Office of the State Auditor

Rebecca Otto
State Auditor

FINANCIAL and INVESTMENT REPORT of VOLUNTEER FIRE RELIEF ASSOCIATIONS

For the Year Ended December 31, 2014

Description of the Office of the State Auditor

The mission of the Office of the State Auditor is to oversee local government finances for Minnesota taxpayers by helping to ensure financial integrity and accountability in local governmental financial activities.

Through financial, compliance, and special audits, the State Auditor oversees and ensures that local government funds are used for the purposes intended by law and that local governments hold themselves to the highest standards of financial accountability.

The State Auditor performs approximately 150 financial and compliance audits per year and has oversight responsibilities for over 3,300 local units of government throughout the state. The office currently maintains five divisions:

Audit Practice - conducts financial and legal compliance audits of local governments;

Government Information - collects and analyzes financial information for cities, towns, counties, and special districts;

Legal/Special Investigations - provides legal analysis and counsel to the Office and responds to outside inquiries about Minnesota local government law; as well as investigates allegations of misfeasance, malfeasance, and nonfeasance in local government;

Pension - monitors investment, financial, and actuarial reporting for approximately 700 public pension funds; and

Tax Increment Financing - promotes compliance and accountability in local governments' use of tax increment financing through financial and compliance audits.

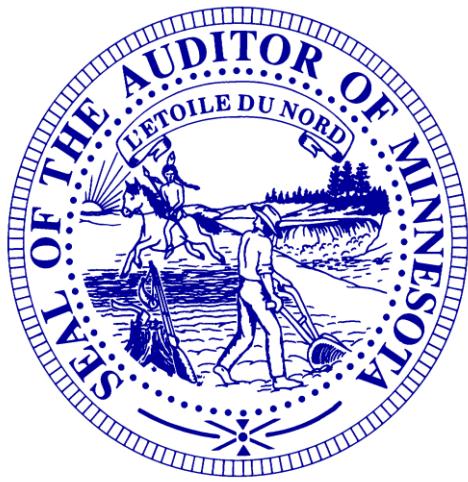

The State Auditor serves on the State Executive Council, State Board of Investment, Land Exchange Board, Public Employees Retirement Association Board, Minnesota Housing Finance Agency, and the Rural Finance Authority Board.

Scope and Methodology

This report summarizes and evaluates the finances, basic benefit structure, and investment performance of Minnesota's volunteer fire relief associations (relief associations). Relief associations are governmental entities that receive and manage public money to provide retirement benefits for individuals providing the governmental services of firefighting and emergency first response. Relief associations are required under Minnesota Statutes, chapters 69, 356, and 424A, to report annually financial, investment, and plan administration information to the Office of the State Auditor (OSA), and the State Auditor is required to provide a detailed report to the Legislature under Minnesota Statutes, sections 6.72 and 356.219.

During 2014, 643 relief associations were required to report to the OSA. This report includes information on 637 of the 643 relief associations. Six relief associations are not included in this report because the accuracy of certain data could not be determined in time for inclusion.¹ The 2013 report included information on 651 of the 656 relief associations that were required to report to the OSA that year.

Legislation passed by the 2009 Minnesota Legislature created the Voluntary Statewide Lump-Sum Volunteer Firefighter Retirement Plan (Plan). Twelve relief associations transferred their assets to the Plan in December 2014. Because there were no assets for these relief associations at year-end, certain data will not be included for them in this report. Thirteen relief associations transferred their assets to the Plan in December 2013, resulting in the decrease in the number of relief associations between the 2013 and 2014 reports.

To obtain analogous comparisons of investment performance, the OSA calculates rates of return for each relief association using a uniform calculation method. Minnesota Statutes, section 356.219, requires the OSA to compute and report total portfolio rates of return, net of all costs and fees. Using a uniform calculation method allows for a fair comparison of investment performance among relief associations. Custom benchmark rates of return calculated by the OSA for each relief association provide a standard against which investment performance may be measured for this group.

This report can be used by relief association trustees and municipal officials to compare their associations to those relief associations with similar plan types. Comparisons can be made on rates of return, net assets, funding ratios, and other reporting information. Regional maps are included to assist relief associations in determining average benefit levels and rates of return for their specific regions.

¹ The relief associations excluded from this report were five defined-benefit lump-sum plans and one defined-contribution plan.

Data tables included in this report provide financial, membership, benefit, and investment information. Tables 2-A, 2-B, and 2-C show the key financial and investment indicators for each relief association, including net assets and rates of return. The funding ratios and financial requirement components for each relief association are provided in Tables 3-A, 3-B, and 3-C. Tables 4-A, 4-B, and 4-C show the revenues and expenditures for each relief association. Membership and bylaw information are provided in Tables 5-A, 5-B, and 5-C, while benefit amounts are provided in Tables 6-A, 6-B, and 6-C. Tables 7 and 8 provide investment information for each relief association.

Executive Summary

- Relief associations held \$546.6 million in net assets at the end of 2014, representing accrued benefits for 18,662 firefighters. (Pages 6 and 31)
- Investment gains totaled \$28.0 million in 2014, a 58.9 percent decrease from the \$68.1 million in investment earnings during 2013. (Page 8)
- In 2014, relief associations received \$24.3 million in state aid, a 2.1 percent increase from the amount received in 2013. (Page 10)
- Relief associations received \$7.9 million in municipal contributions in 2014, a 12.2 percent decrease from the \$9.0 million received in 2013. Of the \$7.9 million received in municipal contributions, \$3.5 million was required to be contributed by statute and \$4.4 million was made voluntarily. It is interesting to note that this is the first time since 2009 that the amount of voluntary municipal contributions exceeded the amount of required municipal contributions. (Page 11)
- In 2014, there were 1,371 benefit disbursements to members or their beneficiaries. These disbursements included lump-sum service pensions, monthly service pensions, survivor benefits, and long-term disability benefits. The 1,371 benefit disbursements were 1.6 percent lower than the 1,393 benefit disbursements that were made during 2013. (Page 6)
- A total of \$30.7 million in service pensions was paid out by 361 different relief associations in 2014. The \$30.7 million paid out represents a 5.5 percent increase from the \$29.1 million paid in 2013. (Page 19)
- In 2014, relief associations had an average rate of return of 4.7 percent. The average rate of return for relief associations that held at least one-half of their assets with the State Board of Investment was 8.2 percent. Investment returns decreased from the 12.8 percent average rate of return in 2013. (Page 14)
- The average rate of return for relief associations over the past ten years was 4.5 percent, below the statutory interest rate assumption of five percent. Less than half, or 39.6 percent, of relief associations had average rates of return of at least five percent over the last ten years. Only twenty-three relief associations had rates of return that were equal to or greater than the State Board of Investment's Income Share Account for the ten-year period. (Pages 16 and 17)

Recommendations

- Relief associations should make sure that their investment policies include specific target asset allocations and accurately reflect the investment strategy of their plan. Relief associations should also periodically review their plans' asset allocation to determine if it is appropriate given their investment goals, specific membership profile, and risk tolerance.
- In general, relief associations should consider investing in balanced portfolios to avoid major investment losses in a single asset class. The investment policy should be crafted and maintained with a long-term investment perspective in mind. Relief associations must be able to withstand the significant losses that occasionally occur in particular asset classes, and trustees should take a long-term view of the performance of these assets. Moving out of certain investments after their value has declined eliminates the chance of benefiting from eventual market recoveries.
- Relief association trustees should understand their fund managers' investment strategies and hold investment advisors accountable for the performance of the assets being managed. Relief association trustees are not relieved of their fiduciary duties by hiring professional consultants or investment advisors. Trustees and members should regularly compare the investment performance of their advisors with the performance of passively-managed index funds and other benchmarks.
- Relief association trustees are encouraged to work cooperatively with municipal officials, and municipal officials who serve as trustees on the association board are encouraged to be thoroughly familiar with the association's finances and investment performance.
- Relief association boards should have a goal of achieving full funding and maintaining a healthy funding ratio. Relief associations that are not fully funded must carefully balance the desire to maintain benefit levels with the duty to ensure that the association remains financially stable for the long term.
- To ensure the long-term health of a plan, relief association trustees and municipal officials should be cautious when considering benefit changes. Relief association trustees, members, municipalities, and independent nonprofit firefighting corporation boards should understand the effects that benefit changes have on contribution requirements and the long-term health of the plan before approving new benefit levels. Implementing smaller, but more frequent, benefit changes may provide more stability to municipalities that are required to make contributions, and make benefit amounts more consistent over time.

Plan Types

A relief association's plan type is characterized by how the plan is funded. Relief associations can either be defined-contribution retirement plans or defined-benefit retirement plans. A defined-contribution retirement plan, also known as a "split-the-pie" plan, provides a retirement benefit with predetermined funding. The unknown variable for a defined-contribution retirement plan is what a member's benefit amount will be at retirement. The benefit amount is equal to the member's individual account balance at the time of retirement. Members of defined-contribution plans receive equal shares of state and municipal contributions and prorated shares of investment earnings. Account balances vary from year to year based on investment performance, revenues, and expenses. Members of a defined-contribution plan receive a one-time lump-sum payment when they retire.

A defined-benefit retirement plan provides a retirement benefit that is predetermined based on a formula. The unknown variable for a defined-benefit retirement plan is the amount of funding needed to support the predetermined benefits. Benefits are primarily funded through a combination of fire state aid, municipal contributions, and investment earnings. When revenue from one of these funding sources decreases, pressure may be put on the other funding sources to make up the difference. If a relief association experiences investment losses, for example, a municipality may need to increase its contributions to the association so that benefits are sufficiently funded.

Relief associations electing to administer defined-benefit retirement plans are further characterized by how benefits are payable. Defined-benefit retirement plans may either pay benefits as a one-time lump-sum payment or as a monthly payment made from the time of retirement until the member's death.

Nearly 84 percent of relief associations in Minnesota are lump-sum plans, meaning that they pay benefits as a one-time lump-sum payment to members upon their retirement. In lump-sum plans, benefits are paid to members based on an annual benefit level in effect at the time of the member's separation from active service and membership. Lump-sum plans are the most common plan type because they are generally easier to administer and have fewer associated administrative costs.

In 2014, only 23, or 3.6 percent, of relief associations offered monthly benefits to retirees. Of these relief associations, 20 provide their members with a choice at retirement of receiving a monthly benefit or a lump-sum benefit. Three relief associations provided only monthly benefits to their members. Monthly benefits are based on the member's years of service and a monthly benefit amount, and are paid from the time of retirement until the member's death. Monthly benefit plans are the least common type of plan due to their complexity and higher administrative costs. In fact, the majority of the 20 relief associations that offer their members a choice of receiving a monthly or a lump-sum benefit have discontinued the monthly benefit option for future members.

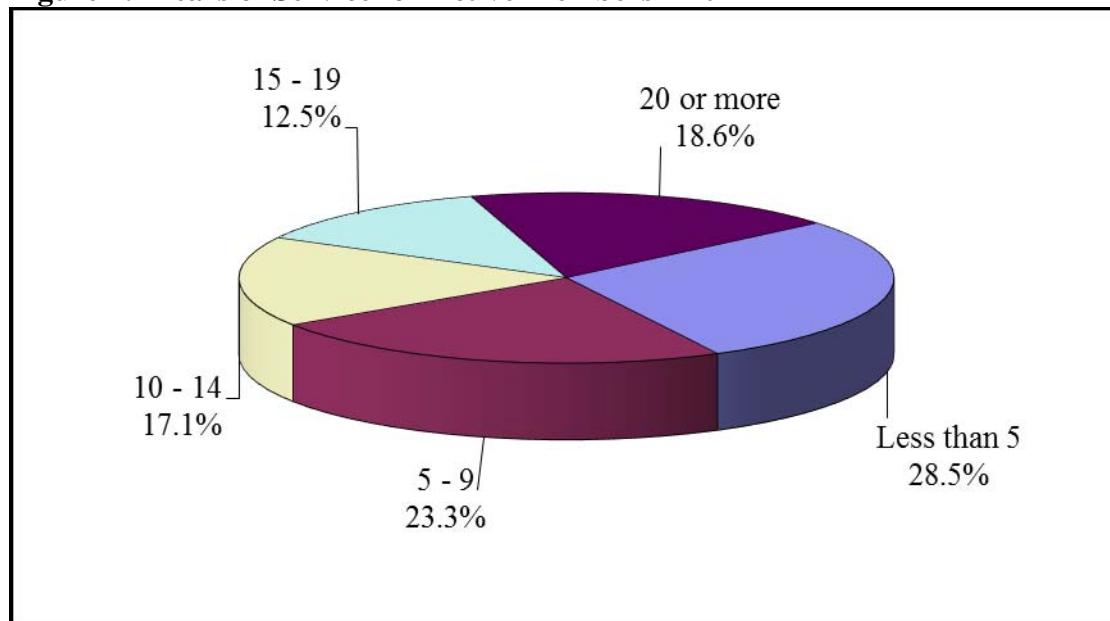

Demographics

During 2014, there were 18,662 relief association members who were active, inactive, or deferred. Of the 18,662 relief association members, 15,478 were active members. In 2014, there were 1,371 benefit disbursements made to members or their beneficiaries. These disbursements included lump-sum service pensions, monthly service pensions, survivor benefits, and long-term disability benefits. There were 1,371 benefit disbursements made in 2014, compared to 1,393 benefit disbursements in 2013.

In 2014, 28.5 percent of active lump-sum and defined-contribution members had fewer than five years of active service.² Slightly over half, or 51.8 percent, of the active members had fewer than ten years of service. Of the 614 lump-sum and defined-contribution plans included in this report, 479 had vesting requirements of ten years or more. Assuming a ten-year vesting requirement, over one-half of the active members in these plan types would not yet be eligible to receive pension benefits if they were to retire today.

Figure 1 below shows years of service for the active lump-sum and defined-contribution plan members.

Figure 1: Years of Service for Active Members – 2014

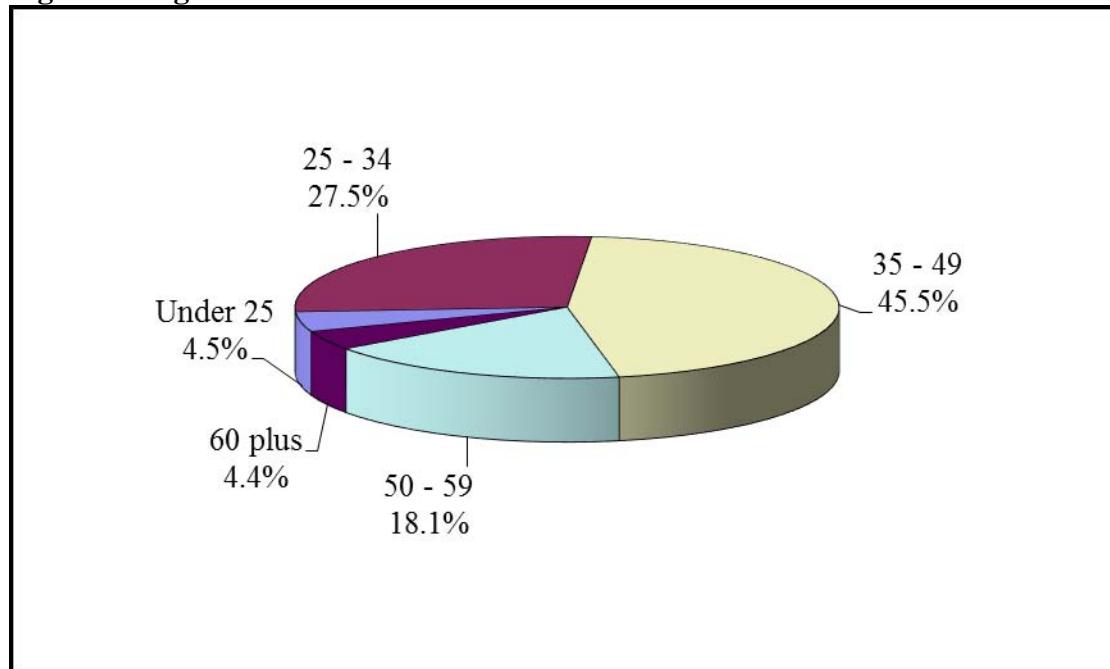

² Lump-sum and defined-contribution plans submit reporting forms to the OSA that contain membership information. Monthly and monthly/lump-sum combination plans are not required to provide the same membership data.

In 2014, the largest age demographic of volunteer firefighters was between 35 and 49, which represented 45.5 percent of all active relief association members. Just over 18 percent of active members were between 50 and 59, and 4.4 percent were age 60 or over. Given that the minimum statutory age for retirement is 50 years, 22.5 percent of active members have already met this requirement. Understanding demographics for the relief association as a whole is important when setting benefit levels and formulating investment strategies. As the population of active members continues to age, relief associations could see an increase in the number and frequency of retirements. Therefore, recruitment and retention become important considerations for relief associations and their affiliated fire departments.

Figure 2 below shows age ranges of the active lump-sum and defined-contribution plan members.

Figure 2: Age of Active Members – 2014

In 2014, the largest demographic of deferred members was between ages 35 and 49, which accounts for 66.3 percent of all deferred members. Deferred members are members who have separated from active service and are vested, but have not yet met the minimum retirement age to receive a service pension or have not yet requested payment of a service pension. Of all deferred members, 19.1 percent have served for 20 or more years.³ Deferred members who are partially vested (have fewer than 20 years of service) receive a reduced benefit upon retirement based upon the relief association's bylaws.

³ Most relief associations require 20 completed years of active service for full vesting.

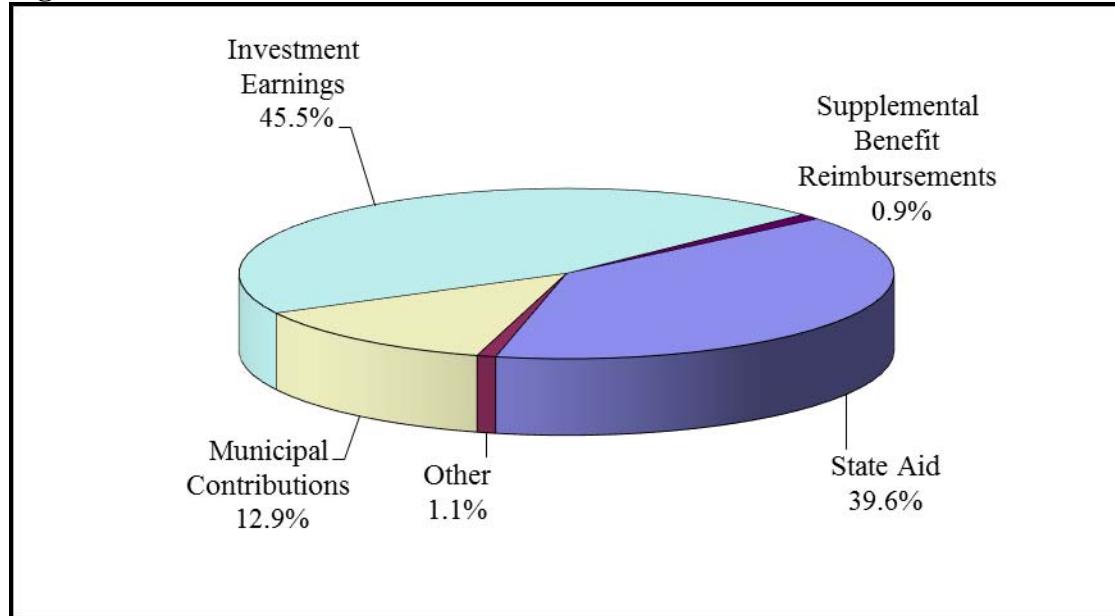

Revenues

For the purposes of this report, relief association revenues are summarized into five categories. The primary sources of revenue for relief associations are fire state aid, municipal contributions, and investment earnings. Relief associations also receive revenues in the form of reimbursements for supplemental benefits paid and other income, such as donations and transfers.

In 2014, relief association revenues totaled \$61.4 million, a decrease of almost 40 percent compared to the \$102.0 million in 2013. The significant decline in total revenues was primarily due to investment gains totaling \$28.0 million in 2014, compared to \$68.1 million in investment gains during 2013.

Figure 3 below illustrates the revenue sources for relief associations during 2014.

Figure 3: Relief Association Revenue Sources – 2014

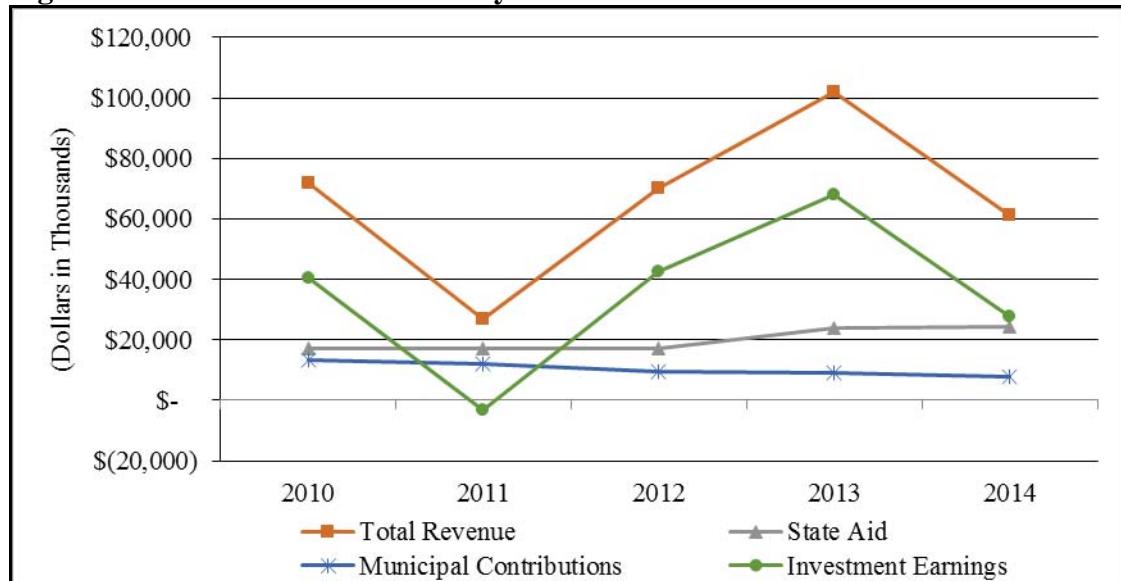

In 2014, state aid accounted for \$24.3 million of relief association revenue. Municipal contributions totaled \$7.9 million. Relief associations also received \$570,104 from supplemental benefit reimbursements and \$651,576 from other sources of income.

Figure 4 on the next page illustrates the primary revenue sources for relief associations from 2010 to 2014. Over this five-year period, state aid and municipal contributions remained fairly stable. Investment earnings fluctuated considerably over this time period and had the greatest impact on total relief association revenues. Investment earnings trended downward during 2010, correlating to the decline in the financial markets with a

recovery occurring during 2011 and continuing upward to 2013. Investment earnings trended downward in 2014, illustrating volatility in the financial markets. The 2013 investment earnings amount was the largest amount during this five-year period, which is important to note as there were fewer relief associations in existence in 2013 than in the prior years.⁴

Figure 4: Relief Association Primary Revenue Sources – 2010 to 2014

Tables 2-A, 2-B, and 2-C on pages 35 through 55 show the net asset value for each relief association at the end of 2014 and the ranking by net assets relative to other associations of the same plan type.

State Aid

Fire state aid is derived from a two-percent state tax on insurance premiums and is allocated based on the market value of real property in the fire district and on the population of each fire district. An additional allocation is given to relief associations with small numbers of active members to maintain a minimum amount of aid. When firefighters are covered by a pension plan, state law requires that fire state aid be used for pension purposes.

A new supplemental state aid program was established during the 2013 legislative session to provide additional funding for fire and police retirement plans. Beginning with 2013 state aid distributions, the State of Minnesota has appropriated about \$5.5 million annually for volunteer fire relief associations and for volunteer firefighters covered by the Voluntary Statewide Lump-Sum Volunteer Firefighter Retirement Plan administered by

⁴ The 2013 report included information on 651 relief associations, while the 2010 report included information on 702 relief associations.

the Public Employees Retirement Association (PERA). While the supplemental state aid program was initially set to sunset, legislation passed during the 2015 legislative session removes the sunset date for volunteer firefighter pension plans.

Volunteer fire relief associations received a total of \$24.3 million in state aid during 2014, a 2.1 percent increase from the \$23.8 million received in 2013.

On average, relief associations received \$38,140 in state aid, representing a 4.3 percent increase from the 2013 average of \$36,570. Only 22.9 percent of relief associations received a state aid amount that was greater than the 2014 average. The average state aid amount for the 530 lump-sum plans included in this report was \$30,535. The \$16.2 million received by lump-sum plans made up 67.0 percent of the total state aid disbursed to relief associations. Defined-contribution plans received a total of \$4.1 million in state aid, with an average of \$49,392. Monthly and monthly/lump-sum combination plans received \$4.0 million in state aid and averaged \$172,305 per plan. This higher average of state aid for the monthly and monthly/lump-sum combination plans is due to their communities having relatively large populations and relatively high property values, the two factors on which the aid allocation is based.

The largest single disbursement of state aid was made to the Plymouth Fire Relief Association, which received \$448,794.⁵ The Eden Prairie Fire Relief Association received \$414,343. Of the eleven relief associations that received over \$300,000 in state aid, the only lump-sum plans were Lakeville and Woodbury.

State aid amounts varied by region due to variation in property values and the difference in population within the fire service areas. The 85 relief associations in the Metro Area accounted for \$11.0 million, or 45.3 percent, of the total state aid disbursed. The average amount received by these 85 relief associations was \$129,427, an increase from the 2013 average of \$122,952. The 110 relief associations in Greater Minnesota affiliated with municipalities having populations over 2,500 received \$6.1 million in state aid. The relief associations received an average of \$55,180 in state aid. Finally, the 442 relief associations in Greater Minnesota affiliated with municipalities having populations under 2,500 received a total of \$7.2 million in state aid, with an average amount of \$16,344.

Tables 2-A, 2-B, and 2-C on pages 35 through 55 show the 2014 state aid received by each relief association and the ranking by amount of state aid relative to other associations of the same plan type.

Municipal Contributions

Municipal contributions are contributions to relief associations from cities, towns, and independent nonprofit firefighting corporations. When a municipality approves a relief association's benefit level, the municipality assumes responsibility for ensuring that the

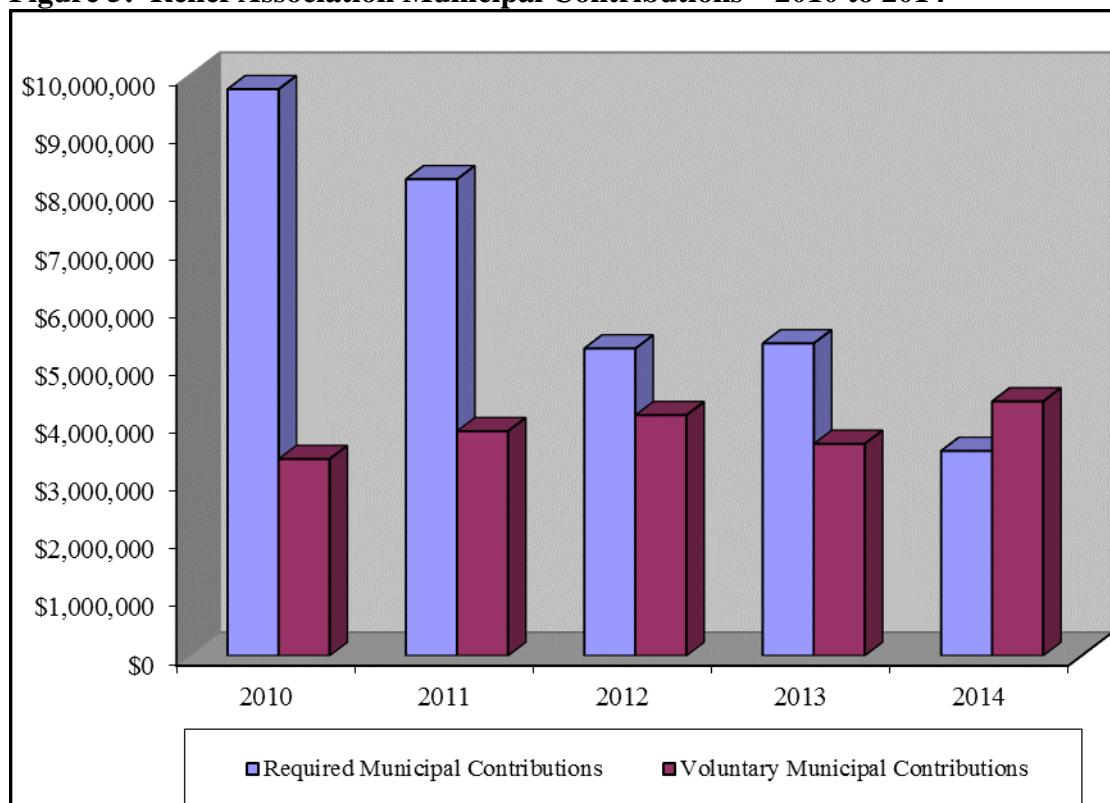

⁵ Although the Spring Lake Park Fire Relief Association received the largest state aid distribution in 2014 at \$474,651, the distribution contained two years of supplemental state aid allocations.

relief association Special Fund has sufficient assets to cover the approved benefit levels. Contributions may be required by law based, in part, on a relief association's finances, or may be made voluntarily by a local municipality. Some relief associations do not receive municipal contributions.

In 2014, relief associations received \$7.9 million in municipal contributions, a 12.2 percent decrease from the \$9.0 million contributed in 2013. Of the \$7.9 million received, \$3.5 million, or 44.3 percent, was required by statute to be contributed and \$4.4 million was made on a voluntary basis. This is the first time since 2009 that the amount of voluntary municipal contributions exceeded the amount of required municipal contributions. The \$3.5 million in required municipal contributions is a decrease of 35.2 percent from the \$5.4 million required for 2013. The required municipal contributions due in recent years were caused by investment losses experienced during the financial market downturn. As the markets improve, the total required municipal contributions have been decreasing.

Figure 5 below shows the total municipal contributions received by relief associations from 2010 to 2014, and illustrates the amounts required by statute to be contributed and the amounts contributed voluntarily.

Figure 5: Relief Association Municipal Contributions – 2010 to 2014

The Eden Prairie Fire Relief Association received the largest municipal contribution in 2014, at \$488,073. The Eagan Fire Relief Association received the next highest municipal contribution, at \$295,173. The average municipal contribution for those relief associations that received one was \$19,261. This is an 8.2 percent decrease from the 2013 average of \$20,969.

Municipal contributions as a percentage of a relief association's assets varied significantly. The Emily Fire Relief Association's municipal contribution of \$15,157 made up 13.3 percent of its net assets. Emily had the highest municipal contribution as a percentage of net assets. The Aurora Fire Relief Association's municipal contribution of \$23,660 made up 12.2 percent of its net assets. In contrast, the large municipal contribution that the Eden Prairie Fire Relief Association received accounted for only 2.4 percent of its net assets.

Lump-sum plans received \$4.3 million in municipal contributions, a 17.3 percent decrease from the \$5.2 million received in 2013. Of the \$4.3 million in municipal contributions made to lump-sum plans, 46.5 percent was required to be contributed. During 2014, 65.1 percent of lump-sum relief associations received a contribution. The Rosemount Fire Relief Association received \$171,000, the largest municipal contribution among lump-sum plans. The Farmington and Shakopee Fire Relief Associations also received municipal contributions that exceeded \$100,000. The average municipal contribution among lump-sum plans that received one was \$12,436.

Required municipal contributions for monthly and monthly/lump-sum combination plans are calculated by an actuary retained by the relief association, using a statutory formula that is different than the statutory formula that is used for lump-sum plans. Monthly and monthly/lump-sum plans received \$2.4 million in municipal contributions, which was nearly identical to the amount received in 2013. Twenty-one of the 23 monthly and monthly/lump-sum combination plans received a municipal contribution during 2014, averaging \$115,536 per contribution. Typically, monthly and monthly/lump-sum plans have higher municipal contribution amounts as these plans are impacted by the ongoing liabilities of their retired members.

Defined-contribution plans by their nature are fully funded because their assets are always equal to their liabilities. All assets are divided among the plan members, and the value of each member's account rises or falls based on revenues and expenditures to or from the plan. As a result, defined-contribution plans do not require contributions from their affiliated municipality, and any municipal contributions made to a defined-contribution plan are made on a voluntary basis by the municipality.

Total municipal contributions made to defined-contribution plans were \$1.2 million in 2014, remaining the same as the \$1.2 million received in 2013. During 2014, 53.6 percent of defined-contribution plans received a municipal contribution, with an average of \$26,660 for those that received one. The overall average size of municipal contributions was skewed by the larger municipal contributions to the Eagan, Maple Grove, and West Metro Fire Relief Associations, which were \$295,173, \$214,091, and \$189,270, respectively. The largest municipal contribution of the remaining defined-

contribution plans was \$64,660, received by the Mendota Heights Fire Relief Association.

Municipal contribution amounts, like state aid amounts, varied by region. Relief associations in the Metro Area received \$4.3 million in municipal contributions, which made up 54.4 percent of the total municipal contributions received. Metro Area relief associations accounted for over one-half of all municipal contributions received, even though they make up only 13.3 percent of relief associations included in this report. The average municipal contribution was \$67,867 for Metro Area plans that received one.

Relief associations affiliated with Greater Minnesota municipalities with a population over 2,500 received \$1.7 million in municipal contributions, accounting for 21.5 percent of all municipal contributions received. The average municipal contribution for these relief associations was \$18,385.

Relief associations affiliated with Greater Minnesota municipalities with a population under 2,500 received \$2.0 million in municipal contributions, which is 25.3 percent of all municipal contributions received. Of these relief associations, 58.1 percent received a municipal contribution, with the average contribution being \$7,656.

Tables 2-A, 2-B, and 2-C on pages 35 through 55 show the 2014 municipal contribution received by each relief association and the ranking by amount of municipal contributions received relative to other relief associations of the same plan type.

Investment Earnings

Investment returns were mixed in 2014. Domestic stock and bonds were the top-performing asset classes in 2014. International stock produced a negative overall return.

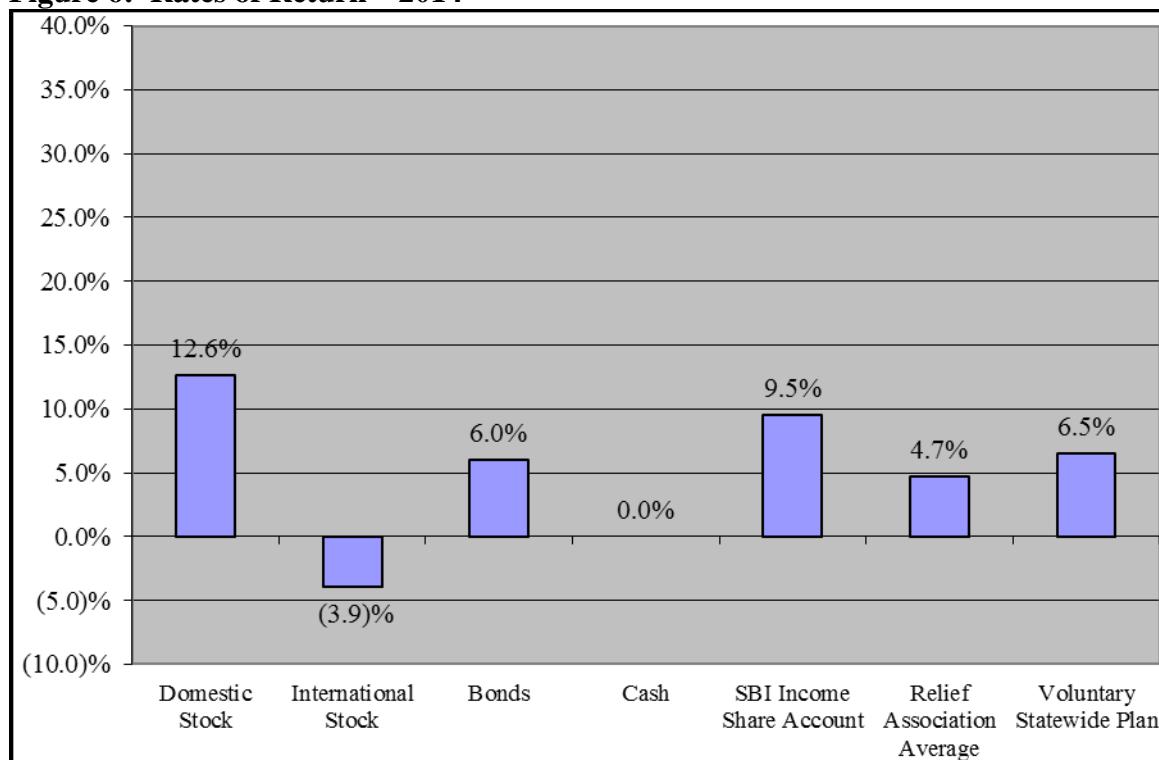

For the year, domestic stock, as measured by the Russell 3000 Index, returned 12.6 percent. International stock returned a negative 3.9 percent, as measured by the Morgan Stanley Capital International (MSCI) All-Country World Index excluding the United States (ACWI ex. U.S.). Bonds returned 6.0 percent, as measured by the Barclays Capital Aggregate Index. Cash returned zero percent, as measured by the 90-Day U.S. Treasury Bill.

The average asset allocation for relief associations was 49.1 percent domestic stock, 9.6 percent international stock, 19.8 percent domestic bonds, 3.8 percent international bonds, 16.2 percent cash, and 1.5 percent other investments. Compared to the averages from 2013, domestic stock allocations increased by 2.5 percent, international stock decreased by 8.6 percent, international bonds decreased by 25.5 percent, while domestic bonds increased by 3.1 percent, cash increased by 1.9 percent, and other investments increased by 7.1 percent.

Figure 6 on the next page shows the 2014 rates of return for domestic stock, international stock, bond, and cash markets. The 2014 rate of return for the State Board of Investment

(SBI) Income Share Account, the relief association average rate of return, and the 2014 rate of return for the Voluntary Statewide Lump-Sum Volunteer Firefighter Retirement Plan are included for comparison purposes.

Figure 6: Rates of Return – 2014

Current Trends

Relief associations had investment gains of \$28.0 million in 2014. Lump-sum plans accounted for \$15.9 million, or 56.8 percent of the total investment gains. Investment earnings for the 84 defined-contribution plans totaled \$6.2 million, which made up 22.1 percent of total investment gains. Monthly and monthly/lump-sum combination plans earned \$5.8 million, accounting for just under 21.0 percent of total investment gains.

In 2014, relief associations averaged a 4.7 percent rate of return. Investment returns decreased from the 12.8 percent average rate of return in 2013. The Grove City Fire Relief Association had the highest rate of return, at 14.8 percent. The Sacred Heart Fire Relief Association returned 13.2 percent, while the Flensburg Fire Relief Association returned 12.3 percent. It is interesting to note that the three relief associations with the highest rates of return were all relief associations affiliated with Greater Minnesota municipalities having a population under 2,500.

Of the relief associations included in this report, 20.4 percent held at least one-half of their assets with the SBI. The average rate of return for these relief associations was 8.2

percent. There were 10.1 percent of relief associations solely invested in cash that had an average rate of return of 1.0 percent.

The Keewatin Fire Relief Association had the lowest rate of return, at negative 3.7 percent. The Storden Fire Relief Association returned negative 2.9 percent, while the Rockford Fire Relief Association returned negative 2.6 percent in 2014.

The Brooklyn Park Fire Relief Association had the highest rate of return among the 85 relief associations in the Metro Area, returning 10.6 percent. The New Brighton, Columbia Heights, and Waconia Fire Relief Associations also had returns exceeding 10.0 percent. All of the plans that returned over 10.0 percent in the Metro Area had diversified portfolios, with each investing over 98 percent of their assets with the State Board of Investment. The Osseo Fire Relief Association returned 0.2 percent for the year, the lowest return of the Metro Area relief associations.

Among the 110 relief associations affiliated with Greater Minnesota municipalities having a population over 2,500, the La Crescent Fire Relief Association had the highest rate of return at 10.8 percent. The Jackson and Owatonna Fire Relief Associations returned 10.7 percent and 10.4 percent, respectively. The Rockford Fire Relief Association had the lowest rate of return among the relief associations affiliated with Greater Minnesota municipalities having a population over 2,500, returning negative 2.7 percent.

The Grove City Fire Relief Association had the highest rate of return among the 442 relief associations affiliated with Greater Minnesota municipalities having a population under 2,500, with a return of 14.8 percent. The Flensburg, Lake Kabetogama, Sacred Heart, and Schroeder Fire Relief Associations also had returns exceeding 12.0 percent. The Keewatin Fire Relief Association had the lowest rate of return among the relief associations affiliated with Greater Minnesota municipalities having a population under 2,500, returning negative 3.7 percent.

Legislation passed by the 2009 Minnesota Legislature created the Voluntary Statewide Lump-Sum Volunteer Firefighter Retirement Plan (Plan). Twelve relief associations transferred their assets to the Plan in December 2014, bringing the total to 88 relief associations that have joined the Plan as of January 1, 2015. Each entity in the Plan has its own separate account, but assets are pooled for investment purposes. The Plan investments are managed by the SBI and have a long-term expected return of six percent. The Plan returned 6.5 percent for 2014. The 2014 asset allocation of the Plan is provided in Table 7 on page 149.

Benchmarks

The OSA calculates a custom benchmark rate of return for each relief association. Benchmarks serve as a standard against which investment performance can be measured. The benchmark return is the return of a hypothetical portfolio of indices, invested in similar asset classes and in the same proportions as the relief association was invested in

at the beginning of 2014. The actual asset allocations at the beginning of the year were used to calculate the custom benchmark rate of return since many relief associations do not have target asset allocations in their investment policies. While imperfect, the benchmark return is a good indicator of the returns available to the relief association during the year.

Table 8 of this report lists each relief association, its custom benchmark, and its 2014 rate of return. Although the indices used to calculate the benchmarks cannot be invested in directly, investments such as mutual funds and exchange-traded funds that closely track most indices are widely available. These types of investments are a way for relief associations to invest in the markets as a whole.

The following indices and their respective rates of return are used to calculate the Table 8 benchmarks for each relief association on page 175:

Asset Class	Benchmark	2014 Return
Domestic Stock	Russell 3000	12.6%
International Stock	MSCI ACWI ex. U.S.	(3.9)%
Bonds	Barclays Capital Aggregate	6.0%
Cash	90-Day U.S. Treasury Bill	0.0%
Other	Russell 3000	12.6%

The Sacred Heart Fire Relief Association exceeded its custom benchmark by 8.0 percent, the highest margin among all relief associations. The Grove City and Flensburg Fire Relief Associations exceeded their benchmarks by 7.9 percent and 7.0 percent respectively. Rates of return for only 177 relief associations, or 27.8 percent, matched or exceeded their calculated custom benchmark rates of return. This is down from the 54.7 percent of relief associations that matched or exceeded their benchmark return in 2013. For 2014, 46.3 percent of relief associations missed their benchmark by one or more percent, an increase from the 34.3 percent that missed their benchmark by one or more percent in 2013. The Keewatin Fire Relief Association missed its respective benchmark by 12.6 percent, the largest deviation among all relief associations.

Long-Term Trends

The ten-year period ending in 2014 contained eight years of positive returns for the average relief association. The U.S. stock market, as measured by the Russell 3000 Index, returned 7.9 percent over the ten-year period. The average bond market return over the ten-year period was 4.7 percent, as measured by the Barclays Capital Aggregate Index.

The average annual relief association rate of return over the last ten years was 4.5 percent, just slightly below the statutory interest rate assumption of five percent. Less than half, or 39.6 percent, of the relief associations in existence for the full ten-year period had a ten-year average annual rate of return of at least five percent. Not keeping up with interest rate assumptions may harm the financial health of the relief association

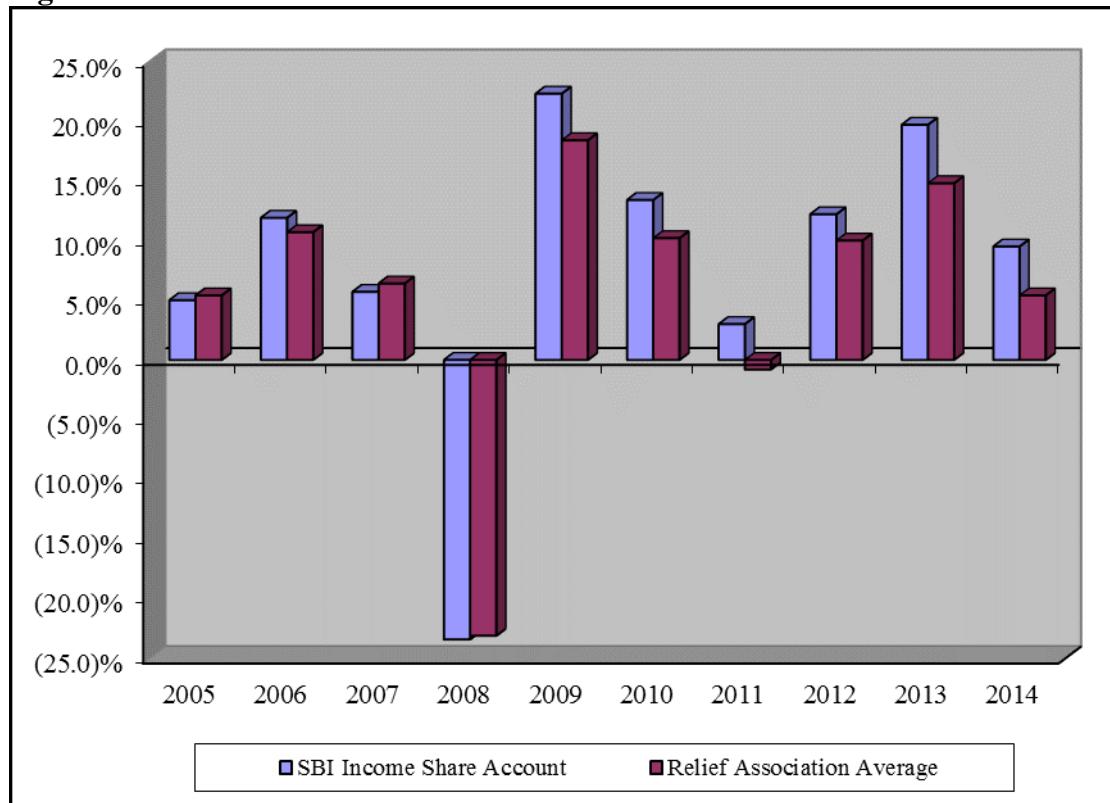

and could result in diminished benefit increases or larger required municipal contributions.

The SBI Income Share Account provides a good example of returns that were available over the ten-year period ending December 31, 2014 (see Table 8 on page 175). This account had an average annual return of 7.2 percent over the ten-year period. Twenty three of the 624 relief associations in existence for the full period had a rate of return that was equal to or greater than the SBI Income Share Account.

The Schroeder Fire Relief Association had the highest average annual rate of return over the ten-year period, at 8.7 percent. The Eagle Lake Fire Relief Association was the lowest-returning relief association over the ten-year period, with an average annual return of negative 0.4 percent.

Figure 7 below shows relief association weighted average rates of return from 2005 to 2014 and the annual rates of return of the SBI Income Share Account.

Figure 7: Annual Rates of Return – 2005 to 2014

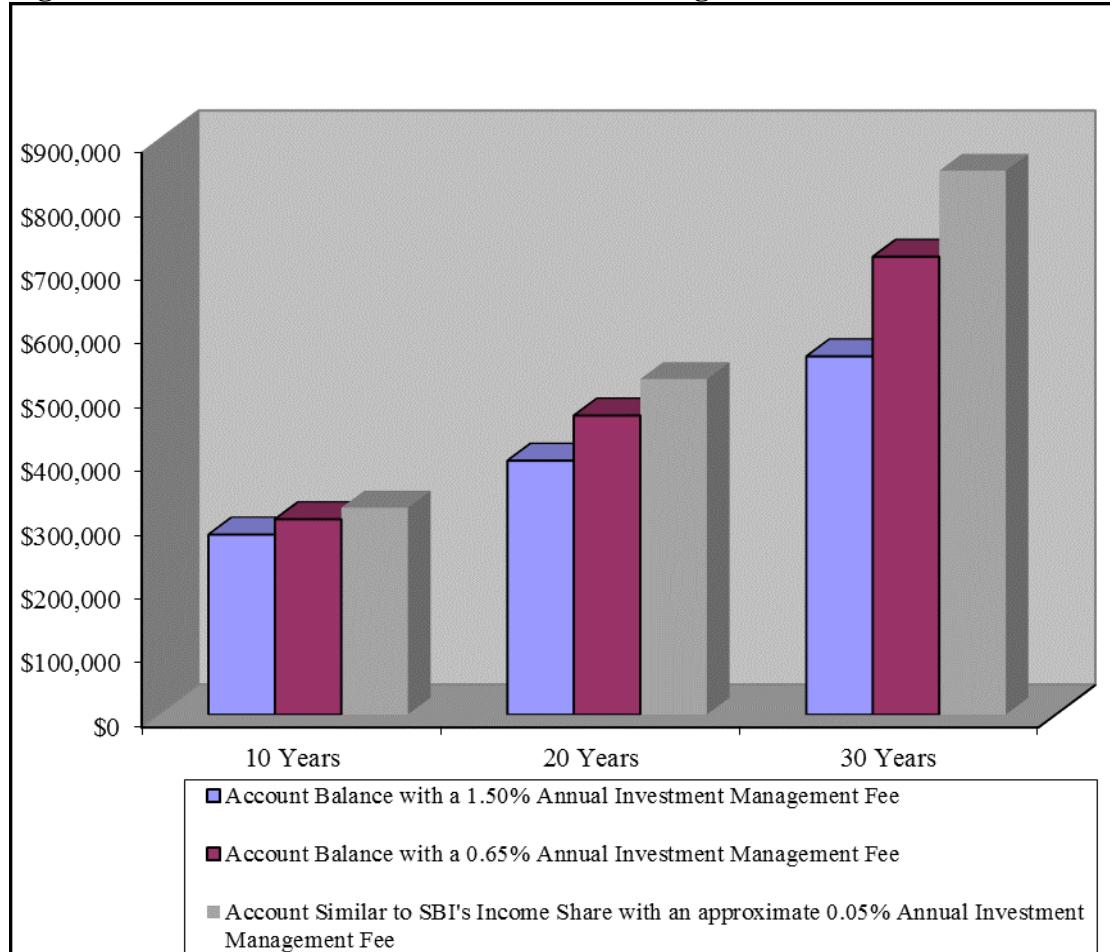

Investment Management Fees

Financial institutions charge different types of fees for managing investment accounts. It is important for relief associations to understand the fees charged. Fees can reduce earnings and lower account balances over time.

Figure 8 below compares the impact various fee scenarios can have on the performance of a relief association's investment account over time. This is a hypothetical example for illustrative purposes only and not indicative of any investment plan. The figure assumes an account with a beginning balance of \$200,000, an annual rate of return of 5.0 percent, and no withdrawals. Actual rates of return may vary and will depend on a number of different factors, including a relief association's choice of investment options. Higher fees can have a significant impact on a relief association's earnings and reduce the value of its account over time.

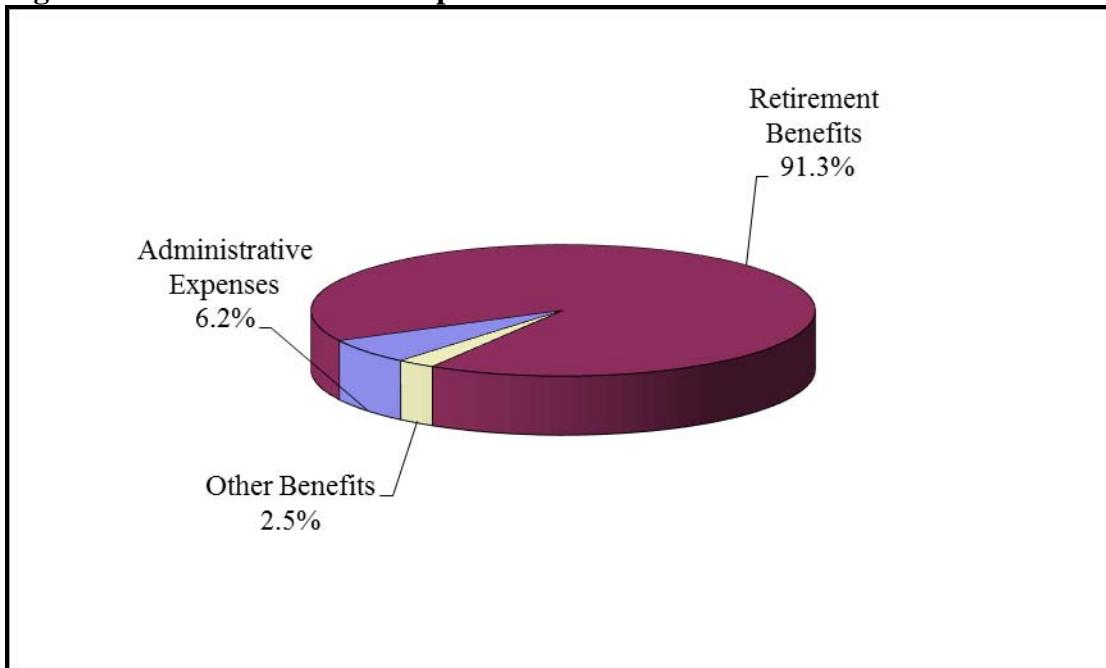

Figure 8: Account Values After Investment Management Fees

Expenditures

The primary expenditures for relief associations are service pension (retirement) benefit payments. Other expenditures are administrative expenses and other benefit payments, which include disability and survivor benefits. Total expenditures for relief associations in 2014 were \$33.6 million, which is a 4.7 percent increase from the 2013 total of \$32.1 million.

Figure 9: Relief Association Expenditures – 2014

Benefit Payments

Relief associations exist to pay retirement, survivor, and disability benefits to members and their beneficiaries. These benefits compensate volunteer firefighters for their service to the community and assist in the recruitment and retention of volunteers. In 2014, a total of \$30.7 million in service pensions was paid out by 361 different relief associations, a 5.5 percent increase from the \$29.1 million paid in 2013. The Eden Prairie Fire Relief Association paid \$1,027,216 in service pensions during 2014, the largest amount paid in 2014 by any one relief association.

Nearly 83 percent of relief associations in Minnesota are lump-sum plans, meaning that they pay benefits as a one-time lump-sum payment to members upon their retirement. Lump-sum plans paid a total of \$17.4 million in service pensions.

Defined-contribution plans are similar to lump-sum plans in that members receive a one-time lump-sum payment when they retire. The 84 defined-contribution plans paid a total of \$6.0 million in service pensions.

In 2014, only 23, or 3.6 percent, of relief associations offered monthly benefits to retirees. Of these relief associations, 20 provided their members with a choice at retirement of receiving a monthly benefit or a lump-sum benefit. Three relief associations provided only monthly benefits to their members. The monthly and monthly/lump-sum combination plans paid \$7.3 million in service pensions.

Other benefits, such as disability and survivor benefit payments, totaled \$825,953, a 4.8 percent increase from the 2013 total of \$788,237. Other benefit payments were paid to members and their beneficiaries by 28 different relief associations. Lump-sum plans paid a total of \$323,039 in other benefit payments. Defined-contribution plans paid a total of \$393,213 in other benefit payments, while monthly and monthly/lump-sum combination plans paid a total of \$109,701.

Administrative Expenses

A relief association's Special Fund is a restricted fund that receives state aid and municipal contributions and is used to pay for pensions and other benefits. Disbursements from a Special Fund may be made only for purposes expressly authorized under state law. Relief associations are authorized to use Special Fund assets to pay certain administrative expenses. Administrative expenses include audit, actuarial and legal fees, office expenses, fidelity bond expenses, officer salaries, and training fees.

In 2014, administrative expenses totaled \$2.1 million, a 4.6 percent decrease from the \$2.2 million of administrative expenses in 2013. In 2014, there were 112 relief associations that did not use Special Fund assets to pay administrative expenses.

Professional fees, which include audit, actuarial, and legal fees, accounted for the largest portion of administrative expenses. Professional fees totaled \$1.3 million, or 61.9 percent, of all administrative expenses. The \$1.3 million spent on professional fees is a 13.3 percent decrease from the \$1.5 million spent in 2013.

Relief associations spent \$537,173 on officer salaries, which remained relatively unchanged from the 2013 amount of \$535,945. Only 270 relief associations, or 42.4 percent, paid officer salaries from the Special Fund. Six relief associations reported total salary disbursements from the Special Fund of more than \$10,000. The average total salary disbursement for the 62 relief associations in the Metro Area that used Special Fund assets to pay officer salaries was \$4,771. The Edina Fire Relief Association had the largest total salary disbursement of relief associations in the Metro Area, at \$24,221.

Only 31.5 percent of relief associations affiliated with Greater Minnesota municipalities having a population under 2,500 used Special Fund assets to pay officer salaries, with an average total disbursement of \$806. The Pierz Fire Relief Association had the largest total salary disbursement for relief associations in this category, at \$3,525.

Nearly two-thirds of relief associations affiliated with Greater Minnesota municipalities having a population over 2,500 paid officer salaries from the Special Fund, with the average total disbursement at \$1,874. The Fairmont Fire Relief Association had the largest total salary disbursement of these relief associations, at \$7,074.

Tables 4-A, 4-B, and 4-C on pages 77 through 99 show the 2014 administrative expenses for each relief association.

Health of the Plans

Funding Ratios

Funding ratios are an important measure to consider when assessing the financial health of a relief association. Funding ratios show the relationship between a relief association's assets and its liabilities.

In 2014, the average funding ratio for lump-sum plans was 136.8 percent, a slight increase from the 2013 average of 130.3 percent.⁶ The median may present a more accurate picture of the funding of lump-sum plans. The median funding ratio was 121.1 percent, compared to 119.9 percent in 2013. This means that one-half of the lump-sum plans had a funding ratio above 121.1 percent, while one-half of the plans were below 121.1 percent. Monthly and monthly/lump-sum combination plans had an average funding ratio of 102.2 percent. Defined-contribution plans are always 100.0 percent funded, as the liabilities are limited to the total plan assets.

Relief association funding ratios increased as asset values increased due to investment gains and increased state aid amounts. The effect was a decrease in the number of relief associations that had deficits (funding ratios below 100.0 percent). At the end of 2014, 65 relief associations, or 10.2 percent, had a deficit, compared to 77 relief associations in 2013. Also, the number of relief associations with funding ratios below 75.0 percent decreased from four in 2013 to two in 2014. The Rollingstone Fire Relief Association had the lowest funding ratio, at 72.0 percent.

While low funding ratios often trigger greater required municipal contributions, extremely high funding ratios can pose problems as well. High funding ratios signal that a relief association's assets are significantly higher than its liabilities. Because a relief association's benefit level has a direct impact on its accrued liability, a high funding ratio suggests that the benefit level is low compared to the relief association's assets. Relief associations with excessively high funding ratios may be shortchanging current retiring members. It is normal for funding ratios of recently-incorporated relief associations to be high.

Extremely high funding ratios or funding ratios of less than 100.0 percent may be hard to maintain consistently over time. For under-funded relief associations, continued large required municipal contributions may cause municipalities to become less willing to approve future benefit increase requests. In the case of over-funded relief associations, future benefit increases may be viewed as unfair to retired members who provided service for years when the plan was over-funded. Maintaining a steady funding ratio

⁶ The average 2014 funding ratio for lump-sum plans was 416.5 percent if two recently-incorporated relief associations are included in the calculation.

over time ensures that all retiring members of the relief association receive an equitable pension benefit.

Tables 3-A, 3-B, and 3-C on pages 59 through 73 show funding ratios for each relief association.

Benefit Levels

Benefit levels vary greatly among relief associations in Minnesota. Typically, relief associations with more assets are able to offer higher benefits to their members. In 2014, the average benefit level for lump-sum plans was \$1,562, a 5.7 percent increase from the 2013 average of \$1,478. Only 32.5 percent of lump-sum plans offered a benefit level higher than the 2014 average of \$1,562.

The maximum lump-sum benefit level allowed under state law for 2014 was \$10,000 per year of service. The Maplewood and Brainerd Fire Relief Associations offered a \$9,000 and \$8,500 benefit level, respectively. A member who retired after serving for 20 years with either of these relief associations would receive a \$180,000 and \$170,000 lump-sum benefit, respectively.

The Chain of Lakes and Hollandale Fire Relief Associations had benefit levels of \$1 per year of service. The Brownsville and Nerstrand Fire Relief Associations offered benefit levels of \$50 per year of service.

For monthly/lump-sum combination plans, the average lump-sum benefit level was \$5,032. The Eden Prairie Fire Relief Association offered the largest lump-sum benefit of the combination plans, at \$10,000 per year of service. The monthly component of the monthly/lump-sum combination plans had an average benefit of \$25. The Eden Prairie and Minnetonka Fire Relief Associations offered the highest monthly benefit levels of the combination plans, at \$56 and \$53 per year of service, respectively. A 20-year retiring member from the Eden Prairie Fire Relief Association who chooses the monthly option would receive \$1,120 every month after retirement for the remainder of the member's life.

The average monthly benefit for the three relief associations that offer only monthly benefits was \$20 per year of service. The Spring Lake Park Fire Relief Association offered the highest monthly benefit of this group, at \$36 per year of service. The lowest monthly benefit was offered by the Pine City Fire Relief Association, at \$9 per year of service.

During 2014, 36.2 percent of the defined-benefit plans that offer a yearly benefit increased their benefit level. The Maplewood Fire Relief Association had the largest benefit increase, increasing its benefit level by \$2,800 per year of service. Maplewood was 104.3 percent funded after implementing the increase. The Brainerd and Elko New Market Fire Relief Associations increased their benefit levels by \$1,675 and \$1,330 per year of service, respectively, and also were fully funded after implementing their

increases. Of the 192 plans that increased their benefit levels, only 17 were not fully funded at the end of 2014.

The Northland Fire Relief Association had the largest percentage benefit increase at 257.1 percent, increasing its benefit level from \$350 to \$1250 per year of service. The Maplevue and Climax Fire Relief Associations each increased their benefit levels by 100.0 percent or more. Of the relief associations that increased their benefit level, 86, or 44.8 percent, had an increase of ten percent or less.

One relief association decreased its benefit level during 2014. The Flensburg Fire Relief Association lowered its benefit level from \$575 to \$350 per year of service. Flensburg ended 2014 at 189 percent funded after implementing the benefit decrease.

Regional Analysis

For the reader's convenience, relief association data is summarized by county and analyzed for trends.

Current Trends

Benefit Levels

In 2014, relief associations in Ramsey County had the highest average lump-sum benefit level, at \$5,085 per year of service. Relief associations in Scott and Hennepin Counties followed, with average benefit levels of \$4,698 and \$4,649 per year of service, respectively. Relief associations in Kittson County had the lowest average benefit level, at \$450 per year of service. In 2014, there were 20 counties that had average benefit levels over \$2,000 per year of service. In 2014, there were 23 counties that had average benefit levels under \$1,000 per year of service.⁷ In 2014, the median average benefit level for counties was \$1,248.

Funding Ratios

In 2014, relief associations in Houston County had the highest average funding ratio, at 422.7 percent. The county's funding ratio is skewed by the Brownsville Fire Relief Association's high funding ratio, which had a benefit level of \$50. The Brownsville funding ratio for 2014 was 1,949.3 percent. Relief associations in Rice and St. Louis Counties followed with average funding ratios of 228.0 and 185.0 percent, respectively. Relief associations in Carver County had the lowest average funding ratio in 2014, at 88.9 percent. In 2014, the median funding ratio for counties was 119.3 percent.

Rates of Return

Relief associations in Cook County had the highest average rate of return, at 8.9 percent. Relief associations in Lac qui Parle and Chippewa Counties followed with average rates of return of 8.7 and 7.6 percent in 2014, respectively. Relief associations in Kittson County had the lowest average rate of return in 2014, at 0.5 percent. The median rate of return for all counties in 2014 was 4.6 percent. The median rate of return for all counties was slightly lower than the average rate of return for all relief associations.

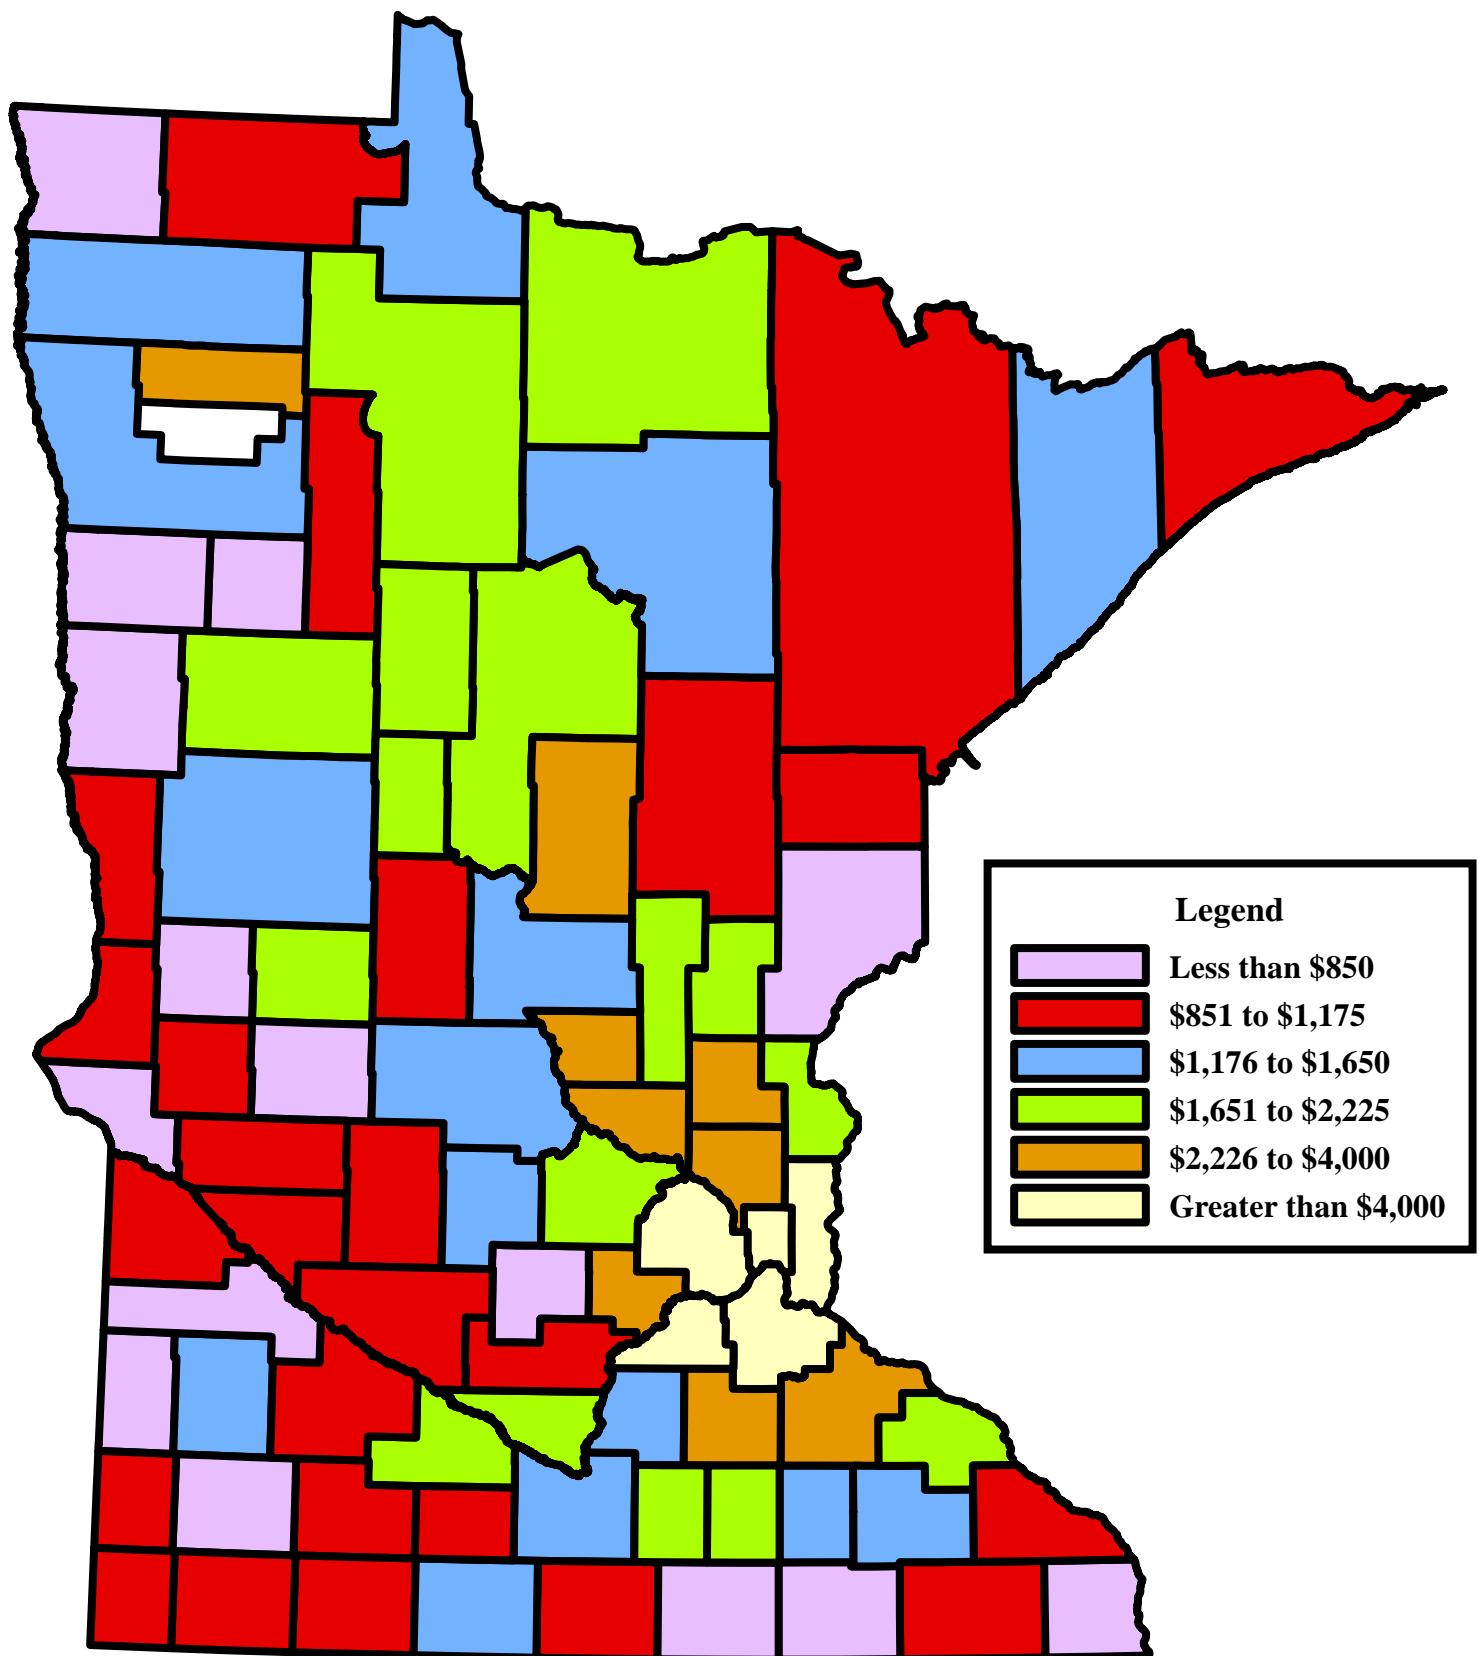

⁷ There are only two relief associations in Red Lake County and both are defined contribution plans that do not have lump sum benefit levels. Therefore, there is no average benefit level per year of service for relief associations in Red Lake County.

Long-Term Trends

Relief associations in Cook and Chippewa Counties had the highest fifteen-year average rates of return, at 5.0 percent. Twenty counties had fifteen-year average rates of return of at least 4.0 percent. The median fifteen-year average rate of return was 3.4 percent.

Statutory guidelines assume a rate of five-percent growth for relief associations. Only relief associations in Cook and Chippewa Counties had fifteen-year average rates of return of five percent. Relief associations in Kittson County had the lowest average rate of return over the fifteen-year period, at 1.7 percent. Relief associations in Jackson and Rock Counties had fifteen-year average rates of return of 2.4 and 2.1 percent respectively.

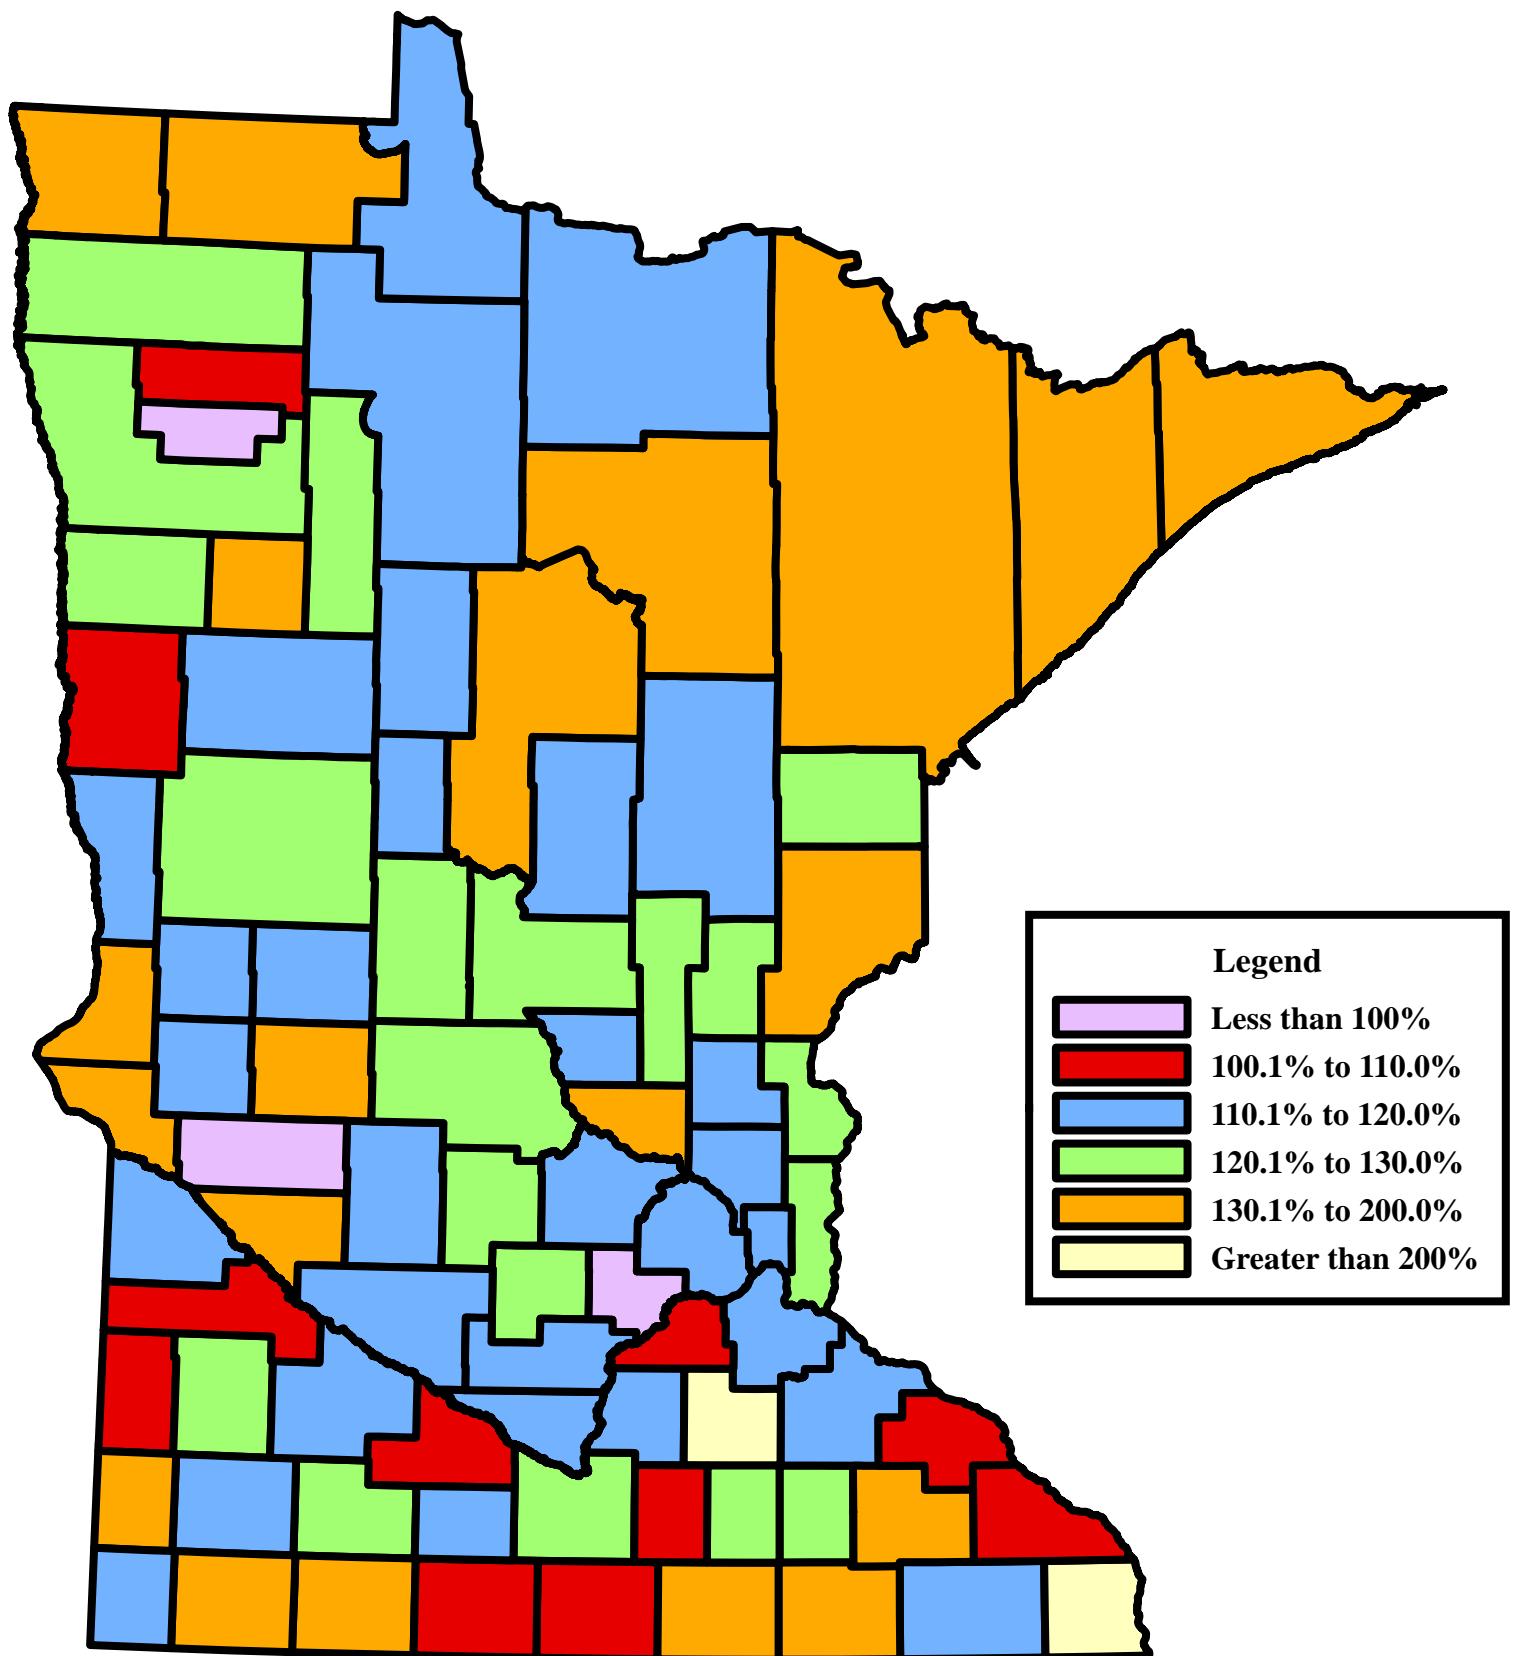

2014 Lump-Sum Benefit Levels Average For Relief Associations by County

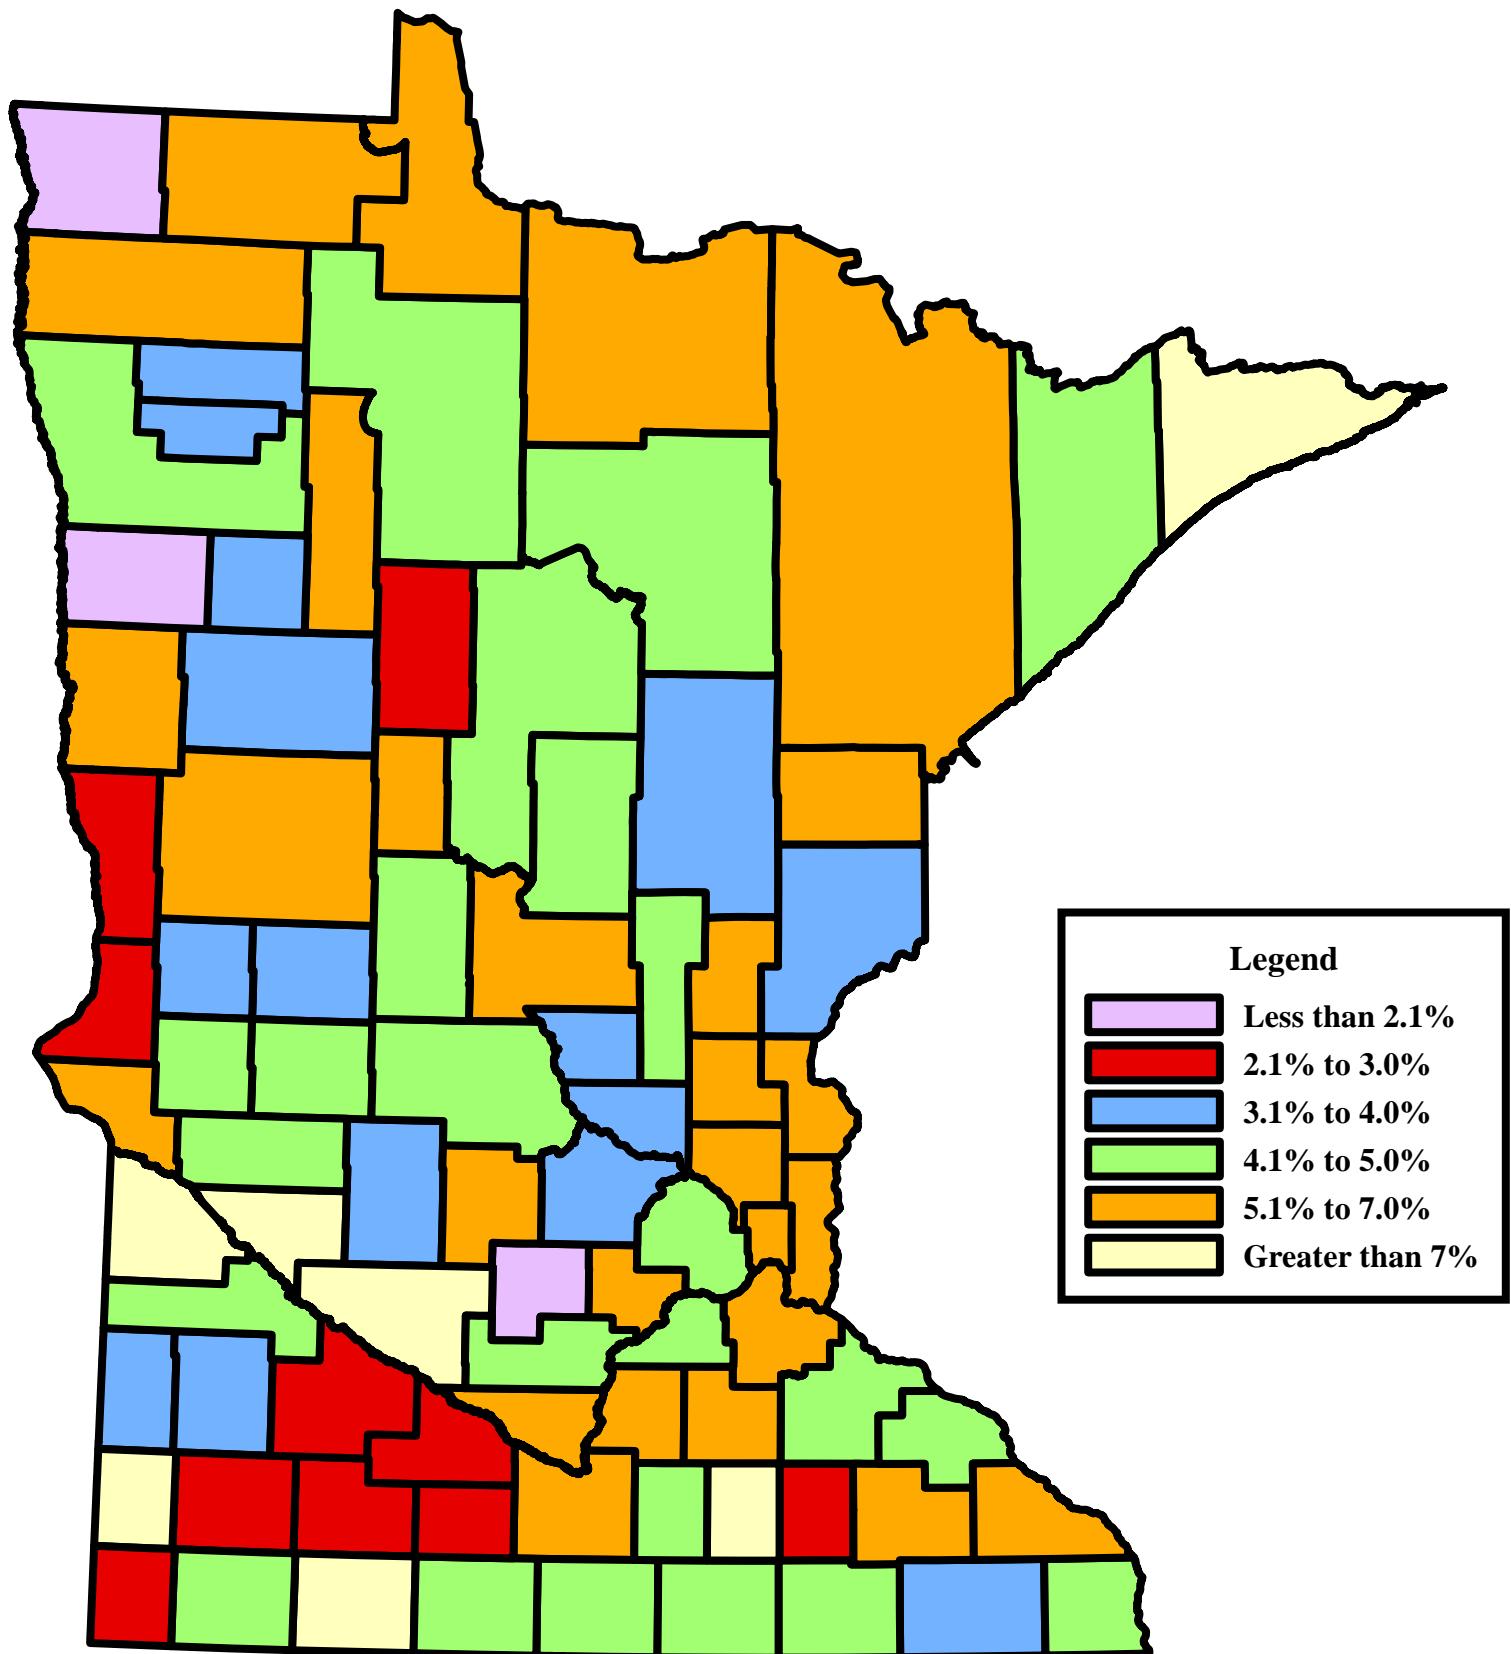

*Red Lake County is blank because there only are defined contribution plans in the county.

How to Read Tables 2-A Through 2-C

Tables 2-A, 2-B, and 2-C provide relief association financial and investment data.

Active Members – Active relief association members as of December 31, 2014.

Net Assets – The value of the relief association’s Special Fund assets as of the end of 2014. The net assets include any accounts payable or receivable that were outstanding as of December 31, 2014. The net asset value may therefore differ from the market value of the relief association’s investments.

Rank (%-ile) – For Net Assets, and for each of the following categories, the relief association is ranked relative to the other associations of the same benefit type. A rank of 0 percent is the lowest, 100 percent the highest. For example, a fire state aid rank of 87 percent means that the relief association received a fire state aid amount higher than 87 percent of the associations of the same benefit type.

State Aid – The amount of fire state aid the relief association received during 2014, or payable for 2014 if not yet received.

Municipal Contributions – The amount of city, town, or independent nonprofit firefighting corporation contributions received by the relief association during 2014, or payable for 2014 if not yet received.

Pension Amount – For lump-sum plans, the amount per year of service in effect at the end of 2014. A retiring firefighter from a lump-sum plan would receive a benefit equal to the pension amount multiplied by the completed years of active service. Benefits for members of a defined-contribution plan are equal to the member’s account balance. Because the benefits for defined-contribution plan members are not based upon a per-year-of-service amount, there is no applicable pension amount.

Table 2-C provides both yearly and monthly benefit amounts. Members for most of the relief associations included in this table have the option of receiving either a lump-sum or a monthly benefit upon retirement. Benefits for members receiving a monthly pension are based on a monthly benefit amount which, when multiplied by the years of service, is the amount a retiring member would receive each month for the rest of his or her life. The yearly benefit amount is the amount per year of service in effect at the end of 2014 for members electing to receive their pension in a lump-sum payment.

All pension amounts are subject to reductions if the member had not served the required years of service for full vesting.

ROR 2014 – The rate of return earned on the relief association’s investments during 2014.

Funding Ratio – The relief association’s December 31, 2014 net assets divided by its accrued liabilities. Over 100 percent means the relief association has more assets than liabilities, while less than 100 percent means it has more projected liabilities than assets.

Table 2-A
Financial and Investment Data for Lump-Sum Plans
For the Year Ended December 31, 2014

Relief Association	Active Members	Net Assets	Rank (%-ile)	State Aid	Rank (%-ile)	Municipal Contributions	Rank (%-ile)	Pension Amount	Rank (%-ile)	ROR 2014	Rank (%-ile)	Funding Ratio	Rank (%-ile)

* These relief associations joined the Voluntary Statewide Lump-Sum Volunteer Firefighter Retirement Plan on January 1, 2015. The assets of these relief associations were transferred to the State Board of Investment at the end of 2014, so there were no net assets or funding ratios for these associations.

This page left blank intentionally.

How to Read Tables 3-A Through 3-C

Tables 3-A, 3-B, and 3-C provide relief association funding status and contribution requirement information.

Net Assets – The value of the relief association’s Special Fund assets as of the end of 2014. The net assets include any accounts payable or receivable that are outstanding as of December 31, 2014. The net asset value may therefore differ from the market value of the relief association’s investments.

Accrued Liabilities – An estimate of how much a relief association has accrued in pension benefits payable as of the end of 2014. The estimate is derived using statutory assumptions.

Surplus or (Deficit) – A surplus is the amount of a relief association’s net assets in excess of its accrued liabilities. A deficit is the amount of accrued liabilities a relief association had in excess of its assets as of December 31, 2014. A relief association that has a deficit is “under-funded,” while a relief association that has a surplus is “fully-funded.”

Funding Ratio – The relief association’s assets divided by its accrued liabilities at the end of 2014. Over 100 percent means the relief association had more assets than liabilities, while less than 100 percent means the association had more projected liabilities than assets.

Deficit Amortization Payment – Relief associations that showed a deficit on their 2014 Schedule Form or Actuarial Valuation are required to include this charge when calculating their required contribution. The amortization payment helps bring the relief association closer to full funding.

Normal Cost – The relief association’s cost of existing for one year; in this case, from 2014 to 2015. The normal cost includes the cost of members receiving one additional year of service credit, and becoming closer to receiving a fully-vested pension.

Required Contribution – The contribution required from the affiliated municipality or independent nonprofit firefighting corporation.

* For lump-sum plans, the Deficit Amortization Payment amounts are based on projected amounts as of August 1, 2014, as reported by relief associations on their 2014 Schedule Form.

^ For lump-sum plans, the Required Contribution is obtained from the 2014 Schedule Form and represents amounts to be contributed to the relief association during 2015.

** These relief associations joined the Voluntary Statewide Lump-Sum Volunteer Firefighter Retirement Plan on January 1, 2015. The assets for these relief associations were transferred to the State Board of Investment and their liabilities were transferred to the Plan at the end of 2014.

This page left blank intentionally.

* For monthly and monthly/lump-sum combination plans, the Deficit Amortization Payment amounts are obtained from actuarial valuations or actuarial estimates prepared according to the benefit provisions applicable on December 31, 2014.

^ For monthly and monthly/lump-sum combination plans, the Required Contribution is obtained from actuarial valuation statistics associated with the December 31, 2014, benefit level of the plan and represents an estimated required contribution for the next budget year. If an estimated required contribution is not provided in the actuarial valuation, it is calculated by reducing the total financial requirements as stated in the valuation by the estimated fire state aid.

How to Read Tables 4-A Through 4-C

Tables 4-A, 4-B, and 4-C provide relief association revenues and expenditures for 2014.

Revenues

State Aid – The amount of fire state aid the relief association received during 2014, or the amount payable for 2014 if not yet received.

Supplemental Benefit Reimbursements – The total amount received in reimbursements from the State of Minnesota for the mandatory additional 10 percent (up to \$1,000) payment for lump-sum service pensions and the optional 20 percent (up to \$2,000) payment for survivor benefits. Supplemental benefits are additional benefits that are paid at the time of the pension or benefit disbursement, and are meant to help offset state income taxes that must be paid on relief association benefits.

Municipal Contributions – The amount of city, town, or independent nonprofit firefighting corporation contributions received by the relief association during 2014, or payable for 2014 if not yet received.

Investment Earnings – The net interest and realized and unrealized gain (loss) on investments during 2014.

All Other – All other income received by the relief association during 2014, which includes, but is not limited to, donations, transfers from the General Fund, and other income.

Expenditures

Administration – Expenses paid for items such as salaries, training, audit, actuarial and legal fees, and fidelity bonds. It also includes any other uncategorized expenditures.

Service Pensions – The total of all service pension disbursements during 2014, including lump-sum and monthly distributions.

Other Benefits – The total of all non-service pension benefit distributions during 2014, including short- and long-term disability payments and survivor benefits.

* The All Other column includes, but is not limited to, donations, transfers, and other income.

^ Includes assets that were transferred to the Voluntary Statewide Lump-Sum Volunteer Firefighter Retirement Plan at the end of 2014. The relief associations joined the Plan on January 1, 2015. The transfer of assets was included as an administrative expense for reporting purposes.

How to Read Tables 5-A Through 5-C

Tables 5-A, 5-B, and 5-C provide information regarding relief association membership and bylaw provisions in effect at the end of 2014.

Active Members – Active members in the relief association as of December 31, 2014.

Lump-Sum – Retirees who received a lump-sum pension during 2014.

Survivor – Survivor benefits paid during 2014.

Disability – Disability benefits paid during 2014.

Monthly – Retirees or beneficiaries receiving a monthly pension during 2014 (for “Other Plan Types” only).

Deferred Members – Members no longer active in the fire department or relief association who are entitled to, but have yet to receive, a service pension.

Minimum Retirement Age – The minimum age at which a member may receive a service pension distribution. State law requires that members be at least age 50 to receive payment of their service pension.

Active Service – The minimum years a member must serve with the affiliated fire department before becoming eligible for a service pension.

Active Membership – The minimum years a member must be a member of the relief association before becoming eligible for a service pension.

Treasurer – The amount of the treasurer’s faithful performance bond. By law, it must be 10 percent of assets, although the amount of the bond need not exceed \$500,000.

Secretary – The amount of the secretary’s faithful performance bond, if applicable. State law does not require that the secretary be bonded.

How to Read Tables 6-A Through 6-C

Tables 6-A, 6-B, and 6-C provide information regarding the benefits offered by each relief association during 2014.

Annual Benefit – The service pension amount payable per year of active service. For defined-contribution plans, the pension amount is based on the member's account balance.

Monthly – The service pension amount payable per month, for each year of active service.

Long-Term Disability – The amount and type of benefit available for members who separate from service with a long-term disability. “Y/S” means the amount paid per year of active service, while “M/S” means the amount paid monthly for each year of active service.

Short-Term Disability – The amount and type of benefit for members who are temporarily unable to serve because of a short-term disability.

Survivor Benefit – The amount and type of benefit paid on behalf of a deceased member. “Y/S” means the amount paid per year of active service, while “M/S” means the amount paid monthly for each year of active service.

How to Read Table 7

Table 7 provides relief association investment information.

Market Value – The value of the relief association’s Special Fund investments as of December 31, 2014.

% of Assets at SBI – Percentage of the relief association’s investments held in the State Board of Investment’s Supplemental Fund.

Allocations as of 12/31/14 – Percentage of the relief association’s investments that are held in each asset class. “Other” includes all investments besides cash, stocks, and bonds, including small allocations to this asset class within mutual funds.

* These relief associations joined the Voluntary Statewide Lump-Sum Volunteer Firefighter Retirement Plan on January 1, 2015. The assets of these relief associations were transferred to the State Board of Investment at the end of 2014, so there were no market values or asset allocations for these associations.

This page left blank intentionally.

How to Read Table 8

Table 8 provides relief association investment information.

Market Value – The value of the relief association’s Special Fund investments as of December 31, 2014.

% of Assets at SBI – Percentage of the relief association’s investments held in the State Board of Investment’s Supplemental Fund.

Rates of Return

2014 – The return on the relief association’s investments for calendar year 2014.

2014 Benchmark – The return on a hypothetical portfolio, explained in detail below.

Above (Below) Benchmark – The 2014 Return minus the Benchmark Return. This figure shows how the relief association performed compared to its benchmark.

5-Yr – The relief association’s average annual return from 2010-2014.

10-Yr – The relief association’s average annual return from 2005-2014.

15-Yr – The relief association’s average annual return from 2000-2014.

Rank (%-ile) 10-Yr Return – The relief association’s ranking by its ten-year return. The highest ten-year average annual return is ranked at 100 percent, while the lowest ten-year average annual return is ranked at 0 percent. For example, a 75 percent rank means the relief association’s average annual return is higher than the return earned by 75 percent of relief associations.

Benchmark Return

The benchmark return is included as a comparison tool for relief associations. The benchmark return shows what the relief association could have earned, had it invested its assets passively for the entire year. Passive investment means using index funds that track a specific index. Index funds are widely available for stocks and bonds. For cash, a relief association could have invested in a proven money market fund or shopped for the highest-returning certificates of deposit.

The benchmark return is calculated for each relief association by multiplying the association's asset class proportions by the rate of return earned on a common benchmark index for each asset class. If a relief association changed investment strategies during the year, the calculated benchmark return will not reflect the changes.

Benchmark Calculation Example

January 1, 2014 Asset Allocation		Benchmark	Return	(a) x (b)
	(a)		(b)	(c)
Domestic Stock	42.3%	Russell 3000	12.6%	5.3%
International Stock	9.8%	MSCI ACWI ex. U.S.	(3.9)%	0.0%
Bonds	25.3%	Barclays Capital Aggregate	6.0%	1.5%
Cash	21.0%	90-Day U.S. T-Bill	0.0%	0.0%
Other	1.6%	Russell 3000	12.6%	0.0%
Benchmark Return			Sum (c) =	6.8%

Common Benchmark Indices

Russell 3000 Index – A measure of the overall U.S. stock market. This index includes the 3,000 largest publicly-traded U.S. companies.

MSCI ACWI ex. U.S. Index – A measure of the performance of international stocks, including developed markets and emerging markets. This index does not include the U.S. stock market's performance.

Barclays Capital Aggregate Index – A measure of the performance of the U.S. investment-grade bond market, including corporate and government bonds.

90-Day U.S. T-Bill – A measure of short-term cash investments.

Legend

- A = The relief associations and the Voluntary Statewide Lump-Sum Volunteer Firefighter Retirement Plan did not exist for either the full five-year, ten-year, or fifteen-year period during which the rates of return were calculated.
- B = The total rate of return is calculated by dividing total investment earnings by beginning of year total investments.
- C = These relief associations joined the Voluntary Statewide Lump-Sum Volunteer Firefighter Retirement Plan on January 1, 2015. The assets of these relief associations were transferred to the State Board of Investment at the end of 2014, so there were no market values or asset allocations for these associations.
- D = These relief associations joined the Voluntary Statewide Lump-Sum Volunteer Firefighter Retirement Plan on January 1, 2015. Prior to joining, these relief associations were fully invested with the State Board of Investment. Based on reporting requirements for relief associations that are fully invested with the State Board of Investment and because the assets were transferred at year-end, there is no rate of return available for 2014.
