

1976-77 School District Comparisons

This publication contains the State Department of Education's fifth annual report on statistics characterizing Minnesota school districts.

Information is included for all districts which operate both elementary and secondary schools. The enrollment data in the first four columns of the report are from October, 1977. All other columns contain data from the 1976-77 school year.

The publication of this report was delayed due to changes in both the content of the report and in the Department's data processing equipment. These changes should, in the long run, improve the usefulness of the report and permit earlier publication of future issues.

Statewide Trends

Enrollments continued to decline at all grade levels and in almost all districts. Total state enrollment declined from 860,763 in the fall of 1976 to 833,524 in the fall of 1977.

While enrollment declined, total professional staff increased slightly, from 50,693 to 50,898. As a result, the pupil/staff ratio fell from 17.4 in 1975-76 to 16.9 in 1976-77.

Revenue from local sources increased as a percentage of the total, while the percentages of both federal and state revenue decreased. The primary cause of this increase in local revenue was a rapid increase in property valuations. EARC valuation per pupil unit rose from \$15,936 in 1975 to \$18,973 in 1976. As a result, revenue from local property taxes increased even though tax rates declined slightly.

Expenditures per pupil unit increased in almost every category. State and local operating costs rose from \$1,059 per pupil unit in 1975-76 to \$1,160 in 1976-77.

Changes in the Report

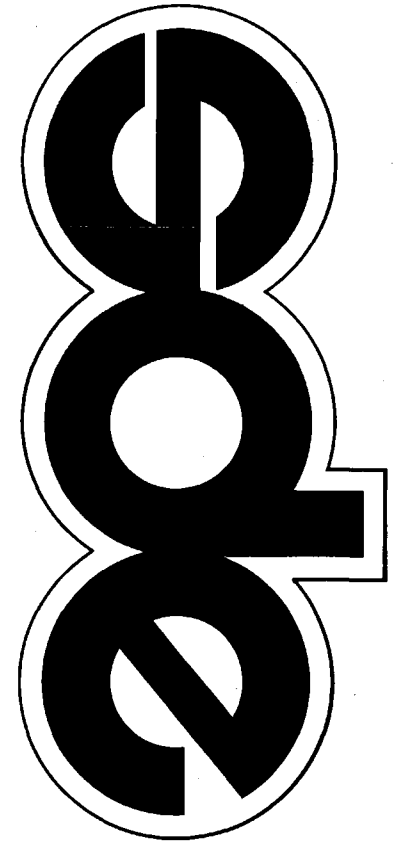

During the five-year history of this report, both sources of data and needs for information have changed. As a result, several changes have been made in the format and content of this year's report. The format has been changed in an attempt to make the report easier to use, new data items have been added, some statistics have been eliminated, and changes have been made in some definitions and titles. These changes are summarized below.

Format Changes

1. In past years school districts were listed by development region, with all of the districts in region 1 listed first, then all of the districts in region 2, etc. Beginning this year districts are listed by county, with counties in alphabetical order, and with the districts in alphabetical order within each county.

On pages 6 and 7 there is a state map and a listing of all school districts in alphabetical order, along with district, county, and region numbers. This listing is intended to help in locating school districts on the report.

2. As in past years, the listing of statistics for individual school districts is followed by a listing for counties and development regions. This year a new table has been added on pages 24 and 25, listing statistics for each of the state's nine Educational Cooperative Service Unit (ECSU) regions.

SPECIAL REPORT

Vol. 13, No. 2

Data for ECSU Regions	24

This document was prepared by the staff of the Education Statistics Section, Minnesota Department of Education.

New Statistics

The following data items have been added to this year's report. Definitions are on pages 3 and 4.

1. District number — To aid in locating specific statistics on the report, district numbers have been added in the first column of each left-hand page and again in the last column of each right-hand page.
2. Percent Local Revenues.
3. Total Current Expenditures.
4. Capital Equipment Expenditures.
5. Building and Sites Expenditures.
6. Unappropriated Operating Fund Balance.
7. Change in Fund Balance.

Data Items Eliminated

The following data items from last year's report have been eliminated, for several reasons. Some of the data items were not widely used, some were potentially misleading or inaccurate, and some were no longer available.

1. Enrollment Trends.
2. Percent Handicapped.
3. Average Salary Per FTE Staff Member.
4. Capital Outlay Expenditures — These expenditures are now included in the columns labelled "Capital Equipment" and "Buildings and Sites."
5. Abatements.
6. Total Expenditures — This statistic was replaced by "Total Current Expenditures."
7. Personal Income Per Pupil Unit.
8. State and Local Effective Costs Per Pupil Unit.

Changes in Definitions and Titles

Definitions and titles of several items have been changed, either for clarification or to accommodate changes in data sources.

1. Percent Minority — This statistic was previously labelled "% Non-White." The definition remains the same.
2. Tax Rates — The two tax rate statistics, formerly labelled "Mill Rates: Non-Agric and EARC," have been relabelled "Tax Rates: Auditor Mills and EARC Mills." Definitions remain the same.
3. Expenditures Per Pupil Unit — 1976-77 was the first year in which school districts were required to be on an accrual-based financial accounting system. Under such a system revenues are recorded when earned, and expenditures are recorded as soon as they result in liabilities, regardless of when the revenue is actually received or the payment is actually made. Prior to 1976-77 most school districts operated a cash-basis accounting system, in which revenues and expenditures were recorded only when cash was actually received or disbursed. In general an accrual-based system provides a more accurate picture of expenses for specific purposes within an individual year.

Because of this change, the expenditure information on this report has a different meaning than the data on previous years' reports. However, the difference in most cases is small, and most comparisons of the data will be valid.

4. In past years, expenditures for summer school were included with Community Services Expenditures. Beginning with this report, expenditures for summer school classes in grades K-12 are *not* included with Community Services Expenditures. Salary expenses for summer school are included in Instructional Salaries, and other summer school expenses are included with Other Instructional Expenditures.
5. The column which previously was labelled "Transfers" is now labelled "Tuition." The definition remains the same.

If you have any questions or suggestions regarding these changes, please contact the Education Statistics Section, 7th floor, Capitol Square Building, 550 Cedar Street, St. Paul, Minnesota 55101, (612) 296-2400.

Item Definitions and Usages

Listed below are definitions for all the statistics in this report. The individual data items are listed in the same order as in the tables on pages 8 to 25.

October 1977 Enrollments

Includes all kindergarten, elementary and secondary pupils enrolled in district schools on October 1, 1977.

Kindergarten — Number of pupils enrolled in kindergarten classes.

Elementary, Grade 1-6 — Number of pupils enrolled in grades one through six, including those in ungraded and handicapped classes.

Secondary, Grade 7-12 — Number of pupils enrolled in grades seven through twelve, including those in ungraded and handicapped classes.

Pupil Data

Provides information on select characteristics of each district's pupils.

% Minority — The percentage of the district's total October 1977 enrollment which is considered to be of American Indian, Black, Oriental or Spanish-speaking origin.

% Attendance — The number of school days attended by all pupils during the 1976-77 school year, as a percent of the total days these pupils could have attended.

% Transported — The number of public school pupils transported to and from school twenty or more days, as a percentage of the district's total average daily membership. (Because of migration of pupils between districts, it is possible for the number of pupils transported to exceed a district's average daily membership. Thus, in some districts the percent transported is greater than 100.)

Professional Staff

Provides information about each district's professional staff. All measures of staffing are computed in terms of full-time equivalents (FTE). A staff member spending 100% of the work week assigned to and providing professional services is counted as 1.00 FTE. One employed only half-time is counted as 0.5 FTE. All data are for the 1976-77 school year. Staff counts are restricted to elementary-secondary personnel; AVTI personnel are excluded.

Total Staff FTE — The total number of licensed professional staff employed by the district for 1976-77, measured in full-time equivalents (FTE). This count includes administrators, classroom teachers, and all other licensed professional personnel.

Pupil Total/FTE — The total number of pupils served in grades K-12 per full-time equivalent staff member, for 1976-77.

Tax Rates

These are measures of the burden of property taxes for school purposes, for taxes payable in 1977. Tax levies are authorized by local school boards within limitations set by state law. Tax rates, which are measured in mills, are computed by dividing the total tax levy by the total valuation of property, then multiplying by 1,000.

Auditor Mills — The actual mill rate of school taxes on the assessed value of nonagricultural property, as determined by the county auditor. If, for example, the auditor mill rate is 50, then a property owner would be assessed \$50 in school property taxes for each \$1,000 of assessed value. Because of differences in assessment practices, comparisons of auditor mill rates among districts may not be valid.

EARC Mills — The mill rate of school taxes based on the district's adjusted assessed value, as computed by the Equalization Aid Review Committee (EARC). In computing the adjusted assessed value, the EARC compensates for differences in assessment practices. Thus it is valid to compare EARC mill rates among districts.

% Revenues

These columns show the percentage of each district's 1976-77 revenues from federal, state, and local sources. Proceeds from sales of bonds and real property are excluded from these computations.

Federal — The percentage of 1976-77 revenues from the federal government.

State — The percentage of 1976-77 revenues from the Minnesota state government.

Local — The percentage of 1976-77 revenues from sources other than the federal or state governments. This category includes revenues from property taxes, tuition and fees, sales of assets, payments from other school districts, and all other local sources.

Total Pupil Units 1976-77

This figure is a measure of school district size, computed by applying weightings to the district's average daily membership (ADM). Each kindergarten ADM counts as 0.5 pupil unit, each elementary ADM as 1.0 pupil unit, and each secondary ADM as 1.4 pupil units. Both resident pupils and nonresidents served by the district are included in the computation. Pupil units, which are intended to reflect the relative costs of educating pupils of various ages, are used in calculating state aid payments and tax levy limitations.

1976-77 Expenditures per Pupil Unit

These columns show each district's 1976-77 expenditures in sixteen categories, divided by the district's total 1976-77 pupil units. Each figure is rounded to the nearest dollar. Each column includes total district expenditures for the indicated purpose, minus reimbursement revenues received from other districts for the same purpose.

Administration — Expenditures for salaries and other expenses of the school board, the superintendent and other district-wide administrative personnel.

Instructional Salaries — Expenditures for salaries of teachers, principals, consultants, coordinators, librarians, guidance and counseling personnel, psychologists, and other instructional resource personnel.

Other Instruction — Expenditures for salaries of para-professionals, aides, secretaries and clerical personnel, and for textbooks, some library costs, audio visual materials, instructional supplies and all other expenses of instruction.

Attendance and Health — Salaries and other expenditures for attendance and health services, including contracted services.

Plant Operation — Expenditures for salaries, contracted services, fuel, utilities, supplies, and other expenses for the operation of the school plant.

Plant Maintenance — Expenditures for salaries, contracted services, and other expenses for maintaining the school district plant and premises.

Fixed Charges — Expenditures for fixed charges, including employee retirement contributions, insurance payments, rental of land and buildings, interest on loans, abatements, unemployment insurance costs, and severance pay.

Food Service — Expenditures for food service salaries, food costs, and lunchroom supplies and equipment.

Student Activities — Expenditures for all student activities over which the school board has assumed control.

Tuition — Total payments to other school districts for education of the district's resident pupils. This may include payments to vocational centers, special education cooperatives, or other schools in Minnesota or in other states.

Total Current Expenditures — Total current expenditures per pupil unit. This is a total of the eleven preceding categories of expenditures. It includes all expenditures incurred for the benefit of elementary-secondary education for the 1976-77 school year, except for capital expenditures and debt service.

Community Services — Expenditures for recreation, civic activities, adult education, and other community services — in general, those community-oriented programs not directed toward regular elementary-secondary education.

Capital Equipment — Expenditures for equipment and all other capital items except for buildings and sites.

Buildings and Sites — Expenditures for buildings and sites.

Debt Service — Expenditures for retirement of bonds and state loans.

Other Measures per Pupil Unit

These columns contain several indicators useful in understanding differences between school districts.

Unappropriated Operating Fund Balance — The district's unappropriated operating fund balance on June 30, 1977, divided by 1976-77 resident pupil units.

Change in Fund Balance — The difference between the district's unappropriated operating fund balance on June 30, 1977 and on June 30, 1976, divided by 1976-77 resident pupil units. A negative number indicates that the district's 1976-77 expenditures exceeded revenues in the operating funds.

State and Local Operating Costs — State and local operating costs per pupil unit, 1976-77. This figure, often referred to as adjusted maintenance cost, is used to compare per pupil unit costs of education among districts. Federal financing is not included, since most federal funds are provided to meet specific problems rather than to contribute to general education. Also excluded from the computation are expenditures for capital outlay, debt service, transportation and community services, and receipts from sales of lunches and materials, student activity receipts in excess of disbursements, and refunds from current expense.

Bonded Debt — The total bonded debt of the district, including state loans, on June 30, 1977, divided by 1976-77 resident pupil units.

1976 EARC Value — The 1976 adjusted assessed valuation of the district, as determined by the Equalization Aid Review Committee (EARC), divided by 1976-77 resident pupil units.

Summary Statistics

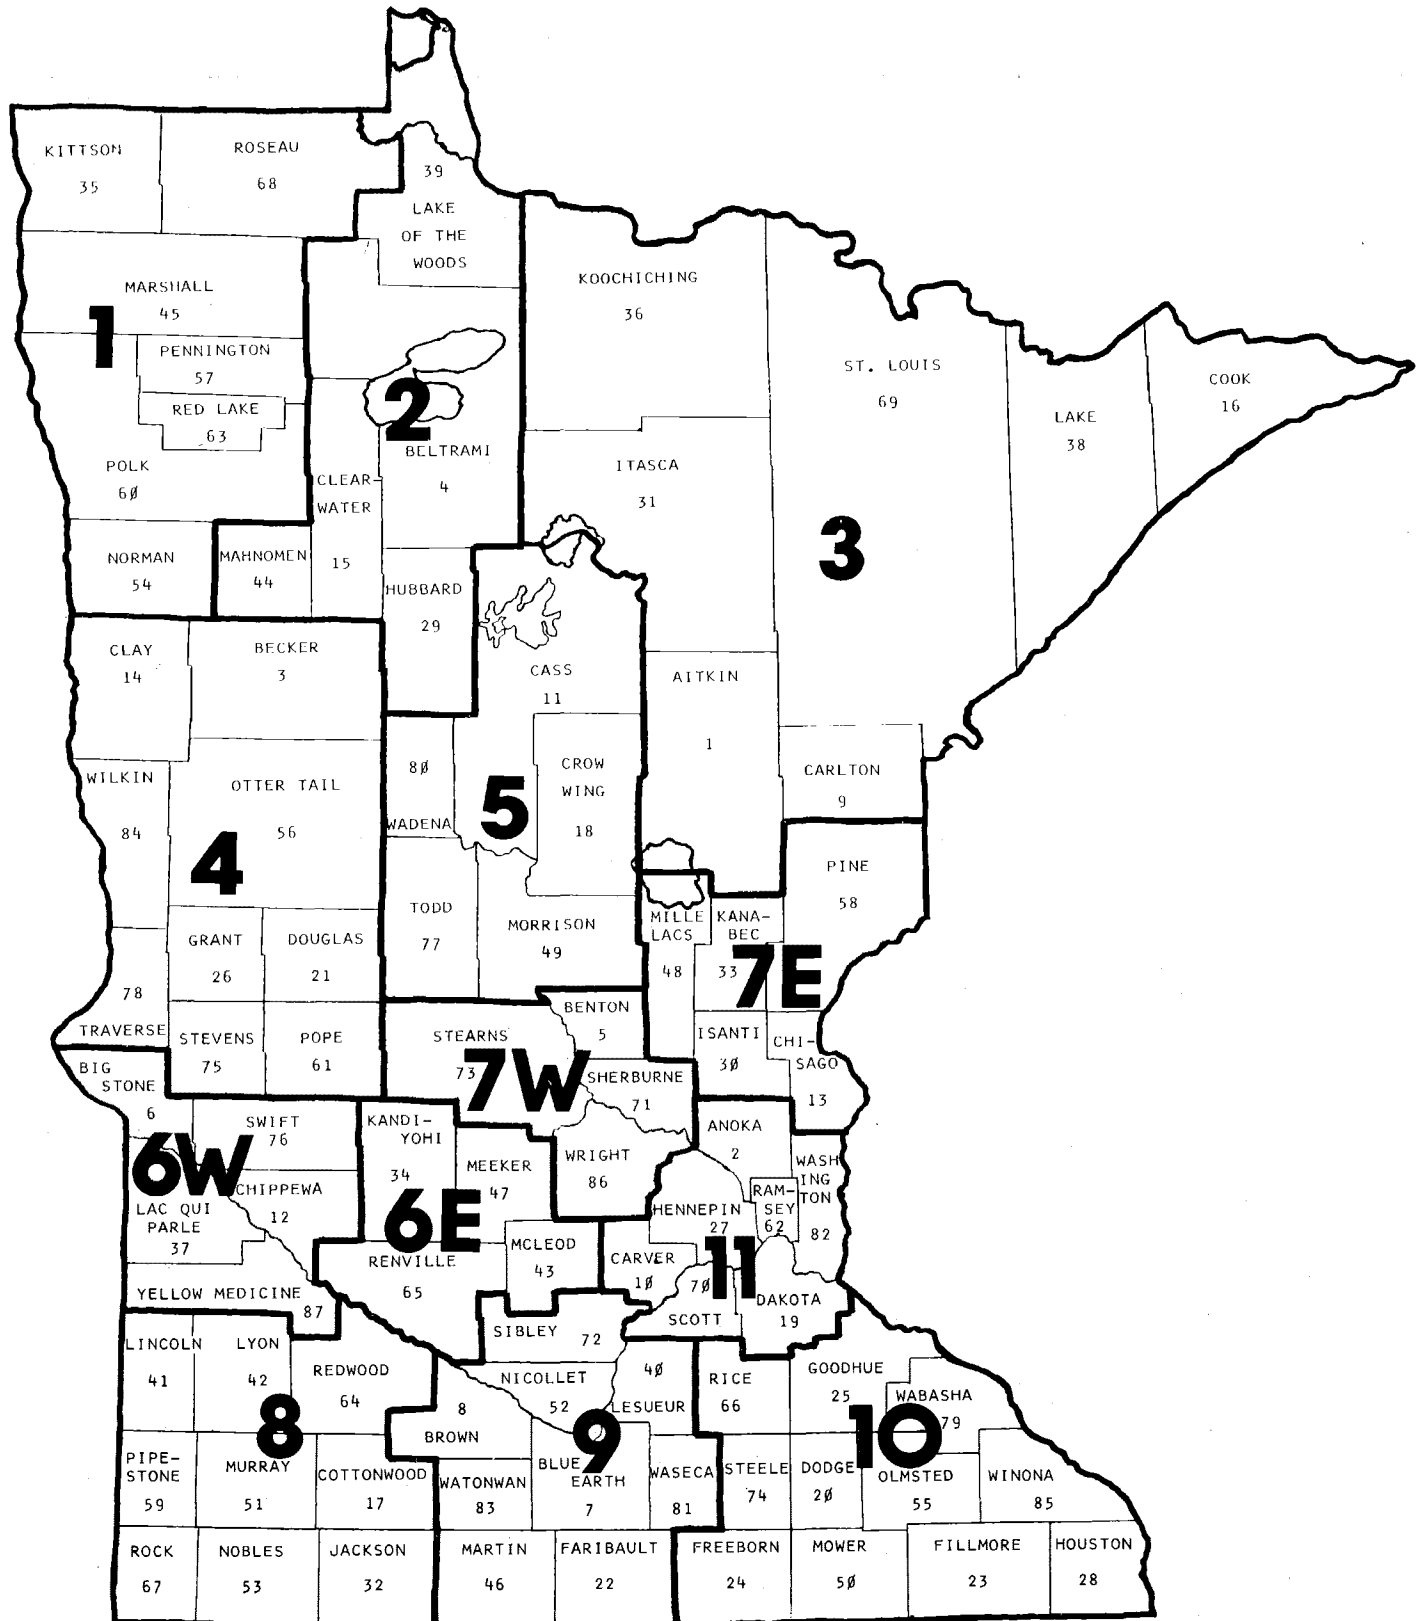

To aid in interpretation of the data, the high and low values, 5th and 95th percentiles*, and the median and mean** are listed below for each data item.

	Low District	5th Percentile	Median (50th Percentile)	95th Percentile	High District	Mean (Average)
October 1977 Enrollments						
Kindergarten	0	14	50	400	3,420	123
Elementary (Gr. 1-6)	48	95	302	2,985	21,153	794

1976 EARC Value	62	9,064	19,431	45,571	79,069	18,977

*The range, defined as the difference between the highest and lowest values of a variable, is a measure of the amount of variability between districts. However, one or more unusually high or low values can significantly increase the size of the range. Because of this problem, the difference between the 95th and 5th percentiles is also frequently used as a measure of variability.

**Both the median and the mean are measures of central tendency. The median is the center value; half the values are above the median and half are below. For most of the statistics, the mean is simply the state total value. For Enrollments, Total Staff FTE, and Total Pupil Units, the mean is the state total divided by the number of districts.

Data for Counties, Development Regions, and the State

The figures listed below are, for each county, totals for all school districts which have their central offices in the county. Totals are also listed for the state's thirteen development regions. The map on page 6 shows the boundaries of these regions.

DEVELOPMENT REGIONS AND COUNTIES	OCTOBER 1977 ENROLLMENTS			PUPIL DATA			PROF. STAFF		TAX RATES		% REVENUES			TOTAL PUPIL UNITS 1976-77

Data for ECSU Regions

The state legislature has set up nine Education Cooperative Service Units (ECSUs), each serving a region of the state. The figures below are totals for each of the ECSU regions. The boundaries of the ECSU regions are the same as the boundaries of the development regions (see map on page 6), with the following exceptions: ECSU region 1 contains development regions 1 and 2, ECSU region 6 contains development regions 6E, 6W, and 8, and ECSU region 7 contains development regions 7E and 7W.
