## GCDD 5 Year Plan Research Report

Report from 2015 Quality of Life Assessment Survey Among Individuals with Developmental Disabilities in Minnesota

Final Report, 12/14/15

THE MINNESOTA  
GOVERNOR'S  
COUNCIL<sup>ON</sup>  
DEVELOPMENTAL  
DISABILITIES

• Most Critical Issues – Respondents’ Perceptions	38
• Appendix – Incidence of Abuse	42

## **Background**

The Minnesota Governor's Council on Developmental Disabilities (GCDD), a division of the Minnesota Department of Administration, not a private sector business. The Council was created by Executive Order under Governor Wendell Anderson's administration in 1971 under provisions of the Developmental Disabilities Assistance and Bill of Rights Act (DD Act) (P.L. 106-402). The DD Act sets out the Council's purpose, the composition of its membership, and responsibilities, including the development of a five year state plan.

Presently, the GCDD has repeated the Quality of Life Assessment Survey (QOLAS), which was initially conducted in 2000, and repeated in 2005 and 2010. The findings will be used as input for the next 5-Year State Plan for federal fiscal years 2017 - 2021.

## **Research Objectives**

Information was gathered regarding current opinions on the degree to which people with developmental disabilities in Minnesota believe they are independent, productive, integrated and included in the community and have self-determination.

## MR Research Overview – METHODOLOGY

The GCDD identified as many groups as possible to get a cross cut of people with developmental disabilities, families, advocacy, professional and provider groups. This outreach meant contacting and working with hundreds of groups and individuals, encouraging them to take the on-line survey, or fill out a hard copy questionnaire.

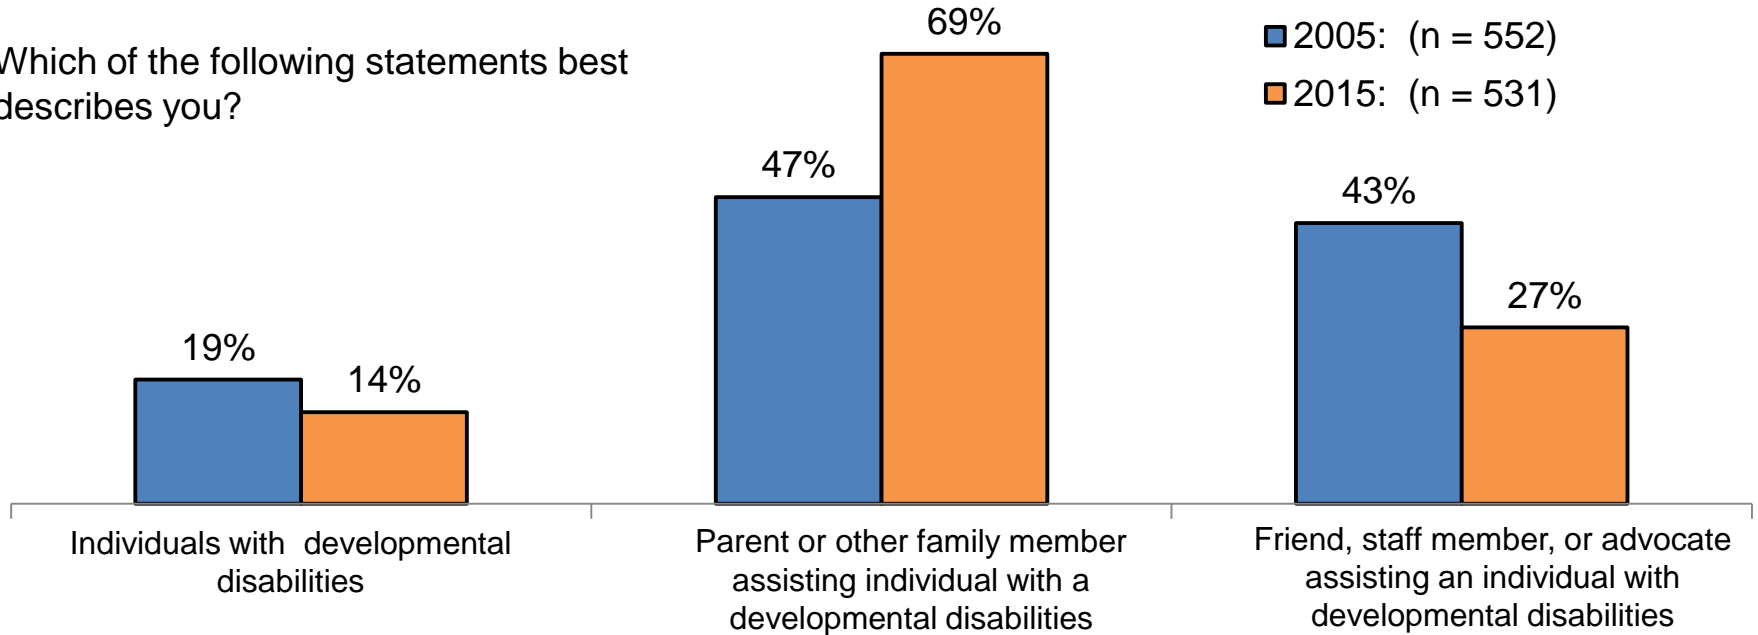

\* MarketResponse reached out to these organizations and some individuals, providing hundreds of printed copies of the questionnaire and attending meetings of constituents to encourage and guide participation in the survey.

## MR Research Overview -- RESPONDENT PROFILE

Slides 5 - 7 show comparisons from the survey done in 2005 and the current 2015 survey. The survey sampling approach was similar in both years, as are the resulting respondent profiles. In other words the samples are well matched and comparable.

Which of the following statements best describes you?

Note: Multiple responses allowed.

## MR Research Overview -- RESPONDENT PROFILE

There was somewhat higher representation from the Twin Cities metro area in the 2015 survey, compared to the 2005 survey. (However, there were no differences in IPSII satisfaction between the 2 regions, in the 2015 survey.)

### Respondents' home location based on zip code

The age group representation was almost identical between the 2005 and 2015 surveys.

Age of the person with the developmental disability?

## Executive Summary

## Executive Summary

---

**There is no evidence of any improvement overall, over the past 15 years, in satisfaction with IPSII.**

- Satisfaction with Productivity (based to a sub-sample of adults who work or volunteer outside of the home) has consistently been higher than satisfaction with SIII, in every year the study has been conducted.

**All ISII satisfaction ratings from the youngest group (less than 14 years old) are statistically significantly lower than the satisfaction ratings from all adult groups.**

- Improving IPSII among children with developmental disabilities is a *different challenge* from improving IPSII among adults.
- Measures of IPSII progress among children and adults with developmental disabilities should be analyzed separately.

**For the youngest adult age group (ages 19-34) overall satisfaction with Integration and Inclusion were lowest, compared to the other IPSII ratings.**

## Executive Summary

---

**For adults with developmental disabilities, ages 19 and older, having a job outside of the home appears to be highly correlated with satisfaction with all elements of IPSII.**

- The youngest adult age group (ages 19-34) had the highest unemployment rate, with 51% without a paying job.
- Improving *real* employment opportunities (i.e., a paying job, 20 hours a week or more) among the 19-34 age group, would result in improved IPSII satisfaction levels.

**Impressions of living in a community that is *a good place for people with developmental disabilities* appear to have eroded somewhat over the past 10 years.**

- About two-thirds of all respondents believe their community is a good place for people with developmental disabilities, down from 73% in 2005.
- This impression may be correlated with the relatively low levels of satisfaction with Integration and Inclusion.

## Executive Summary

**The basic needs expressed by the following 3 statements represent areas of most needed improvement.**

- I have enough money to live on.
- I know what to do if my health or safety is in jeopardy
- My future will be secure, even if something happens to my parents/current staff member, friend, or advocate.

**The survey respondents offered their opinions regarding the most critical issues Minnesotans with developmental disabilities will face over the next 5 years:**

- Access to services/support and adequate funding/resources are critical to all.
- Access to affordable, appropriate housing is most important to the 19-34 age group.
- Better employment opportunities is important to all ages, especially ages 14-34.
- Better access/inclusion in public education is most important to the younger age groups.

## Community and Basic Needs

**Impressions of living in a community that is *a good place for people with developmental disabilities* appear to have eroded somewhat over the past 10 years.**

*To what extent do you agree or disagree with each statement:*

Disagree Strongly	Disagree Somewhat	Neither	Agree Somewhat	Agree Strongly
-------------------	-------------------	---------	----------------	----------------

↑↓ Indicates the proportion is statistically significantly higher or lower than the 2015 proportion, at the 95% confidence level

## MR Perceptions of BASIC NEEDS

The basic needs expressed by the lower 3 statements represent areas of most needed improvement.

### Basic Needs Statements:

I feel comfortable in the house where I live, it feels like home

I feel safe in the neighborhood where I live

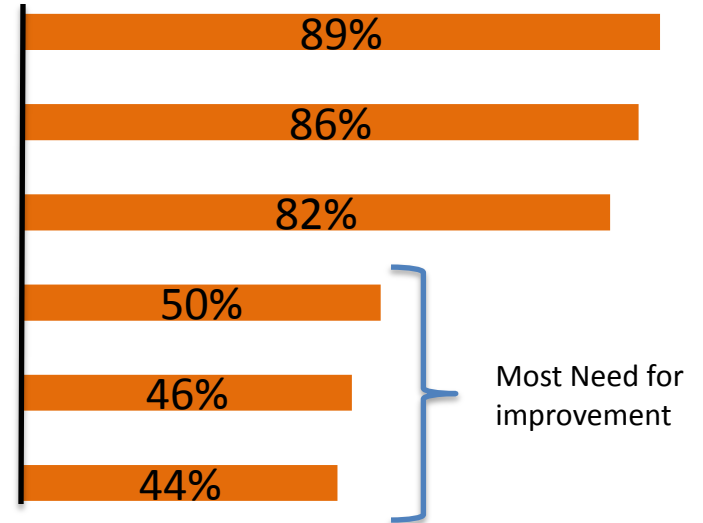

I have access to the healthcare I need

I have enough money to live on

I know what to do if my health or safety is in jeopardy

My future will be secure, even if something happens to my parents/current staff member, friend, or advocate

### Percent who agree (n=506)

## MR Perceptions of BASIC NEEDS

The older 3 age-group segments express higher satisfaction than the younger segments on several aspects related to basic needs.

<u>Percent Who Agree, by Age Group</u>	<u>Total</u> (n=506)	A <u>&lt;14</u> (139)	B <u>14-18</u> (74)	C <u>19-34</u> (144)	D <u>35-54</u> (108)	E <u>55+</u> (41)
I feel comfortable in the house where I live, it feels like home	89%	89%	89%	90%	88%	93%
I feel safe in the neighborhood where I live	86%	82% <sup>E</sup>	82% <sup>E</sup>	89%	86%	95%
I have access to the healthcare I need	82%	79%	74% <sup>D</sup>	85%	87%	88%
I have enough money to live on	50%	44% <sup>DE</sup>	39% <sup>DE</sup>	48% <sup>E</sup>	58% <sup>E</sup>	80%
I know what to do if my health or safety is in jeopardy	46%	32%	47% <sup>A</sup>	51% <sup>A</sup>	56% <sup>A</sup>	51% <sup>A</sup>
My future will be secure, even if something happens to my parents/current staff member, friend, or advocate	44%	32%	32%	50% <sup>AB</sup>	52% <sup>AB</sup>	63% <sup>AB</sup>

AB Indicates the proportion is statistically significantly higher or lower than the proportion in the column so labeled, at the 95% confidence level

## IPSII Summary

## MR Satisfaction with IPSII -- 2015

**Seven out of ten adults with disabilities (over 18 years old), who work or volunteer outside of their homes, are satisfied with their current levels of productivity. Just over half of all respondents are satisfied with the other 4 IPSII dimensions.**

*I am satisfied with my current level of...*

\* Productivity satisfaction only asked to those who work or volunteer outside of their home, and are 19 years of age or older

## MR Satisfaction with IPSII -- 2000 to 2015

There is no evidence of any improvement overall, over the past 15 years, in satisfaction with IPSII. (There may have been some erosion in Integration and Independence since the year 2000.)

(NOTE: Satisfaction with Productivity has consistently been higher than satisfaction with SIII, in every year the study has been conducted.)

Disagree Strongly	Disagree Somewhat	Neither	Agree Somewhat	Agree Strongly
-------------------	-------------------	---------	----------------	----------------

<i>I am satisfied with my current level of...</i>	<u>Percent who Agree Somewhat or Strongly</u>			
	<u>2000</u>	<u>2005</u>	<u>2010</u>	<u>2015</u>
Productivity*	66%	73%	71%	71%
Self Determination	NA	61%	59%	56%
Integration	64% ↑	59%	54%	56%
Independence	64% ↑	60% ↑	55%	53%
Inclusion	55%	54%	50%	52%

\*Productivity satisfaction only asked to those who work or volunteer outside of their home, and are 19 years of age or older

↑↓ Indicates the proportion is statistically significantly higher or lower than the 2015 proportion, at the 95% confidence level

## MR Satisfaction with IPSII – 2015 AGE IMPACTS

All ISII satisfaction ratings from the youngest group (less than 14 years old) are statistically significantly lower than the satisfaction ratings from all adult groups. Among adults, Integration and Inclusion are particularly elusive to the 19-34 year olds.

<i>I am satisfied with my current level of...</i>	Percent who agree somewhat or strongly, by age					2015 Total
	A <14 (120)	B 15 - 18 (65)	C 19 - 34 (150)	D 35 - 54 (117)	E 55 + (43)	
Productivity	--	--	71%	71%	70%	71%
Self Determination	37%	53%	64% <sup>A</sup>	69% <sup>AB</sup>	66% <sup>A</sup>	56%
Integration	40%	57%	56% <sup>A</sup>	74% <sup>ABC</sup>	64% <sup>A</sup>	56%
Independence	35%	43%	64% <sup>AB</sup>	63% <sup>AB</sup>	72% <sup>AB</sup>	53%
Inclusion	37%	50%	57% <sup>A</sup>	65% <sup>A</sup>	60% <sup>A</sup>	52%

AB Indicates the proportion is statistically significantly higher or lower than the proportion in the column so labeled, at the 95% confidence level

## MR Satisfaction with IPSII – CORRELATION WITH EMPLOYMENT, 2015

For adults with developmental disabilities, ages 19 and older, having a job outside of the home appears to be highly correlated with satisfaction with all elements of IPSII.

<i>I am satisfied with my current level of...</i>	<u>Adults, ages 19 or more, Employment</u>			<u>Total Agree</u> (170)
	<u>A</u> <u>Have Job</u> (143)	<u>B</u> <u>Volunteer</u> (34)	<u>C</u> <u>Neither</u> (80)	
Productivity*	<b>75%</b>	56%	NA	71%
Self Determination	<b>73%<sup>c</sup></b>	62%	56%	(n=400+) 56%
Integration	<b>74%<sup>BC</sup></b>	44%	54%	56%
Independence	<b>69%<sup>B</sup></b>	50%	64%	53%
Inclusion	<b>65%</b>	55%	55%	52%

AB Indicates the proportion is statistically significantly higher or lower than the proportion in the column so labeled, at the 95% confidence level

## ISII Detailed Findings:

## Employment and Productivity

# MR Employment

The youngest adult age group (ages 19-34) had the highest unemployment rate, with 51% without a paying job, vs 37% and 43% for the two older age groups respectively

Do you work or volunteer outside of the home? (n=257 adults over age 18)

Yes, I have a job I get paid for (56%)

Yes I volunteer my time (13%)

No job or volunteering (31%)

Ages 19-34  
n= 124

Ages 35-54  
n= 96

Ages 55+  
n= 37

↑↓ Indicates the proportion is statistically significantly higher or lower than the corresponding proportion in another age group, at the 95% confidence level.

## MR Employment

Those with a paying job work an average of ~20 hours per week. Just over half (53%) of those who volunteer spend 5 or fewer hours per week in their volunteer position. Seven out of 10 of all workers believe they work the right number of hours, while 1 out of 4 think their working hours are too few.

AMONG THOSE WHO WORK OR VOLUNTEER: How many hours/week do you work or volunteer? (Total)		Paying Job (143)	Volunteer (34)
5 or fewer	 18%	9%	53%↑
6 to 10 hours	 14%	11%	26%
11 to 15 hours	 9%	10%	6%
16 to 20 hours	 23%	28% ↑	6%
21 to 30 hours	 25%	31% ↑	--
Over 30 hours	 10%	11%	9%
<i>Mean hours</i>		21 ↑	10
<i>Median hours</i>		20	5

↑↓ Indicates the proportion is statistically significantly higher or lower than the 2015 proportion, at the 95% confidence level

## MR Productivity at home

Satisfaction with the 3 aspects of productivity at home were relatively high, with the exception of the youngest group having an appropriate amount of responsibility (which is challenging with any child under the age of 14).

<i>Productivity at home...</i>	Percent who agree somewhat or strongly, by age					<u>2015 Total</u>
	A <u>&lt;14</u> (120)	B <u>15 - 18</u> (65)	C <u>19 - 34</u> (150)	D <u>35 - 54</u> (117)	E <u>55 +</u> (43)	
I receive recognition for the things I do at home	84%	88%	81%	79%	81%	82%
I have been improving my skills at home	79%	72%	79%	75%	68%	76%
I have an appropriate amount of responsibilities at home	48%	70% <sup>A</sup>	70% <sup>A</sup>	71% <sup>A</sup>	81% <sup>A</sup>	65%

AB Indicates the proportion is statistically significantly higher or lower than the proportion in the column so labeled, at the 95% confidence level

## Most Critical Issues – Respondents' Perceptions

## MR Most critical issues

What are the most critical issues that Minnesotans with developmental disabilities will face in the next five years?

Issues Mentioned:	Percent mentioning each issue (n=378)	A	B	C	D	E
		<14 (n=103)	14-18 (n=53)	19-34 (n=106)	35-54 (n=82)	55+ (n=32)
Services/Programs	27%	35% c	21%	19%	29%	32%
Housing	26%	19% c	26%	<b>40%</b>	24% c	12% c
Funding/Financial	24%	20%	21%	27%	28%	24%
Employment	24%	21%	30%	28%	23%	15%
Education	10%	23%	13%	5% A	2% AB	3% A
Healthcare	10%	14%	9%	7%	12%	6%
Transportation	7%	5%	4%	9%	5%	18%
Other	39%	42%	40%	35%	38%	41%

ABC: Indicates statistical significant difference at 95% confidence level with other column(s) figures.

**MR** Most critical issues - Services - Housing -Funding/Financial - Employment

**What are the most critical issues that Minnesotans with developmental disabilities will face in the next five years**

**Services:** n=102

- Access to services related to specific needs
- Staffing shortages/turnover
