

Study Abroad Health and Safety Report

To provide the public with a more accurate understanding of the risks of studying abroad, the Office of Higher Education (OHE) reports study abroad health and safety incident data along with student participation data. This information is annually submitted to OHE by Minnesota postsecondary institutions whose students studied abroad in the prior academic year.

About Study Abroad Data

According to [Minn. Statutes § 5.41](#), postsecondary institutions offering credit for study abroad must:

- report deaths and hospitalizations that occurred during, and as a result of, program participation
- report country, primary program host, and program type of each incident
- request, but not mandate, incident disclosure from students upon completion of their program
- report whether the institution is committed to complying with the health and safety standards set by the [Forum on Education Abroad](#)

Data Privacy

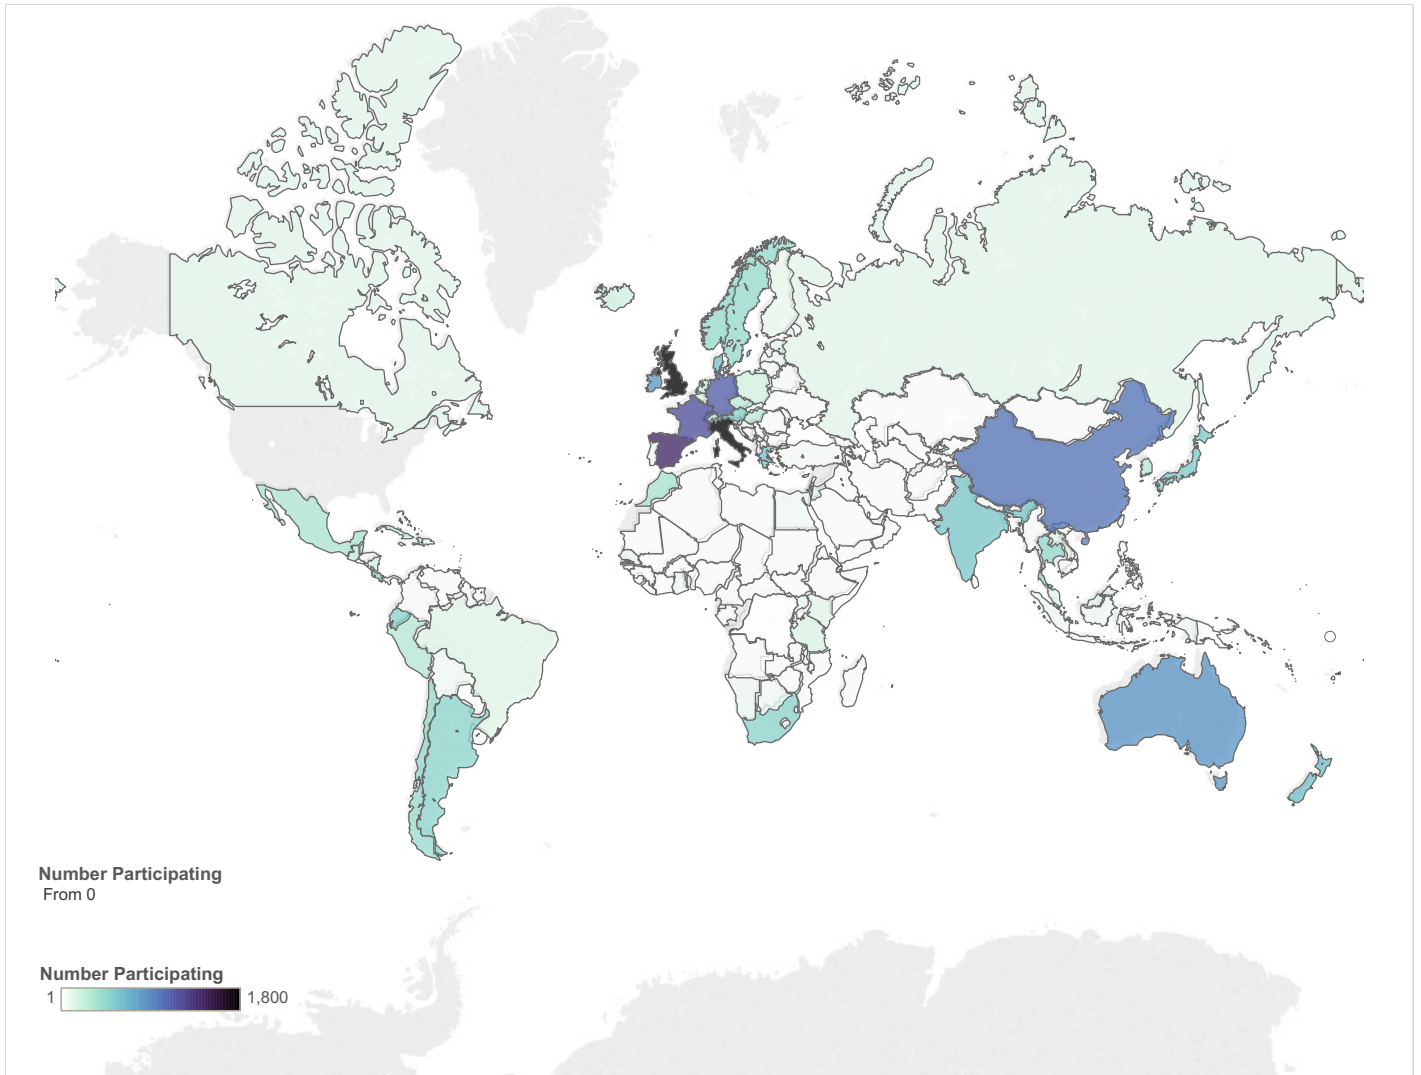

OHE adheres to current federal and state data privacy laws and best practices to protect the privacy of individual students. Reports and data required by Minn. Stat. § 135A.15, Subd. 6 are prepared and published as summary data, as defined in Minn. Stat. § 13.02, Subd. 19, and are consistent with federal and state laws governing access to educational data and student privacy.

OHE's policy for complying with federal and state laws governing access to student records is to suppress student data in cells containing fewer than 10 students. In the data reports that follow, when "<10" is displayed the data for that cell is suppressed to protect student identity in compliance with federal and state privacy laws. Additionally, if only one cell in a column is suppressed, the cell with the second lowest count will also be suppressed to prevent identification.

The following data are on study abroad participation and incidents of Minnesota students that occurred between August 1, 2017 and July 31, 2018.

Minnesota Study Abroad Participants by Country, 2017-2018

Minnesota students studied abroad in a wide variety of countries. Scroll over each country to see the number of students who studied there from August 1, 2017 to July 31, 2018. If no number is displayed, the data is suppressed to protect student identity (total <10).

When "<10" is displ..

Along with their participation and incident reporting, postsecondary institutions report whether the institution is committed to complying with the following health and safety standards set by the Forum on Education Abroad, indicated by 1, 2 and 3 above.

1. The organization prioritizes health, safety, and security in program development, implementation, and management, conducting appropriate risk assessments for program sites and activities, maintaining written emergency plans and protocols, and identifying and leveraging relevant authorities, networks and resources.
2. Staff are trained to anticipate and respond responsibly to student health, safety, or security issues, students are trained to responsibly manage their own health, safety, and security while abroad, and measures are in place for ongoing monitoring of and advising on health, safety, and security issues.
3. The organization maintains appropriate kinds of insurance at recommended levels, operates in compliance with local laws, and follows best practices in reporting on critical incidents. [See more information on the Forum's Standards of Good Practice](#) .

Minnesota Study Abroad Incidents as a Percentage of Participants, 2014-2018

The following data reflect study abroad participation and incidents of Minnesota students that occurred between August 1, 2014 and July 31, 2018, the first three years of study abroad data reporting.

Overall, 2014-2018

Incident as a Percentage of Par..	0.30%
-----------------------------------	-------

During the 2014-2015 through 2017-2018 academic years, less than 1 percent of Minnesota student participants in study abroad programs experienced an incident of hospitalization related to program participation.

Incidents as a Percentage of Participants, By Program Host Type
