CONTENTS

1	Origin and purpose of report	1
2	Medical effects of exposure	2
	Benign conditions of the pleura	2
	Asbestosis	2
	Lung cancer	2
	Mesothelioma	3
	Other cancers	3
3	Types of cancer produced	4
	Cancers caused by asbestos	4
	Gastro-intestinal cancer	4
	Laryngeal cancer	7
	Other cancers	7
	Conclusions	8
4	Difficulties in assessing quantitative effects of asbestos	14
	Laboratory evidence	14
	Epidemiological evidence	15
	Measures of exposure	20
	Measures of response	23
5	Dose-response relationships	32
	Asbestosis	32
	Cancer	33
	Mesothelioma	34
	Lung cancer	36
6	Effects anticipated with current control limits	46
	Amphibole asbestos	46
	Dose-specific risk estimates for chrysotile textile production	46
	The control limit for chrysotile	48
	Asbestos in buildings	49
7	Summary	51
	Acknowledgements	57
	References	58
	Appendix	Amended version of Table in previous report to the Health and Safety Commission 61
