnDOT Commissioner

Charles A. Zelle

Minnesota Department of Transportation

395 John Ireland Blvd.
St. Paul, MN 55155

October 1, 2014

To the Reader:

The State Transportation Improvement Program (STIP) is a comprehensive four-year schedule of planned transportation projects in Minnesota for state fiscal years 2015, 2016, 2017, and 2018. These projects are for state trunk highways, local roads and bridges, rail crossings and transit capital and operating assistance. This document represents an investment of over \$6.7 billion in federal, state, and local funds over the four years.

This document is the statewide transportation program in which MnDOT, local governments, and community and business interest groups worked together in eight District Area Transportation Partnerships (ATPs) to discuss regional priorities and reach agreement on important transportation investments. This state process was developed in response to the Federal “Intermodal Surface Transportation Efficiency Act (ISTEA) of 1991” which focused on enhanced planning processes, greater state and local government responsibility, and more citizen input to decision making. The process has continued under the three following acts: The 1998 Transportation Equity Act for the 21st Century (TEA-21); the 2005 Safe, Accountable, Flexible, Efficient Transportation Equity Act: A legacy for Users (SAFETEA-LU); and we are currently working under a two year bill, Moving Ahead for Progress in the 21st Century Act (MAP-21), signed into law July 6, 2012. On July 10, 2014, the United States Congress extended MAP-21 through May 30, 2015.

Any questions and comments on specific projects included in this program may be directed to the identified MnDOT District Transportation office listed in the Program Listing sections of the document. To further assist you in using this information, a searchable database will be available by October 2014 on the Internet at:

<http://www.dot.state.mn.us/planning/program/stip.html>

General questions or comments can be directed to the Office of Transportation System Management in St. Paul (651-366-3798). Thank you for your interest and support in Minnesota’s Transportation System.

PREFACE

State of Minnesota State Transportation Improvement Program (STIP) 2015-2018

This document is the State of Minnesota State Transportation Improvement Program (STIP) for state fiscal years 2015-2018. It includes an introduction, or overview, of the anticipated expenditures for all modes of transportation under the authority of the Minnesota Department of Transportation (MnDOT). The document is organized into three chapters and three appendices.

Chapter I of this document is the introduction to MnDOT. It provides information on MnDOT's vision for its transportation system and the factors that help shape MnDOT's policies and programs.

Chapter II is the formal response to the federal requirements for the STIP developed under the Moving Ahead for Progress in the 21st Century Act (MAP-21). The programming process to develop this STIP began in the fall of 2013 and was developed under the requirements outlined in SAFETEA-LU with a conservative estimate of federal funds anticipated.

Chapter III includes the project listing of all projects using federal-aid highway or transit funding. Projects using only local dollars are not included. These listings are organized by MnDOT District/Area Transportation Partnership (ATP) areas.

Appendix A includes a description, expenditure summary and project listing for several federal-aid highway and transit categories. A description of the MnDOT State Road Construction Program (SRC) is also included, but without a repeat of the project listing of state trunk highway projects. Appendix B includes, for information purposes only, a description, financial summary, and project listing for other modal programs that are not subject to the federal planning requirements under MAP-21. Appendix C includes a detailed financial plan for the STIP.

The 2015-2018 STIP was developed using programs specified under MAP-21 which was signed into law July 6, 2012. Once approved by the US DOT, the State Transportation Improvement Program for Minnesota is available on the Internet at the following address:

<http://www.dot.state.mn.us/planning/program/stip.html>

I. INTRODUCTION

The Minnesota Department of Transportation (MnDOT) was established and operates a transportation system that includes aeronautics, highways, motor carriers, ports, public transit, railroads and pipelines. MnDOT is the principal agency in the state for development, implementation, administration, consolidation, and coordination of state transportation policies, plans, and programs. These policies, plans, and programs are developed in cooperation with the public and a variety of transportation partners, including the Twin Cities Metropolitan Council, seven Metropolitan Planning Organizations (MPOs) established in areas with populations exceeding 50,000, the nine Regional Development Commissions (RDCs), county, city, and Indian tribal governments throughout the state.

The MnDOT vision is that Minnesota's multimodal transportation system maximizes the health of people, the environment and our economy. The system:

- connects Minnesota's primary assets – the people, natural resources and businesses within the state – to each other and to markets and resources outside the state and country;
- provides safe, convenient, efficient and effective movement of people and goods; and
- is flexible and nimble enough to adapt to changes in society, technology, the environment and the economy.

A number of factors are shaping the development of MnDOT policies and programs. These include safety, the integration of transportation modes, service and investment preservation, customer focus, economic development, technology, environmental partnerships, and federal actions. This document addresses these factors and provides a multimodal focus. This document and the investment levels summarized in Figure 1 do not include the expenditures for infrastructure maintenance. In addition, unless federal funding is a part of the investment, the investments in this document and Figure 1 do not include improvements made by local levels of government. Total government investment in transportation infrastructure could be two to three times the investment level included in this document. The investment in transportation infrastructure improvements included in this document is summarized in Figure 1.

Figure 1 STATE TRANSPORTATION IMPROVEMENT PROGRAM FUNDING INCLUDING RAIL, PORTS, AND AIR BY PROGRAM AND YEAR (\$ MILLIONS)					
PROGRAM	2015	2016	2017	2018	TOTAL*
Highway Assistance Program¹	1,504	1,145	1,227	936	4,812

TOTAL*	2,103	1,795	1,924	1,393	7,216

*May not total correctly due to rounding.

¹The Highway Assistance Program includes all federal-aid for highways received through the Federal Highway Administration (FHWA) of the U.S. Department of Transportation (USDOT). It includes all federal apportionment, allocation or special funding. It also includes all state trunk highway funds appropriated for construction, other state appropriated investments and any local funding utilized as match for federal projects. A list of projects is included in Page III of the STIP.

²The Transit Assistance Program includes all federal-aid for transit received through the Federal Transit Administration (FTA) of the USDOT. It also includes all state and local funds necessary to match the federal funds and operate the transit systems. All transit projects are included in Page III of the STIP and an estimated funding summary is included in Appendix A-4.

³The Minnesota Rail Service Improvement Program (MRSI) was established in 1976 to prevent the loss of rail service on lines potentially subject to railroad abandonment. Projects that fall within the MRSI are divided among 6 programs: rail line rehabilitation, capital improvements for rail shippers, capital improvement for railroads, purchase assistance to rail authorities, loan guarantees and state rail banking. The MRSI Program does not include funding for rail-highway safety projects included in the highway assistance program. The number of rail service assistance projects is estimated and shown in Appendix B-1.

⁴The Port Development Assistance Program was created in 1991. The 1996, 1998, 2000, 2001, 2003, 2005, 2006, 2008, 2009, 2011, 2012 and 2014 Legislatures set aside a total of \$27.0 million to fund this program. The total port development assistance program anticipated expenditures is included in Appendix B-2.

⁵The Airport Development Program figures shown above include federal and state grant funds plus the local share or match. The project listing in Appendix B-3 is not financially constrained to the anticipated funding, and totals about \$463 million in candidate airport projects statewide over the next 4 years.

II. STATE TRANSPORTATION IMPROVEMENT PROGRAM (STIP)

Certification

In accordance with 23 CFR 450.218, the Minnesota Department of Transportation (MnDOT), as the Governor's designee, certifies that the transportation planning process is being carried out in accordance with the following requirements:

1. 23 U.S.C. 134 and 135, 49 U.S.C. 5303 and 5304, and this part;
2. Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
3. 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
4. Section 1101(b) of the SAFETEA-LU (Pub. L. 109-59) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in USDOT funded projects;
5. 23 CFR part 230, regarding implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
6. The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 *et. seq.*) and 49 CFR parts 27, 37, and 38;
7. Sections 174 and 176 (c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506 (c) and (d) and 40 CFR part 93;

8. The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
9. Section 324 of title 23 U.S.C., regarding the prohibition of discrimination based on gender; and
10. Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.

MnDOT also concurs with the MPO's determination that the air quality conformity analysis has been completed by the necessary MPOs and has been reviewed and accepted by the Minnesota Pollution Control Agency.

The 20-Year State Highway Investment Plan

Projects in the STIP are consistent with the *20-Year State Highway Investment Plan* (MnSHIP), a long-term, fiscally constrained and statewide plan. MnSHIP addresses federal planning requirements, the transportation goals identified in state law, and reflects *MnDOT's Statewide Multimodal Transportation Plan* and the *Minnesota GO 50-Year Statewide Vision*. The process for developing and updating MnSHIP provides early and continuous opportunities for the involvement of the public and other potentially affected parties.

In accordance with Minnesota Statutes §174.03, Subdivision 1c, MnSHIP is updated every 4 years beginning January 15, 2013, with interim updates as needed by MnDOT to promote statewide transportation planning. In particular, MnDOT develops 10-year Capital Highway Work Plans to present MnDOT's planned capital investments for the next ten years.

These Work Plans are updated annually and reflect investment direction established in MnSHIP.

MnSHIP is available for download at the following web address: <http://www.dot.state.mn.us/planning/mnship/>

Public Involvement

The last three Federal Transportation Acts have created less of a federal presence in many transportation decisions. The diminished federal role results in more state/local authority and responsibility for these decisions. The funding flexibility and expanded project eligibility under these acts has given decision makers more options to address transportation priorities. Public involvement in transportation issues and decision making is vital because of this expanded eligibility and diversity. Federal Law requires an opportunity for early and continuous involvement in the development of the *Statewide Transportation Plan* and the STIP. Public involvement is also a mandatory component of the MPO planning process.

Minnesota's transportation investment process (Figure 2), with the Area Transportation Partnerships (ATPs) provides for early and continuous involvement in the development of the STIP. The process incorporates the public involvement activities of the partners (MPOs, RDCs, counties, cities and others) into their roles on the ATP. MPOs in accordance with federal requirements have developed public participation processes and use them in conjunction with the development of their Transportation Improvement Programs (TIPs). The MPO TIPs include detailed discussion of public involvement.

In addition to the public input derived through Minnesota's transportation investment process, public meetings, forums, conferences and focus groups have been held throughout the state by the ATP partners, MnDOT and modal partners such as transit, rail and bike/pedestrian.

Other methods used to encourage public involvement included the use of newspaper articles, informational mailings, press releases, websites and social media. A notice of the availability of the draft 2015-2018 STIP was placed in the *State Register* on July 21, 2014. This notice provided a 30 day comment period to the public.

Figure 2
Transportation Investment Process

The Metropolitan Council and its Transportation Advisory Board (TAB) make a concerted effort to ensure all interested and concerned parties are offered opportunities to participate in the preparation of the TIP for the Twin Cities metropolitan area. Public comment is solicited at public meetings and in a 45-day public comment period where comments are also accepted by email, phone, or mail. At the TAB's regular public meeting on June 18, 2014, the TAB adopted the draft TIP for the purpose of public comment; the public comment period was from June 23 – August 8, 2014. Metropolitan Council emailed notification to groups representing a diverse set of stakeholders ranging from private transit providers to representatives of people with disabilities. In addition, Council published information on the Council's web site and in its newsletters sent to local elected officials and legislators.

Minnesota Transportation Process for Investment Decisions

The STIP is developed in accordance with the *Guidance for the Development of the State Transportation Improvement Program* published by MnDOT and with the memo on *STIP Funding Guidance* dated December 5, 2013. Minnesota's STIP is developed through a regional geographic model for making investment decisions. The process chart on this page, (Figure 2), displays the partnerships and transportation activities necessary to produce a STIP.

The process is driven by federal, state, local, and regional planning goals and objectives. Statewide investment goals have been drawn from statewide planning studies and policies, the *Minnesota Statewide Transportation Plan*, and an analysis of previous programs. They are offered as an aid in determining

areawide priorities. The process builds on the plans and priorities established by MnDOT Districts, MPOs, cities, counties, townships and RDCs.

The investment process uses eight regional partnerships whose boundaries are based on MnDOT's State Aid Districts. The partnerships, called Area Transportation Partnerships (ATPs), have as their members both traditional and non-traditional, metropolitan and non-metropolitan stakeholders and can include MPOs, RDCs, cities, counties, townships, transit providers, tribal governments, other interests, and MnDOT. The ATPs integrate the state and local priorities within their region and recommend a minimum four year program for federally funded transportation investments. This four year program, when combined with a list of state highway funded projects is considered the draft Area Transportation Improvement Program (ATIP). Each draft ATIP includes a prioritized list of projects that aid in solving transportation problems and implementing the long range objectives for the area.

Balanced investment decisions promote effective and efficient transportation. Safety is a key element of all investments. The principal investment emphasis is preservation and operational improvements in the existing transportation system. Expansion is focused on the state's interregional corridor system that connects major economic centers and bottlenecks in the Twin Cities metropolitan area.

The draft ATIP prepared by each ATP is submitted for inclusion in the draft State Transportation Improvement Program (STIP). Project cost estimates include an adjustment

for inflation. The ATIPs are analyzed and compared to statewide goals and objectives, and unique transportation needs. They are also analyzed for completeness and fiscal constraint. From this, a draft STIP is developed. The draft STIP is widely circulated for review and comment before final adjustments are made. This STIP covers four state fiscal years and includes all state and local projects financed with federal (highway or transit) assistance. The STIP also includes other regionally significant projects.

The final STIP is reviewed and approved by the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) prior to any expenditure of federal funds. Upon approval, the document will be used by each ATP as a starting point in the process for developing their next ATIP.

Financial Plan

As mentioned in the Preface of this document, this STIP is a formal response to federal requirements. The STIP financial plan addresses fiscal constraint requirements under MAP-21. The principal financial assumption is the continuation of existing revenue sources and levels consistent with MAP-21 authorizations. All of the projects in the 2015-2018 STIP are deemed affordable for implementation under these reasonable financial assumptions. The financial constraint requirements under MAP-21 are deemed to be sufficiently flexible to permit the selection of projects from the second and third year of the STIP to replace projects selected for the first year of the STIP. MnDOT reserves the right to make this project selection for the ATPs from within the STIP.

Federal Funding. MAP-21 requires that the federal-aid highway and federal-aid transit projects in the STIP shall be based on financing reasonably expected to be available. The 2015-2018 STIP is based on anticipated federal, state and local funds. The federal-aid revenues are based on estimates of apportionment (formula), allocations, and high priority project funding.

Federal-Aid Highway Formula Funding: Federal-aid highway formula funding is apportioned to the states by formulas established in law. Federal-aid highway apportionments have been highly variable. Minnesota developed this STIP based on a forecast estimate for obligation authority. Under MAP-21, the federal-aid highway obligation authority estimate for the development of this STIP is approximately \$537 million per year.

Federal-Aid Highway Allocation Funding: Funding available from allocated funding is included in the STIP. Federal-aid highway allocation funding is distributed to the states by administrative formula or by means of a competitive application. Allocated funds include many varied categories of federal-aid, including, but not limited to Public Lands, Indian Reservation Roads, TIGER and Federal Land Access.

Allocations of categorical funding generally consist of several small projects that are distributed to specific areas of the state. Allocations are not always consistent with the time-frame of the development of the STIP.

Annual allocations to individual projects or categories of funding are routinely added to the STIP but due to the timing

of project identification may require amendments to be processed.

Federal-Aid Highway Earmarked Funding: SAFETEA-LU saw an unprecedented amount of federal funds earmarked by Congress. About \$90 million in Earmarked funding was made available each year under SAFETEA-LU, up from about \$30 million each year under previous transportation acts. Earmarked funding is subject to obligation limitation but is available until spent. Due to project delivery schedules and the rules pertaining to the spending of these funds, the actual level of funding committed each year is variable. Earmark funding has not occurred under the continuing resolutions since the end of SAFETEA-LU at the end of FFY 2009. MAP-21 does not include Earmark funding.

Federal Transit Funding: Federal transit funding is appropriated annually. Programs include: Urbanized Area Formula Program, Rural Area Formula Program (includes rural, small urban, intercity bus, and job access and reverse commute), Enhanced Mobility of Seniors and Individuals with Disabilities Formula Program (includes New Freedom), Metropolitan and Statewide Non-metropolitan Transportation Planning Formula Program, State of Good Repair Grants and Bus and Bus Facilities Formula Grants. The passage of MAP-21 and its provisions to guarantee funding for transit programs keep federal transit funds predictable; however, federal funds make up only a small percentage of total operating costs for the transit programs. MAP-21 consolidated certain transit programs to improve efficiency, targeted funding increases particularly for improving the state of good repair, added new

reporting requirements and required performance measures for state of good repair, planning and safety programs.

State Highway and Transit Funding. The State of Minnesota has a biennial budget. State agency programs and operating budgets are based on a balanced budget. The 2015-2018 STIP is based on one year of approved funding and three years of estimated funding. The funding level for the STIP is estimated to be approximately the same for all 4 years of the STIP.

State Highway Funding: Funding for construction from this source is expected to be about \$290 million per year based on the current revenue forecast. The State Highway cash flow also permits advance construction of projects prior to actual federal dollars being available.

State Transit Funding: Transit assistance comes from three sources, the General Fund, Motor Vehicle Sales Tax (MVST) and Motor Vehicle Leased Sales Tax (MVLST). The transit appropriation from the State General Fund is expected to be about \$16.3 million in each year of the STIP for Greater Minnesota and \$77.0 million in 2015, and \$76.7 million in the following years of the STIP for the Metropolitan Area.

Minnesota's 2007 Legislature statutorily dedicated 40 percent of the annual MVST collections for transit: 4 percent is dedicated for Greater Minnesota transit operations and 36 percent for Twin Cities Metropolitan Area transit operations. The February 2014 Forecast estimates total revenue for the Transit Assistance portion of revenues to be about \$272.2 million in 2015, \$286.6 million in 2016 and \$299.7 million in 2017.

Greater Minnesota transit receives 50 percent of MVLST revenues after the fund reaches a threshold of \$32 million. In addition, Minnesota's 2013 Legislature modified the allocation of MVLST revenue for fiscal years 2014 and 2015 by capping the County/State Aid Highway (CSAH) fund's allocation at \$9 million. Therefore \$10.8 million of forecasted revenue over the 2014-15 Biennium that would have gone to CSAH under the old formula will go to the Greater Minnesota transit account in the Transit Assistance Fund instead. As of the February 2014 Forecast, estimates for Greater Minnesota transit assistance are \$34.4 million in 2015, \$25.0 million in 2016, \$27.6 million in 2017 and \$27.6 million in 2018.

2014 Capital Bonding provided

- \$1.5 million for Greater Minnesota transit facilities
- \$15.0 million for Metropolitan Area transit capital improvement

Local Highway and Transit Funding. Local funding is assumed to be available to match, or overmatch, the federal-aid for highways and transit. The state and local funding is also expected to be sufficient to maintain and operate the highway and transit systems.

Local Highway Funding: The State has a dedicated fund for state aid roads and bridges for counties and cities of 5,000 and over in population. The funding is available for maintenance and construction and is used in part to maintain the federal-aid highways and to match federal-aid. The local highway funding committed to match the federal highway aid is expected to average about \$172 million per year.

Local Transit Funding: The majority of the funding for the Minneapolis-St. Paul large urbanized area transit system is provided through local and state revenues. Since transit is substantially a local program, estimates of urbanized transit system funding are based on the MPO TIPs. Small urban and rural transit systems have a portion of their funding provided by assistance from the State General Fund, MVST and MVLST. The local share may be from a large variety of sources.

Advance Construction. Federal law allows states to request and receive approval to construct Federal-aid projects prior to receiving apportionment or obligation authority for the Federal-aid funds through the use of Advance Construction (AC). This means that Minnesota may commit future federal funds to a project as long as it goes through the normal FHWA approval and authorization process. An AC project is treated the same as any other federal project and must be authorized

prior to advertising for letting or expending any funds on the project. Projects using AC must be fully encumbered in the state MnDOT budget for the amount of state funds and the federal AC amount. AC is available to local governments as well as MnDOT.

The agency that uses the AC procedure must “front end” the project with their own funds. These may be state aid funds, local tax funds, State Road Construction funds or some other appropriate funding sources. Local projects utilizing AC funds require a special agreement approved by MnDOT’s Division of State Aid.

Federal regulations require that AC be shown in the year incurred and that the conversion of AC be shown in each year in which conversion takes place. Conversion is the process of converting AC to the obligation of actual federal funds. In the project listings in this STIP, AC funding is shown in a separate column and the dollar amounts are not included in the “Total” column. However, the AC conversion dollar amounts are included in the “FHWA” column and the “Total” column in the year in which a project is converted.

See Appendix C for the detailed financial plan.

Project Selection

The project selection process is the identification of the projects to be implemented in the first year of the 2015-2018 STIP. The projects in the remaining years of the STIP are deemed to be eligible for selection for implementation without a formal amendment to the STIP. MnDOT reserves the right to

select projects for the first year of the STIP from the projects in the last three years of the STIP.

Project selection includes two iterative processes. The first iterative process is “determining the program” from the list of projects within the draft ATIPs. This includes the analysis of the preferred sources of funding for the projects and the directions included in the *20 Year Highway Investment Plan*. It also is the step where the fiscal constraint is maintained. The second iterative process is the review of the STIP. The draft STIP is circulated back to the District/ATP for review and comment. Changes are made in the draft STIP as a result of the review and comment period. The STIP is forwarded to the Commissioner’s staff for review and approval before being sent to the U.S. DOT.

Figure 3 is a summary of the proposed expenditures in the STIP by fiscal year and the proposed source of federal highway or transit funding, state trunk highway funding or other source of state or local funding.

Figure 4 is a summary of the proposed expenditures in the STIP fiscal year and ATP.

Figure 3 is a summary of the proposed expenditures in the STIP by fiscal year and the proposed source of federal highway or transit funding, state trunk highway funding or other source of state or local funding.

III. PROGRAM LISTING

The following section contains the FY 2015-2018 STIP project listing sorted by District/ATP.

The first page of each District/ATP shows the District/ATP location within the state and the counties included within each District/ATP. The name of the District Transportation Engineer, phone number, and address are shown as well as a general information telephone number.

The second page begins the listing of projects in that District/ATP sorted by Fiscal Year. Within each Fiscal Year, projects are sorted by Route System with transit projects first followed by rail, local roadway, and then state projects.

The following information is provided for each project

Seq # - The sequence number is a unique number assigned to each project in this project listing.

Route System - The route name and number on which the project is located. See Figure 5.

Figure 5 Route System Categories	
Route System	Description
BB	Transit (buses)
CITY	City Project
CR	County Road
CSAH	County State Aid Highway
FH	Forest Highway
I	Interstate Highway
IRR	Indian Reservation Roads and Bridges
LOCAL	Local project not associated with a road
MSAS	Municipal State Aid Street
MUN	Municipal Street
PED/BIKE	Pedestrian or Bike Path/Trail (not assigned to a specific road)
REC TRAIL	DNR Recreational Trail
RR	Railroad
MN	Trunk Highway
TWP	Township Road

- Proj Num - Project identifier. Most trunk highway projects start with the control section numbers. Local projects start with either the county number or the city number.
- Year - The year of the project.
- Agency - The jurisdiction responsible for implementing projects or for opening bids.
- Description - The location and/or type of project. Smart Code – See Figure 7
- Miles - The length of the project.
- Program - The program category. See Figure 6.
- Type of Work - The intent of the project.
- Proposed Funds - Preliminary fund assignment with exact determination of funding determined upon authorization. See Figure 8.
- Total - The total estimated cost of the project relative to federal funding to be used in year of letting. This includes advance construction (AC) conversion funding. It does not include the original advance construction funding.
- FHWA - The total estimated federal aid highway funding to be used for the project. This includes advance construction conversion funding.

Figure 6 Program Categories	
Program	Description
AM	Municipal Agreement
BI	Bridge Improvement
BR	Bridge Replacement
BT	Bike Trail (not an Enhancement)
CA	Consultant Agreement
DA	Detour Agreement
DR	Drainage
EN	Enhancement (STP)
IR	Indian Reservation Roads
MA	Miscellaneous Agreements
MC	Major Construction
NA	Not Applicable (Uncommitted)
NO	Noise Walls
PL	Planning
PE	Preliminary Engineering
PM	Preventative Maintenance
RB	Rest Area/Beautification
RC	Reconstruction
RD	Recondition
RS	Resurfacing
RT	Recreational Trail (DNR only)
RW	Right of Way Acquisition
RX	Road Repair (Bridge and Road Construction) (BARC)
SA	Supplemental Agreement/Cost Overruns
SC	Safety Capacity
SH	Highway Safety Improvement Program (HSIP)
SR	Safety Railroads
ST	Striping and Signing
TM	Transportation Management
TR	Transit (FHWA)
B9	FTA Urbanized Area Formula – Section 5307
CF	Clean Fuels – Section 5308
B3	FTA Capital Program - Section 5309
GR	State of Good Repair
NB	FTA Elderly and Persons with Disabilities – Section 5310
OB	FTA Non-urbanized Areas - Section 5311 & Section 5311(f)
JA	FTA Job Access and Reverse Commute – Section 5316
NF	New Freedom Section 5317

Figure 7 Smart Code	
Fund	Description
AB	Alternate Bid
AC	Advance Construction/Advance Construction Payback
ADA	Americans with Disabilities Act (Funding)
ADA5M	Americans with Disabilities Act (Funding)-\$5M of the \$95M Other Roadside Infrastructures for ADA Projects
CBI	Coordinated Border infrastructure (MAP-21 provides no CBI)
CIMS	Corridor Investment Management Strategy
COC	Corridors of Commerce
CMGC	Construction Manager General Contractor
COCII	Corridors of Commerce II
ELLA	Early Let Late Award
FMP	Flood Mitigation Program
HB	Historic Bridges
HRRR	High Risk Rural Road
HSR	High Speed Rail
IDIQ	Indefinite Delivery Indefinite Quantity
IP	Illustrative Project
LGA	Local Government Advance/Local Government Advance Payback
MNXXX	Demo
NCIP	National Corridor Improvement Program (only if project is fully funded)
PNRS	Projects of National and Regional Significance (only if project is fully funded)
PV40M	Pavement Projects - \$40M of the \$95M Other Roadside Infrastructures for Pavement Projects
RCIP	Major Regional and Community Improvement Priorities
RI20M	Other Roadside Infrastructure Program
SEC164	Highway Safety Improvement Program-Repeat Offender Laws
SB	Scenic Byways
SPP	Statewide Performance Program (SPP)
SRTS	Safe Route to School (Infrastructure and Non-Infrastructure)
TCSP	Transportation, Community, Systems Preservation Program (only is project is fully funded)
TED12	2012 Trunk Highway Economic Development Account
TED14	2014 Trunk Highway Additional Spending Authority
TH14TB	Trunk Highway 14 Turn Back
TRLF	Transportation Revolving Loan Fund/Transportation Revolving Loan Payback

Figure 8 Proposed Fund Categories	
Fund	Description
BF	Bond Funds
BROS	Off System Bridge
CBI	Coordinated Border Infrastructure
CMAQ	Congestion Mitigation and Air Quality
DEMO	HPP, Earmark, National Corridor Improvement Program, Projects of National & Regional Significance and all projects that have a Demo ID
DPS	Department of Public Safety
FTA	Federal Transit Administration
FFM	Federal Funds Miscellaneous
FLAP	Federal Land Access Program
HSIP	Highway Safety Improvement Program
LF	Local Funds or Other
NCIP	National Corridor Infrastructure
NHPP	National Highway Performance Program (Interstates, NHS, and Principal Arterials)
PLHD	Public Lands Highway Discretionary
RRS	Highway Rail Grade Crossings & Rail Safety
RT	Recreational Trail
SF	State Funds
STP	Surface Transportation Program
TAP	Transportation Alternative Program
TCSP	Special Allocations for Transportation, Community, and System Preservation projects
TRLF	Transportation Revolving Loan Fund

-
AC	-	The total estimated amount of future federal funds (AC) being committed to a project, front-ended by local/state funds.
FTA	-	The total estimated federal aid transit funding to be used for the project.
TH	-	The total estimated state trunk highway funding to be used for the project.
Bond	-	The total estimated state bond to be used for the project.
Other	-	Estimate of funding other than FHWA, FTA or State TH to be used for the project. This includes local match, local funds, private contributions and special legislative appropriations.

Minnesota Metropolitan Planning Organizations

MANKATO – NORTH MANKATO AREA PLANNING ORGANIZATION

On March 27, 2012, the Census Bureau identified Mankato as an urbanized area with a population of 57,584.

Under federal law (§ 134(d)(1) of the Moving Ahead for Progress in the 21st Century Act (MAP-21), all urbanized areas with a population of more than 50,000 individuals must have a designated metropolitan planning organization (MPO) that is responsible for long-range transportation planning, as well as a short-range investment program.

In response to this, the Mankato/North Mankato Area Planning Organization (MAPO) was established with the guidance of MnDOT Office of Statewide Multimodal Planning (OSMP), the Federal Highway Administration, MnDOT District 7, local governments, transit operators and Region 9 Development Commission. A joint powers agreement between the local governments representing at least 75 percent of the affected population was enacted to establish MAPO as the designated metropolitan planning organization, and was approved by the Governor on January 11, 2013. The city of Mankato serves as the administrative agency.

MAPO has adopted a Public Participation Plan as outlined in 23 USC 134 and 23 CFR 450 and has begun their Long Range Transportation Plan, which should be ready for public comment in the summer/fall of 2015. After the Long Range Plan has been adopted, MAPO will develop their TIP. MAPO, however, approved MnDOT's "List of Projects" with federal

funding within the MAPO planning area which is included in the 2015-2018 STIP. MnDOT will continue to work with MAPO agency and local governments to ensure all federal and state planning requirements are met.

GREATER MINNESOTA MPO PROGRAMS

In accordance with the joint FHWA/FTA Metropolitan Planning Rules, 23 CFR Section 450.324, each of the Metropolitan Planning Organizations in Greater Minnesota has developed and approved a four-year fiscally constrained Transportation Improvement Program (TIP). Each TIP provides a prioritized list of projects for which federal (FHWA and FTA), state (MnDOT) and in some cases, local funds are anticipated to be used. The federally funded projects have been selected through the Area Transportation Partnership (ATP) process and are included in the appropriate Area Transportation Improvement Program (ATIP).

Also included in the MPO TIP is a financial plan which discusses the program's fiscal constraint as well as the MPO's certification that the MPO planning process is being carried out in compliance with all applicable federal requirements. In the case of Duluth, which is an "air quality maintenance area" for carbon monoxide, a conformity determination analysis is also included.

After adoption by the MPO, approval from MnDOT as the Governor's designee, and the completion of a joint planning finding and Air Quality Conformity Determination by FHWA and FTA (where needed), the MPO TIP is incorporated by reference, without modification, into the STIP. Additionally, the federal and MnDOT funded projects within the MPO area are listed in the STIP.

Transportation Alternatives Program (TAP)

TRANSPORTATION ALTERNATIVES PROGRAM (TAP)

MAP-21 consolidated Transportation Enhancements, Historic Structures, Safe Routes to School and Scenic Byways programs along with a number of different eligible activity categories into a new formula highway program, called Transportation Alternatives Program (TAP). For the duration of MAP-21 (July 6, 2012 to May 30, 2015) Minnesota will receive about 2% of formula highway apportionment. For the 2015-2018 STIP, Transportation Alternatives Program projects were solicited, ranked and selected within the ATP process. The projects were then incorporated into the ATIPs.

Highway Safety Improvement Program (HSIP)

HIGHWAY SAFETY IMPROVEMENT PROGRAM (HSIP)

Traditionally, safety projects were reactive in nature and were designed to improve an existing safety problem at a high crash location.

With the passage of MAP-21 and the development of the Minnesota Strategic Highway Safety Plan (SHSP), the types of safety projects funded with HSIP dollars has transitioned from a purely reactive safety program, addressing spot locations, to a more proactive safety program where low-cost systematic strategies are emphasized.

MnDOT projects were selected for the 2015-2018 STIP through a centralized process. A solicitation process was used for the local project selection. Low cost, systematic, proactive projects were prioritized over reactive single location improvements. Projects funded using the new process include: systematic intersection lighting, enhanced edge lines, rumble strips, chevrons on curves and cable median barrier. The Office of Traffic, Safety and Technology approves all state and local HSIP projects before they are included in the STIP.

Projects were selected using the following criteria:

- Road Safety Plan developed project
- Ability to meet the intent of the SHSP
- Fatal and A injury crashes per intersection or per mile
- SHSP (critical emphasis areas)
- Cost per intersection and/or cost per mile
- ADT
- Inclusion on the High Risk Rural Roads list or Top 5% list

For Greater Minnesota ATP's the selection committee was comprised of individuals from the following offices:

- MnDOT Office of Traffic, Safety and Technology
- FHWA (Advisory)
- MnDOT Office of State Aid for Local Transportation (local solicitation only)

For the Metro District ATP the selection committee was comprised of individual representing:

- MnDOT Metro Traffic (2)
- Metro County Engineering (2)
- Metro City Engineering (2)

Transit Programs

FTA

- ✓ Public Transit Urbanized Area Formula Program (Section 5307)
- ✓ Capital Program (Section 5309)
- ✓ Elderly and Persons with Disabilities Program (Section 5310)
- Public Transit Non - Urbanized Area Formula Program (Section 5311)
 - Inner - City Bus Program (Section 5311(f))
- ✓ Job Access - Reverse Commute Program (Section 5316)
- ✓ New Freedom Program (Section 5317)
- ✓ Bus and Bus Facilities (Section 5339)
- ✓ State of Good Repair (Section 5337)

FHWA

- ✓ Surface Transportation Program -Transit Capital
- ✓ Congestion Mitigation & Air Quality (CMAQ)
- ✓ FHWA Earmarks

TRANSIT PROGRAMS

Federal Transit Administration (FTA)

A portion of the federal gas tax is placed in the Mass Transit Account of the Federal Highway Trust Fund. These funds are reserved for transit purposes and are managed by the FTA. Transit funding authorized by MAP-21 is managed in several different ways. Some transit funding is distributed by formula or grant applications and some is allocated to the states and/or transit authorities by FTA.

In Minnesota, FTA transit allocations for rural and small urban transit capital and operating assistance are managed by MnDOT's Office of Transit. These formula programs include the Enhanced Mobility of Seniors and Individuals with Disabilities Program (operating and capital assistance – MAP-21 expanded this program to include operating assistance) and the Rural Area Formula Program (capital and operating assistance). The Urbanized Area Formula Program (capital and operating assistance for urbanized areas with populations over 50,000) is provided directly to the urbanized area transit agency by FTA. In addition, FTA directly allocates Bus and Bus Facilities Formula Program funds to the states and/or transit agencies in urbanized areas for major capital needs such as fleet replacement and construction of transit facilities.

Federal Highway Administration (FHWA)

An investment in transit capital is eligible for federal highway funding under MAP-21 through the Surface Transportation Program (STP) or Congestion Mitigation

and Air Quality (CMAQ). STP and CMAQ transit projects are prioritized by the ATP.

Transit funding from FTA and FHWA is estimated in Figure A-3. Each of these programs is displayed in the Program Listing section of this document.

Tribal Transportation Program (TTP)

TRIBAL TRANSPORTATION PROGRAM

The Tribal Transportation Program (TTP) is co-administered by the Federal Highway Administration's Office of Federal Lands Highway and the Department of the Interior's Bureau of Indian Affairs (BIA). The Indian tribal government, in cooperation with the BIA or FHWA, (and any state or local government, or metropolitan planning organization as may be appropriate), develops a Transportation Improvement Program (TIP) that includes all TTP eligible projects and activities on which the Tribe intends to expend its TTP funds. The TTP TIP is approved by the BIA and FHWA.

After approval, the TTP TIP is forwarded by FHWA to MnDOT for incorporation into the State Transportation Improvement Program (STIP).

Recreational Trails Program

RECREATIONAL TRAILS PROGRAM

The Recreational Trails Program provides funds to develop, maintain, and enhance recreational trails for both motorized and non-motorized recreational trail users. Funds are appropriated to the State by formula, 50 percent equally among all eligible states and 50 percent in proportion to the amount of off-road recreational fuel use. The maximum federal share in Minnesota is 75 percent for these projects, and a 25 percent cash or pre-approved in-kind match is required. Only state agencies, cities, counties, townships, tribal governments or private trail organizations sponsored by a local unit of government are eligible to apply.

The Minnesota Department of Natural Resources (MNDNR) administers this program for Minnesota. The Minnesota Recreational Trail Users Advisory Board (MRTUA) assists the MNDNR in project selections. The committee is comprised of three representatives of the ten identified trail user groups (bike, mountain bike, hike, ski, horse, in-line skate, ATV, Off-Road Vehicles, snowmobiles, Off-Highway Motorcycling) in Minnesota.

The Recreational Trails Program projects are listed in District C of the project list and on the following pages.

Contact: Traci Vibo, Grant Coordinator, Minnesota Department of Natural Resources, Division of Parks and Trails, 500 Lafayette Road, Box 39, St. Paul, Minnesota 55155; phone at (651) 259-5619; or email at traci.vibo@state.mn.us .

**MnDOT
State Road
Construction Program (SRC)**

MnDOT STATE ROAD CONSTRUCTION PROGRAM

In developing the 2015-2018 STIP, only federal-aid highway formula funds were subject to the ATP prioritization process. State funded projects are included in the formal STIP for informational purposes and were shared and discussed with the ATPs. MnDOT anticipates a high degree of flexibility in the use of federal or state funding sources for individual projects.

The estimated average annual state funds available for trunk highway construction activities is \$300 million. Actual amounts are slightly higher with a modest level of over programming. However, a portion of those state funds are reserved for statewide initiatives shown in District ATP C.

State funds are available to each MnDOT District to cover the following items in priority order:

1. Match federal dollars received through the ATP process and Federal High Priority Project funding or Allocated funding.
2. Estimate necessary District set-asides to cover supplemental agreements and cost overruns.
3. Estimate of right-of-way needs to cover all trunk highway projects, with appropriate lead time for expenditures. A single account will still be monitored by the MnDOT Office of Land Management. The MnDOT Districts must identify the expenditures for the correct State Fiscal Year (SFY).

4. A prioritized list of all other state funded projects or set-a-sides. This prioritized list will include all Municipal Agreement Projects, Bridge and Road Construction Projects and Landscape Partnerships.

MnDOT's State Road Construction Program (SRC) is legislatively constrained by an annual budget level. The exact budget level can vary by biennium. The STIP program level may not coincide with the SRC budget level if MnDOT is more or less successful than anticipated during the ATP process. If the program level is significantly higher, legislative action would be required to raise the budget level. The STIP is fiscally constrained, but MnDOT's SRC budget includes a level of advance construction programming.

Project totals (all four years of the STIP) for the MnDOT State Road Construction Program (SRC) are provided in Figure A-4. Figure A-5 gives the SRC program totals by District/ATP and year. Totals for the SRC include dollars funded by federal advance construction funds, which may exceed actual federal dollars available in any given year. This is due to the fact that AC can be converted over more than one year.

- ✓ Minnesota Aeronautics Airport Capital Improvement Program

Minnesota Rail Service Improvement Program

MINNESOTA RAIL SERVICE IMPROVEMENT PROGRAM

The Minnesota Rail Service Improvement Program (MRSI), established in 1976, helps prevent the loss of rail service on lines potentially subject to abandonment by railroads. Using state-developed eligibility rules, the state and rail users and/or railroads enter into contracts for rail line rehabilitation, capital improvements, purchase assistance to rail authorities, loan guarantees and state rail banking. Funding for these projects is in the form of a loan. When the project is completed, the recipient repays the state. These reimbursements are returned to the Minnesota Rail Service Improvement Program account to fund future rehabilitation projects.

Projects fall within the program areas identified below. The MRSI Program has identified \$27 million in railroad track project needs. Projects will move ahead if funding is available and project agreements can be completed and contracts executed. These loan projects are typically funded with state general obligation bond funds or state general funds. Figure B-1 at the end of this section identifies the potential number of projects and funding.

The following five programs are funded under the Minnesota Rail Service Improvement Program.

Rail Purchase Assistance Program

Assists Regional Railroad Authorities in acquiring rail lines that can be operated on a self-sustaining basis to provide local rail service. MnDOT may provide up to 50 percent of the value

of the property. State funds are secured and require repayment if the line is sold or ceases to serve the purpose intended.

Rail Rehabilitation Program

Provides low and no-interest loans to rehabilitate and preserve rail lines that are financially viable and have the potential to increase rail use. A shipper's survey, cost/benefit analysis, and a rehabilitation needs assessment are conducted to determine which lines are prospective rail projects. Repayment of loans is required.

Capital Improvement Loan Program

Provides rail users and railroads with loans for projects that improve rail service and/or strengthen the financial condition of the associated line. Eligible projects have typically included capital improvements such as building and expanding industrial spurs, upgrading bridges and building more efficient loading/un-loading facilities. Repayment of loans is on a quarterly basis.

State Rail Bank Program

Allows the state to acquire and preserve abandoned rail lines for future transportation use or for transmitting energy, fuel or other commodities.

Rail User and Rail Carrier Loan Guarantee Program

Assists rail users in obtaining loans for rail rehabilitation and capital improvements by guaranteeing up to 90 percent of the loan. The 1994 Legislature further amended the statute, recreating the program as the Rail User and Rail Carrier Loan Guarantee Program. Not only rail users but rail carriers are eligible for assistance under the program. In addition to rail

line rehabilitation, rolling stock acquisition and installation are eligible.

Additional information on the Minnesota Rail Service Improvement Program may be obtained from Peter Dahlberg, Program Manager, Office of Freight and Commercial Vehicle Operations, at (651) 366-3693.

Port Development Assistance Program

PORT DEVELOPMENT ASSISTANCE PROGRAM

The Port Development Assistance Program was developed by the state in response to the needs of the commercial navigation system. There are currently no dedicated federal funds available. The program provides a funding source that facilitates compliance with tighter environmental standards; helps to ensure the continued commercial effectiveness of lake and river navigation terminals and helps to offset increases in the general costs of commercial shipping.

A number of conditions exist that warrant the port development assistance program in Minnesota. Many of the public terminals and docks in the state are in need of rehabilitation at costs beyond the means of local agencies. Local port authorities are having trouble keeping their infrastructure intact, especially for our agricultural and mining industries, because the transportation and disposal of dredge material is restricted to fewer, temporary or permanent disposal locations due to environmental regulations.

Project proposals are prioritized based on need, employment generated and overall economic benefit. MnDOT's Office of Freight and Commercial Vehicle Operations, working with the State's port authorities, had identified a list of potential harbor improvement projects for 2014 and beyond. Past projects, besides dredging, include rehabilitating or improving rail and truck access, dock walls, building roofs, sprinklers and electrical systems, mobile handling equipment and adding warehouse capacity.

The Minnesota Legislature has made the following appropriations to the Port Development Assistance Program:

- 1996 - \$3 million (Bonds)
- 1998 - \$3 million (Bonds)
- 1998 - \$1.5 million (General Funds)
- 2000 - \$2 million (General Funds)
- 2001 - \$1 million (General Funds)
- 2003 - \$2 million (Bonds)
- 2005 - \$2 million (Bonds)
- 2006 - \$3 million (Bonds)
- 2008 - \$500,000 (General Funds)
- 2009 - \$3 million (Bonds)
- 2011 - \$3 million (Bonds)
- 2012 - \$1 million (Bonds)
- 2014 - \$2 million (Bonds)

To date, total state appropriations for the Port Development Assistance Program amounts to \$27 million. The Ports have identified nearly \$45 million of port development needs.

According to Minnesota law, Port Development Assistance funds cannot be added to other state sponsored port investments. Port Development funds can be used with federal and local dollars to complete projects that benefit a port.

Additional information about the Port Development Assistance Program may be obtained from Patrick Phenow, Ports and Waterways, Office of Freight and Commercial Vehicle Operations, at (651) 366-3672 or email: patrick.phenow@state.mn.us.

MINNESOTA AERONAUTICS AIRPORT CAPITAL IMPROVEMENT PROGRAM

Legislation

State:

Minnesota Statutes 360 (MS 360), Aeronautics, is the enabling legislation which the Minnesota Department of Transportation (MnDOT), Office of Aeronautics operates. One of the primary directives of this Statute is to promote aviation and aviation safety in Minnesota. MS 360 also establishes a dedicated “State Airport System,” and a dedicated “State Airport Fund.” This fund derives revenue from: aircraft registration tax, aircraft sales and use tax, aviation fuel tax, airline flight property tax, licensing fees, and interest earned on the fund.

The Legislature appropriates monies from the State Airport Fund on a biennial basis to support the state funded aviation programs and activities. The Airport Development and Assistance appropriations are for Airport Grant-In-Aid Programs which support the continued development and maintenance of the State Airport System.

Federal:

The legislative authorization for the Airport Improvement Program (AIP) is contained in the “FAA Modernization and Reform Act of 2012,” passed in February of 2012. The authorization sets AIP funding at \$3.35B per year for federal fiscal years 2012-2015 and established policy for airport development. Commercial service airports receive primary entitlement funds based on their number of passenger enplanements. Airports with at least 10,000 annual enplanements

receive a minimum of \$1 million in entitlement funds.

Commercial service airports may also collect a Passenger Facility Charge (PFC) from enplaning passengers to supplement AIP funding. The current limit on PFCs is \$4.50 per passenger. Non-primary (i.e. general aviation, reliever and non-primary commercial service) airports also receive entitlements up to \$150,000 per year. AIP discretionary funds are available for higher priority projects, but must compete for those funds on a nationwide basis.

Minnesota Chapter 360 requires that the state act as agent on behalf of airport municipalities for making application, and for receiving and disbursing federal funds. The MnDOT, Office of Aeronautics is the designated state agent for providing this coordination.

Eligibility

State:

To be eligible for state grants-in-aid, the airport must be owned by a municipality, licensed for public use, and identified in the State Airport System as designated by the Commissioner of Transportation and approved by the Governor. It must also have airport safety zoning or be in the process of zoning. Currently there are 135 publicly-owned airports in Minnesota.

Federal:

To be eligible for federal grants-in-aid, an airport must be in the National Plan of Integrated Airport Systems (NPIAS). Generally, to qualify, an airport must be more than 30 minutes driving time from the nearest existing NPIAS airport and must have a minimum of 10 based aircraft. Currently, there are 97 airports in

Minnesota in the NPIAS. Five of the NPIAS airports have recently been unclassified by FAA and are therefore only eligible for funding of safety critical projects.

Project Identification

A five-year Capital Improvement Program (CIP) is maintained for all publicly-owned airports in Minnesota. Updates to the CIP are submitted to the Office of Aeronautics annually by the municipalities responsible for the airports. Local decision, and the availability of the local matching funds, will cause some projects to move into future years.

State:

The Minnesota CIP for airports is the result of the annual input received from the municipalities and funding availability for construction grants each fiscal year.

Several factors influence the selection of project elements for state funding. Project priority, inclusion in the State Airport System Plan (SASP), approved airport master plans and airport layout plans (ALPs), statewide airport pavement management information, status of airport safety zoning, and licensing and inspection reports are some of the considerations for funding.

Approximately \$11 million has been identified in FY 2015 for airport construction grants and an additional \$3 million for FY 2015 as part of the supplemental budget. Projects in the 2015-2018 STIP are based on CIP information submitted by airports in September of 2013.

Federal:

The Federal Aviation Administration (FAA) also maintains an Airport Capital Improvement Program (ACIP) for airports included in the NPIAS. In Minnesota, the ACIP is developed based on input from the Office of Aeronautics and the state CIP.

Projects are prioritized by the Office of Aeronautics based on criteria such as project purpose, airport classification, component of project, and type of project. The FAA has ranking criteria for projects based on a formula that awards points for various project elements. The rank ranges from 0 to 100, with 100 being the highest priority. The ACIP list is developed by the FAA, Minneapolis Airports District Office with input from MnDOT, Office of Aeronautics, and submitted to compete nationally for AIP funds.

Approximately \$31 million in federal AIP grants were issued in Minnesota during state fiscal year 2014.

For a list of 2015-2018 Aeronautic projects contact Kathleen Vesely at kathy.vesely@state.mn.us, phone number 651/234-7193.

Appendix C

MnDOT's Detailed Federal Fiscal Constraint Plan

Detailed Federal Fiscal Constraint Plan

The Detailed Federal Fiscal Constraint Plan in Figure C-1 shows how MnDOT will be managing Advance Construction (AC) from 2015 through 2018. AC conversions (Paybacks) identified in the STIP are referred to as “Planned AC Conversion.” District/ATPs have identified and planned for these project conversions. Along with STIP identified “Planned AC”, the Office of Financial Management (OFM) and the Office of Transportation System Management (OTSM) manage the program on a statewide basis using AC to provide for greater financial flexibility and to manage cash flow.

History shows that projects exceeding \$1million are more likely to be paid out over more than one year. Historically, project expenditures payout 50% in the first year, 40% in the second year, and 10% in the third year. For this reason, many projects can be adjusted to more closely reflect the actual timing of these expenditures. Use of these rates on additional AC projects allows MnDOT to maximize the use of Federal funding. OFM manages the conversions of these projects on a statewide basis and refers to these projects as “Managed AC Conversions.”

“Deferred Conversions” describe the adjustment to a Planned AC project. These conversions are used to delay planned conversions to correspond with actual expenditures. MnDOT could use a longer period of conversion and use Trunk Highway cash or bonds to delay conversions further. The reverse is true if more Federal funds become available than has been forecast.

Figure C-1 illustrates how AC is used to manage MnDOT’s program. Lines (1) through (3) come from the STIP. Line (1) is the total Federal formula funds in the STIP for each year. Line (2) represents the amount of regular funds in the STIP total. Line (3) is the amount of “Planned AC Conversions” in the STIP total. Line (4) shows the planned amount of line (2) for new *managed* AC for the current year. Line (4a) is the new managed AC percentage of regular federal funds. Line (5) is 30% of the new *managed* AC from the current year. Line (6) is 50% of the new *managed* AC from the prior year. Line (7) is 20% of the new *managed* AC from 2 years back. Lines (5) through (7) total the amount of managed AC in that state fiscal year. Line (8) is the difference between lines (2) and (4) representing the forecasted sum of the projects that are expected to use 100% of their Federal funds in that year. Line (9) is the same as line (3). Line (10) comes from analysis of the Planned Conversions which are anticipated to convert at a different rate than the expected 50% - 40% - 10%. Line (10) is called “Deferred Conversion.” There are no deferred conversions presently planned in this STIP. Line (11) is the sum of lines (5) through (7). Line (12) is the managed AC carry forward from prior years. As Figure C-1 illustrates, all prior year’s AC will be totally converted in state fiscal year 2015 (no carry forward to 2016).

MnDOT plans to continue its use of AC as a financial management tool. MnDOT’s intention is to encourage the use of AC by the District/ATPs when projects can be packaged or completion of a project will occur over more than one construction season. At the same time, MnDOT will centrally manage AC to ensure sound financial management.

Differences due to rounding

Excludes Earmarks

Minnesota Projected Levels of AC The Federal AC shown in figure C-2 shows the projected level of AC MnDOT will be carrying at the end of each state fiscal year. The ending level of AC includes those projects that were authorized by the Federal Highway Administration (FHWA), have been let, awarded and encumbered by the State. The state fiscal year runs from July 1 to June 30. Trunk Highway Projects that are authorized by FHWA but have not gone through the final process of encumbrance are not counted in the year Ending Balance of AC. The AC Beginning Balance comes from the previous years ending balance. New AC – Planned can be found in the STIP.

New AC – Managed, Managed Conversions, as well as the Planned Conversions can be found in the Minnesota Detailed Financial Plan, figure C-1.

The strategy of using Managed AC on projects that were not planned to be Advance Constructed through the normal process, allows MnDOT to manage through a time when Federal Funding could be uncertain. This practice will give MnDOT the ability to absorb a reduction in Federal funds in a year and not have to reduce the short term program, but make the necessary corrections in the following year(s). Once current year Federal funds become available MnDOT will reevaluate the need to AC projects that fall in this group.

Federal Lands Program

FEDERAL LANDS PROGRAM

The Federal requirement under Title 23 U.S.C. § 204 requires that a Federal Lands TIP be developed as part of the transportation planning process for Federal Lands projects.

The Eastern Federal Lands Highway (EFLHD) division has developed a FY 2015-2018 Transportation Improvement Program (TIP) for transportation projects within Federal Lands. The EFLHD TIP is included in the 2015-2018 STIP.
