# ***Introduction***

## **Introduction**

The 1998 session of the Minnesota Legislature amended Minnesota's abortion reporting requirement to include all physicians licensed and practicing in Minnesota who perform abortions and all Minnesota facilities in which abortions are performed (Minnesota Statutes, sections 145.4131 - 145.4136). A report must be completed and submitted to the Minnesota Department of Health (MDH) for each procedure performed. This law also expanded the content of the reporting form. The number of induced abortions performed out-of-state and paid for with state funds must be reported to MDH by the Minnesota Department of Human Services. Furthermore, any medical facility or any licensed, practicing physician in Minnesota who encounters an illness or injury that is the result of an induced abortion must submit a report of that complication on a separate form developed for that purpose. Both of these forms, *Report of Induced Abortion* and *Report of Complication(s) from Induced Abortion*, are included in the Appendix of this publication.

This report is issued in compliance with Minnesota Statutes, section 145.4134 which requires a yearly public report of induced abortion statistics for the previous calendar year and statistics for prior years adjusted to reflect any additional information from late and/or corrected report forms, beginning with October 1, 1998 data. This is the sixteenth such report and covers the period from January 1, 2014 through December 31, 2014. No additional late or corrected *Report of Induced Abortion* forms were received since publication of the 2013 data in July of 2014. However, seven additional 2013 *Report of Complication(s) from Induced Abortion* forms were submitted. Table 19, on which this data is reported, is included in the appendix with the updated counts for 2013.

The 2003 Minnesota Legislature enacted the Woman's Right to Know Act. This law [Minnesota Statutes, sections 145.4241 – 145.4249] requires physicians to provide women with certain information at least 24 hours prior to an abortion and to collect and report to the Minnesota Department of Health the number of women who were provided this information. Physicians were required to begin collecting this data on January 1, 2004 and to submit their 2014 data to the Department of Health by April 1, 2015. Data from this reporting requirement are published as Tables 25 through 27 on pages 31 through 33 of this report. Additional information about the Woman's Right to Know Act can be found at <http://www.health.state.mn.us/wrtk/index.html>.

The 2006 Minnesota Legislature amended the Woman's Right to Know Act (WRTK) regarding the circumstance of a patient seeking an abortion of an unborn child diagnosed with a fetal anomaly incompatible with life. Such a patient must be informed of available perinatal hospice services and offered this care as an alternative to abortion. If the patient accepts such care the information required under the WRTK need not be provided to her. If she declines hospice services and elects abortion, only information about medical risks, gestational age and anesthesia must be given. The WRTK reporting form was modified to accommodate the changes and Tables 25 and 26 have an additional line to report these cases. The revised version of the form, *Report of Informed Consent for Induced Abortion*, is included in the Appendix.

# ***Technical Notes***

## **Technical Notes**

Data included in this report are submitted to the Minnesota Department of Health by facilities and physicians who perform abortions in Minnesota. The *Report of Induced Abortion* (see Appendix, Figure 1) may be submitted by a facility/clinic on behalf of physicians who practice therein; or physicians may submit reports independently. A number of data items on the report form were specifically required by Minnesota Statutes. These items include: medical specialty of the physician performing the abortion, patient age, date of the abortion, clinical estimate of gestation, number of previous spontaneous and induced abortions, type of abortion procedure, intra-operative complications (post-operative complications are collected using the *Report of Complication(s) from Induced Abortion*), method of disposal of fetal remains, type of payment, health coverage type, and reason for the abortion. The items: type of admission, patient residence, date of last menses, and contraceptive use and method were included to provide continuity with previous abortion report forms. Marital status, Hispanic origin, race, education, and previous live births correspond to items on the Minnesota *Medical Supplement to the Certificate of Live Birth* and thus allow for statistical comparison with birth data and the calculation of pregnancy rates.

Report forms submitted with incomplete data are required by law to be returned to the clinic/facility or independently reporting physician for correction. Overall compliance and cooperation in completing the forms was excellent, however, some data remain unreported. In some cases this is due to a facility being unable to locate the record in question and in other instances due to a patient's refusal to provide the data. Continuing efforts are being made to further improve reporting compliance, completeness, and timeliness.

Due to the sensitivity of abortion data, there are concerns about revealing an individual's identity, whether patient or provider, from data presented in this publication. Minnesota Statutes, section 145.4134 states "The commissioner shall ensure that none of the information included in the public reports can reasonably lead to identification of an individual having performed or having had an abortion. All data included on the forms under sections 145.4131 to 145.4133 must be included on the public report except that the commissioner shall maintain as confidential, data which alone or in combination may constitute information from which an individual ... may be identified using epidemiologic principles."

In general, the policy is that when a single data item, such as age or race/ethnicity, is presented in a table that includes all of the cases, the large number of occurrences in each grouping makes it unnecessary to conceal, or suppress, those data. For example, a table of the age groups tallied for all of the reports received for 2014 would have such large numbers that none of the counts would have to be suppressed. No individual could possibly be identified.

Data generally are suppressed when there are such small numbers of two or more variables that it would be difficult to protect the confidentiality of individuals. For instance, age groups tallied for only a single town in Minnesota would most likely have small counts in some of the age groups. Likewise, a table of age group by race for each county in Minnesota would have small counts in cells for those counties with small populations and few minority residents. Suppression of those small counts would be necessary to protect the confidentiality of the individual.

As a hypothetical example, if the data were to include age and race/ethnicity, the only two Asian American women between the ages of 35 and 39 in a county with a low overall population might be identifiable.

Data by provider, Tables 1.1 and 1.2, are presented for individual clinics that have been publicly identified as abortion providers, but aggregated into a single group for independently reporting physicians. Table 1.2 presents data on individual physicians with no small-number suppression, as the law requires counts by physician by month. Physicians are simply identified as Physician A, Physician B, etc. to protect confidentiality. Please note that the identifiers are arbitrarily assigned to those physicians who reported in a given calendar year. Thus, Physician X in a prior year's report may not be the same individual as Physician X in this report. Data presented in frequency tables for the state as a whole have no small-number data suppressed. Likewise, Table 6, Country/State Residence of Woman, contains sufficiently large groups to confound identification of an individual. Table 7, County of Residence for Women Residing in Minnesota, is the only table for which counts of zero to five are suppressed. Some of the counties have a small population of females of childbearing age and/or a small number of physicians who may be qualified to provide abortion services and thus, though unlikely, it could be possible for a provider or patient to be identified.

| Pregnancy was a result of incest                                      | 13                                | 12                             |
| Economic reasons  | 2,712                             | 2,405                          |
| Does not want children at this time                                   | 6,998                             | 6,370                          |
| Emotional health is at stake  | 747                               | 657                            |
| Physical Health is at stake   | 595                               | 513                            |
| Continued pregnancy will cause<br>impairment of major bodily function | 37                                | 31                             |
| Pregnancy resulted in fetal anomalies                                 | 188                               | 163                            |
| Unknown or the woman refused<br>to answer                             | 1,594                             | 1,450                          |
| Other stated reason   | 582 **                            | 512                            |

\*Note: No totals are given because a woman may have given more than one response.

\*\*See Table 17a

**Table 17a**  
**Other Stated Reason for Abortion, 2014**

|   |       |
|---|-------|
| Single parent of one or more children                                       | 4     |
| Education goals; desire to finish high school and/or college                | 15    |
| Already have children, do not intend to have more                           | 38    |
| Relationship issues, including abuse, separation, and extra-marital affairs | 49    |
| Other miscellaneous responses   | 478   |
|   | <hr/> |
| Total*  | 584   |

\*Total is greater than 'Other Stated Reason' total on Table 17 because some women stated more than one other reason.

**Table 18**  
**Intraoperative Complications\*, 2014**

|  | <u>Occurring in<br/>Minnesota</u> | <u>Minnesota<br/>Residents</u> |
|--|-----------------------------------|--------------------------------|
| No Complications   | 10,102                            | 9,159                          |
| Cervical laceration requiring suture<br>or repair                            | 10                                | 10                             |
| Heavy bleeding/hemorrhage with<br>estimated blood loss in excess<br>of 500cc | 2                                 | 2                              |
| Uterine perforation  | 1                                 | 1                              |
| Other complication   | 7                                 | 7                              |
| Not Reported**   | 1                                 | 1                              |
|  | <hr/>                             | <hr/>                          |
| Total  | 10,123                            | 9,180                          |

\*Complication occurring at the time of the abortion procedure

**Table 19**  
**Postoperative Complications\*, 2014**  
 reported on **Report of Complication from Induced Abortion** form

|   |                 |
|---|-----------------|
| Cervical laceration requiring suture<br>or repair   | 4               |
| Heavy bleeding/hemorrhage with<br>estimated blood loss in excess<br>of 500cc                        | 6               |
| Uterine perforation   | 2               |
| Infection requiring inpatient treatment   | 6               |
| Heavy bleeding/anemia requiring<br>transfusion  | 4               |
| Failed termination of pregnancy<br>(continued viable pregnancy)                                     | 7               |
| Incomplete termination of pregnancy<br>(retained products of conception<br>requiring re-evacuation) | 26              |
| Other complication  | 7               |
| Complication not specified  | 0               |
| Total Reported Complications  | 62 <sup>1</sup> |

<sup>1</sup> 47 'Report of Complication(s) from Induced Abortion' forms were received.

\*Neither location where the abortion was performed nor residence of patient is collected on the *Report of Complication(s) from Induced Abortion*. Therefore, these numbers cannot be directly correlated with counts of induced abortions in an attempt to seek a ratio of complications per procedure.

**Table 20**  
**Induced Abortions by Gestational Age**  
**Performed Out of State and Paid for with State Funds<sup>1</sup>**  
 reported by the Minnesota Department of Human Services, 2013

|   |             |
|---|-------------|
| <9 weeks  | 38          |
| 9 - 10 weeks  | 30          |
| 11 - 12 weeks   | 17          |
| 13 - 15 weeks   | 5           |
| 16 - 20 weeks   | 2           |
| 21 - 24 weeks   | 0           |
| 25 - 30 weeks   | 0           |
| 31 - 36 weeks   | 0           |
| 37 weeks & over   | 0           |
| Unknown   | 44          |
| <hr style="width: 20%; margin: 0 auto;"/>   |             |
| Total Occurrence  | 136         |
| Total state funds used<br>to pay for out of state<br>abortion procedures,<br>including incidental<br>expenses | \$20,463.63 |

<sup>1</sup>All procedures occurred within the local trade area, that is, the "geographic area surrounding the person's residence, including portions of states other than Minnesota, which is commonly used by other persons in the same area to obtain similar necessary goods and services."

**Table 21**  
**Total and Resident Induced Abortions**  
**1975 - 2014**

|      | <u>Occurring in<br/>Minnesota</u> | <u>Minnesota<br/>Residents</u> | <u>Resident<br/>Percent</u> | <u>Resident<br/>Rate<sup>1</sup></u> |
|------|-----------------------------------|--------------------------------|-----------------------------|--------------------------------------|
| 1975 | 10,565                            | 8,924                          | 84.5                        | 10.3                                 |

\*Unknowns are not included in ratios

<sup>1</sup>Ratio is for age 15-19. Separate data for 15-17 and 18-19 is not available for 1980.

<sup>2</sup>Race/Ethnicity data was collected differently prior to 1999, thus ratios are not available for individual categories other than 'White'.

<sup>3</sup>Figures have been updated from those published in the 2013 table with finalized 2013 birth data.

# **Appendix**

## **Updates to 2013 Data**

Minnesota Statutes, sections 145.4134 and 145.4246 require that each yearly report provide the statistics for any previous calendar year for which additional information from late or corrected reports was received, adjusted to reflect these new numbers. Following the publication of the report for calendar year 2013 in July of 2014, seven additional ***Report of Complication(s) from Induced Abortion*** forms were received. Table 19, on which these complications are tabulated, is included in this section of the Appendix and reflects the updated counts. Tables for which the data did not change have not been republished here.

**Table 19**  
**Postoperative Complications\*, 2013**  
 reported on **Report of Complication from Induced Abortion** form

|   |   |
|---|---|

| Heavy bleeding/anemia requiring<br>transfusion  | 2   |
| Failed termination of pregnancy<br>(continued viable pregnancy)                                     | 9   |
| Incomplete termination of pregnancy<br>(retained products of conception<br>requiring re-evacuation) | 40  |
| Other complication  | 5   |
| Complication not specified  | 0   |
| Total Reported Complications  | <hr style="width: 100px; margin-left: auto; margin-right: 0;"/> 61 <sup>1</sup> |

<sup>1</sup> 58 'Report of Complication(s) from Induced Abortion' forms were received.

\*Neither location where the abortion was performed nor residence of patient is collected on the *Report of Complication(s) from Induced Abortion*. Therefore, these numbers cannot be directly correlated with counts of induced abortions in an attempt to seek a ratio of complications per procedure.

# **Definitions**

## **Definitions**

### **Induced Abortion:**

The purposeful interruption of an intrauterine pregnancy with the intention other than to produce a live-born infant, and which does not result in a live birth. This definition excludes management of prolonged retention of products of conception following a fetal death.

### **Fetal Death:**

Death prior to the complete expulsion or extraction of a product of conception from its mother, irrespective of the duration of pregnancy. The death is indicated by the fact that, after such expulsion or extraction, the fetus does not breathe or show any other evidence of life such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles.

### **Fetal Remains:**

MN Statutes 145.1621, subd 2: The remains of a dead offspring of a human being that has reached a stage of development so that there are cartilaginous structures, fetal or skeletal parts after an abortion or miscarriage, whether or not the remains have been obtained by induced, spontaneous, or accidental means.

### **Method of Abortion:**

Suction Curettage: Mechanical dilation of the cervix with removal of the uterine contents by low pressure suction created by an electric suction pump.

Medical: Administration of medication to induce abortion. This does not include administration of morning-after pills or post-coital IUD insertion.

Dilation & Evacuation: Dilation of the cervix by insertion of laminaria several hours before removal of uterine contents by suction and/or sharp curettage.

Intra-Uterine Instillation: Induction of labor by injection of a sterile saline or prostaglandin (a naturally occurring hormone) solution into the amniotic sac. Laminaria are often inserted in the cervix several hours before the injection to aid dilation.

Hysterectomy/otomy: Removal of the fetus by means of a surgical incision made in the uterine wall. In the case of a hysterectomy, the entire uterus is removed.

Sharp Curettage: Mechanical dilation of the cervix with removal of uterine contents by scraping the uterine wall with a surgical curette.

Induction of Labor: Induction of labor by means of Pitocin and/or related medications which causes uterine contractions and expulsion of uterine contents.

Dilation & Extraction: Dilation of the cervix and removal of fetal tissues

## REPORT OF INDUCED ABORTION

### Mandated reporters

All physicians or facilities that perform induced abortions by medical or surgical methods.

### Induced abortion defined

For purpose of these reports, induced abortion means the purposeful interruption of an intrauterine pregnancy with the intention other than to produce a live-born infant, and which does not result in a live birth. This definition excludes management of prolonged retention of products of conception following fetal death.

### Importance of induced abortion reporting

Reports of induced abortion are not legal records and are not maintained permanently in the files of the State office of vital statistics. However, the data they provide are very important from both a demographic and a public health viewpoint. Data from reports of induced abortion provide unique information on the characteristics of women having induced abortions. Uniform annual data of such quality are nowhere else available. Medical and health information is provided to evaluate risks associated with induced abortion at various lengths of gestation and by the type of abortion procedure used. Information on the characteristics of the women is used to evaluate the impact that induced abortion has on the birth rate, teenage pregnancy, and out-of-wedlock births. Because these abortion data provide information necessary to promote and monitor health, it is important that the reports be completed carefully.

### Physician and patient confidentiality

According to MN Statutes §145.4134, the commissioner shall issue a public report providing statistics for the previous calendar year compiled from the data submitted under sections 145.4131 to 145.4133. Each report shall provide the statistics for all previous calendar years, adjusted to reflect any additional information from late or corrected reports. The commissioner shall ensure that none of the information included in the public reports can reasonably lead to identification of an individual having performed or having had an abortion. All data included on the forms under sections 145.4131 to 145.4133 must be included in the public report except that the commissioner shall maintain as confidential data which alone or in combination may constitute information from which, using epidemiologic principles, an individual having performed or having had an abortion may be identified. Service cannot be contingent upon a patient's answering, or refusing to answer, questions on this form.

#### MINNESOTA STATE LAW

##### ARTICLE 10, HEALTH DATA REPORTING

§145.4131 [RECORDING AND REPORTING ABORTION DATA.] Subdivision 1. [FORMS.] (a) Within 90 days of the effective date of this section, the commissioner shall prepare a reporting form for use by physicians or facilities performing abortions. A copy of this section shall be attached to the form. A physician or facility performing an abortion shall obtain a form from the commissioner. (b) The form shall require the following information: (1) the number of abortions performed by the physician in the previous calendar year, reported by month; (2) the method used for each abortion; (3) the approximate gestational age expressed in one of the following increments: (i) less than nine weeks; (ii) nine to ten weeks; (iii) 11 to 12 weeks; (iv) 13 to 15 weeks; (v) 16 to 20 weeks; (vi) 21 to 24 weeks; (vii) 25 to 30 weeks; (viii) 31 to 36 weeks; or (ix) 37 weeks to term; (4) the age of the woman at the time the abortion was performed; (5) the specific reason for the abortion, including, but not limited to, the following: (i) the pregnancy was a result of rape; (ii) the pregnancy was a result of incest; (iii) economic reasons; (iv) the woman does not want children at this time; (v) the woman's emotional health is at stake; (vi) the woman's physical health is at stake; (vii) the woman will suffer substantial and irreversible impairment of a major bodily function if the pregnancy continues; (viii) the pregnancy resulted in fetal anomalies; or (ix) unknown or the woman refused to answer; (6) the number of prior induced abortions; (7) the number of prior spontaneous abortions; (8) whether the abortion was paid for by: (i) private coverage; (ii) public assistance health coverage; or (iii) self-pay; (9) whether coverage was under: (i) a fee-for-service plan; (ii) a capitated private plan; or (iii) other; (10) complications, if any, for each abortion and for the aftermath of each abortion. Space for a description of any complications shall be available on the form; and (11) the medical specialty of the physician performing the abortion. Subd. 2. SUBMISSION.] A physician performing an abortion or a facility at which an abortion is performed shall complete and submit the form to the commissioner no later than April 1 for abortions performed in the previous calendar year. The annual report to the commissioner shall include the methods used to dispose of fetal tissue and remains. Subd. 3. [ADDITIONAL REPORTING.] Nothing in this section shall be construed to preclude the voluntary or required submission of other reports or forms regarding abortions.

# REPORTING PROCEDURE

## COMPLETION AND SUBMISSION OF REPORTS

### 1. Reporting by physician or facility

The Minnesota Department of Health (MDH), Center for Health Statistics, encourages physicians and facilities to develop internal policies for the completion and submission of the Report of Induced Abortion. MDH recommends that these policies designate either the physician or the facility as having the overall responsibility and authority to see that the report is completed and filed on time. This may help prevent duplicate reporting and failure to report. If facilities take the responsibility to report on behalf of their physicians MDH suggests the following reporting procedure:

- \* Notify physicians that the facility will be reporting on their behalf.
- \* Call the Minnesota Center for Health Statistics for assignment of facility reporting codes and physician reporting codes (See instructions #2-3).
- \* Assign physician reporting codes to physicians and maintain a list of these assignments.
- \* Develop efficient procedures for prompt preparation and filing of the reports.
- \* Collect and record the information required by the report.
- \* Prepare a correct and legible report for each abortion performed.
- \* Submit the reports to the Minnesota Center for Health Statistics within the time specified by the law.
- \* Cooperate with the Minnesota Center for Health Statistics concerning queries on report entries.
- \* Call on the Minnesota Center for Health Statistics for advice and assistance when necessary.

If a facility decides not to report on behalf of their physicians, or for physicians who perform induced abortions outside a hospital, clinic, or other institution, the physician performing the abortion is responsible for obtaining a physician reporting code from MDH (See instruction #3), collecting all of the necessary data, completing the report, and filing it with the Minnesota Center for Health Statistics within the time period specified by law (See instruction #7).

### 2. Facility reporting codes

All facilities reporting on behalf of physicians must be assigned a reporting code from MDH. This code is in addition to individual physician reporting codes (See instruction #3). Facilities must submit a name and address to receive a facility code. For facilities that have been reporting to MDH prior to October 1, 1998, already have a facility reporting code and may continue to use the same code for future reporting.

### 3. Physician reporting codes

All physicians must be assigned a reporting code in order to submit a Report of Induced Abortion. Reports submitted without a physician reporting code will be considered incomplete. To obtain a code, physicians, or facilities reporting on behalf of physicians (See instruction # 1), must call MDH to be assigned one code per physician. MDH will require that a valid mailing address be provided for the purposes of keying the reporting code, but no other identifying information will be asked or accepted. Addresses provided may be a business address, or an address established by the physician or facility, such as a PO Box. If facilities are reporting on behalf of their physicians, the facility address may be used for the physician address.

### 4. One report per induced termination of pregnancy

Complete one report for each termination of pregnancy procedure performed.

### 5. Criterion for a complete report

All items on the report should have a response, even if the response is "0, "None," "Unknown," or "Refuse to Answer."

### 6. "Reason for abortion" question

MDH recommends that Item #21 on the report be reviewed with each patient. All responses can be reviewed with the patient before completing the question. If this question is transcribed to another piece of paper, or read to the patient, the question must be copied or read exactly as it is worded on the Report of Induced Abortion. If the patient does not complete the question because she refuses to answer, then the facility or physician must check the appropriate response, which is "Refuse to answer."

### 7. Method of disposal for fetal remains

Reporters should be informed that this question applies to disposal of fetal remains as defined under MN Statutes §145.1621, subd.2.

### 8. Submission dates

Reports should be completed and submitted to the Center for Health Statistics as soon as possible following each procedure. MDH encourages facilities and physicians to submit reports on a monthly basis, but the final date for submitting reports is April 1 of the following year (e.g., all reports for procedures done in 1998 are due by April 1, 1999). (MN Statutes 1998, §145.411)

### REPORT OF COMPLICATION(S) FROM INDUCED ABORTION

A. Facility where patient was attended for complication: \_\_\_\_\_, \_\_\_\_\_  
Name City

B. Physician who treated patient's complication: (See instruction #1)

Name: \_\_\_\_\_, \_\_\_\_\_ or Physician code: \_\_\_\_\_  
Last First

C. Medical specialty of physician who treated patient's complication: \_\_\_\_\_

D. Date complication was diagnosed: \_\_\_\_/\_\_\_\_/\_\_\_\_

E. Exact date, or patient recall of the date, the induced abortion was performed:

\_\_\_\_ Day \_\_\_\_ Month \_\_\_\_ Year (Please indicate numeric day, month, and year. If only month and/or year is known, please indicate in the spaces provided.)

F. Clinical or patient's estimate of gestation at time of induced abortion: \_\_\_\_\_ (weeks)

G. Has patient acknowledged being seen previously by another provider for the same complication?

\_\_\_\_ Yes \_\_\_\_ No

- 1. Cervical laceration requiring suture or repair
- 2. Heavy bleeding/hemorrhage with estimated blood loss of >=500 cc
- 3. Uterine Perforation
- 4. Infection requiring inpatient treatment
- 5. Heavy bleeding/anemia requiring transfusion
- 6. Failed termination of pregnancy (Continued viable pregnancy)
- 7. Incomplete termination of pregnancy (Retained products of conception requiring re-evacuation)
- 8. Other (May include psychological complications, future reproductive complications, or other illnesses or injuries that in the physician's medical judgment occurred as a result of an induced abortion. Please specify diagnosis.)

-----  
-----

# INSTRUCTIONS

**MANDATED REPORTERS:** Any physician licensed and practicing in the state who knowingly encounters an illness or injury that, in the physician's medical judgment, is related to an induced abortion, or the facility where the illness or injury is encountered shall complete and submit the Report of Complication(s) from Induced Abortion.

**DEFINITION OF INDUCED ABORTION:** For the purpose of these reports, induced abortion means the purposeful interruption of an intrauterine pregnancy with the intention other than to produce a live-born infant, and which does not result in a live birth. This definition excludes management of prolonged retention of products of conception following fetal death.

## PROCEDURE FOR COMPLETION AND SUBMISSION OF FORMS:

### 1. Completion of items

All forms should have completed information for items A-G. Physicians may choose to use their name or a physician reporting code when submitting the Report of Complication(s) from Induced Abortion. To obtain a code, physicians, or facilities reporting on behalf of physicians (See instruction # 3), must call MDH to be assigned one code per physician. MDH will require that a valid mailing address be provided for the purposes of keying the reporting code, but no other identifying information will be asked or accepted. Addresses provided may be a business address, or an address established by the physician or facility, such as a PO Box. If facilities are reporting on behalf of their physicians, the facility address may be used for the physician address. **Please note: physicians who perform abortions should use the same physician reporting code when submitting the Report of Complication(s) from Induced Abortion and the Report of Induced Abortion.**

### 2. Reporting complications not indicated on the current list

The category "Other" should be used for any diagnosed complications that are not part of the current list. The current complications list includes those complications that are supported both in the medical literature and by clinical opinion as being directly associated with induced abortion. Because there are clinical opinions and data that suggest that there may be more complications associated with induced abortion, the "Other" category is provided to capture those types of complications. If "Other" is used, be sure to clearly state the diagnosed complication in the space provided.

### 3. Reporting by physician or facility

The Minnesota Department of Health (MDH), Center for Health Statistics, encourages physicians and facilities to develop internal policies for the completion and submission of the Report of Complication(s) from Induced Abortion. These policies should designate either the individual physician or the facility as having the overall responsibility and authority to see that the reports are completed. This may help prevent duplicate reporting or a failure to report. When a complication from an induced abortion is encountered outside a hospital, clinic, or other institution, the physician who encounters the complication is responsible for obtaining all of the necessary data, completing the form, and filing it with the Center for Health Statistics.

### 4. Submission dates

The Report of Complication(s) from Induced Abortion, must be submitted by a physician or facility to the Center for Health Statistics as soon as practicable after the encounter with the abortion related illness or injury. (MN Statutes 1998, § 145.3132)

#### MINNESOTA STATE LAW

§145.4132 [RECORDING AND REPORTING ABORTION COMPLICATION DATA.] Subdivision 1. [FORMS.] (a) Within 90 days of the effective date of this section, the commissioner shall prepare an abortion complication reporting form for all physicians licensed and practicing in the state. A copy of this section shall be attached to the form. (b) The board of medical practice shall ensure that the abortion complication reporting form is distributed: (1) to all physicians licensed to practice in the state, within 120 days after the effective date of this section and by December 1 of each subsequent year; and (2) to a physician who is newly licensed to practice in the state, at the same time as official notification to the physician that the physician is so licensed.

Subd. 2. [REQUIRED REPORTING.] A physician licensed and practicing in the state who knowingly encounters an illness or injury that, in the physician's medical judgment, is related to an induced abortion or the facility where the illness or injury is encountered shall complete and submit an abortion complication reporting form to the commissioner.

Subd. 3. [SUBMISSION.] A physician or facility required to submit an abortion complication reporting form to the commissioner shall do so as soon as practicable after the encounter with the abortion related illness or injury.

Subd. 4. [ADDITIONAL REPORTING.] Nothing in this section shall be construed to preclude the voluntary or required submission of other reports or forms regarding abortion complications.

## REPORT OF INFORMED CONSENT RELATED TO INDUCED ABORTION

### ► Instructions

1. Reporting year is the year in which the required information was given to the patient.
2. Physician reporting code is required. This may be same code that is used for the "Report of Induced Abortion," but a separate code may be obtained. To obtain a code, contact the Minnesota Department of Health at 800-657-3900.

Reporting Year \_\_\_\_\_

Physician Reporting Code \_\_\_\_\_

### Medical Risks Information

#### ► Check one box in question 1.

1. *Method used to inform patient of:*

- (i) the particular medical risks associated with the particular abortion procedure to be employed including, when medically accurate, the risks of infection, hemorrhage, breast cancer, danger to subsequent pregnancies, and infertility;
- (ii) the probable gestation age of the unborn child at the time the abortion is to be performed;
- (iii) the medical risks associated with carrying her child to term; and
- (iv) for abortions after 20 weeks gestational, whether or not an anesthetic or analgesic would eliminate or alleviate organic pain to the unborn child caused by the particular method of abortion to be employed, the particular medical benefits and risks associated with the particular anesthetic or analgesic, and any additional cost of the procedure for the administration of the anesthetic or analgesic.

Telephone by:

- referring physician  
 physician who will perform the abortion

In Person by:

- referring physician  
 physician who will perform the abortion

Information not provided because:

- an immediate abortion was necessary to avert patient's death.  
 (Optional to write in the principal medical condition of the patient which would have caused the patient's death: \_\_\_\_\_)
- a delay would have created serious risk of substantial and irreversible impairment of a major bodily function. (Optional to write in the principal medical condition of the patient which would have caused the patient's impairment of a major bodily function: \_\_\_\_\_)
- the patient's unborn child was diagnosed with a fetal anomaly incompatible with life, the patient was informed of available perinatal hospice services and offered this care as an alternative to abortion, and the patient accepted perinatal hospice services.  
 (Optional to write in the anomaly diagnosed: \_\_\_\_\_)

### Medical Assistance and Printed Materials Information

#### ► Check one box in question 2.

2. *Method used to inform patient that:*

- (i) medical assistance benefits may be available for prenatal care, childbirth, and neonatal care;
- (ii) the father is liable to assist in the support of her child, even in instances when the father has offered to pay for the abortion; and
- (iii) she has the right to review printed materials published by the Minnesota Department of Health and that these materials are available on a state-sponsored Web site, and what the Web site address is. (<http://www.health.state.mn.us/wrtk/handbook.html>)

Telephone by:

- referring physician  
 agent of referring physician (Optional to write in title of the agent [ex.- nurse, counselor, etc.]: \_\_\_\_\_)  
 physician performing abortion  
 agent of physician performing abortion (Optional to write in title of the agent [ex.- nurse, counselor, etc.]: \_\_\_\_\_)

In Person by:

- referring physician  
 agent of referring physician (Optional to write in title of the agent [ex.- nurse, counselor, etc.]: \_\_\_\_\_)  
 physician performing abortion  
 agent of physician performing abortion (Optional to write in title of the agent [ex.- nurse, counselor, etc.]: \_\_\_\_\_)

Information not provided because:

- an immediate abortion was necessary to avert patient's death.  
 (Optional to write in the principal medical condition of the patient which would have caused the patient's death: \_\_\_\_\_)
- a delay would have created serious risk of substantial and irreversible impairment of a major bodily function.  
 (Optional to write in the principal medical condition of the patient which would have caused the patient's impairment of a major bodily function: \_\_\_\_\_)
- the patient's unborn child was diagnosed with a fetal anomaly incompatible with life.  
 (Optional to write in the anomaly diagnosed: \_\_\_\_\_)

### Patient Access to Printed Materials

#### ► Check one box under either question 3A or question 3B.

3A. Patient availed herself of the opportunity to obtain a printed copy of materials published by the Minnesota Department of Health, other than on the web site **and** to the best of your knowledge:

- Patient went on to obtain an abortion (optional to check one of the next two boxes:  same facility  different facility)  
 Patient did not go on to obtain abortion.  
 Do not know if patient went on to obtain abortion.

3B. Patient did *not* avail herself of the opportunity to obtain a printed copy of materials published by the Minnesota Department of Health, other than on the web site **and** to the best of your knowledge:

- Patient went on to obtain an abortion (optional to check one of the next two boxes:  same facility  different facility)  
 Patient did not go on to obtain abortion.  
 Do not know if patient went on to obtain abortion.
