# Lessard-Sams Outdoor Heritage Council Laws of Minnesota 2013 Final Report

Date: September 04, 2018

Program or Project Title: Wild Rice Shoreland Protection

Funds Recommended: \$1,630,000

Manager's Name: Dan Steward

Organization: Minnesota Board of Water and Soil Resources

Address: 1601 Minnesota Drive City: Brainerd, MN 56401 Office Number: 218-828-2598 Email: dan.steward@state.mn.us Website: bwsr.state.mn.us

Legislative Citation: ML 2013, Ch. 137, Art. 1, Sec. 2, Subd. 4(d)

Appropriation Language: \$1,630,000 in the first year is to the Board of Water and Soil Resources to acquire in fee wild rice lake shoreland habitat for native wild rice bed protection and to acquire permanent conservation easements in cooperation with Ducks Unlimited. Of this amount, \$100,000 is for an agreement with Ducks Unlimited for acquisition of land or interests in land to protect native wild rice beds. Up to \$48,000 is for establishing a monitoring and enforcement fund, as approved in the accomplishment plan and subject to Minnesota Statutes, section 97A.056, subdivision 17. A list of proposed land acquisitions must be included as part of the required accomplishment plan.

County Locations: Aitkin, Carlton, Cass, Crow Wing, Hubbard, and Itasca.

#### Regions in which work was completed:

Northern Forest

#### Activity types:

- Protect in Easement
- Protect in Fee

#### Priority resources addressed by activity:

- Wetlands
- Forest
- Habitat

### **Summary of Accomplishments:**

Twenty six easements protecting 1,173.3 were recorded which exceeded the original proposal by 173 acres (15%). 11.6 miles of shoreline were protected which exceeded the 8 acre goal by 30%. Total expenditure was \$1,355,000 which was 17% lower than originally budgeted. No fee-title land acquisition opportunities on wild rice lakes that fit within DNR and other government agency land plans were available during this time period thus DU did not expend any of the \$100,000 budgeted for fee-title acquisition. Instead the program focused on RIM easements.

#### **Process & Methods:**

The second phase of Wild Rice Shoreland Protection was intended to protect additional wild rice shoreland and continue the success of Phase I. BWSR, DU, DNR, SWCDs and other partners (see below) worked closely together to continue protection of vulnerable and ecologically valuable wild rice lake shorelands and grow the program which has led to subsequent phases III-V with Phase VI proposed for ML19 funding.

Wild rice shoreland encompasses a complex of shallow lakes, rivers, and shallow bays of deeper lakes that support rice and provide some of the most important habitat for wetland-dependent wildlife species in Minnesota. Wild rice habitat is especially important to Minnesota's migrating and breeding waterfowl and provides Minnesotans with unique recreation opportunities: hunting waterfowl and harvesting the rice itself for food.

Historically, wild rice occurred throughout Minnesota and extended into northern lowa. Wild rice has since been extirpated from most of its southern range due to human impacts. Today, the heart of the states wild rice acreage falls within this project work area comprised of eight counties Aitkin, Carlton, Cass, Crow Wing, Hubbard, Itasca, St. Louis, and Wadena. These counties also account for 70% of harvesting trips for state licensed harvesters.

This wild rice shoreland complex exists primarily in the state's Forest Section and remains intact with good water quality, but it is subject to intense development pressure that, if allowed, will degrade the resource. Recent well-documented population and development trends pose a serious threat to wild rice habitat in the Northern Forest Section. This population and development boom has reduced the availability of developable shoreline on recreational lakes, resulting in shallow lakes, rivers, and shallow bays containing wild rice being increasingly targeted for shoreline development.

Shallow lakes and rivers in the forest are very susceptible to the impacts of shoreline development. The scoring and ranking process placed a strong emphasis on protecting the most vulnerable shorelines that were offered. Tracts were selected based on the degree they help permanently protect all the land around a given wild rice water body.

Through the work of six SWCD offices, BWSR acquired 26 RIM shoreland easements from wild rice lake and river shoreline landowners. The BWSR/SWCD easements were acquired using the standard RIM process. Future monitoring and enforcement will be conducted via the standard RIM monitoring process.

Although no fee-title acquisitions were completed during this phase the work of the partners paid off in subsequent phases as groundwork from this phase resulted in fee-title acquisition in Phase 3.

#### Explain Partners, Supporters, & Opposition:

To accomplish phase II, Ducks Unlimited (DU), Minnesota Board of Water & Soil Resources (BWSR), Minnesota Department of Natural Resources – Section of Wildlife (DNR Wildlife), Laurentian Resource Conservation and Development Council (LRCD), and the eight work area Soil and Water Conservation Districts (SWCDs) worked together to expand voluntary easement programs to offer permanent shoreland conservation easements on shallow lakes, rivers and shallow bays producing wild rice through both the BWSR's Reinvest In Minnesota (RIM) program (1,000 acres).

Shoreland protection for wild rice lakes and rivers enjoys widespread support from tribal interests, SWCDs, LRCD, Minnesota Forestry Association, outdoor clubs, and other wild rice stakeholders in north-central Minnesota.

#### Additional Comments:

Exceptional challenges, expectations, failures, opportunities, or unique aspects of program

Demand for RIM easements and pre-work on acquisitions from this phase demonstrated the need for future phases including Wild Rice Phases III-V and the proposed Phase VIL 19 request that is pending, as well as increasing demand for RIM easements as a protection option in general through out the northern forests.

#### Other Funds Received:

Not Listed

#### How were the funds used to advanced the program:

Wild rice has significant cultural importance to Minnesota's Native Americans.

## What is the plan to sustain and/or maintain this work after the Outdoor Heritage Funds are expended:

Once a RIM easement is acquired, BWSR is responsible for monitoring and enforcement into perpetuity. The BWSR partners with local SWCDs to carry-out oversight, monitoring and inspection of its conservation easements. Easements are inspected for the first five consecutive years beginning in the year after the easement is recorded. Thereafter, on-site inspections are performed every three years and compliance checks are performed in the other two years. SWCDs report to BWSR on each site inspection conducted and partners' staff document findings. A non-compliance procedure is implemented when potential violations or problems are identified.

Perpetual monitoring and enforcement costs are covered by deposits into the Easement Stewardship Account per MS 103B.103

#### **Outcomes:**

### The original accomplishment plan stated the program would

### Programs in the northern forest region:

- Forestlands are protected from development and fragmentation
- · Healthy populations of endangered, threatened, and special concern species as well as more common species
- Improved aquatic habitat indicators
- Increased availability and improved condition of riparian forests and other habitat corridors

#### How will the outcomes be measured and evaluated?

The outcomes for this program are measured by acres and shoreline of wild rice lakes protected from development. The goal of this Phase 2 project was to protect 1,000 acres in RIM easements and 15 acres in fee-title. The outcomes exceeded our goal by purchasing 26 RIM easements which protected 1,173 acres. These parcels will protect water quality, wild rice stands and critical wildlife habitat.

### **Budget Spreadsheet**

Final Budget line item reallocations are allowed up to 10% and do not need require an amendment to the Accomplishment Plan

Total Amount: \$1,630,000

### **Budget and Cash Leverage**

### Target Lake/Stream/River Feet or Miles (original)

### Target Lake/Stream/River Feet or Miles (final)

11.6 miles

### Explain the success/shortage of acre goals:

Easement acres were exceeded by 15%, shoreline miles protected were exceeded by 30%, and final expenditures came in at 17% less than originally budgeted. Fee title acquisitions did not occur during this phase as there were no available parcels during this time period.

### **Parcel List**

### **Section 1 - Restore / Enhance Parcel List**

No parcels with an activity type restore or enhance.

### **Section 2 - Protect Parcel List**
