UGSBURG COLLEGE CUE FUND Legislative Report January 2017

WE ARE CALLED AUGGIES

The following legislative report includes details regarding Augsburg's CUE fund usage and number of teachers prepared. The goal of the CUE/East African Student to Teacher (EAST) Scholarship Program at Augsburg College is to recruit, retain and license students of East African origin to become k-12 teachers by providing financial, advising and professional development support. EAST Program's most important measure of success is the number of future teachers who obtain a MN teaching license and a teaching position upon completion of licensure program.

EAST Scholarship Program is on its second funded cycle since its inception in 2013. We are pleased to report that out of 24 scholars to date, six obtained teaching licensure and currently employed in various school districts. Ten scholars have completed the teacher preparation program and in the process of obtaining their licensure and currently seeking employment. The remaining 9 are actively enrolled in coursework and/or student teaching. A detailed progress report on the scholars is included below in Appendix A.

Our program has several aspects of support that impact our Scholars' success.

First, EAST pays for 100% of the tuition costs for courses leading to licensure. Scholars take between two and four classes each semester and are evaluated on progress toward degree completion regularly. The collective GPA for all scholars, over all semesters (including Fall 2016) is an astonishing 3.6. 100% of EAST/CUE recipients are students of color. 13 out of 24 identify as male and 11 out of 24 identify as female. While 80% of EAST scholars represent Somali, Ethiopian, Kenyan and Oromo origins, the remaining 20% represent the broader African diaspora communities.

Second, our EAST and education department advising is substantial. Each semester EAST scholars receive intensive, intrusive advising—our program coordinator meets with each scholar individually up to three times per semester—keeping track of course progress, grades, troubleshooting, and informal tutoring. Scholars also meet regularly with their licensure advisor, a faculty member in the education department and in the case of our secondary licensure students, a content faculty adviser too.

Finally, all Scholars attend the EAST program monthly seminars led by the Faculty Program Director and Program Coordinator. EAST Scholars continue to accept invitations for local and national leadership opportunities. For example, EAST was featured at the first Increasing Teacher Diversity in Minnesota Summit held on February 6, 2016 at MCTC.

Professional Development Highlights for EAST Scholars from 2015-2016:

- 1) A lecture by Dr. Nimo Abdi, Post Doctoral Associate in Curriculum and Instruction at the University of Minnesota.
- 2) EAST Presentation at Minnesota Education Equity Partnership (MnEEP) Conference featuring

2211 Riverside Avenue South Minicapolis, MN 55454 Telephone 612-330-1000

in-service East African teachers and four EAST Scholars.

- 3) Two scholars attended a two-day workshop on Somali Studies hosted through the Hutchins African & African American Center at Harvard University.
- 4) Partnership with the Minnesota Writing Project. Scholar attended a three-week intensive writing workshop for teachers.
- 5) Opportunity for EAST alumni to consult the program as EAST Fellows, an initiative made possible by the Graves Family Foundation.

Our Scholars continue to face the barrier of the MTLE/NES exams. We continue to use outside funding to pay for tutoring, retake costs, and study materials. We suggest an end to these exams. We have also suspended our efforts to expand our program to Rochester at this time. Augsburg College does not yet have the infrastructure to support East African teacher candidates in the ways necessary for their success.

Funds Used

Approximately 71% of funds are used for directly supporting students' tuition, standardized test fees and MTLE test preparation materials. The remaining 26% is utilized for program operations including wages, salaries and costs for running seminars/workshops for scholars. During each funding cycle, the CUE/EAST Program, in collaboration with Admissions staff, recruits candidates and assures their retention through the teacher preparation program by providing advisory support, monthly seminars and professional development. Additionally, the program provides NES/MTLE licensure exam preparation to scholars each semester. Furthermore, EAST program provides financial stipend in addition to tuition support for scholars during their student teaching semester to ensure their economic stability while they complete an unpaid semester-long internship required for teacher licensure.

Finally, I wish to thank the State of Minnesota for its continued support to increase the number of teachers of color in the state.

Respectfully submitted,

Audrey Lensmire, PhD

Augsburg College
