

Planning, Research & Evaluation

Residential Foreclosures in Minnesota

Spring 2014

Introduction

In 2013, Minnesota’s foreclosure crisis subsided to near pre-recessionary levels. However, the crisis has destabilized the housing market in many parts of the state, and community recovery has not been level across all parts of the state. As part of its mission to finance affordable housing for low- and moderate-income households while fostering strong communities, Minnesota Housing established foreclosure prevention and community recovery as one of its strategic priorities. To monitor the evolving crisis, Minnesota Housing purchases data on the delinquency and foreclosure status of residential mortgages from CoreLogic. These data help Minnesota Housing and its partners target their prevention and recovery efforts and effectively use resources in the hardest hit areas.

The following report provides key findings about the current state of the foreclosure crisis in Minnesota. The first section provides information about statewide trends and the second section identifies foreclosure and delinquency hotspots around the state. Several maps accompany the discussion. Finally, the appendix includes a table that provides data for each residential zip code in the state.

Report Structure

- Current Statewide Trends 2
- High Need Areas – Foreclosure Hotspots 3
- Zip Code Maps 6
 - Map 1a – Real Estate Owned Loans (State) 7
 - Map 1b - Real Estate Owned Loans (Metro)..... 8
 - Map 2a - Loans in Foreclosure (State) 9
 - Map 2b - Loans in Foreclosure (Metro) 10
 - Map 3a - Loans in Delinquency (State) 11
 - Map 3b - Loans in Delinquency (Metro) 12
 - Map 4a – Annual Change in Composite Index (State) 13
 - Map 4b – Annual Change in Composite Index (Metro) 14
- Appendix A - Zip Code Tables - Index Scores 15

Current Statewide Trends

- Statewide (and nationwide) foreclosures are declining.
 - The total number of U.S. properties completing foreclosures and being repossessed by Lenders (Real Estate Owned, or REO), dropped by 27% between May 2013 and May 2014, to the lowest levels since July 2007.¹
 - Minnesota ranks 5th, lowest among states in the percentage of homes in foreclosure.² Nationwide, the share of mortgages in foreclosure is over three times the rate in Minnesota.
 - In Minnesota, sheriff sales are decreasing each year, but remain above the levels experienced before the foreclosure crisis. In 2013 there were nearly 12,000 sheriff sales, while in 2005 there were fewer than 7,000 sheriff sales. In the past year, sheriff sales dropped by 34%. As reported by HousingLink, this is the third consecutive year of double digit percentage declines.³
- The magnitude of delinquencies continues to decline but remain above historical standards.
 - The state's delinquency rate for residential mortgages increased significantly during the late 2000s. Between the fourth quarter of 2005 and the fourth quarter of 2009, the percentage of mortgages that were at least 60 days past due quadrupled from 1.10% to 4.71%.⁴ However, the delinquency rate has declined at a moderate rate since 2010, with a current rate (1st Quarter 2014) of 2.09%, the lowest rate since March 2008.
- The impact of unemployment on foreclosures is lessening as the state continues to recover from the Great Recession.
 - Minnesota's unemployment rate jumped from a pre-recession low of 3.9% in May of 2006 to a high of 8.3% in May of 2009. Since May 2009, the unemployment rate has trended downward to 4.6% in May of 2014.⁵
 - Many economists predict that unemployment will continue to trend lower over the next three years.⁶

¹ US Department of Housing and Urban Development, US Department of Treasury, *National Housing Scorecard*, May 2014; see: <http://portal.hud.gov/hudportal/documents/huddoc?id=HUDMayNatSC2014.pdf>

² CoreLogic National Foreclosure Report, May 2014.

³ HousingLink, 2013 Annual Foreclosures in Minnesota, February 2013.

⁴ Mortgage Bankers Association, *National Delinquency Survey*. The delinquency rate applies to loans that are at least 60 days past due but have not started the foreclosure process.

⁵ Minnesota Department of Employment and Economic Development, *Local Area Unemployment Statistics*, figures are seasonally adjusted.

⁶ The Federal Reserve Bank of Philadelphia surveyed 45 economic forecasters in the 1st quarter of 2014 and summarized their projections; see <http://www.phil.frb.org/research-and-data/real-time-center/survey-of-professional-forecasters/2014/survq114.cfm>. Nationally, the unemployment rate is expected to be 6.5% in 2014, 6.1% in 2015, 5.7% in 2016, and 5.5 in 2017.

High Need Areas – Foreclosure Hotspots

The foreclosure crisis has had a significant impact on some neighborhoods in Minnesota, while the impact has been much less extensive in others. Initially, the impact was the largest in the core neighborhoods of North Minneapolis and St. Paul's East Side, along with some communities north of the Twin Cities seven-county metropolitan area, particularly in Wright, Sherburne, and Isanti counties. As the foreclosure crisis has evolved over time and declined statewide, it became less concentrated in the center cities. While neighborhoods in Minneapolis and St. Paul still have a large number of foreclosed and REO (Real Estate Owned) properties relative to the state, the concentration of troubled loans in the two central cities is lower than it has been.

To show this information, the attached maps display data on each zip code's:

- REO rate (reflecting foreclosures that have happened),
- In foreclosure rate (reflecting foreclosures that are happening),
- Delinquency rate (reflecting foreclosures that may happen in the near future),⁷ and
- Change in the number of foreclosures from previous year (for zip codes that currently have a foreclosure rate above the statewide rate).

For each rate, there is a statewide map and a map of the Twin Cities metropolitan area. The rates are based on the number of residential first-lien loans in each category divided by the number of households in each zip code.⁸ For example, the delinquency rate is the number of loans in a zip code that are 90 or more days past due but not yet in foreclosure divided by the number of households in the zip code.

Because the data that Minnesota Housing purchases from CoreLogic is proprietary, Minnesota Housing cannot publish specific rates or numbers, but it can publish an index score. To compute the index score, each zip code's rate is divided by the statewide rate. Thus, the statewide rate is 100. If a zip code's rate is twice as high as the statewide rate, it has an index score of 200. If a zip code's rate is half the statewide rate, it has an index score of 50. The index scores show "hot spots" for problem loans.

⁷ A loan is in foreclosure when legal documents have been filed to start the foreclosure process but a sheriff sale has not occurred. Seriously delinquent loans are mortgages delinquent by 90 days or more. An REO property is owned by the lender after the sheriff sale.

⁸ Ideally, the rates should be calculated as the number of loans in each category divided by the number of residential parcels in each zip code. Typically, there is one first-lien loan on each residential parcel, and one foreclosure affects one parcel. However, parcel data by zip code is not available. As a proxy for residential parcels, Minnesota Housing used the number of households in each zip code. Zip codes with a higher proportion of multifamily housing (often in urban areas) have proportionally more households per residential parcel than other zip codes. Thus, the rates used in this report (based on problem loans per household) understate the delinquency and foreclosure problem in zip codes with a higher proportion of multifamily housing. (The denominator of the calculation is disproportionately high.) The number of 2010 households in each zip code comes from the 2010 decennial US Census.

To account for the uncertainty in the resulting rates and index scores, Table 1 in the appendix provides rate index scores in 25 point increments, rather than specific figures. Specific numbers would reflect an inappropriate level of precision and accuracy.

As shown in the maps:

- **Areas with high REO rates can be found across the state.** Very high REO rates (2.5 times the statewide rate) are found in small pockets of the Twin Cities seven-county metropolitan area including Minneapolis, East Bethel, and Mayer. Counties north of the Twin Cities and into central Minnesota form the largest concentrations of REO properties statewide, including Chisago, Isanti, Pine, and Sherburne Counties. In other regions of Greater Minnesota, smaller pockets of very high rates of REOs are found scattered throughout the state. (See Maps 1a and 1b.)
- **The geographic distributions of the highest rates of loans in foreclosure are clustered in communities developed during the peak of the housing boom, but also continue to be prevalent in the core cities in the metro.** The geographic distribution of loans in foreclosure follows a similar pattern to the REO rate, but pockets of very high foreclosure rates (2.5 times greater than the statewide rate) are not as widely dispersed. The western and northern parts of the state have very few pockets of higher rates. Concentrations of loans in foreclosure are found most predominantly in Chisago, Isanti, Pine, and Sherburne Counties in Minnesota. There are other smaller pockets around the state. (See Maps 2a and 2b.)
- **The geographic distribution of the highest delinquency rates is even more concentrated than the distribution of loans in foreclosure.** The highest rates are concentrated in Sherburne and Isanti counties in Greater Minnesota and in Brooklyn Park and Minneapolis in the Twin Cities Metro. (See maps 3a and 3b.)
- **For some areas with high rates of troubled loans, foreclosures are still on the rise, relative to an overall decline in foreclosures statewide.** For areas that have currently high rates of troubled loans (1.5 times greater than the state), some experienced declines in the rate of troubled loans since December 2012, while other areas have experienced increases. Areas with an increasing foreclosure problem relative to the state in the last year include:
 - Suburban Twin Cities Metropolitan communities of Brooklyn Park, Brooklyn Center, Bethel, East Bethel, Elko New Market, and Lakeland Shores,
 - Several communities in counties surrounding the Twin Cities seven-county metropolitan area including Sherburne, Wright, Isanti, Mille Lacs, Rice and Sibley, and
 - Individual zip codes within St Louis, Crow Wing, Steele, and Olmsted Counties.

When assessing the maps and data, four key points need to be kept in mind:

- While some communities with a large proportion of foreclosures early in the crisis may have passed the peak of their crisis, the problems continue in these areas. These communities still need to recover from the destabilizing effects of all the foreclosures that have already occurred. The data in this report apply to the status of loans being serviced in December 2013. Previously foreclosed properties that are in the hands of a new homeowner or investor are no longer classified as foreclosed. Thus, the data does not completely capture the magnitude of the foreclosure crisis for communities that have already had a concentration of loans go completely through the foreclosure process.
- When assessing need, the foreclosure, delinquency, and REO rates are important, but the number of households that the high rate affects is also important. For example, foreclosure and REO index scores for zipcode 55412 (in North Minneapolis) are over 250. In addition, this zip code has over 8,000 households. In contrast, some of the other high score zip codes have less than 1,000 households. Table 1 in the appendix provides not only the index scores for each zip code but also the number of households.
- Some zip codes may show up as having a high delinquency or foreclosure rate because they have a small number of households. If a zip code has only a few hundred households, the addition of a foreclosure or two can have a dramatic effect on the foreclosure rate. To minimize this small zip code effect, the analysis excludes zip codes with fewer than 200 households. In the maps and tables, these zip codes are coded as having “incomplete data.”
- Specific neighborhoods within a zip code may have a very high rate of delinquencies and foreclosures even when the zip code has a lower index score. Parts of the zip code may have a very high rate, while other parts of the same zip code may have a very low rate, giving the zip code a lower index score overall. Thus, the zip-code index scores and maps do not identify all the high need areas around the state.

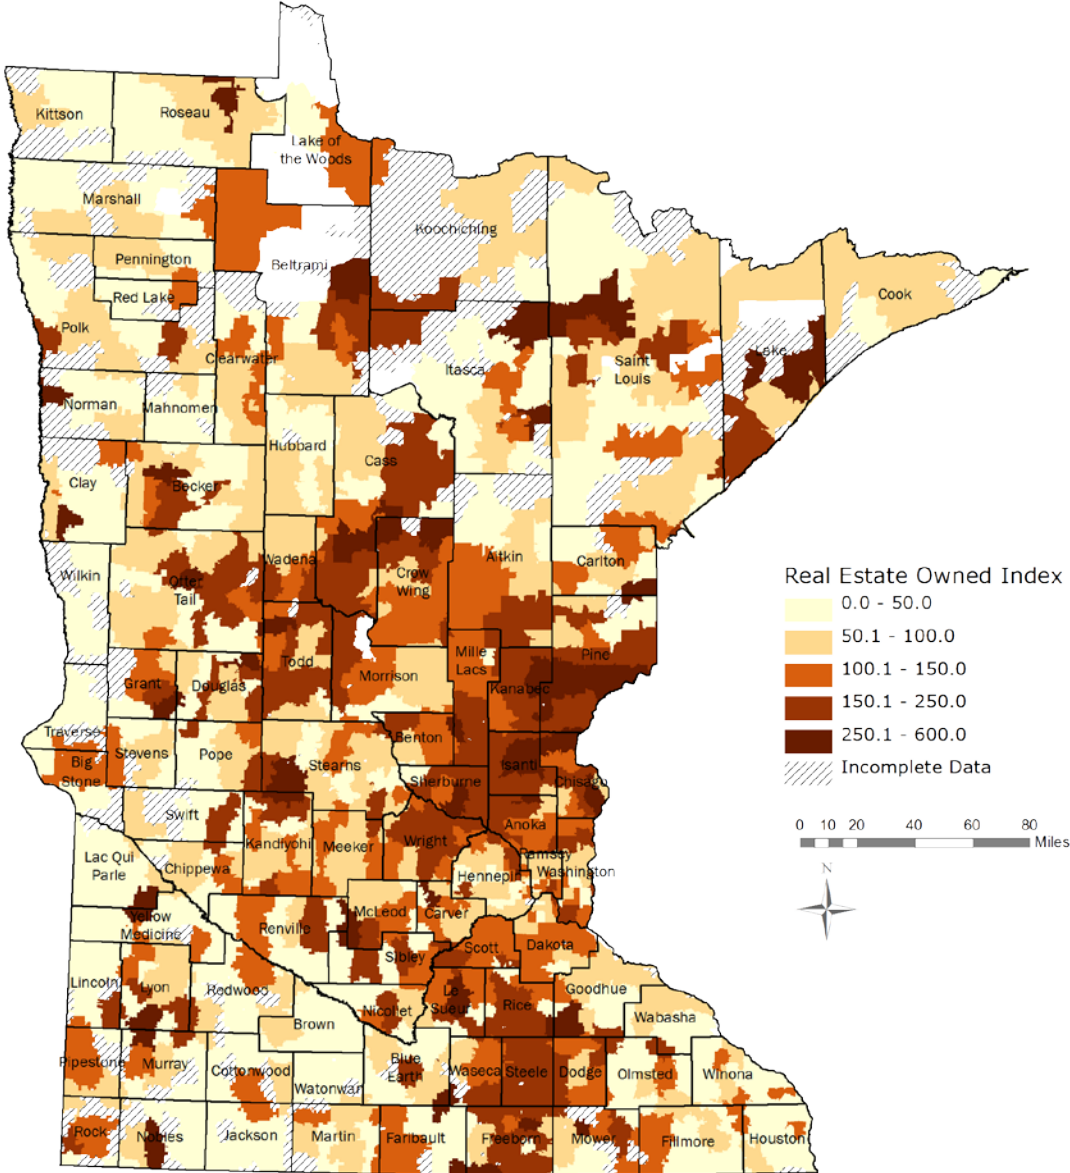

Minnesota Housing will continue to monitor the evolving foreclosure crisis in Minnesota.

Zip Code Maps

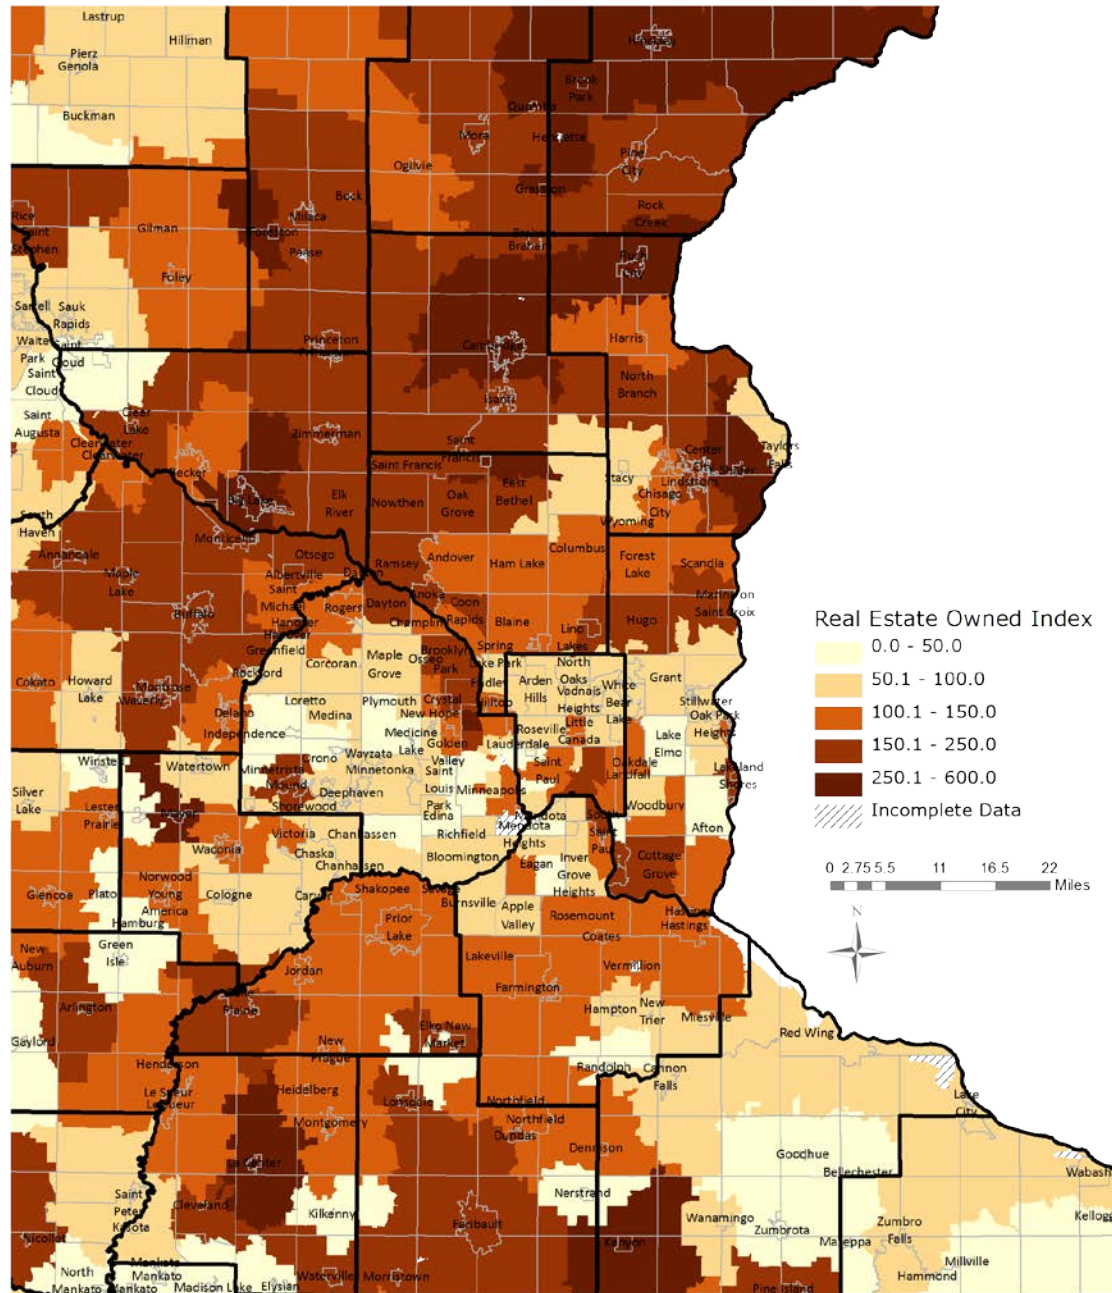

Map 1a – Real Estate Owned Loans (State)
Statewide-Rate: Index = 100
March 2014

Source: Minnesota Housing analysis of data from CoreLogic.
Notes: The index is based on each zip code’s REO rate – the number of loans that are in REO divided by the number of households in each zip code. Each zip code’s rate is divided by the statewide rate to compute the index score. An index score of 200 means the zip code’s rate is twice the state rate, while an index score of 50 means the zip code’s rate is half the state rate.

Map 1b - Real Estate Owned Loans (Metro)
Statewide-Rate: Index = 100
March 2014

Source: Minnesota Housing analysis of data from CoreLogic.

Notes: The index is based on each zip code’s REO rate – the number of loans that are in REO divided by the number of households in each zip code. Each zip code’s rate is divided by the statewide rate to compute the index score. An index score of 200 means the zip code’s rate is twice the state rate, while an index score of 50 means the zip code’s rate is half the state rate.

Map 2a - Loans in Foreclosure (State)
Statewide-Rate: Index = 100
March 2014

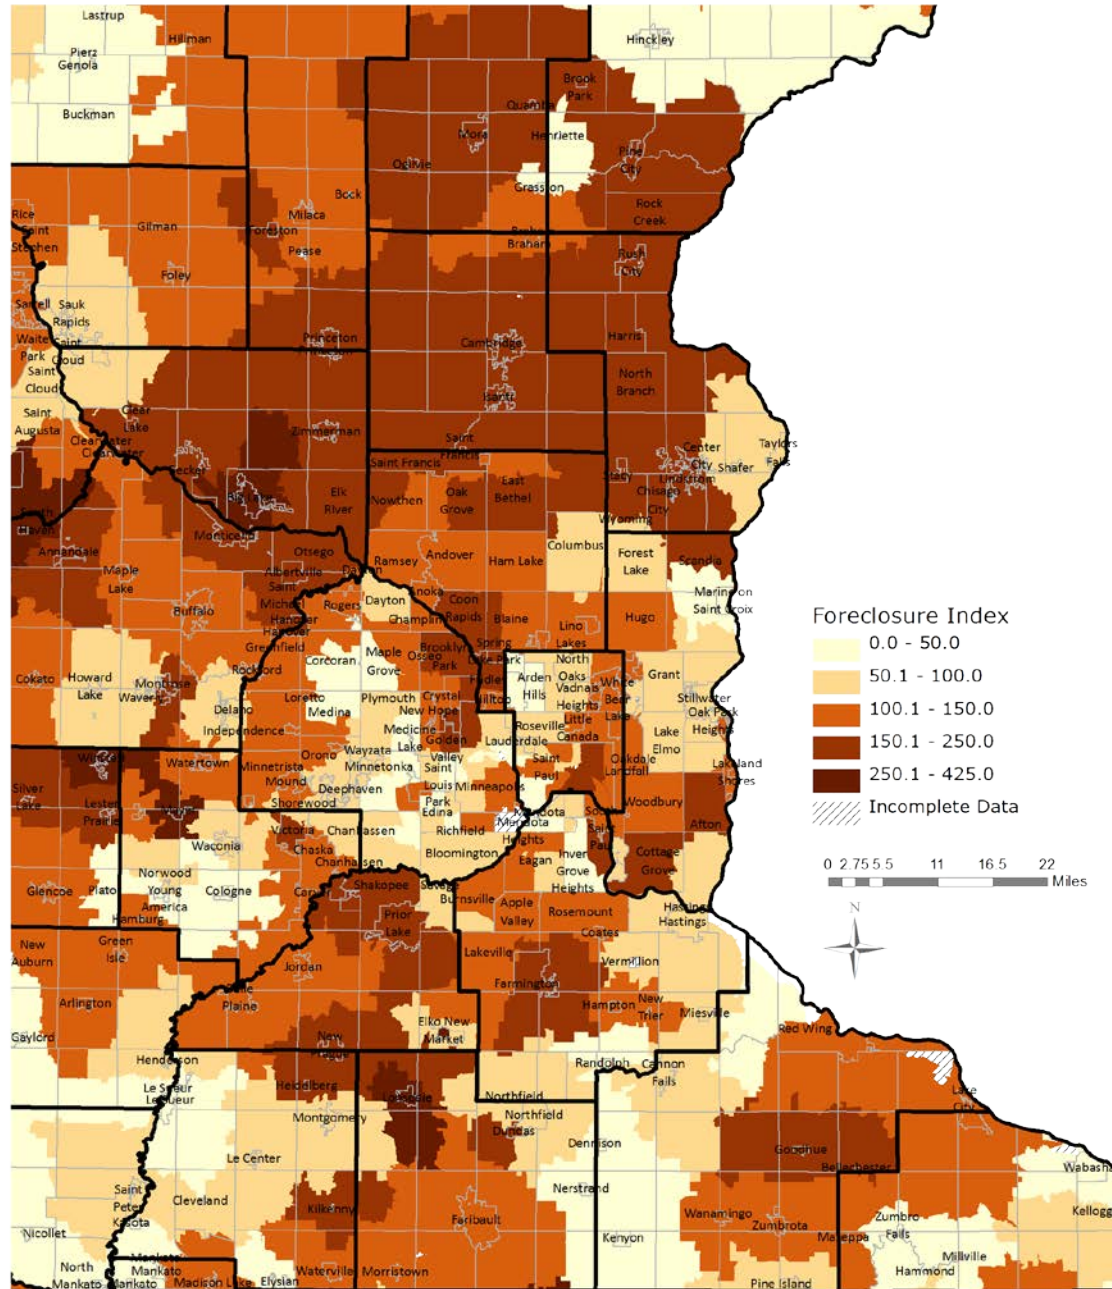

Source: Minnesota Housing analysis of data from CoreLogic.

Notes: The index is based on each zip code's foreclosure rate – the number of loans that are in foreclosure divided by the number of households in each zip code. Each zip code's rate is divided by the statewide rate to compute the index score. An index score of 200 means the zip code's rate is twice the state rate, while an index score of 50 means the zip code's rate is half the state rate.

Map 2b - Loans in Foreclosure (Metro)
Statewide-Rate: Index = 100
March 2014

Source: Minnesota Housing analysis of data from CoreLogic.

Notes: The index is based on each zip code’s foreclosure rate – the number of loans that are in foreclosure divided by the number of households in each zip code. Each zip code’s rate is divided by the statewide rate to compute the index score. An index score of 200 means the zip code’s rate is twice the state rate, while an index score of 50 means the zip code’s rate is half the state rate.

Map 3a - Loans in Delinquency (State)
Statewide-Rate: Index = 100
March 2014

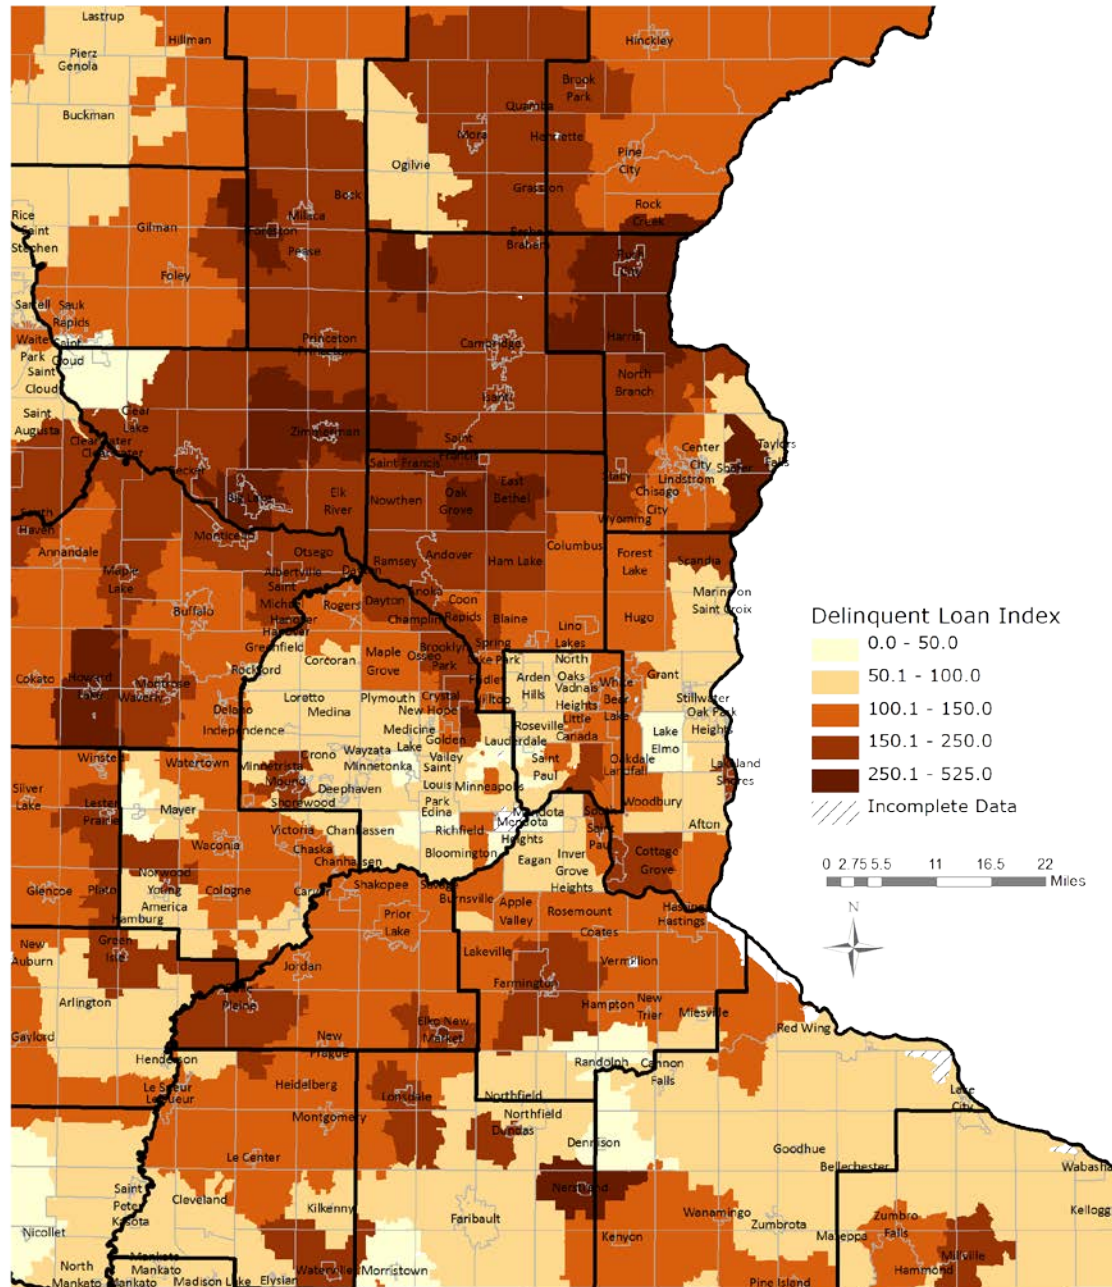

Source: Minnesota Housing analysis of data from CoreLogic.

Notes: The index is based on each zip code’s delinquency rate – the number of loans that are 90 or more days past due divided by the number of households in each zip code. Each zip code’s rate is divided by the statewide rate to compute the index score. An index score of 200 means the zip code’s rate is twice the state rate, while an index score of 50 means the zip code’s rate is half the state rate.

Map 3b - Loans in Delinquency (Metro)
Statewide-Rate: Index = 100
March 2014

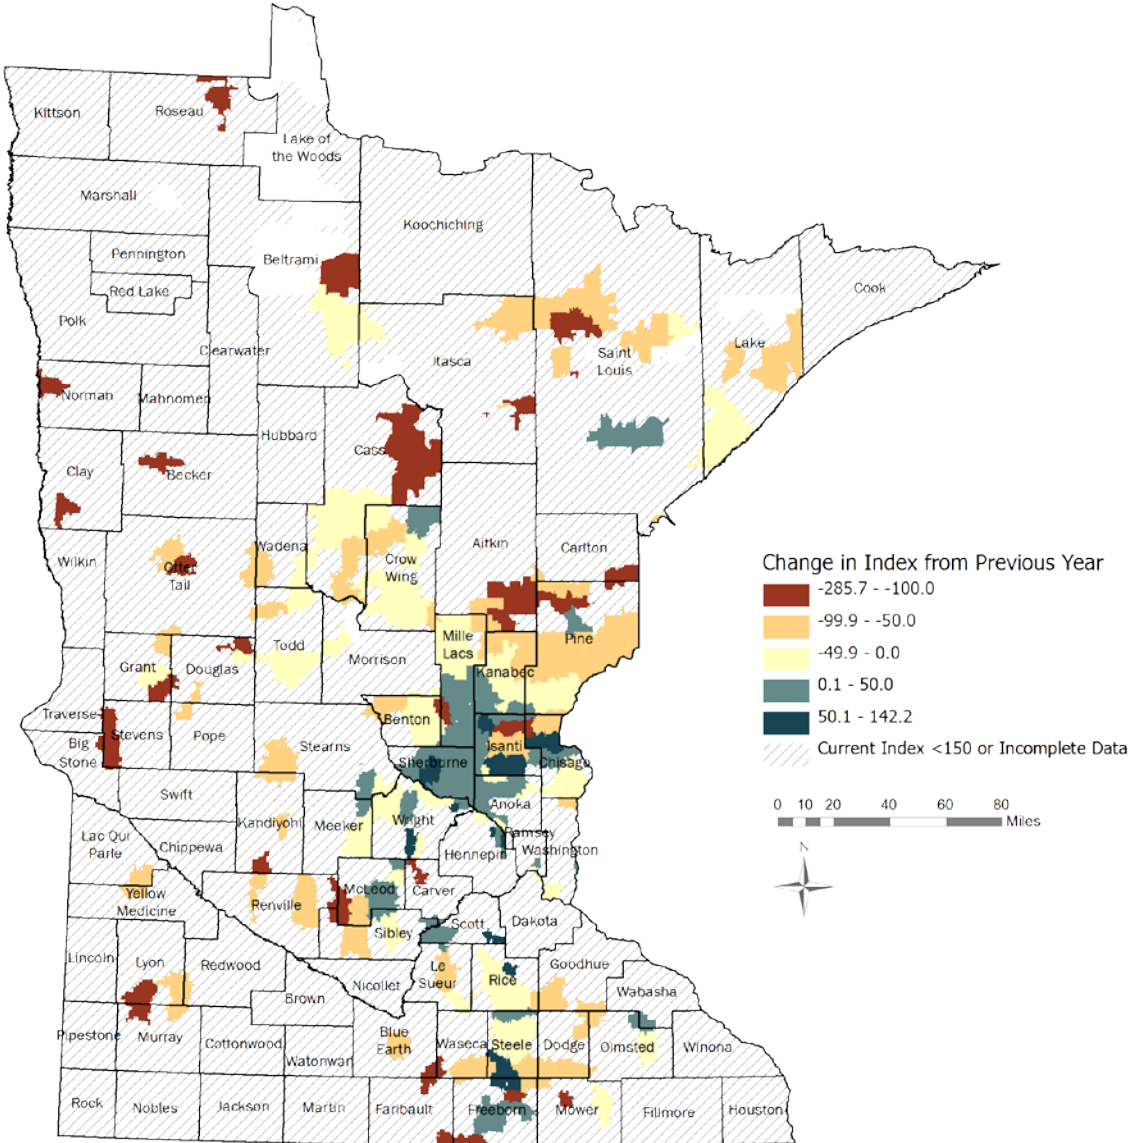

Source: Minnesota Housing analysis of data CoreLogic.

Notes: The index is based on each zip code’s delinquency rate – the number of loans that are 90 or more days past due divided by the number of households in each zip code. Each zip code’s rate is divided by the statewide rate to compute the index score. An index score of 200 means the zip code’s rate is twice the state rate, while an index score of 50 means the zip code’s rate is half the state rate.

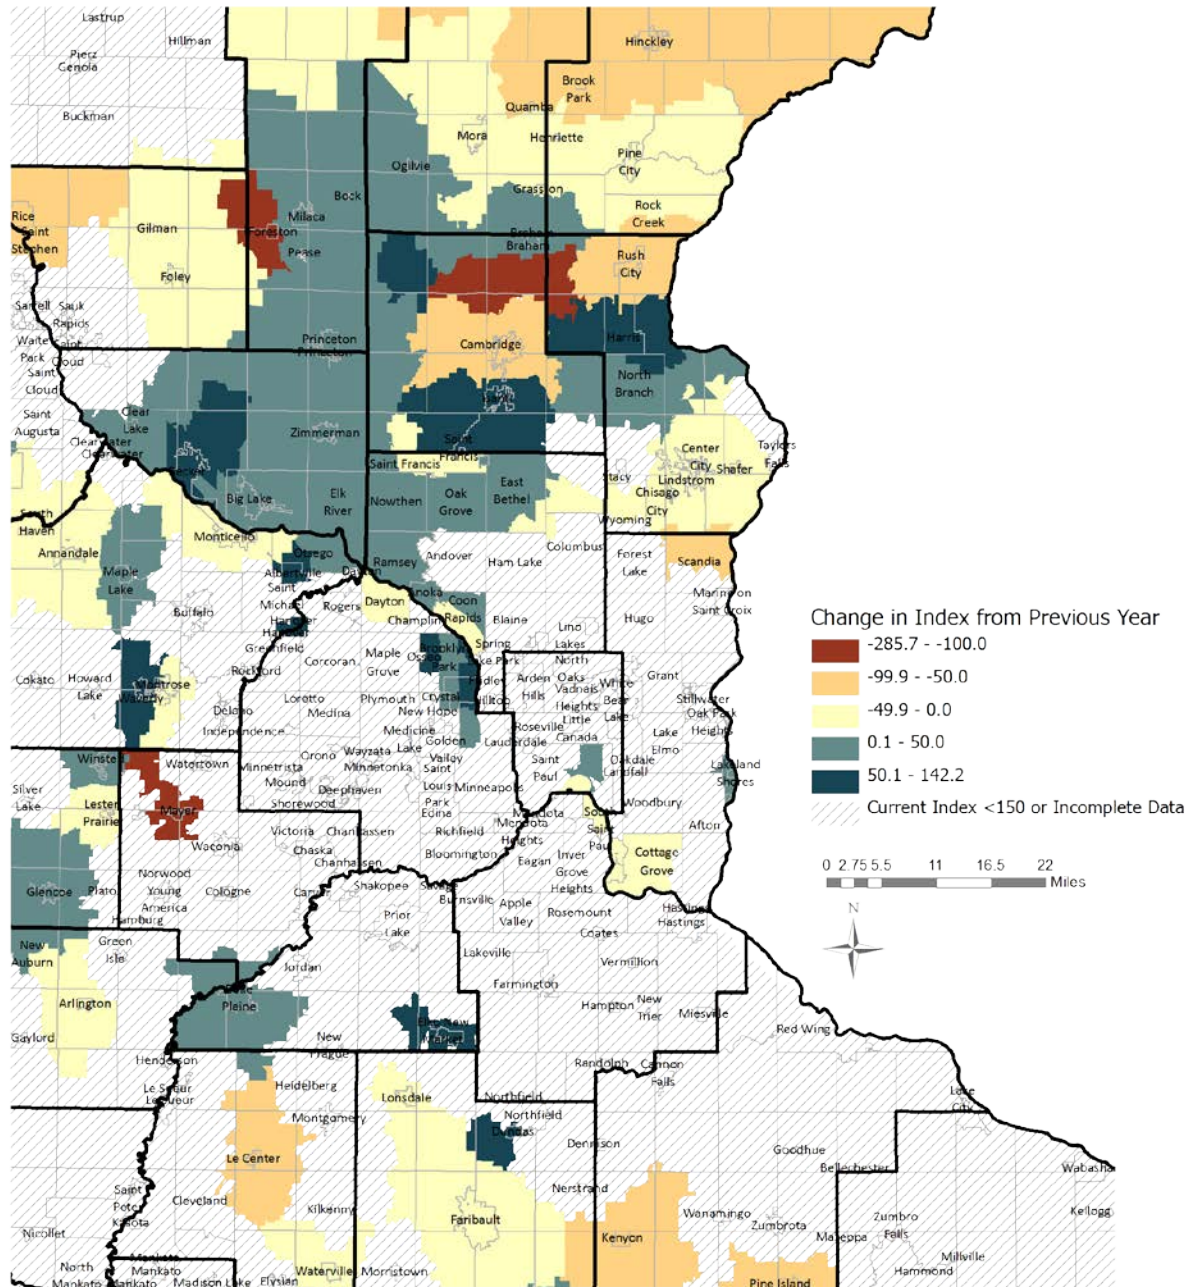

Map 4a – Annual Change in Composite Index (State)
For Zip Codes with a Rate 1.5 Times Greater than the Statewide Rate
Statewide-Rate: Index = 100
March 2012 – March 2014

Source: Minnesota Housing analysis of data from CoreLogic.
Notes: The change in index is based on each zip code’s composite rate of foreclosure, REO and delinquencies in December 2012 and December 2013. Each zip code’s rate is divided by the statewide rate to compute the index score. A decrease in index score means the zip code’s rate of foreclosure has decreased relative to the state’s rate in the past year, while an increase in index score means the zip code’s rate of foreclosure is has increased relative to the state’s rate in the past year.

**Map 4b – Annual Change in Composite Index (Metro)
For Zip Codes with a Rate 1.5 Times Greater than the Statewide Rate
Statewide-Rate: Index = 100
March 2012 – March 2014**

Source: Minnesota Housing analysis of data from CoreLogic.

Notes: The change in index is based on each zip code’s composite rate of foreclosure, REO and delinquencies in September 2012 and September 2013. Each zip code’s rate is divided by the statewide rate to compute the index score. A decrease in index score means the zip code’s rate of foreclosure has decreased relative to the state’s rate in the past year, while an increase in index score means the zip code’s rate of foreclosure is has increased relative to the state’s rate in the past year.

Appendix A - Zip Code Tables - Index Scores

Table 1: Zip Code Index Scores -March 2014					
("Incomplete" means that the zip code has less than 200 households and was not evaluated)					
Zip Code	Primary County	Number of Households	REO Index	Foreclosure Index	90+ Day Delinquency Index
55001	Washington	1,090	25.1 - 50.0	151.1 - 175.0	50.1 - 75.0
55003	Washington	855	100.1 - 125.0	100.1 - 125.0	50.1 - 75.0
