Lessard-Sams Outdoor Heritage Council Laws of Minnesota 2013 <u>Final Report</u>

Date: November 14, 2018

Program or Project Title: Accelerating the Wildlife Management Area Program, Phase 5

Funds Recommended: \$7,960,000

Manager's Name: Eran Sandquist Title: MN State Coordinator Organization: Pheasants Forever, Inc. Address: 410 Lincoln Ave S. Address 2: PO Box 91 City: South Haven, MN 55386 Office Number: 763-242-1273 Mobile Number: 763-242-1273 Fax Number: 320-236-7755 Email: esandquist@pheasantsforever.org Website: www.pheasantsforever.org

Legislative Citation: ML 2013, Ch. 137, Art. 1, Sec. 2, Subd. 2(b)

Appropriation Language: \$7,960,000 in the first year is to the commissioner of natural resources for an agreement with Pheasants Forever to acquire land in fee for wildlife management purposes under Minnesota Statutes, section 86A.05, subdivision 8. A list of proposed land acquisitions must be provided as part of the required accomplishment plan.

County Locations: Anoka, Brown, Carver, Lyon, Martin, Stevens, Swift, and Wright.

Eco regions in which work was completed:

- Forest / Prairie Transition
- Prairie
- Metro / Urban

Activity types:

- Restore
- Protect in Fee

Priority resources addressed by activity:

- Wetlands
- Prairie

Summary of Accomplishments:

The proposal was to accelerate the protection of 1,220 acres of prairie grassland, wetland, and other wildlife habitat as State Wildlife Management Areas open to public hunting. Over the course of the appropriation, we acquired 11 parcels for a total of 1,484.05 acres which exceeded our total acre goal of 1,220 acres by 264.05 acres. Breaking down acres by ecological section we acquired 876 acres in the metro, 152 acres in the forest/prairie, and 456 acres in the prairie. We have a balance of \$52,798 that will be returned to the Fund despite exceeding our acre goals.

In total, we under spent on our budget, over delivered on acre goals, and over delivered on match leverage received while using less personnel costs than proposed.

Process & Methods:

The pressures from development, industry, and agriculture continue to mount on wildlife habitat within the farmland regions of Minnesota. In fact, despite our collective investments in conservation, it is believed that many of the agricultural counties in Minnesota are continuing to experience a net loss of wildlife habitat. This unfortunate reality is currently being exacerbated by conversion of lands expiring out of CRP. Now, more than ever, is the time to accelerate our investments in permanently protected high quality public habitat complexes that will protect, maintain, and increase Minnesota's wildlife populations. In addition, being able to provide public areas for Minnesotans to hunt, trap, fish and otherwise recreate in the outdoors are urgent needs and is fundamental to ensure Minnesota's outdoor heritage and appreciation of the outdoors is passed on to future generations.

To help slow and reverse the loss of habitat and declining wildlife populations, Pheasants Forever (PF) and our partners have protected (fee acquisition from willing sellers) 1,484.05 acres of high priority grassland (native prairie if available), wetland, and wildlife habitat as state Wildlife Management Areas (WMA) throughout the pheasant range of Minnesota. Striving to build landscape level habitat complexes that will protect and sustain wildlife populations, many of the potential projects are additions to existing WMAs or WPAs, many of which were originally acquired in partnership with MNDNR, local PF chapters, and conservation partners.

Projects were developed and selected in conjunction with local and regional DNR staff. All projects will meet standards and requirements for inclusion into the WMA system and DNR Commissioner approval will be received for any project funded under this proposal. In addition to meeting the minimum WMA standards, additional criteria were used to develop the potential project list including:

Does the parcel contain habitat restoration potential that will result in an increase in wildlife populations?

Does the parcel build upon existing investments in public and private land habitat (landscape scale significance)?

Does the parcel contain significant natural communities or will it protect or buffer significant natural communities?

Does the parcel have the potential and focus for habitat protection and restoration in the future?

Does the parcel provide multiple benefits (recreation, access, water control, water quality, lakeshore, local community support etc.)?

All acquired lands will meet the minimum initial development standards for WMAs. In addition, providing high quality habitat and keeping future management concerns in mind, all acquisitions will be restored and/or enhanced to as high quality as practicable, with the belief that quality and comprehensive restorations utilizing native species result in lower management costs. Acquired croplands will be permanently retired and restored to diverse grasslands and wetlands to the fullest extent. Enhancement work may include undesirable woody vegetation removal, water control structure installation, inter-seeding to increase diversity and structure, managed grazing, invasive species control, or any other activity that improves the diversity and health of the prairie-wetland habitat complex.

Pheasants Forever's network of 76 Minnesota chapters and 26,000 members have been actively involved in protecting and restoring lands in partnership with the Minnesota DNR for 27 years and will continue to be a priority. WMA's are an integral component to the comprehensive conservation strategy within the prairie region of the state. The WMAs within this proposal will not only protect, increase, and sustain wildlife habitat and populations; they will provide access and recreational opportunities, including hunting, to ALL Minnesotans, so fundamentally important to our outdoor heritage.

Explain Partners, Supporters, & Opposition:

We worked in close collaboration with MN DNR to find and evaluate the best properties to peruse based on the criteria listed in the process and methods section. During the process, we also worked with many other partners to gauge interest levels and determine if the property is suitable for a Wildlife Management Area.

Additional Comments:

Exceptional challenges, expectations, failures, opportunities, or unique aspects of program

There were no exceptional failures or challenges that were encountered. This is due in part to our high level of collaboration and efficiency. We also strive to be respectful and accommodating in helping to facilitate landowners wishes when working with willing sellers as many see this as leaving their own habitat legacy.

Other Funds Received:

• Not Listed

How were the funds used to advanced the program:

Not Listed

What is the plan to sustain and/or maintain this work after the Outdoor Heritage Funds are expended:

All parcels acquired have been transferred to the MN DNR for enrollment into the Wildlife Management Area program. All parcels were acquired then restored as part of this effort. The long-term management & maintenance of these new WMAs will be the responsibility of the MN DNR. Pheasants Forever is also active in additional habitat enhancement and restoration activities on existing public lands where there is a need.

Outcomes:

The original accomplishment plan stated the program would

Programs in forest-prairie transition region:

- Increased availability and improved condition of riparian forests and other habitat corridors
- Protected, restored, and enhanced nesting and migratory habitat for waterfowl, upland birds, and species of greatest conservation need
- Wetland and upland complexes will consist of native prairies, restored prairies, quality grasslands, and restored shallow lakes and wetlands
- Water is kept on the land
- Improved access to public lands

How will the outcomes be measured and evaluated?

Improved access to public lands- Together with partners we have added 152.17 acres of new permanently protected WMAs in the forest-prairie transition region which are now open to public access.

Programs in metropolitan urbanizing region:

- A network of natural land and riparian habitats will connect corridors for wildlife and species in greatest conservation need
- Protected habitats will hold wetlands and shallow lakes open to public recreation and hunting
- Improved access to public lands

How will the outcomes be measured and evaluated?

Improved access to public lands- Together with partners we have added 875.52 acres of new permanently protected WMAs in the metropolitan region which are now open to public access.

Programs in prairie region:

- Core areas protected with highly biologically diverse wetlands and plant communities, including native prairie, Big Woods, and oak savanna
- Expiring CRP lands are permanently protected
- Improved condition of habitat on public lands
- Protected, restored, and enhanced habitat for waterfowl, upland birds, and species of greatest conservation need
- Protected, restored, and enhanced shallow lakes and wetlands
- Remnant native prairies and wetlands are permanently protected and are part of large complexes of restored prairie, grasslands, and large and small wetlands
- Water is kept on the land
- Improved access to public lands

How will the outcomes be measured and evaluated?

Improved access to public lands- Together with partners we have added 456.36 acres of new permanently protected WMAs in the prairie region which are now open to public access.

Budget Spreadsheet

Final Budget line item reallocations are allowed up to 10% and do not need require an amendment to the Accomplishment Plan

Total Amount: \$7,960,000

Total	0.18	9.00	\$46,700	\$0		\$46,700

Explain any budget challenges or successes:

Pheasants Forever and our partners are happy to bring in over \$550,500 of non-state match dollars to this effort. This represents \$152,500 additional dollars (beyond our \$398,000 goal) brought to bear on the projects of this appropriation. While coming in under budget we were able to buy more acres than our original proposal. This demonstrates the efficiently of Pheasants Forever as the economical provider for building Wildlife Management Areas. No challenges were encountered and PF achieved and exceeded all outlined goals within the budget.

All revenues received by the recipient that have been generated from activities on land with money from the OHF:

- Total Revenue: \$0
- Revenue Spent: \$0

Revenue Balance: \$0
