### Lessard-Sams Outdoor Heritage Council Laws of Minnesota 2013 Final Report

Date: November 13, 2018

Program or Project Title: Minnesota Buffers for Wildlife and Water-III

Funds Recommended: \$3,520,000

Manager's Name: Tabor Hoek

Organization: BWSR & Pheasants Forever

Address: 1400 E. Lyon St.
City: Marshall, MN 56258
Office Number: 507-537-7260
Fax Number: 507-537-6368
Email: tabor.hoek@state.mn.us
Website: www.bwsr.state.mn.us

Legislative Citation: ML 2013, Ch. 137, Art. 1, Sec. 2, Subd. 2(e)

**Appropriation Language:** \$3,520,000 in the first year is to the Board of Water and Soil Resources to acquire permanent conservation easements to protect and enhance habitat by expanding clean water fund riparian wildlife buffers on private land. Up to \$120,000 is for establishing a monitoring and enforcement fund, as approved in the accomplishment plan and subject to Minnesota Statutes, section 97A.056, subdivision 17. Easements funded under this appropriation are not subject to emergency haying and grazing orders. A list of permanent conservation easements must be provided as part of the final report.

County Locations: Big Stone, Blue Earth, Cottonwood, Le Sueur, Lyon, Meeker, Murray, Nobles, Redwood, Renville, Rice, and Watonwan.

#### Eco regions in which work was completed:

- Prairie
- Metro / Urban

#### Activity types:

• Protect in Easement

#### Priority resources addressed by activity:

• Prairie

#### **Summary of Accomplishments:**

This project is was the third request of LSOHC to target riparian buffers for clean water and wildlife using the Reinvest In Minnesota easement program. The Clean Water Fund and OHF were be used in cooperation to secure priority buffers permanently. Five hundred and thirty three acres of enhanced wildlife and water quality buffers were protected with OHF dollars and a total of 1,208 acres were protected from all sources of funding.

#### **Process & Methods:**

The Lessard-Sams Outdoor Heritage Council provided a recommendation to fund the first two phases of RIM Buffers, which secured 2932 acres of permanently established buffers that will continue to provide critical water quality improvements and improved nesting habitat. The complettion of Phase III brings the total of permanently protected buffers for wildlife and water quality to 3465 acres.

This partnership program permanently added grassland habitat and reduced fragmentation by combining the efforts of the Outdoor Heritage Fund, Clean Water Fund, and bonding to secure buffers adjacent to public waters. Building upon the 100-foot RIM buffers funded through the Clean Water Fund, we added an additional buffer width (up to NRCS 393 standard for CRP buffers) to make clean

water buffers more attractive and productive for wildlife. This program contributed toward the development of new habitat complexes and enhancement of existing habitats by expanding the size of narrow corridors and connecting them to large, permanently protected grasslands, wetlands, and shallow lakes. Furthermore, these wildlife buffers were targeted for landscapes with existing permanently protected habitat to accelerate progress toward achieving minimum thresholds of grass habitat required by waterfowl and other Species of Greatest Conservation Need. Many Species of Greatest Conservation Need benefit from large habitat patches and some require a minimum threshold of grassland habitat within a landscape.

Buffers are commonly viewed as simply a water quality practice, but buffers have notable positive impacts on wildlife due their unique upland and riverine habitat interaction. Not only are upland grasslands protected or restored, but detrimental impacts to stream-reliant biota is reduced. Many species of amphibians, such as southern MN's Northern Cricket Frog (endangered) rely on aquatic habitat during the breeding season and then spend most of their lives in upland habitat.

A scoring mechanism was employed to fund high quality wildlife buffer enhancements and target these funds. Buffers for wildlife under this program were prioritized based upon their ability to enhance public land habitats (e.g., WPA's or WMA's), protect expiring CRP lands, add key nesting cover to wetland/upland complexes, provide maximum water quality benefits, and enhance shallow lakes.

Criteria used to evaluate and prioritize buffers funded under this program include: does buffer build upon a Clean Water Fund Buffer, proximity to other permanently protected habitat, buffers within a designated shallow lake watershed, proximity to lands open to public hunting, plant diversity, overall size, and type of water resource being buffered. An open RIM Buffers application process for landowners was used. This effort builds upon the momentum established for RIM Buffer enrollments supported by the Outdoor Heritage Fund and Clean Water Fund in the previous two funding cycles.

RIM Buffers Program delivery was supported by Minnesota's Farm Bill Assistance Partnership which includes Minnesota BWSR, USDA - Natural Resources Conservation Service, Minnesota DNR, Soil and Water Conservation Districts, Pheasants Forever, and numerous local partners.

#### Explain Partners, Supporters, & Opposition:

Delivery of this program was a coordinated approach that brought together BWSR, DNR, local SWCD's, Pheasants Forever and other key conservation partners interested in private land conservation.

#### Additional Comments:

Exceptional challenges, expectations, failures, opportunities, or unique aspects of program

Not Listed

#### Other Funds Received:

• Clean Water Fund

#### How were the funds used to advanced the program:

This project brought two of the major components of the Legacy Amendment together by matching an equal amount of Clean Water Fund dollars to OHF dollars for the RIM buffers program. Indirectly, the Farm Bill Assistance Partnership with BWSR, DNR, PF, and SWCDs paid for SWCDs to hire technicians to promote conservation provisions of the Federal Farm Bill and other conservation programs to private landowners. Clean Water Funds and bond funds were used to expand buffer width, meaning that for every \$1 of OHF, over \$1 of CWF and bond funds were leveraged.

# What is the plan to sustain and/or maintain this work after the Outdoor Heritage Funds are expended:

Once a RIM easement is acquired, BWSR is responsible for monitoring and enforcement in perpetuity. The BWSR partners with local SWCDs to carry-out oversight, monitoring and inspection of its conservation easements. Easements are inspected for the first five consecutive years beginning in the year after the easement is recorded. Thereafter, on-site inspections are performed every three years and compliance checks are performed in the other two years. SWCDs report to BWSR on each site inspection conducted and partners' staff document findings. A non-compliance procedure is implemented when potential violations or problems are identified. The amount listed for Easement Stewardship covers a portion of costs of the SWCD regular monitoring, BWSR oversight, and enforcement.

#### **Outcomes:**

The original accomplishment plan stated the program would

#### Programs in metropolitan urbanizing region:

• Not Listed

#### How will the outcomes be measured and evaluated?

Not Listed

#### Programs in prairie region:

- Expiring CRP lands are permanently protected
- Increased participation of private landowners in habitat projects
- Protected, restored, and enhanced habitat for waterfowl, upland birds, and species of greatest conservation need
- Protected, restored, and enhanced shallow lakes and wetlands
- Water is kept on the land

#### How will the outcomes be measured and evaluated?

A total of 1208 acres (all sources of funding) were protected and restored in this phase. Five hundred and thirty three acres were fundid through OHF, another 533 acres through CWF with the remaining 142 acres funded through bonding. This brings the total of protected acres to 2932 for Buffers Phases I - III combined.

#### **Budget Spreadsheet**

Final Budget line item reallocations are allowed up to 10% and do not need require an amendment to the Accomplishment Plan

Total Amount: \$3,520,000

#### **Budget and Cash Leverage**

#### **Explain any budget challenges or successes:**

Rapidly increasing land values drove easement payments considerably higher than projected thus only 533 acres were completed (76%). The BWSR Personnel budget was overspent by \$21,066. The BWSR personnel budgeting/tracking process is to 1) predict expenses and load budgets accordingly, 2) track actual time spent, and 3) make expenditure corrections. Unfortunately EC's could not be made prior to this appropriation being closed out in SWIFT. Over the five Buffers appropriations from 2011-2015, the personnel budget has been underspent. This issue was discussed with LSOHC staff on 11/1/18 and documenting here was the agreed upon solution.

All revenues received by the recipient that have been generated from activities on land with money from the OHF:

Total Revenue: \$0
Revenue Spent: \$0
Revenue Balance: \$0

#### Target Lake/Stream/River Feet or Miles (original)

30

#### Target Lake/Stream/River Feet or Miles (final)

0

### Explain the success/shortage of acre goals:

Rapidly increasing land values drove easement payments considerably higher than projected thus only 533 acres were completed (76%).

### **Parcel List**

#### **Section 1 - Restore / Enhance Parcel List**

No parcels with an activity type restore or enhance.

#### **Section 2 - Protect Parcel List**
