

# 2014 Health Care Quality Report

Compare Clinic, Medical Group  
and Hospital Performance

Measuring  
and Tracking  
Health Care  
Quality  
in MN

## December 2014

MN Community Measurement (MNCM) is excited to release the 2014 *Health Care Quality Report*. Eleven years after the first edition, this annual report continues to expand and evolve. The first report featured data from just 61 medical groups on seven HEDIS quality measures. This report highlights information on 871 clinics, 183 medical groups and approximately 130 hospitals on more than 71 measures.

Health care is increasingly measured in the value that it creates for those served. For the first time, in addition to quality of care and patient experience measures, this report also includes information on Total Cost of Care.

Each year, the *Health Care Quality Report* shines a light on health care in Minnesota. We strive to provide measures that truly improve the value of care in our community. We also create new measures that seek to address complex conditions and health care issues which are meaningful for both providers and patients. This year, we expanded our focus on new patient-reported outcome and specialty care measures. We reached a new milestone with our first-ever measure evaluating the care of over one million Minnesotans. Our colorectal cancer screening measure evaluated the care of more than 1.1 million patients between ages 51 and 75 from Minnesota and neighboring communities.

We released our Total Cost of Care measure, the first standardized, repeatable measure of its kind in the nation. It includes all costs associated with treating patients, including professional, facility inpatient and outpatient, pharmacy, lab, radiology, ancillary and behavioral health services. The measure will give medical groups additional information to target unwarranted variation in care and give consumers a better understanding of their health care costs.

We also released our inaugural Health Equity of Care Report in early 2015, with 2014 report year data. The report featured health outcomes in five key areas segmented by race, Hispanic ethnicity, preferred language and country of origin. Based on data collected from patients by medical groups, it's the first comprehensive look at health disparities in Minnesota and the first time regional information has been available. This will help medical groups, policy makers, advocates and community leaders better target efforts to reduce and eliminate health inequities in our state.

These exciting accomplishments remind us that Minnesota is at the forefront of health care measurement and improvement; however, we cannot rest on our laurels. We must maintain the gains we've made while identifying the next areas of measurement and data collection that will help push our community to achieve even more.

MNCM remains committed to focusing our efforts on measures that have the greatest potential for impact, thus enhancing the benefits and reducing the burdens of reporting for medical groups. We also intend to remain a trusted source for data sharing, particularly as more stakeholders share information that can benefit and be used by the entire community.

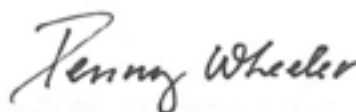

As we look ahead to 2015 and MNCM's 10th organizational anniversary, we know that our trusted record of collaborating with the community to address complicated challenges in the health care system will be more important than ever. The demand for value accountability will continue to increase the need for meaningful measures that improve the lives of those served.

We are thankful to all our stakeholders - providers and health plans, employers and consumers, community partner organizations - for continually coming together to collaborate toward our common goal of providing Minnesotans with the best care and the best experience at the most efficient cost.

We look forward to the continued partnership and the road ahead.

Jim Chase  
President, MN Community Measurement

Penny Wheeler, MD  
Board Chair, MN Community Measurement

# Introduction

The MN Community Measurement 2014 *Health Care Quality Report* compares clinic, medical group and hospital performance on quality, patient experience, cost, and health information technology measures. Quality measures range from preventive to chronic care, along with hospital care for acute and surgical needs. This year marks MNCM's 11th annual report. The report provides valid, reliable and comparable information for clinics, medical groups and hospitals to use in their efforts to improve patient care and outcomes.

MNCM began publicly reporting health care performance results in 2004 with a vision of improving health and health care in Minnesota and neighboring communities by driving change in the cost, quality and patient experience of care. That inaugural effort utilized Healthcare Effectiveness Data Information Set (HEDIS) measures, aggregating data from 10 health plans and reporting results at a medical group level.

One year later, MNCM became an independent, collaborative, non-profit organization. Our Board of Directors includes physicians; health plans, hospital and state government representatives; employers; and consumers. We continued to publicly report HEDIS measures, and in 2005 also put the results online for the first time.

As we gained momentum and experience, medical group leaders encouraged us to obtain data from the most accurate source: their own electronic health record systems. In 2007, we piloted a process to collect data directly from clinics, known as Direct Data Submission (DDS). Several clinics voluntarily participated in this pilot by submitting data directly to MNCM for the Optimal Diabetes Care measure. This process made reporting results for individual clinic sites possible. During the first year, 191 clinics were reported for the Optimal Diabetes Care measure; today, we report rates on more than 600 clinics for the Optimal Diabetes Care measure due, in part, to the state health reform law that made data submission mandatory for providers in 2010.

In recent years, we have expanded the DDS process and this report to include additional clinical measures such as Optimal Vascular Care; Depression Remission and Response at Six and 12 Months; Optimal Asthma Care; and Colorectal Cancer Screening. In 2014, we continued measure expansion to include the Maternity Care: Primary C-Section Rate; Total Knee Replacement; Total Cost of Care; Depression PHQ-9 Utilization; and Depression PHQ-9 Follow-Up at Six and 12 Months.

We appreciate the significant contributions of clinics, medical groups, health plans, hospitals and others who contribute to this report, as well as the multitude of community stakeholders who share their expertise on our committees and as sponsoring members. Achieving our mission to accelerate the improvement of health by publicly reporting health care information relies on this multi-stakeholder, collaborative effort. We continue to strive to be the trusted source for performance measurement, data sharing and public reporting in our community.

# Executive Summary

This is MNCM's 11<sup>th</sup> annual *Health Care Quality Report*. Included in this report are clinic performance results on 26 clinical quality measures, one Total Cost of Care measure, results on the Health Information Technology (HIT) Survey, plans regarding the Patient Experience of Care survey results for 2015, and hospital measures.

## Key Findings

### Clinical Measures

Two clinical measures showed noteworthy improvement in their statewide rates:

- **Optimal Asthma Care for Children and Adults** - For children, the statewide rate increased from 49 percent in 2013 to 56 percent in 2014, translating into 2,860 more children with asthma receiving optimal care. For adults, the statewide rate increased from 40 percent in 2013 to 47 percent in 2014, translating into 4,211 more adult patients with asthma receiving optimal care.

Four clinical measures showed noticeable improvement in their statewide rates:

- **Immunization for Adolescents** - The statewide rate increased from 59 percent in 2013 to 62 percent in 2014, translating into 208 more adolescents who received one dose of meningococcal vaccine and one tetanus, diphtheria toxoids and acellular pertussis vaccine (Tdap) or one tetanus, diphtheria toxoids vaccine (Td) by their 13th birthday.
- **Appropriate Treatment for Adult Bronchitis** - The statewide rate increased from 26 percent in 2013 to 29 percent in 2014, translating into 553 more adults diagnosed with acute bronchitis that did not receive antibiotic prescription (appropriate treatment is no prescription for an antibiotic).
- **PHQ-9 Follow-Up at Six Months** - The statewide rate increased from 28 percent in 2013 to 31 percent in 2014, translating into 2,807 more patients with a diagnosis of major depression or dysthymia and a PHQ-9 score greater than nine having a follow-up

PHQ-9 test at six months from the index date.

Ten other clinical measures showed small improvements in their statewide rates:

- Optimal Vascular Care
- Use of Spirometry Testing in the Assessment and Diagnosis of COPD
- Optimal Diabetes Care
- Colorectal Cancer Screening
- Appropriate Treatment for Children with URI
- Depression Response at Six Months
- Depression Remission at Six Months
- Controlling High Blood Pressure
- Depression Remission at 12 Months
- Depression Response at 12 Months

Two new clinical measures were collected and submitted using MNCM's Direct Data Submission (DDS) process. First, **Maternity Care: Primary C-Section Rate** with a statewide rate of 22 percent, meaning that 22 percent of deliveries were performed by cesarean section. The results this year show variation and room for improvement. For this measure, a lower rate is preferable.

The second new clinical measure set includes the **Total Knee Replacement (TKR) measures**. Three process measures are reported this year and are summarized in the New Measures for 2014 Reporting section. The outcome measures are slated to be publicly reported in 2015.

The **Breast Cancer Screening** measure experienced revisions to its age criterion this year. For 2014, the age criterion includes women between the ages of 50 - 74. The age criterion for previous years included ages 50 - 69. Due to this change, no trend data is available for this measure.

# Executive Summary

This was the first year of reporting statewide rates for the **PHQ-9 Follow-Up** measures at six and 12 months in this report. As stated previously, the statewide rate for PHQ-9 Follow-Up at Six Months was 31 percent. The statewide rate for PHQ-9 Follow-Up at 12 Months was 23 percent, meaning that 23 percent of patients with a diagnosis of major depression or dysthymia and an initial PHQ-9 score greater than nine had a follow-up PHQ-9 test at 12 months from the index contact date. Both measures show room for improvement.

This was also the first year of reporting statewide rates for the **PHQ-9 Utilization** measure. The statewide rate was 70 percent, meaning that 70 percent of patients with major depression or dysthymia completed a PHQ-9 test during the measurement period.

## Patient Experience of Care - Clinic

The 2014 results for the Patient Experience of Care Survey will be collected and reported at the clinic level in the third quarter of 2015.

## Patient Experience of Care - Hospital

The most current H-CAHPS® data that is publicly reported was collected from admission dates January – December 2012 and reports on 10 domains. Results for the H-CAHPS® hospital measures can be found at [MNHealthScores.org](http://MNHealthScores.org). Please also visit the Minnesota Hospital Association's Hospital Quality Report for an expanded list of H-CAHPS® measures at [mnhospitalquality.org](http://mnhospitalquality.org).

## Cost measures

A new report was published in December 2014 by MNCM that allows consumers for the first time to compare the total cost of care at medical groups across the state.

Costs from more than 1.5 million patients were included in the report, which is the nation's most comprehensive

look at the total cost of care. Information is available for 115 medical groups, representing 1,052 clinics across Minnesota and in neighboring communities on [MNHealthScores.org](http://MNHealthScores.org).

## Health Information Technology (HIT) measure

1,364 clinics in Minnesota and bordering states responded to the 2014 Health Information Technology (HIT) Ambulatory Clinic Survey. The 2014 response rate was 86 percent, compared to 80 percent in 2013 and 83 percent in 2012.

We report milestones achieved under adoption, use, and exchange at [MNHealthScores.org](http://MNHealthScores.org).

- **Adopt:** Information about a patient and the care the patient needs is recorded in an electronic health record (EHR) instead of a paper medical record.
- **Utilization:** A patient's doctor uses the EHR to order lab tests, track health problems and improve the patient's care.
- **Exchange:** A patient's information is sent and received in a secure manner between the doctors involved in the patient's care.

Ninety-one percent of clinics have an EHR installed and have it in use in all areas of their clinics. This shows expanded use of EHRs across and within clinics; in 2013, only 83 percent of clinics met this threshold, and in 2012 it was 75 percent.

The advancements of EHR utilization continue to increase over time. The most advanced phase of utilization, which includes data benchmarking and creating patient preventive exam reminders, saw the greatest reported increase from 44 percent of clinics in 2013 to 60 percent of clinics reporting in 2014.

The ability of clinics to electronically send patient care information directly to other sites of care, both in and out-of-network, increased substantially: 55 percent of clinics exchanged patient information within their network as compared to 40 percent last year; and in 2014, one-third of clinics are able to exchange patient

# Executive Summary

information with hospitals outside of their network.

The HIT Survey will be fielded again in 2015. MNCM will continue to collaborate with HIT stakeholders statewide to implement a survey that provides a comprehensive assessment of HIT adoption, utilization, and exchange as well as continue to incorporate Meaningful Use Stage 2 guidelines.

## Hospital measures

More information on hospital measures developed by the Agency for Healthcare Research and Quality (AHRQ) and Centers for Medicare and Medicaid Services (CMS), see page 143.

Results for AHRQ, CMS, and H-CAHPS hospital measures can be found at [MNHealthScores.org](http://MNHealthScores.org).

# Changes to the Report

The layout for this year's report was re-designed to be more aligned with the Institute for Healthcare Improvement's Triple Aim framework: Quality, Patient Experience and Cost. The Quality section begins with new measures. The remaining ambulatory care quality measures are categorized based on the statewide average: increases (large, moderate, and small) and decreases (large, moderate, and small). Please reference page 174 for the category definitions. The Quality section also features information on hospital quality measures. The Patient Experience section features information on both ambulatory care and hospital patient experience. The Cost section includes information on another new measure set this year: Total Cost of Care.

This report now features an indicator (\*) for the **Top 15 performers** (medical groups and clinics) for each measure. This is aligned with our consumer-focused website, [MNHealthScores.org](http://MNHealthScores.org).

Charts for clinic and medical group level results are no longer included in this report since the newly re-designed [MNHealthScores.org](http://MNHealthScores.org) provides this information in convenient, sortable tables for view and download.

There were several measures added to this year's report. Two new clinical measures were collected and submitted using MNCM's Direct Data Submission (DDS) process - Maternity Care: Primary C-Section Rate and Total Knee Replacement (3 process measures). This was the first year of reporting statewide rates for the PHQ-9 Follow-Up measures at Six and 12 Months and PHQ-9 Utilization in this report. Total Cost of Care is featured in this report for the first time.

There was one measure suppressed this year: **Cervical Cancer Screening**. This measure underwent review by the MNCM Measurement and Review Committee (MARC) in 2014 to compare the administrative method of data collection to the hybrid method. Based on the review, MARC approved the use of the hybrid method of data collection for this measure. It is the method that reflects the most accurate Cervical Cancer Screening rate for medical group public reporting. Results for this measure, using the hybrid data collection method, will be reported in 2015.

The **Breast Cancer Screening** measure experienced revisions to its age criterion this year. For 2014, the age criterion includes women between the ages of 50 - 74. The age criterion for previous years included ages 50 - 69. Due to this change, no trend data is available for this measure.

A new [MNHealthScores.org](http://MNHealthScores.org) section is included in the appendices of this report. It details the website's redesign in 2014 and provides helpful tips for comparing results from this report to our website.

# Measure Overview

The measures in this 2014 *Health Care Quality Report* were recommended by MNMCM's Measurement and Reporting Committee (MARC) and approved by our Board of Directors. We have expanded, revised, and retired measures to stay aligned with evidence-based guidelines. Measurement changes across years are reflected in **Table 1**.

**TABLE 1: PERFORMANCE MEASURES OVER THE YEARS**

Measures	Report Year											
	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014

~ Colorectal Cancer Screening (Ages 51-80)

~ Cancer Screening Combined (Breast, Cervical, Colorectal) (Ages 51-80)

&lt; In 2009 reported AHRQ measures only; in 2010 and 2011 reported AHRQ and CMS hospital measures

+ Breast Cancer Screening (Ages 50-69)

# Measure Overview

The 2014 *Health Care Quality Report* is the first to feature information on all three elements necessary to reach optimal health care performance: quality, patient experience and cost. As a result, the 2014 report is organized differently than in previous years.

The Quality section features information on **26 measures**. It begins with four new ambulatory care measures: Maternity Care: Primary C-Section Rate and three Total Knee Replacement process measures. The remaining ambulatory care quality measures are organized into the following categories based on the statewide average:

- **Increases:** Large, moderate, and small
- **Decreases:** Large, moderate, and small

Please see page 174 for category definitions.

- Two measures had **large increases** in their statewide average: Optimal Asthma Care - Children Ages 5 - 17; and Optimal Asthma Care - Adults Ages 18 - 50.
- Three measures had **moderate increases** in their statewide average: Immunizations for Adolescents; Avoidance of Antibiotics in the Treatment of Adult Bronchitis; and PHQ-9 Follow-up at Six Months.
- Twelve measures had **small increases** in their statewide average: Optimal Vascular Care; Use of Spirometry Testing in the Assessment and Diagnosis of COPD; Optimal Diabetes Care; Colorectal Cancer Screening; Appropriate Treatment for Children with Upper Respiratory Infection; PHQ-9 Utilization; PHQ-9 Follow-Up at 12 Months; Depression Remission at Six Months; Depression Response at Six Months; Controlling High Blood Pressure; Depression Remission at 12 Months; and Depression Response at 12 Months.
- Four measures had **small decreases** in their statewide average: Appropriate Testing for Children with Pharyngitis; Chlamydia Screening in Women; Follow-up Care for Children Prescribed ADHD Medication; and Childhood Immunization Status (Combo 3).

In 2014, **no measures had moderate or large decreases in statewide rates between 2013 and 2014**; therefore, those categories are not included in this report.

Two types of measures are included in this section: **Direct Data Submission (DDS)** measures and **HEDIS** measures. DDS measures can be reportable on both the clinic and medical group levels. These measures relied on data specifications published in the 2014 Direct Data Submission Guides for each applicable measure. These measures are aligned with clinical guidelines established by the Institute for Clinical Systems Improvement (ICSI). This report includes 16 DDS measures: Optimal Asthma Care - Children Ages 5 - 17; Optimal Asthma Care - Adults Ages 18 - 50; Optimal Vascular Care; Optimal Diabetes Care; Colorectal Cancer Screening; Depression Remission at Six Months; Depression Response at Six Months; PHQ-9 Follow-Up at Six Months; Depression Remission at 12 Months; Depression Response at 12 Months; PHQ-9 Follow-Up at 12 Months; PHQ-9 Utilization; Total Knee Replacement process measures; and Maternity Care: Primary C-Section Rate.

HEDIS measures use data collected from health plan claims data. Health plan data collection uses either the administrative method (claims only) or hybrid method (claims plus chart review). Measures using health plan data relied on National Committee for Quality Assurance's (NCQA) HEDIS specifications, which are also aligned with ICSI's clinical guidelines. HEDIS is a national set of standardized performance measures originally designed for the managed care industry. The measures have been adopted for use by MNCM to evaluate the performance of medical groups. MNCM reports on 10 HEDIS measures: Breast Cancer Screening; Immunization for Adolescents; Avoidance of Antibiotics in the Treatment of Adult Bronchitis; Use of Spirometry Testing in the Assessment and Diagnosis of COPD; Appropriate Treatment for Children with Upper Respiratory Infection; Controlling High Blood Pressure; Appropriate

# Measure Overview

Testing for Children with Pharyngitis; Chlamydia Screening in Women; Follow-up Care for Children Prescribed ADHD Medication; and Childhood Immunization Status (Combo 3).

The Quality section also features information on **hospital quality measures**. These measures are developed by the Agency for Healthcare Research and Quality (ARHQ) and the Centers for Medicare and Medicaid Services (CMS). Results are provided to MNCM by the Minnesota Hospital Association (MHA) for public reporting.

The **Patient Experience** section features information on both ambulatory care and hospital patient experience. The ambulatory care patient experience data utilizes the CG-CAHPS 12-month survey and is implemented throughout the state every-other-year. In 2013, MNCM published the first year of statewide patient experience survey results. The next iteration of results will occur in 2015. The hospital patient experience data utilizes the H-CAHPS survey designed for hospitals, and is reported annually. These results are also provided to MNCM by MHA for public reporting.

The **Cost** section includes information on another new measure set from MNCM this year: Total Cost of Care. There is Total Cost of Care Overall, which is also segmented by adults and pediatric patients. This measure uses data (commercial only) collected from four health plans in Minnesota: Blue Cross Blue Shield of Minnesota, HealthPartners, Medica and PreferredOne. It includes all costs associated with treating patients, including professional, facility inpatient and outpatient, pharmacy, lab, radiology, ancillary and behavioral health services.

Finally, the **Health Information Technology** section includes information on how well ambulatory care clinics have integrated electronic medical records into their practices. This information is based on an annual survey conducted by MNCM on behalf of the Minnesota Department of Health.

See the Methods appendix for more information on the methodology for each measure. In the Results by Measure section, results are listed with a description of the measure; charts, tables and figures describing the results; and a listing of performance highlights for that measure.

Please see next page.

## RESULTS BY MEASURE

# New Measures/Measures with Specification Changes for 2014 Reporting

### Section Contents

- **Breast Cancer Screening** - Measures the percentage of women ages 50-74 who had a mammogram during the measurement year or prior year.
- **Maternity Care: Primary C-Section Rate** - Measures the percentage of live, singleton, vertex position, term newborns who were delivered via cesarean section to nulliparous women (first birth).
- **Total Knee Replacement process measures** -
  - Percent of procedures with pre-operative Oxford Knee Score (OKS) tool administered
  - Percent of procedures with one year post-operative OKS tool administered
  - Percent of procedures with both pre-operative and one year post-operative OKS administered

The medical group level data for this measure is available to view on [MNHealthScores.org](http://MNHealthScores.org).

NEW MEASURES/ MEASURES WITH SPECIFICATION CHANGES FOR 2014 REPORTING

Breast Cancer Screening

This measures the percentage of women ages 50 - 74 who received a mammogram during the prior two years (the measurement year or prior year).

The statewide rate for Breast Cancer Screening is 76 percent. **Table 2** displays the details of this statewide rate.

The age criterion for this measure was revised from 50 - 69 years to 50 - 74 years this reporting year. Due to this change, no trend data is available for this measure at this time.

*Data for this measure are collected from health plan claims.*

TABLE 2: STATEWIDE RATE FOR BREAST CANCER SCREENING

	Statewide Average	95% CI	Numerator (Patients who were screened)	Denominator
Breast Cancer Screening	76.2%	76.1%-76.4%	202,009	264,994

\*Statewide Average (above) includes those patients attributed to a medical group AND those who could not be attributed to a medical group.

THERE IS NO TREND CHART SINCE MEASURE SPECIFICATIONS WERE CHANGED THIS YEAR.

## PERFORMANCE HIGHLIGHTS FOR BREAST CANCER SCREENING

# Medical Group Results

### Highest performers in 2014

Medical group results showed that an average of 82 percent of women 50-74 years of age had a mammogram. **Sacred Heart Mercy Health Care Center** set the benchmark of 96 percent. Twenty-four of 162 medical groups had rates and confidence intervals fully above the medical group average. These groups are listed below from high to low performance. An asterisk (\*) indicates a Top 15 performer for this measure.

- Sacred Heart Mercy Health Care Center\*
- Paul Larson Ob/Gyn Clinic\*
- Mn Gyn And Surgery\*
- Clinic Sofia Ob/Gyn\*
- John A. Haugen Assoc.\*
- HealthPartners Clinics\*
- Premier OB/GYN of Minnesota\*
- Obstetrics & Gynecology Associates\*
- Mayo Clinic\*
- Family Practice Medical Center Of Willmar\*
- CCMH - Montevideo Clinic\*
- Mayo Clinic Health System - Owatonna\*
- CentraCare Health System\*
- Alexandria Clinic\*
- Allina Health System\*
- Mayo Clinic Health System - Mankato
- Mayo Clinic Health System - Red Wing
- Sanford Bagley
- Affiliated Community Medical Centers
- Sanford Health - Sioux Falls Region
- Park Nicollet Health Services
- Essentia Health - East Region
- Mankato Clinic
- Fairview Medical Group

Not applicable due to measure specification changes.

### Medical group performance over time (2012-2014)

Not applicable due to measure specification changes.

Please see next page.

## NEW MEASURES/ MEASURES WITH SPECIFICATION CHANGES FOR 2014 REPORTING

## Maternity Care: Primary C-Section Rate

This measure assesses the percentage of nulliparous women with a term, singleton baby in a vertex position delivered by cesarean section between July 1, 2013 and June 30, 2014 patients who had a C-section delivery. Any clinic that is part of a medical group in which the medical group has providers who perform cesarean deliveries were eligible to report data for this measure.

The statewide rate for Maternity Care: Primary C-Section Rate was 22 percent (a lower rate is better for this measure). **Table 3** displays the details of this statewide rate. This is a first year measure so trending over time is not available.

In maternity care, patients often seek care from multiple providers across locations within a medical group. Additionally, there are some providers who provide maternity care but may not perform c-sections, and patients who require a c-section are referred to a physician who does. Previous clinic level reporting of the maternity care measure did not include the deliveries performed by providers at a site without providers who performed c-sections, and as a result, rates for the state and at the medical group level had the potential to be artificially elevated. The maternity care measure is most appropriately calculated and reported at the medical group level in order to account for these considerations.

*Data collected for this measure are submitted directly to MN CM by medical groups from electronic health records or paper-based medical charts.*

**TABLE 3: STATEWIDE RATE FOR MATERNITY CARE: PRIMARY C-SECTION RATE**

	Statewide Average	95% CI	Numerator (Patients who had a delivery via C-section)	Denominator (Deliveries)
Maternity Care: Primary C-Section Rate	22.2%	21.6%-22.8%	3,947	17,781

THERE IS NO TREND CHART BECAUSE THIS IS THE FIRST YEAR OF PUBLIC REPORTING FOR THIS MEASURE.

PERFORMANCE HIGHLIGHTS FOR MATERNITY CARE: PRIMARY C-SECTION RATE

## Medical Group Results

### Highest performers in 2014

Medical group results showed an average of 22 percent of live, singleton, vertex position, term newborns were delivered via cesarean section to nulliparous women (first birth). **Tri-County Health Care** set the benchmark of only 10 percent of women having a cesarean delivery. For this measure, a lower performance rate represents better care. There were six of 52 medical groups with rates and confidence intervals fully below the statewide average. The high-performing medical groups are listed below in order starting with the best performance. An asterisk (\*) indicates a Top 15 performer for this measure.

- Hudson Physicians - Minnesota Healthcare Network\*
- Winona Health\*
- Alexandria Clinic\*
- Lakewood Health System\*
- Essentia Health - West\*
- Park Nicollet Health Services\*

### Biggest improvement from 2013-2014

## NEW MEASURES/ MEASURES WITH SPECIFICATION CHANGES FOR 2014 REPORTING

## Total Knee Replacement (TKR)

This is the first year of public reporting for the Total Knee Replacement measure set. For patients aged 18 and older who underwent a primary or revision total knee replacement procedure during the measurement period (January 1, 2012 to December 31, 2012), several outcome measures were calculated including:

1. Average post-operative functional status at one year for patients who underwent total knee replacement as measured by the Oxford Knee Score (OKS) tool.
2. Average post-operative quality of life at one year for patients who underwent total knee replacement as measured by the EQ5D tool.

After review of pilot testing, initial results and the measure development workgroup's recommendations, the MNCM Measurement and Review Committee (MARC) approved a plan to suspend public reporting of the above outcome measures in 2014 based on low rates of patient-reported outcome tool administration. However, MARC approved publicly reporting three process measures as an interim step to promote tool administration, with the goal of eventually reporting the outcome measures as planned. The three process measures that will be publicly reported in 2014 include:

- The percentage of patients with a total knee replacement procedure who have an OKS assessment tool administered pre-operatively (within three months prior to the procedure).
- The percentage of patients with a total knee replacement procedure who have an OKS assessment tool administered one year post-operatively (nine to 15 months after the procedure).
- The percentage of patients with a total knee replacement procedure who have an OKS assessment tool administered both pre-operatively (within three months prior to the procedure) and one year post-operatively (nine to 15 months after the procedure).

See **Table 4** for statewide rates for these three process measures. The medical group level data for these three process measures are available to view on [MNHealthScores.org](http://MNHealthScores.org).

**TABLE 4: STATEWIDE RATES FOR THE TOTAL KNEE REPLACEMENT MEASURES**

	Statewide Average	95% CI	Numerator (Patients who met treatment goals)	Denominator
Number of TKR Procedures w/Pre-Op OKS	35.7%	34.8% - 36.6%	4,011	11,246
Number of TKR Procedures w/1 Yr Post-Op OKS	30.7%	29.8% - 31.6%	3,452	11,246
Number of TKR Procedures w/Pre-Op & Post-Op OKS	18.2%	17.5% - 18.9%	2,044	11,246

## PERFORMANCE HIGHLIGHTS FOR TKR - NUMBER OF TKR PROCEDURES W/PRE-OP OKS

### Medical Group Results

#### Highest performers in 2014

Medical group results showed an average of 36 percent of patients with a TKR procedure had an OKS assessment tool administered pre-operatively (within three months prior to the procedure). **Affiliated Community Medical Centers** set the benchmark of 97 percent. There were 11 of 33 medical groups with rates and confidence intervals fully above the statewide average. The high-performing medical groups are listed below in order starting with the best performance. An asterisk (\*) indicates a Top 15 performer for this measure.

- Affiliated Community Medical Centers\*
- Olmsted Medical Center\*
- The Orthopaedic & Fracture Clinic\*
- Allina Health Specialties\*

## RESULTS BY MEASURE

# Large Increase in Statewide Rate

### Section Contents

- **Optimal Asthma Care (ages 5-17 or 18-50)** - Measures the percentage of patients ages 5-17 or 18-50 with persistent asthma in the measurement period who met all three targets, including: asthma is well-controlled; patient is not at an elevated risk for exacerbation; and patient has been educated about asthma and self-management of the condition by having a written asthma management plan in the medical record.

## LARGE INCREASE IN STATEWIDE RATE

## Optimal Asthma Care

This measures the percentage of patients ages 5-17 and ages 18-50 with persistent asthma who have reached the following three targets to control their asthma:

- Evidence of well-controlled asthma determined through the use of an asthma control tool (e.g. Asthma Control Test (ACT); Childhood Asthma Control Test (C-ACT); Asthma Control Questionnaire (ACQ); and Asthma Therapy Assessment Questionnaire (ATAQ))
- Not at risk for elevated exacerbation as evidenced by patient-reported emergency department visits and hospitalizations
- Patient has been educated about his/her asthma and self-management of the condition and has received a written asthma management plan

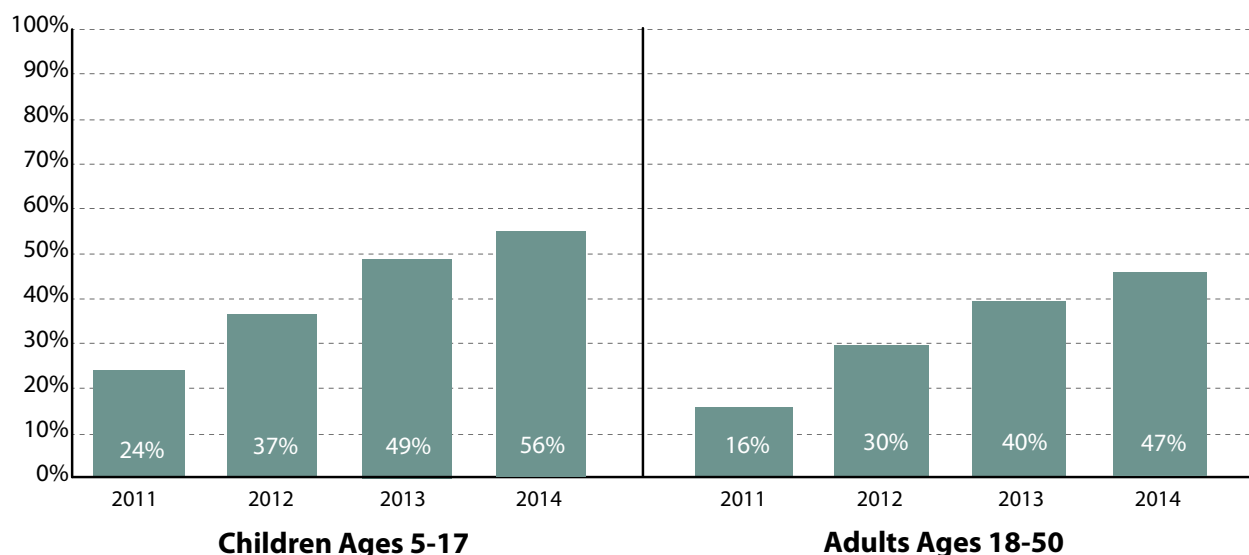

The statewide rate for Optimal Asthma Care is 56 percent for children ages 5-17 and 47 percent for adults ages 18-50. **Table 5** displays the details of this statewide rate for both populations. **Figure 1** shows the average rate for Optimal Asthma Care by age over time. The statewide rates for both patient populations have been increasing since 2011. For both populations, the statewide rate increased by seven percentage points this year. The 2014 statewide rate for children ages 5-17 is nine percentage points higher than the statewide rate for adults ages 18-50.

*Data collected for this measure are submitted directly to MNCM by medical groups and clinics from electronic health records or paper-based medical charts.*

**TABLE 5: STATEWIDE RATE FOR OPTIMAL ASTHMA CARE - CHILDREN AND ADULTS**

	Statewide Average	95% CI	Numerator (Patients who met treatment goals)	Denominator (Patients Sampled)	Total Eligible
Optimal Asthma Care - Children	56.3%	55.8%-56.7%	22,318	40,281	42,555
Optimal Asthma Care - Adults	46.8%	46.4%-47.2%	29,261	62,853	63,542

**FIGURE 1: STATEWIDE RATES FOR OPTIMAL ASTHMA CARE - CHILDREN AND ADULTS OVER TIME**

Caution is recommended when making comparisons from year to year. Annual rate differences can occur due to natural variation, changes in measurement specifications, changes in data sources and other factors.

## PERFORMANCE HIGHLIGHTS FOR OPTIMAL ASTHMA CARE - CHILDREN

## Clinic Results

## Highest performers in 2014

Clinic results showed an average of 56 percent of children ages 5-17 with asthma met all three required components in this measure. **Advancements in Allergy and Asthma Care, Ltd.** set the benchmark of 93 percent. There were 87 of 291 clinics with rates and confidence intervals fully above the statewide average. The high-performing clinics are listed below in alphabetical order under their medical group name. An asterisk (\*) indicates a Top 15 performer for this measure.

AALFA Family Clinic - MHN	• St. Paul	• Inver Grove Heights	• Lakeville

## Biggest improvement from 2013-2014

The greatest improvement since report year 2013 in Optimal Asthma Care for children ages 5-17 (clinic results) was made by **Mayo Clinic Health System Albert Lea**, whose score increased by more than 59 percentage points.

## PERFORMANCE HIGHLIGHTS FOR OPTIMAL ASTHMA CARE - CHILDREN

## Clinic Results

## Clinic performance over time (2012-2014)

We reviewed the data to identify patterns of clinic performance in clinics with three years of data beginning in 2012. We looked for patterns of consistently high performance, consistent improvement, consistent decreases, and/or relative stability. The results are below in alphabetical order under their medical group name.

### Thirty-six clinics achieved consistently high performance and above average rates over the past three years for Optimal Asthma Care - Children:

Advancements in Allergy and Asthma Care, Ltd.	• Coon Rapids	• Andover Clinic	Mayo Clinic
Allergy & Asthma Specialists, PA	• Eagan	• Children's Clinic	• Baldwin Building, Pediatrics
• Maple Grove - North	• Elk River	• Chisago Lakes Clinic	• Northeast
Memorial Medical Office Building	• Maple Grove	• Elk River Clinic	• Northwest
• Minneapolis Medical Arts Bldg	CentraCare Health	• Lakes Medical Center	Mayo Clinic Health System
• Plymouth West Health	• Plaza - Pediatrics	• Lino Lakes Clinic	• Faribault Hwy 60
Allergy & Asthma Specialty Clinic	Children's Respiratory & Critical Care Specialists	• Milaca Clinic	Pediatric Services
Allina Health Clinics	• Minneapolis	• Ridges Clinic	Southdale Allergy and Asthma Clinic LLC
• Cambridge	• Minnetonka	• RidgeValley Clinic	Southdale Pediatric Associates, Ltd
• Champlin	Essentia Health – East Region	• Rosemount Clinic	• Burnsville
	• Duluth Clinic 1st St	HealthPartners Clinics	• Edina
	Fairview Health Services	• Anoka	
		• Elk River	

### Eighty-four clinics showed consistent improvement over three years:

Affiliated Community Medical Centers	• Minneapolis	HealthPartners Central Minnesota Clinics	• Brookdale
• Litchfield Clinic (West)	• Minnetonka	Hennepin County Medical Center (HCMC) Clinics	• Burnsville
• Willmar Clinic	• St Paul	• Downtown Pediatric Clinic	• Carlson
Allergy, Asthma & Pulmonary Associates, PA	Children's Speciality Clinic	• Richfield Clinic	• Chanhassen
Allina Health Clinics	• St. Paul	• Whittier Clinic	• Eagan
• Coon Rapids	Essentia Health – West	Integrity Health Network	• Maple Grove
• Cottage Grove	• Jamestown	• St. Cloud Medical Group - South - IHN	• Plymouth
• Eagan	• Moorhead	Mayo Clinic Health System	• Prior Lake
• Elk River	• Park Rapids	• Austin	• Shakopee
• Farmington	• South University	• Mankato Specialty Clinic	• St. Louis Park 3850 Bldg.
• Forest Lake	Fairview Health Services	• Owatonna	• St. Louis Park Asthma and Allergy
• Northfield	• Lakes Medical Center	Metropolitan Pediatric Specialists	• St. Louis Park Family Medicine
• Shoreview	• Lino Lakes Clinic	• Burnsville	Sanford Health – Fargo Region
• St. Michael	• Milaca Clinic	• Edina	• Children's Southwest Clinic
• West St. Paul	• Rush City Clinic	• Shakopee	• Southpointe Clinic
• Woodbury	• Zimmerman Clinic	Midwest Allergy & Astmas	St Luke's Clinics
CentraCare Health	Grand Itasca Clinic	• Burnsville	• Allergy & Immunology
• Plaza - Pediatrics	HealthPartners Clinics	• Anoka	• Pediatrics
Central Pediatrics	• Andover	• Apple Valley	Stillwater Medical Group
• St. Paul	• Arden Hills	• Bloomington	• Curve Crest Clinic

PERFORMANCE HIGHLIGHTS FOR OPTIMAL ASTHMA CARE - CHILDREN

Clinic Results

Ten clinics showed consistent decreases over three years:

- Allergy & Asthma Specialty Clinic  
Community-University Health Care Center  
Essentia Health – East Region

  - West Duluth Clinic

Fairview Health Services

  - Brooklyn Park Clinic
  - Maple Grove Medical Center
  - Northeast Clinic
- Uptown Clinic

HealthEast Clinics

  - Maplewood Clinic

Mayo Clinic Health System

  - Faribault Hwy 60

Mendakota Pediatrics

Five clinics had rates that were relatively stable over three years:

- Allergy & Asthma Specialists, PA

  - Minneapolis Medical Arts Bldg

Mankato Clinic

  - Wickersham Campus

Winona Health
- Winona Clinic

Altru Health System

  - Lake Region
  - Main

Ninety-seven clinics did not have a discernable pattern over three years.

## PERFORMANCE HIGHLIGHTS FOR OPTIMAL ASTHMA CARE - CHILDREN

## Regional Clinic Results

## Highest performers in 2014 by region

Clinic results showed differences in performance among the different geographic regions in Minnesota. Boundaries of the nine regions were determined by synthesizing health care and geopolitical data, including from the Metropolitan Council and State of Minnesota. The results have been organized to identify areas of the state with the highest proportion of high-performing clinics. The nine regions are listed below based on their proportion of high-performing clinics from high to low. The number of high-performing clinics is shown along with the total number of clinic sites that submitted data for this measure. The high-performing clinics are listed in under their medical group name alphabetical order by region.

## West Metro - 18 out of 38 (47 percent)

## PERFORMANCE HIGHLIGHTS FOR OPTIMAL ASTHMA CARE - CHILDREN

## Medical Group Results

### Highest performers in 2014

Clinic results by medical group showed an average of 56 percent of children ages 5-17 with asthma met all three required components of this measure. **Advancements in Allergy and Asthma Care** set the benchmark of 93 percent. There were 20 of 79 medical groups with rates and confidence intervals fully above the statewide average. The high-performing medical groups are listed below from high to low performance. An asterisk (\*) indicates a Top 15 performer for this measure.

- Advancements in Allergy and Asthma Care\*
- Allergy and Asthma Specialty Clinic\*
- Southdale Pediatric Associates, Ltd\*
- Southdale Allergy & Asthma Clinic\*
- South Lake Pediatrics\*
- HealthPartners Central Minnesota Clinics\*
- AALFA Family Clinic
- CentraCare Health\*
- Children's Respiratory & Critical Care Specialists\*
- Olmsted Medical Center\*
- Allergy & Asthma Specialists, PA\*
- Pediatric Services - Children's Health Network\*
- Stillwater Medical Group\*
- Park Nicollet Health Services\*
- Fridley Children's & Teenagers' Medical Center - Children's Health Network
- Allina Health Clinics\*
- Mayo Clinic
- Fairview Health Services\*
- HealthPartners Clinics
- Mankato Clinic, Ltd.

### Biggest improvement from 2013–2014

The greatest improvement since report year 2013 in Optimal Asthma Care for children ages 5-17 (medical group results) was made by **Allergy, Asthma, & Immunology Clinic**, whose score increased by more than 46 percentage points.

## PERFORMANCE HIGHLIGHTS FOR OPTIMAL ASTHMA CARE - CHILDREN

# Medical Group Results

### Medical group performance over time (2012-2014)

We reviewed the data to identify patterns of performance in medical groups with three years of data beginning in 2012. We looked for patterns of consistently high performance, consistent improvement, consistent decreases and/or relative stability. The results are below in alphabetical order.

Eleven medical groups achieved consistently high performance and above average rates over the past three years for Optimal Asthma Care - Children:

- Advancements in Allergy and Asthma Care
- Allergy & Asthma Specialists, PA
- Allergy and Asthma Specialty Clinic
- Allina Health Clinics
- CentraCare Health
- Children's Respiratory & Critical Care Specialists
- Fairview Health Services
- Mayo Clinic
- Pediatric Services - Children's Health Network
- Southdale Allergy & Asthma Clinic
- Southdale Pediatric Associates, Ltd

Twenty-nine medical groups showed consistent improvement over three years:

- Affiliated Community Medical Centers
- Allergy, Asthma & Pulmonary Associates, PA
- Allina Health Clinics
- CentraCare Health
- Children's Hospitals and Clinics of Minnesota
- Children's Respiratory & Critical Care Specialists
- Essentia Health - Central Region
- Essentia Health - West
- Essentia Health St. Mary's
- Fairview Mesaba Clinics
- FamilyHealth Medical Clinics
- Grand Itasca Clinic
- HealthPartners Central Minnesota Clinics
- HealthPartners Clinics
- Hennepin County Medical Center (HCMC) Clinics
- Integrity Health Network
- Mankato Clinic, Ltd.
- Mayo Clinic Health System
- Midwest Ear, Nose & Throat Specialists
- Multicare Associates
- Native American Community Clinic
- North Memorial
- Olmsted Medical Center
- Park Nicollet Health Services
- Sanford Health - Fargo Region
- St. Luke's Clinics
- Stillwater Medical Group
- United Family Medicine
- University of Minnesota Physicians

Four medical groups showed consistent decreases over three years:

- Allergy and Asthma Specialty Clinic
- Community University Health Care Center
- Entira Family Clinics (formerly Family Health Services MN)
- Mendakota Pediatrics Ltd

Five medical groups had rates that were relatively stable over three years:

- Altru Health System
- North Clinic
- RiverView Health
- Riverwood Healthcare Center
- Winona Health

Twenty-nine medical groups did not have a discernable pattern over three years.

## PERFORMANCE HIGHLIGHTS FOR OPTIMAL ASTHMA CARE - ADULTS

## Clinic Results

## Highest performers in 2014

Clinic results showed an average of 47 percent of adults ages 18-50 with asthma met all three required components in this measure. **Allergy & Asthma Specialty Clinic** set the benchmark of 89 percent. There were 150 of 415 clinics with rates and confidence intervals fully above the statewide average. The high-performing clinics are listed below in alphabetical order under their medical group name. An asterisk (\*) indicates a Top 15 performer for this measure.

<p>AALFA Family Clinic - MHN Advancements in Allergy and Asthma Care, Ltd.* Allergy &amp; Asthma Specialists, PA</p> <ul style="list-style-type: none"> <li>• Maple Grove - N. ## PERFORMANCE HIGHLIGHTS FOR OPTIMAL ASTHMA CARE - ADULTS

## Clinic Results

## Biggest improvement over time (2013-2014)

The greatest improvement since report year 2013 in Optimal Asthma Care for adults ages 18-50 (clinic results) was made by **Mayo Clinic Health System St. Peter**, whose score increased by more than 63 percentage points.

## Clinic performance over time (2012-2014)

We reviewed the data to identify patterns of clinic performance in clinics with three years of data beginning in 2012. We looked for patterns of consistently high performance, consistent improvement, consistent decreases and/or relative stability. The clinic results are below in alphabetical order under their medical group name.

## Seventy-seven clinics achieved consistently high performance and above average rates over the past three years for Optimal Asthma Care - Adults:

Advancements in Allergy and Asthma Care, Ltd.	• Nicollet Mall	• Duluth Clinic 1st St	• Oxboro Clinic
Allergy & Asthma Specialists, PA	• Northfield	Fairview Health Services	• Princeton Clinic
• Maple Grove - N. Memorial Medical Office Bldg	• Plymouth	• Andover Clinic	• Ridges Clinic
• Mpls Medical Arts Bldg	• Ramsey	• Bass Lake Clinic	• RidgeValley Clinic
• Plymouth West Health	• Richfield	• Blaine Clinic	• Rogers Clinic
Allergy & Asthma Specialty Clinic	• Shakopee	• CedarRidge Clinic	• Rosemount Clinic
Allina Health Clinics	• Shoreview	• Chisago Lakes Clinic	• Savage Clinic
• Blaine	• West St. Paul	• Columbia Heights Clinic	• Uptown Clinic
• Brooklyn Park	CentraCare Health	• Crosstown Clinic	• Zimmerman Clinic
• Buffalo	• Becker	• Eagan Clinic	HealthPartners Clinics
• Cambridge	• Northway	• EdenCenter Clinic	• Elk River
• Champlin	• St. Joseph	• Elk River Clinic	• Lino Lakes
• Chaska	• Plaza - Pediatrics	• Farmington Clinic	• Roseville
• Cokato	• Plaza - Family Medicine	• Fridley Clinic	HealthPartners Central MN Clinics
• Coon Rapids	• Plaza - Internal Medicine	• Hiawatha Clinic	Mankato Clinic
• Cottage Grove	Children's Resp. & Critical Care Sp.	• Highland Park Clinic	• Wickersham Campus
• Dean Lakes	• Minneapolis	• Hugo Clinic	Southdale Allergy & Asthma CI LLC
• Farmington	• Minnetonka	• Lakes Medical Center	Southdale Pediatric Associates, Ltd
• First Street	Entira Family Clinics	• Lakeville Clinic	• Burnsville
• Forest Lake	• Inver Grove Heights	• Maple Grove Medical Center	• Edina
• Maple Grove	• White Bear Lk/Banning Ave	• Milaca Clinic	
	Essentia Health – East Region	• North Branch Clinic	
	• Aurora Clinic	• Northeast Clinic	

## One hundred and twenty-one clinics showed consistent improvement over three years:

AALFA Family Clinic - MHN	• Coon Rapids	• Abbott Northwestern General	Essentia Health – East Region
Affiliated Community Medical Centers	• Dean Lakes	Medicine Associates - Edina	• Spooner Clinic
• Litchfield Clinic (East)	• Edina	• New Ulm Medical Center	• Virginia Clinic
• Litchfield Clinic (West)	• Farmington	CentraCare Health	Essentia Health – West
• New London Clinic	• Isles	• Plaza - Internal Medicine	• Casselton
• Redwood Falls Clinic	• Nicollet Mall	Children's Respiratory & Critical Care Specialists	• Jamestown
• Willmar Clinic	• Nininger Road	• Minneapolis	• Moorhead
Allergy, Asthma & Pulmonary Associates, PA	• Northfield	• Minnetonka	• South University
Allina Health Clinics	• Richfield	• St Paul	• West Acres
• Annandale	• St. Michael	Entira Family Clinics	• West Fargo
• Blaine	• United Medical Specialties	• Vadnais Heights	• Park Rapids
• Buffalo	• Uptown	• White Bear Lake/Banning Ave	Essentia Health St. Mary's
• Cokato	• West St. Paul	Essentia Health – Central Region	• Innovis Health Clinic - Detroit Lakes
	• Woodbury	• St. Joseph's - Brainerd Clinic	
	Allina Health Specialties		

## PERFORMANCE HIGHLIGHTS FOR OPTIMAL ASTHMA CARE - ADULTS

### Clinic Results

#### Clinics that showed consistent improvement over three years (cont.)

Fairview Health Services	• St Paul	• Blaine Medical Center	• Shakopee
• CedarRidge Clinic	• West	North Memorial	• Shorewood
• Fridley Clinic	• Woodbury	• Elk River Physicians	• St. Louis Park Asthma and Allergy
• Lakes Medical Center	HealthPartners Central MN Clinics	NorthPoint Health & Wellness Ctr	• St. Louis Park Family Medicine
• Milaca Clinic	Hennepin Cty Med. Ctr (HCMC) Cl.	Northwest Family Physicians	• St. Louis Park IM
FirstLight Health System	• Richfield Clinic	• Plymouth	• Wayzata
• Mora	• Whittier Clinic	Olmsted Medical Center	RRHS dba Fairview Mesaba Clinic
France Ave Family Physicians - MHN	Mankato Clinic	• Byron Clinic	• Hibbing
HealthPartners Clinics	• Daniel's Health Center	• Rochester Northwest	Sanford Bagley
• Andover	• Main Street	• Rochester Southeast	• Sanford Bagley Clinic
• Anoka	• North Mankato	Park Nicollet Health Services	Southside Medical Clinic
• Apple Valley	• Wickersham Campus	• Bloomington	St Luke's Clinics
• Arden Hills	Mayo Clinic	• Brookdale	• Allergy & Immunology
• Bloomington	• Baldwin Building, FM	• Burnsville	• Denfeld
• Brooklyn Center	Mayo Clinic Health System	• Carlson	• Internal Medicine Associates
• Como	• Albert Lea	• Chanhassen	• P.S. Rudie Medical Clinic
• Coon Rapids	• Lake City	• Creekside	• Pulmonology
• Eagan	• Mankato Eastridge	• Eagan	Stillwater Medical Group
• Elk River	• Mankato Northridge	• Golden Valley	• Curve Crest Clinic
• Inver Grove Heights	• Mankato Specialty Clinic	• Maple Grove	United Family Medicine
• Lino Lakes	• St. Peter	• Minneapolis	University of Minnesota Physicians
• Maplewood	Midwest Allergy & Asthmas	• Plymouth	• Bethesda Clinic
• Riverside	• Burnsville	• Prairie Center	• Broadway Family Medicine
• Roseville	Multicare Associates	• Prior Lake	

#### Nine clinics showed consistent decreases over three years:

Entira Family Clinics	Fairview Health Services	Minnesota Lung Center/Minnesota Sleep Institute
• Como/Roseville	• EdenCenter Clinic	• Minneapolis
• Highland	• Rosemount Clinic	
• Maplewood/Battle Creek	HealthEast Clinics	
Essentia Health – East Region	• Oakdale	
• Lakeside Clinic	• Woodbury Clinic	

#### Twenty-nine clinics had rates that were relatively stable over three years.

Affiliated Community Medical Centers	HealthPartners Clinics	Riverwood Healthcare Center
• Granite Falls Clinic	• Midway	• Aitkin Clinic
Altru Health System	Lakewood Health System	• McGregor Clinic
• Family Medicine Center	• Staples Clinic	Sanford Health – Fargo Region
• Grand Forks Family Medicine Residency	North Clinic	• Wahpeton Clinic
• Lake Region	• Maple Grove Office	Sawtooth Mountain Clinic, Inc
• Main	• Oakdale Office in Robbinsdale	Southdale Pediatric Associates, Ltd

• Clinic Services	• Chanhassen Clinic	• Winona Clinic
Fairview Health Services	• Delano Clinic	
• Rush City Clinic	• Excelsior Clinic	
Family Practice Medical Center of Willmar	• Westonka Clinic	

One hundred and fifty-three clinics did not have a discernable pattern over three years.

## PERFORMANCE HIGHLIGHTS FOR OPTIMAL ASTHMA CARE - ADULTS

## Regional Clinic Results

## Highest performers in 2014 by region

Clinic results showed differences in performance among the different geographic regions in Minnesota. Boundaries of the nine regions were determined by synthesizing health care and geopolitical data, including from the Metropolitan Council and State of Minnesota. The results have been organized to identify areas of the state with the highest proportion of high-performing clinics. The nine regions are listed below based on their proportion of high-performing clinics from high to low. The number of high-performing clinics is shown along with the total number of clinic sites that submitted data for this measure. The high-performing clinics are listed under their medical group name in alphabetical order by region.

## PERFORMANCE HIGHLIGHTS FOR OPTIMAL ASTHAMA CARE - ADULTS

## Medical Group Results

### Highest performers in 2014

Clinic results by medical group showed an average of 47 percent of adults ages 18-50 with asthma met all three required components of this measure. **Advancements in Allergy and Asthma Care** set the benchmark of 93 percent. There were 21 of 97 medical groups with rates and confidence intervals fully above the statewide average. The high-performing medical groups are listed below from high to low performance. An asterisk (\*) indicates a Top 15 performer for this measure.

- Allergy and Asthma Specialty Clinic\*
- Advancements in Allergy and Asthma Care\*
- Southdale Allergy & Asthma Clinic\*
- Children's Respiratory & Critical Care Specialists\*
- Southdale Pediatric Associates, Ltd\*
- HealthPartners Central Minnesota Clinics\*
- AALFA Family Clinic\*
- Allina Health Clinics\*
- South Lake Pediatrics\*
- Allergy & Asthma Specialists, PA\*
- CentraCare Health\*

- Essentia Health - Central Region
- HealthPartners Clinics
- Essentia Health - East Region

### Biggest improvement from 2013–2014

The greatest improvement since report year 2013 in Optimal Asthma Care for adults ages 18-50 (medical group results) was made by **Allergy, Asthma, & Immunology Clinic**, whose score increased by more than 31 percentage points.

## PERFORMANCE HIGHLIGHTS FOR OPTIMAL ASTHMA CARE - ADULTS

# Medical Group Results

### Medical group performance over time (2012-2014)

We reviewed the data to identify patterns of performance in medical groups with three years of data beginning in 2012. We looked for patterns of consistently high performance, consistent improvement, consistent decreases and/or relative stability. The results are below in alphabetical order.

Eleven medical groups achieved consistently high performance and above average rates over the past three years for Optimal Asthma Care - Adults:

- Advancements in Allergy and Asthma Care
- Allergy & Asthma Specialists, PA
- Allergy and Asthma Specialty Clinic
- Allina Health Clinics
- CentraCare Health
- Children's Respiratory & Critical Care Specialists
- Essentia Health - East Region
- Fairview Health Services
- HealthPartners Central Minnesota Clinics
- Southdale Allergy & Asthma Clinic
- Southdale Pediatric Associates, Ltd

Twenty-nine medical groups showed consistent improvement over three years:

- AALFA Family Clinic
- Affiliated Community Medical Centers
- Allergy, Asthma & Pulmonary Associates, PA
- Allina Health Clinics
- Allina Health Specialties
- CentraCare Health
- Children's Respiratory & Critical Care Specialists
- Essentia Health - Central Region
- Essentia Health - West
- Essentia Health St. Mary's
- Fairview Mesaba Clinics
- FirstLight Health System
- France Avenue Family Physicians - Minnesota Healthcare Network
- HealthPartners Central Minnesota Clinics
- HealthPartners Clinics
- Mankato Clinic, Ltd.
- Mayo Clinic Health System
- Midwest Ear, Nose & Throat Specialists
- Multicare Associates
- NorthPoint Health & Wellness Center
- Olmsted Medical Center
- Park Nicollet Health Services
- Sanford Bagley
- Sanford Health - Fargo Region
- Southside Community Health Services
- St. Luke's Clinics
- Stillwater Medical Group
- United Family Medicine
- University of Minnesota Physicians

One medical group showed a consistent decrease over three years:

- Minnesota Lung Center/Minnesota Sleep Institute

Thirteen medical groups had rates that were relatively stable over three years:

- Allergy & Asthma Specialists, PA
- Altru Health System
- Apple Valley Medical Clinic
- Avera Medical Group
- Cuyuna Regional Medical Center
- Entira Family Clinics
- Essentia Health - East Region
- Family Practice Medical Center of Willmar
- North Clinic
- Ridgeview Clinics
- Riverwood Healthcare Center
- Sawtooth Mountain Clinic
- Winona Health

Thirty-two medical groups did not have a discernable pattern over three years.

Please see next page.

## RESULTS BY MEASURE

# Moderate Increase in Statewide Rate

### Section Contents

- **Immunizations for Adolescents** - Measures the percentage of 13 year olds who had received one dose of meningococcal vaccine and one tetanus, diphtheria toxoids and acellular pertussis vaccine (Tdap) or one tetanus, diphtheria toxoids vaccine (Td) by their 13<sup>th</sup> birthday.
- **Avoidance of Antibiotic Treatment in Adults with Acute Bronchitis** - Measures the percentage of adults 18-64 years of age with a diagnosis of acute bronchitis who were not dispensed an antibiotic prescription. A higher rate represents better performance.

## MODERATE INCREASE IN STATEWIDE RATE

## Immunizations for Adolescents

This measures the percentage of 13 year olds who had received one dose of meningococcal vaccine and one tetanus, diphtheria toxoids and acellular pertussis vaccine (Tdap) or one tetanus, diphtheria toxoids vaccine (Td) by their thirteenth birthday.

The statewide rate for Immunizations for Adolescents is 62 percent. **Table 6** displays the details of the 2014 rate. **Figure 2** shows the average rate for this measure over time. The statewide rate has increased by nine percentage points since 2012. An increase of three percentage points was seen between 2013 and 2014.

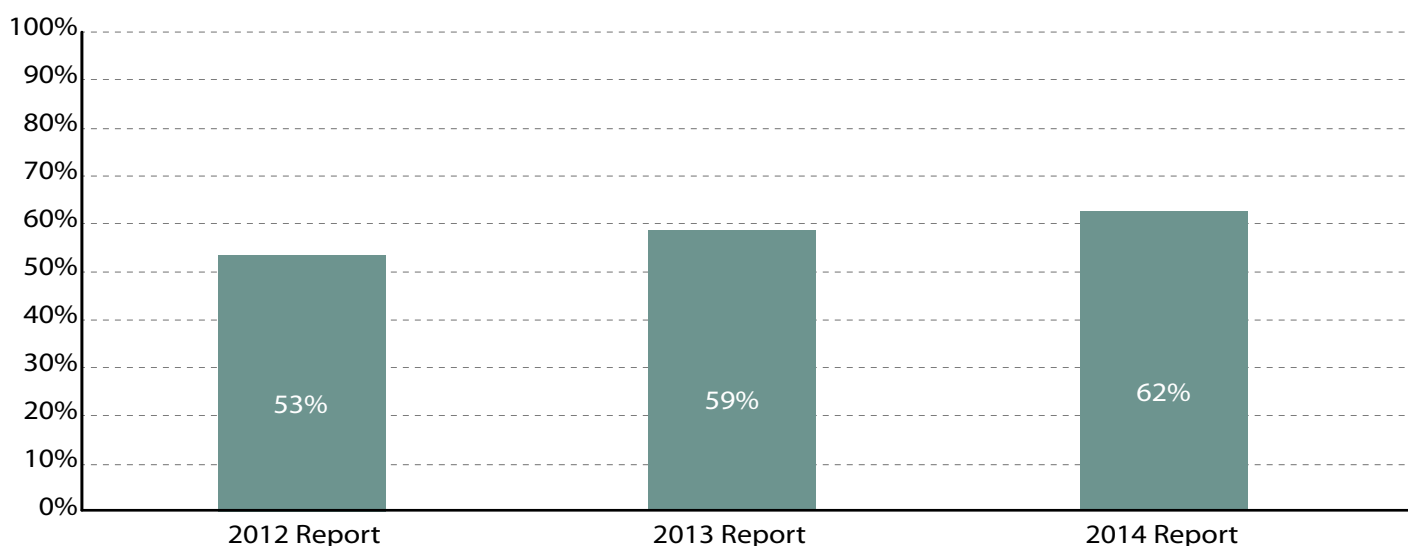

*Data for this measure are collected from health plan claims, the Minnesota Immunization Information Connection registry (MIIC) and medical record review.*

**TABLE 6: STATEWIDE RATE FOR IMMUNIZATIONS FOR ADOLESCENTS\***

	Statewide Average (Weighted)	95% CI	Numerator (Patients who met treatment goals)	Denominator (Patients Sampled)	Total Eligible
Immunizations for Adolescents	62.0%	60.8%-63.1%	3,866	6,492	28,357

\*Statewide Average (above) includes those patients attributed to a medical group AND those who could not be attributed to a medical group.

**FIGURE 2: STATEWIDE RATES FOR IMMUNIZATIONS FOR ADOLESCENTS OVER TIME**

Caution is recommended when making comparisons from year to year. Annual rate differences can occur due to natural variation, changes in measurement specifications, changes in data sources and other factors.

## PERFORMANCE HIGHLIGHTS FOR IMMUNIZATIONS FOR ADOLESCENTS

# Medical Group Results

### Highest performers in 2014

Medical group results showed an average of 66 percent of 13 year olds were up-to-date with all recommended immunizations by their thirteenth birthday. **Children's Clinic Network** set the benchmark of 92 percent. Fourteen out of 36 medical groups had rates and confidence intervals fully above the medical group average. These groups are listed below from high to low performance. An asterisk (\*) indicates a Top 15 performer for this measure.

- Children's Clinic Network\*
- South Lake Pediatrics - Children's Health Network\*
- Southdale Pediatric Associates Ltd\*
- Central Pediatrics\*
- Stillwater Medical Group\*
- Pediatric And Young Adult Medicine - Children's Health Network\*
- St. Cloud Medical Group - IHN\*
- Mayo Clinic\*
- HealthEast\*
- Hennepin Faculty Associates & HCMC Clinics\*
- Essentia Health - East Region\*
- University of Minnesota Physicians\*
- HealthPartners Clinics
- Park Nicollet Health Services

### Biggest improvement from 2013–2014

The greatest improvement since report year 2013 in Immunization for Adolescents (medical group results) was made by **Lakeview Clinic, Ltd.**, whose score increased by more than 26 percentage points.

## PERFORMANCE HIGHLIGHTS FOR IMMUNIZATIONS FOR ADOLESCENTS

# Medical Group Results

### Medical group performance over time (2012-2014)

We reviewed the data to identify patterns of medical group performance in medical groups with three years of data beginning in 2012. We looked for patterns of consistently high performance, consistent improvement, consistent decreases and/or relative stability. The results are below in alphabetical order.

One medical group achieved consistently high performance and above average rates over the past three years for Immunizations for Adolescents:

- HealthPartners Clinics

Two medical groups showed consistent improvement over three years:

- HealthPartners Clinics
- Essentia Health - East Region

One medical group showed a consistent decrease over three years:

- CentraCare Health

There were no medical groups with rates that were relatively stable over three years.

Six medical groups did not have a discernable pattern over three years.

Please see next page.

## MODERATE INCREASE IN STATEWIDE RATE

## Avoidance of Antibiotics in the Treatment of Adult Bronchitis

This measures the percentage of adults ages 18–64 with a diagnosis of acute bronchitis who were not dispensed an antibiotic prescription. A higher rate indicates appropriate treatment of adults with bronchitis (i.e., the proportion for whom antibiotics were not prescribed).

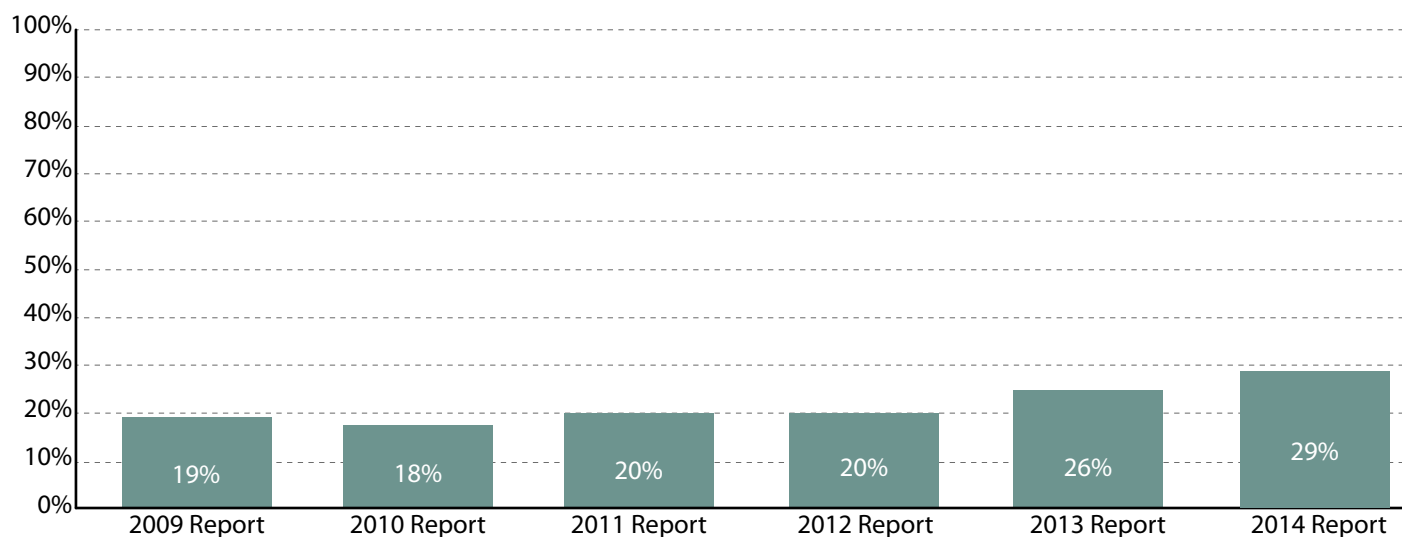

The statewide rate for Avoidance of Antibiotics in the Treatment of Adult Bronchitis is 29 percent. **Table 7** displays the details of the 2014 rate. **Figure 3** displays the statewide rates over time. The rate has increased since 2011. This year showed the largest improvement for this measure over time.

*Data collected for this measure are from health plan data claims.*

**TABLE 7: STATEWIDE RATE FOR AVOIDANCE OF ANTIBIOTICS IN THE TREATMENT OF ADULT BRONCHITIS**

	Statewide Average	95% CI	Numerator (Patients who did not receive an antibiotic)	Denominator
Avoidance of Antibiotics in the Treatment of Adult Bronchitis	28.8%	28.1%-29.5%	4,967	17,266

**FIGURE 3: STATEWIDE RATES FOR AVOIDANCE OF ANTIBIOTICS IN THE TREATMENT OF ADULT BRONCHITIS OVER TIME**

Caution is recommended when making comparisons from year to year. Annual rate differences can occur due to natural variation, changes in measurement specifications, changes in data sources and other factors.

## PERFORMANCE HIGHLIGHTS FOR AVOIDANCE OF ANTIBIOTICS IN THE TREATMENT OF ADULT BRONCHITIS

### Medical Group Results

#### Highest performers in 2014

Medical group results showed an average of 29 percent of adults ages 18-64 who were diagnosed with acute bronchitis were appropriately treated and not prescribed an antibiotic. **Target Clinic** set the benchmark of 92 percent. Eight of 68 medical groups with rates and confidence intervals fully above the medical group average. These groups are listed below from high to low performance. An asterisk (\*) indicates a Top 15 performer for this measure.

- Target Clinic\*
- MinuteClinic\*
- HealthPartners Clinics\*
- Express Healthcare\*
- St. Croix Regional Medical Center\*
- Hennepin Faculty Associates & HCMC Clinics\*
- Familyhealth Medical Clinics\*
- Allina Health System\*

#### Biggest improvement from 2013–2014

The greatest improvement since report year 2013 in Avoidance of Antibiotics in the Treatment of Adult Bronchitis (medical group results) was made by **HealthPartners Clinics**, whose score increased by more than 18 percentage points.

## PERFORMANCE HIGHLIGHTS FOR AVOIDANCE OF ANTIBIOTICS IN THE TREATMENT OF ADULT BRONCHITIS

# Medical Group Results

### Medical group performance over time (2012-2014)

We reviewed the data to identify patterns of medical group performance in medical groups with three years of data beginning in 2012. We looked for patterns of consistently high performance, consistent improvement, consistent decreases and/or relative stability. The results are below in alphabetical order.

Four medical groups achieved consistently high performance and above average rates over the past three years for Avoidance of Antibiotics in the Treatment of Adult Bronchitis:

- Express Healthcare
- HealthPartners Clinics
- MinuteClinic
- Target Clinic

Twelve medical groups showed consistent improvement over three years:

- Allina Health System
- Express Healthcare
- Familyhealth Medical Clinics
- HealthPartners Clinics
- Hutchinson Medical Center
- MinuteClinic
- Park Nicollet Health Services
- Physicians Urgent Care Professional
- Sanford Health - Sioux Falls Region
- Sanford Health Fargo
- St. Luke's Clinics
- Stillwater Medical Group

One medical group showed a consistent decrease over three years:

- Fairview Mesaba Clinics

Five medical groups had rates that were relatively stable over three years:

- 7 Day Clinic
- Entira Family Clinics
- Grand Itasca Clinic
- HealthEast
- Target Clinic

Thirty-seven medical groups did not have a discernable pattern over three years.

Please see next page.

## RESULTS BY MEASURE

# Small Increase in Statewide Rate

### Section Contents

- **Optimal Vascular Care** - Measures the percentage of patients with vascular disease ages 18-75 who reached all four treatment goals to reduce modifiable risk factors. The treatment goals include blood pressure less than 140/90 mmHg, LDL-C less than 100 mg/dl, daily aspirin use and documented tobacco-free status.
- **Use of Spirometry Testing in the Assessment and Diagnosis of COPD** – Measures the percentage of patients 40 years of age and older with a new diagnosis or newly active chronic obstructive pulmonary disease (COPD) who received appropriate spirometry testing to confirm the diagnosis.
- **Optimal Diabetes Care** – Measures the percentage of patients with diabetes (Types 1 and 2) ages 18-75 who reached all five treatment goals to reduce the risk of cardiovascular diseases. The treatment goals include hemoglobin A1c (HbA1c) less than eight, blood pressure less than 140/90 mmHg, LDL-C less than 100 mg/dl, daily aspirin use for patients with a co-morbidity of Ischemic Vascular Disease (IVD) unless contraindicated, and documented tobacco-free status.
- **Colorectal Cancer Screening** – Measures the percentage of adults ages 51-75 who were up to date with appropriate colorectal cancer screening exams. Appropriate exams include colonoscopy, sigmoidoscopy, or fecal blood tests.
- **Appropriate Treatment for Children with Upper Respiratory Infection (URI)** – Measures the percentage of children ages three months to 18 years of age with a diagnosis of URI who were not given an antibiotic prescription within three days of the episode period (July 1 of prior year to June 30 of measurement year). A higher rate represents better performance.
- **PHQ-9 Utilization** - Based on the denominator of patients age 18 and older with major depression or dysthymia and initial PHQ-9 score is greater than nine, this measures the percent of patients who had a PHQ-9 during the measurement period.
- **Depression Remission at Six Months** – Based on the denominator of patients age 18 and older with major depression or dysthymia and initial PHQ-9 score is greater than nine, this measures the percent of patients whose six month PHQ-9 score is less than five. This is the definition of remission.
- **Depression Response at Six Months** – Based on the denominator of patients age 18 and older with major depression or dysthymia and initial PHQ-9 score is greater than nine, this measures the percent of patients whose PHQ-9 score at six months decreased at least 50 percent from their initial PHQ-9 score.
- **PHQ-9 Follow-up at Six Months** - Based on the denominator of patients age 18 and older with major depression or dysthymia and initial PHQ-9 score is greater than nine, this measures the percent of patients who had a follow-up PHQ-9 test at six months from the index contact date. (Grouped together with the depression six month measures)
- **Controlling High Blood Pressure** – Measures the percentage of patients ages 18-85 with a diagnosis of hypertension whose blood pressure was adequately controlled at less than 140/90 mmHg during the measurement year. The representative blood pressure is the most recent blood pressure reading during the measurement year (as long as the reading occurred after the diagnosis of hypertension was made).

## RESULTS BY MEASURE

# Small Increase in Statewide Rate

### Section Contents (cont.)

- **Depression Remission at 12 Months** – Based on the denominator of patients age 18 and older with major depression or dysthymia and initial PHQ-9 score is greater than nine, this measures the percent of patients whose 12 month PHQ-9 score is less than five. This is the definition of remission.
- **Depression Response at 12 Months** - Based on the denominator of patients age 18 and older with major depression or dysthymia and initial PHQ-9 score is greater than nine, this measures the percent of patients whose PHQ-9 score at 12 months decreased at least 50 percent from their initial PHQ-9 score.
- **PHQ-9 Follow-up at 12 Months** - Based on the denominator of patients age 18 and older with major depression or dysthymia and initial PHQ-9 score is greater than nine, this measures the percent of patients who had a follow-up PHQ-9 test at 12 months from the index contact date.

## SMALL INCREASE IN STATEWIDE RATE

## Optimal Vascular Care

This measures the percentage of patients ages 18-75 with vascular disease who reached these four treatment goals to reduce the risk of cardiovascular disease:

- Blood pressure less than 140/90 mmHg
- LDL-C less than 100 mg/dl
- Daily aspirin use
- Documented tobacco-free status

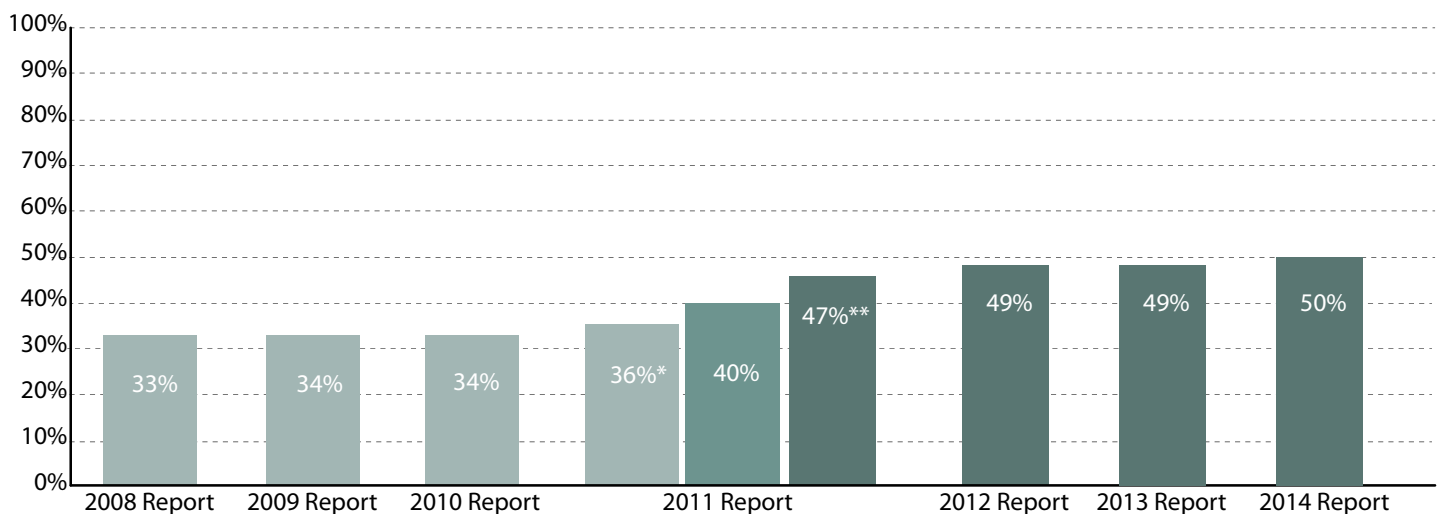

*Credit is given for achieving this composite rate when all four measure components are met. Data collected for this measure are submitted directly to MNMCM by medical groups/clinics from electronic health records or paper-based medical charts.*

The statewide rate for Optimal Vascular Care is 50 percent. **Table 8** displays the details of this statewide rate. **Figure 4** displays the statewide rates over time. The statewide rate has stayed relatively stable since 2012, but increased one percentage point this year.

TABLE 8: STATEWIDE RATE FOR OPTIMAL VASCULAR CARE

	Statewide Average (Weighted)	95% CI	Numerator (Patients who met treatment goals)	Denominator (Patients Sampled)	Total Eligible
Optimal Vascular Care	50.0%	49.7%-50.3%	49,408	98,803	99,550

FIGURE 4: STATEWIDE RATES FOR OPTIMAL VASCULAR CARE OVER TIME

Caution is recommended when making comparisons from year to year. Annual rate differences can occur due to natural variation, changes in measurement specifications, changes in data sources and other factors.

\* MNMCM was able to recast the data for report year 2011 to reflect the former Blood Pressure target of <130/80 for all patients to show trending for report years 2008, 2009, 2010 and 2011.

\*\* MNMCM was able to recast the data for report year 2011 to reflect the current Blood Pressure target of <140/90 for all patients to show trending for report years 2011 and 2012.

## PERFORMANCE HIGHLIGHTS FOR OPTIMAL VASCULAR CARE

## Clinic Results

## Highest performers in 2014

Clinic results showed an average of 50 percent of patients with vascular disease met all four required components in this measure. **Catalyst Medical Clinic** set the benchmark of 68 percent. There were 120 of 481 clinics with rates and confidence intervals fully above the statewide average. The high-performing clinics are listed below in alphabetical order under their medical group name. An asterisk (\*) indicates a Top 15 performer for this measure.

## PERFORMANCE HIGHLIGHTS FOR OPTIMAL VASCULAR CARE

### Clinic Results

#### Fifty-seven clinics showed consistent improvement over three years:

Affiliated Community Medical Ctrs	Hermantown Clinic	Regions Specialty Ctr	Parkway Family Physicians
• Litchfield Clinic (East)	• St. Mary's - Superior Clinic	Integrity Health Network	River Falls Medical Clinic and
Albany Medical Center	Essentia Health – Central Region	• Raiter Clinic – IHN	Minnesota Health Network
Allina Health Clinics	• St. Joseph's - Brainerd Clinic	• SCMG - Clearwater - IHN	• River Falls
• Richfield	Essentia Health St. Mary's	LakeWood Health Center Clinic	Sanford Health – Fargo Region
• Uptown	• Innovis Health Clinic - Detroit	Mankato Clinic, Ltd.	• Detroit Lakes Clinic
Allina Health Specialties	Lakes	• Daniel's Health Center	• East Grand Forks Clinic
• Mpls Heart Inst. Plymouth	Fairview Health Services	Mayo Clinic Health System	• Perham Clinic
Altru Health System	• Blaine Clinic	• New Prague	Sanford Hlth – Sioux Falls Region
• Crookston	• Elk River Clinic	• Waseca	• Adrian Clinic
• Main	• Hugo Clinic	Neighborhood HealthSource	• Canby Clinic
• Warroad	• Lakeville Clinic	• Fremont Clinic	• Luverne Clinic
Avera Medical Group	• Pine City Clinic	North Clinic	• Worthington Clinic
• Worthington	• Rush City Clinic	• Maple Grove Office	Scandia Clinic
CentraCare Health	Gateway Family Health Clinic	• Osseo Office	St Luke's Clinics
• Northway	• Sandstone	North Memorial	• Chequamegon Clinic
• Health Plaza - FM	HealthEast Clinics	• Camden Phys., Maple Grove	• Duluth IM Associates
Entira Family Clinics	• Grand Avenue Clinic	• Golden Valley Physicians	• Hibbing FM Clinic
• Como/Roseville	• Maplewood Clinic	Park Nicollet Health Services	• P.S. Rudie Medical Clinic
• Shoreview	• Midway Clinic	• Heart & Vascular Ctr -	
• Vadnais Heights	HealthPartners Clinics	Cardiology	
Essentia Health – East Region	• Inver Grove Heights	• Minneapolis	

#### Eighteen clinics showed consistent decreases over three years:

Allina Health Clinics	• New Ulm Medical Center	Entira Family Clinics	• Roseville
• Annandale	• United Heart and Vascular	• West St. Paul	Lake Superior Community Health
• Plymouth	Clinic	Fairview Health Services	Center
• Shakopee	Altru Health System	• North Branch Clinic	• Duluth
Allina Health Specialties	• Grand Forks Family Medicine	• Oxboro Clinic	Northwest Family Physicians
• Metropolitan Heart & Vascular	Residency	HealthEast Clinics	• Crystal
Inst. Buffalo	CentraCare Health	• Cottage Grove Clinic	
• Metropolitan Heart & Vascular	• Long Prairie	HealthPartners Clinics	
Inst. Fridley	Edina Sports Health & Wellness	• Anoka	

#### Thirty-two clinics had rates that were relatively stable over three years:

Affiliated Community Medical	Entira Family Clinics	Willmar	• Brooklyn Center Physicians
Centers	• Inver Grove Heights	FirstLight Health System	Park Nicollet Health Services
• Redwood Falls Clinic	• Woodbury	• Mora	• Chanhassen
Allina Health Clinics	Essentia Health – Central Region	HealthPartners Clinics	• Eagan
• Cambridge	• St. Joseph's - Pine River Clinic	• Coon Rapids	• Maple Grove
• Coon Rapids	Essentia Health – East Region	Lakewood Health System	• Plymouth
• First Street	• Ashland Clinic	• Staples Clinic	Sanford Health – Fargo Region
• Ramsey	• Duluth Clinic 1st St	Mayo Clinic	• Hillsboro Clinic
Altru Health System	• Hibbing Clinic	• Specialty Practice	• Jamestown Clinic
• Lake Region	• Virginia Clinic	Mayo Clinic Health System	St Luke's Clinics
Apple Valley Medical Clinic	Fairview Health Services	• Albert Lea	• Mariner Medical Clinic
• Family Practice	• Northeast Clinic	• Owatonna	University of Minnesota Physicians
Burnsville Family Physicians	Family Practice Medical Center of	North Memorial	• Broadway Family Medicine

#### Two hundred and fifty-two clinics did not have a discernable pattern over three years.

## PERFORMANCE HIGHLIGHTS FOR OPTIMAL VASCULAR CARE

## Clinic Regional Results

## Highest performers in 2014 by region

Clinic results showed differences in performance among the different geographic regions in Minnesota. Boundaries of the nine regions were determined by synthesizing health care and geopolitical data, including from the Metropolitan Council and State of Minnesota. The results have been organized to identify areas of the state with the highest proportion of high-performing clinics. The nine regions are listed below based on their proportion of high-performing clinics from high to low. The number of high-performing clinics is shown along with the total number of clinic sites that submitted data for this measure. The high-performing clinics are listed in alphabetical order under their medical group name by region.

## Wisconsin - Five out of 10 (50 percent)

## Essentia Health – East Region

- Hayward Clinic
- Spooner Clinic

## Hudson Physicians – Minnesota Healthcare Network

## River Falls Medical Clinic and Minnesota Healthcare Network

- Ellsworth
- River Falls

## Saint Paul - 25 out of 57 (44 percent)

## PERFORMANCE HIGHLIGHTS FOR OPTIMAL VASCULAR CARE

# Medical Group Results

### Highest performers in 2014

Clinic results by medical group showed an average of 50 percent of patients with vascular disease met all four required components in this measure. **Catalyst Medical Clinic** set the benchmark of 68 percent. There were 16 of 102 medical groups with rates and confidence intervals fully above the statewide average. The high-performing medical groups are listed below from high to low performance. An asterisk (\*) indicates a Top 15 performer for this measure.

- Catalyst Medical Clinic

### Biggest improvement from 2013–2014

The greatest improvement since report year 2013 in Optimal Vascular Care (medical group results) was made by **Cuyuna Regional Medical Center**, whose score increased by more than 24 percentage points.

## PERFORMANCE HIGHLIGHTS FOR OPTIMAL VASCULAR CARE

# Medical Group Results

### Medical group performance over time (2012-2014)

We reviewed the data to identify patterns of performance in medical groups with three years of data beginning in 2012. We looked for patterns of consistently high performance, consistent improvement, consistent decreases and/or relative stability. The results are below in alphabetical order.

Eleven medical groups achieved consistently high performance and above average rates over the past three years for Optimal Vascular Care:

- Affiliated Community Medical Centers
- Allina Health Clinics
- Entira Family Clinics (formerly Family Health Services MN)
- Fairview Health Services
- Family Practice Medical Center of Willmar
- HealthPartners Clinics
- Mankato Clinic, Ltd.
- Mayo Clinic
- Northwest Family Physicians
- Park Nicollet Health Services
- River Falls Medical Clinic and Minnesota Health Network

Seventeen medical groups showed consistent improvement over three years:

- Albany Medical Center
- Altru Health System
- Avera Medical Group
- Essentia Health - Central Region
- Essentia Health St. Mary's
- Gateway Family Health Clinic
- Gundersen Health System
- Lakewood Health Center Clinic
- Olmsted Medical Center
- Parkway Family Physicians - Minnesota Healthcare Network
- River Falls Medical Clinic and Minnesota Health Network
- Sanford Health - Sioux Falls Region
- Scandia Clinic
- Scenic Rivers Health Services
- St. Luke's Clinics
- Stillwater Medical Group
- Winona Health

Four medical groups showed consistent decreases over three years:

- Edina Sports Health & Wellness
- HealthEast Clinics
- Lake Superior Community Health Center
- Ridgeview Clinics

Ten medical groups had rates that were relatively stable over three years:

- Allina Health Clinics
- Allina Health Specialties
- Apple Valley Medical Clinic
- Burnsville Family Physicians
- Essentia Health - East Region
- Family Practice Medical Center of Willmar
- Hennepin County Medical Center (HCMC) Clinics
- Mayo Clinic
- Mayo Clinic Health System
- Park Nicollet Health Services

Fifty-three medical groups did not have a discernable pattern over three years.

Please see next page.

## SMALL INCREASE IN STATEWIDE RATE

## Use of Spirometry Testing in the Assessment and Diagnosis of COPD

This measures the percentage of patients age 40 and older with a new diagnosis or newly active chronic obstructive pulmonary disease (COPD) who received appropriate spirometry testing to confirm the diagnosis.

approaching this peak again with the statewide rate increasing by one percentage point this year.

*Data collected for this measure are from health plan claims.*

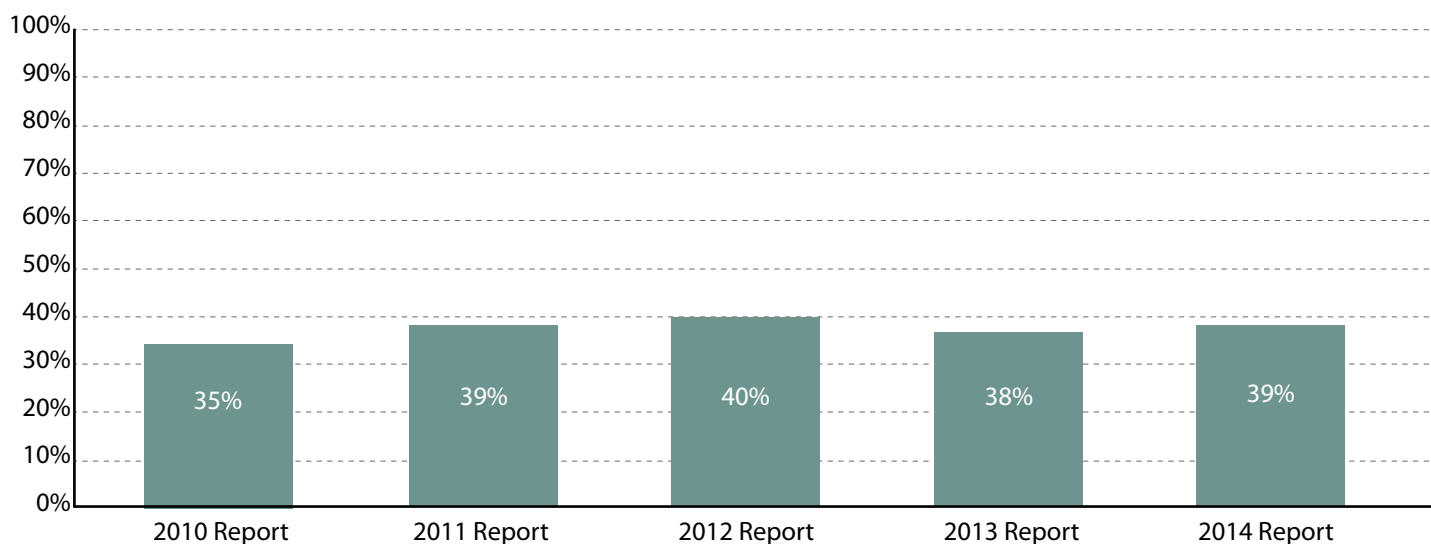

The statewide rate for Use of Spirometry Testing in the Assessment and Diagnosis of COPD is 39 percent. **Table 9** displays the details of the 2014 rate. **Figure 5** shows the average rate for this measure over time. The statewide rate peaked in 2012 at 40 percent and is slowly

**TABLE 9: STATEWIDE RATE FOR USE OF SPIROMETRY IN THE ASSESSMENT AND DIAGNOSIS OF COPD\***

	Statewide Average	95% CI	Numerator (Patients who met treatment goals)	Denominator
Spirometry Testing in the Assessment and Diagnosis of COPD	39.2%	38.2%-40.2%	3,531	9,010

\*Statewide Average (above) includes those patients attributed to a medical group AND those who could not be attributed to a medical group.

**FIGURE 5: STATEWIDE RATES FOR USE OF SPIROMETRY TESTING IN THE ASSESSMENT AND DIAGNOSIS OF COPD OVER TIME**

Caution is recommended when making comparisons from year to year. Annual rate differences can occur due to natural variation, changes in measurement specifications, changes in data sources and other factors.

## PERFORMANCE HIGHLIGHTS FOR USE OF SPIROMETRY TESTING IN THE ASSESSMENT & DIAGNOSIS OF COPD

### Medical Group Results

#### Highest performers in 2014

Medical group results showed an average of 41 percent of patients were given a spirometry test for the assessment and diagnosis of COPD. **Park Nicollet Health Services** set the benchmark of 54 percent. Seven of 46 medical groups with rates and confidence intervals fully above the medical group average. These groups are listed below from high to low performance. An asterisk (\*) indicates a Top 15 performer for this measure.

- Park Nicollet Health Services\*
- Fairview Medical Group\*
- Multicare Associates of the Twin Cities\*
- Sanford Health - Sioux Falls Region\*
- North Memorial Clinic\*
- Entira Family Clinics\*
- HealthPartners Clinics\*

#### Biggest improvement from 2013–2014

The greatest improvement since report year 2013 in Use of Spirometry Testing in the Assessment and Diagnosis of COPD (medical group results) was made by **St. Cloud Medical Group - IHN**, whose score increased by 16 percentage points.

## PERFORMANCE HIGHLIGHTS FOR USE OF SPIROMETRY TESTING IN THE ASSESSMENT & DIAGNOSIS OF COPD

# Medical Group Results

### Medical group performance over time (2012-2014)

We reviewed the data to identify patterns of medical group performance in medical groups with three years of data beginning in 2012. We looked for patterns of consistently high performance, consistent improvement, consistent decreases and/or relative stability. The results are below in alphabetical order.

Three medical groups achieved consistently high performance and above average rates over the past three years for Use of Spirometry Testing in the Assessment and Diagnosis of COPD:

- Entira Family Clinics
- HealthPartners Clinics
- Park Nicollet Health Services

Two medical groups showed consistent improvement over three years:

- Ridgeview Clinics
- Sanford Health - Sioux Falls Region

Four medical groups showed a consistent decrease over three years:

- Essentia Health - Central Region
- HealthEast
- HealthPartners Clinics
- Hutchinson Medical Center

There were no medical groups that had rates that were relatively stable over three years.

Twenty-seven medical groups did not have a discernable pattern over three years.

Please see next page.

## SMALL INCREASE IN STATEWIDE RATE

## Optimal Diabetes Care

This measures the percentage of patients with diabetes (Type 1 and Type 2) ages 18-75 who reached all five of the following treatment goals to reduce cardiovascular risk:

- Blood pressure less than 140/90 mmHg
- LDL-C less than 100 mg/dl
- Hemoglobin A1c (HbA1c) less than 8
- Daily aspirin use for diabetes patients with a co-morbidity of ischemic vascular disease unless contraindicated
- Documented tobacco-free status

The statewide rate for Optimal Diabetes Care is 39 percent. **Table 10** displays the details of this statewide rate.

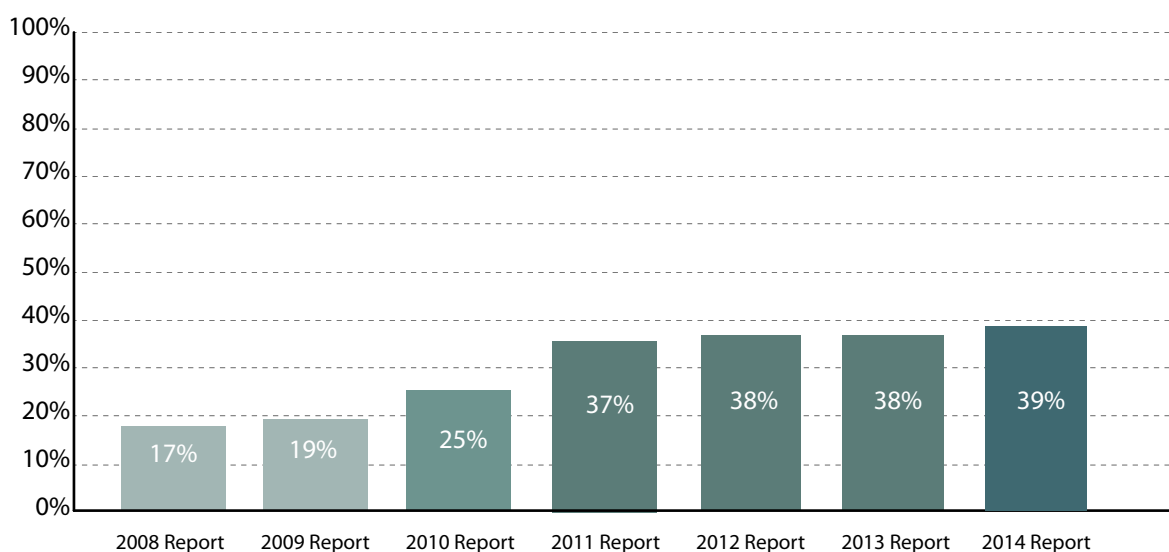

**Figure 6** shows the average rate for Optimal Diabetes Care over time. Since the 2008 report, there has been an increase in this rate; the rate remained stable from 2012 to 2013 but increased by a percentage point this year.

*Credit is given for achieving this composite rate when all five measure components are met. Data collected for this measure are submitted directly to MNCM by medical groups/clinics from electronic health records or paper-based medical charts.*

**TABLE 10: STATEWIDE RATE FOR OPTIMAL DIABETES CARE**

	Statewide Average (Weighted)	95% CI	Numerator (Patients who met treatment goals)	Denominator (Patients sampled)	Total Eligible
Optimal Diabetes Care	38.9%	38.7%-39.1%	90,499	230,818	237,354

**FIGURE 6: STATEWIDE RATES FOR OPTIMAL DIABETES CARE OVER TIME**

Caution is recommended when making comparisons from year to year. Annual rate differences can occur due to natural variation, changes in measurement specifications, changes in data sources and other factors.

## PERFORMANCE HIGHLIGHTS FOR OPTIMAL DIABETES CARE

## Clinic Results

## Highest performers in 2014

Clinic results showed an average of 39 percent of patients with diabetes met all five required components in this measure. **Catalyst Medical Clinic** set the benchmark of 67 percent. There were 162 of 581 clinics with rates and confidence intervals fully above the statewide average. The high-performing clinics are listed below in alphabetical order under their medical group name. An asterisk (\*) indicates a Top 15 performer for this measure.

## PERFORMANCE HIGHLIGHTS FOR OPTIMAL DIABETES CARE

## Clinic Regional Results

## Highest performers in 2014 by region

Clinic results showed differences in performance among the different geographic regions in Minnesota. Boundaries of the nine regions were determined by synthesizing health care and geopolitical data, including from the Metropolitan Council and State of Minnesota. The results have been organized to identify areas of the state with the highest proportion of high-performing clinics. The nine regions are listed below based on their proportion of high-performing clinics from high to low. The number of high-performing clinics is shown along with the total number of clinic sites that submitted data for this measure. The high-performing clinics are listed under their medical group name in alphabetical order by region.

## East Metro - 23 out of 40 (58 percent)

## PERFORMANCE HIGHLIGHTS FOR OPTIMAL DIABETES CARE

## Medical Group Results

### Highest performers in 2014

Clinic results by medical group showed an average of 39 percent of patients with diabetes met all five required components in this measure. **Catalyst Medical Clinic** set the benchmark of 67 percent. There were 20 of 119 medical groups with rates and confidence intervals fully above the statewide average. The high-performing medical groups are listed below from high to low performance. An asterisk (\*) indicates a Top 15 performer for this measure.

- Catalyst Medical Clinic\*
- Entira Family Clinics\*
- Edina Sports Health & Wellness
- France Avenue Family Physicians - Minnesota Healthcare Network\*
- Park Nicollet Health Services\*
- Allina Health Clinics\*
- Richfield Medical Group
- Northwest Family Physicians\*
- Stillwater Medical Group\*
- HealthPartners Clinics\*
- HealthPartners Central Minnesota Clinics\*
- Fairview Health Services\*
- Mankato Clinic, Ltd.\*
- Affiliated Community Medical Centers\*
- Hudson Physicians - Minnesota Healthcare Network
- River Falls Medical Clinic and Minnesota Health Network
- Apple Valley Medical Clinic
- North Memorial
- Mayo Clinic Health System\*
- Essentia Health - East Region\*

### Biggest improvement from 2013–2014

The greatest improvement since report year 2013 in Optimal Diabetes Care (medical group results) was made by **AALFA Family Clinic**, whose score increased by more than 12 percentage points.

## PERFORMANCE HIGHLIGHTS FOR OPTIMAL DIABETES CARE

# Medical Group Results

### Medical group performance over time (2012-2014)

We reviewed the data to identify patterns of performance in medical groups with three years of data beginning in 2012. We looked for patterns of consistently high performance, consistent improvement, consistent decreases and/or relative stability. The results are below in alphabetical order.

Sixteen medical groups achieved consistently high performance and above average rates over the past three years for Optimal Diabetes Care:

- Affiliated Community Medical Centers
- Allina Health Clinics
- Apple Valley Medical Clinic
- Catalyst Medical Clinic
- Edina Sports Health & Wellness
- Entira Family Clinics
- Essentia Health - East Region
- Fairview Health Services
- France Avenue Family Physicians - Minnesota Healthcare Network
- HealthPartners Clinics
- Mankato Clinic, Ltd.
- Mayo Clinic Health System
- Northwest Family Physicians
- Park Nicollet Health Services
- River Falls Medical Clinic and Minnesota Health Network
- Stillwater Medical Group

Ten medical groups showed consistent improvement over three years:

- Albany Medical Center
- Bluestone Physician Services
- Catalyst Medical Clinic
- Essentia Health - Central Region
- Hennepin County Medical Center (HCMC) Clinics
- Hutchinson Health
- NorthPoint Health & Wellness Center
- Richfield Medical Group
- Riverwood Healthcare Center
- Scandia Clinic

Four medical groups showed consistent decreases over three years:

- Apple Valley Medical Clinic
- Edina Family Physicians, P.A.
- FirstLight Health System
- Murray County Clinic

Twenty medical groups had rates that were relatively stable over three years:

- Allina Health Clinics
- CentraCare Family Health Center
- CentraCare Health
- Essentia Health - East Region
- Essentia Health Ada
- Gateway Family Health Clinic
- Glenwood Medical Center
- Graceville Health Center Clinic
- HealthPartners Clinics
- Mayo Clinic
- Multicare Associates
- Native American Community Clinic
- North Memorial
- Northwest Family Physicians
- Open Door Health Center
- Park Nicollet Health Services
- River Falls Medical Clinic and Minnesota Health Network
- Scenic Rivers Health Services
- Valley Family Practice - MHN
- Williams Integracare Clinic

Sixty-seven medical groups did not have a discernable pattern over three years.

Please see next page.

## SMALL INCREASE IN STATEWIDE RATE

## Colorectal Cancer Screening

This measures the percentage of adults ages 51-75 who are up-to-date with the appropriate screening for colorectal cancer. Appropriate screenings for purposes of this measure include one of the following:

- Fecal occult blood test (FOBT) during the measurement year, or
- Flexible sigmoidoscopy during the measurement year or the four years prior, or
- Colonoscopy during the measurement year or the nine years prior.

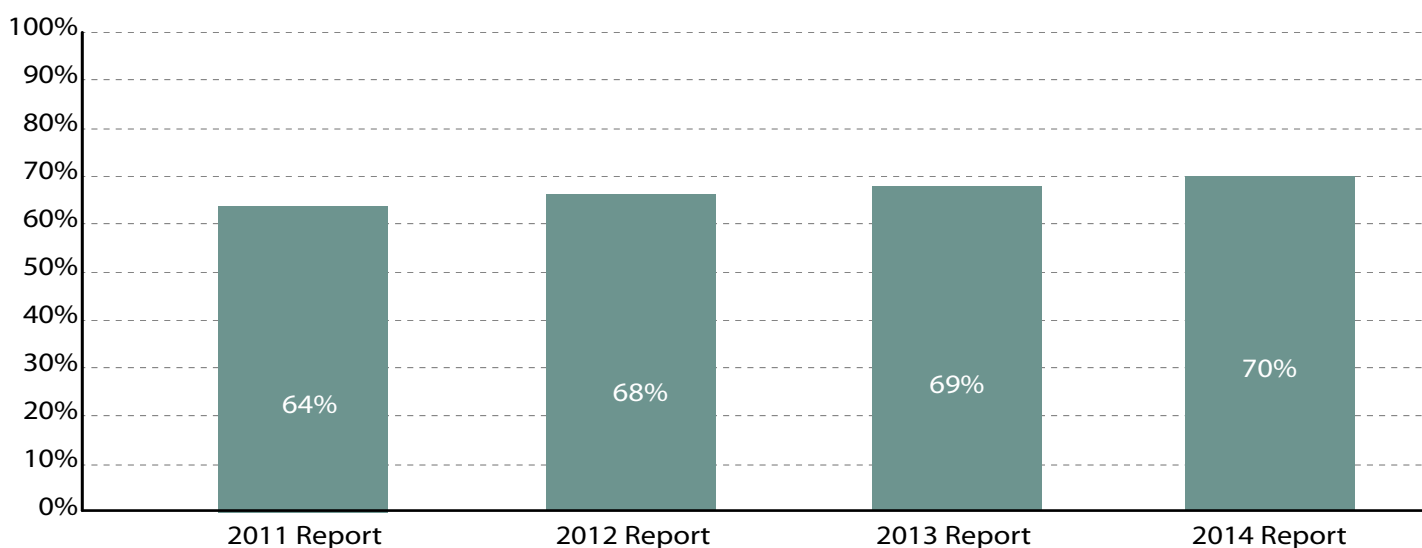

The statewide rate for Colorectal Cancer Screening is 70 percent. **Table 11** displays the details of this statewide rate. **Figure 7** displays the statewide rate over time. The statewide rate has been increasing since the 2011 report and increased by one percentage point from 2013.

*Data collected for this measure are submitted directly to MNMCM by medical groups/clinics from electronic health records or paper-based medical charts.*

**TABLE 11: STATEWIDE RATE FOR COLORECTAL CANCER SCREENING**

	Statewide Average (Weighted)	95% CI	Numerator (Patients who were screened)	Denominator (Patients sampled)	Total Eligible
Colorectal Cancer Screening	69.9%	69.8%-70.0%	777,995	1,110,053	1,165,750

**FIGURE 7: STATEWIDE RATES FOR COLORECTAL CANCER SCREENING OVER TIME**

Caution is recommended when making comparisons from year to year. Annual rate differences can occur due to natural variation, changes in measurement specifications, changes in data sources and other factors.

## PERFORMANCE HIGHLIGHTS FOR COLORECTAL CANCER SCREENING

## Clinic Results

## Highest performers in 2014

Clinic results showed an average of 70 percent of patients ages 51-75 had appropriate screening for colorectal cancer. **Catalyst Medical Clinic** set the benchmark of 93 percent. There were 196 of 672 clinics with rates and confidence intervals fully above the statewide average. The high-performing clinics are listed below in alphabetical order under their medical group name. An asterisk (\*) indicates a Top 15 performer for this measure.

• St. Joseph's - Pequot Lakes Cl.	Integrity Health Network	• Eagan	

Three hundred and twenty-nine clinics did not have a discernable pattern over three years.

## PERFORMANCE HIGHLIGHTS FOR COLORECTAL CANCER SCREENING

## Clinic Results

## Highest performers in 2014 by region

Clinic results showed differences in performance among the different geographic regions in Minnesota. Boundaries of the nine regions were determined by synthesizing health care and geopolitical data, including from the Metropolitan Council and State of Minnesota. The results have been organized to identify areas of the state with the highest proportion of high-performing clinics. The nine regions are listed below based on their proportion of high-performing clinics from high to low. The number of high-performing clinics is shown along with the total number of clinic sites that submitted data for this measure. The high-performing clinics are listed in alphabetical order under their medical group name by region.

## Saint Paul - 29 out of 65 (45 percent)

## PERFORMANCE HIGHLIGHTS FOR COLORECTAL CANCER SCREENING

## Medical Group Results

## Highest performers in 2014

Clinic results by medical group showed an average of 70 percent of patients ages 51-75 had appropriate screening for colorectal cancer. **Catalyst Medical Clinic** set the benchmark of 93 percent. There were 36 of 132 medical groups with rates and confidence intervals fully above the statewide average. The high-performing medical groups are listed below from high to low performance. An asterisk (\*) indicates a Top 15 performer for this measure.

- Catalyst Medical Clinic\*
- Edina Family Physicians, P.A.\*
- Women & Adolescent Gynecology Center\*
- Paul Larson Ob/Gyn Clinic\*
- Obstetrics and Gynecology Associates\*
- Southdale Ob/Gyn Consultants\*
- Mayo Clinic\*
- Mankato Clinic, Ltd.\*
- Oakdale Ob/Gyn\*
- Minnesota Gyn & Surgery\*
- CentraCare Health\*
- Essentia Health - Brainerd Specialty Clinics\*
- Partners Ob/Gyn
- Stillwater Medical Group
- Western ObGyn
- Fairview Health Services\*
- Women's Health Consultants
- HealthPartners Clinics\*
- HealthPartners Central Minnesota Clinics\*
- Adefris & Toppin Women's Specialists
- Edina Sports Health & Wellness
- Burnsville Family Physicians
- OBGYN West
- Alexandria Clinic
- Affiliated Community Medical Centers
- HealthEast Clinics
- Mayo Clinic Health System
- Allina Health Specialties
- Park Nicollet Health Services
- Richfield Medical Group
- Gundersen Health System
- Family Practice Medical Center of Willmar
- Essentia Health - Central Region
- Sanford Health - Fargo Region
- Essentia Health - East Region
- Integrity Health Network
- Allina Health Clinics

## Biggest improvement from 2013–2014

The greatest improvement since report year 2013 in Colorectal Cancer Screening (medical group results) was made by **Edina Family Physicians, P.A.**, whose score increased by more than 31 percentage points.

## PERFORMANCE HIGHLIGHTS FOR COLORECTAL CANCER SCREENING

# Medical Group Results

### Medical group performance over time (2012-2014)

We reviewed the data to identify patterns of performance in medical groups with three years of data beginning in 2012. We looked for patterns of consistently high performance, consistent improvement, consistent decreases and/or relative stability. The results are below in alphabetical order.

Eighteen medical groups achieved consistently high performance and above average rates over the past three years for Colorectal Cancer Screening:

- Affiliated Community Medical Centers
- Allina Health Specialties
- Catalyst Medical Clinic
- CentraCare Health
- Edina Sports Health & Wellness
- Fairview Health Services
- Family Practice Medical Center of Willmar
- HealthEast Clinics
- HealthPartners Central Minnesota Clinics
- HealthPartners Clinics
- Mankato Clinic, Ltd.
- Mayo Clinic
- Oakdale Ob/Gyn
- Park Nicollet Health Services
- Partners Ob/Gyn
- Paul Larson Ob/Gyn Clinic
- Sanford Health - Fargo Region
- Stillwater Medical Group

Nineteen medical groups showed consistent improvement over three years:

- Alexandria Clinic
- Catalyst Medical Clinic
- Comprehensive Healthcare for Women
- Essentia Health - Brainerd Specialty Clinics
- First Care Medical Services
- Hennepin County Medical Center (HCMC) Clinics
- Lakewood Health System
- Madelia Community Hospital & Clinic
- Mayo Clinic Health System
- Ortonville Area Health Services - Northside Medical Clinic
- River's Edge Hospital & Clinic
- RiverView Health
- Sacred Heart Mercy Health Care Center
- Scandia Clinic
- Stillwater Medical Group
- United Family Medicine
- University of Minnesota Physicians
- Western ObGyn
- Women & Adolescent Gynecology Center

Three medical groups showed consistent decreases over three years:

- HealthEast Clinics
- North Clinic
- Parkway Family Physicians - Minnesota Healthcare Network

Fourteen medical groups had rates that were relatively stable over three years:

- Affiliated Community Medical Centers
- Allina Health Specialties
- Edina Sports Health & Wellness
- Entira Family Clinics (formerly Family Health Services MN)
- Family Practice Medical Center of Willmar
- HealthPartners Central Minnesota Clinics
- Meeker Memorial Clinic
- Northwest Family Physicians
- OBGYN West
- Park Nicollet Health Services
- Paul Larson Ob/Gyn Clinic
- Richard Schoewe MD
- Sanford Health - Fargo Region
- Sawtooth Mountain Clinic

Seventy-three medical groups did not have a discernable pattern over three years.

Please see next page.

## SMALL INCREASE IN STATEWIDE RATE

## Appropriate Treatment for Children with Upper Respiratory Infection (URI)

This measures the percentage of children ages three months to 18 years of age with a diagnosis of upper respiratory infection (URI) who were not given an antibiotic prescription within three days of the episode period (July 1 of prior year to June 30 of measurement year).

Appropriate treatment is to not provide an antibiotic, since most URIs are caused by a virus. A higher rate indicates appropriate treatment (i.e., the proportion for whom antibiotics were not prescribed).

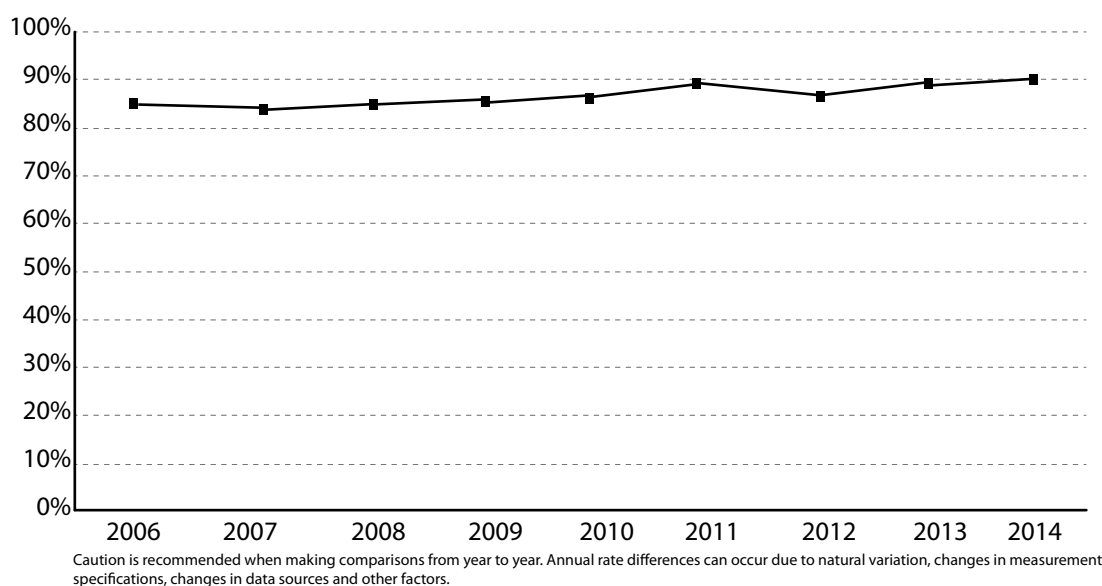

The statewide rate for Appropriate Treatment for Children with URI is 90 percent. **Table 12** displays the details of the 2014 rate. **Figure 8** shows the Appropriate Treatment for Children with URI over time. The statewide rate has been increasing by one percentage point each year since 2012.

*Data collected for this measure are from health plan claims.*

**TABLE 12: STATEWIDE RATE FOR APPROPRIATE TREATMENT FOR CHILDREN WITH URI**

	Statewide Average	95% CI	Numerator (Patients who were not given an antibiotic prescription)	Denominator
Appropriate Treatment for Children with URI	89.9%	89.6%-90.2%	32,724	36,405

**FIGURE 8: STATEWIDE RATES FOR APPROPRIATE TREATMENT FOR CHILDREN WITH URI OVER TIME**

## PERFORMANCE HIGHLIGHTS FOR APPROPRIATE TREATMENT FOR CHILDREN WITH URI

## Medical Group Results

## Highest performers in 2014

Medical group results showed an average of 90 percent of children ages three months to 18 years, with a diagnosis of URI, were appropriately managed without antibiotics. **NorthPoint Health and Wellness** set the benchmark of 100 percent. There were 31 of 122 medical groups with rates and confidence intervals fully above the medical group average. The high-performing medical groups are listed below from high to low performance. An asterisk (\*) indicates a Top 15 performer for this measure.

- NorthPoint Health And Wellness Center\*
- Cedar Riverside People's Center\*
- Community University Health Care Center\*
- United Family Medicine\*
- Neighborhood Healthsource\*
- FirstLight Health System\*
- South Lake Pediatrics - Children's Health Network\*
- Wayzata Children's Clinic (Affiliated With Children's Health Network)\*
- North Clinic\*
- Hennepin Faculty Associates & HCMC Clinics\*
- West Side Community Health Services\*
- Fridley Children's & Teenagers' Medical Center – Children's Health Network\*
- MinuteClinic\*
- Southdale Pediatric Associates Ltd\*
- Buffalo Clinic, PA - IHN\*
- University of Minnesota Physicians
- Allina Health System
- Children's Clinic Network
- North Memorial Clinic
- All About Children Pediatrics - Children's Health Network
- HealthPartners Clinics
- Grand Itasca Clinic
- Pediatric Services - Children's Health Network
- Park Nicollet Health Services
- HealthEast
- Mayo Clinic Health System - Albert Lea
- Fairview Medical Group
- Target Clinic
- Children's Health Care
- Essentia Health - East Region
- CentraCare Health System

## Biggest improvement from 2013–2014

The greatest improvement since report year 2013 in Appropriate Treatment for Children with URI (medical group results) was made by **Dulcimer Medical Center**, whose score increased by more than 25 percentage points.

## PERFORMANCE HIGHLIGHTS FOR APPROPRIATE TREATMENT FOR CHILDREN WITH URI

# Medical Group Results

### Medical group performance over time (2012-2014)

We reviewed the data to identify patterns of medical group performance in medical groups with three years of data beginning in 2012. We looked for patterns of consistent high performance, consistent improvement, consistent decreases and/or relative stability. The results are below in alphabetical order.

Twenty medical groups achieved consistently high performance and above average rates over the past three years for Appropriate Treatment for Children with URI:

- All About Children Pediatrics - Children's Health Network
- Allina Health System
- Buffalo Clinic, PA - IHN
- CentraCare Health System
- Fairview Medical Group
- FirstLight Health System
- Fridley Children's & Teenagers' Medical Center - Children's Health Network
- HealthEast
- HealthPartners Clinics
- Hennepin Faculty Associates & HCMC Clinics
- MinuteClinic
- North Memorial Clinic
- Park Nicollet Health Services
- Pediatric Services - Children's Health Network
- South Lake Pediatrics - Children's Health Network
- Southdale Pediatric Associates Ltd
- Target Clinic
- University of Minnesota Physicians
- Wayzata Children's Clinic (Affiliated With Children's Health Network)
- West Side Community Health Services

Six medical groups showed consistent improvement over three years:

- Cedar Riverside People's Center
- Fairview Express Care
- Fairview Mesaba Clinics
- Raiter Clinic, LTD - IHN
- Ridgeview Clinics
- Sanford Health - Sioux Falls Region

Three medical groups showed consistent decreases over three years:

- Alexandria Clinic
- CentraCare Health System
- Mayo Clinic Health System - Franciscan Healthcare in La Crosse

Nineteen medical groups had rates that were relatively stable over three years:

- Affiliated Community Medical Centers
- Allina Health System
- Buffalo Clinic, PA - IHN
- Fridley Children's & Teenagers' Medical Center - Children's Health Network
- Gateway Family Health Clinic
- HealthPartners Clinics
- Hennepin Faculty Associates & HCMC Clinics
- Hutchinson Medical Center
- Lakeview Clinic, Ltd.
- Mayo Clinic Health System - Albert Lea
- Mayo Clinic Health System - Fairmont
- Neighborhood Healthsource
- South Lake Pediatrics - Children's Health Network
- Southdale Pediatric Associates Ltd
- Stillwater Medical Group
- Tri-County Health Care
- University of Minnesota Physicians
- Wayzata Children's Clinic (Affiliated With Children's Health Network)
- Winona Health

Seventy-four medical groups did not have a discernable pattern over three years.

Please see next page.

## SMALL INCREASE IN STATEWIDE RATE

## PHQ-9 Utilization

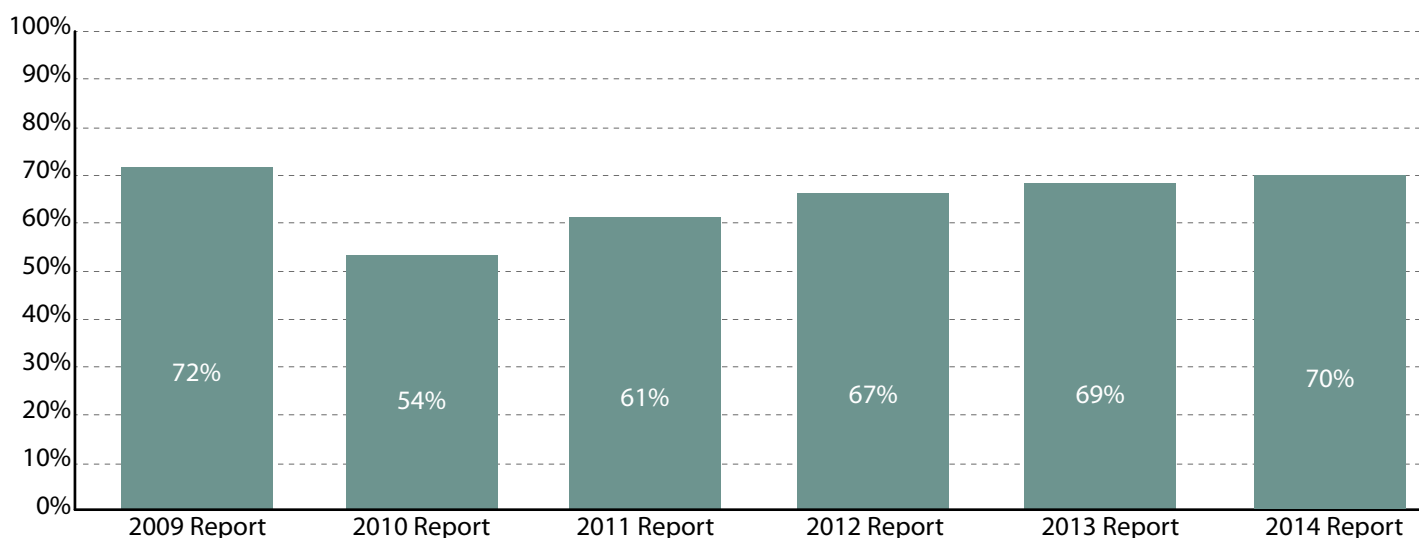

PHQ-9 Utilization is defined as the percentage of the adult population with major depression or dysthymia who had a PHQ-9 during the measurement period. This measure is determining the rate of the use of the PHQ-9 tool for the medical group's population of patients with major depression or dysthymia.

The statewide rate for PHQ-9 Utilization was 70 percent. **Table 13** displays the details of this statewide rate. **Figure 9** shows the PHQ-9 Utilization over time. The statewide rate has been increasing since 2010 with an one percentage point increase from 2013 to 2014.

*Data collected for this measure are submitted directly to MNCM by medical groups/clinics from electronic health records or paper-based medical charts.*

**TABLE 13: STATEWIDE RATE FOR PHQ-9 UTILIZATION**

	Statewide Average (Weighted)	95% CI	Numerator (Patients who met treatment goals)	Denominator (Patients sampled)	Total Eligible
PHQ-9 Utilization	70.0%	69.7%-70.2%	105,724	151,096	2,332,380

**FIGURE 9: STATEWIDE RATES FOR PHQ-9 UTILIZATION OVER TIME**

Caution is recommended when making comparisons from year to year. Annual rate differences can occur due to natural variation, changes in measurement specifications, changes in data sources and other factors.

## PERFORMANCE HIGHLIGHTS FOR PHQ-9 UTILIZATION

## Clinic Results

## Highest performers in 2014

Clinic results showed an average of 70 percent of adult patients with major depression or dysthymia who had a PHQ-9 during the measurement period. There were **11 clinics** that set the benchmark of 100 percent. There were 230 of 537 clinics with rates and confidence intervals fully above the statewide average. The Top 15 Performers (\*) are listed below in alphabetical order under their medical group name.

#### Biggest improvement from 2013-2014

The greatest improvement since report year 2013 in PHQ-9 Utilization (clinic results) was made by **Raiter Clinic - IHN**, whose score increased by more than 91 percentage points.

## PERFORMANCE HIGHLIGHTS FOR PHQ-9 UTILIZATION

## Clinic Results

## Clinic performance over time (2012-2014)

We reviewed the data to identify patterns of clinic performance in clinics with three years of data beginning in 2012. We looked for patterns of consistently high performance, consistent improvement, consistent decreases, and/or relative stability. The results are below in alphabetical order under their medical group name.

One hundred and twenty-five clinics achieved consistently high performance and above average rates over the past three years for PHQ-9 Utilization:

## AALFA Family Clinic-MHN

## Allina Health Clinics

- Blaine
- Brooklyn Park
- Buffalo
- Cambridge
- Champlin
- Chaska
- Coon Rapids
- Cottage Grove
- Dean Lakes
- Eagan
- Edina

## PERFORMANCE HIGHLIGHTS FOR PHQ-9 UTILIZATION

### Clinic Results

#### Fifty-nine clinics showed consistent improvement over three years:

Alexandria Clinic, A Service of Douglas County Hospital	Entira Family Clinics	Multicare Associates	Sanford Health – Fargo Region
Allina Health Specialties	• White Bear Lake - Bellaire Ave	• Fridley Medical Center	• Detroit Lakes Clinic
• New Ulm Medical Center	Essentia Health – East Region	New Hope Crystal Medical Clinic	• South University
Associated Clinic of Psychology	• Aurora Clinic	NorthPoint Health & Wellness Ctr	• Thief River Falls Clinic
• Apple Valley	Family Practice Med. Ctr of Willmar	Olmsted Medical Center	• Walker Clinic
• Brooklyn Center	HealthPartners Clinics	• Byron Clinic	• West Fargo Clinic
• Minneapolis	• Arden Hills	• Plainview Clinic	Sanford Health – Sioux Falls Region
• West St. Paul	• Riverside	• Rochester Northwest	• Tracy Clinic
Avera Medical Group	Hennepin Cty Med. Ctr (HCMC) Cl.	• Rochester Southeast	St Luke's Clinics
• Worthington	• Brooklyn Park Clinic	• Rochester SE - Psychiatry	• Chequamegon Clinic
CentraCare Health	Lake Superior Community Hlth Ctr	• Stewartville Clinic	• Mariner Medical Clinic
• Becker	• Duluth	Park Nicollet Health Services	• Mount Royal
• Northway	Lakeland Mental Health Center	• Bloomington	• P.S. Rudie Medical Clinic
• St. Joseph	• Detroit Lakes	• Carlson	Synergy Family Physicians, P.A.
• Melrose	• Glenwood	• Chanhassen	University of Minnesota Physicians
• Plaza - Family Medicine	• Moorhead	• Minneapolis	• Broadway Family Medicine
• Plaza - Internal Medicine	Mankato Clinic, Ltd.	• Plymouth	• Psychiatry Clinic
• Sauk Centre	• North Mankato	• Prairie Center	• Women's Health Specialists
• River Campus - IM	• Mayo Clinic	• Shorewood	Winona Health
	• Baldwin Bldg, Primary Care IM	• Wayzata	• Winona Clinic

#### Thirty-nine clinics showed consistent decreases over three years:

Affiliated Community Medical Centers	• Shoreview	• Oxboro Clinic	Minnesota Mental Health Clinics
• New London Clinic	• St. Michael	• RidgeValley Clinic	• Eagan Clinic
Allina Health Clinics	Allina Health Specialties	Gateway Family Health Clinic	• North Clinic
• Annandale	• Allina Mental Health United	• Moose Lake	• WestHealth Office in Plymouth
• Blaine	Avera Medical Group	• Sandstone	Ridgeview Clinics
• Buffalo	• SW Ment Hlth Ctr Worthington	HealthEast Clinics	• Chanhassen Clinic
• Champlin	Brainerd Northern Pines Mental Health	• Midway Clinic	• Excelsior Clinic
• Cokato	Caritas Mental Health Clinic	• Roseville Clinic	River Falls Medical Clinic and MHN
• Faribault	Essentia Health – East Region	HealthPartners Clinics	• River Falls
• Nininger Road	• Ely Clinic	• Bloomington	Sanford Health – Fargo Region
• North Branch	• Hayward Clinic	• Brooklyn Center	• North Fargo Clinic
• Plymouth	• Spooner Clinic	• White Bear Lake	
• Ramsey	Fairview Health Services	Mayo Clinic Health System	
• Richfield	• Lino Lakes Clinic	• St. Peter	
		• Waseca	

#### Twenty-three clinics had rates that were relatively stable over three years:

Allina Health Clinics	• Grand Forks Family Medicine Residency	• Andover Clinic	• Positive Care Clinic
• Chaska	• Lake Region	• Eagan Clinic	Mankato Clinic, Ltd.
• First Street	Community-University Hlth Care Ctr	• Lakes Medical Center	• Dpt of Psychiatry & Psych.
• Nicollet Mall	Entira Family Clinics	• Rosemount Clinic	Ridgeview Clinics
• Northfield	• White Bear Lake/Banning Ave	• Rush City Clinic	• Westonka Clinic
• Shakopee	Essentia Health – East Region	• Zimmerman Clinic	St Luke's Clinics
• Woodbury	• International Falls Clinic	HealthPartners Clinics	• Internal Medicine Associates
Altru Health System	Fairview Health Services	• Coon Rapids	
• Crookston		Hennepin Cty Med. Ctr (HCMC) Cl.	

#### Two hundred and forty-four clinics did not have a discernable pattern over three years.

## PERFORMANCE HIGHLIGHTS FOR PHQ-9 UTILIZATION

## Regional Clinic Results

## Highest performers in 2014 by region

Clinic results showed differences in performance among the different geographic regions in Minnesota. Boundaries of the nine regions were determined by synthesizing health care and geopolitical data, including from the Metropolitan Council and State of Minnesota. The results have been organized to identify areas of the state with the highest proportion of high-performing clinics. The nine regions are listed below based on their proportion of high-performing clinics from high to low. The number of high-performing clinics is shown along with the total number of clinic sites that submitted data for this measure. The high-performing clinics are listed under their medical group name in alphabetical order by region.

## PERFORMANCE HIGHLIGHTS FOR PHQ-9 UTILIZATION

## Medical Group Results

## Highest performers in 2014

Medical group results showed an average of 70 percent of adult patients with major depression or dysthymia who had a PHQ-9 during the measurement period. There were six medical groups who set the benchmark of 100 percent: **Zumbro Valley Health Center; Apple Valley Medical Clinic; AALFA Family Clinic; Mental Health Resources; Synergy Family Physicians, P.A; and Gundersen Health System.** There were 44 of 120 medical groups with rates and confidence intervals fully above the statewide average. The high-performing medical groups are listed below in order starting with the best performance. An asterisk (\*) indicates a Top 15 performer for this measure.

- Zumbro Valley Health Center\*
- Apple Valley Medical Clinic\*
- AALFA Family Clinic\*
- Mental Health Resources\*
- Synergy Family Physicians, P.A\*
- Gundersen Health System\*
- Boynton Health Service\*
- Dawson Clinic\*
- Native American Community Clinic\*
- New Hope Crystal Medical Clinic\*

- Family Practice Medical Center of Willmar
- Minnesota Mental Health Clinics
- Park Nicollet Health Services
- Winona Health
- HealthEast Clinics
- Integrity Health Network

## Biggest improvement from 2013-2014

The greatest improvement since report year 2013 in PHQ-9 Utilization (medical group results) was made by **Apple Valley Medical Clinic**, whose score increased by more than 88 percentage points.

## Medical group performance over time (2012-2014)

Not applicable.

Please see next page.

## SMALL INCREASE IN STATEWIDE RATE

## Depression Remission, Response, and PHQ-9 Follow-up at Six Months

Depression **Remission** at Six Months is defined as the percentage of patients with major depression or dysthymia and an initial PHQ-9 score greater than nine whose six month PHQ-9 score was less than five. The statewide rate for Depression **Remission** at Six Months is eight percent. **Table 14** displays the details of the statewide rate. **Figure 10** displays the statewide rates over time for Depression **Remission** at Six Months. Since the 2009 report, this rate has remained relatively stable.

Depression **Response** at Six Months is defined as the percentage of patients whose PHQ-9 score at six months decreased by at least 50 percent from their initial PHQ-9 score. The statewide rate for Depression **Response** at Six Months is 13 percent. **Table 14** displays the details of the statewide rate. **Figure 10** displays the statewide rates over time for Depression **Response** at Six Months. Since the 2009 report, this rate has remained relatively stable.

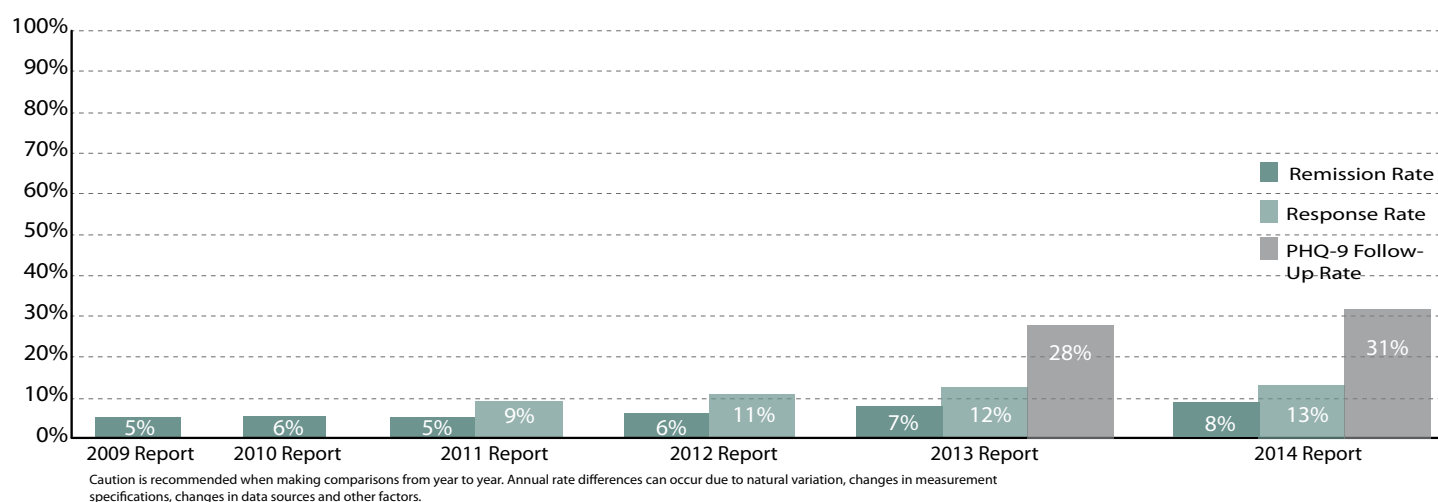

**PHQ-9 Follow-up** at Six Months is defined as the percentage of patients with a diagnosis of major depression or dysthymia and a PHQ-9 score at the index contact greater than nine who have a follow-up PHQ-9 test at six months from the index contact date. The statewide rate for **PHQ-9 Follow-up** at Six Months is 31 percent. **Table 14** displays the details of the statewide rate. This is the first year this measure has been included in this report. **Figure 10** displays the statewide rates over time for PHQ-9 Follow-Up at Six Months. The rate increased by three percentage points from 2013 to 2014.

*Data collected for this measure are submitted directly to MNCM by medical groups/clinics from electronic health records or paper-based medical charts.*

**TABLE 14: STATEWIDE RATE FOR DEPRESSION REMISSION, RESPONSE, AND PHQ-9 FOLLOW-UP AT SIX MONTHS**

	Statewide Average	95% CI	Numerator (Patients who met treatment goals)	Denominator
Depression <b>Remission</b> at Six Months	7.7%	7.6% - 7.9%	7,003	90,536
Depression <b>Response</b> at Six Months	12.8%	12.6% - 13.0%	11,588	90,536
PHQ-9 <b>Follow-Up</b> at Six Months	30.8%	30.5% - 31.1%	27,882	90,536

**FIGURE 10: STATEWIDE RATES FOR DEPRESSION REMISSION, RESPONSE, AND PHQ-9 FOLLOW-UP AT SIX MONTHS OVER TIME**

## PERFORMANCE HIGHLIGHTS FOR DEPRESSION MEASURES AT SIX MONTHS

## Clinic Results

## Highest performers in 2014

Clinic results showed that average of eight percent of patients with depression were in remission at six months (had a PHQ-9 score of less than five). **Entira Family Clinics - Inver Grove Heights** set the benchmark of 27 percent. There were 81 of 442 clinics with rates and confidence intervals fully above the statewide average. The high-performing clinics are listed below in alphabetical order under their medical group name. An asterisk (\*) indicates a Top 15 performer for this measure.

## Biggest improvement from 2013–2014

The greatest improvement since report year 2013 in Depression Remission at Six Months (clinic results) was made by **Avera Medical Group - Worthington**, which had a 16 percentage point increase.

## PERFORMANCE HIGHLIGHTS FOR DEPRESSION MEASURES AT SIX MONTHS

### Clinic Results

#### Clinic performance over time (2012-2014)

We reviewed the data to identify patterns of clinic performance in clinics with three years of data beginning in 2012. We looked for patterns of consistently high performance, consistent improvement, consistent decreases and/or relative stability. The results are below in alphabetical order under their medical group name.

Thirty clinics achieved consistently high performance and above average rates over the past three years for Depression Remission at Six Months:

Allina Health Clinics	• Ramsey	• White Bear Lake - Bellaire
• Annandale	• Shoreview	• Woodbury
• Buffalo	• St. Michael	Mankato Clinic, Ltd.
• Champlin	• West St. Paul	• Department of Psychiatry & Psychology
• Cokato	• Woodbury	Mayo Clinic
• Coon Rapids	Entira Family Clinics	• Baldwin Building, Family Medicine
• Dean Lakes	• Inver Grove Heights	• Baldwin Building, Primary Care Internal Medicine
• Eagan	• Maplewood/Battle Creek	• Kasson
• Edina	• Shoreview	• Northeast
• Faribault	• Vadnais Heights	• Northwest
• Plymouth	• West St. Paul	
• Prescott	• White Bear Lake/Banning Ave	

Twenty-eight clinics showed consistent improvement over three years:

Allina Health Clinics	Entira Family Clinics	Park Nicollet Health Services
• Blaine	• Highland	• Brookdale
• Coon Rapids	• Inver Grove Heights	• Burnsville
• Faribault	Essentia Health – East Region	• Chanhassen
• Farmington	• Spooner Clinic	• Eagan
• First Street	France Ave Family Phys. - MN Healthcare Ntwk	• Plymouth
• Forest Lake	North Memorial	• Prairie Center
• Shoreview	• Golden Valley Physicians	• Prior Lake
Allina Health Specialties	Northwest Family Physicians	• Shakopee
• ANW General Medicine Associates - Edina	• Rogers	• Wayzata
Avera Medical Group	Olmsted Medical Center	Essentia Health St. Mary's
• Marshall Psychiatry Associates	• Byron Clinic	• Innovis Health Clinic - Detroit Lakes
Catalyst Medical Clinic	• Plainview Clinic	

Two clinics showed consistent decreases over three years:

Allina Health Specialties
• Allina Mental Health United
North Memorial
• Camden Physicians, Plymouth

## PERFORMANCE HIGHLIGHTS FOR DEPRESSION MEASURES AT SIX MONTHS

### Clinic Results

Eighty-two clinics had rates that were relatively stable over three years:

Affiliated Community Medical Centers	• EdenCenter Clinic	• Internal Medicine Clinic at Parkside	• Blaine Medical Center
• Granite Falls Clinic	• Farmington Clinic	• Richfield Clinic	• Fridley Medical Center
Allina Health Clinics	• Lakes Medical Center	• Whittier Clinic	Native American Community Clinic North Clinic
• Dean Lakes	• Maple Grove Medical Center	Integrity Health Network	• Oakdale Office in Robbinsdale
• Nininger Road	• North Branch Clinic	• Raiter Clinic – IHN	• WestHealth Office in Plymouth
• Ramsey	• Pine City Clinic	• St. Cloud Medical Group - Clearwater - IHN	Ramsey County Mental Health Center
Allina Health Specialties	• Rosemount Clinic	• St. Cloud Medical Group – NW - IHN	Ridgeview Clinics
• Allina Mental Health Unity	Glencoe Regional Health Services	• St. Cloud Medical Group - South - IHN	• Delano Clinic
• Brainerd Northern Pines Mental Health	HealthPartners Clinics	Lakewood Health System	• Westonka Clinic
Carver County Mental Health Program	• Andover	• Staples Clinic	• Winsted Clinic
• First Street Center	• Anoka	Mankato Clinic, Ltd.	Sanford Health – Fargo Region
CentraCare Clinic	• Arden Hills	• Department of Psychiatry & Psychology	• Bagley Clinic
• Northway	• Brooklyn Center	• Main Street	• Professional Building
• St. Joseph	• Como	• Wickersham Campus	St. Cloud Hospital - Behavioral Health Clinic
• Health Plaza - Family Medicine	• Coon Rapids	Mayo Clinic	Stevens Community Medical Center
• River Campus - Internal Medicine	• Hlth Ctr for Women	• Baldwin Building, Family Medicine	Stillwater Medical Group
Entira Family Clinics	• Midway	• Northwest	• Curve Crest Clinic
• Maplewood/Battle Creek	• Regions BH Woodbury	• Specialty Practice	United Hospital District Clinic
• White Bear Lake/Banning Ave	• Riverside Behav Hlth	Mayo Clinic Health System	University of Minnesota Physicians
• Woodbury	• Specialty Center 401	• Albert Lea	• Bethesda Clinic
Essentia Health – East Region	• St Paul	• Fairmont	• Broadway Family Medicine
• International Falls Clinic	• West Behav Hlth	• Waseca	• Phalen Clinic
Essentia Health – Central Region	• Woodbury	Minnesota Mental Health Clinics	• Primary Care Center
• Lakeland Psychiatry Clinic	HealthPartners Central Minnesota Clinics	• Eagan Clinic	Winona Health
Fairview Health Services	Hennepin County Medical Center (HCMC) Clinics	Multicare Associates	• Winona Clinic
• Blaine Clinic	• Brooklyn Park Clinic		
• CedarRidge Clinic	• Downtown Medicine Clinic		
	• East Lake Clinic		

Three hundred and thirty-six clinics did not have a discernable pattern over three years.

## PERFORMANCE HIGHLIGHTS FOR DEPRESSION REMISSION AT SIX MONTHS

## Regional Clinic Results

## Highest performers in 2014 by region

Clinic results showed differences in performance among the different geographic regions in Minnesota. Boundaries of the nine regions were determined by synthesizing health care and geopolitical data, including from the Metropolitan Council and State of Minnesota. The results have been organized to identify areas of the state with the highest proportion of high-performing clinics. The nine regions are listed below based on their proportion of high-performing clinics from high to low. The number of high-performing clinics is shown along with the total number of clinic sites that submitted data for this measure. The high-performing clinics are listed under their medical group name in alphabetical order by region.

## Wisconsin - Four out of nine (44 percent)

- Allina Health Clinics
  - Prescott
- Essentia Health – East Region
  - Ashland Clinic
  - Spooner Clinic
  - St. Mary's - Superior Clinic

## West Metro - 17 out of 48 (35 percent)

## PERFORMANCE HIGHLIGHTS FOR DEPRESSION MEASURES AT SIX MONTHS

## Medical Group Results

### Highest performers in 2014

Clinic results by medical group showed an average of eight percent of patients with depression were in remission at six months (had a PHQ-9 score of less than five). **Entira Family Clinics** set the benchmark of 17 percent. There were eight of 106 medical groups with rates and confidence intervals fully above the statewide average. The high-performing medical groups are listed below from high to low performance. An asterisk (\*) indicates a Top 15 performer for this measure.

- Entira Family Clinics\*
- Allina Health Clinics\*
- Mayo Clinic\*
- Park Nicollet Health Services\*
- Northwest Family Physicians\*
- Zumbro Valley Health Center\*
- Allina Health Specialties\*
- Essentia Health St. Mary's\*
- Olmsted Medical Center\*
- Essentia Health - East Region\*
- Mankato Clinic, Ltd.\*
- Madelia Community Hospital & Clinic\*
- CentraCare Family Health Center\*
- FirstLight Health System\*
- AALFA Family Clinic\*

### Biggest improvement from 2013–2014

The greatest improvement since report year 2013 in Depression Remission at Six Months (medical group results) was made by **Park Nicollet Health Services**, whose score increased by six percentage points.

### Medical group performance over time (2012-2014)

Not applicable.

Please see next page.

## SMALL INCREASE IN STATEWIDE RATE

## Controlling High Blood Pressure

This measures the percentage of patients ages 18-85 with a diagnosis of hypertension, or high blood pressure, whose blood pressure was adequately controlled at less than 140/90 mmHg during the measurement year.

The representative blood pressure is the most recent blood pressure reading during the measurement year (as long as the blood pressure reading occurred following the hypertension diagnosis).

The statewide rate for Controlling High Blood Pressure was 76 percent. **Table 15** displays the details of the 2014 rate.

**Figure 11** shows the average rate for Controlling High Blood Pressure over time. Since the 2007 report, there has been an increase in this rate; the rate remained stable from 2011 to 2013 but increased by a percentage point this year.

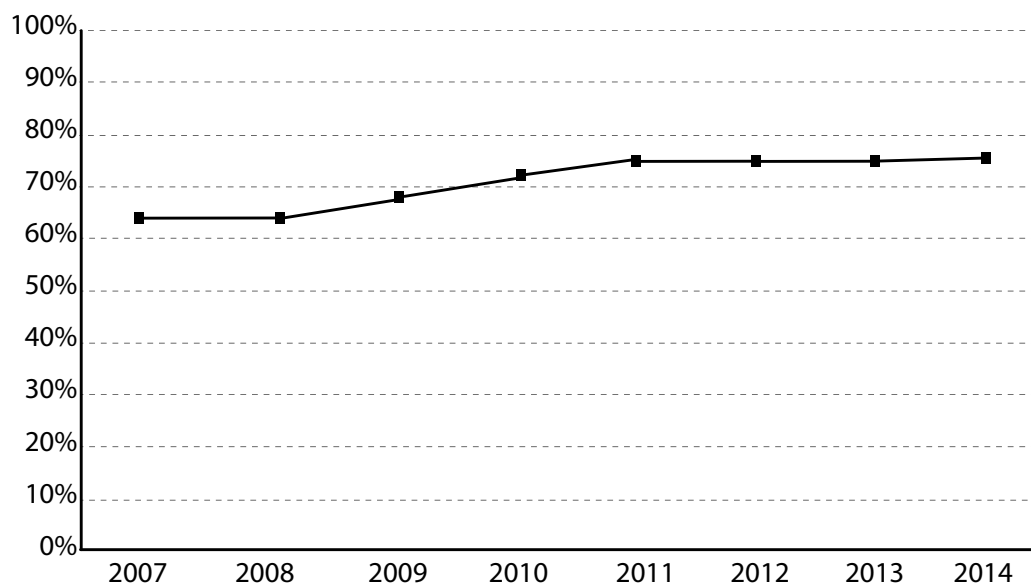

*Data collected for this measure are from health plan claims and medical record review.*

**TABLE 15: STATEWIDE RATE FOR CONTROLLING HIGH BLOOD PRESSURE\***

	Statewide Average (Weighted)	95% CI	Numerator (Patients who met target goal)	Denominator (Patients Sampled)	Total Eligible
BP <140/90 mmHg	75.6%	74.9%-76.2%	11,657	16,313	232,306

\*Statewide Average (above) includes those patients attributed to a medical group AND those who could not be attributed to a medical group.

**FIGURE 11: STATEWIDE RATES FOR CONTROLLING HIGH BLOOD PRESSURE OVER TIME**

Caution is recommended when making comparisons from year to year. Annual rate differences can occur due to natural variation, changes in measurement specifications, changes in data sources and other factors.

## PERFORMANCE HIGHLIGHTS FOR CONTROLLING HIGH BLOOD PRESSURE

### Medical Group Results

#### Highest performers in 2014

Medical group results showed that an average of 76 percent of patients with high blood pressure were appropriately controlled. **Entira Family Clinics** set the benchmark of 96 percent. There were 13 of 83 medical groups with rates and confidence intervals fully above the medical group average. The high-performing medical groups are listed below from high to low performance. An asterisk (\*) indicates a Top 15 performer for this measure.

- Entira Family Clinics\*
- Mayo Clinic Health System - Waseca\*
- First Care Medical Services\*
- Burnsville Family Physicians\*
- Alexandria Clinic\*
- Glencoe Regional Health Services\*
- Vibrant Health Family Clinics\*
- Mayo Clinic Health System - Lake City\*
- Stillwater Medical Group\*
- Affiliated Community Medical Centers\*
- Park Nicollet Health Services\*
- Allina Health System\*
- Fairview Medical Group\*

#### Biggest improvement from 2013–2014

The greatest improvement since report year 2013 in Controlling High Blood Pressure (medical group results) was made by **First Care Medical Services**, whose score increased by more than 29 percentage points.

## PERFORMANCE HIGHLIGHTS FOR CONTROLLING HIGH BLOOD PRESSURE

# Medical Group Results

### Medical group performance over time (2012-2014)

We reviewed the data to identify patterns of medical group performance in medical groups with three years of data beginning in 2012. We looked for patterns of consistent high performance, consistent improvement, consistent decreases and/or relative stability. The results are below in alphabetical order.

Three medical groups achieved consistently high performance and above average rates over the past three years for Controlling High Blood Pressure:

- Affiliated Community Medical Centers
- Allina Health System
- Family Health Services Minnesota

Seven medical groups showed consistent improvement over three years:

- Alexandria Clinic
- Buffalo Clinic, PA - IHN
- Burnsville Family Physicians
- CCMH - Montevideo Clinic
- Cuyuna Regional Medical Center - Clinic Services
- Glenwood Medical Center
- Winona Health

Two medical groups showed consistent decreases over three years:

- Neighborhood Healthsource
- Sanford Health Fargo

Four medical groups had rates that were relatively stable over three years:

- Allina Health System
- Fairview Medical Group
- Mankato Clinic
- Multicare Associates of the Twin Cities

Fifty medical groups did not have a discernable pattern over three years.

Please see next page.

## SMALL INCREASE IN STATEWIDE RATE

## Depression Remission, Response, and PHQ-9 Follow-up at 12 Months

Depression **Remission** at 12 Months is defined as the percentage of patients with major depression or dysthymia and an initial PHQ-9 score greater than nine whose 12 month PHQ-9 score was less than five. The statewide rate for Depression **Remission** at 12 Months is six percent.

**Table 16** displays the details of the statewide rate. **Figure 12** displays the statewide rates over time for Depression **Remission** at 12 Months. Since the 2009 report, this rate has remained relatively stable.

Depression **Response** at 12 Months is defined as the percentage of patients whose PHQ-9 score at 12 months decreased by at least 50 percent from their initial PHQ-9 score. The statewide rate for Depression **Response** at 12 Months is 10 percent. **Table 16** displays the details of the statewide rate. **Figure 12** displays the statewide rates over time for Depression **Response** at 12 Months. Since the 2009 report, this rate has remained relatively stable.

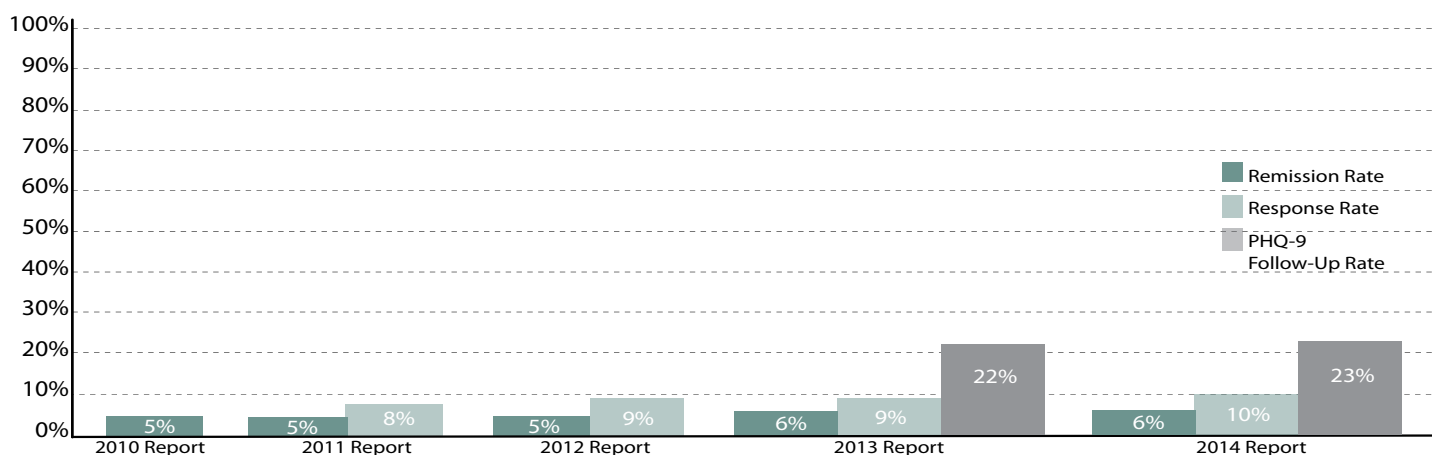

**PHQ-9 Follow-up** at 12 Months is defined as the percentage of patients with a diagnosis of major depression or dysthymia and a PHQ-9 score at the index contact greater than nine who have a follow-up PHQ-9 test at 12 months from the index contact date. The statewide rate for **PHQ-9 Follow-up** at 12 Months is 23 percent. **Table 16** displays the details of the statewide rate. This is the first year this measure has been included in this report. **Figure 12** displays the statewide rates over time for **PHQ-9 Follow-Up** at 12 Months. The rate increased by one percentage point from 2013 to 2014.

*Data collected for this measure are submitted directly to MNCM by medical groups/clinics from electronic health records or paper-based medical charts.*

**TABLE 16: STATEWIDE RATE FOR DEPRESSION REMISSION, RESPONSE, AND PHQ-9 FOLLOW-UP AT 12 MONTHS**

	Statewide Average	95% CI	Numerator (Patients who met treatment goals)	Denominator
Depression <b>Remission</b> at 12 Months	5.9%	5.7% - 6.1%	5,084	86,147
Depression <b>Response</b> at 12 Months	9.8%	9.6% - 10.0%	8,431	86,147
PHQ-9 <b>Follow-Up</b> at 12 Months	23.3%	23.0% - 23.6%	20,078	86,147

**FIGURE 12: STATEWIDE RATES FOR DEPRESSION REMISSION, RESPONSE, AND PHQ-9 FOLLOW-UP AT 12 MONTHS OVER TIME**

Caution is recommended when making comparisons from year to year. Annual rate differences can occur due to natural variation, changes in measurement specifications, changes in data sources and other factors.

## PERFORMANCE HIGHLIGHTS FOR DEPRESSION MEASURES AT 12 MONTHS

## Clinic Results

## Highest performers in 2014

Clinic results showed an average of six percent of patients with depression were in remission at 12 months (had a PHQ-9 score of less than five). **Mayo Clinic - Northwest** set the benchmark of 24 percent. There were 57 of 406 clinics with rates and confidence intervals fully above the statewide average. The high-performing clinics are listed below in alphabetical order under their medical group name. An asterisk (\*) indicates a Top 15 performer for this measure.

## PERFORMANCE HIGHLIGHTS FOR DEPRESSION MEASURES AT 12 MONTHS

### Clinic Results

#### Clinic performance over time (2012-2014)

We reviewed the data to identify patterns of clinic performance in clinics with three years of data beginning in 2012. We looked for patterns of consistently high performance, consistent improvement, consistent decreases and/or relative stability. The results are below in alphabetical order under their medical group name.

Twenty-one clinics achieved consistently high performance and above average rates over the past three years for Depression Remission at 12 Months:

Allina Health Clinics	• Nicollet Mall	Mankato Clinic, Ltd.
• Brooklyn Park	• Northfield	• Department of Psychiatry & Psychology
• Buffalo	• Shoreview	Mayo Clinic
• Champlin	• St. Michael	• Baldwin Building, Family Medicine
• Coon Rapids	• West St. Paul	• Baldwin Building, Primary Care Internal Medicine
• Dean Lakes	• Woodbury	• Northeast
• Faribault	Entira Family Clinics	• Northwest
• Farmington	• Inver Grove Heights	
• First Street	• West St. Paul	

Eighteen clinics showed consistent improvement over three years:

Allina Health Clinics	Entira Family Clinics
• Annandale	• East Side
• Eagan	Essentia Health – East Region
• Elk River	• Ashland Clinic
• Faribault	• Lakeside Clinic
• Maple Grove	• Spooner Clinic
• Plymouth	• St. Mary's - Superior Clinic
• Shoreview	• West Duluth Clinic
• West St. Paul	Mayo Clinic
CentraCare Health	• Baldwin Building, Primary Care Internal Medicine
• St. Joseph	Olmsted Medical Center
Edina Family Physicians, P.A.	• Byron Clinic

One clinic showed a consistent decrease over three years:

AALFA Family Clinic - MHN

## PERFORMANCE HIGHLIGHTS FOR DEPRESSION MEASURES AT 12 MONTHS

## PERFORMANCE HIGHLIGHTS FOR DEPRESSION MEASURES AT 12 MONTHS

## Clinic Regional Results

## Highest performers in 2014 by region

Clinic results showed differences in performance among the different geographic regions in Minnesota. Boundaries of the nine regions were determined by synthesizing health care and geopolitical data, including from the Metropolitan Council and State of Minnesota. The results have been organized to identify areas of the state with the highest proportion of high-performing clinics. The nine regions are listed below based on their proportion of high-performing clinics from high to low. The number of high-performing clinics is shown along with the total number of clinic sites that submitted data for this measure. The high-performing clinics are listed under their medical group name in alphabetical order by region.

## Wisconsin - Three out of eight (38 percent)

- Essentia Health – East Region
- St. Mary's-Superior Clinic
  - Ashland Clinic
  - Spooner Clinic

## Southeast - 14 out of 55 (25 percent)

- Plymouth
- Richfield

##### Allina Health Specialties

- Allina Mental Health Unity

#### Northwest - One out of 14 (seven percent)

##### Essentia Health St. Mary's

- Innovis Health Clinic - Detroit Lakes

#### Southwest - One out of 26 (four percent)

##### Affiliated Community Medical Centers

- Litchfield Clinic (East)

## PERFORMANCE HIGHLIGHTS FOR DEPRESSION MEASURES AT 12 MONTHS

### Medical Group Results

#### Highest performers in 2014

Clinic results by medical group showed an average of six percent of patients with depression were in remission at 12 months (had a PHQ-9 score of less than five). **Allina Health Clinics** set the benchmark of 12 percent. There were nine of 102 medical groups with rates and confidence intervals fully above the statewide average. The high-performing medical groups are listed below from high to low. An asterisk (\*) indicates a Top 15 performer for this measure.

- Allina Health Clinics\*
- Mayo Clinic\*
- Zumbro Valley Health Center\*
- Essentia Health - East Region\*
- Essentia Health St. Mary's\*
- Olmsted Medical Center\*
- Allina Health Specialties\*
- Entira Family Clinics\*
- Mankato Clinic, Ltd.\*

#### Biggest improvement from 2013–2014

The greatest improvement since report year 2013 in Depression Remission at 12 Months (medical group results) was made by **Essentia Health St. Mary's**, whose score increased by more than six percentage points.

#### Medical group performance over time (2012-2014)

Not applicable.

Please see next page.

## RESULTS BY MEASURE

# Small Decrease in Statewide Rate

### Section Contents

- **Appropriate Testing for Children with Pharyngitis** – Measures the percentage of children 2-18 years of age with pharyngitis (sore throat) who were given an antibiotic and a group A streptococcus (strep) test for the episode period (July 1 of prior year to June 30 of measurement year). A higher rate represents better performance.
- **Chlamydia Screening in Women** – Measures the percentage of sexually active women ages 16-24 who had at least one test for chlamydia infection during the measurement year.
- **Follow-Up Care for Children Prescribed ADHD Medication** – Measures the percentage of children 6-12 years old with a newly prescribed attention-deficit/hyperactivity disorder (ADHD) medication who had one follow-up visit with a practitioner with prescribing authority within 30 days of the first ADHD medication being dispensed.
- **Childhood Immunization Status (Combo 3)** – Measures the percentage of two-year old children who had four DTaP/DT, three IPV, one MMR, three H influenza type B, three Hepatitis B, one VZV, and four pneumococcal conjugate vaccines within the HEDIS specified time period and by their second birthday.

## SMALL DECREASE IN STATEWIDE RATE

## Appropriate Testing for Children with Pharyngitis

This measures the percentage of children ages 2-18 with pharyngitis (sore throat) who were given an antibiotic and a group A streptococcus (strep) test rather than just an antibiotic for the episode period (July 1 of prior year to June 30 of measurement year). Since pharyngitis may be caused by a virus, best practice is to test for strep when ordering an antibiotic. A higher rate represents better performance (i.e., appropriate testing).

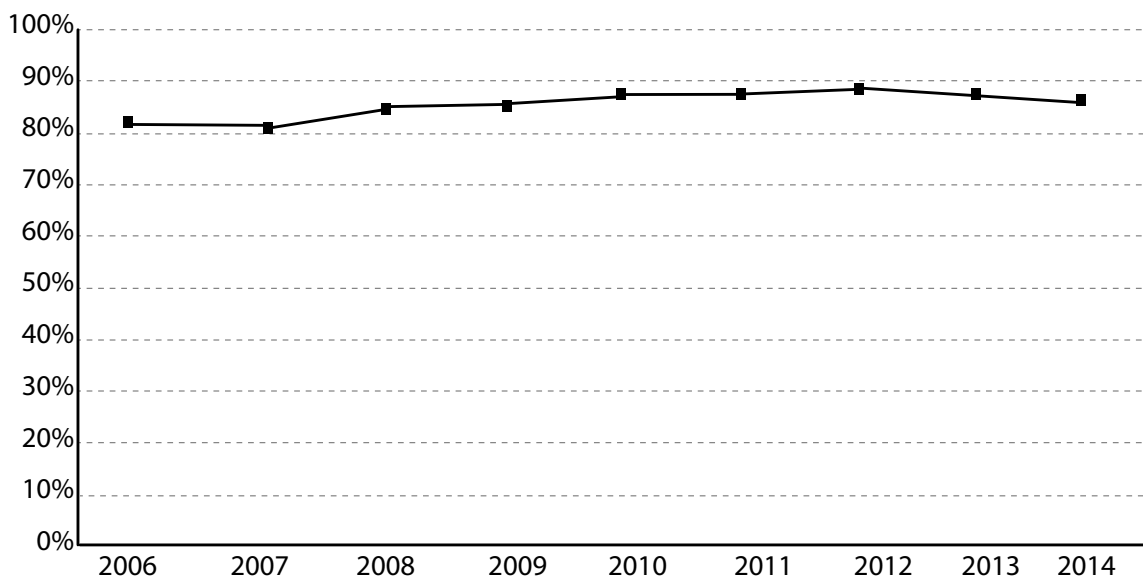

The statewide rate for Appropriate Testing for Children with Pharyngitis is 88 percent. **Table 17** displays the details of the 2014 rate. **Figure 13** shows the Appropriate Testing for Children with Pharyngitis over time. Since the 2006 report, the rate has increased, but it has been relatively stable since 2010.

*Data collected for this measure are from health plan claims.*

**TABLE 17: STATEWIDE RATE FOR APPROPRIATE TESTING FOR CHILDREN WITH PHARYNGITIS**

	Statewide Average	95% CI	Numerator (Patients who recieved an antibiotic and Group A test)	Denominator
Appropriate Testing for Children with Pharyngitis	88.4%	88.0%-88.7%	24,357	27,567

**FIGURE 13: STATEWIDE RATES FOR APPROPRIATE TESTING FOR CHILDREN WITH PHARYNGITIS OVER TIME**

Caution is recommended when making comparisons from year to year. Annual rate differences can occur due to natural variation, changes in measurement specifications, changes in data sources and other factors.

## PERFORMANCE HIGHLIGHTS FOR APPROPRIATE TESTING FOR CHILDREN WITH PHARYNGITIS

## Medical Group Results

### Highest performers in 2014

Medical group results showed an average of 88 percent of children ages 2-18 who were diagnosed with pharyngitis were appropriately dispensed an antibiotic and received a strep test. **Eagan Valley Pediatrics** set the benchmark of 100 percent. Thirty-three of 109 medical groups with rates and confidence intervals fully above the medical group average. These groups are listed below from high to low performance from the top of the left column to the bottom of the right column. An asterisk (\*) indicates a Top 15 performer for this measure.

- |   |   |

### Biggest improvement from 2013–2014

The greatest improvement since report year 2013 in Appropriate Testing for Children with Pharyngitis (medical group results) was made by **Riverwood Aitkin Clinic**, which had a 38 percentage point increase.

## PERFORMANCE HIGHLIGHTS FOR APPROPRIATE TESTING FOR CHILDREN WITH PHARYNGITIS

# Medical Group Results

### Medical group performance over time (2012-2014)

We reviewed the data to identify patterns of medical group performance in clinics with three years of data beginning in 2012. We looked for patterns of consistently high performance, consistent improvement, consistent decreases and/or relative stability. The results are below in alphabetical order.

Twenty-one medical groups achieved consistently high performance and above average rates over the past three years for Appropriate Testing for Children with Pharyngitis:

- Allina Health System
- Central Pediatrics
- Eagan Valley Pediatrics
- Express Healthcare
- Fairview Medical Group
- FirstLight Health System
- Fridley Children's & Teenagers' Medical Center – Children's Health Network
- HealthPartners Clinics
- MinuteClinic
- Multicare Associates of the Twin Cities
- Park Nicollet Health Services
- Pediatric and Adolescent Services
- Pediatric and Young Adult Medicine - Children's Health Network
- Pediatric Services - Children's Health Network
- Priority Pediatrics Urgent Care
- Ridgeview Clinics
- South Lake Pediatrics - Children's Health Network
- Southdale Pediatric Associates Ltd
- St. Cloud Medical Group - IHN
- Target Clinic
- Wayzata Children's Clinic (Affiliated With Children's Health Network)

Three medical groups showed consistent improvement over three years:

- Fairview Mesaba Clinics
- Riverwood Aitkin Clinic
- Tri-County Health Care

Eight medical groups showed consistent decreases over three years:

- Mayo Clinic Health System - Albert Lea
- Dulcimer Medical Center
- Mayo Clinic Health System - Fairmont
- First Care Medical Services
- HealthEast
- Hennepin Faculty Associates & HCMC Clinics
- Murray County Clinic
- Essentia Health - West Region

Twenty-seven medical groups had rates that were relatively stable over three years:

- Allina Health System
- Central Pediatrics
- Express Healthcare
- Fairview Express Care
- FirstLight Health System
- Fridley Children's & Teenagers' Medical Center – Children's Health Network
- HealthPartners Clinics
- Mankato Clinic
- MinuteClinic
- Multicare Associates of the Twin Cities
- Olmsted Medical Center
- Park Nicollet Health Services
- Pediatric And Adolescent Services
- Pediatric And Young Adult Medicine - Children's Health Network
- Pediatric Services - Children's Health Network
- Physicians Urgent Care Professional
- Raiter Clinic, LTD - IHN
- South Lake Pediatrics - Children's Health Network
- St. Cloud Medical Group - IHN
- Target Clinic
- Wayzata Children's Clinic (Affiliated With Children's Health Network)

Sixty medical groups did not have a discernable pattern over three years.

Please see next page.

## SMALL DECREASE IN STATEWIDE RATE

## Chlamydia Screening in Women

This measures the percentage of sexually active women ages 16-24 who had at least one test for chlamydia during the measurement year.

The statewide rate for Chlamydia Screening is 48 percent. **Table 18** displays the details of the 2014 rate. **Figure 14** displays the statewide rates over time. Since the 2013, this rate has remained stable at 48 percent.

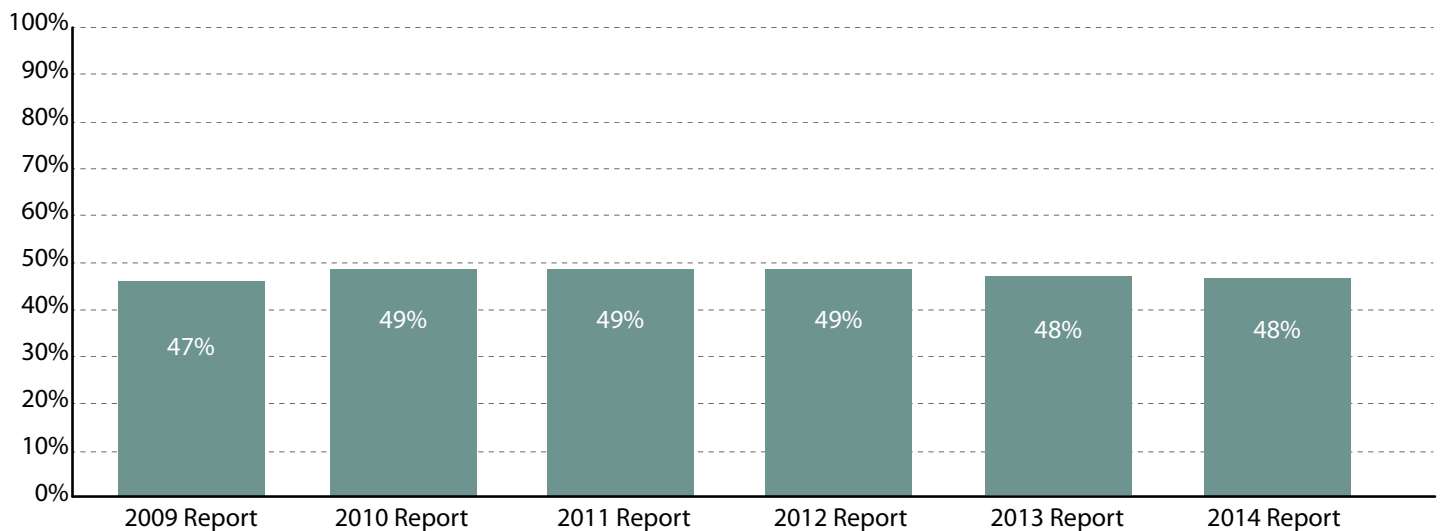

*The data for this measure are collected from health plan claims.*

**TABLE 18: STATEWIDE RATE FOR CHLAMYDIA SCREENING IN WOMEN**

	Statewide Average	95% CI	Numerator (Patients who were screened)	Denominator
Chlamydia Screening in Women	47.5%	47.2%-47.9%	33,527	70,532

\*Statewide Average (above) includes those patients attributed to a medical group AND those who could not be attributed to a medical group.

**FIGURE 14: STATEWIDE RATES FOR CHLAMYDIA SCREENING IN WOMEN OVER TIME**

Caution is recommended when making comparisons from year to year. Annual rate differences can occur due to natural variation, changes in measurement specifications, changes in data sources and other factors.

## PERFORMANCE HIGHLIGHTS FOR CHLAMYDIA SCREENING IN WOMEN

## Medical Group Results

### Highest performers in 2014

Medical group results showed an average of 50 percent of sexually active women ages 16-24 had a chlamydia test. **Face to Face Health and Counseling** set the benchmark of 90 percent. Nineteen of 134 medical groups with rates and confidence intervals fully above the medical group average. These groups are listed below from high to low performance. An asterisk (\*) indicates a Top 15 performer for this measure.

- Face To Face Health & Counseling\*
- NorthPoint Health and Wellness Center\*
- Hennepin Faculty Associates & HCMC Clinics\*
- Edina Sports Health & Wellness\*
- West Side Community Health Services\*
- Planned Parenthood of Minnesota, North Dakota, South Dakota\*
- HealthPartners Clinics\*
- Express Healthcare\*
- Adefris & Toppin Women's Specialists\*
- Mayo Clinic Health System - Red Wing\*
- HealthEast\*
- United Family Medicine\*
- Paul Larson Ob-Gyn Clinic, PA\*
- Neighborhood Healthsource\*
- Allina Specialty Clinic\*
- Fairview Medical Group
- University of Minnesota Physicians
- Premier OB/GYN of Minnesota
- Entira Family Clinics

### Biggest improvement from 2013–2014

The greatest improvement since report year 2013 in Chlamydia Screening in Women (medical group results) was made by **Express Healthcare**, whose score increased by more than 23 percentage points.

## PERFORMANCE HIGHLIGHTS FOR CHLAMYDIA SCREENING IN WOMEN

# Medical Group Results

### Medical group performance over time (2012-2014)

We reviewed the data to identify patterns of medical group performance in clinics with three years of data beginning in 2012. We looked for patterns of consistently high performance, consistent improvement, consistent decreases and/or relative stability. The results are below in alphabetical order.

Eleven medical groups achieved consistently high performance and above average rates over the past three years for Chlamydia Screening in Women:

- Allina Specialty Clinic
- Entira Family Clinics
- Face To Face Health & Counseling
- Fairview Medical Group
- HealthEast
- HealthPartners Clinics
- Hennepin Faculty Associates & HCMC Clinics
- Neighborhood Healthsource
- NorthPoint Health and Wellness Center
- University of Minnesota Physicians
- West Side Community Health Services

Six medical groups showed consistent improvement over three years:

- All About Children Pediatrics - Children's Health Network
- Lakewood Health System
- Planned Parenthood of Minnesota, North Dakota, South Dakota
- Premier OB/GYN of Minnesota
- Tri-County Health Care
- West Side Community Health Services

Thirteen medical groups showed consistent decreases over three years:

- Clinic Sofia Ob/Gyn
- Entira Family Clinics
- Family Tree Clinic
- Fridley Children's & Teenagers' Medical Center – Children's Health Network
- Glencoe Regional Health Services
- HealthEast
- John A. Haugen Assoc.
- Neighborhood Healthsource
- North Clinic
- Obstetrics & Gynecology Associates
- Open Cities Health Center
- Park Nicollet Clinic
- Renville County Hospital And Clinics

Five medical groups had rates that were relatively stable over three years:

- CentraCare Health
- Central Pediatrics
- Community University Health Care Center
- Gundersen Health System
- NorthPoint Health and Wellness Center

Ninety-one medical groups did not have a discernable pattern over three years.

Please see next page.

## SMALL DECREASE IN STATEWIDE RATE

## Follow-up Care for Children Prescribed ADHD Medication

This measures the percentage of children newly prescribed attention-deficit/hyperactivity disorder (ADHD) medication who had at least one follow-up visit with a practitioner with prescribing authority within 30 days of when the first ADHD medication was dispensed.

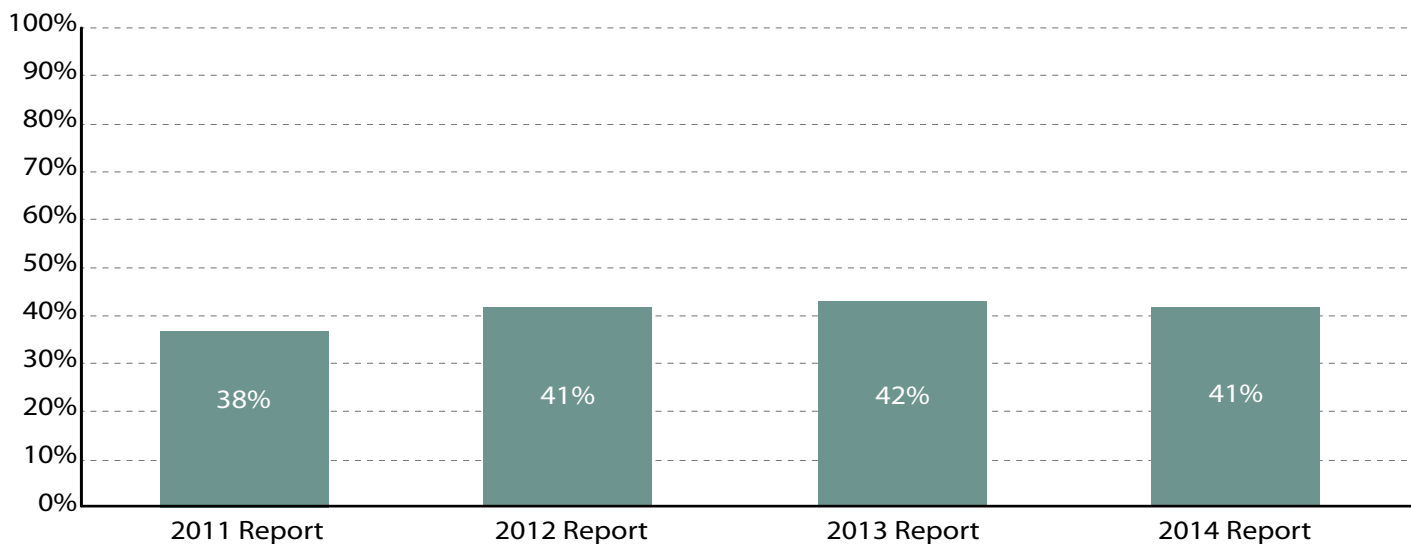

The statewide rate for Follow-up Care for Children Prescribed ADHD Medication is 41 percent. **Table 19** explains the details of the 2014 rate. **Figure 15** shows the average rate for this measure over time. The statewide rate has increased since 2011, but decreased by one percentage point this year.

*Data collected for this measure are from health plan claims.*

**TABLE 19: STATEWIDE RATE FOR FOLLOW-UP CARE FOR CHILDREN PRESCRIBED ADHD MEDICATION**

	Statewide Average	95% CI	Numerator (Patients who received a follow-up visit)	Denominator
Follow-up Care for Children Prescribed ADHD Medication	41.4%	40.1%-42.8%	2,138	5,162

**FIGURE 15: STATEWIDE RATES FOR FOLLOW-UP CARE FOR CHILDREN PRESCRIBED ADHD MEDICATION OVER TIME**

Caution is recommended when making comparisons from year to year. Annual rate differences can occur due to natural variation, changes in measurement specifications, changes in data sources and other factors.

## PERFORMANCE HIGHLIGHTS FOR FOLLOW-UP CARE FOR CHILDREN PRESCRIBED ADHD MEDICATION

### Medical Group Results

#### Highest performers in 2014

Medical group results showed an average of 42 percent of patients had a follow-up visit if they were prescribed ADHD medication. **Central Pediatrics** set the benchmark of 63 percent. There were three out of 37 medical groups with rates and confidence intervals fully above the medical group average. These groups are listed below from high to low performance. An asterisk (\*) indicates a Top 15 performer for this measure.

- Central Pediatrics\*
- Southdale Pediatric Associates Ltd\*
- Fairview Health Services\*

#### Biggest improvement from 2013–2014

The greatest improvement since report year 2013 in Follow-up Care for Children Prescribed ADHD Medication (medical group results) was made by **Avera Medical Group**, whose score increased by almost 25 percentage points.

## PERFORMANCE HIGHLIGHTS FOR FOLLOW-UP CARE FOR CHILDREN PRESCRIBED ADHD MEDICATION

# Medical Group Results

### Medical group performance over time (2012-2014)

We reviewed the data to identify patterns of medical group performance in clinics with three years of data beginning in 2012. We looked for patterns of consistent high performance, consistent improvement, consistent decreases and/or relative stability. The results are below in alphabetical order.

One medical group achieved consistently high performance and above average rates over the past three years for Follow-up Care for Children Prescribed ADHD Medication:

- Southdale Pediatric Associates Ltd

Five medical groups showed consistent improvement over three years:

- All About Children Pediatrics - Children's Health Network
- Altru Health System
- Fairview Health Services
- HealthEast
- University of Minnesota Physicians

Three medical groups showed consistent decreases over three years:

- Essentia Health - Central Region
- HealthPartners Clinics
- South Lake Pediatrics - Children's Health Network

One medical group had a rate that was relatively stable over three years:

- Mayo Clinic

Eighteen medical groups did not have a discernable pattern over three years.

Please see next page.

## SMALL DECREASE IN STATEWIDE RATE

## Childhood Immunization Status (Combo 3)

This measures the percentage of two year old children who received all of the following vaccines by their second birthday:

- Four DTaP/DT
- Three IPV
- One MMR
- Three H influenza type B
- Three Hepatitis B
- One VZV
- Four pneumococcal conjugate

The statewide rate for Childhood Immunization Status (Combo 3) is 78 percent. **Table 20** displays the details of the 2014 rate. **Figure 16** shows the average rate for Childhood Immunization over time. Since the 2007 report, the rate had stayed relatively stable. It dropped in 2011, but increased in 2012 and has since remained stable.

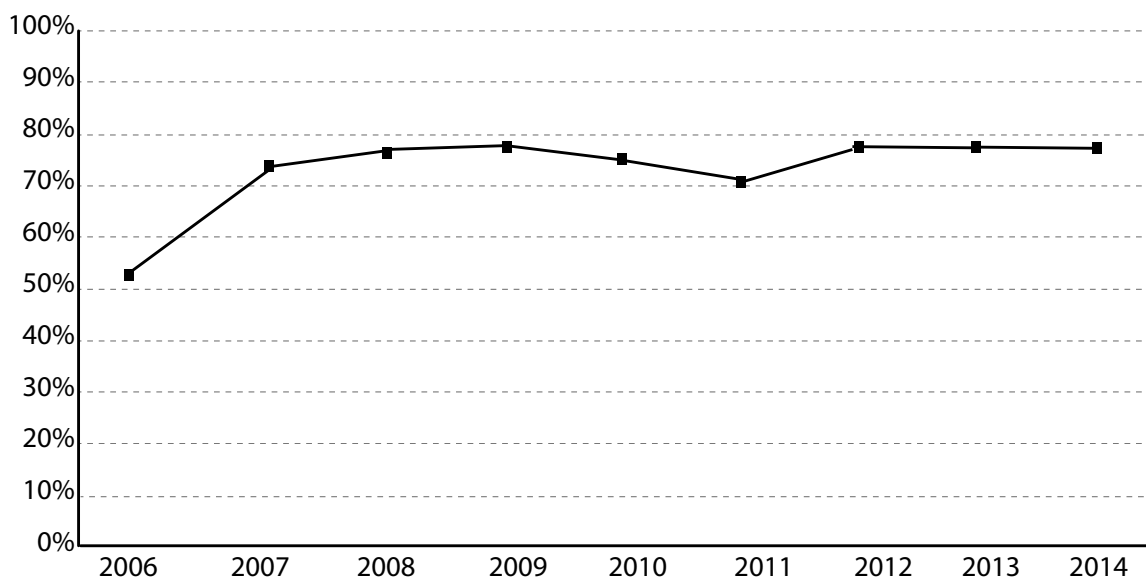

*Data for this measure are collected from health plan claims, the Minnesota Immunization Information Connection registry (MIIC) and medical record review.*

**TABLE 20: STATEWIDE RATE FOR CHILDHOOD IMMUNIZATION STATUS (COMBO 3)**

	Statewide Average (Weighted)	95% CI	Numerator (Patients who had all vaccinations)	Denominator (Patients sampled)	Total Eligible
Childhood Immunization	77.5%	76.6%-78.5%	5,304	6,952	25,802

\*Statewide Average (above) includes those patients attributed to a medical group AND those who could not be attributed to a medical group.

**FIGURE 16: STATEWIDE RATES FOR CHILDHOOD IMMUNIZATION STATUS (COMBO 3) OVER TIME**

Caution is recommended when making comparisons from year to year. Annual rate differences can occur due to natural variation, changes in measurement specifications, changes in data sources and other factors.

## PERFORMANCE HIGHLIGHTS FOR CHILDHOOD IMMUNIZATION STATUS (COMBO 3)

# Medical Group Results

### Highest performers in 2014

Medical group results showed an average of 80 percent of two year old children were up-to-date with all recommended immunizations by their second birthday. **Mankato Clinic** set the benchmark of 94 percent. Twelve of 53 medical groups had rates and confidence intervals fully above the medical group average. These groups are listed below from high to low performance. An asterisk (\*) indicates a Top 15 performer for this measure.

- Mankato Clinic\*
- Affiliated Community Medical Centers\*
- Lakeview Clinic, Ltd.\*
- Stillwater Medical Group\*
- Buffalo Clinic, PA - IHN\*
- Children's Health Care\*
- St. Cloud Medical Group - IHN\*
- Mayo Clinic\*
- Essentia Health - Central Region\*
- Fairview Medical Group\*
- Sanford Health - Sioux Falls Region\*
- HealthPartners Clinics\*

### Biggest improvement from 2013–2014

The greatest improvement since report year 2013 in Childhood Immunizations (medical group results) was made by **St. Luke's Clinics**, whose score increased by more than 21 percentage points.

## PERFORMANCE HIGHLIGHTS FOR CHILDHOOD IMMUNIZATION STATUS (COMBO 3)

# Medical Group Results

### Medical group performance over time (2012-2014)

We reviewed the data to identify patterns of medical group performance in clinics with three years of data beginning in 2012. We looked for patterns of consistent high performance, consistent improvement, consistent decreases and/or relative stability. The results are below in alphabetical order.

There were no medical groups that achieved consistently high performance and above average rates over the past three years for Childhood Immunization Status (Combo 3).

Four medical groups showed consistent improvement over three years:

- Essentia Health - Central Region
- Fairview Medical Group
- Mankato Clinic
- Stillwater Medical Group

Three medical groups showed consistent decreases over three years:

- Hutchinson Medical Center
- Pediatric And Young Adult Medicine - Children's Health Network
- Pediatric Services - Children's Health Network

Two medical groups had rates that were relatively stable over three years:

- Altru Health System
- CentraCare Health System

Thirty medical groups did not have a discernable pattern over three years.

Please see next page.

## RESULTS BY MEASURE

## Quality: Hospital

Measure results were made available courtesy of the Minnesota Hospital Association (MHA). While specific hospital measure results are not included in this report; they can be found on [MNHealthScores.org](http://MNHealthScores.org) and MNCM's corporate website, [MNCM.org](http://MNCM.org). Hospital measure results include inpatient quality indicators, patient safety indicators, and pediatric patient safety indicators that were developed by the Agency for Healthcare Research and Quality (AHRQ). In addition, results from the Centers for Medicare and Medicaid Services (CMS) Process of Care measures are include heart attack (AMI), heart failure, pneumonia, and surgical care. All of these measures are based on patient discharge information and can serve as an indication of hospital quality. Minnesota hospitals routinely use these measures for quality improvement initiatives.

Each year, MN Community Measurement's Measurement and Review Committee (MARC) determines which measures will be publicly reported by MNCM the following year. During this decision-making process, MARC reviews both what is available on Hospital Compare and recommendations made by the Hospital Quality Reporting Steering Committee, a group facilitated by Stratis Health through a subcontract with MNCM as part of MNCM's State Quality Reporting and Measurement System contract with the Minnesota Department of Health. Generally, MARC aligns with the Hospital Quality Reporting Steering Committee's recommendations whenever it makes sense for MNCM and aims to primarily report hospital measures that are not already publicly reported on Hospital Compare. As a result, the hospital measures that are publicly reported change periodically. Measures that were publicly reported by MNCM in 2014 but are not in 2015 are noted with an asterisk (\*). For the most part, the measures no longer reported in 2015 were discontinued by the Centers for Medicare and Medicaid Services (CMS).

## Agency for Healthcare Research and Quality (AHRQ) Measures

The AHRQ measures are collected by MHA using administrative data from Minnesota hospitals. They reflect the quality of care inside hospitals, and include mortality and surgery measures. The patient safety indicators and pediatric patient safety indicators reflect hospital quality of care, but also focus on avoidable complications and events.

## Inpatient Quality Indicators

- **Abdominal Aortic Aneurysm (AAA) Repair Volume** - This measure is used to assess the raw volume of provider-level AAA repair (surgical procedure).\*
- **AAA Repair Mortality Rate** - This measure is used to assess the number of deaths per 100 discharges with procedure code of AAA repair.\*
- **Percutaneous Transluminal Coronary Angioplasty (PTCA)** - This measure is used to assess the raw volume of provider-level PTCA (surgical procedure).
- **PTCA Mortality Rate** - This measure is used to assess the number of deaths per 100 percutaneous transluminal coronary angioplasties.
- **Coronary Artery Bypass Graft (CABG) Volume** - This measure is used to assess the raw volume of provider-level coronary artery bypass graft (surgical procedure).\*
- **Coronary Artery Bypass Graft (CABG) Morality Rate** - This measure is used to assess the number of deaths per 100 discharges with a procedure code of coronary artery bypass graft.\*
- **Hip Fracture Morality Rate** - This measure is used to assess the number of deaths per 100 discharges with a procedure code of hip fracture.\*

## RESULTS BY MEASURE

## Quality: Hospital

- **Mortality for Selected Conditions Composite** – This composite is a weighted average of the mortality indicators for patients admitted for selected conditions and is used to assess the number of deaths for acute myocardial infarction, congestive heart failure, acute stroke, gastrointestinal hemorrhage, hip fracture and pneumonia.

## Patient Safety Indicators

- **Pressure Ulcer** - This measure is used to assess the number of cases of decubitus ulcer per 1,000 discharges with a length of stay greater than four days.\*
- **Death Among Surgical Patients with Treatable Serious Complications** - This measure is used to assess the number of deaths per 1,000 patients having developed specified complications of care during hospitalization.
- **Post-Operative Pulmonary Embolism or Deep Vein Thrombosis** - This measure is used to assess the number of cases of deep vein thrombosis (DVT) or pulmonary embolism (PE) per 1,000 surgical discharges with an operating room procedure.\*
- **Obstetric Trauma - Vaginal Delivery with Instrument** - This measure is used to assess the number of cases of obstetric trauma (3rd or 4th degree lacerations) per 1,000 instrument-assisted vaginal deliveries.
- **Obstetric Trauma - Vaginal Delivery without Instrument** - This measure is used to assess the number of cases of obstetric trauma (3rd- or 4th-degree lacerations) per 1,000 without instrument assistance.
- **Patient Safety for Selected Indicators Composite\*** – This composite is a weighted average of most of the patient safety indicators and is used to assess the number of potentially preventable adverse events.

## Pediatric Patient Safety Indicators

- **Pediatric Heart Surgery Mortality Rate** - This measure is used to assess the number of in-hospital deaths in pediatric patients undergoing congenital heart disease repair or undergoing a non-specific heart surgery with a diagnosis of congenital heart disease present.
- **Pediatric Heart Surgery Volume** - This measure is used to assess the raw volume of provider-level congenital heart disease repair or non-specific heart surgery with a diagnosis of congenital heart disease present in pediatric patients.
- **Pediatric Patient Safety for Selected Indicators Composite\*** – This composite is a weighted average of most of the pediatric quality indicators and is used to assess the number of potentially preventable adverse events.

## Centers for Medicare and Medicaid Services (CMS) Measures

The following are Process of Care measures reported through Hospital Compare ([hospitalcompare.hhs.gov](http://hospitalcompare.hhs.gov)). MHA provides these measures using administrative discharge data collected from Minnesota hospitals.

## Mortality Measures

- Hospital 30-day, all-cause, risk-standardized mortality rate following **acute myocardial infarction** hospitalization (MORT-30-AMI).
- Hospital 30-day, all-cause, risk-standardized mortality rate following **heart failure** hospitalization (MORT-30-HF).

## RESULTS BY MEASURE

# Quality: Hospital

- Hospital 30-day, all-cause, risk-standardized mortality rate following **pneumonia** hospitalization (MORT-30-PN).

For detailed results for all AHRQ/CMS measures noted on previous pages for individual Minnesota hospitals, please refer to [MNHealthScores.org](http://MNHealthScores.org).

### Vermont Oxford Network (VON)

**Late sepsis or meningitis in very low birth weight neonates.** This measure is used to assess the infection rate for inborn and outborn infants meeting certain age and weight requirements for hospitals with a level 3 neonatal intensive care unit.

### Centers for Disease Control and Prevention/National Healthcare Safety Network (NHSN) - Based Healthcare-Associated Infection

**Central line-associated bloodstream infection (CLABSI) event.** This measure is used to assess the infection rate of patients with a central-line associated bloodstream infection event by inpatient hospital unit for hospitals with a neonatal intensive care unit and/or pediatric intensive care unit.

For detailed results on VON and NHSN measures, please refer to [MNCM.org/Reports-and-Websites/Reports-and-Data](http://MNCM.org/Reports-and-Websites/Reports-and-Data) under “Available Data”.

Please see next page.

## RESULTS BY MEASURE

## Patient Experience of Care: Clinic

Patient experience of care refers to everything that happens to patients from the moment they walk into the provider's office until the end of the appointment. It also includes phone calls and/or other contacts a patient has with the provider's office before, during or after appointments.

In 2008 and 2010, MNMCM piloted the implementation of a standard, comparable patient experience of care survey and process with participating medical groups and vendors. In 2012, MNMCM implemented the first ever statewide patient experience of care survey. The statewide process was mandated under the Minnesota Department of Health's (MDH) Statewide Quality Reporting and Measurement System (SQRMS) for eligible clinics who met size and clinical specialty criteria. The survey cycle beginning in 2014 marks the second collection of statewide Patient Experience data collection under the biennial Rule.

In 2014, the Patient Experience of Care data will be collected from patient responses to the Clinician & Group – Consumer Assessment of Healthcare Providers and Systems® (CG-CAHPS) 12-Month survey – a change from the survey used in 2012 called the CG-CAHPS Visit version. The survey will be mailed or completed over the phone or web on a random sample of patients ages 18 and older who had office visits from September 1 through November 30, 2014 (three months). As of the beginning of 2015, more than 850 clinics intend to have the survey fielded on their behalf by CAHPS-certified survey vendors.

An analysis of the data produces four composite scores called “domains” for each clinic. These clinic domain scores are reported as top box scores – meaning the percent of responses that rated the clinic with the “most positive” response.

- **Access to care** (availability of appointments, care and information when needed over the past year).
- **Courtesy and respect of office staff** (how polite and helpful office staff had been, for example, a receptionist that treats patients with courtesy and respect).
- **Communication with doctors** (how well providers listen and explain care instructions in a way that patients understand).
- **Provider rating question** (how a patient would rate the provider on a point scale (0 to 10) with zero being the worst possible provider rating and ten being the best possible provider rating).

The Patient Experience data collected in 2012 (September 1 through November 30, 2011 dates of service) is displayed on [MNHealthScores.org](http://MNHealthScores.org). Across all respondents, the overall top box domain averages for 2012 were:

- **Access to Care** = 60 percent
- **Provider Communication** = 90 percent
- **Courteous & Helpful Office Staff** = 91 percent
- **Provider Rating** = 78 percent

**The 2014 results will be collected, reported and validated in the second quarter of 2015 and reported at the clinic level in the third quarter of 2015.**

Please see next page.

## RESULTS BY MEASURE

## Patient Experience of Care: Hospital

The Centers for Medicare & Medicaid Services (CMS), along with the Agency for Healthcare Research and Quality (AHRQ), developed the HCAHPS® (Hospital Consumer Assessment of Healthcare Providers and Systems) Survey, also known as Hospital CAHPS®, to provide a standardized survey instrument and data collection methodology for measuring patients' perspectives on hospital care.

The HCAHPS® Survey is administered to a nation-wide random sample of patients continuously throughout the year. The survey is not restricted to Medicare beneficiaries only. CMS cleans, adjusts and analyzes the data, then publicly reports the results on its website, [hospitalcompare.hhs.gov](http://hospitalcompare.hhs.gov). The Minnesota Hospital Association provides the data to MNCM, which publicly reports it on [MNHealthScores.org](http://MNHealthScores.org).

The most current HCAHPS® data that is publicly reported was collected from hospital admission dates January – December 2012 and 10 domains are reported. The statewide rates for each of these domains are listed below.

Domains	Minnesota Rate (% Most Positive)
Nurse communication	80
Doctor communication	83
Responsiveness of hospital staff	73
Pain management	71
Communication about medicines	66
Discharge information	87
Cleanliness of hospital environment	77
Quietness of hospital environment	64
Overall rating of hospital	73
Willingness to recommend hospital	73

For detailed measure results for individual Minnesota hospitals, please refer to [MNHealthScores.org](http://MNHealthScores.org).

Please see next page.

## RESULTS BY MEASURE

# Cost: Total Cost of Care

**Total Cost of Care** is a National Quality Forum (NQF)-endorsed methodology, which includes all health care costs associated with treating commercially-insured patients, including professional, facility inpatient and outpatient, pharmacy, lab, radiology, behavioral health and ancillary costs. NQF is considered the gold standard of health care measurement endorsement.

Total Cost of Care results were published for the first time in December of 2014 allowing consumers to compare the total cost of care at medical groups across the state.

Costs representing more than 1.5 million patients were included in the results, which is the nation's most comprehensive look at the total cost of care. Information is available for 115 medical groups, representing 1,052 clinics across Minnesota and in neighboring communities on [MNHealthScores.org](http://MNHealthScores.org).

The **average monthly cost of medical care per patient is \$435** and just a small reduction could save millions.

The results, posted on [MNHealthScores.org](http://MNHealthScores.org), include data based on 2013 claims from the four health plans in Minnesota with the largest commercially-insured populations: Blue Cross and Blue Shield of Minnesota, HealthPartners, Medica and PreferredOne. The health care costs evaluated for this report totaled more than \$8 billion.

The total cost of care is the **full cost** – paid by both patients and health insurance companies. The amounts have been risk-adjusted and outlier costs have been removed to create a level playing field for all medical groups so true differences in cost can be evaluated.

The release of this Total Cost of Care report is the result of a three-year community-based effort, involving more than 40 representatives from medical groups, health plans, large employers, consumer groups, the State of Minnesota, professional associations and health care improvement organizations. Technical assistance and data validation was conducted by independent statisticians as well as local and national experts, including NQF, the Network for Regional Healthcare Improvement and Johns Hopkins University.

This information will continue to provide the community with more transparency on the actual cost of care and help MNCM identify opportunities for more improved reporting for episodes of care or other average cost of care measures.

**For detailed measure results for individual Minnesota medical groups, please refer to [MNHealthScores.org](http://MNHealthScores.org).**

Please see next page.

## RESULTS BY MEASURE

## Health Information Technology (HIT): Clinic

Health Information Technology (HIT) is the use of computers and computer programs, such as an electronic health record (EHR) to store, retrieve and securely transfer patient information electronically within health care settings. HIT use in clinics includes three phases: 1) adopting an EHR system; 2) using its various features to gather and manage patient information; and 3) exchanging information among doctors' offices.

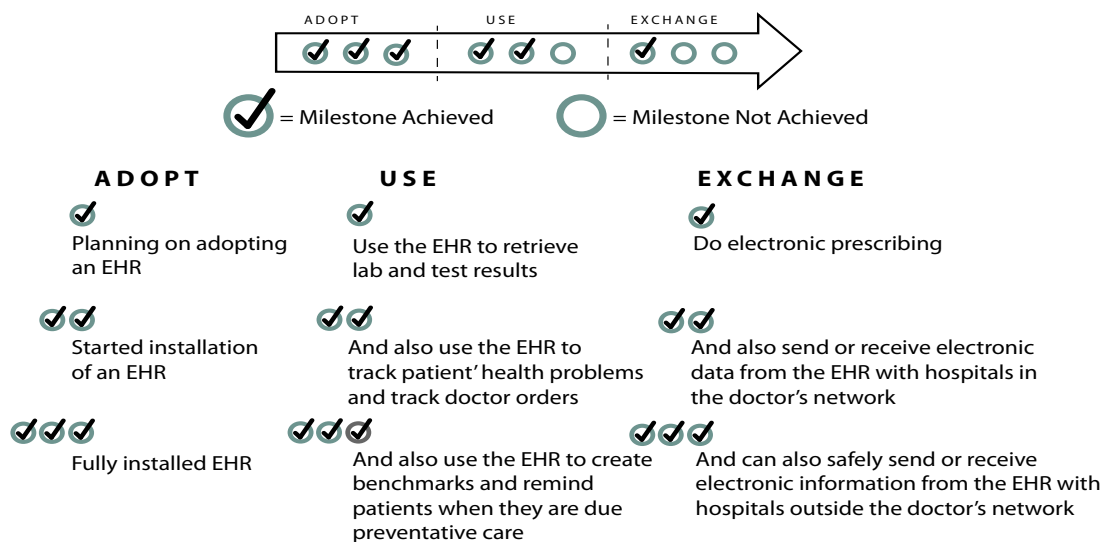

- **Adopt:** Information about a patient and the care that the patient needs is recorded in an EHR instead of a paper medical record.
- **Utilization:** A patient's doctor uses the EHR to order lab tests, track health problems and improve the patient's care.
- **Exchange:** A patient's information is sent and received in a secure manner among the doctors involved in the patient's care.

Doctors, hospitals, laboratories and pharmacies that use HIT can document and share information about the care they provide. This can be helpful if a patient sees multiple doctors or has a medical condition that requires specific types of care.

The **table** and **checkmarks** below indicate how successful Minnesota doctors and other health care providers were in advancing the use of HIT in their practices. Each checkmark represents a milestone. More checkmarks shows more extensive HIT use, which relates to higher quality care.

Small differences in the number of checkmarks in the full report should not be of concern. It is more important to look at larger differences. The information in this report is collected annually between February and March, so results may not reflect recent advancements in an individual clinic's efforts to use HIT.

For detailed measure results for individual clinics, please refer to MNHealthScores at [MNHealthScores.org](http://MNHealthScores.org).

## RESULTS BY MEASURE

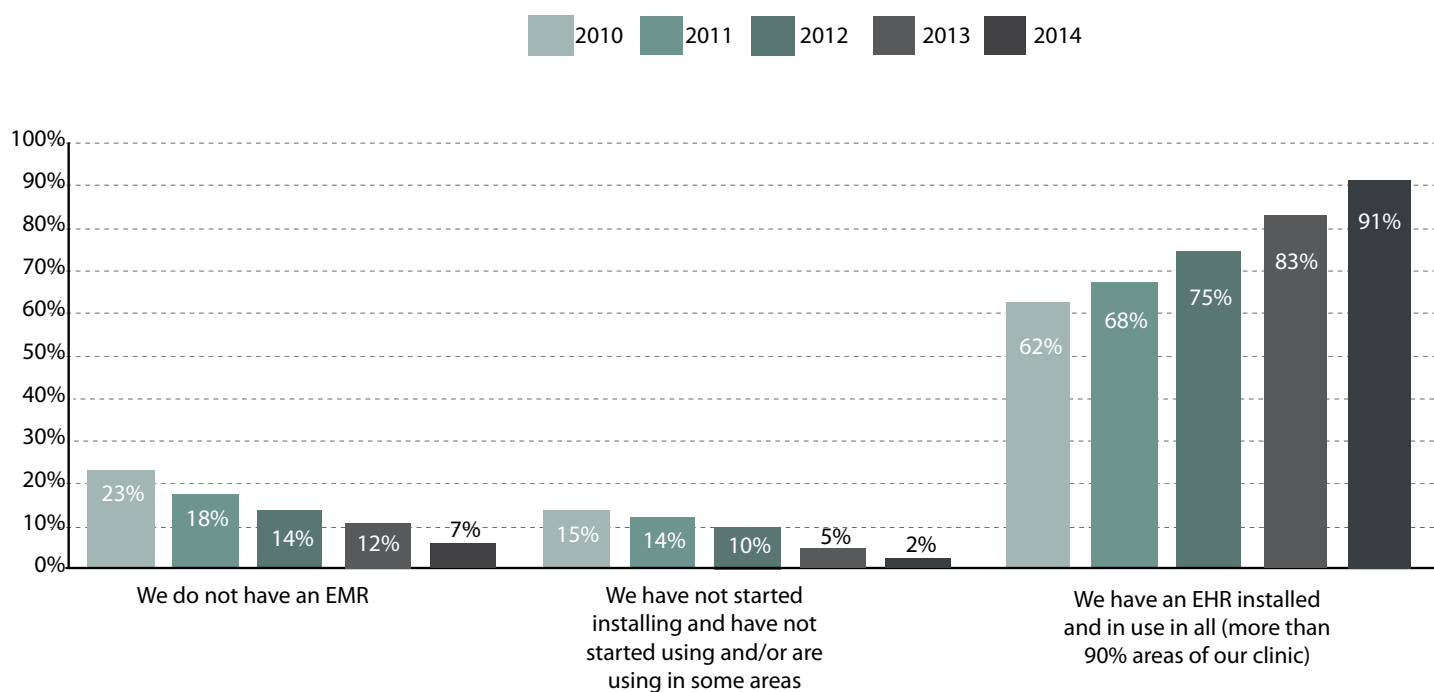

## Health Information Technology (HIT): Clinic

The HIT measure results are based on clinic staff responses to the 2014 Health Information Technology (HIT) Ambulatory Clinic Survey, conducted electronically by MN Community Measurement (MNCM). A unique survey link was sent to each clinic registered with MNCM, in Minnesota and bordering states. The survey was fielded in early 2014 and a response rate of 86 percent was obtained from 1,316 respondents.

The total number of clinics responding to the HIT survey in previous years was: 1,364 in 2013; 1,247 in 2012; 1,313 in 2011; and 1,198 in 2010.

**Figure 17** below represents the percentage of clinics in relevant electronic health record (EHR) adoption and utilization modes and show the increase of clinics' use of EHRs over time.

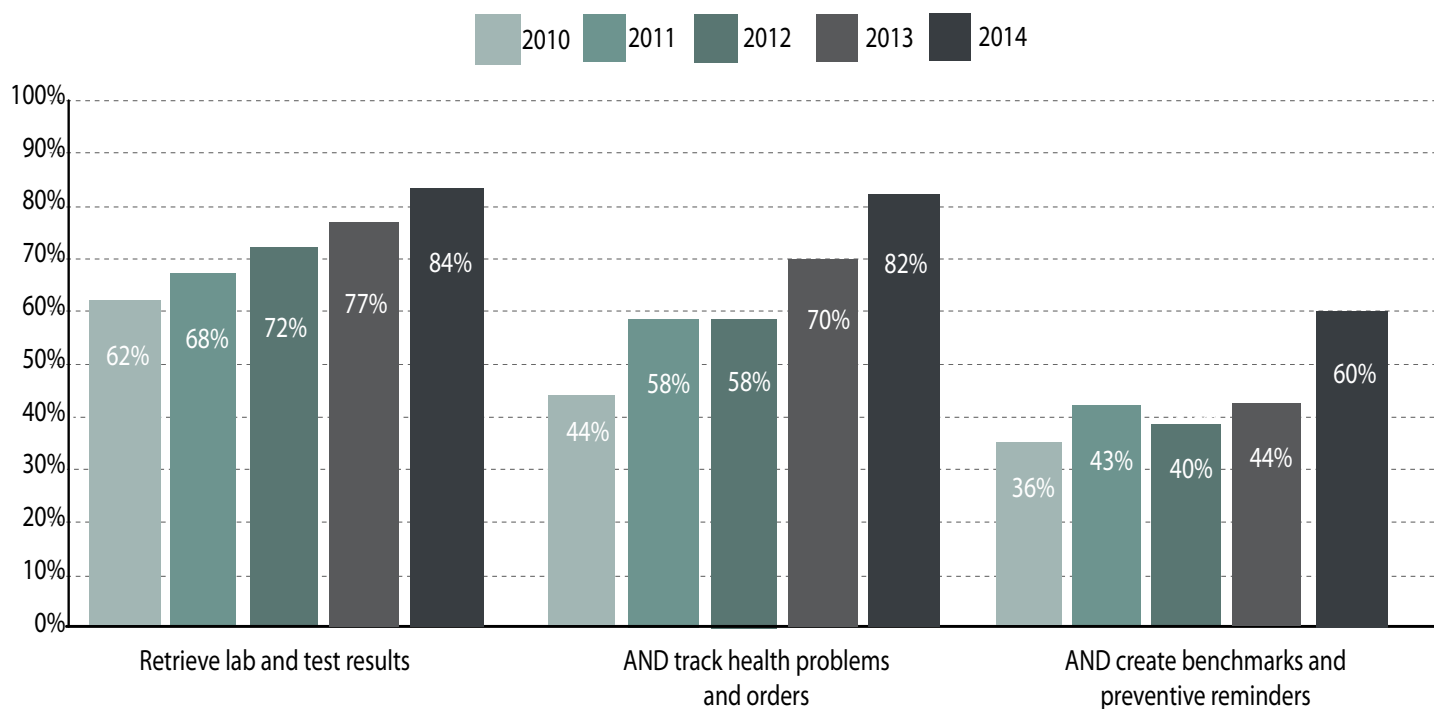

**FIGURE 17: EHR ADOPTION FOR CLINICS OVER TIME**

In 2014, 91 percent of respondents that had an EHR installed and in use in all of their clinics, compared to 83 percent of clinics in 2013, 75 percent in 2012 and 68 percent in 2011. This rate is near a universal EHR installation across all clinics in Minnesota and some clinics in bordering states. Conversely, the percentage of clinics without an EHR (nor a plan to adopt in the near future) has continued to fall each year to the current low of seven percent.

## RESULTS BY MEASURE

## Health Information Technology (HIT): Clinic

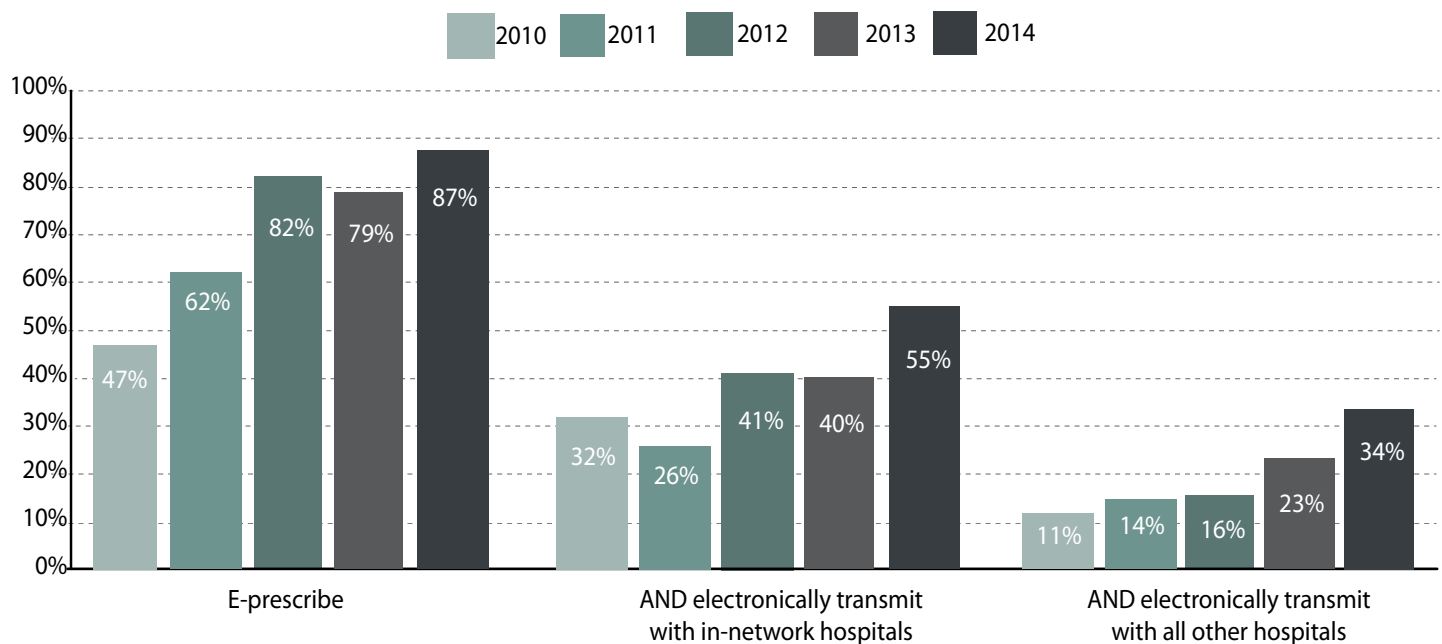

**FIGURE 18: EHR UTILIZATION FOR CLINICS OVER TIME**

**Figure 18** above shows that the advancement of EHR utilization has continued to increase over time. Eighty-four percent of clinics used their EHR to retrieve lab and test results in 2014; and 82 percent of clinics also utilized their EHR for patient problem lists and orders. Yet the most advanced phase of utilization, which includes data benchmarking and creating patient preventive exam reminders, has seen the largest increase (a 16 percentage point increase) from 44 percent of clinics in 2013 to 60 percent of clinics in 2014.

The use of EHRs for more advanced tasks such as transfer and receipt of patient information to improve coordinated care has also increased over the past few years for Minnesota clinics and some clinics in bordering states.

## RESULTS BY MEASURE

## Health Information Technology (HIT): Clinic

**FIGURE 19: EHR INFORMATION EXCHANGE FOR CLINICS OVER TIME**

**Figure 19** shows that 87 percent of clinics reported utilizing e-prescribing in 2014, up from 79 percent the year prior. E-prescribing increases efficiencies by electronically sending prescriptions directly to a participating pharmacy without any intermediary steps. More important is the ability of clinics to electronically send patient care information directly to other sites of care, both in-network and out-of-network. The increased use of this functionality is substantial: 55 percent of clinics exchange patient information within their network compared to 40 percent last year; and in 2014 one-third of clinics are able to exchange patient information with hospitals outside of their network.

**In summary, each phase showed improvement this year.**

Please see next page.

## SUMMARY OF RESULTS

## Statewide and Medical Group Summary by Measure

**Table 21** on the next page provides an overview of the statewide averages by measure. It also includes the percentage point change in the average rates from 2013 to 2014, as well as the percentage point change over time for applicable measures. We were unable to make rate comparisons to previous years for some measures because this was the first year the measures were reported or a measure experienced specification changes this year.

OF THOSE 21 MEASURES, 18 OF THEM HAD A STATEWIDE RATE THAT INCREASED.

**Twenty-one** out of 26 measures had performance rates that could be compared to last year. Of those 21 measures, 18 of them had a statewide rate that increased. There were two measures with large increases in their statewide rate: Optimal Asthma Care - Children Ages 5-17; and Optimal Asthma Care - Adults Ages 18-50. Three measures had moderate increases in their statewide rate: Immunizations for Adolescents; Appropriate Treatment for Adult Bronchitis; and PHQ-9 Follow-Up at Six Months). The majority of the increases in statewide rates were

small in the following 12 measures: Optimal Vascular Care; Use of Spirometry Testing in the Assessment and Diagnosis of COPD; Optimal Diabetes Care; Colorectal Cancer Screening; Depression Response at Six Months; Appropriate Treatment of Children with URI; PHQ-9 Utilization; PHQ-9 Follow-Up at 12 Months; Depression Remission at Six Months; Controlling High Blood Pressure; Depression Remission at 12 Months; and Depression Response at 12 Months. Four measures had small decreases in their statewide rates: Appropriate Treatment for Children with Pharyngitis; Chlamydia Screening in Women; Follow-up Care for Children Prescribed ADHD Medication; and Childhood Immunization Status (Combo 3). There were no measures that fell into the category of moderate or large decreases in statewide rate.

This was the fourth year of data collection for **Optimal Asthma Care - Children Ages 5-17** and **Optimal Asthma Care - Adults Ages 18-50**. The 2014 statewide rate for each of these measures significantly increased from 2013. Results indicate that improvement was achieved in managing care in clinic settings. More extensive implementation of a valid asthma control tool may have contributed to increased performance rates for both asthma populations.

Other measures that showed noticeable increases from 2013 include **Immunizations for Adolescents** and **Appropriate Treatment for Adult Bronchitis**. This is the third year of reporting for Immunizations for Adolescents, and the statewide rate continues to increase. Bronchitis has also shown improvements since 2012, and this trend continued.

The **Childhood Immunization Status (Combo 3)** has increased by 25.5 percentage points since 2006; however, this increase has not been stable, indicating there is continued room for improvement for this measure.

Each of the statewide averages for the four **depression care** measures achieved slight increases. While there is significant room for improvement, it is encouraging to see progress being made for this specific population.

There were **seven measures added to this report**: four of them are new to 2014 reporting: Maternity Care: Primary C-Section Rate and Total Knee Replacement (three measures total); the other three measures have been publicly reported before but are new to this report: PHQ-9 Follow-Up at Six Months; PHQ-9 Follow-Up at 12 Months; and PHQ-9 Utilization. Each measure shows room for improvement.

There was one measure, **Breast Cancer Screening**, that experienced revisions to its age criterion this year. Due to this change, no trend data is available for this measure.

## SUMMARY OF RESULTS

## Statewide and Medical Group Summary by Measure

TABLE 21: MN COMMUNITY MEASUREMENT STATEWIDE RESULTS COMPARISONS TO PREVIOUS YEARS

Quality Measure	2014 Statewide Average (2013 Dates of Service)	Percentage Point Change Statewide 2013 vs. 2014	Percentage Point Change Over Time
<b>New Measures</b>			
<b>Breast Cancer Screening (Mammograms)</b> (Medical Group Level Results)	76.2%	N/A	N/A
<b>Maternity Care: Primary C-Section Rate</b> (Medical Group Level Results)	22.2%	N/A	N/A
<b>Total Knee Replacement (TKR): TKR Procedure w/Pre-Op OKS</b> (Medical Group Level Results)	35.7%	N/A	N/A

<b>Total Knee Replacement (TKR): TKR Procedure w/Pre-Op &amp; Post-Op OKS</b> (Medical Group Level Results)	18.2%	N/A	N/A
<b>Large Increase in Statewide Rate</b>			
<b>Optimal Asthma Care - Children Ages 5-17*</b> (Clinic Level Results)	56.3%	7.1↑	32.0 ↑ (4 years)
<b>Optimal Asthma Care - Adults Ages 18-50*</b> (Clinic Level Results)	46.8%	6.7↑	31.1 ↑ (4 years)
<b>Moderate Increase in Statewide Rate</b>			
<b>Immunizations for Adolescents *</b> (Medical Group Level Results)	62.0%	3.2↑	8.6 ↑ (3 years)
<b>Appropriate Treatment for Adult Bronchitis</b> (Medical Group Level Results)	28.8%	3.2↑	9.5 ↑ (6 years)
<b>PHQ-9 Follow-Up at Six Months</b> (Clinic Level Results)	30.8%	3.1↑	3.1 ↑ (2 years)
<b>Small Increase in Statewide Rate</b>			
<b>Optimal Vascular Care *</b> (Clinic Level Results)	50.0%	1.5↑	0.6 ↑ (3 years)
<b>Use of Spirometry Testing in the Assessment and Diagnosis of COPD</b> (Medical Group Level Results)	39.2%	1.4↑	4.2 ↑ (5 years)
<b>Optimal Diabetes Care *</b> (Clinic Level Results)	38.9%	1.2↑	1.9 ↑ (3 years)
<b>Colorectal Cancer Screening*</b> (Clinic Level Results)	69.9%	1.1↑	5.1 ↑ (4 years)
<b>Depression Response at Six Months</b> (Clinic Level Results)	89.9%	1.1↑	3.6 ↑ (4 years)
<b>Appropriate Treatment for Children with URI</b> (Medical Group Level Results)	12.8%	1.1↑	4.2 ↑ (9 years)
<b>PHQ-9 Utilization</b> (Clinic Level Results)	70.0%	1.1↑	1.9 ↓ (6 years)
<b>PHQ-9 Follow-Up at 12 Months</b> (Clinic Level Results)	23.3%	1.1↑	1.1 ↑ (2 years)
<b>Depression Remission at Six Months</b> (Clinic Level Results)	7.7%	0.8↑	3.5 ↑ (6 years)
<b>Controlling High Blood Pressure*</b> (Medical Group Level Results)	75.6%	0.5↑	10.1 ↑ (8 years)
<b>Depression Remission at 12 Months</b> (Clinic Level Results)	5.9%	0.4↑	1.4 ↑ (5 years)
<b>Depression Response at 12 Months</b> (Clinic Level Results)	9.8%	0.4↑	1.6 ↑ (4 years)
<b>Small Decrease in Statewide Rate</b>			
<b>Appropriate Treatment for Children with Pharyngitis</b> (Medical Group Level Results)	88.4%	0.3↓	6.6 ↑ (9 years)
<b>Chlamydia Screening in Women (Ages 16-24)</b> (Medical Group Level Results)	47.5%	0.3↓	0.2 ↑ (6 years)
<b>Follow-Up Care for Children Prescribed ADHD Medication</b> (Medical Group Level Results)	41.4%	0.3↓	3.3 ↑ (4 years)
<b>Childhood Immunization Status (Combo 3) *</b> (Medical Group Level Results)	77.5%	0.5↓	25.5 ↑ (9 years)

\*These statewide averages are weighted (see methods).

N/A = Measure specifications changed or the measure is in its first year of implementation. Comparisons cannot be made.

See page 174 for measure category definitions.

## APPENDIX

## Highest Performers in 2014 by Medical Group Type for Clinical Measures

The following **tables 22-26** list the high-performing medical groups by type based on the clinical measures on which they were reported. These groups had above-average rates on most clinical measures.

Three primary care medical groups achieved rates that were above average more frequently than others. Each of these medical groups achieved above-average rates on at least half of the clinical measures on which they were reported.

**TABLE 22: HIGH PERFORMING MEDICAL GROUPS IN 2014 - PRIMARY CARE**

Measure	Health Partners Clinics 13 out of 18	Park Nicollet Health Services 13 out of 18	Fairview Health Services 12 out of 18
ADHD			●
Adolescent Immunizations	●	●	
Breast Cancer Screening	●	●	●
Bronchitis	●		
Childhood Immunization Status (Combo 3)	●		●
Chlamydia Screening	●		●
Colorectal Cancer Screening	●	●	●
Controlling High Blood Pressure		●	●
COPD	●	●	●

## APPENDIX

# Highest Performers in 2014 by Medical Group Type for Clinical Measures

For all measures, we observed considerable variation across medical groups/clinics. For two measures, some medical groups achieved performance rates of 100 percent.

**TABLE 27: MEDICAL GROUP PERFORMANCE VARIATION IN 2014**

Please see next page.

## Future Plans

As we look into 2015, MN Community Measurement (MNCM) remains focused on being a catalyst for change and driving toward low-cost, high-quality care provided in a way that satisfies and empowers patients. We are deeply grateful for the collaboration, time and contributions of the stakeholders who help us steer Minnesota and our nation toward improvements in health and health care.

### What's next for cost of care?

With the release of **Total Cost of Care (TCOC)** in late 2014, MNCM capped a three-year, multi-stakeholder process to develop a standardized, repeatable and actionable measure of the total cost of care for Minnesota. More than three dozen committed, expert stakeholders worked with MNCM to define the methodology and data collection process; we are deeply grateful for the collaboration, time and contributions of these stakeholders who are helping to steer the state and nation toward a meaningful conversation about cost of care.

So what's next? Our multi-stakeholder group is focused primarily on two areas that could continue to evolve this work: First, development of a resource use measure that could be paired with TCOC to provide medical groups with information on whether they're spending efficiently. Second, using cost information for "episodes" of care, which would build on the procedure cost data that is available today to bundle procedures/conditions that require patients to undergo multiple office visits, medications, and/or specialty services (e.g., total knee replacement, labor & delivery, diabetes).

### Measurement focus: patient-reported outcomes, specialty care

With significant measure development work completed in 2014, we'll see the fruits of much of that labor in 2015. After a four year effort to develop new specialty measures utilizing **patient-reporting outcomes**, public reporting of total knee replacement and spine surgery outcome measures is expected in 2015. Additionally, we'll report two pediatric preventive care measures – mental health screening and obesity counseling – for the first time. These will help round out MNCM's suite of measures and our measurement framework.

We will continue to focus on patient-reported outcome measures that provide actionable information for consumers and providers. In the coming year, we expect measure development to focus on low back pain, colonoscopy quality, cancer care and other topics.

### Second statewide patient experience survey

In partnership with the Minnesota Department of Health, MNCM plans to release the second statewide **patient experience of care** survey in 2015. This is a statewide measure across a full population, which sets Minnesota apart from other states with patient experience information. The data helps illuminate how patients feel about care delivered at clinics in Minnesota and surrounding communities. The survey is conducted every other year.

### Shining a spotlight on health disparities

Minnesota providers have steadily improved their collection and reporting of **race, Hispanic ethnicity, country of origin, and preferred language (REL)** data to help drive quality improvements that reduce health disparities. Over the past year, MNCM reached a critical milestone that allowed us to publicly report statewide and regional information on five Direct Data Submission measures by race, Hispanic ethnicity, preferred language, and country of origin. Medical groups are also able to use this data privately for quality improvement initiatives.

## Future Plans

Minnesota's community has rallied around collection and reporting of REL data voluntarily. We collect more data and follow best practices more widely than any other state, allowing our community to target disparities in a meaningful way. It has also positioned MNCM well to be a leader in the testing and use of socio-demographic factors to improve outcomes for patients.

### Advancements in consumer use of data

We have always strived to provide consumers with actionable information; however, we're now in a position to do this in a way that we've never been able to before. By providing information on cost, quality and patient experience, we can do this in unprecedented ways. We can now provide a view of care across the spectrum and provide consumers with each piece of information they need to make informed decisions and partner with their providers on their care.

This year, we rethought and redesigned our public reporting, consumer-focused website, [MNHealthScores.org](http://MNHealthScores.org), to make it as easy-to-understand and as actionable as possible. The new website features consumer-friendly data displays that were designed using best practices gleaned from more than a decade of academic research on interpretation of health care cost and quality information. As part of this, we introduced the HealthScore, an easy-to-understand icon and label that groups data into clear categories and provides consumers with important context to guide understanding.

We also know these tools are being utilized more than ever before. [MNHealthScores.org](http://MNHealthScores.org) and [MNCM.org](http://MNCM.org) received more than 80,000 visits in 2014. **Our vision remains to be the trusted source for performance measurement and public reporting of data across the spectrum of health care.**

## Acknowledgements

The *2014 Health Care Quality Report* is a collaborative effort led by MN Community Measurement on behalf of the Minnesota health care community and the broader public. We would like to acknowledge the contributions of all organizations that shared their resources, and the individuals who shared their time and expertise to make this report possible. We offer our sincerest thanks to:

**The health plans and county-based purchasing organizations that contributed data for this report:** Blue Cross and Blue Shield of Minnesota, HealthPartners, Itasca Medical Care, Medica, Metropolitan Health Plan, PreferredOne, PrimeWest, Sanford Health Plan, South Country Health Alliance, and UCare.

**The medical groups and clinics that submitted data for this report:** Names are listed on pages 167-168.

**The Data Planning Committee, (delivering technical guidance on measure specifications and data collection):** Sarah Cook-Burton, Lisa Deml, Ann Herzog Morrison, Paul Koehler, James Krizak, Jason Johnson, Jonathon Moon, Margareth Ranheim, Sherri Ryan, David Sawyer, Monica Simmer, Brett Skyles, Alex Tava, Kathryn Thies, and Rachel Woods.

**The members of all measure development committees who contributed their time and expertise in developing new measures.**

**The Measurement and Reporting Advisory Committee, (providing expertise in reporting policy and measure selection):** Howard Epstein, Matt Flory, Stefan Gildemeister, Tim Hernandez, David Homans, Sue Knudson, Larry Lee, Robert Lloyd, Caryn McGear, Bill Nersesian, Chris Norton, Mark Nyman, Rahshana Price-Isuk, Jeff Rank, Ann Robinow, Allan Ross, Laura Saliterman, David Satin, Darin Smith, Kris Soegaard, Mark Sonneborn, and Dan Walczak.

**The MN Community Measurement Board of Directors, (granting organizational oversight and leadership support):** Beth Averbeck, Julie Brunner, Ann Carlson, Jim Chase, Daryll Dykes, Tim Hernandez, David Homans, Pam Houg, Scott Leitz, Sanne Magnan, Lawrence Massa, Paul Mattessich, Cara McNulty, Robert Meiches, Gordon Mosser, Nancy Nelson, Chris Norton, Marshall Smith, Mark Werner, Penny Wheeler, and Brian Whited.

## Multispecialty and Primary Care Medical Groups Reported in 2014 - (172)

- 7 Day Clinic
- AALFA
- Advanced Medical Clinic
- Affiliated Community Medical Centers
- Albany Medical Center
- Alexandria Clinic
- Allina Health System
- Allina Medical Clinic
- Altru Health System
- Amery Regional Medical Center
- Apple Valley Medical Clinic
- Appleton Area Health Services
- Avera Medical Group
- Avera Medical Group - Estherville Medical Clinic
- Avera Medical Group - Pipestone
- Avera Medical Group-Aberdeen/Ipswich/Marshall Cty Cl.
- Avera Medical Group - Marshall
- Avera Med. Grp - McGreevy Cl., United Med. Ctr, Worthington Speciality Cl.
- Avera Medical Group - Tyler Medical Clinic
- Axis Medical Center
- Baldwin Area Medical Center
- Barnesville Area Clinic
- Bluestone Physician Services
- Boynton Health Service
- Buffalo Clinic, PA - IHN
- Burnett Medical Center
- Burnsville Family Physicians
- Catalyst Medical Clinic
- CCMH - Montevideo Clinic
- Cedar Riverside People's Center
- CentraCare Health System
- Chippewa Cty Montevideo Hosp & Medical Clinic
- Community Memorial Hospital
- Community University Health Care Center

## Other Types of Medical Groups Reported in 2014

### Ten Allergy Medical Groups

- Advancements in Allergy & Asthma Care
- Allergy & Asthma Specialists, PA
- Allergy and Asthma Specialty Clinic
- Allergy, Asthma & Immunology Clinic
- Allergy, Asthma & Pulmonary Associates, PA
- Children's Respiratory & Critical Care Specialists
- Midwest Ear, Nose & Throat Specialists
- Minnesota Allergy & Asthma Clinic, PA
- Minnesota Lung Center/Minnesota Sleep Institute
- Southdale Allergy & Asthma Clinic

### Twenty-one Behavioral Health Medical Groups

- Associated Clinic of Psychology
- Associates in Psychiatry & Psychology
- BHSI
- Caritas Mental Health Clinic
- Carver County Mental Health Program
- Family Life Center
- Goodhue County Mental Health
- Lakeland Mental Health Center
- Mental Health Resources
- Midwest Center for Personal & Family Development
- Minnesota Mental Health Clinics
- Northern Pines Mental Health Center, Inc.
- Nystrom & Associates, Ltd.
- People Incorporated Stark Mental Health Clinic
- Ramsey County Mental Health
- Scott County Mental Health Center
- South Central Human Relations Center
- St. Cloud Hospital - Behavioral Health Clinic
- Western Mental Health Center, Inc.
- Woodland Centers
- Zumbro Valley Health Center

### One Endocrinology Medical Group

- Endocrinology Clinic of Mpls.

### Eighteen Obstetrics/Gynecology Medical Groups

- Adefris & Toppin Women's Specialists
- Brainerd Medical Center Ob/Gyn
- Clinic Sofia Ob/Gyn
- Comprehensive Healthcare For Women
- John A. Haugen Assoc.
- Metropolitan Obstetrics & Gynecology
- Mn Gyn And Surgery
- Oakdale Ob/Gyn
- OBGYN West
- Obstetrics & Gynecology Associates
- Partners Ob/Gyn
- Paul Larson Ob/Gyn Clinic
- Planned Parenthood Of MN, ND, SD
- Premier OB/GYN of Minnesota
- Southdale Ob/Gyn Consultants
- Western ObGyn
- Women & Adolescent Gynecology Center
- Women's Health Consultants

### Nine Orthopedic Medical Groups

- Heartland Orthopedic Specialists
- Little Falls Orthopedics
- Minneapolis Orthopaedics
- Northern Orthopedics, Ltd.
- Northern Pines Orthopaedic Clinic
- Southwest Minnesota Orthopedics and Sports Medicine
- St. Cloud Orthopedics
- St. Croix Orthopaedics
- The Orthopaedic & Fracture Clinic

### Ten Pediatric/Adolescent Medicine Medical Groups

- All About Children Pediatrics - CPN
- Central Pediatrics
- Children's Clinic Network
- Children's Health Care
- Children's Hosp. Clinics Mpls, StP, Tams
- Eagan Valley Pediatrics
- Edina Family Physicians, P.A.
- Edina Pediatrics
- Fridley Children's & Teenagers' Medical Center - CPN
- Mendakota Pediatrics - CPN
- Northern Lights Pediatric & Adolescent Medicine
- Pediatric And Adolescent Services
- Pediatric & Young Adult Medicine - CPN
- Pediatric Services - CPN
- South Lake Pediatrics - CPN
- Southdale Pediatric Associates Ltd
- Wayzata Children's Clinic (Affiliated With CPN)

### Eleven Urgent/Convenience Care Medical Groups

- Chaska Urgent Care
- Emergency Physicians
- Express Healthcare
- Fairview Express Care
- MinuteClinic
- Physicians Urgent Care Professional
- Priority Pediatrics Urgent Care
- Smart Clinic
- Suburban Emergency Associates
- Target Clinic
- Urgent Care Doctor's Office, PA

## Hospitals Reporting AHRQ and CMS Measures in 2014 - (131)

- Abbott Northwestern Hospital
- Albany Area Hospital and Medical Center
- Appleton Area Health Services
- Avera Marshall Regional Medical Center
- Bigfork Valley Hospital
- Buffalo Hospital
- Cambridge Medical Center

 ^Reported AHRQ, CMS, and VON Measures

**We wish to thank all medical groups, clinics and hospitals in Minnesota and bordering communities for their continued commitment to quality improvement as a means to provide the best care possible for patients.**

## Summary of Risk Adjustment Results by Measure

Not all patients have the same likelihood of achieving optimal health outcomes due to barriers based on demographic, physical or socio-economic situations. **Risk Adjustment** is the process of adjusting measures to account for the barriers that are outside the control or influence of the health care provider. Appropriate risk adjustment creates a more normal distribution of results.

The risk adjustment calculation uses an **Actual to Expected** methodology. This methodology does not alter the result of a clinic/medical group; the actual rate remains unchanged. Instead, that rate is compared to a unique expected rate based on the proportion of each risk category for each clinic/medical group rather than the raw market average.

To test whether there was a statistically significant difference between the expected and actual rates by each clinic/medical group, a **one population proportions test** was used. This method was employed to test the proportion of optimally managed patients attributed to a clinic/medical group compared to a specific value for that clinic/medical group. In the MNMCM case, the specified value is an expected rate calculated taking into account the overall state rate and adjusted for risk factors specific to the measure. The methodology uses a 99 percent test of significance.

The comparison between clinics/medical groups is the aforementioned test of significance and the **actual to expected ratio**: actual percentage of patients meeting criteria divided by the expected percentage of patients meeting criteria for the particular entities' mix of patient risk.

The six measures that were risk-adjusted using the methodology described above are detailed in **Table 28** on the next page along with the variables upon which they were risk-adjusted.

## Summary of Risk Adjustment Results by Measure

**TABLE 28: 2014 RISK ADJUSTMENT VARIABLE(S) PER MEASURE**

Measure	Risk Adjustment Variable(s)
Optimal Asthma Care Children	<ul style="list-style-type: none"> <li>• <b>Insurance Product Type</b> (Commercial; Medicare; MN Government Programs; and Self-Pay/Uninsured)</li> </ul>
Optimal Asthma Care Adults	<ul style="list-style-type: none"> <li>• <b>Insurance Product Type</b> (Commercial; Medicare; MN Government Programs; and Self-Pay/Uninsured)</li> </ul>
Optimal Vascular Care	<ul style="list-style-type: none"> <li>• <b>Insurance Product Type</b> (Commercial; Medicare; MN Government Programs; and Self-Pay/Uninsured)</li> <li>• <b>Age</b> (18-25; 26-50; 51-65; and 66-75)</li> </ul>
Optimal Diabetes Care	<ul style="list-style-type: none"> <li>• <b>Insurance Product Type</b> (Commercial; Medicare; MN Government Programs; and Self-Pay/Uninsured)</li> <li>• <b>Age</b> (18-25; 26-50; 51-65; and 66-75)</li> <li>• <b>Diabetes Type</b> (Type 1 and Type 2)</li> </ul>
Colorectal Cancer Screening	<ul style="list-style-type: none"> <li>• <b>Insurance Product Type</b> (Commercial; Medicare; MN Government Programs; and Self-Pay/Uninsured)</li> <li>• <b>Age</b> (51-65 and 66-75)</li> </ul>
Depression Remission at Six Months	<ul style="list-style-type: none"> <li>• <b>Insurance Product Type</b> (Commercial; Medicare; MN Government Programs; and Self-Pay/Uninsured)</li> <li>• <b>Initial PHQ-9 Severity Bands</b> (Moderate; Moderately Severe; and Severe)</li> </ul>

Future risk adjustment is not intended be limited to only these six measures; this is the first step. In 2015, MN Community Measurement will continue to study recommended variables for these measures as well as additional measures and will work to create an overall structure for how risk adjustment is applied for our measures.

The measures that are **not risk-adjusted** in the following charts are:

- Breast Cancer Screening
- Maternity Care: Primary C-Section Rate
- Total Knee Replacement Process Measures (three total)
- Immunizations for Adolescents
- Avoidance of Antibiotics in the Treatment of Adult Bronchitis
- Use of Spirometry Testing in the Assessment and Diagnosis of COPD
- Appropriate Treatment for Children with URI
- PHQ-9 Utilization
- Depression Response at Six Months
- PHQ-9 Follow-Up at Six Months
- Controlling High Blood Pressure
- Depression Remission at 12 Months
- Depression Response at 12 Months
- PHQ-9 Follow-Up at 12 Months
- Appropriate Testing for Children with Pharyngitis
- Chlamydia Screening in Women
- Follow-Up Care for Children Prescribed ADHD Medication
- Childhood Immunization Status (Combo 3)

## Maternity Care: Primary C-Section Rate (Medical Group Level Results)

Medical Group Name	Rate (Actual)	Lower Bound of 95% CI	Upper Bound of 95% CI	N	Total Population Or Sample	Rating

## APPENDIX 1

# Data Sources and Data Collection

### Direct Data Submission (DDS) Measures

The data source for clinic results was the clinic itself. All data elements were specified by MNCM in our 2014 Direct Data Submission (DDS) guides. These guides provided detailed steps and instructions to ensure that clinics submitted data in a standard format.

Data for DDS measures were reported at two levels: by clinic site and medical group. Clinics were defined as single locations where patients received care. Medical groups usually consist of multiple clinics. Often, the medical group provides centralized administrative functions for multiple clinics.

Medical groups/clinics that submit data for individual clinics first registered through the secure MNCM Data Portal. Once registered, medical groups/clinics submitted the required data elements directly through the Data Portal. This is referred to as MNCM's Direct Data Submission (DDS) process. Medical groups/clinics had the option to submit data on a clinic's total patient population (preferred) or, if necessary, a representative random sample of the clinic's total patient population. Detailed instructions for sampling were also provided in the 2014 DDS Guides. Medical groups/clinics that submitted through the DDS process must submit data for all clinics within the medical group as applicable.

Clinic abstractors collected data from medical records either by extracting the data from an electronic medical record (EMR) through a data query or from paper-based medical records. Medical groups completed numerous quality checks before data was submitted to MNCM. Detailed instructions for medical groups/clinics conducting quality checks were provided in the 2014 DDS Guides. All appropriate HIPAA requirements were followed.

Once data were submitted, an extensive validation process conducted by MNCM staff followed that included quality checks of all files and on-site audits for selected clinics. For on-site audits, MNCM used the National Committee for Quality Assurance's (NCQA) "8 and 30" File Sampling Procedure, developed in 1996

in consultation with Johns Hopkins University. For a detailed description of this procedure, see [www.ncqa.org](http://www.ncqa.org). Audits were conducted by trained MNCM auditors who were independent of medical groups and/or clinics. The validation process is important to ensure that the data are reliable, complete and consistent.

## APPENDIX1

## Data Sources and Data Collection

### Hospital Measures

#### Agency for Healthcare Research and Quality (AHRQ) Hospital Measures

The hospital rates for AHRQ measures were calculated by the Minnesota Hospital Association (MHA), using the UB-92 Administrative Database. Minnesota hospitals send all-payer, discharge-level information to the MHA at varying intervals, but at least quarterly. The MHA performs data checks before the data is accepted for inclusion in the measure calculations. All patients using non-federal, nonrehabilitation, community hospitals in Minnesota are included in the data. The data contain numerous clinical and nonclinical data variables including age, sex, race, ethnicity, length of stay, discharge status, source of payment, total charges, diagnoses, and procedures, as well as certain hospital demographic information.

For the inpatient quality indicators (IQI), the discharge data is used to track volume of admissions for specific procedures that were performed, and mortality indicators for certain procedures. For the patient safety indicators, the measures indicate potential inpatient complications and patient safety concerns following surgeries, other procedures, and childbirth. The numerator includes only cases where a secondary diagnosis code flags a potentially preventable complication.

The AHRQ data is provided to MN Community Measurement by MHA.

#### Centers for Medicare and Medicaid Services (CMS) Hospital Compare Measures

The Hospital Compare rates are based on each hospital's discharge data, including administrative data and medical record information that tie to each individual measure. The data is retrospective and includes the principal diagnosis and other ICD-9-CM diagnosis and procedures codes, as well as patient demographic information including age, sex, race, and ethnicity. Hospitals provide the required data for each measure to the Quality Improvement Organization (QIO) Clinical Data Warehouse. In Minnesota, the QIO is Stratis Health.

Hospitals use a CMS abstraction tool to send abstracted data to the QIO Data Warehouse through QualityNet (a HIPAA-compliant, secure data transmission vehicle), or they hire a vendor to submit the data on their behalf. Data submissions include auditing processes which check to ensure the data is consistent with the required specifications for samples sizes, outliers, and missing data. The QIO stores this data and provides four quarters of data (updated quarterly) for reporting and quality improvement efforts.

The Hospital Compare measure data is provided to MN Community Measurement by MHA.

**Care That Protects Patients from Medical Errors and Does Not Cause Harm**

## APPENDIX 2

## Methodology

## Measures Reported

Three types of measures were reported at the medical group level: HEDIS measures that used an administrative data only method; HEDIS measures that used a hybrid method (administrative claims data plus medical record review); and measures that used data submitted directly to MNCM by medical groups and clinics from electronic health records or paper-based medical charts, known as Direct Data Submission (DDS).

The following HEDIS measures used the **hybrid method**:

- Controlling High Blood Pressure
- Childhood Immunization Status - Combo 3
- Immunizations for Adolescents

The following HEDIS measures used the **administrative method**:

- Use of Spirometry Testing in the Assessment and Diagnosis of COPD
- Follow-Up Care for Children Prescribed ADHD Medication
- Appropriate Treatment for Children with Upper Respiratory Infection
- Appropriate Testing for Children with Pharyngitis
- Avoidance of Antibiotics in the Treatment of Adult Bronchitis
- Breast Cancer Screening
- Chlamydia Screening in Women

The following measures used data submitted directly to MNCM by medical groups and clinics known as DDS:

- Colorectal Cancer Screening
- Depression Care:
  - Depression Remission at Six Months
  - Depression Response at Six Months
  - PHQ-9 Follow-up at Six Months
  - Depression Remission at 12 Months
  - Depression Response at 12 Months
  - PHQ-9 Follow-up at 12 Months
  - PHQ-9 Utilization
- Maternity Care: Primary C-Section Rate

- Optimal Asthma Care - Adults
- Optimal Asthma Care - Children
- Optimal Diabetes Care
- Optimal Vascular Care
- Total Knee Replacement

Total Cost of Care measure methodology forthcoming in final publication.

In November 2013, the MNCM Measure Review Committee was formed with the charge of annually reviewing the DDS and HEDIS measures on the MNCM slate to ensure their collection and reporting continue to be of value to the community. The formation of this committee allows for increased stakeholder participation/influence and transparency/awareness of the measure review process.

Measurement specifications for medical group level results were calculated using NCQA's 2014 HEDIS Technical Specifications. Measurement specifications for clinic level results were calculated by MNCM's Data Portal using MNCM's 2014 DDS Guide and Technical Specifications.

MNCM combines measures into the following categories to summarize medical group/clinic performance:

- "Large Increase in Statewide Rate" or "Large Decrease in Statewide Rate" - These categories include measures that displayed a statewide rate change whose absolute value was greater than or equal to five percentage points from 2013 to 2014.
- "Moderate Increase in Statewide Rate" or "Moderate Decrease in Statewide Rate" - These categories include measures that displayed a statewide rate change whose absolute value was greater than or equal to three percentage points and less than five percentage points from 2013 to 2014.
- "Small Increase in Statewide Rate" or "Small Decrease in Statewide Rate" - These categories include measures that displayed a statewide rate change whose absolute value was less than three percentage point from 2013 to 2014.

## APPENDIX 2

# Methodology

## Eligible Population Specifications

The eligible populations for the administrative and hybrid measures were identified by each participating health plan using its respective administrative databases. NCQA's 2014 HEDIS Technical Specifications provided the standard definitions for the eligible population for each measure, which included data elements such as age, continuous enrollment, and anchor date requirements. For administrative measures, the entire eligible population was the denominator. For hybrid measures, the eligible population served as the sampling frame from which to draw the number of patients for chart audit and the reference for weighting. The eligible populations for the measures reported through the DDS process to MNCM by medical groups and clinics were identified by a medical group on behalf of their individual clinics. MNCM's 2014 Direct Data Submission (DDS) Guides provided technical specifications for the standard definitions of eligible population for each measure, which included elements such as age, appropriate diagnosis codes, and number of visits needed in the measurement timeframe.

## Patient Attribution to Medical Groups/Clinics

For HEDIS measures, health plans assigned patients to a medical group using a standard medical group definition based on tax identification numbers (TIN). Administrative billing codes determined the frequency of patient visits to medical groups. For most of the HEDIS measures, patients were assigned to the medical group they visited most frequently during the measurement year. Patients who visited two or more medical groups with the same frequency were attributed to a medical group visited most recently in the measurement year. For three of the HEDIS measures – Appropriate Testing for Children with Pharyngitis, Appropriate Treatment for Children with Upper Respiratory Infection, and Avoidance of Antibiotics in the Treatment of Adult Bronchitis – patients were assigned to the clinic they visited for the specific service. For one measure – Follow-Up Care for Children Prescribed ADHD Medication – patients were assigned to the provider who prescribed the medication and then to the medical group where that provider practices.

In order to submit data at the clinic level for the DDS measures, medical groups attributed each patient to a single clinic within their medical group. Each medical group attested to using MNCM's patient attribution methodology outlined in the data collection guides. Patients were generally attributed to an assigned primary care provider. Others are attributed to a provider who saw the patient most often in the measurement year or most recently in the measurement year.

## Sampling

### For HEDIS Hybrid Measures

As noted previously, the hybrid method required each participating health plan to first identify the eligible population meeting measurement specifications using its administrative databases. This population of eligibles served as the sampling frame from which to draw the denominator (the patients for whom medical record review would be completed). The resource-intensive nature of medical record review necessitated pulling a random sample of the eligible population, for medical record review. Medical record review was conducted for all enrollees drawn for the sample.

MNCM used a two-stage, random sampling process for the hybrid measures. This strategy was designed with statisticians to ensure reporting for the maximum number of medical groups while minimizing the impact of weighting on the results for any one medical group. The sampling procedure started with the health plans providing a data file containing a record for each eligible patient for each hybrid measure. This file also identified eligible patients that had been selected for the annual HEDIS sample. Additional patients were then selected from the remaining eligible population to meet MNCM minimum reporting requirements.

### For Measures Collected by Direct Data Submission

Clinics may submit data on their full population (preferred) or, if necessary, a random sample of at least 60 patients per clinic. However, they are strongly encouraged to submit their total population of patients to achieve more precise rates and allow health plans to

## APPENDIX 2

## Methodology

identify health plan product type. For clinics that chose to submit a sample, the 2014 DDS Guides provided technical specifications and accepted methods to select a systematic sample. If submitting a sample of patients, the clinic must attest to use one of the accepted sampling methods as part of the pre-submission data certification process. Further MNMCM review is completed as necessary.

### Numerator Specifications

For HEDIS administrative measures, the numerator was the number of patients from the eligible population who met numerator targets. For HEDIS hybrid measures, the numerator was the number of patients from the sample who met numerator targets.

For DDS measures, the numerator was the number of patients identified from either the eligible population or the sample who met the numerator targets. The targets were specified by MNMCM in the 2014 DDS Guides technical specifications. Clinical quality data that the medical group submits is used to calculate the numerator; this data is verified through MNMCM's validation process.

### Weighting

#### For HEDIS Hybrid Measures

Because data for the hybrid measures were taken from a sample, results were weighted to obtain accurate rates. This allowed for aggregation and unbiased reporting by medical group. Weighting was a cost-saving measure that enabled MNMCM to draw a sample on which to estimate medical group and statewide rates. Weighting was applied to efficiently utilize health plan resources for data collection on a randomly sampled population. Weights were calculated for each sampling stratum (i.e., health plan/health plan product/medical group). A weight was equal to the total eligible population for that stratum divided by the total sample size. In calculating rates for a population – medical group or statewide – the denominator was the sum of the weights for all patients in that population, and the numerator was the sum of the weights for patients in the population who met the numerator targets.

#### Direct Data Submission (DDS) Measures

Clinics may submit data for the DDS measures on their full population (preferred) or, if necessary, a sample of at least 60 patients per clinic. For clinics that elected to submit a sample from their total population, results were weighted to account for the total population.

### Calculating Rates

#### For HEDIS Administrative and Hybrid Measures

Administrative and hybrid measures were reported at a medical group level and were expressed as percentages. They were calculated as 100 times the number who met the numerator targets divided by the number who were eligible for the measure. Rates calculated for measures using the administrative method were straightforward. However, rates calculated for measures using the hybrid method required weighting because of the sampling procedures. Rates and 95-percent-asymmetrical confidence intervals were calculated for each measure for each medical group. Asymmetrical confidence intervals were used to avoid confidence interval lower-bound values less than zero and upper bound values greater than one hundred. Medical group rates are first calculated for each group and then a medical group average is calculated. The medical group average is displayed when comparing medical group performance to provide context.

#### For Measures Collected by Direct Data Submission (DDS)

Rates were expressed as percentages, calculated as 100 times the number that met the numerator specifications divided by the number in the denominator for the measure. Rates from measures using the total eligible population are straightforward calculations whereby the total eligible population serves as the denominator. Due to the dynamic nature of patient populations, rates and 95 percent confidence intervals are calculated for each measure for each medical group/clinic regardless of whether the full population or a sample is submitted. Rates are first calculated for each medical group/clinic and then an overall average rate is calculated. The overall average rate is displayed when comparing a single medical group/clinic to the performance of all medical groups/clinics to provide context.

## APPENDIX 2

## Methodology

## Risk Adjustment

Risk adjustment is a technique used to level the playing field for clinics/medical groups by adjusting for the differences in risk amongst specific patient groups. The process should isolate the clinic/medical group's true impact on patients' health and allow them to be compared more easily.

The risk adjustment calculation employed by MN Community Measurement uses an **Actual to Expected** methodology. This methodology does not alter a clinic/medical group's result; the actual rate remains unchanged. Instead, each clinic/medical group's rate is compared to a unique expected rate for that clinic/medical group that is based on the mix of patient risk seen at that clinic/medical group, rather than the raw market average.

To test whether there was a statistically significant difference between the expected and actual rates by each clinic/medical group, a **one population proportions** test was used. This method was employed to test the proportion of optimally managed patients attributed to a clinic/medical group compared to a specific value for that clinic/medical group. In the MNMCM case, the specified value is an expected rate calculated taking into account the overall state rate and adjusted for risk factors specific to the measure. The methodology uses a 99 percent test of significance.

The comparison between clinics/medical groups is the aforementioned test of significance and **the actual to expected ratio**: actual percentage of patients meeting criteria divided by the expected percentage of patients meeting criteria for the particular entities' mix of patient risk.

Six Direct Data Submission (DDS) measures were risk-adjusted using this methodology (see page 172 for list of measures). The Summary of Risk Adjustment Results by Measure section contains tables for both risk-adjusted and non-risk-adjusted measures.

The tables for the **risk-adjusted measures** include the following columns in order from left to right:

- **Medical Group Name**
- **Rate (Actual)** = Actual percentage of patients meeting criteria (unadjusted rate)
- **Lower Bound of 95% CI** = Lower bound of the 95 percent confidence interval for the medical group's/clinic's unadjusted rate
- **Upper Bound of 95% CI** = Upper bound of the 95 percent confidence interval for the medical group's/clinic's unadjusted rate
- **N** = Number of patients at a medical group/clinic site that meet the denominator criteria for the measure
- **Total Population or Sample** = Indicates whether the medical group/clinic submitted their total population or a sample of patients for the measure (see pages 299-300 for explanation)
- **Rate (Expected)** = Expected percentage of patients meeting criteria based on the clinic's/medical group's mix of patient risk (adjusted rate)
- **Actual to Expected Ratio** = Actual percentage of patients meeting criteria divided by the expected percentage of patients meeting criteria for the clinic's/medical group's mix of patient risk
- **Rating** = Rating of medical group/clinic displayed on MNHealthScores.org
  - **TOP** = Top 15 clinics or medical groups, as long as the clinic or medical group meets the Above rating criteria
  - **Above** = Clinic or medical group's actual rate is significantly above their expected rate
  - **Expected** = Clinic or medical group's actual rate is equivalent to their expected rate
  - **Below** = Clinic or medical group's actual rate is significantly below their expected rate

The tables for the **non-risk-adjusted measures** include all of the columns noted for risk-adjusted measures except Rate (Expected) and Actual to Expected Ratio. Additionally, non-risk-adjusted measures are rated on the following scale:

- **TOP** = Top 15 clinics or medical groups, as long as the clinic or medical group meets the Above rating criteria

See next page...

## APPENDIX 2

## Methodology

- **Above** = Clinic or medical group's actual rate is significantly above the statewide average
- **Average** = Clinic or medical group's actual rate is equivalent to the statewide average
- **Below** = Clinic or medical group's actual rate is significantly below the statewide average

### Limitations

The medical groups and clinics identified in this report do not represent all medical groups and clinics in Minnesota. MNCM established minimum thresholds for public reporting to ensure statistically reliable rates. Only medical groups and clinics that met these thresholds were reported. Because hybrid measures are based on a sample, a higher threshold is used: 60 patients per medical group was the minimum requirement for public reporting to ensure a reasonable level of confidence in the reported rate. However, administrative measures are based on a complete census of managed care patients, so a minimum threshold of 30 patients per medical group was required. DDS measures are based on complete census of all patients regardless of payer, so a minimum threshold of 30 patients per clinic was required. It should also be noted that although medical groups and clinics are reported for some measures they may not be reported for all measures.

Data used to calculate rates for the HEDIS administrative and hybrid measures reflected patients insured through 10 health plans. Medical groups with patients who were insured through other health plans, who were uninsured, who self-pay, or who were served by a Medicaid/Medicare fee-for-service program were not reflected in these results. Therefore, the data for these measures does not necessarily represent a medical group's entire patient population. In addition, caution is recommended when making comparisons from year to year. Annual rate differences can occur due to natural variation, changes in measurement specifications, changes in data sources and other factors.

### Data Analyses

#### Identifying High Performing Medical Groups/Clinics

For each measure, both individual medical group rates and a medical group average rate were calculated.

Medical groups that achieved high performance were identified by comparing the individual medical group/clinic rate with the medical group average. Medical groups that had rates that were fully above the medical group average and 95 percent confidence intervals were noted as high performers. These high performers were highlighted in the results by measure section for each measure. The performance rates for all medical groups were presented in descending order. Additionally, the Top 15 performers are identified via an asterisk (\*). The same methods were applied at the clinic-level for Optimal Diabetes Care, Optimal Vascular Care, Depression Remission at Six Months, Depression Remission at 12 Months, Optimal Asthma Care, Maternity Care: Primary C-Section and Colorectal Cancer Screening.

#### Identifying Medical Groups and Clinics with Biggest Improvements

For each measure, individual medical group and clinic rates during report year 2014 were compared with their rates during report year 2013, calculating an absolute percentage point difference. Medical groups and clinics with the largest percentage point increases were identified.

#### Medical Group and Clinic Performance Over Time (Three Years)

This analysis was done to determine patterns of medical group and clinic performance over time per measure. Patterns were reviewed for the three reporting years (2012, 2013 and 2014). See "Medical Group Performance Over Time (2012-2014)" in the results by measure section for those measures where three years of data was available.

Patterns in rate changes over the three reporting years were reviewed. Only medical groups with rates for each of the three reporting periods per measure were included in the analysis. The percent and number of medical groups were reported for each of the following patterns of rate changes over the past three years for each measure:

- **Consistently improved:** Medical groups with more than a two percentage point increase between each consecutive year.

## APPENDIX 2

## Methodology

- Relatively stable: Medical groups that had no more than a two percentage point increase or decrease between each consecutive year (-two percent – +two percent).
- Consistently decreased: Medical groups with more than a two percentage point decrease between each consecutive year.
- Variable performance (with an improvement or with a decline): Medical groups with an up/down pattern that was not consistent and did not fall into one of the other categories.

## Patient Experience

This is a biannual measure with the next distribution cycle in 2014 for dates of service September 1, 2014 – November 30, 2014. The 2014 measure will utilize the Clinic and Group - Consumer Assessment of Healthcare Providers and Systems® (CG-CAHPS) 12-Month Survey and includes the provision to distribute the Adult and/or Child 12-Month Patient Centered Medical Home (PCMH) survey. Public reporting will occur in second quarter of 2015.

The Patient Experience of Care Survey is required every other year for all clinics who saw at least 715 unique adult patients for a face-to-face visit during the eligibility period of September 1, 2011 – November 30, 2011. Exclusions were pediatric/adolescent-only practices or psychiatry. The number of clinics participating in the survey was 717 sites in Minnesota and surrounding states (WI, ND).

The survey used during the 2012 distribution was the Clinic and Group - Consumer Assessment of Healthcare Providers and Systems® (CG-CAHPS) Visit survey. Clinics contracted with a certified-CAHPS survey vendor to distribute the survey on their behalf.

Patient visits from September 1, 2012 – November 30, 2012 were used to select a random sample of adult patients, 18 and older, to receive the survey.

MNCM conducted extensive validation with both the clinics and survey vendors. Clinics submitted documentation to MNCM on their visit selection process, providing screen shots of the relevant field criteria.

Survey vendors submitted draft survey documents and test files for each client to assure random file selection. All components had to be approved before surveying could begin.

Final data files will be uploaded to MNCM's Data Portal in first quarter 2015 and field validation checks will be done to ensure correct file format.

Data analysis using the national standard CAHPS program produces four composite domain scores: Access to Care, Provider Communication, Courteous and Helpful Office Staff, and a Provider Rating. All publicly reported results meet minimum reliability thresholds for reporting (at 0.7 reliability score). All individual clinic patient experience scores are reported on [MNHealthScores.org](http://MNHealthScores.org).

## Health Information Technology (HIT) Survey

MNCM initially developed the Health Information Technology (HIT) Ambulatory Clinic Survey in 2009 using input from a multi-stakeholder workgroup. Goals of the survey development were to assess HIT adoption and use in Minnesota in a format that could be used by multiple organizations; and assess the use and application of these technologies and how they might affect patient care. The workgroup also incorporated information from the federal government's meaningful use criteria into survey questions to increase alignment with other HIT initiatives.

The survey remained relatively constant until late in 2012 when MNCM reconvened the stakeholder workgroup to review the survey and make necessary changes to better align with Meaningful Use Stage 2. The workgroup consisted of a balanced representation of clinical staff, health plans, HIT content experts, and state agencies (MDH, DHS).

The survey continues as an online instrument and email invitations with a unique web link were sent to all MNCM registered clinics on February 18, 2014. The survey remained open for 30 days. Medical groups with multiple clinic sites that had the same technology systems and identical processes of care, were allowed to

## APPENDIX 2

## Methodology

request duplication of a set of survey responses across clinic locations and therefore, improve the efficiency of responding for their clinic sites.

Reminder emails were distributed to non-responders midway through the open period, and one week before close. In total, 1,530 clinic sites received the email invitation to the HIT Survey in Minnesota and neighboring communities states. Of these, 1,316 responded for a final response rate of 86 percent.

## Hospital Measures

**Agency for Healthcare Research and Quality (AHRQ) Measures**

Software provided by the Agency for Healthcare Research and Quality (SAS version 4.0) was used by the Minnesota Hospital Association to calculate the inpatient quality indicators (IQIs) and the patient safety indicators (PSIs). Administrative discharge data received from Minnesota hospitals was aggregated by the zip code of patient residence. The AHRQ QI software calculates observed rates for each hospital using this discharge data. The PSI observed rates are the number of adverse events or complications tied to a procedure divided by the number of admissions for that procedure. The IQI volume rates are simple counts of admissions for procedures that were performed. The IQI mortality rates are the number of deaths divided by the number of admissions for the procedure or condition.

The IQI and PSI observed rates are risk adjusted for age, gender, severity, and comorbidity using statistical methodologies specific to each measure. A regression-based standardization is used for risk adjustment and is included in the AHRQ QI Software. Confidence intervals are calculated for the risk-adjusted rates at a 95percent confidence level. The expected rate is the rate the hospital would have if it performed the same as the national average, but takes into account the hospital's actual case-mix (e.g., age, gender, modified DRG and comorbidities). An individual hospital's observed rate can be compared against this expected rate to determine potential performance issues. If the observed rate is higher than the expected rate, this may imply that the

hospital performed worse than the national average. Conversely, if the observed rate is lower than the expected rate, this hospital likely performed better than the national average.

**Hospital Compare Measures (Centers for Medicare and Medicaid Services)**

Each process of care rate is calculated by simply dividing the numerator by the denominator for each measure. The denominator is the sum of all eligible cases – as defined in each measure specification. The numerator is the sum of all eligible cases where the recommended care was provided. The statewide averages for each measure are calculated using all of the data submitted to the Minnesota QIO Warehouse for hospitals with at least one case in the measure's denominator.

APPENDIX 3

# MNHealthScores.org

A critical component of MN Community Measurement’s (MNCM) mission is to publicly report health care information, with the goal of driving improvement. Our public reporting website is [MNHealthScores.org](#); it is focused on and designed for patients, their families and the public to help them make educated choices about where to obtain care and what care they should expect.

In 2014, we redesigned [MNHealthScores.org](#) to better meet the needs of Minnesota health care consumers. To actively participate in their care and help drive improvement, consumers must understand and be able to use the information that MNCM reports. The site features consumer-friendly data displays that represent best practices gleaned from more than a decade of academic research on consumer interpretation of health care cost and quality data displays. The data displays highlight a HealthScore for each clinic, medical group or hospital for each measure. This HealthScore is an easy-to-understand icon and label that categorizes data into clear groupings. This provides consumers with important context to understand the rates.

Legend

### What does the HealthScore mean?

Ratings of clinics, medical groups and hospitals are grouped into the following categories. Not every health topic features results in all five categories.

TOP		Top - Top 15 clinics or medical groups, as long as their rate is above average.	BELOW AVERAGE		Below Average - Rate is significantly below the state average.
ABOVE AVERAGE		Above Average - Rate is significantly above the state average.	NOT REPORTABLE		Not Reportable - No rate is available due to clinic or hospital not submitting information, not providing the type of care, or having too few patients to be reported.
AVERAGE		Average - Rate is equivalent to the state average.			

Throughout the redesign project, a variety of stakeholders provided input, including consumers, providers, employers, payers and others. We conducted extensive testing with consumers to ensure the site is user-friendly and easy to understand. Additionally, all clinics and medical groups whose data is displayed on the site were given an opportunity to preview their HealthScore results, and attend a webinar to preview the new website design, prior to the launch of the new website.

## APPENDIX 3

## MNHealthScores

In our effort to make the site as consumer-friendly as possible, some measure names were adjusted for clarity. They include:

Measure Name for Data Collection	Measure Name on <i>MNHealthScores.org</i>
Adolescent Immunization	Vaccinations: Adolescents
Appropriate Testing for Children with Pharyngitis	Sore Throats: Children
Appropriate Testing for Children with Upper Respiratory Infection	Colds: Children
Avoidance of Antibiotic Treatment in Adults with Acute Bronchitis	Bronchitis
Childhood Immunization	Vaccinations: Children
Depression: 6 Month PHQ-9 Follow Up	Depression: Follow Up (6 Months)
Depression: 6 Month Remission	Depression: Feel Better (6 Months)
Depression: 6 Month Response	Depression: Improved Symptoms (6 Months)
Depression: 12 Month PHQ-9 Follow Up	Depression: Follow Up (12 Months)
Depression: 12 Month Remission	Depression: Feel Better (12 Months)
Depression: 12 Month Response	Depression: Improved Symptoms (12 Months)
Depression: Use of the PHQ-9	Depression: Assessing Symptoms
Follow Up Care for Children Prescribed ADHD Medication	Attention Deficit Hyperactivity Disorder (ADHD)
Maternity Care: Primary C-Section	Cesarean Deliveries
Use of Spirometry Testing in the Assessment of COPD	Chronic Obstructive Pulmonary Disease (COPD)
Vascular Disease	Vascular Care

We hope you'll visit [MNHealthScores.org](http://MNHealthScores.org) and recommend it as a resource to your patients and other community members.
