Projected spending for fiscal years 2018 and 2019

End of fall term spending for Fiscal Year 2017 is above projected spending levels by \$1.2M (estimated to be \$2.5M by end of year). The increase in spending is largely limited to public 4-year institutions and may be the result of income shifts (fewer Pell recipients or increase in middle income students) or student behavior (increase full-time enrollment or FAFSA filing). OHE is monitoring spending to determine if the spending increase has been sustained as measured by increases in spring term spending.

Depending on whether the sustained increase is seen in spring term payments at the end of February, OHE will adjust its spending projection accordingly. OHE expects that 2018-2019 biennial spending will be \$353.9 million as shown in Table 2.
