AT A GLANCE

Conserve, and manage natural resources

- Manage **1.3 million** acres of wildlife management areas, **191,000** acres of scientific and natural areas, and **4.23 million** acres of state forest.
- Protect, monitor, enhance and restore habitat on **5,500** fishing lakes and **16,000** miles of streams and rivers.
- Manage **2,800** surface-water monitoring sites.

Get people outdoors

- Operate **75** state parks and recreation areas, **43** state forest campgrounds and **9** state waysides.
- Manage **2.4 million** license sales and **1.4 million** boat/vehicle registrations.
- Manage more than **26,200** miles of trails for hiking, biking, snowmobiles, off-highway vehicles, horseback riding and cross-county skiing.
- Manage **1,700** public water accesses, **368** fishing piers and **35** water trails.

Build the economy

- Manage fishing, hunting and wildlife-watching activities supporting **48,000** jobs and **\$3.8 billion** in economic activity.
- Manage **12 million** acres of state mineral rights contributing directly to the mining economy, including 3.5 million acres of school trust lands.
- Meet certification requirements on **5 million** acres of state forest lands that provide timber, habitat, clean water and recreational opportunities, including 2.5 million acres of school trust lands.

Serve the public

- Manage **2,800** facilities statewide.
- Direct an annual budget of roughly **\$550** million.
- **4,479** Employees worked **5.6 million** hours, which equates to **2,677** full time equivalents.

PURPOSE

Our mission is to work with citizens to 1) Conserve and manage natural resources, 2) Provide outdoor recreation opportunities; and 3) Provide for commercial uses of natural resources in a way that creates a sustainable quality of life.

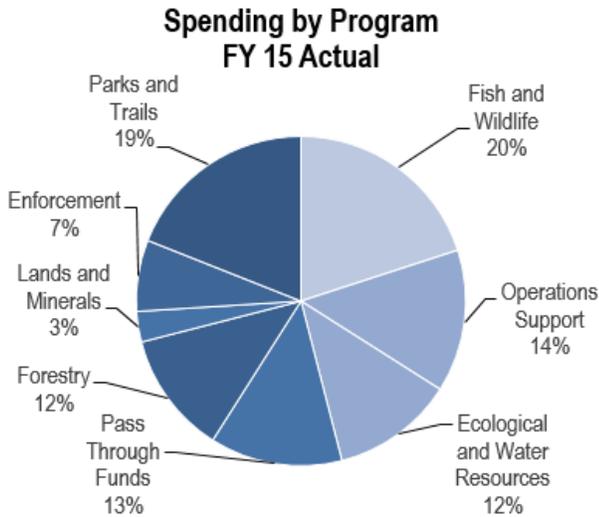

We fulfill our mission by:

- **Conserving** the diversity of land, waters, and wildlife so citizens can enjoy the outdoors and benefit from natural resources and related industries.
- **Encouraging** citizens to get outdoors to enjoy the state’s natural wonders.
- **Promoting** responsible use of resources for our collective economic benefit.
- **Managing** an outdoor recreation system that provides hunting, fishing, wildlife-watching, camping, skiing, hiking, biking, motorized recreation, and conservation education.
- **Protecting and promoting** healthy waterways and ground water.
- **Managing** state forests, mineral rights, and school-trust lands for maximum long-term economic return.

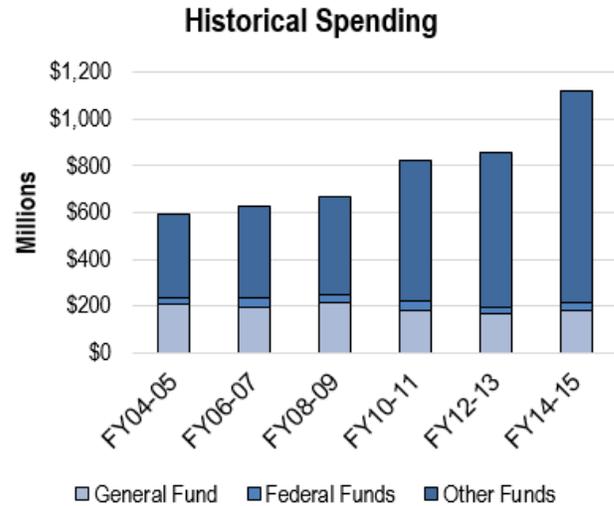

We contribute to the statewide outcomes of:

- A clean, healthy environment with sustainable uses of natural resources.
- A thriving economy that encourages business growth and employment opportunities.
- Strong and stable family and communities.
- People in Minnesota are safe

BUDGET

Source: BPAS

Source: Consolidated Fund Statement

FY 2016-17 biennial budget is approximately \$1.1 billion. The majority of our funding comes from recreational fees and tax revenues. Twenty-seven percent of our funding is one-time, which is dedicated for specific purposes and 19 percent is pass-through grants. We operate out of fifty funds but approximately 39 percent of our financial activity occurs in the Game and Fish Fund and the Natural Resources Fund. This spending focuses on conserving and managing natural resources so Minnesotans can enjoy the outdoors today and tomorrow. About 24 percent of our funding comes from the General Fund. Our major General Fund expenditures relate to operating the state park and forest systems and responding to forest fires. Additionally, we make payments on behalf of the state to counties and Indian tribes as required by statute and treaties, which constitutes 31 percent of our General Fund budget.

STRATEGIES

To accomplish our mission, we use the following strategies:

- 1. Conserve, enhance waters, natural lands, and fish and wildlife habitats.** We work closely with partners to conserve critical lakes, wildlife and waters by:

 - Accelerating groundwater management—monitoring, permitting, education and compliance -- to ensure sustainable use and quality.
 - Working with farmers, landowners, local officials and citizens to promote conservation of prairies, grasslands and wetlands.
 - Implementing programs to prevent and curb spread of invasive species.
 - Accelerating programs to inventory, monitor status of natural lands, waters and species.
- 2. Provide outdoor recreational opportunities.** We support a robust tourism economy and a high quality of life that attracts people and business to the state by:

 - Implementing programs such as the “I Can” series and “Learn to Hunt” that provide affordable outdoor learning experiences to beginners.
 - Increasing the use of user friendly, digital recreation information, such as new websites and mobile apps.
 - Creating and implementing a new parks and trails system plan to improve existing systems and attract future users.
- 3. Manage natural resources for sustainable economies, and communities.** Through recreation tourism, forest products, and mineral and water resources, we help generate billions of dollars a year for the state by:

 - Maintaining diverse, healthy, sustainable and productive forests that meet certification standards.

- Researching and developing mining technologies that protect the environment.
 - Improving data management systems to provide better access and analysis of groundwater and surface water data for sustainable communities.
 - Leasing mineral rights and real estate and selling land and timber from the school trust lands.
4. **Achieve operational excellence in service to citizens.** We strive to continually improve services offered to citizens by:
- Increasing use of plain language and presenting information in easy-to-understand formats.
 - Protecting public safety with Americans with Disabilities Act (ADA) standards at DNR facilities, parks, trails, and other facilities.
 - Maintaining work standards that reinforce positive, professional conduct, promote diversity, and support staff training and development.
 - Working to increase department energy efficiency and renewable energy use that reduces costs and helps the environment.
 - Developing “continuous improvement” project to improve public service and customer satisfaction.
-

Department of Natural Resources legal authority comes from Minnesota Statutes:

Department of Natural Resources

FY18-19 Biennial Budget Change Item

Change Item Title: Operating Adjustment

Fiscal Impact (\$000s)	FY 2018	FY 2019	FY 2020	FY 2021
General Fund				
Expenditures	2,550	4,429	4,429	4,429
Other Funds				
Expenditures	5,276	9,882	9,882	9,882
Net Fiscal Impact = (Expenditures – Revenues)	7,826	14,311	14,311	14,311
FTEs	49	96	96	96

Recommendation:

The Governor recommends additional funding of \$7.827 million in FY 2018 and \$14.309 in FY 2019 to maintain the current level of service delivery at the Department of Natural Resources. This includes increases for current projected compensation and MNIT rates for DNR, as well as expected additional increases in compensation and employer paid pension costs.

Rationale/Background:

Each year, employer-paid health care contributions, pension contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year. For the DNR, known cost increases include current contract compensation and health insurance increases that are projected to add an additional 2% per year to our compensation needs for the 2018-19 biennium. This is a \$4.1 million increase in FY 2018 and a \$8.3 million increase in FY 2019 on the direct appropriated funds. In addition, MNIT projections for information technology services for the DNR, show an estimated increase of \$900,000 per year.

Agencies face challenging decisions to manage these costs within existing budgets, while maintaining the services Minnesotans expect. From year to year, agencies find ways to become more efficient with existing resources. However, cost growth typically outstrips efficiencies, and without additional resources added to agency budgets, service delivery erodes.

For the DNR, an erosion of services includes lower fish and wildlife monitoring, lower fish stocking, fewer conservation officers, fewer aquatic invasive species inspections, slower permit reviews, reduced trail maintenance, additional deferred maintenance on the DNR infrastructure, reduced field work on DNR lands, shorter parks seasons and reduced customer service at state parks.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the DNR, this funding will cover known employee compensation growth (2%), and anticipated compensation increases and employer-paid pension costs. Portions of this proposal are funded by fee increases carried in other change items in the Governor's budget—these occur in the Game and Fish fund and in various Natural Resources fund accounts.

Results:

This proposal is intended to allow agencies to continue to provide current levels of service and information to the public.

Statutory Change(s):

N.A.

Department of Natural Resources

FY18-19 Biennial Budget Change Item

Change Item Title: Legal Support Costs

Fiscal Impact (\$000s)	FY 2018	FY 2019	FY 2020	FY 2021
General Fund				
DNR Expenditures	2,250	2,250	0	0
PCA Expenditures	1,384	1,093		
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	3,634	3,343	0	0
FTEs	1.5	1.5	0	0

Recommendation:

The Governor recommends \$6,977,000 in FY18-19 General Funds (\$3,634,000 in FY18 and \$3,343,000 in FY19) for the Minnesota Department of Natural Resources (DNR) and the Minnesota Pollution Control Agency (MPCA)'s legal support costs they will incur to defend the agencies' decisions in contested proceedings. Supplemental funding gives the agencies the ability to defend their environmental and natural resources decisions whether in federal or state court, contested case hearings, mediation and other venues without imposing undue hardship on existing division budgets. This funding is recommended for DNR, in cooperation with the MPCA, so they can jointly coordinate legal efforts as needed.

This recommendation provides for in-house attorneys at the DNR (1.5 full time equivalents), legal services from the Minnesota Attorney General's Office (AG) to support DNR, contracted outside legal services for both agencies, and related expenses. This recommendation is based on the agencies' recent cost experience.

Rationale/Background:

DNR's mission is to work with citizens to conserve and manage the state's natural resources, to provide outdoor recreation opportunities, and to provide for commercial uses of natural resources in a way that creates a sustainable quality of life. This mission brings together diverse constituencies who may disagree with DNR's decisions. The MPCA's mission is to protect and improve the environment and enhance human health. Their natural resources and environmental regulatory, permit, leasing, or other types of decisions can be and often are challenged through either contested case or judicial proceedings. The cost of defending these decisions can be significant.

DNR and the MPCA will have difficulty adequately defending the state's response to legal challenges without sufficient resources. Costs associated with the NorthMet project for both agencies include outside legal counsel, staff and in-house counsel, records management, and related expenses. DNR is involved in several other large pieces of litigation, and anticipates being challenged on a number of complex water and mining decisions over the biennium. Costs associated with defending these anticipated agency decisions include expert witnesses' fees, staff and in house counsel costs, Attorney General's Office fees, Office of Administrative Hearings costs, and other defense preparation. The risk of needing to expend resources to support litigation is particularly high given the number of controversial decisions pending before both agencies. In these cases the agencies anticipate their decisions will be challenged regardless of their decision.

DNR and the MPCA are increasingly dependent on dedicated funding sources from the state – the agencies' share of general fund as a part of the budget continues to diminish. DNR and MPCA do not have the ability to seek reimbursement of attorney's fees or other litigation costs from project proponents, plaintiffs or defendants except in very rare cases. Not defending the agency decision is not an option. This means that the DNR and MPCA must seek additional resources from the Legislature or reduce/eliminate program funding in order to cover these costs.

Providing special appropriations for these large and unexpected legal costs has precedent. An example is an appropriation that the Legislature provided to defend the 1837 Treaty Rights lawsuit that was eventually heard by the U.S. Supreme Court in the 1990s. The Legislature appropriated \$750,000 to the DNR in ML 2015, 1st Special Session (\$300,000 in FY16 and \$450,000 in FY17) for legal costs related to water management that is available until June 30, 2018. In addition, ML 2016 appropriated \$4.4 million to the DNR that was split between both agencies (DNR - \$3.233 million and MPCA - \$1.167) related to NorthMet mining legal costs with funds available until June 30, 2019. The appropriations did not include the total estimated costs associated with this issue.

Proposal:

This request is for \$6.977 million (\$ 3.634 million in FY18 and \$3.343 million in FY19) for anticipated legal support costs in the next biennium above and beyond the current appropriations. The request would fund 1.5 FTE positions at DNR in years FY18-19 to provide in-house legal counsel and related legal services to support the agency on the anticipated legal proceedings. The majority of the funding would go toward the attorney general’s office, contracted legal support, and other litigation related costs over the next two years.

Results:

Strong legal team to support the agencies on legal challenges relating to Polymet, White Bear Lake, Fargo-Moorhead Diversion, Crowell Moring, Relativity, and other work.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>

Department of Natural Resources

FY18-19 Biennial Budget Change Item

Change Item Title: Parks and Trails Operations and Maintenance

Fiscal Impact (\$000s)	FY 2018	FY 2019	FY 2020	FY 2021
General Fund				
Expenditures	4,279	5,036	5,036	5,036
Revenues	0	0	0	0
Other Funds—Natural Resources				
Expenditures	3,207	3,407	3,407	3,407
Revenues	6,825	8,710	8,925	9,125
Net Fiscal Impact = (Expenditures – Revenues)	661	(267)	(482)	(682)
FTEs	40	40	40	40

Recommendation:

The Governor recommends an increased General Fund appropriation of \$9.3 million in the FY2018-19 biennium, which includes making permanent \$5.6 million in one-time funding from the FY16-17 biennium and an additional \$3.7 million in new General Fund appropriations. This proposal also recommends increased Natural Resources Fund appropriations of \$6.6 million for the biennium, which includes making permanent \$1.3 million in one-time funding from the State Park Account in the FY16-17 biennium. This funding for Minnesota’s State Park and Trail system will better meet the needs and expectations of a wide variety of outdoor recreationalists.

The Natural Resources Fund appropriation will be covered by modest increases to user fees for state park visitors, snowmobiles, all-terrain vehicles (ATVs), boats, and cross-country skiing. Many user fees have not been increased in more than 10 years, eroding the services that DNR can provide and putting some of these funds in danger of going into deficit. This package of change items will bring these recreational accounts into balance as well as allow the DNR to maintain and enhance Minnesota’s outstanding parks, trails, snowmobile, ATV, cross-country skiing and water recreation facilities and services. Natural Resource Fund revenue increases will also support current activities such as motorized vehicle education and safety, trail ambassador volunteers, recreation enforcement activities, and aquatic management activities.

This recommendation for increased appropriations does not include funding to cover inflationary increases in employee compensation and operating costs, some of which are covered in the DNR Operating Adjustment request. Staffing to provide public services makes up nearly half of the parks and trails field operations and maintenance budget.

Revenue increase based on proposed fee changes

Natural Resources Fund	Previous Fee Increase	Proposed Annual Increase	Estimated Revenue Increases			
			FY18	FY19	FY20	FY21
State Park Account	2003	\$1/daily; \$5/annual	1,100	1,335	1,550	1,750
Water Recreation Account	2006	\$1-15/craft, depending on size	3,000	4,000	4,000	4,000
Cross-Country Ski Account	2010	\$2/daily; \$5/annual	75	75	75	75
Snowmobile Account	2005	\$10/year	2,000	2,000	2,000	2,000
ATV Account	2005	\$5/year	650	1,300	1,300	1,300
Total			6,825	8,710	8,925	9,125

Rationale/Background:

State parks and trails support a healthy population and economy. The Division of Parks and Trails serves more than 8.7 million state park visitors and owners of 820,000 registered boats, 265,000 ATVs, 200,000 registered snowmobiles, and 20,000 cross-country ski passes. Minnesota state parks and recreation areas represent 32 of the top 50 tourist attractions in Minnesota, making state parks and trails a cornerstone of the \$11.6 billion outdoor recreation industry. In addition to meeting basic

customer service and operational needs, state parks and trails also need to offer relevant services and amenities to attract the next generation of outdoor recreation enthusiasts. The foundation of Minnesota's outstanding outdoor recreation system is supported by the General Fund and by user fees deposited into various Natural Resources accounts.

Unfortunately, with various reductions, consolidations and new units added since the early 2000s, the system has stretched to a critical point, where staffing and basic maintenance are no longer meeting visitor needs and expectations. At a time when state parks and trails are witnessing record increases in the number of visitors (e.g., annual permit sales and camping are up 30% and 21%, respectively, since 2012), we are receiving increasing complaints as services are reduced and basic upkeep of our facilities lags behind industry standards.

Without new funding, we will need to further cut back on the visitor services that outdoor recreationalists expect from a nation-leading parks and trails system: reduced park seasons, services, and facilities; reduced trail and public water access maintenance (e.g., grooming, sweeping, signage, parking lots, trailheads, docks and piers); and fewer grants to the local governments and user groups that have built and continue to maintain our grant-in-aid trail systems (off-highway vehicle, snowmobile, and cross-country skiing).

In order to manage increased costs over the past decade, we have already significantly reduced maintenance and services; shortened camping seasons; co-managed park and trail units; and reduced visitor services. In addition, we increased prices on some park offerings (e.g., \$1/night on campsites and \$1/bundle on firewood). Recently implemented operating changes, including staffing reductions, have stretched to the breaking point our capacity to manage Minnesota's system of state parks and trails. The legislature has authorized a number of new units and facilities in recent years, including Lake Vermilion-Soudan Underground Mine State Park and Brown's Creek State Trail, which require staffing and support. Without additional funding, the quality of service and visitor experience will decline. The current situation is not sustainable.

Proposal:

This proposal recommends new biennial funding for parks and trails operations and maintenance of \$9.3 million from General Fund and \$6.6 million from dedicated accounts through increased user fees. The remaining user fee increases (\$8.9 million) will create fund stability and funding for enforcement, local water safety grants, aquatic management activities, on-the-ground projects, and grant-in-aid (GIA) programs.

The proposal makes \$5.6 million of one-time funding from the previous biennia permanent (maintaining 34 existing FTE) and includes user fees and new General Fund appropriations (6 new FTE) that will stabilize these Natural Resource Fund accounts, many of which are projecting deficits within the biennium. It will provide for needed trail management and enforcement; provide critical maintenance and project support for grant-in-aid trails (motorized, snowmobile and cross-country skiing) and needed investments in technology, connectivity and improved visitor orientation as Minnesota's state outdoor recreation system moves toward more self-directed and sustainable visitor service models.

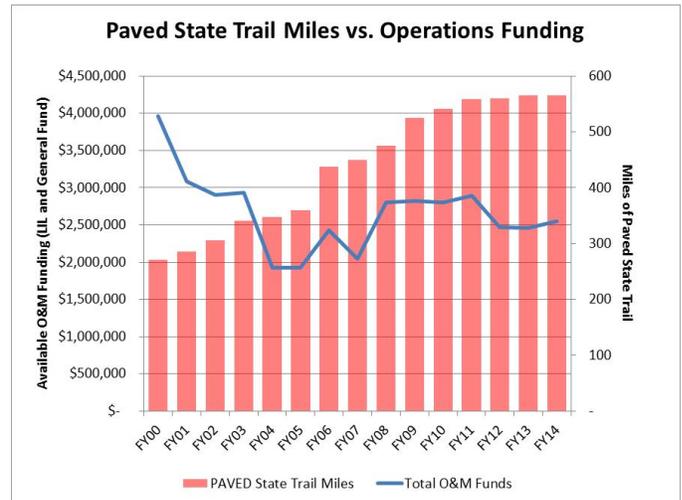

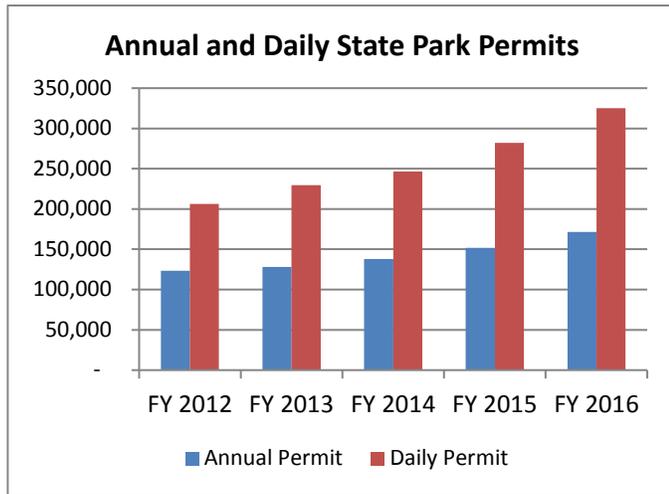

Funding for water recreation and trails (snowmobile, ATV and cross country ski) is provided by user fees through boat, snowmobile and ATV registrations and ski passes. These registrations have not increased for many years. The increased revenue will allow strategic investments in the first two biennia, which will gradually be reduced by inflationary pressure. The investments may include some growth of the ATV system and investments in grooming equipment and trail maintenance for the snowmobile system—both for state managed and GIA trails. Water recreation revenue will be used to improve best management practices and invasive species control at some of the most important public water accesses across the state. Cross country ski pass revenue will be invested in grants to local ski clubs and will allow state parks and trails to invest small amounts of new money in ski grooming in our busiest units.

IT Related Proposals:

A portion of this funding will provide for improved connectivity at our recreational and office facilities, which will facilitate better access to self-directed services and cover the costs associated with connection and monthly service.

Results:

- **Quantity:** Sustain quality experiences for a consistently increasing number of annual visitors to Minnesota's state parks, trails and water access sites.
- **Quality:** Provide “unforgettable” experiences that result in high visitor satisfaction at both state-run facilities and those maintained through Minnesota’s robust grant-in-aid trail programs.
- **Result:** Minnesotans will be healthier, happier, and enjoy improved fitness; Minnesota’s tourism economy will continue to thrive; more special places will be preserved; and more people will be connected to the outdoors.
- **What we will measure:** We collect visitor and trail use satisfaction data, permit and camping sales data, number of visitors/users served, number of acres managed, number of special species preserved.

Statutory Change(s):

Fee changes required to fund this proposal include:

- M.S. 85.055 State Park fees
- M.S. 84.82 Snowmobile registration fees; M.S. 84.8205 Snowmobile State Trail Sticker fee
- M.S. 84.922 ATV registration fees
- M.S. 86B.415 Watercraft License Fees
- M.S. 85.42 Ski Pass fees

Department of Natural Resources

FY18-19 Biennial Budget Change Item

Change Item Title: Parks and Trails Legacy – DNR Parks and Trails

Fiscal Impact (\$000s)	FY 2018	FY 2019	FY 2020	FY 2021
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds – P&T Legacy				
Expenditures	16,741	17,790	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	16,741	17,790	0	0
FTEs	42	42	0	0

Recommendation:

The Governor recommends \$16.741 million for FY18 and \$17.79 million for FY19 are allocated from the Parks and Trails Legacy Fund for the Department of Natural Resources (DNR) to advance goals from the 25-year Parks and Trails Legacy Plan within Minnesota state parks and trails. The focus of the work includes connecting people to the outdoors, acquiring land and creating opportunities, taking care of what we have, and coordinating with partners.

Rationale/Background:

The Clean Water, Land, and Legacy Amendment created the Parks and Trails Fund, which is an important source of funding for improving parks and trails statewide. The DNR uses the Legacy Fund to help establish a 21st century state park and trail system that attracts future generations to experience the outdoors, while supporting the economic vitality of surrounding communities and ensuring the protection of the state's unique resources.

The DNR, the Metropolitan Council, and greater Minnesota are working together to advance a more coordinated approach to achieve outcomes for the Parks and Trails Legacy Fund. The DNR continues to support a percentage distribution of "40-40-20," where 40 percent is allocated to the DNR, 40 percent to the Metropolitan Council, and 20 percent to greater Minnesota. This percentage distribution was agreed to by a 2011 Parks and Trails Legacy Funding Work Group, and has been recommended for three biennia. It is supported by the three implementing agencies and Minnesota's Legacy Advisory Committee, and remains the best approach for allocating the Parks and Trails Legacy Fund.

Proposal:

The DNR will continue to advance the four main goals associated with the 25-year Parks and Trails Legacy Plan:

- **Connect People to the Outdoors.** We continue to promote and provide innovative programs and special events that educate, interpret and build outdoor stewardship skills. For example, the I Can! series reaches out to young families and new park and trail users to teach skills such as camping, climbing, paddling, archery and more. In 2016, we reached more than 300,000 participants through interpretive programs, with our skill-building programs reaching about 43,000 of those.
- **Acquire Land, Create Opportunities.** We will pursue high-priority acquisitions that provide important connections and/or preserve priority important natural and cultural resources. New development and rehabilitation projects create new recreation opportunities with potential to increase state park and trail use.
- **Take Care of What We Have.** We will ensure high-quality outdoor recreational experiences through infrastructure renewal and increased accessibility. This will include, for example, new and enhanced campgrounds, trail bridges, and energy efficiency projects. We also manage and restore natural landscapes within the state park and trail system.
- **Coordinate with Partners.** While agencies and organizations can do a great deal of Legacy work on their own, ultimately we are striving to provide a seamless system of parks and trails in Minnesota. Coordination and cooperation are needed to do everything from providing information to park and trail users to better connecting the statewide, metro

and greater Minnesota parks and trails. The DNR will continue to coordinate with implementing agencies and seek guidance from the Legacy Advisory Committee.

Results:

In keeping with the strategic directions set forth in the Parks and Trails Legacy Plan, the DNR has expanded and improved outdoor recreation opportunities across the state. Key indicators of success include:

- **More people are getting outdoors.** State park permit sales, overnight stays and program participation have all increased significantly since 2009. Overall attendance at interpretive programs increased by almost 40 percent from 2009 to 2015.
- **New opportunities and acquisitions exist at Minnesota state parks and trails.** Over the past seven years, Legacy-funded acquisitions have increased the total acres of parkland and the total miles of state trails. Legacy funding has also made a number of important development projects possible. For example, since 2009 the DNR has:
 - Constructed a trail center at Bear Head Lake SP and a new visitor center at Tettegouche SP (leveraged with bonding).
 - New day use area at LaSalle SRA.
 - Rehabbing underway of 6 miles of trail in St. Croix SP and 5 miles of the Blufflands ST.
 - Built a new 6 mile state park bike trail (Browns Creek ST), and six miles of bike trail in Itasca SP.
 - Improved accessibility at many state parks and trails, including replacing picnic tables and adding accessible fire rings to 75 recreation units (includes forest recreation areas).
 - Upgraded electrical service at campsites, and added 50 amp service at campsites at eight state parks.
 - Major new campground underway at Whitewater SP.
 - Constructed seven yurts in three state parks.
 - Built camper cabins in two state parks.
 - New group camp at Lake Bemidji SP.
 - Converted two historic buildings into lodging.
 - Constructed two RV sanitation stations.
 - Installed 14 renewable energy systems.
 - Bison reintroduction at Minneopa SP.
- **Native landscapes and aging structures have been restored.** Since the initiation of Legacy funding, the pace of native plant restoration at state parks and trails has increased 59 percent, prescribed burning has increased 34 percent and control of invasive plants has increased by more than 90 percent. In addition, Legacy funds have been used to make improvements to our aging infrastructure and to reinvigorate visitor services. More than a third of the 300 bridges on state trails are over 100 years old, and we've used Legacy funding to repair or replace over 50 of them since 2009.

Statutory Change(s):

N.A.

Department of Natural Resources

FY18-19 Biennial Budget Change Item

Change Item Title: Parks and Trails Legacy – Greater Minnesota

Fiscal Impact (\$000s)	FY 2018	FY 2019	FY 2020	FY 2021
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds – P&T Legacy				
Expenditures	8,370	8,894	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	8,370	8,894	0	0
FTEs	2	2	0	0

Recommendation:

The Governor recommends \$8.37 million for FY18 and \$8.894 million for FY19 from the Parks and Trails Legacy Fund to support the Parks and Trails Legacy Grant Program for greater Minnesota. This funding will provide grants to local governments to connect people to the outdoors, help create new parks and trails, and maintain existing ones.

A portion of the total appropriation may be used for administering the grants, including up to 4.5 percent for the Greater Minnesota Regional Park and Trail Commission (GMRP&TC) to maintain an Executive Director and necessary support functions, and up to 2.5 percent for the Department of Natural Resources (DNR) to manage the grants according to standards consistent with the Minnesota Office of Grants Management. This continues the partnership approach of FY16-17, with GMRP&TC providing leadership for the grant program, while DNR provides contract management services.

Rationale/Background:

The Clean Water, Land, and Legacy Amendment created the Parks and Trails Fund, which is an important source of funding for parks and trails statewide.

The DNR, GMRP&TC and the Metropolitan Council are working together to advance a more coordinated approach to achieve outcomes for the Parks and Trails Legacy Fund. The implementing agencies continue to support a percentage distribution of “40-40-20,” where 40 percent is allocated to the DNR, 40 percent to Metropolitan Council, and 20 percent for GMRP&TC, as well as approximately 1 percent allocated “off the top” for coordination. This percentage distribution was agreed to by a 2011 Parks and Trails Legacy Funding Work Group, and has been recommended for three biennia. It is supported by the three implementing agencies and Minnesota’s Legacy Advisory Committee, and remains the best approach for allocating the Parks and Trails Legacy Fund.

The 2013 Legislature established the GMRP&TC to advance system planning in greater Minnesota and to provide recommendations to the legislature for grants funded by the Parks and Trails Legacy Fund. The scope of this work is for parks and trails of regional significance in counties and cities outside the seven-county metropolitan area (Minnesota Statutes, 85.536).

This grant program will help create a seamless system of outdoor recreation across the state. It plays a critical role for enhancing outdoor recreation participation in greater Minnesota, conserving important natural features, and contributing to local economic benefits around the state.

Proposal:

The commission began formally leading the grant program in FY16-17 by guiding the planning and grant selection for greater Minnesota based on the results of its public engagement process in six districts across the state. In FY18-19, GMRP&TC will lead the regional parks and trails competitive grant program by guiding the planning and grant selection for greater Minnesota.

The DNR will continue to work closely with the commission and provide contract management for funded projects, as well as technical assistance to grant applicants and recipients.

This funding will directly provide for a competitive grant program that will help achieve the goals of the 25-year Parks and Trails Legacy Plan, including connecting people to the outdoors, acquiring land and creating opportunities, taking care of what we have, and improving coordination across outdoor recreation providers.

Results:

This program will provide grants to local governments to create and maintain outdoor recreation opportunities of regional or statewide significance in greater Minnesota. Performance measures include:

- the number and type of grants;
- dollars awarded;
- results achieved (e.g., acres acquired, parks and trails developed, and satisfaction of park and trail users); and
- economic trends and benefits resulting from local parks and trails.

Since 2010, greater Minnesota Legacy funds have been used to acquire more than 1,500 acres of parkland. These important acquisitions, most in rapidly growing areas, provide the land for new recreational opportunities.

Results and performance measures under the grant program can vary based on the types of projects submitted and selected for funding. This makes it difficult to set targets for acres acquired, trails miles developed, etc. For example, land acquisition value per acre is significantly different based on the location of the property and the highest use of the property. The same amount of acquisition dollars allocated each year may result in a wide variance in the actual acres acquired.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>FY10/11</i>	<i>FY12/13</i>	<i>FY14/15</i>	<i>FY16/17</i>	<i>Estimated FY18/19</i>
Quantity	Number of grants	38	41	12	25	20-40
Results	Regional Park Acres Acquired	202	608	314	472	300-500
Results	Trails Miles Developed and/or Rehabilitated	117	171	54	40	50-100

Currently grant outcomes are measured on the DNR’s website at:
[Grant Outcomes \(http://www.dnr.state.mn.us/grants/outcomes/index.html\)](http://www.dnr.state.mn.us/grants/outcomes/index.html).

The commission will continue to report grant outcomes through the DNR website and/or the Legislative Coordinating Committee (LCC) Legacy website.

Department of Natural Resources

FY18-19 Biennial Budget Change Item

Change Item Title: Parks and Trails Legacy – Coordination Among Partners

Fiscal Impact (\$000s)	FY 2018	FY 2019	FY 2020	FY 2021
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds – P&T Legacy				
Expenditures	521	548	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	521	548	0	0
FTEs	1	1	0	0

Recommendation:

The Governor recommends \$521,000 for FY18 and \$548,000 for FY19 from the Parks and Trails Legacy Fund to advance a coordinated approach for:

- Integrated research and planning;
- Development, management, and marketing of web-based systems;
- Support for the Parks and Trails Legacy Advisory Committee;
- Restoration evaluation; and
- Other priority coordination needs such as youth involvement and connecting underrepresented audiences.

The products and benefits of this change item are shared among the three implementing agencies - Department of Natural Resources, Greater Minnesota Regional Parks and Trails Commission, and the Metropolitan Council. The responsibility for coordinating, planning and communicating are also shared to ensure that these benefits meet the needs of the three entities.

Through a coordinated approach, we can create a seamless and integrated system of parks and trails, a high priority for citizens participating in the Legacy planning process. Park and trail users want an integrated information source and integrated system of regional parks and trails so that they can quickly and easily find information and opportunities that provide desired experiences. Integrated approaches to research and evaluation are also needed.

Rationale/Background:

The three implementing agencies are working together to advance a more coordinated approach to achieve outcomes for the Parks and Trails Legacy Fund. All three continue to support a percentage distribution of “40-40-20,” where 40 percent is allocated to the DNR, 40 percent to Metropolitan Council, and 20 percent to Greater Minnesota. This percentage distribution was agreed to by a 2011 Parks and Trails Legacy Funding Work Group, and was recommended for three biennia (FY14/15, 16/17, and 18/19).

The state and regional parks and trails system is made up of different providers across the state funded by numerous sources. This complex network poses a challenge to state and regional providers interested in meaningful coordination, as well as end users who seek quality, connected and accessible opportunities. Coordination is essential to achieve the vision laid out in the *Parks and Trails Legacy Plan* and to ensure that the principles the public developed for the use of Legacy Funds are achieved. Effective coordination results in wise use of funds and may result in cost savings.

A major goal for all outdoor recreation providers is to increase the per capita participation in nature-based outdoor recreation. The primary driving factor behind this trend is a decline in involvement among young adults and their children, for older adults, urban individuals and communities of color. Coordinated research information and evaluation should help in our joint efforts to increase outdoor recreation participation.

Proposal:

This request builds on previous appropriations from the Park and Trail Legacy Fund related to coordination and research.

- *Research and planning*—coordinated action continues to be needed across the three systems to understand who is using the state and regional park and trail system, where they are coming from, their satisfaction with facilities and programs, and how to better connect our target markets to the outdoors. The three systems are complementary and use different methodologies to answer different questions. Nonetheless, we need to develop information about use and satisfaction across all systems to make decisions about future investments. Coordinated research and planning is critical to ensuring Minnesotans' expectations for use of the Park and Trail Legacy Fund are being met.
- *Web-based systems* – One of the goals in the *Parks and Trails Legacy Plan*, under the strategic direction of “*Coordinate Among Partners*” is enhanced, integrated and accessible information for park and trail users. The development of an integrated web site that gives users the ability to do trip planning, create customized maps, use print-on-demand services and interface with smartphones is currently underway. This proposal will build on that effort by providing maintenance and marketing resources.
- *Support for the Legacy Advisory Committee* - The mission of the Parks and Trails Legacy Advisory Committee (LAC) is to “champion the 25 year Parks and Trails Legacy Plan by providing recommendations to enhance promotion, coordination, and accountability throughout implementation of the plan.” (<http://www.legacy.lleg.mn.ptlac>).
- The LAC was created as a part of the implementation of the 25-year *Parks and Trails Legacy Plan*. Committee members advise the convening sponsors (Greater Minnesota Regional Parks and Trails Commission, Metropolitan Council, and the Department of Natural Resources) on the implementation of the Legacy Plan. The committee is comprised of volunteers who travel from around the state. Reimbursement for travel expenses and support for their work makes participation possible for a diversity of Minnesotans.
- *Restoration evaluation* – Evaluation of natural resource restoration projects across all four Legacy Funds will determine progress towards achievement of restoration goals. A significant amount of Legacy Funds have been invested in restoration projects and an assessment of progress will guide future investments and assess achievement of restoration goals. This proposal will help achieve legislative mandates for restoration evaluation.
- *Other priority coordination needs such as joint marketing and youth involvement, and equity* - Other priority coordination needs such as joint marketing and youth involvement, and connecting racially and ethnically diverse audiences need a coordinated effort as well.

Results:

- Improve performance for achieving the goals of the 25-year *Parks and Trails Legacy Plan*.
- Increase effectiveness and efficiency of Parks and Trails Legacy Funds.
- Specific results include:
 - Develop and maintain an integrated, user-friendly website, and marketing it to the benefit of our target markets.
 - Implement commonly-agreed research priorities across the three systems for standardized visitor information.
 - Hold six Legacy Advisory Committee meetings per year with the completion of an annual work plan designed to monitor and evaluate and recommend how to implement the *Parks and Trails Legacy Plan*.
 - Complete restoration evaluations and an assessment of the acres of natural resource sites improved.
 - Increase engagement among youth and diverse audiences.

Statutory Change(s):

N.A.

Department of Natural Resources

FY18-19 Biennial Budget Change Item

Change Item Title: Fish and Wildlife Fee Increases and Program Support

Fiscal Impact (\$000s)	FY 2018	FY 2019	FY 2020	FY 2021
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Game and Fish Funds				
Expenditures	3,299	2,223	2,223	2,223
Revenues	9,927	9,927	9,927	9,927
Net Fiscal Impact = (Expenditures – Revenues)	(6,628)	(7,704)	(7,704)	(7,704)
FTEs	8	8	8	8

Recommendation:

The Governor recommends increasing revenue from fishing and hunting license fees (\$9.1M), Pittman Robertson funds (\$0.750M), and fishing tournament fees (\$0.006M). Fifty percent of the increased revenue is needed to meet the current structural deficit and inflationary impacts in the Game and Fish fund. The remaining revenue is for critical Fish and Wildlife initiatives related to key conservation outcomes. Annual spending and revenue from the Game and Fish Fund is approximately \$111M and \$107 million, respectively.

Rationale/Background:

This proposal creates a healthy balance in the Game and Fish fund and makes strategic investments in critical fish and wildlife programs. Currently, the Game and Fish fund projects a deficit starting in CY19 due to a structural imbalance of just over \$4 million per year.

MS 97A.055 requires long-range planning and fee adjustments as part of the budget process. The last fee increase was in 2012. The Game and Fish Fund Budget Oversight Committee (BOC) has recognized this needs to be addressed. In addition, Pittman-Robertson revenue estimates remain at high levels. Minnesota’s apportionment of wildlife restoration dollars continues to be projected above \$20 million through FY 2018, well above average allotments of \$11 million prior to FY 2012. To earn these federal dollars, we must first spend state dollars and then submit for a 75% reimbursement. Without increased spending to recapture 75% of eligible expenses, there is a risk of reversion (loss of federal funds), which may occur as early as FY 2018. Since the beginning of the Pittman-Robertson program in 1937, Minnesota has never turned back these federal funds.

Our ability to accomplish our programmatic goals has been impacted not only by inflationary pressures, but also by increasing needs in fish and wildlife programs. Without new funding, we risk reducing hunter and angler satisfaction, and a diminished capacity to understand and respond to changes in fish and wildlife populations. We need to maintain our ability to monitor and manage our populations and habitats to ensure sustainability of the state’s substantial tourism industry based on hunting and angling. We also need to expand deer research and monitoring as recommended in the Office of the Legislative Auditor’s (OLA) report on deer population management.

Not addressing the current revenue shortfalls and programmatic pressures will prolong the projected deficit and create a widening gap in much needed natural resource efforts.

Proposal:

This proposal is primarily a change to existing programs, with outcomes that relate to current natural resource conservation opportunities.

- License fee revenues – proposes increasing hunting and fishing license fees for various license types raising projected revenues by \$9.1 million per year. License fee changes would go into effect July 1, 2017. (see table below).
- Administrative or programmatic capacity – \$2.223M for programmatic capacity.

- *Fisheries Section (\$1.183M for a Section with 284 FTEs).* The proposal funds increased monitoring and evaluation of fish populations and management of regulations. This is critical to ensure that we are identifying emerging issues early and responding quickly to minimize the potential impacts such as biological changes that may threaten certain fish populations. Examples of this work include increased ability to evaluate changes in northern pike regulations, walleye stocking adjustment efficiencies, and informed decisions based on current fisheries data, including harvest and pressure (creel survey) information.
- *Wildlife Section (\$1.04M for a Section with 223 FTEs).* This proposal funds evaluation and research of wildlife populations and management of habitats and facilities. This includes conducting hunter attitude surveys, expanding deer population surveys, increasing oak and other forest habitat management, and maintaining and improving hunter access to WMAs and other public lands. These funds would also be used to address some of the priorities identified in the OLA recommended deer plan, once completed.
- **Equipment or supplies** – \$1.076M for fisheries-related equipment. The sampling boat for Lake Superior (\$364,000) has reached the end of its useful life and needs to be replaced to ensure safe and reliable sampling on this co-managed fishery. \$374,000 is proposed for four electrofishing boats used to sample fish in lakes and rivers to replacing failing boats. Other fish sampling equipment (\$177,000) will replace failing nets and prevent the inefficient use of staff time to patch nets. Finally, \$161,000 is requested for trout and salmon work, including Lake Superior trout management, reclamation of lakes for stream trout lake management, and improved biosecurity measures at coldwater hatcheries.
- **Federal revenues** – Eligible spending will allow for an additional \$750,000 in Pittman-Robertson reimbursement, allowing Minnesota to invest in critical wildlife areas at a 25:75 state to federal match.

License type	Current	Proposed	% Increase	Estimated Additional Revenue (in millions)
Resident angling	\$22	\$25	14%	\$1.363

Department of Natural Resources

FY18-19 Biennial Budget Change Item

Change Item Title: High Pathogen Avian Influenza Emergency Planning and Response Funds

Fiscal Impact (\$000s)	FY 2018	FY 2019	FY 2020	FY 2021
General Fund				
Expenditures	250	250	250	250
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	250	250	250	250
FTEs	2	2	2	2

Recommendation:

The Governor recommends \$250,000 per year from the general fund for emergency preparedness and response relating to high pathogen avian influenza (HPAI) and other wildlife outbreaks.

Rationale/Background:

The DNR was provided \$350,000 in the 2015 legislative session to assist in the response to a HPAI outbreak in Minnesota. Funds were used for sampling of animals in the wild to detect and monitor for the avian influenza virus. The 2015 outbreak of HPAI in Minnesota highlighted the need to prepare for and be able to quickly respond to outbreaks. Due to the complexities inherent in the Minnesota poultry systems, lack of planning and response can lead to catastrophic outcomes for Minnesota's food production system and the economy.

Current funding available for disease management is limited and restricted to statutorily specified activities. When disease outbreaks occur, these funds are often insufficient to manage the monitoring, testing and other activities necessary to respond and control the outbreak. The DNR has no ongoing funds dedicated to HPAI response.

Proposal:

This proposal would provide \$250,000 per year to fund emergency planning and preparedness activities related HPAI and other disease outbreaks in wildlife populations. DNR would continue to monitor for HPAI strains by sampling fall hunter-harvested ducks in coordination with the United States Department of Agriculture. Other activities will include planning and preparedness training, research, response to outbreaks including sampling, testing and implementation of methods to prevent disease spread for HPAI and other wildlife diseases. .

Results:

Improved understanding of the role wild birds play in maintaining and spreading HPAI viruses.

Department of Natural Resources

FY18-19 Biennial Budget Change Item

Change Item Title: Free Hunting and Fishing Licenses for 50% Service Connected Disabled Veterans

Fiscal Impact (\$000s)	FY 2018	FY 2019	FY 2020	FY 2021
General Fund				
Expenditures	350	350	350	350
Revenues	0	0	0	0
Other Funds				
Expenditures	(350)	(350)	(350)	(350)
Revenues	(350)	(350)	(350)	(350)
Net Fiscal Impact = (Expenditures – Revenues)	350	350	350	350
FTEs	0	0	0	0

Recommendation:

The Governor recommends reducing the threshold level of service-connected (SC) disability in current law from 100% down to 50% disability rating for veterans to be eligible for free hunting and fishing licenses as described in M.S. 97A.441. This will not have an impact on the Minnesota Department of Veterans Affairs (MDVA's) budget. It will impact the Minnesota Department of Natural Resources by reducing revenue received from issuing hunting and fishing licenses. To offset the impact of this lost revenue, the Governor recommends a \$350,000 per year general fund appropriation for the Department of Natural Resources.

Rationale/Background:

The proposal would expand the number of service connected disabled veterans eligible for free hunting and fishing licenses. Numerous states provide free hunting and fishing benefits for a wider margin of their disabled veteran populations.

Proposal:

Currently, approximately 6,800 veterans in Minnesota are rated 100% service-connected disabled and therefore are eligible for the discounted hunting and fishing licenses. By reducing the threshold to those Veterans with a 50% service connected disability or greater, the number of veterans eligible more than triples to 22,800.

The Minnesota Department of Natural Resources is willing to support a reduction in the eligibility threshold for free hunting and fishing licenses. However, they are constrained by the requirements associated with receiving federal funding allocations and lost licenses fees.

Results:

It is difficult to estimate how many additional service connected disabled veterans would take advantage of reduced costs associated with hunting and fishing licenses. At present, the estimated veteran participation rate in hunting & fishing activities is close to 60%, significantly higher than that of the general population. However, the number of 100% SC veterans currently taking advantage of the free hunting and fishing licenses is relatively low compared to the overall number of 100% SC veterans.

Statutory Change(s):

M.S. 97A.441

Department of Natural Resources

FY18-19 Biennial Budget Change Item

Change Item Title: Delivery of Natural Resources Law Enforcement

Fiscal Impact (\$000s)	FY 2018	FY 2019	FY 2020	FY 2021
General Fund				
Expenditures	2,785	2,785	2,785	2,785
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,785	2,785	2,785	2,785
FTEs	17	17	17	17

Recommendation:

The Governor recommends \$2.785 million each year to be appropriated to the Department of Natural Resources (DNR) to deliver natural resource law enforcement services on a statewide basis by restoring positions and right-sizing staff to meet the current and evolving demands for natural resource protection in the state.

Rationale/Background:

Minnesotans have a connection with our natural resources that has transcended time since statehood. These precious resources are vital to our economy, public health, heritage, and quality of life. During some of the most trying recent economic times voters approved measures to increase taxes to protect, improve, and enhance these natural resources and water quality. With those measures, and the continuing work of the Department of Natural Resources—and partnering private and governmental agencies—resource managers, citizens, stakeholders, and political leaders at all levels of government have invested time and money into developing an array of management plans. These management plans ensure that our natural resources still provide a healthy economic driver, increase public health, maintain our outdoor heritage and quality of life.

In today's conservation law enforcement, conservation officers are the highly visible asset that provides outreach, education, and law enforcement to ensure that many of these management plans meet their intended objectives. In the field, contact between citizens-users and Conservation Officers ensure that management plans are understood, so voluntary compliance is achieved.

Increased operating costs have forced the Division of Enforcement to 'live off its vacancies'. We currently have 21 vacant conservation officer positions, leaving 18 field stations unmanned throughout the state. We received funding for 9 positions in the 2015 Legislative session, however due to increasing costs, we were only able to hire 4 positions. We have implemented cost saving measures including permanent reductions in regional training staffing and division support positions, and reductions in fleet. At the same time we have seen increases in hunting seasons, additional forest land, state trails and conservation efforts throughout the state that Conservation Officers need to enforce natural resource laws on. These vacancies in the field make it difficult to provide the valued services of Conservation Officers. In turn, resource management plans are not as effective. The Division's budget expenditures are primarily providing staff and the direct and necessary costs of keeping that staff in the field.

Proposal:

This proposal to restore enforcement staffing will assist the department in meeting resource management program goals that are vital to the state's economic, public health, heritage and quality of life. We realize the important role of in the field citizen engagement. The changing role of conservation law enforcement is vital to the Department's outreach and education.

Conservation officers are increasingly partnering with new local, state, tribal and federal agencies. Many of these agencies rely on our work to accomplish their resource management programs. Funding of field vacancies will make those partnerships more effective.

This proposal will increase field contacts with citizens. Conservation officers provide a conduit between citizens and resource managers. By the nature of our field work, we engage one-on-one with citizens and are able to provide vital information about rules, regulations, and laws, the reasoning behind them, and the impacts if they are not followed. We are also able to put citizens in touch with resource professionals when we are not able to provide the resources they require. Many citizens don't even know where to start if they have a question; these field contacts provide that opportunity to start citizen engagement.

Results:

Compliance rates, response to calls for service, numbers of public outreach contacts, by supporting a diverse conservation workforce, and reaching resource management objectives can be measured to evaluate if Division staffing is sufficient.

Statutory Change(s):

NA

Department of Natural Resources

FY18-19 Biennial Budget Change Item

Change Item Title: Funding Flexibility

Fiscal Impact (\$000s)	FY 2018	FY 2019	FY 2020	FY 2021
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends creating an “Enforcement Operating Account” in the Natural Resource (NR) fund that would consolidate seven NR appropriations into one operating account for NR fund activity.

Rationale/Background:

The Division of Enforcement is currently allocated operating funds from a number of accounts in the Natural Resources (NR) fund. These accounts include:

- Water Recreation
- Snowmobile
- Off Highway Motorcycle
- Off Road Vehicle
- State Parks
- State Parks and Trails Lottery in Lieu and
- Invasive Species

Enforcement appropriations from these accounts make up less than 17% of the Enforcement Division Operating Budget. Base dollar amounts within these NR accounts range from \$71,000 to \$3.4 million not including grant activity. These operating dollars are currently used in a ‘one-for-one’ ratio in our operations, which is mostly paying for the hours worked on a specific activity related to that account. This is problematic because the hours worked in relation to those activities are user-driven and can be directly related to weather conditions.

For example, in a year when the state gets early snowfall and trail conditions are good more people are participating in snowmobiling activities. The demand for services exceeds the funding from the snowmobile account in the natural resources fund. As a result the demand for all-terrain vehicle (ATV) services decreases and we have an excess in that account. However, keeping fund integrity in mind, we are unable to pay for snowmobile work with ATV funds. In a low snow year, the above scenario is reversed.

This proposal would allow flexibility within the Enforcement division’s NR budget to ensure NR program needs are met and not limited by funding structure. The Division would still track hours worked in each of the individual programs and be able to report back to legislators and stakeholders on services provided.

Proposal:

This proposal would create an “Enforcement Operating Account” in the NR fund where the funds that were traditionally allocated to the Division would be consolidated. Rather than having seven appropriations from the seven different accounts in the NR fund, the Division would have one appropriation from this new account.

Results:

This is a Continuous Improvement proposal. More efficient accounting operations are realized, allowing staff to focus on new tasks and initiatives identified in the Division's 10-year Strategic Plan.

Statutory Change(s):

Legislative appropriation language will need to be changed from historical language.

Department of Natural Resources

FY18-19 Biennial Budget Change Item

Change Item Title: Wild Ginseng Harvest, Certification, and Sale

Fiscal Impact (\$000s)	FY 2018	FY 2019	FY 2020	FY 2021
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	65	65	65	65
Revenues	65	65	65	65
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends creating a new fee license to harvest wild ginseng, increasing the existing license fee for buying and selling ginseng, and setting a restitution value of illegally-taken ginseng. These fees are estimated to generate \$65,000 annually and will be used to create a regulatory structure and data-gathering process necessary to manage ginseng harvest in a sustainable manner. Currently, only a dealer's license is issued, totaling less than \$500 in revenue annually.

Rationale/Background:

Wild ginseng is a small plant that grows on the floor of deciduous hardwood forests throughout the eastern and central U.S., and reaches the western edge of its range in Minnesota. The root of the wild ginseng plant has been highly valued as a medicine in overseas markets for thousands of years. The harvest of ginseng from U.S forests has been practiced by a small number of persons for many years, but a recent ten-fold increase in the market price of ginseng has created a boom in interest in harvesting the plant. Regulations that enable the DNR to manage the harvest of ginseng have not been updated in over thirty years. The DNR is committed to managing the harvest of ginseng to insure the species' continued presence in the state into the future.

The U.S. Fish and Wildlife Service (USFWS) has designated wild ginseng as a species for which trade is regulated under Appendix II of the international Convention on Trade in Endangered Species (CITES). USFWS recently wrote to the DNR expressing concern that Minnesota is one of only two states that continue to allow harvest of ginseng on state lands, and requested that the DNR provide evidence that this harvest is sustainable. Until the data collection and analysis funded by this change item is implemented, the DNR will be unable to provide such evidence to USFWS. Without an assurance of sustainable harvest, USFWS can prohibit export of wild ginseng originating in Minnesota.

Proposal:

This proposal modifies the existing ginseng harvest license, fees, and penalty structure as follows:

- Increases the dealer's license fee to \$1,000
 - The DNR anticipates that approximately 30 such licenses will be issued each year. State statute currently requires that dealers who buy ginseng from harvesters and then sell that ginseng to wholesalers purchase a license from the DNR for \$5. In 2015, the DNR issued 72 of these licenses.
- Establishes a new \$100 license for harvesting wild ginseng
 - The DNR anticipates that approximately 200 such licenses will be issued each year. State statute currently does not require that ginseng harvesters possess a license for harvesting wild ginseng.
- Establishes a restitution value for wild ginseng equal to the current market value at the time the ginseng is illegally obtained
 - The DNR anticipates restitutions to generate approximately \$15,000 annually. State statute currently does not set a restitution value for ginseng harvested illegally.

The revenues from this proposal would fund staff time and/or contracts for field surveys, data collection, data analysis, and report writing that will allow DNR to monitor both the health of the State's wild ginseng population and the rate of harvest of wild ginseng on state lands.

Results:

The evaluation of the successful performance of the proposed legislative initiative and change item will be derived from the proposed collection of data on the rates of wild ginseng harvest and on the status of wild ginseng populations. Currently, there are no data on these performance measures.

Statutory Change(s):

The proposed legislative initiative will affect the following statutes:

- Section 84.091
- Section 84.0911
- Section 84.0912
- Section 84.093
- Section 84.42

Department of Natural Resources

FY18-19 Biennial Budget Change Item

Change Item Title: Reforestation of DNR-Administered Forest Lands

Fiscal Impact (\$000s)	FY 2018	FY 2019	FY 2020	FY 2021
General Fund				
Expenditures	1,250	1,250	1,250	1,250
Revenues				
Forest Management Investment Acct.				
Expenditures	1,250	1,250	1,250	1,250
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,500	2,500	2,500	2,500
FTEs	3	3	3	3

Recommendation:

The Governor recommends \$2.5 million in both FY2018 and FY2019 for reforestation of DNR-administered forest lands. Funding is needed to maintain healthy, vibrant state forests and comply with *Minnesota Statute*, chapter 89.002 requirements to reforest after harvest on state lands. Reforestation efforts will include site preparation, planting seeds and seedlings, protecting seedlings from animal browse and stand improvement. The \$2.5 million request represents approximately 8% of the Division of Forestry’s General Fund and Forest Management Investment Account appropriations. There is currently no base funding for reforestation work. Support for this activity has typically been one-time funding or bonding. This proposal provides a stable source of funding for this critical activity. There will be a corresponding reduction in future bonding requests from the Division of Forestry.

Rationale/Background:

Over the past decade, DNR has sought bonding funds to support reforestation efforts. Unfortunately, bonding has consistently fallen \$1 to \$2 million short of the reforestation need. Reforestation work is the base for all good forest management. It is how we create diverse, healthy forests. Without reliable, long-term reforestation funding, Minnesota’s state forests are at risk. Increased invasive species outbreaks, reduced wildlife habitat, diminished water quality, fewer recreation opportunities and reduced available wood fiber are all potential outcomes of forests without solid reforestation activities.

Lack of reforestation dollars limits the DNR’s ability to harvest timber. This puts rural employment at risk, which depends on DNR forest lands as part of the local economy. About 30% of Minnesota’s wood fiber comes from DNR-administered forest lands. Planting seeds or seedlings is required to regenerate pine, spruce, walnut and oak forests. Following *Minnesota Statute*, chapter 89.002, these forests cannot be harvested without funding to support reforestation efforts. Existing reforestation funding will be depleted by the end of the current biennium. There are no other designated reforestation dollars for FY2018 and beyond. Compounding this shortfall is the additional burden of unplanned events such as wind storms and Emerald Ash Borer destruction. Reliable reforestation funding is needed to do good forest management and create vigorous forests.

Proposal:

This proposal creates a stable funding source for reforestation. Reforestation is high priority DNR work that includes:

- Preparing sites for planting.
- Seeding and planting new forests.
- Protecting seedlings from animal browse through the critical first seven years of growth.
- Conducting stand improvement or selectively thinning trees, to promote healthy and strong growth of remaining trees.

The \$2.5 million annual request supports 3 FTEs and breaks down into the following funding components:

- \$1,250,000 general fund appropriation
- \$1,250,000 Forest Management Investment Account appropriation from the Natural Resources Fund.
- Of the 3 FTEs, 2 FTES are restoring positions and 1 FTE is maintaining a position.

Results:

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>FY2011-2015</i>	<i>FY2016</i>	<i>FY2020</i>
Quantity	Number of acres reforested.		8,500	6,700
Quantity	Number of acres protected from animal browse annually.		300	2,300
Quality	Number of acres of stand improvement annually.		2,000	2,000

Additional funds (e.g. bonding) will be needed to meet full reforestation needs.

Statutory Change(s):

None

Department of Natural Resources

FY18-19 Biennial Budget Change Item

Change Item Title: DNR Sustainable Timber Harvest Analysis

Fiscal Impact (\$000s)	FY 2018	FY 2019	FY 2020	FY 2021
General Fund				
Expenditures	500	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	500	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$500,000 in FY2018 to complete a statewide analysis of the sustainable timber harvest level on DNR-administered forest lands. The project will include forest modeling scenarios of DNR-administered forest lands, assessment of potential effects on non-timber resources, stakeholder engagement and identification of investments to sustain DNR timber harvest levels over time. Funding will be used to contract technical expertise to complete the analysis and facilitate stakeholder and public engagement.

Rationale/Background:

The current target for timber offered for sale from DNR-administered forestry lands is 800,000 cords per year. This target is based on a number of statewide analyses conducted between 2008 and 2015. Past analyses were conducted with a variety of methods, modeling approaches and assumptions that incorporated non-timber resources (e.g., wildlife habitat, biodiversity) to varying degrees. While updating the DNR landscape-level forest management plans (Section Forest Resource Management Plans) in the northern part of the state, the statewide DNR timber target has been of interest to both internal staff and external stakeholders. In addition, the recent increase in timber prices and announcement of a potential new wood siding mill near Hoyt Lakes has generated concerns about an increase in DNR timber offered for sale to meet this potential increase in timber demand. About 30 percent of Minnesota's wood fiber comes from state forest lands.

Some stakeholders suggest DNR could sustain higher levels of timber harvest while others question whether 800,000 cords per year is sustainable. To address these concerns, the Governor directs the DNR to complete an analysis of the sustainability of harvesting one million cords per year of timber from DNR-administered forest lands. If this analysis demonstrates that one million cords per year is unsustainable, DNR is directed to identify an alternative sustainable harvest level. While DNR is confident about the current 800,000 cords per year target, a thorough analysis of new data would be of great value. This analysis would improve responses to questions about DNR's sustainable timber harvest level and identify possible investments (e.g. roads, reforestation, timber stand improvement, invasive species control) to appropriately support DNR's sustainable harvest levels over time. Such supporting investments will ensure environmental responsibility and economic return. DNR has begun preliminary work engaging stakeholders and gathering information to ensure the analysis can be done quickly.

Proposal:

This is a new initiative with preliminary work beginning in FY2017. The technical modeling and analysis will be completed by an independent contractor using additional funds in FY2018. The project has the following primary components:

Forest Modeling of DNR-administered Forest Lands

Multiple modeling scenarios of DNR-administered forest lands will be conducted to analyze trade-offs among multiple forest resources under varying levels of constraints and assumptions.

Analysis of Potential Effects on Non-timber Resources

Technical experts in various natural resource disciplines from organizations such as the University of Minnesota, Natural Resources Research Institute and DNR will analyze the potential effects on non-timber resources. Factors such as wildlife, water quality and biodiversity will be considered. Their analysis will examine outputs from multiple modeling scenarios, assess relative effects on non-timber resources and suggest how these effects should be considered in determining the DNR sustainable timber harvest level.

Identification of Supporting Investments

Investments that will best support long-term environmental and economic needs for sustainable DNR timber harvest will be identified. These include potential investments in reforestation, forest stand protection (e.g., from insects, disease, animal browsing), forest thinning, forest roads, invasive species control, forest inventory and monitoring.

Stakeholder Engagement

Stakeholder engagement will be important throughout the project to maintain transparency and acceptance of the analyses and recommendations. A stakeholder advisory group will review the overall project design, forest modeling approach, analysis of non-timber effects, and identification of needed supporting investments for sustainable timber harvests on DNR-administered forest lands.

The project will:

- Consider the potential effects of multiple statewide modeling scenarios on timber and non-timber forest resources.
- Recommend long-term (50 years) and near-term (10 years) sustainable harvest levels on DNR-administered state forest lands under current policies and management practices.
- Identify potential effects of changes to policies and practices on near- and long-term DNR sustainable harvest levels and non-timber resources.
- Identify critical investments to best support long-term environmental and economic outcomes for recommended current and potential future DNR sustainable harvest levels.

The recommended DNR sustainable harvest levels will be incorporated in DNR Section Forest Resource Management Plans as they are scheduled for revision.

Results:

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Results	Recommended long-term and short-term sustainable timber harvest levels on DNR-administered state forest lands.	NA	NA	June 2018
Results	DNR Section Forest Resource Management Plans created using recommended sustainable timber harvest levels. Updated on 10-year cycle.	NA	NA	2018-2028

Statutory Change(s):

No statutory changes are needed.

Department of Natural Resources

FY18-19 Biennial Budget Change Item

Change Item Title: Next Generation Core Forestry Data Systems

Fiscal Impact (\$000s)	FY 2018	FY 2019	FY 2020	FY 2021
General Fund				
Expenditures	2,000	2,000	1,000	1,000
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,000	2,000	1,000	1,000
FTEs	3	2	2	2

Recommendation:

The Governor recommends \$2 million from the general fund in both FY2018 and FY2019 to replace aging core forestry data systems with an updated, integrated and more efficient data system.

Rationale/Background:

Current DNR Forestry data systems are based on a 25-year old business needs analysis, with some system components created 20 years ago. Despite ongoing investments, current systems are partially integrated, challenging for field staff to use, complicating forest management workflow and poorly structured for efficient reporting. In addition, the systems are built on platforms unable to support the constantly evolving aspects of mobile data devices, applications and operating systems. A new forestry data system will increase the efficiency, timeliness and accuracy in how DNR gathers, enters, manages and uses forestry data that is needed to operate core business processes. Resulting gains in data management will improve staff efficiency related to a number of DNR performance indicators, such as acres of DNR forest lands re-inventoried, miles of state forest roads maintained, acres and volume of timber offered for sale and acres of reforestation.

In 2015, the Office of Legislative Auditor Report on DNR Forest Management recommended that resources should be allocated to address functional and content shortcomings of DNR’s core forestry data systems. The report also highlighted challenges relating to a time consuming and duplicative data entry processes, limited ability for field staff to retrieve data and effective tracking of accomplishments and progress toward management goals. This proposal will address the concerns raised in the Office of Legislative Auditor’s report.

FY2016-2017 general funds provided for a systems review and business analysis (Phase I), with the expectation that we would create an FY2018-2019 budget request for preparation, development and implementation (Phase II). Phase 1 analysis is nearing completion and has informed development of this proposal for Phase II.

Proposal:

This initiative will build a new integrated forestry data system to support the forest management processes on nearly 5 million acres of DNR-administered forest lands. Three to five different data systems will be combined into one integrated system. The business processes included are forest inventory, forest planning, timber appraisals, forest roads, timber sales, timber scaling and reforestation. A new system will be better able to assist foresters in managing forests by making critical data more readily available, supporting efficient data collection in the field, coordinating forest management projects across multiple sites over time and providing timely information on accomplishments and outcomes. Because foresters will have better access to more complete information, they will spend less time collecting redundant information, focus data collection on filling specific information needs and make better-informed decisions while in the field.

The new system will be designed to maximize use of current mobile device technology and applications, plus provide the flexibility to adapt as mobile data devices continue to evolve. Data collection devices currently being used by DNR Forestry staff

are outdated and expensive to support. Without a systems change new, less expensive, more efficient mobile data devices cannot be used.

Completion of a new systems build (Phase II) is expected to take two biennia to complete, with additional development funds in the FY2020-2021 biennium (\$1,000,000/\$1,000,000). Phase II includes three DNR project and data managers in FY2018 and two positions in FY2019 to prepare for the migration to a major new system and support system development and implementation. This includes refining requirements, data migration, data governance, testing and training. An external contractor will develop the new system, program new software and coordinate new hardware. Ongoing funding for FY2022 and beyond of \$500,000 per year includes one MNIT position and support of ongoing system maintenance and enhancements.

IT Related Proposals:

This proposal has a heavy information technology component. MN.IT estimates six positions for the preparation, development and implementation parts of the project. One position will be a long-term MNIT position to address hardware upkeep, forester training, software bug fixes, ad-hoc report development and application enhancements.

Results:

Department of Natural Resources

FY18-19 Biennial Budget Change Item

Change Item Title: Sustainable Forest Incentive Act Updates

Fiscal Impact (\$000s)	FY 2018	FY 2019	FY 2020	FY 2021
General Fund				
Expenditures	156	4,512	4,631	4,831
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	156	4,512	4,631	4,831
FTEs	0	0	0	0

Recommendation:

The Governor recommends revising the Sustainable Forest Incentive Act (SFIA) to update eligibility and certification requirements, among other changes, to align current land use practices with the purposes of the act. This proposal also includes an administrative cost for the Department of Natural Resources. To support the administrative costs for DNR, this recommendation includes \$156,000 in FY18, \$312,000 in FY19, and \$231,000 in FY20 and ongoing.

Rationale/Background:

Under current law, property owners receive \$7 for each acre of qualifying forest land enrolled in SFIA. In return, they agree not to develop the land and to follow a forest management plan while they are in the program. All enrolled land must remain in SFIA for at least eight years. This proposal revises the Sustainable Forest Incentive Act in response to the 2014 report from the Office of the Legislative Auditor. The revisions are intended to provide greater accountability and oversight, and to align current land use practices with the purposes of the act.

Proposal:

This proposal modifies the existing SFIA program by adding to the act’s purpose provision to emphasize economic and ecological benefits. This change would modify the law to account for instances where land is improved with a paved trail under easement, lease, or license.

This proposal updates and changes SFIA eligibility requirements, certifications, covenant length, calculation of the incentive payment, withdrawal procedures, transfers of ownership, definitions to forest land and claimants, and other minor changes.

Results:

<i>Name of Measure</i>	<i>Impact</i>
Efficiency and Compliance	Increase

Statutory Change(s):

Minnesota Statutes, Chapter 290C

Department of Natural Resources

FY18-19 Biennial Budget Change Item

Change Item Title: Public Waters Protection

Fiscal Impact (\$000s)	FY 2018	FY 2019	FY 2020	FY 2021
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Water Management Acct				
Expenditures	670	670	670	670
Revenues	670	670	670	670
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	6	6	6	6

Recommendation:

The Governor recommends increasing public water permit fees by approximately \$670,000 annually and appropriate those funds to the department. Currently revenue generated by the water appropriation permitting program is supplementing work being done under the public waters permitting program. This proposal would slightly narrow the disparity between the revenue that two water permitting programs bring in and the funding needs of each of these programs. These additional funds would be used to support public waters protection work of 5 FTEs for field work and 1 FTE for mapping maintenance and corrections.

Rationale/Background:

Public water protection, which includes the field administration of public water permits, is a significant workload for division hydrologists. The current fee structure for public waters permit applications does not begin to bring in enough revenue to support the program. The majority of the Water Management Account is funded by water appropriation fees but Water Management Account dollars are applied towards funding work in accordance with Minnesota Statutes, chapter 103G including the water appropriation permitting and the work in public waters permitting programs. This budget proposal would narrow the disparity between the revenue that each program brings in and the funding needs of each program.

The public waters permit program is funded by a combination of General Fund, Water Management Account, and a small amount of Water Recreation Account. General Fund support for the program has declined for more than a decade, while other funding levels have been flat. The Water Management Account has become the dedicated funding source for water appropriation and public water permits, but the vast majority of \$5 million in annual revenue to the account comes from appropriation permits. While public water permits make up half of the workload for the 28 DNR hydrologists, annual revenues from public waters permits makes up only \$200,000 of the revenues into the Water Management Account.

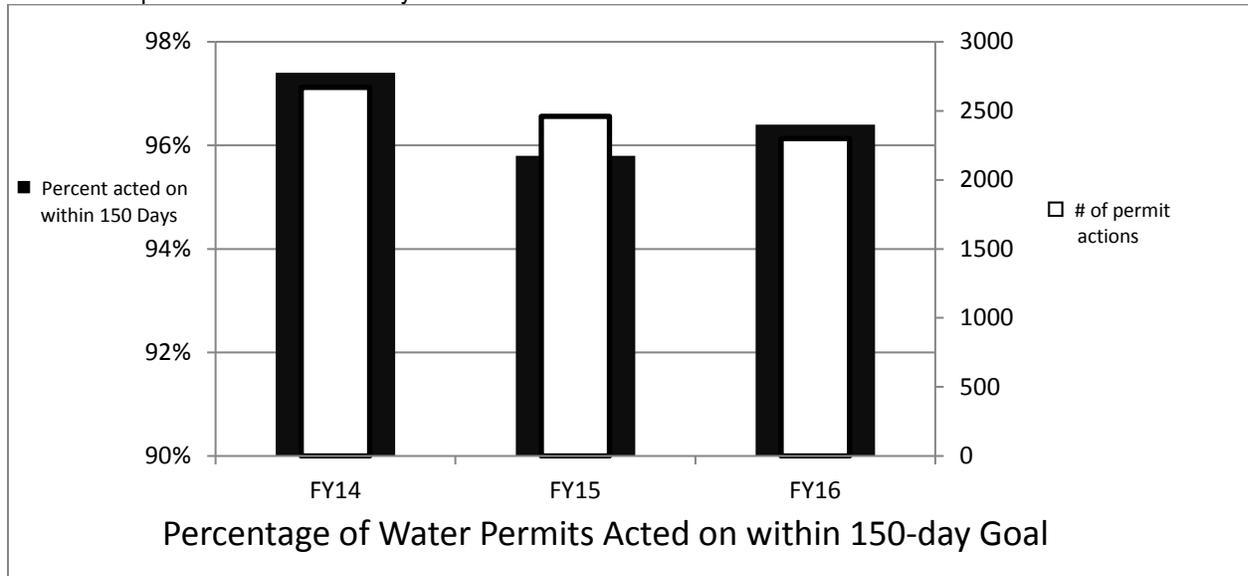

This proposal would improve the current imbalance between public water and water use permit revenues and program costs by bringing the public waters permitting revenue and appropriations from the Water Management Account a little closer to covering the costs of the program. This proposal would provide additional support for the public water permit program, to help stay within the 150-day permit decision goal and make sure that potential natural resource impacts are adequately addressed.

Proposal:

This proposal would raise public water permit fees which are based on the level of impact from the current range of \$150 to \$1000 to a range of \$300 to \$5000 with the ability to have an additional hourly charge for permits requiring more than 20 hours of work. Currently, revenue from public waters permitting funds less than 2 FTEs. This proposal seeks funding for 5 FTEs for field work and 1 FTE for new work to maintain the public water inventory maps—a key tool for program work. With increased funding DNR will be able to better address the more complicated permit applications and will consistently meet the governor's and legislature's permit efficiency goals while slightly narrowing the funding gap between water use fees and dollars spent on public water protection.

Results:

- Number of permits issued in 150 days or fewer.

Statutory Change(s):

This requires changes to the statutory fee structure established by Minnesota Statutes, section 103G.301.

Department of Natural Resources

FY18-19 Biennial Budget Change Item

Change Item Title: Aquatic Invasive Species Revenue Increase

Fiscal Impact (\$000s)	FY 2018	FY 2019	FY 2020	FY 2021
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds Invasive Species				
Expenditures	1,058	1,058	1,058	1,058
Revenues	1,306	1,741	1,741	1,741
Net Fiscal Impact = (Expenditures – Revenues)	(248)	(683)	(683)	(683)
FTEs	3	3	3	3

Recommendation:

The Governor recommends an increase in the Aquatic Invasive Species (AIS) surcharge on the watercraft license from \$5 to \$12. The watercraft license is renewed every three years. This would also increase the appropriation for the Division of Ecological and Water Resources from the Invasive Species Account by \$558,000 and make available up to \$500,000 for applied research grants for the University of Minnesota (U of M) AIS Research Center and other research institutions.

Rationale/Background:

The AIS surcharge on the watercraft license was increased from \$2 to \$5 in 1993. The proposed increase will maintain a positive fund balance in the Invasive Species Account and provide increased funding to meet the growing needs of the Invasive Species Program. It will also provide funding to help fill research gaps focused on managing and controlling AIS, to support counties' Aquatic Invasive Species (AIS) activities and to restore habitat and native species that have been degraded by AIS.

AIS cause serious economic, recreational and environmental harm. Minnesota leads Midwestern states in preventing the spread of AIS, largely due to the effectiveness of the DNR's Invasive Species Program. The three primary goals of the Invasive Species Program are to:

1. Prevent the introduction of new invasive species into Minnesota;
2. Prevent the spread of invasive species within Minnesota; and
3. Reduce the impacts caused by invasive species to Minnesota's ecology, society, and economy.

The DNR Invasive Species Program collaborates with other states, Minnesota counties, research institutions, lake associations and many other partners. Prevention activities include watercraft inspections, public education and awareness, and the guidance of a 20-member AIS Advisory Committee. Prevention efforts today not only reduce the spread of invasive species, but also buy critical time needed for research and management that may provide long-term control solutions.

Due to a shortfall in existing revenue, the DNR reduced spending in the AIS account. As a stop-gap to address this shortfall in FY16/17, the DNR eliminated two small grant programs (local unit of government inspection grants \$150,000 and public awareness grants \$75,000) and cut \$150,000 provided to the Parks and Trails Division for AIS prevention Best Management Practices for water access sites. Absent additional revenue and funding, the DNR will not have adequate resources for the existing 3 FTE supporting current prevention efforts.

Proposal:

This is an increase in the AIS surcharge on watercraft licenses and an increase in appropriations from the invasive species fund to continue current efforts and increase research activities. This proposal would maintain funding for existing AIS work, including management grants and watercraft inspectors, and will increase funding that is available for critical research on effective AIS management and prevention. The funding would make available \$175,000 to restore grants for inspection and public

awareness, \$375,000 to maintain current DNR staffing levels for prevention, and \$500,000 would be available for an agreement with the U of M AIS Applied Research Center and other research institutions to research long term control solutions.

AIS management and prevention is carried out in partnership with state, federal, local, and nonprofit partners.

Results:

- Number of roadside check stations
- Compliance rate at AIS roadside check stations
- Violation rate at AIS roadside check stations
- Number of inspections at roadside check stations
- Number of statewide inspections
- This information is communicated through survey reports available online and as hard copies.

Statutory Change(s):

This proposal will require a change to M.S. 86D.415 subd. 7.

Department of Natural Resources

FY18-19 Biennial Budget Change Item

Change Item Title: Pineland Sands Forest Conversion Study

Fiscal Impact (\$000s)	FY 2018	FY 2019	FY 2020	FY 2021
General Fund				
Expenditures	1,000	500	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,000	500	0	0
FTEs	0.75	0.75	0.0	0.0

Recommendation:

The Governor recommends an appropriation of \$1.5 million in general funds in FY 2018 - 19 to study large-scale land conversion effects on resources including drinking water, surface water, and plant and animal species related to recent activity in the Pineland Sands Aquifer. The funding would also be used to leverage additional private resources and take advantage of other work in the Pineland Sands Aquifer.

This recommendation is for a new activity at the Department of Natural Resources (DNR). We have not previously conducted similar studies. Further, we do not currently have sufficient information about potential effects of large-scale land conversions on the environment specifically in the area of the Pineland Sand Aquifer. Other agencies, including the Minnesota Department of Agriculture (MDA) and the Minnesota Pollution Control Agency (MPCA) will benefit from this new information for use in drinking water protection activities and to assist with development of best management practices for the area.

Rationale/Background:

The land overlying the Pineland Sands Aquifer has been experiencing rapid and large scale conversion to irrigated agriculture. Sandy soils that are highly suitable for a variety of irrigated crops mean that much of this land is attractive for conversion to crop land. The Potlatch Timber Company is selling off substantial land holdings in the area. Sandy soils are known to be vulnerable to changing water quality in both groundwater and surface water, changes that are accelerated by irrigation. There is not sufficient information about land conversion impacts to water quantity and water quality (both surface and groundwater) including drinking water, habitat, plants and animals to inform future permitting decisions.

The DNR received a substantial number of water appropriation applications and preliminary well assessment requests within the Pineland Sands Aquifer. In order to make decisions on these applications the DNR needed additional information on the potential environmental effects. The DNR also received a citizen petition for preparation of an Environmental Assessment Worksheet to assess the potential significance of these effects. The representatives of the petition included several non-governmental organizations such as Pesticide Action Network, Toxic Taters, Water Legacy, Minnesota Center for Environmental Advocacy, and the Land Stewardship Project. Most of the applications and well assessments were withdrawn in favor of gathering the necessary information as part of this special study.

With the increasing trend in groundwater quality impacts from irrigated lands and associated groundwater withdrawal, this proposal will allow DNR to track environmental effects from land conversion and increases in irrigated crop production. The types of potential environmental effects include:

- Large scale conversion of jack pine forest to irrigated agriculture and associated loss of ecosystem services and biodiversity.
- Water appropriation impacts to surface water such as streams, rivers and wetlands (i.e., diminished flow and level in surface water features).
- Water quality impacts to surface water and groundwater due to runoff from irrigated agricultural lands.

- Potential cumulative effects combining past, present and future projects that include land conversion and water appropriations.

Proposal:

This proposal is a new initiative. The intent of this study is to gather additional information about these potential effects. Baseline conditions will be established and predictions of environmental effects from further conversion will be developed. The information obtained by this project will be used to establish sustainable levels of land conversion and explore options to avoid or mitigate the effects so that future permitting decisions are properly informed. The study will also identify additional information needs for further study as part of other efforts or that can be collected as part of water appropriation application consideration.

We have not previously conducted similar studies. Further, we do not currently have sufficient information about potential effects of large-scale land conversions on the environment specifically in the area of the Pineland Sand Aquifer. Other agencies, including the Minnesota Department of Agriculture (MDA) and the Minnesota Pollution Control Agency (MPCA) will benefit from this new information for use in drinking water protection activities and to assist with development of best management practices for the area.

The proposal will pay for 0.75 FTE, purchase of equipment to conduct the study, and other costs associated with conducting the study. The department would engage a private consulting firm to assist in data collection, analysis, and reporting.

Results:

This study would provide important information that would inform permit decisions which will aid in long term sustainability of water resources in the Pineland Sands aquifer.

Statutory Change(s):

No statutory change is needed.

Department of Natural Resources

FY18-19 Biennial Budget Change Item

Change Item Title: Conservation Management of Rare Resources

Fiscal Impact (\$000s)	FY 2018	FY 2019	FY 2020	FY 2021
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds Heritage Enhancement				
Expenditures	1,400	1,400	1,400	1,400
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,400	1,400	1,400	1,400
FTEs	7	7	7	7

Recommendation:

The Governor recommends an annual increase of \$1.4 million annually to the Heritage Enhancement Account appropriation to provide data and technical support for the development and implementation of priority conservation work. Priority programs include:

- Nongame Wildlife Program,
- Minnesota Biological Survey (MBS),
- Scientific and Natural Area (SNA),
- Mississippi River planning and restoration,
- Terrestrial Invasive Species, and
- Conservation Management and Rare Resources.

Rationale/Background:

The Nongame Wildlife, Minnesota Biological Survey (MBS), Scientific Natural Area (SNA), Mississippi River planning and restoration, Terrestrial Invasive Species, and Conservation Management and Rare Resources programs all have a long history in the protection and enhancement of Minnesota's natural resources heritage. These programs have provided data and technical assistance to a number of local and regional partners and priority projects and work including:

- The development and implementation of the Minnesota Prairie Conservation Plan,
- Minnesota's Forest Certification process,
- The revision of the State's Wildlife Action Plan,
- The update of the state list of endangered and threatened species,
- The review of school trust lands,
- The identification of areas for parks and scientific and natural areas,
- The development of best management practices for pollinators, and for rare species recovery,
- The management of information on state and federally listed plants and animals, and
- Financial and technical support managing terrestrial invasive species and diseases.

These programs have been funded from a variety of sources including the Nongame Wildlife Fund, the Environment and Natural Resources Trust Fund, heritage enhancement fund and the general fund. Declining donations to the Nongame Wildlife Fund have resulted in cuts to the regional nongame operational budgets which has severely limited the implementation of conservation projects focused on nongame species and other rare resources. The Minnesota Biological Survey is currently partially funded through the Nongame Wildlife Program and matching Reinvest in Minnesota funds. With declining donations to the Nongame Wildlife funds, the fund can no longer support this work. A new funding source is needed to ensure continued collection of data to implement conservation and management efforts to maintain the enhance biodiversity.

The current general fund and heritage enhancement fund base appropriations can no longer meet the needs of the programs with increased demand to address threats such as invasive species, pollinator decline, disease management and climate change. Additional funding would allow for the DNR to restore efforts in planning and coordinating Mississippi River planning and coordination of river habitat projects, coordinating the state's responses to bat and pollinator decline, managing our response to terrestrial invasive species that is impacting our landscape ecologically and economically, and providing sustainable funding for the Minnesota Biological Survey and Nongame Wildlife programs.

Proposal:

This proposal would provide \$1,400,000 per year in increased funding from the Heritage Enhancement Account to be available for a wide range of nongame wildlife, rare species conservation, and other habitat projects including:

- \$115,000 for Mississippi River Planning Position (1 FTE),
- \$115,000 for Bat Conservation Coordinator (1 FTE),
- \$115,000 for Pollinator Conservation Coordinator (1 FTE),
- \$115,000 for Terrestrial Invasive Species Coordinator (1 FTE),
- \$300,000 Minnesota Biological Survey (2 FTE),
- \$250,000 for Operations for Scientific and Natural Areas,
- \$115,000 for conservation of rare resources data (1 FTE), and
- \$275,000 for Nongame Wildlife regional implementation.

This proposal complements our current nongame and rare resources work that is in partnership with state, federal, local and non-profit partners. The funds provide state match for projects funded with federal State Wildlife Grants, and it complements work funded by LSOHC and LCCMR.

Results:

- Maintain Minnesota Biological Survey's animal, plant, and habitat survey work that provides baseline surveys information and directed monitoring such as White-nose Syndrome in bats and native pollinators.
- Maintain technical assistance at the regional level to ongoing natural resource field operations including Forestry and Wildlife Management activities.
- Restore activities related to planning and restoration coordination with state and federal entities in the Upper Mississippi Watershed.
- Provide leadership for the department in coordinating our pollinator decline conservation and response efforts and making sure they are based on sound scientific information.

These measures are directly connected to goal 1 and 2 in "Conservation that Works" and help to ensure that Minnesota's waters, natural lands, and diverse fish and wildlife habitats are conserved and enhanced. These measures also help to provide an outdoor recreation system that is diverse and of high quality.

Statutory Change(s):

Department of Natural Resources

FY18-19 Biennial Budget Change Item

Change Item Title: Mississippi River Corridor Critical Area (MRCCA) Rule Implementation

Fiscal Impact (\$000s)	FY 2018	FY 2019	FY 2020	FY 2021
General Fund				
Expenditures	605	155	155	155
Revenues				
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	605	155	155	155
FTEs	1	1	1	1

Recommendation:

The Governor recommends \$605,000 in FY 2018 and \$155,000 in FY 2019 through FY 2021 in new General Fund appropriation, to allow DNR to provide financial and technical assistance and training to local governments to update their local plans and ordinances to be consistent with the Mississippi River Corridor Critical Area (MRCCA) rules. The MRCCA is a specially-designated swath of land along both sides of the Mississippi River in the Twin Cities metropolitan area.

Rationale/Background:

In 2013, the Legislature directed the DNR to complete rulemaking for the MRCCA and appropriated Clean Water funds to the DNR to complete rulemaking. The rules were published in the State Register on December 27, 2016. Thirty local governments in the MRCCA (21 cities, 4 townships, and 5 counties with land use authority) need to update their MRCCA plans and ordinances to comply with and implement the rules. The requested funds are needed to ensure that these rules are implemented at the local level within a timely manner to fully carry out the Legislature’s Clean Water directive.

Without funding to aid the DNR and local governments in updating local plans and ordinances to implement the rules, the costs will be greater for local governments and the timeframe for rule implementation will be much longer and could be delayed indefinitely. Funding will allow for the development of local plans by the end of 2018 and the successful adoption of ordinances to implement the MRCCA rules within each of the 30 affected communities by the end of FY 2021. This proposal would enable the DNR to fulfill its responsibilities to review and approve all local plans and ordinances for compliance with the rules. It would also enable the DNR to reduce local implementation costs.

Proposal:

This new initiative would provide \$450,000 in grants to be available to MRCCA communities. Most communities within the MRCCA have estimated costs between \$5K and \$20K to update local plans and ordinances. Grants averaging \$15K would not fully cover but would help to offset these costs and improve local cooperation. For 30 communities, this is a total cost of approximately \$450K that would be available in FY 2018.

In addition this proposal would enable the DNR to fulfill its responsibilities to review and approve all local plans and ordinances for compliance with the rules in a timely manner to fully carry out the Legislature’s Clean Water directive. Funding for 1FTE would enable the DNR to reduce local implementation costs by:

- Developing model plans and ordinances, maps, and other tools to aid local implementation;
- Working with the Metropolitan Council and local government staff to develop a notification/adoption schedule that is aligned with the Metropolitan Council’s schedule for comprehensive plan updates (deadline for comprehensive plan updates is December 2018);
- Working with the the Metropolitan Council to provide guidance, training and resources to local governments;
- Providing technical assistance to local governments in preparing and submitting their updated plans and ordinances; and

- Providing financial assistance through the grant dollars for local governments to update their plans and ordinances.

Local governments have requested that DNR align the schedule for MRCCA plan updates with the Metropolitan Council's schedule for 2040 comprehensive plan updates. This proposal will help DNR to meet this request. This work compliments our overall Shoreland Management program work; implementation of the MRCCA rules contributes to improved water quality.

Results:

This is a new effort.

- **Quantity:** 30 communities will have adopted local plans and ordinances to implement the MRCCA rules.
- **Quality:** The local plans meet our standards and DNR-developed ordinances are adopted by the 30 communities.
- **Result:** Local governments will have updated local plans and ordinances to implement the rules. Their costs in doing this will be offset by grant dollars. This funding will result in timely, equitable implementation of the rules throughout the MRCCA.
- Staff will be working directly with the affected communities; communication will be frequent and ongoing throughout the process.

Statutory Change(s):

No statutory changes are needed for this request.

Department of Natural Resources

FY18-19 Biennial Budget Change Item

Change Item Title: Hydropower Water Use Fees

Fiscal Impact (\$000s)	FY 2018	FY 2019	FY 2020	FY 2021
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Water Management Account				
Expenditures	0	0	0	0
Revenues	91	90	90	90
Net Fiscal Impact = (Expenditures – Revenues)	(91)	(90)	(90)	(90)
FTEs	0	0	0	0

Recommendation:

The Governor recommends to change the water use fee structure described in Minnesota Statute section 103G.271, subd. 6 for hydropower facilities that temporarily divert water from its main channel and into a constructed channel for power generation or mechanical operations such as flour milling, then return the water to its source. This proposal is only for surface water use. The funds would be deposited into the Water Management Account for work as described in Minnesota Statutes, chapter 103G. This will increase deposits to the Water Management account by about \$90,000/year.

Rationale/Background:

Some hydropower facilities have been in operation for more than or close to 100 years—preceding our permit program. These facilities divert water out of its natural channel and, under law, are required to have water appropriation permits and pay annual water use fees. Currently these facilities do not have water use permits as required by law. In addition, Minnesota Statute 103G.271 Subdivision 6a requires payment of fees for past unpermitted appropriations during the past seven years meaning that these entities would owe the DNR a one-time payment for back fees that range between \$420,000 and \$2.1 million. The existing fee structure is such that this proposed law change is needed to help these facilities avoid payment of exorbitant fees that could potentially put them out of business.

This change will help us achieve our goal that water users having appropriate permits.

Proposal:

This proposal would change the existing water use fee structure for a facility that temporarily diverts state waters into a constructed channel to produce hydroelectrical or hydromechanical power by setting a maximum fee of \$10,000 for each facility, by exempting them from payment of back fees and by exempting permits for these facilities from bumping into a higher maximum fee category under 103G.271 subdivision 6d.

Under this proposal we will work with impacted facilities to bring them into compliance with water use law. This is part of our current work to ensure that water users have the appropriate permits. Those using water at more than 10,000 gallons per day or 1 million gallons per year need water use permits. This will help us to bring these facilities into compliance with water use laws. We can begin working with these facilities to get them under permit immediately.

Results:

Current unpermitted hydropower facilities would be permitted.

Statutory Change(s):

Minnesota Statutes, section 103G.271

Department of Natural Resources

FY18-19 Biennial Budget Change Item

Change Item Title: Establish Goal to Improve Water Quality 25% by 2025

Fiscal Impact (\$000s)	FY 2018	FY 2019	FY 2020	FY 2021
General Fund				
Expenditures	250	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	250	0	0	0
FTEs				

Recommendation:

The governor recommends \$250,000 from the general fund in FY2018 to conduct a stakeholder and public engagement process across Minnesota seeking input on how to reach a statewide goal to improve water quality by 25% by 2025.

Rationale/Background:

In the land of 10,000 lakes, Minnesotans expect clean, affordable water, no matter where they live. However, more than 40 percent of Minnesota’s waters are listed as impaired or polluted. Drinking water is increasingly at risk from both pollution and aged-out infrastructure. Aquatic invasive species have infested more than 550 lakes statewide. Currently, the state is committed to clean water with the Clean Water, Land and Legacy Amendment until 2034. Each year about \$85 million from the Clean Water Fund is invested in various water management activities. Without additional action, the quality of Minnesota’s waters is expected to improve only 6 to 8 percent by 2034. To ensure that Minnesota’s fish are safe to eat, that our water is safe to drink and our lakes are safe for swimming, we need to do more. To move forward, citizens, government, businesses, and stakeholder groups must work together to identify regionally-specific priorities, create a shared vision for what a 25% improvement will look like for different parts of the state, and develop strategies to get us there. This budget initiative is designed to engage communities across Minnesota to collaborate on solutions to accelerate the pace of water quality improvement.

Proposal:

The Health Department, Department of Natural Resources, Pollution Control Agency, Department of Agriculture, Board of Water and Soil Resources, Metropolitan Council, Public Facilities Authority, and Environmental Quality Board are launching a collaborative civic engagement process from June through December 2017 to gather input on reaching a Water Quality Improvement Goal of 25% by 2025. This new initiative builds on existing water-quality improvement programs within state and local government, but has the distinct purpose of catalyzing local input on, and support towards, the 25% improvement goal. This civic engagement process will help to accelerate the pace of progress toward water quality improvements by providing citizens opportunities to shape local and regional-specific solutions for improving water quality in their communities.

The 2017 civic engagement process will include:

- Organizing ten town hall events in Greater Minnesota and in the Twin Cities Metro Region to gather input from citizens.
- Generating regionally specific educational “toolkits” for public dissemination with background information on water challenges and successes.
- Holding targeted meetings with key stakeholders in different regions of the state to discuss community needs and priorities.
- Developing online resources and platforms that support public involvement.
- Developing a final report with results from the public engagement process.

The Governor recommends \$250,000 from the general fund for agency activities necessary to support the planning and implementation of this civic engagement initiative. The funding would support technical and project-management staff time as well as additional costs related to producing educational materials and holding public meetings. Each agency will contribute to

this process based on their expertise and capacities. This proposal provides the following funding to agencies and allows them to transfer these resources as necessary for implementation:

- Agriculture Department: \$47,000
- Board of Water and Soil Resources: \$26,000
- Environmental Quality Board: \$67,000
- Health Department: \$30,000
- Natural Resources Department: \$26,000
- Pollution Control Agency: \$54,000

Results:

The budget initiative will enable the cooperating agencies to receive a significantly wider range of input regarding the 25% by 2025 Water Quality Improvement Goal than is currently provided for under existing programs and budgets. Agencies will report on the quantity of public participation across the various engagement forums (in-person meetings, online participation); the quality of ideas generated; and the extent of implementation. By December 15, 2017, the cooperating agencies will submit a report to the Governor and the Legislative Water Commission on the results of the public input process, including policy and budget recommendations.

Statutory Change(s):

The proposed legislative initiative will affect the following statute:

Section 103A.213

Department of Natural Resources

FY18-19 Biennial Budget Change Item

Change Item Title: Clean Water Funds

Fiscal Impact (\$000s)	FY 2018	FY 2019	FY 2020	FY 2021
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	9,270	9,270	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	9,270	9,270	0	0
FTEs	78	78	0	0

Recommendation:

The Governor recommends \$18.54 million from the Clean Water Fund for protecting, enhancing, and restoring water quality in Minnesota's lakes, rivers, streams, and groundwater. This funding will support 78 FTEs (plus contracts with outside vendors and operating expenses) to contribute to a long-term partnership of Minnesota's executive branch water agencies, which include the Dept. of Agriculture, Dept. of Health, Minnesota Pollution Control Agency, Board of Water and Soil Resources, Dept. of Natural Resources, and local governments to fix and prevent water pollution problems and prevent groundwater over-use.

Rationale/Background:

Water is one of the most challenging resource issues facing Minnesota over the next 50 years, and it is a key economic driver for the state's growth and development. Good information about the quality and quantity of Minnesota's lakes, rivers, streams, and groundwater is critical to ensure clean water for recreation, fish and wildlife habitat, drinking, and economic vitality. The Clean Water Fund is one of the primary sources of funding for water quality. The fund was established under Article XI, Section 15 of the Minnesota Constitution.

The Clean Water Fund is treated as a new initiative each biennium however; the Clean Water Council and the executive branch agencies agree that we need to fund long-term programs to address water quality problems. The Clean Water Fund supports about 78 FTEs within DNR working on data gathering and analysis, technical support for project implementation, and tools to help local partners target water quality improvement efforts. DNR partners with Minnesota's water agencies and local governments to fix and prevent water pollution problems and prevent groundwater over-use.

The intended results are to prevent waters from becoming impaired, to restore waters that are impaired, and to protect long-term water supplies from over use and contamination. The ultimate goal is that Minnesotans can enjoy swimming and fishing without adverse health effects. The Clean Water Fund performance report describes the efforts that State Agencies are using to improve water quality and the performance measures. The DNR supports statewide watershed assessment with flow monitoring, water level monitoring, biological surveys, and analysis of fish contaminants.

Proposal:

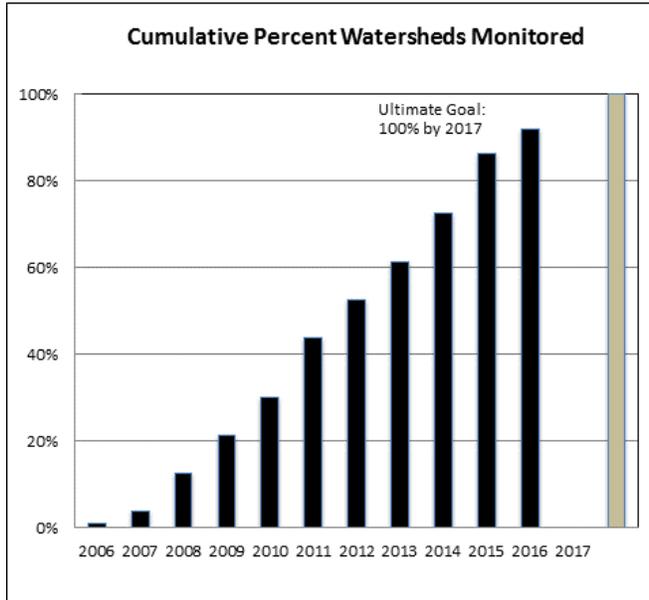

This proposal is part of a long term, collaborative effort that will lead to cleaner water through targeted implementation projects and programs. The foundation of the effort is comprehensive assessments of water pollution and supply problems within the state's 81 major surface watersheds and within the state's myriad groundwater sources (aquifers) and prioritized strategies to address these problems.

Minnesota's water agencies are working with local partners to check water quality and aquifer levels, and develop and implement strategies to protect and restore watersheds and groundwater. Specific parts of DNR's proposal include:

- Collecting and analyzing watershed-based data in rivers, streams, and lakes;
- Completing county geologic atlases to define and characterize the state's aquifers;

- Aquifer level testing and modeling;
- Implementing groundwater management areas;
- Helping local partners plan for and implement water quality strategies;
- Mapping streams for riparian buffers;
- Maintaining and updating water data;
- Monitoring forest harvest; stewardship planning on private forests;
- Drainage hydrology and modeling; and
- Integrating data with other agencies.

Results:

- This proposal will provide funding for completion of watershed assessments and geologic atlases. Collectively, the agencies and partners are on track to complete the statewide assessment of all 81 major watersheds by 2017 (Figure 1).

Figure 1 Progress completing watershed assessments.

The DNR in partnership with the Minnesota Geological Survey is completing geologic atlases throughout the state. Atlases provide critical information for local water supply planning and water quality protection (Figure 2).

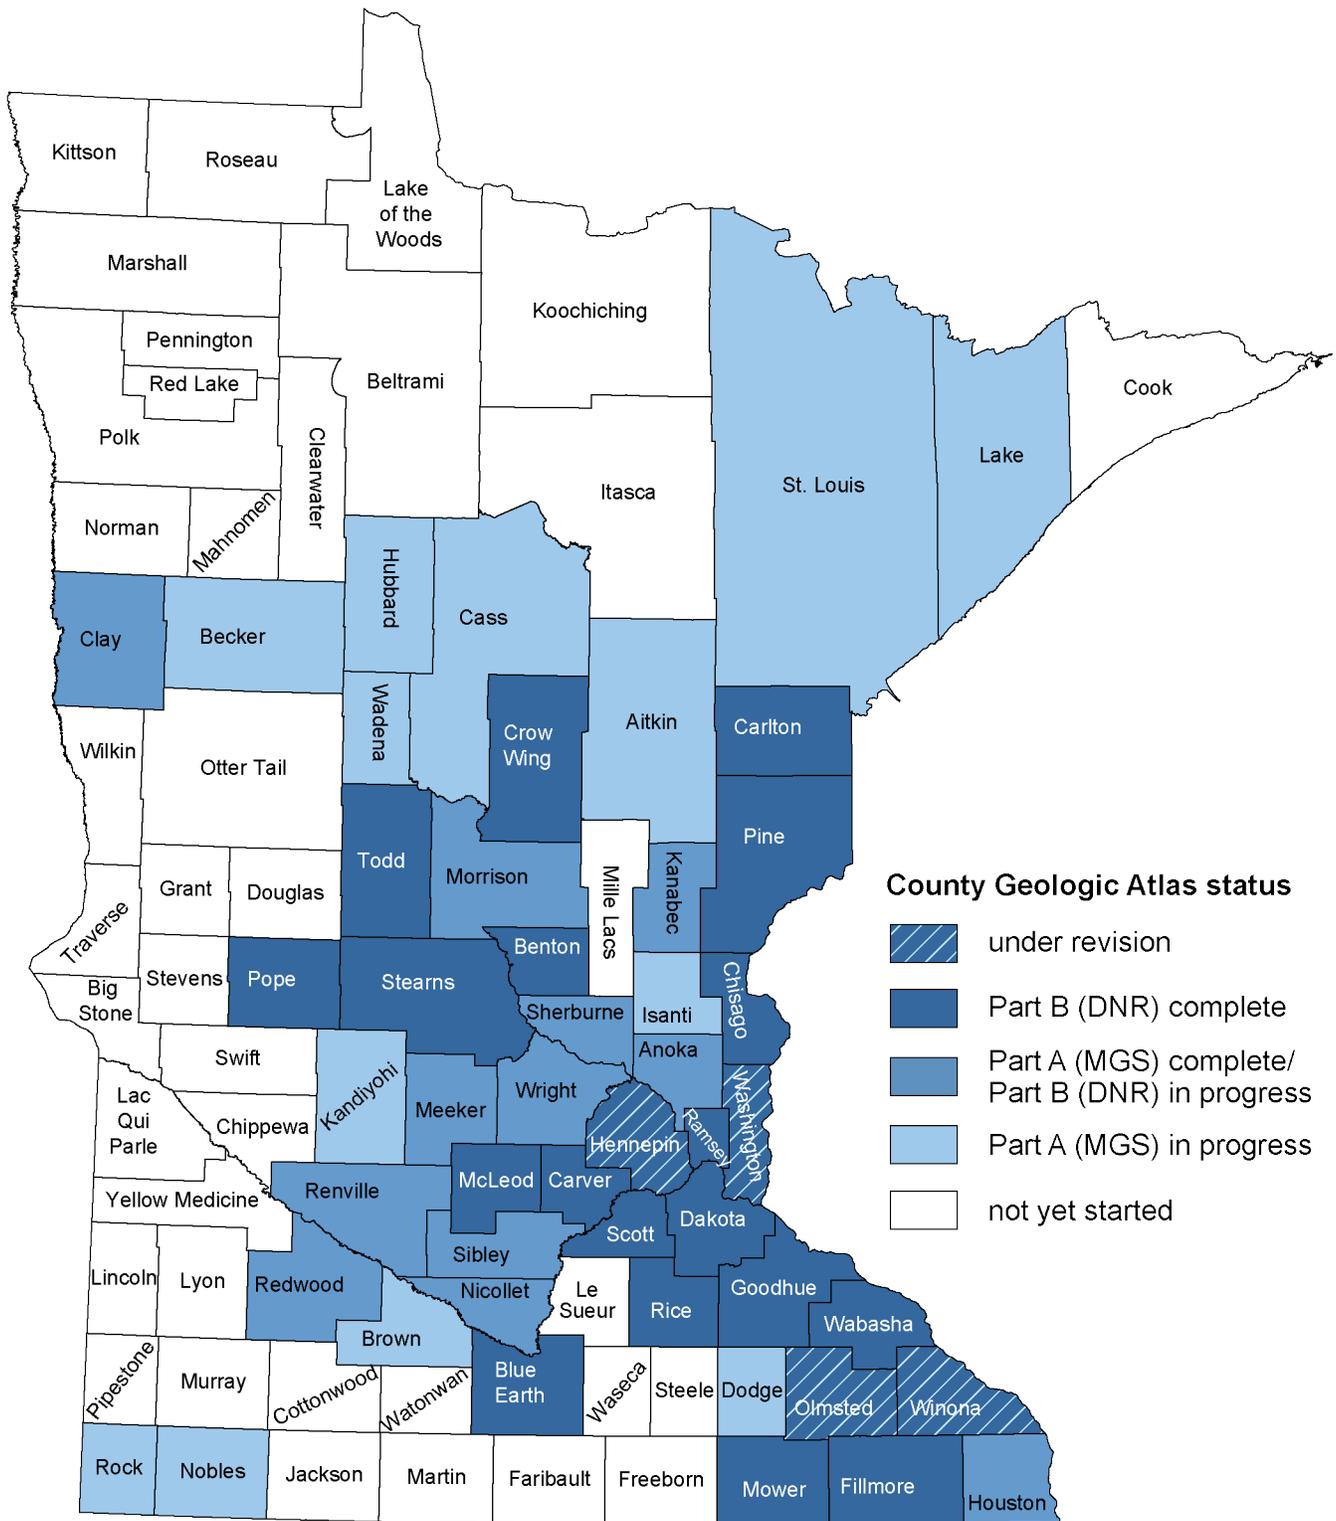

Figure 2 Statewide progress completing County Geologic Atlases.

The DNR's aquifer monitoring efforts include partnerships with other state agencies, Soil and Water Conservation Districts, and municipal water suppliers. We have 720 actively used monitoring wells and we are adding about 50 new monitoring sites per year, with a long term goal of about 7,000 wells throughout the state. We analyze water level trends in aquifers where there are at least 20 years of data, currently only 296 sites have reached 20 years of record (Figure 3).

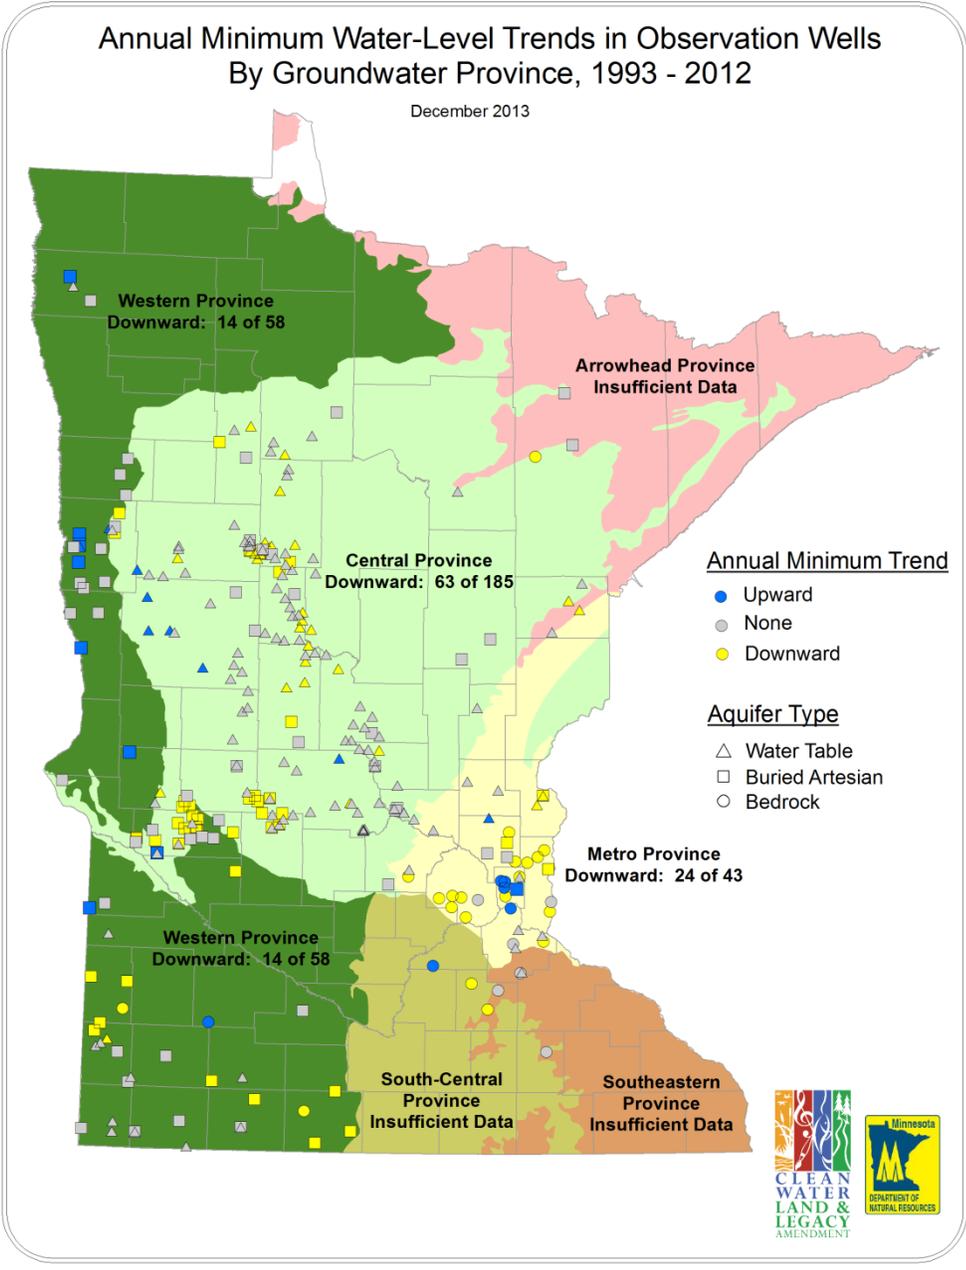

Figure 3 Statewide map showing water level trends for aquifers with monitoring data with at least 20 years of data.

Statutory Change(s):
N/A

Department of Natural Resources

FY18-19 Biennial Budget Change Item

Change Item Title: Conservation Easement Stewardship - Staffing

Fiscal Impact (\$000s)	FY 2018	FY 2019	FY 2020	FY 2021
General Fund				
Expenditures	125	125	125	125
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	125	125	125	125
FTEs	1.25	1.25	1.25	1.25

Recommendation:

The Governor recommends a \$125,000 annual appropriation from the general fund to support conservation easement stewardship work performed by the Division of Lands and Minerals (LAM). This proposal would provide a stable funding source for one existing FTE and would fund an additional .25 FTE to perform professional services work needed by DNR's conservation easement stewardship program.

This change represents a modest increase in what LAM is currently spending on conservation easement stewardship. Currently, one FTE is funded with programmatic funds that only exist at the expense of other department projects. This proposal would provide a stable funding source for the current FTE plus provide additional resources toward meeting the requirements of the program.

Rationale/Background:

The DNR currently holds 1,118 conservation easements covering 384,000 acres. The DNR initially began acquiring conservation easements in the 1970s, before the development of minimum industry standards for conservation easement stewardship. The standards now include preparation of baseline property reports for all easements, regular monitoring, regular communication with landowners, records management and enforcement of easement terms when there are violations. Beginning in 2008, with support from the Environment and Natural Resources Trust Fund (ENRTF), the DNR began developing a program to improve the stewardship of its conservation easements. Since that time, the DNR has conducted monitoring visits on nearly all of its conservation easements, completed baseline property reports on 85% of its conservation easements and developed an operational order for conservation easement stewardship. LAM plays a lead role in coordinating and supporting the DNR's conservation easement stewardship program. LAM's conservation easement work includes:

- Coordinating the development of agency-wide conservation easement stewardship standards.
- Training agency conservation easement stewardship staff.
- Assisting agency conservation easement stewardship staff with preparation of baseline property reports, the use of technology for conservation easement stewardship, records management and resolution of easement violations.
- Coordinating and facilitating meetings of the DNR's Conservation Easement Stewardship and Enforcement Committees established by the DNR's operational order on conservation easement stewardship.
- Administering the database and supporting the application that DNR uses to record information about conservation easement monitoring and enforcement and to prepare baseline property reports.
- Providing data and reports relating to DNR's conservation easements and easement stewardship.
- Providing survey, legal and real estate services related to ongoing conservation easement management.

To sustain its efforts to meet current minimum standards for conservation easement stewardship and to ensure that the public investment in its easements is protected, the DNR needs funding for LAM conservation easement stewardship staff.

Between FY08 and FY15, there were three ENRTF appropriations to the DNR for conservation easement stewardship projects. The projects were managed by LAM, and the funding paid for for LAM conservation easement stewardship staff as well as conservation easement stewardship staff in other DNR divisions. The last ENRTF appropriation expired in FY15. Since that time, programmatic dollars from other divisions have been used to support LAM's ongoing conservation easement work.

To assist with agency-wide funding needs for conservation easement stewardship, the 2015 Legislature established the Natural Resources Conservation Easement Stewardship Account. The new law allowed existing and future conservation easement stewardship appropriations to be transferred into the account to earn interests. Annually, 5% of the balance of the account is appropriated to the commissioner for conservation easement stewardship. In FY16 and FY17, \$50,040 and \$53,655 were made available for this work. While we anticipate that over time, deposits into the Account will continue and interest earnings available to the department will grow, the current level of funding does not meet DNR's conservation easement stewardship funding needs, including the need to fund LAM conservation easement stewardship staff.

Proposal:

This proposal would change the funding source for an existing position that is currently funded with program areas funds and provide additional funding for .25 FTE.

- Existing Position. LAM provides services to the program including coordination of agency-wide conservation easement stewardship work, records management and operation of the DNR's conservation easement database. The database is used for easement monitoring and preparation of baseline property reports. Funding of the current position was provided from ENRTF dollars and then programmatic dollars by DNR divisions that administer conservation easements, after ENRTF project funds ended. As LAM's conservation easement stewardship work is a core real estate function, this proposal shifts funding for the existing LAM position to the general fund.
- Additional Resources. The proposal also adds a .25 FTE in LAM to provide professional services to support the DNR's conservation easement stewardship program. With recent improvements in the DNR's stewardship of its conservation easements, the DNR has determined that a number of existing easements need surveys, amendments or other professional services work. This funding would enable LAM to perform this work and address other ongoing needs for survey, appraisal, legal and real estate expertise in the DNR's conservation easement stewardship program.

LAM's conservation easement stewardship positions will need funding beyond the FY18-19 biennium.

The change item will ensure that LAM's existing conservation easement stewardship position can be maintained and will provide funding for additional professional services by LAM to the DNR's conservation easement stewardship program. The funding source change for the LAM position will also free up other divisions' programmatic funds and enable them to redirect those funds toward their divisional conservation easement stewardship work. With these changes, the DNR will be able to better fulfill its conservation easement stewardship obligations.

Results:

This proposal is intended to impact the number of conservation easements regularly monitored by the DNR. Current performance measures are:

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of conservation easements monitored per fiscal year	47	242	FY12-FY16

Statutory Change(s):

This proposal will not require statutory changes.

Department of Natural Resources

FY18-19 Biennial Budget Change Item

Change Item Title: Web Modernization

Fiscal Impact (\$000s)	FY 2018	FY 2019	FY 2020	FY 2021
General Fund				
Expenditures	1,109	1,029	939	939
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,109	1,029	939	939
FTEs	5	5	5	5

Recommendation:

The Governor recommends ongoing general fund support (\$1.109 million in FY18; \$1.029 million in FY19 and \$939,000 annually thereafter) to improve customer service through a modernized DNR website. The funding will allow the DNR to migrate its website to a secure, modern content management system, refresh web pages, improve access to digital documents, and to create a suite of new mobile-ready applications. This request includes sufficient funding to develop and maintain priority customer facing services for mobile use and a digital library portal. This proposal would fund 5.0 FTE to support the work of this project: 3.0 FTE (0.5 FTE per division) to manage content; 1.0 FTE to manage the digital library and 1.0 FTE for social media/web management.

Rationale/Background:

Citizen demand for enhanced electronic services is increasing; our customers expect more transparency and improved opportunities to engage with us. They expect the DNR to deliver modern digital services on digital platforms on a modernized website platform. As one of the largest electronic information and government license distribution networks in the Midwest, DNR needs to be prepared to provide information and services that best meets our customers' needs. The DNR is the state's trusted source for natural resources information as demonstrated by:

- DNR's website had over 60 million webpages viewed in FY 2016.
- The DNR's website gets approximately 2.8 million visits annually.
- DNR's web traffic is increasing: we had almost 15 million online sessions in FY15.

The size and complexity of the DNR website will require a significant investment to update and maintain. But the efforts will pay off as we are able to reach more Minnesota citizens, out-of-state visitors, and business customers on their modern hand-held devices and engage them in outdoor recreation.

In his FY16/17 biennial budget, the Governor recommended \$500,000 per year in ongoing funding for this effort. Minnesota Laws of 2015 appropriated \$250,000 to the DNR in one-time funds to build a modern web sites that provides easier access to permits, licenses, parks reservations, mobile applications and other natural resources information within a secure environment. Additional investments are needed to deliver better digital services with modern tools and technologies to meet the needs of our customers.

Proposal:

This proposal includes funding to:

- Continue to build the Modern Web Platform. Much of the work to design and build the modern web platform for DNR was started in FY16-17. This work cannot be completed with existing resources.

- Refresh web content, implement plain language and electronic accessibility guidelines, and develop maintenance procedures and policies to better serve customers.
- Enhance the delivery of customer facing services through improved web applications and connections to social media.
- Improve customer engagement opportunities to communicate with DNR about their concerns; not just DNR communicating out to customers.
- Build the DNR Digital Library and transition the current web documents. DNR's library has over 4000 publications documenting Minnesota natural resources management from 1874 to the present. This provides a historically rich base of natural resource information on topics that Minnesotans care deeply about – water, forests, fish and wildlife, mining and recreation. Dnr currently has over 32,0000 published documents in its website that would be transitioned to the new digital library platform under this proposal.

IT Related Proposals:

Much of our funding has been (and will be) invested in modern IT technology, including design, integration, hardware resources, security controls, migrating content, and developing mobile applications.

Results:

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of website visitors and users of mobile applications	2.8 million individuals from 6 million different devices.	Rising annually	
Quality	Improvement in information quality and accessibility	25,000 web pages	Reduce 100 percent of outdated pages	July 1, 2018
Results	Customer satisfaction improves on mobile devices such as phones, tablets	10 percent of website has mobile-friendly pages	100 percent website mobile-friendly	July 1, 2018

Statutory Change(s):

N.A.

Department of Natural Resources

FY18-19 Biennial Budget Change Item

Change Item Title: Technical Budget Changes

Fiscal Impact (\$000s)	FY 2018	FY 2019	FY 2020	FY 2021
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends making technical changes to add clarity and consistency to multiple statutory authorities. These changes do not result in fiscal impact but are fiscal in nature because they impact our financial operations. The changes include 1) changing the date that Department of Revenue transfers gas revenues to the DNR, 2) clarifying that certain grants can reimburse for county expenditures prior to grant contract execution, and 3) creating consistency across how we deposit certain statutory parks and trail revenues.

Rationale/Background:

Through our regular financial management checks, we have identified multiple areas where our statutory authority could be clearer. This proposal seeks the housekeeping changes for clarification and consistency to enable DNR's work to be streamlined effectively through statutory authorities.

These changes do not result in fiscal impact but are fiscal in nature.

Proposal:

This proposal makes the following technical changes:

- Adjust the transfer of gas tax revenues from the Department of Revenue (DOR) to the DNR. M.S. 296A.18 subdivision 16 requires the DOR to transfer gas tax revenues to the DNR on November 1 and June 1. Until FY 16, the DOR made the second transfer on April 1. The later transfer date causes cash flow issues in the snowmobile fund. We are proposing that the second transfer be moved to April 1. This proposed timing change aligns statute with the previous process and resolves the cash flow issue.
- Provide clarifying language for Enforcement's Boat and Water Safety Grants in order to reimburse county expenditures that occur within the grant period but prior to the date the contract was completed. This issue was discovered during an internal audit. The change adds an encumbrance exception to the DNR's Grants Management Process.
- Clarifies where certain revenues should be deposited. The lack of clarity was discovered by a recent audit.
 - Direct proceeds from tours and outreach/educational programs to the State Parks Working Capital Account (M.S. 85.22);
 - Direct proceeds from lodging facilities (e.g., yurts, camper cabins) to the State Parks Account in the Natural Resources Fund (M.S. 85.052); and
 - Direct proceeds from special use permits on state trails and water access sites to a new State Trail and Water Access Account in the Natural Resources Fund (M.S. 84.03).

Results:

These changes result in clearer and more consistent statutory authorities that govern these aspects of our financial management.

Statutory Change(s):

Request:

The Governor recommends the state commit to a major investment plan for transportation to fund the estimated \$6 billion dollar gap that exists between funding needs and revenues in the next 10 years. The Governor proposes filling the \$6 billion gap in road and bridge funding by:

- Initiating a 6.5% gross receipts tax on gas
- Increasing registration fees (increase additional tax rate from 1.25% to 1.5% and base tax from \$10 to \$20; phased-in over 4 years)
- Authorizing \$2 billion in trunk highway bonds over the next 10 years
- Leveraging MnDOT efficiencies (up to 15% of new revenue)

The gross receipts tax and registration tax increases will fund roads and bridges at the state, county and municipal levels.

The Governor recommends funding Department of Revenue's cost for administering the NexTen Transportation proposal. These costs include \$234,000 in FY 2018 and \$222,000 in subsequent years for initiating and implementing the 6.5% gross receipts tax on gas.

Other Components:

In addition to the new funding above, the Governor recommends:

- Implementing \$10 surcharges on both motor vehicle registrations and motor vehicle title transfers. These surcharges would raise an estimated \$57 million per year, and would be deposited in the Special Revenue Fund to fund transportation needs not eligible for trunk highway funds:
 - Greater Minnesota transit - \$10 million annual base increase
 - Bike and pedestrian infrastructure, including Safe Routes to Schools administration – \$2.5 million annual base increase
 - Americans with Disabilities (ADA) projects for local roads - \$4 million annual base increase
 - Aid for Cities with Populations under 5,000 - \$19 million annually
 - Aid for Large Cities - \$19 million annually
 - Aid for Tribal Roads - \$2.5 million annually

General fund revenues are reduced by \$6.61 million FY18-19 biennium due to increased petroleum refunds and income tax interactions with the registration tax. General fund appropriations increase by \$220,000 for the biennium for increased aid under M.S. 270C.19 due to the increase in gas tax.

The sale of \$2 billion in trunk highway bonds is authorized over the next ten years. Debt service for these bonds is estimated to be \$22.2 million for the FY2018-19 biennium. This estimate increases to \$136.5 million for the FY2020-21 biennium. These estimates were provided by the Department of Minnesota Management and Budget.

For the FY2020-21 biennium, when the revenues are completely phased in, the increased revenue from the gross receipts and registration fees will increase expenditures for each transportation fund by about 25%. To illustrate the impact to taxpayers: the increases in the gross receipts, registration taxes and surcharge will cost the average Minnesotan \$16 per month, or 52 cents per day, and the gross receipts tax on gasoline is projected to add an additional 16.3 cents to the price of a gallon of gasoline. However, this proposal includes additional long-term sustainable funding and includes dedicated funds.

Rationale/Background:

Minnesota cannot preserve and improve quality and performance of the state's transportation systems under current investment levels and current infrastructure lifecycle replacement practice. The consequences of underinvesting in the state's transportation system will include a deterioration in service, increase in congestion, failing infrastructure and diminished ability to remain economically competitive. This is because transportation systems facilitate the efficient movement of people and goods and create the opportunity for economic development, enhanced productivity, job formation and sustainable growth. Without additional investment, the transportation system will not be able to expand to accommodate expected population and job growth. In addition, alternatives to driving alone must play a larger role in satisfying growing transportation demand - roads, transit and other transportation modes must work together as one system.

Road and Bridge funding components

Inflation has overtaken revenue growth for transportation. In 2012 the Transportation Finance Advisory Committee (TFAC) determined additional funding was needed for transportation. The department faces a \$6 billion gap in revenue over the next ten years above current fund balance projections, to fund activities such as state road construction and operations and maintenance. \$4 billion is needed for preservation and modernization, and \$2 billion is needed for strategic expansion.

Without additional revenue, there will be:

- Increased deterioration of pavement and bridges on state system
 - In FY2015, 5 percent of highway pavement is considered in poor condition (rough driving surface); it is estimated to be 11 percent in 20 years
 - In FY2015, 3 percent of bridge deck pavement is considered in poor condition; it is estimated to be 8-10% in 20 years
- Very little expansion to address population and economic growth
- Reductions in products and service delivery

In addition, more operations and maintenance dollars are recommended, calculated as 10 percent of new trunk highway fund revenues. This additional funding will be spent on snow plowing, fixing pot holes and guard rails, etc. These are needed due to declining asset conditions, increased snow and ice requirements, and the need for more timely maintenance.

While the Department has always worked to be good stewards of public funds, the department has taken a more targeted approach to identify and quantify efficiencies as well as find new areas for greater efficiencies. When the Department identifies savings on current projects, we release the programmed funds to advance additional projects (examples include the 494/694 project in Plymouth and Highway 371 north of Nisswa). Under this proposal, the Department commits to finding 15 percent efficiencies of new revenues.

Special Revenue Fund - Transit

Greater Minnesota Transit has a statutory goal to meet 90 percent of the transit need by 2025. In 2015, public transit systems met 88 percent of the need, based on the demographic models developed for the recent Greater Minnesota Investment Plan. That model predicts Greater Minnesota public transit demand will increase 45 percent from 2015 to 2025, primarily due to the rapid increase in people reaching age 65. This gap of operating funds includes those needed by local service providers to deliver more service, acquire and replace buses, provide bus maintenance and storage facilities. A small portion will be used by MnDOT to administer the larger program and keep up with inflation.

Special Revenue Fund – Bike and pedestrian infrastructure, including Safe Routes to Schools

There is a need to increase access to safe options for active transportation – walking and bicycling. Statewide Bicycle System and Pedestrian System plans are in progress to identify specific future needs. Since 2005 MnDOT has received Safe Routes to School applications requesting \$120 million and has awarded approximately \$20 million in grants, illustrating the gap between current need and investment. These grants to schools, in partnership with cities and counties, implement infrastructure projects that improve safety or access for children walking or bicycling to school.

Proposal:

Road and Bridge funding components

New revenues, bonding and MnDOT efficiencies would be identified to help close the funding gap in the next ten years. The goal is an integrated transportation system that optimizes the movement of people and goods across the state. With new funding, we can:

- Improve asset management - preserve and modernize the existing system
- Expand MnPASS and bus rapid transit lanes
- Complete strategic expansion on key corridors throughout the state
- Complete Main Street improvements

The benefits for taxpayers will include:

- Reduced wear and tear on their cars
- Fewer stops at the fuel pump
- Fewer accidents
- More time doing what they need to do

MnDOT has identified pavement and bridge needs as well as mobility projects that are not currently being addressed through its 10-year work plan. These unmet needs and projects will be given priority. These funds will provide for capital costs of construction as well as project development and engineering activities, allowing the department to utilize this funding in the most efficient manner.

Internally MnDOT will narrow the transportation funding gap by saving or avoiding costs through efficiencies, innovation and improved program and project management and thereby stretch public dollars further. Efficiencies will also be realized in the long-term asset management of the transportation system with increased benefits and savings when the right investment is made at the right time.

MnDOT proposes to utilize the increased operating appropriations for our highest-priority products and services. Some of these include:

- Snow and Ice - Keeping the roads clear of snow and ice
- System Roadway Structures Maintenance – remove potholes (Pavement repair)

- Bridges and Structures Inspection and Maintenance

Special Revenue Fund – Transit

In Greater Minnesota, MnDOT's highest priorities will be to establish service in locations without any existing public transit. Currently, many counties do not have county-wide service. Assuming all eligible locations are served by public transit, MnDOT's top priorities for service expansion include:

- Expand service hours in the morning and night to serve more trips
- Expand multi-county services to link more communities
- Provide service on more days of the week
- Expand service frequencies and coverage

Special Revenue Fund – Bike and pedestrian infrastructure, including Safe Routes to Schools

Provide safe routes infrastructure to increase access to safe options for active transportation in communities across Minnesota. Safe routes for bicyclists and pedestrians are the most effective way to increase walking and bicycling. Safe bicycle and pedestrian access to schools for Minnesota children has numerous benefits including reducing congestion around schools, reducing school transportation costs, and providing an opportunity for physical activity which decreases obesity, improves health and supports academic achievement.

IT Related Proposals:

N/A

Results:

Road and Bridge funding components

MnDOT would plan to rehabilitate the system for the 21st century by:

- Improving 1,700 center lane additional miles of pavement
- Repairing or replacing an additional 235 bridges, such as Robert St bridge over Mississippi River in St Paul
- Accelerate progress toward state goal of zero highway deaths with targeted installation of rumble strips, median barriers, lighting and other safety improvements. The Minnesota Toward Zero Death program has helped decrease traffic fatalities on Minnesota roads by 40.5% - saving an estimated 2,046 lives since 2003
- Keep roadside infrastructure in a state of good repair.

In addition, MnDOT has operating performance measures that will be impacted by this proposal. All are anticipated to decline without additional funding; and this would reduce the decline. They include:

- Snow Plowing Performance – meet clearance targets
- Smooth Roads – percent of pavement patching addressed
- Percent of projects let in the year scheduled

Special Revenue Fund – Transit

The additional funding allows the State to meet 90% of projected need for Greater Minnesota transit by 2025 by increasing transit service by nearly 500,000 service hours.

Special Revenue Fund – Bike and pedestrian infrastructure, including Safe Routes to Schools

Additional bicycle infrastructure investments would focus on local bicycle networks via local planning assistance with partners. Expanding the State Bikeways Systems (e.g. Mississippi River Trail) and investing in local network connection projects would also be prioritized.

Additional pedestrian infrastructure investments will improve the condition of existing infrastructure (sidewalks, pedestrian bridges, traffic signals, etc.), and fill gaps in the sidewalk network.

Increasing the Safe Routes to Schools investment would provide safer walking and biking to school options for thousands of school students.

Program: Lands and Minerals Resource Management

www.dnr.state.mn.us/lands_minerals/index.html

AT A GLANCE

- Collected **\$22.5 million** in revenue from state-owned land and mineral resources.
- Minnesota ranked **first** in the nation for iron ore production.
- Issued **2** work in public water permits for mining operations in 2016.
- Completed **71** acquisitions of land and interests in land.
- Calculate in lieu of tax payment of approximately **\$31.5 million** for distribution to local government annually.
- Manage **12 million** acres of state-owned mineral rights including **3.5 million** acres of school trust lands.
- Manage real estate activities for **5.4 million** acres of state-owned land, including **2.5 million** acres of school trust lands.

PURPOSE & CONTEXT

The Division of Lands and Minerals manages all state-owned mineral rights and provides real estate services for Department of Natural Resources (DNR) managed lands.

We ensure that mining is designed to protect natural resources and that sites are properly reclaimed for future use once mining is complete. The mineland reclamation activity promotes a healthy environment with sustainable use of natural resources.

Our land management activity includes oversight of the school trust lands which generate revenue by leasing state surface lands and mineral rights. These funds go to school districts throughout the state, the University of Minnesota and its students, as well as local towns, cities, and counties.

SERVICES PROVIDED

We meet our goals through three bodies of work:

Minerals Management

- We gather mineral resource information to encourage further exploration and investment. We maintain a drill core library of past exploration and drillings that provide geological insight into future sites. We map the location of sand and gravel to identify future resources and aid in local planning. We issue state mineral leases through public sales and negotiations.
- We review all exploration plans to ensure environmental protection criteria are met and conduct field inspections of the exploration activity on state and private lands. Exploration companies are searching for valuable deposits of copper, nickel, platinum, palladium, and other precious metals.
- We monitor the terms and conditions of the state leases, including performance requirements.
- We closely monitor iron ore being removed from the state lands. We verify volumes, collect the revenues due, and distribute them to school trust land, the university trust, and local communities.

Mine Permitting and Reclamation

- We administer permits to mine that are needed before metallic mineral mining operations may start on any land. We ensure permits include conditions to protect the environment, preserve natural resources, and plan for future use of the land. Amendments or other modifications to the permit to mine are evaluated for expansions and changes in operating plans.
- We administer water appropriation permits and work in public water permits needed for metallic minerals mining and peat mining. We ensure permits include conditions to allow reasonable use and protection of the state's water resources.
- We inspect mining operations to ensure permit compliance. This includes monitoring ongoing operations, reclamation, water use and protection activities, and environmental protection activities.

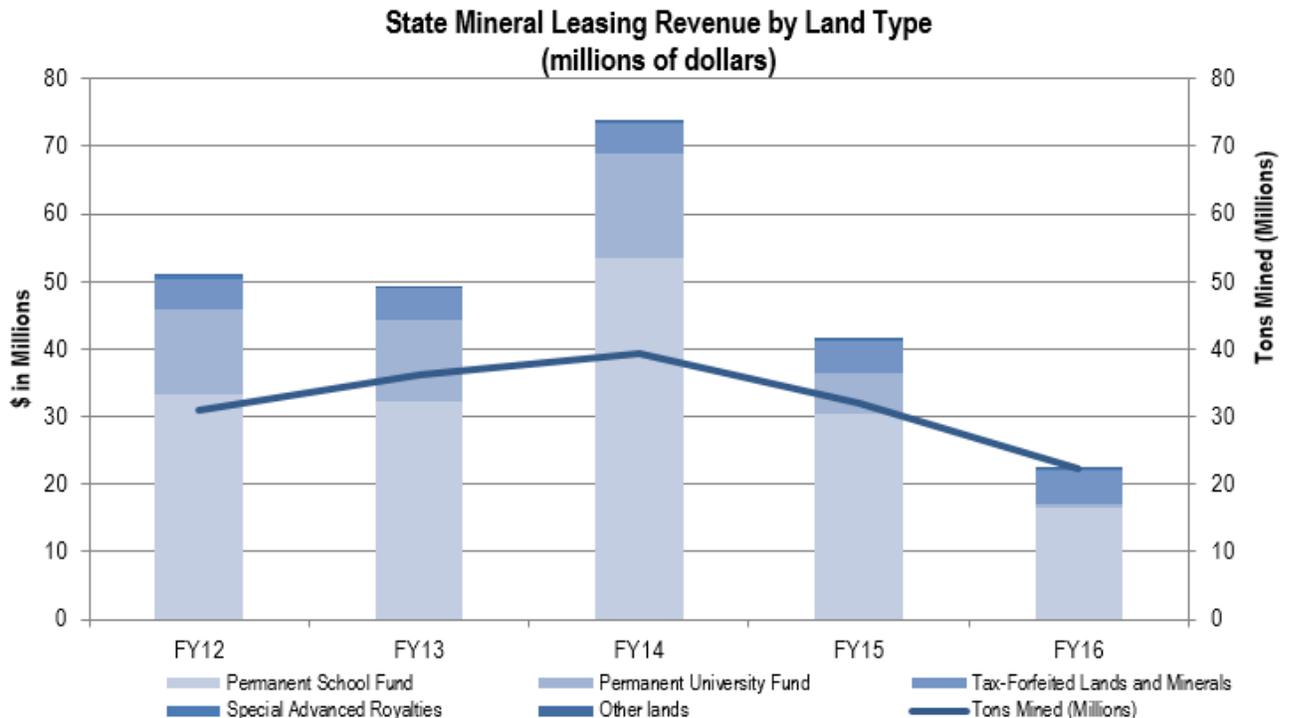

- We conduct environmental research to better understand potential water quality and other mining impacts and to evaluate new ways to reduce impacts.

Real Estate Management

- We acquire land through purchase and donation for outdoor recreation and natural-resource protection. We sell some lands to raise revenue for school trust land and to dispose of land no longer needed for natural resource purposes. We trade some land with other units of government or private parties to consolidate landholdings or to obtain land better suited for natural resources.
- We issue licenses for utilities to cross state lands and waters. We issue road easements for crossing state land and water. We issue leases for hunting cabins, boathouses, towers, agriculture, access to private property and other uses.
- We conduct surveys to address boundary issues prior to an acquisition, and to accurately post the boundaries for existing outdoor recreation units and before extensive development such as a water access site or campground.
- We provide direction on monitoring of conservation easements and enforcement of terms and conditions. We review and decide whether to approve the proposed sale of certain tax forfeited land by the counties. We review and decide whether to approve the exchange of tax forfeited land with other entities, subject to final approval by the Land Exchange Board.
- We work with counties to develop land record data and calculate annual payments in lieu of taxes.

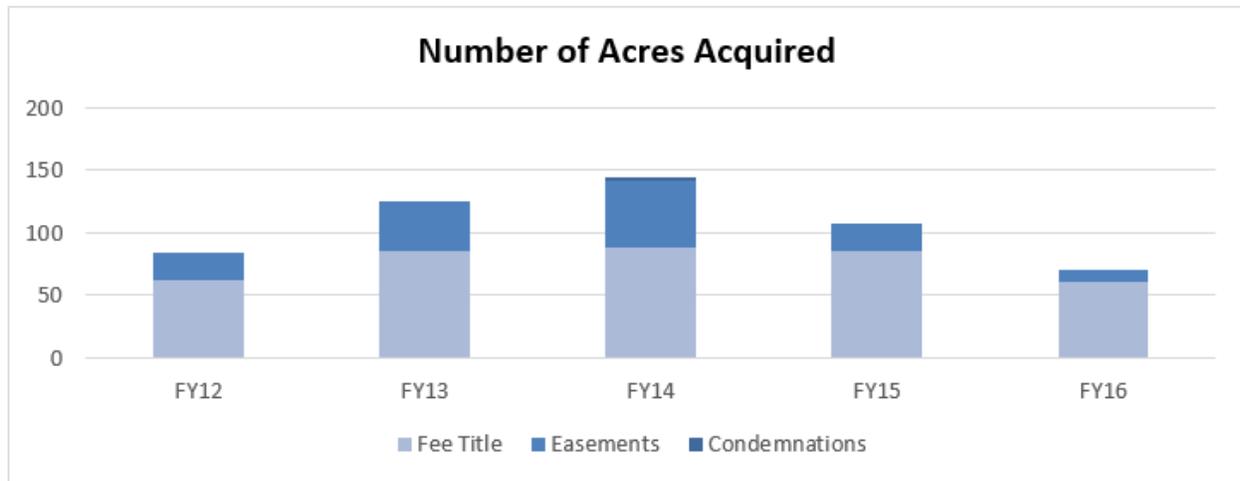

RESULTS

Quantity Performance Measure: Minerals management - Annual Mineral Leasing Revenue. This chart shows that mineral lease revenue has fluctuated in recent years and reflects recent downturn in taconite mining activity. The line showing tons mined indicates that the tonnage mined is not the sole factor for the change in revenue. Other factors include a higher commodity value for iron ore in FY2014, DNR’s success in negotiating higher royalty rates, and more recently the decision to provide a short term reduction in royalty rates to aid the struggling taconite industry.

Results Performance Measure: Mineland reclamation. In the past 4 years, we have issued 27 new or amended permits covering 3,500 acres. We have reclaimed 2,100 acres of previously mined lands for future use.

Quantity Performance Measure: Real estate management. The Division of Lands and Minerals is responsible for negotiating the land acquisition for the DNR. The graph shows the number of acres acquired for easements has been significantly decreasing due to a decrease in recent appropriations for conservation easements. The acres acquired for fee acquisitions is a more stable component, showing more modest variation through the years, although there has also been a decline in direct appropriations to DNR for acquisitions.

Program: Ecological and Water Resources

Activity: Ecological and Water Resources

www.dnr.state.mn.us/eco/index.html

www.dnr.state.mn.us/waters/index.html

AT A GLANCE

- Conduct **100,000** watercraft inspections for aquatic invasive species each year.
- Annually issue **1,200** water appropriation permit decisions and **900** permit decisions for activities affecting public waters.
- **191,000** acres of Scientific and Natural Areas (SNAs) in **163** SNAs.
- **10,100** acres in prairie easements in FY16.
- Install or upgrade stream flow monitoring equipment at **five** new locations and conduct stream flow monitoring at **281** streams in FY16.
- County Geologic Atlases completed for **23** counties statewide through FY16.
- Remove **100 - 200** buildings from flood plains to prevent flood damage each year.
- Minnesota Biological Survey completed in **84** of our 87 counties through FY16.

PURPOSE & CONTEXT

The Ecological and Water Resources Division promotes and delivers integrated land and water conservation to ensure healthy surface water, groundwater, and landscapes.

We provide critical information and regulatory oversight to state and local governments and landowners to foster naturalresources stewardship and enhance recreational and economic uses.

Our customers include local governments, conservation organizations, businesses, landowners and Minnesota citizens, who all benefit from healthy natural resources.

SERVICES PROVIDED

Our work is divided into three categories:

1. Inventory, monitoring, and analysis

- We collect and deliver information on ground and surface water, lake and stream habitat, rare plants and animals, and maintain flood-warning gages.
- We ensure that quality environmental information is available for current and future generations to use and maintaining Minnesota’s quality of life.
- We work to make sure state and local governments have access to this information, so they make good decisions regarding development and natural resource protection.

2. Conservation assistance and regulation

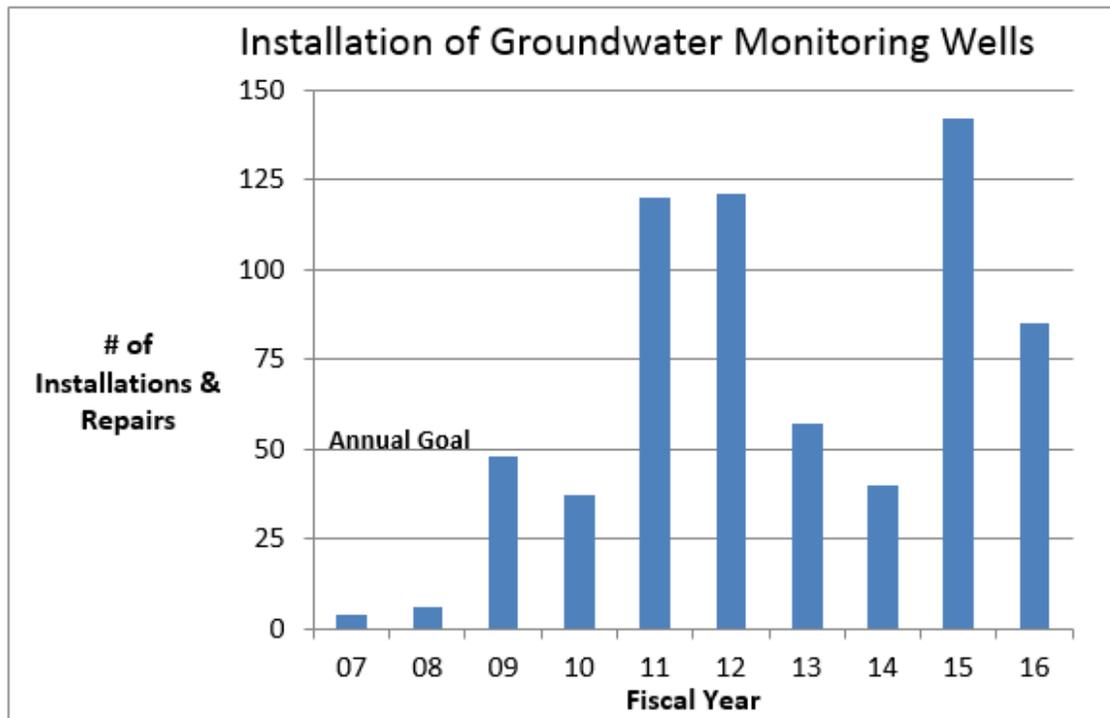

- We ensure recreation, habitat and water quality are maintained by regulating proposed alterations to lakes, wetlands, rivers and streams.
- We provide regulatory and technical oversight to local governments for shoreland, floodplains, and Wild and Scenic Rivers.
- We regulate water use to provide for sustainable surface water and ground water supplies as our population grows.
- We provide oversight of state’s dams, so they operate safely and protect the public and natural resources.
- We engage in environmental review to identify potential impacts of projects and help ensure permitting addresses those impacts.

3. Ecosystem management and protection

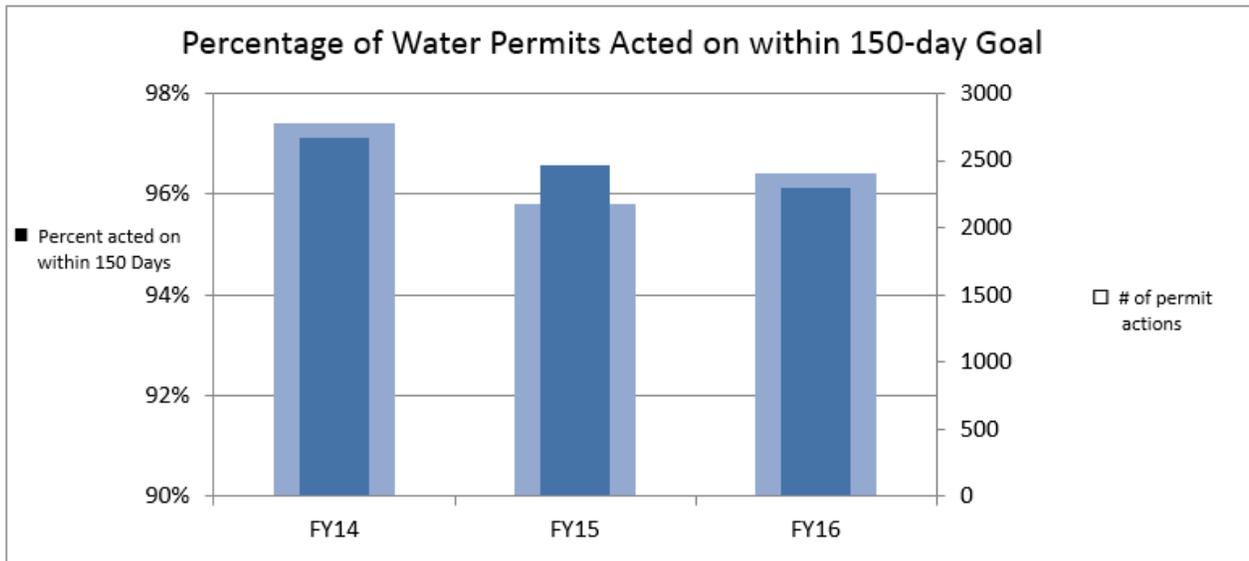

- We manage and prevent the spread of aquatic and terrestrial invasive species that threaten the state's lakes, rivers, wetlands, forests, and prairies, and the economies that depend on them.
- We manage Scientific and Natural Area and native prairie bank programs, nongame wildlife, and help protect habitat to improve conditions for native species. Nongame wildlife is important to the state's ecosystems and recreational enjoyment of the outdoors.
- We protect threatened and endangered species to prevent state extinctions.

RESULTS

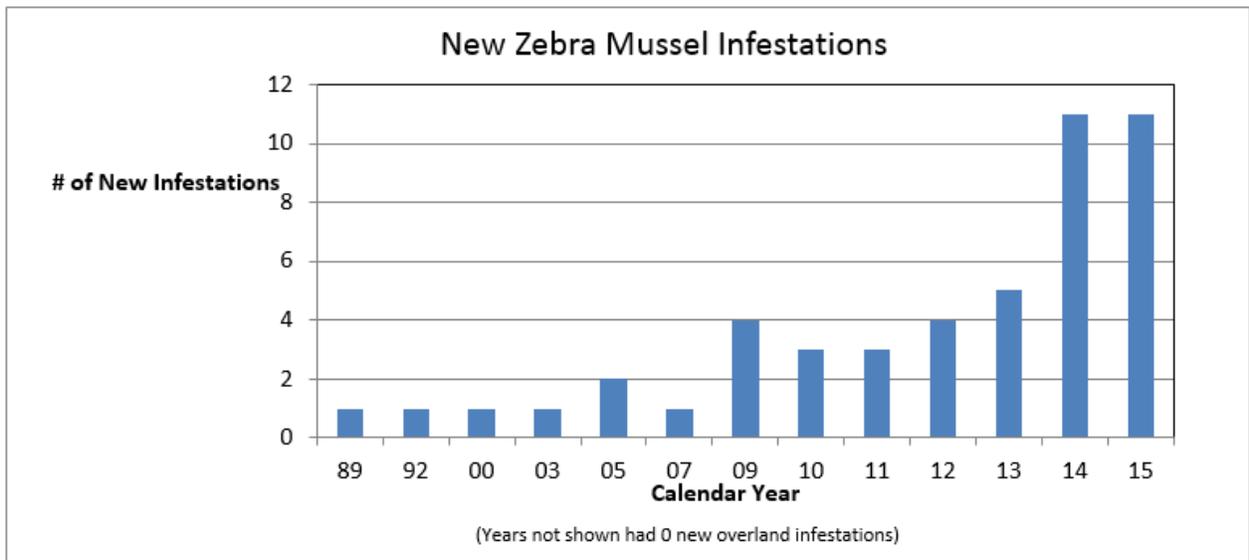

Quantity Performance Measure: Number of new groundwater monitoring well installations and repairs (50 per year goal). We have met or nearly met our goal for new installations and repairs nearly every year since 2009. The number of new wells we can drill in a year varies by the depth required and the complexity of the installation.

Quality Performance Measure: Number of water permits and percent acted on within 150 days. In the last two years, the number of permit applications received has been lower than the peak year of 2014. In FY16, we are acting on a larger percent of permits within 150 days as we get through the backlog from FY14 and implement some system improvements.

Results Performance Measure: Number of new lake infestations of zebra mussels due to overland spread (the spread of zebra mussels by inwater equipment or watercrafts). Minnesota has had 11 or fewer new overland zebra mussel infestations every year despite the increasing number of infested lakes. Once in a lake, zebra mussels can also spread to downstream waters, which is why limiting overland spread is important.

The legal authority for the Ecological and Water Resources Program comes from Minnesota Statutes:

Program: Forestry
Activity: Forest Management

www.dnr.state.mn.us/forestry/index.html

AT A GLANCE

- Manage **59** state forests covering 4.2 million acres for clean water, wildlife habitat, quality timber, outdoor recreation, and biological diversity.
- Provide **30 percent** of the state’s wood fiber that keeps Minnesota’s forest products industry strong, which supports more than 62,800 jobs statewide.
- Maintain **2,360** miles of forest roads that provide access for recreation, general public use, fire protection, forest management, and timber production.
- Reforest **10,000** acres annually by aerial seeding and hand-planting seedlings.
- Maintain forest management certification on **5 million** acres of Department of Natural Resources (DNR)-administered lands as determined by criteria set out and enforced by the Forest Stewardship Council and Sustainable Forestry Initiative.
- Prepare forest management plans for private landowners on **70,000** acres annually through a network of DNR, county, and private consulting foresters.
- Engage **45,000** students annually in outdoor education activities at **130** statewide school forest sites.

PURPOSE & CONTEXT

Our goal is to help sustain a quality of life by improving the productivity, health, diversity, accessibility, and use of forests. Healthy forests provide clean water, wildlife habitat, biodiversity, and forest-related products.

Healthy forests ensure the state’s natural areas remain productive, ecologically healthy, and beautiful in the face of wildfires, land-use pressures, climate change, and invasive plants, insect pests, and diseases. They play a key role in protecting water quality and provide low costs, accessible recreation for all Minnesotans.

Our forest products industry relies on a sustainable state timber supply. The industry provides 62,800 jobs and economic benefits worth \$17.1 billion. Well-managed forests also provide economic benefits from tourism and outdoor recreation activities like hunting, hiking, riding, and birdwatching.

Forest management is important to forest landowners, conservation groups, hunters, anglers, and other outdoor enthusiasts, school teachers, students, loggers and other forest operators, forest industry employees, and forestry professionals.

SERVICES PROVIDED

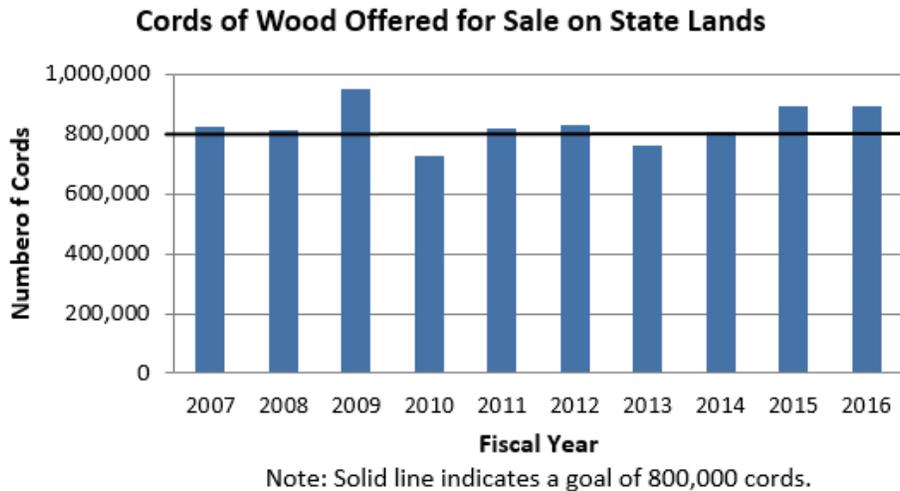

To achieve our goals, we:

- **Manage state forest lands** to improve their health and productivity so they provide clean water, abundant wildlife habitat, a sustainable supply of timber, and outdoor recreation opportunities. We lead forest management and policy development aimed at ensuring Minnesota forest lands (public and private) are sustained and enhanced. We support the commercial use and public enjoyment of forests by maintaining public forest roads and recreational trails.
- **Provide technical assistance to communities and private landowners** through training sessions, printed and online materials, and one-on-one visits to encourage them to keep their forests and lands healthy and intact in the face of development pressure, a changing climate, and growing populations of invasive species.
- **Develop and distribute forest information** to help Minnesotans prepare for and prevent insect and disease infestations and understand how forest resources benefit people, the environment, and the economy.
- **Implement the Sustainable Forest Resources Act** (Minnesota Statutes, Chapter 89A) to gather and incorporate diverse perspectives on forest management, use, and protection.
- **Manage timber on school trust lands** to maximize long-term economic returns to the Trust using sound conservation practices.
- **Work with the forest products industry** to understand needs and adjust, as possible, consistent with sound management practices.

RESULTS

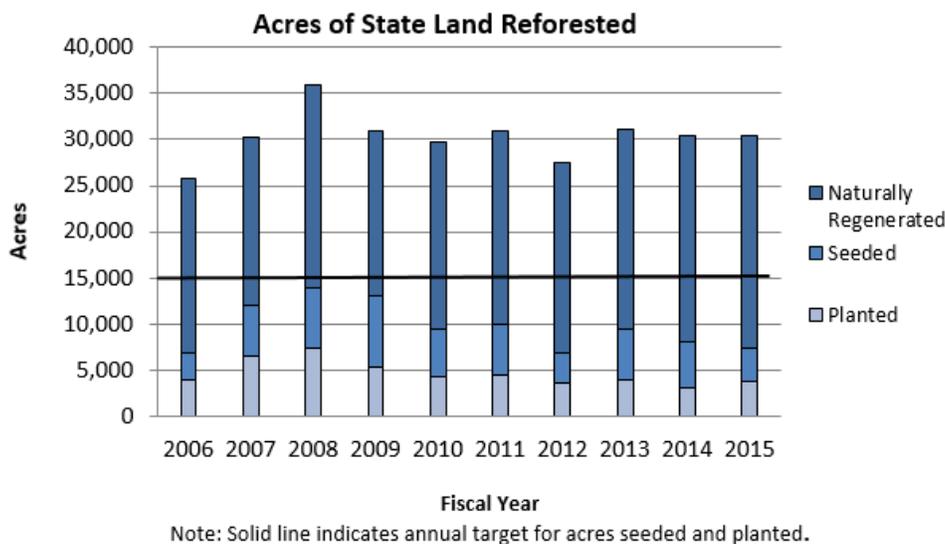

Quantity Performance Measure: Cords of wood offered for sale on state lands.

The state owns 24 percent of Minnesota's forest land, which is a significant source of raw materials for forest product industries and energy production. Our goal is to maintain the wood offered at public auction at a minimum level of 800,000 cords per year. State timber harvests are a management tool that have a similar effect as the natural disturbances of the past (e.g., wildfires), helping us efficiently and economically provide sustainable timber, wildlife habitat, clean water, and recreational opportunities.

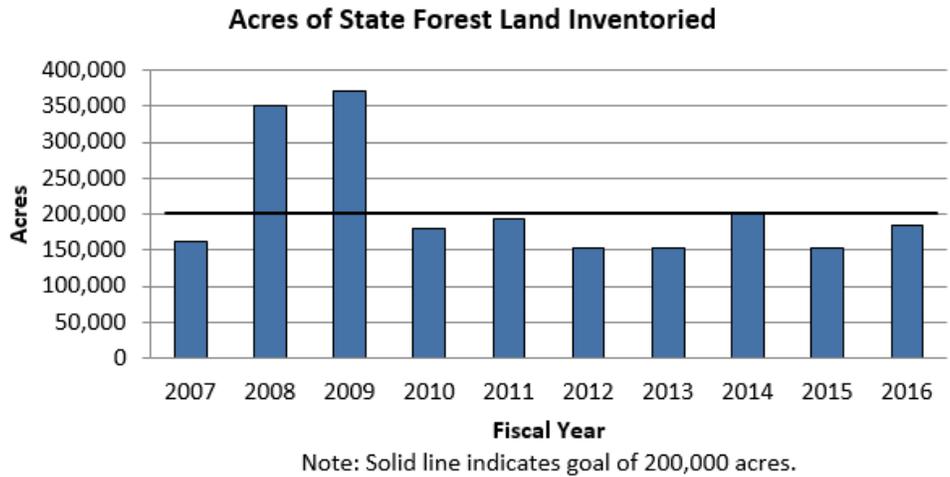

Results Performance Measure: Acres of state land reforested.

We must reforest the same number of acres as we harvest (Minnesota Statutes, section 89.002, subdivision 2). This is done by planting seedlings, spreading seed by air, and where possible, allowing the forest to grow back on its own (natural regeneration). The approach to reforestation after harvest depends on what tree species are best for the site. If pine should reforest a site, then we plant seedlings for best results. If we want a lowland conifer species like black spruce, we do aerial seeding from helicopters. For aspen growth, we allow natural regeneration or sprouting to occur. For best reforestation results, we should be planting or seeding approximately 15,000 acres per year, given the types of sites we are harvesting. We also protect an average of 5,800 acres of young trees like pine from deer and other animals per year.

Quantity Performance Measure: Acres of state forest land inventoried.

The DNR must maintain an up-to-date inventory of state forest lands, including tree species, age, size, and potential productivity to determine timber supply, management targets, and research needs. In keeping with good forest management practices, our goal is to inventory 200,000 acres per year. DNR foresters and hired consultants perform the on-the-ground inventory work.

The legal authority for the forest management activity comes from Minnesota Statutes 88, 89, 89A, and 90.

Program: Forestry
Activity: Firefighting

www.dnr.state.mn.us/forestry/index.html

AT A GLANCE

- Respond to **1,200** wildfires in FY2016
- Issue **65,000** burning permits annually.
- Respond in **20** minutes or less to wildfires where we are the first responder.
- Protect at least **95 percent** of structures threatened by wildfires.
- Hold the nation’s largest fire prevention outreach event at the State Fair where **500** firefighters and volunteers present fire prevention activities.
- Maintain **six** wildfire protection plans through the Firewise Program to help **318** communities reduce burnable materials around homes and communities.
- Coordinate emergency response activities and equipment and maintain cooperative agreements with national and local partners.
- Provide out-of-state firefighting assistance through the Minnesota Interagency Fire Center.

PURPOSE & CONTEXT

The Division of Forestry provides wildfire protection on 45.5 million acres of public and private land. We do this by:

- Protecting against loss of life by wildfire;
- Reducing loss of property and natural resources;
- Responding to fire and natural disaster emergencies in Minnesota and cooperating with federal and regional firefighting organizations by staffing national fire incidents;
- Preventing wildfires through education, regulation, and an open-burning permit system;
- Using prescribed fires as a tool to reduce burnable materials in natural areas.

Wildfire is a natural part of the environment, however it can cause damage. With more people living in suburbs and rural areas, wildfire protection is critical to protecting people, property, and natural resources. Our protection efforts serve landowners, homeowners, businesses, rural fire departments, other emergency response partners, and natural resource managers.

State authority over wildfire management began in the early 1900s after devastating wildfires destroyed Hinckley, Baudette, Chisholm, and Cloquet. In 1976 the Legislature created an open appropriation account to fund fire suppression efforts, and today the Department of Natural Resources (DNR) is responsible for state wildfire suppression costs.

SERVICES PROVIDED

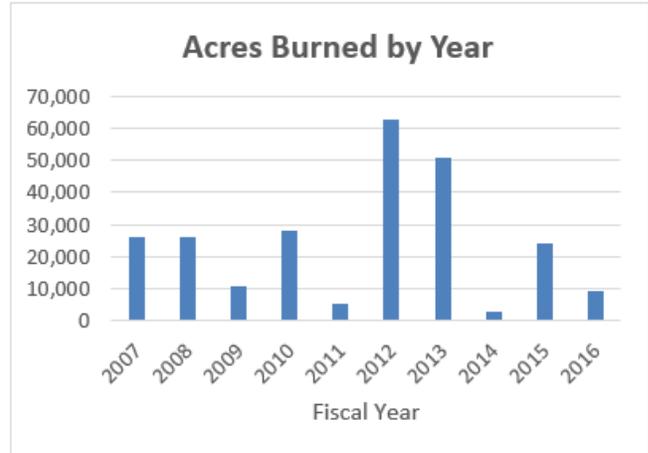

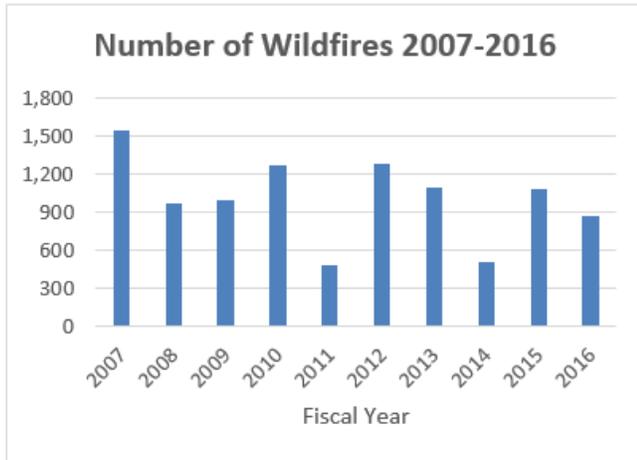

We protect against the loss of life, property, and natural resources from wildfire and enhance natural resource management through:

- **Prevention**—providing educational information and activities, regulating open burning, enforcing state wildfire and open-burning laws, investigating wildfire arson, and helping homeowners, developers, and cities identify and reduce the risk of wildfires around their homes and communities through the Firewise program.
- **Presuppression**—training firefighters and support personnel, operating the Minnesota Interagency Fire Center, maintaining partnerships and aid agreements with other fire protection agencies, tracking statewide availability of specialized ground and aerial suppression equipment, and maintaining an emergency communications network.
- **Suppression**—locating wildfires with aerial patrols, public reports, and lookout towers; seasonally relocating firefighting resources to shorten response times; and controlling the spread of wildfires to minimize their damage. Suppression efforts require trained firefighters, support personnel, and aerial and ground-based equipment.
- **Prescribed burning**—using fire intentionally to prepare sites for reforestation; control insects, diseases, and invasive plants; improve wildlife habitat; maintain natural plant communities; reduce the risk and severity of wildfires; and provide valuable fire suppression training.

RESULTS

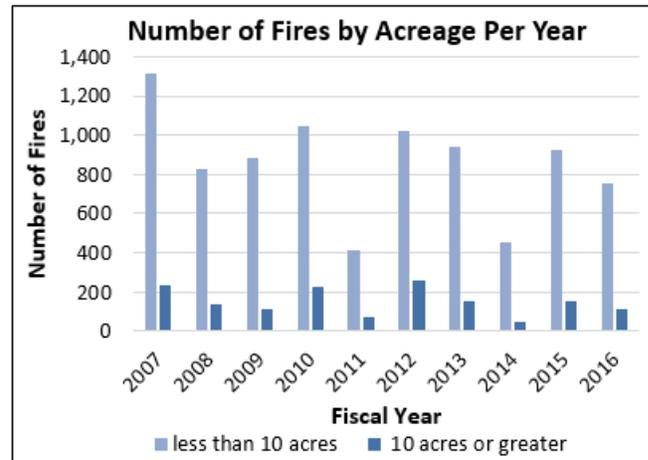

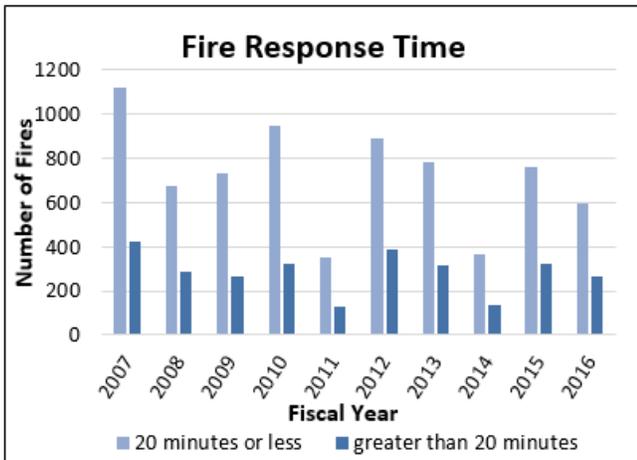

Quantity Performance Measure: Fires and acres burned.

Wildfire danger levels relate to the weather. A long-term drought from 2011 to 2013 meant high wildfire danger and longer wildfire seasons. During those years, DNR and firefighting partners remained in “high-alert” status over the summer and into the fall to handle the dangerous fire conditions. During this time, Minnesota also exchanged firefighter and equipment support with state, federal, and provincial partners. These reciprocal working relationships continue to be a critical resource for reducing wildfire costs. The need for wildfire protection is unpredictable from year to year, but can be a significant workload when weather patterns are dry.

Quality Performance Measure: Wildfire size and response times.

The success of our wildfire suppression strategy is due to aggressive initial attack. Our goal is to keep wildfires small—under 10 acres—and respond to them within 20 minutes. Once a wildfire escapes initial attack, suppression costs and damages increase at a rapid rate.

The legal authority for the firefighting activity comes from Minnesota Statutes: 88.01-88.46 (<https://www.revisor.mn.gov/statutes/?id=88>).

Program: Parks and Trails
Activity: Parks and Trails Management

www.dnr.state.mn.us/parks_trails/index.html

AT A GLANCE

- Operate **66** state parks, **9** state recreation areas, **9** state waysides and nearly **5,000** campsites.
- Maintain more than **4,200** miles of hiking/biking/motorized trails and **22,000** miles of snowmobile trails.
- Maintain forest recreation areas including **43** campgrounds and **29** day use areas.
- Maintain **1,500** public water accesses, **368** fishing piers, **35** state water trails.
- Contribute to the state’s **\$13.6 billion** tourism industry with **11** of the top **35** Minnesota tourist attractions, and **31** out of **40** of the top tourist attractions in the four tourism regions of Greater Minnesota.
- Restore and maintain **240,000** acres of natural lands and help preserve **285** rare species.
- Steward **62** historic districts, nearly **600** historic structures and more than **900** archaeological sites.
- Deliver **9,500** outdoor educational programs to **310,000** participants.

PURPOSE & CONTEXT

The vision of the Department of Natural Resources (DNR) Parks and Trails Division is to create unforgettable park, trail, and water recreation experiences that inspire people to pass along the love of the outdoors to current and future generations.

State parks and trails make citizens’ lives better by connecting them to nature, helping them to stay healthy and fit, strengthening local communities and economies and conserving the state’s special places and resources.

We serve out-of-state visitors and residents alike. We offer outdoor recreational opportunities within 30 miles of most people in the state. We serve:

- **8.7** million state park visitors (18 percent are out-of-state);
- Owners of **500,000** registered snowmobiles and off highway vehicles; and **818,000** registered watercraft; and
- Local communities, which receive about **\$230 million** each year from park visitor spending.

SERVICES PROVIDED

Our work is divided into four categories.

We connect people to the outdoors through our state parks, trails, forest recreation areas and water recreation. Our naturalist and outreach programs are aimed at experienced and beginner outdoor enthusiasts. We offer skill-building programs so first-timers can explore the outdoors in a safe, engaging way. We appeal to outdoor enthusiasts with an eye toward innovative facilities, services and amenities (such as 100% reservable campsites, self-directed visitor orientation and the 2016 Governor’s Innovation Award winning Park Finder web service) and popular recreational opportunities like mountain biking and paddle boarding.

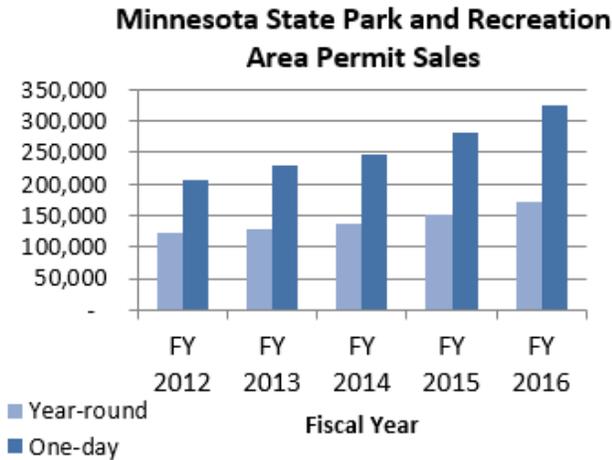

We acquire land and create new recreational and conservation opportunities. We focus acquisition and development on conserving the state’s rich natural and cultural history, and meeting future recreation demand. We plan ahead to meet the emerging needs of outdoor enthusiasts and use technology to attract and retain outdoor recreation users.

We take care of what we have and the people we serve. Our visitors want high quality customer service, facilities and amenities. With this in mind, we invest Legacy funds to make improvements to our aging infrastructure and reinvigorate visitor services. We also manage unique natural resources for public enjoyment and long-term conservation.

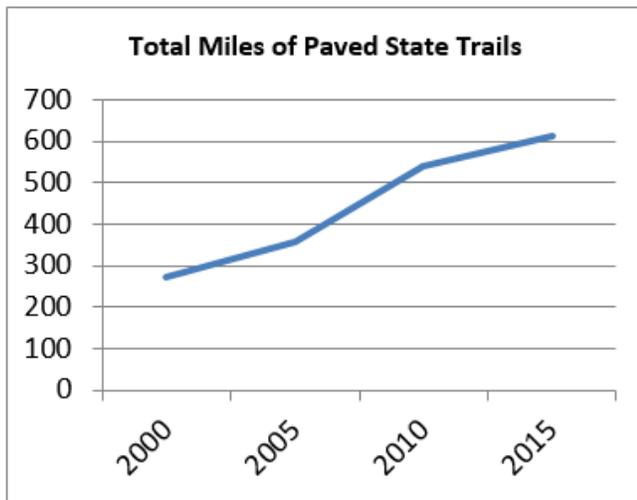

We work with partners. We connect with outdoor recreation partners to provide a seamless outdoor recreation system at the local, regional, state and federal level. About 25 percent of our budget is devoted to grant programs that pass funding through to local governments to meet near-home outdoor recreation opportunities (see Parks and Trails Community Partnerships narrative).

RESULTS

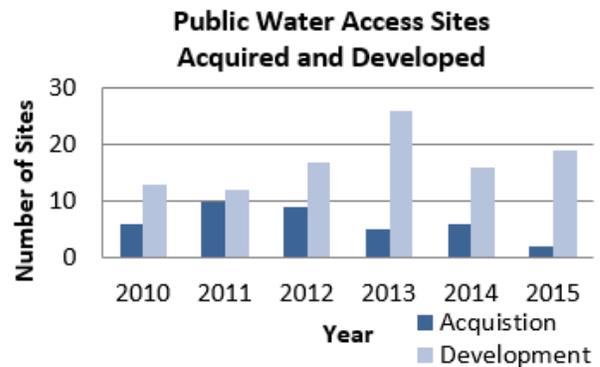

Quantity Performance Measure: Number of State Park permit sales. The popularity of state outdoor recreation assets is on the rise, as illustrated by the increase in one-day and year-round permit sales (below). State parks and trails help support healthy communities.

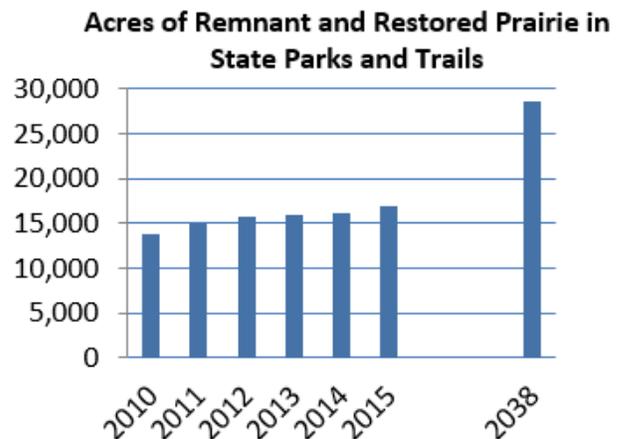

Quantity Performance Measure: Mile of paved trails for bicycling have more than doubled since 2000, increasing from 271 in 2000 to 613 in 2015. Our expanding trails system provides social and economic benefits to local communities.

Quantity Performance Measure: We maintain public water accesses, state water trails, fishing piers and shore fishing sites. In recent years, our focus has shifted to improving existing water accesses for public safety, storm-water runoff, and boat-cleaning areas.

Results Performance Measure: We protect, restore and maintain native plant communities and wildlife through active management. Restoring native plant communities, conducting prescribed burns and managing invasive species on over 17,000 acres every year. We currently manage approximately 16,900 acres of remnant/restored prairie and our goal is to restore an additional 11,700 acres of prairie by 2038.

These measures illustrate just a handful of the outcomes we achieve through our Parks and Trails Management and Operations. More measures and trends can be found at: State Parks and Trails Studies (<http://www.dnr.state.mn.us/aboutdnr/reports/pat/index.html>)

The legal authority for the Parks and Trails Management and Operations Program comes from Minnesota Statutes: 86A.05 (<https://www.revisor.mn.gov/statutes/?id=86A.05>).

Program: Parks and Trails
Activity: Community Partnerships

www.dnr.state.mn.us/grants/recreation/index.html

AT A GLANCE

Deliver **370** grants totaling more than **\$25 million** annually to local governments and organizations for parks and trails. These include approximately:

- **70** grants for acquisition and development of local parks and trails;
- **180** grants for snowmobile trail maintenance and grooming;
- **70** grants for off-highway vehicle trail development and maintenance; and
- **50** grants for ski trail maintenance and grooming.

Aid in the development of local trail systems throughout the state by administering grants to volunteer organizations. This “grant-in-aid” (GIA) system now, includes:

- Over **21,000** miles of GIA snowmobile trails;
- Over **1,700** miles of off-highway vehicle trails; and
- Over **700** miles of cross-country ski trails.

PURPOSE & CONTEXT

The Parks and Trails Community Partnership program works to provide grants to organizations and local governments to help create new parks and trails and maintain existing parks and trails.

By creating a seamless system of outdoor recreation, local and regional parks and trails complement the state system and contribute to Minnesota’s overall outdoor recreation goals.

Community partnerships benefit:

- Local communities that receive grants and whose economies benefit from trail associated spending.
- Trails users, including 213,000 snowmobile riders and 292,000 off-highway vehicle riders, and over 19,000 cross-country skiers.

Community parks and trails partnerships help provide for thriving local economies. In Minnesota, outdoor recreation generates \$11.6 billion in annual consumer spending, \$815 million in state and local taxes, and 118,000 jobs (Outdoor Industry Association surveys, 2012). Local and regional parks and trails are an important part of the state’s outdoor recreation industry.

SERVICES PROVIDED

We provide grants to local governments and organizations for parks and trail acquisition, development, rehabilitation, grooming, maintenance and operations. We administer a variety of grant programs focusing on outdoor recreation, regional parks and trails, local trail connections, as well as Grant-in-Aid (GIA) programs for snowmobile, off-highway vehicle, and cross-country ski trail users. We manage federal programs such as the Federal Recreational Trail Program and the Land and Water Conservation Fund.

Our grant administration services include managing the grant programs; providing information and customer service to grant recipients; ensuring a fair and efficient process for grant selection; ensuring financial accountability; and building partnerships with local, regional, state and federal programs.

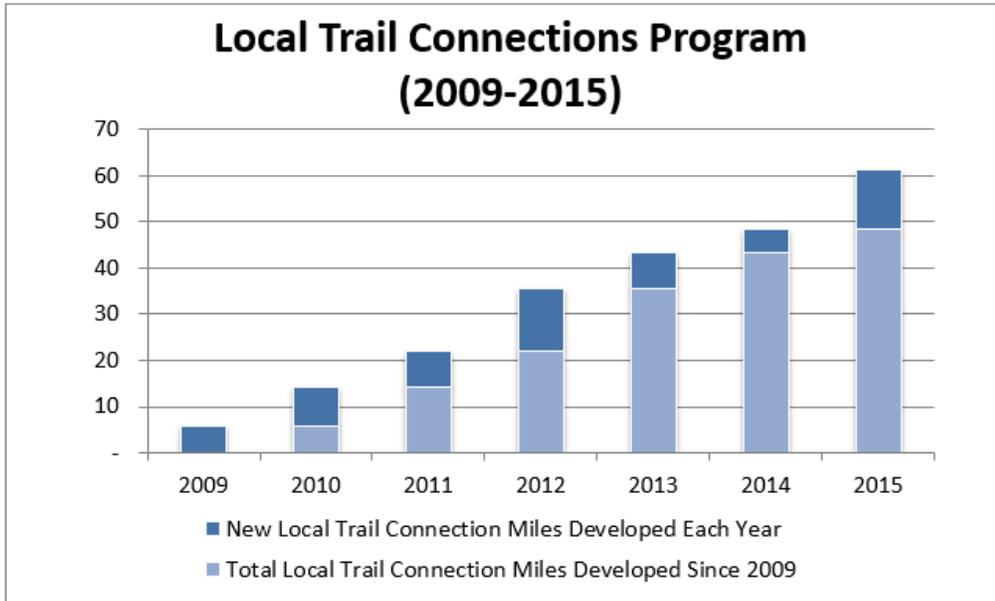

RESULTS

Quality Performance Measure: Miles of New Local Trail Connections Developed

We aim to achieve high satisfaction among grant recipients while meeting state and federal grant management standards. Our goal is for grants to contribute to a comprehensive outdoor recreation system in Minnesota.

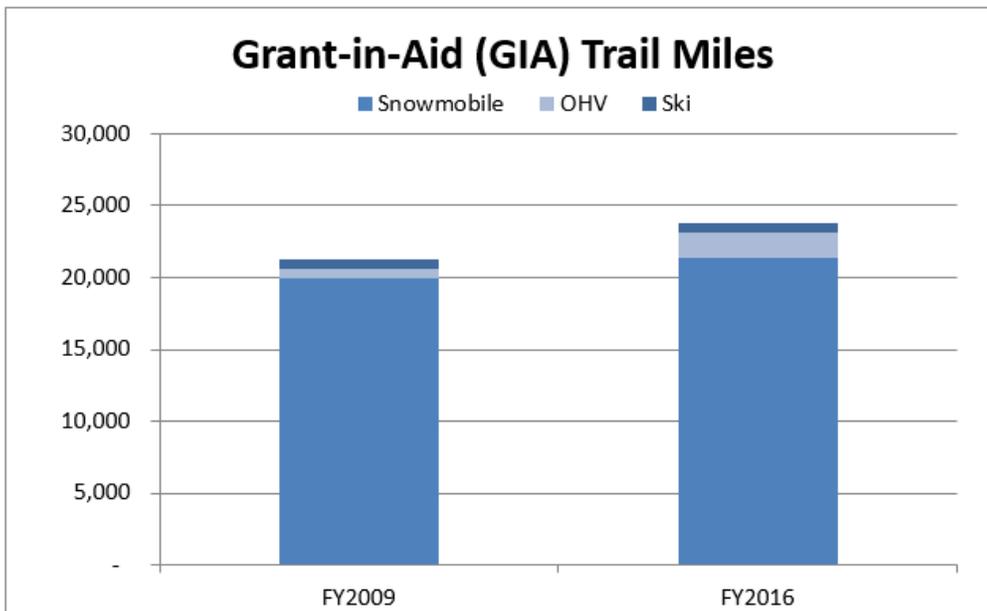

The Local Trail Connections Program is one example where we facilitate new trail connections. These trail segments may be relatively short in length, but are often necessary to create a seamless trail system that meets local needs. These trail

segments may create connections to where people live (such as residential areas within cities or entire communities) and/or to significant public resources (such as historical areas, parks and/or other trails).

Quantity Performance Measure: Trail Miles Cooperatively Developed and Maintained

We also manage the Grant-in-Aid (GIA) program, a cost-sharing system of snowmobile, off-highway vehicle, and cross-country ski trails. The GIA trail system has grown by more than 2,500 miles in recent years from 21,308 miles in FY2009 to 23,813 miles in FY2016. This program relies on groups or clubs, with the support and participation of local governments. We provide financial and technical assistance and overall GIA program management. Together, we develop and maintain a much larger trail system than any one group could deliver.

Additional measures are available on DNR’s grant outcomes website at DNR Grant Outcomes Reporting (<http://www.dnr.state.mn.us/grants/outcomes/index.html>)

The legal authority for the Parks and Trails Community Partnerships Program comes from Minnesota Statutes 84.83, 84.794, 84.803, 84.927, 85.019, 85.43, and 85.5535.

Program: Fish and Wildlife

Activity: Fish and Wildlife

dnr.state.mn.us/fishwildlife/index.html

www.dnr.state.mn.us/rlp/index.html

AT A GLANCE

- Manage nearly **1.3 million** acres of state-owned wildlife management areas and **45,000** acres of aquatic management areas.
- Protect, monitor, enhance, and restore aquatic habitat for **5,500** fishing lakes and **15,000** miles of fishable streams and rivers in Minnesota.
- Manage **61** wildlife and **28** sport fish game species.
- Provide services to **1.5 million** licensed anglers, **580,000** licensed hunters and trappers, and **1.6 million** wildlife watchers.
- Protect, enhance, and restore habitats by infusing **\$6.8 million** in competitive matching grants to nonprofit organizations or local governments in metro and greater Minnesota.
- Manage **2.8 million** license sales for hunting, fishing, and other activities, and **1.4 million** registrations for recreational boats and vehicles.
- Provide an electronic license purchasing system operated for license agents and DNR License Center.
- Engage **1,550** Minnesota businesses as point-of-sale agents for hunting and fishing licenses and **170** registration and titling agents.
- Answer more than **80,000** customer and license agent telephone questions annually.
- Collect **\$65 million** in receipts annually.
- Process more than **350,000** pieces of mail annually.

PURPOSE & CONTEXT

The Fish and Wildlife Division manages fish and wildlife populations, their habitats, and use of these public resources, including fishing, hunting, and trapping. We serve citizens seeking licenses, registration and titling. To fulfill this work, we also serve licensing agents and deputy registrars.

Our goal is to sustain healthy populations of fish and wildlife, high quality recreational opportunities, and vibrant local economies. In partnership with citizens, we protect and restore natural lands, lakes, and streams, monitor harvested species, anticipate and respond to new challenges, and promote the state’s hunting, fishing and trapping heritage. Hunters, anglers, and wildlife viewers and photographers benefit from diverse, abundant species, accessible public lands, and high quality recreational experiences.

We provide licensing and recreational vehicle services, through use of the Electronic Licensing System (ELS), in an efficient and cost effective manner, including web, telephone, and mobile-device options. Data are used to analyze recreational participation trends. Revenue from vehicle and watercraft registration and titling helps managers regulate watercraft, snowmobile, ATV and other recreational vehicles. It also provides funding for development of recreational trail systems, public water access, lake and river improvements, aquatic plant management, and boat and water safety programs.

Minnesota residents and non-residents benefit with access to natural lands and participation in outdoor recreation offering personal health benefits and maintaining Minnesota’s hunting and fishing heritage – benefitting current and future generations. This boosts Minnesota’s economy including rural communities by supporting more than 48,000 jobs and generating \$3.8 billion in annual statewide expenditures. We support local economies by making licenses available at 1,550 point-of-sale locations statewide.

SERVICES PROVIDED

Our work is divided into five categories.

1. **Fish and wildlife population monitoring and management:** To ensure high quality fishing, hunting, trapping and wildlife watching, we monitor and manage fish and wildlife populations for the benefit of citizens.
 - We conduct surveys to 1) monitor fish and wildlife population trends, 2) Inform management decisions, including harvest regulations, and 3) Assess values and attitudes of anglers, hunters, and landowners and to evaluate changes in participation and resource use.

- We use research to understand and predict changes in fish and wildlife populations and to inform management decisions.
 - We raise and stock walleye, muskellunge, northern pike, trout, salmon, and other game fish species to enhance or restore fish populations in lakes and streams or to establish new fishing opportunities.
 - We monitor and manage diseases to reduce risk of outbreaks and high fish and wildlife losses.
 - We reduce human-wildlife conflicts by monitoring wildlife damage and providing assistance to property owners and growers to prevent or reduce damage.
2. **Habitat protection, enhancement, and restoration:** To help sustain healthy, productive fish and wildlife populations, we:
- Manage more than 1.3 million acres of wildlife and aquatic habitat;
 - Contribute to improved habitat management on other public and private lands through technical and financial assistance;
 - Acquire lands through purchase or donation to add high priority parcels to the system's land base which are then enhanced or restored;
 - We enhance and restore grasslands and prairie; conduct prescribed burns and remove woody vegetation to enhance prairies; restore and enhance wetlands; manage forest stands; conduct wildlife lake assessments; improve fish spawning areas; protect and enhance aquatic habitats; and remove dams and restore functions to aquatic systems; and
 - We provide public awareness and access to state lands through posting boundaries, providing parking lots and walking trails, and providing maps (digital and paper) and other user information.
3. **Technical assistance, public participation, planning, and coordination:** Citizen understanding and support is critical to healthy environments. We improve citizen engagement through roundtables, workshops, public input, county and state fairs, customer surveys, web surveys, and other tools. We work with private landowners and local government units to help them improve habitat in grasslands, forests, wetlands, lakes and streams.
4. **Outreach, recruitment, retention, and communication:** We work with partners to provide information and educational opportunities that encourage outdoor recreation and sustain or increase participation in fishing and hunting. This work includes: mentored hunts, the National Archery in the Schools program, skills-based training, youth and women's programs, direct engagement of Southeast Asian and other under-represented communities, MinnAqua, Becoming An Outdoors Woman/Family program, and Fishing In the Neighborhood.

We share with citizens large volumes of information about fish and wildlife populations, habitats, and recreational opportunities. We communicate this information through print media, our website, social media, mobile devices, and video.

5. **Public Information and Customer Service:** We are responsible for the development, implementation, and maintenance of the statewide ELS. We provide easy access for outdoors enthusiasts to purchase hunting and fishing licenses at any of the 1,550 ELS agent locations. Customers can also purchase by phone, mobile-device, and online. We have a walk-in service counter in St. Paul that provides service to customers for all types of license, registration and titling transactions. Commercial licenses are issued for businesses such as minnow dealers, game farms, shooting preserves, and we manage the lottery system for turkey, antlerless deer, bear, and elk seasons.

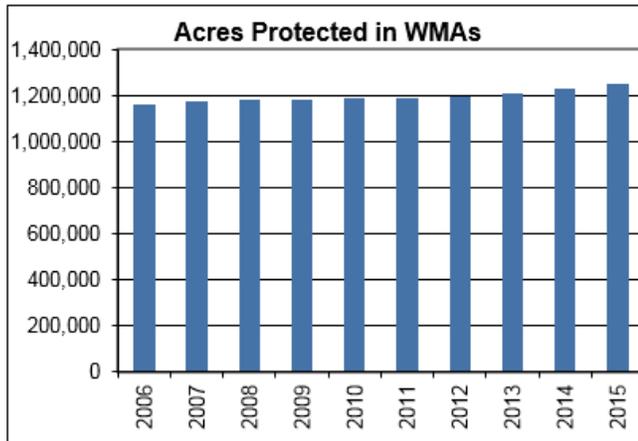

We issue all watercraft registration and titles and the registration of all-terrain vehicles (ATVs), snowmobiles, off road vehicles (ORVs), and off-highway motorcycles (OHMs) through the web-based ELS.

We distribute a variety of DNR-related materials. This includes hunting regulations, fishing regulations, waterfowl supplements, boating guides, snowmobile regulation and off-highway vehicle regulations.

RESULTS

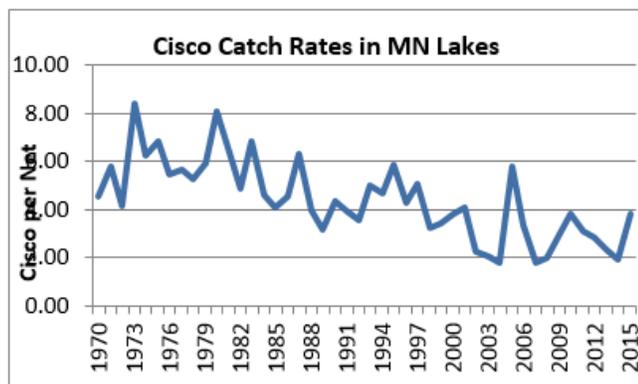

Results Performance Measure: Acres Protected in WMAs

The Wildlife Management Area (WMA) system is the backbone of DNR's wildlife program. WMAs provide for public recreation and wildlife production. A stable to moderate increasing base of WMA acres has been achieved in recent years.

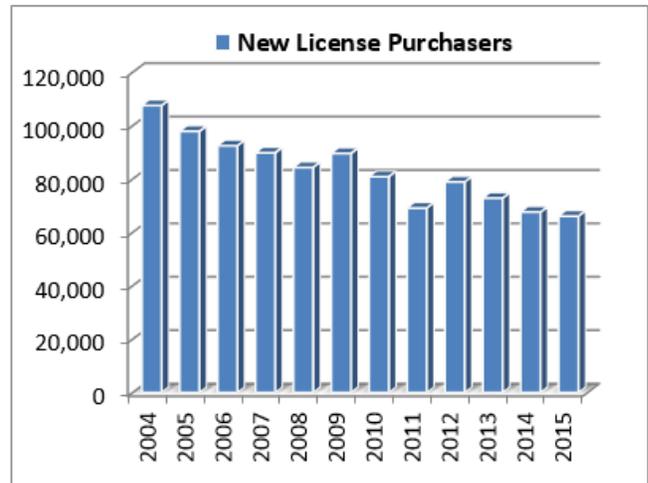

Results Performance Measure: Cisco catch per net since 1970.

Cisco (or tullibee) are an important forage fish for walleye, northern pike, and muskellunge. Cisco are an early indicator of environmental changes impacting cool water lakes due to their sensitivity to water temperatures and oxygen levels.

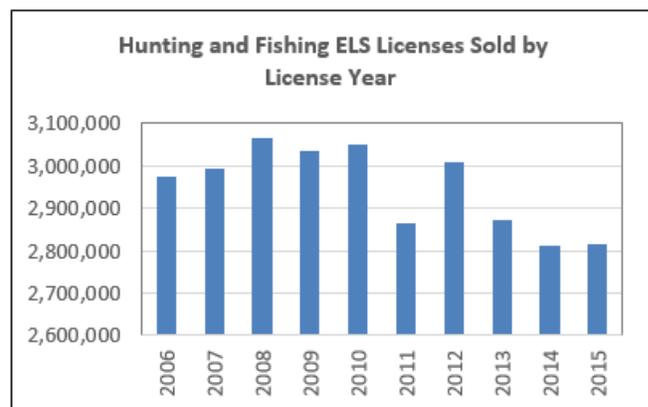

Quality Performance Measure: New license purchases:

Although fishing and hunting participation rates are higher in Minnesota than nationwide, overall rates are declining. Angling and hunting activities directly fund state fish and wildlife management through license purchases and federal equipment excise taxes. Outreach efforts focus on recruiting and retaining citizens interested in healthy fish and wildlife populations, habitat, and recreation.

Quantity Performance Measure: Number of Licenses Sold.

License sales and availability are adjusted annually based on multiple factors, including population assessments. Recent years have been lower than normal however expected to trend upward.

The legal authority for the Fish and Wildlife program comes from the following Minnesota Statutes

- 17, (<https://www.revisor.mn.gov/statutes/?id=17>),
- 84 (<https://www.revisor.mn.gov/statutes/?id=84>),
- 84C (<https://www.revisor.mn.gov/statutes/?id=84C>),
- 84D (<https://www.revisor.mn.gov/statutes/?id=84D>),
- 86A (<https://www.revisor.mn.gov/statutes/?id=86A>),

- 97A (<https://www.revisor.mn.gov/statutes/?id=97A>),
- 97B (<https://www.revisor.mn.gov/statutes/?id=97B>),
- 97C (<https://www.revisor.mn.gov/statutes/?id=97C>),

Program: Enforcement

Activity: Enforcement

www.dnr.state.mn.us/enforcement/index.html

AT A GLANCE

- 186 Conservation Officers providing outreach, safety education training, and law enforcement of our state’s natural resources for citizens and visitors.
- Engage in over 1,300 outreach opportunities annually
- Certified over 54,000 students in safety education programs by working with 7,000 volunteer instructors in all counties in the state.
- Administered over 300 state & federal grants to user groups and local law enforcement partners for outreach, safety education, and enforcement of motorized recreational vehicle laws & regulations.
- Worked with over 100 non-profit shooting sports organizations to increase capacity for high-school shooting sports and recreational shooting through infrastructure improvements and expansions.
- Provide 2,500 hours of flight operations to support resource management and public safety.

PURPOSE & CONTEXT

As the primary conservation law enforcement agency in Minnesota, we fulfill the Department of Natural Resources (DNR) mission by protecting natural resources and public safety. Protecting public safety is our highest priority. Our role in protecting natural resources has grown from traditional game and fish enforcement to broader natural resource protection responsibilities that affect quality of life and economic sustainability. We achieve compliance with laws and regulations through outreach, safety education, and law enforcement.

Our 10-year strategic plan addresses how we will accomplish our work in the face of new, broad trends. A decline in outdoor recreation participation means a decline in licenses and permit revenue, which impacts the funding for traditional enforcement activities. At the same time, there are increasing demands for enforcement of invasive species, water appropriation, disaster response, and other natural resource protection laws. Even though our demands are shifting, our work plan continues to be informed by our funding, which does not always allow the flexibility needed to meet the needs in the field.

SERVICES PROVIDED

Our work includes outreach, safety education, and law enforcement in four main areas:

1. Fish and Game Education and Protection

- We work with recreational and commercial users to protect fish and game populations.
- We manage youth and adult hunting safety education programs.
- We recruit new users through outreach opportunities and shooting range development.

2. Recreational Safety and Enforcement

- We work with motorized and non-motorized recreational users to enforce recreational laws and regulations.
- We deliver recreational motorized safety education.

3. Natural Resource Protection

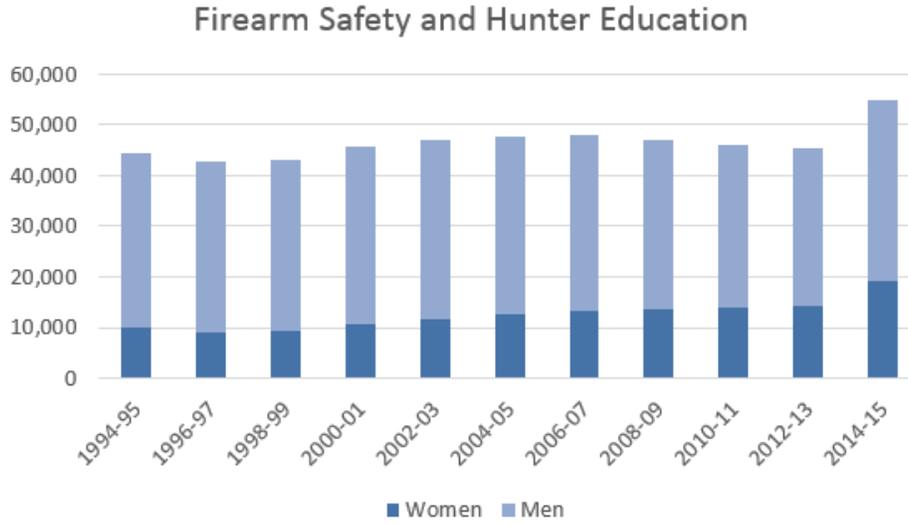

- We enforce regulations related invasive species, wetland protection, water appropriation, water quality, solid waste, timber theft, and air quality.
- We work with partner regulatory agencies to educate user groups on the state’s natural resource laws and regulations.

4. Public Safety

- As licensed peace officers, we work within the emergency management system to provide mutual-aid assistance in response to disasters, search and rescue, and law enforcement.

RESULTS

Quantity Performance Measure: Number of Minnesotans Certified in Firearms Safety and Hunter Education Programs.
Outreach efforts continue to increase the number of women certified in firearms safety/hunter education programs.

The legal authority for the Enforcement Program comes from Minnesota Statutes:

- 84.028 (<https://www.revisor.mn.gov/statutes/?id=84.028>)
- 84.081 (<https://www.revisor.mn.gov/statutes/?id=84.081>)

Program: Operations Support
Activity: Operations Support

www.dnr.state.mn.us/aboutdnr/commissioner/index.html

AT A GLANCE

- Direct budget and accounting policy for effective use of approximately \$550 million per year
- Provide human resource services to 4,479 employees which is the number of individuals that were paid at any one time during the Fiscal Year (This equates to 2,677 full-time equivalent employees)
- Manages over 2,800 buildings of various age, construction, use and lifecycle statewide (2.9 million square feet of building space) with 300+ buildings where DNR employees work
- Manage over 5,000 pieces of fleet equipment made up of approximately 1,600 on-road vehicles, 1,700 off-road vehicles, and 1,800 trailers and attachments
- Coordinate with MN.IT Services @DNR to host 120 business-enhancing information technology applications for DNR
- Provide support for the DNR website which had over 80 million web pages viewed in FY16
- Managed over 546,000 total public contacts in FY15 at the DNR Information Center including calls, emails, walk-ins, guard desk check-ins, brochure distribution and mailings

PURPOSE & CONTEXT

We support and provide administrative leadership to the Department of Natural Resources (DNR). We work with Minnesotans to create a better future for our state. We use the best available science to make informed decisions and deliver conservation services in partnership with others. We ensure that our mission is carried out in an integrated and efficient manner through leadership and services.

We are focused on operational excellence and continuous improvement by maintaining an agency-wide performance system and focusing on operational efficiencies. This effort results in better conservation service delivery, improved health and safety of Minnesotans, and a new generation of conservation leaders.

The budget reflects the agency investment in IT services provided by MN.IT @ DNR. Services extend outside of the organization and benefit other units of government, businesses, conservation partners, the public and others for outreach, recreation, and other natural resources purposes.

Services are funded through internal billing mechanisms such as professional services, utilization rates, and approved costs allocation methods.

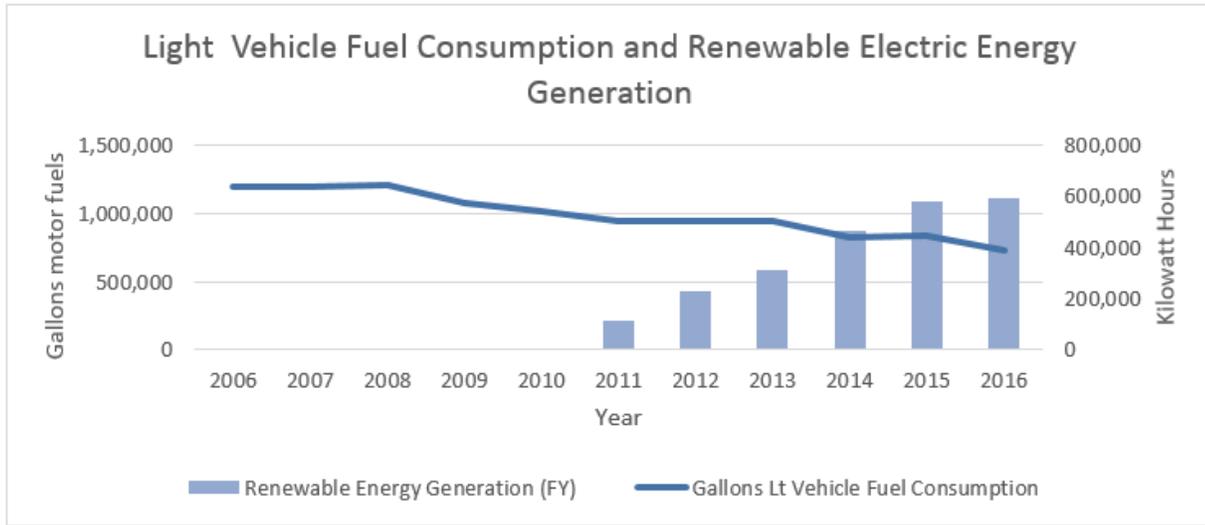

SERVICES PROVIDED

We support the agency’s operations in the following ways.

- We provide administrative leadership and direction for the department, government relations management, and management of regulatory activities, including business services as set forth in Minnesota statute.
- We support staff through human resources services including labor relations, ethics, employee development, payroll and hiring services.
- We manage safety, emergency preparedness and disaster response (non-fire emergency).
- We maintain fleet, buildings, and infrastructure that support our conservation mission.
- We administer financial operations and biennial budget processes for the department’s critical functions including revenues, expenditures, internal audit and procurement services.
- We manage pass-through grants for the Outdoor Heritage fund and Environment and Natural Resources Trust fund.
- We utilize policy and planning services to ensure our operations are coordinated to achieve priorities.
- We engage the public through communication services that build staff and public awareness, trust, and support through clear and transparent plain language.
- We provide leadership and management for IT services that support our daily activities.
- We provide engineering and architectural services for the department.
- We provide legal support for our programs.

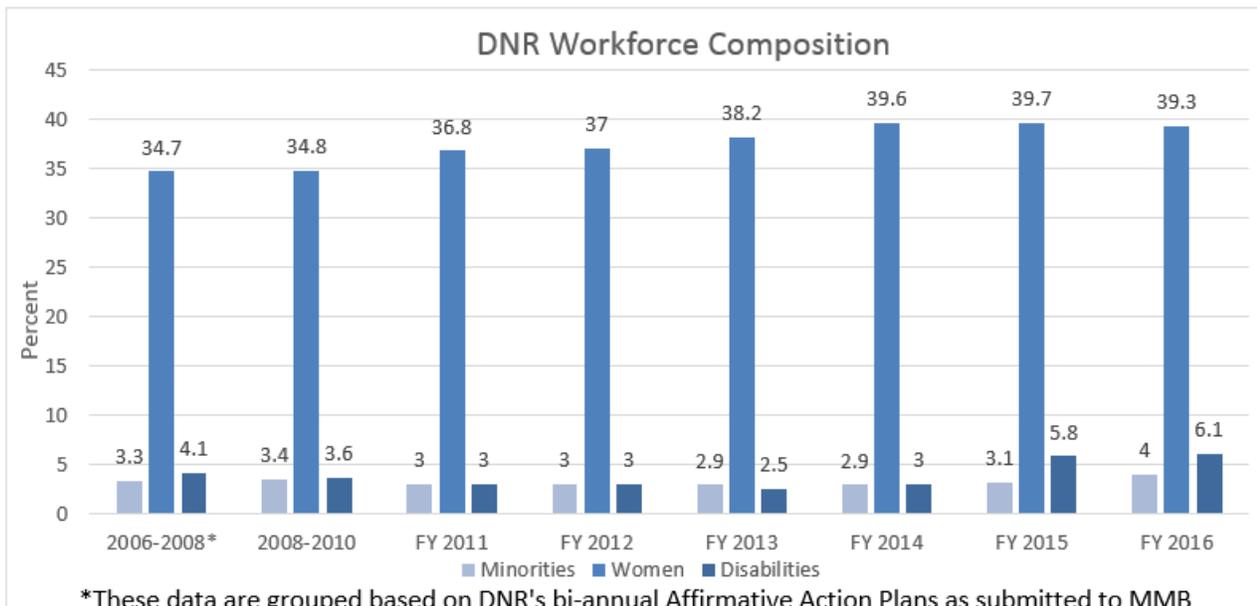

RESULTS

Results Performance Measure: Light vehicle fuel consumption and renewable energy generation. This chart shows an increase in the amount of renewable energy generated by our renewable energy systems and an overall decrease in light vehicle fuel consumption. Cutting overall energy use and increasing the use of renewables is a key agency priority.

*A new fleet data system was implemented part way through FY12, so data is incomplete or not available for that year.

Quantity Performance Measure: DNR Workforce Composition. This chart demonstrates our commitment to diversifying the makeup of our workforce to better reflect the demographics of Minnesota citizens. Many efforts are being utilized to recruit and retain qualified applicants who represent historically underrepresented groups. Our outreach efforts emphasize STEM (science, technology, engineering and math) career areas which are in high demand among all units of government on a local and national level.

The legal authority for the Operations Division comes from the Minnesota Constitution and following Minnesota Statutes and Minnesota Constitution:

Program: Pass Through Funds
Activity: Pass Through Funds

AT A GLANCE

- Approximately \$31.5 million each year to counties for Payment in Lieu of taxes
- \$8.6 million in Indian tribe treaty payments in FY16
- Manage roughly 200 grant contracts totaling more than \$325 million of Environmental Trust and Outdoor Heritage Legacy funds in FY17
- Provide \$320,000 to the Duluth and Como Zoos each year

PURPOSE & CONTEXT

DNR “pass-through funds” includes funds that are directed to non-state entities by statute, law or treaty. Since we do not determine who receives the funds and cannot use them for our own operations, these funds are commonly referred to as “pass through” funds.

We are responsible for being fiscal stewards of these funds. To this end, we establish sound business management practices that are consistent with state law, statewide grant management policies, and internal policies.

The financial activity in this budget activity does not include the management of the pass through dollars. The financing relating to managing these dollars occurs in the division that serves as the lead on the specific dollars.

Because of the nature of these dollars, we cannot use them to directly advance our mission. Recipients of these funds, however, are commonly our partners in promoting and advancing the broader goals of protecting and preserving the state’s natural resources. Pass through funds include:

- Payment in Lieu of Taxes (PILT);
- Treaty payments;
- Environmental and Natural Resource Trust Fund grants to third parties;
- Outdoor Heritage Grants to third parties; and
- Lottery-in-Lieu grants to the Duluth and Como Zoos.

SERVICES PROVIDED

We provide approximately \$31.5 million annually for Payments in Lieu of Taxes (PILT). PILT is a local government aid payment made by the state to counties for tax-exempt natural resource lands according to Minnesota statutes 477A.10-14 and 17. Most of the payments are for state-owned land and school trust land that is administered by the DNR and for county-administered tax forfeited land.

We make payments of roughly \$8.6 million each year to tribes in accordance with the Leech Lake Band and the 1854 Treaty agreements. According to MS 97A.151 subd. 4 and 97A.155 subd. 1, the Leech Lake Band receives 5 percent of specific Game and Fish proceeds. Per MS 97A.157 subd. 2 and the 1854 treaty, the Grand Portage Band and Bois Forte Band receive \$1.6 million annually plus additional funds if the payment to the Leech Lake Band exceeded \$1.5 million in the previous fiscal year. The additional payment is equal to the amount in excess of \$1.5 million.

We manage approximately 200 grants a year totaling over \$325 million dollars to third party recipients identified by the legislature. These grants come out of the Environmental and Natural Resources Trust (Trust) and the Outdoor Heritage (OHF) Funds. The purpose of the Trust funds are to maintain and enhance Minnesota’s environmental and natural resources. The purpose of the OHF is to restore, protect, and enhance wetlands, prairies, forests, and habitat for fish, game, and wildlife and that prevent forest fragmentation, encourage forest consolidation, and expand restored native prairie.

RESULTS

Quantity Measure: Total pass through dollars each year

We provide responsible management for all dollars that we are legally responsible for providing to non-state entities. The table below shows the amount that has been provided in the recent past.

TOTAL AMOUNT OF PASS THROUGH FUNDS
(by year)

2012	2013	2014	2015	2016
77,536,444	87,403,291	94,027,004	111,764,454	105,590,963

The legal authority for the grants management process comes from M.S. 16B.98 (<https://www.revisor.mn.gov/statutes/?id=16B.98>).

FY 2018-19 Federal Funds Summary

(Dollars in Thousands)

Federal Agency and CFDA #	Federal Award Name and Brief Purpose	New Grant	FY2016 Actuals	FY2017 Budget	FY2018 Base	FY2019 Base	Required State Match or MOE?	FTEs
U.S. Geological Survey, 15.808	National Park Service Vegetation Mapping Inventory Program-Accuracy assessment of Great Smoky Mountain National Park vegetation map	New	\$8	\$10	\$25	\$25		0.1
U.S. Fish and Wildlife Service, 15.608	Fed Agreements for Invasives-Implementation of state plan for invasive species prevention, research, and monitoring.		\$49	\$145	\$0	\$0		0.2
National Oceanic and Atmospheric Administration, 11.419	Coastal Zone Management-Program requires a balance between economic development and resource protection within the coastal zone. Projects must preserve, protect, develop, and where possible, restore and enhance coastal resources.		\$988	\$1,126	\$995	\$995	State Match Required	4.5
Federal Emergency Management Agency, 97.045	Cooperating Technical Partners-Increase local involvement in the production, development, and maintenance of Digital Flood Insurance Maps (DFIRMS) and develop non-regulatory products to help local governments reduce flood risk		\$382	\$600	\$600	\$600		2.8
Federal Emergency Management Agency, 97.023	Community Assistance Program-State Support Services Element-Provide technical assistance to National Flood Insurance. Program communities to monitor and evaluate performance of floodplain management activities.		\$151	\$152	\$152	\$152	State Match Required	1
Dept. of Homeland Security, 97.041	National Dam Safety Program-To strengthen and improve the state dam safety program.		\$144	\$151	\$150	\$150	Maintenance of Effort Required	1.5

Federal Agency and CFDA #	Federal Award Name and Brief Purpose	New Grant	FY2016 Actuals	FY2017 Budget	FY2018 Base	FY2019 Base	Required State Match or MOE?	FTEs
U.S. Fish and Wildlife Service, 15.662	Great Lakes Restoration Initiative- To protect and restore the Great Lakes by preventing and controlling invasive species, reducing nutrient runoff, and restoring habitat to protect native species.		\$427	\$923	\$600	\$600		7.7
U.S. Fish and Wildlife Service, 15.657	White Nose Syndrome- Monitor bat populations for the occurrence of white nose syndrome and educate the public about the disease.		\$42	\$100	\$100	\$100		0.3
U.S. Fish and Wildlife Service, 15.660	Endangered Species Candidate Conservation Action- Coordinated conservation of monarch butterfly and native pollinators		\$61	\$5	\$10	\$10		0.4
U.S. Fish and Wildlife Service, 15.634	State Wildlife Grants- Implement, coordinate, and monitor implementation of the state wildlife action plan to benefit species of greatest conservation need.		\$1,170	\$1,100	\$1,100	\$1,100	State Match Required	9.6
U.S. Fish and Wildlife Service, 15.634	Comprehensive Conservation Plan- Coordinate and monitor state wildlife.		\$345	\$400	\$400	\$400	State Match Required	1.6
U.S. Fish and Wildlife Service, 15.669	U.S. Fish and Wildlife Services Landscape Conservation Cooperative-Address priority concerns for fish, wildlife, and plants.	New	\$0	\$100	\$100	\$100	State Match Required	
U.S. Environmental Protection Agency (EPA), 66.461	EWR US EPA Agreement (wetlands program development grant)- Pass-through grant under a cooperative agreement with Minnesota Pollution Control Agency for wetland monitoring.		\$0	\$100	\$100	\$100	State Match Required	
Dept. of Interior, Fish and Wildlife Service, 15.615	EWR Endangered Species Reimbursement- Research & monitoring to support endangered species recovery.		\$0	\$100	\$102	\$100	State Match Required	
U.S. Geological Survey, 15.978	Long Term Resource Monitoring- Monitor long-term trends of water quality, aquatic vegetation, & fish on Pool 4 of the Mississippi River; analyze & summarize the data and provide that information to decision makers.		\$514	\$604	\$650	\$660		4

Federal Agency and CFDA #	Federal Award Name and Brief Purpose	New Grant	FY2016 Actuals	FY2017 Budget	FY2018 Base	FY2019 Base	Required State Match or MOE?	FTEs
Defense/ National Guard Bureau, 12.401	Army Compatible Use Buffer Zone- Protect lands surrounding Camp Ripley from development & other encroachment that would impair the camp's function. This is achieved through DNR fee title & conservation easement acquisition from willing land owners.		\$250	\$0	\$0	\$0	State Match Required	
Environmental Protection Agency, Office of the Administrator, 66.700	Fed Agreements Pesticide Enforcement- Monitor on behalf of the USDA the application of pesticides to aquatic systems in MN to ensure that products are used appropriately and safely		\$0	\$0	\$73	\$0		
Commerce/ National Oceanic and Atmospheric Administration, 11.407	Lake Superior IPA- Work with statistical and modeling experts at the Quantitative Fisheries Center at Michigan State University to provide research, outreach services, and a teaching program		\$0	\$0	\$68	\$0		
	Ecological and Water Resources Total		\$4,531	\$5,617	\$5,226	\$5,093		33.7
Dept. of Agriculture, U.S. Forest Service, 10.664	Volunteer Fire Department Assistance- Grants to local volunteer fire departments for training, personal protective equipment, and equipment for wildfire support.		\$247	\$288	\$250	\$250	State Match Required	
Dept. of Agriculture, U.S. Forest Service, 10.680	Forest Health Management- Forest Health Core Funding, Off-Plot, Canker, and Monitoring		\$221	\$263	\$225	\$225	State Match Required	0.7
Dept. of Agriculture, U.S. Forest Service, 10.680	Forest Health Management Protection and Treatment- Prevention and treatment of invasive species.	New	\$0	\$61	\$36	\$0	State Match Required	
Dept. of Agriculture, U.S. Forest Service, 10.664	Private Forest Management Stewardship (Competitive Grants)- Promote and enable the long-term active management of non-industrial private and other non-federal forest land (Family Owners, Pine River, Master Woodland, Teaching).	New	\$149	\$100	\$355	\$355	State Match Required	

Federal Agency and CFDA #	Federal Award Name and Brief Purpose	New Grant	FY2016 Actuals	FY2017 Budget	FY2018 Base	FY2019 Base	Required State Match or MOE?	FTEs
Dept. of Agriculture, U.S. Forest Service, 10.678	Private Forest Management Stewardship- Promote and enable the long-term active management of non-industrial private and other non-federal forest land		\$400	\$210	\$350	\$450	State Match Required	3.9
Dept. of Agriculture, U.S. Forest Service, 10.664	Cooperative Fire Protection-State Fire Assistance- The State Fire Assistance program provides financial, technical, and related assistance for fire prevention, training, and pre-suppression activities.		\$524	\$510	\$550	\$550	State Match Required	1.3
Dept. of Agriculture, U.S. Forest Service, 10.664	Wildfire Risk Reduction-The Firewise program provides information and education targeting prevention and mitigation in the Wildland Urban interface.		\$627	\$625	\$400	\$300	State Match Required	1
Dept. of Agriculture, U.S. Forest Service, 10.675	Urban and Community Forestry Program- The focus of this program is to improve the protection and management of community forests and expand the resource base by building the capacity of local programs and private vendors across the state.		\$398	\$300	\$300	\$350	State Match Required	0.9
Dept. of Agriculture, U.S. Forest Service, 10.678	Conservation Reserve Program & Equip Grant- This program reserves highly eroded cropland acres and establishes more suitable covers to promote other resource values. These values include improved air and water quality and wildlife habitat.		\$205	\$1,777	\$350	\$350		1.6
Dept. of Agriculture, U.S. Forest Service, 10.676	Forest Legacy- This program contracts specific acquisition activities and/or provides a portion of salaries for employees involved in day-to-day administration of the program.		\$39	\$86	\$56	\$40	State Match Required	0.3

Federal Agency and CFDA #	Federal Award Name and Brief Purpose	New Grant	FY2016 Actuals	FY2017 Budget	FY2018 Base	FY2019 Base	Required State Match or MOE?	FTEs
Dept. of Agriculture, U.S. Forest Service, 10.664	Landscape Stewardship-The Minnesota Forest Resources Council Landscape Grant increases private forest management in a collaborative manner by addressing regionally significant forest management concerns and/or opportunities.	New	\$120	\$107	\$100	\$134	State Match Required	
Dept. of Agriculture, Forest Service, 10.674	State Wood Energy Team (SWET) – MN Woody Biomass Thermal Energy Team. SWET strives to implement commercially available wood energy systems by strategically identifying businesses and government facilities using high cost energy.		\$153	\$150	\$30	\$0	State Match Required	.3
Dept of Agriculture, Forest Service, 10.664	FIA FFY11-077- This program collaborates with Northern Research Station in completing the Forest Inventory and Analysis Project in an effort to report on the health of Minnesota's forests		\$476	\$4	\$0	\$0	State Match Required	
	Forestry Total		\$3,559	\$4,481	\$3,002	\$3,004		10
Commerce/ National Oceanic and Atmospheric Administration, 11.419	Coastal Zone Management, NOAA Yr. 5- Coastal Zone Management, program requires a balance between economic development and resource protection within the coastal zone. Projects must preserve, protect, develop, and where possible, restore and enhance coastal resources		\$0	\$17	\$0	\$0		
U.S. Dept. of Transportation, 20.205	American Recovery and Reinvestment Act Root River Project- Resurfaced the Root River Trail		\$0	\$13	\$0	\$0		
	Budget Activity: Parks and Trails Total		\$0	\$30	\$0	\$0		0

Federal Agency and CFDA #	Federal Award Name and Brief Purpose	New Grant	FY2016 Actuals	FY2017 Budget	FY2018 Base	FY2019 Base	Required State Match or MOE?	FTEs
U.S. Fish and Wildlife Service, 15.616	Clean Vessel Act- The Clean Vessel Act Grant Program (CVA) provides grant funds to the states, the District of Columbia and insular areas for the construction, renovation, operation, and maintenance of pump out stations and waste reception facilities for recreational boaters and also for educational programs that inform boaters of the importance of proper disposal of their sewage		\$0	\$200	\$200	\$200	State Match Required	
Federal Highway Administration, 20.219	Federal Recreation Trail Program (FRTTP)- Provides funds to the States to develop and maintain recreational trails and trail-related facilities for both non-motorized, motorized and diversified recreational trail uses.		\$3,935	\$2,500	\$2,500	\$2,500	State Match and Maintenance of Effort Required	0.7
U.S. Fish and Wildlife Service, 15.622	Boating Infrastructure Grant Program (BIG)- The Boating Infrastructure Grant Program (BIG) provides grant funds to the states, the District of Columbia and insular areas to construct, renovate, and maintain tie-up facilities with features for transient boaters in vessels 26 feet or more in length, and to produce and distribute information and educational materials about the program.		\$100	\$200	\$200	\$200	State Match Required	
Department of Homeland Security- United States Coast Guard, 97.012	Boating Safety Financial Assistance- States that meet certain minimum USCG program standards (including MN) are automatically eligible for a Recreational Boating Safety Grant. MNDNR Parks and Trails division administers the grant and disperses funds for a variety of boat and water safety purposes.		\$2,798	\$3,600	\$3,700	\$3,700	State Match Required	6
	Budget Activity: Community Partnerships Total		\$6,833	\$6,500	\$6,600	\$6,600		6.7
	Parks and Trails Total		\$6,833	\$6,530	\$6,600	\$6,600		6.7

Federal Agency and CFDA #	Federal Award Name and Brief Purpose	New Grant	FY2016 Actuals	FY2017 Budget	FY2018 Base	FY2019 Base	Required State Match or MOE?	FTEs
U.S Fish and Wildlife Service, 15.608	National Fish Habitat Partnership-Fish Passage at Crane Lake project	New	\$0	\$25	\$10	\$0	State Match Required	
Department of Agriculture (Natural Resources Conservation Service), 10.093	Voluntary Public Access & Habitat Incentive Program (VPA-HIP)		\$42	\$450	\$927	\$328		0.2
Environmental Protection Agency, 66.469	Great Lakes Restoration Initiative-Habitat work on several sites in the St. Louis River Estuary, which includes long-term monitoring,	New	\$0	\$400	\$3,275	\$200		
Environmental Protection Agency, 66.469	St. Louis River Area of Concern Remediation to Restoration Support Projects-Knowlton Creek: Stream restoration of Knowlton Creek to work toward St. Louis River Area of Concern delisting		\$0	\$700	\$0	\$0		
U.S. Fish and Wildlife Service, 15.615	Ecological Services Program-Native prairie acquisition to provide critical habitat for Species of Greatest Conservation Need.	New	\$0	\$10	\$300	\$10	State Match Required	
U.S. Fish and Wildlife Service, 15.637	Prairie Pothole Joint Venture-Water control structure inventory and assessment.	New	\$0	\$30	\$30	\$0		
U.S. Fish and Wildlife Service, 15.657	Cooperative Recovery Initiative- Habitat improvement for the endangered Topeka Shiner.	New	\$36	\$0	\$100	\$10	State Match Required	
Dept of Commerce, National Oceanic and Atmospheric Administration, 11.407	Inter-jurisdictional Fisheries Act- Work with statistical and modeling experts at the Quantitative Fisheries Center (QFC) at Michigan State University to provide quantitative methods and models for fish community and population dynamics		\$4	\$40	\$30	\$20		
Dept of Interior, Fish and Wildlife Service, 15.608	Midwest Glacial Lakes Partnership- Refine data models on a subset of managed fish lakes in 8 states for habitat quality and protection potential		\$8	\$0	\$0	\$0		
U.S. Fish and Wildlife Service, 15.623	North American Wetlands Conservation Act- Wetland restoration and enhancement	New	\$0	\$0	\$100	\$200	State Match Required	1

	Federal Fund – DNR Total		\$15,518	\$20,578	\$24,798	\$20,196		53

Narrative:

Federal funds are accepted at the DNR when they support the mission, strategies, goals and objectives found in the DNR's Strategic Conservation Agenda. The Federal Funds Summary Table below lists anticipated revenues for incoming federal funds, their use, number of FTE positions needed to implement, and whether funds are new and require a state match and/or maintenance of effort. Federal funds include discretionary continuing programs, funds based on funding formulas, competitive grants, and project grants.

Federal Fund accounts include:

1. Incoming federal grant or federal cooperative agreement revenue deposited directly to a federal (3000 fund) account.
2. Federal grant funds awarded to the DNR that are then passed-through to another entity.

Outgoing grants funded from federal dollars are estimated throughout the spending period of the grant, rather than estimated in the first year of the grant award. Estimates are based on the best federal funding information available at the time this report is prepared. Most new federal awards that impact state fiscal years 2016-2017 have not yet been confirmed. Therefore, we used historical trend information from recent years to estimate future revenues, as well as any knowledge of changing funding levels or trends that may impact future awards.

Specific funding level changes or trends by division include:

- Parks and Trails Division: Anticipating an extra \$500,000 a year in federal expenditures for our Boating Safety Financial Assistance Award this biennium.
- Enforcement Division: Currently does not anticipate receiving any new federal awards in the upcoming biennium. Enforcement had one federal award for the previous biennium. If Enforcement receives new, unanticipated awards, the DNR will seek spending authority through the LAC process.

Major state funding is required related to the federal awards listed in this summary as most grants are implemented on a reimbursement basis and may require a state match or a maintenance of effort.

DNR Grants Funding Detail

(Dollars in Thousands)

Program Name Federal or State or Both (citation)	Purpose	Recipient Type(s) Eligibility Criteria	FY 2016	FY 2017
Firewise Community Mitigation-10.664	Firewise is a national program that focuses on creating safe access and defensible space for homes in the wildland urban interface so they can survive the rampages of wildfire. In Minnesota, the Firewise Program provides funds to communities for planning and mitigation activities. Grants require a 50/50 cash or in-kind match.	Fire department district, organized township, city, or county	\$409,300.00	\$400,000.00
Federal Recreational Trail-20.219	Encourage the maintenance and development of motorized, non-motorized, and diversified trails by providing funding assistance.	Sponsored by a unit of government, preferably in cooperation with a local trail organization	\$1,684,947.31	\$2,500,000.00
Supplemental Boating Safety Patrol-97.012	Assist counties, through their sheriffs' offices, in funding additional boating safety patrol hours on lakes and rivers in an effort to reduce accidents.	Counties through the sheriff's offices	\$316,700.00	\$316,700.00
Supplemental Boating Safety Equipment and Aids to Navigation-97.012	Assist counties, through their sheriffs' offices, in funding boating safety equipment and aids to navigation to help carry out their legislatively-mandated boating safety duties and in order to reduce deaths, injuries, and property damage on state waters.	Counties participating in the state boat and water safety grant program, through their sheriff's offices	\$481,703.00	\$488,721.00
Minnesota's Lake Superior Coastal Program-11.419	Preserve, protect, develop, and, where possible, restore or enhance coastal resources along Minnesota's North Shore of Lake Superior.	Regional planning agencies; state agencies; non-profit agencies; colleges and universities; public school districts in the coastal area; conservation districts; port authorities; tribal governments; joint powers boards; sanitary sewer boards; cities, townships, and counties within the coastal area; area-wide agencies. Projects must be located within Minnesota's coastal area, which includes portions of Carlton, St. Louis, Lake and Cook Counties (maps available at www.mndnr.gov/mlscp)	\$334,000.00	\$637,000.00
Volunteer Fire Assistance Matching Grant Program-10.664	Primary objectives of the program are saving lives and protecting property in rural areas through providing financial and technical assistance.	Minnesota fire departments in cities or communities with populations under 10,000.	\$229,779.68	\$303,954.27

Program Name Federal or State or Both (citation)	Purpose	Recipient Type(s) Eligibility Criteria	FY 2016	FY 2017
National Outdoor Recreation Legacy Partnership Program-10.676	Create or reinvigorate parks and other outdoor recreation spaces located in jurisdictions delineated by the Census Bureau for the 2010 Census as comprising densely settled territory that contains 50,000 or more people.	State agencies, political subdivisions such as cities, counties, and special purpose districts such as park districts, and federally-recognized Indian tribes that are organized to govern themselves and perform the functions of a general purpose unit of government.	\$500,000.00	Unknown
Clean Vessel Act Grants-15.616	Encourage the development or improvement of marina sanitation facilities for boaters in order to maintain and improve water quality in public waters.	Public and private marinas	\$0.00	\$200,000.00
Boating Infrastructure Grants Program 15.622	Provide grants to State and Territories to construct, renovate, or maintain tie-up facilities for transient recreational vessels 26 feet or more in length	Townships, cities, etc.	\$200,000.00	\$200,000.00
State Wildlife Grants-15.634	Implement, coordinate, & monitor implementation of the state wildlife action plan to benefit species of greatest conservation need.	Individuals, organizations, state and local entities, colleges and universities; Funds available and eligibility varies by RFP offer. The project currently accepting proposals is for restoration on private land, the criteria are: They have to have a remnant prairie, that is restorable. They have to be within the project area. They have to have rare species on the site or the site looks like it would support rare species They have to be willing to sign a landowner agreement which essentially protects the site for 10 years. They have to be willing to let us back on the site to conduct follow-up management such as prescribed burning and additional surveys/monitoring.	\$5,454.00	\$65,000.00
Long Term Resource Monitoring (LTRM)-15.978	Monitor long-term trends of water quality, aquatic vegetation, & fish on Pool 4 of the Mississippi River; analyze & summarize the data and provide that information to decision makers.	Six LTRM Program field stations in the five Upper Mississippi River states	\$518,353.34	\$535,648.00
Outdoor Recreation	Increase and enhance outdoor recreation facilities in local and community parks throughout the state.	Cities, counties, and townships	\$206,000 State \$374,142 Federal	\$200,000 State \$831,023 Federal

Program Name Federal or State or Both (citation)	Purpose	Recipient Type(s) Eligibility Criteria	FY 2016	FY 2017
AIS (Aquatic Invasive Species) Public Awareness Projects	To help prevent the spread of aquatic invasive species (AIS), especially zebra mussels and spiny waterfleas, into Minnesota waters.	Lake associations, tribal organizations, coalitions of lake associations, local citizen groups, local units of government	\$0.00	\$0.00
AIS Control Projects	For the control of curly-leaf pondweed, Eurasian watermilfoil, and flowering rush using herbicides, mechanical control, or a combination of both to support projects that have received an Invasive Aquatic Plant Management Permit.	Lake associations, watershed districts, cities, and counties	\$200,000.00	\$200,000.00
Watercraft Access Inspections by DNR Staff	Intended to help prevent the spread of AIS, especially zebra mussels, into Minnesota waters by assisting local organizations that would like additional watercraft inspections at particular water accesses.	Lake associations, tribal organizations, coalitions of lake associations, local citizen groups, local units of government	\$57,216.00	\$60,000.00
Watercraft Access Inspections by Local Government Units	Intended to help prevent and curb the spread of AIS, especially zebra mussels, into Minnesota waters by assisting tribal and LGUs that are interested in implementing an AIS prevention program using authorized inspectors to work at water accesses in their area.	Tribal and local units of government such as conservation districts, cities, counties, and watershed districts	\$0.00	\$0.00
Conservation Partners Legacy (CPL) (M.L. 2016, Chapter 172, Article 1, Section 2)	Funds conservation projects that restore, enhance, or protect forests, wetlands, prairies, and habitat for fish, game, and wildlife in Minnesota.	Nonprofit organizations and government entities	\$7,029,500	\$7,660,000
Off-highway Vehicle (OHV) Safety Enforcement	Funding is to be used by counties to assist the state in OHV enforcement activities, including training local staff, holding ATV safety classes, and field enforcement activity.	All counties in Minnesota	\$509,927.76	\$510,072.24
Snowmobile Safety Enforcement	Funding is to be used by counties to assist the state in OHV enforcement activities, including training local staff, holding snowmobile safety classes, and field enforcement activity.	All counties in Minnesota	\$314,992.00	\$315,008.00
Local Trail Connections	Promote relatively short trail connections between where people live and desirable locations. Not to develop significant new trails.	Counties, cities, and townships	\$361,530.00	\$400,000.00
Regional Trail	Promote development of regionally significant trails outside the seven-county metropolitan area.	Counties, cities, and townships	\$200,000.00	\$200,000.00

Program Name Federal or State or Both (citation)	Purpose	Recipient Type(s) Eligibility Criteria	FY 2016	FY 2017
Off-highway Vehicle Trails Assistance	Facilitate development and maintenance of trails for use by all-terrain vehicles, off-highway motorcycles, and off-road vehicles at the initiative of enthusiast groups or clubs, with the support and participation of local government sponsors.	All-Terrain Vehicles (ATVs), Off-Highway Motorcycles (OHMs), and Off-Road Vehicles (ORVs) enthusiast groups or clubs with the support and participation of local government sponsors	\$1,155,312.32	\$1,500,000.00
Cross Country Ski Trail	Encourage the maintenance and development of cross country ski trails.	Counties, cities, townships, and private trail organizations sponsored by a local unit of government	\$277,118.06	\$285,000.00
Minnesota Snowmobile Trails Assistance	Creation and maintenance of locally initiated trails that were financially assisted by the state.	Local units of government	\$7,354,303.03	\$7,424,000.00
State Boat and Water Safety	Assist in funding boat and water safety programs carried out through the county sheriff's offices in order to reduce deaths, injuries, and property damage on state waters.	Counties through their sheriff's offices	\$1,082,000.00	\$1,082,000.00
Dam Safety (MS 103G.511; MS 103G.515)	Improve the safety and condition of publicly owned dams and water level control structures.	Cities, counties, townships, watershed districts	\$3,002,950.00	\$5,540,000.00
Flood Hazard Mitigation M.S. 103G.161	Provide financial and technical assistance to local governmental units for conducting flood damage reduction studies and for planning and implementing flood damage reduction measures.	Cities, counties, townships, watershed districts, watershed management organizations and lake improvement districts	\$34,871,000	\$10,000,000
Forest Stewardship Project - Healthy Forests for Healthy Water	Forest stewardship management planning assistance and cost share for forestry practices/projects for clean water protection	Nonindustrial private landowners who have 20-1,000 acres of land with 10 acres of woody vegetation after the plan has been implemented within targeted southeastern Minnesota watersheds		
Forest Stewardship Project - Tullibee Lake Watersheds	Forest stewardship management planning assistance for clean water protection	Nonindustrial private landowners who have 20-1,000 acres of land with 10 acres of woody vegetation after the plan has been implemented within the Tullibee Lake watershed		
Public Parks and Recreation Archery Range Rehabilitation Grants Program	Assist county, regional, city, recreation, and parks agencies in supporting Minnesota's growing interest in archery.	County, regional, or city public parks in need of new archery range development	\$0.00	\$0.00
Expedited Small Trap Range Grants (MS 84.026)	Increase shooting range capacity for youth trap shooters by providing matching funds to recreational shooting clubs open to public use.	Local recreational shooting clubs in Minnesota that allow public access to shooting and need to expand, improve, or update trap shooting ranges	\$679.10	\$166,894.00

Program Name Federal or State or Both (citation)	Purpose	Recipient Type(s) Eligibility Criteria	FY 2016	FY 2017
Large Trap Range Grants(MS 84.026)	Increase shooting range capacity for youth trap shooters by providing matching funds to recreational shooting clubs open to public use.	Local recreational shooting clubs in Minnesota that allow public access to shooting that need funds for larger trap shooting facility projects	\$518,595.00	\$504,991.00
Large Shooting Range Improvement Grants (MS 84.026, ML 2015 First Special Session, Ch 4, Art 3, Sec 3)	To increase shooting range capacity for Minnesota's shooters, by providing matching funds to recreational shooting clubs open for public use.	Local recreational shooting clubs in Minnesota that allow public access to shooting.	\$48,412.00	\$1,951,587.00
Improving Community Forests Through Citizen Engagement	A grant program supplying approximately \$400,000 to an estimated 8 to 12 Minnesota cities and towns to support urban and community forestry (planting new trees, creating and maintaining gravel tree beds, watering new trees, recruiting and training citizen volunteers, developing a citywide urban forestry plan, updating tree inventories, pruning trees, and conducting early detection of pests and disease presence in priority areas).	All political subdivisions of Minnesota as well as non-governmental organizations	\$400,000.00	\$0.00
Angler and Hunter Recruitment and Retention Grant Program	Help local groups support MN's angling and hunting heritage.	Must have a mission or educational purpose that supports hunter and angler recruitment and retention	\$193,000.00	\$130,000.00
Archery in the Schools	Introduces Minnesota students to archery by providing schools with the best equipment, training, and curriculum available at the lowest possible price. It is part of the National Archery in the Schools Program (NASP).	MN schools	\$25,342.00	\$32,000.00
Grant to Koronis Lake Association	For the purpose of removing and preventing aquatic invasive species	Legislatively named to the Koronis Lake Association	\$0.00	\$200,000.00
38			\$62,282,114.60	\$43,504,621.24
