Public Surveys for Deer Goal Setting

MN DNR periodically conducts stakeholder surveys to collect information about public desires and opinions regarding specific natural resource management issues. Survey recipients are selected randomly and provide a statistically representative sample of stakeholder opinions. Thus, these surveys differ from annual public input opportunities which may include some bias according to self-selection of interested parties. In 2014, both hunters (Appendix A) and landowners (Appendix B) in this goal setting block were surveyed; the resulting information provides a basis for the 2015 deer population goal setting process. This report covers goal block G3, Pine Moraines.

Methods

Hunters and private landowners were surveyed using a mixed mode design that included two waves of letters requesting survey completion online; the third wave was mailed using a self-administered mail back questionnaire (Appendices A and B).

We randomly selected 2,000 adult 2013 deer license holders who indicated they intended to hunt in deer areas 241, 242, 246, 248, 251, 258, 259, or 287. A total of 79 were undeliverable and we received 763 completed responses, which yielded an adjusted response rate of 39.7%.

Landowner parcels were stratified into 4 acreages, 1) 2 - 19.9, 2) 20 - 79.9, 3) 80 - 319.9, and 4) 320+. We selected a simple random sample from strata 1-3 (n = 640) and surveyed all landowners in stratum 4 (N = 383). Overall, we removed 79 landowners from the mailing due to already receiving a hunter survey and there were 193 undeliverable surveys; 867 completed landowner surveys were returned, yielding a 42.7% adjusted response rate. For both surveys, our error rate at the goal block level was 3.5%.

Hunter Survey

Demographics

Nearly all respondents (98%) indicated they hunted during the 2013 firearm deer season. Overall 21% indicated they hunted deer during the archery season and 19% hunted muzzleloader. Firearm hunters spent an average of 5.1 days afield, compared to 5.7 for muzzleloader and 15.0 for archery hunters. Overall, individuals had hunted an average of 28 years in Minnesota and 19 years in the deer area they indicated they hunted most often. Overall, 87% of respondents were male and the average age was 51.4 (range = 19 - 91).

Most hunters did at least some of their hunting on their own private land (64%), other private land (64%), or public land (65%). Another 14% indicated they did at least some hunting on lands that they leased for deer hunting. Only 4.2% of respondents hunted exclusively on land they leased. Also, we found no statistical differences among hunters, based on the lands they hunted. With respect to future populations; a majority expressed a desire for an increase in deer numbers, regardless of where they hunted (Table 1).

Population trends and perceptions about deer populations

Respondents were asked to indicate their perceptions of deer population trends over the last 5 years. Overall, 69% of respondents indicated there were fewer deer than 5 years ago, 10% indicated more, and 21% believed populations were the same. We noted differences in responses with 92% of 287 hunters (Itasca State Park) most likely to indicate deer populations had declined (Table 2). Respondents were also asked for their perceptions of total deer population size as rated by 'too low', 'about right', or 'too high'. Slightly more than half (54%) believed the population was 'too low', 40% thought it was 'about right', and 6% indicated the population was 'too high'. Respondents in deer area 241 were most likely to indicate that populations were about right (50%) or too high (10%) (Table 3). Respondents were also asked to indicate their desires for future deer population densities and slightly more than two-thirds (68%) wanted to see an increase in deer densities at some level (Table 4, Figure 1). Interestingly, most respondents (88%) would shoot an antlerless deer if given the opportunity.

Satisfaction

Hunters were asked to indicate their overall satisfaction with deer numbers, whether they heard about or saw legal bucks, their satisfaction with the number of legal bucks, quality of bucks, total number of deer and total number of antlerless deer. Less than half (31%) were satisfied with current deer numbers; a majority (55%) indicated dissatisfaction (Table 5). Similarly, 39% of respondents indicated they were satisfied with the total number of deer they saw while hunting (48% were not satisfied and 18% were neutral). Nearly half (47%) were satisfied with the total number of antlerless deer they observed. Fewer hunters (34%) were satisfied with the number of legal bucks observed; 48% of hunters indicated they saw heard about or saw legal bucks while hunting. More hunters (49%) were dissatisfied than satisfied (34%) with the quality of bucks observed (Table 6). Finally, a higher percentage of people who did at least some of their hunting on their own property expressed satisfaction with total deer numbers, as compared to public land hunters, those who lease, and people who hunt private land they don't own (Figure 2).

Consideration when setting deer population goals

Respondents were also asked to rate the importance of 12 items when setting deer population goals. They were expressed as items that respondents could consider as relatively important when setting deer population goals. The scale ranges from 'not at all important' to 'very important' and covered a range of items that would lead to management for either higher or lower deer populations. Overall, respondents were mixed in that they viewed winter mortality and disease risks as important, yet the amount of crop damage from deer and impacts on other species had lower relative importance. Conversely, hunter satisfaction, hunting tradition, and economic considerations had high relative importance (Table 7, Figure 3).

| | Relative Importance | | | | | | |
|---|---------------------|--------|------------|-----------|------|--|--|
| | Not at | А | | | | | |
| Item | all | little | Moderately | Important | Very | | |
| Amount of deer mortality during an average winter | 4% | 11% | 26% | 44% | 16% | | |
| Amount of deer mortality during a severe winter | 2% | 8% | 15% | 37% | 38% | | |
| Deer over-browsing of forests | 10% | 18% | 26% | 31% | 14% | | |
| Public satisfaction with deer numbers | 12% | 20% | 26% | 27% | 16% | | |
| Hunter satisfaction with deer numbers | 8% | 16% | 27% | 29% | 19% | | |
| The number of deer-vehicle collisions | 10% | 19% | 31% | 27% | 13% | | |
| Amount of crop damage from deer | 18% | 28% | 29% | 18% | 7% | | |
| Impacts of deer on other wildlife species | 21% | 27% | 27% | 20% | 6% | | |
| Potential health risks to the deer herd | 2% | 7% | 17% | 41% | 33% | | |

| Impact of deer hunting on the local economy | 6% | 11% | 24% | 32% | 26% | | |

Table 7. Items that hunters believed should be important when considering setting deer population goals.

Figure 3. Graphical importance of items that should be considered when setting deer population goals as defined by hunters. Items were consolidated into 3 groups.

Landowner Survey

Demographics

We received 199, 258, 253, and 157 responses from the 4 strata, respectively. Because the number of undeliverable surveys was high (n = 193), we could not calculate survey response by stratum. In total, 65% of respondents indicated they hunted deer in Minnesota during the 2013 deer season; similar percentages were reported for 2011 (68%) and 2012 (67%). There were no statistical differences between the online or mail survey responses for the percentage of landowners who hunted deer. Since those percentages did not vary, tables that describe hunter attitudes are based off whether or not they hunted in 2013 only. By stratum, a lower proportion of respondents who owned 2 – 20 acres indicated they hunted (44%), as compared to other landowners (20-79.9: 68%; 80-319.9: 74%; 320+: 73%). Overall, individuals had hunted an average of 38 years. In total, 72% of respondents were male and the average age was 61.5 (range = 18 - 94).

Hunting patterns

A majority of landowners did all of their hunting on their own private land (63%); conversely, a minority hunted public land (43%), land they didn't own (40%), or leased land (8.4%). Regardless of where they hunted, a majority of hunting landowners expressed a desire for an increase in deer numbers (Table 8).

Most landowners (77%) indicated they allowed hunting on their property. As expected, individuals with smaller parcels allowed hunting at lower rates (41%) then landowners with at least 20 acres (82% - 92%). In essence, the majority of parcels at least 20 acres in size are hunted in this goal setting block. Overall, only 2.8% of landowners indicated they leased their property for hunting with the highest percentage (7%; n = 18) of leasing occurring on parcels at least 320 acres in size. With respect to who is allowed to hunt, 66% indicated family members, 41% indicated friends or neighbors, and 4.7% allowed strangers who asked permission.

Reported damage from deer

The percentage of landowners who had acreage in crops (e.g., row crops, small grains, orchards, vegetables) varied greatly by stratum, as did the percentage who owned woodlots and residential acreage (Figure 4). With the exception of landscaping damage, we also observed similar patterns for landowners who reported damage from deer (Figure 5). A majority of landowners indicated they had deer-related damage, with individuals owning at least 20 acres indicating higher levels (Table 9). We also observed no statistical differences among deer permit areas for landowners who reported they had crops, woods, or residential acreage (Figure 6).

Population trends and perceptions about deer populations

Respondents were asked to indicate their perceptions of deer population trends over the last 5 years. Overall, 45% (36% non-hunters, 49% hunters) of respondents indicated there were fewer deer than 5 years ago, 23% (26% non-hunters, 21% hunters) indicated more, and 32% (38% non-hunters, 23% hunters) believed populations were the same. Comparable to hunter survey, respondents who lived in deer area 241 had the highest percentage of people who thought the population was higher (Table 10). Respondents were also asked for their perceptions of total deer population size as rated by 'too low', 'about right', or 'too high'. Non-hunting landowners were far more likely to indicate the deer populations were 'too low' (41% vs 20%). Roughly similar

percentages believed the population was too high (11% hunters, 18% non-hunters). Similar patterns were detected by deer area in that hunting landowners were much more likely to express different population desires than non-hunting landowners (Table 11). Respondents were also asked to indicate their desires for future deer population densities and 45% wanted to see an increase in deer densities at some level (Table 12, Figure 7). We also observed clear differences between hunting and non-hunting landowners with hunting landowners indicating stronger preferences for higher deer populations (Table 13; Figure 8).

| | Lower | | Th | e Same | Higher | |
|-----------|-------|---------|-----|---------|--------|---------|

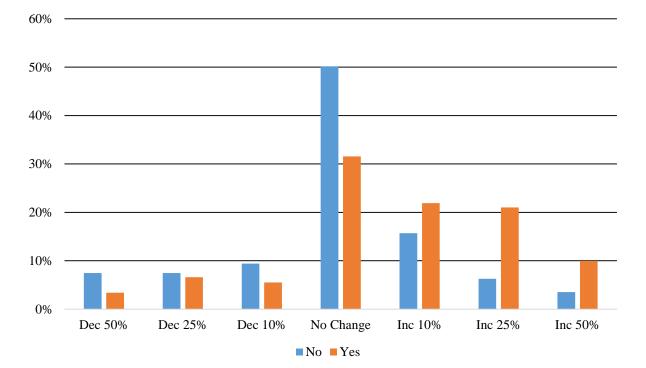

Figure 8. Graphical representation of landowner desires for future deer populations, by whether or not they hunted.

Consideration when setting deer population goals

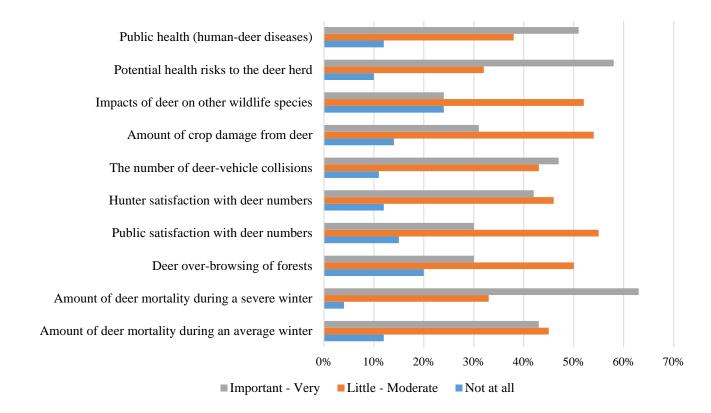

Respondents were also asked to rate the importance of 10 items when setting deer population goals². The scale ranges from 'not at all important' to 'very important' and covered a range of items that would lead to both higher and lower deer populations. Similar to the hunter survey, respondents were mixed in that they viewed winter mortality and disease risks as important, yet the amount of crop damage from deer and impacts on other species had lower relative importance. Conversely, hunter satisfaction, hunting tradition, and economic considerations had high relative importance (Table 14; Figure 9).

Table 14. Importance of items landowners indicated should be considered when setting deer population goals.

| | Relative Importance | | | | | |
|---|---------------------|--------|------------|-----------|------|--|
| | | А | | | | |
| Item | Not at all | little | Moderately | Important | Very | |
| Amount of deer mortality during an average winter | 12% | 14% | 30% | 32% | 11% | |
| Amount of deer mortality during a severe winter | 4% | 10% | 23% | 35% | 28% | |
| Deer over-browsing of forests | 20% | 23% | 27% | 23% | 7% | |
| Public satisfaction with deer numbers | 15% | 23% | 31% | 25% | 6% | |
| Hunter satisfaction with deer numbers | 12% | 16% | 30% | 29% | 13% | |
| The number of deer-vehicle collisions | 11% | 15% | 27% | 30% | 16% | |
| Amount of crop damage from deer | 14% | 25% | 30% | 21% | 10% | |
| Impacts of deer on other wildlife species | 24% | 24% | 28% | 19% | 5% | |
| Potential health risks to the deer herd | 10% | 11% | 21% | 31% | 27% | |
| Public health (human-deer diseases) | 12% | 19% | 19% | 26% | 24% | |

² The questions about hunting heritage and impacts of deer hunting to the local economy were inadvertently omitted.

Figure 9. Graphical importance of items that landowners indicate should be considered when setting deer population goals. Items were consolidated into 3 groups.

2014 Survey of Minnesota Deer Hunters: Population Management

The Minnesota DNR will be evaluating deer population goals in central Minnesota this year. An important component of this project is to collect information from deer hunters regarding their opinions towards deer populations. You have been selected at random to participate in this survey. Please take a few moments to answer the questions below. Your responses will help guide deer population goals in the area you hunt.

- 1. Please check the boxes below to report if you hunted deer in Minnesota during the 2011, 2012 or 2013 Minnesota deer season. (*Please check all that apply*).
 - □ 2011 | □ 2012 | □ 2013
 - □ I did not hunt deer any of these years \rightarrow Please skip to Question 13
- 2. Minnesota allows people to hunt deer during all 3 seasons. For the most recent year you hunted, which seasons did you participate? Please mark 'Yes' if you hunted a season and also estimate the number of days you hunted.

| Season | Yes | No | If Yes, Number of Days |
|--------------|-----|----|---------------------------|
| Archery | | | |
| Firearm | | | |
| Muzzleloader | | | |

- 3. Which **ONE** deer permit area did you hunt most often during the most recent deer season you hunted? □ 241 | □ 242 | □ 246 | □ 248 | □ 251 | □ 258 | □ 259 | □ 287 | □ None of these
- 4. If you <u>did not hunt one of the permit areas</u> listed above, please tell us which one you hunted most often: ______Area Number
- 5. Including 2013, how many years have you hunted deer in the permit area you hunt most often? _____ Years
- 6. Including 2013, how many total years have you been hunting deer in Minnesota? _____ Years
- 7. How much of your deer hunting did you do on each of the following types of land during your most recent deer hunting season? (*Please circle one item from each row.*)

| | None | Some | Most | All |
|--|------|------|------|-----|
| Private land that I own | 1 | 2 | 3 | 4 |
| Private land that I lease for hunting | 1 | 2 | 3 | 4 |
| Private land that I do <u>not</u> own or lease | 1 | 2 | 3 | 4 |
| Public land | 1 | 2 | 3 | 4 |

- 8. Please indicate if there are any deer harvest restrictions on the property you hunt most often.
 - Antlerless harvest is restricted, but hunters can take any legal buck
 - Buck harvest is restricted to only large antlered bucks, but hunters can take any antlerless deer
 - Buck harvest restricted to only large antlered bucks, and antlerless harvest is also restricted
 - □ No restrictions on the type of deer that can be harvested
 - □ Other (please explain): _____
- 9. Please indicate whether you agree or disagree with the following statements regarding your most recent deer hunt. (*Please circle one number for each statement below*).

| | Strongly Disagree | Slightly Disagree | Neither Agree nor Disagree | Slightly Agree | Strongly Agree |
|--|----------------------|----------------------|-------------------------------------|-------------------|-------------------|
| I was satisfied with the number of legal bucks | 1 | 2 | 3 | 4 | 5 |
| I was satisfied with the quality of bucks | 1 | 2 | 3 | 4 | 5 |
| I heard about or saw legal bucks while hunting | 1 | 2 | 3 | 4 | 5 |
| I was satisfied with the total number of antlerless deer | 1 | 2 | 3 | 4 | 5 |
| I was satisfied with the total number of deer | 1 | 2 | 3 | 4 | 5 |

- 10. Will you shoot an antlerless deer if given the opportunity?
 - □ Yes
 - 🛛 No
- 11. Over the past 5 years, what trend have you seen in the deer population in the deer area you hunt most often?
 - □ Much fewer deer now than 5 years ago
 - □ Slightly fewer deer now than 5 years ago
 - \Box About the same number of deer as 5 years ago
 - \Box Slightly more deer now than 5 years ago
 - □ Many more deer now than 5 years ago
- 12. In thinking about the deer permit area you hunt, please indicate your overall satisfaction with current deer numbers.
 - □ Very Dissatisfied
 - □ Slightly Dissatisfied
 - □ Neither Dissatisfied or Satisfied
 - □ Slightly Satisfied
 - □ Very Satisfied

13. How much importance should we assign to each of the following considerations when setting deer population goals? (*Please circle one number for each statement below*).

| | Not at all Important | A little Important | Moderately Important | Important | Very Important |
|--|-------------------------|-----------------------|-------------------------|-----------|-------------------|
| Amount of deer mortality during an average winter | 1 | 2 | 3 | 4 | 5 |
| Amount of deer mortality during a <u>severe</u> winter | 1 | 2 | 3 | 4 | 5 |
| Potential health risks to the deer herd | 1 | 2 | 3 | 4 | 5 |
| Public health (human-deer diseases) | 1 | 2 | 3 | 4 | 5 |
| Amount of crop damage from deer | 1 | 2 | 3 | 4 | 5 |
| The number of deer-vehicle collisions | 1 | 2 | 3 | 4 | 5 |
| Deer over-browsing of forests | 1 | 2 | 3 | 4 | 5 |
| Impacts of deer on other wildlife species | 1 | 2 | 3 | 4 | 5 |
| Deer hunting heritage and tradition | 1 | 2 | 3 | 4 | 5 |
| Hunter satisfaction with deer numbers | 1 | 2 | 3 | 4 | 5 |
| Public satisfaction with deer numbers | 1 | 2 | 3 | 4 | 5 |
| Impact of deer hunting on the local economy | 1 | 2 | 3 | 4 | 5 |

14. Please identify up to 3 other factors that you believe are important and should be considered when setting deer population goals.

| 1) | |
|----|--|
| 2) | |
| 3) | |

16. In thinking about your property and the surrounding area, would you say the deer population is,

□ Much too Low □ Too Low □ About Right □ Too High □ Much too High

17. In thinking about your property and the surrounding area, at what level do you think the deer population should be managed? (*Please circle one*).

| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
|------------------------|------------------------|------------------------|-----------|------------------------|------------------------|------------------------|
| Decrease Population | Decrease Population | Decrease Population | No Change | Increase Population | Increase Population | Increase Population |
| 50% | 25% | 10% | | 10% | 25% | 50% |
| (Significant) | (Moderate) | (Slight) | | (Slight) | (Moderate) | (Significant) |

- 18. To what extent would you support or oppose a regulation that would increase the proportion of antlered bucks in the deer area you hunt most often?
 - □ Strongly Oppose
 - □ Slightly Oppose
 - □ Neither Oppose nor Support
 - □ Slightly Support
 - □ Strongly Support
- 19. Please let us know how you feel about the Minnesota Department of Natural Resources. (*Please circle one response for each of the following statements.*)

| | | Neither | | | |
|---|----------------------|----------------------|----------------------|-------------------|-------------------|
| | Strongly Disagree | Slightly Disagree | Agree or Disagree | Slightly Agree | Strongly Agree |
| The MnDNR does a good job of managing deer in Minnesota. | 1 | 2 | 3 | 4 | 5 |
| When deciding about deer management in Minnesota, the MnDNR will be open and honest in the things they do and say. | 1 | 2 | 3 | 4 | 5 |
| The MnDNR can be trusted to make decisions about deer management that are good for the resource. | 1 | 2 | 3 | 4 | 5 |
| The MnDNR will make decisions about deer management in a way that is fair. | 1 | 2 | 3 | 4 | 5 |
| The MnDNR has deer managers and biologists who are well- trained for their jobs. | 1 | 2 | 3 | 4 | 5 |
| The MnDNR listens to deer hunters' concerns. | 1 | 2 | 3 | 4 | 5 |

20. What is your gender?

□ Male | □ Female

21. What year were you born? _____ (*Please use the 4 digit year*)

If you would be willing to respond to additional questions about deer management and hunting in Minnesota and are willing to provide your email address, please write it below. We will only use your email address for research related to deer management and will not share it with anyone.

e-mail address:

2014 Survey of Minnesota Landowners: Deer Management

The Minnesota DNR will be evaluating deer population goals in central Minnesota this year. An important component of this project is to collect information from landowners regarding their opinions towards deer populations and land management. You have been selected at random to participate in this survey. Please take a few moments to answer the questions below. Your responses will help guide deer population goals in the area you own land.

- 1. How many total acres did you own and/or lease at the end of 2013?
- 2. Please make a "rough" estimate as to how many acres of your property (owned and leased) are in each of the following categories. Please also estimate the percentage of that land type you have enrolled in a State or Federal Conservation Program.

| Land Type | Acres Owned | Acres Leased | % Enrolled in Conservation Program |
|--|----------------|-----------------|--|
| Private Residence (house, lawns, associated buildings) | | | % |
| Woodlands (natural forest or tree plantings) | | | % |
| Brushland (including abandoned, overgrown fields) | | | % |
| Hayfields, Pasture, or Grassland | | | % |
| Wetlands | | | % |
| Row Crops | | | % |
| Small Grains | | | % |
| Orchards or Vineyards | | | % |
| Vegetables or other Truck Crops | | | % |
| Prairie (Native or Restored) | | | % |
| Wildlife Food Plots | | | % |
| Other (Please list:) | | | % |

3. Did you experience deer damage to land that you own or leased in 2013?

| Crops | ⊔ Yes | | |
|-------------|-------|-------------------------|-----------------------------|
| Woodlands | □ Yes | \Box No \rightarrow | IF ALL ARE <u>NO</u> PLEASE |
| Landscaping | □ Yes | □ No | SKIP TO QUESTION 6 |

4. How would you describe the total amount of deer damage you experienced in 2013? (Check one).

□ Negligible □ Minor

□ Moderate □ Severe

Very Severe

- 5. How would you compare the amount of deer damage you experienced in 2013 to what you experienced 5 years ago? (*Check one*).
 - □ Much less damage than 5 years ago
 - □ Slightly less damage than 5 years ago
 - $\hfill\square$ About the same damage as 5 years ago
 - □ Slightly more damage than 5 years ago
 - \Box Much more damage than 5 years ago
 - □ I was not farming/managing lands 5 years ago
- 6. Over the past 5 years, what trend have you seen in the deer population in the area of your property? (*Check one*).
 - $\hfill\square$ Much fewer deer now than 5 years ago
 - \Box Slightly fewer deer now than 5 years ago
 - \Box About the same number of deer now as 5 years ago
 - $\hfill\square$ Slightly more deer now than 5 years ago
 - $\hfill\square$ Many more deer now than 5 years ago
- 7. In thinking about your property and the surrounding area, please indicate your overall satisfaction with current deer numbers. (*Please check one below*).
 - □ Very Dissatisfied □ Slightly Dissatisfied □ Neutral □ Slightly Satisfied □ Very Satisfied
- 8. How much importance should we assign to each of the following considerations when setting deer population goals? (*Please circle one number for each statement below*).

| | Not at all Important | A little Important | Moderately Important | Important | Very Important |
|---|-------------------------|-----------------------|-------------------------|-----------|-------------------|
| Amount of deer mortality during an average winter | 1 | 2 | 3 | 4 | 5 |
| Amount of deer mortality during a severe winter | 1 | 2 | 3 | 4 | 5 |
| Potential health risks to the deer herd such as chronic wasting disease | 1 | 2 | 3 | 4 | 5 |
| Public health (such human-deer disease from ticks) | 1 | 2 | 3 | 4 | 5 |
| Amount of crop damage from deer | 1 | 2 | 3 | 4 | 5 |
| The number of deer-vehicle collisions | 1 | 2 | 3 | 4 | 5 |
| Deer over-browsing of forests | 1 | 2 | 3 | 4 | 5 |
| Impacts of deer on other wildlife species | 1 | 2 | 3 | 4 | 5 |
| Hunter satisfaction with deer numbers | 1 | 2 | 3 | 4 | 5 |
| Public satisfaction with deer numbers | 1 | 2 | 3 | 4 | 5 |

- 9. Please identify up to 3 other factors that you believe are important and should be considered when setting deer population goals.

10. In thinking about your property and the surrounding area, would you say the deer population is, (*Check one*)

□ Much too Low □ Too Low □ About Right □ Too High □ Much too High

11. In thinking about your property and the surrounding area, at what level do you think the deer population should be managed? (*Please circle one*).

| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
|---------------|------------|------------|-----------|------------|------------|---------------|
| Decrease | Decrease | Decrease | No Change | Increase | Increase | Increase |
| Population | Population | Population | | Population | Population | Population |
| 50% | 25% | 10% | | 10% | 25% | 50% |
| (Significant) | (Moderate) | (Slight) | | (Slight) | (Moderate) | (Significant) |

- 12. Did you allow hunting on your property during the 2013 deer season? (Check only one)
 - ❑ Yes
 ❑ No→PLEASE SKIP TO QUESTION 17
- 13. Do you lease any of your property for deer hunting?
 - □ Yes
 - No
- 14. Who did you allow to hunt deer on your property? (*Check mark all that apply*). Please also estimate the number of people who hunted your property in 2013.

| □ Myself or family members people | □ Strangers who ask permission people |
|-----------------------------------|---------------------------------------|
| □ Friends or neighbors people | □ People who lease my property people |
| □ Other (please list: |) people |

15. Please indicate if you impose any deer harvest restrictions on your property. (Please check one only).

- □ Antlerless harvest is restricted, but hunters can take any legal buck
- □ Buck harvest is restricted to only large antlered bucks, but hunters can take any antlerless deer
- □ Buck harvest restricted to only large antlered bucks, and antlerless harvest is also restricted

□ No restrictions on the type of deer that can be harvested

- Other (please list: _____)
- 16. Please check the boxes below to report if you hunted deer in Minnesota during the 2011, 2012 or 2013 Minnesota deer season? (*Please check all that apply*).
 - **2** 2011 | **2** 2012 | **2** 2013
 - □ I hunt deer but did not hunt any of these years \rightarrow Please skip to Question 21
 - □ I do not hunt deer at all \rightarrow Please skip to Question 22
- 17. Which **ONE** deer permit area did you hunt most often during the <u>most recent</u> deer season you hunted. $241 \mid 242 \mid 246 \mid 2248 \mid 2251 \mid 258 \mid 259 \mid 287 \mid N/A$

- 18. If you <u>did not hunt one of the permit areas</u> listed above, please tell us which one you hunted most often: ______Area Number
- 19. How much of your deer hunting did you do on each of the following types of land during your <u>most recent</u> deer hunting season? (*Circle one number for each item*).

| | None | Some | Most | All |
|---|------|------|------|-----|
| Private land that I own | 1 | 2 | 3 | 4 |
