I. SUBMISSION REQUIREMENTS FOR PHYSICIAN CLINICS	39
II. SUBMISSION REQUIREMENTS FOR HOSPITALS.....	43
III. SUBMISSION REQUIREMENTS FOR AMBULATORY SURGICAL CENTERS	47

INTRODUCTION

Minnesota Statutes 62U.02 requires the Commissioner of Health to establish standards for measuring health outcomes and develop a standardized set of measures to assess the quality of health care services offered by health care providers. In addition, Minnesota Statutes 62U.02 requires the Commissioner of Health to issue annual public reports on provider quality using a subset of measures from the standardized set of measures. The Department of Health has contracted with Minnesota Community Measurement (MNCM) to lead a consortium of organizations, including Stratis Health, the Minnesota Medical Association (MMA), the Minnesota Hospital Association (MHA), and the University of Minnesota School of Public Health, to assist in the completion of these tasks.

Measures that will be used for public reporting are identified in Appendices A, B and C. The standardized set of measures are defined in the body of the rule and include the measures identified in Appendices A, B, C, and D. The hospital measures in Appendix B and the ambulatory surgical center measures in Appendix C are defined by the referenced national quality organizations and will likely change over time as modified by the national quality organizations.

APPENDIX A

REQUIRED PHYSICIAN CLINIC QUALITY MEASURE DATA

Data Required for Reporting Beginning in Calendar Year 2011 and Every Year Thereafter		
Measure Name and Purpose	Data Elements	Specification Information
Data Required for Reporting Beginning in January 2011 (2010 Dates of Service) and Every Year Thereafter		
Diabetes		
<p>Optimal diabetes care (ODC) composite</p> <p>These measures are used to assess the percent of adult patients who have type I or type II diabetes with optimally managed modifiable risk factors:</p> <ul style="list-style-type: none"> ▪ HbA1c (less than 8 percent) ▪ Low-density lipoprotein (LDL) cholesterol (less than 100 mg/dL) ▪ Blood pressure control (less than 140/90 mm Hg) ▪ Daily aspirin use if patient has diagnosis of IVD or valid contraindication to aspirin ▪ Documented tobacco free <p><i>(Urgent Care Centers are not required to submit data on this measure.)</i></p>	<p>Physician clinics must submit the following data for the optimal diabetes care measure and for each of the five component measures:</p> <ul style="list-style-type: none"> ▪ Patient identification methodology ▪ Submit the following two data elements by primary payer type (i.e., private insurance, Medicare, Minnesota Health Care Programs, uninsured/self-pay:): <ul style="list-style-type: none"> ▪ Denominator: <p>Number of patients meeting the criteria for inclusion in the measure if submitting on the full population</p> <p>OR</p> <p>Number of patients in data submission if submitting a sample</p> ▪ Numerator: Number of patients meeting the targets in the measure ▪ Denominator: Number of patients meeting the criteria for inclusion in the measure ▪ Number of patients meeting the exclusion criteria ▪ Calculated rate 	<p>Specifications for optimal diabetes care: Dates of service: 01/01/2010 – 12/31/2010. Minnesota Community Measurement; Revised 08/13/2010.</p> <p>Measure specifications can be found on the Minnesota Department of Health website http://www.health.state.mn.us/healthreform</p>

Measure Name and Purpose	Data Elements	Specification Information
Data Required for Reporting Beginning in January 2011 (2010 Dates of Service) and Every Year Thereafter		
Cardiovascular Conditions		
<p>Optimal vascular care (OVC) composite</p> <p>These measures are used to assess the percent of adult patients who have ischemic vascular disease (IVD) with optimally managed modifiable risk factors:</p> <ul style="list-style-type: none"> Low-density lipoprotein (LDL) cholesterol (less than 100 mg/dL) Blood pressure (BP) control: <ul style="list-style-type: none"> For patients with IVD <u>and</u> diabetes, BP less than 140/90 mm Hg For all other IVD patients, BP less than 130/80 mm Hg Daily aspirin use or contraindication to aspirin Documented tobacco free <p><i>(Urgent Care Centers are not required to submit data on this measure.)</i></p>	<p>Physician clinics must submit the following data for the optimal vascular care measure and for each of the four component measures:</p> <ul style="list-style-type: none"> Patient identification methodology Submit the following two data elements by primary payer type (i.e., private insurance, Medicare, Minnesota Health Care Programs, uninsured/self-pay): <ul style="list-style-type: none"> Denominator: <p>Number of patients meeting the criteria for inclusion in the measure if submitting on the full population</p> <p>OR</p> <p>Denominator: Number of patients in data submission if submitting a sample</p> Numerator: Number of patients meeting the targets in the measure Denominator: Number of patients meeting the criteria for inclusion in the measure Number of patients meeting the exclusion criteria Calculated rate 	<p>Specifications for optimal vascular care: Dates of service: 01/01/2010 – 12/31/2010. Minnesota Community Measurement; Revised 8/13/2010.</p> <p>Measure specifications can be found on the Minnesota Department of Health website http://www.health.state.mn.us/healthreform</p>

Measure Name and Purpose	Data Elements	Specification Information
Data Required for Reporting Beginning in February 2011 (2010 Dates of Service) and Every Year Thereafter		
Behavioral Health Conditions		
Depression remission at six months <p>This measure is used to assess the percent of adult patients who have major depression or dysthymia who have reached remission at six months (+/- 30 days) after being identified as having an initial PHQ-9 score greater than 9. Remission is identified as a PHQ-9 score less than 5.</p> <p><i>(Urgent Care Centers are not required to submit data on this measure.)</i></p>	<p>Physician clinics must submit the following data for the depression remission at six months measure:</p> <ul style="list-style-type: none"> ▪ Patient identification methodology ▪ Submit the following two data elements by three bands of initial PHQ9 scores (10-14; 15-19; 20 and above): <ul style="list-style-type: none"> ▪ Denominator: Number of patients meeting the criteria for inclusion in the measure ▪ Numerator: Number of patients meeting the targets in the measure ▪ Number of patients meeting the exclusion criteria ▪ Number of patients for whom a follow up six month (+/- 30 days) PHQ9 assessment was not completed. ▪ Calculated rate 	<p>Specifications for depression: Minnesota Community Measurement; Revised 7/13/2010.</p> <p>Measure specifications can be found on the Minnesota Department of Health website http://www.health.state.mn.us/healthreform</p>

Measure Name and Purpose	Data Elements	Specification Information
Data Required for Reporting Beginning in July 2011 (July 1, 2010 – June 30, 2011 Dates of Service) and Every Year Thereafter		
Respiratory Conditions		
Optimal asthma care <p>These measures are used to assess the percent of pediatric and adult asthma patients who are receiving optimal care. Optimal care is</p>	<p>Physician clinics must submit the following data for the optimal asthma care measure and for each of the three component measures:</p>	<p>Specifications for optimal asthma care: Dates of service: 07/01/2010- 06/30/2011.</p>

Measure Name and Purpose	Data Elements	Specification Information
Data Required for Reporting Beginning in July 2011 (July 1, 2010 – June 30, 2011 Dates of Service) and Every Year Thereafter		
<p>defined as:</p> <ul style="list-style-type: none"> Asthma is well controlled Patient is not at increased risk of exacerbations Patient has a current written asthma action/management plan <p><i>(Urgent Care Centers are not required to submit data on this measure.)</i></p>	<ul style="list-style-type: none"> Patient identification methodology Within two separate age bands, ages 5-17 and 18-50, submit the following two data elements by primary payer type (i.e., private insurance, Medicare, Minnesota Health Care Programs, uninsured/self-pay): <ul style="list-style-type: none"> Denominator: <p>Number of patients meeting the criteria for inclusion in the measure if submitting on the full population</p> <p>OR</p> <p>Number of patients in data submission if submitting a sample (NOTE: One sample per age band is required for this measure.)</p> Numerator: Number of patients meeting the targets in the measure Denominator: Number of patients meeting the criteria for inclusion in the measure Number of patients meeting the exclusion criteria Calculated rate 	<p>Minnesota Community Measurement; April 2010.</p> <p>Measure specifications can be found on the Minnesota Department of Health website http://www.health.state.mn.us/healthreform</p>
Preventive Care		
<p>Colorectal cancer screening</p> <p>This measure is used to assess the percent of adult patients who are up to date with appropriate colorectal cancer screening. The</p>	<p>Physician clinics must submit the following data for the colorectal cancer screening measure:</p> <ul style="list-style-type: none"> Patient identification methodology 	<p>Specifications for colorectal cancer screening: Dates of service: 07/01/2010 – 06/30/2011. Minnesota</p>

Measure Name and Purpose	Data Elements	Specification Information
Data Required for Reporting Beginning in July 2011 (July 1, 2010 – June 30, 2011 Dates of Service) and Every Year Thereafter		
<p>screening methods include:</p> <ul style="list-style-type: none"> ▪ Colonoscopy within ten years ▪ Sigmoidoscopy within five year ▪ Stool Blood Tests (FOBT or FIT) within the reporting period <p><i>(Urgent Care Centers are not required to submit data on this measure.)</i></p>	<ul style="list-style-type: none"> ▪ Submit the following two data elements by primary payer type (i.e., private insurance, Medicare, Minnesota Health Care Programs, uninsured/self-pay): <ul style="list-style-type: none"> ▪ Denominator: <p>Number of patients meeting the criteria for inclusion in the measure if submitting on the full population</p> <p>OR</p> <p>Number of patients in data submission if submitting a sample</p> ▪ Numerator: Number of patients meeting the targets in the measure ▪ Denominator: Number of patients meeting the criteria for inclusion in the measure ▪ Number of patients meeting the exclusion criteria ▪ Calculated rate 	<p>Community Measurement; Revised 5/27/2010.</p> <p>Measure specifications can be found on the Minnesota Department of Health website http://www.health.state.mn.us/healthreform</p>

Measure Name and Purpose	Data Elements	Specification Information
Data Required for Reporting Beginning in February 2011 (2010 Dates of Service) and Every Year Thereafter		
Health Information Technology (HIT)		
<p>Health information technology (HIT)</p> <p>This survey is used to assess a medical group's adoption and use of Health Information Technology (HIT) in their clinical practice.</p>	<p>Internet-based survey as updated in 2011</p>	<p>Measure specifications can be found on the Minnesota Department of Health website http://www.health.state.mn.us/</p>

Measure Name and Purpose	Data Elements	Specification Information
Data Required for Reporting Beginning in February 2011 (2010 Dates of Service) and Every Year Thereafter		
		healthreform

Data Required for Reporting Beginning in Calendar Year 2013 and Every Year Thereafter		
Measure Name and Purpose	Data Elements	Specification Information
Data Required for Reporting Beginning in February 2013 (2012 Dates of Service) and Every Year Thereafter		
Patient Experience of Care		
Patient experience of care This survey will be used to assess adult patient experience of care. MDH will require use of the Clinician and Group Consumer Assessment of Healthcare Providers and Systems (CG-CAHPS) visit specific tool.		Specifications for patient experience: Survey period 09/01/2012-11/30/2012. Minnesota Community Measurement; Revised 10/4/10. Measure specifications can be found on the Minnesota Department of Health website http://www.health.state.mn.us/healthreform

APPENDIX B

REQUIRED HOSPITAL QUALITY MEASURE DATA

Data Required for Reporting Beginning in Calendar Year 2011 and Every Year Thereafter		
Measure Name and Purpose	Data Elements	Specification Information
Measures Required for Reporting Beginning in January 2011 and Every Year Thereafter		
Hospital Compare Quality Measures, Centers for Medicare & Medicaid Services (CMS) and The Joint Commission		
<p>Acute myocardial infarction (AMI) – Acute myocardial infarction (AMI) / heart attack process of care measures for applicable hospital discharge dates</p> <p>The hospital process of care measures include the following measures related to heart attack care:</p> <ul style="list-style-type: none"> Aspirin at arrival (AMI-1) – This measure is used to assess the percent of acute myocardial infarction (AMI) patients who received aspirin within 24 hours before or after hospital arrival. Aspirin prescribed at discharge (AMI-2) – This measure is used to assess the percent of acute myocardial infarction (AMI) patients who are prescribed aspirin at hospital discharge. ACEI or ARB for LVSD (AMI-3) – This measure is used to assess the percent of acute myocardial infarction (AMI) patients with left ventricular systolic dysfunction (LVSD) who are prescribed an ACEI or ARB at hospital discharge. For purposes of this measure, LVSD is defined as chart documentation of a left ventricular ejection fraction (LVEF) less than 40% or a narrative description of left ventricular systolic (LVS) function consistent with moderate or severe systolic dysfunction. Adult smoking cessation advice/counseling (AMI-4) – This measure is used to assess the percent of acute myocardial infarction (AMI) patients with a history of smoking cigarettes, who are given smoking cessation advice or 	<p>Hospitals must submit data for each of the hospital compare acute myocardial infarction (AMI) / heart attack process of care quality measures. This data includes the following information:</p> <ul style="list-style-type: none"> Denominator: Number of patients meeting the criteria for inclusion in each of the quality measures Numerator: Number of patients meeting the targets in each of the quality measures Calculated rate 	<p>Specifications manual for national hospital inpatient quality measures, version 3.2b, discharges 10-01-10 (4Q10) through 03-31-11 (1Q11). Centers for Medicare & Medicaid Services (CMS), The Joint Commission; April 2010 or as updated.</p> <p>Measure specifications can be found on the Centers for Medicare & Medicaid Services (CMS), QualityNet website http://qualitynet.org</p>

APPENDIX D

OTHER STANDARDIZED QUALITY MEASURES

Measure Name	Measure Elements	Specification Information
Unlimited Availability		
Healthcare Effectiveness Data and Information Set (HEDIS)	All Healthcare Effectiveness Data and Information Set (HEDIS) measures as of HEDIS 2010, or as updated, that are applicable to physician clinics are included in the standardized set of quality measures.	Healthcare Effectiveness Data and Information Set (HEDIS) 2010 Volume 2: Technical Specifications. National Committee for Quality Assurance (NCQA); 2009 or as updated.
National Quality Forum (NQF) endorsed measures	All NQF-endorsed measures as of August 1, 2010, or as updated, that are applicable to physician clinics and hospitals are included in the standardized set of quality measures, excluding those requiring use of proprietary databases or registries.	More information about these measures can be found on the National Quality Forum (NQF), website http://qualityforum.org

Measure Name	Measure Elements	Specification Information
Time-Limited Availability: These Measures are Available for Use for Three Years (2010 Dates of Service Through 2012 Dates of Service)		
Pediatric asthma	<p>For patients, ages 5 to 19 years:</p> <ul style="list-style-type: none"> ▪ At the last asthma visit, is the asthma severity level (intermittent or persistent) documented? ▪ If it is documented that the patient has persistent asthma, is the patient on an anti-inflammatory medication? ▪ If the patient is a smoker or exposed to second hand smoke, is advice regarding smoking cessation documented in the last year? 	<p>Clinical Review: Measure Specifications for Pediatric Asthma. Medica; Pediatric Asthma; July 2009.</p> <p>Measure specifications can be found on the Minnesota Department of Health website http://www.health.state.mn.us/healthreform</p>

	<ul style="list-style-type: none"> ▪ If the patient is a smoker, or exposed to second hand smoke, is advice regarding smoking cessation documented at the last visit? ▪ Is the child's environment tobacco smoke free? ▪ Is there evidence in the medical records that the patient received a written Asthma Action Plan? ▪ Unless contraindicated, is there evidence in the medical record that the patient has received an influenza vaccine within the past year? 	
--	--	--

Measure Name	Measure Elements	Specification Information
Time-Limited Availability: These Measures are Available for Use for Two Years (2010 Dates of Service Through 2011 Dates of Service)		
Adult depression	<p>For adults, ages 19 years and older:</p> <ul style="list-style-type: none"> ▪ At the time of initial diagnosis in the past year, was there documentation of at least 5 of the symptoms of depression, or that the patient met the criteria for depression using a standardized depression diagnosing tool? ▪ At the time of the initial diagnosis in the past year, is there documentation that the patient was assessed for alcohol consumption? ▪ If the patient was at the clinic for a primary care visit more than 6 weeks after the initial diagnosis, is there documentation of ongoing assessment of their depression status? ▪ Was the patient's depression status reassessed using the PHQ-9 tool at a follow up visit within 6 months after diagnosis? ▪ Was the PHQ-9 depression diagnostic tool used for the initial depression diagnosis? 	<p>Clinical Review: Measure Specifications for Adult Depression. Medica; Pediatric Asthma; July 2009.</p> <p>Measure specifications can be found on the Minnesota Department of Health website http://www.health.state.mn.us/healthreform</p>

APPENDIX E

SUBMISSION SPECIFICATIONS

I. Submission Requirements for Physician Clinics

1. **Registration.** Each physician clinic must register electronically and obtain a login user ID and password from the commissioner or commissioner's designee beginning January 1, 2010 and no later than February 10, 2010 and no later than February 10 of each subsequent year, and must supply data elements, including the following:

- a. **Physician clinic information:** Name, mailing address, clinic national provider identifier (NPI);
- b. **Contact information for individual(s) responsible for submitting data:** Company, name, title, mailing address, telephone number, fax number, e-mail address;
- c. **Contact information for physician clinic general contact:** Name, title, mailing address, telephone number, fax number, e-mail address;
- d. **Clinical staff information for the previous calendar year:** Name, national provider identifier (NPI), board certifications for all clinical staff that have provided health care services at the physician clinic during the previous calendar year;
- e. **Description of health care services provided by the physician clinic.**
- f. **Medical group affiliation.**

2. **Data Submission.**

- a. **Measures for which physician clinics may submit on their full patient population or a random sample in 2011. (NOTE: Beginning in 2012, physician clinics with electronic medical records in place for the prior full measurement period are required to submit data on their full patient population.)**

Optimal diabetes care (ODC) and optimal vascular care (OVC). Each physician clinic, except ambulatory surgical centers, must submit the data required to calculate the applicable quality measures, as described in Appendix A and including the number of patients receiving the applicable health care services allocated according to primary payer type (private insurance, Medicare, Minnesota Health Care Programs, uninsured/self-pay) to the commissioner or the commissioner's designee. Specifically, this includes patient identification methodology, numerator and denominator by primary payer type, number of patients meeting the exclusion criteria, and calculated rate. If submitting a sample, the denominator for the entire patient population does not need to be allocated by primary payer type. A physician clinic may work with a single subcontractor to submit the required data on their behalf. Data may be submitted beginning January 1, 2011 and no later than February 15, 2011 and beginning January 1 and no later than February 15 of each subsequent year.

Optimal asthma care. Each physician clinic, except ambulatory surgical centers, must submit the data required to calculate the applicable quality measures, as described in Appendix A to the commissioner or the commissioner's designee. For this measure, this includes identifying the patients in two separate age bands, ages 5-17 and ages 18-

50. If the physician clinic chooses to submit a sample, there must be one sample per age band. Within these two age bands, data on the number of patients receiving the applicable health care services must be allocated according to primary payer type (private insurance, Medicare, Minnesota Health Care Programs, uninsured/self-pay). Specifically, this includes patient identification methodology, separation of the data by age bands, numerator and denominator by primary payer type, number of patients meeting the exclusion criteria, and calculated rate. If submitting a sample, the denominator for the entire patient population does not need to be allocated by primary payer type. A physician clinic may work with a single subcontractor to submit the required data on their behalf. Data may be submitted beginning July 1, 2011 and no later than August 15, 2011 and beginning July 1 and no later than August 15 of each subsequent year.

Colorectal cancer screening. Each physician clinic, except ambulatory surgical centers, must submit the data required to calculate the applicable quality measures, as described in Appendix A and including the number of patients receiving the applicable health care services allocated according to primary payer type (private insurance, Medicare, Minnesota Health Care Programs, uninsured/self-pay) to the commissioner or the commissioner's designee. Specifically, this includes patient identification methodology, numerator and denominator by primary payer type, number of patients meeting the exclusion criteria, and calculated rate. If submitting a sample, the denominator for the entire patient population does not need to be allocated by primary payer type. A physician clinic may work with a single subcontractor to submit the required data on their behalf. Data may be submitted beginning July 1, 2011 and no later than August 15, 2011 and beginning July 1 and no later than August 15 of each subsequent year.

i. **Data Submission Requirements.** A physician clinic may satisfy the data submission requirement for these quality measures by completing the following steps:

1. **Patient identification methodology.** Identify patients meeting the criteria for inclusion in the measure. Use the measurement specifications referenced in Appendix A to determine eligibility for each patient, only including patients that meet denominator criteria for each measure in the list. Develop a list of the eligible patients for each measure using a practice management, billing system, or electronic medical record.

2. **Data Collection: Total Population versus Sample.**

Identification of the population of patients eligible for the denominator for each measure is accomplished via a query of a practice management system or an electronic medical record. Use the measurement specifications referenced in Appendix A to determine eligibility for each patient, only including patients that meet denominator criteria for each measure in the list. Physician clinics may choose one of the following options:

a. Full patient population. Physician clinics are encouraged to submit data using their full patient population for each

measure, but may use a random sampling methodology, as described below.

- b. **Random sampling methodology.** Physician clinics may submit data on a random sample of relevant patients in 2011. At a minimum, physician clinics must select 60 patients for the random sample population and must oversample by at least 20 patients. If a physician clinic's total population for a particular measure is less than 60, the physician clinic must submit data using their full patient population for that measure. In subsequent years, physician clinics with an electronic medical record in place for a full measurement period will be expected to submit data on a full population basis. (NOTE: For the optimal asthma measure, there must be one sample per age band, one for ages 5-17 and one for ages 18-50.)
3. **Data submission template.** Use the data submission template supplied annually by the commissioner or the commissioner's designee as a data collection tool. Data elements may be either extracted from an electronic medical record system or abstracted through medical record review.
4. **Data file upload.** Submit data electronically to the commissioner or the commissioner's designee.
5. **Data validation.** Physician clinics must maintain documentation for the data described in Appendix A, including the methodology used to determine patients meeting the criteria for inclusion in each measure and the data submission template, for purposes of data validation.

b. Measures for which physician clinics may only submit data on their full patient population in 2011.

Depression remission at six months. Each physician clinic, except ambulatory surgical centers, must submit the data required to calculate the applicable quality measures, as described in Appendix A to the commissioner or the commissioner's designee. For this measure the data elements must be submitted by three bands of initial PHQ9 scores (10-14; 15-19; 20 and above). The number of patients for whom a follow up six month (+/- 30 days) PHQ9 assessment was not completed is a required data element as well. Specifically the required data includes, patient identification methodology, numerator and denominator separated by three bands of initial PHQ9 scores, number of patients who did not get a second PHQ9 assessment, number of patients meeting the exclusion criteria, and calculated rate. A physician clinic may work with a single subcontractor to submit the required data on their behalf. Data may be submitted beginning February 7, 2011 and no later than February 25, 2011.

- i. **Data Submission Requirements.** A physician clinic may satisfy the data submission requirement for these quality measures by completing the following steps:

-
1. **Patient identification methodology.** Identify patients meeting the criteria for inclusion in the measure. Use the measurement specifications referenced in Appendix A to determine eligibility for each patient, only including patients that meet denominator criteria for each measure in the list. Develop a list of the eligible patients for each measure using a practice management, billing system, or electronic medical record.
 2. **Data Collection: Total Population.** Identification of the population of patients eligible for the denominator for each measure is accomplished via a query of a practice management system or an electronic medical record. Use the measurement specifications referenced in Appendix A to determine eligibility for each patient, only including patients that meet denominator criteria for each measure in the list. For this measure physician clinics must submit data using their full patient population.
 3. **Data submission template.** Use the data submission template supplied annually by the commissioner or the commissioner's designee as a data collection tool. Data elements may be either extracted from an electronic medical record system or abstracted through medical record review.
 4. **Data file upload.** Submit data electronically to the commissioner or the commissioner's designee.
 5. **Data validation.** Physician clinics must maintain documentation for the data described in Appendix A, including the methodology used to determine patients meeting the criteria for inclusion in each measure and the data submission template, for purposes of data validation.
3. **Health information technology (HIT) survey.** Each physician clinic must complete the internet-based survey available annually from the commissioner or commissioner's designee beginning February 15, 2010 and no later than March 15, 2010 and beginning February 15 and no later than March 15 of each subsequent year.
 4. **Patient experience of care survey.** Each physician clinic must use a vendor certified by CMS.¹ Each physician clinic must either select a CMS-certified vendor of its choice or use the services of a centralized vendor coordinated by the commissioner or the commissioner's designee. Survey period will include patients seen September 1, 2012 – November 30, 2012.

¹ CMS only certifies vendors to administer the CMS-required HCAHPS survey. CMS does not certify vendors to administer CG-CAHPS for physician clinics. For purposes of fulfilling state requirements under Chapter 4654, physician clinics must use a vendor certified by CMS to administer HCAHPS.

II. Submission Requirements for Hospitals

- 1. Data Submission for Hospital Compare Measures, Centers for Medicare & Medicaid Services (CMS) and The Joint Commission.** Each hospital must submit the data described in Appendix B required to calculate the applicable quality measures. There are two ways hospitals may satisfy this requirement:

- a. Submission to the Centers for Medicare & Medicaid Services (CMS).** If a hospital normally submits data for all cases for these quality measures to the Centers for Medicare & Medicaid Services (CMS), using the Centers for Medicare & Medicaid Services' (CMS) existing schedule, specifications, and processes, and continues to do so, the hospital will have satisfied their data submission requirements for these quality measures provided that the hospital also signs an authorization form allowing the data to be published on the U.S. Department of Health & Human Services Hospital Compare website for *all* cases for each applicable quality measure; or
- b. Submission directly to commissioner or commissioner's designee.** If a hospital does not submit data for these quality measures to the Centers for Medicare & Medicaid Services (CMS), the hospital must submit data to the commissioner or the commissioner's designee according to the following schedule:

Inpatient Quality Measures

Discharge Dates	Data Submission Deadline
Third Quarter, 2010: July 1 – September 30	February 15, 2011
Fourth Quarter, 2010: October 1 – December 31	May 15, 2011
First Quarter, 2011: January 1 – March 31	August 15, 2011
Second Quarter, 2011: April 1 – June 30	November 15, 2011

Outpatient Quality Measures

Discharge Dates	Data Submission Deadline
Third Quarter, 2010: July 1 – September 30	February 1, 2011
Fourth Quarter, 2010: October 1 – December 31	May 1, 2011
First Quarter, 2011: January 1 – March 31	August 1, 2011
Second Quarter, 2011: April 1 – June 30	November 1, 2011

- i. Data collection and analysis.
 1. Hospitals must use the CMS Abstraction & Reporting Tool (CART), available from the Centers for Medicare & Medicaid Services (CMS), for the collection and analysis of the data required to calculate each measure.

-
2. Use the measurement specifications referenced in Appendix B to determine whether each patient is eligible for inclusion in the measurement calculation.
 - ii. Data validation. At their own expense, hospitals must have their data validated by a third-party vendor using protocols and standards consistent with those of the Centers for Medicare & Medicaid Services (CMS) to verify that the data is consistent and reproducible.
 - iii. Data submission. Submit data electronically to the commissioner or the commissioner's designee on a form provided by the commissioner or the commissioner's designee.
- 2. Data Submission for Appropriate Care Measures (ACM).** Each hospital must submit the data described in Appendix B required to calculate the applicable quality measures according to the following schedule:

Discharge Dates	Data Submission Deadline
Third Quarter, 2010: July 1 – September 30	February 15, 2011
Fourth Quarter, 2010: October 1 – December 31	May 15, 2011
First Quarter, 2011: January 1 – March 31	August 15, 2011
Second Quarter, 2011: April 1 – June 30	November 15, 2011

There are two ways hospitals may satisfy this requirement.

a. Each hospital may authorize a single organization to complete the following steps and submit the data on their behalf:

- i. Signs an authorization form allowing Stratis Health to release summary level ACM data, calculated from data in the CMS national data repository, to MHA for publication on the MHA website Minnesota Hospital Quality Report.

b. Each hospital may perform the following steps itself:

- i. Data collection and analysis. Identify the patients meeting the criteria for inclusion in the measure. Use the measurement specifications referenced in Appendix B to determine eligibility for each patient, only including patients that meet denominator criteria. The ACM is a pass/fail measure at the individual patient level that asks whether eligible patients have received ALL of the appropriate care for the condition they are being treated for. A patient is included if the patient meets denominator criteria for at least one of the measures in a topic. These topics include heart failure, acute myocardial infarction, and pneumonia. Within each topic, a patient must meet numerator criteria for each measure in which the patient meets denominator criteria to be considered as having appropriate care (Pass).
- ii. Data submission. Submit data electronically to the commissioner or the commissioner's designee.

-
- 3. Data Submission for Inpatient Quality Indicators (IQI), Patient Safety Indicators (PSI), and Pediatric Patient Safety Indicators (PDI), Agency for Healthcare Research and Quality.** Each hospital must submit the data described in Appendix B required to calculate the applicable quality measures according to the following schedule:

Discharge Dates	Data Submission Deadline
Third Quarter, 2010: July 1 – September 30	January 28, 2011
Fourth Quarter, 2010: October 1 – December 31	April 29, 2011
First Quarter, 2011: January 1 – March 31	July 23, 2011
Second Quarter, 2011: April 1 – June 30	October 22, 2011

There are two ways hospitals may satisfy this requirement.

a. Each hospital may authorize a single organization to complete the following steps and submit the data on their behalf:

- i. Apply Version 4.2, or the most recent version of the Quality Indicator software, available from the Agency for Healthcare Research and Quality's (AHRQ), to the hospital's discharge data. A hospital must participate in verifying the results of the analysis as needed.
- ii. Validate the data.
 1. In the event data validation procedures show that data is inaccurate, hospitals must correct the inaccurate information and resubmit corrected data. Resubmitted data must be verified for accuracy.
 2. The results of the analysis using the Quality Indicator software for each hospital must be verified for accuracy by each hospital prior to submission.
- iii. Submit the data to the commissioner or the commissioner's designee.

b. Each hospital may perform the following steps itself:

- i. Apply Version 4.2, or the most recent version of the Quality Indicator software, available from the Agency for Healthcare Research and Quality's (AHRQ), to its discharge data.
- ii. Validate the data submission through a third-party vendor.
- iii. Submit data electronically to the commissioner or the commissioner's designee on a form provided by the commissioner or the commissioner's designee.

- 4. Data Submission for Vermont Oxford Network (VON).** Each hospital with a level 3 neonatal intensive care unit (NICU) must submit the data required to calculate the applicable quality measure, as described in Appendix B, to VON.

- a. Each hospital with a level 3 NICU must submit applicable data on the specified patients to VON, for measure calculation and inclusion in VON's annual report to the hospital, according to the following VON data submission schedule:

Discharge Dates	Data Submission Deadline
All 2010 Dates of Service	June 30, 2011

- b. Each hospital with a level 3 NICU must submit summary level results electronically for the previous calendar year to the commissioner or the commissioner's designee by October 31, 2011 and every year thereafter.

- 5. Data Submission for the National Healthcare Safety Network (NHSN).** Each hospital with a neonatal and/or pediatric intensive care unit must submit the data required to calculate the applicable quality measure, as described in Appendix B, on the following schedule:

Discharge Dates	Data Submission Deadline
First Quarter, 2011: January 1 – March 31	August 15, 2011
Second Quarter, 2011: April 1 – June 30	November 15, 2011
Third Quarter, 2011: July 1 – September 30	January 15, 2012
Fourth Quarter, 2011: October 1 – December 31	April 15, 2012

- a. Each hospital with a neonatal and/or pediatric intensive care unit must electronically submit summary level data according to NHSN definitions, for each intensive care unit, to the commissioner or the commissioner's designee for measure calculation.
- 6. Health information technology (HIT) survey.** Each hospital must complete the survey available annually from the commissioner or commissioner's designee in calendar year 2010 and each subsequent year.
- 7. Patient experience of care survey.** Each hospital must complete the HCAHPS survey using a CMS-certified vendor.

III. Submission Requirements for Ambulatory Surgical Centers

1. **Registration.** Each ambulatory surgical center must register electronically and obtain a login user ID and password from the commissioner or commissioner's designee beginning March 1, 2011 and no later than April 1, 2011 and no later than April 1 of each subsequent year; and must supply data elements, including the following:
 - a. **Ambulatory Surgical Center information:** Name, mailing address, ambulatory surgical center national provider identifier (NPI);
 - b. **Contact information for individual(s) responsible for submitting data:** Company, name, title, mailing address, telephone number, fax number, e-mail address;
 - c. **Contact information for ambulatory surgical center general contact:** Name, title, mailing address, telephone number, fax number, e-mail address;
 - d. **Clinical staff information for the previous calendar year:** Name, national provider identifier (NPI), board certifications for all clinical staff that have provided health care services at the ambulatory surgical center during the previous calendar year;
 - f. **Medical group affiliation if applicable.**
2. **Data Submission.** Each ambulatory surgical center must submit the data required to calculate the applicable quality measures, as described in Appendix C, including the number of patients receiving the applicable health care services, as well as the distribution of the ambulatory surgical center's total patient population by primary payer type (private insurance, Medicare, Minnesota Health Care Programs, uninsured/self-pay) to the commissioner or the commissioner's designee. An ambulatory surgical center may work with a single subcontractor to submit the required data on their behalf. Data may be submitted beginning July 1, 2011 and no later than August 15, 2011 and beginning July 1 and no later than August 15 of each subsequent year. (NOTE: After the initial 2011 reporting year, each ASC must allocate the data required to calculate the applicable quality measures by primary payer type when the commissioner or the commissioner's designee determines the results must be risk adjusted. In 2012, based on current measures, this would apply to the hospital transfer/admission measure.)
 - a. **Prophylactic intravenous (IV) antibiotic timing; Appropriate surgical site hair removal; and Hospital transfer/admission.**

An ambulatory surgical center may satisfy the data submission requirements for these quality measures by completing steps formally outlined in the Summary Data Submission Guide.
 - i. **Patient identification methodology.** Use the measurement specifications referenced in Appendix C to determine eligibility for each patient, only including patients that meet denominator criteria for each measure in the list. Ambulatory surgical centers may submit data on a random sample of relevant patients in 2011. Ambulatory surgical centers with fewer than 60 relevant patients for each measure must submit data on all relevant patients. In subsequent years, ambulatory surgical centers with an electronic medical record in place for a full measurement period will be expected to submit data on a full population basis.

-
- ii. **Data submission template.** Use the data submission template supplied annually by the commissioner or the commissioner's designee as a data collection tool. Data elements may be either extracted from an electronic medical record system or abstracted through medical record review.
 - iii. **Data file upload.** Submit data electronically to the commissioner or the commissioner's designee.
 - iv. **Data validation.** Ambulatory surgical centers must maintain documentation for the data described in Appendix C including the methodology used to determine patients meeting the criteria for inclusion in each measure and the data submission template for purposes of data validation.
