

State of Minnesota Comprehensive Annual Financial Report

For the Year Ended June 30, 2016

One of the first harbingers of spring in Minnesota is the appearance of dandelions. After a season of snow and freezing temperatures, most Minnesotans welcome the sight of these delicate yellow flowers popping up in lawns, if only briefly. Once serious lawn care and gardening are under way, the “love affair” with them ends and a war of attrition against this “weed” begins.

Looking out at the yellow carpet of dandelions that inevitably blankets our landscapes, it’s hard to believe that dandelions are not native to the state. In fact, they came to Minnesota in 1849 in the mail to Harriet Godfrey, one of Minneapolis’s first residents. She and her husband, Ard, moved to the state from Maine in 1847, and she missed the pretty yellow flower she was accustomed to seeing—so much so she asked a friend to send her a packet of seeds. The rest was left to nature.

Lest we be too intolerant of these yellow invaders, consider that dandelions do produce a source of greens that were common in our forefathers’ diet and are a main ingredient in dandelion wine. They also provide a supplemental food source for precious honey bees and butterflies that play an important role in crop and plant pollination.

Introduction

2016 Comprehensive Annual Financial Report Transmittal Letter from the Commissioner of Minnesota Management and Budget

December 16, 2016

400 Centennial Building
658 Cedar Street
St. Paul, Minnesota 55155
Voice: (651) 201-8000
Fax: (651) 296-8685
TTY: 1-800-627-3529

The Honorable Mark Dayton, Governor

Members of the Legislature

In accordance with Minnesota Statutes, Section 16A.50, Minnesota Management and Budget is pleased to submit the Comprehensive Annual Financial Report (CAFR) for the state of Minnesota for the fiscal year ended June 30, 2016. This report includes the financial statements for the state, and the disclosures necessary to accurately present the financial condition and results of operations for the fiscal year. We prepared the report in accordance with generally accepted accounting principles (GAAP) for governmental units.

The report is divided into three sections:

1. **Introduction Section** – Includes this letter of transmittal, the certificate of achievement, the state's organization chart, and the list of principal officials.
2. **Financial Section** – Includes the auditor's opinion, management's discussion and analysis, basic financial statements, combining and individual fund statements for nonmajor funds, and the general obligation debt schedule. The Notes to the Financial Statements, in the basic financial statements, are necessary for an understanding of the information included in the statements. The notes include the Summary of Significant Accounting Policies and other necessary disclosure of matters relating to the financial position of the state.
3. **Statistical Section** – Includes mainly trend data and nonfinancial information useful in assessing a government's financial condition.

Management assumes full responsibility for the completeness and reliability of the information contained in this report, based on a comprehensive framework of internal control that it has established for this purpose. Because the cost of internal control should not exceed anticipated benefits, the objective is to provide reasonable, rather than absolute, assurance that the financial statements are free of any material misstatements.

The independent Office of the Legislative Auditor has issued an unqualified (clean) opinion on the state of Minnesota's financial statements for the year ended June 30, 2016. The independent auditor's report is located at the front of the financial section of this report.

As a part of the audit of these financial statements, the Office of the Legislative Auditor is conducting a single audit of federal programs. This audit meets the requirements of the federal Single Audit Act and is designed to meet the special needs of federal grantor agencies. The standards governing Single Audit engagements require the independent auditor to report not only on the fair presentation of the financial statements, but also on the state's internal controls and legal requirements involving the administration of federal awards for the year ended June 30, 2016. The supplementary report, "Financial and Compliance Report on Federally Assisted Programs," will be available in March 2017.

Management's discussion and analysis immediately follows the independent auditor's report and provides a narrative introduction, overview, and analysis of the basic financial statements and is designed to complement this letter of transmittal and should be read in conjunction with it.

Financial Reporting Entity and Responsibilities

The financial reporting entity consists of all the funds of the primary government, as well as its discretely presented component units. Component units are legally separate organizations for which the state is financially accountable. Financial accountability is defined as appointment of a voting majority of the component unit's governing body, and either (a) the ability of the state to impose its will, or (b) the potential for the organization to provide financial benefits to, or impose financial burdens on, the primary government; the organization is fiscally dependent on the primary government; or the nature and relationship between the primary government and the organization is such that exclusion would cause the reporting entity's financial statements to be misleading. Component units meeting this criteria are considered discretely presented unless the boards are substantially the same as the state or the component unit provides services or benefits entirely, or almost entirely, to the state.

The Housing Finance Agency, Metropolitan Council, University of Minnesota, Agricultural and Economic Development Board, National Sports Center Foundation, Office of Higher Education, Public Facilities Authority, Rural Finance Authority, Workers' Compensation Assigned Risk Plan, and Minnesota Sports Facilities Authority are component units reported discretely. The state has the ability to either impose its will over these agencies, or provides, or will provide, substantial funding.

Minnesota Management and Budget is responsible for the Statewide Integrated Financial Tools (SWIFT), an Oracle PeopleSoft Enterprise Resource Planning System. The majority of the information related to these financial statements was prepared from information provided by SWIFT. SWIFT maintains two separate ledgers. One is maintained primarily on a modified cash basis of accounting with certain accrual information and represents the starting basis for the financial statements. As SWIFT does not maintain all accrual information, adjustments to accounting data are necessary to provide financial statements in accordance with GAAP. The second ledger tracks information on a budgetary basis and recognizes revenues and expenditures essentially on a cash basis, except that encumbrances at year-end are considered expenditures. These disparate bases result in budgetary fund balances, which often differ significantly from those calculated under GAAP.

Minnesota Management and Budget is also responsible for designing and applying the state's system of internal accounting controls. These controls provide reasonable assurance that the state's assets are protected against loss and that the accounting records from which the financial statements are prepared are reliable. The concept of reasonable assurance recognizes that the cost of control should not exceed the benefit derived.

Budget Process

The state's fiscal period is a biennium. The Governor's biennial budget is presented to the Legislature in January (or February after a gubernatorial transition) of odd numbered years for the upcoming biennium. The state constitution and statutes require a balanced budget for the biennium. Specific legislative appropriations are required for several funds. These funds include the General, Trunk Highway, Highway User Tax Distribution, State Airports, Petroleum Tank Cleanup, Natural Resources, Game and Fish, Environmental and Remediation, Heritage, Special Compensation, Health Care Access, and Workforce Development funds.

Budgetary control is provided primarily through SWIFT. Appropriations are established in the accounting system at the amounts provided in the appropriation laws. The accounting system does not permit expenditures in excess of these amounts.

Economic Condition and Outlook

Well into the current economic expansion, Minnesota continues to add jobs at a fairly steady rate. Consistent job growth has contributed to the state's declining unemployment rate, which is now at 4.0 percent on a seasonally adjusted basis, 0.9 percentage points below the current U.S. rate. At the same time, the state's employment growth is seeing the effects of drags on exports and a tightening labor market. Total non-farm employment in Minnesota grew 1.0 percent in fiscal year 2016 and is forecast to accelerate slightly to 1.2 percent growth in fiscal year 2017. Employment growth is forecast to decelerate to 0.8 percent in fiscal year 2018 followed by 1.0 percent growth in fiscal year 2019.

Information from the Bureau of Economic Analysis, Quarterly Census of Employment and Wages (QCEW), and income tax withholding collections suggests Minnesota's nominal wage and salary disbursements grew 3.2 percent in fiscal year 2016. Wage income is now expected to accelerate to 5.3 percent growth in fiscal year 2017, followed by 4.7 percent in each of fiscal years 2018 and 2019. Minnesota personal income grew 2.0 percent in fiscal year 2016, and is now forecast to accelerate to 4.6 percent in fiscal year 2017, followed by 4.6 percent and 4.7 percent in fiscal year 2018 and 2019, respectively.

Minnesota's housing recovery continued to gain traction from its excellent performance in CY 2015, and as we approach the end of CY 2016, homebuilding activity is encouraging. As of October 2016, closed sales of homes in Minnesota preserved its good performance, reaching an 11-year high. Also encouraging are rising median and mean sales prices. According to the Minnesota Association of Realtors, in October 2016 the median sales price in the state rose 8.5 percent, while the average sales price increased 6.1 percent.

As the labor market continues to tighten and wages continue to grow, more people will be looking for long-term stable housing, increasing household formations, a key driver of demand for housing. Increasing formations foster housing sales and starts. After six years of low levels, annual household formations have picked up to 18,000 in calendar year 2015, consistent with continued employment growth. In calendar years 2016 and 2017, annual net new formations are forecast to be around 25,700 and 21,600, respectively. The 30-year fixed mortgage rate has risen to 4.16 percent at the end of November. Even though this is still low relative to historic norms, if rates keep moving up, it could affect demand for homes.

A global economic slowdown and a stronger U.S. dollar relative to major trading partners make Minnesota-produced goods and commodities more expensive elsewhere in the world, reducing demand for the state's products abroad. Exports of Minnesota manufactured goods have fallen over the last year, and manufacturing employment has declined. In the current forecast, we expect improvements in global growth to lead Minnesota manufacturers to add jobs starting in 2018. Minnesota's exports of goods and services to countries throughout the world are an important source of economic strength. According to data from the Minnesota Department of Employment and Economic Development for the second quarter of calendar year 2016, Minnesota exports, including agricultural, mining and manufactured products, were valued at \$4.8 billion, showing a decline of 8.0 percent since the second quarter of calendar year 2015, which is 2.0 percent more than the national decline of exports over the same period.

General Fund Condition

On a budgetary basis, the General Fund ended fiscal year 2016 with an unassigned fund balance of \$969 million. This balance resulted primarily from a \$221 million increase in General Fund non-dedicated revenues over the fiscal year 2016 original budget. Actual spending and encumbrance for fiscal year 2016 was \$431 million below the fiscal year 2016 original budget.

Minnesota budgets and manages its financial affairs on a budgetary basis, which primarily uses a cash basis of accounting. Revenues are recorded when received and expenditures are recorded when the payments are made with the exception that, at year-end, encumbered amounts are included in the expenditures of the year appropriated for budgetary reporting. GAAP requires that the modified accrual basis of accounting be used to prepare governmental fund statements. The modified accrual basis of accounting recognizes revenues when they become both measurable and available to finance operations of the fiscal year or liquidate liabilities existing at fiscal year-end. Expenditures are recognized when a liability occurs.

On a GAAP basis, the General Fund reported a balance of \$3.047 billion for fiscal year 2016, a difference of \$2.1 billion from the budgetary General Fund balance. The difference between the General Fund budgetary and GAAP fund balance results from two primary reasons. First, on a GAAP basis, the accruals of revenue and expenditures are required to be reported under the modified accrual basis of accounting. Second, several funds are included in the GAAP fund balance which are not included in the budgetary fund balance. These additional funds reported a fund balance of \$1.4 billion. The difference between the GAAP basis and budgetary basis General Fund fund balance, excluding these additional funds not reported in the budgetary fund balance, was \$655 million. For details of the budget to GAAP differences, see Note 18 – Budgetary Basis vs. GAAP in the Notes to the Financial Statements.

Improved Bond Ratings

Minnesota's reputation among credit rating agencies continues to improve. Rating agencies have recently upgraded the state's rating and outlook.

Fitch Ratings announced in July 2016 an upgrade of Minnesota's credit rating from AA+ to AAA, the highest rating awarded. Fitch Ratings based their upgrade on "Minnesota's solid and broad-based economy, a revenue structure well designed to capture economic growth, a low liability burden, strong control over revenues and spending" and "a sophisticated approach to reserve funding." Fitch Ratings noted that these factors, along with Minnesota's financial flexibility and a projected surplus, positioned the state well to navigate future fluctuations in the economy.

In August 2015, Standard & Poor's improved the state's outlook from stable to positive. Standard & Poor's revised its outlook to positive from stable on Minnesota's debt, "reflecting the state's payment of its deferred liabilities and improved structural balance alignment." The positive outlook indicates Standard & Poor's could raise the rating over the next two years. Standard & Poor's said, "should the state continue to demonstrate a strong commitment to structural balance and avoid using payment deferrals or shifts, while managing budget growth pressures, we could raise the rating."

Largest Budget Reserve in State History

Under law, the state must allocate 33% of the November forecast balance to the budget reserve until it reaches Minnesota Management and Budget's recommended reserve level. The 2016 November forecast allocated an additional \$334 million to the budget reserve. This amount, combined with the cash flow account, results in total current budget and cash reserves of \$2.280 billion, the state's largest rainy day fund ever. In 2015, the Pew Charitable Trust praised Minnesota for our strong reserve policy that automatically sets money aside for unexpected deficits or other budget challenges caused by changing economic conditions.

TransparencyMN Website Award

Minnesota's [TransparencyMN website](#) was awarded a University of Minnesota Humphrey School of Public Affairs' State Government Innovation Award as part of the state's commitment to financial accountability.

The website provides real time information about state government finances and operations. A section of TransparencyMN called MN Open Checkbook offers direct access to information on state budgets, payments to vendors, contracts and grants, and employee payroll data. TransparencyMN uses a robust

business intelligence tool to make complex financial information understandable. It provides Minnesotans with information on how their tax dollars are being spent in a concise and user friendly format. The information is updated daily, providing users with timely information on state budgeting and spending.

Certificate of Achievement

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the state of Minnesota for its comprehensive annual financial report for the fiscal year ended June 30, 2015. This was the thirty-first consecutive year that the state has received this prestigious award. To be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current comprehensive annual financial report continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

Acknowledgments

Although Minnesota Management and Budget accepts final responsibility for this report, staff in many other state agencies and component units provided much of the data. Assistance from these organizations ranged from providing necessary data to actual preparation of financial statements. I appreciate the dedication of the people in Minnesota Management and Budget and in other agencies who helped in the preparation of this report. Without the efforts of all involved, this report would not have been possible.

Sincerely,

Myron Frans
Commissioner

Independent Auditor's Report

Members of the Minnesota State Legislature

The Honorable Mark Dayton, Governor

Mr. Myron Frans, Commissioner, Minnesota Management and Budget

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Minnesota, as of and for the year ended June 30, 2016, which collectively comprise the state's basic financial statements as listed in the Table of Contents.

Management's Responsibility for the Financial Statements

The State of Minnesota's management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of the Minnesota State Colleges and Universities, which is a major proprietary fund and represents 59 percent, 47 percent, and 32 percent, respectively, of the total assets, total net position, and operating revenues of the primary government's business-type activities. We also did not audit the financial statements of the Housing Finance Agency, Metropolitan Council, University of Minnesota, Office of Higher Education, Public Facilities Authority, and Workers' Compensation Assigned Risk Plan, which cumulatively represent 95 percent, 92 percent, and 99 percent, respectively, of the total assets, total net position, and operating revenues of the total discretely presented component units. Those financial statements were audited by other auditors whose reports thereon have been furnished to us, and our opinion, insofar as it relates to the amounts included for the aforementioned major proprietary fund, business-type activities, and discretely presented component units, is based solely on the reports of other auditors. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the State of Minnesota's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the State of Minnesota's internal control. Accordingly, we express no such opinion.

An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

The financial statements of the Housing Finance Agency, the National Sports Center Foundation, and the Workers' Compensation Assigned Risk Plan, which are discretely presented component units, were not audited in accordance with *Government Auditing Standards*.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, based upon our audit and the reports of other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Minnesota as of June 30, 2016, and the respective changes in financial position and, where applicable, cash flows thereof and the respective budgetary comparison for the General Fund for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter

Change in Actuarial Assumptions

As mentioned in Note 8 to the financial statements (on page 113), most defined benefit plans changed a key assumption used to calculate the net pension liability the State of Minnesota will report in fiscal year 2017; the plans changed the long-term projected rate of investment return from 7.9 percent to 7.5 percent.¹ That change, along with changes to other actuarial assumptions,² will significantly increase the net pension liability the State of Minnesota will report for fiscal year 2017.³ For example, the state's reported net pension liability for its share of the State Employees Retirement Fund will increase from about \$1.1 billion at June 30, 2016, to about \$9 billion at June 30, 2017, an increase of over 700 percent. Our opinions are not modified with respect to this matter.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis and the other required supplementary information, as listed in the Table of Contents, be presented to supplement the basic financial statements. Such information, although not a part of the State of Minnesota's basic financial statements, is required by the Governmental Accounting

¹ The defined benefit plans that made this change included the State Employees Retirement Fund, the Correctional Employees Retirement Fund, the General Employees Retirement Fund, the Judges Retirement Fund, the Legislators Retirement Fund, and the State Patrol Retirement Fund.

² Other changes to the Teachers Retirement Fund's actuarial assumptions will significantly increase the net pension liability the State of Minnesota will report for fiscal year 2017.

³ The net pension liability is the amount by which the estimated present value of future pension obligations exceeds money on hand set aside to make those payments. Pension plan administrators' actuaries determine these amounts through actuarial valuations and measurements that use assumptions about events which occur many years into the future. No one set of assumptions is uniquely correct.

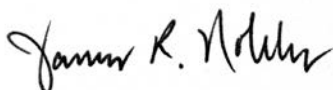

Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We and the other auditors have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State of Minnesota's basic financial statements. The Introduction, the Combining and Individual Nonmajor Fund Financial Statements and Schedules, General Obligation Debt Schedule, and the Statistical Section, as listed in the Table of Contents, are presented for purposes of additional analysis and are not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The Combining and Individual Nonmajor Fund Financial Statements and Schedules and the General Obligation Debt Schedule have been subjected to the auditing procedures applied by us and the other auditors in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or the statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, based on our audit and the reports of other auditors, the information is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole. The Introduction and Statistical Sections have not been subjected to the auditing procedures applied by us and the other auditors in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we will also issue a report on our consideration of the State of Minnesota's internal control over financial reporting; on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements; and on other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

2016 Comprehensive Annual Financial Report Management's Discussion and Analysis

Introduction

The following discussion and analysis of the state of Minnesota (state) financial performance provides an overview of the state's financial activities for the fiscal year ended June 30, 2016, and identifies changes in the financial position of the state that occurred during the fiscal year. This section should be read in conjunction with the preceding transmittal letter and the state's financial statements and notes to the financial statements, which follow.

Overview of the Financial Statements

The focus of Minnesota's financial reporting is on the state as a whole, and on the individual funds that are considered to be major. This reporting focus presents a more comprehensive view of Minnesota's financial activities and financial position, and makes the comparison of Minnesota's government to other governments easier.

The financial section of this annual report has four parts:

- Management's Discussion and Analysis (MD&A)
- Basic Financial Statements
- Required Supplementary Information
- Combining and Individual Fund Statements – Nonmajor Funds

The report also includes statistical and economic information, which generally provides a ten-year history of various indicators.

The basic financial statements include government-wide financial statements, fund financial statements, and notes to the financial statements that provide more detailed information.

Government-wide Financial Statements

The government-wide financial statements provide an overall view of the state's operations in a manner similar to a private-sector business. Government-wide financial statements consist of the statement of net position and the statement of activities that are prepared using the economic resources measurement focus and the accrual basis of accounting. All current year revenues and expenses are included in the statements regardless of whether the related cash has been received or paid. Revenues and expenses are reported in the statement of activities for some items that will not result in cash flows until future fiscal periods (e.g. uncollected taxes, accounts receivable, and earned but unused vacation leave). This reporting method produces a view of financial activities and position similar to that presented by most private-sector companies. The statements provide both short-term and long-term information about the state's financial position, which assists readers in assessing the state's economic condition at the end of the fiscal year.

The government-wide financial statements are located immediately following this discussion and analysis.

The statement of net position presents all of the state's financial resources along with capital assets and long-term obligations. The statement includes all assets and liabilities of the state. Net position is the difference between assets and liabilities and is one method to measure the state's financial condition.

- An increase or decrease in the state's net position from one year to the next indicates whether the financial position of the state is improving or deteriorating.
- Other indicators of the state's financial condition include the condition of its infrastructure and economic events and trends that affect future revenues and expenses.

The statement of activities presents the changes in net position and reports on the gross and net cost of various activities carried out by the state (governmental, business-type, and component units). These costs are paid by general taxes and other revenues generated by the state. This statement summarizes the cost of providing specific services by the government, and includes all current year revenues and expenses.

The statement of net position and the statement of activities segregate the activities of the state into three types:

Governmental Activities

The governmental activities of the state include most basic services such as environmental resources, general government, transportation, education, health and human services, and public safety. Most of the costs of these activities are financed by taxes, fees, and federal grants.

Business-type Activities

The business-type activities of the state normally are intended to recover all, or a significant portion of, their costs through user fees and charges to external users of goods and services. The operations of the Unemployment Insurance Fund, the State Colleges and Universities, and the Lottery are examples of business-type activities.

Discretely Presented Component Units

Component units may be blended or discretely presented. Blended component units, although legally separate entities, are, in substance, part of the state's operations. Discretely presented component units are shown separately from the primary government. Component units are legally separate organizations for which the state is financially accountable, or the nature and significance of the unit's relationship with the state is such that exclusion of the unit would cause the state's financial statements to be misleading. Financial accountability is defined as the appointment of a voting majority of the component unit governing body, and either a) the ability of the state to impose its will, or b) the potential for the organization to provide financial benefits to, or impose financial burdens on, the primary government.

The state's ten component units are reported as discretely presented component units and reported in two categories: major and nonmajor. This categorization is based on the relative size of an individual component unit's assets, liabilities, revenues, and expenses in relation to the total of all component units and the primary government.

The state's three major component units are:

- Housing Finance Agency
- Metropolitan Council
- University of Minnesota

The state's seven nonmajor component units are combined into a single column for reporting in the fund financial statements. These nonmajor component units are:

- Agricultural and Economic Development Board
- National Sports Center Foundation
- Office of Higher Education
- Public Facilities Authority
- Rural Finance Authority
- Workers' Compensation Assigned Risk Plan
- Minnesota Sports Facilities Authority

State Fund and Component Unit Financial Statements

A fund is a grouping of related self-balancing accounts used to maintain control over resources that have been segregated for specific activities or objectives. The state of Minnesota, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

The fund financial statements focus on individual parts of the state, reporting the state's operations in more detail than in the government-wide statements. Fund financial statements focus on the most significant funds within the state.

The state's funds are divided into three categories:

Governmental Funds

Governmental funds record most of the basic services provided by the state and account for essentially the same functions as reported in the governmental activities in the government-wide financial statements. Unlike the government-wide financial statements, the fund financial statements focus on how money flows in and out of the funds during a fiscal year and spendable resources available at the end of the fiscal year.

Governmental funds are accounted for using the modified accrual basis of accounting, which recognizes revenues when they are available and measurable. Expenditures are generally recognized in the accounting period when the fund liability is incurred, if measurable. This approach is known as the flow of current financial resources measurement focus. These statements provide a detailed short-term view of the state's finances that assist in determining whether there are more or less resources available and whether these financial resources will be adequate to meet the current needs of the state. Governmental funds include the General, special revenue, capital project, Debt Service, and Permanent funds.

The focus of governmental funds is narrower than that of the government-wide financial statements. It is useful to compare the information presented for governmental funds with similar information presented for

governmental activities in the government-wide financial statements. By comparing this financial information, readers may better understand the long-term impact of the state's short-term financing decisions.

The basic financial statements include a reconciliation of governmental funds to governmental activities. These reconciliations follow the governmental funds balance sheet and the governmental funds statement of revenues, expenditures, and changes in fund balances.

The state maintains 23 individual state governmental funds. Information is presented separately in the governmental funds balance sheet and in the governmental funds statement of revenues, expenditures, and changes in fund balances for the General and Federal funds, which are reported as major funds. Information from the remaining funds is combined into a single, aggregated column. Individual fund data for each of these nonmajor governmental funds is provided in the form of combining statements included in this report.

The state adopts a biennial budget with annual appropriations for the majority of the activity reported in the General Fund. A budgetary comparison statement has been provided for the General Fund activity with appropriations included in the biennial budget to demonstrate compliance with this budget.

Proprietary Funds

When the state charges customers for the services it provides, whether to outside customers or to other agencies within the state, these services are generally reported in proprietary funds. Proprietary funds (enterprise and internal service) utilize accrual accounting which is the same method used by private-sector businesses. Proprietary fund financial statements provide the same type of information as the government-wide financial statements, only in more detail.

Enterprise funds, a type of proprietary fund, are used to report activities that provide goods and services to outside (non-government) customers, including the general public. Internal service funds are used to accumulate and allocate costs internally for goods and services provided by one program of the state to another. Because the activities reported by internal service funds predominantly benefit governmental functions rather than business-type functions, the internal service funds have been included within governmental activities in the government-wide financial statements.

The state maintains 18 individual proprietary funds. The State Colleges and Universities and Unemployment Insurance funds, both of which are considered major funds, are presented separately in the proprietary funds statement of net position and in the proprietary funds statement of revenues, expenses, and changes in net position. Information from the ten nonmajor enterprise funds and the six internal service funds are combined into two separate aggregated columns. Individual fund data for each of these nonmajor proprietary funds is provided in the form of combining statements presented in this report.

Fiduciary Funds

Fiduciary funds are used to report activities when the state acts as a trustee or fiduciary to hold resources for the benefit of parties outside the state. The accrual basis of accounting is used for fiduciary funds and is similar to the accounting used for proprietary funds. The government-wide statements exclude fiduciary fund activities and balances because these assets are restricted in purpose and cannot be used by the state to finance its operations. The state must ensure that the assets reported in fiduciary funds are used for their intended purposes.

The state maintains 19 individual fiduciary funds. The state's fiduciary funds are the pension trust funds, the investment trust funds (which account for the transactions, assets, liabilities, and fund equity of the external investment pools), and the Agency Fund (which accounts for the assets held for distribution by the state as an agent for other governmental units, other organizations, or individuals). Individual fund detail is included in the combining financial statements included in this report.

Component Units

Component units are legally separate organizations for which the state is financially accountable. The government-wide financial statements present information for the discretely presented component units in a single column on the statement of net position. Also, some information on the statement of changes in net position is aggregated for component units. The discretely presented component units' statements of net position and statements of changes in net position provide detail for each major discretely presented component unit and aggregate the detail for nonmajor discretely presented component units. Individual nonmajor discretely presented component unit detail can be found in the combining financial statements included in this report.

Notes to the Financial Statements

The notes provide additional narrative and financial information that is essential to a full understanding of the data provided in the government-wide financial statements and the fund financial statements. The notes to the financial statements are located immediately following the component unit financial statements.

Required Supplementary Information

The basic financial statements are followed by a section of required supplementary information that further explains and supports the information in the financial statements. This section includes maintenance data regarding certain portions of the state's infrastructure, actuarial measures of pension and other postemployment benefits funding progress, and public employees insurance program development information.

Other Supplementary Information

Other supplementary information includes combining financial statements for nonmajor governmental, proprietary, and fiduciary funds and nonmajor discretely presented component units. These funds are added together by fund type and presented in single columns in the basic financial statements.

Government-wide Financial Analysis

Net position serves as a useful indicator of a government's financial position over time. The state's combined net position (governmental and business-type activities) totaled \$16.7 billion at the end of fiscal year 2016, compared to \$14.9 billion at the beginning of the year.

⁽¹⁾ 2015 has been restated to be consistent with 2016 presentation.

The largest portion, \$13.9 billion of \$16.7 billion, of the state's net position reflects investment in capital assets such as land, buildings, equipment, and infrastructure (pavement, bridges, and other immovable assets) less any related outstanding debt used to acquire those assets. The state uses these capital assets to provide services to citizens. Capital assets are not considered to be convertible to cash and cannot be used to fund the daily activities of the state or pay for the debt related to capital assets. Therefore, the resources needed to repay this debt related to capital assets must be provided from other sources.

Approximately \$7.8 billion of the state's net position represent resources subject to external restrictions, constitutional provisions, or enabling legislation, which restricts how these assets may be used. Additional information on the state's net position restrictions is located in Note 16 – Equity in the notes to the financial statements.

The remaining net position balance represents a deficit in unrestricted net position of \$5.0 billion. This deficit does not mean that the state lacks resources to pay its bills in the near future. Rather, this deficit primarily reflects three significant factors. First, the state, similar to other states, issues general obligation bonds and distributes the proceeds to component units and local units of government. These proceeds are used to finance the purchase or construction of capital assets. These entities record the capital assets in their statements of net position; however, the state is responsible for the repayment of the debt. This practice allows the state to promote improved financial management by reducing bond issuance costs and obtaining more favorable financing arrangements. Second, the state reports the majority of the noncapital portion of net position for most of its governmental activities' special revenue, debt service, and permanent funds as restricted. Third, the state recognized a net pension liability for defined benefit plans to which the state contributes either on behalf of state employees or for employees of other entities. This liability is long-term in nature and is being managed by the retirement systems and the state Legislature.

The state's combined net position for governmental and business-type activities increased \$1.7 billion (11.6 percent) over the course of this fiscal year. This resulted from a \$1.4 billion (12.4 percent) increase in net position of governmental activities, and a \$293 million (8.7 percent) increase in net position of business-type activities.

⁽¹⁾ 2015 has been restated to be consistent with 2016 presentation.

Approximately 60 percent of the state's total revenue (governmental and business-type activities) came from taxes, while 29 percent resulted from grants and contributions, including federal aid. Charges for various goods and services provided 10 percent of the total revenues. The remaining 1 percent came from other general revenues.

The state's expenses cover a range of services. The largest expenses were for general education, and health and human services.

Governmental Activities

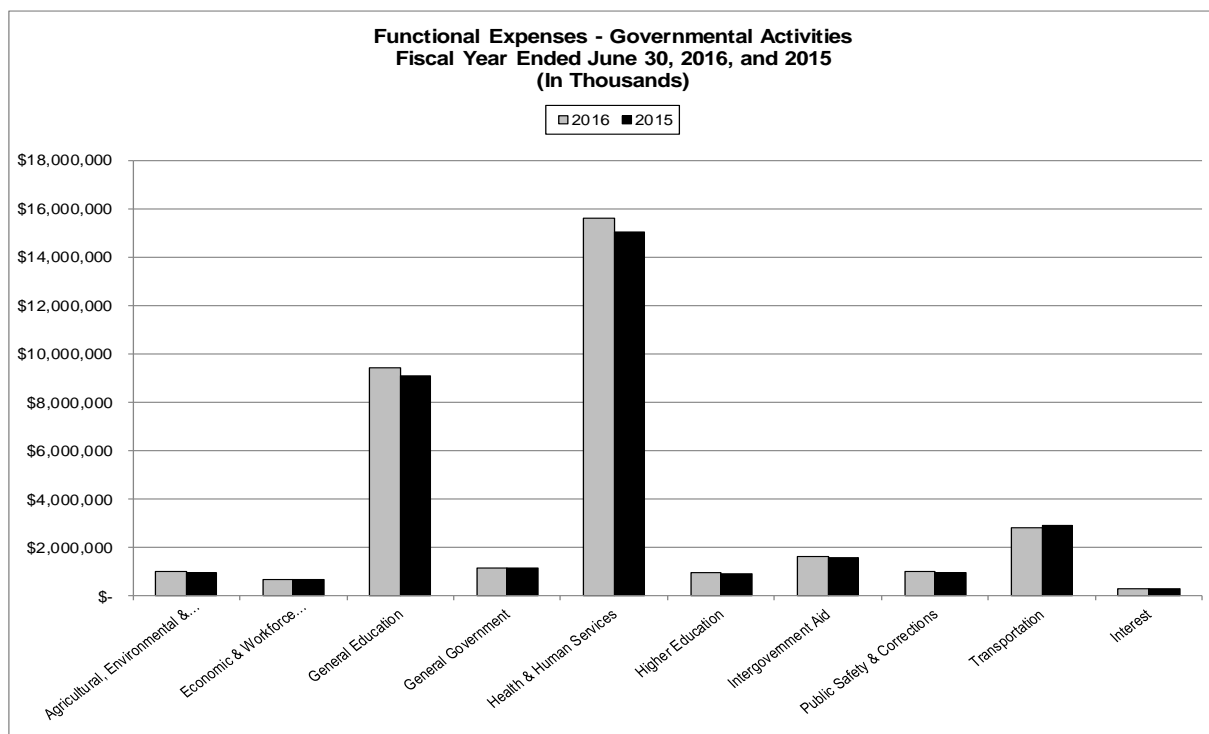

Governmental activities increased the state's net position by \$1.4 billion in the current year compared to an increase of \$1.6 billion in the prior year.

Revenues increased slightly by \$920 million over prior year. The growth rate for sales and individual income taxes remained slower and that growth was offset by a slight decrease in corporate income taxes due to weaker corporate profits. Operating grants and contributions increased slightly due to additional federal revenue resulting from the federal share of the increase in medical assistance expenses, additional funding for the Children's Health Insurance Program, and capitalized infrastructure projects.

There was a \$1.0 billion increase in expenses compared to the prior year. The largest increase related to health and human services expenses, which resulted from the increase in enrollment in medical assistance. This was partially offset by the increase in federal revenue for the federal government's share, as noted previously. The increase in general education was primarily due to a two percent per pupil formula increase and a slight increase in the number of pupils. Grants to cities and counties for general aid increased intergovernmental aid, while an increase in grants to the University of Minnesota and the Office of Higher Education (component units) caused an increase in higher education. Projects to restore, enhance, and protect the habitat for fish, game, and wildlife increased agricultural, environmental and energy expenses. Grants to counties for transportation projects were reduced, causing a decrease in transportation.

Business-type Activities

Net position for the state's proprietary funds increased by \$293 million during the current year compared to \$328 million in the prior year. This resulted primarily from a \$118 million increase in net position in the State Colleges and Universities Fund and a \$61 million increase in net position in the Unemployment Insurance Fund.

The State Colleges and Universities Fund's net position increase of \$118 million was \$50 million higher than the prior year. Most of this was attributable to a net decrease in net pension expense. Tuition and fees increased due to an increase in tuition rates at universities, but was partially offset by a decrease in enrollment. This decrease in enrollment also caused a reduction in federal grants as students received less financial aid. The Unemployment Insurance Fund's net position increase of \$61 million was \$180 million less than the prior year. This was primarily attributed to a decrease in insurance premiums due to a reduction in tax rates and additional benefits paid due to an increase in average wages.

During the 2016 legislative session, an employer tax credit of approximately \$258 million was passed and will be effective for fiscal year 2017. Employers can apply this credit toward their unemployment taxes due to the state in fiscal year 2017.

Long-Term Liabilities

The state's total long-term liabilities increased by \$590 million (4.3 percent) during the current fiscal year. The increase is primarily attributable an increase in the net pension liability and the issuance of state general obligation bonds for trunk highway projects and other various state purposes.

State Funds Financial Analysis

Governmental Funds

The focus of the state's governmental funds is to provide information on near-term cash inflows and outflows during the fiscal year and balances of spendable resources as of fiscal year end. Such information is useful in assessing the state's financial condition. The unassigned fund balance serves as a useful measure of the state's net resources available for future spending at the end of the fiscal year.

As of the end of the current fiscal year, the state's governmental funds reported combined ending fund balances of \$9.1 billion, an increase of \$479 million over the prior year.

The General Fund is the chief operating fund of the state. At the end of the current fiscal year, the unassigned fund balance of the General Fund was \$1.6 billion, an increase of \$789 million during the current year.

Because the General Fund is the chief operating fund of the state, some of the same variances impacting Governmental Activities impacted the General Fund. As previously noted, the growth rate for sales and individual income taxes remained weak while weaker corporate profits caused a decrease in corporate income taxes.

The General Fund expenditures for general education increased as a result of the two percent per pupil formula increase and a slight increase in the number of pupils. Intergovernmental aid increased due to additional grants to cities and counties for general aid while the increase in higher education was due to additional grants to the University of Minnesota and the Office of Higher Education (component units).

Even though medical assistance expenditures increased, the General Fund expenditures remained consistent due to the shift of a portion of medical assistance expenditures to the Health Care Access Fund (special revenue fund). These expenditures were partially offset by an increase in federal revenue for the federal government's share of these expenditures as well as the additional federal grants for the Children's Health Insurance Program.

Proprietary Funds – Enterprise and Internal Service Funds

The statements for proprietary funds provide the same type of information found in the government-wide financial statements, but in more detail.

Enterprise Funds

The state's enterprise funds are included in the Business-type Activities column of the Statement of Activities. Enterprise funds net position increased by \$293 million during the current year. This primarily resulted from a \$118 million increase in net position of the State Colleges and Universities Fund and a \$61 million increase in net position of the Unemployment Insurance Fund. For further discussion, see the Government-wide Financial Analysis – Business-type Activities section.

Internal Service Funds

The state's internal service funds are included in the Governmental Activities column of the Statement of Activities; however, eliminations have been made in the Statement of Activities so that certain allocated expenses are recorded only once in the function for which the expenses were made.

The implementation of GASB 68, "Accounting and Financial Reporting for Pensions," which required the recording of the net pension liability and the deferred inflows and outflows of resources associated with pensions, has caused many of the nonmajor enterprise and internal services funds to end fiscal year in a deficit net position. The actuarially determined amounts are likely to vary significantly from year to year and are managed by the retirement systems and state Legislature to ensure the defined benefit plans are adequately funded to pay plan benefits to employees participating as they become due. For these reasons, the state does not include the pension-related liabilities or deferred inflow and outflows of resources in the rate-setting process for managing these funds as long as the funds are contributing the statutory required contributions. The amounts will continue to be monitored by the retirement systems administering these plans and the state Legislature.

General Fund Budgetary Highlights

Several significant economic forecast and budget actions occurred prior to and during fiscal year 2016. These are material to understanding changes in General Fund balances that occurred in fiscal year 2016. Both the Minnesota State Constitution (Article XI, section 6) and Minnesota Statutes, Section 16A.152, require that the budget be balanced for the biennium. The following highlights material actions taken by the state Legislature and the Governor affecting fiscal year 2016.

Actions Establishing the Fiscal Year 2016 Budget

The budget for state fiscal year 2016 was adopted in May and June 2015. During the 2015 legislative session, the February 2015 Budget and Economic Forecast increased the projected budget balance for the 2016-17 biennium from \$1.0 billion to \$1.867 billion. General Fund revenues for 2016-17 biennium were forecast to be \$44.3 billion and projected current law spending was expected to be \$41.1 billion. Legislative actions during the 2015 regular and special sessions reduced the projected balance by \$1.002 billion to \$865 million. Legislative changes included \$705 million in new spending, \$132 million in higher revenue and transfers in, and \$429 million in reduced resources carried forward from the 2014-15 biennium due to changes enacted impacting that budget period.

Changes to General Fund revenues included \$526 million in new spending in E-12 education, largely due to 2 percent annual increase to the basic education formula, \$174 million increase in higher education spending, \$115 million higher spending for the courts and public safety, and a \$51 million increase in economic development. The spending increases were offset by a \$291 spending decrease in health and human services largely due to a one-time cost shift to the Health Care Access Fund. Gains in resources included a transfer-in from the Closed Landfill Investment account of \$63 million and minor tax changes.

After the 2015 legislative session, the enacted budget for fiscal year 2016 included \$1.421 billion in carry forward from fiscal year 2015, \$20.893 billion in General Fund revenues, \$20.500 billion in General Fund spending, \$1.344 billion in cash and budgetary reserves, \$14 million in a stadium reserve account, and a \$456 million ending budgetary balance.

Budget and Forecast Actions Impacting Fiscal Year 2016

The November 2015 Budget and Economic Forecast improved the budget outlook for the 2016-17 biennium by \$1.006 billion. A favorable close to fiscal year 2015 increased resources carried forward by \$682 million and the General Fund revenue forecast was increased \$90 million. Spending estimates were reduced by \$178 million. Statutory reserve allocations transferred \$602 million of the balance to the budget reserve and \$6 million to the stadium reserve, leaving as unallocated forecast balance of \$1.206 billion. Higher sales and corporate income taxes estimates offset a lower individual income taxes forecast. Spending was reduced \$178 million due to savings in health and human services spending that were offset partially by increases in other budget areas, including a higher E-12 forecast and statutory transfers to reimburse funds borrowed from other state funds to solve past budget issues.

The February 2016 Budget and Economic Forecast reduced General Fund revenues by \$427 million and spending by \$129 million. Those changes, offset by an \$8 million increase in stadium reserves, reduced the 2016-17 biennium forecast balance by \$306 million. The February forecast for fiscal year 2016 reflected \$20.890 billion in General Fund revenue, \$20.401 billion in General Fund spending, \$1.947 billion in cash and budget reserves, \$21 million in the stadium reserve, and a \$625 million budgetary balance.

The 2016 legislative session ended in May 2016. Changes enacted in the session included \$67 million in revenue changes and \$239 million in supplemental spending for the 2016-17 biennium. A number of the changes impacted the fiscal year 2016 budget. Revenue changes resulted in less than a \$11 million increase for fiscal year 2016. Spending changes were made in health and human services, public safety, environment, agriculture and economic development. Fiscal year 2016 spending increases totaled \$4 million. After the legislative changes, fiscal year 2016 General Fund revenues were estimated to be

\$20.901 billion. Fiscal year 2016 General Fund expenditures were projected to be \$20.405 billion. The legislature made no reserve changes in the 2016 legislative session.

Fiscal year 2016 officially closed in August 2016. Actual revenues for fiscal year 2016 were \$21.151 billion, \$258 million higher than end of session estimates, including \$193 million in higher tax collections. Spending for fiscal year 2016 was \$20.151 billion, \$245 million below previous estimates; however, \$187 million of unspent appropriations in fiscal year 2016 were authorized to carryforward into fiscal year 2017. The budgetary balance for fiscal year 2016 was \$946 million, \$315 million higher than prior estimates.

Budget and GAAP Based Financial Outlook

Minnesota budgets and manages its financial affairs on a budgetary basis, which primarily uses a cash basis of accounting. Revenues are recorded when received and expenditures are recorded when the payments are made, with the exception that, at year-end, encumbered amounts are included in the expenditures of the year appropriated for budgetary reporting. GAAP requires that the modified accrual basis of accounting be used to prepare governmental fund statements. The modified accrual basis of accounting recognizes revenues when they become both measureable and available to finance operations of the fiscal year or liquidate liabilities existing at fiscal year-end. Expenditures are recognized when a liability occurs.

On a budgetary basis, the state's General Fund ended fiscal year 2016 with a balance of \$969 million. On a GAAP basis, the General Fund reported a balance of \$3.047 billion for fiscal year 2016, a difference of \$2.078 billion from the budgetary General Fund balance. The difference between the General Fund budgetary and GAAP fund balance results from two primary reasons. First, on a GAAP basis, the accruals of revenue and expenditures are required to be reported under the modified accrual basis of accounting. Second, several funds are included in the GAAP fund balance which are not included in the budgetary fund balance. These additional funds reported a fund balance of \$1.423 billion. The difference between the GAAP basis and budgetary basis fund balance of the General Fund, excluding these additional funds not reported in the budgetary fund balance, was \$655 million. Additional information on the differences between the budgetary basis and the GAAP basis for the General Fund is included in Note 18 – Budgetary Basis vs. GAAP of the notes to the financial statements.

In the November 2016 forecast, Minnesota's budget outlook improved from previous estimates despite a weaker economic outlook. After a statutory allocation of \$334 million to the budget reserve, the fiscal year 2016-17 forecast balance is \$678 million, a decrease of \$51 million from the end of session. Forecast revenues for the biennium increased \$41 million, while forecast spending decreased \$245 million. A net increase in the stadium reserve reserves reduced the bottom line by an additional \$3 million.

Capital Asset and Debt Administration

Capital Assets

The state's investment in capital assets for governmental and business-type activities as of June 30, 2016, was \$22.0 billion, less accumulated depreciation of \$3.7 billion, resulting in a net book value of \$18.3 billion. This investment in capital assets includes land, buildings, construction and development in progress, infrastructure, easements, art and historical treasures, internally generated computer software, and equipment. Infrastructure assets are long-lived capital assets, such as pavement, bridges, tunnels, drainage systems, lighting systems, and similar items that are normally stationary in nature.

The state uses the modified approach for reporting selected infrastructure assets. The modified approach requires that the state meet certain requirements regarding the inventory and maintenance of eligible capital assets, including condition assessments. Under the modified approach, assets are not depreciated and certain maintenance and preservation costs associated with those assets are expensed. Assets accounted for under this approach include approximately 29,000 lane miles of pavement and 3,000 bridges that are maintained by the Minnesota Department of Transportation (MnDOT).

The state's goal is to maintain pavement at, or above, a 3.0 Pavement Quality Index (PQI) for all principal arterial pavement and at, or above, a 2.8 PQI for all other pavement. The most recent condition assessment, completed for calendar year 2015, indicated that the average PQI for principal arterial pavement was 3.4 and 3.3 for all other pavements. The state has maintained a stable condition of pavement over the past several years.

The state's goal is to have over 92 percent of principal arterial system bridges and 80 percent of all other system bridges in fair to good condition. The most recent condition assessment, completed for calendar year 2015, indicated that 95 percent of principal arterial system bridges and 94 percent of all other system bridges were in fair to good condition. The state has also maintained a stable condition of bridges over the past several years.

During the current year, expenditures for maintenance of pavement were higher than budget due primarily to a significant number of projects for pavement maintenance being completed earlier than anticipated due to favorable weather conditions and contractors completing work ahead of schedule.

Additional information on the state's capital assets and infrastructure under the modified approach is included in Note 6 – Capital Assets of the notes to the financial statements and in the required supplementary information, respectively.

Debt Administration

The authority of the state to incur general obligation debt is described in Article XI, Sections 5 and 7, of the state's constitution. General obligation bonds, issued by the state, are backed by the full faith, credit, and taxing powers of the state.

The state's general obligation bonds were rated on June 30, 2016, as follows:

- AA+ by Fitch Ratings (July 2016 upgraded to AAA)
- Aa1 by Moody's Investors Service
- AA+ by Standard & Poor's (August 2015 improved outlook to positive)

The Legislature also statutorily authorizes other types of debt.

The state issues revenue bonds, which are payable solely from rentals, revenues, and other income, and charges and monies that were pledged for repayment.

The state issued state General Fund appropriation refunding bonds to refund bonds issued by a blended component unit, Tobacco Securitization Authority, which no longer exists. The state also issued state General Fund appropriation bonds to finance the state and City of Minneapolis shares of the costs of a professional football stadium project.

The Certificates of Participation were issued by the state to finance the statewide systems, integrated tax system, and the legislative office facility.

During fiscal year 2016, the state issued the following bonds:

- \$368.2 million in general obligation state various purpose bonds
- \$310.0 million in general obligation state trunk highway bonds
- \$7.2 million in general obligation Rural Finance Authority bonds
- \$376.7 million in general obligation state various purpose refunding bonds
- \$14.9 million in general obligation state trunk highway refunding bonds

Additional information on the state's long-term debt obligations is located in Note 12 – General Long-Term Liabilities – Primary Government in the notes to the financial statements.

Requests for Information

This financial report is designed to provide citizens, taxpayers, customers, investors, and creditors with a general overview of the state's finances and to demonstrate the state's accountability for the money it receives.

STATE OF MINNESOTA

RECONCILIATION OF THE GOVERNMENTAL FUND BALANCE SHEET TO THE STATEMENT OF NET POSITION

JUNE 30, 2016
(IN THOUSANDS)

Total Fund Balance for Governmental Funds \$ 9,112,522

Amounts reported for governmental activities in the Statement of Net Position are different because:

Capital assets used in governmental activities are not financial resources and therefore are not reported in the funds. These assets consist of:

Infrastructure	\$ 10,179,574	
Nondepreciable Capital Assets	3,393,879	
Depreciable Capital Assets	4,183,394	
Accumulated Depreciation	<u>(1,779,280)</u>	
		15,977,567

Net effect of state revenues that will be collected after year-end but not available to pay for current period expenditures and refunds of revenues that will be paid after year-end. 1,302,400

Deferred Inflows resulting from the refunding of debt and restructuring of capital leases included in the Statement of Net Position. (63,419)

Internal service funds are used by management to charge the costs of certain activities to individual funds. The assets and liabilities of the internal service funds are included in governmental activities in the Statement of Net Position. 1,642

Deferred pension outflows of \$652,750 and inflows of \$(1,177,123) resulting primarily from pension actuarial gains and losses to be amortized are included in the Statement of Net Position. (524,373)

Some liabilities are not due and payable in the current period and therefore are not reported in the funds. These liabilities consist of:

Accrued Interest Payable	\$ (116,768)	
General Obligation Bonds Payable	(6,277,717)	
State General Fund Appropriation Bonds Payable	(1,000,675)	
Revenue Bonds Payable	(41,855)	
Bond Premium Payable	(894,505)	
Due to Component Units	(7,817)	
Capital Leases Payable	(89,854)	
Certificate of Participation Payable	(103,020)	
Certificate of Participation Premium Payable	(12,850)	
Claims Payable	(647,724)	
Compensated Absences Payable	(279,321)	
Net Other Post-Employment Benefits	(291,522)	
Net Pension Liability	<u>(3,053,411)</u>	
		<u>(12,817,039)</u>

Net Position of Governmental Activities \$ 12,989,300

The notes are an integral part of the financial statements.

The notes are an integral part of the financial statements.

STATE OF MINNESOTA

RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES

YEAR ENDED JUNE 30, 2016
(IN THOUSANDS)

Net Change in Fund Balances for Governmental Funds	\$ 479,029
---	-------------------

Amounts reported for governmental activities in the Statement of Activities are different because:

Governmental funds report capital outlay as expenditures. However, in the Statement of Activities, the cost of capital assets is allocated over their estimated useful lives as depreciation. This is the amount by which capital outlay exceeded depreciation of \$170,940 in the current period.	1,003,049
--	-----------

Governmental funds report the proceeds from the sale of capital assets as increases in financial resources. However, in the Statement of Activities, only the gain or loss on the sale and the fair market value of donated capital assets are reported.	(73,710)
--	----------

Internal service funds are used by management to charge the costs of certain activities to individual funds. The net revenue (expense) of internal service funds activities is reported in governmental activities, but not included in governmental funds.	(4,131)
---	---------

Net changes in revenues in the Statement of Activities that do not provide current financial resources are not reported as revenues in governmental funds.	(82,189)
--	----------

Bond and loan proceeds provide current financial resources to governmental funds; however, issuing or incurring debt is reported as an increase of long-term liabilities in the Statement of Net Position.	(1,225,878)
--	-------------

Net changes due to the additions and amortization of deferred inflows related to the refunding of debt and restructuring of capital leases reported in the Statement of Activities.	(6,634)
---	---------

Net changes in the net pension liability and the additions and amortization of deferred inflows and outflows related to pensions is reported in the Statement of Activities but not included in governmental funds.	215,591
---	---------

Repayment of bonds, loans, and capital leases are reported as expenditures in governmental funds, but the repayment reduces long-term liabilities in the Statement of Net Position.	1,138,520
---	-----------

Net changes in expenses reported in the Statement of Activities that do not require the use of current financial resources are not reported as expenditures in the governmental funds.	(10,160)
--	----------

Change in Net Position of Governmental Activities	\$ 1,433,487
--	---------------------

The notes are an integral part of the financial statements.

Comprehensive
Annual
Financial Report

Major Proprietary Funds

State Colleges and Universities Fund

The fund accounts for the activities of Minnesota State Colleges and Universities (MnSCU). MnSCU is a system of public state universities and two-year colleges and is the largest system of higher education in the state. While the primary activity of MnSCU is to provide educational services, the fund also includes scholarships, student loans, bookstores, student living activities, research, and long-term debt.

Unemployment Insurance Fund

The fund receives unemployment taxes collected from employers and pays unemployment benefits to eligible individuals.

Financial Report

Major Discretely Presented Component Unit Funds

Housing Finance Agency

The agency provides money for loans and technical assistance for construction and rehabilitation of housing for families of low and moderate incomes.

Metropolitan Council

The council is responsible for coordinating the planning and development of the Twin Cities metropolitan area. The council also operates the metropolitan regional sewage treatment and disposal systems and the public transit system.

University of Minnesota

The multi-campus university provides undergraduate and graduate degrees, advanced research opportunities, and an extension service. The university includes several nonprofit foundations that provide resources which benefit the university.

2016 Comprehensive Annual Financial Report
Notes to the Financial Statements

These notes provide disclosures relevant to the basic financial statements on the preceding pages.

Note 1 – Summary of Significant Accounting and Reporting Policies

Basis of Presentation

The accompanying financial statements of the state of Minnesota (the state) have been prepared to conform to generally accepted accounting principles (GAAP) as prescribed by the Governmental Accounting Standards Board (GASB). The state implemented the following GASB statements for the fiscal year ended June 30, 2016:

GASB Statement No. 72 “Fair Value Measurement and Application” was issued in February 2015. The statement addresses accounting and financial reporting issues related to fair value measurements. It provides guidance for determining a fair value measurement for financial reporting purposes and for applying fair value to certain investments and disclosures related to all fair value measurements. See Note 2 – Cash, Investments, and Derivative Instruments for further information.

GASB Statement No. 76 “The Hierarchy of Generally Accepted Accounting Principles for State and Local Governments” was issued in June 2015. The statement identifies the hierarchy of generally accepted accounting principles (GAAP) and reduces the GAAP hierarchy to two categories of authoritative GAAP. It addresses the use of authoritative and nonauthoritative literature in the event that the accounting treatment for a transaction or other event is not specified within a source of authoritative GAAP. This statement has no material impact on the state.

GASB Statement No. 78 “Pensions Provided through Certain Multiple-Employer Defined Benefit Pension Plans” was issued in December 2015. The statement amends the scope and applicability of Statement No. 68 “Accounting and Financial Reporting for Pensions” to exclude pensions provided to employees of state or local governmental employers through a cost-sharing multiple-employer defined benefit pension plan that has certain characteristics. The statement establishes requirements for recognition and measurement of pension expense, expenditures, and liabilities; note disclosures; and required supplementary information for pensions that have certain characteristics. This statement has no impact on the state.

GASB Statement No. 79 “Certain External Investment Pools and Pool Participants” was issued in December 2015. The statement addresses accounting and financial reporting for certain external investment pools and pool participants. It establishes criteria for an external investment pool to qualify for making the election to measure all of its investments at amortized cost for financial reporting purposes. This statement has no impact on the state.

GASB Statement No. 82 “Pension Issues” was issued in March 2016. The statement addresses issues raised with respect to GASB Statement No. 67 “Financial Reporting for Pension Plans,” GASB Statement No. 68 “Accounting and Financial Reporting for Pensions,” and GASB Statement No. 73 “Accounting and Financial Reporting for Pension and Related Assets That Are Not within the Scope of GASB Statement 68, and Amendments to Certain Provisions of GASB Statements 67 and 68.” These issues relate to the presentation of payroll-related measures in required supplementary information, the selection of assumptions and the treatment of deviations from the guidance in an Actuarial Standard of Practice for financial reporting purposes, and the classification of payments made by employers to satisfy plan member contribution requirements. This statement has no material impact on the state.

Financial Reporting Entity of the State of Minnesota

This report includes the state departments, agencies, institutions, and organizational units that are controlled by or dependent upon the Minnesota Legislature or its constitutional officers. The state of Minnesota, as a primary government, consists of all organizations that make up its legal entity. This report also includes other legally separate organizations as component units. GASB has established criteria for determining which organizations should be included as component units. Legally separate organizations are reported as component units if either the state is financially accountable for the organization or the nature and significance of the organization's relationship with the state are such that exclusion would cause the state's financial statements to be misleading. These criteria include the state's ability to appoint a voting majority of an organization's governing body, and either the state's ability to impose its will on that organization, or the potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the state.

Component units may be blended or discretely presented. Blended component units, although legally separate entities, are, in substance, part of the state's operations. All of the state's component units are discretely presented component units that are shown separately from the primary government. The "Component Units" column in the accompanying financial statements includes the financial data of the state's discretely presented component units. Discretely presented component units are also identified separately in the note disclosures because of their separate legal status. All discretely presented component units are presented in this report on the economic resources measurement focus and the accrual basis of accounting.

Discretely Presented Component Units

The following provides a description of the state's discretely presented component units.

- Housing Finance Agency (HFA) – HFA provides money for loans and technical assistance for constructing and rehabilitating housing for families of low and moderate incomes. The HFA board has seven members who are either heads of state departments or appointed by the governor. HFA is under the administrative control of a commissioner appointed by the governor. The state has the ability to significantly influence the programs, projects, and levels of services provided by HFA. HFA issues bonds in its own name.
- Metropolitan Council (MC) – MC is responsible for coordinating the planning and development of the seven-county metropolitan area. MC operates the public transit system and the regional sewage collection and treatment system. The governor appoints the council members, including the chair, subject to the advice and consent of the Minnesota senate. The state has the ability to significantly influence the projects and levels of services provided by MC. The regional administrator, appointed by the council, is responsible for the administration of council activities. The fiscal year for MC ends December 31.
- University of Minnesota (U of M) – U of M was established permanently by the Minnesota constitution. The state appropriates a large percentage of U of M's operating budget. The Minnesota Legislature elects the twelve-member board of regents, which governs U of M, but the state does not have direct authority over the management of the university. The state has issued debt for U of M capital projects. U of M includes several nonprofit organizations as component units.
- Agricultural and Economic Development Board (AEDB) – AEDB administers programs for agricultural and economic development. AEDB has seven members, four of whom are commissioners of state departments. The state has the ability to significantly influence the programs and projects of AEDB. AEDB controls the operations of the agriculture resource programs and loans. AEDB may issue revenue bonds for the purpose of financing development projects.

- National Sports Center Foundation (NSCF) – The Minnesota Amateur Sports Commission contracts with NSCF to operate various sports facilities, including the National Sports Center, primarily for holding youth-oriented athletic and other non-athletic functions and events. Although the facilities belong to the state, NSCF is responsible for the operating costs and certain improvements to the facilities. The commission appoints foundation board members, approves the foundation's spending budget, approves all rates and fees, and owns any reserve funds. The fiscal year for NSCF ends December 31.
- Office of Higher Education (OHE) – OHE makes and guarantees loans to qualified post-secondary students. To fund the loan program, revenue bonds are issued in OHE's name with limitations set by the Minnesota Legislature. OHE also administers the state grant program. The state provides administrative funding for these programs. The governor appoints the OHE director with the advice and consent of the senate.
- Public Facilities Authority (PFA) – PFA provides assistance to municipalities, primarily for wastewater treatment construction projects. The state provides funding and administrative services for PFA. PFA is composed of commissioners from state departments and agencies. The commissioners direct the operations of the authority and determine the funding for local government projects. PFA issues revenue bonds to make loans for wastewater treatment facilities.
- Rural Finance Authority (RFA) – RFA administers a number of state agriculture programs, including the homestead redemption program, loan restructuring program, and agricultural improvement program. The board of the authority consists of state department heads and members appointed by the governor. RFA is under the administrative control of the commissioner of the Department of Agriculture, who is a member of the board. The state has issued general obligation bond debt for RFA programs.
- Workers' Compensation Assigned Risk Plan (WCARP) – WCARP is the source of workers' compensation and employers' liability coverage for Minnesota employers unable to obtain an insurance policy through the voluntary market. WCARP operations are subject to review by the state commissioner of the Department of Commerce. The commissioner enters into administrative contracts, sets premium rates, and makes assessments. The commissioner has the authority to assess all licensed workers' compensation insurance companies doing business in Minnesota an amount sufficient to fully fund the obligations of the plan to the extent that the assets of the plan are inadequate to meet its obligations. The fiscal year for WCARP ends December 31.
- Minnesota Sports Facilities Authority (MSFA) – MSFA's mission is to provide for the construction, financing, and long-term use of a new multi-purpose stadium and related stadium infrastructure as a venue for professional football and a broad range of other civic, community, athletic, educational, cultural, and commercial activities. MSFA has five members, including a chair and two members who are appointed by the governor. The state provides administrative funding to MSFA. The fiscal year for MSFA ends December 31.

A discretely presented component unit is classified as major or nonmajor, depending on its significance relative to other component units and the nature and significance of the component unit's relationship to the primary government. HFA, MC, and U of M are classified as major component units for this report.

Additional information is available from the component unit's separately-issued financial statements. Because AEDB and RFA do not issue separately audited financial statements, the combining financial statements include a Statement of Revenues, Expenses, and Changes in Net Position and a Statement of Cash Flows for each of these component units.

Complete financial statements of the discretely presented component units may be obtained from their respective administrative offices as follows:

Housing Finance Agency 400 Sibley Street, Suite 300 St. Paul, Minnesota 55101-1998	Office of Higher Education 1450 Energy Park Drive, Suite 350 St. Paul, Minnesota 55108-5227
University of Minnesota Office of the Controller 205 West Bank Office Building 1300 South Second Street Minneapolis, Minnesota 55454-1075	Public Facilities Authority Department of Employment & Economic Development 1st National Bank Building 332 Minnesota Street, Suite W820 St. Paul, Minnesota 55101-1378
National Sports Center Foundation National Sports Center 1700 105th Avenue Northeast Blaine, Minnesota 55449-4500	Workers' Compensation Assigned Risk Plan Affinity Insurance Services, Inc. 5600 West 83 rd Street 8200 Tower, Suite 1100 Minneapolis, Minnesota 55437-1062
Metropolitan Council 390 North Robert Street St. Paul, Minnesota 55101-1805	Minnesota Sports Facilities Authority 1005 4 th Street South Minneapolis, Minnesota 55415-1752

Related Entities – These are entities for which the state is accountable because the state appoints a voting majority of the board, but for which the state does not have financial accountability. The following are related entities, but are not included in the reporting entity:

- Higher Education Facilities Authority (HEFA) – The governor appoints a majority of the board. HEFA can issue revenue bonds and notes in its name. The state has no statutory authority to affect the operations of HEFA.
- Joint Underwriting Association – The state commissioner of the Department of Commerce appoints a majority of the board. The board establishes the operating plan and determines premium rates and assessments. Membership in the association is a condition for doing business in the state.
- Metropolitan Airports Commission – The governor appoints a majority of the voting commissioners. The state has no statutory authority to directly affect the commission's activities and operations. Holders of the commission's debt instruments have no recourse against the state.
- Workers' Compensation Reinsurance Association – The state commissioner of the Department of Labor and Industry appoints, or approves the appointment of, a majority of the board. The association supports itself solely from revenues derived from premiums charged to association members. The state has no authority to affect the operations of the association.

The following organizations, which are included in the primary government, prepare and publish separate financial reports, which may contain differences in presentation resulting from differing reporting emphasis. These financial reports may be obtained directly from each organization.

Minnesota State Lottery 2645 Long Lake Road Roseville, Minnesota 55113-1117	Minnesota State Retirement System 60 Empire Drive, Suite 300 St. Paul, Minnesota 55103-1888
Public Employees Retirement Association 60 Empire Drive, Suite 200 St. Paul, Minnesota 55103-1890	Teachers Retirement Association 60 Empire Drive, Suite 400 St. Paul, Minnesota 55103-1889
State Board of Investment 60 Empire Drive, Suite 355 St. Paul, Minnesota 55103-1888	Minnesota State Colleges and Universities Financial Reporting Unit 500 Wells Fargo Place, 30 East 7 th Street St. Paul, Minnesota 55101-4914

The financial reports, available from the State Board of Investment, report on investments in investment pools, which include the majority of the state's Fiduciary Funds.

Financial Reporting Structure of the State of Minnesota

The basic financial statements include government-wide and fund financial statements. The government-wide financial statements report on the state as a whole, while the fund financial statements emphasize major individual funds and fund types. Both types of statements categorize activities as either governmental or business-type. Governmental expenditures are classified by function. Each of the state's departments and agencies is included in a functional classification based on its primary mission and objectives.

Government-wide Financial Statements

The government-wide financial statements (Statement of Net Position and Statement of Activities) display information about the state as a whole, except for its fiduciary activities. These statements include separate columns for the governmental and business-type activities of the state and its discretely presented component units. Eliminations have been made in the Statement of Activities so that certain allocated expenses are recorded only once in the function for which the expenses were made. General government expenses that benefit state agencies have not been allocated as indirect expenses to the various functions of the state, but are reported under the general government function.

The focus of the government-wide statements is on financial information of the state as an entity and the change in the overall financial position of the state as a result of the activities of the fiscal year. Government-wide financial statements are presented using the economic resources measurement focus and the accrual basis of accounting. Under the economic resources measurement focus, all economic resources and obligations of the reporting government, both current and long-term, are reported in the government-wide statements. Under the accrual basis of accounting, revenues, expenses, gains, losses, assets, and liabilities resulting from exchange and exchange-like transactions are recognized when the exchange takes place. Amounts paid to acquire capital assets are capitalized as assets in the government-wide financial statements. These amounts are reported as expenditures in the governmental fund financial statements. Long-term debt is recorded as a liability in the government-wide financial statements, rather than as an other financing source. Amounts paid to reduce long-term indebtedness of the reporting government are reported as a reduction of the related liabilities, rather than as expenditures.

In the government-wide Statement of Net Position, both the governmental and business-type activities are presented on a consolidated basis by column. The statement includes long-term assets and receivables as well as long-term debt and obligations.

The government-wide Statement of Activities reports how much of the cost of each functional category (public safety and corrections, transportation, etc.) is supported by general government revenues (sales taxes, income taxes, etc.). The Statement of Activities reduces gross expenses, including depreciation, by related program revenues, and by operating and capital grants and contributions.

Program revenues must be directly associated with, or derived directly from, the function or a business-type activity. Program revenues include: 1) charges to customers or applicants for goods, services, or privileges provided by a given function, and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function. Operating grants include operating-specific and discretionary (either operating or capital) grants, while the capital grants column reflects capital-specific grants. Program revenues are applied against program expenses in the Statement of Activities to report the net cost of each program.

General revenues normally cover the net costs (program expenses less program revenues) of all activities. Taxes represent the majority of general revenues. Internally dedicated resources are reported as general revenues, rather than program revenues.

Fund Financial Statements

Fund financial statements report on the financial operations and position of governmental, proprietary, and fiduciary funds, even though fiduciary funds are excluded from the government-wide financial statements. The emphasis in fund financial statements is on the major funds in the governmental or enterprise categories. All remaining governmental, proprietary, and fiduciary funds are aggregated and reported as nonmajor funds.

Governmental funds, including the general, special revenue, capital projects, debt service, and permanent funds, are presented on a current financial resource measurement focus and modified accrual basis of accounting in the fund financial statements. This presentation is deemed most appropriate to demonstrate compliance with legal and bond covenant requirements, the source and use of financial resources, and how the state's actual spending conforms to the budget. Because the governmental fund statements are presented using a different measurement focus and basis of accounting than used in the governmental column in the government-wide statements, reconciliations explaining the adjustments required to restate the fund-based financial statements for the government-wide governmental activities column are included.

Proprietary funds, including the enterprise and internal service funds, are presented on the economic resource measurement focus and full accrual basis of accounting in the fund financial statements. This is the same measurement focus and basis of accounting as the government-wide financial statements.

The state's fiduciary funds are presented in the fund financial statements by type (pension trust, investment trust, or agency). These assets are held for the benefit of others and cannot be used for activities or obligations of the government; therefore, the funds are excluded from the government-wide statements.

The fund financial statements are presented after the government-wide financial statements. These statements display information about major funds individually, and nonmajor funds in the aggregate, for governmental, enterprise, and internal service funds.

Classification of Funds

The financial position and results of state operations are organized using individual funds. Each fund is a separate accounting entity with a self-balancing set of accounts used to record the financial transactions and balances of that entity. Individual funds have been established as stipulated by legal provisions or by

administrative discretion. The state uses fund accounting, which is designed to demonstrate legal compliance and to segregate transactions related to certain government functions or activities.

Governmental Fund Types – These funds account for the acquisition, use, and balances of expendable financial resources and the related current liabilities. Most state operations are accounted for in this fund category. The fund types included in this category are the General Fund plus special revenue, capital project, debt service, and permanent funds.

- General Fund, which accounts for all financial resources not accounted for and reported in another fund. The Environment and Natural Resources account is one account within the General Fund. It is a permanent trust fund that was established by Minnesota Constitution, Art. XI, Sec. 14. The Constitution outlines the amount that can be appropriated each biennium. Amounts that can be authorized for expenditure are classified as restricted on the face of the statements.
- Special revenue funds, which account for revenue sources that are restricted or committed to expenditure for specific purposes other than debt service or capital projects.
- Capital project funds, which account for financial resources that are restricted, committed, or assigned to capital expenditures, including the acquisition or construction of capital facilities and other capital assets. The state's capital expenditures are reported as capital outlay, whereas capital expenditures for other entities are reported as grant expenditures. Capital project funds exclude capital-related outflows financed by proprietary funds or for assets that will be held in trust.
- Debt Service Fund, which accounts for the accumulation of resources for, and the payment of, most general obligation long-term debt principal and interest.
- Permanent Fund, which accounts for resources that are restricted to the extent that only earnings, and not principal, may be used for purposes that support the state's programs. Minnesota Constitution, Art. XI, Sec. 8 allows for the distribution of net interest and dividends to school districts. The change in investment value is recorded on the face of the financial statements as "Investment/Interest Income." Amounts that can be authorized for expenditure are classified as restricted on the face of the statements.

The state has two major governmental funds. The General Fund is the principal operating fund used to account for most of the general activities of the state. The Federal Fund is the state's only major special revenue fund. It receives and disburses federal government grants, reimbursements, recoveries, and premiums.

Proprietary Fund Types – These funds focus on determining net income, changes in net position, financial position, and cash flows. Generally accepted accounting principles, similar to those used by private sector businesses, are followed in accounting for these funds. The fund types included in this category are the enterprise and internal service funds.

- Enterprise funds account for activities that charge a fee to external users for goods or services. Activities of enterprise funds are financed and operated similarly to private business enterprises where the intent of the governing body is to recover costs primarily through user fees.
- Internal service funds account for the financing of goods or services provided by one agency to primarily other state agencies on a cost reimbursement or other basis. The activities reported as internal service funds include motor pool, central services, employee insurance, technology services, plant management, and risk management.

The state has two major enterprise funds, the State Colleges and Universities Fund and the Unemployment Insurance Fund. The State Colleges and Universities Fund accounts for the activities of the Minnesota State Colleges and Universities (MnSCU) System. MnSCU, the largest higher education

system in the state, is a system of public colleges and universities. The Unemployment Insurance Fund receives unemployment taxes collected from employers and pays unemployment benefits to eligible individuals.

Fiduciary Funds Types – These funds account for assets held by the state in a trustee capacity or as an agent for individuals, private organizations, or other governmental units. Pension trust, investment trust, and agency fund types are included in this fund category.

- Pension trust funds report retirement funds administered by independent boards for which the state has a fiduciary role.
- Investment trust funds provide an investment vehicle for entities outside the state, including various public retirement plans.
- The Agency Fund accounts for resources held in a custodial capacity for individuals, private organizations, or other governmental units. Some examples include resources held for inmates of correctional facilities or residents of veterans and group homes, sales taxes to be distributed to local governments, and child support collections to be distributed to custodial parents.

Basis of Accounting, Measurement Focus, and Fund Financial Statement Presentation

All governmental funds focus on the flow of current financial resources and use the modified accrual basis of accounting. With this measurement focus, only current assets and current liabilities are included on the balance sheet. Governmental fund operating statements present increases (revenues and other financing sources) and decreases (expenditures and other financing uses) to fund balances. Under the modified accrual basis of accounting, revenues are recognized in the period in which they become both measurable and available to finance operations of the fiscal year, or to liquidate liabilities existing at fiscal year end. The state considers receivables collected after June 30, but by the close of the books in late August, to be available, and recognizes these receivables as current year revenues in governmental funds. Individual income taxes, property taxes, sales taxes, and federal grants are the major revenue sources susceptible to accrual. Receivables not collected by the close of the books in late August are reported as deferred revenue. In addition, revenues collected in advance, including certain federal grant revenues to which the state does not yet have legal entitlement, are also reported as deferred revenue until the related commitment arises, at which time revenue is recognized. Expenditures and related liabilities are recognized when fund obligations are incurred, except for debt service, compensated absences, capital leases, pension and other postemployment benefits, and claims and judgments, which are recorded when due and expected to be liquidated with available financial resources. The following provides further detail on specific items regarding the modified accrual basis of accounting.

Tax Revenues – Tax revenues, excluding property taxes, are recognized in the period they become both measurable and available to finance expenditures of the current period. Measurable means that taxpayer liability is supported by sufficient documentation and can be reasonably estimated. The state's liability for anticipated refunds of such taxes is estimated and recorded as reductions in revenue in the period when the related tax is recognized.

Property Tax Revenues – Laws of Minnesota Special Session 2001 established a state general tax (property tax) against commercial/industrial and seasonal residential recreational properties. Counties, as agents for the state, assess the state general tax. The tax is distributed among counties by applying a uniform rate to the appropriate tax capacities in each county. Levies are determined based on the formula contained in the laws. The state preliminarily certifies the state general levy rate to each county no later than November 1 of each year for taxes payable in the following calendar year. The state certifies the final state general tax levy on January 1 of each year to each county. Property taxes are due to counties in two installments for each year – May 15 and October 15. The counties pay the state general tax to the state on three dates – June 30, December 1, and January 25 for any adjustments or changes. Property tax is recognized, net of uncollectible amounts, in the period for which the taxes are levied and the taxes are available.

Federal Revenues – Federal revenues, earned by incurring allowable obligations, are recognized at the same time the related obligation is recognized, with one exception. Trunk Highway Fund (special revenue fund) expenditures incurred by June 30, but not converted to Federal funding by the close of the federal fiscal year, are not recognized as federal revenues.

Proprietary, pension trust, and investment trust funds are accounted for using the full accrual basis of accounting. Revenues are recognized when earned, and expenses are recognized as incurred. The accrual basis of accounting is also used for contributions, benefits, and refunds paid for defined benefit and defined contribution pension plans. Agency funds use the accrual basis of accounting but do not have a measurement focus because agency funds do not recognize revenues and expenses.

Proprietary funds distinguish operating from nonoperating items. Operating revenues and expenses result from providing services or producing and delivering goods in connection with the proprietary fund's principal ongoing operations. Operating expenses for enterprise and internal service funds include the cost of sales and services, administrative expense, and depreciation of capital assets. All other revenues and expenses are reported as nonoperating items.

Cash Equivalents and Investments

Cash Equivalents – Cash equivalents are short-term, highly liquid investments having original maturities (remaining time to maturity at acquisition) of three months or less. Cash equivalents also include management pools and money market funds that are used essentially as demand deposit accounts.

Investments – Investments are reported at fair value, which is defined as the exit price at the measurement date from the perspective of a market participant that controls the asset or is obligated for the liability. During fiscal year 2016, the state implemented GASB Statement No. 72 "Fair Value Measurement and Application" which sets forth the framework for measuring the fair value of investments based on a hierarchy of valuation inputs. Investments in derivatives are generally made to manage the overall risk of the individual manager's portfolios to a level satisfactory to the investment management firm and in accordance with the firm's contract with the State Board of Investment. See Note 2 – Cash, Investments, and Derivative Instruments for additional information regarding cash, investments, and derivative instruments.

Inventories

Generally, inventories for governmental funds are recorded as expenditures when purchased and are not a resource available for appropriation. The exception primarily relates to the Trunk Highway Fund (special revenue fund) and inventories are valued using weighted-average cost. Inventories maintained by the various funds are determined by annual and periodic physical counts. Inventories of proprietary funds are valued using the first-in, first-out, average cost, or specific cost methods.

Securities Lending

Securities on loan for cash collateral and the liabilities resulting from the security lending transactions are reported on the Statement of Net Position or the Balance Sheet, as appropriate, for the particular fund type or level of reporting. Securities lending income and rebate and management fees are reported separately on the Statement of Revenues, Expenditures and Changes in Fund Balances; the Statement of Revenues, Expenses and Changes in Net Position; or the Statement of Changes in Net Position, as appropriate for the particular fund type.

Restricted Net Position

Mandatory asset segregations required by bond covenants and other external restrictions are presented in enterprise funds and discretely presented component units as restricted net position. After liabilities from restricted assets are paid, any remaining restricted assets in the enterprise funds will be used for debt service.

Income Tax Credits

The Minnesota Department of Revenue processes several types of tax credits through the individual income tax system. For financial reporting purposes, income tax credits that are limited by the amount of the individual's tax liability (before considering such credits) are reported as revenue reductions. In contrast, credits for Education, Working Family, and Child and Dependent Care may be received even if they exceed the individual's tax liability. These types of credits are reported as expenditures, rather than revenue reductions, because the income tax system is, essentially, being used as a filing and payment mechanism to make grant payments to individuals.

Grant Expenditures and Liabilities Recognition

Grants are defined as nonexchange transactions because the state gives (or receives) value to another party without receiving (or giving) equal value in return. Grants are normally paid on either a reimbursement basis or an entitlement basis.

Reimbursement type grants may be awarded for specific services provided to eligible recipients, or may be made for eligible types of reimbursements. Grants paid on the reimbursement basis are recognized as expenditures and liabilities in the year in which the grantee incurs the costs of providing specific services to eligible recipients or makes eligible types of expenditures.

Entitlement type grants may be based on services provided by the grantee. The intent of the grant is to help fund such services, but the grant amount is not based on the cost of providing the service(s). Expenditures and the related liabilities for these types of entitlement grants are recognized as the service is provided if the amount owed can be reasonably estimated soon after the end of the state's fiscal year. Other types of entitlement grants are not based on the services provided or action taken by the grantee. Expenditures and the related liabilities for these types of grants are recognized in the fiscal year in which the resources were appropriated.

Compensated Absences

State employees accrue vacation leave, sick leave, and compensatory leave at various rates within limits specified in the collective bargaining agreements. Leave balances are liquidated in cash only upon termination from state employment. The current and noncurrent compensated absences liabilities for governmental funds are reported only in the government-wide Statement of Net Position. All other fund types report the liability for compensated absences as a liability of the specific fund.

Capital Assets

Capital assets, which include land, buildings, equipment, infrastructure, intangible assets, and art and historical treasures, are reported in the government-wide financial statements and the fund financial statements for proprietary and fiduciary funds. Capital assets are generally defined by the state as assets with an initial, individual cost of more than \$300,000 for buildings, \$30,000 for equipment, \$300,000 for infrastructure, \$30,000 to \$2,000,000 for internally generated computer software depending on the fund and fund type, and \$30,000 for art and historical treasures. All land and easement assets are capitalized, regardless of cost. Capital assets must also have an estimated useful life of two or more years.

Capital assets are recorded at cost or, for donated assets, at fair value at the date of acquisition. An inventory of land and buildings was completed in 1985. Historical cost records for older capital assets are incomplete or not available; therefore, estimated historical costs have been used in these situations. Permanent School Fund (permanent fund) land is reported at estimated historic cost. The land included in the Permanent School Fund was granted to the state by the federal government in connection with the state being admitted to the United States. Tax forfeited land is not included in land inventory because the state does not take permanent title. When the land is sold, proceeds are distributed to local jurisdictions.

Capital assets are depreciated using the straight-line method generally based on the following useful lives: 20-50 years for buildings, 20-50 years for large improvements, 3-10 years for small improvements,

3-12 years for equipment, 3-10 years for internally generated computer software, and 20-50 years for easements. Transportation infrastructure assets using the modified approach, land, construction and development in progress, permanent easements with indefinite useful lives, and works of art and historical treasures, such as the state capitol, are not depreciated.

GASB Statement No. 34 “Basic Financial Statements – and Management’s Discussion and Analysis – for State and Local Governments” allows an alternative (modified) approach to the recording of infrastructure assets in which costs to maintain and preserve these assets are expensed in lieu of depreciation. The transportation infrastructure capital assets of pavement and bridges are reported using the modified approach. In electing to use this option for transportation infrastructure, the state uses an asset management system which establishes minimum standards and determines, at least every three years, whether the minimum standards are being met. Disclosures of the minimum standards and the current status of the state’s pavement and bridges are included in Required Supplementary Information Modified Approach for Infrastructure. See Note 6 – Capital Assets for further information on capital assets.

Current and Noncurrent Assets

At the government-wide level, assets are classified as either current or noncurrent. Governmental activity current assets are those considered available for appropriation and expenditure and include cash, various receivables, and short-term investments. Current assets in business-type activities are those that are available or can readily be made available to meet the cost of operating or to pay current liabilities. All other assets are considered noncurrent. Assets are classified as current or noncurrent in proprietary funds, but assets are not classified at the fund level for governmental funds.

Deferred Outflows of Resources

Contributions to pension plans subsequent to the measurement date of the net pension liability and before the fiscal year end are reported as deferred outflows of resources. In addition, amounts related to the increases in the net pension liability due to changes in assumptions, changes in the primary government’s proportionate share of the net pension liability, differences between expected and actual experience, and net differences between projected and actual investment earnings are reported as deferred outflows of resources. These amounts are amortized as pension expense over the average of the expected remaining service lives of all employees of the applicable pension plan, with the exception of the difference between projected and actual earnings, which is amortized over five years.

Current and Noncurrent Liabilities

In the government-wide financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities or business-type activities column. Long-term liabilities are the amount of liabilities not due and payable during the fiscal year resulting from debt issuances, compensated absences, closure and postclosure care for landfills, workers’ compensation claims, supplementary and second injury benefit claims, pollution remediation obligations, capital leases, net pension, other postemployment benefits, and arbitrage rebate requirements. In proprietary fund statements, these liabilities are reported as liabilities of each individual fund.

In the fund financial statements, governmental fund types recognize bond premiums and discounts during the current period. The face amount of the debt issued is reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures. In the government-wide financial statements, bond premiums and discounts are deferred and amortized over the life of the bonds using the straight-line method.

See Note 12 – Long-Term Liabilities – Primary Government for further information.

Deferred Inflows of Resources

In the governmental funds, when an asset is recorded but the revenue is not available, the amount is reported as a deferred inflow of resources until the revenue becomes available. Amounts that are not permitted to be used until the next fiscal year remain as deferred inflows of resources in the government-wide statements. In addition, differences between the reacquisition price and the net carrying amounts on refunding general obligation bonds as well as the adjustments to the lease obligations on a capital lease restructuring due to the refunding of the debt by the lessor are reported as a deferred inflow of resources on the government-wide financial statements. These amounts are amortized as interest expense over the shorter of the remaining life of the old debt or the life of the new debt. Amounts related to the decreases in the net pension liability due to changes in assumptions, changes in the primary government's proportionate share of the net pension liability, differences between expected and actual experience, and net differences between projected and actual investment earnings are reported as deferred inflows of resources. These amounts are amortized as pension expense over the average of the expected remaining service lives of all employees of the applicable pension plan, with the exception of the difference between projected and actual earnings, which is amortized over five years.

Deferred Compensation Plan

The state offers a deferred compensation plan created in accordance with Internal Revenue Service Code, Section 457. The State Deferred Compensation Fund (pension trust fund) represents the value of all assets of the plan. The plan is available to all public employees in the state and is administered by the Minnesota State Retirement System. Under this plan, compensation is deferred for income tax purposes in accordance with Section 457 and is not available to employees until termination, retirement, death, or unforeseeable emergency. In accordance with state statute, effective July 1, 1997, contributions are held for the exclusive benefit of the participants and their beneficiaries. These amounts are held in trust, in custodial accounts, or in qualifying contracts, as required by federal law. The State Board of Investment determines the investment options available to plan participants and oversees the activities of the investment managers. The majority of the assets of the plan are invested in various mutual funds. The state is not liable for any investment losses under the plan.

Net Position/Fund Balances and Fund Balance Classification Policies and Procedures

The difference between fund assets and liabilities is "Net Position" on the government-wide, proprietary, and fiduciary fund statements and "Fund Balances" on governmental fund statements.

Net Investment in Capital Assets consists of capital assets, net of accumulated depreciation and reduced by the outstanding balances of bonds, mortgages, notes, or other debt attributable to the acquisition, construction, or improvement of such assets as well as deferred outflows of resources and deferred inflows of resources that are attributable to the acquisition, construction, or improvement of these assets or related debt. Significant unspent related debt proceeds are included in Restricted for Capital Projects.

Restricted Net Position represents the portion of net position that is constrained either externally by parties such as creditors or grantors, or legally through constitutional provisions or enabling legislation. Restricted net position is determined at the fund level. For a fund with more than one revenue stream, restricted net position is determined by the materiality of any restricted revenues in the fund. When both restricted and unrestricted net position are available for use, the state policy is to use restricted resources first.

In the fund financial statements, governmental funds report fund balance classifications that comprise a hierarchy based primarily on the extent to which the state is bound to honor constraints on the specific purposes for which amounts in those funds can be spent. Fund balance is reported as restricted when constraints placed on the use of the resources are either externally imposed by creditors, grantors, contributors, or laws or regulations of other governments; or, imposed by law through constitutional provisions or enabling legislation. Amounts that can only be used for specific purposes pursuant to constraints imposed by the Minnesota Legislature by passing a bill, which is signed by the Governor, are reported as committed fund balance. Those committed amounts cannot be used for any other purpose

unless the Minnesota Legislature removes or changes the specified use by taking the same type of action it employed to commit those amounts. Amounts that are constrained by the state's intent to be used for specific purposes, but are neither restricted nor committed, are classified as assigned fund balances. Intent is expressed by agency heads to whom the Governor has delegated the authority to assign amounts to be used for specific purposes. Unassigned fund balance represents fund balance that has not been assigned to other funds and that has not been restricted, committed, or assigned to specific purposes within the General Fund. Nonspendable fund balances include amounts that cannot be spent because they are either not in spendable form or legally or contractually required to be maintained intact.

The state's policy is that restricted amounts are spent first when expenditures are incurred for purposes for which both restricted or unrestricted (committed, assigned, or unassigned) amounts are available. Within unrestricted fund balance, the state's policy is that committed amounts are reduced first, followed by assigned amounts, and then unassigned amounts when expenditures are incurred for purposes for which amounts in any of those unrestricted fund balance classifications could be used.

Budgeting and Budgetary Control

The state operates on a two-year (biennial) budget cycle ending on June 30 of odd-numbered years. Appropriations in the biennial budget are usually for a single year; however, where specified, single year appropriations may be carried forward to the following year of the biennium. The governor's budget for the biennium is developed by Minnesota Management and Budget and presented to the Minnesota Legislature for approval. Specific appropriations are required for the majority of the expenditures from the General Fund. The accounts not requiring specific appropriations are considered perspective differences in the budgetary basis vs. GAAP reconciliation. Specific appropriations are also required for all special revenue funds except the Federal, Municipal State-Aid Street, County State-Aid Highway, Douglas J. Johnson Economic Protection Trust, Endowment, and Miscellaneous Special Revenue funds. Some appropriations are "open appropriations" for entitlement type and some interfund transfer programs. In these cases, the amount that is needed to fulfill the obligation for the fiscal year is made available. There is no limit on the amount that can be expended for the program. Estimates of the amount needed for such programs are included in the budget forecast.

Budgetary control is essentially maintained at the departmental level except for certain programs where control is at the program level. In most departments, upon notifying the governor and legislative leadership, department heads are permitted to revise budgets by transferring amounts between programs within their departments.

Unencumbered appropriation balances generally cancel to the fund at the end of the fiscal year. However, if specifically provided by law, or if statutory authority is invoked by the agency, the unencumbered balance may be carried forward between fiscal years. The accounting system maintains two separate ledgers. One is maintained primarily on a modified cash basis of accounting with certain accrual information and represents the starting point for the financial statements. The second ledger tracks information on a budgetary basis of accounting, which approximates a cash basis with the exception that, at year-end, encumbered amounts are included as expenditures of the year appropriated for budgetary reporting. The budget ledger controls expenditures by appropriation line item as established in the legally adopted appropriation bills. A separate report showing the detail of legal level of budgetary control and actual expenditures is available from Minnesota Management and Budget.

Interfund Activity and Balances

Generally, internal service fund activity has been eliminated from the government-wide statements. Internal service fund activity from external customers is reported under governmental activities in the government-wide statements. Interfund receivables and payables have been eliminated from the government-wide Statement of Net Position, except for residual amounts between governmental and business-type activities. See Note 5 – Interfund Transactions for additional information.

Note 2 – Cash, Investments, and Derivative Instruments

Primary Government

Cash and Cash Equivalents

The majority of the primary government's cash is held in the state treasury and commingled in state bank accounts, while the majority of component unit cash is held in separate bank accounts. Cash in individual funds may be invested separately where permitted by statute; however, cash in most funds is invested as part of an investment pool. A fund's investment with the primary government's cash pools is reported as a cash equivalent. Where provided by statute, investment earnings of the primary government's pools are allocated to the individual funds. Earnings for all other participants are credited to the General Fund.

Deposits

Minnesota Statutes, Section 9.031, requires that deposits be secured by depository insurance or a combination of depository insurance and collateral securities held in the state's name by an agent of the state. The statute further requires that the insurance and collateral shall be in an amount sufficient to ensure that the deposits do not exceed 90 percent of the sum of the insured amounts and the fair value of the collateral.

Investments

The State Board of Investment (SBI) manages the majority of the state's investments. All investments undertaken by SBI are governed by the standards codified in Minnesota Statutes, Chapters 11A and 356A. Minnesota Statutes, Section 11A.24, broadly restricts investments of the primary government to obligations and stocks of United States and Canadian governments, their agencies and registered corporations, other international securities, short-term obligations of specified high quality, restricted participation as a limited partner in venture capital, real estate, or resource equity investments, and restricted participation in registered mutual funds.

Funds not invested by SBI are primarily from the Minnesota State Colleges and Universities. Investments for these funds must also conform to the above statutes and may be further restricted by bond indentures.

Generally, when applicable, the statutes limit investments to those rated by a nationally recognized rating agency within the top four quality ratings categories. The statutes further prescribe the maximum percentage of fund assets that may be invested in various asset classes and contain specific restrictions to ensure the quality of the investments.

SBI is authorized to establish, and has established, combined investment funds used by participating public retirement and nonretirement funds. Retirement and nonretirement funds may not be commingled. Each investment fund has its own characteristics, including investment objective and risk characteristics. Within statutory requirements and based on detailed analyses of each fund, SBI has established investment guidelines and benchmarks for all funds under its management. These investment guidelines and benchmarks are tailored to the particular needs of each fund and specify investment objectives, risk tolerance, asset allocation, investment management structure, and specific performance standards.

Investment Derivative Instruments

Minnesota Statutes, Section 11A.24, provides that any agreement for put and call options and futures contracts may only be entered into with a fully offsetting amount of cash or securities. This provision applies to foreign currency forward contracts used to offset the currency risk of a security. All other derivatives are exchange traded. The purpose of the SBI derivative activity is to equitize cash in the portfolio, to adjust the duration of the portfolio, or to offset current futures positions.

The cash inflows, cash outflows, and changes in fair value of investment derivatives are reported as investment income. The June 30, 2016, fair value of investment derivatives is reported as investments.

Synthetic Guaranteed Investment Contract (SGIC): SBI maintains a fully benefit-responsive SGIC for the Supplemental Investment Pool - Fixed Interest Account of the pension trust and investment trust funds' portfolio. The investment objective of the Fixed Interest Account is to protect investors in defined contribution and deferred compensation plans from loss of their original investment and to provide a competitive interest rate. On June 30, 2016, the SGIC had a portfolio of well diversified high quality investment grade fixed income securities with a fair value of \$1,418,560,000 that is \$40,433,000 in excess of the value protected by the wrap contract. The Fixed Income Account also includes a liquid investment pool with a fair value of \$166,470,000.

The following table summarizes, by derivative type, the investment derivative activity and June 30 positions for fiscal year 2016:

Primary Government Derivative Activity for the Year Ended June 30, 2016 By Derivative Type (In Thousands)			
	Change in Fair Value	Year End Notional Amount	Year End Fair Value
Governmental Activities:			
Futures	\$ 2,263	\$ 37	\$ -
Fiduciary Activities:			
Futures	\$ (34,887)	\$ (322,895)	\$ -
Futures Options Bought	(3,679)	-	-
Futures Options Written	2,602	(269)	(128)
FX Forwards	8,461	288,554	3,982
Warrants/Stock Rights	(358)	2,421	1,284
	<u>\$ (27,861)</u>	<u>\$ (32,189)</u>	<u>\$ 5,138</u>

Credit Risk: Minnesota is exposed to credit risk through five counter parties in foreign currency forward (FX Forward) contracts used to offset the currency risk of a security. The state's FX Forward counter parties combined exposes the state to a maximum loss of \$6,754,000 should these counter parties fail to perform. These counter parties have Standard & Poor's (S&P) credit ratings of BBB+ or better. The primary government, excluding pension and investment trust funds, had no exposure to counter party risk.

Foreign Currency Risk: Currency futures and foreign stock index futures are exposed to foreign currency risk. Their currency risks are included in the investment Foreign Currency Risk schedule of this note.

Component Unit Derivative Activity: Derivative activity of the state's component units is disclosed in the last section of this note.

Credit Risk of Debt Security Investments

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations to the holders of the investment. Minnesota Statutes limit investments in debt securities to the top four quality ratings categories by a nationally recognized rating agency. SBI may also invest in unrated corporate obligations or in corporate obligations that are not rated among the top four quality categories provided that:

Unrated Corporate Obligations

- Aggregate value of these obligations may not exceed 5 percent of the fund for which the state board is investing;
- SBI's participation is limited to 50 percent of a single offering; and
- SBI's participation is limited to 25 percent of the issuer's unrated obligations.

Corporate Stock

- Aggregate value of corporate stock may not exceed 85 percent of the market or book value, whichever is less, of a fund.
- Generally, investment in corporate stock may not exceed 5 percent of the total outstanding shares of any one corporation.

Interest Rate Risk – Investments

Interest rate risk is the risk that changes in interest rates of debt investments will adversely affect the fair value of an investment. The state does not have a policy on interest rate risk. The contracts between SBI and investment managers contain the guidelines and limitations regarding interest rate risk. Debt securities are constrained around the quality rating, sector mix, and duration of the Barclays Capital U.S. Aggregate Bond index. Interest rate risk information is presented using the weighted average maturity method, which expresses investment time horizons, the period when investments become due and payable in years or months, weighted to reflect the dollar size of individual investments within investment type.

Fair Value Reporting

GASB Statement No. 72 "Fair Value Measurement and Application" sets forth the framework for measuring the fair value of investments based on a hierarchy of valuation inputs. The statement defines fair value as the exit price at the measurement date from the perspective of a market participant that controls the asset or is obligated for the liability. The hierarchy has three levels:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity can access at the measurement date.

Level 2: Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Inputs for Level 2 include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability; or
- Inputs derived principally from, or corroborated by, observable market data by correlation or other means.

Level 3: Unobservable inputs for the asset or liability. Unobservable inputs reflect SBI's assumptions about the inputs that market participants would use in pricing an asset or liability.

Net Asset Value (NAV) per share, or its equivalent, is the measurement used for investments that do not have a readily determinable fair value as a practical expedient. These investments are not classified in the fair value hierarchy.

All non-cash investments, including derivative investments that are not hedging derivatives, are required to be measured at fair value on a recurring basis. SBI maintains investment pools in which participants can invest where participants own a proportionate share of the investment pools. The fair value of the investment pools is priced daily by the SBI custodian, when a daily price is available, by using independent pricing sources.

Level 3 investments primarily consist of assets where the asset is distressed or there is not an active market. The fair value of the assets measured at NAV have been determined using the March 31, 2016, values, adjusted for cash flows. The investments measured at NAV are typically not eligible for redemption. Distributions are received as underlying investments within the funds are liquidated, which occur over the life of the investment. Cash and short-term investments are not leveled under GASB 72.

To the extent available, SBI investments are recorded at fair value as of June 30, 2016. SBI has 21 investments that are valued at NAV that are currently in the liquidation mode, totaling 1.5 percent of the NAV value. SBI has a total of \$5,412,991,000 in unfunded commitments to the investments valued at NAV.

The state does not have a credit risk policy that is more stringent than the statutory requirements. The contracts between SBI and investment managers include guidelines or limitations regarding credit risk. The exposure to credit risk is based on the lower of S&P or Moody's Quality Ratings. For clarity of reporting, Moody's ratings are displayed in this exhibit using the comparable S&P rating.

Concentration of Credit Risk – Investments

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer. The state does not have a formal policy regarding concentration of credit risk for rated corporate debt securities that are among the top four quality categories. For other types of investments, Minnesota Statutes, Section 11A.24, established investment parameters which are outlined in the "Credit Risk of Debt Security Investments" section of this note. SBI determined the concentration of credit risk based on security identification number.

The state did not have exposure to a single issuer that equals or exceeds five percent of the overall portfolio as of June 30, 2016, and therefore, there is no concentration of credit risk.

Foreign Currency Risk – Investments

Foreign currency risk is the risk that changes in currency exchange rates will adversely affect the fair value of an investment or a deposit. SBI has established guidelines to be used by investment managers for international investing. Under these guidelines, countries are categorized based on a country's legal structures and standings regarding worker and human rights issues. Managers may invest in countries with legal structures that generally respect the rights of workers and human rights without additional notification of SBI. Investment managers who wish to invest in other countries must either notify SBI in writing or appear before SBI, depending on the country involved. Managers with authority to invest in foreign securities are given authority to hedge foreign currency through forward contracts to avoid currency losses.

The primary government, excluding pension trust and investment trust funds, had no exposure to foreign currency risk as of June 30, 2016. The following table shows the foreign currency risk for the pension trust and investment trust funds.

Pension Trust and Investment Trust Funds

Custodial Risk – Investments

Custodial risk for investments is the risk that, in the event of a failure of the counterparty, the state will not be able to recover the value of the investment or collateral securities that are in the possession of an outside party. Investments are held in the state's name and collateral for repurchase agreements is held in the state's name by third party agents. The primary government does not have a formal policy for custodial credit risk.

Securities Lending

Minnesota Statutes do not prohibit the state from participating in securities lending transactions. The state has, by a Securities Lending Authorization Agreement, authorized State Street Bank and Trust Company (State Street) to act as agent in lending state securities to approved borrowers. State Street, as agent, enters into Securities Loan Agreements with borrowers.

During the fiscal year, State Street lent, on behalf of the state, certain securities held by State Street as custodian and received cash or other collateral including securities issued or guaranteed by the United States government. State Street does not have the ability to pledge or sell collateral securities absent a borrower default. Borrowers were required to deliver collateral for each loan in amounts equal to at least 100 percent of the fair value of the loaned securities.

Pursuant to the Securities Lending Authorization Agreement, State Street had an obligation to indemnify the state in the event of default by a borrower. There were no failures by any borrower to return loaned

securities or pay distributions thereon during the fiscal year that resulted in a declaration or notice of default of the borrower.

During the fiscal year, the state and the borrowers maintained the right to terminate securities lending transactions upon notice. The cash collateral received on each loan was invested in a collective investment pool. As of June 30, 2016, such investment pool had an average duration of 12.39 days and an average weighted maturity of 88.83 days for USD collateral.

Because the loans were terminable at will, their duration did not generally match the duration of the investments made with cash collateral. On June 30, 2016, the state had no credit risk exposure to borrowers because the amounts the state owed the borrowers exceeded the amounts the borrowers owed the state.

The fair value of collateral held and the fair value of securities on loan for the state as of June 30, 2016, were \$14,769,029,000 and \$14,248,837,000, respectively. Securities received as collateral for which the state does not have the ability to pledge or sell unless the borrower defaults are not reported as assets and liabilities in the Statement of Net Position. Cash collateral of \$8,463,536,000 is reported in the Fiduciary Funds Statement of Net Position as an asset and correspondingly on the statement as a liability. Some component units that are allocated a portion of the collateral have a December 31 year end.

Component Units

Housing Finance Agency

As of June 30, 2016, the Housing Finance Agency (HFA) had \$530,172,000 of cash and cash equivalents and \$1,715,288,000 of investments. As of June 30, 2016, \$525,590,000 of deposits and \$1,626,869,000 of investment securities were subject to custodial credit risk. HFA investments have weighted average maturities ranging from under one month (certificates of deposit) to 1.8 – 27.7 years.

HFA cash equivalents included \$4,585,000 of investment agreements, which are generally uncollateralized interest-bearing contracts.

HFA investments had an estimated fair value of \$1,715,288,000 as of June 30, 2016. Included in these investments were \$10,520,000 in U.S. Treasuries (not rated), and \$1,580,201,000 in U.S. Agencies having an S&P rating of AA+ and Moody's Investors Services rating of Aaa. An additional \$31,565,000 in municipal debt investments had an S&P rating of AA and Moody's Investors Services rating of Aa2.

HFA measured the fair value of its investments using the three-tier hierarchy of input quality specified by GASB Statement No. 72 "Fair Value Measurement and Application." HFA measured investments of \$65,386,000 and \$1,556,899,000 using Level 1 and Level 2 inputs, respectively. The remaining investments of \$93,003,000 related to premiums/discounts and unrealized appreciation/depreciation.

HFA had investments in single issuers as of June 30, 2016, excluding investments issued or explicitly guaranteed by the U.S. Government, that exceeded five percent or more of total investments. These investments of \$408,292,000 were issued by Federal National Mortgage Association.

HFA entered into interest rate swap agreements that were considered to be derivative instruments under GASB Statement No. 53 "Accounting and Financial Reporting for Derivative Instruments." These interest rate swap agreements have been determined to be effective hedges and were reported at fair value as of June 30, 2016, as a liability called "Interest Rate Swap Agreements." The inception-to-date change in fair value as of June 30, 2016, was reported in "Accumulated Decrease in Fair Value of Hedging Derivatives" deferred outflows of resources.

As of June 30, 2016, HFA had four and seven interest rate swap agreements with counterparties the Bank of New York Mellon and Royal Bank of Canada for total notional amounts of \$46,765,000 and \$143,830,000 having fair values of (\$3,206,000) and (\$8,558,000), respectively. For these counterparties,

the fair values for the fiscal year ended June 30, 2016, increased \$773,000 and decreased \$1,177,000, respectively.

The fair value of the swap represents HFA's potential exposure to credit risk. The counterparties, the Bank of New York Mellon and Royal Bank of Canada, have been rated by Moody's as Aa1 and Aa3, respectively, and by S&P as AA- and AA-, respectively.

All swaps are pay-fixed/receive-variable with initial notional amounts that matched the original principal amounts and have terms which reduce the notional amounts to approximately follow the anticipated reductions in outstanding principal. HFA has also purchased the right, generally based upon a 300 percent PSA prepayment rate (the standard prepayment model of the Security Industries and Financial Market Association) on the underlying mortgage loans, to further reduce the notional balances of the swaps as necessary to match outstanding principal amounts of the associated bonds. HFA also has the right to terminate outstanding swaps in whole or in part at any time if it is not in default. The swap contracts may also be terminated by the counterparties but are generally limited to HFA payment default or other HFA defaults that remain uncured for 30 days.

The variable rate HFA pays on its bonds resets weekly, but the variable rate received on its swaps is based upon a specified percentage of the one-month taxable LIBOR rate or the SIFMA index rate. This exposes HFA to basis risk (the risk that the rates do not equal), and this risk will vary over time due to inter-market conditions.

HFA assumes the risk that changes in the tax code may vary from the historical long-term relationship between taxable and tax-exempt short-term interest rates for economic reasons.

Metropolitan Council

As of December 31, 2015, the Metropolitan Council (MC), had \$318,967,000 in cash and cash equivalents and \$596,608,000 in investments. Of this amount, \$809,222,000 was subject to rating. Using the Moody's Investors Services rating scale, \$599,978,000 of these investments were rated Aaa, while \$209,244,000 were not rated. U.S. Treasury State and Local Government Securities (SLGS) of \$67,134,000 and net outstanding checks of \$39,219,000 comprise the remaining cash and investment amount.

MC has investment policies to address its various types of investment risks. Several MC investment holdings are subject to custodial credit risk. Of the \$206,663,000 U.S. agency investments, MC has a custodial credit risk exposure of \$2,016,000 because the related securities are held by a custodial agent in the broker's name.

MC measured the fair value of its investments using the three-tier hierarchy of input quality specified by GASB Statement No. 72 "Fair Value Measurement and Application." MC measured investments of \$223,100,000 and \$470,457,000 using Level 1 and Level 2 inputs, respectively. MC measured another \$182,799,000 of investments at the net asset value, while the remaining \$39,219,000 was cash and cash equivalents.

MC has adopted a simulation model of reporting investment sensitivity to fluctuation in interest rates. Assumptions are made of interest rate changes of 50, 100, 150, and 200 basis points with interest rate changes occurring on December 31, 2015. The investment portfolio has an average yield of 1.29 percent, modified duration of 2.67 years, effective duration of 1.80 years, and convexity of -0.45.

The following table presents the estimated fair value of MC investments subject to interest rate risk using the simulation model.

Major Component Unit Metropolitan Council Fair Value of Investments As of December 31, 2015 (In Thousands)	
	Estimated Fair Value
Fair Value of Portfolio Before Basis Point Increase	\$ 918,322
Fair Value of Portfolio After Basis Point Increase of:	
50 Points	\$ 831,867
100 Points	\$ 826,878
150 Points	\$ 821,731
200 Points	\$ 816,657

MC has used commodity futures as an energy forward pricing mechanism (EFPM) permitted by Minnesota Statutes, Section 473.1293. Statutorily, MC may not hedge more than 100 percent of the projected consumption of any of its commodities and only up to 23 months into the future. Since 2004, MC has hedged most of its annual diesel fuel consumption. The hedging transactions are separate from fuel purchase transactions. For calendar year 2015, MC performed a statistical analysis and determined that the liquidated hedges were essentially effective.

As of December 31, 2015, MC had 314 New York Mercantile Exchange (NYMEX) heating oil futures contracts (13.2 million gallons) acquired from May 13, 2014, through December 29, 2015, to terminate on dates from January 29, 2016, through October 31, 2017. As of December 31, 2015, the heating oil futures contracts had a fair value of \$17,554,000.

MC is using NYMEX heating oil futures to hedge diesel fuel consumption. MC will be exposed to basis risk if the prices significantly deviate from each other. Historically, there has been a strong correlation between the two products.

University of Minnesota

As of June 30, 2016, the University of Minnesota (U of M), including its discretely presented component units, had \$565,942,000 of cash and cash equivalents and \$4,602,669,000 of investments. U of M's discretely presented component units do not classify investments according to risk because these entities prepare their financial statements under standards set by the Financial Accounting Standards Board. Excluding discretely presented component units, U of M reported cash and cash equivalents of \$457,807,000 and investments of \$2,129,446,000.

As of June 30, 2016, U of M's bank balance of \$342,898,000 was uninsured and uncollateralized.

U of M maintains centralized management for substantially all of its cash and investments. The Board of Regents establishes U of M's investment policies and objectives. U of M uses internal investment pools designed to meet respective investment objectives within established risk parameters for each pool.

U of M has established policies to address the various types of investment risks. U of M uses S&P ratings and duration as a measure of a debt investment's exposure to fair value changes arising from changing interest rates. As of June 30, 2016, \$1,414,309,000 of investment in securities was subject to quality rating and interest rate risk. This amount was rated as follows:

- \$1,209,226,000 was rated AA or better
- \$173,240,000 was rated BBB to A
- \$31,843,000 was not rated

The securities subject to interest rate risk were comprised of the following:

- \$656,037,000 in government agencies with weighted average maturities of 1.0 to 1.7 years
- \$103,372,000 in mortgage-backed securities with a weighted average maturity of 18.9 years
- \$343,637,000 in cash and cash equivalents with a weighted average maturity of 0.0 years
- \$279,420,000 in mutual funds with a weighted average maturity of 5.4 years

As of June 30, 2016, U of M had \$242,036,000 of equity investments subject to foreign currency risk. The two largest components of this amount are \$73,976,000 in Euro Currency and \$39,564,000 in Japanese Yen.

U of M measured the fair value of its investments using the three-tier hierarchy of input quality specified by GASB Statement No. 72 "Fair Value Measurement and Application." MC measured investments of \$317,989,000; \$821,951,000; and \$3,704,000 using Level 1, 2 and 3 inputs, respectively. U of M measured another \$985,802,000 of investments at the net asset value.

As of June 30, 2016, U of M has one pay-fixed, receive-variable swap that is considered ineffective. At June 30, 2016, the total fair value was (\$3,677,000), with changes in fair value reported as investment income.

U of M is exposed to interest rate risk and termination risk upon default of the other party.

Note 5 – Interfund Transactions

Primary Government

During normal operations, the state processes routine transactions between funds, including loans, expenditures, and transfers of resources for administrative and program services, debt service, and compliance with legal mandates.

In the fund financial statements, these transactions are generally recorded as transfers in/out and interfund receivables/payables. Transfers generally represent legally authorized transfers between funds authorized to receive revenue and funds authorized to make expenditures, and do not represent reimbursement of expenditures.

Nonmajor Enterprise Funds	<u>\$ -</u>	<u>\$ 6</u>
Total Primary Government	<u>\$ 65,561</u>	<u>\$ 60,973⁽¹⁾</u>
⁽¹⁾ Due to Component Units on the Government-wide Statement of Net Position totals \$68,790 and includes \$7,817 of loans payable to the Public Facilities Authority (component unit) that are not fund level liabilities.		

The Due To Primary Government balance exceeds the Due From Component Units balance by \$4,009,000 because the Metropolitan Council, the Workers' Compensation Assigned Risk Plan, the National Sports Center Foundation, and the Minnesota Sports Facilities Authority use a different fiscal year end than the primary government. The \$51,253,000 difference between the Due From Primary Government balance and the Due To Component Units balance is also due to these different fiscal year ends as well as the \$7,817,000 loans payable disclosed above.

⁽¹⁾ The beginning balance has been restated for the prior period adjustment.				

Prior Period Adjustment Governmental Activities: During fiscal year 2016, land increased by \$93,347,000 resulting in a prior period adjustment. This increase was attributable to the capitalization of donated land that was previously unrecorded and adjusting for land that was disposed of at fair value rather than at cost.

Capital outlay expenditures in the governmental funds totaled \$1,173,989,000 for fiscal year 2016. Donations of general capital assets received during fiscal year 2016 were valued at \$20,484,000. Transfers of \$265,164,000 were primarily from construction in progress for completed projects. Internal service funds additions were \$30,798,000.

General capital assets purchased with resources provided by outstanding capital lease agreements in governmental activities as of June 30, 2016, consisted of buildings with a cost of \$180,050,000.

Note 8 – Pension and Investment Trust Funds

Primary Government Administered Plans

The state performs a fiduciary role for several pension trust funds. For some of these funds, the state contributes as an employer and/or a non-employer contributing entity, and performs only a fiduciary role for other funds. These trust funds are categorized as either defined benefit or defined contribution (pension trust funds) or investment trust funds.

Three plan administrators, who prepare and publish their own stand-alone comprehensive annual financial reports, including financial statements and required supplementary information, and Minnesota State Colleges and Universities (MnSCU), which publishes a stand-alone pension statement, provide the pension fund information. Each plan administrator accounts for one or more pension plans. Copies of these reports may be obtained directly from the organizations listed below.

Plan Administrator	Plans Covered
Minnesota State Retirement System (MSRS)	State Employees Retirement Fund Correctional Employees Retirement Fund Judges Retirement Fund Legislators Retirement Fund State Patrol Retirement Fund Hennepin County Supplemental Retirement Fund Health Care Savings Fund Unclassified Employees Retirement Fund Minnesota Deferred Compensation Fund
Public Employees Retirement Association (PERA)	General Employees Retirement Fund Police and Fire Fund Public Employees Correctional Fund Volunteer Firefighter Retirement Fund Defined Contribution Fund
Teachers Retirement Association (TRA)	Teachers Retirement Fund
Minnesota State Colleges and Universities	State Colleges and Universities Retirement Fund

See Note 1 – Summary of Significant Accounting and Reporting Policies for addresses of MSRS, PERA, and TRA. The address for MnSCU is included in the “Defined Contribution Funds” section of this note.

Basis of Accounting and Valuation of Investments

The plan administrators prepare financial statements using the accrual basis of accounting which is the basis used to determine the fiduciary net position used by the plans. Member and employer contributions are recognized in the period in which they are earned and become due. Expenses are recognized when the liability is incurred. Benefits and refunds are recognized when due and payable in accordance with the statutory terms of each plan.

During fiscal year 2016, the state implemented GASB Statement No. 72 “Fair Value Measurement and Application.” This statement addresses accounting and financial reporting issues related to fair value measurements. Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 2 – Cash, Investment, and Derivative Investments for more information.

The individual pension trust funds participate in internal investment pools sponsored by the state and administered by the State Board of Investment (SBI). The pools function much like mutual funds, with the various pension trust funds purchasing “units” in the pool rather than individual securities. At year-end, some security purchase and sale transactions entered into by SBI were not settled, resulting in securities trades receivables and payables. These unsettled securities trades are an essential element in determining the fair value of each pension trust fund’s pooled investment balance; therefore, the trades are reported in the Combining Statement of Net Position of pension trust funds as net amounts and allocated to the individual pension trust funds. As of June 30, 2016, this presentation resulted in a negative asset within the total investment pool participation.

Non-Primary Government Administered Plan

The state contributes as a non-employer contributing entity into the St. Paul Teachers’ Retirement Fund, but does not perform any other fiduciary responsibilities. Separately-issued financial statements for the St. Paul Teachers’ Retirement Fund Association may be obtained at St. Paul Teachers’ Retirement Association, 1619 Dayton Avenue, Room 309, St. Paul, MN 55104.

Plan Administrator	Plan Covered
St. Paul Teachers’ Retirement Fund Association (SPTRF)	St. Paul Teachers’ Retirement Fund

Defined Benefit Plans

Primary Government Administered Multiple-Employer Cost Sharing Plans

The State Employees Retirement Fund (SERF) covers most state employees, the University of Minnesota (component unit) non-faculty employees, and selected metropolitan agency employees. Fifteen employers participate in this plan. The plan provides retirement, survivor, and disability benefits. The annuity benefit formula is the greater of a step rate with a flat rate reduction for each month of early retirement, or a level rate (the higher step rate) with an actuarial reduction for early retirement. The applicable rates if the employee was first hired before July 1, 1989, are 1.2 percent of the member’s average salary for the first 10 years of allowable service and 1.7 percent for each subsequent year. The applicable rate if the employee is first hired after June 30, 1989, is 1.7 percent of high-five average salary for each year of allowable service. Annual benefits increase by 2.0 percent each year and 2.5 percent if the plan is funded at least 90 percent for two consecutive years. If, after reverting to a 2.5 percent increase, the funding ratio declines to less than 80 percent for the most recent actuarial valuation year or 85 percent for two consecutive years, the benefit increase will change to 2.0 percent until the plan again reaches 90 percent funding for two consecutive years. For the prior measurement period, the benefit increase of 2.5 percent was projected to start in 2016 instead of 2044 as in the current measurement period.

The Correctional Employees Retirement Fund (CERF) primarily covers state employees who have direct contact with inmates or patients in Minnesota correctional facilities, the state operated forensic service program, or the Minnesota sex offenders program. Three employers participate in this plan. The plan provides retirement, survivor, and disability benefits. The annuity benefit formula is 2.4 percent of the member’s high-five average salary for each year of service for employees hired before July 1, 2010, and 2.2 percent for hires after June 30, 2010. Annual benefits increase by 2.0 percent each year and 2.5 percent if the plan is funded at least 90 percent of full funding for two consecutive years. If, after reverting to a 2.5 percent increase, the funding ratio declines to less than 80 percent for the most recent actuarial valuation year, or 85 percent for two consecutive years, the benefit increase will decrease to 2.0 percent until the plan again reaches 90 percent funding for two consecutive years. For the prior measurement period, the annual benefit increase of 2.5 percent was projected to start in 2066 instead of indefinitely as in the current measurement period.

The General Employees Retirement Fund (GERF) covers employees of various governmental units and subdivisions, including counties, cities, school districts, and related organizations. Approximately 2,000

employers participate in this plan. The plan provides retirement, survivor, and disability benefits. On January 1, 2015, Minneapolis Employee Retirement Fund (MERF) merged into GERF. The annuity accrual rate for former MERF members is 2.0 percent of average salary for each of the first ten years of service and 2.5 percent for each remaining year. Basic membership includes participants who are not covered by the Social Security Act, while coordinated membership includes participants who are covered by the Act. The annuity benefit formula for each type of membership is the greater of the step rate with a flat reduction for each month of early retirement, or a level rate (the higher step rate) with an actuarially based reduction for early retirement. The applicable rates for each year of allowable service based on the member's high-five average salary for basic members and for coordinated members are 2.2 and 1.2 percent for the first ten years of service and 2.7 and 1.7 percent for each remaining year, respectively. Annual benefits increase by 1.0 percent each year and 2.5 percent if the plan is funded at least 90 percent for two consecutive years. If, after reverting to a 2.5 percent increase, the funding ratio declines to less than 80 percent for the most recent actuarial valuation year or 85 percent for two consecutive years, the benefit increase will decrease to 1.0 percent. For the prior measurement period, the benefit increase of 2.5 percent was projected to start in 2031 instead of 2036 as in the current measurement period.

The Police and Fire Fund (P&FF) covers persons employed as police officers and firefighters by local governmental units and subdivisions. Approximately 500 employers participate in this plan. The plan provides retirement, survivor, and disability benefits. The annuity formula for each member is 3.0 percent of the member's high-five average salary for each year of service in that plan. Annual benefits increase by 1.0 percent each year and 2.5 percent if the plan is funded at least 90 percent for two consecutive years. Prior to 1981, these employees were not covered by a local relief association. The fund covers all those hired since 1980.

The Public Employees Correctional Fund (PECF) covers employees in county correctional facilities who have direct contact with inmates. Eighty county employers participate in this plan. The plan provides retirement, survivor, and disability benefits. The annuity formula for each member is 1.9 percent of the member's high-five average salary for each year of service. Annual benefits increase by 1.0 percent each year and 2.5 percent if the plan is funded at least 90 percent for two consecutive years.

The Teachers Retirement Fund (TRF) covers teachers and other related professionals employed by school districts or by the state. On June 30, 2015, the Duluth Teachers Retirement Fund merged into TRF. Prior to the merger, Duluth Teachers Retirement Fund was a self-administered plan using different assumptions as a stand-alone plan. As a result of the merger, the net pension liability as of the beginning of the year was restated to reflect the merged entity. The state's share of the difference in the net pension liability recognized in the prior year and the restated amount is reflected as part of the change in proportionate share of contributions in the current year. Approximately 590 employers participate in this plan. The plan provides retirement, survivor, and disability benefits. Basic membership includes participants who are not covered by the Social Security Act, while coordinated membership includes participants who are covered by the Act. The annuity formula for the coordinated members is the greater of a step rate with a flat reduction for each month of early retirement, or a level rate (the higher step rate) with an actuarially based reduction for early retirement. The annuity formula for Tier I basic members is 2.2 percent for the first ten years and 2.7 percent for each subsequent year and Tier II is 2.7 percent of the member's high-five average salary. The annuity formula for Tier I coordinated members for services prior to July 1, 2006, is 1.2 percent for the first ten years and 1.7 percent each subsequent year of the member's high-five average salary. The annuity formula for Tier I coordinated members for services subsequent to July 1, 2006, is 1.4 percent for the first ten years and 1.9 percent each subsequent year of the member's high-five average salary. The annuity formula for Tier II coordinated members is 1.7 percent for services prior to July 1, 2006, and 1.9 percent for each year subsequent of the member's high-five average salary. Annual benefits increase by 2.0 percent each year and 2.5 percent if the plan is funded at least 90 percent of full funding for two consecutive years.

Non-Primary Government Administered Multiple-Employer Cost Sharing Plans

The St. Paul Teachers' Retirement Fund (SPTRF) covers teachers and other related professionals employed by St. Paul Public Schools, St. Paul College, charter schools within the City of St. Paul, and SPTRF staff. The plan provides retirement, survivor, and disability benefits. Members hired before July 1, 1989, are eligible for Tier I or II benefits, whichever results in the highest benefits. The benefit formula for Tier I members is 1.2 percent of the members high-five average salary for the first ten years of service and 1.7 percent for subsequent years of service for services rendered prior to July 1, 2015, when these rates increase to 1.4 percent and 1.9 percent, respectively. The benefit formula for Tier II members is 1.7 percent of the members high-five average salary for years of service rendered prior to July 1, 2015, when this rate increases to 1.9 percent. Annual benefits increase by 1.0 percent each year, 2.0 percent if the plan is funded at least 80 percent, and up to 2.5 percent if the plan is funded at least 90 percent. For the prior measurement period, the benefit increase if the plan is funded at least 90 percent was up to 5.0 percent.

Primary Government Administered Multiple-Employer Agent Plan

The Volunteer Firefighter Retirement Fund (VFRF) was established on January 1, 2010, as a lump-sum defined benefit plan largely funded by fire state aid and covers volunteer firefighters. Members do not contribute to the plan. Employer contributions are determined annually. There are 92 employers participating in this plan. If fire state aid plus investment income are not expected to cover the normal cost of benefits during the next calendar year, an employer contribution is calculated and payable by the end of the next calendar year. Benefits are determined by employee years of service multiplied by a benefit level chosen by the entity sponsoring the fire department from 20 possible levels ranging from \$500 to \$7,500 per year of service. Plan provisions include a pro-rated vesting schedule that increases from 5 years at 40 percent through 20 years at 100 percent. The plan is established and administered in accordance with Minnesota Statutes, Chapter 353G. The state is not an employer of participants in the plan, but performs in a fiduciary capacity.

Primary Government Administered Single-Employer Plans

The Judges Retirement Fund (JRF) covers judges of the Supreme Court, appellate, and district courts. The plan provides retirement, survivor, and disability benefits. The annuity benefit formula for Tier I program judges is 2.7 percent of the high-five average salary for each year of service prior to June 30, 1980, and 3.2 percent for each year thereafter up to 76.8 percent. The annuity benefit formula for Tier II program judges is 2.5 percent of the high-five average salary for each year of service. Annual benefits increase by 1.75 percent each year and 2.0 percent if the plan is funded at least 70 percent for two consecutive years, and 2.5 percent if the plan is funded at least 90 percent.

The Legislators Retirement Fund (LRF) covers constitutional officers and certain members of the state's House of Representatives and Senate who were first elected prior to July 1, 1997, and chose to retain coverage under this plan. The plan provides retirement and survivor benefits. The annuity benefit formula ranges from 2.5 percent to 5.0 percent of high-five average salary for each year of service depending on a member's length of service. Annual benefits increase by 2.0 percent each year and 2.5 percent if the plan is funded at least 90 percent for two consecutive years. If, after reverting to a 2.5 percent increase, the funding ratio for the State Employees Retirement Fund declines to less than 80 percent for the most recent actuarial valuation year or 85 percent for two consecutive years, the benefit increase will decrease to 2.0 percent until the plan reaches a 90 percent funding ratio for two consecutive years. For the prior measurement period, the benefit increase of 2.5 percent was projected to start in 2015 instead of 2044. This plan is closed to new entrants.

The State Patrol Retirement Fund (SPRF) covers state troopers, conservation officers, and certain crime bureau and gambling enforcement agents. The plan provides retirement, survivor, and disability benefits. The annuity is 3.0 percent of high five average salary for each year of allowable service up to 33 years; members with at least 28 years of service as of July 1, 2013, are not subject to this limit. Annual benefits increase by 1.0 percent each year and 1.5 percent if the plan is funded at least 85 percent for two consecutive years, and 2.5 percent if the plan is funded at least 90 percent for two consecutive years. If, after reverting to a 1.5 percent increase, the funding ratio declines to less than 75 percent for the most recent actuarial valuation year or 80 percent for two consecutive years, the benefit increase will decrease to 1.0 percent. For the prior measurement period, the benefit increase was projected as 1.0 percent through 2018, 1.5 percent through 2045, and 2.5 percent thereafter instead of 1.0 percent through 2031, 1.5 percent through 2052, and 2.5 percent thereafter as in the current measurement period.

The State Board of Investment, which manages the investments of MSRS, PERA, and TRA, prepares an analysis of the reasonableness of the long-term expected rate of return on a regular basis using a building-block method using both long-term historical returns and long-term capital market expectations from a number of investments management and consulting organizations. Best-estimates of expected future real rates of return are developed for each major asset class. These asset class estimates and target allocations are combined to produce a geometric, expected long-term rate of return as summarized in the following table:

Primary Government Administered Plans Asset Class Target Allocation and Expected Return As of June 30, 2016		
<u>Asset Class</u>	<u>Target Allocation</u>	<u>Long-Term Expected Rate of Return (Geometric Mean)</u>
Domestic Stocks	45%	5.50%
International Stocks	15%	6.00%
Bonds	18%	1.45%
Alternative Assets	20%	6.40%
Unallocated Cash	2%	0.50%
Total	<u>100%</u>	

The following table presents the net pension liability for each defined benefit plan with a primary government proportionate share of the net pension liability, calculated using the corresponding discount rate as well as what the net pension liability would be if the rate were one percentage point higher or lower.

Primary Government Proportionate Share Sensitivity of the Net Pension Liability to Changes in the Discount Rate As of June 30, 2016 (In Thousands)						
	With a 1% Decrease		Current Discount Rate		With a 1% Increase	
	Rate	NPL ⁽¹⁾	Rate	NPL ⁽¹⁾	Rate	NPL ⁽¹⁾
SERF	6.90%	\$ 2,329,738	7.90% ⁽⁴⁾	\$ 1,138,125	8.90%	\$ 146,484
CERF ⁽³⁾	5.25%	899,472	6.25% ⁽²⁾⁽⁴⁾	653,352	7.25%	454,712
GERF	6.90%	340,415	7.90% ⁽⁴⁾	216,500	8.90%	114,165
TRF ⁽³⁾	7.00%	1,282,301	8.00%	842,439	9.00%	475,361
SPTRF	7.00%	266,030	8.00%	173,161	9.00%	129,301
JRF ⁽³⁾	4.25%	282,854	5.25% ⁽²⁾⁽⁴⁾	236,392	6.25%	196,936
LRF ⁽³⁾	2.80%	157,407	3.80% ⁽²⁾⁽⁴⁾	140,923	4.80%	127,130
SPRF	6.90%	270,947	7.90% ⁽⁴⁾	173,705	8.90%	92,576
⁽¹⁾ Net Pension Liability.						
⁽²⁾ The long-term projected rate of return was used through 2054, 2034, and 2015 for CERF, JRF, and LRF, respectively. The 20 year municipal bond rate was used subsequent to these years.						
⁽³⁾ The discount rate changed from 6.82, 8.25, 5.78, and 4.29 percent for CERF, TRF, JRF, and LRF, respectively.						
⁽⁴⁾ The long-term projected rate of return for SERF, CERF, GERF, JRF, LRF, and SPRF that will be used to calculate the net pension liability for fiscal year 2017 will change from 7.90 to 7.50 percent. This will have a significant impact on the calculation of the net pension liability for fiscal year 2017.						

Defined Contribution Plans

The defined contribution funds presented in the financial statements include various statewide public employee retirement funds. The benefits received are limited to an annuity, which can be purchased with the combined contributions of both the employee and employer or solely with employee contributions, depending on the fund. Accordingly, there is no unfunded liability for these funds; therefore, there is no actuarial accrued benefit liability or actuarially required contribution.

Plan Descriptions and Contribution Information

The Hennepin County Supplemental Retirement Fund (HCSRF), authorized by Minnesota Statutes, Sections 383B.46-52, covers employees of Hennepin County who began employment prior to April 14, 1982. The employer (Hennepin County and Hennepin Healthcare System) and employee contribution rate is 1.0 percent of the employee's salary. Benefits are the participant's account balance, which includes investment earnings/losses.

Health Care Savings Fund (HCSF), authorized by Minnesota Statutes, Section 352.98, creates a post-retirement health care savings plan by which public employers and employees may save to cover post-retirement health care costs. Contributions to the plan are defined in a personnel policy or in a collective

bargaining agreement. Contributions to the plan, by or on behalf of an employee, are held in trust for reimbursement of employee and dependent health-related expenses following termination of public service. The current plan is based on state employee contributions without any matching provision by the state. A plan participant may request reimbursement until funds accumulated in the participant's account are exhausted. Benefits are the participant's account balance, which includes investment gains/losses and must be used for qualifying health-related expenses. The employee contributions were \$130,016,000 for the fiscal year ended June 30, 2016.

The Unclassified Employees Retirement Fund (UERF), authorized by Minnesota Statutes, Chapter 352D, covers only those state employees who are included either by statute or policy in the "unclassified service" of the state, specified employees of various statutorily designated entities, or judges who exceed the maximum benefit cap under the Judges Retirement Fund (pension trust fund). Statutory contribution rates are 5.5 percent of employee's salary for employee and 6.0 percent for state. However, contribution rates for participating judges are 8.0 percent of employee's salary with no state contribution. Benefits are either an annuity based on age, value of the participant's account, and a 6.0 percent post-retirement interest assumption or the participant's account balance withdrawals.

The Minnesota Deferred Compensation Fund (DCPF) is a voluntary retirement savings plan authorized under section 457(b) of the Internal Revenue Code and Minnesota Statutes, Section 352.965. The plan is primarily composed of employee pre-tax contributions and accumulated investment gains or losses. Participants may withdraw funds upon termination of public service or in the event of an unforeseeable emergency. Employees and elected officials of the state and its political subdivisions are eligible to participate in the plan.

The Defined Contribution Fund (DCF) is authorized by Minnesota Statutes, Chapter 353D. The plan covers local units of government of which current or former elected officials elect to participate (with the exception of elected county sheriffs), emergency medical service personnel employed by or providing service to any of the participating ambulance services, and physicians employed at public facilities. The statutory contribution rate is 5.0 percent of employee's salary for both the employee and employer (local units of government, elected officials, and physicians). For other participants, the contribution rate is determined by the employer with a fixed percentage for the employee. Plan benefits depend solely on amounts contributed to the plan, plus investment earnings, less administrative expenses.

The State Colleges and Universities Retirement Fund (CURF), authorized by Minnesota Statutes, Chapter 354B and Chapter 354C, covers unclassified teachers, librarians, administrators, and certain other staff members. Participation is mandatory for qualified employees. This fund consists of an Individual Retirement Account Plan (IRAP) and a Supplemental Retirement Plan (SRP). Two member groups, faculty and administrators, participate in the IRAP. The state and employee statutory contribution rates are 6.0 and 4.5 percent, respectively. For the SRP, the statutorily required contribution rate is 5.0 percent of salary for both the state and employees with contribution maximums between \$1,700 and \$2,500 depending on the member group. Minnesota Statutes allow additional state and employee contributions under specific circumstances.

Teachers Insurance and Annuity Association College Retirement Equities Fund (TIAA-CREF) is the administrative agent for the State Colleges and Universities Retirement Fund. Separately-issued financial statements can be obtained from TIAA-CREF, Normandale Lake Office Park, 8000 Norman Center Drive, Suite 1100, Bloomington, MN 55437.

Investment Trust Funds

The Supplemental Retirement and the Investment Trust funds (investment trust funds) are administered by the State Board of Investment, which issues a separate report (see Note 1 – Summary of Significant Accounting and Reporting Policies for the address). These funds are investment pools for external participants.

Component Units

The following component units are participants in the State Employees Retirement Fund (SERF), Police and Fire Fund (P&FF), and the Unclassified Employees Retirement Funds (UERF):

- Housing Finance Agency (HFA)
- Metropolitan Council (MC)
- University of Minnesota (U of M)
- Office of Higher Education (OHE)
- Minnesota Sports Facilities Authority (MSFA)

Net Pension Expense	\$ 1,209	\$ 727	\$ 1,936

The University of Minnesota also participates in the Supplemental Benefit Plan. The plan provides retirement, survivor, and disability benefits to faculty. Contribution rates are determined on a funding status and actuarial value basis as the plan is closed to new entrants. The net pension liability as of June 30, 2016, was \$1,595,000.

Note 9 – Termination and Postemployment Benefits

Primary Government – Termination Benefits

Early termination benefits are defined as benefits received for discontinuing services earlier than planned. A liability and expense for voluntary termination benefits are recognized when the offer is accepted and the amount can be estimated. A liability and expense for involuntary termination benefits are recognized when a plan of termination has been approved, the plan has been communicated to the employees, and the amount can be estimated.

Only three state bargaining agreements provide for this benefit. These agreements, affecting only Minnesota State Colleges and Universities (MnSCU) employees, are the Minnesota State College Faculty, Inter Faculty Organization, and Minnesota State University Association of Administrative Service Faculty contracts. Faculty members who meet a combination of age and years of service plus certain eligibility requirements are eligible to receive an early retirement incentive cash payment based on base salary plus health insurance paid for one year after separation or up to age 65, depending on the contract. Approximately 100 former faculty members and staff currently receive this benefit. The cost of the benefits was \$1,776,000 during fiscal year ended June 30, 2016, with a remaining liability as of June 30, 2016, of \$3,011,000.

Primary Government – Postemployment Benefits Other Than Pensions

Plan Description

Other postemployment benefits (OPEB) are available to state employees and their dependents through a single-employer defined benefit health care plan, as allowed by Minnesota Statutes, Section 43A.27, Subdivision 3, and Minnesota Statutes, Section 471.61, Subdivision 2a, and required under the terms of selected employment contracts. All pre-age-65 state retirees with at least 5 years of allowable pension service who are entitled at the time of retirement to receive an annuity under the state retirement program are eligible to participate in the state's health and dental insurance plan until age 65. Retirees not eligible for an employer subsidy must pay 100 percent of the premiums to continue receiving coverage. These employees are allowed to stay in the active employee risk pool with the same premium rate and are, therefore, subsidized by the insurance premiums rates for active state employees, resulting in an implicit rate subsidy. As of July 1, 2014, there were approximately 2,440 retirees participating in the state's insurance plan under this provision.

The state also subsidizes the health care and dental premium rates for certain employees, primarily conservation officers, correctional officers at state correctional facilities, and state troopers through an explicit rate subsidy under terms of selected employment contracts. If the retiree terminates employment prior to age 55, the employer's premium contribution rate is frozen at the date of the employee's retirement and is payable by the state until the retiree is age 65. The retiree is responsible for any other portion of the premiums. If the retiree terminates employment at age 55 or later, the employer contributes the active employee's premium rate each year until the retiree is age 65. Coverage ends at the retiree's attainment of age 65. As of July 1, 2014, there were approximately 975 correctional and law enforcement retirees receiving an explicit rate subsidy.

The state does not issue a separate financial report for its OPEB as the state does not fund an OPEB plan and operates on a pay-as-you-go basis.

Funding Policy

The contribution requirement of plan members and the state are established and may be amended by the Minnesota Legislature or through selected employment contracts, which are negotiated every other year. The required contribution is based on a projected pay-as-you-go basis. For fiscal year ended June 30, 2016, the state contributed \$35,984,000 to the plan. Plan member retirees receiving benefits through the implicit rate subsidy contributed \$22,588,000 through their average required contribution of \$525 per month for retiree-only coverage and \$1,545 per month for retiree-family coverage.

Annual OPEB Cost and Net OPEB Obligation

The state's annual OPEB cost (expense) is calculated based on the annual required contribution (ARC) of the employer, an amount actuarially determined in accordance with the parameters of GASB Statement No. 45 "Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions." The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal costs each year and amortize any unfunded actuarial liabilities over a thirty year amortization period using a 4.10 percent discount rate. For year ending June 30, 2016, the state's ARC is \$74,289,000.

The following table shows the components of the state's annual OPEB cost, the amount contributed to the plan, and the changes to the state's net OPEB obligation:

OPEB Disclosures As of June 30, 2016 (In Thousands)	
Annual Required Contributions (ARC) ⁽¹⁾	\$ 74,289
Interest on Net OPEB Obligation (NOO) ⁽¹⁾	12,173
Amortization Adjustment to ARC ⁽¹⁾	<u>(10,821)</u>
Annual OPEB Cost (Expense)	\$ 75,641
Contributions	<u>(35,984)</u>
Increase in NOO	<u>\$ 39,657</u>
NOO, Beginning Balance	<u>\$ 296,900</u>
NOO, Ending ⁽²⁾	<u><u>\$ 336,557</u></u>
⁽¹⁾ Components of annual OPEB cost.	
⁽²⁾ Governmental Activities, Business-type Activities, and Fiduciary Funds include \$292,616; \$43,826; and \$115, respectively.	

The state's annual OPEB cost, the percentage of annual OPEB cost contributed to the plan, and the net OPEB obligation for fiscal years 2016, 2015, and 2014 are as follows:

OPEB Disclosures (In Thousands)			
<u>Fiscal Year Ended</u>	<u>Annual OPEB Cost</u>	<u>Percentage of Annual OPEB Cost Contributed</u>	<u>Net OPEB Obligation</u>
June 30, 2016	\$ 75,641	48%	\$ 336,557
June 30, 2015	\$ 72,065	45%	\$ 296,900
June 30, 2014	\$ 70,803	50%	\$ 256,979

Funded Status and Funding Progress

As of July 1, 2014, the most recent actuarial valuation date, the actuarial accrued liability (AAL) for benefits and the unfunded actuarial accrued liability (UAAL) was \$666,638,000. The actuarial value of assets is zero as no assets have been deposited into an irrevocable OPEB trust for future benefits. The covered payroll (annual payroll of active employees covered by the plan) was \$3,243,316,000 and the ratio of the UAAL to the covered payroll was 20.6 percent.

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the health care cost trend. Amounts determined regarding the funded status of the plan and the annual required contributions of the employer are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The schedule of funding progress, presented as required supplementary information following the notes to the financial statements, is designed to present multiyear trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liabilities for benefits. However, as the state operates on a pay-as-you-go basis, the actuarial value of plan assets is zero.

Actuarial Methods and Assumptions

The projection of benefits for financial reporting purposes is based on the substantive plan (the plan as understood by the employer and the plan members) and includes the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The projection of benefits for financial reporting purposes does not explicitly incorporate the potential effects of legal or contractual funding limitations on the pattern of cost sharing between the employer and plan members in the future. The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short-term volatility in actuarial accrued liabilities, consistent with the long-term perspective of the calculations.

Actuarial Assumptions for OPEB

- The actuarial cost method used is the Entry Age Normal Cost method. The date of actuarial valuation is July 1, 2014.
- Expected investment return is 4.10 percent based on the estimated long-term investment yield on the general assets of the state.
- Inflation rate is 3.0 percent.

- Projected salary increases are a level 3.75 percent.
- The annual health care cost trend rate is 6.60 percent initially, reduced by increments to an ultimate rate of 4.0 percent by 2074 and later. The annual dental cost trend rate is 5.0 percent.
- The amortization period for the unfunded actuarial accrued liability is 30 year level percent of pay.
- The amortization period is open.

See Note 12 – Long-Term Liabilities – Primary Government for the related liability amount accrued at the government-wide level.

Component Units – Postemployment Benefits Other Than Pensions

The Metropolitan Council (MC) administers another postemployment benefit (OPEB) plan, a single-employer defined benefit health care and life insurance plan to eligible retirees, their spouses, and dependents. MC does not fund its OPEB benefits in an irrevocable trust. However, it has separately invested \$207,095,000 as of December 31, 2015, for this purpose. The annual required contribution for 2015 was \$20,339,000 or 6.0 percent of annual covered payroll. As of December 31, 2015, 2014, and 2013, the net OPEB obligation was \$87,231,000, \$83,577,000, and \$78,825,000, respectively. The actuarial accrued liability (AAL) for benefits was \$209,378,000 as of December 31, 2015, all of which was unfunded. The covered payroll was \$339,990,000, and the ratio of the unfunded actuarial accrued liability (UAAL) to the covered payroll was 61.6 percent.

The University of Minnesota (U of M) administers another postemployment benefit (OPEB) plan, a single-employer defined benefit health care plan to eligible employees, retirees, their spouses, and dependents, and an academic disability plan for faculty and academic professional and administrative employees. U of M does not fund its OPEB benefits in an irrevocable trust. The annual required contribution for the year ended June 30, 2016, was \$26,457,000 or 2.0 percent of annual covered payroll. As of June 30, 2016, 2015, and 2014, the net OPEB obligation was \$138,200,000, \$120,227,000, and \$101,288,000. The actuarial accrued liability (AAL) for benefits was \$111,519,000 as of June 30, 2016. The covered payroll was \$1,350,645,000, and the ratio of the unfunded actuarial accrued liability (UAAL) to the covered payroll was 8.3 percent.

Note 10 – Long-Term Commitments

Long-term commitments consist of grant agreements, construction projects, and other contracts. A portion of these commitments will be funded by current reserves, and these amounts are included on the face of the financial statements in the restricted, committed, and assigned fund balance amounts. Resources provided by future bond proceeds, gas taxes, motor vehicle registration revenues, and federal grants will fund the remaining commitments. Governmental funds' encumbrances, both current and long-term, as of June 30, 2016, were as follows:

Primary Government Encumbrances As of June 30, 2016 (In Thousands)	
Major Fund: General Fund	\$ 364,974
Non-Major Governmental Funds	<u>1,634,507</u>
Total Encumbrances	<u>\$ 1,999,481</u>

Petroleum Tank Environmental Cleanup

The Petroleum Tank Release Cleanup Act, Minnesota Statutes, Chapter 115C, requires the state to reimburse eligible applicants for a significant portion of their costs to investigate and clean up contamination from leaking petroleum storage tanks. Reimbursements are made from the Petroleum Tank Cleanup Fund (Petrofund) (special revenue fund). As of July 2016, the Petrofund has reimbursed eligible applicants approximately \$440,000,000 since program inception in 1987. Future expenditures from the Petrofund will be necessary as existing cleanup projects are completed and new cleanup projects are begun at currently undiscovered leak sites. The estimated total payments from the program, which is scheduled to sunset on June 30, 2022, are between \$460,000,000 and \$480,000,000 for investigative and cleanup costs.

Environmental and Remediation Fund

The Remediation Account was established in the state treasury as part of the Environmental and Remediation Fund (special revenue fund) to provide a reliable source of public money for response and corrective actions to address releases of hazardous substances, pollutants, contaminants, agricultural chemicals, and petroleum, and for environmental response actions at qualified closed landfills for which the state has assumed responsibility. Money in the general portion of the fund may be spent for remediation actions related to releases of hazardous substances, pollutants, or containments and to provide technical and other assistance. Additionally, funds may be spent for corrective actions to address incidents involving agricultural chemicals, including related administrative costs, enforcement, and cost recovery actions.

In addition to the general portion of the fund, two dedicated accounts are held within the fund. Money in the dry cleaner environmental response and reimbursement account may be used for environmental response actions at dry cleaning facilities and sites as well as related administrative costs. The metropolitan landfill contingency action trust account receives 25 percent of the metropolitan solid waste landfill fee. Money in this dedicated account is appropriated for closure and post-closure care of mixed municipal solid waste disposal facilities in the metropolitan area for a 30-year period after closure if determined that the operator/owner cannot take the necessary actions as directed by the commissioner of the Minnesota Pollution Control Agency.

The Closed Landfill Investment Account consists of money credited to the fund plus interest and other earnings. Money in the fund may be spent only after fiscal year 2020 as determined by the commissioner of the Minnesota Pollution Control Agency on environmental response actions at qualified closed mixed municipal solid waste disposal facilities.

Minnesota State Colleges and Universities

The Minnesota State Colleges and Universities had commitments of \$85,308,000 for construction and renovation of college and university facilities as of June 30, 2016.

Component Units

As of June 30, 2016, the Housing Finance Agency had committed approximately \$336,490,000 for the purchase or origination of future loans or other housing assistance.

The Metropolitan Council entered into contracts for various purposes such as transit services and construction projects. As of December 31, 2015, unpaid commitments for Metro Transit Bus services were approximately \$419,776,000. Future commitments for Metro Transit Light Rail were approximately \$85,544,000, while future commitments for Metro Transit Commuter Rail were approximately \$8,685,000. Future commitments for Regional Transit and Environmental Services were approximately \$24,226,000 and \$113,680,000, respectively. Finally, amounts authorized and initiated in the calendar year 2015 budget but not completely expended in calendar year 2015 were \$3,351,000.

The University of Minnesota had construction projects in progress with an estimated completion cost of \$381,645,000 as of June 30, 2016. These costs will be funded from plant fund assets and state appropriations.

As of June 30, 2016, the Public Facilities Authority (PFA) had committed approximately \$117,000,000 for the origination or disbursement of future loans under the Clean Water, Drinking Water, and Transportation Revolving Loan programs. PFA also committed \$21,000,000 for grants.

As of December 31, 2015, the Minnesota Sports Facilities Authority had committed approximately \$137,575,000 for stadium and stadium infrastructure construction projects.

Note 11 – Operating Lease Agreements

Operating Leases

The state and its component units are committed under various leases primarily for building and office space. For accounting purposes, these leases are considered to be operating leases.

Lease expenditures/expenses for the fiscal year ended June 30, 2016, totaled approximately \$89,285,000 and \$20,225,000 for the primary government and component units, respectively. Lease expenses for the year ended December 31, 2015, totaled approximately \$1,977,000 for component units.

Debt Service Fund

Minnesota Statutes, Section 16A.641, provides for an annual appropriation for transfer to the Debt Service Fund. The amount of the appropriation is to be such that, when combined with the balance on hand in the Debt Service Fund on December 1 of each year for state bonds, it will be sufficient to pay all general obligation bond principal and interest due and to become due through July 1 in the second ensuing year. If the amount appropriated is insufficient when combined with the balance on hand in the Debt Service Fund, the state constitution requires the state auditor to levy a statewide property tax to cover the deficiency. No such property tax has been levied since 1969 when the law requiring the appropriation was enacted.

During fiscal year 2016, Minnesota Management and Budget made the necessary transfers to the Debt Service Fund as follows:

Primary Government Transfers to Debt Service Fund Year Ended June 30, 2016 (In Thousands)	
General Fund	\$ 706,555
Special Revenue Funds:	
Trunk Highway Fund	\$ 180,726
Miscellaneous Special Revenue Fund	<u>1,216</u>
Total Special Revenue Funds	\$ 181,942
Capital Projects Fund – Building Fund	\$ 49
Internal Service Fund – Plant Management Fund	<u>\$ 2,861</u>
Total Transfers to Debt Service Fund	<u>\$ 891,407</u>

General Obligation Bond Issues

In August 2015, the state issued \$1,076,980,000 general obligation bonds, Series 2015A through Series 2015E:

- Series 2015A for \$368,225,000 in state various purpose bonds were issued at a true interest rate of 2.93 percent.
- Series 2015B for \$310,000,000 in state trunk highway bonds were issued at a true interest rate of 2.88 percent.
- Series 2015C for \$7,200,000 in taxable state bonds were issued at a true interest rate of 2.43 percent.
- Series 2015D for \$376,655,000 in state various purpose refunding bonds were issued at a true interest rate of 2.18 percent. The aggregate debt service payments decreased by \$50,452,000 and the economic gain (the present value of the debt service savings) for the state was \$44,114,000.
- Series 2015E for \$14,900,000 in state trunk highway refunding were issued at a true interest rate of 2.15 percent. The aggregate debt service payments decreased by \$247,000 and the economic gain (the present value of the debt service savings) for the state was \$1,181,000.

The state remains contingently liable to pay its advance refunded general obligation bonds as shown in the following table.

Primary Government Outstanding Defeased Debt (In Thousands)

Total	<u>\$ 1,196,012</u>	<u>\$ 6,513,580</u>	

State General Fund Appropriation Bonds

On October 31, 2012, the Minnesota Supreme Court concluded that the Appropriation Refunding Bonds do not constitute public debt for which the state has pledged its full faith, credit, and taxing powers. The Minnesota Supreme Court held that, accordingly, the bonds are not subject to the Minnesota Constitution's Article XI, Section 5, restrictions on the use of the proceeds of "public debt." Resulting from the decision of this court case, on November 21, 2012, the state sold state General Fund appropriation refunding bonds. The bonds were issued for the purpose of refunding tobacco settlement revenue bonds Series 2011A and Series 2011B of the Tobacco Securitization Authority. These appropriation bonds are payable only from amounts appropriated by the Minnesota Legislature.

Minnesota Statutes, Section 16A.965, authorizes the state to issue state General Fund appropriation bonds for the purpose of financing up to \$498,000,000 for the state and City of Minneapolis' share of the costs of a professional football stadium project of the Minnesota Sports Facilities Authority (component unit) that was created for that purpose by Minnesota Statutes, Chapter 473J. The state has commenced the financing process. In addition, the Minnesota Pay-for-Performance Act of 2011 authorized issuance of up to \$10,000,000 bond proceeds as incentive payments to service providers for certain financial outcomes that will result in decreased costs or increased revenues to the state.

Minnesota Statutes, Section 16A.967, authorizes the state to issue state General Fund appropriation bonds not to exceed \$19,000,000 for financing land acquisition, design, engineering, and construction of facilities and infrastructure necessary to complete the next phase of the Lewis and Clark Regional Water System project, including completion of the pipeline to Magnolia, extension of the project to the Lincoln-Pipestone Rural Water System connection near Adrian, and engineering, design, and easement acquisition for the final phase of the project to Worthington. No bonds shall be sold until the commissioner of Minnesota Management and Budget determines that a nonstate match of at least \$9,000,000 is committed to this project phase. Grant agreements entered into under this section must provide for reimbursement to the state from any federal money provided for the project, consistent with the Lewis and Clark Regional Water System, Incorporated agreement. The nonstate match was met, and on November 2, 2016, state General Fund appropriation bonds of \$11,790,000 were issued. See Note 21 - Subsequent Events.

The following table is a schedule of state General Fund appropriation bonds authorized, but unissued, and bonds outstanding as of June 30, 2016.

Primary Government State General Fund Appropriation Bonds Authorized, but Unissued, and Bonds Outstanding As of June 30, 2016 (In Thousands)			
<u>Purpose</u>	<u>Authorized But Unissued</u>	<u>Amount Outstanding</u>	<u>Interest Rates</u>
Professional Football Stadium	\$ -	\$ 445,330	0.60-5.00%
Pay-for-Performance	10,000	-	N/A
Refund Tobacco Securitization Authority	-	555,345	3.00-5.00%
Lewis and Clark Regional Water System	19,000	-	N/A
Total	<u>\$ 29,000</u>	<u>\$ 1,000,675</u>	

Loans Payable and Due to Component Unit

Governmental activities loans are loans relating to the Trunk Highway Fund (special revenue fund). \$7,817,000 in loans from the Public Facilities Authority (component unit – Due to Component Unit) was outstanding for transportation projects. Other governmental activities loans are internal service fund loans for equipment purchases.

Business-type activities loans are loans to purchase equipment and loans from energy companies to improve energy efficiencies in the colleges and universities.

Capital Leases

In fiscal year 2006, the state entered into capital lease agreements, amended in fiscal year 2013, with St. Paul Port Authority (SPPA - not part of the state's reporting entity) to purchase two newly constructed buildings on state-owned land for \$180,005,000. Lease payments are scheduled over 20 years and approximate the debt service payments of SPPA. The leases meet the criteria of a capital lease as defined by GASB Statement No. 62 "Codification of Accounting and Financial Reporting Guidance Contained in Pre-November 30, 1989 FASB and AICPA Pronouncements." The terms of each agreement provide options to purchase the buildings under a bargain purchase option. In May 2013, the SPPA issued refunding bonds of \$115,760,000. The proceeds of the bonds were applied to refund SPPA's outstanding revenue bonds. The lease agreement was amended to approximate the debt service payments of SPPA refunding bonds. The state has other capital lease agreements to purchase equipment that meets the above criteria.

Certificates of Participation

In August 2009, the state issued \$74,980,000 of certificates of participation (COPs) at a true interest rate of 2.88 percent to finance the acquisition of computer software development intangible assets. The proceeds were used to develop the state's statewide financial and procurement system and the state's integrated tax accounting system. The COPs were issued under a trust agreement with U.S. Bank, NA., trustee, who will collect rental payments according to the principal and interest schedule pursuant to the Technology Systems Lease Purchase Agreement for remittance to the investors. The COPs are not general or moral obligations of the state and no revenues are pledged to repay them. If the state defaults on the debt, the trustee has the right to terminate the lease terms of either or both projects and to take whatever legal action may appear necessary to collect rental payment(s).

In August 2014, the state issued \$80,100,000 of certificates of participation (COPs) at a true interest rate of 3.70 percent to finance the predesign, design, and construction and equipping of offices, hearing rooms, and parking facilities for a legislative office facility. The COPs are not general or moral obligations of the state and no revenues are pledged to repay them. If the state defaults on the debt, the trustee has the right to terminate the lease terms of either or both projects and to take whatever legal action may appear necessary to collect rental payment(s).

Revenue Bonds Payable

In October 2013, Iron Range Resources and Rehabilitation issued \$37,830,000 of education facilities revenue bonds at a true interest rate of 3.76 percent. Minnesota Laws of 2013, Chapter 143, Article 11, Section 11; Minnesota Statutes, Section 298.22 through 298.32; and an order of the commissioner of Iron Range Resources and Rehabilitation authorized the issuance of the bonds. The bonds will be used to make grants to certain school districts located in the taconite relief areas, as defined in Minnesota Statutes, Section 273.134. The interest rates for the bonds range from 3.00 percent to 4.30 percent over a 20 year term.

In September 2014, the Iron Range Resources and Rehabilitation issued \$7,860,000 of education facilities refunding revenue bonds at a true interest rate of 1.32 percent. The proceeds of the bonds will be used to effect a current refunding of the commissioner of Iron Range Resources and Rehabilitation's Educational Facilities Revenue Bonds Series 2006. Minnesota Laws of 2005, Chapter 152, Article 1,

Section 39 as amended; Minnesota Statutes, Section 298.2211; and an order of the commissioner of Iron Range Resources and Rehabilitation authorized the issuance of the bonds. The interest rates on the bonds range from 2.00 to 3.00 percent over the seven year term of the bonds.

To repay the bonds, Iron Range Resources and Rehabilitation has pledged future appropriations of the annual distribution of taconite production tax revenues to the Iron Range Resources and Rehabilitation account within the General Fund and the Douglas J. Johnson Economic Protection Trust Fund (special revenue fund). These tax distributions, totaling \$3,990,000 for fiscal year 2016, have averaged less than seven percent of the state's total annual taconite production tax revenues over the last five years. The debt service on the bonds is payable solely from these taconite production tax distributions. For fiscal year 2016, principal and interest paid by Iron Range Resources and Rehabilitation on the bonds was \$3,944,000. The total principal and interest remaining to be paid as of June 30, 2016, is \$55,984,000 payable through October 2033.

The state is authorized by Minnesota Statutes, Section 403.275, and by Minnesota Statewide Radio Board resolution to issue revenue bonds for a current development phase of a public safety radio communications system. On November 1, 2006, \$35,000,000 in revenue bonds was issued at a true interest rate of 3.76 percent. On November 13, 2008, \$42,205,000 in revenue bonds was issued at a true interest rate of 4.60 percent. On October 22, 2009, \$60,510,000 in revenue bonds was issued at a true interest rate of 3.17 percent. On August 16, 2011, \$60,380,000 in revenue bonds was issued at a true interest rate of 2.96 percent. The state has pledged future 911 fee revenues to repay the debt. The debt service on these bonds is payable solely from the revenues derived from the 911 fee assessed on wireless and wire-line telephone service. Annual principal and interest payments on the bonds are expected to require less than 30 percent of the total 911 fee revenues. The total principal and interest remaining to be paid on the bonds as of June 30, 2016, is \$124,537,000 payable through June 2026. Principal and interest paid during fiscal year 2016 and total 911 fee revenues were \$18,213,000 and \$68,500,000, respectively. The bonds are accounted for in the 911 Services Fund (enterprise fund) and are insured by a financial guaranty insurance policy issued by MBIA Insurance Corporation.

Minnesota State Colleges and Universities (MnSCU) (enterprise fund) is authorized by Minnesota Statutes, Section 136F.98, to issue revenue bonds whose aggregate principal shall not exceed \$405,000,000 at any time. The proceeds of these bonds are used to finance the acquisition, construction, and remodeling of buildings for dormitory, residence hall, parking ramps, student union, and food service purposes at state universities. Revenue bonds currently outstanding have interest rates of 1.00 percent to 5.75 percent. The revenue bonds are payable solely from, and collateralized by, an irrevocable pledge of revenues to be derived from the operation of the financed buildings and from student fees. These revenue bonds are payable through 2036. Annual principal and interest payments on the bonds are expected to require less than 25 percent of net revenues. The total principal and interest remaining to be paid on the bonds is \$415,618,000. Principal and interest paid for the current year and total customer net revenues were \$26,727,000 and \$119,181,000, respectively.

Itasca Community College issued revenue bonds through the Itasca County Housing Redevelopment Authority that are payable through 2025. These bonds are payable solely from, and collateralized by, an irrevocable pledge of revenues to be derived from the operation of the financed buildings. Annual principal and interest payments on the bonds are expected to require less than 36 percent of net revenues. The total principal and interest remaining to be paid on the bonds is \$1,895,000. Principal and interest paid and total customer net revenues during fiscal year 2016 were \$166,000 and \$495,000, respectively. These revenue bonds have a variable interest rate of 0.75 percent to 3.65 percent.

Claims

The state has assumed responsibility for the long-term care of certain closed municipal solid waste facilities. Minnesota Statutes, Section 115B.39, established the landfill cleanup program to provide environmental response to qualified, state-permitted, closed landfills. The state is responsible, in perpetuity, for performing cleanup and final closure work, as well as all postclosure maintenance and monitoring, at qualifying sites. Municipal solid waste landfill liabilities of \$202,463,000 for closure and postclosure care claims are payable from the Environmental and Remediation Fund (special revenue

fund) and the General Fund. There are currently 109 landfills in the program and four more landfills that are qualified, but not yet enrolled. One of the qualified sites, Freeway Landfill, has a liability of \$53,625,000; approximately 25 percent of the total landfill liability. Estimated landfill closure and postclosure liabilities include planned response actions, future unknown additional remedies which have some probability of occurring, future replacement of some remedial systems, and administrative costs. Since costs are estimated at current value, actual costs could be different because of inflation, changes in technology, inclusion of additional qualifying sites or changes in regulations, and future unanticipated response actions. Funding for the state's ongoing claims at these landfills has historically come from the Environmental and Remediation Fund (special revenue fund). Currently, the majority of funds appropriated for spending from the Environmental and Remediation Fund are budgeted and expended annually on activities not associated with closure and postclosure care of landfills. Further, the recovery of financial assurance monies from previous landfill owners and operators is no longer a source of revenue to the Environmental and Remediation Fund. The closed landfill investment account within the Environmental and Remediation Fund was established to address long-term costs through minimal withdrawals from a fund managed through the State Board of Investment to ensure long-term availability of resources beginning after fiscal year 2020. Proceeds from the sale of state general obligation bonds, accounted for in the Building Fund (capital projects fund) and repaid by the General Fund, are now a significant source of funding for design and construction work at the publicly-owned landfills in the program.

The state of Minnesota is financially responsible to remediate certain known pollution present on either state-owned or non-state-owned land. In most cases, the state voluntarily assumes responsibility for site assessment and clean-up activities when the responsible party cannot be found or is financially unable to perform the remediation. Pollution remediation obligation liabilities as of June 30, 2016, were \$73,268,000. Of this total, \$62,747,000 was the liability for remediation on sites designated pursuant to state or federal superfund laws. The pollution remediation amounts are estimated through an analysis of existing polluted sites. The liabilities are based on the weighted average of the pollution remediation outlays expected to be incurred to settle those liabilities. Because the liabilities are measured at their current value, they are subject to change due to inflation, technology improvements, or changes to applicable laws and regulations. Funding for the state's pollution remediation primarily comes from the Environmental and Remediation Fund (special revenue fund), which was established under Minnesota Statutes, Section 116.155, and the Petroleum Tank Cleanup Fund (special revenue fund), which was established under Minnesota Statutes, Section 115C.08.

The governmental activities' and business-type activities' liability for workers' compensation of \$84,693,000 and \$4,462,000, respectively, are based on claims filed for injuries to state employees occurring prior to June 30, 2016, and is an undiscounted estimate of future payments. The liability will be liquidated using future resources at unspecified times.

Claims of \$26,900,000 are for workers' compensation claims of employees of uninsured and bankrupt firms. These claims are funded by an assessment on insurers and are payable from the Special Compensation Fund (special revenue fund).

Claims of \$260,400,000 are for reimbursements of supplementary and second injury benefits for old workers' compensation injuries. Legislative action ended both the supplementary and second injury programs. The claim amount represents the estimated discounted (5.00 percent) cost of supplementary benefits for injuries prior to October 1, 1995, and second injury program benefits for injuries prior to July 1, 1992. Without alteration by settlements, the liability is expected to extend to approximately the year 2057 for supplementary benefits and 2046 for second injuries.

The remaining \$9,523,000 is for claims in the Risk Management Fund (internal service fund), \$70,387,000 in the Employee Insurance Fund (internal service fund), and \$10,428,000 in the Public Employees Insurance Fund (enterprise fund).

Compensated Absences

The compensated absences liability for governmental activities and business-type activities of \$305,707,000 and \$152,748,000 respectively, are primarily for vacation leave and vested sick leave, which are payable as severance pay under specific conditions. Both amounts are paid in cash only when an employee terminates state employment. This obligation will be liquidated using future resources at unspecified times.

Arbitrage Liabilities

An arbitrage rebate payable to the federal government is required by the Tax Reform Act of 1986 and U.S. Treasury regulations and penalties if there are excess earnings on tax-exempt bond proceeds and debt service reserves. For fiscal year 2016, the state did not have excess earnings on tax-exempt bond proceeds and debt service.

Revenue Bonds Payable – Fiduciary Funds

On June 1, 2000, the state of Minnesota issued revenue bonds totaling \$29,000,000 on behalf of the state's three retirement systems. Minnesota Statutes, Section 356.89, authorized the issuance of the revenue bonds for the construction of an administrative office building. On August 9, 2012, the state of Minnesota issued revenue refunding bonds totaling \$21,880,000 on behalf of the state's three retirement systems at a true rate of 1.63 percent. Minnesota Statutes, Section 356B.10, authorized the issuance of the revenue bonds for a current refunding of the \$29,000,000 Retirement System Building Revenue Bonds, Series 2000, which were issued for the construction of an administrative office building. The revenue refunding bonds have an interest rate of 1.63 percent and are not general obligations of the state. The bonds are backed by the assets of the three retirement systems, excluding assets segregated for retired employees and assets of the systems' defined contribution funds.

The debt service payments are allocated to each system based on the percentage interest each has in the facility. For fiscal year 2016, principal and interest paid by the State Employees Retirement Fund (SERF), Teachers Retirement Fund (TRF), and General Employees Retirement Fund (GERF) was \$2,081,000. The total principal and interest remaining to be paid as of June 30, 2016, is \$17,646,000, payable through fiscal year 2025.

General Obligation and Revenue Bonds

The Metropolitan Council (MC) issued general obligation bonds for parks, solid waste disposal systems, sewers, and transportation projects, backed by the full faith and credit and taxing powers of MC. MC had \$1,549,118,000 in general obligation bonds and general obligation grant anticipation notes outstanding on December 31, 2015, net of unamortized discounts/premiums. During calendar year 2015, MC issued general obligation parks, transit, and wastewater bonds for a total of \$151,000,000.

The University of Minnesota (U of M) issued general obligation bonds and revenue bonds for capital projects. On June 30, 2016, the principal amount of general obligation bonds and revenue bonds outstanding, net of unamortized discounts/premiums, was \$916,266,000 and \$302,673,000, respectively.

⁽¹⁾ MC general obligation bonds include general obligation grant anticipation notes issued in calendar years 2012, 2014, and 2015.

⁽²⁾ MC interest is net of Build America Bonds federal subsidy.

The Housing Finance Agency (HFA) is authorized by Minnesota Statutes, Section 462A.06, to issue bonds and notes to provide funds for rehabilitation, construction, and mortgage loans, or to refund bonds to sponsors of residential housing for families of low and moderate income. The amount outstanding on these bonds at any time shall not exceed \$5,000,000,000, according to Minnesota Statutes, Section 462A.22. The principal amount of revenue bonds outstanding on June 30, 2016, net of unamortized discounts/premiums, was \$2,284,222,000.

The Office of Higher Education (OHE) is authorized by Minnesota Statutes, Section 136A.171 through Section 136A.175, to issue revenue bonds and notes to finance guaranteed loans for students attending eligible post-secondary educational institutions. The amount outstanding on these bonds at any one time, not including refunded bonds or otherwise defeased or discharged bonds, shall not exceed \$850,000,000, according to Minnesota Statutes, Section 136A.171. On June 30, 2016, the outstanding principal of revenue bonds was \$471,430,000, net of unamortized discounts/premiums.

The Public Facilities Authority (PFA) is authorized by Minnesota Statutes, Section 446A.04, to issue revenue bonds to make loans to municipalities for wastewater treatment facilities. The amount outstanding on these bonds at any time shall not exceed \$1,500,000,000, according to Minnesota Statutes, Section 446A.12. The principal amount of bonds outstanding on June 30, 2016, net of unamortized discounts/premiums, was \$1,073,878,000.

Loans and Notes Payable

The Metropolitan Council received loans from the Housing Finance Agency (component unit) in calendar years 2002 and 2004 for \$400,000, and \$730,000, respectively. In 2004, MC received a \$275,000 loan from Hennepin County Housing and Redevelopment Authority for a total of \$1,405,000 of loans outstanding on December 31, 2015. The terms of the loan agreements are 30 years, although they may be extended indefinitely if all the terms of the loan agreement are met.

In calendar year 2015, MC entered into an interest-free loan agreement with the Counties Transit Improvement Board. The loan was on a reimbursement basis and will fund the purchase of five light rail vehicles. The outstanding balance of the loan was \$1,949,000 on December 31, 2015.

On December 17, 2014, the University of Minnesota issued taxable commercial paper notes of \$51,620,000. U of M also issued tax-exempt commercial paper notes which are backed by U of M's self-liquidity. On June 30, 2016, the outstanding commercial paper notes were \$231,920,000. Commercial paper is short-term in nature and is classified as current liabilities on the financial statements.

On June 30, 2016, the Housing Finance Agency had in place a revolving line of credit with an outstanding balance of \$23,000,000. The line of credit is classified as a current liability on the financial statements.

The National Sports Center Foundation refinanced a majority of its existing debt with a new bank in 2012. On December 31, 2015, the total outstanding loans and notes payable was \$3,476,000.

Capital Leases

On December 1, 2004, the Metropolitan Council entered into an annual appropriation lease purchase agreement for land and facilities. The lease is subject to non-appropriation by MC, in which event the lease is terminated and there is no obligation of MC for future lease payments. MC intends to continue the lease through its entire term. On December 31, 2015, the present value of the minimum lease payments was \$7,875,000.

The University of Minnesota has six distinct capital leases. Two of the six are financed through third-party financing for the purchase of fleet vehicles. The remaining four capital leases have payments being paid directly to the lessor and represent leases for buildings. On June 30, 2016, the present value of the minimum lease payments was \$18,842,000.

Variable Rate Debt

University of Minnesota

To protect against future interest rate fluctuations on U of M's general obligation bonds and for budgeting purposes, U of M entered into an interest rate swap. This was a freestanding pay-fixed, receive-variable interest rate swap. At June 30, 2016, this swap was considered an ineffective hedge, where the change in fair value was included in investment income reported in the Statements of Activities. See Note 2 – Cash, Investments, and Derivative Instruments for more information.

Office of Higher Education

The rates on the taxable Series 2008A bonds and tax-exempt Series 2008B bonds are determined by a remarketing agent. The rates on Series 2008A bonds and Series 2008B bonds cannot exceed 15.0 percent and 12.0 percent, respectively. The interest on the Series 2008A and Series 2008B bonds was payable monthly and semi-annually, respectively. No principal payments are required until final maturity.

The rates on the tax-exempt Series 2011A and 2011B bonds are determined by a remarketing agent. The rates on the Series 2011A and 2011B bonds cannot exceed 12.0 percent. Interest payments on the Series 2011A and 2011B bonds was payable semi-annually and no principal payments were required until final maturity.

The rates on the tax-exempt Series 2010 bonds are fixed and range from 2.0 percent to 5.0 percent. The interest on the 2010 bonds was paid semi-annually. The annual effective interest rate was 4.40 percent for the year ended June 30, 2016.

The rates on the tax-exempt Series 2012B bonds are both fixed rate and variable rate. For the fixed rate bonds, the rate was set at 2.58 percent. For the variable rate bonds, the rate was a percentage of the one-month LIBOR plus a set margin and the rate changes monthly. The bonds have mandatory redemption dates at various years throughout the life of the bonds with a balloon payment due at final maturity.

All bond series are secured by the revenues derived by OHE from student loans financed by the proceeds of the bonds.

Housing Finance Agency

As of June 30, 2016, all of the HFA interest rate swap agreements have been determined to be effective hedges, as defined by GASB Statement No. 53 "Accounting and Financial Reporting for Derivative Instruments." The fair value was reported as a liability called "Interest Rate Swap Agreements." The inception-to-date change in fair value as of June 30, 2016, was reported in "Accumulated Decrease in Fair Value of Hedging Derivatives" deferred outflows of resources. Fair values were determined pursuant to GASB Statement No. 72 "Fair Value Measurement and Application," and the fair value hierarchy of interest rate swap agreements is determined to be Level 2. See Note 2 – Cash, Investment, and Derivative Instruments for more information.

Bond Defeasances

In prior years, U of M defeased various bonds by placing the proceeds from new bond issuances into an irrevocable trust to provide for all future debt-service payments on the old bonds. The amount defeased for special purpose revenue bonds 2006 Series was \$99,220,000 with \$99,220,000 outstanding as of June 30, 2016. The amount defeased for general obligation bonds 1982 and 1996 Series A was \$271,635,000 with \$106,275,000 outstanding as of June 30, 2016. Neither the outstanding indebtedness nor the related trust account assets for these bonds are included in U of M's financial statements as of June 30, 2016.

The types of goods or services provided by each segment are as follows:

- MnSCU Revenue Fund constructs, maintains, and operates college buildings for residence hall, student union, parking, and wellness purposes.
- MnSCU Itasca Residence Hall accounts for the construction of student housing at Itasca Community College.
- 911 Services Fund accounts for activities related to the enhancement of the state's 911 emergency response system.

Each segment has a revenue stream pledged to secure revenue bonds and provisions in the bond documents which require the separate reporting of each segment's financial operations and position.

Note 15 – Contingent Liabilities

University of Minnesota

The University of Minnesota (U of M) (component unit) issued state-secured revenue bonds to finance a football stadium on campus. In fiscal year 2006, the Minnesota Legislature appropriated from the General Fund \$10,250,000 per year not to exceed 25 years starting in fiscal year 2008 to pay a portion of the bonds. Grants from the General Fund are conditioned upon satisfaction of certain requirements by U of M. As of November 2016, there was \$85,490,000 outstanding on these bonds.

U of M issued state-secured revenue bonds to finance Biomedical Science Research facilities. In fiscal year 2008, the Minnesota Legislature appropriated from the General Fund amounts ranging from \$850,000 to \$15,550,000 per year not to exceed 25 years starting in fiscal year 2010 to pay a portion of the bonds. Grants from the General Fund are conditioned upon satisfaction of certain requirements by U of M. As of November 2016, \$177,170,000 was outstanding on these bonds. All required payments of the bonds are guaranteed by the state.

Housing Finance Agency

The Housing Finance Agency (HFA) (component unit) issued state-secured appropriation bonds to provide funds for rehabilitation, construction, and mortgage loans or to refund bonds to sponsors of residential housing for families of low and moderate income. In fiscal year 2008, the Minnesota Legislature appropriated from the General Fund up to \$2,400,000 per year for 22 years starting in fiscal year 2011 to pay a portion of the bonds. As of November 2016, there was \$26,015,000 outstanding on these bonds.

HFA issued state-secured appropriation bonds to finance housing infrastructure. In fiscal year 2012, the Minnesota Legislature appropriated from the General Fund up to \$2,200,000 per year starting in fiscal year 2014 through 2036 to pay a portion of the bonds. In fiscal year 2014, the Minnesota Legislature appropriated from the General Fund an additional \$6,400,000 per year beginning in fiscal year 2016 through 2038 to pay a portion of the bonds. All required payments of the bonds are guaranteed by the state. As of November 2016, \$99,680,000 was outstanding on these bonds. HFA issued additional state-secured appropriation bonds of \$11,335,000 in August 2016. See Note 21 – Subsequent Events.

In fiscal year 2015, the Minnesota Legislature authorized HFA to issue an additional \$10,000,000 of housing infrastructure bonds and appropriated from the General Fund up to an additional \$800,000 per year beginning in fiscal year 2018 through 2039. HFA issued state-secured appropriation bonds of \$7,290,000 in August 2016. See Note 21 – Subsequent Events.

School District Credit Enhancement Program

Minnesota Statutes, Section 126C.55, established a school district credit enhancement program. If a school district is unable to pay its debt service due on school district and intermediate school district certificates of indebtedness, capital notes, certificate of participation, or general obligation bonds enrolled in the program, the Minnesota Legislature appropriates annually from the General Fund the amounts necessary to make the debt service payments. This amount is repaid to the General Fund through a reduction in state aid payable to the school district or intermediate school district, or the levy of an ad valorem tax which may be made with the approval of the commissioner of Education. The total amount of debt enrolled in the program as of November 2016 was \$14.4 billion. The state has not had to make any debt service payments on behalf of school districts or intermediate school districts under this program.

City and County Credit Enhancement Program

Minnesota Statutes, Section 446A.086, established a city and county credit enhancement program. If a city or county is unable to pay its debt service due on general obligation bonds enrolled in the program issued for the construction, improvement, or rehabilitation of certain projects, the Minnesota Legislature appropriates annually from the General Fund the amounts necessary to make the debt service payments. This amount is repaid to the General Fund through a reduction in state aid payable to the city or county, or the levy of an ad valorem tax which may be made with the approval of the Public Facilities Authority (component unit). As of November 2016, the total general obligation bonds guaranteed by the state through 2045, was \$629 million.

Note 16 – Equity

Restricted Net Position – Government-wide Statement of Net Position

The following table identifies the primary government's restricted net position in greater detail than is presented on the face of the financial statements:

Primary Government Restricted Net Position Balances As of June 30, 2016 (In Thousands)

Net Position Deficits

The following funds have net position deficits for the fiscal year ended June 30, 2016.

Net Position Deficits As of June 30, 2016 (In Thousands)		Net Position
Enterprise Funds		
Behavioral Services	\$	(15,443)
State Auditor		(3,539)
State Lottery		(9,751)
State Operated Community Services		(26,097)
Internal Service Funds		
Central Services	\$	(974)
MN.IT Services		(179,884)
Pension Trust Fund		
Legislators Retirement	\$	(41)

The fiscal year 2015 implementation of GASB Statement No. 68 "Accounting and Financial Reporting for Pensions" required the recording of the net pension liability and the deferred inflows and outflows of resources associated with pensions. This caused the nonmajor enterprise and internal services funds noted in the table above to end fiscal year 2016 in a deficit net position. The actuarially determined amounts are likely to vary significantly from year to year and are managed by the retirement systems and the Minnesota Legislature to ensure the defined benefit plans are adequately funded to pay plan benefits to employees participating as they become due. For these reasons, the state does not include the pension-related liabilities or deferred inflows and outflows of resources in the rate-setting process for managing these funds as long as the funds are contributing the statutory required contributions. The amounts will continue to be monitored by the retirement systems administering these plans and the Minnesota Legislature.

Two of the enterprise funds have net position deficits for reasons in addition to the implementation of GASB Statement No. 68, and one pension trust fund has a net position deficit for reasons unrelated to GASB Statement No. 68. See the following for explanations:

Behavioral Services Fund (enterprise fund) has been experiencing a change in population served and service rates over the past few years which resulted in an annual deficit net position. During the 2015 Legislative Session, the Minnesota Legislature provided a supplemental appropriation. In addition, the Centers for Medicare and Medicaid approved a complex committed service rate in September 2016 which was retroactive to October 2015. The additional rate is expected to partially reduce the operating loss of the program but will not remove the need for the on-going appropriation.

State Operated Community Services Fund (enterprise fund) has seen a steady decline in operating income which resulted in a deficit net position. To maintain operations, the Department of Human Services transferred appropriated fiscal year 2017 funds from another state-operated program. Legislative action in 2016 provided one-time funds to replace the borrowed funds and provided fiscal year 2017 operating funds to cover the anticipated operating losses while the program is redesigned.

Legislators Retirement Fund (pension trust fund) has a net position deficit because it operates on a pay-as-you-go basis. See Note 8 – Pension and Investment Trust Funds for additional information.

Note 17 – Risk Management

Primary Government

The state is exposed to various risks of loss related to torts; to theft of, damage to, or destruction of assets; to errors and omissions; and to employer obligations. The state manages these risks through the Risk Management Fund (internal service fund), a self-insurance fund, and other insurance and self-funding mechanisms. All health plans are self-insured.

Risk Management Fund

State agencies may elect to participate in the Risk Management Fund (internal service fund), which offers auto, liability, property, and related coverage. The agencies pay a premium to participate in this coverage. All agencies that own state vehicles are required to purchase automobile liability coverage from the fund.

The property coverage offers an agency a range of deductibles from \$1,000 through \$250,000 per loss. The fund covers the balance of the claim up to \$1,000,000. The reinsurance program provides coverage up to \$1,000,000,000. Once annual aggregate losses paid by the Risk Management Fund reach \$2,500,000 in any one fiscal year, the reinsurer will provide coverage in excess of a \$25,000 maintenance deductible for each claim. Agencies electing not to participate in the Risk Management Fund, and not able to cover the losses from their operating budget, must seek other reimbursements or additional appropriations from the Minnesota Legislature.

The liability coverage is up to the statutory limit (tort claims cap) of \$500,000 bodily injury and property damage per person, and \$1,500,000 bodily injury and property damage per occurrence. The casualty reinsurance program provides \$10,000,000 excess of a \$1,000,000 retention to protect the state from auto and general liability claims that are extra-territorial, as well as for suits brought in federal court which would be outside the state's jurisdiction.

The Risk Management Fund purchases insurance policies for state agencies seeking insurance for specialized insurance needs for which the state does not self-insure. These coverages include aviation, medical malpractice, and foster care liability. The premiums for these policies are billed back to the agencies at cost.

Minnesota Statutes, Section 15.38, Subdivision 8, permits the purchase of insurance on state-owned buildings and contents.

All losses of state property are covered by programs of the Risk Management Fund, by insurance policies purchased in the commercial market, or are uninsured and become the liability of the state.

Tort Claims

State agencies may elect to participate in the Risk Management Fund and obtain coverage for selected exposures, subject to the tort claims limits. Agencies not electing to participate in the Risk Management Fund are responsible for paying the cost of claims from their operating budget. The Minnesota Legislature also makes an annual Tort Claim Appropriation to cover claims that would unduly impair agency operations. Agencies not able to cover claims through these two avenues must seek additional appropriations from the Minnesota Legislature. Tort claims brought outside Minnesota state jurisdiction and in federal court have unlimited liability exposure.

Workers' Compensation

The state, as a self-insured employer, assumes all risks for workers' compensation-related claims and provides workers' compensation insurance coverage for state employees. The program provides a full-service workers' compensation insurance program, including workplace safety and loss control, rehabilitative and return to work services, claim services, and legal services.

The program is required by state law to be a member of the Workers' Compensation Reinsurance Association (WCRA). WCRA reimburses the state for catastrophic workers' compensation claims that exceed the current retention amount of \$2,000,000.

The recovery of claim costs that are less than the WCRA retention amount is the responsibility of each state agency. State agencies may participate in either a 'pay-as-you-go' revolving fund or a premium pool cost allocation fund. These costs are paid from each agency's operating budget.

The state estimates the liability for reported claims that have not yet been settled. These costs include anticipated indemnity and medical benefits related to the reported claim.

State Employee Group Insurance Program

The Minnesota Legislature created the Employee Insurance Fund, an internal service fund dedicated solely for the purpose of this program. The fund is administered by SEGIP, to provide eligible employees and other eligible persons with life insurance and hospital, medical, and dental coverage through provider organizations. The Employee Insurance Fund is not associated with any other public risk pools. A contingency reserve is maintained to increase the controls over medical plan provisions and other insurance costs for the purpose of moderating premium and claim fluctuations, and to assume all inherent risk associated with the self-funded insurance programs, which would also include losses to the fund.

SEGIP provides benefits coverage to employees by contracting with carriers through a network of providers throughout the state. SEGIP had settlements of \$4,963,862 greater than coverage during the fiscal year ended June 30, 2016.

In January 2000, the fund became fully self-insured for medical coverage and assumed all liability for medical claims. The self-funded programs within the fund establish claim liabilities based on estimates of the ultimate cost of claims (including future claim adjustment expenses) that have been reported but not paid and of claims that have been incurred but not reported. These estimates are agreed to by the insurance carriers and the state and are reviewed for accuracy and reasonableness. The estimates are based on claim experience and claim lag timetables provided by the carriers and do not include additional estimates for subrogation, salvage, or unallocated claim adjustments.

Public Employees Insurance Program

The Public Employees Insurance Program (PEIP) is a public entity risk pool currently operating as an insurance program. The risk pool was created by the Minnesota Legislature to provide public employees and other eligible persons with life insurance and hospital, medical, and dental coverage to result in a greater utilization of government resources and advance the health and welfare of the citizens of the state. The enabling legislation for PEIP is Laws of Minnesota, 1987, codified as Minnesota Statutes, Section 43A.316. Beginning in fiscal year 1998, medical benefits provided through PEIP became a self-insured program.

PEIP's membership as of June 30, 2016, was 9,880 members and their dependents. The members of the pool include 79 school districts, 27 cities/townships, 6 counties, and 12 other public employers. PEIP provides medical benefits coverage to public employees through a self-insured statewide program administered through several private-sector claims administrators/managed care organizations, as well as fully insured life and dental coverage. The pool will be self-sustaining through member premiums. Stop-loss coverage was discontinued effective January 1, 2015.

The pool establishes claims liabilities based on estimates of the ultimate costs of claims (including future claim adjustment expenses) that have been reported but not settled and of claims that have been incurred but not reported.

Component Units

Housing Finance Agency

The Housing Finance Agency (HFA) is exposed to various insurable risks of loss related to tort; to theft of, damage to, or destruction of assets; to errors or omissions; and to employer obligations. HFA manages these risks through the primary government's insurance plans including the primary government's Risk Management Fund (internal service fund) and through purchased insurance coverage. HFA retains the risk of loss, although there have been no settlements or actual losses in excess of coverage in the last three years. HFA participates in the SEGIP, which is administered by the Employee Insurance Fund (internal service fund). This program provides life insurance and hospital, medical, and dental coverage through provider organizations. HFA also participates in the primary government's Workers' Compensation Program. Annual premiums are assessed by the program based on average costs and claims.

Metropolitan Council

The Metropolitan Council (MC) is exposed to various risks of loss related to torts; to theft of, damage to, and destruction of assets; to errors and omissions; and to employer obligations. MC both purchases commercial insurance and self-insures for these risks of loss. MC has not experienced any significant reductions in insurance coverage from the prior year. MC has not had any settlements in excess of commercial coverage for the past three years.

MC purchases general liability insurance to protect all divisions of MC and recognizes a current liability for incurred, reported claims, and a long-term liability for claims incurred but not reported. Claims liabilities are calculated considering recent claim settlement trends including frequency and amount of payouts. Minnesota Statutes, Section 466.04, generally limits MC's tort exposure to \$500,000 per claim and \$1,500,000 per occurrence for a claim arising on or after July 1, 2009. For claims arising earlier, the limits are \$400,000 per claim and \$1,200,000 per occurrence. In addition, an amount equal to twice these limits applies if the claim arises out of the release or threatened release of a hazardous substance.

MC has self-administered workers' compensation claims for all divisions. Liabilities are reported when information is available that suggests there has been an occurrence with probable loss incurred. Liabilities include an amount for claims that have been incurred but not reported. Claims liabilities are re-evaluated periodically to consider recently settled claims, the frequency of claims, and other economic and social factors. Liabilities for incurred losses to be settled by fixed or reasonably determinable payments over a long period of time are reported at their present value using a discount rate of 3.02 percent. The self-insurance retention limit for workers' compensation is \$1,960,000 per single loss. For claims above the retention limit, the Workers' Compensation Reinsurance Association reimburses MC.

MC claims include both workers' compensation claims and \$328,000 for the Family Self Sufficiency program escrow accounts.

University of Minnesota

The University of Minnesota (U of M) is self-insured for medical malpractice, general liability, directors' and officers' liability, and automobile liability through RUMINCO, Ltd., a wholly-owned single parent captive insurance company. Claims are reported to a third-party administrator, which pays expenses and estimates claim liabilities. The total expense of a claim is estimated and booked as a liability when it is probable that a loss has occurred and the amount of the loss can be reasonably estimated in the year in which it is reported. In addition, an actuarial liability is established for incurred but not reported claims using a discount rate of 0.75 percent.

U of M is also self-insured for workers' compensation through an internally maintained fund. The internal fund for workers' compensation is maintained only to fund current year expected payouts. Excess insurance is maintained through the Workers' Compensation Reinsurance Association. Each year, an actuarial estimate of U of M's liability for workers' compensation is compiled and recorded, but the liability is not funded in a separate reserve.

U of M's medical (health) and dental coverage for faculty and staff is a self-insured program. Under the plan, U of M pays claims, while the administration of the program is handled by independent administrators. U of M's graduate assistant medical plan and student health plan are also self-insured. Each year, an actuarial estimate of U of M's liability for medical claims, including incurred but not reported claims, is recorded.

Note 18 – Budgetary Basis vs. GAAP

Actual revenues, transfers-in, expenditures, encumbrances, and transfers-out on the budgetary basis do not equal those on the GAAP basis in the Governmental Funds Statement of Revenues, Expenditures and Changes in Fund Balances for the General Fund. This inequality results primarily from the differences in the recognition of accruals, reimbursements, deferred revenue, intrafund, and loan transactions. In addition, encumbrances are recognized as expenditures in the year encumbered on a budgetary basis. The modified accrual basis of accounting recognizes expenditures when the goods or services are received, regardless of the year funds are encumbered. The GAAP General Fund also includes several funds that are not included in the budgetary General Fund. A reconciliation of the fund balances under the two basis of accounting for the General Fund is provided in the following table.

General Fund Reconciliation of GAAP Basis Fund Balance to Budgetary Fund Balance As of June 30, 2016 (In Thousands)	
GAAP Basis Fund Balance:	\$ 3,047,091
Less: Encumbrances ⁽¹⁾	259,974

Budgetary Reserve	<u>(1,969,057)</u>
Budgetary Basis:	
Unassigned Fund Balance	<u>\$ 968,690</u>
⁽¹⁾ Encumbrances related to funds included in the budgetary General Fund.	

Note 19 –Litigation

- 1) Payment of tort claims against the state is made from funds appropriated by the Minnesota Legislature to agencies for their general operations to the extent such funds are available without unduly hindering the operation of the agency, from appropriations of dedicated receipts if practicable, or from funds appropriated for the payment of tort claims. The Tort Claims appropriations for each of the fiscal years ending June 30, 2016, and 2017 are \$761,000. The maximum limit of liability for tort claims arising out of a single occurrence in Minnesota on or before January 1, 2000, and before January 1, 2008, is \$1,000,000. The maximum limited liability for any one claim is \$300,000 for claims arising before August 1, 2007, and \$400,000 for claims arising on or after August 1, 2007, and before July 1, 2009, for any one claim and the maximum limits of liability for tort claims arising in Minnesota on or after January 1, 2008, and prior to July 1, 2009, is \$1,200,000 for any number of claims arising out of a single occurrence. For tort claims arising in Minnesota on or after July 1, 2009, the maximum limits are \$500,000 for any one claim and \$1,500,000 for any number of claims arising out of a single occurrence.
- 2) Lawsuits based on non-tort theories furnish another basis for potential liability. The following cases, or categories of cases, in which the state, its officers or employees, are defendants have been noted because an adverse decision in each case or category of case could result in an expenditure of state moneys of over \$15 million in excess of current levels.
 - a. At any one time, there are hundreds of Minnesota Department of Transportation (MnDOT) eminent domain actions being litigated in district courts throughout the state. There is a continuous flow of such cases, with the actual number depending on many factors such as the number of parcels of land that can be acquired by direct purchase, the construction needs of the department, and revenues available for highway projects. In the aggregate, the potential cost to the state for property which has been, or will be, acquired exceeds \$15 million. Liability arising out of decisions unfavorable to the state may impact the state's Trunk Highway Fund (special revenue fund).
 - b. *A.W. Kuettel & Sons, Inc., et al. v. Essar Steel Minnesota LLC, et al.* (Itasca County District Court) and *TrueNorth Steel, Inc. v. Essar Steel Minnesota LLC* (Itasca County District Court). These mechanics' lien suits involve numerous parcels of property surrounding the Essar Steel Minnesota Integrated Pellet Plant in Nashwauk, Minnesota. The state is a named defendant in these suits because it owns some of the subject parcels. The state's parcels were leased to Essar Steel Minnesota LLC (Essar) for mining purposes; however, Essar filed for Chapter 11 bankruptcy. A.W. Kuettel, TrueNorth Steel, and approximately eight other contractors and subcontractors, which supplied materials and/or labor to the properties for Essar, have filed claims and cross-claims against the state and the other defendants that total approximately \$42 million exclusive of interest and attorneys' fees. The claims allege the state is liable for the amounts owing because the state has an ownership interest in some of the properties, had knowledge of the improvements, will be unjustly enriched by the improvements, and violated the Public Contractors' Performance and Payment Bond Act by not obtaining payment bonds for these matters. These suits are currently stayed and will remain stayed until further order in Essar's bankruptcy case.
 - c. *Foster v. State of Minnesota et al.* (U.S. District Court for the District of Minnesota). Plaintiff sued the state, the current Attorney General, and the Commissioner of the Department of Management and Budget alleging an unconstitutional taking of her property on the basis that the state released her statutory consumer fraud claims against major tobacco companies as part of the state's 1998 tobacco settlement. The 1998 settlement provided for up-front and annual payments to the state and injunctive relief, in exchange for which the state released its statutory consumer protection claims against the settling tobacco companies. In 2012, the Minnesota Supreme Court held that this release included related statutory consumer protection claims that might be prosecuted by private Minnesota consumers under the authority provided in Minnesota Statutes, Section 8.31, Subdivision 3a. Plaintiff previously brought a taking claim on the same theory in state court, which was dismissed for failure to state a claim and on the basis of the applicable statute of limitations. The Minnesota Court of Appeals affirmed the dismissal on the statute of limitations

basis without addressing the merits of the takings claim. The Minnesota Supreme Court denied plaintiff's petition for certiorari review. Plaintiff then re-filed the takings claim in federal court, alleging that her federal takings claim is sufficiently distinct from her state takings claim and that it can be pursued separately in federal court. The state filed a motion to dismiss which is fully briefed and set for argument on December 14, 2016.

- d. *Guggenberger et al. v. State, et al. and Gordon, et al. v. DHS, et al.* (United States District Court, District of Minnesota). In *Guggenberger*, Plaintiffs filed suit in August 2015 alleging that the Department of Human Services' operation of the Medicaid Home and Community Based Waiver Services ("HCBS") programs violates (1) the reasonable promptness provision of the Medicaid Act; (2) the integration mandate of the Americans with Disabilities Act; (3) the free choice provision of the Medicaid Act; (4) Plaintiffs' right to Due Process; and (5) Section 504 of the Rehabilitation Act. Plaintiffs seek class certification. Plaintiffs amended their complaint, and Defendants moved to dismiss. The district court granted the motion to dismiss in part and denied it in part (it dismissed the state and DHS as parties, but did not dismiss any claims). Plaintiffs request relief to require the state to fund and provide Waiver Services to all waiver-eligible individuals currently on a waiting list, and that cost likely exceeds \$15 million. In *Gordon*, the plaintiffs receive Waiver Services and brought claims under the Medicaid Act, the Fourteenth Amendment, the Americans with Disabilities Act, and the Rehabilitation Act, seeking, among other things, access to "individualized housing services." Defendants brought a motion to dismiss, which is now fully briefed and scheduled for hearing in January 2017. The court also ordered discovery to proceed.
- e. *Hall v. State* (Ramsey County/Minnesota Court of Appeals). In a putative class action filed in 2015, four plaintiffs challenge Minnesota's Uniform Disposition of Unclaimed Property Act ("MUPA"), alleging it deprives them of property without due process and without just compensation as no interest is paid to owners when they claim their unclaimed property. Plaintiffs seek class certification, damages, declaratory and injunctive relief, and attorneys' fees. The district court denied defendants' motion to dismiss and certified the takings and due process claims to the court of appeals as important and doubtful. The matter is currently under consideration by the court of appeals. Plaintiffs allege that the state holds over \$600 million in unclaimed property. If the class is certified and Plaintiffs prevail on their claims, the state's exposure may exceed \$15 million.
- f. *H.B Fuller Co. and Subsidiaries v. Commissioner of Revenue* (Minnesota Tax Court). This is a corporate franchise tax case filed in October 2016 involving computation of the research credit allowed by Minnesota Statutes, Section 290.068. Department of Revenue estimates that if similarly situated taxpayers make a similar claim, the total exposure may exceed \$15 million.
- g. *Hospital Surcharge Litigation*. There are numerous appeals by providers, including various hospital systems, challenging the imposition of a tax on net patient revenue under Minnesota Statutes, Section 256.9657. Many of the appeals challenge the imposition of the tax on revenues the appellants claim they receive from the Federal Employees Health Benefits Act (FEHBA) and the Tricare Program (collectively known as "FEHBA/TRICARE"), two health insurance programs that serve federal employees, federal retirees, and active and retired members of the United States military and their families, on the basis that the state tax is preempted. Some appellants also appeal on the basis that a particular service provided is not subject to the tax. The Minnesota Supreme Court held that the state tax is not preempted. The time for the hospitals to seek review at the United States Supreme Court has not expired. In the aggregate, the state's exposure from all of these appeals likely exceeds \$15 million.
- h. *The Jamar Company d/b/a Asdco v. State of Minnesota, et. al.* (Itasca County District Court) and *Hammerlund Construction Inc., et al. v. State of Minnesota, et. al.* (Itasca County District Court). These mechanics' lien suits involve similar claims but different tax-forfeited properties in Itasca County. The subject properties were leased by Itasca County to Magnetation LLC (Magnetation) for mining purposes; however, Magnetation filed for Chapter 11 bankruptcy. The state is a named defendant in these suits because it owns the subject properties in trust for Itasca County, the

taxing district, which has the authority to manage the properties. Jamar, Hammerlund, and approximately 20 other contractors and subcontractors, which supplied materials and/or labor to the properties for Magnetation, have filed claims and cross-claims against the state and the other defendants that total approximately \$22.2 million exclusive of interest and attorneys' fees. The claims allege the state is liable for the amounts owing because the state has an ownership interest in the properties, had knowledge of the improvements, will be unjustly enriched by the improvements, and violated the Public Contractors' Performance and Payment Bond Act by not obtaining payment bonds for these matters. These suits are currently stayed and will remain stayed until further order in Magnetation's bankruptcy case.

- i. *Kimberly-Clark Corporation & Subsidiaries v. Commissioner of Revenue* (Minnesota Tax Court). The taxpayer filed an appeal in the Minnesota Tax Court challenging the Commissioner's denial of the taxpayer's refund claims. The taxpayer alleges it is entitled to elect a corporate tax apportionment formula set forth in the Multistate Tax Compact, even though the Minnesota Legislature repealed that provision of the Compact from the Minnesota Statutes in 1987. Resolution of this case may impact the Commissioner's assessments against other multistate tax filers and may impact refund claims corporate taxpayers have and may file with the Commissioner. As of February 2015, multiple corporate taxpayers had filed about \$180 million in refund claims, with estimated potential total refunds of \$700 million. On June 19, 2015, the Minnesota Tax Court granted summary judgment to the Commissioner of Revenue. The taxpayer appealed to the Minnesota Supreme Court. On June 22, 2016, the Minnesota Supreme Court dismissed the taxpayer's claims, finding that the claims failed as a matter of law. The taxpayer filed a petition for writ of certiorari to the U.S. Supreme Court on October 20, 2016.
- j. *Kiminski v. Hunt et al (formerly Beach/Ness v. Hunt et al.)* and similar matters. In January of 2013, the Department of Natural Resources (DNR) notified approximately 5,000 residents that their drivers' license data may have been improperly viewed by former DNR employee John Hunt. Since the notification, five putative class actions have been filed in federal court against DNR, the Department of Public Safety, and various state employees in their individual and official capacities alleging violations of federal and state law resulting from Hunt's conduct. The suits have all been consolidated and a consolidated amended complaint has been filed. The suits include claims for relief under the federal Drivers Privacy Protection Act and 42 U.S.C. § 1983. The plaintiffs seek statutory damages, actual damages, punitive damages, injunctive relief, and attorneys' fees. Other similar cases have been filed against other state employees in their individual and official capacities alleging plaintiffs' drivers' license data may have been improperly viewed by state employees. Motions to dismiss were filed and granted by the district court in each case. The Eighth Circuit Court of Appeals has affirmed the dismissal of state defendants in each case it has decided. Two decisions remain pending in the Eighth Circuit and several other cases remain pending in the district court while it addresses the claims of non-state defendants. The U.S. Supreme Court denied certiorari review of the only case in which the plaintiffs sought review.
- k. *McLane Minnesota, Inc. v. Commissioner of Revenue* (Minnesota Tax Court). Stipulations for dismissal have been filed, but orders for dismissal have not yet been issued.
- l. *Minnesota Energy Resources Corp. (MERC) v. Commissioner of Revenue* (Minnesota Tax Court). The plaintiff, a natural gas pipeline corporation, appeals the market valuations made of the pipeline corporation's real, personal, and operating property subject to assessment in 53 counties in Minnesota. The separate appeals for tax years 2008-2012 are consolidated. MERC has also filed separate appeals for 2013 and 2014. The pipeline corporation argues: (1) that the Commissioner has failed to correctly determine the market value (as defined in Minnesota Statutes, Section 272.03, Subdivision 8) of the pipeline's property in Minnesota and in its determination has employed methods which overstate the market value and arrived at a value in excess of market value; and (2) that the pipeline's property in Minnesota was unfairly and unequally assessed compared to property in the same class and the property of similarly situated taxpayers in violation of Minnesota Statutes, Section 273.11, the Equal Protection Clause; the Uniformity of Taxation Clause (Art. X, Sec. 1), and the Due Process Clause of the Minnesota Constitution and the Equal Protection and Due Process Clause of U.S. Constitution. The

apportionable 2008 market value for this property is \$126 million under the Minnesota rule in effect for 2008. A new Minnesota rule governs calculation for 2009-2011 tax years. MERC objects to both the old and new rules. Specifically, MERC disagrees with how the capitalization rate is calculated, the fact that external obsolescence is not included in depreciation and the weighting of cost factors and, thus, claim that the property tax assessments are not applied evenly throughout Minnesota. In September 2014, the Tax Court issued a decision in the 2008-2012 consolidated cases. The decision upheld certain of MERC's claims and denied other claims. For all five years combined, the net result of the Tax Court's decision is that MERC would receive a total refund of \$1.35 million, only 30 percent of which would be the state's share. Both sides appealed to the Supreme Court with oral argument held on November 4, 2015. The 2013 and 2014 appeals have been stayed pending final resolution of the 2008-2012 cases. On November 9, 2016, the Minnesota Supreme Court issued an opinion affirming in part and reversing in part the Minnesota Tax Court's decision, and it remanded the case for further proceedings.

- m. *Walgreens Specialty Pharmacy v. Commissioner of Revenue* (Minnesota Tax Court). This is a Legend Drug Use Tax case. Appellant sought a refund totaling \$14,434,159.70 for tax years 2008 through 2013, which was denied. Appellant argues that the Department of Revenue misapplied the applicable statute. Appellant also argues that the use tax is unconstitutional under the Due Process and Commerce Clauses of the United States Constitution and is also preempted by federal law. The case is currently in discovery and dispositive motions must be filed and served by May 19, 2017. The Department of Revenue estimates that if similarly-situated taxpayers successfully brought refund claims, the total exposure would exceed \$139 million.

Note 20 – Prior Period Adjustment, Change in Reporting Entity and Change in Fund Structure

Primary Government

Prior Period Adjustments

During fiscal year 2016, the Department of Natural Resources increased land in governmental activities for land that was previously donated but unrecorded as well as adjusting the value of land that was disposed of at fair value instead of at historical cost. This change resulted in an increase in Land. A prior period adjustment of \$93.3 million was reflected in Governmental Activities in the government-wide financial statements. See Note 6 – Capital Assets for additional information.

During fiscal year 2016, the Department of Human Services calculated the impact of a federal law change that increased the federal share of expenditures; thus, overstating the state's share. This resulted in a prior period adjustment of \$33.7 million in the General Fund and \$4.7 million in the Health Care Access Fund (special revenue fund). These amounts also resulted in a prior period adjustment of \$38.4 million in Governmental Activities in the government-wide financial statements.

During fiscal year 2016, the Department of Revenue identified an overstatement of accounts receivable in the prior year. A \$45.7 million prior period adjustment was reflected in Governmental Activities in the government-wide financial statement as a result of this overstatement of revenue.

Change in Reporting Entity

Minnesota Statutes, Section 353G, allows volunteer firefighters to be covered by the Volunteer Firefighter Retirement Fund (pension trust fund). During fiscal year 2016, fourteen firefighter groups joined the Volunteer Firefighter Retirement Fund managed by the Public Employees Retirement Association. Investment balances of \$3.4 million were reported as a change in reporting entity in the Volunteer Firefighter Retirement Fund.

Change in Fund Structure

Minnesota Statutes, Chapter 353G, allows volunteer firefighters to be covered by the Volunteer Firefighter Retirement Fund (pension trust fund). During fiscal year 2016, six firefighter groups moved from the volunteer fire accounts, part of the Supplemental Retirement Fund (investment trust fund), into the Volunteer Firefighter Retirement Fund managed by the Public Employees Retirement Association. The transfer was reported as a change in fund structure of \$3.9 million in the Supplemental Retirement Fund and the Volunteer Firefighter Retirement Fund.

Note 21 – Subsequent Events

Primary Government

On July 28, 2016, Fitch Ratings upgraded the state's general obligation bond rating to AAA from AA+.

On August 11, 2016, the state sold \$265.9 million of general obligation state various purpose bonds Series 2016A at a true interest rate of 2.29 percent, \$215.0 million of general obligation state trunk highway bonds Series 2016B at a true interest rate of 2.13 percent, \$7.5 million general obligation taxable state various purpose bonds Series 2016C at a true interest rate of 1.38 percent, and \$310.6 million of general obligation state various purpose refunding bonds Series 2016D at a true interest rate of 1.57 percent. These bonds are backed by the full faith and credit and taxing powers of the state.

On November 1, 2016, the state sold \$91.7 million of 911 revenue refunding bonds (Public Safety Radio Communications System Project) Series 2016 at a true interest rate of 1.06 percent. The proceeds of the bonds will be used to defease and refund, on an advance refunding basis, the outstanding maturities of the state's 911 Revenue Bonds Series 2008, Series 2009, Series 2011, and pay the costs associated with the issuance of the bonds. The revenue bonds are secured by the 911 fee charged to subscribers connected to the public switched networks that furnish service capable of originating a 911 emergency telephone call in the state.

On November 2, 2016, the state sold \$11.8 million of state General Fund appropriation bonds taxable Series 2016A at a true interest rate of 2.83 percent. The bonds were issued to finance the completion of the next phase of the Lewis and Clark Regional Water System Project, including the costs associated with the completion of a water transmission pipeline in southwest Minnesota. For information on the state appropriation for these bonds, see Note 12 – Long-Term Liabilities – Primary Government.

Component Units

On August 16, 2016, the Housing Finance Agency (HFA) issued state appropriation bonds (Housing Infrastructure) for \$10.4 million Series 2016A at a true interest rate of 2.80 percent, \$0.9 million Series 2016B at a true interest rate of 1.14 percent, and \$7.3 million Series 2016C at a true interest rate of 2.68 percent. The proceeds of the bonds will be used to provide money to fund housing infrastructure loans and to pay the costs of issuance of the Series Bonds. The state will provide to HFA up to an additional \$800,000 per year beginning in fiscal year 2018 through fiscal year 2039 for the payment of the bonds. For information on the state appropriation for these bonds, see Note 15 – Contingent Liabilities.

2016
Comprehensive
Annual
Financial Report

Required Supplementary Information

2016 Comprehensive Annual Financial Report
Required Supplementary Information

Modified Approach for Infrastructure

The state uses the modified approach for reporting selected infrastructure assets. Under this approach, the state expenses certain maintenance and preservation costs and does not report depreciation expense. Assets accounted for under the modified approach include approximately 29,000 lane miles of pavement and approximately 3,000 bridges and tunnels maintained by the state.

To utilize the modified approach, the state is required to:

- Maintain an asset management system that includes an up-to-date inventory of eligible infrastructure assets.
- Perform condition assessments of eligible assets and summarize the results using a measurement scale.
- Estimate each year the annual amount to maintain and preserve the assets at the condition level established and disclosed by the state.
- Document that the assets are being preserved approximately at, or above, the established condition level.

Lane Miles of Pavement

Measurement Scale

The Minnesota Department of Transportation (MnDOT) uses three pavement condition indices to determine the condition of the trunk highway system: Present Serviceability Rating (PSR), Surface Rating (SR), and Pavement Quality Index (PQI). The PSR is a measure of pavement smoothness, the SR measures pavement distress (cracking), and the PQI is a composite index equal to the square root of the PSR multiplied by the SR.

The five qualitative categories used to describe pavement condition are shown in the table below:

Description	PQI Range	PSR Range	SR Range
Very Good	3.7 - 4.5	4.1 - 5.0	3.3 - 4.0
Good	2.8 - 3.6	3.1 - 4.0	2.5 - 3.2
Fair	1.9 - 2.7	2.1 - 3.0	1.7 - 2.4
Poor	1.0 - 1.8	1.1 - 2.0	0.9 - 1.6
Very Poor	0.0 - 0.9	0.0 - 1.0	0.0 - 0.8

The PQI is used as the index for determining whether the pavement infrastructure is being maintained in a serviceable level. The PQI is an overall index, combining both pavement smoothness (PSR) and cracking (SR).

Established Condition Level

Principal arterial pavements will be maintained at 3.0 PQI (good) or higher, and all other pavements will be maintained at 2.8 PQI (good) or higher.

Assessed Conditions

The state assesses condition on 100 percent of the pavement surfaces at least once every two years.

	Principal Arterial Average PQI	Non-Principal Arterial Average PQI
2015	3.42	3.32
2014	3.41	3.35
2013	3.40	3.26

Bridges and Tunnels

Measurement Scale

MnDOT utilizes three performance measures to maintain and improve the bridge system: Structural Condition Rating, Geometric Rating, and Posted Bridge and Bridge Load Carrying Capacity. The Structural Condition Rating is used to determine if the bridge system is being maintained at a serviceable level for the condition of the bridges under MnDOT's jurisdiction.

The Structural Condition Rating is a broad measure of the structural condition of a bridge. Each bridge is rated as Good, Fair, or Poor by using three National Bridge Inventory (NBI) condition codes and two NBI appraisal ratings to place each bridge in a category.

The three NBI condition codes are Deck Condition, Superstructure Condition, and Substructure Condition. The two NBI appraisal ratings are Structural Evaluation and Waterway Adequacy. Both the condition codes and the appraisal ratings use a scale of 0 (failed) through 9 (excellent).

Rating	Description
9	Excellent.
8	Very good.
7	Good. Some minor problems.
6	Satisfactory. Structural elements show some minor deterioration.
5	Fair. All primary structural elements are sound, but may have some minor section loss, cracking, spalling, or scour.
4	Poor. Advanced section loss, deterioration, spalling, or scour.
3	Serious. Loss of section, deterioration, spalling, or scour have seriously affected primary structural components. Local failures are possible. Fatigue cracks in steel or shear cracks in concrete may be present.
2	Critical. Advanced deterioration of primary structural elements. Fatigue cracks in steel or shear cracks in concrete may be present or scour may have removed substructure support. Unless closely monitored, it may be necessary to close the bridge until corrective action is taken.
1	Imminent failure. Major deterioration or section loss present in critical structural components or obvious vertical or horizontal movement affecting structure stability. Bridge is closed to traffic, but corrective action may put it back in light service.
0	Failure. Out of service, beyond corrective action.

The criteria for placing a bridge in each of the three categories are as follows:

Rating	Description
Good	If all of the condition codes are 7 or greater, and if both of the appraisal ratings are 6 or greater.
Fair	If any of the condition codes are 5 or 6, or if either of the appraisal ratings are 3, 4, or 5.
Poor	If any of the condition codes are 4 or less, or if either of the appraisal ratings are 2 or less. This is also defined as structurally deficient.

Established Condition Level

Ninety-two percent of principal arterial system bridges will be maintained at fair to good, while 80 percent of all other system bridges will be maintained at fair to good.

Assessed Conditions

Principal Arterial	2015	2014	2013
Fair to Good	94.9%	95.2%	94.9%

All Other Systems	2015	2014	2013
Fair to Good	94.4%	93.8%	93.6%

Budgeted and Estimated Costs to Maintain

The following table presents the state's estimate of spending necessary to preserve and maintain the roads and bridges at, or above, the Established Condition Levels cited above, and the actual amount spent (in thousands):

		Costs to be Capitalized			Maintenance of System			Total Construction Program
		Bridges	Pavement	Total Costs	Bridges	Pavement	Total Costs	
Budget	2016	\$ 234,366	\$ 400,943	\$ 635,309	\$ 112,444	\$ 462,387	\$ 574,831	\$ 1,210,140
	2015	255,033	230,075	485,108	55,789	403,213	459,002	944,110
	2014	251,019	248,841	499,860	78,143	627,255	705,398	1,205,258
	2013	179,581	289,898	469,479	36,480	691,872	728,352	1,197,831
	2012	257,442	288,138	545,580	23,111	504,601	527,712	1,073,292
Actual	2016	\$ 232,087	\$ 403,563	\$ 635,650	\$ 79,748	\$ 652,665	\$ 732,413	\$ 1,368,063
	2015	197,844	384,351	582,195	71,852	606,939	678,791	1,260,986

	2013	137,387	190,739	328,126	58,127	615,638	673,765	1,001,891
	2012	105,736	158,438	264,174	64,810	571,693	636,503	900,677

Defined Benefit Plans – State Participating

The state of Minnesota currently contributes as an employer and/or non-employer contributing entity into four primary government administered multiple-employer cost sharing plans, one non-primary government administered multiple-employer cost sharing plans, and three primary government administered single-employer plans. During the fiscal year 2015 reporting period, the Minneapolis Employees Retirement Fund merged with the General Employees Retirement Fund and the Duluth Teachers' Retirement Fund merged with the Teachers Retirement Fund. See Note 8 – Pension and Investment Trust Funds for more information on each plan.

Required supplementary information is provided for the following plans:

- State Employees Retirement Fund (SERF)
- Correctional Employees Retirement Fund (CERF)
- General Employees Retirement Fund (GERF)
- Minneapolis Employees Retirement Fund (MERF)
- Teachers Retirement Fund (TRF)
- Duluth Teachers' Retirement Fund (DTRF)
- St. Paul Teachers' Retirement Fund (SPTRF)
- Judges Retirement Fund (JRF)
- Legislators Retirement Fund (LRF)
- State Patrol Retirement Fund (SPRF)

Public Employees Insurance Program Development Information

The Public Employees Insurance Program's medical claims is a self-funded program. The following table illustrates how the fund's earned revenue (net of reinsurance) and investment income compare to related costs of loss (net of loss assumed by reinsurers) and other expenses assumed by the fund as of the end of each of the past ten years (in thousands).

	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016
1. Required Contribution and Investment Revenue:										
Earned	\$ 13,219	\$ 13,439	\$ 12,286	\$ 25,031	\$ 34,161	\$ 45,413	\$ 49,244	\$ 90,110	\$ 96,008	\$109,484
Ceded	(1,347)	(1,298)	(1,218)	(2,684)	(2,660)	(3,502)	(4,582)	(8,372)	(4,607)	-

7. Increase (Decrease) in Estimated Net Incurred Claims and Expenses from End of Policy Year:										
	\$ (66)	\$ 45	\$ (352)	\$ 38	\$ 660	\$ (38)	\$ 579	\$ 380	\$ 1,322	\$ -

The rows of the table are defined as follows:

1. This section shows the total of each fiscal year's gross earned contribution revenue and investment revenue, contribution revenue ceded to reinsurers, and net earned contribution revenue and reported investment revenue.
2. This line shows each fiscal year's other operating costs of the fund including overhead and claims expense not allocable to individual claims.
3. This section shows the fund's gross incurred claims and allocated claim adjustment expenses, claims assumed by reinsurers, and net incurred claims and allocated adjustment expenses (both paid and accrued) as originally reported at the end of the first year in which the event that triggered coverage under the contract occurred (called policy year).
4. This section shows the cumulative net amounts paid as of the end of successive years for each policy year.
5. This line shows the latest re-estimated amount of claims assumed by reinsurers as of the end of the current year for each policy year.
6. This section shows how each policy year's net incurred claims increased or decreased as of the end of successive years. (This annual re-estimation results from new information received on known claims, re-evaluation of existing information on known claims, and emergence of new claims not previously known.)
7. This line compares the latest re-estimated net incurred claims amount to the amount originally established (section 3) and shows whether this latest estimate of net claims cost is greater or less than originally estimated. As data for individual policy years mature, the correlation between original estimates and re-estimated amounts commonly is used to evaluate the accuracy of net incurred claims currently recognized in less mature policy years. The columns of the table show data for successive policy years.

Combining and Individual Fund Statements – Nonmajor Funds

2016
Comprehensive
Annual
Financial Report

Nonmajor Special Revenue Funds

Trunk Highway Fund

The fund receives a portion of the revenue from taxes on motor vehicles and motor fuels and federal grants to plan, design, construct, and maintain the state trunk highway system.

Highway User Tax Distribution Fund

The fund receives a portion of the revenue from taxes on motor vehicles and motor fuels to administer vehicle licensing services.

State Airports Fund

The fund uses revenue from aviation-related taxes and fees to provide technical and financial assistance to municipal airports and to promote aviation safety, planning, and regulation.

Municipal State-Aid Street Fund

The fund receives a portion of the revenue from taxes on motor vehicles and motor fuels primarily for distribution to municipalities for improvement of streets.

County State-Aid Highway Fund

The fund receives a portion of the revenue from taxes on motor vehicles and motor fuels for distribution to counties for improvement of county roads.

Petroleum Tank Cleanup Fund

The fund receives funding from a fee imposed on petroleum distributors to reimburse responsible parties for most of their costs to clean up environmental contamination from petroleum tanks.

Nonmajor Special Revenue Funds – Continued

Natural Resources Fund

The fund receives taxes from fuel used in recreational vehicles, and fees and donations that are used to fund management of the related natural resource programs.

Game and Fish Fund

The fund receives revenues from license fees and fines related to hunting and fishing which are spent for related purposes.

Environmental and Remediation Fund

The fund accounts for activities that monitor and control environmental problems using taxes and fees from activities and industries contributing to environmental problems. It also accounts for activities that respond to, and correct releases of, hazardous substances, pollutants, chemicals, and petroleum, as well as environmental actions at qualified landfill facilities.

Douglas J. Johnson Economic Protection Trust Fund

The fund receives distribution from taconite production taxes to be held in trust or expended only in economic emergency for the purposes of rehabilitation and diversification of industry in the area largely dependent on the taconite mining industry.

Heritage Fund

The fund receives a portion of sales and use taxes to restore, protect, and enhance the outdoors, water quality, parks and trails, and arts and cultural heritage.

Endowment Fund

The fund receives gifts and donations that may be expended only for those purposes specified by the donors.

Special Compensation Fund

The fund receives assessments on all insurers for administration of the state workers' compensation program, including enforcement, reimbursement of certain supplemental benefits, and payment of claims to employees of uninsured and bankrupt firms.

Health Care Access Fund

The fund receives taxes on health service providers and premiums for programs to help contain the costs of health care, make reforms in health insurance, and provide competitively-priced insurance for people unable to obtain affordable coverage.

Workforce Development Fund

The fund receives special assessments levied on employers for employment and training programs.

Miscellaneous Special Revenue Fund

The fund includes numerous smaller accounts whose revenues are restricted or committed to a variety of specific purposes.

NOTE TO NONMAJOR APPROPRIATED SPECIAL REVENUE FUNDS COMBINING SCHEDULE OF REVENUES, EXPENDITURES AND CHANGES IN FUND BALANCES – BUDGET AND ACTUAL BUDGETARY BASIS YEAR ENDED JUNE 30, 2016 (IN THOUSANDS)

Budgetary Basis vs GAAP Nonmajor Appropriated Special Revenue Funds

Actual revenues, transfers-in, expenditures, encumbrances, and transfers-out on the budgetary basis do not equal those on the GAAP basis in the Combining Statement of Revenues, Expenditures, and Changes in Fund Balances for Nonmajor Appropriated Special Revenue Fund - Budget and Actual. This inequality results primarily from the differences in the recognition of accruals, reimbursements, deferred revenue, and intrafund transactions, and from the budgetary basis of accounting for encumbrances. On the budgetary basis, encumbrances are recognized as expenditures in the year encumbered. The modified accrual basis of accounting recognizes expenditures when the goods or services are received, regardless of the year funds are encumbered. A reconciliation of the fund balances under the two bases of accounting for the Nonmajor Appropriated Special Revenue Funds is provided in the following table.

	Trunk Highway	Highway User Tax Distribution	State Airports	Petroleum Tank Cleanup	Natural Resources	Game and Fish	Environmental & Remediation	Heritage	Special Compensation	Health Care Access	Workforce Development
GAAP Basis Fund Balance:	\$ 822,307	\$ 599	\$ 34,771	\$ 23,272	\$ 67,182	\$ 55,443	\$ 111,654	\$ 410,974	\$ 37,629	\$ 609,446	\$ 50,492

2016
Comprehensive
Annual
Financial Report

Nonmajor Capital Projects Funds

Building Fund

The fund receives revenue from the sale of certificates of participation and state bonds to finance technology development and to provide funds for the acquisition, maintenance, and betterment of state and local lands and buildings.

General Projects Fund

The fund receives monies appropriated from the General Fund for building, maintenance, or capital improvement projects.

Transportation Fund

The fund receives transportation bond proceeds, General Fund appropriations, and federal grants for the construction or reconstruction of state and locally-owned transportation infrastructure.

2016
Comprehensive
Annual
Financial Report

Nonmajor Enterprise Funds

Behavioral Services Fund

The fund accounts for the activity of state regional treatment centers for chemical dependency treatment services and for the activity of state neurorehabilitation services.

Enterprise Activities Fund

The fund includes various minor activities providing services to the general public or local governmental units.

Giants Ridge Fund

The fund accounts for a recreation area established to foster economic development and tourism within St. Louis County.

Minnesota Correctional Industries Fund

The fund accounts for the activity of state correctional industries which facilitates offender rehabilitation by providing facilities and assistance for manufacturing and marketing goods primarily to governmental entities.

MNsure Fund

The fund accounts for the on-going operations of MNsure, which is Minnesota's state-run health insurance exchange under the federal Affordable Care Act.

911 Services Fund

The fund accounts for activities related to the enhancement of the state's 911 emergency response system.

Public Employees Insurance Fund

The fund provides hospital, medical, and dental benefit coverage as well as life insurance coverage to public employees and other eligible persons.

State Auditor Fund

The fund accounts for the audit services provided to local governments by the Office of the State Auditor's Audit Practice Division.

Nonmajor Enterprise Funds – Continued

State Lottery Fund

The fund accounts for the operations of the state lottery. Forty percent (40%) of the net proceeds are transferred to the Environment and Natural Resources Fund, with the remainder transferred to the General Fund.

State Operated Community Services Fund

The fund accounts for waiver residential and day treatment and rehabilitation services for individuals with developmental disabilities.

Comprehensive
Annual
Financial Report

Pension Trust Funds

Minnesota State Retirement System

State Employees Retirement Fund

The fund includes resources accumulated to pay present and future retirement annuities to state and University of Minnesota employees not covered by other pension funds.

Correctional Employees Retirement Fund

The fund includes resources accumulated to pay present and future retirement annuities to state employees who have direct responsibility for offenders at Minnesota correctional facilities.

Judges Retirement Fund

The fund includes resources accumulated to pay present and future retirement annuities to eligible district, municipal, county, and probate court judges, supreme court justices, and various court referees.

Legislators Retirement Fund

The fund includes resources accumulated to pay present and future retirement annuities for members of the state legislature.

State Patrol Retirement Fund

The fund includes resources accumulated to pay present and future retirement annuities to eligible state patrol officers, conservation officers, and crime bureau personnel.

Hennepin County Supplemental Retirement Fund

The fund accounts for resources administered by the Minnesota State Retirement System on behalf of the Hennepin County supplemental retirement program.

Pension Trust Funds – Continued

Health Care Savings Fund

The fund includes contributions by or on behalf of employees and accumulated earnings for reimbursement of health-related expenses of the employee or dependents after retirement.

Unclassified Employees Retirement Fund

The fund includes the aggregate of unclassified employee share accounts which are either refunded or used to purchase a retirement annuity upon termination of service.

Minnesota Deferred Compensation Fund

The fund includes contributions by participants toward a voluntary retirement savings plan.

Public Employees Retirement Association

General Employees Retirement Fund

The fund includes resources accumulated to pay present and future retirement annuities to eligible employees of various local units of government.

Minneapolis Employees Retirement Fund

The fund includes resources accumulated to pay present and future retirement annuities to eligible employees of the City of Minneapolis.

Police and Fire Fund

The fund includes resources accumulated to pay present and future retirement annuities to eligible police officers and firefighters.

Public Employees Correctional Fund

The fund includes resources accumulated to pay present and future retirement annuities to eligible correctional employees of various local units of government.

Volunteer Firefighter Retirement Fund

The fund contains the assets attributable to the voluntary statewide lump-sum volunteer firefighter retirement plan.

Defined Contribution Fund

The fund is an IRC Section 401(a) deferred compensation plan administered by the Public Employees Retirement Association.

Teachers Retirement Association

Teachers Retirement Fund

The fund includes resources accumulated to pay present and future retirement annuities for members of both the basic and coordinated teachers retirement plans.

State Colleges and Universities

State Colleges and Universities Retirement Fund

The fund includes unclassified teachers, librarians, administrators, and certain other staff members who have been employed fulltime for a minimum of two academic years.

Annual
Financial Report

Nonmajor Component Unit Funds

Agricultural and Economic Development Board

The board administers programs for agricultural and economic development.

National Sports Center Foundation

The foundation is under contract with the Minnesota Amateur Sports Commission to maintain and operate the National Sports Center facility. The primary purpose of the facility is to hold youth-oriented athletic and other non-athletic functions and events.

Office of Higher Education

The office makes and guarantees loans to qualified post secondary students.

Public Facilities Authority

The authority provides financial assistance to eligible municipalities with high cost wastewater infrastructure projects.

Rural Finance Authority

The authority administers state agricultural programs.

Workers' Compensation Assigned Risk Plan

The plan is the source of workers' compensation and employers' liability coverage for Minnesota employers who have been unable to obtain an insurance policy through the voluntary market.

Minnesota Sports Facilities Authority

The authority provides for the construction, financing, and long-term use and operations of a new multi-purpose stadium and related stadium infrastructure. The purpose of the stadium is to hold professional football games as well as a broad range of other civic, community, athletic, educational, cultural, and commercial activities.

- (1) Minnesota Statutes 16A.641, Subdivision 7b, requires the premium received on the sale of bonds after December 1, 2012, to be deposited to either the bond proceeds fund where it is used to reduce the par amount of the bonds issued or to the state bond fund or used to reduce the par amount of the bond issue at the time of the sale.
- (2) Minnesota Statutes 16A.642, required that on January 1, 2015, the commissioner of Management and Budget report unencumbered bond proceeds balances to the Legislature that were enacted more than four years prior. These bond proceeds balances and their bond authorizations cancelled effective on July 1, 2015. The cancellation report reduced Various Purpose Bonds authorizations as follows: Laws 2000, Chapter 492 by \$2,688; Laws 2005, Chapter 20 by \$295,267; Laws 2006, Chapter 258 by \$1,189,366; Special Session Laws 2007, Chapter 2 by \$366,650; Laws 2008, Chapter 152 was reduced by \$512,643; Laws 2008, Chapter 179 by \$923,933; Laws 2008, Chapter 365 by \$242,195; Laws 2009, Chapter 93 by \$564,587; Laws 2010, Chapter 189 by \$4,866,171 and Special Session Laws 2010, Chapter 1 by \$1,243,997. The Cancellation Report also reduced Trunk Highway Bond Authorization of Laws 2008, Chapter 152 by \$297,457; Laws 2009, Chapter 36 by \$58,003; and Laws 2010, Chapter 388 by \$905,136.
- (3) Special Session Laws 2015, Chapter 5, Article 1 reduced Various Purpose Bonds authorized in Laws 2014, Chapter 294 by \$50,000.
- (4) Laws 2014, Chapter 294 reduced Various Purpose Bonds authorized in Laws 2000, Chapter 492 by \$983,142, Laws 2002, Chapter 393 by \$4,805, Laws 2005, Chapter 20 by \$40,399, Laws 2006, Chapter 258 by \$1,509,567, Special Session Laws 2007, Chapter 2 by \$53,847, Laws 2008, Chapter 179 by \$3,646,561, Laws 2008, Chapter 365 by \$188,036, Laws 2009, Chapter 93 by \$199,627, Laws 2010, Chapter 189 by \$2,200,284 and Special Session Laws 2010, Chapter 1 by \$2,000,000.
- (5) Laws 2014, Chapter 312, Article 9 reduced Trunk Highway Bonds authorized in Laws 2010, Chapter 189 by \$1,493,000 and increased Trunk Highway Bonds authorized in Laws 2012, Chapter 287 by \$1,493,000.

- (6) Minnesota Statutes 16A.642, required that on January 1, 2013, the commissioner of Management and Budget report unencumbered bond proceeds balances to the Legislature that were enacted more than four years prior. These bond proceeds balances and their bond authorizations cancelled effective on July 1, 2013. The cancellation report will reduce Various Purpose Bonds authorizations as follows: Laws 1994, Chapter 643 by \$1,044; Laws 1999, Chapter 240 by \$12,067; Laws 2000, Chapter 492 by \$60,002; Laws 2002, Chapter 393 by \$202,847; Laws 2005, Chapter 20 by \$2,110,817; Laws 2006, Chapter 258 by \$2,516,360; Special Session Laws 2007, Chapter 2 by \$6,551,231; Laws 2008, Chapter 152 was reduced by \$25,027; Laws 2008, Chapter 179 by \$2,354,454 and Laws 2008, Chapter 365 by \$263,610. The Cancellation Report also reduced Trunk Highway Bond Authorization of Laws 2008, Chapter 152 by \$1,968,953; however, \$1,414,600 was reauthorized by Laws 2013, Chapter 117.
- (7) Laws 2013, Chapter 136 reduced Various Purpose Bonds authorized in Laws 2009, Chapter 93 by \$2,000,000.
- (8) Special Session Laws 2012, Chapter 1 reduced Various Purpose Bonds authorized in Special Session Laws 2007, Chapter 2 by \$5,680,000; and Special Session Laws 2010, Chapter 1 by \$2,133,000.
- (9) Special Session Laws 2011, Chapter 12 also reduced Various Purpose Bonds authorizations in Laws 2005, Chapter 20 by \$22,000,000; and Laws 2008, Chapter 179 by \$3,500,000. However, as of July 2012, Laws 2005, Chapter 20 had only \$18,520,501 available in remaining authorization so that is the amount that was cancelled.
- (10) The Governor vetoed \$361,460,000 of appropriations for Various Purpose capital projects and \$6,500,000 for Trunk Highway projects to be funded from Laws 2010, Chapter 189. The Governor requested that the bond authorizations be reduced to match the appropriations in the 2011 Legislative Session but no capital budget was passed during this time frame. The bond authorizations for Laws 2010, Chapter 189 were reduced in Special Session Laws 2011, Chapter 12 to match the appropriations. The net reductions to the bond authorizations were \$359,660,000 for Various Purpose Bonds and \$6,500,000 for Trunk Highway Bonds.
- (11) Minnesota Statutes 16A.642, required that on January 1, 2011, the commissioner of Management and Budget report unencumbered bond proceeds balances to the Legislature that were enacted more than four years prior. These bond proceeds balances and their bond authorizations cancelled effective on July 1, 2011. The cancellation report reduced Various Purpose Bonds authorizations as follows: Laws 2000, Chapter 492 by \$2,000; Laws 2002, Chapter 393 by \$34,670; Laws 2005, Chapter 20 by \$2,697,899; and Laws 2006, Chapter 258 by \$6,481,965.
- (12) Laws 2010, Chapter 189 also reduced Various Purpose Bonds authorizations in Laws 2002, Chapter 393 by \$280,914; Laws 2005, Chapter 20 by \$1,682,567; Laws 2006, Chapter 258 by \$7,770; Special Session Laws 2007, Chapter 2 by \$2,283,263; Laws 2008, Chapter 179 by \$152,660; and Laws 2009, Chapter 93 by \$3,900,000. Laws 2010, Chapter 189 reduced Trunk Highway Bond authorization Laws 2008, Chapter 152 by \$18,500,000. Laws 2010, Chapter 189 reduced the Various Purpose Bond authorization in Laws 2009, Chapter 93 by \$85,155,000 to offset the appropriations that the Governor vetoed \$85,155,000.
- (13) Minnesota Statutes 16A.642, required that on January 1, 2009, the commissioner of Finance report unencumbered bond proceeds balances to the Legislature that were enacted more than four years prior. These bond proceeds balances and their bond authorizations cancelled effective on July 1, 2009. The cancellation report reduced Various Purpose Bonds authorizations as follows: Laws 2000, Chapter 492 by \$217,331; Laws 2002, Chapter 393 by \$284,508; and Special Session Laws 2002, Chapter 1 by \$178,656. The cancellation report also reduced Trunk Highway Bonds authorized by Special Session Laws 2003, Chapter 19, Article 3 by \$208,570; Special Session Laws 2003, Chapter 19, Article 4 by \$4,083,466.
- (14) Laws 2008, Chapter 365 reduced the Various Purpose Bond authorization in Laws 2008, Chapter 179 by \$223,588,000.
- (15) Laws 2008, Chapter 179 reduced Various Purpose Bonds authorizations in Laws 2002, Chapter 393 by \$17,262,000; Laws 2005, Chapter 20 by \$2,000,000; and Laws 2006, Chapter 258 by \$3,767,000.
- (16) Laws 2007, Chapter 45 reduced the Various Purpose Bond authorization in Laws 2006, Chapter 258 by \$150,000.
- (17) Minnesota Statutes 16A.642, required that on January 1, 2007, the commissioner of Finance report unencumbered bond proceeds balances to the Legislature that were enacted more than four years prior. These bond proceeds balances and their bond authorizations cancelled effective on July 1, 2007. The cancellation report reduced Building Bond authorizations as follows: Special Session Laws 1997, Chapter 2 by \$112,548; and Laws 1999, Chapter 240 by \$93,091. The cancellation report also reduced Various Purpose Bonds authorizations as follows: Laws 2000, Chapter 492 by \$524,411; Laws 2002, Chapter 393 by \$6,052,781; and Special Session Laws 2002, Chapter 1 by \$863,386.
- (18) Minnesota Statutes 16A.642, required that on January 1, 2005, the commissioner of Finance report unencumbered bond proceeds balances to the Legislature that were enacted more than four years prior. These bond proceeds balances and their bond authorizations cancelled effective on July 1, 2005. The cancellation report reduced Building Bond authorizations as follows: Special Session Laws 1997, Chapter 2 by \$763,514; and Laws 1999, Chapter 240 by \$292,887. The cancellation report also reduced Various Purpose Bonds authorized by Laws 2000, Chapter 492 by \$3,333,695.
- (19) Laws 2005, Chapter 20 reduced Building Bond authorizations as follows: Laws 1994, Chapter 643 by \$2,631,376; Special Session Laws 1997, Chapter 2 by \$18; and Laws 1999, Chapter 240 by \$24,887,000. Laws 2005, Chapter 20 also reduced Various Purpose Bonds authorized by Laws 2000, Chapter 492 by \$3,300,000; and Laws 2002, Chapter 393 by \$352,923,000.

- (20) The Governor vetoed \$352,923,000 of appropriations for capital projects to be funded from Laws 2002, Chapter 393. The bond authorization was reduced to match the appropriations in Laws 2005, Chapter 20. Laws of 2002, Chapter 393 also corrected the bond authorization reported in footnote 22 below by increasing the bond authorization of Laws 1998, Chapter 404 by \$2,700,000 and reducing the bond authorization of Laws 1999, Chapter 240 by the \$2,700,000.
- (21) Laws of 2001, Chapter 55 converted \$7 million of transportation improvement projects authorized in Laws 2000, Chapter 479 from general fund to Transportation Bonds and converted capital projects authorized in Laws 2000, Chapter 492 to be financed from Various Purpose general obligation bonds to general fund cash.
- (22) Laws 2000, Chapter 492 reduced Building Bonds authorizations as follows: Laws 1994, Chapter 643 by \$1,964,000; Special Session Laws 1997, Chapter 2 by \$10,000,000; and Laws 1999, Chapter 240 by \$4,000,000. The \$2,700,000 bond authorization reduction for Laws of 1998, Chapter 404 was for the cancellation of projects actually authorized by Laws of 1999, Chapter 240.
- (23) The Governor vetoed \$23,605,000 of appropriations for capital projects and \$10,440,000 of appropriations for transportation projects to be funded from Laws 1999, Chapter 240. The bond authorization was reduced to match the appropriations in Laws 2005, Chapter 20.
- (24) Laws 1998, Chapter 404 reduced Building Bonds authorization in Laws 1994, Chapter 643 by \$1,350,000.
- (25) Laws 1997, Chapter 202 reduced Building Bond authorizations as follows: Laws 1990, Chapter 610 by \$9,260,000.
- (26) Special Session Laws 1995, Chapter 2 reduced Building Bond authorizations as follows: Laws 1990, Chapter 610 by \$580,000; and Laws 1994, Chapter 643 by \$1,245,000.
- (27) Laws 1994, Chapter 643 reduced Building Bond authorizations of Laws 1990, Chapter 610 by \$115,000.
- (28) Laws 1993, Chapter 373 reduced Building Bond authorizations of Laws 1990, Chapter 610 by \$2,500,000.

2016
Comprehensive
Annual
Financial Report

Statistical Section

The statistical section presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the state's overall financial health.

Financial Trends

These schedules contain trend information to help understand and assess how the state's financial position has changed over time.

Revenue Capacity

These schedules contain information to assess the state's most significant revenue source, individual income taxes. Minnesota's data privacy laws prevent disclosing the names of principal taxpayers.

Debt Capacity

These schedules present information to help assess the affordability of the state's current level of outstanding debt and the state's ability to issue additional debt in the future.

Economic and Demographic Information

These schedules offer economic and demographic indicators to help understand the environment within which the state's financial activities take place.

Operating Information

These schedules contain service and infrastructure data to help understand how the information in the state's financial report relates to the services the state provides and the activities it performs.

⁽¹⁾ Revenues from student fees and the operation of the financed buildings are pledged to repay revenue bonds. This amount is net of cost of goods sold.

⁽²⁾ Depreciation, amortization, bad debt, interest and financing expenses are not included.

⁽³⁾ In 2013, the remaining \$85,000 in principal and interest was paid in full for Vermilion Community College.

⁽⁴⁾ Revenue bonds of \$16.0 million for Giants Ridge were issued on November 1, 2000. In 2011, the entire \$11.3 million in outstanding revenue bonds was redeemed. Of this amount, the D.J. Johnson Economic Protection Trust Fund contributed \$8.7 million.

⁽⁵⁾ Revenues from golf course and ski area are pledged to repay revenue bonds.
This amount is net of cost of goods sold.

⁽⁶⁾ Iron Range issued Educational Facilities Revenue bonds of \$37.8 million on October 18, 2013. D.J. Johnson Economic Protection Trust Fund pays a portion of the debt.

⁽⁷⁾ Taconite production tax revenues pledged for these bonds consist only of the portion allocated to the Iron Range Resources and Rehabilitation Agency (IRRRA) and D.J. Johnson Economic Protection Trust Funds.

⁽⁸⁾ Revenue bonds of \$42.2 million were issued on November 13, 2008 for 911 services.

⁽⁹⁾ 911 fees assessed on wireless and wire-line telephone services are pledged to repay the 911 revenue bonds.

Notes:

N/A = Information not available.

Of the \$18.3 billion in capital assets owned by the state as of June 30, 2016, \$12.0 billion (65.6 percent) of the assets represent infrastructure and right of way under the Transportation function.
The remaining \$6.3 billion in capital assets is allocated to other functions.

⁽¹⁾ Current year amounts are estimated.
