Agency Financing by Fund 4

Agency Change Summary 6

AT A GLANCE

- Regulates wagering activities on Horse Racing (\$86 million annually) and Card Playing (\$67 million annually) at Canterbury Park and Running Aces Casino and Racetrack
- Licenses Advance Deposit Wagering (ADW) providers and regulates wagering conducted in Minnesota on horseracing via ADW platforms (\$30 million annually)
- Administers \$1.2 million in the Minnesota Breeders Fund for the benefit of owners and breeders of Minnesota bred race horses
- Issues over 5,000 occupational and vendor licenses to industry participants per year

PURPOSE

The Minnesota Racing Commission (MRC) operates in the public interest to ensure the integrity of horseracing and card playing, oversees the proper distribution of funds back into the industry, and provides for the safety and welfare of the human and equine participants. Additionally, the commission works to promote the horse racing and breeding industries in Minnesota in order to provide economic stimulus, offer residents and visitors an exciting entertainment option, and support agriculture and rural agribusiness.

BUDGET

Note: FY 17 operating expenses include \$1,147,000 in breeder fund payouts, which is 49% of the total operating expenses.

Source: Budget Planning & Analysis System (BPAS)

Source: Consolidated Fund Statement

The Racing Commission's basic operations are currently financed entirely by the industry it regulates. Racetrack and occupational license fees (limited by a direct appropriation from the special revenue fund per statute), reimbursements outlined in M.S. 240.30 Subd.9 (<https://www.revisor.mn.gov/statutes/cite/240.30>) and M.S. 240.155 Subd.1 (<https://www.revisor.mn.gov/statutes/cite/240.155>) paid by the racetracks, and regulatory fees paid by advance deposit wagering (ADW) providers provide the funding for Commission operations.

STRATEGIES

To accomplish the Racing Commission's mission of regulating this extremely complex industry, administering the Breeders Fund, and overseeing the safety and welfare of the human and equine participants, a number of strategies are employed:

1. Licensing – Facilitate a licensing process that is detailed, accurate, and administered in a way that licenses are issued only to individuals and vendors who meet the criteria established in law and rule, and whose participation in racing and/or card playing is consistent with the best interests of the industry.
2. Fiscal Oversight – Ensure that all monies flowing through the pari-mutuel, ADW, and card revenue streams are reviewed, tested, and verified in order to keep associations in compliance with their obligations to the participants, the public, and the state.
3. Policing – Engage contractors and hire staff who are experts in the fields of veterinary science, criminal justice, and the rules of racing to conduct drug testing, investigate potential criminal activity, and administer the rules governing horseracing and card playing in order to maintain the highest level of integrity for the wagering public.
4. Civic Engagement – Lead the industry forward through active communication with all areas of state government in order to encourage public policy that will afford the greatest opportunity for the industry to expand and thrive.
5. Education – Educate all participants including licensees, vendors, and all those who work with our equines or the public, on what is expected under our laws and rules.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Equine Drug Testing (blood and urine)	2,576	2,591	CY 16 & CY 17

2016-19 Efficient Tax Service Activity Fiscal Reports	36

AT A GLANCE

In 2017, the Department of Revenue:

- Employed 1,375 people across the state
- Processed 3 million individual income tax returns
- Collected \$23.9 billion in state taxes annually to fund state and local programs
- Collected \$10.9 billion in individual income taxes
- Collected \$5.8 billion in sales taxes
- Collected \$859 million in statewide property taxes
- Assisted 315,000 businesses collect sales tax
- Assisted 3,429 local governments with tax administration
- Responded to over 717,000 phone calls and helped another 168,000 customers by email or in-person
- Served 3 million visitors (20 million page views) through our website

PURPOSE

The Minnesota Department of Revenue's mission is "working together to fund Minnesota's future." Our vision is that everyone reports, pays and receives the right amount: no more, no less.

We work with individuals, businesses, local governments, federal and state agencies, tax professionals, and others to administer 31 state and local taxes. We collect over \$23 billion in state taxes annually to fund state and local programs.

We also collect debt owed to state agencies and local governments. We oversee the uniform application of property tax laws by local governments, administer state property tax refund and relief programs, and make state aid payments to counties, cities, towns, and special taxing districts through 31 state programs.

BUDGET

**Spending by Program
FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Budget Planning & Analysis System (BPAS)

The revenue we collect is allocated through the budget process to fund a wide range of state and local programs – education, health care, roads and bridges, transit, parks and trails, prisons, public safety, job training, economic development, and local government services, among others.

The department’s budget is organized into two major programs: Tax System Management and Debt Collection Management.

Tax System Management includes the following activities:

- Tax Payment and Return Processing
- Administration of State Taxes
- Appeals, Legal Services, and Tax Research
- Agency-wide Operations Support and Oversight

Debt Collection Management collects delinquent tax debts and debts owed to other state agencies. Key activities include:

- Helping customers understand and resolve their state tax and other government agency debts
- Using the collection process when customers do not voluntarily work to resolve their debts

Together, these programs directly contribute to and support the statewide outcome of efficient and accountable government services. In addition, the revenue we collect supports other statewide outcomes, including:

- A thriving economy that encourages business growth and employment opportunities
- Minnesotans have the education and skills needed to achieve their goals
- All Minnesotans have optimal health
- Strong and stable families and communities
- People in Minnesota are safe
- A clean, healthy environment with sustainable uses of natural resources
- Sustainable options to safely move people, goods, services, and information

STRATEGIES

To achieve our mission we have identified the following Department of Revenue strategies:

1. Provide customers with information, education, and services.
2. Create operational efficiencies and leverage technology to secure customer information, and to meet customer and employee needs.
3. Enforce the tax laws by identifying and addressing patterns of non-compliance.
4. Listen to our customers, identify and develop improvements to the revenue system.
5. Foster a productive, innovative, and healthy work environment that provides opportunities for growth and development.

Legal Citation: M.S. 270C.03 establishes the Department of Revenue’s legal authority.

Recommendation:

The Governor recommends additional funding of \$11.374 million in the FY 2020-2021 biennium to maintain the current level of service delivery at the Minnesota Department of Revenue.

Rationale/Background:

Those who file and pay Minnesota taxes need to be able to trust the system that receives their personal information, that other taxpayers are paying their fair share, and that they will receive the right refund amount in a reasonable amount of time. Increased operational costs limit the department's ability to provide the level of service our customers need and expect, and increased demands on the department have created the need for additional funding.

Increased operational and information technology costs

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Absorbing this increase in compensation costs within existing agency base appropriations results in reduced staffing and/or reduced non-compensation spending. Based on existing staffing and previously negotiated contracts, compensation costs are expected to increase 4.0% over the next biennium. These increases cannot be avoided.

Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. For example, technology costs to administer Minnesota's tax system have increased over the last four years and will continue to increase. In the FY 2020-21 Biennium, the Department of Revenue will transition from a local to an enterprise service delivery model for workstation management (laptop/desktop computer support and refresh) and service/help desk support. Regular replacement of workstations will be included as part of the service rate, in order to ensure the security and supportability of state agency computers. The department will also transition to the enterprise service/help desk, which provides 24/7 support to agency staff.

In addition, for the FY 2020-21 biennium, the Department of Revenue's portion of MNIT administrative overhead expenses is projected to increase. MNIT overhead expenses include HR, finance, procurement, enterprise project management, and security activities. These expenses are allocated to agencies based on their total IT spend and total number of dedicated MNIT staff as of fiscal year 2017.

These cost drivers put pressure on agency operating budgets that, without operating increases, would remain flat from year to year.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the Department of Revenue, this funding will cover known employee compensation growth and allow the department to maintain its existing level of information technology services.

Without this funding, the department and MNIT services within it must reduce 82 FTE over the biennium through attrition. This attrition will negatively impact both Minnesota taxpayers -- our customers -- and, potentially, the general fund. Taxpayers will wait longer for refunds and will have a harder time reaching someone in the department by phone or email to have their questions answered. In addition, the department will perform fewer educational classes and audits, both of which can translate to a negative effect on the revenue stream.

Equity and Inclusion:

This recommendation supports a fair, transparent, and equitable revenue system in Minnesota. The department serves a broad base of customers and has a responsibility to deliver services to all. The funding recommended in this proposal will allow the department to continue focusing resources, outreach and education for low-income Minnesotans, people new to Minnesota, the elderly and others who are underserved. This proposal also fosters consistent communication and equal treatment under Minnesota tax laws, and focuses resources and information that the department's entire broad, diverse customer base can understand and use to file returns, pay what they owe, or receive the right refund.

Results:

This proposal is intended to allow agencies to continue to provide current levels of service and information to the public. It will allow the Department of Revenue to maintain its ability to meet our mission of funding Minnesota's future. The vision of, "everyone reports, pays, and receives the right amount: no more, no less" will be realized with the appropriate funds to serve our broad customer base and meet growing needs.

Statutory Change(s): None.

Program: Tax System Managementwww.revenue.state.mn.us**AT A GLANCE**

In 2017, the Minnesota Department of Revenue:

- Interacted with 595,000 corporations, S corporations, partnerships, and other businesses
- Issued 867,000 property tax refunds
- Awarded 30 Volunteer Income Tax Assistance (VITA) grants to organizations that provide tax assistance to minority and low-income communities.
- Provided over 160 free classes for business taxpayers and tax preparers
- Attended five events for military service members and families to promote their eligibility for tax benefits

PURPOSE & CONTEXT

The Department of Revenue's Tax System Management program provides the technology and human resources needed to administer tax laws. The program provides tax information and education, filing and paying services, property tax and state aid administration, and tax enforcement.

These Tax System Management activities help ensure that individuals, businesses, and policymakers have:

- Information and services they need to accurately, voluntarily, and conveniently file and pay their taxes
- Confidence that everyone reports, pays and receives the right amount: no more or no less
- Accurate, impartial, and complete information to make informed decisions

SERVICES PROVIDED

The Tax Management System is responsible for collecting over \$23 billion each year to fund essential services to Minnesotans including: local government and school district aid; services for children, families and seniors; early childhood, K-12 and higher education; health and human services; transportation; public safety; environmental, energy, and agricultural programs; and other important services.

Minnesota's tax system is fueled by the vast majority of people who voluntarily file and pay on time, and who rely on the department for: education and outreach; a robust and reliable filing system; and confidence in the system. When taxpayers do not meet their obligations under the law, we work to bring them into compliance through collection and enforcement efforts.

We provide a variety of services in the Tax System Management program. Specific activities are listed below and are described in more detail in their Budget Activity Narratives.

- Payment and Return Processing
- Administration of State Taxes
- Appeals, Legal Services, and Tax Research
- Agency-wide Operations Support and Oversight

RESULTS

Program: Tax System Management**Activity: Payment and Return Processing**www.revenue.state.mn.us**AT A GLANCE**

In 2017, Payment and Return Processing:

- Processed 2.9 million individual income tax returns
- Sent over 1.9 million individual income tax refunds to Minnesotans
- Processed \$24.7 billion dollars in tax payments
- Opened and sorted 2.5 million pieces of mail
- Served businesses with 61,704 calls to Business Registration
- Sent over 3 million pieces of mail to Minnesotans to help them meet their tax obligations
- Audited 20 business tax type returns during the processing cycle

PURPOSE & CONTEXT

Payment and Return Processing serves individual and business taxpayers and other state agencies. These services include reviewing and processing paper and electronic returns, refunds, and payments submitted to the Department of Revenue. This activity also includes technology development, implementation and support for agency-wide technology needs.

SERVICES PROVIDED

Key Payment and Return Processing activities include:

- Keeping pace with changing technology and fraud schemes
- Providing safe, secure, and convenient ways for filing and paying
- Accurately reviewing and processing returns, payments, and refunds
- Checking returns to prevent fraudulent returns and refunds
- Processing payments and deposits in a timely manner
- Providing technology solutions that facilitate and support tax administration, security of taxpayer data, and continuous business improvements in taxpayer services

We leverage strategic investments in technology to meet the department's mission, vision, and strategies. Investments in the Integrated Tax System and security are key priorities.

The Tax Operations Division within the Payment and Return Processing activity serves all department employees and external customers by providing technology solutions that facilitate tax administration, provide for security of taxpayer data, and support continuous improvements in our taxpayer services.

Information technology (IT) functions are provided under a service agreement with Minnesota IT Services (MN.IT). MN.IT provides the department with hardware, software, and IT professionals to implement, run, and maintain the hardware and software needed to administer the tax code.

MN.IT serves all Department of Revenue employees and external customers of the agency by providing technology solutions that facilitate tax administration, provide for security of taxpayer data, and support continuous business improvements in taxpayer services.

Program: Tax System Management**Activity: Administration of State Taxes**www.revenue.state.mn.us

AT A GLANCE

In 2017, within the Department of Revenue Tax Administration divisions:

- Income Tax and Withholding provided program and compliance oversight for the collection of \$10.931 billion in individual income taxes
- Corporate Tax provided program and compliance oversight for the collection of \$1.205 billion in various corporate taxes
- Special Taxes provided program and compliance oversight in the administration of more than 47 unique taxes and fees
- Criminal Investigations completed the investigation of 49 tax noncompliance cases
- Sales and Use Tax handled 58,000 phone calls, 13,000 emails, 3,100 web messages and 250 walk in taxpayer requests
- Income Tax and Withholding handled 232,2000 phone calls, 39,000 emails and 30,450 web messages and 2,860 walk in taxpayer requests
- Special Taxes completed 3,445 outreach trainings, stamp sales transactions, and county visits
- Sales and Use Tax conducted 98 external classes for customers and 125 internal classes for employees

PURPOSE & CONTEXT

State Tax Administration provides information and services to our customers so they can understand and fulfill their tax obligations. It also includes enforcement efforts such as fraud prevention, audits, and investigations.

The Department of Revenue administers 31 state taxes including: individual income tax; sales and use tax; corporate franchise tax and other business income taxes; estate tax; motor fuels excise tax; alcoholic beverage taxes; cigarette tax and tobacco products tax; controlled substances tax; property tax, mortgage registry tax, and deed transfer tax; lawful gambling taxes; insurance premium taxes; MinnesotaCare taxes; mining taxes; state property tax; air flight property tax; rural electric co-ops tax; and solid waste management tax.

State Tax Administration serves Minnesota individual and business taxpayers, tax professionals and preparers, local tax administrators, legislators and staff, nonprofit groups, governor and staff, and members of the news media – among others.

We also oversee local property tax administration and state aids, serving taxpayers, local administrators, and state policymakers. These activities promote equity and uniformity throughout the state's complex property tax system.

SERVICES PROVIDED

Key tax administration activities include:

- Providing customers the information, training and services they need to voluntarily comply with tax laws
- Keeping pace with changing technology and laws
- Responding to customer inquiries, in the format desired by the taxpayer (walk-in, call-in, and click-in)
- Protecting customer data
- Effectively using state resources to identify and audit noncompliant taxpayers (individual and business)

- Providing education, guidance, and assistance to county assessors, auditors, and treasurers
- Overseeing local property tax administration to promote compliance and uniformity
- Administering a range of local aid payments
- Collecting, analyzing, and providing data to stakeholders
- Supporting the Minnesota State Board of Assessors

Program: Tax System Management**Activity: Appeals, Legal Services, and Tax Research**www.revenue.state.mn.us

AT A GLANCE

In 2017, Appeals, Legal Services and Tax Research:

- Closed 1,316 administrative appeals, of which 3.2% were appealed to court
- Worked on 117 cases filed in small claims and Tax Court
- Published five Revenue Notices
- Completed on-time revenue estimates for 98.8% of the bills heard in tax committees
- Responded to 45 Data Practices requests

PURPOSE & CONTEXT

The Appeals, Legal Services and Tax Research Divisions provide tax policy development and tax administration support through legal and policy guidance to Department of Revenue employees and customers and by providing information and analysis about Minnesota's tax system.

Appeals, Legal Services, and Tax Research serves individual and business taxpayers, tax administrators, the governor and staff, legislators and staff, state agencies, local governments, and nonprofit organizations.

SERVICES PROVIDED

Appeals and Legal Services Division

This division comprises the following units: Appeals; Legal Services; and Litigation, Disclosure and Records Management. See below for details.

Appeals

This unit provides an informal forum for the reconsideration of tax audits, refund denials, and penalties issued as tax orders by the department. Taxpayers who disagree with these orders may file an administrative appeal with the Department of Revenue or appeal to Minnesota Tax Court or District Court, depending on the type of order.

Other key activities include:

- Providing feedback about appeal resolutions to the department's audit and collection divisions
- Working with the Attorney General's Office staff on cases that are litigated in court
- Handling small claims cases that are filed in Tax Court

Legal Services

This unit works closely with the Commissioner of Revenue, the Governor's Office, and the Legislature to develop state policy and clarify tax issues to ensure that the revenue system is fair, efficient, reliable, competitive, and understandable.

Legal Services attorneys serve as legal counsel to the Department of Revenue by providing legal and policy advice to department staff about tax matters and actively participating on division policy teams. Our attorneys:

- Draft tax-related legislation and testify before legislative committees about the legal aspects of each bill
- Draft and amend Minnesota Rules that interpret tax laws so they can be applied to everyday use
- Create Revenue Notices that advise taxpayers about the department's position regarding tax laws

The department's Rules and Revenue Notices are published in the State Register and posted on our website.

Legal Services also provides training to department employees about tax law changes and other tax-related subjects. These activities support tax policy development and tax administration.

Litigation, Disclosure and Records Management

This unit manages the compliance activities associated with state and federal requirements related to tax returns and return information. Key activities include:

- Providing guidance on the retention of all department records
- Directing responses to data practices requests for department information
- Managing the department's small claims Tax Court cases and significant litigation by acting as liaison between the department and the Attorney General's Office.

Tax Research Division

The Tax Research Division provides customers with information and analysis about Minnesota's tax system. Our researchers provide accurate, complete, and timely information to state policymakers, government officials, the media, and the public so recipients can make well-informed decisions. Key activities include:

- Providing policy guidance
- Estimating the impacts of proposed legislation
- Forecasting future state revenues
- Preparing studies and reports mandated by the Legislature

Tax Research creates and maintains databases of tax data and complex models for analyzing the tax system. Our key products include the Tax Incidence Study, Tax Expenditure Budget, Tax Handbook, and annual tax statistics for the department's website.

Program: Tax System Management**Activity: Agency-wide Operations and Oversight**www.revenue.state.mn.us**AT A GLANCE**

In 2017, Operations and Oversight divisions:

- Partnered with agency leaders to fill 410 positions
- Launched an agency-wide, four-year diversity and inclusion strategic plan to increase employee engagement across the organization and recruit, hire and train a diverse workforce
- Managed 11 locations throughout the state and ensured physical security standards are maintained
- Delivered 72 development courses to 2,842 learners in FY 2018
- Facilitated an agency-wide budget workgroup process to manage and administer agency budget of approximately \$160 million
- Published 47 press releases and responded to over 160 press inquiries
- Created and maintained over 80 individual and business tax forms
- Facilitated 30 agency-wide projects and provided data and other support on 128 division- or unit-level projects
- Identified through a survey that 79.5% of department employees believe the agency's culture supports continuous improvement to our work and services

PURPOSE & CONTEXT

Operations and Oversight provides the overall strategic and day-to-day functions required to administer programs across the Department of Revenue. Activities include agency leadership, strategic planning and oversight, workforce recruitment, development, training and retention, internal and external communication with employees and customers, financial and program oversight and accountability, and agency planning, program and financial evaluation and development.

We serve all department employees, individual and business taxpayers, tax administrators, the governor and staff, legislators and staff, state agencies, local governments, and nonprofit organizations.

Operations and Oversight helps the Department of Revenue accomplish its goals through the following strategies:

- Promote the mission and values of the department through executive leadership, policy development, strategic planning, and internal and external communications.
- Provide statutorily required services and guidance in the areas of finance, human resources administration, and employee development.
- Use best and current practices to manage information technology, planning and performance, and diversity and inclusion activities.
- Hire and maintain a high-quality and diverse workforce.
- Safeguard the state's assets and comply with federal and state regulations and agency policies through compliance with established procedures and internal controls.

SERVICES PROVIDED

Operations and Oversight provides a wide range of services including budget management, financial transactions, financial reporting and analysis, procurement and inventory management, internal audit, asset and property management, recruitment and selection, job classification, salary and benefit administration, labor contract administration, employee training and internal and external communications.

We work closely with MN.IT Revenue and other stakeholders to ensure continuous operation and accessibility to technology systems. Our planning and performance unit conducts research and evaluation projects, prepares legislative and other reports, and manages continuous improvement activities. We also develop and update business continuity and risk management plans.

Program: Debt Collection Managementwww.revenue.state.mn.us**AT A GLANCE**

In 2017, the Minnesota Department of Revenue:

- Collected over \$323 million owed to Minnesota governments
- Resolved 217,000 tax debt cases
- Answered over 325,500 incoming phone calls each year from customers who owe debt
- Assisted more than 2,200 walk-in customers

PURPOSE & CONTEXT

The Department of Revenue's Debt Collection Management program collects past-due tax debts and debts owed to other state agencies in Minnesota. We facilitate all aspects of debt collection, making it more efficient for government as a whole by centralizing the work instead of duplicating it in each agency.

This centralized approach also makes it easier for a debtor who may owe debt to multiple agencies by providing a one-stop resolution center to settle their state government debts. We help people who owe understand their obligations and work to set up payment plans when appropriate.

The Department of Revenue started collecting non-tax debts for other state agencies in 1995, when legislation centralized debt collection services. In 2008, new legislation allowed local governments to refer their debts to us. We now collect 171 types of fees, fines, taxes, and payments for a range of public agencies.

SERVICES PROVIDED**Helping Customers**

A large part of the department's role is helping customers understand their obligation and working to get – and keep – them in compliance. To do that, we provide education and outreach to customers through:

- Training events
- Outreach events
- Videos
- Website content
- Phone calls
- Emails
- Letters
- In-person customer contact

Collection Process

When a debt is not paid to Minnesota, a state agency, or a local jurisdiction, that debt is referred to the Department of Revenue. The collection process begins the same way for all debtors. We send the customer a notice with details on the debt, their rights, and how they can resolve the debt.

Many customers work with us at this point to resolve their debt by making a full payment or by setting up a payment plan. If the customer fails to respond to the written notice, we take actions to collect the debt. Each case is different and these collection actions may vary based on many factors. Depending on the circumstances, we may:

- Levy wages or financial accounts
- File liens against property
- Offset (take) tax or other refunds
- Hold owners or corporate officers personally liable for business debts
- Revoke professional or business licenses
- Seize business or personal property

We ensure that everyone reports, pays, and receives the right amount by:

- Printing letters, processing payments and returns, registering customers in the system, making financial adjustments, and handling and distributing incoming correspondence
- Reconciling accounts, and issuing payments to banks, the general fund, and other agencies
- Issuing legal opinions, providing representation on legal matters, resolving internal and tax court appeals and administrative hearings
- Programming the technical systems needed to track and process debts
- Protecting customer data
- Communicating and reaching out to the public through direct and digital communication and in the news media

Science Museum of Minnesota

Agency Profile 1

Agency Expenditure Overview 4

Agency Financing by Fund 5

Agency Change Summary 6

AT A GLANCE

Highlights of FY 2018:

- More than 815,000 people visited the museum and outreach sites statewide
- More than 162,000 students were served statewide through school outreach, field trips, and teacher professional development
 - 78,359 visitors paid no admission fee

PURPOSE

VISION: *We envision a world in which all people have the power to use science to make lives better.*

MISSION: "Turn on the Science: Inspire learning. Inform policy. Improve Lives."

ROLE: The Science Museum of Minnesota (SMM) offers informal STEM (science-technology-engineering-math) learning opportunities to a variety of people including: adult learners, families with school-age children; K-12 teachers, students, and school districts; diverse under-served urban youth; and state policy makers.

The SMM is a top tier science and technology center with innovative interactive exhibits emphasizing hands-on learning; and is a natural history museum with scientific collections and interpretive exhibits.

STATEWIDE OUTCOME:

Minnesotans have the education and skills needed to achieve their goals. SMM provides excellent informal science, technology, engineering, and math (STEM) education programs to reinforce the achievement of Minnesota academic standards, background and preparation for STEM workforce development, and lifelong learning.

BUDGET

**Spending by Category
FY 17 Actual**

Note: FY17 spending by category includes all SMM spending regardless of funding source.

Historical Spending

Source: FY17 Audited financial statements
Source: Audited Financial Statements FY08-FY17

The museum budget uses diversified sources of funding. The General Fund category of the budget includes the State appropriation. The Other State Funds category includes other direct state funds. The State Grants category includes funds awarded directly to the Science Museum of Minnesota from other state agencies. The Federal Funds category includes funding received directly to the Science Museum of Minnesota for grant support, such as funds received from the National Science Foundation. The Program and Other category includes all other Museum spending from all other sources.

STRATEGIES

Public Visitor Place.

- SMM produces and presents world class special exhibits such as *The Science Behind Pixar*, *Sportsology*, *Mental Health: Mind Matters*, and *RACE: Are We So Different?* for audiences at our museum and at museums nationwide.
- Per our current strategic plan, *Strategic Plan: 2020 & Beyond*, we will “Improve equity of, and access to, the museum experience and educational programs to attract the broadest audiences and ensure a positive, meaningful STEM learning experience for all visitors, with a focus on girls and women, people of color, and low-income households.” To ensure accessibility to the broader community, we offer free and reduced admission to families, individuals from low-income households, and schools in need. SMM offers a broad variety of STEM education programs for families, children and youth (pre-K through post-secondary), and adult learners.

Programs and Resources for K-12 students, teachers, and school districts.

- SMM is one of Minnesota’s leading destinations for school field trips.
- Our school outreach programs reach K-12 classrooms statewide.
- SMM provides professional development to educators statewide, focused on promoting equity and inclusion in STEM education and professions with regard to ethnicity, gender, gender identification, cultural background, and socioeconomic circumstances.
- SMM’s Kitty Andersen Youth Science Center (KAYSC) offers year-round out-of-school time programs and follows a STEM Justice framework in which STEM learning is used to solve community problems. The KAYSC reaches a majority of youth of color from low-income households.

RESULTS

SMM measures success quantitatively and qualitatively:

1. The total number served includes both people who visit the museum and those who take part in our offsite programs statewide. The overwhelming majority of these are Minnesotans with the remainder representing out of state visitors who recognize SMM as a premiere tourist attraction in the Twin Cities. This number is an important “bottom line” indicator of success.
2. Each year the museum must raise private funds from individuals, corporations, foundations, sponsors, and museum members. Our ability to raise funds from private donors is an indicator that members of the public resonate with our value proposition and the delivery of our educational mission. They are willing to invest their own resources in supporting the museum financially.
3. In January 2014, SMM established a searchable database for teachers and parents that links the museum’s exhibits and educational resources with Minnesota State Education Standards. This is an important resource for our key audience of K-12 educators.
4. Our school network tracks the MN counties we serve through field trips, school outreach residencies and assemblies, and teacher professional development. We are pleased to share that we again reached all 87 counties in FY18.

AT A GLANCE

- 6.2 million filings from businesses, Uniform Commercial Code (UCC), Tax Liens, Effective Financing Statement (EFS) and notaries in a Secretary of State maintained and operated database as of July 2018
- As of July 2018, there have been over 43,000 new business filings processed in CY 2018
- 3.258 million registered voters in Statewide Voter Registration System (82% of all eligible voters) as of July 2018
- 8,052 applicants and participants served by the Safe at Home program as of July 2018
- Contribute nearly \$22 million to the general fund each biennium

PURPOSE

The Office of the Secretary of State is a constitutional office headed by the independently-elected Secretary of State. As the chief election official in Minnesota, the Secretary of State oversees the administration of elections, and promotes voting and civic engagement. The Secretary of State also facilitates commerce, maintains the records of the state, and provides key services for those who fear for their safety through administering the Safe at Home address confidentiality program. The Secretary of State serves on the State Board of Investment, the Executive Council, and other specified boards.

The Secretary of State partners with local election officials to conduct elections that are fair, accurate, secure, and transparent, thereby providing **efficient and accountable government services**. By providing quality customer service and making it easy to search records of active businesses in Minnesota, the Secretary of State helps promote **a thriving economy that encourages business growth and employment opportunities**. The Office has made it easier for citizens and businesses to interact with the Office by developing online services for voters, businesses, and those interested in Open Appointments. The Safe at Home address confidentiality program provides a critical service to survivors of domestic violence and others who fear for their safety, which in turn helps promote **strong and stable families and communities** and works to ensure that **people in Minnesota are safe**.

BUDGET

**Spending by Activity

Historical Spending

Source: Consolidated Fund Statement

STRATEGIES

The core functions of the Office are:

- Administer and oversee Minnesota's elections
- Safeguard, record, and retrieve government documents
- File business documents, record liens, and retrieve both on demand
- Issue notary public commissions
- Run the State of Minnesota's Open Appointments process
- Administer Safe at Home, Minnesota's address confidentiality program

The Office partners with local election officials at the county, city, school district, and township levels to conduct elections in the state. The Office provides the backbone of the elections system by developing and securing key election databases, specifically the Statewide Voter Registration System, which includes records for all of the state's 3.2 million registered voters and the Election Reporting System, through which vote totals are reported. The Office provides training and support to local election officials and has developed online tools, including online voter registration, online absentee ballot requests, and online lookup tools, to provide convenience to voters and cost savings to local election officials. The Office also engages in extensive efforts to provide information to Minnesotans about registration and voting by working with businesses, non-profits, service organizations, schools, and others throughout the state.

Similarly, the Office continues its efforts to increase online resources for business services, including allowing as many business filings as possible to be made online in real time, providing more efficient and responsive service to our customers. Any customer who wishes can still seek information and file business and UCC documents in person or by mail. Fees collected for these services, and others provided by the Business Services Division, add approximately \$22 million to the general fund each biennium.

The Safe at Home address confidentiality program provides those who fear for their safety, especially survivors of domestic violence and stalking, with a way to go about their daily lives without having to disclose their home address. The Office provides a mail-forwarding service to more than 2,600 active participants (encompassing more than 1,000 households and over 200,000 pieces of mail annually), assists them in interactions with businesses or government entities who are unfamiliar with the program, and trains and supports application assistants who are employed by victim service agencies throughout the state. The program remains the strongest in the country; a position solidified when the legislature made it possible for Safe at Home participants to purchase property confidentially. As additional states adopt address confidentiality programs, several states, such as Wisconsin and Iowa, have looked to Minnesota's program as a model.

The following statutes provide the legal authority for the Office of the Secretary of State:

Minnesota Constitution

Minnesota Statutes, Chapter 5, 5A, 5B, 201, 202A, 203B, 204B, 204C, 204D, 206, 211A, 302A, 303, 304A, 308A, 308B, 317A, 319B, 321, 322A, 322B, 323A, 333, 336, 336A.

FY 2020-21 Biennial Budget Change Item

Change Item Title: Litigation Fees

Fiscal Impact (\$000s)	FY 2019	FY 2020	FY 2021	FY 2022	FY 2023
General Fund					
Expenditures	1,290	0	0	0	0
Revenues	0	0	0	0	0
Other Funds					
Expenditures	0	0	0	0	0
Revenues	0	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,290	0	0	0	0
FTEs	0	0	0	0	0

Recommendation:

The Governor recommends \$1.29 million from the General Fund in FY 2019 for the Office of the Secretary of State to make a one-time payment of court-ordered attorney fees as a result of the U.S. Supreme Court decision holding a portion of Minnesota Statutes unconstitutional in *Minnesota Voters Alliance v. Mansky*, No. 16-1435, 585 U.S. ___, 138 S. Ct. 1876 (2018). The Office is currently litigating the final amount of fees owed to plaintiffs and anticipates that the court will make a determination on the total amount of fees owed early in the 2019 legislative session. The Governor recommends these funds for the payment of court-ordered fees and costs in FY 2019.

Rationale/Background:

In 2010, several organizations and individuals sued the Minnesota Secretary of State, as well as Ramsey and Hennepin county election officials, challenging the constitutionality of a portion of Minnesota Statute § 211B.11. Minnesota Statute § 211B.11 prohibits the wearing of political insignia at or about a polling place, and has been Minnesota law since 1988. After nearly eight years of litigation, the U.S. Supreme Court held that a portion of the statute was unconstitutional. Under federal law, plaintiffs are entitled to seek reimbursement for attorney fees and costs associated with litigating the constitutional challenge, and plaintiffs are seeking reimbursement.

On January 8, 2019, the appellate attorney fees and costs total to date, from judgements, was determined to be \$983,760. This amount will increase by approximately \$486 every week from January 8, 2019 until payment is made. In addition, it is anticipated that plaintiffs will seek an additional \$250,000 - \$300,000 in attorney fees and costs related to their work in the district court. Assuming that the district court payment is \$300,000, inclusive of potential interest, and assuming that a payment is made by March 19, 2019, the Office of the Secretary of State requires \$1.29 million in a one-time General Fund appropriation to pay these court-ordered attorney fees and costs owed to the plaintiffs. This amount is an estimate and might require adjustment once the judgement for attorney fees and costs related to the work in district court is made.

Proposal:

The Office of the Secretary of State is proposing a one-time payment from the general fund to cover the costs of unavoidable litigation fees relating to a Supreme Court case in which a section of a state statute was found to be unconstitutional.

This is not a new initiative, a change to an existing program, or an ongoing request. This will simply cover court ordered attorney fees and costs owed to plaintiffs due to the U.S. Supreme Court holding a portion of Minnesota Law unconstitutional in *Minnesota Voters Alliance v. Mansky*, No. 16-1435, 585 U.S. ___, 138 S. Ct. 1876 (2018).

Equity and Inclusion:

- This request is not aimed at reducing or eliminating any disparities for identified groups.
- There are no potential positive or negative impacts on the identified groups.

Results:

Receiving additional funds to pay court ordered litigation fees will allow the Office to meet the terms of the court order to continue to provide current levels of service and information to the public.

Statutory Change(s):

N/A

Office of the Minnesota Secretary of State

FY 2020-21 Biennial Budget Change Item

Change Item Title: Operating Adjustment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	392	513	513	513
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	392	513	513	513
FTEs	0	0	0	0

Recommendation:

The Governor recommends additional funding of \$905,000 in the FY 2020-21 biennium from the General Fund for the Office of the Secretary of State to maintain existing staffing levels and allow the Office to continue to provide current levels of service and information to the public.

This recommendation is equal to a 6.8% increase to the Office's General Fund base budget for the FY 2020-2021 biennium.

Rationale/Background:

Each year, operating costs such as rent and lease, utilities, and IT continue to grow. In addition to these operating costs, salary and compensation-related costs and health care contributions increase annually. Despite these increases, the Office of the Minnesota Secretary of State's general fund appropriation has remained flat over the past two biennium and is currently at an amount slightly lower than the Office's 2003 general fund appropriation.

Over the past four years, the Office has been able to work with less, maintaining the services Minnesotans have come to expect of the Office. But growth in these costs has reached a point where the Office will not be able to maintain current levels of service without additional resources.

If an operational increase is not provided, the services the Office provides to Minnesotans will be impacted. Some examples include:

- Fewer staff resources available to help Minnesota business owners register their business, resulting in a possible decrease of the Office's net contribution of over \$20 million to the General Fund each biennium.
- Fewer staff resources available to assist counties, cities, and townships conduct their elections.
- Insufficient staff resources in the Safe at Home Program, resulting in reduced capacity to assist those who fear for their safety.
- Decreased capacity to safeguard, record, and retrieve government documents in a timely manner.

Proposal:

The Office of the Secretary of State proposes an operating increase of \$905,000 in the FY 2020-21 biennium to maintain the Office's delivery of current services.

The proposed budget increase is intended to address inflation and other economic factors that drive the Office's costs and allow the Office of the Secretary of State to continue to provide the quality experience, services, programs, and information that Minnesotans expect. This funding would cover current employee compensation growth, including unavoidable health insurance premium increases.

Additionally, this increase will allow the Office to continue providing services at the level that results in the Office contributing over \$20 million to the General Fund above the Office's appropriation.

Equity and Inclusion:

- This request does not directly impact any identified groups. (Racial and Ethnic groups, Lesbian, Gay, Bisexual, and Transgender groups, Persons with Disabilities and Veterans)
- This request is not aimed at reducing or eliminating any disparities for identified groups.
- There are no potential positive or negative impacts on the identified groups.

Results:

This request is sought to allow the Office of the Secretary of State to continue to provide current levels of service and information to the public. Examples of current performance measures are shown below.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of new business filings	62,500	67,000	2016/2017
Quantity	Number of business web filings	346,000	359,500	2016/2017
Quantity	Number of UCC/Tax Lien & CNS web filings	181,000	177,000	2016/2017
Quantity	Number of underage children in Safe at Home program	1,144	1,371	2015/2017
Quantity	Total number of individuals served by the Safe at Home program	2,777	3,439	2015/2017
Quantity	Number of open appointment applications	2,105	3,044	2015/2017
Quantity	Number of registered voters	3,611,892	3,623,913	2012/2016
Result	Voter Turnout	2,950,780	2,968,281	11/6/2012 11/8/2016

Statutory Change(s):

No statutory changes are needed for this change item. The following statutes provide the legal authority for the Office of the Secretary of State: Minnesota Constitution , Minnesota Statutes, Chapter 5, 5A, 5B, 201, 202A, 203B, 204B, 204C, 204D, 206, 211A, 302A, 303, 304A, 308A, 308B, 317A, 319B, 321, 322A, 322B, 323A, 333, 336, 336A.

Office of the Minnesota Secretary of State

FY 2020-21 Biennial Budget Change Item

Change Item Title: 2018 HAVA Election Security Funds State Match

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	163	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	163	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$163,000 one-time in FY 2020 from the General Fund for the Office of the Secretary of State to meet the state matching requirements described in the Consolidated Appropriations Act of 2018, which will allow the Office to use \$6,595,610 in federal Help America Vote Act (HAVA) funds to secure and improve Minnesota's election systems.

This recommendation is equal to a 2.4% increase to the Office's General Fund base budget in FY 2020.

Rationale/Background:

In September of 2017, the Office of the Minnesota Secretary of State was informed by the US Department of Homeland Security that Minnesota was one of 21 states targeted by entities acting at the behest of the Russian government. With this news, and in light of the designation of elections as critical infrastructure, the Office joined other secretaries of state and national stakeholders to work with Congress and find funding for states to address this immediate security need. Congress responded to this need by approving funding for election security in the Consolidated Appropriations Act of 2018, signed into law in March of 2018.

The Consolidated Appropriations Act of 2018 included \$380 million in grants for states to improve the administration of elections for Federal office. These grants are authorized under Title I Section 101 of the Help America Vote Act (HAVA) of 2002, and are designed to provide states with additional resources to secure and improve their election system. Minnesota's federal share of the \$380 million is \$6,595,610.

States are required to match 5 percent of the 2018 HAVA funds within two years of receiving federal funds, and Minnesota is required to spend \$329,781 in state matching funds. The federal Elections Assistance Commission (EAC) has confirmed that \$167,000 the Office spent on election security can be credited towards the required state match. With this credit, the outstanding state match requirement is \$162,781.

Proposal:

The Office of the Secretary of State requests \$162,781 in general funds to meet the 5% match the 2018 HAVA funds require. This matching funding will allow the Office to utilize the \$6,595,610 in federal funds after legislative appropriation. Once the federal funds appropriated by the legislature, the Office proposes using the HAVA funds in five specific categories: auditing, communications, cybersecurity, e-Poll book and equipment, and Minnesota's Statewide Voter Registration System.

The Office worked with stakeholders, including representatives from the counties, cities, and townships, as well as members from the disability community, and cybersecurity experts, to develop a comprehensive spending plan for the greater \$6,595,610 election funds. Examples of what the working group has proposed are below:

- **Strengthening, securing, and modernizing the Statewide Voter Registration System (SVRS)**
Minnesota's Statewide Voter Registration System was launched in 2004 using over \$1.2 million of state general fund dollars and over \$5.1 million in funds appropriated from the federal HAVA account. Since its development, the Office has added various components to accommodate changes to voting and elections. Because of this, the system is in need of investment to keep it functioning well.

The Office feels that the most efficient way strengthen, secure, and modernize SVRS is to invest in a re-work of the system. This would be done piece by piece, rather than re-writing the system from scratch with a large rollout once complete. The Office is requesting funds to hire three additional staff, including an IT Business Analyst, IT Developer, and an Elections Administration Specialist to supplement current Office staff during this project. Estimated costs for these three additional staff for a four-year period is \$1.4 million total.

- **Ongoing support for multi-factor authentication**
Multi-Factor Authentication (MFA) is a security system recommended by the Department of Homeland Security and a National Institute of Standards and Technology (NIST) standard that requires more than one piece of information to verify a user's identity for a login. Using MFA provides an extra safeguard for the Office of the Secretary of State when county or local election officials access our system.
- **Licensing for systems scanning/testing**
Regular and comprehensive scanning and testing of the Office's public facing websites is a direct recommendation from the Department of Homeland Security and a NIST standard.

Currently, the Office maintains four licenses to scan the online absentee ballot application and voter registration tools, the Minnesota Business and Lien System, and the notary services online portal. Additional licenses are needed so that all of the public facing websites and online tools can be scanned for vulnerabilities.

This will allow the Office to purchase 20 additional licenses to ensure all of the Office's public websites can be scanned and a full vulnerability review of the underlying code can be done.

- **Next generation antivirus software**
As viruses and malware advance, so must our antivirus software. Additional antivirus software will detect new viruses and malware without daily/hourly signature updates, and is needed to augment our current "signature based" antivirus software with next generation "behavior based" software. "Signature based" software looks at specific known or previously identified malicious coding and then blocks that malicious coding. "Behavior based" software analyzes what that coding does, even if the coding has not been previously identified as a known malicious code and instead blocks the code based on the malicious behavior.

This cost will cover antivirus software for all of the Office's approximately 200 workstations and servers at \$44.81/device, and is recommended by MN.IT Security.

- **Policy writer**
The Department of Homeland Security recommends that the Office hire a policy writer to develop written based cybersecurity policies and procedures. This policy writer's services are anticipated to be about six months in length, with an approximate hourly rate of \$140/hour. Once initial policies are done, our office believes current staff will be able to handle the yearly reviews and updates.
- **Cyber Navigator**
Given the fact that many Minnesota counties and cities do not have their own cyber security or IT expert on staff, the Office is proposing the hiring of a "Cyber Navigator". This cyber navigator would be a cyber security expert that can work with the Office of Secretary of State, counties, and cities to provide cyber

security training, system updates, and patches. This person will educate election officials on election security specifically, including everything from recognizing and reporting a threat, to learning how hackers could try to access their networks, and how to keep their systems secure.

- **Assess Minnesota’s data sharing and post-election review/audit process**

The Office will engage outside experts to 1) analyze and make recommendations regarding Minnesota’s current post-election review/audit process, including examining unadjusted differences, with the goal of quantifying its likelihood of detecting tabulation and other errors, and 2) thoroughly examine and audit the security of information sharing between the Office and other agencies and entities.

- **Invest in improvements for securing information sharing with counties**

The Office will develop or contract with a third party vendor for solutions to improve the security of sensitive information and data exchanges between counties and the Office. This may take many forms, including enhanced email security and developing a secured portal where links and other sensitive information is to be shared.

- **Enhance website security and accessibility**

The Office will invest in additional security measures to enhance the security of the Minnesota Secretary of State’s website. Additionally, we will ensure all pages of the website are accessible to those who may have a disability and make all webpages mobile-friendly. This will allow all Minnesotans to have equal access to the same reliable and accurate information, regardless of how they visit the website or any disabilities they may have.

- **Recruit and train election officials**

The Office will use a portion of the federal funds to assist counties and cities in recruiting election judges and conducting additional election judge training related to accessibility at the polling place, using and securing e-Pollbooks, physical security, and cybersecurity.

- **Provide sub grants to local jurisdictions for improved election security and accessibility**

The Office will invest in the security of local jurisdictions’ election security by providing sub grants to local jurisdictions for updated computers and/or software, additional physical security for election equipment, and increased polling place accessibility.

- **Expand absentee and mail-voting for voters with a disability**

The Office will increase accessibility for absentee and mail-voting by working with the Legislature to allow voters with a disability to receive and mark their ballot electronically, allowing them to vote privately and independently.

In order to use the 2018 HAVA funds to strengthen Minnesota’s elections, the Legislature needs to authorize use of federal funds under Minn. Stat. § 5.30 and the state must provide the state matching funds at 5% of the total 2018 HAVA award.

Equity and Inclusion:

The security and integrity of Minnesota elections benefits all voters. Securing our elections with the funds provided may prevent bad actors from disenfranchising select voters. Without these funds to use on cybersecurity improvement and upgrades, the Office has no way of telling which identified groups may be negatively impacted.

Results:

This request seeks matching funds which will allow the Office of the Secretary of State to utilize federal funds to improve the administration of elections for Federal office, with the goal of securing our elections from foreign interference and maintaining public confidence in Minnesota's election system. Examples of current performance measures for Minnesota's elections are shown below.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of registered voters	3,611,892	3,623,913	2012/2016

Quantity	Online Absentee Applications	42,567	152,862	2014/2016
Quantity	General Absentee Ballots Returned by Election Day	263,487	614,037	11/6/2012 11/8/2016
Result	General Absentee Ballots Acceptance Rate	97.74%	98.64%	11/6/2012 11/8/2016
Quantity	Online Voter Registrations	29,142	350,849	2014/2016

Statutory Change(s):

None. The legislature needs to authorize the use of the federal 2018 HAVA funds under Minn. Stat. § 5.30.

Office of the Minnesota Secretary of State

FY 2020-21 Biennial Budget Change Item

Change Item Title: Safe at Home Program

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	222	235	235	235
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	222	235	235	235
FTEs	1	1	1	1

Recommendation:

The Governor recommends additional funding of \$222,000 in FY 2020 and \$235,000 each year thereafter from the General Fund for the Office of the Secretary of State to accommodate the growth of Minnesota's Safe at Home program, to provide enhanced security for the program, and to grow the technical training and assistance provided to both program participants and public and private stakeholders who interact with program participants.

This recommendation is equal to a 3.4% increase to the Office's General Fund base budget for the FY 2020-2021 biennium.

Rationale/Background:

The Safe at Home address confidentiality program is managed by the Office of the Minnesota Secretary of State. The program, which began September 1, 2007, is designed to help people who fear for their safety, especially survivors of domestic violence and stalking, maintain a confidential address. It is open to survivors of domestic violence, sexual assault, stalking, and those who otherwise fear for their safety, including law enforcement and judicial personnel.

Participants enrolled in Safe at Home are assigned a PO Box address to be used as their legal address. All private and public entities in the state of Minnesota must accept the Safe at Home address as a participant's actual address and cannot require a participant to disclose their real address. Using the assigned PO Box, Safe at Home provides a mail forwarding service. Safe at Home receives participants' mail and forwards all First Class Mail to their physical address. The Safe at Home program also assists participants with their interactions with third parties should problems arise when giving the Safe at Home address to others. To facilitate this, staff work with third party stakeholders, such as county offices, utility companies, banks, and schools, to ensure legal compliance and to ensure their business practices accommodate the safety needs of Safe at Home participants. Since the program's inception, more than 8,000 participants and applicants have been served by the Safe at Home program and nearly 1,000 victim advocates have been trained by Safe at Home staff to be application assistants, helping with the application process.

The program continues to grow with more and more applicants and participants using Safe at Home to forward their mail and keep their address confidential. In 2015, there were a total of 2,777 individuals served by Safe at Home. In 2017, that total grew to 3,439 individuals served by the program. A funding increase for the Safe at Home program is necessary to accommodate for the growth of the program. Specific drivers of this need are

additional participants served, inflation of postage and rent, the need for additional space, and the need for more modern security for staff and information kept by Safe at Home.

Proposal:

The Office of the Secretary of State proposes a \$457,000 increase in the FY 2020-2021 biennium in funding for the Safe at Home program to accommodate for program growth, to provide enhanced security for the program, and to grow the technical training and assistance provided to both program participants and public and private stakeholders who interact with program participants.

In the event these funds are not received, the Safe at Home program will be unable to maintain its current level of service to the growing number of participants and stakeholders, potentially endangering the lives of participants who depend on Safe at Home to keep their addresses confidential and out of the hands of those they fear.

With the growth of the program, both in participants and the number of stakeholders who interact with participants and staff, the program requires additional resources for:

- **Postage:** As a mail forwarding service, the Safe at Home program is spending more on postage every year with the increase in participants as well as the continued inflation in postage.
- **Staff:** With more participants enrolled in the program, there is simply more work to be done in the Safe at Home office. In order to maintain the level of service application assistants, applicants, participants, and third parties have come to expect, Safe at Home needs to hire additional staff to assist the Director in conducting technical training, facilitating communications with third parties such as law enforcement and private entities, and assist in overseeing the operations of the office. This position will result in faster response times for those who seek information from Safe at Home, and added capacity for technical training and outreach with statewide partners.
- **Space:** The Safe at Home office is located at a confidential address that moves on a regular basis to ensure the safety of both Safe at Home employees and the information housed within the office, namely the confidential addresses of all Safe at Home participants. The office will need to move by the end of FY 2021 to a more secure location to accommodate the growth of the program. Currently, the Office of the Secretary of State spends \$18.00 a square foot, and it is estimated that the Office will need to spend in excess of \$27.00 a square foot on its new lease. The increase in cost per square foot is due to an increase in the average market rate for commercial property as well as the increased physical security needs of the Safe at Home program. A new office with additional security measures in place is paramount to the operation of the Safe at Home program.
- **Modern Security:** Prior to moving offices, Safe at Home will need to invest in and install new security equipment. The security equipment currently used was purchased when the program began more than ten years ago and has not kept up with the demands of the program and is quickly becoming obsolete. Investing in new equipment will ensure the employees and the information they possess are secure.
- **Technical Training:** The Safe at Home staff provide detailed, technical resources for participants on how participants should interact with both the private and public sectors. Similarly, staff provide technical training to public and private sector organizations that interact with Safe at Home participants. With an increase in participation, there is a need for additional funding to meet the increased demand for this technical training work.

These additional resources are necessary in order to accommodate the growth of the program in a safe and secure manner. This is not a new initiative, but a necessary funding increase to ensure that Minnesotans continue to receive the level of service they have come to expect and rely on from the Safe at Home program.

This proposal will help ensure a safe and secure environment for staff and the private information participants trust the office to maintain, ensuring Safe at Home continues to be a viable public safety tool.

Equity and Inclusion:

The Safe at Home program works with a very diverse population in terms of race, ethnicity, gender, sexual orientation, and disability. This request specifically does not directly impact any identified groups, nor is it aimed at reducing or eliminating any disparities for identified groups. However, this request will ensure that the Safe at Home program continues providing quality service to participants and those who interact with them. It will also result in a safer, more secure environment for the employees and information the office has been trusted to keep.

Results:

This request is sought to allow the Office of the Secretary of State's Safe at Home program to continue to provide current levels of service and information to the participants and those who interact with participants. Examples of current performance measures for Safe at Home are shown below.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of underage children in Safe at Home program	1,144	1,371	2015/2017

Program: Secretary of State**Activity: Elections**sos.state.mn.us/elections-voting/**AT A GLANCE**

- Support local election officials in conducting:
 - 2,000 township elections annually
 - 900 city elections (2 year cycle)
 - 300 school district elections (2 year cycle)
 - 200 other elections (2 year cycle)
- 505 State and Federal candidate filings processed in CY 2018
- Over 614,000 absentee ballots returned in the 2016 general election (21% of votes cast)
- 11,888 Overseas and Military ballots accepted in 2016 (97.6% acceptance rate)

PURPOSE & CONTEXT

A core function of the Office of the Secretary of State is to administer and oversee elections statewide. There are approximately 2,700 elections held annually in Minnesota, serving over three million registered voters. In partnership with local election officials, the Office's Elections Division works to ensure that every eligible vote is properly cast, counted, and reported.

A large part of Minnesota's election system is the Statewide Voter Registration System (SVRS). SVRS is developed and maintained by the Office, and includes records for all of the state's registered voters. Election administrators statewide depend on SVRS to provide complete, accurate, and up to date information. The Office has devoted significant resources towards securing and maintaining SVRS, including the implementation of multi-factor authentication for those accessing the system.

Prior to the adoption, use, or purchase of voting equipment, the Office must examine and certify each type of voting system. The Office's Elections Division is responsible for conducting the examination and providing this certification.

SERVICES PROVIDED

The Office's Elections Division provides training and support to local election officials year round, with staff making themselves available after hours on election nights to answer any questions or concerns. Additional support items created and made available for local election officials and the public are Election Law books, Campaign Manuals, Local Election Official guides, and Election Judge guides and training videos. The Elections Division also engages in a robust voter outreach program in an effort to provide information to Minnesotans about their registration status, how to register, and voting. The Office partners with local businesses, chambers of commerce, nonprofit organizations, service organizations, schools, and other organizations throughout the state to connect with eligible voters.

At the conclusion of any multi-county election, county canvassing board reports are reported to the State Canvassing Board for certification. The Secretary of State serves as chair of the board, with the Office's Elections Division preparing the canvassing board report, and testifying on the results before the board.

Additionally, the Office's Election Division offers online tools, including online voter registration, online absentee ballot request, and online lookup tools to provide convenience to voters and cost savings to local election officials.

Another online tool provided is election night reporting, which gives citizens real time election results. The Office also invests significant time and resources to protect these online tools and databases. In 2015 the Office established an IT security team and, on average, the Office's IT security team blocks over 27,000 potentially malicious IP addresses a month, and over 100 potentially malicious behavior-based IP addresses a month.

RESULTS

The Office measures the Elections Division performance by the indicators set out in the table below. Each of these measures indicates the Office's strategies are working.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>

Program: Secretary of State**Activity: Business Services**sos.state.mn.us/business-liens**AT A GLANCE**

- Over 66,000 customer service calls received in 2017
- 53% response rate on voluntary Minnesota Business Snapshot survey
- Over 323,000 annual renewals filed in FY2016, with over 21,000 being manually processed by staff

PURPOSE & CONTEXT

The Secretary of State's Business Services Division makes up more than half of the Office of the Secretary of State, and provides customer service and filing services to those conducting business in Minnesota. This includes all businesses, nonprofits, newspapers, and notaries. Fees for these services add approximately \$22 million to the General Fund each biennium.

SERVICES PROVIDED

The Office's Business Services Division approves and files articles of incorporation and amendments for all business and nonprofit organizations operating in the state. It provides both online and walk-in services for those filing a business, articles, and renewals. Additionally, staff are available to assist those conducting business searches, and those ordering copies of filings and certificates. In FY2016 there was an average of over 200 counter customers assisted a month.

The Business Services Division records documents filed under the Uniform Commercial Code (UCC) regarding collateral pledged to secure loans, and administers the Central Notification System (CNS) for farm product liens. The Division also serves to file and maintain statewide federal tax liens.

In September 2016, Secretary of State Steve Simon launched the Minnesota Business Snapshot, a new initiative designed to serve Minnesotans by providing the public with data and information on the economic and demographic make-up of Minnesota's businesses. The Minnesota Business Snapshot (MBS) is a voluntary, five-question survey offered to new and existing businesses in Minnesota as they file an original filing and subsequent annual renewals or annual reinstatements. To date, over 260,000 businesses have participated. The survey was put together with the input of individual business owners, business organizations, nonprofits, and researchers from across the state.

In July 2017, the Office implemented a new and updated website for the Notary Online System. The new website allows for improved usability for new and existing notaries, county users, and the general public. The updated website provides a simplified portal for notaries to update their information and renew a commission. Additionally, the Office now has the ability to send email notifications when an update has been made to a notary commission record and users are able to search for a notary using commission number, name, city, county, and/or business listing.

RESULTS

The Office measures the Business Services Division's performance by the indicators set out in the table below. Each of these measures indicates the Office's strategies are working.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of new business filings	62,500	67,000	2016/2017
Quantity	Number of business web filings	346,000	359,500	2016/2017
Quantity	Number of business mail and counter filings	66,000	69,600	2016/2017
Quantity	Number of UCC/Tax Lien & CNS web filings	181,000	177,000	2016/2017

Program: Secretary of State

Activity: Safe at Home

sos.state.mn.us/safe-at-home/

AT A GLANCE

- 2,653 participants currently enrolled in the Safe at Home address confidentiality program
- All 87 counties are served by a trained and certified application assistant
- 1,108 new individuals enrolled in 2017

PURPOSE & CONTEXT

The Safe at Home address confidentiality program is managed by the Office of the Minnesota Secretary of State. The program, which began September 1, 2007, is designed to help people who fear for their safety, especially survivors of domestic violence and stalking, maintain a confidential address. It is open to survivors of domestic violence, sexual assault, stalking, and those who otherwise fear for their safety, including law enforcement and judicial personnel.

SERVICES PROVIDED

Participants enrolled in Safe at Home are assigned a PO Box address to be used as their legal address. All private and public entities in the state of Minnesota must accept the Safe at Home address as a participant's actual address per M.S. 5B.05(a). Using the assigned PO Box, Safe at Home provides a mail forwarding service. Safe at Home receives participants' mail and forwards all First Class Mail to their physical address. The Safe at Home program also assists participants with their interactions with third parties should problems arise when giving the Safe at Home address to others. To facilitate this, staff work with third party stakeholders, such as county offices, utility companies, banks, and schools, to ensure legal compliance and to ensure their business practices accommodate the safety needs of Safe at Home participants. Since the program's inception, more than 8,000 participants and applicants have been served by the Safe at Home program and the over 800 application assistants trained by Safe at Home staff.

Because the Safe at Home address is a program participant's legal address, the Office accepts legal service of process for all participants and staff from the Safe at Home program are available after hours in case of a law enforcement emergency requiring a participant's physical address. If there is an emergency situation where law enforcement needs a participant's physical address, the law enforcement agency can make a data disclosure request through the Duty Officer at the Minnesota Bureau of Criminal Apprehension. Safe at Home staff are on call 24 hours a day, 7 days a week to respond to such a request if the need arises.

RESULTS

The Office measures Safe at Home's performance by the indicators set out in the table below. Each of these measures indicates the Office's strategies are working.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>

Program: Secretary of State**Activity: Administration**sos.state.mn.us**AT A GLANCE**

- 115 Session Laws filed with the Office of the Secretary of State in 2018
- As of August 2018 there have been over 1,900 Official Documents filed in CY 2018
- 240 official meetings held with elected officials and constituency groups in 2017
- As of August 2018 there have been over 1.4 million unique hits to the Office's website in CY 2018

PURPOSE & CONTEXT

The Secretary of State's Administration Division serves to assist the Secretary with his constitutional duties, including the administration of the Open Appointments process, certification of Official Documents, maintenance of original Chapter Laws, and service on the Executive Council, State Board of Investment, and Board of the Minnesota Historical Society.

The Administration Division also serves as the Office's constituent services division, working with federal, state, and local elected officials, constituency groups, and individual constituents. This work is done both in person and online, and it is the responsibility of the Administration Division to maintain the website for these purposes.

In addition to the work the Administration Division does to assist the Secretary and constituents, the Administration Division also provides support to the Office's other divisions in the form of scheduling, research, counseling direction, project management, record maintenance, and more.

SERVICES PROVIDED

As keeper of the Great Seal of the State of Minnesota, the Secretary certifies the authenticity of official documents, such as acts of the Legislature, and proclamations and executive orders issued by the Governor. All Official Documents are signed by the Secretary and filed by the Administration Division. As of July 2018, over 1,900 Official Documents have been filed in CY 2018.

The Administration Division is the forward facing division, it communicates with the public, elected officials, and other business and advocacy groups on behalf of the Secretary of State. This includes the creation and distribution of items such as the Legislative Manual (Blue Book) and flag etiquette guide. Items such as these are provided both physically and electronically. Maintaining the Office's website is a priority of the Office, and the Office has continued to increase the number of services and information provide online. In 2016, there were over 3.3 million unique visitors to the Office's website.

The Administration Division is also where the Office provides information about the over 200 State Boards, Commissions, Councils, Work Groups, and Task Forces that work to advise policy makers and regulate professionals. The Office communicates vacancies through a monthly Open Positions Notice which is sent to over 20,000 email addresses, and through the maintenance of an online portal for Minnesota residents to gather information and apply for vacant positions.

RESULTS

The Office measures the Administration Division's performance by the indicators set out in the table below. Each of these measures indicates the Office's strategies are working.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>

<i>Operating Adjustment</i>	6

AT A GLANCE

- Eleven Minnesota Sentencing Guidelines Commission (MSGC) members represent key criminal justice stakeholders and the public
- MSGC creates and improves Sentencing Guidelines
- Guidelines give judges uniform standards to apply when sentencing over 16,500 felony cases annually
- MSGC staff help criminal justice professionals in all 87 counties use the Guidelines correctly
- MSGC staff publish reports and conduct research on felony sentencing for Commission, Legislature, and the public

PURPOSE

The MSGC exists to establish rational and consistent sentencing standards that—

- Promote public safety;
- Reduce sentencing disparity;
- Recommending felony sanctions that are proportional to the crime's severity and the offender's criminal history; and
- Support the appropriate use of finite correctional resources.
- The MSGC supports the statewide outcome that **people in Minnesota are safe**
- The MSGC supports the statewide outcome of **efficient and accountable government services**

BUDGET

**Spending by Category
FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

The MSGC's activities are financed entirely through the General Fund. Its payroll budget consists of one (1) Executive Director, four (4) Research Analysts, and one (1) Management Analyst. Operating expenses included leased space, technology costs, education delivery costs, and office expenses.

STRATEGIES

The Minnesota Sentencing Guidelines Commission utilizes the following strategies to accomplish its mission:

- The MSGC meets monthly to work on improving the Sentencing Guidelines and, from time to time, making recommendations to the Legislature regarding changes to criminal law, criminal procedure, and other aspects of sentencing.
- MSGC staff create and maintain a comprehensive and accurate database on felony sentences.
- MSGC staff publish reports on sentencing practices and related criminal justice issues. These reports help policymakers, criminal justice officials, and the public evaluate felony sentencing policy and proposed legislation.
- A sentencing worksheet is required whenever a judge sentences a felony, and MSGC staff review every worksheet to ensure the accurate and consistent application of the Guidelines.
- MSGC staff provide in-person and web-based educational opportunities to help practitioners understand and correctly apply Guidelines policies.
- As needed, the MSGC and its staff respond to changes in case law, legislation, and issues raised by interested parties.
- Annually, MSGC staff work with the Department of Corrections to generate prison bed projections.
- MSGC members and staff serve on committees and task forces to further the goals of the criminal justice system.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Felony offenders' sentencing worksheets reviewed	16,763	16,927	2015 & 2016

Change Item Title: Operating Adjustment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	8	16	16	16
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	8	16	16	16
Maintain FTEs	.5	1.0	1.0	1.0

Recommendation:

The Governor recommends additional funding of \$24,000 in the FY 2020-2021 biennium to maintain the current level of service delivery at the Minnesota Sentencing Guidelines Commission (MSGC).

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the MSGC, this funding will cover known employee compensation growth and other operating costs.

Results:

This proposal is intended to allow agencies to continue to provide current levels of service and information to the public.

AT A GLANCE**FY 2017:****Licensing Services**

- 6,164 Licensed Social Workers
- 2,598 Licensed Graduate Social Workers
- 763 Licensed Independent Social Workers
- 5,388 Licensed Independent Clinical Social Workers
- 269 temporary licenses issued
- 2,162 license applications processed
- 5,981 license renewals processed
- 7,309 Supervision Plans and Verifications processed
- 275 Continuing Education Providers approved

Complaint Resolution Services

- 351 new complaints received
- 279 complaints resolved
- 36 corrective and disciplinary actions

Education Outreach Services

- 22 student presentations
- 2 conference presentations
- 6 conference exhibits

Staff to Licensee Ratio

- 1 to 1,320 = 11.3 staff to 14,913 licensees

PURPOSE

The mission of the Minnesota Board of Social Work (BOSW) is to ensure residents of Minnesota quality social work services by establishing and enforcing professional standards. Fifteen volunteer Board Members, including five public members, provide oversight to make certain we meet the needs of citizens and promote a diverse and qualified workforce.

The Board keeps **Minnesotans safe** by 1) licensing qualified social workers, 2) investigating and resolving complaints when services do not meet standards, and 3) providing outreach and education. The demand for our services has grown in response to a significant increase in the number of applicants, licensees, and complaints.

We collaborate with state and federal agencies, utilize technology to streamline business processes, provide online services, and increase transparency and access to information for citizens. Conducting regular strategic planning and continuous process and service delivery improvements, sets outcome-based priorities and results, and promotes **efficient and accountable services**.

BUDGET

**Spending by Category
FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

The Board is funded by licensure fees and receives no general fund dollars. Minnesota Statutes section 214.06, subdivision 1(a) compels the Board to collect fees in the amount sufficient to cover direct and indirect expenditures. Funds are deposited as non-dedicated revenue into the state government special revenue fund. From this fund, the Board receives a direct appropriation to pay for operations and program services provided by the agency, including licensing, complaint investigation and resolution, education and outreach, salaries, rent, and technology costs. Statewide indirect costs are also paid through the direct appropriation.

In addition to Board operational and program service expenses, fees collected fund support services provided to multiple health related licensing boards and/or other agencies. Some of these are: Office of the Attorney General for legal services, and inter-board programs including the Administrative Services Unit, Health Professionals Services Program, and the Criminal Background Check Program.

STRATEGIES

Key services and strategies to keep Minnesotans safe and to provide efficient and accountable services include:

1. License and regulate qualified social work professionals:
 - Establish and enforce requirements for initial and continued licensure, including ethical practice standards, education, national examination, criminal background checks, supervised practice experience, and continuing education.
 - Issue and renew bachelor and graduate degree licenses: Licensed Social Worker (LSW); Licensed Graduate Social Worker (LGSW); Licensed Independent Social Worker (LISW); and Licensed Independent Clinical Social Worker (LICSW).
 - Issue temporary licenses to expedite employment of new graduates, military personnel, and licensees relocating to Minnesota from other states.
 - Provide online services for license application, license renewal, and supervision plan and verification submission. Provide online public license data, including adverse license actions, and licensing supervisor information.
 - Promote a more culturally diverse, licensed mental health workforce.
 - Collaborate with other Health Licensing Boards and MN.IT to develop, maintain, and enhance a common platform licensing database system and online services for enhanced data security, improved customer service, and greater efficiencies.

2. Investigate and resolve complaints against licensed social workers' practice in a fair and timely manner:
 - Ensure that licensed social workers meet professional standards, practice safely and competently, and are accountable to the people they serve. Results show that when the Board takes action against a licensee, a future complaint is rare.
 - Collaborate with the Office of the Attorney General to investigate, resolve complaints, and take action when appropriate.
 - Utilize and partner with the Health Professionals Services Program (for impaired professionals) to assist with monitoring and remediation of licensees to ensure safe practice.
 - Completion of a two-year review of the Board's complaint resolution process with regard to "transparency, accountability, cost savings, and possible efficiencies" and created over 40 recommendations to enhance the process.
 - Offer guidance to applicants, licensees, and the public about the application of the Social Work Practice Act.
3. Provide education, outreach, strategic communications, and build collaborative partnerships:
 - Educate the public, social work students and faculty, licensed professionals, applicants, and organizations about professional licensing responsibilities, ethical practice standards, and the complaint resolution process through in-person and web-based methods.
 - Expand outreach to wider audiences including the general public, employers, and diverse communities and organizations.
 - Partner with local, state, and national organizations to improve public safety policies, regulatory practices, and mental health workforce issues, including social work licensing mobility and portability.
 - Utilize technology to increase access to educational opportunities for licensees and applicants with an online jurisprudence examination and online learning modules to be deployed in 2019.
 - Utilize the GovDelivery subscription service to distribute agency newsletter and bulletins to citizens.

RESULTS

The following chart results show the trends in the increased "quantity" of licensing and complaint resolution services provided, and the "quality" of the processing or resolution times for fiscal years 2013 and 2017.

Application Processing Time

*Note: Additional staffing resources were allocated to application processing during FY17 to avoid delays due to the deployment of a new licensing database.

Renewal Processing Time

*Note: Renewal processing time reduced to 24 hours or less from December 2016 to end of FY17 due to the deployment of a new licensing database which allowed for automatic approval of renewals upon receipt of renewal application and fee.

FTEs	0	0	0	0

Recommendation:

The Governor recommends additional funding of \$206,000 in the FY 2020-2021 biennium to maintain the current level of service delivery at the Minnesota Board of Social Work.

Rationale/Background:

The mission of the Minnesota Board of Social Work is to ensure residents of Minnesota quality social work services by establishing and enforcing professional standards. Fifteen volunteer Board Members, including five public members, provide oversight to make certain we meet the needs of citizens and promote a diverse and qualified workforce.

The Board is entirely fee supported and receives no General Fund dollars to provide all services. Fees must be collected to cover all direct and indirect expenditures and are deposited as non-dedicated revenue into the State Government Special Revenue Fund (SGSRF). The Minnesota Legislature makes appropriations from the fund to pay for expenses incurred by the Board.

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the Board of Social Work, this funding will cover known employee compensation growth, centralized IT expenses, budget deficiency due to increased salary and fringe expenses, updating and printing of agency brochures and educational materials, and rent for agency office space. IT cost growth drivers may include dedicated MN.IT staff compensation-related increases, increased volume usage of enterprise IT services, increased software licensing costs, and/or application support and maintenance cost increases.

Nondiscretionary MN.IT IT Centralized Services	FY 2020	FY 2021
Ongoing MN.IT service increases including phone, voice mail, LAN, WAN, switches, state email accounts, Microsoft software license increases, and service cost for GovDelivery Notification Service and WebEx Service	\$4,000	\$4,000
Ongoing increase to annual database maintenance agreement cost	\$10,000	\$10,000
Ongoing MN.IT bundled costs for board member laptops and state email addresses to ensure data security and necessary access to Board data to efficiently and effectively conduct business	\$25,000	\$25,000
TOTAL	\$39,000	\$39,000

1. **Absorb Budget Pressures from Increased Staff Compensation**

The increased appropriation is critical to absorb new, increased staff compensation costs based on labor agreements, salaries, insurance, and pension costs. Currently, the Board has a staff of 12.6 FTEs serving 15,226 licensees. Annually, staff process over 2,000 applications for licensure, over 6,000 applications for license renewal, and over 400 complaints.

2. **Update and Print Agency Brochures and Educational Materials**

Agency brochures and educational materials need to be updated to ensure accurate, current, plain language information is provided to the public. The estimated cost to update and create agency brochures through the state Minncor service is \$600.00 per 5,000 copies.

3. **Increase in Rent for Agency Office Space**

The Board's rental lease for office space expires on January 31, 2021, during the FY 2020-FY 2021 biennium. The Board is co-located with 17 other Health Related Licensing Boards (HLBs) at the same privately owned building.

The table below identifies each increased appropriation request described above.

Small Agency Increased Appropriation Request		FY 2020	FY 2021	FY 2022	FY 2023
#1	Increased Nondiscretionary MN.IT Centralized IT Service Expenses	\$39,000	\$39,000	\$39,000	\$39,000
#2	Absorb Budget Deficit for Increased Staff Compensation	\$35,000	\$72,000	\$72,000	\$72,000
#3	Update and Print Agency Brochures and Educational Materials	\$5,000	\$5,000	\$5,000	\$5,000
#4	Increase in Rent for Agency Office Space	\$4,000	\$7,000	\$7,000	\$7,000
TOTAL		\$83,000	\$123,000	\$123,000	\$123,000

Equity and Inclusion:

The Board does not discriminate on the basis of race, ethnicity, gender, sexual orientation, or disability. The positive impact of this change will be to continue to provide services for all people of the State of Minnesota without discrimination.

Social Work, Board of

FY 2020-21 Biennial Budget Change Item

Change Item Title: Licensing Database and Online Service Enhancements

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	25	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	25	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends a one-time appropriation to fund enhancements for the Board's Automated Licensure Information Management System (ALIMS) database system and to make online service enhancements.

Rationale/Background:

Enhancements to the Board's licensing database system and online services will create more efficient operational business processes and enhance online services for applicants, licensees, and licensing supervisors. Improved technology creates easier access for customers, cost saving efficiencies, and enhanced data security.

The Board is entirely fee supported and receives no General Fund dollars to provide all services. Fees must be collected to cover all direct and indirect expenditures and are deposited as non-dedicated revenue into the State Government Special Revenue Fund (SGSRF). The Minnesota Legislature makes appropriations from the fund to pay for expenses incurred by the Board.

Proposal:

The proposed project includes a professional technical contract to be administered by MN.IT to develop, test, and deploy needed enhancements to the Board's licensing database system and online services. The project involves the functionality to demonstrate compliance with the Board's social work licensing requirements under Minnesota Statutes, Section 148E. The IT project requirements will be accomplished by both MN.IT staff and a state approved contractor.

The scope of the project will include:

- Enhancements to the Board's (ALIMS) database system:
 - Includes corrections and enhancements to the required Supervision Plan and Supervision Verification Form reporting and storage of this data in the Board's licensing database in order to create efficiencies and decrease data errors. This work is estimated to be performed primarily by MN.IT staff for an estimated cost of \$10,000.
- Enhancements to Board online services for applicants and licensees:
 - Add the ability to pay for additional services, or required services such as name changes, via credit card.
 - Enhance the current online supervision reporting services for applicants, licensees, and licensing supervisors to create simplified reporting and increase accuracy of data reporting.
 - Test and deploy the new online Continuing Education Provider (CEP) application service.
 - Create necessary interface between online services and Board's database system.

- e. This work is estimated to be performed primarily by a State Approved Vendor, under a Professional Technical Contract under MN.IT for an estimated cost of \$15,000.

Equity and Inclusion:

The Board provides public safety services to residents of Minnesota, licensed social work professionals, and the clients they serve. Licensed social workers provide services to some of the most vulnerable, underserved, and diverse populations in our state.

IT Related Proposals:

<i>Category</i>	<i>FY 2020</i>	<i>FY 2021</i>	<i>FY 2022</i>	<i>FY 2023</i>	<i>FY 2024</i>	<i>FY 2025</i>
Payroll						
Professional/Technical Contracts	15,000					
Infrastructure						
Hardware						
Software						
Training						
Enterprise Services						
Staff costs (MN.IT or agency)	10,000					
Total	25,000					
MN.IT FTEs						
Agency FTEs						

Results:

This required technology project leverages both internal MN.IT resources and a contracted state vendor. It is an investment in the new ALIMIS database system deployed by the Board in December 2016. The positive results include 1) increased data accuracy and security; 2) greater efficiencies in business operations; and 3) enhanced and new online services for applicants, licensees, licensing supervisors, and Board approved CE Providers.

Statutory Change(s):

Not applicable.

Social Work, Board of

FY 2020-21 Biennial Budget Change Item

Change Item Title: Convert Licensing Records from Microfilm to Digital Records

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	50	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	50	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends a one-time appropriation to fund a licensing data conversion project at the Minnesota Board of Social Work.

Rationale/Background:

Currently the Board has 16,146 licensing records on microfilm. These records were transferred from a paper-based record system to microfilm from 1991 to 2002. Microfilm storage of data was the “state of the art” technology available at the time to create efficient data storage and increase data security. The Board had no capacity for scanning data at that time.

The project will provide citizens easier access to data under the Minnesota Government Data Practices Act and allow the Board to secure licensing data, create efficiencies in business operations, and provide citizens access to public data in a timely fashion.

Proposal:

The 16,146 microfilm records on site are not currently integrated into the Board’s secure licensing database system. Integrating licensing data, currently stored using two separate data retention methods, will increase data security, create processing efficiencies, and mitigate risks created from the antiquated microfilm data retention and storage method. The current hardware and software required to “read and print” microfilm records is out of warranty and beyond its expected life span. Hardware and software is no longer available for this obsolete microfilm technology.

The Board has received a preliminary bid from a state approved vendor on which to base this request. The estimated one-time cost to scan the approximate 16,146 records, containing approximately 500,000 microfilm images, and deliver clean, PDF images which will be integrated with the Board’s database system.

Equity and Inclusion:

The Board provides public safety services to residents of Minnesota, licensed social work professionals, and the clients they serve. Licensed social workers provide services to some of the most vulnerable, underserved, and diverse populations in our state.

IT Related Proposals:

Not applicable.

Results:

This increased one-time appropriation requested will produce the following critical data retention results, and positive outcomes to ensure the Board can provide necessary services:

1. Provide current technology capacity by integrating licensing records from two separate data retention systems into one secure and current technology system.
2. Provide necessary capacity to provide customers with access to public data in a timely manner.
3. Increase effective and efficient business operations.
4. Mitigate risk and ensure data security.

Statutory Change(s):

Not applicable.

Social Work, Board of

FY 2020-21 Biennial Budget Change Item

Change Item Title: Fee Change

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	463	471	470	478
Net Fiscal Impact = (Expenditures – Revenues)	(463)	(471)	(470)	(478)
FTEs	0	0	0	0

Recommendation:

The Governor recommends a fee increase for the Board of Social Work. This proposal would give the Board authority set fees at an amount ‘not to exceed’ a specified cap, which would allow the Board to manage future budgets.

Rationale/Background:

Board Mission and Funding: The mission of the Minnesota Board of Social Work (BOSW) is to ensure residents of Minnesota quality social work services by establishing and enforcing professional standards. Fifteen volunteer Board Members, including five public members, provide oversight to make certain we meet the needs of citizens and promote a diverse and qualified workforce.

The Board is entirely fee supported and receives no General Fund dollars to provide all services. Fees must be collected to cover all direct and indirect expenditures and are deposited as non-dedicated revenue into the State Government Special Revenue Fund (SGSRF). The Minnesota Legislature makes appropriations from the fund to pay for expenses incurred by the Board.

Fees have not been increased since 2000. In addition, the Board decreased fees by 20% in FY 2006 and an additional 10% in FY 2009, to reduce revenues and implement a “cost of doing business” fiscal management model. Current fee rates have been in place since FY 2009. The Board officially received an appropriation increase in 2017. However, an end of session oversight resulted in fee increase language not being included in the bill, despite being tracked as included.

Proposal:

The need to increase fees is due to the increase in the cost of doing business which has resulted in a more precarious budget position and has increased the gap between revenues and expenditures. A legislative transfer of \$1,432,787 from the Board’s SGSRF accumulated balance from FY 2004-FY 2012 was made at the same time as the Board’s intentional fee reductions, leading to a large reduction in the Board’s accumulated balance.

The Board continues to closely monitor its revenues and expenditures to ensure resources are adequate to meet its statutory duties, and effectively and efficiently provide its core public safety mission, for all residents of Minnesota.

Fee Change Descriptions: The tables below identify Board fees by license type and include: 1) current fee amounts; 2) proposed fee amounts for FY 2020-FY2021; and 3) a proposed “not to exceed amount” to be enacted

statutorily. The ‘not to exceed amount’ would allow the Board greater flexibility and ability to effectively manage, in a timely manner, a financial environment that might require an adjustment up or down in fees.

Fees for the Board’s four license types are also identified and include:

- Licensed Social Worker (LSW)
- Licensed Graduate Social Worker (LGSW)
- Licensed Independent Social Worker (LISW)
- Licensed Independent Clinical Social Worker (LICSW)

Application Fee							
License Type	Current Fee	Proposed Fee FY 2020-FY 2021	FY 2020 Number Paying	FY 2020 Additional Revenue	FY 2021 Number Paying	FY 2021 Additional Revenue	Proposed Not to Exceed Amount

Equity and Inclusion:

The Board provides public safety services to residents of Minnesota, licensed social work professionals, and the clients they serve. These services are paramount to ensuring safety for Minnesotans. Licensed social workers provide services to some of the most vulnerable, underserved, and diverse populations in our state.

Results:

Application Processing Time

*Note: Additional staffing resources were allocated to application processing during FY17 to avoid delays due to the deployment of a new licensing database.

Renewal Processing Time

*Note: Renewal processing time reduced to 24 hours or less from December 2016 to end of FY17 due to the deployment of a new licensing database which allowed for automatic approval of renewals upon receipt of renewal application and fee.

Complaint Data

Complaint Processing Time

With this fee change, and increased revenue, the Board can achieve the following results:

1. Maintain core public safety responsibilities including complaint investigation and resolution, and licensing functions, and avoid adverse effects on citizens, professionals, and the workforce.
2. Maintain necessary staffing to conduct its business at the current, and increased, levels of service, resolve complaints and license professionals in a timely manner.
3. Afford necessary and increased technology costs.
4. Afford increased legal costs necessary for complaint investigation and resolution.
5. Effectively meet the ever growing demands for Board services based on its continual growth.
6. Continue to effectively conduct the State's business and ensure sound future policy and fiscal strategic goals.

Statutory Change(s):

The Board's fees are found in MN Statutes, section §148E.180.

AT A GLANCE

- The Minnesota State Academies (MSA) oversees two schools - the Minnesota State Academy for the Blind (MSAB), and the Minnesota State Academy for the Deaf (MSAD) on 2 campuses in Faribault, Minnesota.
- The Academies have provided educational services to blind, visually impaired, deaf-blind, deaf, and hard-of-hearing students since the 1860's. Many of our students also have additional disabilities and learning/communication needs.
- The Academies are a public school district, utilizing the same educational standards and expectations as other districts in the state. All of our students are special education students on Individual Education Plans.
- Students from 60 different school districts attended classes at the Academies during the 2017-2018 school year.
- The Academies are funded primarily through a biennial appropriation rather than by the funding formula that is applied to other districts in the state. The Academies are not able to issue any tax levies or bonding and rely on legislative action to fund all needs on our campuses.

PURPOSE

Our updated mission is: "MSA empowers every student to achieve, care, and thrive in an ever-changing world". In our efforts to prepare students, we provide educational programming to support students in their development of knowledge, critical thinking, and skills necessary to become contributing members of Minnesota's economy, promoting transition skills to support successful employment and support for businesses in MN.

Each student is provided with opportunities to maximize their education and skills so that they can reach their transition goals, in conjunction with their Individual Education Plans. Our students range in age from infants who participate in Early Childhood services through 21 year olds who are working to meet graduation requirements and IEP expectations beyond the usual four years of high school. During the 2017-2018 school year, 67 students attended MSAB, 112 attended MSAD, and 18 graduated from both schools.

In our educational programming, we incorporate instruction and training for families in supporting communication access and educational growth for their blind and/or deaf child – this contributes to strong family connections and support for their child, and we are working to expand our services to support communities around the state.

While deaf/hard-of-hearing or blind/visually impaired students are the majority of our enrollment, MSA also serves students who are both deaf and blind, and many also have significant physical or cognitive disabilities. School districts usually have very few students with those disabilities and have collaborated with MSA to provide the best available and least restrictive educational environment because 1) the needs of the students are met fully, and 2) it is more efficient to enroll a student at MSA in an established program that is designed to meet their needs and has a larger critical mass of students rather than trying to develop a minimally effective program for a small number of students with limited services and a much smaller critical mass.

The MSA contribute to four of the statewide outcomes expected for state agencies:

- A thriving economy that encourages business growth and employment opportunities
- Minnesotans have the education and skills needed to achieve their goals
- Strong and stable families and communities
- Efficient and accountable government services

BUDGET

Source: Budget Planning & Analysis System (BPAS)

Source: Consolidated Fund Statement

The annual operating budget for FY 17 to the Minnesota State Academies is approximately 18.6 million dollars. The academies use operating funds as well as capital appropriations (not included in the chart above) to maintain buildings on two campuses, two of which are on the National Registry of Historic Places.

STRATEGIES

- Rather than serving one geographical location, the Academies serve blind, visually-impaired, deaf-blind, deaf, and hard-of-hearing students from the entire state. The Academies provide a fully accessible educational environment that is designed specifically to meet their needs, serving as an additional option for districts which have very few deaf or blind students in their schools. Rather than hiring special education teachers and purchasing needed support services and equipment, especially with the limited number of qualified individuals available for those positions/services, the districts have the ability (with parental agreement) to send a student to the Academies with no tuition costs.
- The mission of the Academies is to empower students to achieve, care, and thrive in an ever-changing world. We meet the challenges of a student population with varied communication and learning needs through using state standards, Individual Education Programs (IEP), transition planning, and incorporation of research-based best practices for instruction of Blind and Visually Impaired and Deaf and Hard of Hearing individuals. We incorporate instruction in Braille, Orientation and Mobility, ASL/English bilingual strategies, speech and language services, among others in ensuring that each of our students' needs are met both in the classroom and outside the classroom. We focus on development of each child as a whole, enhancing opportunities for further success in life.
- The role of the MSA is to provide a comprehensive and appropriately-designed educational program for our student population. We have a responsibility and obligation to provide top-quality education programming in an efficient and accountable way. Our teachers prepare lessons and instructional units to ensure that our students work towards achievement of Minnesota state standards and IEP goals established by their IEP teams. We provide professional development/learning opportunities for our teachers to maintain their knowledge and skills, ensuring that we continue to utilize research-based methodology and best practices for teaching blind and deaf students, including any additional needs that they may have. Outside of the classroom, we provide enrichment and extracurricular opportunities so that students can develop fully as a whole child (meeting their mental health, social, physical, and communication needs).

- In alignment with the expectations established by Minnesota's Olmstead Plan which is defined as a broad series of key activities our state must accomplish to ensure people with disabilities are living, learning, working and enjoying life in the most integrated setting. Our school supports students with coursework, experiential activities, work readiness, and independent living skills that support their ability to have an independent life after graduation that allows for them to choose a variety of occupations, living situations, and recreational/social opportunities. This enhances their ability to be contributing citizens and employees in Minnesota. We collaborate with other state agencies and school districts to provide a variety of transition programming.
- MSA's special education program is involved in a continuous review cycle developed and overseen by the Minnesota Department of Education to ensure that we follow established processes and procedures to develop individual education plans and evaluations following the needs of each student. Our special education professionals have specific training and knowledge related to evaluations, teaching, and designing educational programming that matches our student population.
- Our Early Childhood services include instruction for students, starting as soon as the child is identified as blind/visually impaired, deafblind, or deaf/hard-of-hearing. We provide home-based services, supporting students and their families with communication, language, and learning access at home until the child becomes 2 years of age. At that time, parents have the option of enrolling their children in our site-based early childhood classes for part-day/full-day instruction designed to maximize the students' learning and language opportunities. This supports the family structure and encourages continued communication and learning at home, outside of the classroom, which enhances further learning and academic success of the child.
- Lastly, we issue diplomas to students who have met the state's requirements for graduation, including special education goals. While working towards earning a diploma, each student receives individually designed educational programming, accommodations, and services to support his/her growth towards achieving transition goals established in their Individual Education Program.

Minnesota State Academies

FY 2020-21 Biennial Budget Change Item

Change Item Title: Operating Adjustment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	515	550	550	550
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	515	550	550	1,000
Maintain FTEs	5.5	5.5	5.5	5.5

Recommendation:

The Governor recommends additional funding of \$1.065 million in the FY 2020-2021 biennium to maintain the current level of service delivery at the Minnesota State Academies.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the Minnesota State Academies this funding will cover known employee compensation growth and a bus to transport students between campuses.

Results:

This proposal is intended to allow agencies to continue to provide current levels of service and information to the public.

Minnesota State Academies

FY 2020-21 Biennial Budget Change Item

Change Item Title: Enhancing Services

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	570	580	580	580
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	570	580	580	580
FTEs	1.0	1.0	1.0	1.0

Recommendation:

The Governor recommends \$1.150 million increase in FY2020-2021 to the Academies to enhance current services to meet the needs of their students and continue to maintain their facilities.

This proposal adds four new school days and one additional teacher preparation day to accommodate student testing needs. Additionally, it continues to fund facility maintenance. Finally, it funds new staff to meet the changing needs of the student population statewide and to meet the Academies' obligations under federal/state laws.

Rationale/Background:

This proposal is critical in maintaining the educational benefit of the schools' programs and ensuring that students can meet their educational goals as identified in their Individual Education Plans (IEPs). Unlike most public schools in the state, the Academies are unable to conduct referendums or tax levies to raise additional funds to meet needs. The Academies depend fully on legislative appropriations to fund programs at the required levels.

Additionally, the Academies' student population is changing – the Academies are serving students with additional disabilities and needs. Due to those changing needs, the Academies are required to provide additional services, supports, and instruction that matches their learning, language, and communication needs. Following federal and state laws/regulations, IEP teams determine the appropriate levels of services and accommodations that are required for each student. The Academies are legally obligated to provide those services/accommodations and funding is necessary to provide those services as required. Additionally, the Academies are a state-wide educational agency and the Academies have had numerous requests to support the needs of deaf, hard of hearing, deafblind, blind, and visually impaired students statewide. There is a nationwide shortage of teachers and professionals who are trained and/or knowledgeable about working with this specific student population and the Academies are in need of additional professionals so that the Academies can also support school districts statewide with evaluation and other training/supports that will allow students to access education in their home schools.

Proposal:

This proposal provides for additional operating support. First, it increases compensation by \$450,000 over the biennium to fund four additional school days. These additional days will be used to provide accommodations for students during state tests and one additional teacher preparation day. Because students need additional time to take the state tests, the additional school days allow students and teachers to alleviate the school calendar and demands. Second, it continues a Repair and Replace Appropriation funded during the previous biennium to

maintain facilities. This appropriation will be maintained at \$250,000 each year. Third, it provides additional \$100,000 each year in new compensation funding to allow the Academies to meet the increasingly complex needs of their students by hiring a new FTE to support those needs.

The Academies prioritize using this funding to replace their contract Occupational Therapist into a full-time, in-house Occupational Therapist. Many students have additional physical challenges, the Academies' needs have increased for those services. Additionally, this position works with the evaluation team so the Academies' capacity for supporting school districts statewide would also be enhanced.

Equity and Inclusion:

The Academies' students and staff represent diverse racial/ethnic backgrounds, LGBT identities, military backgrounds and disability statuses. The entire staff and student population will be affected if the Academies are not funded at required levels.

IT Related Proposals:

Not applicable – a portion of the Academies' budget is set aside for technology but is not included as part of this specific change item. Another change item has been proposed for technology needs.

Results:

The Academies currently measure results using student results – the Academies monitor students' progress academically as well as in different aspects of their development. The Academies utilize reading, math, and science results to report progress to their board as well as to stakeholders. The Academies are also currently investigating other assessments to measure growth in other areas that do not show up on standardized tests. Providing adequate funding for necessary programs, supports, tutoring, technology, and other modifications/accommodations is critical to ensuring students' success in school and provides avenues for them to reach their IEP goals.

Statutory Change(s):

Minnesota State Academies

FY 2020-21 Biennial Budget Change Item

Change Item Title: Technology Initiative

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	650	505	505	505
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	650	505	505	505
FTEs	1	1	1	1

Request:

The Governor recommends \$1.155 million in FY2020-2021 to address necessary technology upgrades to upgrade classroom equipment and make long-term infrastructure and safety investments.

Rationale/Background:

- The proposal is designed to benefit the approximately 179 students enrolled at the Academies and the 198 staff members that serve those students.
- This proposal strongly focuses on provision of adaptive equipment to meet student needs as required by law and written in the student's IEP. In many cases, adaptive equipment/technology is required for meeting the students' educational needs.
- Software and hardware needs to be similar to the technologies that students will encounter when leaving the Academies, entering college and the working world.
- The Minnesota State Academies needs to upgrade technology to provide equal access to communication and safety for students, staff, and families. Currently, the mass communication system only serves a portion of staff and students and places others in great danger due to the lack of accessibility features that are compatible with their needs.
- During the past 4 years, using funds from the previous technology grant, the Academies have updated technology, upgraded infrastructure, and provided training for students and staff. The Academies also have begun to examine ways to expand on solutions developed in smaller departments/buildings. The Academies continue to need upgrades in additional buildings and campus sites so that the Academies can complete their vision for a seamless technology-infused educational environment that is safe and accessible for all.

Proposal:

This request is based on an extension of a previous technology grant for \$708,000 in FY2016 and \$490,000 in FY2017. The Academies need additional funding to complete the rest of the phases to create a comprehensive, safe, and accessible technology-infused educational environment. The funds will be utilized to purchase equipment, software, training, infrastructure updates, and individual student accommodations to meet students' learning, language, and communication needs. By providing equipment and infrastructure updates, students will be prepared during their K-12 education to use similar equipment and infrastructure in post-secondary or employment settings.

Technology updates include but are not limited to: classroom and office computers, software components used by staff and students, energy efficient printers, accessibility and adaptive technologies and one Systems Information FTE to support infrastructure and programming needs.

Additionally, this proposal will cover infrastructure, equipment, software, and training necessary to implement campus-wide notification systems that are designed to match the needs of the student population. Currently, the Academies do not have a comprehensive system that is accessible to students and this leaves the campus in great danger as students are more vulnerable than the usual public school environment where everyone has access to alarms and audible communication systems. The Academies need specially designed systems and equipment that matches blind, visually impaired and/or deaf, hard-of-hearing students' accessibility requirements. The Academies also have the additional challenge of serving students from 18 months through 21 years of age, including those who have cognitive challenges, requiring a system that can be modified to meet different students' language and comprehension abilities.

Equity and Inclusion:

The Academies' students and staff represent diverse racial/ethnic backgrounds, LGBT identities, military backgrounds and disability statuses. The entire staff and student population will be affected if the Academies are not funded at required levels.

Program: Minnesota State Academies

Activity: Minnesota State Academy for the Deaf

msad.msa.state.mn.us

AT A GLANCE

- The Minnesota State Academy for the Deaf (MSAD) has provided educational services to students who are deaf, deaf-blind, and hard-of-hearing since 1863.
- Students from more than 31 different school districts attended classes at MSAD during the 2017-2018 school year
- MSAD is the only school in the state that provides a residential component specifically designed to meet the needs of deaf, deaf-blind, and hard-of-hearing students.
- Students who live outside the Faribault area may live in the dormitory and participate in a variety of enrichment, educational, recreational, and social activities, including athletics. Students in the Faribault area may also participate in those activities and commute from their homes.
- MSAD provides a fully accessible educational environment, incorporating American Sign Language (ASL)/English bilingual strategies to support growth in language and learning.

PURPOSE & CONTEXT

MSAD provides educational programming and support services for deaf, deaf-blind, and hard-of-hearing students at different ages throughout the school, utilizing ASL and English throughout the day to support proficiency in both languages for learning and communication. Instruction is provided by licensed teachers who have knowledge, skills, and background in working with deaf, deaf-blind, and hard-of-hearing individuals and lessons/instructional units are tailored to meet the learning, language, and communication needs of each student. Our academic programs within MSAD include: **Early Childhood** (Ages birth-5); **Preschool** (Ages 2-4); **Pre-Kindergarten** (Ages 4-5); **Elementary School** (Kindergarten- 5th grade); **Middle School** (6th-8th grades); and **High School** (9th-12th grades). Students may also select the option of attending part time classes at a local public or private school as appropriate. For some students with specific needs, the **Academy Plus Transition** program for students aged 18-21 is an option, providing additional instruction and practice in the areas of academic and language development, home living skills, community work, access to community resources, transportation, leisure & recreational activities, preparation for post-secondary education, and job-related skills for gainful employment. Our residential program complements our education program by providing activities and experiences outside of the classroom that enhance whole-child development, including social skills; cultural identity development; participation in organizations, activities, and athletics; and interactions with peers who have similar hearing levels and signing skills.

SERVICES PROVIDED

The Minnesota State Academy for the Deaf provides services in the following areas:

Academic Achievement: Classes are rigorous, based on state standards and IEP goals, and lead to graduation. Programming at MSAD provides students with fully accessible educational activities and utilize ASL and English so that students can have direct instruction and communication with their teachers and peers within their classrooms.

Whole child development: Students at MSAD participate in activities in and outside of the classroom, including activities in MSAD’s residential program, that are fully accessible, with a critical mass of deaf, deaf-blind, and/or hard-of-hearing peers . This provides them with opportunities to develop social skills, language and communication, and participate in extracurricular activities/experiences appropriate to their age.

Special Education: Individual needs of students are identified through appropriate assessments/evaluations selected by the student’s IEP team, involving parents/guardians and educational professionals knowledgeable with the learning, language, and communication needs of deaf, deaf-blind, and hard-of-hearing students. Services, accommodations/modifications, and instructional strategies are selected carefully, based on each student’s individual needs, providing support for growth towards meeting their transition goals.

Program: Minnesota State Academies

Activity: Minnesota State Academy for the Blind

msab.msa.state.mn.us/

AT A GLANCE

- The Minnesota State Academy for the Blind (MSAB) has provided educational services to students who are blind, visually-impaired, and/or deaf-blind since 1866.
- Students from more than 29 different school districts attended classes at MSAB during the 2017-2018 school year.
- MSAB is the only school in the state that provides a residential component specifically designed to meet the needs of blind, visually-impaired, and/or deaf-blind students.
- Students who live outside the Faribault area may live in the dormitory and participate in a variety of enrichment, educational, recreational, and social activities, including athletics. Students in the Faribault area may also participate in those activities but commute from their homes.
- MSAB provides a fully accessible educational environment, incorporating Braille and technology, to support growth in language and learning.

PURPOSE & CONTEXT

MSAB provides educational programming and support services for blind, visually-impaired, and/or deaf-blind students at different ages throughout the school, from birth through age 21. Instruction is provided by licensed teachers who have knowledge, skills, and background in working with blind and visually-impaired individuals and lessons/instructional units are tailored to meet the learning, language, and communication needs of each student. Instruction is provided in small group settings with emphasis exposure to Braille and assistive technology. Our specially designed curriculum includes academic skills, communication, orientation and mobility training, social skills, independent living, recreation and leisure activities, career education, and self-advocacy instruction. Students with multiple challenges have increased support provided by teachers and assistants with specific training to support their physical and learning needs. Some students may also select the option of attending classes at a local public or private school as appropriate. For some students with specific needs, the Academy Plus Transition program for students aged 18-21 is an option, providing additional instruction and practice in the areas of academic development, home living skills, grooming, community work, access to community resources, transportation, leisure & recreational activities, preparation for post-secondary education, and job-related skills for gainful employment.

Our residential program complements our education program by providing activities and experiences outside of the classroom that enhance whole-child development alongside peers who are also blind or visually-impaired. Students are encouraged to participate in athletic competitions like track, wrestling, and swimming, and club activities such as chess. The dormitories have facilities which promote life skills such as cooking and grooming. A semi-independent living program challenges students to learn practical decision making skills in a home environment, such as budgeting, meal preparation, and laundry, among others.

SERVICES PROVIDED

The Minnesota State Academy for the Blind provides services in the following areas:

Academic Achievement: Classes are rigorous, based on state standards and IEP goals, and lead to graduation. Programming at MSAB provides students with fully accessible educational activities and utilize Braille and/or

assistive technology so that students can have access to all instructional materials and activities within their classroom.

Whole child development: Students at MSAB participate in activities in and outside of the classroom, including activities in MSAB's residential program, which are fully accessible, with a critical mass of blind, visually-impaired, and/or deafblind peers. This provides them with opportunities to develop social skills, language and communication, and participate in extracurricular activities/experiences appropriate to their age.

Special Education: Individual needs of students are identified through appropriate assessments/evaluations selected by the student's IEP team, involving parents/guardians and educational professionals knowledgeable with the learning, language, and communication needs of blind and visually-impaired students. Services, accommodations/modifications, and instructional strategies are selected carefully, based on each student's individual needs, providing support for growth towards meeting their transition goals.

Program: Minnesota State Academies

Activity: Minnesota State Academies Operations

AT A GLANCE

- Shared Services include central administration, student support services, human resources, business services, physical plant operations, health services, food services, information technology, and interpreter services, supporting staff and students on both campuses (MSAB and MSAD).
- Approximately 50% of the students enrolled in the Academies live on campus in the dormitories during the week, requiring 24 hours a day supervision and services.
- Nursing staff provide round the clock medical support to students during the school day and after school to the students living in the dormitories.
- Physical plant workers respond to alarms and unanticipated system malfunctions. i.e. Heating, cooling, alarms, etc.
- Food Service employees and Interpreter services are scheduled when needed on weekdays, evenings, and on occasion, weekends for student and staff activities/functions.

PURPOSE & CONTEXT

The shared services model that the Minnesota State Academies has created utilizes economies of scale to provide top-quality services to a group of students with very specific and resource-intensive needs. Rather than utilizing two parallel systems, a single service delivery model supports both campuses and all services for the Minnesota State Academy for the Blind and the Minnesota Academy for the Deaf. The campuses are about one mile apart and MSA personnel frequently work on both campuses, providing close support and attention to the student body and faculty at both schools.

SERVICES PROVIDED

Central Administration (Superintendent's office): Responsible for the overall functioning of the State Academies, along with the support of the MSA Board. The Superintendent supervises both schools with the assistance of a director for each campus as well as department heads of shared service divisions.

Student Support Services (including Special Education Services): Responsible to ensure compliance with federal and state laws, regulations, and requirements in order to meet students' needs as defined in their Individual Education Programs (IEPs) – includes all related and support services that are available to students on both campuses.

Human Resources: Supports approximately 250 full-time, part-time, and intermittent employees within 7 labor groups. Supports staff members with related services such as insurance coverage, benefit management, and job audits.

Business Services: Processes payroll, issues payments, coordinates purchases, and provides general budget oversight.

Physical Plant: Maintains 17 buildings and grounds on two campuses, covering 40 acres. Oversees scheduling and maintenance of school vehicles. Supports oversight of new construction.

Health Services: Provides health services on both campuses for all students, including medication and monitoring, and providing on-call support after hours.

Food Services: Prepares three meals each day for residential students and lunch for day students on both campuses.

Information Technology: Provides support for all IT needs on campus, including student information systems, website support, classroom technology and applications, and videophones

Interpreting Services: Provides interpretation of information using ASL, English, and on occasion, other languages such as Spanish or Somali. Provides tactile interpreter services for deaf-blind students. Supports students in mainstreaming programs in local schools. Supports Sign Language Proficiency Interviews and ratings for the Academy for the Deaf as well as school districts statewide.

AT A GLANCE

- Oversees the finances of approximately 4,800 local governments.
- Completes approximately 150 financial and compliance audits annually.
- Reviews approximately 450 single audit reports annually.
- Responds to inquiries on issues related to legal compliance from the public, local government officials and employees, and policymakers.
- Reviews investment and financial reporting and compliance of approximately 600 local public pension plans.
- Maintains financial reporting database on local government entities.
- Reviews expenditures and compliance of approximately 1,700 tax increment financing (TIF) districts.
- Supports service by the State Auditor on six state boards and one council and provides senior management to the Office.
- Investigates allegations of unlawful use of public funds and property.
- Publishes educational resources and provides regular training opportunities on local government finance and legal compliance issues.

PURPOSE

The mission of the Office of the State Auditor (OSA) is to oversee local government finances for Minnesota taxpayers by helping to ensure financial integrity and accountability in local governmental financial activities. Through this mission, the OSA contributes to the statewide outcome of **efficient and accountable government services**.

BUDGET

Source: Budget Planning & Analysis System (BPAS)

FY 14 – 17 the Audit Practice Division funds were moved the State Auditor's Enterprise Fund

Source: BPAS

The OSA is organized into seven divisions: Audit Practice, Government Information (GID), Legal/Special Investigations (SI), Operations Management (OPM), Pension, Tax Increment Financing (TIF), and the Constitutional

Office. There are approximately 100 employees in six offices, two worksites, and numerous client sites across the state. We are primarily funded by a general fund appropriation, with the TIF Division being funded by a statutory appropriation. Audit fees collected by the Audit Practice Division for auditing services are deposited in the general fund as non-dedicated receipts.

STRATEGIES

The OSA oversees more than \$20 billion in annual spending by local governments by auditing local government financial statements and reviewing documents, data, reports, and reported complaints. The financial information collected from local governments is analyzed and serves as the basis of the statutory reports we issue.

Primary statutory citations regarding the State Auditor's office are in Chapter 6 of Minnesota Statutes (<https://www.revisor.mn.gov/statutes/cite/6>).

State Auditor

FY 2020-21 Biennial Budget Change Item

Change Item Title: Operating Adjustment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	259	525	525	525
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	259	525	525	525
FTEs	3.75	6.56	6.56	6.56

Recommendation:

The Governor recommends additional funding of \$259,000 in FY 2020 and \$525,000 in FY 2021 and each year thereafter from the General Fund to the Office of the State Auditor for an operating adjustment to maintain current levels of staffing.

This recommendation is equal to a 3.9 percent increase to the Office's General Fund base budget for the FY 2020-2021 biennium.

Rationale/Background:

The State Auditor oversees local government finances for Minnesota taxpayers by helping to ensure financial integrity and accountability in local governmental financial activities. Eighty-seven percent (87%) of the proposed General Fund Direct Appropriation pays the salaries and benefits of staff who review documents and financial data, issue financial reports, and review complaints related to the finances and legal compliance of local government entities. Staff also provides essential training and support to accounting staff in local governments to help them properly complete their financial reporting requirements, establish proper internal controls to safeguard assets, and investigate reports of financial misfeasance, malfeasance and nonfeasance by local government employees and officials.

Projected increases in salary and benefit costs put pressure on our ability to retain all essential staff. This request will allow us to retain the necessary qualified staff to meet our mission.

Proposal:

The State Auditor proposes an increase of \$784,000 in our General Fund Direct Appropriation for the 2020/2021 biennium. These funds will be used to pay salaries, benefits and related operating costs of current staff and allow us to avoid reducing staff by approximately 7 full time equivalents (FTE).

Results:

Type of Measure	Name of Measure	Previous	Current	Dates
Quality	Audits Issued Within 12 Months of Auditee Year-End (See notes 1 and 2)	93%	94%	2016/2017
Quantity	Local Governments Meeting Reporting Requirements	95.5%	95.4%	2016/2017

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Results	CTAS Users Reporting with Exported Files	756	778	2016/2017
Quality	Pension Plans Certified as Eligible to Receive Fire State Aid	99.9%	99.9%	2016/2017
Quality	Views of Website documents and pages	1,654,022	1,916,840	2016/2017

Notes:

1. For the two areas that refer to Audits Issued, “Previous” refers to audits issued during the 2016 calendar year and “Current” refers to audits issued during the 2017 calendar year.
2. The Division’s outcomes are largely qualitative in nature, and many measures are driven by uncontrollable factors such as the abilities, resources, and preparedness of auditees.

State Auditor

FY 2020-21 Biennial Budget Change Item

Change Item Title: Township Specialist

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	94	96	96	96
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	94	96	96	96
FTEs	1	1	1	1

Recommendation:

The Governor recommends additional funding of \$94,000 in FY 2020 and \$96,000 in FY 2021 and each year thereafter from the General Fund to the Office of the State Auditor to fund the filling of a Township Specialist position in the Government Information Division.

This recommendation represents a 0.9 percent increase in the Office's General Fund base budget for the FY 2020-2021 biennium.

Rationale/Background:

The Government Information Division collects financial information from over 3,300 local governments in Minnesota. Townships make up 1,781 of these entities with fifty-three percent of townships having a population of 300 or less. This position would help townships to meet their legal reporting requirements by following up on outstanding reports, answering reporting questions, and reviewing reported information.

Proposal:

The State Auditor is proposing an increase of \$190,000 in our General Fund Direct Appropriation for the 2020/2021 biennium. These funds will be used to pay the salary and benefits of a township specialist position/one full time equivalent (FTE).

Results:

State Auditor

FY 2020-21 Biennial Budget Change Item

Change Item Title: Refill Staff Support Position

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	82	85	85	85
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	82	85	85	85
FTEs	1	1	1	1

Recommendation:

The Governor recommends additional funding of \$82,000 in FY 2020 and \$85,000 in FY 2021 and each year thereafter from the General Fund to the Office of the State Auditor to fund the refilling of an executive assistant to the State Auditor position.

This recommendation represents a 0.8 percent increase in the Office's General Fund base budget for the FY 2020-2021 biennium.

Rationale/Background:

The State Auditor is in need of an executive assistant to assist in scheduling, filing, and responding to requests. With shrinking budgets, this position has not been filled since 2011. This position will help the Constitutional Office division better meet the current public demand for services, as well as allow the State Auditor to be more directly engaged with municipalities.

Proposal:

The State Auditor is proposing an increase of \$167,000 in our General Fund direct appropriation for the 2020/2021 biennium. These funds will be used to pay the salaries and benefits of one support staff positions/one full time equivalent (FTE).

State Auditor

FY 2020-21 Biennial Budget Change Item

Change Item Title: Refill Deputy State Auditor Position

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	157	160	160	160
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	157	160	160	160
FTEs	1	1	1	1

Recommendation:

The Governor recommends additional funding of \$157,000 in FY 2020 and \$160,000 in FY 2021 from the General Fund for the Office of the State Auditor to fund the refilling of a third Deputy State Auditor position.

This recommendation represents a 1.6 percent increase in the Office's General Fund base budget for the FY 2020-2021 biennium.

Rationale/Background:

Minnesota State Statute allows the State Auditor three deputies. With shrinking budgets, this position has not been filled since 2007. The third deputy position will provide supervision of the Government Information Division and the Operations Management Division. A third deputy position is essential to ensure proper supervision of these functions and promote outreach to local governments.

Proposal:

The State Auditor is proposing an increase of \$317,000 in our General Fund Direct Appropriation for the 2020/2021 biennium. These funds will be used to pay the salary and benefits of a third deputy state auditor position/one full time equivalent (FTE).

Program: State Auditor

Activity: Audit Practice

auditor.state.mn.us/

AT A GLANCE

- Conducts approximately 150 financial and legal compliance audits annually.
- Reviews approximately 450 single audits annually.
- Conducts annual training for state and local government accounting professionals on new accounting principles and financial compliance issues.

PURPOSE & CONTEXT

The Office of the State Auditor (OSA) has the legal authority to act in the public's best interest in auditing local government finances, including counties, first-class cities, and other political subdivisions of the state. The Audit Practice division has the authority to audit local governments that we do not audit annually if we determine that it is in the public's best interest. This unique capability instills in taxpayers and other stakeholders confidence in local government finances. The Audit Practice Division is funded by a general fund appropriation. Audit fees collected by the Division for auditing services are deposited in the general fund as non-dedicated receipts.

SERVICES PROVIDED

The Audit Practice division provides the following services:

- Issue approximately 150 annual audit reports of counties, cities, entities associated with counties and cities, and other local governments to provide transparency and accountability to taxpayers, the State of Minnesota, federal agencies, and other stakeholders;
- Provide professional, unbiased, objective assessments of whether public resources are reasonably managed, appropriately reported, and administered in compliance with laws and regulations;
- Report on the fair presentation of local governments' financial statements, comment on irregularities and deficiencies in local governments' internal controls, identify issues of legal noncompliance, and recommend changes in local government accounting practices and procedures;
- Use our experience to make the audit process as efficient and effective as possible for the audit clients;
- Provide annual training for the OSA audit staff to maintain a highly-trained staff and include one day of training on new accounting principles and financial compliance issues for state and local government accounting professionals;
- Conduct annual desk reviews of county audit reports and periodic work paper reviews of county audits performed by private CPA firms to determine that the audit procedures performed are in conformance with auditing standards; and
- Provide technical accounting and auditing coordination to support the other divisions within the office, promoting efficiency and effectiveness.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quality	Peer Review Quality Standards Met (See note 1)	Yes	Yes	2015/2018

Type of Measure	Name of Measure	Previous	Current	Dates
Quantity	Change in Total Number of Audits Issued (See notes 2 and 3)	0	-26	2016/2017
Quality	Audits Issued Within 12 Months of Auditee Year-End (See notes 3 and 4)	93%	94%	2016/2017
Results	Available Training Slots Filled by State and Local Government Accounting Professionals (See note 5)	100%	100%	2016/2017

Notes:

1. The OSA participates in the National State Auditor's Association Peer Review Program. Maintenance of an appropriate internal quality control system is essential to performing effective audits that comply with professional standards. The results of the two previous Peer Reviews concluded that the OSA met professional requirements. The Peer Review is performed every three years: the Peer Reviews listed above were performed in 2015 and 2018.
2. The decrease in the number of audits issued in 2017 was primarily due to audits of Drug Task Forces on behalf of the Minnesota Department of Public Safety not being performed in 2017.
3. For the two areas that refer to Audits Issued, "Previous" refers to audits issued during the 2016 calendar year and "Current" refers to audits issued during the 2017 calendar year.
4. The Division's outcomes are largely qualitative in nature, and many measures are driven by uncontrollable factors such as the abilities, resources, and preparedness of auditees.
5. The Available Training Slots refers to the annual training provided by the OSA.

Program: State Auditor

Activity: Legal/Special Investigations

auditor.state.mn.us

AT A GLANCE

- Provides legal expertise to all divisions within the office.
- Responds to inquiries on issues related to legal compliance from the public, local government officials and employees, and policymakers.
- Annually publishes the Minnesota Legal Compliance Audit Guides by entity type.
- Publishes and updates Statements of Position to provide guidance on legal compliance, finance, and internal controls for local government officials and employees, and other interested parties.
- Investigates allegations of unlawful use of public funds and property.
- Provides training to assist local government officials and employees in protecting public assets.

PURPOSE & CONTEXT

We work to ensure that local government funds are used in compliance with state law by over 4,800 units of local government. Our work is relied upon by local governments, members of the public, public- and private-sector auditors, law enforcement, statewide local government associations, and attorneys to obtain legal compliance in the use of local government funds. We receive and respond to statutorily-required reports of theft, embezzlement, and unlawful uses of public funds or property involving local governments. We use specialized financial investigative and legal expertise to respond to questions and concerns. We meet our statutory duty to publish a legal compliance audit guide for use in auditing local governments. In addition, we support all divisions within the office by providing legal expertise and by conducting legal reviews of all audits performed by the Audit Practice Division. We are funded by an appropriation from the general fund.

SERVICES PROVIDED

We work to increase legal compliance in the use of local government funds by providing the following services:

- Perform inquiries, reviews, and investigations initiated because of concerns that we receive, and provide recommendations to local governments;
- Respond to the statutorily-required reports of possible misuse of public funds to ensure that a thorough investigation has been performed, appropriate referrals to law enforcement have been made, and internal control modifications have been implemented;
- Provide targeted training on legal compliance and on the prevention and detection of fraud to local government officials and employees, private and public sector auditors, and other interested parties;
- Update and publish annually seven Minnesota Legal Compliance Audit Guides, which set the current minimum legal compliance procedures and scope for local government audits; and
- Research, revise, and publish Statements of Position on a variety of topics related to local government legal compliance, finance, and internal controls and publish weekly Avoiding Pitfalls items on issues we identify during audits, inquiries, reviews, and investigations.

RESULTS

Our work improves legal compliance and transparency in the use of local government funds, and serves as a constant deterrent against misuse of public funds.

Program: State Auditor

Activity: Government Information

auditor.state.mn.us

AT A GLANCE

- Collects, reviews, and compiles financial information on approximately 3,300 local governments.
- Issues 10 to 12 reports or special studies on local government finances.
- Issues Best Practices Reviews of local government operations periodically.
- Certifies to the Department of Revenue all cities eligible to receive Local Government Aid and Small Cities Assistance.
- Certifies to the Department of Revenue additional local government aid for cities and counties participating in the Performance Measurement Program.

PURPOSE & CONTEXT

We provide comprehensive, comparable financial information from over 3,300 local governments to assist state and local policymakers with policy and spending decisions to help the public make informed decisions about its local government. We collect and analyze local government financial data and publish regular reports provided to the legislature and to the public. We also conduct best practices reviews of local government operations as resources allow. The Government Information division is funded by an appropriation from the general fund.

SERVICES PROVIDED

We work with local governments to collect and analyze their financial information on a timely basis. We provide transparency of local government finances through the following services:

- Respond to local government financial questions;
- Create and provide electronic reporting forms to improve accuracy and timeliness in statutorily-required reporting;
- Provide on-demand online training to help local governments successfully complete electronic reporting forms;
- Maintain, support, and upgrade the Small Cities and Towns Accounting System (CTAS) software used by over 1,300 small cities and towns throughout Minnesota;
- Provide basic accounting and CTAS training to local government officials and employees throughout the state;
- Prescribe the chart of accounts and reporting requirements for cities, towns, and special districts;
- Maintain an extensive database of local government financial data;
- Provide a user-friendly comparison tool of local government financial information;
- Compile and issue 10 to 12 annual reports each year;
- Prepare and compile customized data for use by legislative researchers and the media; and
- Conduct special studies as requested by the legislature.

Program: State Auditor

Activity: Pension

auditor.state.mn.us

AT A GLANCE

- Monitors approximately 600 local public pension plans with assets of over \$552 million and membership of nearly 18,000.
- Issues two annual financial and investment performance reports.
- Certifies individual public pension plans for state aid distributions totaling over \$24 million.

PURPOSE & CONTEXT

We work to ensure compliance with state laws governing administration, finances, investments, and pension benefits for approximately 600 volunteer fire and other types of local public pension plans in Minnesota. We are the sole source of comprehensive pension information of local public pension plans, which is used for comparison purposes by pension plan boards and their associated municipalities, and by the legislature to make policy decisions on these pension plans. We manage the reporting processes for the entire local pension plan system, ensuring that consistent approaches, methods, and investment rate-of-return calculations are used. The users of our services include pension plan boards, plan members, municipal representatives, auditors, investment professionals, policy makers, and the public. We are funded by an appropriation from the general fund. Pension state aid is used to reduce the appropriation.

SERVICES PROVIDED

We promote the consistent interpretation and application of state laws and local pension plan bylaws by providing the following services:

- Monitor pension plan operations and the administration of pension benefits;
- Collect and review annual reporting forms;
- Issue Statements of Position, monthly newsletters, and legislative updates to inform and educate pension plan trustees;
- Create and publish Sample Bylaw Guides and an annual Selected Relevant Statutes booklet to assist pension plan trustee in meeting statutory requirements;
- Convene the Volunteer Fire Relief Association Working Group annually bringing together stakeholders to identify and discuss pressing pension issues and to suggest legislative changes; and
- Publish annual reports on pension plan finances, investments, and administration.

RESULTS

The degree of compliance of local public pension plans with state laws and local bylaws, as measured annually, is excellent, as evidenced by the percentage of pension plans certified for fire state aid shown below.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>

Program: State Auditor

Activity: Operations Management

auditor.state.mn.us

AT A GLANCE

- Provides accounting services, facilities management, technology support, and human resources services for approximately 100 employees in six offices, two worksites, and numerous client sites.
- Hosts and maintains a website to increase transparency in local government finances that serve approximately 15,000 unique visitors each month.
- Maintains integrated databases for all divisions within the Office.
- Modifies, collects, and processes electronic reporting forms for the Office.

PURPOSE & CONTEXT

The Operations Management Division supports all activities within the office by providing the accounting, facilities management, technology support, and human resource services for all divisions. We are funded by a general fund appropriation. The Tax Increment Financing (TIF) Division funding is accounted for in the Miscellaneous Special Revenue Fund, and costs related to supporting the TIF division are allocated directly to that appropriation.

SERVICES PROVIDED

We support all divisions within the office enabling each division to pursue identified strategies and to achieve desired results by providing the following services:

- Prepare and maintain the office's biennial budget;
- Process payroll for approximately 100 employees;
- Prepare purchase orders and pay invoices;
- Bill for and deposit payments for audit services;
- Maintain furniture and equipment inventory;
- Coordinate the lease renewals for and maintenance of six offices;
- Manage all the technology needs of the office;
- Maintain an integrated database for all divisions;
- Work with each division to collect, process, and improve electronic reporting forms;
- Provide research and strategic planning support on technology issues;
- Provide network and personal computer installation, support, and maintenance;
- Purchase common network equipment;
- Coordinate the hiring of employees;
- Educate employees on benefit options; and
- Work to ensure the office is in compliance with state bargaining agreements.

RESULTS

We leverage technology to help the office perform its work more effectively and efficiently.

Program: State Auditor
Activity: Constitutional Office

auditor.state.mn.us

AT A GLANCE

- Provide senior-level management for the Office of the State Auditor (OSA).
- Supports the State Auditor's service on six state boards and one state council.
- Conducts outreach and provides educational resources to local officials, local government finance professionals, and the public.
- Works with the legislature and governor on appropriations and policy issues to ensure effective OSA oversight.
- Works with media statewide to improve quality and increase transparency of local government finances.

PURPOSE & CONTEXT

The State Auditor is an independent constitutional officer elected statewide to provide oversight of over 4,300 units of local government. The State Auditor oversees \$20 billion spent each year to deliver local government services. The Constitutional Office provides senior-level management and leadership to the office and supports the State Auditor on six state boards and one council. The office is funded by a general fund appropriation.

SERVICES PROVIDED

We accomplish our goal of providing effective oversight of local government finances by providing the following services:

- Leverage the extensive knowledge of local government finance and accounting expertise cross-divisionally;
- Reach out to key stakeholders to proactively address emerging finance and compliance issues;
- Conduct outreach through public speaking to the public to instill confidence in local government finances;
- Propose, pursue, and advocate for legislation that increases accountability of local government finances; and
- Work with the media to increase transparency, improve the quality of stories done to raise public awareness of local government finances.

The legal authority for these activities is outlined below:

Minn. Const., art. 5, §§ 1 and 4 (Executive branch).
Minn. Stat., ch. 6 (State Auditor).

Program: State Auditor

Activity: Tax Increment Financing

auditor.state.mn.us

AT A GLANCE

- Oversees approximately 1,700 Tax Increment Financing (TIF) districts administered by over 400 development authorities.
- Collects and reviews approximately 1,700 annual TIF reports, 150 TIF plans, and 200 other filings annually.
- Publishes annual TIF Legislative Report.
- Provides training and resources to promote TIF compliance.

PURPOSE & CONTEXT

The Tax Increment Financing Division works to ensure compliance with the Tax Increment Financing (TIF) Act. The TIF Act was created to help businesses and communities redevelop blighted areas, expand the property tax base, create jobs, construct housing, and assist development where it would not otherwise occur “but for the use of tax increment.” The division works with approximately 1,700 TIF districts. We are the sole source of comprehensive comparable data on TIF use in Minnesota. Some of this data is used in the annual TIF Legislative Report to inform lawmakers and the public on the uses of TIF. Our oversight work serves as a deterrent to misuse of TIF. We are funded by a special revenue fund statutory appropriation.

SERVICES PROVIDED

The division works to ensure compliance with the TIF Act by providing the following services:

- Review financial information annually to identify non-compliance and to help communities come into legal compliance;
- Conduct desk reviews and targeted field reviews of TIF districts;
- Educate a broad audience, including local officials, lawmakers, financial consultants, state agencies, the public, and the media, on the TIF Act by publishing Statements of Position, monthly newsletters and legislative updates; providing online training videos; conducting trainings and seminars; and responding to requests for information;
- Publish a Tax Increment Financing County Guide to assist county officials in meeting their responsibilities under the TIF Act; and
- Consult with local government associations, legislative staff, and others regarding possible amendments to the TIF Act to ensure ongoing effective oversight by the OSA.

AT A GLANCE

The Supreme Court, consisting of seven members, is the highest court in Minnesota, serving as the final guardian of the Minnesota Constitution and interpreting/applying the United States Constitution.

- In 2017, 108 direct appeals and 635 petitions for further review were filed with the Supreme Court.
- The Chief Justice is the administrative head of the Judicial Branch, which includes 320 justices and judges and 2,500 employees.
- The Supreme Court serves all Minnesota citizens.

PURPOSE

The Supreme Court has original jurisdiction in remedial cases as prescribed by law, appellate jurisdiction over all cases, and supervisory jurisdiction over all courts in the state. Election contests and appeals for first-degree murder cases are automatically appealed to the Supreme Court. The Supreme Court is solely responsible for the regulation of the practice of law and for judicial and lawyer discipline. The Court also promulgates rules of practice and procedure for the legal system in the state. The Chief Justice is responsible for supervising administrative operations of the state court system.

Supreme Court responsibilities contribute to **strong and stable families and communities**, and the administration of the state's court system ensures the **people in Minnesota are safe** and provides **efficient and accountable government services**.

BUDGET

**Spending by Program
FY 17 Actual**

Source: BPAS

Historical Spending

Source: Consolidated Fund Statement

The Supreme Court expended \$58 million in FY 2017. Of this amount, \$50 million (86%) was from state general fund appropriations, with the remaining \$8 million (14%) being funded through various sources such as federal and local government grants, Interest on Lawyers Trust Accounts, and fees.

STRATEGIES

As the state's highest court, the Supreme Court hears oral arguments in the State Capitol Courtroom and the Minnesota Judicial Center. The Supreme Court reviews matters on certiorari, meaning it reviews cases to set precedent, to clarify legal issues, to resolve statutory conflicts, and to answer constitutional questions. The Supreme Court considers appeals from judgments from the Court of Appeals, the Workers Compensation Court of Appeals, and the Tax Court. It hears special term matters, motions, and petitions for extraordinary relief. The Supreme Court also hears mandatory cases, including first degree murder convictions and election contests. The Court promulgates rules of practice and procedure for the legal system in the state.

In addition to hearing appeals, the Supreme Court is responsible for regulating the practice of law, and making recommendations for improvement of the judicial system.

The Chief Justice is responsible for supervising administrative operations of the state court system. The Chief Justice is assisted by the State Court Administrator's Office, which provides the administrative infrastructure for the Judicial Branch, including providing finance, human resources, technology, education, communications, research/evaluation, caseload management and cross-district judicial assignments. The Chief Justice serves as chair of the Judicial Council, the policy-making entity for the Judicial Branch.

The mission of the Judicial Branch is *"To provide justice through a system that assures equal access for the fair and timely resolution of cases and controversies."* The Supreme Court conducts its administrative functions in support of three strategic goals to deliver its mission and to support the statewide outcomes of **promoting strong families and communities, insuring people in Minnesota are safe** and **providing efficient and accountable government services**:

1. Access to Justice – Ensuring the justice system is open, affordable, effective and accountable to the people it serves.
2. Administration of Justice for Effective Results – Working across branches of government and with other justice system stakeholders to improve outcomes for and the delivery of services for children, families, and alcohol and other addicted offenders who come to its courts.
3. Public Trust, Accountability, and Impartiality – Through education, outreach to diverse communities and a commitment to effective and efficient customer service and accountability, improving citizens' understanding of and confidence in the Third Branch of government.

The Judicial Council conducts a rigorous strategic planning process that guides the work of the State Court Administrator's Office in support of the Judicial Branch's three strategic goals. The strategic plan is reviewed and updated biennially.

In recent years, as part of the Judicial Council's strategic planning, the Judicial Branch has begun implementing an ambitious reform agenda involving the use of technology and the re-engineering of business practices in a system-wide effort to expand services and ensure equal access to justice. The centerpiece of this effort – the eCourtMN Initiative – transformed Minnesota's courts from a paper-based environment to an electronic information environment that will ensure convenient, timely, and appropriate access to case information for all stakeholders, and result in more timely and efficient processing of cases. Electronic filing of cases, at both the trial and appellate levels, became mandatory on July 1, 2106. Current efforts focus on leveraging technology to provide high-quality, consistent, and convenient court administration services anywhere in the state.

The Minnesota Constitution, Article VI, https://www.revisor.mn.gov/constitution/#article_6, provides the legal authority for the Supreme Court. M.S. 2.724 provides legal authority for the chief justice's administrative responsibilities: <https://www.revisor.mn.gov/statutes/cite/2.724>. M.S. 480.05 provides legal authority for the Supreme Court's rule making authority: <https://www.revisor.mn.gov/statutes/cite/480.05>. M.S. 480.13-17 provide legal authority for the position and duties of the state court administrator: <https://www.revisor.mn.gov/statutes/cite/480.13>, <https://www.revisor.mn.gov/statutes/cite/480.14>, <https://www.revisor.mn.gov/statutes/cite/480.15>, <https://www.revisor.mn.gov/statutes/cite/480.16>, <https://www.revisor.mn.gov/statutes/cite/480.17>.

Net Fiscal Impact = (Expenditures – Revenues)	1,195	2,495	2,495	2,495
Maintain FTEs	3.0	7.1	7.1	7.1

Recommendation:

The Governor recommends funding for this request from the Supreme Court, with the exception that compensation increases are funded at 3% each year.

The Judicial Branch seeks \$4,189,000 in the FY2020-21 biennium to increase the compensation of Supreme Court justices by 3.5% each year of the biennium, provide a 3.5% each year compensation pool for employees, and fund unavoidable health insurance premium increases. The request represents a 5.4% increase in the Supreme Court biennial base budget. The request maintains the current complement of employees.

Rationale/Background:

In order for the Judicial Branch to continue driving innovation in our court system and improve services to Minnesotans, the Judicial Branch needs to retain and attract skilled and knowledgeable employees and judges who can maintain and operate a modern, efficient, and technology-based court system. However, the Judicial Branch faces two significant challenges:

- Following a six year salary freeze, which made it possible to preserve essential court functions while managing difficult budget cuts and freezes between FY2008 and FY2013, the Judicial Branch has made concerted efforts to improve the competitiveness of the Judicial Branch salary structure. To ensure the salary structure supports a competent workforce, and to not fall below market in the future, the Branch must continue to keep pace with public-sector market competitors. Retaining a skilled and knowledgeable workforce is important to maintain a technology-based court. Judges in some counties make less than the county attorneys who appear before them, and, in some cases even less than the assistant county attorneys.
- The second workforce challenge is a significant retirement wave among both employees and judges. Nearly one-third of current Judicial Branch staff will be 65 years old or older in the next 10 years. In the last two years, 49 judge positions have been subject to the appointment/election process — 15% of all judges in the state. By 2020, at least 37% of all judges that were on the Bench in 2015 will have either retired, or will have turned 65 years old.

This incredible loss of experience and talent is especially concerning when paired with a salary structure that must remain competitive for the Judicial Branch to compete for workers with the necessary skills.

The Supreme Court also requests funding for unavoidable health insurance increases. Health insurance premiums are estimated to increase by 5.63% in 2020 and 5.62% in 2021. The Judicial Branch does not negotiate its own insurance agreements – it participates in the general plan negotiated by Minnesota Management and Budget.

The Judicial Branch cannot absorb the increased insurance contribution cost and would need to divert funding from court functions to pay for the increases without additional funding.

Proposal:

This change level request is not a new initiative. The Judicial Branch's FY2020-21 biennial budget request seeks funding to increase employee and judge salaries, which will help ensure that the Judicial Branch will be ready to respond to this retirement wave, while maintaining the caliber of workforce needed to continue driving innovation within the court system.

In addition, the request for funding unavoidable health insurance increases will hold court services harmless from rising insurance costs for Judicial Branch judges and employees.

Equity and Inclusion:

- The change level request does not directly impact any Racial and Ethnic groups.
- The change level request is not aimed at reducing or eliminating any disparities for Racial and Ethnic groups.
- There are no potential positive or negative impacts on the identified groups.
- The change level request will enable the Judicial Branch to continue efforts to attract and retain skilled and knowledgeable employees and judges who can maintain and operate a modern, efficient, and technology-based court system. In FY17, the Branch implemented a formal pay-for-performance structure for unrepresented staff and prioritized pay-for-performance in collective bargaining, ensuring that all employee increases are based on performance. These pay-for-performance structures recognize exemplary performance and serve as performance accountability mechanisms.

Results:

This request is sought to support the core mission and services of the Supreme Court and to allow the Court to continue to undertake initiatives designed to increase efficiency, reduce costs, and improve public services.

Minnesotans bring their most important and complex matters to the courts for resolution. Judges and staff work every day to help the people resolve these disputes. At the same time staff and judges are driving major innovation within the court system. Their innovations are improving service to the public and creating new efficiencies throughout the justice system. It is critically important that the Judicial Branch continue to retain and attract a workforce that builds on this innovation.

Supreme Court

FY 2020-21 Biennial Budget Change Item

Change Item Title: Cyber Security Program

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	2,500	2,500	2,500	2,500
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,500	2,500	2,500	2,500
FTEs	5.5	5.5	5.5	5.5

Recommendation:

The Governor recommends funding for this request from the Supreme Court.

The Judicial Branch seeks \$5,000,000 in the FY2020-21 biennium to continue development of the Judicial Branch Cyber Security Program. The request represents a 6.4% increase in the Supreme Court biennial base budget.

Rationale/Background:

The Judicial Branch launched its cyber security program in FY2017. This request seeks to enhance and further the program. The Branch's Cyber Security Program is aimed at mitigating the Branch's risk of major data breaches, data corruption, system outages, document/data loss, and cyber-attacks. The Judicial Branch recently transitioned to statewide electronic filing of court cases, electronic case records and online sharing of court records. This has resulted in increased dependence on the Branch's technology infrastructure. The Branch recognizes that as an organization's dependence on technology increases, there are ever increasing risks – major outages and cyber security incidents become more common and more costly. The strength and security of the Judicial Branch technology infrastructure is one of the Branch's highest priorities. The request addresses necessary staff, training, hardware, and software needs to strengthen this effort.

The Judicial Branch is responsible for and committed to the safety and security of a magnitude of public, private, and sealed information regarding Minnesotans involved in the judicial system. The Cyber Security Program maintains and ensures the confidentiality, integrity, and availability of information through a carefully coordinated protection network, which provides the Judicial Branch the necessary flexibility to protect against increasingly sophisticated cyber-attacks.

Proposal:

The Judicial Branch Cyber Security Program seeks funds to continue to make forward progress to respond to the ever-changing cyber-threat landscape. In the first two years of operation the Branch formed a dedicated team and launched critical tools and policies to increase the Branch's ability to secure sensitive data, identify vulnerabilities, and mitigate threats. The Judicial Branch is seeking funding for the resources and tools needed to continue these efforts.

Equity and Inclusion:

All Minnesotans are impacted by the proposed change item. Data breaches, data corruption, system outages, document/data loss, and cyber-attacks have a direct impact on the ability of Minnesotans to access the judicial system. Protection of Judicial Branch data and technology infrastructures is critical to the public trust and confidence placed in the Judicial Branch.

Results:

The Judicial Branch has promulgated policies and procedures to measure specific program performance measures as part of the Cyber Security Program implementation, including the following:

- **Quantity:** Have adequate policies and procedures been developed and are court staff and judicial officers sufficiently trained?
- **Quality:** Are all technology systems adequately secure?
- **Result:** The risk of data breaches, data corruption, system outages, document/data loss, and cyber-attacks is greatly reduced.

Periodic reports are provided to the Judicial Council. Internal policies and procedures are monitored for compliance.

Supreme Court

FY 2020-21 Biennial Budget Change Item

Change Item Title: Civil Legal Services

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	1,646	2,568	2,568	2,568
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,646	2,568	2,568	2,568
FTEs	0	0	0	0

Recommendation:

The Governor recommends funding this request from Civil Legal Services submitted through the Supreme Court.

Civil Legal Services (CLS), a core function of the justice system, requests an increase of \$1,646,000 to its base funding in both years of the 2020-2021 biennium, along with an additional \$922,000 increase in the second year of the 2020-2021 biennium. This increase will continue the improvement of legal outcomes and enhance services to Minnesotans who have low incomes or disabilities, or are elderly, and who need civil legal help to meet their basic human needs. The increase will be used for compensation enhancement for CLS attorneys, whose salaries are significantly less than their other public sector counterparts, and to defray the network's increases in health insurance costs. CLS programs' total collective budget, including the appropriation, is \$39,551,657. The requested increase would be 4% of all CLS funding in FY 2020 and 6.1% of all CLS funding in FY 2021.

Rationale/Background:

CLS opens the doors of the justice system to the most vulnerable in our community. It creates strong and stable families and communities by helping people find solutions to civil legal disputes. It helps victims of domestic violence achieve safety, preserves housing stability and prevents homelessness caused by improper eviction and foreclosure, protects vulnerable Minnesotans from financial exploitation, and maximizes the ability of people who are elderly or have disabilities to live safely and independently in their communities. CLS also increases efficiency in the justice system by redirecting cases that are without merit or can be resolved in another manner, and by ensuring efficient use of the courts when CLS clients come before a judge. CLS increases public access to easily understood legal resources by developing, and continuously expanding, the website www.LawHelpMN.org. In addition, the return on investment (ROI) in CLS is high. The most recent Economic Impact Study conducted by the Minnesota Legal Services Coalition demonstrates a \$3.94 ROI in CLS, with CLS generating \$133 million in revenue for Minnesota in 2014. Additionally, in 2017, CLS used legal representation to protect or to recover more than \$22 million dollars in child support, household financial support, and public benefits for Minnesotans.

Inadequate resources for CLS to provide legal representation to meet the demand for its services and to address critical human needs has been persistent. Presently, CLS is forced to turn away 60% (3 out of 5) eligible clients seeking its services due to lack of resources. The lack of resources also results in a CLS compensation deficit, when CLS is compared to other public interest employers in the justice system. Presently, the average starting salary for CLS attorneys is \$47,983. To illustrate the CLS compensation deficit, this is 87% of the current starting salary for public defenders. This compensation deficit widens as CLS attorneys and public defenders become more experienced. For example, CLS attorneys with 7-10 years of experience have annual salaries less than 80% of similarly experienced public defenders. Increased general fund support to address the CLS compensation

deficit and to cover increased health insurance costs will help CLS to recruit and retain skilled staff, to improve returns on CLS investments in personnel, and – as a result – to be more effective and efficient in helping vulnerable Minnesotans to meet their basic human needs.

Proposal:

The funding requested will support the existing CLS program, which provides legal help to vulnerable Minnesotans in all 87 counties. From 2015 to 2017, CLS increased by nearly 9% the number of its clients facing foreclosure or eviction who remained housed; increased by over 6% the number of seniors and people with disabilities it served who continue to live safely and independently in the community; and held steady in the overall number of Minnesotans helped who successfully resolved critical legal problems. CLS achieved these outcomes in spite of widespread staff turnover due to the CLS compensation deficit. The intended result of the requested increase is additional improved outcomes for Minnesotans with low incomes needing legal representation or advice to meet their need for safety, shelter, food, health care, and basic income. CLS partners with the courts, public libraries, domestic violence shelters, social service systems, and volunteers to achieve these results. CLS has an active working group focused on maximizing coordination in CLS intake and referral processes within the existing CLS infrastructure in Minnesota, while also partnering with the Judicial Branch in the Justice for All project, now in its implementation phase with support from the National Center for State Courts. These collaborative, system-improvement-focused efforts will result in improved and increased access to justice to meet basic needs for elder Minnesotans, Minnesotans with disabilities, or Minnesotans with low incomes. Here is how CLS will invest the requested increase in CLS funding and how the CLS system will benefit as a result:

- \$964,000 of the request will go to salary improvement. This will enable a 2-6% increase in CLS staff salaries. This level of increase would allow CLS to bring its starting attorney salary up to approximately 90% of the current starting salary for public defenders and to take modest steps to address the wider gaps between CLS and public defender salaries at higher experience levels.
- \$435,100 of the request will go to offset anticipated increases in health insurance and other benefits costs in the range of 7-17%.
- CLS continues to innovate and to refine its use of the newest and best technological platforms to facilitate the efficient and effective triaging, intake, and referral processes throughout the statewide CLS system, wherever Minnesotans go for legal help, to ensure that there is no wrong door for accessing CLS. CLS also continues to expand direct outreach to underserved communities in Minnesota to meet people where they live and work, facilitating access to justice at locations of identifiable community need. Increasing CLS competitiveness in compensation with other public sector legal employers will help CLS providers retain key staff to facilitate these important system-improvement activities. Without the increase, CLS will continue to experience the effects of both the CLS compensation deficit and rising health care costs on CLS providers' budgets, staffing, and services.

Equity and Inclusion:

CLS provides access to the justice system for people of color, people with disabilities, the elderly, LGBTQ people, and veterans. These populations have disproportionate numbers of people with low incomes who qualify for CLS services. While most CLS providers serve all of these populations and target outreach to them, CLS has specific programs to address the unique legal needs of people with disabilities and the elderly.

In 2017, 50% of clients served by CLS were non-white (28% Black, 14% Hispanic, 4% Native American, and 4% Asian).

Equity and Inclusion efforts are sustainable because equity is a core value of CLS and central to our mission.

Results:

Program: Supreme Court Operations

mncourts.gov/

AT A GLANCE

- In 2017, 108 direct appeals and 635 petitions for further review were filed with the Supreme Court.
- The Chief Justice is the administrative head of the Judicial Branch, which includes 320 justices and judges and 2,500 employees.
- The Supreme Court publicly disciplined 41 Minnesota lawyers in 2017.

PURPOSE & CONTEXT

The Supreme Court is the highest court in Minnesota, serving as the final guardian of the Minnesota Constitution and interpreting/applying the United States Constitution.

The Supreme Court is solely responsible for the regulation of the practice of law and for judicial and lawyer discipline.

The mission of the Judicial Branch is “To provide justice through a system that assures equal access for the fair and timely resolution of cases and controversies.” The Supreme Court conducts its adjudicative and administrative functions in support of three strategic goals to deliver its mission and to support the statewide outcome of strong families and communities:

1. Access to Justice – Ensuring the justice system is open, affordable, effective and accountable to the people it serves.
2. Administration of Justice for Effective Results – Working across branches of government and with other justice system stakeholders to improve outcomes for and the delivery of services for children, families, and alcohol and other addicted offenders who come to its courts.
3. Public Trust, Accountability, and Impartiality – Through education, outreach to diverse communities and a commitment to effective and efficient customer service and accountability, improving citizens’ understanding of and confidence in the Third Branch of government.

The Supreme Court serves all Minnesota citizens. The administrative and adjudicative functions of the Supreme Court support the following statewide outcomes:

- Strong and stable families and communities;
- People in Minnesota are safe; and
- Efficient and accountable government services.

SERVICES PROVIDED

The Minnesota Supreme Court considers appeals from judgments from the Court of Appeals, the Workers Compensation Court of Appeals, and the Tax Court. It hears special term matters, motions, and petitions for extraordinary relief. The Supreme Court also hears mandatory cases, including first degree murder convictions and election contests. The Court promulgates rules of practice and procedure for the legal system in the state. The Court oversees the practice of law, including admission to the Bar, lawyer and judge discipline, and continuing legal education.

The Chief Justice is responsible for supervising administrative operations of the state court system. The Chief Justice serves as the chair of the Judicial Council, the policy making body for the Judicial Branch.

The Chief Justice is assisted by the State Court Administrator’s Office, which provides the administrative infrastructure for the Judicial Branch. The State Court Administrator’s Office is responsible for providing Judicial

Branch finance, human resources, technology, education, communications, research/evaluation, caseload management and cross-district judicial assignments.

RESULTS

It is the policy of the Minnesota Judicial Branch to establish core performance goals and to monitor key results that measure progress toward meeting these goals in order to ensure accountability of the Branch, improve overall operations of the court and enhance the public's trust and confidence in the Judiciary. Throughout the year the Supreme Court reviews performance measure results. This review is shared with the Judicial Council (the Branch's governing body) twice a year.

The Supreme Court timing objectives identify the Court's performance based on the case type: Mandatory/Original Cases (e.g. First Degree Murder cases and Election Contests); Discretionary Cases (e.g. appeals from judgments from the Court of Appeals, the Workers Compensation Court of Appeals, and the Tax Court); and Expedited Cases (Appeals in termination of parental rights and adoption cases).

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>FY2016</i>		<i>FY2017</i>	
		<i>Number of Cases</i>	<i>Percent that met Timing Objective</i>	<i>Number of Cases</i>	<i>Percent that met Timing Objective</i>
Quality	Mandatory/Original Cases Ninety five percent of the cases will be disposed of within 180 days of submission to the Supreme Court.	28	88%	28	88%
Quality	Discretionary Cases Ninety five percent of petitions for further review should be disposed of within sixty days of the filing of the request for review.	537	86%	551	89%
Quality	Expedited Cases Ninety five percent of expedited appeals (termination of parental rights, adoptions) should be disposed of within 25 days of filing the appeal.	20	100%	19	100%

Data are from the Judicial Branch 2016 & 2017 Performance Measures – Key Results and Measures Annual Report. The report can be found at mncourts.gov/.

The Minnesota State Constitution, Article VI, provides the legal authority for the Supreme Court. M.S. 2.724 <https://www.revisor.mn.gov/statutes/?id=2.724> provides the legal authority for the chief justice's administrative responsibilities. M.S. 480.05 <https://www.revisor.mn.gov/statutes/?id=480.05> provides legal authority for the Supreme Court's rule making authority. M.S. 480.13-.17 <https://www.revisor.mn.gov/statutes/?id=480> provides legal authority for the position and duties of the state court administrator.

Program: Civil and Family Legal Services

mncourts.gov/

AT A GLANCE

- In 2017, Civil Legal Services (CLS) served 46,521 households consisting of more than 112,000 people throughout all 87 Minnesota counties.
- There is one Civil Legal Services attorney for every 6,058 eligible clients, compared with one practicing attorney for every 324 Minnesotans.
- 18% of clients represented are seniors, 19% are people with disabilities, and 65% are women.

PURPOSE & CONTEXT

The Supreme Court administers CLS funding. There are three sources of Court-administered funding: general fund, Interest on Lawyers Trust Accounts (IOLTA), and attorney registration fees. The Court administers these funds through its Legal Services Advisory Committee. By statute, 85% of the general fund support is distributed on a poverty population basis to the Minnesota Legal Services Coalition, six regional CLS organizations that provide a full range of civil legal help in all 87 counties. The remaining 15% of general fund support is awarded on a competitive basis to CLS organizations. CLS also receives funding from federal and local government grants, foundations, the United Way, law firms, corporations, and individual private donors.

The statewide civil legal services network is a core function of the justice system. It ensures access to justice for vulnerable Minnesotans and increases efficiency in the justice system. CLS focuses on resolving civil legal matters that directly affect the basic human needs for safety, shelter, and household sustenance. All CLS clients have low incomes, disabilities, or are elderly. Network innovations to increase efficiency include expanded public access to services through technology, controlled cost through shared service coordination, and leveraging of volunteer resources.

SERVICES PROVIDED

CLS opens the doors of the justice system to the most vulnerable in our community. It creates strong and stable families and communities by helping people find solutions to civil legal disputes. In addition to the services noted in the “At a Glance” box above, CLS provided education and self-help services to nearly 319,764 additional people. CLS attorneys and advocates work from offices throughout the state, giving direct service to people in all 87 Minnesota counties. CLS also developed, and is continuously expanding, a public internet resource, www.LawHelpMN.org. This website has dozens of self-help resources including easy-to-use legal forms, and is used by the court system, public libraries, social service agencies, and the general public. It is preparing to launch an improved referral system and an online triage system to improve the efficiency and effectiveness of guiding potential clients to the best resource to address their legal issues.

CLS priorities include [1] helping victims of domestic violence achieve safety; [2] preserving housing stability and preventing homelessness due to improper eviction or foreclosure; [3] protecting vulnerable Minnesotans from financial exploitation; and [4] maximizing the ability of people who are elderly or have disabilities to live safely and independently in their community. An essential part of the state’s domestic violence intervention system, CLS gives legal help to women and children served by the state’s network of domestic violence shelters and support programs. CLS has a similar relationship with social service systems that address homelessness or independent living for seniors or people with disabilities. The CLS partnership with the justice system is also critical. CLS creates efficiencies in the justice system by redirecting cases that are without merit or can be resolved in another manner, and by ensuring efficient use of the courts when CLS clients come before a judge.

CLS also creates efficiency by providing essential infrastructure to leverage and support volunteer attorneys through training, mentoring, www.ProJusticeMN.org, and a new volunteer program Minnesota Legal Advice Online (MLAO). Finally and critically, CLS has an active working group focused on maximizing coordination in CLS intake and referral processes, while also partnering with the Judicial Branch in the Justice for All project, now in its implementation phase with support from the National Center for State Courts.

CLS in Minnesota is forced to turn away 60 percent (3 out of 5) of eligible clients seeking its services due to lack of resources. The inability of CLS to meet the demand for its services to meet critical human needs has been persistent. CLS continues to create efficiencies through technological innovations, coordination, and leveraging volunteers to serve more eligible families and individuals, but the need for services far exceeds the capacity of CLS.

Narrative

In FY20 and FY21 the Supreme Court will continue to receive federal funding for Child Support and the Court Improvement Program. The Order for Protection database grant ended in FY14 and was replaced by the Stop Violence Against Women Act for a Point of Contact position grant. This grant has a state match of approximately 30%. The Expedited Child Support Program funds magistrates, personnel, and operating costs. The Expedited Child Support Program receives federal reimbursement at a rate of 66% for eligible expenditures, so less spending

with state appropriated dollars would result in a proportionate decrease in federal reimbursement. The Court Improvement Program improves the processing of child protection cases and the outcomes for abused and neglected children. Estimates were based on past funding. Grants that will be ending did not include revenue projected past the end date.

AT A GLANCE

In 2017 the Department of Revenue paid:

- \$927 million in aids to local governments
- \$651 million in property tax refunds to about 860,000 individuals
- \$74 million in credits to reduce individuals' and businesses' property taxes
- \$24 million in other programs

PURPOSE

The Minnesota Department of Revenue's mission is "working together to fund Minnesota's future." Our vision is that everyone reports, pays and receives the right amount: no more, no less.

Property taxes are a primary source of funding for local governments. Property Tax Aid, Credit and Refund programs administered by the Department of Revenue provide direct property tax relief to individual taxpayers and funding to local governments, including cities and counties.

In addition to administering Tax Aids, Credits and Refunds, the Department of Revenue administers 31 types of state and local taxes and collects debt owed to state agencies and local government. We collect over \$23 billion in state taxes annually to fund state and local programs.

Tax and debt collection revenue collected by the Department of Revenue is accounted for in the Tax Aids, Credits and Refunds budget book. More information about the Department of Revenue's tax administration and debt collection activities can be found in the Minnesota Department of Revenue budget book, which also details the operating expenditures of the department.

BUDGET

**Spending by Category
FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

The Department of Revenue administers three dozen Property Tax Aid, Credit and Refund programs that make payments to individual taxpayers and local governments. In 2017, we disbursed nearly \$1.7 billion in general fund dollars through four types of programs:

- Aids paid to local government to help them fund local services
- Credits that reduce the amount of property taxes individuals pay
- Refunds that provide individuals direct relief for taxes already paid
- Other programs such as the senior citizen property tax deferral program and tax refund interest payments.

STRATEGIES

Property Tax Aid, Credit and Refund programs:

- Target property tax relief based on income and ability to pay
 - Provide aid to local governments and property tax relief to individuals to help make the services provided by local governments more affordable
 - Address sudden increases in property taxes
 - Encourage behavior which the state deems beneficial to achieving statewide outcomes.

FTEs		46.90	20.60	16.10	16.10

Recommendation:

The Governor recommends Minnesota respond to the 2017 federal tax bill and other federal tax changes by partially separating our state individual income tax system from the federal government's, giving Minnesota more control over the fairness of our taxes and the stability of our revenue. Adopting the federal changes for business income provides simplicity for tax filing in Minnesota and ease of tax administration. The proposal provides tax relief for low- and middle-income Minnesotans with an increased Working Family Credit for larger families.

Rationale/Background:

Minnesota's income tax currently uses federal taxable income (FTI), as defined in the Internal Revenue Code (IRC), as its starting point. Our state income tax calculation relies on many federal calculations and definitions. Since we last updated our tax statutes to conform to the IRC, several federal tax bills have been enacted, including the 2017 act known as the Tax Cuts and Jobs Act (TCJA).

TCJA made sweeping changes to the federal tax system, including changing individual income tax by suspending personal and dependent exemptions, increasing the standard deduction amount, and suspending or modifying itemized deductions. Provisions were enacted to broaden the tax base for businesses by adding new foreign income provisions, repealing or limiting the use of business deductions, and closing special loopholes in the tax code. The tax broadening provisions were offset by a reduction in corporate tax rates and a new deduction for business income of pass through businesses.

This proposal generally conforms to the federal tax changes for business income and decouples in significant ways from federal individual income tax policy.

Proposal:

1. *Individual provisions*
 - a. *Keep Minnesota's Standard Deduction, Itemized Deductions, and Personal and Dependent Exemptions by conforming to Federal Adjusted Gross Income; Administrative Ease for Taxpayers.*

This proposal changes the starting point of Minnesota taxable income for individuals to federal adjusted gross income (FAGI), instead of FTI, beginning with tax year 2019.

This new starting point gives Minnesota the ability to determine how itemized and standard deductions and exemptions meet Minnesota's needs, rather than mechanically following changes in federal law. The proposal

creates Minnesota standard deductions and Minnesota personal and dependent exemptions at the current levels. The proposal maintains tax benefits for Minnesota that are available under current Minnesota law, including charitable contribution deductions, unreimbursed employee expense deductions, current treatment of 529 Plan withdrawals, and casualty losses, among others.

The proposal conforms to select federal changes to individual income tax such as the changes to the mortgage interest deduction limit.

Individual income tax filing season is underway and Minnesotans are already receiving their refunds for tax year 2018. However, changes made to federal taxes by TCJA, like adjusted gross income, asset depreciation and calculation of basis, have an impact to state tax items for future years. If these items are left as is, taxpayers' future year state returns will be affected. Under this proposal, Minnesotans will be able to rely on their tax year 2018 filing using current 2018 forms and instructions and be able to maintain consistent tracking for state and federal tax items in future years. A subset of taxpayer returns with asset depreciation will experience a change to their 2018 returns. Taxpayers affected by these asset depreciation provisions will not need to refile their taxes; the department will make adjustments and communicate with taxpayers. This approach balances the fact that the tax year 2018 filing season for individuals is already underway with the need to align tax items that affect future year returns.

b. Working Family Credit Expansion

Many low- and middle-income families haven't seen their wages rise while their cost of living has increased. This credit, which also exists at the federal level, helps working families deal with the many financial constraints they face. The program is an important source of financial stability for low- and moderate-income working families with children. A growing body of research shows that the credit benefits families at virtually every stage of life. For example, it:

- Improves infant and maternal health,
- Reduces poverty,
- Improves academic performance and employment outcomes – children in families receiving the federal credit do better in school, are more likely to attend college, and earn more as adults,
- Boosts employment, which reduces the number of households receiving other forms of assistance, and
- Helps businesses – working families are likely to put these funds back into the Minnesota economy.

This proposal changes the Working Family Credit calculation to allow an increased credit for families with three or more children. This is an expansion of the existing state credit, which is modeled on the federal Earned Income Tax Credit.

Under this proposal, about 44,300 tax returns would be affected for tax year 2019 and 2,400 new households would be eligible for the Working Family Credit. Those helped by this proposal would see an average tax reduction of \$227.

2. Business Income Provisions

a. Business Activity

The Governor recommends conforming to most of the changes for business taxes from the 2017 federal tax bill, beginning with tax year 2018. The proposal does not allow the federal 20% deduction for qualified business income of pass-through entities.

b. Section 179 Expensing

The proposal conforms to the federal expansion of allowances for section 179 expensing starting with taxable year 2018. The deduction allows businesses to expense up to \$1 million of qualifying equipment purchases in the first year placed in service. For property placed in service in 2018, the proposal retains the Minnesota 80% addback. The proposal completely conforms to federal section 179 expensing by removing the Minnesota 80% addback modification for property placed in service starting in tax year 2019.

c. Bonus Depreciation

The proposal also conforms to the federal 100% bonus depreciation while retaining the Minnesota 80% addback modification. The changes include an increased percentage amount and expansion of the types of property that qualify for the deduction, including both new and used property.

d. Other Income

The proposal conforms to federal treatment of certain foreign earnings and profits. Deferred foreign earnings that are deemed to be includible federally and subject to the one-time transition tax are included in the Minnesota tax base. The proposal also conforms to federal current year inclusion of global intangible low-taxed income (GILTI) which addresses profit shifting concerns in the new territorial tax system and changes made to subpart F income (current year inclusion of certain types of passive foreign earnings). The proposal does allow the federal deduction for foreign-derived intangible income (FDII) that is derived from a domestic corporation.

This proposal conforms to federal changes to calculation of unrelated business income for tax exempt entities.

e. Loss Limitations

The proposal conforms to federal limits on current year use of business losses and generally allows taxpayers to continue the carry forward of any disallowed losses for up to 15 years under Minnesota's net operating loss (NOL) deduction. For most businesses with gross revenues in excess of \$25 million, the interest deduction is newly limited to 30% of adjusted earnings. Taxpayers are also subject to a \$500,000 limitation on excess business losses. This limits the amount of nonbusiness income that can be offset in the current year. Any excess disallowed loss can be carried forward as part of NOL.

Beginning in tax year 2018, the amount of NOL deduction that corporations can use to offset business income in any taxable year is 80%. Any NOL carryforward in excess of 80% of taxable income can be carried forward to be used in a future year.

f. Repeal of Corporate AMT

The proposal repeals Minnesota's corporate alternative minimum tax (AMT) to mirror the federal repeal of AMT under TCJA, beginning in tax year 2018. The proposal modifies the existing carryover credit that allows corporations that pay AMT in one year to use that tax as a credit against regular tax in a later tax year. Carryover credits generated in years prior to repeal could continue to be used in 2018 and for up to three tax years.

3. Tax Year 2017 Extenders

The Governor recommends updating Minnesota's tax code with provisions extended under the Disaster Tax Relief and Airport and Airway Extension Act of 2017 and the Bipartisan Budget Act of 2018 (BBA) to provide relief to thousands of Minnesota families who take deductions for tuition, mortgage insurance premiums, and mortgage debt forgiveness. Certain provisions in the IRC are set to expire each year and are extended annually at the end of the taxable year to which they apply. The BBA extended a number of provisions for one year through tax year 2017, including various depreciation rules. The acts allow increased limits for charitable contributions and special rules for early distributions related to recent hurricane and wildfire federally-declared disasters in 2017 and 2018.

For C corporations, the Department of Revenue will work with taxpayers to ensure that any adjustment to filed returns is done efficiently and with minimal administrative complications. For individuals, the Department of Revenue will adjust most returns and issue refunds.

4. Administrative Costs

The proposal includes the costs for the Department of Revenue to administer the bill in a manner that is as easy as possible for taxpayers, preparers and software providers. The proposed response to the federal changes and extenders affects returns that taxpayers have already filed for tax years 2017 and 2018. The department's

administrative costs help us minimize the impact of the changes on taxpayers through automated and manual adjustments to previously filed returns. Administrative costs also cover the increased taxpayer communications, support and assistance that will be necessary to help taxpayers, preparers and software providers understand changes and respond to appeals. These costs will also ensure that the department has the tax year 2019 filing system fully developed, tested and ready for taxpayers in January of 2020. The administrative costs contained in this proposal are shown in the Expenditure Overview, Financing by Fund, and Change Summary fiscal reports contained in the Minnesota Department of Revenue's operating budget book.

Equity and Inclusion:

Expanding the Working Family Credit could play a role in narrowing Minnesota's racial income disparities. People of color were approximately 18% of the state's population in 2015, but they made up 34% of Minnesota households eligible for the Earned Income Tax Credit. In 2015, 49% of the credit was distributed to taxpayers in Greater Minnesota.

Results:

Minnesota low- and moderate-income families will receive a larger Working Family Credit, providing them with resources to meet their families' needs. This proposal will also increase the progressivity of Minnesota's tax code.

FY 2020-21 Biennial Budget Change Item

Change Item Title: Increase the Working Family Credit to Offset Transportation Costs

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	(40,800)	(41,000)	(41,200)	(41,500)
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	40,800	41,000	41,200	41,500
FTEs	0	0	0	0

Recommendation:

The Governor recommends increasing the amount of the Working Family Credit in order to offset the impact of the transportation proposal on low-income families.

Rationale/Background:

Minnesota cannot preserve and improve the quality and performance of the state's transportation systems under the combined limitations of current investment levels and current lifecycle replacement practices. The consequences of underinvesting in the state's transportation system will include deterioration in service, increases in congestion, failing infrastructure, and diminished ability to remain economically competitive. This is because transportation systems facilitate the efficient movement of people and goods and create the opportunity for economic development, enhanced productivity, job formation and sustainable growth. Without additional investment, the transportation system will not be able to expand to accommodate expected population and job growth. In addition, alternatives to driving must play a larger role in satisfying the growing transportation demands - roads, transit and other transportation modes must work together as one system.

The transportation system supports all families in Minnesota. This proposal balances the needs of improved transportation with an additional tax credit for working families to help them afford the changes in the transportation proposal.

Proposal:

The proposal would increase the working family credit by \$100 for each single or head of household recipient and by \$200 for each married filing jointly recipient. This increase will provide working families with a tax credit to help offset any increased amount they pay for gasoline as a part of the Governor's recommendation to fund infrastructure.

Equity and Inclusion:

The increase in working family credit provides tax relief for low and middle-income Minnesotans.

Results:

Type of Measure	Impact
Tax Progressivity	Increase

Statutory Change(s):

Minnesota Statutes Section 290.0671

Tax Aids, Credits and Refunds

FY 2020-21 Biennial Budget Change Item

Change Item Title: Reduce Taxes on Social Security Income

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	(11,000)	(11,900)	(12,700)	(13,500)
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	11,000	11,900	12,700	13,500
FTEs	0	0	0	0

Recommendation:

The Governor recommends increasing the portion of social security benefits that Minnesotans can subtract when calculating Minnesota taxable income.

Rationale/Background:

A certain amount of Social Security benefits are required to be included in federal taxable income if the income exceeds certain thresholds. Under current law, a taxpayer may subtract a portion of social security income when calculating Minnesota taxable income.

Proposal:

The proposal increases the maximum subtraction amount from \$4,700 to \$6,000 for married filing jointly, from \$2,350 to \$3,000 for married filing separately, and from \$3,660 to \$4,500 for single and head of household filers for 2019. The proposal also lowers the phase-out thresholds. The new thresholds are set so that taxpayers in the current phase-out range would have no change in tax or a slight decrease.

The maximum subtraction and phase-out totals would be adjusted for inflation beginning tax year 2020.

About 200,300 returns would be impacted for 2019 and the average reduction in tax would be approximately \$55. No taxpayers would pay more tax under the proposal.

Equity and Inclusion:

The proposal provides tax relief for Minnesotans who rely on Social Security benefits, including senior citizens.

Results:

The proposal will allow more Minnesota seniors to pay less tax on their social security income.

Statutory Change(s):

Minnesota Statutes, Section 290.0132

Tax Aids, Credits and Refunds

FY 2020-21 Biennial Budget Change Item

Change Item Title: Angel Tax Credit

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	(10,000)	(10,000)	0	0
Other Funds				
Expenditures	285	285	47	47
Revenues	368	368	127	127
Net Fiscal Impact = (Expenditures – Revenues)	9,917	9,917	(80)	(80)
FTEs	1	1	0.25	0.25

Recommendation:

The Governor recommends \$10 million in FY 2020 and \$10 million in FY 2021 for the Angel Tax Credit Program.

These funds provide a tax credit to investors or investment funds that put money into early stage companies focused on high technology, a new proprietary technology, or a new proprietary product, process, or service in specified fields. The program was funded at \$15 million in calendar years 2015 and 2016, \$10 million in calendar year 2017, and was not funded in 2018. Other funds in this program include fees collected for applications and report filing as well as expenditures for Department of Employment and Economic Development (DEED) program staff to certify participating businesses.

Rationale/Background:

The Angel Tax Credit program is Minnesota's primary economic development tool for assisting early stage businesses and is part of DEED's commitment to fostering innovation in the state. Minnesota has earned its reputation as one of the best states for business by encouraging the growth and economic competitiveness of businesses of all sizes. As high-tech startups look outside the confines of traditional hubs like Silicon Valley, Minnesota has the opportunity to provide incentives that will encourage job growth and technical expertise here in the state. The Angel Tax Credit program has resulted in over \$421 million in private investment in Minnesota startups, leveraged by the state's issuance of \$101 million in tax credits to angel investors. The program spurs economic growth and builds on Minnesota's existing ecosystem of high tech, high innovation companies, including the state's clean energy technology companies.

The program is also an important tool for wealth creation in communities across the state. Since its inception, DEED has sought to broaden the base of individuals, communities, and businesses that benefit from the program. DEED believes it is critical that all qualifying businesses in Minnesota have access to the benefits of the program. The policy changes included in this proposal will increase utilization of the program among targeted group businesses, including those owned by people of color, women-owned businesses, veteran-owned businesses, businesses owned by people with disabilities, and/or businesses in Greater Minnesota.

Proposal:

The Governor recommends \$10 million in FY 2020 and \$10 million in FY 2021 for the Angel Tax Credit Program.

The Governor recommends that the Angel Tax Credit program be modified to better serve targeted group businesses. These modifications include:

- *Adjust the minimum employee compensation requirement to better serve Greater Minnesota:* This proposal revises the minimum employee compensation so rather than applying to every employee of the business, it applies to at least 51% of a business's employees. This requirement has been especially problematic in Greater Minnesota, where wage levels are lower than the metro area. The 2017 requirement was \$20.70 per hour or \$43,050 per year.
- *Lower minimum investment thresholds for investors of targeted business:* This proposal reduces the minimum investment for individuals from \$10,000 to \$7,500 to increase the pool of potential investors in targeted businesses. Targeted businesses typically raise smaller amounts from each investor than non-targeted businesses.
- *Reduce disincentives to annual report filing:* Modify the late filing penalty to \$100 from \$500, an amount that has proven to be a substantial disincentive to filing and providing the program with needed information. This proposal also adds authority for the Commissioner of DEED to revoke any credit allocated and certified for investors, funds, and businesses who fail to file.

Equity and Inclusion:

This proposal specifically targets businesses owned and managed by minorities, women and businesses located in Greater Minnesota, reserving credits for investments in these business and modifying certain program requirements to better enable them to benefit from the program.

Results:

	CY 2014	CY 2015	CY 2016	CY 2017
Number of businesses receiving investments	183	182	187	163
Number of businesses in which investments were made	110	114	105	101

Minnesota Statutes, Section 116J.8737

Tax Aids, Credits and Refunds

FY 2020-21 Biennial Budget Change Item

Change Item Title: Modifications of Sales Tax Exemptions and Updates for Wayfair

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	(490)	(570)	(140)
Revenues	(22,830)	(13,440)	16,130	27,900
Other Funds				
Expenditures	0	0	0	0
Revenues	(1,279)	(770)	931	1,630
Net Fiscal Impact = (Expenditures – Revenues)	24,109	13,720	(17,631)	(29,670)
FTEs	0	0	0	0

Recommendation:

The Governor recommends three changes to sales tax.

1. Data center software sales tax exemption modification
2. Local government and non-profit sales tax exemption for construction materials for fiscal years 2020 and 2021
3. Modification of sales tax provisions in response to the United States Supreme Court decision in *South Dakota v. Wayfair, Inc.*

Rationale/Background:

1. *Data center software sales tax exemption modification*

In the context of Qualified Data Centers and sales tax, there are three types of software:

- 1) Software that operates data center equipment,
- 2) Software that manages data, and
- 3) Software with multiple licenses loaded at the data center and distributed by the enterprise.

Under current law, software that operates data center equipment is exempt. Software that manages data at the data center is also exempt. Software with multiple licenses loaded at the data center and distributed by the enterprise to users outside of the data center is not exempt. The software exemption can be claimed for up to 20 years from the date of the first purchase qualifying for the exemption. This exemption is only available for purchases of this type of software for use in a qualified data center.

This exemption from sales tax was first enacted in 2011. At that time, with refunds being paid beginning after July 1, 2013, it was estimated to cost approximately \$24 million in 2014 and approximately \$4 million in 2015. The exemption was substantially modified in 2013. Square footage and investment requirements were reduced and the qualification period extended. At this time, the changes to the exemption were estimated to cost approximately \$8 million per fiscal year. The most recent Tax Expenditure Report anticipated that the Qualified Data Center exemption would cost \$70 million in fiscal year 2018. The 2018 Budget and Economic Forecast published in December indicated that sales tax refund claims were forecasted to be \$101 million greater than the prior forecast largely due to qualified data centers.

2. *Local government and non-profit sales tax exemption*

Under current law, construction materials and supplies are generally taxable in Minnesota. Sales tax-exempt entities such as cities, counties, townships, school districts, special districts, state institutions of higher education, public libraries, most hospitals and nursing homes, and most charitable, educational, and religious organizations may purchase construction materials directly without paying the tax, with certain exceptions. However, building, construction, and reconstruction materials purchased by a contractor or subcontractor as part of a lump-sum or similar type of contract with a guaranteed maximum price covering both labor and materials are taxable, even if the project owner is exempt from sales tax.

3. *Modification of sales tax provisions in response to the United States Supreme Court decision in Wayfair*

The June 21, 2018, U.S. Supreme Court decision in *South Dakota v. Wayfair, Inc.* allows states like Minnesota to require remote sellers with no physical presence, such as online and mail-order companies, to collect and remit the applicable sales or use tax on sales delivered to locations within their state. The Court's decision in *Wayfair* caused two existing Minnesota laws to become effective (remote sellers and marketplace providers). The department announced on July 25, 2018, that remote sellers and marketplace providers must comply with Minnesota's existing laws no later than October 1, 2018. During the implementation process, the department identified changes to current law that would ease administration and continue to pursue a level of uniformity amongst the states— a tenant of the *Wayfair* decision.

Proposal:

1. *Data center software sales tax exemption modification*

The proposal would modify the exemption for software:

- For entities whose first qualifying purchase was 5 or more years prior to July 1, 2019, purchases of software that operates data center equipment and software that manages data at the data center would be exempt, ending with the last purchase made prior to July 1, 2019.
- For entities whose first qualifying purchase was after June 30, 2019, the exemption expands to all software, is limited to 5 years of the first qualifying purchase, and the refund is reduced to 50% of the sales tax paid on the software.
- For entities whose first qualifying purchase was made less than 5 years prior to July 1, 2019, software that operates data center equipment and software that manages data at the data center would be exempt for purchases prior to July 1, 2019; and purchases after June 30, 2019, and within 5 years of the first qualifying purchase, *all* software is exempt, and the refund is limited to 50% of the sales tax paid.

2. *Local government and non-profit sales tax exemption for FY 2020 and 2021*

The proposal would eliminate the requirement that local governments and non-profits use certain types of contracts for their construction to obtain a sales tax exemption. Contractors, subcontractors, and builders would pay the tax at the time materials are purchased, and the local governments and nonprofits would submit a tax refund claim to the Department of Revenue. This provision is limited to fiscal years 2020 and 2021 only.

3. *Modification of sales tax provisions in response to the United States Supreme Court decision in Wayfair*

Regarding marketplace providers, the proposal:

- replaces current law's marketplace provider physical presence requirement with an economic nexus threshold that mirrors current law for retailers;
- requires marketplace providers to file an information report each calendar quarter;
- clarifies that marketplace providers must obtain a sales tax permit;

- removes the \$10,000 threshold amount for remote sellers selling into Minnesota solely through a marketplace provider;

Regarding remote sellers, the proposal simplifies current Minnesota law by providing that all remote sellers with sales totaling more than \$100,000, including sellers making nine or fewer sales, would be required to collect and remit sales tax.

The proposal also:

- updates and adds definitions clearly defining which remote sellers and marketplace providers are subject to Minnesota's sales tax jurisdiction;
- provides remote sellers and marketplace providers 60 days to begin collecting and remitting sales tax after satisfying Minnesota's economic nexus thresholds; and
- requires remote sellers and marketplace providers to notify the department when they no longer have economic nexus with Minnesota.

Equity and Inclusion:

This proposal will provide local governments and non-profits with an exemption from sales tax which will provide property tax relief to those jurisdictions and provide additional funds for non-profits to do their work in communities across Minnesota.

Results:

The modification of the sales tax exemption for data center software will clarify the exemption and increase the ability of taxpayers to understand which software qualifies for the exemption.

<i>Type of Measure</i>	<i>Impact</i>
Data Centers - Efficiency and Compliance	Increase

Tax Aids, Credits and Refunds

FY 2020-21 Biennial Budget Change Item

Change Item Title: Buffer Credit for Agricultural Land

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures (BWSR)	2,045	0	0	0
Expenditures (Tax Aids, Credits and Refunds)	0	15,800	15,800	15,800
Revenues (Tax Aids, Credits and Refunds)	0	550	550	550
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,045	15,250	15,250	15,250
FTEs	0	0	0	0

Recommendation:

The Governor recommends creating an ongoing property tax credit to compensate landowners required to maintain riparian buffers or a water quality equivalent on agricultural land. In addition, the Governor recommends appropriating \$2.045 million from the general fund to the Board of Water and Soil Resources (BWSR) in FY 2020 to provide payments to local soil and water conservation districts (SWCDs). SWCDs will be responsible for reporting landowner noncompliance with the buffer law to counties.

Rationale/Background:

Laws enacted during the 2015 legislative session require riparian buffers or a water quality equivalent to be established on many public waters and drainage systems. Owners of agricultural land abutting public waters must have had buffers in place by November 1, 2017. For land abutting public drainage systems, the deadline was November 1, 2018.

Proposal:

Under this proposal, landowners can claim a property tax credit of \$50 per acre for land required to be maintained as a riparian buffer. Alternatively, landowners can claim an equivalent tax credit if they choose to instead implement an alternative practice with equivalent water quality benefits.

Parcels must meet the following requirements in order to be eligible for the credit:

1. The buffer or alternative practice must be on land classified as 2a agricultural;
2. The buffer or an alternative practice is required under Minnesota Statutes, Section 103F.48, and identified on the state's buffer-protection map;
3. There are no delinquent taxes on the parcel;
4. The land has not been compensated for damages consistent with Minnesota Statutes, Chapter 103E, for the purposes of installing a buffer; and
5. The SWCD has not found the landowner noncompliant with buffer requirements.

Landowners must apply for the riparian buffer credit and certify their amount of eligible land by December 31, 2019. Landowners only apply for the first year they receive the credit. Once approved, the credit will continue into future years. Beginning in 2020 applications for the buffer tax credit will be allowed only when ownership of the land changes or when compliance with at least one of the above conditions changes.

Counties, in consultation with SWCDs, other local water management authorities, and BWSR, will verify applicants' eligibility for the credit. BWSR will distribute a \$30,000 payment from the general fund to MnGeo and \$2.015 million in payments from the general fund to SWCDs in FY 2020. MnGeo will determine which parcels are both subject to the buffer law and are classified as 2a agricultural land. BWSR will provide \$5,000 to \$40,000 each to 89 SWCDs. The size of the payments will depend on the number of parcels BWSR anticipates the SWCD will review for compliance.

The Department of Natural Resources estimates approximately 317,000 acres will be eligible for this credit. Counties will administer the credit, and the Department of Revenue will reimburse the counties. The state estimates the total value of the credit for landowners will be \$15.8 million annually. In addition, the buffer credit reduces property taxes on farm land. Because property taxes can be claimed as income tax deductions for businesses, the buffer credit will reduce income tax deductions and increase revenue to the state by \$550,000 annually.

Equity and Inclusion:

This proposal will not increase inequities.

Results:

The credit will provide property tax relief for landowners complying with the riparian buffer requirement.

Statutory Change(s):

New section – Minnesota Statutes, Section 273.1388

Minnesota Statutes, Section 273.1393

Tax Aids, Credits and Refunds

FY 20-21 Biennial Budget Change Item

Change Item Title: Increase Local Government Aid and County Program Aid

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	59,479	59,479	59,479
Revenues	0	1,150	1,150	1,150
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	58,329	58,329	58,329
FTEs	0	0	0	0

Recommendation:

The Governor recommends increasing the appropriations for the County Program Aid (CPA) and Local Government Aid (LGA) by approximately \$30 million per year for each program.

Rationale/Background:

Local Government Aid and County Program Aid are important tools in the state-local partnership and supporting economic prosperity in our communities. They help local governments pay for vital needs such as local roads and public safety. They also help relieve the burden of local property taxes. Increased CPA and LGA assists local governments and reduces property tax levies for Minnesota property owners.

Proposal:

The CPA appropriation would increase from \$234 million to \$264.3 million starting in fiscal year 2021 through fiscal year 2025. For fiscal year 2026 and thereafter, the appropriation would be \$261.3 million.

The LGA appropriation would increase from \$534.4 million to \$565 million starting in fiscal year 2021 and thereafter.

It is assumed that the increased CPA and LGA would reduce property tax levies by a portion of the increase. Lower levies will decrease property taxes on all properties. Lower levies will result in lower homeowner property tax refunds, reducing costs to the state general fund. Lower levies will also lower income tax deductions, increasing revenues to the state general fund.

Equity and Inclusion:

This proposal would help cities and counties provide for important services across the state that benefit all Minnesotans such as investments in local roads and public safety, which can be vital for lower-income taxpayers. This proposal will reduce the pressure on local property taxes, a regressive tax that can be burdensome for low-income taxpayers because it is not based on the ability to pay, unlike income tax, for example.

Results:

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	CPA appropriation	\$234 million	\$264.3 million	FY 2020 – FY 2021
Quantity	LGA appropriation	\$534.4 million	\$565 million	FY 2020 – FY 2021
Results	Competitiveness for Businesses – businesses could see a decrease in local property taxes as a result of an LGA increase.		Increase

Loan Issuances		170	260	260
Revenues	0	(5)	(5)	(10)
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	1,275	1,365	1,370
FTEs	0	0	0	0

Recommendation:

Senior Citizen Property Tax Deferral Program

The Governor recommends amending the Senior Citizen Property Tax Deferral Program to lower the owner/occupancy requirements from 15 years to 5 years and to move the application date deadline from July 1 to November 1. These changes would allow more Minnesotans participate in the Senior Citizen Property Tax Deferral Program and make it more affordable for them to stay in their homes.

ITIN Usage for Homestead

The Governor recommends allowing property owners to qualify for homestead classification by providing an Individual Taxpayer Identification Number (ITIN) to an assessor. The Internal Revenue Service issues ITINs in lieu of Social Security numbers to some immigrants who are required to file a federal tax return. This property tax change is effective for applications for homestead filed in 2019 and thereafter.

Agricultural Homestead Market Value Credit

The Governor recommends clarification for changes made during the 2017 special session to the agricultural homestead market value credit. This change would clarify the maximum credit amount.

Deed Tax

The Governor recommends increasing the threshold of the amount of net consideration associated with a transfer that qualifies for the minimum deed tax from \$500 to \$3,000.

Rationale/Background:

Senior Citizen Property Tax Deferral Program

This proposal would help seniors to pay their property taxes. The changes would expand eligibility so more seniors can qualify for property tax deferrals, and extend the filing due date to make it easier to pay. There are two parts to this proposal. They are:

- **Owner/Occupancy Requirement:** The Senior Citizen Property Tax Deferral Program currently requires participants to own and occupy their homestead property for 15 years or longer. Reducing this requirement to 5 years will allow more seniors to enroll in this program. Living patterns are changing as fewer seniors occupy the same home for over 15 years. It is difficult to estimate how many would take advantage of this change because applicants typically learn of the current 15-year requirement when they apply for the program. As a result, many of them withdraw their application because they do not meet this requirement.

- **Filing Requirement:** The current July 1 filing requirement presents a challenge for seniors. Taxpayers often learn of this program when they are struggling to pay their second-half property taxes, due October 15. As a result, the July 1 application deadline has passed by the time they contact the department to get into the program for the next year. Minnesotans who apply for this program are often on a fixed income and trying to maintain a lifestyle that lets them remain in their homes. When their application is denied, they may face penalties and interest if they are delinquent on their property taxes.

ITIN Usage for Homestead

Under current law, only property owners with a valid Social Security number are allowed the homestead classification. This prevents many property tax payers who own a home from receiving homestead status, even if they meet every other qualification. Residents without homestead status are taxed at a higher class rate and do not qualify for the homestead property tax refund. The intent of homestead classification is to have homeowners share a smaller amount of the overall tax burden, since they bring value and stability to the city, school district, and county. Immigrants with an ITIN that own homes provide that value and stability as well, and should qualify for homestead status.

Agricultural Homestead Market Value Credit

During the 2017 special session, changes were made to the agricultural homestead market value credit to clarify the credit calculation for properties that are fractional agricultural homesteads. The two changes for these properties were: 1) the credit is calculated on a fractional market value based on the percentage homestead and 2) the amount of homestead is prorated equally between property owners. Due to these law changes, each fractional agricultural homestead and each owner of an agricultural homestead is eligible for the maximum credit amount beginning with taxes payable in 2019.

Deed Tax

Except for the exemptions listed in Minnesota Statutes, Section 287.22, a deed tax is imposed when real property is transferred or conveyed from one party to another. In some cases, a minimum deed tax of \$1.65 is imposed. For those situations where the minimum tax does not apply, the tax rate is 0.0033 of the net consideration. The minimum tax applies in the following situations:

1. The transfer is made as a result of a consolidation or merger.
2. The transfer is a designated transfer.
3. There is no consideration associated with the transfer.
4. The net consideration associated with the transfer is less than or equal to \$500. (Note that $\$1.65 = 0.0033 \times \500 .)

Proposal:

Senior Citizen Property Tax Deferral Program

This proposal would amend the Senior Citizen Property Tax Deferral Program to:

- Lower the owner/occupancy requirement from 15 years to 5 years.
- Move the application deadline from July 1 to November 1.

The department will continue to notify homeowners and counties whether they are accepted into the program by December 1.

ITIN Usage for Homestead

Under the proposal, property owners with a valid ITIN issued by the Internal Revenue Service could apply for (and receive) homestead classification. As a result, more taxpayers could qualify for homestead status and the Homestead Property Tax Refund. This would provide greater parity between taxpayers with an ITIN and those with a Social Security number.

Agricultural Homestead Market Value Credit

The proposal clarifies that a single agricultural homestead is eligible to receive a maximum credit of \$490. A fractional homestead would also receive a fractional maximum credit amount. For example, under the proposal a 50% homestead could receive a maximum credit of \$245, or half of the \$490 maximum for a full homestead. The proposal also clarifies that a single homestead owned by multiple owners is also subject to the maximum credit of \$490 per homestead.

The proposal also amends the homestead market value exclusion to be prorated based on the percentage of homestead for fractional homesteads. This change cleans up statutory language to be consistent with department guidance on the homestead market value exclusion.

The proposed clarification changes are effective beginning with taxes payable in 2020 to provide county administrators adequate time to implement the changes.

Deed Tax

Under the proposal, the net consideration for the transfer would be changed and the minimum tax of \$1.65 would apply when the net consideration associated with the transfer is less than or equal to \$3,000. Information provided to the Department of Revenue for 2015, 2016, and 2017 indicated that the following transfers occurred where the purchase amount was between \$500 and \$3,000:

- 2015 – 899 sales for a total of \$1,780,000,
- 2016 – 655 sales for a total of \$1,287,000,
- 2017 – 847 sales for a total of \$1,656,000.
- 3-yr average – 800 sales for an average of \$1,574,333.

Average actual deed tax collections for FY 2015, FY 2016, and FY 2017 were \$109,663,333.

Equity and Inclusion:

Senior Citizen Property Tax Deferral Program

This proposal would expand the deferral program so that more seniors having trouble paying their property taxes will qualify. Seniors on a fixed income are most likely to utilize this program and would see the most benefit from these changes.

ITIN Usage for Homestead

Taxpayers who have an ITIN, but not a Social Security number, are often resident or non-resident immigrants. This proposal would increase equity and inclusion by providing the same tax treatment for these taxpayers as for those with a Social Security number.

Results:

<i>Type of Measure</i>	<i>Impact</i>
Senior Property Tax Deferral – Efficiency and Compliance	Increase
ITIN Usage for Homestead – Transparency, Understandability, Simplicity, and Accountability	Increase
ITIN Usage for Homestead – Tax Progressivity	Increase

Recommendation:

General Levy Inflator

The Governor recommends reinstating the state general levy inflator. This state property tax provision is effective beginning with taxes payable in 2020.

Restore Tobacco Tax Inflator and Restore Premium Cigar Tax

The Governor recommends restoring the cigarette and moist snuff tax indexing to ensure that the tax keeps up with the pace of inflation. This proposal also restores the maximum tax on premium cigars to its previous level of \$3.50 per cigar. These tobacco tax provisions are effective July 1, 2019.

Estate Tax Freeze

The Governor recommends freezing the estate tax exclusion amount at \$2.7 million, the amount the exclusion is set at in 2019. The small business and farm property estate tax subtractions would remain at \$2.3 million to ensure that the \$5 million exclusion under current law would remain in place.

Rationale/Background:

General Levy Inflator

In 2017 the legislature repealed the inflator on the state general levy. This proposal would reinstate the levy beginning with taxes payable in 2020.

Over the next ten years, the freeze to the state general levy will cost Minnesota over \$1 billion in lost revenue. Similar to how local governments change their total levy amount, the inflator allows the state general levy to keep pace with the increased cost of public services. Local property taxes have increased at a much higher rate over time than the state general levy.

This provision, passed in 2017, shortchanges the long-term prosperity of Minnesota by hurting our ability to fund schools, health care programs, infrastructure, and other important priorities.

Restore Tobacco Tax Inflator and Restore Premium Cigar Tax

In 2017 the legislature repealed the inflator on the moist snuff and cigarette taxes and reduced the maximum tax on premium cigars from \$3.50 per cigar to \$0.50 per cigar. The purpose of the 2013 enactment of the cigarette tax increase and inflator was to make strategic investments in health care, education and jobs, and to reduce smoking in Minnesota, in particular among its youth. Each year, more than 6,300 Minnesotans die from smoking-

related illnesses, and smoking costs Minnesotans more than \$3 billion in excess health care cost. Since the increase took effect, smoking has declined, most notably among high school students.

Elimination of the inflator on these taxes made cigarettes and moist snuff more affordable for our youth, who are more price sensitive. Removal of the inflator lowers the cost of cigarettes and snuff over time in real dollars.

Estate Tax Freeze

In 2017 the legislature increased the estate tax exclusion amount. The exclusion amount increased from \$2 million to \$3 million over a period of four years. This proposal would freeze the exclusion amount at \$2.7 million.

The estate tax change passed by the legislature resulted in over 700 of the wealthiest 1,000 estates in Minnesota no longer having a potential liability for the Minnesota estate tax. Family farms and businesses are already exempt from the estate tax up to \$5 million when they pass on their farms or businesses to their heirs. Freezing the estate tax exemption at its current level Minnesota will reduce the regressivity of Minnesota's tax code.

Proposal:

General Levy Inflator

This proposal would reinstate the state general levy inflator, which impacts commercial and industrial property as well as seasonal residential recreational property. Of the total amount, 95% is levied on commercial-industrial property and 5% on seasonal residential recreational property. This state property tax provision is effective beginning with taxes payable in 2020.

Reinstating the inflator will improve our state's long-term economic well-being by putting the state general property tax in line with local property taxes and will reduce the likelihood of projected deficits in the future by allowing the state general levy to keep pace with the increased cost of public services.

Restore Tobacco Tax Inflator and Restore Premium Cigar Tax

This proposal would reactivate the inflator effective July 1, 2019. In 2017 the legislature also reduced the maximum tax on premium cigars from \$3.50 per cigar to \$0.50 per cigar. This proposal would restore the maximum tax to its previous level of \$3.50.

Estate Tax Freeze

The proposal would change the estate tax exclusion for estates of decedents dying after December 31, 2018, freezing the exclusion amount at \$2.7 million.

In addition, the 2017 law changed the maximum small business and farm subtraction. The maximum small business and farm subtraction plus the amount of the exclusion is equal to \$5 million under both the law prior to the 2017 changes and afterward. So as the exclusion increases, the maximum small business and farm subtraction decreases, with the sum of the two remaining at a constant \$5 million. This proposal would maintain that \$5 million exclusion.

Equity and Inclusion:

General Levy Inflator

This proposal will help Minnesota continue to fund important services that all Minnesotans depend on and treat the state general property tax similarly to local property taxes.

Restore Tobacco Tax Inflator and Restore Premium Cigar Tax

The lower price on tobacco products as a result of the law change in 2017 leads to increased youth access and worse public health.

Estate Tax Freeze

This proposal would eliminate a preferential tax treatment for a select few taxpayers that can afford and take advantage of it. It would help level the playing field for all taxpayers.

FY 2020-21 Biennial Budget Change Item

Change Item Title: Corporate Tax Changes

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	6,430	9,400	14,100	15,100
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	(6,430)	(9,400)	(14,100)	(15,100)
FTEs	0	0	0	0

Recommendation:

The Governor recommends reforming corporate taxes to level the playing field for certain business transactions and simplify corporate taxes by clarifying current laws. This package includes four proposals, effective for tax year 2019 and thereafter.

Rationale/Background:

Some corporations take advantage of special loopholes in our tax code to avoid paying their fair share. The Governor's proposal would eliminate unfair business tax avoidance and evasion strategies to level the playing field for working Minnesotans and small businesses.

As the economy and business practices change, it can be difficult for taxes to keep pace with how corporations structure their businesses. This proposal reforms part of the tax code to ensure it keeps pace with economic and business changes.

Proposal:

1. *Preventing Tax Evasion*

Restrict transactions or organizational structures that are structured to avoid tax and do not serve a business purpose. This proposal includes a penalty for using transactions or organizational structures that do not serve a business purpose.

2. *Eliminating the Dividend Received Deduction on Debt Financed Stock*

Exclude dividends received from debt-financed stock when calculating the Dividend Received Deduction. This proposal removes an unintended additional benefit to corporations that receive dividends from debt-financed stock. Including these dividends when calculating the dividends received deduction may allow taxpayers to report a net loss when they actually realized net income.

3. *Treating Mutual Fund Manager Income Consistently*

Require all entities that manage mutual funds to apportion their income consistently, based on where the mutual fund shareholders are located. Under current law, a corporation that manages a mutual fund apportions its income based on where the shareholders are located. If another type of entity, such as a partnership or limited liability company, manages a mutual fund then its income is apportioned based on where the mutual fund is located. Taxpayers have set up organizational structures to exploit this inconsistency.

4. *Apportionment Sales Factor-Exclude Derivatives*

This proposal would add a provision to specifically exclude derivative sales from the income apportionment computation. Currently Minnesota does not have any statutes or methods that specifically address how to apportion this type of income. The dealing of derivatives is usually high volume, which skews the apportionment percentage of total income to be attributed to the state.

Equity and Inclusion:

These proposals as a whole would simplify corporate taxes and make them fairer. It would also eliminate unintended preferential tax treatments for a select few taxpayers that are able to afford and take advantage of the unintentional tax benefits, and help level the playing field for all taxpayers.

Results:

<i>Type of Measure</i>	<i>Impact</i>
Transparency, Understandability, Simplicity and Accountability	Increase
Efficiency & Compliance	Increase
Competitiveness for Business	Increase

Statutory Change(s):

1. Preventing Tax Evasion: Minnesota Statutes, Sections 270C.03, subd. 1, 270C.331, 270C.33, subd. 6, 289A.60
2. Eliminate the Dividend Received Deduction on Debt Financed Stock: Minnesota Statutes, Section 290.21, subd. 4(c)
3. Treating Mutual Fund Manager Income Consistently: Minnesota Statutes, Section 290.191, subd. 5(k)
4. Apportionment Sales Factor-Exclude Derivatives: Minnesota Statutes, Section 290.191, subd. 5(a)

Tax Aids, Credits and Refunds

FY 2020-21 Biennial Budget Change Item

Change Item Title: Repeal Sunset of the Provider Tax

Transfers In			122,000	122,000
Net Fiscal Impact = (Expenditures – Revenues)	(225,213)	(705,878)	(724,811)	(770,028)
FTEs	0	0	0	0

Recommendation:

To support essential health care services and expand access to health insurance, the Governor recommends repealing the sunset on the two percent taxes on hospitals, surgical centers, health care providers, wholesale drug distributors, and those subject to the legend drug use tax contained in Minnesota Statutes, section 295.52. This proposal increases revenues to the Health Care Access Fund by \$970 million in the FY 2020-21 biennium.

The repeal of the tax sunset restores a provider rate increase that was established in 2003 to offset the cost of paying the provider tax on Medical Assistance and MinnesotaCare covered services.

The additional revenue creates a positive projected balance in the Health Care Access Fund. This balance triggers a statutory transfer to the General Fund of \$122 million per year.

Rationale/Background:

The Provider Tax is an essential source of funding for the Health Care Access Fund which provides health care coverage through the MinnesotaCare and Medical Assistance (MA) programs and supports public health activities through the Minnesota Department of Health. The reinstatement of the Provider Tax would also enable the Health Care Access Fund to support the Health Insurance Premium Subsidy and Health Insurance Tax Credit to stabilize and make the individual health insurance market more affordable.

Minnesota levies a two percent tax on revenue from patient services at hospitals, surgical centers and health care providers. This two percent tax also applies to the gross revenue of wholesale drug distributors as well as on amounts paid for prescription drugs by entities subject to the legend drug use tax.

Under current law, the provider taxes sunset on December 31, 2019. Repealing the sunset of the provider tax provides greater funding stability for the state's initiatives to promote access to health care, improve the quality of care, and contain health care costs. This proposal raises about \$237 million and \$733 million of revenue in fiscal years 2020 and 2021 respectively.

In 2003, the state legislature removed an exemption on taxing health care provider revenue for services provided to recipients of MA and MinnesotaCare and increased provider payment rates by two percent for these services subject to this tax. The November 2016 MA and MinnesotaCare forecast accounted for the provider tax sunset by removing the value of the two percent rate increase effective January 1, 2020. Repealing the provider tax sunset reinstates the two percent rate increase in MA and MinnesotaCare, resulting in a net cost to the state of just over \$39 million in FY 2020-21.

The current tax rate is 2%, although each year the rate must be reduced if the Commissioner of Management and Budget determines that projected revenue to the Health Care Access Fund is greater than 125% of expenditures and transfers, and the cash balance in the fund is adequate.

This proposal also amends existing nexus language and treats interest on overpayments for provider taxes consistent with other taxes. While current statutory language establishes nexus under the United States Constitution, this proposal addresses the impact of the United States Supreme Court decision in *Wayfair v. South Dakota* by providing for minimum economic nexus thresholds. Regarding interest, this proposal provides 90 days from the due date of the return or the date on which the original return is filed, whichever is later, before the amount refunded begins to bear interest.

Proposal:

This proposal repeals the sunset of the two percent provider taxes contained in Minnesota Statutes, section 295.52, to ensure funding for MinnesotaCare, Medical Assistance (MA), and public health activities through the Minnesota Department of Health. The repeal also supports proposals recommended in the Governor's budget to stabilize the individual health insurance market and make insurance more affordable. The individual market stabilization and affordability proposals include the Health Insurance Premium Subsidy and a Health Insurance Premium Tax Credit.

Equity and Inclusion:

Medical assistance is the largest expenditure from the Health Care Access Fund and currently provides health insurance coverage to over 1 million Minnesotans, who meet income limits. MinnesotaCare assists those most in need that are not already covered by existing programs. To be eligible for MinnesotaCare, individuals must meet income limits, not be eligible for Medical Assistance, and satisfy other requirements related to residency and lack of access to other health insurance. MinnesotaCare coverage is available to persons with incomes greater than 133 percent of federal poverty guidelines but not exceeding 200 percent, if other program eligibility requirements are met.

Results:

Recommendation:

The Governor recommends providing a state-based premium tax credit for Minnesotans who earn too much to qualify for federal assistance to increase affordability of individual market health coverage. The tax credit would be available to reduce the cost of qualified health plan (QHP) coverage starting in plan year 2021.

Rationale/Background:

The Affordable Care Act (ACA) established health insurance exchanges to assist people without health care insurance to find information about health insurance options and purchase health care insurance. Minnesota established a state-based exchange known as MNsure. Qualified Health Plans (QHP) purchased through MNsure may be eligible for a federal premium tax credit to either reduce the cost of the monthly premium or to be claimed after the end of the plan year on the tax return.

In Minnesota, the federal premium tax credit is available for individuals and households with an income above the threshold of public program health coverage, such as Medical Assistance or MinnesotaCare programs, and at or below 400% of the federal poverty level (FPL). Under the Federal Poverty Guidelines for 2019, 400% of FPL for an individual is \$49,960 and for a family of four is \$103,000.

Minnesotans who exceed the 400% FPL threshold do not qualify for federal premium tax credits. Even for many Minnesotans above 400% of FPL, premiums now exceed 10 percent of household budgets.

Proposal:

The proposal establishes a state-based tax credit (SBTC) for Minnesotans who purchase a QHP in the individual market through MNsure. SBTC will be available to any customer who applies for financial assistance through MNsure, projects their household's annual income to be above 400% FPL, meets other program eligibility requirements, and enrolls in QHP coverage.

The amount of the SBTC will be the dollar amount necessary to reduce the premium of the second lowest cost silver plan available to the household to the affordability threshold established under the ACA (9.86% of annual income in tax year 2019, but varying by federal formula each year) after application of the 20% premium subsidy, if any.

Minnesotans will be able to qualify for the credit during the enrollment period, which starts on November 1, 2020, for plan year 2021 coverage. Similar to the federal premium tax credit, the SBTC can be applied to their monthly bill from their insurance provider, during the tax year to which it relates. This allows customers to receive a monthly reduction in premiums with the SBTC amount being paid directly to the insurance company.

Customers will also have an option to decline to claim the SBTC in advance and instead claim the credit upon filing a state tax return for the applicable tax year, generally filed during the following year.

MNsure will:

- Collect pertinent information needed to determine eligibility and facilitate the application of the SBTC, when appropriate, toward the cost of QHPs offered on the exchange.
- Enable the MNsure shopping tool to calculate the proper SBTC amount so that at the point of purchase, customers will see the actual premium price they will pay.
- Provide notice to consumers confirming amount of SBTC applied toward their selected health plan, as well as other program requirements.
- Assist consumers with change to income or other eligibility criteria throughout the coverage year.
- Administer SBTC through payments to carriers reimbursing them for SBTC discounts applied to monthly premium bills sent to enrollees and conduct regular data reconciliation with health insurance carriers.
- Provide an end-of-year file to the Department of Revenue reporting SBTC payments made to customers.
- Provide an end-of-year statement to each taxpayer by January 31 reporting the amount of advance tax credit, beginning in January 2022 and each January thereafter. This statement will include the amount of SBTC received and the premium amount of the second lowest cost silver plan available to the individual or family, less any state premium subsidy received, for each coverage month.

NOTE: The administrative costs for MNsure in this proposal reflect shared investments made in the Governor's 20 percent premium subsidy proposal. The administrative impact and staffing requirements of this program are higher than reflected in this change page and premium withhold revenue is insufficient to cover expenses if considered apart from the premium subsidy proposal.

The Minnesota Department of Revenue will reconcile advanced credits paid and credits due as a part of the individual income tax filing process. The department will review income and SBTC information to determine the appropriate amount of credit. The department will issue refunds for unclaimed or underpaid credits and assess additional tax as necessary to reconcile the credit. The Minnesota Department of Revenue will provide information to MMB annually to reconcile the appropriation.

Equity and Inclusion:

MNsure's mission is to ensure all Minnesotans have the security of health insurance.

MNsure serves Minnesota individuals and families who are:

- Uninsured and underinsured
- Buying health coverage on their own
- Seeking a better option
- Qualifying for Medical Assistance (MA) or MinnesotaCare applicants and recipients

Since October 1, 2013, MNsure has processed over 2.8 million enrollments in health and dental insurance coverage. Over 75% of these enrollments resulted in a Minnesotan receiving subsidized insurance coverage, whether via a public program or federal tax credits and cost sharing reductions.

This proposal will enhance Minnesotans ability to purchase affordable health care coverage. The proposal provides relief for consumers who do not qualify for other state-based health coverage programs or do not receive employer-provided insurance, such as self-employed and small business owners.

Results:

Analysts at the Departments of Commerce and Health estimate providing this state based tax credit would mean approximately 34,880 Minnesotans currently in the individual market would receive this tax credit by 2023 and see a reduction in their health insurance premium costs. Additionally, 13,080 uninsured Minnesotans are expected to enroll in coverage and receive this insurance premium reduction.

Recommendation:

The Governor recommends the state commit to a major transportation investment plan to fund the estimated \$6 billion dollar gap that exists between funding needs and available revenues over the next 10 years. The Governor proposes filling the \$6 billion gap in road and bridge funding by:

- Initiating a 20 cent gas tax increase, including fuel in distributor storage at the start time of each increase (phased-in over two years in October and April in FY20 and FY21)
- Indexing the gas tax to inflation (beginning in FY23)
- Increasing the registration tax, effective January 1, 2020 (increase tax rate from 1.25 percent to 1.5 percent and base tax fee from \$10 to \$45; change the depreciation schedule; amend base value calculation by removing destination charge and hold harmless provision of statute)
- Increasing the motor vehicle sales tax from 6.5 percent to 6.875 percent, effective December 1, 2019
- Authorizing \$2 billion in trunk highway bonds over 8 years starting in 2022

The gas tax, registration tax, and motor vehicle sales tax increases will fund roads and bridges for the state trunk highways, county state aid highways, and municipal state aid streets. In the FY22-23 biennium, when revenue changes are completely phased in, the increased revenue from the gas tax, motor vehicle sales tax, and registration fees are forecast to increase available resources for each transportation fund by 30 percent.

To help lower- and middle-income Minnesotans pay for transportation investments, the governor proposes an increase to the Working Family Credit of \$100 for each single or head of household recipient and \$200 for each married filing jointly recipient. This proposal is described in the Tax Aids, Credits and Refunds section. In addition, while the gas tax increase would impact how our rate compares to neighboring states, the existing qualifying service station tax credit would ensure Minnesota service stations within 7.5 miles of the state border receive refunds that effectively reduce the rate to not more than three cents per gallon above the rate of the neighboring state.

Other Components:

In addition to the new funding above, the Governor recommends:

- Returning the auto parts sales tax, 9.2 percent motor vehicle rental tax, and 6.5 percent sales tax on motor vehicle rentals currently deposited into the Highway User Tax Distribution (HUTD) Fund as of FY2018 back to the General Fund beginning in FY2020. This results in an increase to the General Fund of \$395 million in FY20-21 and \$404 million in FY22-23.
- Restoring the motor vehicle lease sales tax to the pre-2018 distribution levels. This results in \$32 million returned to the General Fund, annually.
- In total, the General Fund would receive \$459 million in FY20-21 and \$468 million in FY22-23.

General fund revenues are reduced by \$8 million in the FY20-21 biennium due to increased petroleum refunds and income tax interactions with the registration tax. General fund expenditures decrease by \$170,000 for the biennium for increased aid to counties with casinos under [M.S. 270C.19](https://www.revisor.mn.gov/statutes/cite/270C.19) (<https://www.revisor.mn.gov/statutes/cite/270C.19>) due to the increase in gas tax.

Authorization for the sale of \$2 billion in trunk highway bonds over 8 years starting in 2022 (\$250 million per year). Debt service for these bonds is estimated to be \$22.2 million for the FY22-23 biennium.

Several components in this proposal require changes to the Minnesota Licensing and Registration System (MNLARS). Costs associated with changes to MNLARS will be funded through the Department of Public Safety's MNLARS budget recommendation.

Rationale/Background:

Minnesota cannot preserve and improve quality and performance of the state's transportation systems under the combined limitations of current investment levels and current lifecycle replacement practices. The consequences of underinvesting in the state's transportation system will include deterioration in service, increases in congestion, failing infrastructure and diminished ability to remain economically competitive. This is because transportation systems facilitate the efficient movement of people and goods and create the opportunity for economic development, enhanced productivity, job formation and sustainable growth. Without additional investment, the transportation system will not be able to expand to accommodate expected population and job growth. In addition, alternatives to driving alone must play a larger role in satisfying growing transportation demand - roads, transit and other transportation modes must work together as one system.

Road and Bridge Funding

The 2018 Minnesota Statewide Highway Investment Plan (MnSHIP) determined additional funding was needed for transportation, due largely to aging infrastructure and construction costs exceeding the growth of existing revenues. Overall, the department faces a \$6 billion gap in revenue over the next ten years above current fund

balance projections to fund needed investments in state road construction. Of this total gap, roughly \$4 billion is needed for preservation and modernization, and \$2 billion is needed for strategic expansion.

Without additional revenue, there will be:

- Increasing deterioration of pavement and bridges on state system. The percent of highway pavement considered in poor condition (rough driving surface) and the percent of bridge deck pavement considered in poor condition it is estimated to increase significantly in the next 20 years.
- Very little expansion to address population and economic growth
- Reductions in high priority products and service delivery

In addition, more operations and maintenance dollars are recommended, calculated at 5 percent of new Trunk Highway Fund revenues. This additional funding will be spent on snow plowing, fixing pot holes and guard rails, etc. Investing in operations and maintenance is needed due to declining asset conditions, increased snow and ice requirements, and the need for more timely maintenance.

Proposal:

Road and Bridge funding components

New revenues and bonding would be identified to help close the funding gap over the next ten years. The goal is an integrated transportation system that optimizes the movement of people and goods across the state. With new funding, we can:

- Improve asset management - preserve and modernize the existing system
- Invest in strategic mobility enhancements, including MnPASS and other intelligent transportation tools
- Complete strategic expansion on key corridors throughout the state
- Complete Main Street improvements

The benefits for Minnesotans will include:

- Reduced wear and tear on their cars
- Fewer stops at the fuel pump due to smoother roads and reduced congestion
- Fewer accidents
- More time doing what they need to do
- Reduced impacts on our environment

MnDOT has identified pavement and bridge needs as well as mobility projects that are not currently being addressed through its 10-year work plan. These unmet needs and projects will be given priority. These funds will provide for capital costs of construction as well as project development and engineering activities with contractor support, allowing the department to utilize this funding in the most efficient manner.

MnDOT proposes to utilize the increased operating appropriations for our highest-priority products and services. Some of these include:

- Snow and Ice - keeping the roads clear of snow and ice
- System Roadway Structures Maintenance – repair potholes (pavement repair)
- Bridges and Structures Inspection and Maintenance
- Intelligent transportation systems for improved safety and mobility

The Governor's proposal provides constitutionally dedicated funding increases that can be relied on over the long term and can only be used for transportation purposes. Returning auto parts and other taxes to the general fund results in the availability of funding for other state priorities.

Department of Natural Resources Funding Components

The Governor's proposal provides constitutionally dedicated funding increases that can be relied on over the long term and can only be used for transportation purposes. Returning auto parts and other taxes to the general fund results in the availability of funding for other state priorities.

The Department of Natural Resources (DNR) receives a portion of the unrefunded gasoline tax, which has supported the state's recreational motorized vehicle activities and forest roads since 1961. This funding is dedicated to the DNR with the broader goal that the unrefunded gasoline proceeds should support programs related to non-highway gasoline use.

This revenue enables additional investment in Minnesota's water recreation facilities and services. The proposal funds \$3.35 million annually for increased operations and maintenance of public water access sites and state trails (\$1.35 million) and increasing boating access site rehabilitation (\$2 million). Additionally, this proposal increases grants to local sheriff offices by \$300,000 annually to reimburse for search and rescue efforts.

This proposal also increases revenues to DNR's forest road account by \$170,000 in FY20, \$506,000 in FY21, \$670,000 in FY22, and \$705,000 in FY23. The state and counties (with a land commissioner) split this revenue 52% and 48% respectively. This increase funds additional graveling, grading, and drainage projects to maintain the state's 2,340-mile forest road network used by the forest industry, emergency responders and outdoor enthusiasts.

Transit Funding Components

Revenue from the motor vehicle sales tax is split between the HUTD (60 percent) and the Transit Assistance Fund (40 percent). The Metropolitan Council receives 90 percent of the motor vehicle sales tax revenue in the Transit Assistance Fund and MnDOT receives the remaining 10 percent for greater Minnesota transit.

Over the long-term, greater Minnesota transit revenues will increase from the proposed increased MVST rate. However, restoring the motor vehicle lease sales tax to the pre-2018 distribution levels results in a short-term reduction in revenue. To offset the decrease in revenue between FY20-23, MnDOT is amending internal accounting practices to allow additional spending of the motor vehicle lease tax revenue in the current year (current accounting practices involve carrying forward all of this revenue each year, and planning spending in the subsequent year).

Equity and Inclusion:

A safe, reliable and multimodal system of transportation is vital to ensuring equity and inclusion by connecting communities statewide. This needed funding will also provide additional contracting opportunities to certified small businesses and opportunities to work towards enterprise-wide goals of equity and inclusion.

IT Related Proposals:

N/A

Results:

Currently, Minnesota's total state gasoline taxes are 28th highest in the country, including District of Columbia. Since 2013, Minnesota has dropped from 19th highest state gasoline taxes, as a result of other states increasing their gasoline tax rate. Over a 10-year period, the inflation-adjusted tax on gasoline is projected to add an additional 28 cents to the price of a gallon of gasoline.

These investments would provide additional long-term sustainable and dedicated funding. MnDOT would plan to rehabilitate the system for the 21st century by:

- Improving an additional 1,800 miles of pavement and repair or replace an additional 300 bridges on state highways
- Accelerate progress toward the state goal of zero highway deaths with targeted installation of rumble strips, median barriers, lighting and other safety improvements. The Minnesota Toward Zero Death program has helped decrease injuries and deaths on the highway
- Keep roadside infrastructure in a state of good repair

In addition, MnDOT has operating performance measures that will be impacted by this proposal. All are anticipated to decline without additional funding; and this would reduce the decline. They include:

- Snow Plowing Performance – meet clearance targets
- Smooth Roads – percent of pavement patching addressed
- Percent of projects let in the year scheduled

Recommendation:

The Governor recommends enactment of a 1/8 cent sales tax in the seven-county metropolitan area to maintain and expand the regional bus and transitway system. Revenues from the sales tax, along with the Minnesota Department of Transportation proposal to increase the motor vehicle sales tax rate from 6.5 percent to 6.875 percent and state general obligation bonds would:

- Eliminate a structural deficit in the regional bus system
- Build out 10 Bus Rapid Transit (BRT) lines
- Increase service in the region's busiest transit corridors by 40 percent
- Increase regional transit ridership by 30-40 percent
- Begin the electrification of the regional fleet by adding at least 150 electric buses
- Improve the transit customer experience through investments in safety, shelters and technology

The Minnesota Department of Revenue will administer this tax for the Metropolitan Council, including working with retailers in the jurisdiction, updating tax collection systems, and compliance. The department will recover administrative costs from the revenue raised by the tax in its local sales tax administration account in the state special revenue fund.

Rationale/Background:

Today, more than three million people call the metropolitan region their home – 55 percent of the entire state. By 2040 the region is expected to add an additional 700,000 people and 500,000 jobs. As the region's population grows and changes, demand for reliable transit options will increase. That growing population will include more people of color, millennials, and seniors – all these cohorts use transit at higher rates than their peers.

Since 2011, the Metropolitan Council has provided 600 million transit rides, many of them connecting people to work or school. A reliable, safe and comprehensive transit system is a key part of our region's economic competitiveness, and our ability to attract and retain businesses, workers, and people. Ridership has steadily increased over the past decade; however, that trend has stagnated in the past several years. When looking more closely at ridership trends, while bus ridership is declining, ridership on rail and arterial BRT has been increasing. Put simply, when we invest in transit, ridership follows.

Over the past several years, investment in transit has failed to keep up with the growing demand for services. Further, existing revenues will not be sufficient to maintain existing service levels. In the next biennium alone, the regional bus system is facing a deficit over \$53 million and more than \$250 million over the next 10 years.

While the Council has managed some of the deficit with one-time savings, smart fiscal management, and \$70 million in onetime general funds, without new investment, our region will continue to fall behind peer regions.

Proposal:

The Metropolitan Council is proposing that the state enact an 1/8 cent sales tax in the seven-county metropolitan area and invest the revenues - \$770 Million over 10 years - to fund the structural deficit in the regional bus system, and build and operate an expanded, integrated regional transit system. An aggressive investment in BRT would mean nearly 40 percent more bus service in our region's busiest transit corridors. This would significantly increase transit access to nearly 500,000 jobs along 10 corridors.

This investment in BRT complements the expansion planned for the next 10 years in the long-term regional transportation plan including Green Line extension (SWLRT), Blue Line extension (Bottineau LRT), Orange Line BRT, Gold Line BRT, and Rush Line BRT. It would also support an additional 3-5 percent investment in regular route bus.

In total, these investments would lead to a 30-40 percent increase in regional transit ridership in the greater Minneapolis-Saint Paul region over the next 10 years.

Accomplishing this plan is dependent on:

- MnDOT's proposal to increase the motor vehicle sales tax from 6.5 percent to 6.875 percent;
- State GO Bonds;
- Continued financial support from the county transit sales tax collections in the region.

The Minnesota Department of Revenue will administer this tax for the Metropolitan Council. The administrative costs contained in this proposal are shown in the Expenditure Overview, Financing by Fund, and Change Summary fiscal reports contained in the Minnesota Department of Revenue's operating budget book.

Equity and Inclusion:

More than 30 percent of transit riders are transit dependent, meaning they can't afford a car. In addition to serving low-income populations, people of color also use transit at higher rates than white people. Investments in these transit corridors helps people who rely on public transit, giving them the ability to live and work throughout the region, and access opportunities. If everyone is going to have a seat at the table in One Minnesota, we need to properly fund transit, so everyone can get to the table.

Results:

- 10 new Bus Rapid Transit (BRT) lines
- 40 percent service increase in the region's busiest transit corridors
- 30-40 percent increase in regional transit ridership
- 150 electric buses
- Improved transit customer experience

Recommendation:

The Governor recommends the Metropolitan Council's authority to issue bonds under M.S. 473.39 be increased by \$92,300,000 to implement the Council's transit capital improvement program.

Rationale/Background:

The Metropolitan Council is given authority to issue general obligation bonds to implement the Council's transit capital improvement program in M.S. 473.39. Council bonding authority is used primarily for bus and paratransit vehicle replacement as a local match for Federal Appropriations. This one-time authority is subject to the volume limitations in this section and when exhausted, the Council requests additional authority. The Council is requesting \$92,300,000 in additional authority.

Proposal:

In addition to the authority previously granted in M.S. 473.446, the proposal allows the Council to issue certificates of indebtedness, bonds, or other obligations under this section in an amount not exceeding \$92,300,000 for capital expenditures as prescribed in the council's transit capital improvement program and for related costs, including the costs of issuance and sale of the obligations. Of this authorization, after July 1, 2019, the council may issue certificates of indebtedness, bonds, or other obligations in an amount not exceeding \$45,400,000 and after July 1, 2020, the council may issue certificates of indebtedness, bonds, or other obligations in an additional amount not exceeding \$46,900,000.

Council transit bonds are repaid through a property tax authorized in M.S. 473.446. Higher levies will increase property taxes on all property. They result in higher homeowner property tax refunds, increasing costs to the state general fund. Higher levies also increase income tax deductions, reducing revenues to the state general fund. The net impact on the general fund is \$90,000 in FY 2021, and \$2.38 million in FY 2022-23. The fiscal impact is represented in the Tax Aids, Credits and Refunds budget pages.

Results:

The Council will implement its transit capital improvement program.

Recommendation:

The Governor recommends providing Minnesota school districts and charter schools with additional revenue to improve student and school security. Funds may be used for building security improvements or to hire more school resource officers, counselors, or other student support staff. This recommendation provides one-time state aid to districts and charter schools equal to \$5 per pupil in fiscal year (FY) 2020. In FY 2021 and beyond this proposal will: 1) increase the Safe Schools Levy allowance from \$36 per pupil to \$50 per pupil and create a minimum revenue amount of \$20,834 per school district; 2) equalize the levy to allow districts with low property tax capacity access to this revenue; and 3) provide charter schools with \$14 per pupil in Safe Schools Aid. The Governor also recommends amending the allowable uses under the school levy to include professional development such as restorative practices, social-emotional learning, and other evidence-based practices.

This proposal seeks an allocation of \$17.8 million for the FY 2020-21 biennium and \$24.7 million for the FY 2022-23 biennium, including the cost of interactions with the property tax refund program, state individual and corporate income taxes, and the continuation of the 4,000 expiring seats for the voluntary pre-kindergarten/school readiness plus program. In addition, the safe schools levy would increase by \$5.4 million for taxes payable in 2020 and \$5.6 million for taxes payable in 2021 and later.

Rationale/Background:

Under current law a district may levy up to \$36 per adjusted pupil unit to directly fund the following purposes or reimburse cities and counties who contract with the district for these purposes:

1. to pay the costs incurred for the salaries, benefits and transportation costs of peace officers and sheriffs for liaison in services in the district's schools;
2. to pay the costs for a drug abuse prevention program as defined in section 609.101, subdivision 3, paragraph (e), in the elementary schools;
3. to pay the costs for a gang resistance education training curriculum in the district's schools;
4. to pay the costs for security in the district's schools and on school property;
5. to pay the costs for other crime prevention, drug abuse, student and staff safety, voluntary opt-in suicide prevention tools, and violence prevention measures taken by the school district;
6. to pay costs for licensed school counselors, licensed school nurses, licensed school social workers, licensed school psychologists, and licensed alcohol and chemical dependency counselors to help provide early responses to problems;
7. to pay for facility security enhancements including laminated glass, public announcement systems, emergency communications devices, and equipment and facility modifications related to violence prevention and facility security;

8. to pay for costs associated with improving the school climate; or
9. to pay costs for co-locating and collaborating with mental health professionals who are not district employees or contractors.

A school district that is a member of an intermediate school district may levy an additional amount up to \$15 per adjusted pupil unit for intermediate school district programs.

The levy is not equalized by the state. Most districts levy the maximum amount, but a few districts, including those with the lowest tax base per pupil, do not levy or levy less than the maximum due to low tax capacity.

The levy formula has been increased periodically and the uses of the revenue have been broadened over time. Prior to 2001, the levy was called the crime levy, and a per capita formula was used (\$1.50 per capita from taxes payable in 1998 – 2001 and \$1 per capita before that). For taxes payable in 2001 and 2002, the rate was \$11 per pupil unit. Beginning with taxes payable in 2003, the rate was increased to \$30 per pupil unit, and beginning with taxes payable in 2014, the rate was increased to \$36 per pupil unit (\$4 of this increase was new revenue, and \$2 was to adjust for a pupil unit weighting change).

With the increase in the number of school shootings and other violence in schools in recent years, there is growing recognition of the need to significantly increase funding for student and staff safety, both for building security improvements and for more school resource officers, counselors, or other student support staff, and to extend the funding to schools that are currently excluded. To ensure that districts with little or no tax base are able to access safe schools revenue, and to provide greater equity in the tax burdens between districts with low tax base per student and districts with higher tax base per student, state aid should be provided to equalize the levy. Finally, the authority for cooperative units to access safe schools revenue should be extended from intermediate districts only to all cooperative units enrolling students.

Proposal:

For FY 2020:

- Increase the safe schools revenue allowance for school districts from \$36 to \$41, a \$5 increase, with a minimum revenue of \$17,083 per district, and provide \$5 per student for charter schools. Since the levy for FY 2020 has already been made, provide the increase all from state aid; and
- Increase the safe schools revenue allowance for intermediate districts from \$15 to \$17.08 per member district pupil unit, a \$2.08 increase, and provide \$2.08 per student for other cooperative units enrolling students. Since the levy for FY 2020 has already been made, provide the \$2.08 increase all from state aid.
- Amend the allowable uses under item (8) school climate in the school safety levy to include professional development such as restorative practices, social-emotional learning, and other evidence-based practices.

For FY 2021 and later:

- Increase the current safe schools revenue allowance for school districts from \$36 to \$50, a \$14 increase, with a minimum revenue of \$20,834 per district, and provide \$14 per student for charter schools;
- Increase the current safe schools revenue allowance for intermediate districts from \$15 to \$20.83 per member district pupil unit, a \$5.83 increase, and provide \$5.83 per student for other cooperative units enrolling students;
- Equalize the levy for school districts and the levy made by member districts of cooperatives, including intermediate districts, using an equalizing factor equal to 110 percent of the state average Adjusted Net Tax Capacity (ANTC) per pupil unit excluding 50 percent of Class 2a agricultural property valuation. This is the same measure currently used for Long Term Facilities Maintenance Revenue (LTFM), except that the equalizing factor for LTFM is 123 percent of the state average ag-modified ANTC per pupil.

For FY 2020 and later:

- Clarify that the equipment bonding under Minnesota Statute, section 123B.61 may be used for the purchase of equipment related to violence prevention and facility security, and increase the maximum amount of the annual debt service levy for facilities and equipment bonds by the amount of a district's safe schools revenue.

Because this proposal raises levy allowances, property taxes on all property will increase. Increased property taxes will result in higher homeowner property tax refunds, which are additional costs to the state general fund. The growth in property taxes will also increase income tax deductions, which reduces revenues to the state general fund.

Equity and Inclusion:

This proposal will support all students in Minnesota public schools, particularly students in charter schools, cooperatives other than intermediates, and students in low tax base school districts. Charter schools and cooperatives other than intermediates are currently excluded from eligibility for safe schools revenue; in this proposal they would be included in the program and would receive the same increase as school districts and intermediate districts, respectively. Districts with little or no tax base (e.g., Red Lake, Nett Lake), which have been effectively excluded from the program due to inability to make a tax levy, will be able to raise the same revenue per student as other districts with most of the revenue funded by the state. Districts with relatively low tax base per student will receive equalization aid to reduce disparities in the tax rate needed to raise the same safe schools revenue per student as other districts.

Results:

School districts and cooperatives will receive a much-needed boost in safe schools revenue, which can be used for building security improvements or to hire more school resource officers, counselors, or other student support staff.

Statutory Change(s):

M.S. 126C.44

Tax Aids, Credits and Refunds

FY 2020-21 Biennial Budget Change Item

Change Item Title: Soil and Water Conservation District Levy Authority

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	940	940	1,150
Revenues	0	(740)	(740)	(900)
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	1,680	1,680	2,050
FTEs	0	0	0	0

Recommendation:

The Governor recommends providing Minnesota's soil and water conservation districts (SWCDs) property tax levy authority. Levy authority for each SWCD will be capped at 0.048 percent of the estimated market value of property or \$1 million, whichever is less. The state estimates SWCDs will levy about \$26.4 million in calendar year 2020, \$26.4 million in calendar year 2021, and \$34.1 million in calendar year 2022.

Rationale/Background:

SWCDs are the front lines of the state's conservation delivery system. They use their considerable knowledge, expertise and trust to help landowners target clean water and conservation practices where they can provide the greatest benefit. SWCDs are the only unit of government with the expressed statutory charge to work with private landowners to plan and implement soil and water conservation practices, yet they currently do not have the ability to independently raise revenue to support implementation of land and water treatment practices and programs to achieve the broad goals of clean water, clean air, and abundant fish and wildlife habitat.

Stable and predictable funding is necessary in light of many of the state's current goals for clean water, which are not presently being met. These goals are articulated in many places including the Federal Government Clean Water Act and Minnesota's Clean Water Legacy Act. The state has established goals such as reducing phosphorous and nitrogen levels by 45 percent in Mississippi River Basin (MN Nutrient Reduction Strategy) and reducing sediment loading by 90 percent in the Minnesota River Basin (MN Sediment Reduction Strategy). Protecting clean waters from becoming polluted is equally important.

Proposal:

This proposal will give each SWCD authority to independently levy property taxes on property owners. This authority will allow taxpayers to deduct more property taxes against their state income tax and receive larger property tax refunds. Because of this, the net cost to the general fund will be \$1.68 million in FY 2020-21 and \$3.73 million FY 2022-23.

This levy authority will increase SWCD capacity in:

- Funding technical capability.
- Funding the cost of implementing land and water treatment practices and programs.
- Organizing, planning, and implementing soil and water conservation practices with landowners on a watershed scale.
- Leveraging federal conservation programs, such as the Environmental Quality Incentives Program and the Conservation Reserve Program.

- Prioritizing and targeting clean water fund dollars to leverage landowner and SWCD investments.
- Delivering land and water treatment projects and programs that are prioritized, targeted, and measurable.
- Measuring and reporting progress and outcomes.

Statutory Change:

Minnesota Statutes, Section 103C

Program: Refunds

Activity: Homestead Credit Refund

revenue.state.mn.us/

AT A GLANCE

For refunds based on taxes paid in 2016:

- Approximately 506,000 homeowners received refunds
- The average refund was \$853

PURPOSE & CONTEXT

Property taxes account for a high share of household income for some taxpayers. The homestead credit refund for homeowners program is designed to provide relief to households that pay high property taxes relative to their household income.

The Homestead Credit Refund is paid from the General Fund.

SERVICES PROVIDED

The program provides property tax relief to homeowners based on an income definition of ability to pay. If property tax exceeds a threshold percentage of income, the refund equals a percentage of the tax over the threshold, up to a maximum amount.

RESULTS

The year is the taxes payable year in which refunds are based.

Property taxes are less regressive for households with lower incomes because of the property tax refunds (PTR).

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Results	Suits index - homeowner property taxes before PTR	-0.202	-0.175	2012 – 2014
Results	Suits index - homeowner property taxes after PTR	-0.161	-0.120	2012 – 2014
Results	Reduction in regressivity due to PTR	20%	31%	2012 – 2014

Performance Measure Notes:

The Suits index is a summary measure of tax progressivity or regressivity. A progressive tax is one in which the effective tax rate rises as income rises. A regressive tax is one in which the effective tax rate falls as income rises. A proportional tax has a Suits index equal to zero; a progressive tax has a positive index number in the range between 0 and +1; a regressive tax has a negative value between 0 and -1.

The Suits index compares the 2015 Tax Incidence Study based on calendar year 2012 property taxes and refunds (previous) with the most recently available 2017 Tax Incidence Study based on calendar year 2014 property taxes and refunds (current).

Homeowner property taxes become less regressive after the property tax refund.

Law changes in 2013 and 2014 increased the amount of refunds paid to homeowners by increasing the number of homeowners eligible and the average refund paid.

For additional information, visit the Revenue Department website (www.revenue.state.mn.us) and search 'property tax refund'.

Program: Refunds

Activity: Renter Property Tax Refund

revenue.state.mn.us/

AT A GLANCE

For refunds based on taxes paid in 2016:

- Approximately 347,000 renters received refunds
- The average refund was \$637

PURPOSE & CONTEXT

Property taxes account for a high share of income for some taxpayers. The renter property tax refund program is designed to provide relief to renters that pay high property taxes relative to their income.

The Renter Property Tax Refund is paid from the General Fund.

SERVICES PROVIDED

The program provides property tax relief to renters based on an income definition of ability to pay. If property tax exceeds a threshold percentage of income, the refund equals a percentage of the tax over the threshold, up to a maximum amount. Property tax for renters is defined as 17% of rent paid.

RESULTS

The year is the taxes payable year in which refunds are based.

Property taxes are less regressive for renters with lower incomes due to property tax refunds (PTR).

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Results	Suits index – renter property taxes before PTR	-0.282	-0.310	2012 –2014
Results	Suits index – renter property taxes after PTR	-0.118	-0.146	2012 – 2014
Results	Reduction in regressivity due to PTR	58%	53%	2012 – 2014

Performance Measure Notes:

The Suits index is a summary measure of tax progressivity or regressivity. A progressive tax is one in which the effective tax rate rises as income rises. A regressive tax is one in which the effective tax rate falls as income rises. A proportional tax has a Suits index equal to zero; a progressive tax has a positive index number in the range between 0 and +1; a regressive tax has a negative value between 0 and -1.

The Suits index compares the 2015 Tax Incidence Study based on calendar year 2012 property taxes and refunds (previous) with the most recently available 2017 Tax Incidence Study based on calendar year 2014 property taxes and refunds (current).

Rental housing property taxes become less regressive after the property tax refund.

Law changes in 2013 and 2014 increased the amount of refunds paid to homeowners by increasing the number of renters eligible and the average refund paid.

Program: Refunds

Activity: Special Property Tax Refund

revenue.state.mn.us/

AT A GLANCE

In 2017:

- Approximately 36,000 homeowners received a special refund
- The average refund was \$85

PURPOSE & CONTEXT

Large increases in property taxes can lead to financial strain for households. The special property tax refund program provides relief to property owners who have a large increase in property taxes due to economic conditions, property tax policy changes, or other factors.

The Special Property Tax Refund is paid from the General Fund.

SERVICES PROVIDED

Homesteads experiencing an increase in property tax of at least 12% and \$100 are eligible for a refund of 60% of the increase above 12%. The maximum refund is \$1,000.

RESULTS

The chart shows that the number of special property tax refunds increases when average residential homestead property tax growth is higher.

Property taxes are more predictable and affordable for households by reducing significant annual increases.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Annual special refunds processed	67,000	36,000	2015 - 2017

Performance Measure Notes:

Results from year to year can be highly variable. Since 2008, the average annual number of special refunds processed is 45,000. The average refund has ranged from \$83 to \$152.

Annual refunds processed compares taxes payable year 2015 (previous) to 2017 (current).

For additional information, visit the Revenue Department website (www.revenue.state.mn.us) and search 'property tax refund'.

Program: Refunds**Activity: Sustainable Forest Incentive Payment**revenue.state.mn.us/**AT A GLANCE**

In 2017:

- 2,560 forest land owners received an incentive payment
- The average incentive payment was \$4,222

PURPOSE & CONTEXT

Property taxes can represent a significant cost for forested property that can discourage long-term forest management investments. The Sustainable Forest Incentive Act provides payments to owners of forest land to encourage sustainable forest management.

Sustainable Forest Incentive Payments are paid from the General Fund.

SERVICES PROVIDED

An owner of forest land who meets all qualifications of the Sustainable Forest Incentive Act is eligible for a payment for the enrolled acres. The annual payments are adjusted each year based on statewide average market values and tax rates.

RESULTS

The payments encourage forest land owners to make long-term commitments to sustainable forest management by reducing the costs of holding land in an undeveloped state.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Acres of forest land enrolled	756,000	989,000	2015 – 2017

Performance Measure Notes:

Acres of forest land enrolled compares calendar year 2015 (previous) to 2017 (current).

The average incentive payment increased from \$2,205 in 2015 to \$4,222 in 2017.

Law changes in 2017 modified the annual payments to forest land enrolled in the program. The annual payments are adjusted each year based on statewide average market values and tax rates, and vary based on the covenant length and total number of acres enrolled in the program. Previously, the annual payment was set by statute as \$7 per acre.

For additional information, visit the Revenue Department website (www.revenue.state.mn.us) and search 'sustainable forest'.

Legal Citation: M.S. Chapter 290C establishes the Sustainable Forest Incentive Payment. It was amended by Laws 2013, Chapter 143, Article 2, Sections 2-5; and Laws 2017 First Special Session, Chapter 1, Article 10, Sections 1-17. <https://www.revisor.mn.gov/statutes/cite/290C>.

Program: Local Aids

Activity: Local Government Aid to Cities

revenue.state.mn.us/

AT A GLANCE

In 2018:

- 760 cities out of 853 receive Local Government Aid
- Payments were increased \$15 million from the previous year

PURPOSE & CONTEXT

Cities across the state have varying service needs and revenue sources. Local Government Aid payments to cities provide general support for services and reduce property tax burdens on homeowners and businesses.

Local Government Aid is paid from the General Fund.

SERVICES PROVIDED

Local Government Aid (LGA) is a general purpose aid to cities that can be used for any lawful purpose. It is also used for property tax relief by reducing the amount of revenue that is collected locally.

The LGA formula has changed many times since enacted in 1971. The current formula measures city need with factors including population and age of housing and compares this to a city's ability to pay measured by local property values. The formula attempts to target aid to those cities with the lowest property values and highest need.

RESULTS

Cities across the state are more able to offer their residents comparable services at a similar tax cost.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Percentage of cities receiving LGA	90%	90%	2014 – 2016
Quantity	LGA percentage of city spending	14.1%	13.6%	2014 – 2016

Performance Measure Notes:

Percentage of cities receiving LGA compares payable year 2014 (previous) to 2016 (current).

LGA percentage of city spending is based on State Auditor city finance reports for 2014 and 2016 and computes LGA as a percentage of total current expenditures. 2016 is the most recent auditor data available.

A 2017 law change increased the city LGA appropriation by \$15 million for aids payable 2018 and thereafter.

For additional information, visit the Revenue Department website (www.revenue.state.mn.us) and search 'LGA'.

Legal Citation: M.S. Chapter 477A establishes the Local Government Aid program. It was amended by: Laws 2013, Chapter 143, Article 2, Sections 7-12 and 14-18; Laws 2014, Chapter 308, Article 1, Sections 5-6; and Laws 2017 First Special Session, Chapter 1, Article 4, Sections 10-11, 15-17, 19, and 26.

Program: Local Aids
Activity: County Program Aid

revenue.state.mn.us/

AT A GLANCE

In 2018:

- All 87 counties received County Program Aid
- Payments were increased \$25 million from the previous year

PURPOSE & CONTEXT

Counties across the state have varying services needs and revenue sources. County Program Aid payments provide general support for services and reduce property tax burdens for homeowners and businesses.

County Program Aid is paid from the General Fund.

SERVICES PROVIDED

County Program Aid (CPA) is a general purpose aid to counties that can be used for any lawful purpose. It is also used for property tax relief by reducing the amount of revenue collected locally.

The CPA appropriation is divided into two main pots: (1) need aid and (2) tax base equalization aid. The need aid is distributed based on a county's measure of crime rate, poverty, and population. The tax base equalization aid is distributed based on a county's population and property values. The formula provides aid to those counties with the highest need and lowest property values.

RESULTS

Counties across the state are more able to offer their residents comparable services at a similar tax cost.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Percentage of counties receiving CPA - Need Aid	100%	100%	2014 – 2016
Quantity	Percentage of counties receiving CPA - Tax Base Equalization Aid	82%	69%	2014 – 2016
Quantity	CPA percentage of county spending	4.1%	3.9%	2014 – 2016

CPA Percentage of County General Spending

Performance Measure Notes:

Percentage of counties receiving CPA compares payable year 2014 (previous) to 2016 (current).

CPA percentage of county spending is based on State Auditor county finance reports for 2014 and 2016 and computes CPA as a percentage of total current expenditures. 2016 is the most recent auditor data available.

A 2017 law change increased the CPA appropriation by \$25 million for aids payable 2018 and thereafter. The law change also modified the CPA formula to increase the number of counties receiving Tax Base Equalization Aid. Beginning in 2018, all 87 counties now receive Tax Base Equalization Aid.

Prior to 2004, the previous county aid programs were Family Preservation Aid, County Criminal Justice Aid, Homestead and Agricultural Credit Aid (HACA), and Attached Machinery Aid.

For additional information, visit the Revenue Department website (www.revenue.state.mn.us) and search 'CPA'.

Legal Citation: M.S. Chapter 477A establishes the County Program Aid program. It was amended by: Laws 2013, Chapter 143, Article 2, Section 19; Laws 2014, Chapter 150, Article 4, Section 6; Laws 2014, Chapter 308, Article 1, Section 13; and Laws 2017 First Special Session, Chapter 1, Article 4, Sections 12-13, 20, and 33.

Program: Local Aids

Activity: Disparity Reduction Aid

revenue.state.mn.us/

AT A GLANCE

In 2017:

- 15% of 6,197 taxing areas received Disparity Reduction Aid
- The average aid payment was \$19,345

PURPOSE & CONTEXT

Tax reform in 1988 caused higher tax rates in some areas. Disparity Reduction Aid (DRA) provides aid to areas that received this aid in 1989 and continue to have a local tax rate above 90% of their net tax capacity today.

Disparity Reduction Aid is paid from the General Fund.

SERVICES PROVIDED

Disparity Reduction Aid was first paid in 1989 and continues to provide aid to some counties, school districts, and townships. Taxing areas that had a combined local tax rate above 90% of their net tax capacity in 1989 received DRA.

Today, a taxing area can only receive DRA if it received DRA in 1989, and still has a tax rate above 90%.

RESULTS

Taxing areas that received this aid in 1989 and continue to have a tax rate above 90% receive state assistance to help reduce property tax rates.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of taxing areas receiving DRA	924	932	2015 – 2017
Quantity	Number of taxing areas with a tax rate above 90%	2,778	2,872	2015 – 2017
Quantity	Percentage of taxing areas with a tax rate above 90% that receive DRA	32%	32%	2015 – 2017

Performance Measures Notes:

The percentage of taxing areas receiving DRA compares payable year 2015 (previous) to 2017 (current).

A taxing area is a geographic area that has the same county, school district, municipality, and special taxing districts. There are over 6,000 taxing areas in Minnesota.

Currently, 32% of taxing areas with a tax rate above 90% receive DRA. Only a small share of areas with tax rates above 90% receive DRA because aid distributions are based on the original 1989 calculations. If an area did not have a tax rate above 90% in 1989, they cannot receive DRA.

Fifteen percent of all taxing areas received DRA in both 2015 and 2017. The average aid payment decreased from \$19,566 in 2015 to \$19,345 in 2017.

For additional information, visit the Revenue Department website (www.revenue.state.mn.us) and search 'DRA'.

Program: Local Aids

Activity: Casino Aid to Counties

revenue.state.mn.us/

AT A GLANCE

In 2018:

- 16 counties received Casino Aid
- The average aid payment was \$96,000

PURPOSE & CONTEXT

Increased service demands from tax-exempt property can lead to financial strain for local governments. Casino Aid provides a state payment to counties where an Indian reservation is located in the county, the tribes operate a casino, and state taxes are collected under a tax agreement with the tribe.

Casino Aid to Counties is paid from the General Fund.

SERVICES PROVIDED

County Casino Aid is equal to 5% of taxes collected from the Indian reservation under a tax agreement

RESULTS

The fiscal impacts of tax-exempt tribal-owned casinos are reduced for local governments.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of Counties Receiving Casino Aid	15	16	2016 – 2018

Performance Measures Notes:

Program: Local Aids
Activity: Utility Transition Aid

revenue.state.mn.us/

AT A GLANCE

In 2018:

- 3 towns receive Utility Valuation Transition Aid
- The average aid payment is \$1,696

PURPOSE & CONTEXT

Large reductions to tax base can lead to financial strain for local governments. Utility Valuation Transition Aid provides aid to cities and towns that lost tax base due to a change in the rule for valuing utility property.

Utility Transition Aid is paid from the General Fund.

SERVICES PROVIDED

Utility Valuation Transition Aid was first paid in calendar year 2009 to 43 cities and towns with tax base reductions greater than 4% due to a 2007 utility valuation rule change. The aid will continue for each qualifying municipality until the current value of utility property exceeds its 2007 value under the old rule.

RESULTS

Local tax rates in jurisdictions receiving aid are lower than they would be without the aid, and the aid phases out as tax base returns to previous assessment levels.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of eligible cities and towns where the current utility tax base remains lower than the 2007 amount.	4	3	2016 – 2018

Performance Measures Notes:

Number of eligible cities and towns compares aid payable year 2016 (previous) to 2018 (current).

Due to decreases in utility property values, some cities and towns that no longer received transition aid became eligible for aid again.

For additional information, visit the Revenue Department website (www.revenue.state.mn.us) and search 'UVTA'.

Legal Citation: M.S. 477A.16 establishes Utility Value Transition Aid.

Program: Local Aids
Activity: State Taconite Aid

revenue.state.mn.us/

AT A GLANCE

In 2017:

- The state general fund paid 22 cents per taxable ton of iron ore concentrates produced (\$7.4 million) to the taconite production distribution fund

PURPOSE & CONTEXT

Large decreases to tax base can lead to financial strain for local governments. State Taconite Aid provides revenue to compensate for reduced taconite production occurring in certain areas since 2001.

State Taconite Aid is paid from the General Fund.

SERVICES PROVIDED

Taconite production decreased 30% in 2001 primarily due to the closure of the LTV Steel Mining Company plant in Hoyt Lakes.

Beginning in 2001, state aid was provided to the production tax fund to be distributed like production tax revenues. Production tax revenues are distributed to various local governments, development agencies and for property tax relief to taxpayers within the taconite assistance area.

The state taconite aid contribution was equal to 33 cents per taxable ton of iron ore concentrates for production year 2001, and 22 cents per taxable ton of iron ore concentrates for production years 2002 and thereafter.

RESULTS

The potential fiscal impacts of the 2001 decrease in taconite production are reduced.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Taconite Production as a Percentage of Base Year 2000 Production	70%	75%	2000 – 2016

Performance Measures Notes:

Base year 2000 production is for the calendar year.

Taconite production percentage compares calendar year 2000 (previous) to calendar year 2016 (current).

The state taconite aid contribution accounted for 7.6% of total production tax distributions in 2017.

Program: Local Aids

Activity: Payment in Lieu of Taxes (PILT)

revenue.state.mn.us/

AT A GLANCE

In 2017:

- 8.5 million acres of natural resources land were enrolled in Payment in Lieu of Taxes (PILT) program
- All 87 counties received a PILT payment, with 18 counties receiving payments of at least \$500,000

PURPOSE & CONTEXT

Loss of tax base when land becomes exempt can lead to financial strain for local governments. PILT payments provide compensation to local governments for the property taxes lost when the Department of Natural Resources acquires land for the state.

The PILT program is paid from the General Fund.

SERVICES PROVIDED

The state makes payments in lieu of taxes primarily to counties for certain natural resource and wildlife management lands. Counties are responsible for distributing any PILT payments to townships, cities, and schools.

RESULTS

The potential fiscal impacts of tax-exempt state-owned land are reduced for local governments.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Acres of Natural Resources Land in PILT	8.52 million	8.51 million	2015 – 2017

Performance Measures Notes:

Acres of natural resources land compares calendar year 2015 (previous) to 2017 (current)

Law changes in 2017 increased the per acre payment rate from \$1.50 to \$2.00 for county-administered other natural resources land and Department of Natural Resources-administered other natural resources land, effective beginning for payments made in 2018.

For additional information, visit the Revenue Department website (www.revenue.state.mn.us/) and search 'PILT'.

Program: Local Aids
Activity: Township Aid

revenue.state.mn.us/

AT A GLANCE

In 2018:

- 1,781 townships received Township Aid
- The average aid amount was \$5,615

PURPOSE & CONTEXT

Township governments received Local Government Aid from the state until 2001. A 2013 law created a new aid program to help townships fund their services.

Township Aid is paid from the General Fund.

SERVICES PROVIDED

Township Aid is a general purpose aid to townships that can be used for any lawful purpose. It is also used for property tax relief by reducing the amount of revenue collected locally. Aid payments are determined through a formula that considers the size of the township, its population, and the share of its property value that is farms and cabins.

RESULTS

Townships across the state are more able to offer their residents comparable services at a similar tax cost.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Township Aid percentage of township spending	4.0%	3.8%	2014 – 2016

Performance Measures Notes:

Township Aid percentage of township spending is based on State Auditor township finance reports for 2014 and 2016 and computes Township Aid as a percentage of total current expenditures. The most recent auditor data available is from 2016 and the first year of Township Aid was 2014.

For additional information, visit the Revenue Department website (www.revenue.state.mn.us/) and search 'township aid'.

Program: Local Aids**Activity: Aquatic Invasive Species Aid**revenue.state.mn.us/**AT A GLANCE**

In 2018:

- There were 787 Minnesota waters infested with invasive species
- 83 Minnesota counties received this aid

PURPOSE & CONTEXT

Invasive species not native to Minnesota can cause harm to the environment, the economy, and human health. Aquatic Invasive Species Aid assists counties in preventing or limiting the spread of invasive species in Minnesota waters.

Aquatic Invasive Species Aid is paid from the General Fund.

SERVICES PROVIDED

Created in 2014, Aquatic Invasive Species Prevention Aid is distributed to counties based on their share of the statewide total for watercraft trailer launches and watercraft trailer parking spaces.

RESULTS

Aquatic Invasive Species Prevention Aid provides funds to limit the spread of invasive species.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>

Program: Local Aids
Activity: Production Property Transition Aid

revenue.state.mn.us/

AT A GLANCE

In 2018:

- 3 cities and towns received Production Property Transition Aid
- The average aid payment is \$28,000

PURPOSE & CONTEXT

Property tax law changes can sometimes reduce the amount of tax base available to local governments. Production Property Transition Aid provides temporary aid for cities and towns that lost tax base due to a change in the method to value certain production facilities.

Production Property Transition Aid is paid from the General Fund.

SERVICES PROVIDED

Production Property Transition Aid provides transitional aid for cities and towns with tax base reductions greater than 5% due to a change in the way ethanol, dairy, brewery, wine and distillery properties are valued for property tax purposes. The aid amount is the difference in net tax capacity due to the valuation change times the local tax rate. The aid was first paid in 2016 and phases out over five years.

RESULTS

Local tax rates in jurisdictions receiving aid are compensated for their loss of tax base.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of cities and towns receiving aid	3	3	2016 - 2018

Performance Measures Notes:

Number of eligible cities and towns compares aids payable year 2016 (previous) to 2018 (current).

The total amount of aid paid in 2018 was \$85,000. This amount will decrease each year until 2021, when the aid expires.

Program: Local Aids
Activity: Small Cities Assistance

revenue.state.mn.us/

AT A GLANCE

In 2018:

- The state paid \$8 million in small cities assistance

PURPOSE & CONTEXT

The Small Cities Assistance program was established in 2015 and provides formula-based transportation aid for 705 small cities in Minnesota that do not receive municipal state-aid street funding. Qualifying cities have a population under 5,000. Funds are for construction and maintenance of roads. This program is funded through fiscal year 2019.

SERVICES PROVIDED

The funding is for the construction and maintenance of roads located within the city and can include land acquisition, environmental analysis, design, engineering, construction, reconstruction and maintenance. The aid is formula based, so that cities do not apply or compete for funds. The Commissioner of Revenue distributes the funds to cities in the same manner as local government aid. Generally, cities will receive 50% of the payment in July and 50% of the payment in December.

RESULTS

The Small Cities Assistance program increases aid to small cities to assist in the construction and maintenance of roads.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of cities eligible for small cities assistance	704	705	2016 – 2018

Program: Local Aids

Activity: Riparian Protection Aid

revenue.state.mn.us

AT A GLANCE

In 2018, 14 watershed districts and 72 counties received Riparian Protection Aid

PURPOSE & CONTEXT

Riparian buffers – strips of vegetated land adjacent to streams, rivers, lakes, or wetlands – are used to protect and restore water quality and healthy aquatic life. State law requires riparian buffers along the shoreline of most lakes, rivers, and streams.

Created in 2017, Riparian Protection Aid provides funds to help watershed districts and counties oversee riparian protection and water quality practices.

Riparian Protection Aid is paid from the General Fund.

SERVICES PROVIDED

Riparian Protection Aid is distributed to watershed districts and counties based on their share of acres of agricultural land and miles of shoreline that require buffers.

If watershed districts and counties choose not to oversee the riparian protection and water quality practices required by law, their share of aid goes to the Board of Water and Soil Resources.

RESULTS

Riparian Protection Aid provides funds to oversee riparian protection and water quality practices.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>

Program: Local Aids**Activity:** Out of Home Placement Aidrevenue.state.mn.us/**AT A GLANCE**

In 2018:

- 2 tribes received Out of Home Placement Aid
- 65 counties received Out of Home Placement Aid

PURPOSE & CONTEXT

Payments made to provide foster care for children under the Indian Child Welfare Act can be a large expense for some tribes and local governments. Out of Home Placement Aid reduces the cost incurred by local social service agencies to provide foster care.

Out of Home Placement Aid is paid from the General Fund.

SERVICES PROVIDED

Out of Home Placement Aid is a specific-purpose aid that partially reimburses the costs incurred by counties and tribes to provide foster care for children under the Indian Child Welfare Act (ICWA).

Aid payments to counties are based on foster care payments made in the preceding calendar year. Aid payments to tribes are the greater of \$200,000 or 5 percent of the reimbursement amount received from the federal government for out-of-home placement costs for the previous calendar year.

RESULTS

Out of Home Placement Aid reduces the cost to tribes and local governments of providing ICWA foster care.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Out of Home Placement Aid percentage of county spending on ICWA foster care	0%	25.1%	2016 – 2018

Performance Measures Notes

Out of Home Placement Aid percentage of county spending on ICWA foster care is based on county expenditures on ICWA foster care as reported to the Department of Human Services. This aid was first available in 2018.

For more information, visit our website (www.revenue.state.mn.us) and type **out of home placement** into the Search box.

Program: Credits**Activity: Agricultural Homestead Market Value Credit**revenue.state.mn.us/**AT A GLANCE**

In 2017:

- 96,000 farm homesteads received the credit
- The average market value agricultural land credit amount was \$396

PURPOSE & CONTEXT

For some taxpayers, property taxes are a significant cost to owning agricultural land. Agricultural credits reduce the tax for owners of homesteaded farm property.

Agricultural Homestead Market Value Credits are paid from the General Fund.

SERVICES PROVIDED

The agricultural market value credit was designed to reduce the tax on agricultural homestead land beyond the house, garage, and immediately surrounding acre of land. The credit is based on a percentage of land market value, with a maximum credit of \$490 per homestead.

RESULTS

The credit makes homesteaded farm land more affordable.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Average market value agricultural land credit amount	\$433	\$396	2015 – 2017
Quantity	Effective tax rate without credit	0.40%	0.43%	2015 – 2017
Quantity	Effective tax rate with credit	0.36%	0.38%	2015 – 2017

Performance Measures Notes:

Approximately 90,000 homesteads received the credit in 2015. The number has increased slightly to 96,000 in 2017.

Average credit amount compares payable year 2015 (previous) to 2017 (current).

Effective tax rate compares property tax as a percent of market value on all agricultural homestead land before and after the credit. The average effective tax rate for all property statewide was 1.45% for taxes payable 2017.

For additional information, visit the Revenue Department website (www.revenue.state.mn.us) and search 'Agricultural Homestead Market Value Credit'.

Program: Credits**Activity: Prior Year Credit Adjustments**revenue.state.mn.us/**AT A GLANCE**

In 2017:

- Prior year credit adjustments were 0.11% of the total credits

PURPOSE & CONTEXT

Each year adjustments must be made for accounting corrections. Prior Year Credit Adjustments are paid to local governments to account for abatements, court orders, omissions, and other adjustments to credits.

Prior year credit adjustments are paid from the General Fund.

SERVICES PROVIDED

Prior Year Credit Adjustments are made for the Agricultural Preserve, Homestead Disaster, Agricultural Homestead Market Value, Local Option Disaster, and Disparity Reduction credits.

RESULTS

The potential impacts of tax-exempt state-owned land are reduced for local governments.

Program: Credits**Activity: Disparity Reduction Credit**revenue.state.mn.us/**AT A GLANCE**

In 2017:

- The average property tax decrease due to the Disparity Reduction Credit was \$5,789
- Approximately 2,000 parcels received the credit

PURPOSE & CONTEXT

Property taxes tend to be lower in North Dakota, putting some Minnesota businesses in bordering communities at a disadvantage. The Disparity Reduction Credit provides property tax relief for businesses in certain border cities.

Disparity Reduction Credits are paid from the General Fund.

SERVICES PROVIDED

The Disparity Reduction Credit reduces property taxes for:

- commercial/industrial property,
- public utility property, and
- apartment property.

The credit reduces property taxes to 1.6% of the property's market value. The Disparity Reduction Credit assists businesses in the border cities of Breckenridge, Dilworth, East Grand Forks, Ortonville, and Moorhead.

RESULTS

The Disparity Reduction Credit increases business competitiveness in border areas.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Average property tax reduction due to credit	\$6,998	\$5,789	2015 – 2017

Performance Measures Notes:

The average credit amount compares payable year 2015 (previous) to 2017 (current).

In 2015, the tax rate threshold decreased from 1.9% to 1.6% of market value. Businesses in the City of Ortonville also became eligible to receive the credit in 2015. These changes have increased the total credits.

Legal Citation: M.S. 273.1398 establishes the Disparity Reduction Credit.

Program: Credits**Activity: Supplemental Taconite Homestead Credit**revenue.state.mn.us/**AT A GLANCE**

In 2017:

- The average property tax decrease from the Supplemental Taconite Homestead Credit was \$260
- 20,000 homesteads received the credit

PURPOSE & CONTEXT

Property taxes increase the cost of owning a home. The Supplemental Taconite Homestead Credit reduces the property taxes for homesteads in the taconite relief area.

Supplemental Taconite Homestead Credits are paid from the General Fund.

SERVICES PROVIDED

The Supplemental Taconite Homestead Credit program was created in 1980. Homesteads receive a credit that is either 57% of the property tax up to \$289.80 or 66% of the property tax up to \$315.10, depending on the location of the homestead.

RESULTS

Property taxes are more affordable for residential homesteads in the taconite relief area.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Average property tax reduction due to credit	\$283	\$260	2015 – 2017

Performance Measures Notes:

Average property tax reduction compares payable year 2015 (previous) to 2017 (current).

79% of homesteads received maximum credit amount.

The effective tax rate (ETR) for a property equals the net property tax divided by its market value. The ETR can be viewed as a measure of how much property tax is paid per \$1,000 in market value.

The ETR for homesteads receiving the Supplemental Taconite Homestead Credit was 0.79% for taxes payable in 2017. Without the credit, the ETR for homesteads would have been 0.96%. The average ETR for homesteads statewide was 1.26% for taxes payable in 2017.

Legal Citation: M.S. 273.1391 establishes the Supplemental Taconite Homestead Credit.

Program: Credits

Activity: Agricultural Preservation Credit

revenue.state.mn.us/

AT A GLANCE

In 2017:

- 3,196 credits were paid to agricultural land owners in the Twin Cities metropolitan area

PURPOSE & CONTEXT

For some taxpayers, property taxes are a significant cost to owning agricultural land. Agricultural preservation credits reduce the tax on homesteaded farm property that is increasing in value due to development pressure.

Agricultural Preservation Credits are paid from County Agricultural Preserve Funds, State Conservation Fund, and State General Fund.

SERVICES PROVIDED

The Metropolitan Agricultural Preserves Act, established in 1980, encourages agricultural use on land within the seven-county Twin Cities metropolitan area. Valuation for taxation is based on the land's agricultural use, irrespective of other market pressures. Unlike valuation deferments under the Green Acres law, land enrolled in this program is not required to repay any taxes or special assessments when exiting the program.

Lands in the program also receive a credit based on the difference between the local tax rate and the statewide average local tax rate for townships, but no less than \$1.50 per acre.

A \$5 fee on all mortgage registrations and deed transfers within the seven-county Twin Cities metropolitan area is split between each county's Agricultural Preserve Fund and the State Conservation Fund. If insufficient funds exist in the county fund to pay the credit, the balance is paid from the State Conservation Fund. If insufficient funds exist in the State Conservation Fund, the balance is paid from the State General Fund.

RESULTS

The credit enables land to remain in agricultural production despite rising values and development pressure.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of acres enrolled	210,000	210,000	2015 – 2017
Quantity	Average Credit	\$295	\$284	2015 – 2017

Performance Measures Notes:

Number of acres enrolled and average credit compare calendar year 2015 (previous) to 2017 (current).

For additional information, visit the Revenue Department website (www.revenue.state.mn.us/) and search 'agricultural preserve credit'.

Program: Credits**Activity: Agricultural School Bonding Credit**revenue.state.mn.us/**AT A GLANCE**

The Agricultural School Bonding Credit became effective with taxes payable year 2018.

PURPOSE & CONTEXT

Created in 2017, the Agricultural School Bonding Credit reduces the tax for owners of agricultural land. This is a property tax credit on all property classified as agricultural, excluding the house, garage, and surrounding one acre of land of an agricultural homestead, equal to 40 percent of the tax on the property attributable to school district bonded debt levies.

Agricultural School Bonding Credits are paid from the General Fund.

SERVICES PROVIDED

This credit reduces school property taxes on agricultural, rural vacant, and managed forest land. The credit amount is 40 percent of a property's net tax capacity multiplied by the school debt tax rate.

The county calculates a school debt tax rate for each school district. The school debt tax rate is the school debt service levy divided by the total Net Tax Capacity of all taxable property in the school district. The credit equals 40% of the qualifying property's Net Tax Capacity (excluding the house, garage, and surrounding one acre of land of an agricultural homestead) multiplied by the school debt tax rate. This credit applies to all school debt levies, whether or not they are voter-approved. The School Bond Credit is subtracted from the gross taxes on a property to determine the net property taxes.

RESULTS

No properties received this credit in taxes payable year 2017; the credit became effective with taxes payable year 2018.

Legal Citation: M.S. 273.1387 establishes the Agricultural School Bonding Credit.

Program: Pension-Related Aids

Activity: Police Aid

revenue.state.mn.us/

AT A GLANCE

In 2017:

- 401 local jurisdictions received Police Aid

PURPOSE & CONTEXT

Public safety pensions have historically been a shared responsibility of both state and local governments. State Police Aid provides pension aid to local governments that employ police officers.

Police Aid is paid from the General Fund.

SERVICES PROVIDED

Police Aid was established in 1971 to help support retirement pensions of local police officers. Annual aid distributions to public safety departments are based on the number of months worked by each licensed officer employed by the department. The amount of aid is equal to the revenues from the auto insurance premiums tax. In fiscal year 2017 the total aid amount was \$72.6 million.

RESULTS

Police Aid helps increase affordability of local peace officer pensions.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of jurisdictions receiving aid	404	401	2015 – 2017
Quantity	Aid as a percentage of employer pension cost	66%	63%	2015 – 2017

Performance Measures Notes:

Number of jurisdictions receiving aid compares payable year 2015 (previous) to 2017 (current).

Aid as a percentage of employer pension cost measures how much of a department's pension obligations are paid through state Police Aid. In 2017, Police Aid paid for an average of 63% of a police department's pension obligations.

For additional information, visit the Revenue Department website (www.revenue.state.mn.us) and search 'police state aid'.

Program: Pension-Related Aids

Activity: Fire Aid

revenue.state.mn.us/

AT A GLANCE

In 2017:

- 762 fire relief associations received state Fire Aid

PURPOSE & CONTEXT

Public safety pensions have historically been a shared responsibility of both state and local governments. State Fire Aid provides pension aid to fire relief associations that employ firefighters.

Fire Aid is paid from the General Fund.

SERVICES PROVIDED

Fire Aid was established in 1885 to help support retirement pensions of firefighters. Annual aid distributions are based on the population and property values of the department's coverage area. The amount of aid is equal to the revenues from the fire insurance premiums tax.

State fire aid helps fund:

- service pensions paid to retired firefighters
- disability benefits paid to disabled firefighters
- survivor benefits paid to the surviving spouses and children of deceased firefighters

RESULTS

Fire Aid helps increase affordability of fire service.

Program: Pension-Related Aids
Activity: Insurance Surcharge Aid

revenue.state.mn.us/

AT A GLANCE

In 2017:

- 4 firefighter relief associations received Insurance Surcharge Aid

PURPOSE & CONTEXT

Public safety pensions have historically been a shared responsibility of both state and local governments. Insurance Surcharge Aid helps support retirement pensions of firefighters.

Insurance Surcharge Aid is paid from the General Fund.

SERVICES PROVIDED

Insurance Surcharge Aid helps pay the employer's pension costs for firefighters' relief associations in first class cities. The aid amount is based on revenue from a 2% surcharge on insurance premiums for fire, lightning, and sprinkler leakage coverage within each city.

RESULTS

Insurance Surcharge Aid helps increase affordability of fire service.

Program: Pension-Related Aids

Activity: Public Employees Retirement Association Aid

revenue.state.mn.us/

AT A GLANCE

In 2017:

- 1,110 jurisdictions received Public Employees Retirement Association Aid

PURPOSE & CONTEXT

State law changes can increase costs to local governments by raising their pension contribution rates. Public Employees Retirement Association (PERA) Aid is paid to local governments to offset an increase to the employer-paid PERA rates that began in 1998.

PERA Aid is paid from the General Fund.

SERVICES PROVIDED

The aid is 0.35% of a jurisdiction's 1997 PERA payroll. The amounts remain the same each year, unless an employer no longer participates in PERA.

The aid will end on June 30, 2020.

RESULTS

State assistance helps increase affordability of local government employee pensions.

Program: Pension-Related Aids

Activity: Amortization Aid

revenue.state.mn.us/

AT A GLANCE

In 2017:

- 3 jurisdictions received Amortization Aid

PURPOSE & CONTEXT

Public safety pensions have historically been a shared responsibility of both state and local governments. Amortization Aid supports retirement pensions of local police officers, firefighters, and teachers.

Amortization Aid is paid from the General Fund.

SERVICES PROVIDED

Amortization Aid was established in 1980 to assist underfunded police or salaried firefighters' pension associations and teachers' retirement funds. Aid payments are determined by a combination of fixed amounts and fixed percentages.

The number of jurisdictions receiving aid is decreasing as local pensions merge with the statewide pension systems or as local pensions become fully funded and no longer qualify for aid. Also, some of the amortization aid provisions ended in 2010.

RESULTS

Amortization Aid helps increase affordability of local government employee pensions.

Program: Pension-Related Aids**Activity: Firefighter Supplemental Benefits Reimbursement**revenue.state.mn.us/**AT A GLANCE**

In 2017:

- 328 firefighter relief associations received Firefighter Supplemental Benefits Reimbursement payments

PURPOSE & CONTEXT

Public safety pensions have historically been a shared responsibility of both state and local governments. The Firefighter Supplemental Benefits Reimbursement payments provide pension aid to fire relief associations.

Firefighter Supplemental Benefits Reimbursements are paid from the General Fund.

SERVICES PROVIDED

The Firefighter Supplemental Benefits Reimbursement was established in 1988 to help support retirement pensions for local firefighters. Payments are made to volunteer firefighter relief associations to reimburse them for benefits paid in the previous year. The payment is for retirement benefits, disability benefits, or survivor benefits.

The reimbursement cannot be more than 10% of the distributions paid and cannot be more than \$1,000. The supplemental benefit for survivors cannot be more than 20% and cannot be more than \$2,000.

RESULTS

Firefighter Supplemental Benefits Reimbursement helps increase affordability of firefighter pensions.

Program: Pension-Related Aids**Activity:** Police-Fire Retirement Supplemental Aidrevenue.state.mn.us/**AT A GLANCE**

In 2017:

- 745 entities received Police-Fire Retirement Supplemental Aid

PURPOSE & CONTEXT

Public safety pensions have historically been a shared responsibility of both state and local governments. State Police-Fire Retirement Supplemental Aid provides pension aid to relief associations and retirement plans for police officers and firefighters.

Police-Fire Retirement Supplemental Aid is paid from the General Fund.

SERVICES PROVIDED

Police-Fire Retirement Supplemental Aid was established in 2013 to help support retirement pensions of police officers and firefighters. Annual aid distributions are provided to the Public Employees Retirement Association (PERA) police and fire retirement fund, State Patrol retirement fund and volunteer fire relief associations. The amount of aid is equal to a specified general fund appropriation amount in statute.

The aid provided to PERA and the State Patrol will terminate once the funding levels of the retirement plans reach 90%.

RESULTS

Police-Fire Retirement Supplemental Aid helps increase affordability of peace officer and firefighter pensions.

Program: Other Local Government Payments

Activity: Senior Property Tax Deferral Reimbursement

revenue.state.mn.us/

AT A GLANCE

In 2017:

- 334 taxpayers were enrolled in the program
- The average amount of property taxes deferred was \$3,900

PURPOSE & CONTEXT

Property taxes account for a high share of income for some taxpayers. The Senior Citizens Property Tax Deferral program helps seniors stay in their homes by allowing them to postpone paying a portion of their property tax.

Senior Property Tax Deferral Reimbursements are paid from the General Fund.

SERVICES PROVIDED

Beginning in 1999 this voluntary program allows eligible senior citizens to postpone paying a portion of their homestead property taxes and special assessments. The state reimburses counties for the amount of property taxes deferred each year. A homestead may remain eligible until a qualifying homeowner no longer lives in the property, at which point the deferred taxes and interest must be paid to the state.

Qualified homeowners must be age 65 or older who have owned and lived in their home for at least 15 years and have household income less than \$60,000. They can postpone the portion of property taxes above 3% of their income.

RESULTS

Senior citizens can afford to stay in their homes by postponing payment of some of their property taxes.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of senior citizen taxpayers enrolled	309	334	2015 – 2017
Quantity	Average amount of property taxes deferred	\$3,800	\$3,900	2015 – 2017

Performance Measures Notes:

Number of taxpayers enrolled compares calendar year 2015 (previous) to 2017 (current).

For additional information, visit the Revenue Department website (www.revenue.state.mn.us) and search 'senior deferral'.

Legal Citation: M.S. Chapter 290B establishes the Senior Citizens' Property Tax Deferral program.

Program: Other Local Government Payments

Activity: Performance Measurement Reimbursement

revenue.state.mn.us/

AT A GLANCE

In 2018:

- 28% of counties and 3% of cities participated in the Performance Measurement program.

PURPOSE & CONTEXT

Transparency in government finances is important for establishing the trust and understanding of taxpayers. The reimbursement helps local governments to develop performance measures.

Performance Measurement Reimbursements are paid from the General Fund.

SERVICES PROVIDED

The Performance Measurement program was created in 2010 to determine the effectiveness of counties and cities in providing services. Participants use a set of 10 performance measures (for example police response time, hours to snow plow streets, citizen's rating of water quality). Participation by counties and cities is voluntary.

Counties and cities report results annually to the state auditor and to their residents. Participating jurisdictions are eligible for a 14 cents per capita reimbursement (up to \$25,000) and exemption from property tax levy limits for the following year (if levy limits are in effect).

RESULTS

Taxpayers have access to helpful information about the cost and quality of services provided by local governments.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Percentage of counties participating	22%	28%	2016 – 2018
Quantity	Percentage of cities participating	3%	3%	2016 – 2018

Performance Measures Notes:

Annual participation compares calendar year 2016 (previous) to 2018 (current).

Participation in the program has decreased since the first year of the program. The decrease in participation from the first year to the second reflects additional requirements for implementing local performance measures in the second year. Many local jurisdictions elected to explore the program in the first year but decided against moving towards full implementation in the second year.

Legal Citation: M.S. 6.91 establishes the Performance Measurement Reimbursement payments.

<https://www.revisor.mn.gov/statutes/cite/6.91>

Program: Other Local Government Payments

Activity: Mahnomen Property Tax Reimbursement

revenue.state.mn.us/

AT A GLANCE

In 2017:

- 3 local governments in Mahnomen County received combined payments totaling \$1.2 million

PURPOSE & CONTEXT

Large decreases in tax base can lead to financial strain for local governments. The program provides payments for the loss of property tax base due to the Shooting Star Casino becoming tax exempt.

Mahnomen Property Tax Reimbursements are paid from the General Fund.

SERVICES PROVIDED

Beginning in 2007, the Shooting Star Casino was placed into tax-exempt trust status.

The state makes annual payments to compensate for property taxes not collected on the tax exempt land:

- Mahnomen County (\$900,000)
- the City of Mahnomen (\$160,000), and
- Mahnomen School District #432 (\$140,000)

The payment was first made in 2006, became permanent in 2008, and was increased in 2013.

RESULTS

The fiscal impacts of tax exempt tribal owned property are reduced for local governments in Mahnomen County.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	City tax base percentage of pre-exemption tax base	53%	56%	2015 – 2017
Quantity	County tax base percentage of pre-exemption tax base	173%	180%	2015 – 2017
Quantity	School district tax base percentage of pre-exemption tax base	162%	169%	2015 – 2017

Performance Measures Notes:

City tax base percentage compares assessment year 2015 (previous) to assessment year 2017 (current) for the City of Mahnomen, Mahnomen County, and Mahnomen School District #432. The pre-exemption tax base is assessment year 2006.

The total tax base for the city of Mahnomen decreased to 52% of its pre-exemption tax base when the exemption began in assessment year 2007. In recent years, the city tax base percentage has grown to 56% of pre-exemption levels. The exclusion reduced the taxable value of homesteads and the tax base of local taxing jurisdictions statewide.

Legal Citation: 2008 Minn. Laws Chapter 154, Article 1 established the payments; they were amended by Laws 2013 Chapter 143 Article 2 Section 33.

Program: Other Local Government Payments**Activity: Taconite Aid Reimbursement**revenue.state.mn.us/**AT A GLANCE**

In 2017:

- 1 school district received Taconite Aid Reimbursement

PURPOSE & CONTEXT

The Taconite Aid Reimbursement is paid to Deer River School District #317 in Itasca County to compensate the district for the mining occupation tax distribution received before the law was changed in 1978.

The Taconite Aid Reimbursement is paid from the General Fund.

SERVICES PROVIDED

The Deer River School District receives an annual payment of \$561,050. This payment has remained the same since 1980.

RESULTS

The fiscal impacts of a 1978 occupation tax law change are reduced for the school district.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Payment's percentage of total school district revenues	4.6%	3.8%	2015 – 2017

Performance Measures Notes:

Payment's percentage of total school district revenue compares calendar year 2015 (previous) to 2017 (current).

In FY 2017, the reimbursement payment accounted for 3.8% of total school district revenues.

Legal Citation: M.S. 477A.15 establishes this payment. <https://www.revisor.mn.gov/statutes/cite/477A.15>.

Program: Other Local Government Payments

Activity: Border City Reimbursement

revenue.state.mn.us/

AT A GLANCE

In 2017:

- 2 jurisdictions received a Border City Reimbursement payment

PURPOSE & CONTEXT

Property taxes tend to be lower in North Dakota, putting some Minnesota businesses in bordering communities at a disadvantage. The Border City Reimbursement provides property tax relief for businesses in certain border cities.

Border City Reimbursements are paid from the General Fund.

SERVICES PROVIDED

The Border City Reimbursement reduces property taxes for:

- commercial/industrial property,
- public utility property, and
- apartment property.

The reimbursement provides additional property tax relief to the border cities of Breckenridge, Dilworth, East Grand Forks, and Moorhead. Cities must request the state reimbursement, and then payments to businesses are determined by the cities.

RESULTS

Border City Reimbursement increases business competitiveness in border areas.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of jurisdictions receiving reimbursement	1	2	2015 – 2017

Performance Measures Notes:

Number of jurisdictions receiving reimbursement compares payable year 2015 (previous) to 2017 (current).

The City of Breckenridge was the only city to receive a payment in 2015. The two jurisdictions receiving reimbursement payments in 2017 were the City of Breckenridge and the City of East Grand Forks.

Legal Citation: M.S. 469.1735 establishes the Border City Reimbursement.

Program: Other Local Government Payments

Activity: Disaster Credits

revenue.state.mn.us/

AT A GLANCE

In 2016 and 2017:

- 917 parcels received Disaster Credits

PURPOSE & CONTEXT

Damage caused by natural disasters and other events can lead to financial strain for households and businesses. The credit provides property tax relief for property damaged in a declared disaster or emergency area.

Disaster Credits are paid from the General Fund.

SERVICES PROVIDED

Beginning in 1984, the disaster credit reduces the property tax of damaged homestead property within a declared disaster or emergency area. The damaged property is revalued, and the credit is equal to difference in tax between the original value and the value after damage. The state reimburses local governments for the credit in the year following the damage.

A county board may grant an abatement of property tax in the year in which the damage occurred if 50% of the homestead was destroyed. The county may also grant a credit for taxes payable in the year following the damage for homestead property that does not qualify for the disaster credit and non-homestead property. The state reimburses the local jurisdictions for abatements and credits for property located in a declared disaster or emergency area.

The state legislature periodically authorizes tax base replacement aid for cities that experience a tax base reduction greater than 5% due to damage caused by a natural disaster.

RESULTS

Property tax relief helps individuals, businesses and communities recover from the impacts of damage caused by a disaster.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of parcels receiving credits	121	917	2014/2015 – 2016/2017

Performance Measures Notes:

The number of parcels receiving credits compares payable years 2014 and 2015 (previous) to 2016 and 2017 (current). The amount of payment is dependent on the number and severity of disasters. In payable years 2014 and 2016, no parcels received the credit.

For additional information, visit the Revenue Department website (www.revenue.state.mn.us) and search 'disaster'.

Legal Citation: M.S. 273.1231 through 273.1235 establish these credits.

<https://www.revisor.mn.gov/statutes/cite/273.1231>.

Program: Other Local Government Payments**Activity: Miscellaneous Payments**revenue.state.mn.us/**AT A GLANCE**

Between 2016 and 2019:

- 2 local governments received one-time relief payments

PURPOSE & CONTEXT

Unforeseen events may occur that strain local government finances. State payments provide financial assistance to help local governments through unforeseen events.

The miscellaneous payments made during the reporting period were paid from the General Fund.

SERVICES PROVIDED

Occasionally payments are authorized by law to local governments experiencing an extraordinary or unusual circumstance and where other financial assistance is unavailable. Examples include:

- \$48,152 to the city of Bluffton between 2015 and 2016 for repayment of Local Government Aid penalties, and
- \$1,200,000 to the county of Wadena between 2018 and 2019 for health care costs

The payments are made outside of existing aid distribution formulas.

RESULTS

Relief payments help communities recover from the impacts of unusual circumstances.

Performance Measures Notes:

The amount and frequency of payments is dependent on legislative approval.

Legal Citation: Laws 2014, Chapter 308, Article 1, Section 15; Laws 2017 First Special Session, Chapter 1, Article 4, Section 32.

Program: Other Local Government Payments**Activity: Minneapolis Debt Service Aid**revenue.state.mn.us/**AT A GLANCE**

In 2017:

- The state paid \$4.12 million of Minneapolis's library referendum bonds.

PURPOSE & CONTEXT

Regional infrastructure projects often require state assistance to be affordable. This program will provide state aid to Minneapolis to pay a portion of the city's library referendum bonds.

The Minneapolis Debt Service Aid is paid from the General Fund.

SERVICES PROVIDED

The state makes annual payments to the city of Minneapolis equal to 40% of the annual levy for payments for the city's library referendum bonds. These payments began in 2016.

RESULTS

Minneapolis Debt Service Aid decreases property taxes for properties in the city of Minneapolis.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>

Program: Other Local Government Payments

Activity: Bloomington Fiscal Disparities Loan Repayment

revenue.state.mn.us/

AT A GLANCE

In 2018:

- The state paid \$4.7 million of Bloomington's loan obligation

PURPOSE & CONTEXT

Regional infrastructure projects often require state assistance to be affordable. This program will repay a portion of a loan on behalf of the city of Bloomington.

Bloomington Fiscal Disparities Loan Repayments are paid from the General Fund.

SERVICES PROVIDED

This program relieves the city of Bloomington of its obligation to repay a loan it received from the Fiscal Disparities Property Tax program for the initial construction of infrastructure for the Mall of America. For the last four years of repayment (2015 to 2018) the state will make the repayment to the fiscal disparities program on Bloomington's behalf.

RESULTS

The Bloomington Fiscal Disparities Loan Repayment program allows the City of Bloomington to use money they would have used to pay off the loan for other purposes.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Percent of additional tax base in Bloomington due to the state payment	2.8%	2.4%	2016 – 2018

Program: Other Taxes and Refunds

Activity: Other Taxes and Refunds

revenue.state.mn.us/

AT A GLANCE

- The Department of Revenue collects and transfers numerous taxes on behalf of other state agencies.

PURPOSE & CONTEXT

The Department of Revenue collects certain taxes on behalf of other state agencies. Those include revenue for the Highway User & Tax Distribution, Restricted Miscellaneous Special Revenue, State Airports, Environmental, and Remediation funds. That revenue is then transferred to the appropriate agencies.

SERVICES PROVIDED

For some of these funds collected and transferred by the department of revenue, the agency does provide interest on refunds to taxpayers when necessary.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Projected</i>	<i>Dates</i>
Quantity	Amount of interest on refunds on taxes for the state airport fund	\$0	\$1,000	2017 – 2019

Program: Other Taxes and Refunds

Activity: Political Contribution Refund

revenue.state.mn.us/

AT A GLANCE

In FY 2017:

- This program was suspended for contributions made from July 1, 2015 – June 30, 2017.

PURPOSE & CONTEXT

The Political Contribution Refund program was enacted in 1990 (Minnesota Statute 290.06, subdivision 23). The program provides funds to qualifying political candidates and parties through contributions by Minnesotans who request the refund. Only contributions to candidates that have signed an agreement with the Minnesota Campaign Finance and Public Disclosure Board to observe the state campaign spending limit law are eligible for the political contribution refund.

Individuals who make qualifying contributions to qualified candidates may receive a state refund up to a total of \$50 per person (or \$100 per couple) in any calendar year.

Political Contribution Refunds are paid from the General Fund.

SERVICES PROVIDED

The program provides refunds to individuals who make qualified contributions to candidates who agree to limit their spending by signing a Public Subsidy Agreement.

Candidates and parties provide contributors documentation about their contribution on forms. Contributors submit those forms and documentation to the Department of Revenue. The department sends a refund to contributors who apply for a refund of contributions they made to qualified Minnesota political parties or candidates for the following Minnesota offices:

- Legislature (State House or Senate)
- Governor, Lieutenant Governor, or Attorney General
- Secretary of State
- State Auditor

RESULTS

Individuals who contribute money to a qualifying party or candidate may receive a refund of up to \$50 for their contribution. The program was suspended for FY2009 – 2013. It was in effect for FY14-15. It was suspended for FY16-17.

To qualify for a refund of political contributions made during 2018, taxpayers must apply by April 15, 2019.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Political Contribution Refunds Paid	\$0	\$2,489,000	2016-2017
Quantity	Total Political Contribution Refunds	0	33,000	2016-2017

Performance Measure Notes:

Compares refunds paid in tax year 2016 (previous) to tax year 2017 (current).

Legal Citation: M.S. 290.06, subdivision 23, establishes the Political Contribution Refund program. It was amended (suspended) by Laws 2015, Chapter 77, Section 82. <https://www.revisor.mn.gov/statutes/cite/290.06>.

Program: Other Taxes and Refunds

Activity: Tax Refund Interest

revenue.state.mn.us/

AT A GLANCE

In Fiscal Year 2017:

- \$10.6 million in tax refund interest was paid to taxpayers who did not receive refunds within the statutory time frame
- The interest rate has been 3% since 2010.

PURPOSE & CONTEXT

The Department of Revenue must pay interest to taxpayers on certain tax refunds if they are not paid within the time frame set by statute. The interest rate has been 3% since 2010; it is the same rate taxpayers owe on underpayments.

The department calculates the interest rate based on the prime rate charged by banks and announces the rate prior to each calendar year.

Tax Refund Interest Payments are paid from the General Fund.

SERVICES PROVIDED

Interest can accrue on tax refunds for various reasons, such as disputes that are resolved in court cases, tax audits, and administrative appeals. The Department of Revenue works to minimize interest accruals, which can fluctuate greatly from year to year depending on resolution of court cases and appeals.

The date interest starts to accrue on a tax refund is specified in statute, as shown below.

<i>Type of Tax or Refund</i>	<i>Interest Starts to Accrue</i>
Individual Income Tax	90 days after the return is due or filed (whichever is later)
Corporate Franchise Tax	90 days after the return is due or filed (whichever is later)
Withholding Taxes	On the date taxes were paid to the Department of Revenue
Sales and Use Taxes	Usually on the date taxes were paid to the Department of Revenue However, interest starts to accrue 90 days after refund claims filed for: <ul style="list-style-type: none"> • Sales tax paid on exempt capital equipment or building materials • Purchaser refunds (of sales tax incorrectly charged by a retailer or vendor)

RESULTS

Taxpayers receive interest payments on any refunds that are not paid within the statutory timeline.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Tax Refund Interest Paid	\$8,660,000	\$10,610,000	2016-2017
Quantity	Returns Receiving Refund Interest	106,000	119,000	2016-2017

Performance Measure Notes:

Compares tax refund interest paid in FY2016 (previous) to FY2017 (current).

Legal Citation: M.S. 289A.56 establishes tax refund interest payments.

<https://www.revisor.mn.gov/statutes/2017/cite/289A.56>.

Program: Other Taxes and Refunds**Activity: Discontinued Programs**revenue.state.mn.us/**PURPOSE & CONTEXT**

Effective July 1, 2017 the Greater Minnesota Internship Credit was repealed. Starting in tax year 2018 taxpayers can no longer claim the credit. The program required the Office of Higher Education to administer an internship program through public and private nonprofit institutions to provide tax credits to employers who hired interns under the program.

The Volunteer Retention Stipend was established in 2014 as a three year pilot program to help recruit and retain volunteer firefighters, ambulance attendants, and medical responders. The stipend was \$500 for each qualified volunteer in the pilot area, which includes 14 counties. The final year of the three year pilot program was in 2017.

RESULTS

AT A GLANCE

- Nine full-time staff: three judges, three administrative staff, and three judicial law clerks.
- Approximately 3,200 cases were filed annually between 2014 and 2018. Ninety-eight percent were appeals from property tax assessments; the remainder were appeals from orders of the Commissioner of Revenue.
- A property tax appeal is filed with the district court administrator in the county in which the property is located and then transferred to the tax court; an appeal from an order of the Commissioner of Revenue is filed directly with the Tax Court.
- Generates approximately \$900,000 per year in filing fees deposited into the General Fund.
- FY 2017 base budget of \$1,248,000, along with \$609,000 in one-time money for the acquisition and implementation of a new case-management system.
- Judges travel throughout Minnesota to hear cases where taxpayers reside.
- The Court files written findings of fact, conclusions of law, and an explanatory memorandum in each case within three months of submission.

PURPOSE

The Minnesota Tax Court is a specialized trial court in the executive branch with statewide jurisdiction. By statute, it is “the sole, exclusive, and final authority for the hearing and determination of all questions of law and fact arising under the tax laws of the state” (Minnesota Statutes section 271.01, subdivision 5).

The Tax Court resolves disputes between property owners and counties concerning the correct value and classification of real property and adjudicates taxpayer appeals from orders of the Minnesota Commissioner of Revenue. By ensuring that property is correctly classified and valued and that taxpayers are correctly taxed, the court helps provide efficient and accountable government services. The Court’s three judges strive to ensure that the Court is managed according to best practices by working closely with the Department of Administration’s Small Agency Resource Team (SmART) and with MN.IT.

BUDGET

**Spending by Category
FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

The Minnesota Tax Court generates approximately \$900,000 annually in non-dedicated revenue from filing fees, which are deposited into the General Fund. All funding for Tax Court operations, in turn, comes from General Fund appropriations. The Tax Court's FY 16-17 biennial budget included a base amount of approximately \$2.5 million and a one-time appropriation of approximately \$1.4 million for the acquisition and implementation of a new electronic case-management system.

STRATEGIES

The Tax Court is a specialized trial court. Tax Court actions are governed by the Minnesota Rules of Civil Procedure and of Evidence, and proceed in largely the same manner as civil actions filed in the Minnesota District Courts. Like other trial courts, the Tax Court resolves discovery and trial-management disputes, decides dispositive and non-dispositive motions, and conducts bench trials (jury trials are not available in Tax Court). The Tax Court files written findings of fact, conclusions of law, and an explanatory memorandum in each case heard.

Harness Available Resources: To ensure the Court is managed according to best practices, we work closely with the Department of Administration's Small Agency Resource Team (SmART) and with MN.IT. SmART assists the Court with human resources and budgeting. The Court's budget now includes line-items for statutorily mandated services such as judicial travel to conduct hearings, the purchase of transcripts for indigent taxpayers, and translators for court proceedings. MN.IT assists the Court in maintaining its existing infrastructure and in helping to guarantee that the Court's technology will meet its future needs.

Active Case Management: Filings in the Tax Court increased from approximately 1,200 in calendar year 2000 to almost 6,000 in 2010. Filings for the last five years (2014 through 2018) have averaged approximately 3,200 cases per year. Although the court had a significant backlog for many years, that is no longer so. Since 2013, the Court has filed a scheduling order in each case to ensure that matters that do not settle are ready for trial in approximately 16 months. As a result of this active case management (and a modest decrease in filings), the Court has significantly reduced the number of open and pending cases on its docket. In addition, to facilitate settlements in Commissioner of Revenue and particularly in property tax cases (in which counties would otherwise have to request special funds to pay for an outside mediator), the judges of the Court have all completed training as civil mediators. This enables parties to mediate appropriate cases (at no cost to the parties) in hopes of resolving them short of trial. Finally, the court has implemented streamlined procedures that reduce the time (and cost to the parties) of trying cases that cannot otherwise be resolved.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Aug. 25, 2015</i>	<i>Aug. 15, 2016</i>	<i>Aug. 15, 2017</i>	<i>Aug. 15, 2018</i>
Quantity	Open/Pending Cases	7,740	4,003	N/A	3,080
Quality	Average Age of Open/Pending Cases	N/A	N/A	N/A	20 mos.

1. The number of open and pending cases represents the cases awaiting disposition by the Court. As used here, "Open and Pending Cases" refers to matters that have been entered into the Tax Court's electronic case-management system, but have not yet been settled or tried.
2. The Court's new case-management system allows it, for the first time, to track the average age of open and pending cases.

The Minnesota Tax Court is authorized by Minnesota Statutes Chapter 271 (<https://www.revisor.mn.gov/statutes/?id=271>).

Recommendation:

The Governor recommends \$125,000 in FY 2020, and \$126,000 annually thereafter, from the general fund for a new staff person to manage the Tax Court's new e-filing system. The Tax Court has received funding since FY 2016 for the IT costs of a new case management system. Effective July 1, 2019, a component of that system will, for the first time, allow parties to file court documents electronically and provide parties and the public remote, online access to documents. The court seeks to create a staff position to oversee these new features and provide dedicated assistance to those using the system. This recommendation represents a 7.5% increase to the Tax Court's base budget, which totals \$3.364 million in FY 2020-21.

Rationale/Background:

In this technological age, taxpayers increasingly expect to file documents electronically, rather than incur the effort and expense of filing paper documents by U.S. Mail. In addition, taxpayers expect to receive documents electronically (rather than paper copies) and to electronically access documents filed in their court cases.

In July 2017, the Tax Court began using C-Track, an electronic case-management system supplied by Thomson Reuters, which has the capacity to accept electronic filings and to make court documents remotely viewable by the public. MN.IT and Thompson Reuters estimate that the Tax Court can implement e-filing and public access during fiscal year 2020.

Courts with e-filing must maintain competently staffed helplines to assist customers in e-filing and accessing documents. Users commonly need help with setting up accounts; creating and updating usernames and passwords; and accessing and navigating the system. Those attempting to file documents electronically also commonly need help with properly naming documents to be filed; selecting the correct descriptors; and using acceptable document types and file sizes. In addition, courts with remote access to court documents also face questions from users and the general public concerning how to view documents, as well as which documents are viewable and why others are not.

Other courts that have implemented e-filing frequently underestimated the amount of time court staff spend assisting users with e-filing. In addition, before electronic documents can be added to C-Track, they must be reviewed to ensure that they are in proper format, will be filed in the correct case, and have had any confidential information (such as social security numbers and financial account identifiers) redacted. Given the workload of the court's existing staff (which will continue even after e-filing is implemented), the court lacks the workflow capacity

to fulfill these needs, nor can the court shift work among existing staff to free-up the equivalent of one full-time position.

Proposal:

The Governor recommends funds of \$125,000 in fiscal year 2020 (\$126,000 in fiscal year 2021) for the addition of one full-time employee to assist taxpayers with e-filing and citizens with public access. The recommendation is for salary and benefits only; the court will absorb additional expenses (e.g., for office space and necessary training). The court will fund other costs associated with implementation of e-filing and public access (such as the creation of training materials) from its base appropriation.

Equity and Inclusion:

The implementation of e-filing will make filing and serving documents easier and less expensive for all taxpayers and other Tax Court customers by eliminating the need to copy paper documents and to mail them to the court and the opposing party. It will especially benefit persons with disabilities, however, who will be able to send documents to, and receive documents from, the court and other parties without leaving their homes, and to receive individualized assistance in e-filing, also without leaving their homes. The addition of electronic access to tax court records will particularly benefit those with disabilities and those who reside outside the Twin Cities metropolitan area.

Results:

Using C-Track analytic tools, the court will be able to track the number of documents that are e-filed annually once e-filing is implemented. In addition, the court will track the number of e-filer inquiries concerning various filing tasks, with the goal of clarifying its e-filing procedures to reduce such inquiries. Finally, the court will track citizens' use of public access.

Agency Change Summary 5

AT A GLANCE

Who We Serve:

- 130,000 active/inactive teachers
- 65,000 benefit annuitants
- 593 employer units

Revenue sources: (Over 28 years)

- 74% investment income
- 12% member contributions
- 14% employer unit contributions

Direct Aid and Supplemental Employer Contributions:

- General Fund appropriation of approximately \$16.5 million annually for merger of Minneapolis Teachers Retirement Fund Association (MTRFA) in 2006.
- \$2.25 million annually from the City of Minneapolis and \$2.25 million annually from the Minneapolis School District in direct contributions related to the MTRFA merger.
- General Fund appropriation of approximately \$14.4 million annually for the merger with the Duluth Teachers Retirement Fund Association in 2015.

Staff:

- 85 FTE

PURPOSE

- Provide retirement, disability, and survivor benefits to Minnesota public educators, assisting them in achieving future income security.
- Strive to provide benefits that attract and retain competent teachers who serve communities throughout the state, building a stronger education system.
- Commit to safeguarding the financial integrity of the fund and take pride in providing exceptional, innovative services to our members.

TRA contributes to the following statewide outcomes:

- A thriving economy that encourages business growth and employment opportunities;
- Minnesotans have the education and skills needed to achieve their goals;
- Efficient and accountable government services.

BUDGET

**Spending by Program
FY 17 Actual**

Historical Spending

Source: TRA Comprehensive Annual Financial Reports (FY 2006-2017)

TRA was established by the Minnesota legislature in 1931 and is primarily governed by Minnesota Statutes Chapters 354 and 356. The Association is administered by an eight member board of trustees. TRA is funded through member contributions, employer contributions, and investment earnings on fund assets. Over long periods of time, approximately 74 percent of fund revenues are generated by investment earnings. TRA members contribute 7.50% of their covered salary to TRA. Beginning July 1, 2018, the employer contribution was increased from 7.50% to 7.71%. The employer contribution rate will increase annually in stages and on July 1, 2023, will be 8.75% of member covered salary. The member contribution rate is scheduled to increase from 7.50% to 7.75% of member pay on July 1, 2023.

The TRA expenditure budget consists largely (over 99%) of monthly retirement, survivor, and disability payments to members or other benefit recipients. In fiscal year 2019, TRA expects to pay \$153 million/month in benefits to over 65,000 individuals.

TRA's main office is in St. Paul. Satellite offices are located in Detroit Lakes, Duluth, Mankato and St. Cloud.

STRATEGIES

The TRA Management Team is committed to safeguarding the financial integrity of the fund, which requires continual monitoring of actuarial funding reporting. Core operational functions include: collecting, recording and maintaining the accounting of retirement contributions; collecting and managing member information; issuing benefit and refund payments; and educating members and employers about TRA plan features.

RESULTS

During fiscal year 2018, 3,633 members were served with individual pre-retirement counseling services. Another 2,025 members were served during group counseling and other ad-hoc presentations. In fiscal year 2018, TRA generated 25,830 benefit estimates for members preparing for retirement. TRA members may also securely generate benefit estimates online. TRA members requested 24,041 benefit estimates online during fiscal year 2018. The TRA Contact Center received 43,302 telephone calls and responded to 1,494 emails during fiscal year 2018.

The 2018 Legislature enacted significant pension reform by increasing member and employer contributions and trimming plan features including the lowering of the annual COLA to 1.0% for five years through 2023. Thereafter the COLA will increase by 0.1% each year until it reaches 1.5% on January 1, 2027. The bill also modified TRA's investment earnings assumption from 8.5% annually to 7.5% annually. Other economic assumptions such as total covered payroll, inflation, and individual salary increases were also modified. Incorporating all these reforms, TRA's 30-year projected funding ratio is 104% by 2048.

Another performance measure is the funded ratio of the plan, which is an indication of the ability to meet current and future benefit obligations.

<i>Type of Measure</i>	<i>Performance Measures</i>	<i>Previous 6/30/2017</i>	<i>Current 6/30/2018</i>
Quality	TRA Plan Funding Ratio (Market Value)	77.5%	78.1%
Quality	TRA Plan Contribution Sufficiency (percent of covered payroll- Market Value and after full implementation of contribution rate increases)	-2.2%	0.2%
Quantity	TRA Plan Unfunded Actuarial Liability (Market Value)	\$6.2 billion	\$6.3 billion

Legal authority for the Teachers Retirement Association comes from Minnesota Statutes Chapter 354 (<https://www.revisor.mn.gov/statutes/?id=354>).

AT A GLANCE

- Over 143,000 centerline miles (single roadway, regardless of the number of lanes) including trunk highways and local roads
- 5th largest state highway system in the nation
- 4,860 bridges
- More than 95 million vehicle miles driven everyday on the state highway system
- 50% of state highways and 35% of state bridges are more than 50 years old
- 503 construction projects planned in the 18-19 biennium
- \$21 billion in planned investments for state highways over the next 20 years (MnSHIP)
- 4,979 full time equivalent employees as of FY18
- Truck freight traffic projected to increase 30% by 2030

We work with our partners to support:

- 3 active Lake Superior and 4 Mississippi River system ports
- Transit services in all 80 non-metro counties
- Greater MN transit ridership needs are projected to increase 45% by 2025
- 135 publicly owned state-funded airports
- 4,420 track miles serving 21 railroad companies, Northstar commuter, and Amtrak passenger service

PURPOSE

Transportation today is about providing access to critical connections for all Minnesotans through managing an efficient, safe, reliable and accessible system of interconnected modes. Transportation supports a robust quality of life through various modes working together to link people to education, healthcare, jobs and recreation. Transportation supports a healthy economy, providing for the efficient shipping of raw and finished goods as well as access to jobs. Transportation also plays an important role in the stewardship of our environment by ensuring compliance with environmental laws and policies. The Minnesota Department of Transportation's (MnDOT's) work with connected and automated technology is also helping the agency gain experience and knowledge of new technologies to prepare for the future of transportation. Therefore, MnDOT has adopted the following:

Vision: Minnesota's multimodal transportation system maximizes the health of people, the environment, and the economy.

Mission: To plan, build, operate, and maintain a safe, accessible, efficient, and reliable multimodal transportation system that connects people to destinations and markets throughout the state, regionally, and around the world.

Funding is provided in four programs with 12 budget activities:

Multimodal Systems	State Roads	Local Roads	Agency Management
Aeronautics	Program Planning & Delivery	County State Aid Roads	Agency Services
Transit	State Road Construction	Municipal State Aid Roads	Building Services
Freight and Rail Safety	Debt Service		
	Operations and Maintenance		
	Statewide Radio		
	Communications		

BUDGET

Note: Spending includes Trunk Highway fund debt service transfer

Note: Spending includes Trunk Highway fund debt service transfer

The primary source of financing for state-owned highways is the trunk highway fund, which is supported by motor fuel taxes, motor vehicle registration fees, and motor vehicle sales taxes. Other sources of transportation funding include federal, transit assistance, county state aid highway, municipal state aid street, state airport, and special revenue funds. Beginning in FY 2018 a portion of transportation-related revenues, historically deposited in the general fund, are now dedicated to fund transportation purposes. The additional funding is from (1) general sales tax revenue from sales of automotive repair and replacement parts, (2) general sales tax revenue from short-term vehicle rentals, (3) collections from a separate vehicle rental tax, and (4) motor vehicle lease sales tax revenue. In total, less than one percent of the agency's operating budget in FY 2017 was directly from the general fund, which supports non-highway modes such as greater Minnesota transit, ports, and rail. Starting in FY 2018, as a result of transferring the additional General Funds, the portion of the agency's operating budget from the General Fund increases to approximately 3 percent.

STRATEGIES

As stewards of the transportation system, we're committed to the following objectives:

1. **Open Decision Making:** Make transportation system decisions through processes that are inclusive, engaging, and supported by data and analysis. Provide for and support coordination, collaboration, and innovation. Ensure efficient and effective use of resources.
2. **Transportation Safety:** Safeguard transportation users as well as the communities the systems travel through. Apply proven strategies to reduce fatalities and serious injuries for all modes. Foster a culture of transportation safety in Minnesota (<http://www.minnesotatzd.org/>).
3. **Critical Connections:** Maintain and improve multimodal transportation connections essential for Minnesotans' prosperity and quality of life. Strategically consider new connections that help meet performance targets and maximize social, economic and environmental benefits.
4. **System Stewardship:** Strategically build, manage, maintain, and operate all transportation assets. Rely on system data and analysis, performance measures and targets, agency and partners' needs, and public expectations to inform decisions. Use technology and innovation to get the most out of investments and maintain system performance. Increase the resiliency of the transportation system and adapt to changing needs.

5. **Healthy Communities:** Make fiscally-responsible decisions that respect and complement the natural, cultural, social, and economic context. Integrate land uses and transportation systems to leverage public and private investments.

MnDOT seeks to advance three goal areas identified in the Strategic Operating Plan (2018-2022): operational excellence, customer trust and workforce excellence. Over the next two years, we intend to focus on the following four risk-based priorities outlined in the Strategic Operating Plan:

- Be nimble and responsive
- Strengthen relationships
- Ensure the safety and security of MnDOT's employees and assets
- Plan MnDOT's future workforce (recruitment, engagement, retention)

The Minnesota Department of Transportation requires that the principles of "Complete Streets" be considered at all phases of planning and project development in the establishment, development, operation, and maintenance of a comprehensive, integrated, and connected multimodal transportation system (<http://www.dot.state.mn.us/policy/operations/op004.html>).

The Department of Transportation's legal authority comes from:

Minnesota Constitution, Article XIV, Public Highway System (<https://www.revisor.mn.gov/constitution>)

Powers of Road Authorities, M.S. 160 (<https://www.revisor.mn.gov/statutes/?id=160>)

Trunk Highways, M.S. 161 (<https://www.revisor.mn.gov/statutes/?id=161>)

Administration of State Aid Road Systems, M.S. 162 (<https://www.revisor.mn.gov/statutes/?id=162>)

Responsibilities Related to Bridges, M.S. 165 (<https://www.revisor.mn.gov/statutes/?id=165>)

Trunk Highway Bonds, M.S. 167 (<https://www.revisor.mn.gov/statutes/?id=167>)

Traffic Regulation, M.S. 169 (<https://www.revisor.mn.gov/statutes/?id=169>)

Signs and Billboards Along Highways, M.S. 173 (<https://www.revisor.mn.gov/statutes/?id=173>)

Department of Transportation, M.S. 174 (<https://www.revisor.mn.gov/statutes/?id=174>)

Recommendation:

The Governor recommends the state commit to a major transportation investment plan to fund the estimated \$6 billion dollar gap that exists between funding needs and available revenues over the next 10 years. The Governor proposes filling the \$6 billion gap in road and bridge funding by:

- Initiating a 20 cent gas tax increase, including fuel in distributor storage at the start time of each increase (phased-in over two years in October and April in FY20 and FY21)
- Indexing the gas tax to inflation (beginning in FY23)
- Increasing the registration tax, effective January 1, 2020 (increase tax rate from 1.25 percent to 1.5 percent and base tax fee from \$10 to \$45; change the depreciation schedule; amend base value calculation by removing destination charge and hold harmless provision of statute)
- Increasing the motor vehicle sales tax from 6.5 percent to 6.875 percent, effective December 1, 2019
- Authorizing \$2 billion in trunk highway bonds over 8 years starting in 2022

The gas tax, registration tax, and motor vehicle sales tax increases will fund roads and bridges for the state trunk highways, county state aid highways, and municipal state aid streets. In the FY22-23 biennium, when revenue changes are completely phased in, the increased revenue from the gas tax, motor vehicle sales tax, and registration fees are forecast to increase available resources for each transportation fund by 30 percent.

To help lower- and middle-income Minnesotans pay for transportation investments, the governor proposes an increase to the Working Family Credit of \$100 for each single or head of household recipient and \$200 for each married filing jointly recipient. This proposal is described in the Tax Aids, Credits and Refunds section. In addition, while the gas tax increase would impact how our rate compares to neighboring states, the existing qualifying service station tax credit would ensure Minnesota service stations within 7.5 miles of the state border receive refunds that effectively reduce the rate to not more than three cents per gallon above the rate of the neighboring state.

Other Components:

In addition to the new funding above, the Governor recommends:

- Returning the auto parts sales tax, 9.2 percent motor vehicle rental tax, and 6.5 percent sales tax on motor vehicle rentals currently deposited into the Highway User Tax Distribution (HUTD) Fund as of FY2018 back to the General Fund beginning in FY2020. This results in an increase to the General Fund of \$395 million in FY20-21 and \$404 million in FY22-23.
- Restoring the motor vehicle lease sales tax to the pre-2018 distribution levels. This results in \$32 million returned to the General Fund, annually.
- In total, the General Fund would receive \$459 million in FY20-21 and \$468 million in FY22-23.

General fund revenues are reduced by \$8 million in the FY20-21 biennium due to increased petroleum refunds and income tax interactions with the registration tax. General fund expenditures decrease by \$170,000 for the biennium for increased aid to counties with casinos under [M.S. 270C.19](https://www.revisor.mn.gov/statutes/cite/270C.19) (<https://www.revisor.mn.gov/statutes/cite/270C.19>) due to the increase in gas tax.

Authorization for the sale of \$2 billion in trunk highway bonds over 8 years starting in 2022 (\$250 million per year). Debt service for these bonds is estimated to be \$22.2 million for the FY22-23 biennium.

Several components in this proposal require changes to the Minnesota Licensing and Registration System (MNLARS). Costs associated with changes to MNLARS will be funded through the Department of Public Safety's MNLARS budget recommendation.

Rationale/Background:

Minnesota cannot preserve and improve quality and performance of the state's transportation systems under the combined limitations of current investment levels and current lifecycle replacement practices. The consequences of underinvesting in the state's transportation system will include deterioration in service, increases in congestion, failing infrastructure and diminished ability to remain economically competitive. This is because transportation systems facilitate the efficient movement of people and goods and create the opportunity for economic development, enhanced productivity, job formation and sustainable growth. Without additional investment, the transportation system will not be able to expand to accommodate expected population and job growth. In addition, alternatives to driving alone must play a larger role in satisfying growing transportation demand - roads, transit and other transportation modes must work together as one system.

Road and Bridge Funding

The 2018 Minnesota Statewide Highway Investment Plan (MnSHIP) determined additional funding was needed for transportation, due largely to aging infrastructure and construction costs exceeding the growth of existing revenues. Overall, the department faces a \$6 billion gap in revenue over the next ten years above current fund

balance projections to fund needed investments in state road construction. Of this total gap, roughly \$4 billion is needed for preservation and modernization, and \$2 billion is needed for strategic expansion.

Without additional revenue, there will be:

- Increasing deterioration of pavement and bridges on state system. The percent of highway pavement considered in poor condition (rough driving surface) and the percent of bridge deck pavement considered in poor condition it is estimated to increase significantly in the next 20 years.
- Very little expansion to address population and economic growth
- Reductions in high priority products and service delivery

In addition, more operations and maintenance dollars are recommended, calculated at 5 percent of new Trunk Highway Fund revenues. This additional funding will be spent on snow plowing, fixing pot holes and guard rails, etc. Investing in operations and maintenance is needed due to declining asset conditions, increased snow and ice requirements, and the need for more timely maintenance.

Proposal:

Road and Bridge funding components

New revenues and bonding would be identified to help close the funding gap over the next ten years. The goal is an integrated transportation system that optimizes the movement of people and goods across the state. With new funding, we can:

- Improve asset management - preserve and modernize the existing system
- Invest in strategic mobility enhancements, including MnPASS and other intelligent transportation tools
- Complete strategic expansion on key corridors throughout the state
- Complete Main Street improvements

The benefits for Minnesotans will include:

- Reduced wear and tear on their cars
- Fewer stops at the fuel pump due to smoother roads and reduced congestion
- Fewer accidents
- More time doing what they need to do
- Reduced impacts on our environment

MnDOT has identified pavement and bridge needs as well as mobility projects that are not currently being addressed through its 10-year work plan. These unmet needs and projects will be given priority. These funds will provide for capital costs of construction as well as project development and engineering activities with contractor support, allowing the department to utilize this funding in the most efficient manner.

MnDOT proposes to utilize the increased operating appropriations for our highest-priority products and services. Some of these include:

- Snow and Ice - keeping the roads clear of snow and ice
- System Roadway Structures Maintenance – repair potholes (pavement repair)
- Bridges and Structures Inspection and Maintenance
- Intelligent transportation systems for improved safety and mobility

The Governor's proposal provides constitutionally dedicated funding increases that can be relied on over the long term and can only be used for transportation purposes. Returning auto parts and other taxes to the general fund results in the availability of funding for other state priorities.

Department of Natural Resources Funding Components

The Governor's proposal provides constitutionally dedicated funding increases that can be relied on over the long term and can only be used for transportation purposes. Returning auto parts and other taxes to the general fund results in the availability of funding for other state priorities.

The Department of Natural Resources (DNR) receives a portion of the unrefunded gasoline tax, which has supported the state's recreational motorized vehicle activities and forest roads since 1961. This funding is dedicated to the DNR with the broader goal that the unrefunded gasoline proceeds should support programs related to non-highway gasoline use.

This revenue enables additional investment in Minnesota's water recreation facilities and services. The proposal funds \$3.35 million annually for increased operations and maintenance of public water access sites and state trails (\$1.35 million) and increasing boating access site rehabilitation (\$2 million). Additionally, this proposal increases grants to local sheriff offices by \$300,000 annually to reimburse for search and rescue efforts.

This proposal also increases revenues to DNR's forest road account by \$170,000 in FY20, \$506,000 in FY21, \$670,000 in FY22, and \$705,000 in FY23. The state and counties (with a land commissioner) split this revenue 52% and 48% respectively. This increase funds additional graveling, grading, and drainage projects to maintain the state's 2,340-mile forest road network used by the forest industry, emergency responders and outdoor enthusiasts.

Transit Funding Components

Revenue from the motor vehicle sales tax is split between the HUTD (60 percent) and the Transit Assistance Fund (40 percent). The Metropolitan Council receives 90 percent of the motor vehicle sales tax revenue in the Transit Assistance Fund and MnDOT receives the remaining 10 percent for greater Minnesota transit.

Over the long-term, greater Minnesota transit revenues will increase from the proposed increased MVST rate. However, restoring the motor vehicle lease sales tax to the pre-2018 distribution levels results in a short-term reduction in revenue. To offset the decrease in revenue between FY20-23, MnDOT is amending internal accounting practices to allow additional spending of the motor vehicle lease tax revenue in the current year (current accounting practices involve carrying forward all of this revenue each year, and planning spending in the subsequent year).

Equity and Inclusion:

A safe, reliable and multimodal system of transportation is vital to ensuring equity and inclusion by connecting communities statewide. This needed funding will also provide additional contracting opportunities to certified small businesses and opportunities to work towards enterprise-wide goals of equity and inclusion.

IT Related Proposals:

N/A

Results:

Currently, Minnesota's total state gasoline taxes are 28th highest in the country, including District of Columbia. Since 2013, Minnesota has dropped from 19th highest state gasoline taxes, as a result of other states increasing their gasoline tax rate. Over a 10-year period, the inflation-adjusted tax on gasoline is projected to add an additional 28 cents to the price of a gallon of gasoline.

These investments would provide additional long-term sustainable and dedicated funding. MnDOT would plan to rehabilitate the system for the 21st century by:

- Improving an additional 1,800 miles of pavement and repair or replace an additional 300 bridges on state highways
- Accelerate progress toward the state goal of zero highway deaths with targeted installation of rumble strips, median barriers, lighting and other safety improvements. The Minnesota Toward Zero Death program has helped decrease injuries and deaths on the highway
- Keep roadside infrastructure in a state of good repair

In addition, MnDOT has operating performance measures that will be impacted by this proposal. All are anticipated to decline without additional funding; and this would reduce the decline. They include:

- Snow Plowing Performance – meet clearance targets
- Smooth Roads – percent of pavement patching addressed
- Percent of projects let in the year scheduled

Statutory Change(s):

Gasoline Tax: M.S. 296A.07 and M.S. 296A.08

Vehicle Registration Taxes: M.S. 168.013

Motor Vehicle Sales Tax: M.S. 297B.02

Motor Vehicle Lease Sales Tax: 297A.815

General Fund Transfers: M.S. 297A.94 and 297A.64

Transportation

FY 2020-21 Biennial Budget Change Item

Change Item Title: Trunk Highway Operating Pressures

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Trunk Highway Fund				
Expenditures	22,400	43,442	43,442	43,442
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	22,400	43,442	43,442	43,442
FTEs	0	0	0	0

Recommendation:

The Governor recommends a base increase in the Trunk Highway Fund operating appropriations of \$65.8 million for FY20-21 to offset a portion of the cumulative decreases in buying power due to inflation on commodity purchases, compensation cost increases including steps and insurance, and rate and volume increases in IT services.

Rationale/Background:

MnDOT purchases a significant amount of commodities each year to help deliver core products and services including fuel, salt, sand, bituminous, and utilities. While costs range significantly from year to year, over the past five years most commodities have remained relatively flat and in some cases decreased. However, over the next five years, MnDOT estimates the costs of all commodities to increase anywhere from two percent per year for electricity to six percent per year for salt and sand.

MnDOT requested funding in the FY18-19 biennial budget request to relieve operating pressures of commodity inflation and salary increases. Although the specific request was not enacted, MnDOT did receive funding increases in most trunk highway operating appropriations that were used in part to help offset increasing costs. However, the majority of this funding was one-time, and operating pressures will continue in future years. Over the past five years, compensation costs for MnDOT employees have increased an average of three percent per year, due to collectively bargained cost-of-living increases, annual step increases, and insurance cost increases.

Proposal:

The increased operating appropriations will help maintain the highest-priority products and services and necessary support functions. Some of these include:

- Snow and Ice – includes activities such anti-icing treatment before storms, snow plowing and ice removal during storms and clean-up of snow and ice after storms have passed. Snow plowing on Minnesota's 12,000 miles of roads is expensive, labor intensive, and critical.
- System Roadway Structures Maintenance – patch potholes, seal cracks, pave road surfaces, remove debris, repair or replace culverts, maintain roadway shoulders, and respond to flooding.
- Bridges and Structures Inspection and Maintenance – 4,860 state highway bridges are inspected in accordance with state and federal requirements. In addition, MnDOT performs preventive maintenance such as sealing cracks, joints and railings, spot painting, lubrication of expansion bearings, and flushing with water. Reactive maintenance is also needed when a vehicle damages a bridge or deterioration is discovered. This proposal includes a \$1 million base increase for the Bridge Office.

- Develop Highway Improvement Projects – includes activities such as scoping, environmental review, public involvement, and designing. Designing performs engineering studies and analysis, prepares construction plans, uses performance based practical design and flexible design standards to ensure road designs meet project goals while minimizing costs. This proposal includes a base increase of \$1.4 million for major projects staffing. It will provide base budget staffing levels to manage project development and construction of upcoming major projects.
- Highway Construction Management Oversight – includes managing overall progress, coordinating the early stages, and overseeing quality management, material testing, etc.

This proposal covers increasing costs of compensation including steps and insurance, and IT across the agency.

Below is a summary of the components of the request (amounts in \$1,000s):

Component (% Increase)	FY 2020	FY 2021	FY 2022	FY 2023
Compensation (~3%)	13,600	30,400	30,400	30,400
Commodities (5%)	4,000	8,200	8,200	8,200
IT Rates/Volume (5%)	2,400	2,400	2,400	2,400
Major Projects Staffing	1,400	1,442	1,484	1,530
Bridge Office	1,000	1,000	1,000	1,000
Total	22,400	43,442	43,484	43,530

Equity and Inclusion:

This proposal is not expected to impact equity or inclusion.

IT Related Proposals:

Of the total request, \$2.4 million per year is to cover the additional costs needed for IT services based on projected rates charged by MNIT and volumes of services utilized by MnDOT. In the FY20-21 Biennium, MnDOT will transition from a local to an enterprise service delivery model for workstation management (laptop/desktop computer support and refresh) and service/help desk support. Regular replacement of workstations will be included as part of the service rate, in order to ensure the security and supportability of state agency computers. The agency will also transition to the enterprise service/help desk, which provides 24/7 support to agency staff.

In addition, for the FY20-21 biennium, MnDOT's portion of MNIT administrative overhead expenses is projected to increase. MNIT overhead expenses include HR, finance, procurement, enterprise project management, and security activities. These expenses are allocated to agencies based on their total IT spend and total number of dedicated MNIT staff as of fiscal year 2017.

Results:

This funding will allow MnDOT to maintain its existing levels of service. If this funding is not received, MnDOT would be forced to reduce service levels in some areas.

Statutory Change(s):

Transportation

FY 2020-21 Biennial Budget Change Item

Change Item Title: Cyber Security and Agency Priority Initiatives

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Trunk Highway Fund				
Expenditures	2,502	1,814	498	498
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,502	1,814	498	498
FTEs	1	1	1	1

Recommendation:

The Governor recommends an increase to the Trunk Highway Fund appropriations for cyber security, risk management and protection of the state's sensitive data assets and technology investments. The request includes a \$500,000 base increase beginning in FY20 and onetime funds of \$2 million in FY20 and \$1.3 million in FY21. The total request includes \$2.5 million in FY20, \$1.8 million in FY2021, and \$500,000 ongoing.

Rationale/Background:

MnDOT seeks support for the critical technology systems that enable the agency to successfully plan, build, operate, and maintain the state's multimodal transportation system. These investments secure critical state technology and data assets while also creating opportunities for more modern and innovative technology solutions to meet our customer's needs. Investments include:

Cyber Security, Risk Management

In partnership, MnDOT and MNIT at DOT have identified a backlog of IT risk management efforts in need of base and one-time investment to bring all of MnDOT's IT systems to a consistent and reasonable level of security. The request will support needed modernization efforts designed to update MnDOT's IT systems to a fully supported state and keep already gained IT security levels consistent. This proposal includes a request for a base increase of \$300,000 and one-time increases of \$500,000 in FY20 and \$200,000 in FY21 for a total of \$1.3 million to fund a total of 3 permanent and 4 temporary full-time MNIT positions.

Agency Priority Initiatives

MnDOT's priority technology initiatives are designed to enable MnDOT to maintain technology systems critical to supporting Minnesota's multimodal transportation system.

Motor Carrier Information System – Replace an outdated, customer-facing system used for processing applications and issuing operating credentials to commercial motor carriers of property and passengers. The new system will provide a fully automated, web-based accessible system that is compatible with newer technologies, customizable, and intuitive to users. Customers will be able to enter information online at a time that is convenient for them instead of having to physically visit a MnDOT location during business hours. Customers can receive notifications when action is required on their carrier file. Carriers will be able to check status of their requests and verify if vehicles are registered and active in the system.

Oversized/Overweight Permitting System (Route Builder) – Replace outdated, customer-facing permitting and routing software used to analyze and approve routing of oversized and overweight loads on MN state highways. The new system will offer an improved customer experience, with increased accuracy, a better payment tool, improved monitoring and reporting components, and more accurate routing.

Software Asset Management – In partnership, MnDOT and MNIT at DOT designed and tested a software asset management approach that will provide a comprehensive inventory of all agency software assets, a defined structure for managing that inventory, and ongoing strategies to fully leverage existing investments in software.

This proposal requests a base increase of \$200,000 and one-time increases of \$1.5 million in FY20 and \$1.1 million FY21, for a total of \$3.0 million. Agency priority initiatives would require a mix of full time and temporary positions for this proposal, 1 MnDOT and 1 MNIT FTE.

Proposal:

MnDOT is the primary state user of “Internet of Things” (IoT) technology- physical devices that can connect to networks. Examples include dynamic overhead signs, roadway sensors, and bridge de-icing systems. Emerging technologies in connected and automated vehicles will substantially increase MnDOT’s role in maintaining these highway infrastructure assets on behalf of the State. As a result, a critical need for FY20-21 is to ensure that these systems are supported and secured to avoid potentially costly service outages.

Beyond these physical devices, MnDOT utilizes IT systems for a majority of the agency business functions. IT tools are used to determine the amount of salt to disperse in a given weather condition, to calculate funds distributed to local government, and to analyze crash and safety statistics. To ensure uninterrupted and effective operational status, MnDOT applications must be upgraded, secured, and managed. In FY2018-19, MnDOT deployed a new program to analyze current IT systems, identify out-of-date or vulnerable components, and resolve technical issues. With additional capacity, MnDOT could more quickly address these critical risks to security and business continuity.

MnDOT has identified several key customer-facing applications that are operating on outdated technology and need to be fully replaced. With these replacement projects, MnDOT will be able to offer the public a more user-friendly experience, more modern functionality and notification capabilities, and flexibility in accessing MnDOT services.

Equity and Inclusion:

IT investments provide significant opportunities to both attract skilled and diverse employees, as well as contracting with Disadvantaged Business Enterprises and Targeted Group Businesses.

IT Related Proposals:

Agency FTEs		1	1	1	1	1	1

Results:

The proposal will allow us to better protect the state from cyber-security risks through one-time and base investments. In addition, it will provide necessary enhancements for our critical IT initiatives. It is paramount as an agency that we keep pace with technology to allow us to better inform agency stakeholders, to provide a more user-friendly and mobile experience for the public, and to ensure that critical State assets are maintained.

Statutory Change(s):

N/A

Transportation

FY 2020-21 Biennial Budget Change Item

Change Item Title: Tribal Training Funding

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	311	316	316	316
Revenues	0	0	0	0
Trunk Highway Fund				
Expenditures	100	100	100	100
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	411	416	416	416
FTEs	1.5	1.5	1.5	1.5

Recommendation:

The Governor recommends fully funding the Governor's Executive Order 13-10 (directing state agencies to engage in consultation, coordination, and cooperation with tribal governments) for tribal training for state agencies. Currently, MnDOT is absorbing the majority of the cost of the training for all the agencies.

The request also includes funding for additional staff to support the activities of the tribal liaison. The success of the tribal affairs program and the tribal training have greatly expanded the demand for the tribal liaison position. The additional funding for this request would fund positions under the direction of the liaison to expand the capacity of that role.

If this funding is not appropriated it is likely that MnDOT will need to bill agencies for attending the training to recover costs that are not benefitting the trunk highways.

Rationale/Background:

Funding the proposal allows MnDOT to carry out its mission which involves adhering to Federal laws specific to Indian Country, compliance with Executive Order 13-10 and the agency's Tribal Nations Policy, and taking positive action to address priority transportation issues of mutual interest between MnDOT and tribal governments in Minnesota. This training informs employees about consultation and coordination and equips them with the knowledge and tools they need to implement such consultation.

This training won the State Government Innovation Award and is designed to educate state employees on how to more appropriately interact, communicate, and collaborate with tribes and tribal governments. This proposal will allow the training to continue without MnDOT bearing the sole cost.

Proposal:

This proposal will fund MnDOT's tribal training for other state agencies. As part of this request, the trunk highway funding will provide staff to continue to provide five, two-day sessions at tribal locations per year. Part of the funding request is also to develop on-line training to expand access to the core curriculum and develop more narrowly focused on-line courses for specific topics and individual tribes.

Equity and Inclusion:

Strengthening authentic relationships and collaboration with tribal members helps reduce disparities for tribal members within MnDOT and also helps expand the cultural competency skills necessary for working with tribal governments across the state.

IT Related Proposals:

There is not an anticipated IT impact, though there is a potential for a software license cost to develop the online training so it is compliant with the system at MMB.

Results:

This investment will increase partnership and customer engagement between the state and Tribal Nation. This can be measured by the number of attendees, the survey results, and the number of agencies that have attended. To continue providing this effective training, an appropriation would cover the cost, enabling MnDOT to continue to have more sessions and to create online e-training.

Statutory Change(s):

N/A

Transportation

FY 2020-21 Biennial Budget Change Item

Change Item Title: Aeronautics Base Budget Increase

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
State Airport Fund				
Expenditures	4,700	4,700	4,700	4,700
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	4,700	4,700	4,700	4,700
FTEs	0	0	0	0

Recommendation:

The Governor recommends an ongoing base appropriation increase of \$4.7 million per year. The base increase would include \$3.3 million for Airport Development and Assistance and \$1.4 million for Aviation Support and Service Assistance appropriations. This is a 23 percent increase in FY20-21 to the current \$15.298 million Airport Development and Assistance and \$5.231 million Aviation Support and Services Assistance appropriations.

Rationale/Background:

The state's airports allow for critical connections to destinations for people, products, and businesses of Minnesota. It is a key component of our multimodal transportation system within the state. The state's 135 airports and the aero operations currently exceed the base funding available. An increase in the base budget would assist in replacements of aging infrastructure, relieve increasing operating pressures, and support needed building costs for the Office of Aeronautics.

Aeronautics has not received a base increase in 20 years and will face organizational restructuring without additional funding. A replacement of the Office of Aeronautics' IT customer application system is critical to support the complexities of the tax structures. Additionally, the existing Aviation Support and Services building will begin to pose safety issues if needed work is not completed. This work includes modifying bathrooms to be ADA compliant.

Proposal:

Approval of this proposal will cover operational pressures, fund much needed capital improvements, improve critical systems, and allow more critical airport projects to be completed. In addition, this will increase aviation support and services for aeronautics building repairs, IT spending and aeronautics operations. MnDOT's Aeronautics Office has the statutory authority to annually set the percent of state match for federal grants. When the match can be kept at a higher percentage, the participation rates by local governments is lower. This results in a greater number of local airports being able to move forward on needed projects and a greater amount of federal dollars spent in the state. This base increase would enable MnDOT to keep state participation rates at a higher level for improvement projects at airports. This proposal would be paid from the existing State Airport Fund balance.

Equity and Inclusion:

This proposal is not expected to impact equity or inclusion.

IT Related Proposals:

This proposal includes three system improvements: aircraft registration system, capital improvement system, and DOS-based IT systems to monitor navigational systems. This will allow more airport projects, create less down-time for navigational systems, lower maintenance costs, and decrease security risks.

Category	FY 2020	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025
Payroll						
Professional/Technical Contracts						
Infrastructure						
Hardware						
Software	600,000	600,000				
Training						
Enterprise Services						
Staff costs (MNIT or agency)						
Total	600,000	600,000				
MNIT FTEs						
Agency FTEs						

Results:

As the state agency charged with overseeing aviation safety in Minnesota, we run and maintain statewide navigation systems. MnDOT's Aeronautics Office has the statutory authority to annually set the percent of state match for federal grants. This funding will allow MnDOT to keep state participation rates at a higher level for improvement projects at airports. If this funding is not approved, some navigational systems will be retired. The funding will provide a means to have more airport projects, less down-time for navigational systems and lower maintenance costs. For Aviation Support and Services, the increase will allow them to maintain existing, and in some instances, provide better service to customers.

MnDOT also distributes state funds to public airports (with the exception of the Minneapolis-Saint Paul International airport) for maintenance and operation activities, such as keeping runways free of snow and ice, equipment purchases, building utilities, and upkeep. Grants distributed to public airports for maintenance and operation activities met nearly a fourth of the funds expended to operate and maintain public airports in 2016 and 2017. Larger airports have a greater gap in reimbursements, with 29 smaller airports having all maintenance and operation needs met in 2016 and 26 airports in 2017.

State participation in airport Maintenance and Operation (M&O) expenses was capped in 2009 and has remained unchanged since, even though across the state airports have been adding needed infrastructure. One example is Owatonna-Degner Regional Airport where a new 3000 foot crosswind runway was constructed increasing the length of runway to be maintained by 50 percent. No additional state funding was provided to maintain and operate the new pavement and necessary lighting infrastructure. Due to the one-time appropriations all 135 system airports received additional M&O funds. This proposal would allow the increase to be sustained.

FTEs	33.6	33.6	33.6	33.6

Recommendation:

The Governor recommends an increase in the Trunk Highway Fund base appropriation for recruitment and retention for the Career Pathways Program, which is comprised of the Civil Engineering Internship Program, Phoenix Internship Program, Seeds Student Worker Program, Grad Engineer and Land Surveyor Program, and Retaining Our Workforce (MnROW) programs. This will also provide additional support for labor relations activities, staffing activities, and technical training to maintain existing demand and account for workload increases over the past few years for Human Resource activities that MnDOT invested in with FY18-19 funds.

Rationale/Background:

MnDOT continues to be at risk without dedicated or increased funding to fill critical positions. Retirements are on the rise, and we'll need to conduct recruitment efforts as a standard practice to become an employer of choice in a competitive market. Current resources have not kept pace with the demands for supervisory support in performance management, staffing, and training needs. Currently, the Seeds Student Worker Program and the Phoenix Internship Program receive federal reimbursement to help offset costs. MnDOT is experiencing staffing shortages and further support of these programs will help facilitate the growth needed to mitigate shortages.

Some of MnDOT's best recruitment and retention comes from workforce programs such as Civil Engineering Internship Programs, Phoenix Internship Program, Seeds Student Worker Program, Grad Engineer and Land Surveyor Program, and the MnROW program. MnDOT has had limited opportunity to utilize these programs as value has been realized in "growing our own" talent, but the needs are greater than what the current funding will provide. These have been identified as critical positions to build bench strength in the agency. MnDOT has funded these over the past biennium with one-time funds. This request will provide stable funding for these programs.

Proposal:

The funding would cover part/full-time positions within the programs, including 13 graduate engineers, 11 civil engineer internships, 10 Phoenix internships, 7 Seeds workers, and 1 full-time position to help manage the increase in these recruitment programs. The additional support positions will also assist supervisors and managers in labor relations, performance management, and training activities. This advances MnDOT's Strategic Operating Plan (SOP) of Customer Trust as MnDOT is better able to engage customers while listening and understanding the diverse balance of needs to achieve all best possible outcomes. This also advances MnDOT's SOP of Workforce Excellence as this funding will attract and retain a workforce for MnDOT to be successful and better reflect the communities we serve. Historically, these programs have a high level of success both in recruitment and retention. Together, these programs comprise a career pathway within MnDOT.

Equity and Inclusion:

The funding will provide additional recruitment opportunities to work towards enterprise-wide goals of equity and inclusion. Data illustrates that this program assists in attracting and retaining a workforce that better reflects the communities we serve. These programs are recruiting and retaining minorities, people with disabilities, females, and veterans at higher rates than our overall employee hiring and rehiring efforts are achieving.

IT Related Proposals:

N/A

Results:

MnDOT strives to focus on customer satisfaction. To that end, our workforce is the driving factor for our success in this area. This proposal advances MnDOT's SOP of customer trust as MnDOT is better able to engage customers while listening and understanding the diverse balance of needs to achieve all best possible outcomes. This proposal also advances MnDOT's SOP of Workforce Excellence as this funding will attract and retain a workforce for MnDOT to be successful and better reflect the communities we serve.

Transportation

FY 2020-21 Biennial Budget Change Item

Change Item Title: Rail Grade Crossing Safety

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Trunk Highway Fund				
Expenditures	0	0	0	0
Revenues (DPS)	(750)	(1,500)	(1,500)	(1,500)
Special Revenue Fund				
Expenditures	750	1,500	1,500	1,500
Revenues	750	1,500	1,500	1,500
Net Fiscal Impact = (Expenditures – Revenues)	750	1,500	1,500	1,500
FTEs	0	0	0	0

Recommendation:

The Governor recommends increasing the funding for the rail grade crossing safety account from \$1 million to \$2.5 million per year in response to increasing needs for rail safety improvements on the trunk highway and local road system. This will be phased in over two years: \$750,000 increase in FY20 and \$1.5 million in subsequent years. This account is derived from a portion of State Patrol fine revenues (deposited in a Department of Public Safety account), and the increase in grade crossing funding would result in an equivalent decrease in the Trunk Highway Fund.

Rationale/Background:

There is an increasing need for safety improvements at rail grade crossings. Safety improvements at highway and rail grade crossings help motorists and pedestrians make safe decisions about crossing railroad tracks. These funds will allow for a significant increase in the number of small safety projects that can be programmed and delivered rapidly, such as sign replacements, crossing closures, roadway enhancements and signal circuitry upgrades. The funds can be used at any of Minnesota's rail crossings of public roadways.

Proposal:

The fine structure will not change; the increase of \$750,000 and then \$1.5 million will result in a corresponding reduction in the amount of fines deposited in the Trunk Highway Fund. This funding source is used statewide on an as-needed basis.

Equity and Inclusion:

This proposal is not expected to impact equity or inclusion. However, this investment may provide additional contracting opportunities to certified small businesses.

IT Related Proposals:

N/A

Results:

This initiative would be measured through increases in rail safety and will be documented to provide before and after measurements.

Source: Federal Railroad Administration Office of Safety Analysis

[M.S. 299D.03 subd. 5\(a\)\(1\)](https://www.revisor.mn.gov/statutes/cite/299D.03) (<https://www.revisor.mn.gov/statutes/cite/299D.03>)

Transportation

FY 2020-21 Biennial Budget Change Item

Change Item Title: State Airplane Rate Changes

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Special Revenue Fund				
Expenditures	0	0	0	0
Revenues	202	202	202	202
Net Fiscal Impact = (Expenditures – Revenues)	(202)	(202)	(202)	(202)
FTEs	0	0	0	0

Recommendation:

The Governor recommends amending Minnesota Statutes 360.024 so that pilot salary, aircraft replacement, or aircraft leasing costs can be included in the charge for air transportation services. It would also delete the reference to “direct” operating costs in statute. There are indirect fixed costs that should be considered such as insurance and hanger lease costs. This amendment allows MnDOT a funding mechanism to replace aircraft.

Rationale/Background:

Per Minnesota Statutes 360.024, MnDOT provides air transportation services for conducting state business. Agencies pay for this service based on a rate allowable in statute. Money is placed into a revolving account and used for operating costs and maintenance. Current state law does not allow this fund to be used to replace aircraft.

The aircraft used for this service is aging. The King Air C90 is 38 years old and as aircraft age, they cost more to maintain. A 30-year old airplane can have more than double the maintenance costs of a 5-year old airplane. In addition, time spent on the ground while being maintained reduces the number of days the aircraft are available. For example, in the past year the 38 year old airplane has been in maintenance 17 percent more days than the 26 year old airplane. By age 30, aircraft typically spend nearly half their time in maintenance.

MnDOT recommends replacement of this aircraft due to age and the coming expenses. MnDOT hired Conklin and de Decker (a consultant firm) to verify our assessment, assess current usage, and make recommendations for the number and type of aircraft we should own. They recommended replacing the aircraft with a new/newer aircraft.

Proposal:

This request allows MnDOT to begin including the costs of leasing aircraft in the rate charged to those using the plane. MnDOT proposes increasing the flying rate per mile, which would raise an additional \$202,000 per year and would be used to replace the aging aircraft over time. MnDOT would finance a lease-to-own for one new aircraft and sell the King Air C90. The final aircraft type would be determined through the request for proposal and subsequent procurement process. The estimated cost of leasing a new aircraft should be no more than \$3.8 million.

Over time, the request allows MnDOT to collect revenue for the full estimated annual leasing costs of \$433,000. In addition, MnDOT would include the sale of the old aircraft to cover a portion of the leasing costs. The plane would be sold through the State of Minnesota Surplus Services process. MnDOT estimates the plane will sell for \$500,000.

There will be maintenance cost savings as a result leasing a new plane. We have not included those savings as we plan to apply the savings to maintenance on the other aircraft.

Equity and Inclusion:

Replacing the aircraft gives MnDOT a more efficient way to move around the state to build relationships and collect feedback from all corners of the state to ensure greater inclusion in MnDOT's operations.

IT Related Proposals:

N/A

Results:

As the state agency charged with overseeing aviation safety in Minnesota, we are able to fly and visits airports to monitor the condition and their compliance with State Rules and Federal Aviation Regulations. Our pilots have backgrounds as airport inspectors; we are able to interact with airport officials to resolve any existing or future concerns that the airport sponsor may have.

In addition, MnDOT Aeronautics has managed this air transportation service for decades. Air transportation saves the state money by making efficient use of staff time by offering the option to fly. For example, driving round-trip to Bemidji would require 8 hours of travel time and an overnight stay, including meal reimbursements, ultimately requiring two full business days. Flying is only two hours round-trip. Most of the state of Minnesota is within one hour fly time of the Saint Paul Downtown Airport. MnDOT uses a fly vs. drive calculator to help evaluate whether a trip is cost effective.

Transportation

FY 2020-21 Biennial Budget Change Item

Change Item Title: Connected and Automated Vehicles

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Trunk Highway Fund				
Expenditures	6,200	5,500	5,500	5,500
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	6,200	5,500	5,500	5,500
FTEs	4	4	4	4

Recommendation:

The Governor recommends an appropriation increase of \$6.2 million in FY20, and \$5.5 million in subsequent years from the trunk highway fund to advance Connected and Automated Vehicles (CAV) policy, planning, testing, and implementation. This technology has significant potential to impact safety, mobility, equity, and the Minnesota economy. Funds are needed to ensure Minnesota is prepared for this transformative technology.

CAV includes automated (potentially driverless) vehicles operating on the surface transportation system, connected vehicle sharing information with infrastructure and/or other vehicles, truck platooning, the impact of electric automated vehicles, and how automated shared mobility transportation may impact traffic operations and safety.

An initial amount of \$1 million per year in FY18-19 has been invested, and MnDOT is working to identify additional trunk highway funds to invest in this effort for FY19, but ongoing funding is necessary.

Rationale/Background:

The private industry is rapidly advancing this technology, and our current laws, policies, planning, and infrastructure need to catch up. Much of the testing and deployments are occurring in urban and warm weather climates, which do not replicate Minnesota conditions. MnDOT and other state agencies need to continue planning and utilizing these advances for our preparedness of this emerging technology. This proposal allows Minnesota to be a leader with the diverse climates of our state in regards to CAV.

By properly planning, testing, and piloting this technology, we have an opportunity to make strategic investments in our assets now, so we are ready for this technology as it evolves. In particular, this proposal could help:

- Advance CAV technology in winter weather conditions
- Develop corridors and test tracks for industry to test and validate technology
- Utilize CAV technology to improve mobility for those with transportation challenges (e.g. person with disabilities, low income, aging populations, communities of color, rural Minnesota, Tribal communities)
- Utilize CAV technology to improve the safety and operations of work zones
- Utilize CAV technology to improve bike and pedestrian safety
- Build public trust in CAV through public outreach, education and demonstrations.
- Share data between government and third parties to advance CAV applications that improve safety and mobility
- Utilize data to help manage infrastructure and operations to support CAV
- Utilize CAV technology to grow Minnesota businesses and attract new business and talent
- Strategically plan for policy, infrastructure, and operational risk

Limited or no investment may expose the State of Minnesota and MnDOT to additional infrastructure costs, decrease in public trust, and increased IT costs by reacting to the technology. There are several unknowns with this technology, such as when it will come, what exactly will it be, and in which areas the private industry will focus their priorities. This is an evolving technology that could likely create systems-wide changes not only in transportation, but in the way people live, work, and play.

Proposal:

This funding will support several CAV efforts:

- Implement the recommendations from the Governor's Advisory Council on Connected and Automated Vehicles as part of Executive Order 18-04. The recommendations include investment priorities such as: preparing our infrastructure, planning, policy, research, advancing public private partnerships, cyber security, public engagement and education, testing and deployment corridors, pilot/demonstration projects, economic and workforce development, equity, and insurance and liability. In addition, MnDOT is responsible for leading recommended policy changes at the legislature.
- Support an innovative public-private-partnership concept called the "Minnesota CAV Challenge". This allows public and private institutions to submit CAV concepts to solve our transportation challenges (e.g. improve work zone operations, improve safety, reduce transportation barriers in low-income areas, implement CAV in rural Minnesota, data sharing, planning, policy, and building public trust in CAV).
- Implement recommendations from MnDOT's CAV Strategic Plan (to be completed in spring 2019). This Strategic Plan will identify specific capital investment strategies, long-term planning, staffing, IT, public outreach, communications, regulatory impacts, operations and infrastructure needs specific to MnDOT.
- Fund the Office of Connected and Automated Vehicles (CAV-X) staff to implement CAV programming and projects.
- Fund connected vehicle technology advancement, including testing and deployment of this technology on signal systems, fleet vehicles, and other roadway elements to improve safety and traffic flow.
- Implement cyber security and data privacy measures to collect and share data between vehicles, infrastructure, and private partners.
- Provide opportunities for public input, public education, and public demonstration and testing projects.

Funding would also be used to complete operational and infrastructure efforts from the Traffic Incident Management and Operations (TSMO) plan.

Equity and Inclusion:

Persons with disabilities, aging population, tribal nations, and other groups with current transportation challenges will be impacted by this technology. MnDOT CAV-X staff has done extensive outreach to these groups. Persons with disabilities strongly support the rapid deployment of these technologies to provide more job opportunities and personal freedom options. Other groups with transportation challenges want to make sure Minnesota is proactive, so this technology does not increase transportation barriers. They have also requested more opportunities to learn about the technology through public demonstrations and education.

With proper planning, this technology has the potential to benefit groups experiencing transportation barriers. This includes creating regulation that supports safe development and testing, and ensuring that the applications are used properly to benefit Minnesota residents and businesses. Failure to implement proactive policies could have an adverse effect, by having CAV applications that only benefit a few.

As stated above, there could be positive or negative impacts. For example, automated vehicles could provide more transportation options (e.g., bring unemployed and persons with disabilities to job markets and more access to education, health care and other items to improve quality of life). Automated vehicles can also greatly reduce the number of traffic related deaths and serious injury by minimizing human error in driving. However, the

technology could create additional transportation barriers if not everyone has access to the technology, or the technology costs become prohibitive for low income homes.

The private industry is going to continue developing this technology at a rapid pace. Ongoing funding is required to keep pace with the advancements in technology.

Category	FY 2020	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025
Payroll						
Professional/Technical Contracts						
Infrastructure						
Hardware	\$100	\$100	\$100	\$100		
Software	\$250	\$250	\$250	\$250		
Training						
Enterprise Services	\$25	\$25	\$25	\$25		
Staff costs (MNIT or agency)						
Total	\$375	\$375	375	\$375		
MNIT FTEs						
Agency FTEs						

Results:

During the implementation phases, we will measure success by implementing the action items within the Governor's Advisory Council report and MnDOT CAV Strategic Plan recommendations.

Once the technology is deployed and connected and automated vehicles reach a statistically significant market penetration rate, we can measure success in the reduction of traffic related fatalities and serious injuries and congestion management.

Statutory Change(s):

Not applicable.

Transportation

FY 2020-21 Biennial Budget Change Item

Change Item Title: Salt Solutions and Sustainability

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Trunk Highway Fund				
Expenditures	5,110	5,065	3,070	1,576
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	5,110	5,065	3,070	1,576
FTEs	4	4	4	4

Recommendation:

The Governor recommends Trunk Highway funding to address sustainability efforts the agency is prioritizing. A significant portion of this request is to invest in strategies that result in less salt use for snow and ice activities, saving money and limiting the impact salt has on the environment, while still effectively minimizing snow and ice on the roads Minnesotans travel. Funding would also be used for sustainability strategies that reduce the environmental impact of other agency functions, including investing in telematics systems and equipping MnDOT's fleet with equipment that tracks data to help the agency reduce fuel use, save money, and achieve sustainability goals.

On average, MnDOT spends approximately \$75 million on snow and ice management activities. Of this amount, a portion is allocated for various activities, materials, and equipment that reduces the amount of salt used to manage snow and ice.

Rationale/Background:

MnDOT is required to take actions to conserve energy and water, reduce waste, lower transportation energy use, save money, and reduce emissions. In response, MnDOT continues to develop and adopt targeted strategies to make progress in all these areas.

MnDOT is a national leader in winter maintenance. The agency continues to find and apply new methods of intelligent chemical applications to meet public and economic demands for safe winter driving, while striving to limit environmental impacts. Salt used during snow and ice activities is toxic to the environment and MnDOT continues to build on past success in reducing the chlorides that leave the roadway and enter the environment.

In addition, MnDOT's fleet consists of a variety of vehicles that perform maintenance, snow plowing, delivery, and various employee duties across the state. By installing telematics systems, the agency can track vehicle engine performance, route selection, and provide other data to increase the efficiency of MnDOT operations. One example is that telematics can support new efforts to reduce unnecessary vehicle idling to avoid wasting fuel. MnDOT is implementing a new anti-idling policy and this funding will provide the tools to track this data and support implementation of the policy.

Proposal:

Sustainability at MnDOT means reducing environmental impacts and being more efficient. Best practices are always improving and resources are required to keep up with the technology and opportunities that enhance MnDOT's ability to sustain the current level of service without compromising the environment, including:

Road Surface Liquid Deicing & Chemical Storage & Equipment (One-time request): Salt and liquid deicers/anti-icers are the most commonly used in snow fighting due to their quick action, economic cost, and ease of use. Having multiple chemicals, larger storage units and the proper equipment, such as slurry systems, located throughout the state will allow MnDOT District personnel to choose the proper chemical for each individual, unique event. The result is that less salt is spread, minimizing environmental impacts.

The use of liquid deicers can help reduce the effect on Minnesota's natural environment and water quality. For instance, the process of spraying deicing salt with a solution of liquid chemical before spreading the salt on the roadway helps the salt work more effectively by keeping more of the chemical on the road surface and by activating the chemical more quickly.

Data Driven Decisions (Base request): Data driven decisions are made daily in snow and ice operations and data provides confidence when making decisions in the field in real time scenarios and helps supervisors make informed decisions. MnDOT has been using Maintenance Decision Support System (MDSS) for many years. MnDOT has made great strides in applying MDSS data to all areas of maintenance. The system provides real-time weather, road conditions and maintenance information to supervisors and snowplow operators to help them make decisions about salt, sand, and chemical use.

However, there are areas that need improvements. For instance, enhancements to the system's front end would include improving reporting opportunities for operators, supervisors, and managers. Near real time reporting of field data would help decision maker's correct behavior and actions of operators in a real time setting.

Operations Support/Technology/GIS (Base request): MnDOT is continually moving forward with new technology to track and implement best practices with infrastructure inventories, system size tracking and salt sustainability initiatives. These systems rely on Transportation Asset Management System (TAMS) and Geographic Information System (GIS) mapping technologies to assure data is accurately collected, maintained, analyzed, and reported. This proposal would also include additional MnDOT employee to assist with the support, training, and maintenance of technology systems vital to maintenance operations.

Road and Weather Information System (RWIS) (One-time request): MnDOT proposes adding an additional 62 RWIS sites throughout the state. RWIS is an automated information system that collects, processes, and distributes current and forecasted weather and road surface information. RWIS sites are located on the right-of-way next to the highway and have sensors imbedded in the pavement. They collect road surface and atmospheric information, including air and pavement temperatures, relative humidity, wind speed/direction, subsurface temperatures, and depth of precipitation and salt concentration on the roadway. This information is used by operators and supervisors to aid in determining what material to use, when to use it, and at what rate. The end result is faster and more efficient response to keep Minnesotans moving safely.

Telematics (Base request): MnDOT proposes equipping light duty fleet vehicles with telematics devices to gather data for sustainability and fuel reduction guidelines. Installing this technology allows MnDOT to evaluate a vehicle's engine performance, fuel consumption, and other parameters.

Chief Sustainability Office (Base request): Funding would support staff to continue to measure, track, and report benefits and costs of agency sustainability efforts to save money and reduce agency environmental impacts. The work supports effort in each functional area within the agency's organization structure and strategies that support agency compliance with state law and executive direction.

Equity and Inclusion:

Equity is a key component of a sustainability and efforts to promote equity and inclusion will have an important role in the Chief Sustainability Office.

IT Related Proposals:

There is not an anticipated IT impact, though there is a potential cost related to equipping MnDOT staff and the vehicles they operate with the necessary tools and technology to implement the sustainability strategies discussed in this proposal.

Results:

MnDOT has set a five year goal of reducing the amount of salt used in snow and ice activities. As illustrated in the graph below, overall, salt usage has been declining. There are several factors that influence the amount of salt used, including wind speed, gusts and direction, and precipitation type, duration, and amount. Due to salt's reduced effectiveness at low temperatures salt use and winter severity do not correlate.

MnDOT is working toward meeting the salt use recommendation of the MDSS. MnDOT is working to reduce salt usage to within 10 percent of the recommended MDSS usage. While MnDOT has moved toward MDSS recommendations, MDSS testing and analysis suggests that salt use still exceeds the level recommended by MDSS (incomplete data may contribute to the significant decrease between 2015-16 and 2016-17).

Statutory Change(s):

N/A

Transportation

FY 2020-21 Biennial Budget Change Item

Change Item Title: Pavement Preservation

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Trunk Highway Fund				
Expenditures	10,000	10,000	10,000	10,000
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	10,000	10,000	10,000	10,000
FTEs	0	0	0	0

Recommendation:

The Governor recommends a base increase of \$10 million from the Trunk Highway Fund to provide additional funding for pavement preservation, allowing the agency to strategically plan repairs and utilize durable pavement preservation techniques.

Expenditures for pavement preservation were \$50 million in FY17 and \$51 million in FY18. Past legislative sessions have provided one-time funding, including \$10 million in FY14 and \$2 million in FY15.

Rationale/Background:

Overall, MnDOT expects that the miles of pavement in poor condition will increase significantly by the end of the 20-year planning period. Pavement condition is expected to decline due to two key factors: limited funding and the age of Minnesota's roadways, many of which were constructed more than 40-years ago and require more expensive fixes. This trend requires an increase in preventive pavement maintenance. Durable pavement preservation techniques are used for preventive pavement surface treatment repairs to positively impact customer satisfaction through smoother rides and extended pavement life.

Proposal:

A base increase dedicated to pavement preservation will allow MnDOT to conduct more preventive pavement maintenance. The funding will be dedicated for equipment and materials to conduct work across the state road system. Due to recent innovative efforts, MnDOT has successfully implemented other techniques to provide longer lasting durable pavements as a cost-effective way of keeping roads in good condition. Applying these treatments before roads deteriorate not only provides the traveling public with roads in better condition, but also reduces overall life-cycle costs. Examples of these longer lasting pavement preservation techniques are: mastic patching, micro-surfacing, and slurry seals.

Equity and Inclusion:

This proposal is not expected to impact equity or inclusion.

IT Related Proposals:

N/A

Results:

Pavement condition is measured by the percent of miles of highway in poor condition. The system condition is projected to be declining after 2018.

Statutory Change(s):

N/A

Transportation

FY 2020-21 Biennial Budget Change Item

Change Item Title: Safety Culture

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Trunk Highway Fund				
Expenditures	1,335	650	650	650
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,335	650	650	650
FTEs	3	3	3	3

Recommendation:

The Governor recommends a Trunk Highway Fund base appropriation increase of \$650,000 starting in FY20. This funding request includes \$685,000 in one time funding in FY20.

Rationale/Background:

MnDOT highly values its employees, their personal safety, and the safety of the traveling public. Safety is a core value of MnDOT and therefore, additional investments in safety are needed to lower our injury/accident rates. These investments will provide dedicated and additional safety professionals to properly train, equip, monitor, and protect MnDOT employees and ultimately, the traveling public.

Proposal:

This request would include two trainers and a data analyst. They would provide safety compliance training throughout the districts. The training will include data and information that emphasize the need to work safe, provide information on how to remain safe, and help celebrate this success. This will reduce injury and accident rates with a direct impact on our claim rates and improving the work environment for all employees. Accurate and real time data is also needed to forecast where our resources would be best utilized. The balance of the request is needed for training, equipment, and tools to manage the safety program and achieve outcomes that align with the Strategic Operating Plan.

Equity and Inclusion:

This proposal is not expected to impact equity or inclusion.

IT Related Proposals:

N/A

Results:

MnDOT has set a self-imposed goal of reducing OSHA recordable injuries by 25 percent. Additional investments in training and equipment will provide the organizational structure and programming needed to reach that goal. In meeting the goal, the number of personal injury and property (damage to equipment) claims will be reduced and productivity will increase. Furthermore, MnDOT will have an engaged and healthy workforce that provides high levels of service to the traveling public.

Statutory Change(s):

N/A

Transportation

FY 2020-21 Biennial Budget Change Item

Change Item Title: Road Equipment Fund

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Trunk Highway Fund				
Expenditures	10,000	10,000	10,000	10,000
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	10,000	10,000	10,000	10,000
FTEs	0	0	0	0

Recommendation:

The Governor recommends a base increase of \$10 million in the Trunk Highway Fund for an enhanced fleet replacement plan. The goal is to meet the performance measure target of 90 percent of our fleet within lifecycle. Currently, the agency allocates \$20 million from the Trunk Highway Fund. This amount falls short of covering actual need and meeting lifecycle targets.

Rationale/Background:

MnDOT's operations and maintenance activities are dependent on a large fleet of equipment with varying lifecycles. Road equipment funding is not able to keep up with the need to replace fleet equipment at the end of their economic lifecycle. This results in a severe backlog on equipment replacements. For instance, MnDOT currently has 181 plow trucks out of lifecycle, based on a 14 year standard with a replacement value of approximately \$40 Million. The 14 year cycle is based on funding and a commitment to build 57 plow trucks annually. Increased funding of equipment will allow for an enhanced fleet replacement plan, with equipment being replaced at or near their scheduled retirement dates.

Equipment past its lifecycle is more expensive to keep operational and therefore less productive. MnDOT has been unable to meet its performance measure target of having 90 percent of its fleet within lifecycle since its inception in 2002. Currently 27 percent of MnDOT's fleet (3,000 units) is past its established lifecycle. The estimated value of replacing these units is approximately \$100 million.

Proposal:

MnDOT proposes increasing the current level of funding to eliminate the existing fleet equipment lifecycle gap. This request will allow MnDOT to replace equipment on schedule, reducing equipment repair costs, unscheduled downtime, and the need for reserve equipment. Current road equipment fleet replacement value is over \$500 million. The current budget only allows for the replacement of less than 4 percent annually.

Equity and Inclusion:

MnDOT makes every effort to purchase fleet equipment from as diverse a group of vendors as possible. Increasing the purchasing levels can open up additional opportunities for targeted vendors to participate in this process.

IT Related Proposals:

N/A

Results:

MnDOT has several internal fleet performance metrics that it uses to manage its fleet. This follows with established recommendations for state DOTs nationally. One of those metrics is the measurement of the percentage of fleet within established lifecycle standards.

Statutory Change(s):

Expenditures	13,280	18,700	10,000	10,000
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	13,280	18,700	10,000	10,000
FTEs	6	6	3	3

Recommendation:

The Governor recommends a base increase to the Trunk Highway Fund for the Building Services appropriation to maintain the critical statewide facilities that support department operations. The direct appropriation amount was \$28.531 million in FY18 and \$29.385 million in FY19 from the Trunk Highway Fund and \$54,000 from the General Fund in each of these years. Aside from this, larger building projects (typically over \$2 million) are funded by Trunk Highway Bond authorizations in the legislative session.

Rationale/Background:

Many of MnDOT's facilities have already reached the end of their useful life and many more will follow in the next 20 years. This proposal is intended to provide MnDOT staff and visiting public with facilities designed for modern equipment and technology that continues to ensure a safe and secure environment for all. Investing in MnDOT facilities will result in safe and accessible workplaces for MnDOT staff, with increased efficiencies and lower costs.

Each year, construction costs increase due to rising costs for labor, materials, equipment, and other factors. Although the appropriation has increased in recent years, the current funding allocation is inadequate to address the current needs, which will only increase as the building stock ages and costs rise.

Proposal:

Facilities Maintenance Program (FMP):

FMP funds are distributed to offices and districts with buildings for maintenance. Increased funding for the FMP would enable MnDOT to upgrade its current buildings to an acceptable level. MnDOT recently updated its statewide Facility Condition Assessment (FCA). This initiative, directed by the Department of Administration, is a formal and comprehensive analysis of all MnDOT facilities which is updated every three years on a rolling basis. In the most current assessment, 263 MnDOT buildings are rated fair, 58 are rated poor, and 19 have a rating of crisis/emergency – meaning they are considered unsafe to use and require major repair or replacement to restore function. The FCA data also revealed that MnDOT has significantly underfunded building maintenance, resulting in a considerable deferred maintenance backlog. FMP funding is for projects less than \$2 million.

Small Capital Program:

As part of its mission to provide service to the traveling public across the state, MnDOT owns and maintains nearly 1,075 buildings (of which 187 are radio equipment shelters) at 269 sites. This includes more than 150 truck stations and regional offices in addition to many storage buildings for salt, materials, and equipment. Small Capital Program funding is for projects over \$2 million. Additional funding for MnDOT's small capital building projects would improve our ability to plan projects across years and take advantage of better letting times to improve bids.

The goal of these programs is to put the MnDOT building replacement program on a 50-year lifecycle; the typical lifecycle of an industrial/commercial building. In addition, the building construction program will focus on the entire facility campus instead of singular building replacements. This work complements and enhances the building services construction program planning that is already occurring. Additionally the increase in maintenance funds will help to keep the current buildings at an acceptable level.

The Department of Administration and the State Designer Selection Board assist MnDOT in replacing outdated and obsolete MnDOT buildings. MnDOT currently has delegated purchasing authority for projects up to a bid amount of \$2 million to the Department of Administration. The current cost of one MnDOT truck stations is now approaching this delegated authority, and as result the Department of Administration will be required to assist MnDOT on more projects.

Land Acquisition:

Create a readily accessible base funding source for land acquisition to support the additional projects identified in the 10-year Capital Facilities Investment Plan (CFIP). The CFIP provides the framework for project delivery for the next four years. Land acquisition is a priority when a capital building project is programmed. Acquisition activities are needed at least four years in advance to meet building delivery schedules (scoping, design selection board process, legislative design & construction funding requests, construction phase). Current funding sources cannot sustain land acquisition costs due to the demand for capital improvement and preservation maintenance projects.

Security Upgrades to Facilities:

Safety and security is a priority for the agency and this funding ensures upgrades are realized at facilities state-wide. Facility upgrades are based on security assessments showing that current configurations have associated risks. Upgrades to MnDOT's Central Office built in 1957, at 395 John Ireland Boulevard, include; securing entry points from unauthorized access, limiting lobby elevators to staff and authorized associates, and installing bullet resistant and tinted windows. In addition, current assessments are being completed to analyze and determine security enhancement at other MnDOT facilities throughout the state.

Other Building Enhancements:

MnDOT is focused on optimizing facilities to meet the needs of a mobile workforce. Projects would provide employees with the space they need to be efficient, deliver modern and appropriate infrastructure for staff, and create spaces that improves inclusivity to all workers. Alternatives, such as renting separate facilities, have been evaluated and far surpass the cost of these office space enhancements. Other building enhancements and accommodations would include truck station pavement, roofing, ADA compliance, single user restrooms, and lactation or quiet rooms.

The Building Services program is delivered by a staff of architects, engineers, planners, and technicians. An increase in the construction program will require approximately three new FTEs or a combination of FTEs and consultants to manage scoping, design, bidding, and construction. In addition, three FTEs for FY20-21 would be required to manage and oversee the proposed security and building enhancement projects.

Equity and Inclusion:

In addition to complying with the Americans with Disabilities Act, this will provide better accessibility for MnDOT employees and the general public. Investments in MnDOT's building program will provide additional contracting opportunities to certified small businesses.

IT Related Proposals:

N/A

Results:

Benefits will be directly measured by improved scores on the periodic FCA and a subsequent decrease in the estimated value of deferred maintenance. Deferred maintenance is the total of essential, but unfunded, facilities maintenance work necessary to bring facilities and collateral equipment to the required acceptable facilities maintenance standards. This is the total work that should be accomplished in order to maintain the facilities but cannot be achieved within available resources.

The Facility Condition Index (FCI) is a ratio comparing the total deferred maintenance for a building to its estimated replacement value. The current replacement value of all MnDOT buildings is approximately \$1.27 billion and the FCA algorithmically derived deferred maintenance is approximately \$186 million. The average condition of all buildings in the MnDOT portfolio is “fair” on the tiered condition scale. The goal is to make strategic investments to improve the portfolio average, and then continue to apply necessary resources to maintain them at that level.

The graph below indicates, many of our buildings have already exceeded their expected service life of 50 years. Currently, 22 MnDOT truck stations exceed that number. In the next 20 years 49 more truck stations will be 50 years old. In certain locations, replacement of a facility is warranted functional obsolescence to accommodate snow fighting equipment. 20 MnDOT facilities are now too small to safely accommodate the plow trucks they must house.

Transportation

FY 2020-21 Biennial Budget Change Item

Change Item Title: Strategic IT Initiatives

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Trunk Highway Funds				
Expenditures	1,585	1,593	1,593	1,593
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,585	1,593	1,593	1,593
FTEs	8	8	8	8

Recommendation:

The Governor recommends an increase to the Trunk Highway Fund appropriations for engineering application and technology rapid response support to deliver technology investments to the state's customers. The request includes an approximate \$1.6 million base increase beginning in FY2020.

Rationale/Background:

MnDOT's priority technology initiatives are designed to enable MnDOT to implement new, modern, and supported technology systems critical to supporting Minnesota's multimodal transportation system. These investments create opportunities for more modern and innovative technology solutions for a more efficient transportation system.

Engineering Application Support – Provide expert support and guidance for critical engineering and construction specific technical software. Increased program capacity will enable business coordination and analysis of future 3D implementation and related computer-aided design and drafting standards, policies, and development. MnDOT will move from traditional document-based project delivery and asset management to a system based upon leveraging data. This initiative and related technology will advance MnDOT's ability to collaborate with industry partners and other governmental entities.

Technology Rapid Response Support – In partnership, MnDOT and MNIT at DOT are seeking to improve MnDOT's ability to address new technology needs and leverage emerging technology opportunities with a nimble and responsive IT review team. MnDOT employees are continually identifying opportunities to partner with private industry to implement enhanced tools and systems, however MnDOT must ensure due diligence with the State's data, technology, and cybersecurity standards. MnDOT's ability to innovate, modernize, and respond to opportunities is dependent on the agency's capacity to perform critical technical and security analyses.

Proposal:

MnDOT is striving to identify, develop, and implement innovative ways of delivering products and services to the state's customers. To achieve this goal, MnDOT is proposing support for critical advancements in engineering design technology, upgraded technology management and compliance, and increased capacity to explore and launch new innovations to serve MnDOT's constituents.

Equity and Inclusion:

IT investments provide significant opportunities to both attract skilled and diverse employees, as well as contracting with Disadvantaged Business Enterprises and Targeted Group Businesses.

Agency FTEs	8	8	8	8	8	8

Results:

With this proposal, MnDOT would have increased capacity to fully leverage new and emerging technology, ensuring efficient and modern transportation development and delivery. Specifically, this proposal will advance MnDOT's engineering and construction technology to create increased opportunities for industry collaboration and data-driven decision making.

Statutory Change(s):

N/A

Transportation

FY 2020-21 Biennial Budget Change Item

Change Item Title: Snow and Ice Contingency

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Trunk Highway Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends amending the snow and ice appropriation contingency statute to allow access to the contingency when 100 percent of the spending target is reached for direct snow and ice management costs, instead of 110 percent. The statute would also be amended to make the contingency apply to each fiscal year instead of the biennium.

Rationale/Background:

MnDOT received new statutory language in 2017 (M.S. 174.57) which authorized MnDOT to spend unappropriated Trunk Highway Fund balances on snow and ice activities in any fiscal year where snow and ice spending exceeds 110 percent of the biennial budget for snow and ice activities. This contingency language allows for MnDOT to spend additional resources on snow and ice during harsh winters, without having to reduce spring and summer maintenance activities or request additional funding from the Legislature.

Since the contingency spending cannot be triggered until the biennial target is met, the language provides no help in the first year of a biennium if it's an expensive winter. Also, requiring MnDOT to exceed 110 percent of the target requires MnDOT to identify and reserve that 10 percent portion from other activities, which is counter to the intent of the legislation.

Proposal:

The proposal would amend statute so that the contingency language would be based on each fiscal year rather than the biennium. It would make the fund balance available when spending exceeds 100 percent of the target, so that MnDOT would not have to identify the additional 10 percent each year.

Equity and Inclusion:

This proposal is not expected to impact equity or inclusion.

IT Related Proposals:

N/A

Results:

Amending this statute will allow MnDOT as an agency to better plan maintenance activities that are currently dependent upon the severity of the winter. The agency will have the option to draw from the unappropriated fund balance to fund amounts that cannot be covered from the existing budget. With the ability to utilize the unappropriated fund balance, the agency could continue to plan for maintenance work in the spring and summer

by ordering needed materials and getting staff on board to be ready when the season arrives. This will provide a more constant source of funding for all MnDOT's services, allow better planning, allow the timely purchase of materials and equipment to gain better price points and maintain a constant staffing complement.

To assess plowing performance, MnDOT evaluates each snow plow route after each snowstorm. The goal is to return the road to an acceptable driving condition in a prescribed amount of time ("time to bare lane"). The target time varies by the amount of traffic on the road. MnDOT's goal is to meet the plowing target for each roadway 70 percent of the time in a season. MnDOT has met this goal in nine of the last ten seasons (FY 2009 was 67 percent). Winter weather severity varies significantly from year to year and from region to region.

Statutory Change(s):

[M.S. 174.57](https://www.revisor.mn.gov/statutes/cite/174.57) (<https://www.revisor.mn.gov/statutes/cite/174.57>)

Transportation

FY 2020-21 Biennial Budget Change Item

Change Item Title: Utility Relocation

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends revising M.S. 161.46, Subd. 2, so that utilities on Interstate right-of-way must be relocated at the utility company's expense. This would only apply to utilities placed after passage of this change, grandfathering in all existing utilities. The expectation is that no benefit to the Trunk Highway Fund would occur until after the forecast period.

Rationale/Background:

When the Interstates were first being constructed it was not uncommon to encounter utilities already located within the proposed right-of-way. This requirement continues to apply, even when utilities are placed within existing Interstate right-of-way with the understanding that they may be required to move in the future.

Proposal:

This proposal would no longer require the state pay for utilities relocation when the relocation is necessary due to a construction project within the right-of-way where the utility facility is located. The number of permits to locate within the right-of-way is increasing. Compared to 2011, the number of permits tripled in 2017, approximately 110.

Equity and Inclusion:

This proposal is not expected to impact equity or inclusion.

IT Related Proposals:

N/A

Results:

This change in statute and practice would result in more dollars available for highways and bridges. Since this would only apply to utilities placed after the passage of this change, we assume no relocations will be required during the budget timeframe, so no cost savings would occur.

The cost of the current approach can be significant. On the Hwy 169/I-494 project, utility relocations added up to about 10 percent of the project costs (about \$14 million). In the last 14 years, it has averaged approximately \$4.2 million per year.

Statutory Change(s):

M.S. 161.46, subd. 2

Transportation

FY 2020-21 Biennial Budget Change Item

Change Item Title: Drone Enforcement and Regulation

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
State Airport Fund				
Expenditures	0	0	0	0
Revenues	(26)	(32)	(41)	(51)
Net Fiscal Impact = (Expenditures – Revenues)	(26)	(32)	(41)	(51)
FTEs	0	0	0	0

Recommendation:

The Governor recommends creating new provisions in law related to unmanned aircraft systems (drones). One relates to a change in fees by reducing the registration fee for small drones from \$100 to \$25 annually. It is anticipated this will result in a large increase in the number of drones registered, which will result in greater compliance with state statutes.

Rationale/Background:

There is substantial non-compliance with existing drone registration requirements. The Federal Aviation Administration (FAA) registration database has 2,558 non-hobbyist drones registered to Minnesota addresses, but the MnDOT database has only 574 drones registered. The state registration structure imposes a minimum annual registration fee of \$100. Although this may be appropriate for manned aircraft, as even the least expensive new aircraft cost tens of thousands of dollars, some commercial operators are using drones with retail prices of as little as \$600. Additionally, some commercial operators report not registering portions of their fleet and not using those aircraft in Minnesota to avoid registration fees.

While manned aircraft benefit from the investment of MnDOT in airports and navigational aids, operators of small unmanned aircraft do not operate from airports or use the navigational aids funded by MnDOT. Reducing the registration fee better reflects the investment of MnDOT into supporting the drone community. This proposal only decreases the registration fee for small drones (those between 0.55 and 55 pounds) since it is expected the larger drones of the future will use more of the existing aviation infrastructure.

Increased compliance with registration requirements will allow the agency to better understand how drones are being used in Minnesota. Having an accurate database of drone operators would allow MnDOT to disseminate safety critical information to drone operators when necessary. Overall, these regulations will help to ensure aviation safety.

This proposal seeks to harmonize state and federal aviation law, and reduce barriers to commercial operation of drones in Minnesota. Current statute imposes requirements on drone operators that were developed for manned aircraft. This can interfere with the implementation of drone technology. Although Minnesota is 15th in the nation in the number of manned aircraft pilots, Minnesota is 40th in the ratio of remote pilots to manned pilots, which suggests that Minnesota is lagging in adoption of this new technology.

Proposal:

The portion of the proposal related to fees would make minor edits to Minnesota Statutes Chapter 360 to more explicitly allow MnDOT to regulate use of drones through aircraft registration and commercial operator licensing. It will also allow commercial drone operators to use on-demand insurance to meet the insurance requirements of M.S. 360.59. One of the changes would require small drones to be registered for a fee of \$25. Currently, a drone is considered an aircraft and subject to, typically, an annual \$100 registration fee. An estimated decreased revenue has been calculated by utilizing FAA estimates of drone growth, and a very rough estimate of the increased percentage of drones to be registered in Minnesota (growing from about 20 percent currently to 60 percent).

Equity and Inclusion:

This proposal is not expected to impact equity or inclusion.

IT Related Proposals:

N/A

Results:

For the fee portion of the changes, increased compliance would be indicated by an increase in the ratio of the number drones registered with the state of Minnesota to the number of non-hobbyist drones registered with the FAA using Minnesota addresses. Overall, reduction of barriers to commercial drone operation would be indicated by a shift in the ratio of remote pilots to manned aircraft pilots.

Statutory Change(s):

The fee change would be in M.S.360.55; other M.S. 360 changes are also proposed.

Transportation

FY 2020-21 Biennial Budget Change Item

Change Item Title: Capital Investment Bill Debt Service

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
<i>Debt Service – GO Bonds</i>	15,954	58,199	65,064	61,677
<i>Debt Service – Appropriation Bonds</i>	0	0	0	4,800
<i>Cash-Financed Projects</i>	1,920	0	0	0
Expenditures	17,784	58,199	65,064	66,477
Trunk Highway Fund				
Expenditures	1,272	5,119	7,944	8,504
Net Fiscal Impact = (Expenditures – Revenues)	19,146	63,318	73,008	74,981
FTEs	0	0	0	0

Request:

The Governor recommends \$82.464 million in FY 2020-2021 to support his 2019 capital budget recommendations. Of this total:

- \$76.073 million is from the general fund to pay for cash-financed projects and debt service on \$1.018 billion in general obligation bonds and \$120 million in appropriation bonds.
- \$6.391 million is from the trunk highway fund for debt service on \$92 million in trunk highway bonds.

Rationale/Background:

The Governor recommended a total of \$1.27 billion in capital projects. Both general fund cash and debt service are needed to finance these projects.

Proposal:

More information about the Governor's 2019 capital budget recommendations can be found in the "Current Capital Budget" section of MMB's website.

Equity and Inclusion:

The Governor's 2019 capital budget includes 73 individual projects. Of those, 37 are statutory programs that impact projects across the state, 20 projects are located in the metro-area, and 16 projects are located in greater Minnesota.

Results:

This recommendation will allow the state to meet its financial obligations with respect to debt service and the financing of capital projects.

Transportation

FY 2020-21 Biennial Budget Change Item

Change Item Title: Passenger Rail Appropriation Reduction

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	(81)	(81)	(81)	(81)
Revenues	0	0	0	0
Other Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	(81)	(81)	(81)	(81)
FTEs	(0.5)	(0.5)	(0.5)	(0.5)

Recommendation:

The Governor recommends decreasing the MnDOT Passenger Rail general fund appropriation by \$81,000 each year. This would result in a decrease in compensation, approximately 0.5 FTEs.

Rationale/Background:

Passenger rail works in partnership with local governments and regional rail authorities, neighboring state Departments of Transportation, community groups and corridor advocates to deliver passenger rail services that are federally compliant, environmentally friendly and sustainable to connect Minnesota with the national passenger rail system. Currently, staff is working on the development of priority passenger rail corridor projects identified in the Statewide Freight and Passenger Rail Plan, specifically the Twin Cities to Duluth (Northern Lights Express or NLX) and the second train between the Twin Cities and Chicago. Corridor development activities include environmental review, preliminary engineering, and design.

Proposal:

Currently the MnDOT Passenger Rail Office base budget is sufficient for 2.5 FTEs and related needs. This proposal would eliminate 0.5 FTEs from the budget.

Equity and Inclusion:

This proposal is not expected to impact equity or inclusion.

IT Related Proposals:

N/A

Results:

The resulting change in General Funds is expected to be minimal. The two existing FTEs would continue to perform planning and development activities for the priority projects identified in the Statewide Freight and Passenger Rail Plan. However, if additional funding was provided for these projects in the future, the reduction may limit or delay services required in planning, developing and overseeing these passenger rail corridors.

Statutory Change(s):

N/A

Transportation

FY 2020-21 Biennial Budget Change Item

Change Item Title: Impact on Transportation Funds for DPS Funding Recommendations

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Highway User Tax Distribution				
Expenditures (DPS)	5,831	5,772	5,772	5,772
Transfer Out (MnDOT)	(5,831)	(5,772)	(5,772)	(5,772)
Trunk Highway				
Expenditures	0	0	0	0
Transfer In	(3,434)	(3,399)	(3,399)	(3,399)
County State Aid Highway				
Expenditures	(1,898)	(1,879)	(1,879)	(1,879)
Transfer In	(1,898)	(1,879)	(1,879)	(1,879)
Municipal State Aid Street				
Expenditures	(499)	(494)	(494)	(494)
Transfer In	(499)	(494)	(494)	(494)
Net Fiscal Impact (MnDOT) = (Expenditures – Revenues)	(3,434)	(3,399)	(3,399)	(3,399)
FTEs	0	0	0	0

Recommendation:

The Governor recommends an \$11.6 million appropriation increase in the Highway User Tax Distribution (HUTD) Funds in FY20-21 for multiple Department of Public Safety (DPS) transportation related change items.

Rationale/Background:

Per the Minnesota State Constitution, Article XIV and Minnesota Statutes 161.081, transportation tax revenues are deposited in the HUTD Fund. From there, HUTD Fund revenues are allocated to the Trunk Highway (TH), County State Aid Highway (CSAH), and Municipal State Aid Street (MSAS) Funds. These transfers are allocated after reducing the available revenues for appropriations for Departments of Revenue and Public Safety. As a result of the proposed HUTD funding increases for DPS, the corresponding transfers to the TH, CSAH, and MSAS Funds would be proportionally reduced at the following percentages:

Fund	Agency	Percentage	Overall Percentage
Trunk Highway	MnDOT	62% of 95%	58.90%
County State Aid Highway	MnDOT	29% of 95% + 5%	32.55%
Municipal State Aid Street	MnDOT	9% of 95%	8.55%

Also, because the funds in CSAH and MSAS are statutorily appropriated, any reductions in transfers also correspondingly reduces expenditures.

Proposal:

The Governor's FY20-21 Biennial Budget request includes the following DPS requests: Driver and Vehicle Services division staffing initiative; an HUTD Fund allocation increase; and an application server migration. Each of the

requests are funded from the HUTD Fund, and will correspondingly reduce the available net revenues to transfer to the transportation funds, as explained above.

Below is a summary of the revenue impacts by fund for each change item:

Driver and Vehicle Services Division Staffing initiative				
Fund	FY 2020	FY 2021	FY 2022	FY 2023
HUTD	<u>(471)</u>	<u>(456)</u>	<u>(456)</u>	<u>(456)</u>
TH	(277)	(269)	(269)	(269)
CSAH	(153)	(148)	(148)	(148)
MSAS	(40)	(39)	(39)	(39)

HUTD Fund Allocation Increase				
Fund	FY 2020	FY 2021	FY 2022	FY 2023
HUTD	<u>(5,226)</u>	<u>(5,226)</u>	<u>(5,226)</u>	<u>(5,226)</u>
TH	(3,078)	(3,078)	(3,078)	(3,078)
CSAH	(1,701)	(1,701)	(1,701)	(1,701)
MSAS	(447)	(447)	(447)	(447)

Application Server Migration				
Fund	FY 2020	FY 2021	FY 2022	FY 2023
HUTD	<u>(134)</u>	<u>(90)</u>	<u>(90)</u>	<u>(90)</u>
TH	(79)	(53)	(53)	(53)

AT A GLANCE

- 75th year as the state aviation agency
- More than 375 airports in Minnesota:
 - 135 publicly owned airports that receive state funds
 - Six privately owned airports for public use, 67 privately owned for private use
 - 30 key airports capable of supporting business jets, airfreight, and airlines
 - Nine airports provide scheduled airline service: Minneapolis-St. Paul, Rochester, Duluth, St. Cloud, Brainerd, International Falls, Thief River Falls, Bemidji, and Hibbing
 - Numerous seaplane bases and heliports, including hospital heliports
- More than 70% of Minnesota public airports receive Federal Aviation Administration (FAA) Airport Improvement Program (AIP) funds
- 55% of public airports are owned by a city with a population less than 5,000 people
- 7,000 registered aircraft
- More than 12,000 licensed pilots
- The numbers of unmanned aircraft systems (UAS i.e. “drones”) and pilots are increasing rapidly
- More than 350 commercial operators provide: agricultural spraying, aerial photography, UAS services, flight instruction, aircraft maintenance and emergency response
- Statewide navigational systems include:
 - 40 Instrument Landing Systems (ILS)
 - 36 Very High Frequency Omni-Directional Radio-Range Systems and Distance Measuring Equipment (VOR/DME)
 - 100 automated weather observation stations (AWOS)

PURPOSE & CONTEXT

Aviation allows time critical connection to destinations for the people, products, and businesses of Minnesota. It is a key component of our multimodal transportation system within the state, regionally, and around the world.

Aviation in Minnesota is more than passenger airline travel. General aviation is vital to communities across the state. Farming communities reap benefits from agricultural spraying, increasing crop yields through more efficient fertilizing. Aerial firefighting, mapping, and patrolling of utility lines help protect forested regions. In addition, mail and package deliveries, emergency response, and patient transport services benefit all Minnesota residents and businesses.

Aviation taxes support the state aviation system; these include aircraft registration taxes, sales and lease taxes on aircraft, airline flight property taxes, and aviation fuel taxes. More details are included in the [2016 Aviation Tax Report](https://www.dot.state.mn.us/govrel/reports/2016/2016-aviation-tax-report.pdf) (<https://www.dot.state.mn.us/govrel/reports/2016/2016-aviation-tax-report.pdf>).

MnDOT continues to engage and work closely with stakeholders throughout the state in developing the goals of our aviation system and identifying the needs of airports. Our aviation system is essential to communities throughout the state and through this work we ensure the effective and efficient use of the system’s resources.

SERVICES PROVIDED

As the state aviation agency, MnDOT:

- Collects aviation taxes and safeguards the long-term viability of the state airports fund
- Distributes state airport and federal funds to ensure a robust, well-balanced aviation system
- Offers technical resources and expertise to communities to preserve the utility of airports
- Plans and promotes a coordinated, cost-effective statewide system of airports
- Provides navigational systems to increase the safety and efficiency of our airspace
- Enforces state and federal safety standards through airport licensure and inspection
- Promotes aeronautics through information, education, and outreach to pilots and the public

Airports

MnDOT provides statewide aviation system planning. The [State Aviation System Plan](http://www.dot.state.mn.us/aero/planning/sasp.html) (SASP) (<http://www.dot.state.mn.us/aero/planning/sasp.html>) serves to benchmark the state of aviation in Minnesota, establish the current condition of the airport system, and provide investment guidance by identifying performance gaps, quantifying needs, and promoting efficiency in operations. The SASP is currently being drafted and statewide public outreach is underway.

Construction projects and infrastructure improvements ensure continued safety, reliability and access to the transportation system. MnDOT partners with airport sponsors and the FAA to maximize federal dollars applied to projects in Minnesota. State construction funds are awarded based on a statewide prioritization system that considers: project purpose, airport classification, airport component, and type of project.

Generally projects that provide for safety and essential air navigation and are physically on the airfield score higher than projects that enhance ground-side services such as fueling and baggage loading equipment. Federal construction funds are awarded based on FAA AIP eligibility and nationwide competition. Starting in FY 2015, FAA projects were supported with 90 percent FAA, 5 percent state and 5 percent local funds. The 5 percent state match enables our smallest communities to be eligible for an FAA grant to afford the local share.

MnDOT also distributes state funds to public airports (with the exception of the Minneapolis-Saint Paul International airport) for maintenance and operation activities, such as keeping runways free of snow and ice, equipment purchases, building utilities, and upkeep. Maintenance and operation funds are distributed based on a formula that considers the area of runway and taxiway, the size of lighting systems, and available funding. Each grant has a state and local cost share and a maximum reimbursement amount. Maintenance and operation values for each eligible airport were recalculated for the 2016-17 biennium after remaining at a constant level since 2009.

Aviation Safety, Operation and Regulation

MnDOT provides the inspection and licensing of airports, permitting of tall towers, licensing of commercial operators, registering aircraft, and ensuring regulatory compliance. Each year MnDOT inspects a third of the public use airports for compliance with minimum safety standards and airport licensing requirements. Inspection results help airport managers identify areas for improvement, including needed investments. Information from the inspection is also provided to the FAA and published in airport directories to enhance safe use of the aviation system. During inspections MnDOT discusses needed safety improvements, best practices in operations and maintenance, and economic development opportunities.

UAS, also known as drones, are generally defined as aircraft under state and federal law. MnDOT's regulatory and tax collection roles in aviation extend to UAS as well. How the aircraft is used is the determining factor in which regulations must be followed. For example, regulations for recreational users vary from those for commercial users. An on-going challenge is the large number of UAS users that are new to aviation and are therefore unaware of aviation regulations and the consequences of non-compliance. The current national fleet of 1 million drones is

expected to double by 2022. In Minnesota, we see similar trends with continued growth in recreational, commercial, and government use of UAS for a wide variety of activities. We continue to partner with FAA, UAS organizations, and others to increase education efforts.

Education and training programs (Airport Technical Assistance Program (AirTAP), Maintenance Technicians Conference, etc.), pilot safety, and information services (airport directory and navigational chart) also enhance the overall safety of the aviation system. For more than 25 years, Aviation Career Education (ACE) camps have been held annually and co-hosted by MnDOT and the FAA. These camps serve to prepare the next generation of aviation professionals for careers in a wide variety of aviation fields.

RESULTS

Airports

A measure of the quality of the airport system is the Runway Pavement Condition Index (PCI). A score between a scale of zero and 100 is assigned based on a physical inspection of runway and parallel taxiway pavements. The scale ranges from zero (indicating the worst possible condition) to 100 (considered the best condition). Targets are set with a goal of 84 percent of runway pavements in good or better condition and no more than four percent of pavements in poor condition. Pavement condition tends to be cyclical over time, related to available funding programs. Percent of pavements in good condition peaked between 2015 and 2017, while percent of pavements in poor condition were around three percent.

As illustrated below, grants distributed to public airports for maintenance and operation activities met nearly a fourth of the funds expended to operate and maintain public airports in 2016 and 2017. Larger airports have a greater gap in reimbursements, with 29 smaller airports having all maintenance and operation needs met in 2016 and 26 airports in 2017.

Maintenance & Operation Grants (\$ in thousands)

In addition, one of the most common causes of aviation accidents is continued flight in deteriorating weather conditions. Providing weather stations at multiple airports creates a reliable network of weather information available along any flight route, enhancing safety. Ground based navigation systems provide pilots better access to airports in weather conditions when visibility is limited by clouds, fog, rain, or snow.

MnDOT owns, operates, and maintains a system of navigational aids and weather stations that enhances federally owned systems. Additionally, pilots can check weather conditions, get updated airport information, and file flight plans at MnDOT provided computers at airports. The 2012 SASP reports 100 percent of system airports meet the target of having weather reporting stations on-site or are within 30 nautical miles of an airport that has weather reporting on-site.

Chapter 360 Airports and Aeronautics M.S. 360.011-360.93 (<https://www.revisor.mn.gov/statutes/?id=360>) provides the legal authority for this activity.

Program: Multimodal Systems

Activity: Transit

dot.state.mn.us/transit/

dot.state.mn.us/saferoutes/index.html

dot.state.mn.us/bike/

dot.state.mn.us/peds/

AT A GLANCE

- All 80 counties in Greater Minnesota served
- 37 Greater Minnesota public bus systems funded in FY18
- 147 wheelchair-accessible buses funded for public and non-profit run systems in FY18
- 9 Regional Transportation Coordinating Council project development grants funded in FY18
- 41 Safe Routes to Schools projects funded for \$2.8 million in FY18
- Completed the designation of the North Star Bicycle Route, United States Bicycle Route 41.
- Partnered with the Minnesota Department of Health and completed the Minnesota Walks Plan in 2016

PURPOSE & CONTEXT

The Office of Transit and Active Transportation (OTAT) supports transit services to all 80 non-metro counties to meet the needs of transit users and support walking and bicycling statewide. MnDOT continues to work to increase the use of transit, bicycling, and walking as a percentage of all trips statewide. OTAT also works closely with the Metropolitan Council on the planning, development, design, and construction of major transit projects in the Twin Cities metro area.

MnDOT engages our customers to provide planning and policy direction for transit, walking, and bicycling routes on a statewide basis. This includes the needs of our partners and implementing best practices in planning for and investing in transit facilities and pedestrian infrastructure.

SERVICES PROVIDED

Transit Planning and Grants

OTAT provides funding grants, planning support and technical assistance to:

- Public bus service outside the Twin Cities metro area, including grants to purchase buses and bus facilities: [Public Transit Participation Program](http://www.dot.state.mn.us/transit/grants/5311/index.html) (<http://www.dot.state.mn.us/transit/grants/5311/index.html>). Grants are issued to: public, private, and nonprofit operators, as well as local, state, and tribal governments.
- Programs for travel options focused on seniors and persons with disabilities: [Enhanced Mobility of Seniors and Individuals with Disabilities Program](http://www.dot.state.mn.us/transit/grants/5310/index.html) (<http://www.dot.state.mn.us/transit/grants/5310/index.html>).
- InterCity Bus services: [Section 5311f Minnesota Intercity Bus Program](http://www.dot.state.mn.us/transit/grants/5311f/index.html) (<http://www.dot.state.mn.us/transit/grants/5311f/index.html>), includes State and Federal funding to support intercity bus transportation service to non-urbanized communities within Minnesota.
- [Regional Transportation Coordinating Council](http://www.dot.state.mn.us/transit/grants/RTCC/index.html) (<http://www.dot.state.mn.us/transit/grants/RTCC/index.html>), coordinates transportation providers, service agents, and the private sector with the goal to fill transportation gaps, streamline access to transportation, and provide individuals more options of where and when to travel.

Bicycle and Pedestrian Planning and Grants

OTAT walking and bicycling services and programs include:

- Providing planning for bicycle transportation and pedestrian infrastructure that promotes bicycling as an energy-efficient and healthy transportation alternative. [The Statewide Bicycle System Plan](http://www.dot.state.mn.us/bike/system-plan/pdfs/statewide-bicycle-system-plan.pdf) (<http://www.dot.state.mn.us/bike/system-plan/pdfs/statewide-bicycle-system-plan.pdf>).
- Delivering programs and resources that encourage walking and bicycling as a part of the Trunk Highway and local transportation network (e.g., Share the Road, State Bicycle Map, State Bicycle Routes, [Minnesota Walks Plan](http://www.dot.state.mn.us/peds/plan/) (<http://www.dot.state.mn.us/peds/plan/>)).
- Coordinating the statewide [Non-Motorized Traffic Monitoring Program](http://www.dot.state.mn.us/bike/research/research.html) (<http://www.dot.state.mn.us/bike/research/research.html>).
- Delivering Safe Routes to Schools Program grants for planning, education, and related projects,
- Providing strategic direction for the MnDOT-owned ABC parking ramps in downtown Minneapolis to encourage carpooling, transit, and bicycle commuting. The parking ramps serve as bridges over Interstate 394 which surrounds Target Field. The ramps are managed by the city of Minneapolis on MnDOT's behalf.

Light and Commuter Rail

OTAT assists the Metropolitan Council with planning, design, and construction of light rail transit and commuter rail. This includes operating the Northstar commuter rail and Blue Line and Green Line light rail. Work continues on the Green Line Extension and Blue Line Extension light rail projects under development.

RESULTS

Public Transit in Greater Minnesota

There are 37 public transit systems serving at least a portion of all 80 counties in Greater Minnesota, delivering 11.7 million rides in 2016 and 11.9 million rides in 2017.

During the last decade, Greater Minnesota public transit ridership has increased 12 percent. Service has expanded so that every non-metro county (80 counties) has at least some public bus service. [Minnesota Statute 174.24](https://www.revisor.mn.gov/statutes/cite/174.24) (<https://www.revisor.mn.gov/statutes/cite/174.24>) requires MnDOT to develop a transit investment plan that contains a goal of meeting at least 80 percent of total transit needs in Greater Minnesota by July 1, 2015 and 90 percent by 2025. Based on the new model developed for the [2017 Greater Minnesota Transit Investment Plan](http://www.dot.state.mn.us/transitinvestment/) (<http://www.dot.state.mn.us/transitinvestment/>), in 2017 public transit systems met approximately 88 percent of

the estimated total transit demand in Greater Minnesota. This model predicts Greater Minnesota public transit demand will increase 45 percent from 2015 to 2025, primarily due to the rapid increase in people reaching age 65.

Bicycle and Pedestrian Programs

In 2017, Minnesota was named the second most bike-friendly state in the United States by the League of American Cyclists. As bicycling has increased in Minnesota, the rate of bicycle crashes has been declining consistently over the past ten years (with the exception of 2015 that saw a slight increase). However, data in 2017 shows that although participation in walking as a form of transportation has remained relatively flat, pedestrian fatalities have begun to increase over the past two years.

*2017 is preliminary data collected by Minnesota Department of Public Safety Office of Traffic Safety

The United States Congress created the Safe Routes to School Program in 2005 with the goal of getting more children to walk or bicycle to school safely. In 2012, the Minnesota Legislature created a state-level program with similar goals. Since 2005, MnDOT has provided more than \$30 million in grants that reach more than 700 schools across Minnesota for infrastructure improvements, education and planning activities. The Safe Routes to School Program reached an average of 10,000 students per year from 2006 to 2011. Funding increased in 2012 with the availability of state funds, peaking in 2013 when both federal and state funds were available. OTT continues to improve its collection methods and develop more complete and detailed data that provides a more accurate depiction of each program's impact. The table below illustrates the number of students who participate in these programs and benefit from these resources.

Program: Multimodal Systems
Activity: Freight and Rail Safety

dot.state.mn.us/cvo

dot.state.mn.us/ofrw/railroad

AT A GLANCE

- \$5 million in Port Development Assistance Program grants provided for public port authority infrastructure improvements in FY2018
- 70 highway/rail grade crossing safety improvements completed on state and local roads in FY 2017
- More than 77,000 motor carrier oversize/overweight permits issued in calendar year 2017
- 400 limousine, 258 special transportation service, 123 property carrier, 112 household goods movers, and 10 building mover credentials issued in calendar year 2017
- More than 11,000 interstate carriers registered through the United Carrier Registration Program in calendar year 2017
- 3,715 special transportation service and 676 limousine inspections conducted in calendar year 2017

PURPOSE & CONTEXT

The Office of Freight and Commercial Vehicle Operation's (OFCVO) purpose is to improve the safety and performance of the state's multimodal freight transportation system through:

- Ensuring railroad compliance with state and federal safety standards and improving safety for the traveling public at highway-rail grade crossings
- Planning and delivering freight infrastructure projects
- Enforcing state and federal laws and rules that govern carriers and transportation service providers
- Conducting investigations of carriers that operate in interstate commerce to ensure sound safety management practices
- Coordinating with the State Patrol to conduct safety inspections of commercial motor vehicles
- Delivering training and technical assistance to motor carriers, drivers, and shippers
- Providing web access, information, and e-government transaction services for commercial vehicles

OFCVO programs enhance Minnesota's economic competitiveness by improving access to regional, national, and global markets through safe and efficient transport of goods and people. Through these efforts we are able to implement strategies that advance freight mobility, safety, and economic competitiveness.

SERVICES PROVIDED

Freight System Planning: Develop plans and support legislative and other initiatives that improve Minnesota's freight transportation system. Plans include [Statewide Freight System and Investment Plan](http://www.dot.state.mn.us/planning/freightplan/pdf/statewidefreightplanrevised2018.pdf) (<http://www.dot.state.mn.us/planning/freightplan/pdf/statewidefreightplanrevised2018.pdf>) and the [State Rail Plan](http://www.dot.state.mn.us/planning/railplan/) (<http://www.dot.state.mn.us/planning/railplan/>).

Minnesota Freight Advisory Committee: Oversee the Minnesota Freight Advisory Committee (MFAC), which includes membership of 40 businesses and organizations representing the freight industry. The MFAC membership meets quarterly to discuss current issues and trends.

Minnesota Highway Freight Program (MHFP): Provide funding to eligible construction projects on public roads that provide measurable freight transportation benefits and intermodal impact, and have statewide planning

purposes. MnDOT had a solicitation for this program from June through August 2017 and received 36 applications and two planning requests. MHFP allocated \$99 million for highway, intermodal, and statewide planning projects in October 2017.

Port Development Assistance Program (PDAP): Improve port infrastructure and access to waterways in response to the needs of the commercial waterway navigation system. The program provides grants that help to ensure the continued commercial effectiveness of the Great Lakes and Mississippi River navigation terminals. Projects awarded in January 2018 include: 1) the Duluth Seaway Port Authority's Berth 10 Rehabilitation, to provide for additional vessel mooring and storage at the Clure Terminal Expansion; 2) a Direct Barge-Rail-Truck Intermodal Facility at the St. Paul Port Authority's Southport Terminal; 3) a new barge terminal construction for the Wabasha Port Authority; and 4) storm water improvements at the Port Authority of Winona.

Minnesota Rail Service Improvement Program (MRSI): Administer loans and grants that improve the condition and capacity of rail infrastructure. In 2017, the Legislature created a grant program to provide funding for freight rail economic development projects.

Passenger Rail: Partner with local governments and regional rail authorities, neighboring state Departments of Transportation, community groups and corridor advocates to deliver passenger rail services that are federally compliant, environmentally friendly, and sustainable to connect Minnesota with the national passenger rail system. The most recent 2015 [Statewide Freight and Passenger Rail Plan](http://www.dot.state.mn.us/planning/railplan/2015report/DraftMNStateRailPlan.pdf) (<http://www.dot.state.mn.us/planning/railplan/2015report/DraftMNStateRailPlan.pdf>) identifies priority passenger rail corridors for development by MnDOT.

Rail Safety Inspection Program: Inspect rail track, rail cars, locomotives, and hazardous materials to ensure railroad compliance with federal and state safety standards. In FY 2018, MnDOT state rail inspectors and Federal Railroad Administration inspectors documented 11,532 defects and 217 more serious violations. MnDOT works with the appropriate railroads to ensure that all defects and violations are corrected.

Rail Crossing Safety Program: Monitor the safety performance of more than 4,100 rail grade crossings along Minnesota's public road system and develop the Department's Railroad Highway Grade Crossing Safety Improvement Program. A risk based assessment is used to identify at risk locations and determine the proper level of warning at each crossing.

Trunk Highway-Rail Coordination: Coordinate the involvement of railroads directly affected by MnDOT trunk highway construction projects. In FY 2018, 45 rail agreements were executed for Trunk Highway construction projects.

State Interagency Rail Group and State Rail Director: Housed at MnDOT and serves as the primary expert and point of contact for the management of cross-agency railroad issues in Minnesota, to the USDOT Federal Railroad Administration, Minnesota Congressional delegates, and the legislature. The Rail Director coordinates the interagency rail team consisting of Met Council, DPS, PCA, DEED, IRRB, Commerce, Health, Ag, and MnDOT.

Weigh Stations: Play a key part of Minnesota's federally required and approved weight enforcement program. Weight enforcement is a key role in protecting the state's roadway and bridge infrastructure and motorists from unsafe vehicles and unqualified drivers. These facilities are built, owned, and maintained by MnDOT and operated by the Minnesota State Patrol's Commercial Vehicle Enforcement Division. OFCVO continues to invest in weigh stations and related technologies to maximize the safety benefits and minimize delays for the industry. In 2017, the six fixed weigh scale facilities weighed 1.4 million trucks.

Oversize and Overweight Vehicle Permitting and Routing: Issue oversize/overweight truck permits to protect the infrastructure and promote safety. Using either an automated system or working with staff, carriers are assigned routes that are adequate for the size and weight of their loads.

Commercial Truck and Bus Credentials: Oversee the proper identification and licensing/registration of motor carriers. In addition to issuing licenses for Freight (property) carriers, Household Goods Movers, Building Movers, Motor Carriers of Passengers, Limousine Operators and Special Transportation Service Providers (also known as Non-emergency Medical Transportation), the office registers MN based interstate carriers through the Unified Carrier Registration Program.

Motor Carrier Safety Assistance Program (MCSAP): Participate in the federal grant program administered by the United States Department of Transportation's Federal Motor Carrier Safety Administration, which defines uniform enforcement of safety rules, regulations and standards for both interstate and intrastate motor carriers and drivers. This work improves the safety performance of passenger carriers, including special transportation service (STS) providers serving the elderly and disabled, limousine operators, and motor carriers of property and passengers. In 2017, OFCVO conducted 212 motor carrier safety compliance reviews, 523 audits on newly established motor carriers, and 37 safety talks to industry on safety regulations and requirements.

Hazardous Materials: Assist local authorities by providing technical guidance to incident commanders and recommending mitigation measures necessary to protect life, property and the environment. During 2017, OFCVO assisted in 144 incidents where hazardous materials were involved. OFCVO also provided educational outreach to transporters and shippers of hazardous materials to promote the safe transportation of these products.

Medical Waivers: Process medical waivers for commercial vehicle drivers who are not permitted to drive with a variety of medical conditions that potentially create safety risks. Waivers are based on physician evaluations of the impact of the condition and the success of ongoing medical management. For the driver, the waiver allows continued employment with minimal safety risks. In 2017, 413 medical waivers were processed.

Special Transportation Service Complaint Reporting and Resolution: Operate an enhanced complaint intake and reporting system to accept complaints from the public and industry regarding unsafe or improper operation by motor carriers and providers of special transportation services for the elderly and disabled. The improvements include promoting a dedicated phone line specific for accepting complaints, a dedicated web link to file complaints online, and a new tracking system database to monitor progress on complaint investigations and resolution. OFCVO handled 12 and 17 complaints in 2016 and 2017, respectively.

RESULTS

Rail Crossing Safety Program: Through improvements in infrastructure and public education, grade crossing incidents have declined substantially, from a high of 392 in 1970 to 34 in 2017. Of the 34 incidents in 2017, there were five grade crossing fatalities. Approximately one-third of Minnesota's 4,100 public road grade crossings have gates and/or flashing lights. 70 highway/rail grade crossing safety improvements were completed on state and local roads in FY 2018.

Source: Federal Railroad Administration Office of Safety Analysis

Oversize and Overweight Vehicle Permitting and Routing: Use of the online oversize/overweight permitting system has seen increased usage over the past five years. As a result, a replacement system is currently being developed to keep up with increased demand of online permits.

The legal authority for the Freight and Commercial Vehicle Operations activity comes from:

Program: State Roads

Activity: Program Planning and Delivery

dot.state.mn.us/planning/program/plans.html

AT A GLANCE

- 376 construction projects let during calendar years 2016-17
- \$1.8 billion in construction projects were developed for calendar years 2016-17 lettings
- \$21 billion in planned investments for state highways over the next 20 years
- \$195 million in contracts awarded to small businesses in FY2016-17
- The 20-year Minnesota State Highway Investment Plan (MnSHIP) is updated every five years with the new release in January 2022
- The 10-year Capital Highway Investment Plan and four year State Transportation Improvement Program (STIP) are updated every year
- 50 or more research projects start each year with about 200 in progress at any time

PURPOSE & CONTEXT

The transportation infrastructure is aging; a large portion of the existing infrastructure was built during the 'Interstate Era' of the 1960's and early 1970's and is nearing the end of its useful life. Aging infrastructure requires more involved and frequent rehabilitation or complete replacement.

Program Planning and Delivery of the Trunk Highway system requires thoughtful and efficient short, mid- and long-range plans to fit the diverse needs of the system's stakeholders. This activity includes: developing investment plans, conducting data analysis, reviewing performance outcomes, managing the capital program, creating construction plans and construction project oversight, goal setting, as well as research and development.

We must efficiently use the resources available to plan and preserve infrastructure, while also providing oversight for the replacement and limited expansion of the system. In addition, we must meet the need for safety, mobility, reliable freight movement, and bicyclists and pedestrian improvements.

In the planning of the Trunk Highway system, MnDOT's objective is to enhance our customer's trust by listening to their needs, engaging them in creating plans and communicating effectively about our programs and projects. By doing so, we will plan and deliver projects to get the most out of our investments and optimize system performance.

SERVICES PROVIDED

Highway System Planning

Highway planning includes assessing statewide infrastructure conditions; determining future needs for all highway users, including automobiles as well as trucks, buses, bicycles and pedestrians; and then making planning decisions based on projected available funding. We strive to make policy and planning decisions that provide the greatest return on Minnesota's transportation system investment.

The [Minnesota State Highway Investment Plan](http://www.dot.state.mn.us/planning/mnship/) (MnSHIP) (<http://www.dot.state.mn.us/planning/mnship/>) is completed every five years and establishes capital investment priorities for the next 20 years. MnSHIP draws on performance management systems to establish investment scenarios which optimize the highway system

performance based on projected available funding. MnSHIP ensures that performance targets set by the federal government for interstate pavements and National Highway System bridges are met.

The [Capital Highway Investment Plan](http://www.dot.state.mn.us/planning/10yearplan/) (CHIP) (<http://www.dot.state.mn.us/planning/10yearplan/>) is a ten year list of financially constrained projects that are selected to meet the investment priorities and performance targets established by MnSHIP. Preservation projects are selected based upon the projected condition of the pavement or bridge available from the pavement and bridge management systems. The CHIP is updated annually.

The [State Transportation Improvement Program](http://www.dot.state.mn.us/planning/program/stip.html) (STIP) (<http://www.dot.state.mn.us/planning/program/stip.html>) includes the first four years of the CHIP. These projects are considered funded and committed for delivery. The last six years of the CHIP are priorities based upon the MnSHIP investment criteria, but may change as project scope and revised revenue forecasts become available.

Develop Highway Improvement Projects

Development of highway improvement projects involves several steps:

- **Scoping** determines the elements of a project that are needed to meet project goals and sets preliminary cost estimates and schedules.
- **Environmental Review** considers impacts of proposed projects to ensure compliance with environmental laws and policies and avoids, minimizes, or mitigates environmental impacts.
- **Public Involvement and Engagement** includes public participation through meetings, media, local government, technology, and social media. The public is involved throughout the entire life of the project, including planning, design, scoping, environmental review, and construction.
- **Design** includes engineering studies and analysis, preparing construction plans, using performance based practical design and flexible design standards to ensure road designs meet project goals while minimizing costs.

MnDOT employs Shared Service Centers to provide centralized technical expertise to districts and for agency efficiency. A Shared Service Center will maintain an expertise that the districts can draw upon when needed and functions much like an internal consultant by bringing expertise and resources to a project that a district doesn't have available. Shared Service Centers exist for project scheduling, sign design, signal and lighting design, design of living snow fences, implementing all contracting methods, and right-of-way staff needed to address the additional parcels necessary to meet American's with Disability Act (ADA) standards.

Highway Construction Management Oversight

MnDOT monitors construction projects to ensure that the final product meets all specifications by doing the following:

- **Managing** the overall progress of State Highway projects from project letting through construction completion and final project documentation.
- **Coordinating** the early stages of projects with unique features.
- **Providing** opportunities for small business participation and employment opportunities to minorities and women to work on MnDOT contracts.
- **Overseeing** quality management, material testing, project scheduling, and compliance with specifications.
- **Providing** sound fiscal management, financial tracking, and regulatory compliance.
- **Ensuring** that construction traffic control provides the most efficient and safest movement possible through work zones.

Research and Development

MnDOT develops and utilizes new technologies for Trunk Highway projects, such as newer, more cost-effective pavement designs, accelerated bridge construction techniques, and methods to improve highway safety.

Recently, MnDOT developed the Connected and Automated Vehicle (CAV) strategic plan that will address short term goals (testing and early deployments) and long term strategies that will address how to design and operate our roadways for CAV technology. MnDOT also conducts additional research in the areas of maintenance, pavements, and intelligent transportation systems. This includes the MnROAD program, which is a pavement test track made up of various materials and pavements. The program finds ways to make roads last longer, perform better, cost less to build and maintain, be built faster, and have minimal impact on the environment. Research Services manages research projects that serve as a resource for staff as well as city and county engineers.

RESULTS

Project Delivery

To help ensure projects are delivered within budget and on time, we continue to place a greater emphasis on project scheduling and monitoring. In 2014, the department began striving to better balance lettings throughout the year. This initiative is designed to increase the number of projects let during better bidding environments (October through March) to maximize competition between bids and more evenly distribute the design work throughout the year, lessening the need for overtime.

Highway projects are much more complicated than even 20 years ago. Management of traffic in a work zone, permitting regulations, and innovative design all take more design resources in order to minimize traffic disruptions, comply with state and federal rules, and reduce the cost to construct. Currently, based on most recent data, program planning and delivery activities cost approximately 17 percent of construction costs.

* Throughout this measure, expenditures reflect budgetary commitments (expenditures and encumbrances) and include consultant-led program planning and delivery.

The Department of Transportation's Program Planning and Delivery legal authority comes from:
Roads General Provisions M.S.160 (<https://www.revisor.mn.gov/statutes/?id=160>)
Trunk Highway M.S.161 (<https://www.revisor.mn.gov/statutes/?id=161>)

Program: State Roads

Activity: State Road Construction

minnesotago.org/

dot.state.mn.us/planning/program/stip.html

dot.state.mn.us/planning/mnship/

dot.state.mn.us/planning/10yearplan/index.html

dot.state.mn.us/projectselection/

AT A GLANCE

- 436 construction projects started in the 16-17 biennium
- 503 construction projects planned in the 18-19 biennium
- Corridors of Commerce and Transportation Economic Development (TED) projects were also selected:
 - 9 TED projects received funding in 2017
 - 7 Corridors of Commerce projects received funding in 2017 and 2018 (for construction between 2019 and 2024)
- Funded through direct appropriations from the Trunk Highway Fund, Federal Highway Trust Funds and Trunk Highway Bond proceeds

PURPOSE & CONTEXT

The State Road Construction budget activity is the capital investment program for the construction, reconstruction, and improvement on the 12,000 miles of state managed roads and bridges. State managed roads include the National Highway System (NHS), along with 7,600 miles of non-NHS Trunk Highways.

Investments on these roads are primarily in the areas of system preservation, improvements, and expansion. MnDOT staff administers and provides oversight to hundreds of projects each season. Investment decisions are made based on priorities and policies identified in the planning documents developed by the agency.

MnDOT's objective is to demonstrate effective and efficient stewardship of state road construction resources and to make long-term investments that respond effectively to evolving needs of highway users.

SERVICES PROVIDED

MnDOT selects, designs, and manages construction projects to advance the objectives and performance measures in the Statewide Multimodal Transportation Plan. The investment priorities and direction are set in the [20-year Minnesota State Highway Investment Plan](http://www.dot.state.mn.us/planning/mnship) (MnSHIP) (<http://www.dot.state.mn.us/planning/mnship>). Individual construction projects are prioritized and selected by category of project within special funding programs, such as TED or Corridors of Commerce. Beginning in 2019, MnDOT will use more comprehensive, objective, and transparent scoring methods to evaluate and prioritize candidate projects based on the new legislatively required Project Selection Policy. The annual construction program provides work for contractors across the state and opportunities for small business participation and employment to minorities and women to work on MnDOT contracts.

Trunk Highway System Preservation Construction

Trunk Highway preservation construction includes:

- Repairing and reconstructing highways and bridges to maintain the existing transportation system.

- Planning for the preservation of highway and bridge investments in a timely and cost-effective manner, allowing MnDOT to maintain the state's existing vital connections.
- Selecting preservation projects that provide a safe and reliable riding surface for travelers while minimizing life-cycle costs.

Trunk Highway System Expansion

Trunk Highway expansion includes:

- Adding capacity to the transportation system with new lanes, bridges, interchanges, and in rare cases adding additional centerline miles.
- Creating safer roadways with new turn lanes, wider shoulders, and roundabouts.
- Completing critical connections through special legislation and bonding programs, such as the Corridors of Commerce program.

Other Trunk Highway System Improvements

Investing in areas within the right of way but outside of the traditional highway footprint, including:

- Multimodal investments, including bike paths and pedestrian bridges
- Intelligent Traffic Systems, including ramp meters and changeable message signs
- Truck weigh stations and scales
- Travel center and safety rest areas

RESULTS

MnSHIP Outcomes (2018 to 2037)

MnSHIP identifies the investment priorities for the State Road and Bridge Construction Program and the outcomes of those investments. Based upon the estimated available funding during this time period, MnDOT will focus on the following outcomes:

- System Stewardship:
 - **Strengths:** MnDOT focuses a majority of investment on maintaining the condition of roads, bridges, and roadside infrastructure. Federal targets for pavement and bridge condition are likely to be met.
 - **Drawbacks:** Conditions of roads, bridges and roadside infrastructure decline on NHS and non-NHS routes.
- Transportation Safety:
 - **Strengths:** MnDOT will continue to focus on lower cost, proactive treatments aimed at preventing fatalities and serious injuries.
 - **Drawbacks:** Only a limited number of locations with a sustained crash history will be addressed.
- Critical Connections:
 - **Strengths:** MnDOT commits to achieving substantial compliance with the Americans with Disabilities Act no later than 2037. MnDOT also commits to planned mobility investments in the Twin Cities metro area through 2023.
 - **Drawbacks:** The number and scope of mobility improvements decreases substantially, potentially reducing the ability to maintain reliable travel times in the Twin Cities area and Greater Minnesota. Resources are not available to address growing areas of the state.
- Healthy Communities:
 - **Strengths:** Through the Transportation and Economic Development program, investments will be made to address local concerns through partnerships, design add-ons and a few stand-alone projects to support economic competitiveness and quality of life.
 - **Drawbacks:** The investment direction limits MnDOT's ability to address local concerns.

Efficiencies

While MnDOT has always worked to be good stewards of public funds, the department continues to take a more targeted approach to identify and quantify efficiencies as well as find new areas for greater efficiencies. When MnDOT identifies savings on current projects, we release those funds to advance additional projects. MnDOT uses a best practice case-analysis approach to evaluate and measure efficiency. Best practice evaluation reviews dimensions of efficiency in quality, time and cost. MnDOT analyzes each case for implementation of cost saving strategies, designs, and processes. Efficiencies identified in fiscal year 2017 came throughout the project development process for each project worth more than \$10 million, as well as any regionally significant project let in FY 2017. In FY 2017 there were approximately \$70 million in savings identified on major projects. There were also an estimated \$12 million in efficiencies identified in other areas of the department such as administration, maintenance, and operations. MnDOT efficiencies are reported in the [Major Highway Projects Report](https://www.dot.state.mn.us/govrel/reports/2017/mhpr-report.pdf) (<https://www.dot.state.mn.us/govrel/reports/2017/mhpr-report.pdf>).

Performance Indicators

MnDOT tracks the performance of the Trunk Highway system with a number of different performance measures, many of which are published on the [transportation performance website](https://performance.minnesotago.org/) (<https://performance.minnesotago.org/>). MnDOT prioritizes infrastructure improvements on NHS routes and holds these roads to a higher performance standard than non-NHS routes. This approach allows MnDOT to comply with federal law and manage risks related to statewide travel.

Pavement condition is measured by the percent of miles of highway in poor condition. The system condition is projected to be declining after 2018.

Bridge condition is measured by percent of bridge deck area in poor condition. This graph illustrates that bridges on the NHS are meeting percent poor target through 2021. Projections indicate conditions will start to decline in 2024 and then more significantly toward the end of 2028.

**Percent of NHS Bridges in Poor Condition as a Percent of
Total NHS Bridge Deck Area
(Target ≤ 2%)**

*FY 2019 was not included in the current yearly condition forecast due to data and timing issues.

MnDOT's Complete Street Policy considers the needs of pedestrians, bicyclists, transit, motorists and commercial and emergency vehicles in all phases of planning, project development, operation and maintenance activities. MnDOT documents how each user group (e.g. pedestrian, bicycle, transit, freight) has been considered using both categories defined in MnDOT's Complete Streets Policy and then described in a written explanation for each type of use. In the graph below you will see we are making improvements in the majority of projects where we identified needs. However, in some cases the desired improvements are not feasible or cost effective so are not included in the final plan. Percentages, in the graph below, exclude projects where the use is legally prohibited according to [Minnesota Statutes 169.305](https://www.revisor.mn.gov/statutes/cite/169.305) (<https://www.revisor.mn.gov/statutes/cite/169.305>) or where there is no evidence of a current need to provide for the user group, no plans identify the project corridor for future use or land use trends suggest an absence of future need over the life of the project.

For FY2018-19, overall 70 percent of projects have documented considerations for each type of use. All projects are required to complete the documentation during the project scoping process, though some projects are not yet fully scoped or have yet to complete their analysis.

**State Road Construction Projects with
Identified Pedestrian Needs**

**State Road Construction Projects with
Identified Transit Needs**

State Road Construction Projects with Identified Bicycle Needs

State Road Construction Projects with Identified Freight Needs

Mobility is measured by the speed that users can travel on Metro freeways. The performance is stable at the current investment level, although the percentage of congested miles is expected to increase in the future as traffic volumes continue to grow. Congestion is defined as freeway traffic flowing at speeds less than 45 miles per hour (mph) and does not include delays that may occur at speeds greater than 45 mph.

Percent of Metro Freeway Miles Below 45 mph in AM or PM Peak

The Department of Transportation's State Road Construction legal authority comes from:

Roads, General Provisions M.S.160 (<https://www.revisor.mn.gov/statutes/?id=160>)

Trunk Highways M.S.161 (<https://www.revisor.mn.gov/statutes/?id=161>)

Complete Streets M.S. 174.75 (<https://www.revisor.mn.gov/statutes/?id=174.75>)

TED M.S. 174.12 (<https://www.revisor.mn.gov/statutes/cite/174.12>)

Corridors of Commerce M.S. (<https://www.revisor.mn.gov/statutes/cite/161.088>)

Program: State Roads

Activity: Debt Service

dot.state.mn.us/policy/financial/fm007.html

AT A GLANCE

Trunk Highway General Obligation Bonds:

- \$4.3 billion authorized since 2000
- \$2.9 billion sold since 2000
- \$229 million three-year average expenditures of bond-funded projects
- Debt service payments have grown from 7% of state revenues in Trunk Highway Fund in FY 2009 to 16% in FY 2018
- \$4.6 billion in remaining debt service payments on all current bond authorizations

PURPOSE & CONTEXT

The state of Minnesota is authorized to issue General Obligation bonds for trunk highway purposes under Article XIV, section 11 of the constitution. Bonds are purchased to advance construction projects beyond what the State Road Construction and Federal funding programs can support in a given period. The Minnesota Department of Transportation is also authorized to enter into loan agreements using the Transportation Revolving Loan Fund and to enter into local government advance agreements. The debt service activity is funded by a direct appropriation from the Trunk Highway Fund. The Trunk Highway Fund, rather than the State's General Fund, pays all of the debt service for Trunk Highway bonds.

SERVICES PROVIDED

This activity encompasses repayment of all debt related to the Trunk Highway System. This includes the required annual payment of the principal and interest on Trunk Highway bonds to the State Debt Service Fund from the Trunk Highway Fund, as well as payments to the Transportation Revolving Loan Fund for Trunk Highway loan agreements and repayments of advances from local governments. We work closely with Minnesota Management and Budget to coordinate activities related to selling bonds and forecasting both debt cash flow and debt service payments.

This activity also includes significant funding for the Corridors of Commerce program, established in [Minnesota Statute 161.088](https://www.revisor.mn.gov/statutes/cite/161.088) (<https://www.revisor.mn.gov/statutes/cite/161.088>), to be used for projects focused on capacity development or freight improvement that meet specific criteria. Since 2013, \$1.0 billion in Trunk Highway bonds have been authorized for the Corridors of Commerce program.

Trunk Highway bonds have become an increasingly common financing tool in recent years, especially since the \$1.8 billion approved in Minnesota Laws of 2008, Chapter 152. The total cost of repaying the bonds generally ranges between \$1.3-\$1.5 for every \$1 of bonds authorized (depending on prevailing interest rates), and are repaid over 20 years.

The current gas tax rate of 28.5 cents per gallon includes 3.5 cents dedicated to the debt service on the \$1.8 billion of trunk highway bonds authorized in Laws of Minnesota 2008, Chapter 152. MnDOT prepares an annual analysis of the gas tax debt service surcharge required in [Minnesota Statute 296A.083](https://www.revisor.mn.gov/statutes/cite/296A.083) (<https://www.revisor.mn.gov/statutes/cite/296A.083>). From FY2009 to 2017, the debt surcharge revenue was greater than the debt service amounts – resulting in a positive amount transferred to the Trunk Highway Fund. Beginning in FY 2018 and thereafter, the debt service payments become larger than the surcharge revenues, which will reduce the Trunk Highway Fund balance. In total, this imbalance is projected to result in a cumulative reduction to the Trunk Highway Fund balance of \$244 million by the end of the FY2020-21

biennium. This imbalance grows to \$484 million by FY 2039. The full 3.5 cent tax will continue to be collected but falls short of recovering the debt service forecast amount of \$2.2 billion from FY 2009 through FY 2039.

RESULTS

Minnesota's goals for the transportation system are established in the Minnesota State Highway Investment Plan (MnSHIP). Bond debt, particularly when interest rates are low, is an important strategy for funding transportation projects. The key goal for the debt service activity is to balance the needs of the transportation system by maximizing the funding resources available within a financially sound debt management policy. In 2010, statutory language was enacted that required MnDOT to develop a debt management policy, [Minnesota Statute 167.60](https://www.revisor.mn.gov/statutes/cite/167.60) (<https://www.revisor.mn.gov/statutes/cite/167.60>). The policy is important to ensure that debt obligations do not materially impact funding levels for other budget activities. MnDOT policy states that debt service cannot exceed 20 percent of annual projected state revenues to the Trunk Highway Fund. The graph below depicts the most current debt service estimates compared with the policy limit. The debt service peaks at 16.1 percent in FY 2019.

The Department of Transportation's Debt Service activity legal authority comes from:

Program: State Roads

Activity: Operations and Maintenance

dot.state.mn.us/

dot.state.mn.us/maintenance/

AT A GLANCE

We maintain:

- 12,000 state highway miles (29,000 certified lane miles), including the National Highway System (NHS)
- 3,360 traffic management systems (signals, ramp meters, changeable message signs, cameras and road weather information stations)
- 591 miles of cable median barrier
- 28,913 highway lighting fixtures
- 4,860 bridges greater than 10 feet in length on Trunk Highway routes (including rail road, pedestrian and other structures)
- 40,709 highway culverts
- 256,714 acres of highway right of way (including wetlands and ponds)
- 840 snowplows
- 1,075 individual buildings (including 187 radio equipment shelters)

PURPOSE & CONTEXT

State managed roads makes up only 8.4 percent of Minnesota's roads, but carries nearly 60 percent of total traffic volume with more than 95 million vehicle miles driven every day. Safety and efficiency is integral to the work we perform daily.

MnDOT maintenance:

- Clears snow and debris from Minnesota roadways
- Repairs and improves highways, bridges, shoulders, safety devices, and traffic management systems
- Maintains the fleet, equipment, and buildings necessary to perform maintenance activities
- Performs striping, signage, and roadway lighting structure activities
- Preserves and optimizes investments while delivering faster, smoother, and more reliable trips
- Respond to emergencies 24 hours per day, 365 days per year and provides services regardless of snow, rain, floods, construction, or emergencies

MnDOT prepares for and adapts to the challenges and opportunities that enable us to advance our objective of operational excellence by getting the best performance out of the roadways. Our operations address changing traffic and environmental conditions in a cost effective manner, providing effective stewardship of public resources.

SERVICES PROVIDED

Bridges and Structures Maintenance

MnDOT inspects 4,860 state highway bridges in accordance with state and federal requirements, as well as additional inspections due to unforeseen events. Federal rules require that all bridges are inspected on a one or two year cycle. See the [Bridge Office website](http://www.dot.state.mn.us/bridge/inspection.html) (<http://www.dot.state.mn.us/bridge/inspection.html>) for more information on bridge inspection.

MnDOT performs preventive maintenance to extend the service life of state managed bridges by protecting these assets from exposure to moisture and corrosive agents like salt. Preventive routine maintenance includes sealing cracks, joints, and railings; spot painting; lubrication of expansion bearings and flushing of the bridge deck; and superstructure and substructure elements with water to remove winter residue to reduce the frequency and scope of future repairs.

Reactive maintenance repairs are prioritized as high, medium or low priority and is a response to a condition discovered during an inspection or maintenance or when a vehicle damages a bridge. High priority includes deficiencies that could affect safe function of the bridge or result in deterioration to a critical condition. See our Bridge Office website for more information on [Bridge Construction and Maintenance](http://www.dot.state.mn.us/bridge/maintenance.html) (<http://www.dot.state.mn.us/bridge/maintenance.html>).

Traffic Devices Operation and Maintenance

To increase freeway and arterial efficiency, reduce crashes and provide travelers with information we operate the [Regional Transportation Management Center](http://www.dot.state.mn.us/rtmc) (RTMC) (<http://www.dot.state.mn.us/rtmc>), support the Southern Regional Communication Center (SRCC), operate a central traffic signal control system, staff district traffic engineering offices, and provide an Electrical Services section and the Freeway Incident Response Safety Team. These activities provide travelers with current travel times and critical roadway information, including Amber Alerts and road condition information from our Roadway Weather Information System. We relay this information using changeable message signs, the Internet and telephones. We also maintain traffic signals statewide, install and repair signs and lights, stripe roads, install and repair guardrails, and maintain cable median barriers. See our websites for more information on [MnDOT Traffic Engineering](http://www.dot.state.mn.us/trafficing) (<http://www.dot.state.mn.us/trafficing>) and [MN 511](http://www.511mn.org) (<http://www.511mn.org>).

In order to gain the best outcomes from the existing transportation infrastructure we implement Transportation System Management and Operations (TSMO) strategies. These are operational strategies that increase safety by reducing the frequency, severity and clearance times of crashes that improve reliability, mobility, and efficiency by maximizing the existing roadway capacity and reducing recurring and non-recurring congestion. Examples of TSMO strategies include traffic incident management, traveler information, safety service patrols, ramp metering, optimizing traffic signal timing, work zone management, and road weather management.

Road and Roadside Maintenance

To keep roads safe and in good operating condition, we patch potholes, seal cracks, pave road surfaces, remove debris (including the Adopt-a-Highway program), repair or replace culverts, maintain roadway shoulders, and respond to flooding. Inspection programs help in reducing infrastructure risk as well as improved planning. We also measure highway smoothness and remaining pavement life to inform and prioritize our work. This information helps us make timely investments to prolong pavement life.

Maintenance crews mow, control noxious weeds, remove trees and brush, issue permits for public roadway activities like utility work, and maintain rest areas and weigh stations. See our websites for more information on [roadway vegetation management](http://www.dot.state.mn.us/roadsides/vegetation/index.html) (<http://www.dot.state.mn.us/roadsides/vegetation/index.html>) and [rest areas](http://www.dot.state.mn.us/restareas/) (<http://www.dot.state.mn.us/restareas/>). The state also owns more than 256,714 acres of right of way that is managed within the operations and maintenance activity.

In FY2018, MnDOT drafted a [Transportation Asset Management Plan](http://www.dot.state.mn.us/assetmanagement/tamp.html) (TAMP) (<http://www.dot.state.mn.us/assetmanagement/tamp.html>). The plan describes asset inventory and condition information, performance measures and targets, risks, financial plans, and life cycle cost assessments. These assessments help MnDOT evaluate the cost effectiveness of existing management and investment practices, and identify areas where process improvements can be made. The plan also acts as a vehicle for better integration between MnDOT's Capital Investment and Maintenance programs.

MnDOT collects operations and maintenance cost data and a broader range of asset inventory and condition information with the implementation of a statewide Transportation Asset Management System (TAMS). The software has been implemented for several of MnDOT's asset classes and operational activities and is functioning as expected. In the fall of 2017, MnDOT performed a statewide asset survey. The automated data collection and subsequent processing resulted in additional asset inventory information for numerous asset classes and will allow us to more actively manage a fuller range of assets; reducing risks, prioritizing high return services, and fully reflecting costs. The benefits of TAMS are seen in areas such as storing information on asset inventories and condition assessments or capturing labor, equipment and material quantities and costs via work orders for maintenance and operations work activities.

Snow and Ice

MnDOT's snow and ice activities include pre-storm preparation (including stockpile set up, equipment preparations and pre-treatment of roads and bridges), snow plowing and ice removal during storm events and post storm clean-up of snow and ice. For snow events, snowfighters are deployed across all areas of the storm.

Snow plowing on Minnesota's 12,000 miles of roads is expensive, labor intensive, and extremely tough on equipment. MnDOT maintains a flexible and responsive workforce to fight winter storms. During the winter, some employees may be reassigned from other areas of the department (such as construction or program planning and delivery) to plowing duties, or serve in a back-up snowfighter status. During harsh winters, MnDOT has historically found it necessary to redirect funds to the snow and ice effort from other maintenance functions like drainage, roadside maintenance and pothole patching.

In 2017, MnDOT received new statutory language that allows using unreserved Trunk Highway fund balance, instead of reducing other maintenance activities, for additional snow and ice needs in biennia where expenditures exceed 110 percent of biennial snow and ice expenditure estimates ([Minnesota Statute 174.57](https://www.revisor.mn.gov/statutes/cite/174.57) (<https://www.revisor.mn.gov/statutes/cite/174.57>)). In compliance with this statute, MnDOT has developed estimated biennial expenditure levels for snow and ice management for the FY 2018-19 and FY 2020-21 biennia of \$150 million (\$75 million/year). These estimates are based on historical average snow and ice management expenditures. In FY 2018, MnDOT expended approximately \$72 million on snow and ice management activities.

MnDOT maximizes its winter resources through proactive implementation of new technology. Snow plows are equipped with automated vehicle location (AVL) technologies, as well as a decision support tool which helps snowfighters make optimal decisions as to the plowing process and chemical usage. MnDOT's snow and ice performance measures are customer driven and based on extensive customer market research. See our website for more information on [snow and ice](http://www.dot.state.mn.us/maintenance/) (<http://www.dot.state.mn.us/maintenance/>) which includes the most current "Annual At - a Glance Winter report 2017-2018."

RESULTS

Bridges and Structures Maintenance Performance

MnDOT measures the timeliness of bridge inspections and of completing high priority reactive maintenance. The bridge fracture critical inspection goal is to complete 100 percent of inspections on time (98 percent for routine inspections). This goal exceeds the 95 percent target established in the National Bridge Inspection Standards.

The bridge maintenance goal is to complete 100 percent of high priority reactive maintenance on time. MnDOT has met this goal the last four years. Achieving this performance measure on time will ensure the safe function and structural health of the bridge, along with extending the service life of the bridge, saving time and money in the long run, and enhancing safety for the traveling public.

Traffic Devices Operation and Maintenance

MnDOT is a partner in the [Toward Zero Deaths Initiative](http://www.minnesotatzd.org/) (<http://www.minnesotatzd.org/>) to help reduce injuries and deaths on the highway.

**2017 Trunk Highway data is not complete as of July, 2018.*

Recurring congestion is minimized through a sophisticated traffic management system, while non-recurring congestion (crashes, stalls) is reduced through quick clearance response. MnDOT expects congestion to remain the same or increase as the region continues to grow. Since 2010, MnDOT's strategy has shifted away from reducing congestion toward providing alternatives to congested travel. MnPASS Express Lanes provide for cost-effectively improving the efficiency and sustainability of the region's highway and transit systems. MnPASS uses market-based, congestion pricing principles to manage travel demand during peak-travel times and provide a congestion-free option for transit, carpools, motorcycles and a fee-based option to solo motorists. Eighty percent of MnPASS users are either riding on buses or in a carpool. The typical MnPASS lane operates as a regular lane open to all traffic nearly 90 percent of the time.

Traffic incidents, like crashes, cause major congestion on the Twin Cities Metro area freeway system. Incident clearance time is measured on the system between 6 a.m. and 7 p.m. on weekdays. The target is incident clearance within 35 minutes to minimize delays. MnDOT has met this target for the past seven years.

Road and Roadside Maintenance Performance

MnDOT is committed to protecting, maintaining, and preserving our roads. In doing so, we maximize taxpayers' investments in better, longer-lasting roads for smoother, safer, and more efficient travel. MnDOT measures pavement cracking based on a surface ranking index that has a zero to four scale, with a four meaning no cracks. Typically, a rating of 3.2 or lower receives some sort of patching.

With the introduction of the asset management system, MnDOT will begin to accumulate more comprehensive asset, cost, and performance data. The availability of this information will allow development of additional performance measures and targets for roadside asset maintenance.

Snow and Ice Performance

To assess plowing performance, MnDOT evaluates each snow plow route after each snowstorm. The goal is to return the road to an acceptable driving condition in a prescribed amount of time (“time to bare lane”). The target time varies by the amount of traffic on the road. MnDOT’s goal is to meet the plowing target for each roadway 70 percent of the time in a season. MnDOT has met this goal in nine of the last ten seasons (FY 2009 was 67 percent). Winter weather severity varies significantly from year to year and from region to region.

Program: State Roads

Activity: Statewide Radio Communications

dot.state.mn.us/oec

dps.mn.gov/divisions/ecn/programs/armer/

AT A GLANCE

- ARMER System
 - More than 81,000 subscribers to the Allied Radio Matrix for Emergency Response (ARMER)
 - 333 of the planned 335 ARMER towers constructed and on the air
 - Systems availability is 97% (percent of time all sites are on the air and in service)
 - 550 tower leases with partners
- Radio/Electronic System Maintenance
 - 17 radio repair facilities statewide
 - 9,900 mobile and portable radios maintained for state agencies
 - 3,708 base station radios maintained for state agencies
 - 87 Road Weather Information System sites maintained across the state

PURPOSE & CONTEXT

Statewide Radio Communications builds, maintains, owns, and operates the Allied Radio Matrix for Emergency Response (ARMER) backbone. This is Minnesota's shared public safety radio communication system that provides around the clock interoperable radio communication service to multiple federal, state, and local agencies.

ARMER serves the day-to-day and emergency communication needs of MnDOT, the Department of Public Safety (DPS) and other state agencies, as well as the majority of local and regional law enforcement agencies. This includes fire, emergency medical, and public works services.

The system is a network of radio towers, equipment shelters, and radio transmission equipment which is shared by network users throughout the state. This is identified in the Statewide Radio Communication Plan maintained by the Statewide Emergency Communications Board (SECB).

Statewide Radio Communications strengthens relationships with all operating entities and stakeholders, including all 87 counties and their emergency services through meetings with the Regional Advisory Committees. We strive for operational excellence by providing wide area network coverage of the Interoperable system to its customers, of which there are more than 82,000 push to talk (where a radio initiates a call on the system) users/subscribers on ARMER.

SERVICES PROVIDED

Part of Statewide Radio Communications' investment and planning function is to provide overall electrical engineering direction for the strategic and tactical planning of wireless, voice and data systems for ARMER and other public safety or transportation applications (Road and Weather Information System (RWIS), automatic vehicle location (AVL), dispatcher console systems, audio loggers, remote site data connections, and camera systems). This includes electronic communication system engineering, design and construction expertise to offices and districts and other state and local agencies. Statewide Radio Communications also serve as public safety radio spectrum frequency advisor for the state of Minnesota.

Management of the system requires us to monitor, repair, upgrade and replace the radio communications infrastructure, facilities, base stations, and mobile and portable radios. The agency also provides maintenance for electronic equipment, such as road weather information systems. We manage private and public tower lease/rental space for antenna use statewide.

In working with other state and local agencies, including the Department of Public Safety and the Department of Natural Resources, we provide emergency service response for public safety electronic communications systems and shared expertise and technical services. As the lead agency, we provide Minnesota with the infrastructure and resources to allow its emergency responders to communicate with each other at any time regardless of the nature or scope of an event.

The ARMER system build-out is on schedule and on budget. Of 335 planned towers, 333 are complete. Land acquisition of the two remaining sites has been challenging. Construction is planned to be completed in 2019. The system is designed to provide 95 percent mobile level coverage by county (with the exception of the Boundary Waters and Lake of the Woods area as noted in the original plan). Mobile level coverage are radio mounted in a vehicle (typically a higher range) and Portable radios (handhelds) have a lesser range.

RESULTS

* Prior to 2015 system was under construction

Program: Local Roads

Activity: County State Aid Roads

dot.state.mn.us/stateaid/

AT A GLANCE

- 87 counties
- 30,739 miles of County State Aid Highways make up approximately 20% of all Minnesota roadways
- 5,781 bridges on the CSAH system
- 55,403 township road miles eligible for funding
- 6,220 township bridges eligible for funding
- Annually approved on average:
 - 495 CSAH projects
 - 200 federal aid projects
 - 70 bridge bond projects
 - 65 township bridge projects

PURPOSE & CONTEXT

State Aid for Local Transportation (SALT) provides customer service to Minnesota counties through distribution of the annual allocation from the Highway User Tax Distribution Fund (HUTD), general obligation bonding for local bridges and road improvements, and Federal Highway Administration funds.

A portion of funds from the HUTD are for construction and system maintenance on the County State Aid Highways (CSAH) system, with a small portion available to townships for maintenance and bridge replacement. The other funding sources are primarily for construction on the CSAH system.

Counties select construction projects and perform maintenance activities within their jurisdictions, which include identified roads within cities with a population of less than 5,000. SALT reviews and approves local individual construction plans for compliance with state and federal laws, standards, and rules.

In engaging our customers, we are able to assist in planning for, constructing, and maintaining the CSAH system. Through this work we are able to ensure the effective and efficient use of public resources for long-term investments that respond to the evolving needs of counties throughout the state.

SERVICES PROVIDED

Customer Service:

SALT builds relationships with county highway departments to plan, build, operate and maintain Minnesota's multimodal transportation system to maximize investments and optimize system performance. SALT administers local bridge and road improvement bond funds on a priority basis to supplement costly bridge replacement and improve safety and mobility on local roads. We also provide counties with technical resources and materials, such as crash record data. Financial customer service includes processing payments for construction projects, annual maintenance allotments, providing training, and procedural guidance. SALT maximizes resources by collaborating across jurisdictional boundaries and connecting agencies on common issues and improvements.

SALT reviews and approves construction plans along with project funding requests to ensure consistency with rules for State Aid operation. We collaborate with counties on construction, maintenance, and project delivery

costs, as well as project activities to provide the best value with limited resources. A small portion of the HUTD is used to support a research board made up of county engineers and State Aid employees. This board researches methods and materials for innovation and economical improvements for maintenance and construction.

Federal Aid:

SALT also acts as an agent for the local authorities in the administration of their federal construction contracts to fulfill the state's obligations for federal oversight of all local federal aid projects. We assist local agencies in completing the requirements for federal aid, including public involvement, small business participation and documentation to comply with environmental and historic preservation requirements.

Other HUTD Funding:

- Administration functions are funded from an allocation from the HUTD Fund established in statute at two percent of available funds.
- One percent of available funds are set aside for a disaster account to assist counties with extraordinary disaster costs when they arise.
- The State Park Road Account is an account that provides funding for access roads to state parks and recreational areas. These projects are selected by the Department of Natural Resources.
- The Town Road Account identified in statute is distributed from the HUTD Fund through the counties to township governments for maintenance of township roads.
- The Town Bridge Account is distributed to counties for the replacement of deficient township bridges through the five percent set aside from the HUTD Fund.

RESULTS

Safety

Safety on the CSAH system is measured in both the total number of crashes that occur and the number of serious crashes (fatalities and life changing crashes).

Note: In 2016, Minnesota revised the crash reporting system. The new system modified the classifications and definitions of injury severity bringing the State of Minnesota in compliance with the Federal Standards. As a result the 2016 Crash Facts saw a spike in the number of serious injuries. Due to the change in injury severity definitions, direct comparisons to historical data cannot be made.

Pavement Condition

Over the past six years, Pavement Condition – Ride Quality Index (RQI) has been on a downward trend in the percentage of pavement on the CSAH system that is rated in “Poor” condition based on the RQI.

Bridge Condition

The percentage of bridges rated in “Poor” condition has been decreasing since 2011.

Program: Local Roads**Activity: Municipal State Aid Roads**dot.state.mn.us/stateaid/**AT A GLANCE**

- 148 cities with a population greater than 5,000
- 3,752 miles of Municipal State Aid Streets (MSAS)
- 517 bridges on the MSAS system
- 223 MSAS projects approved on average per year
- 67 bridge bond projects approved on average per year

PURPOSE & CONTEXT

State Aid for Local Transportation (SALT) provides customer service to Minnesota cities with populations greater than 5,000 through distribution of the annual allocation from the Highway User Tax Distribution Fund (HUTD), general obligation bond proceeds for local bridges, and Federal Highway Administration funds. Primarily, HUTD funds are used for construction and system maintenance on the municipal state aid street system.

Cities select construction projects and perform maintenance activities. SALT reviews and approves individual local agency construction plans for compliance with state and federal laws, standards, and rules.

In engaging our customer we are able to assist in planning for, constructing, and maintaining the MSAS system. Through this work we are able to ensure the effective and efficient use of public resources for long-term investments that respond to the evolving needs of cities throughout the state.

SERVICES PROVIDED**Customer Service**

SALT builds strong relationships with municipalities to plan, build, operate, and maintain Minnesota's multimodal transportation system to maximize investment and optimize system performance. Minnesota's transportation system is vital for moving people and freight throughout the state. We administer local bridge bond funds on a priority basis to supplement costly bridge replacement on local roads.

SALT provides cities with technical resources and materials to deliver effective and efficient system improvements. Financial customer service includes processing payments for construction projects, annual maintenance allotments, providing training, and procedural guidance. We provide customer service through collaboration of agencies on common transportation system questions, concerns, and improvements.

Construction plans along with project funding requests are reviewed and approved to ensure consistency with the rules for State Aid Operation. State Aid collaborates with cities on their construction, maintenance, and project delivery costs, as well as project activities to provide the best value with limited resources. We provide assistance with identification of innovative and economical methods and materials to improve the transportation system.

Federal Aid

State Aid acts as an agent for the local authorities to administer the local federal construction contracts to fulfill the state's obligations for federal oversight of all local federal aid projects. We assist local agencies in completing the requirements for federal aid, including public involvement, small business participation, and documentation to comply with environmental, and historic preservation requirements.

Other HUTD Funding:

- Administrative functions are funded from an allocation from the HUTD Fund established in statute at two percent of available funds.
- Two percent of available funds are set aside for a disaster account to assist cities with extraordinary disaster costs when they arise.

RESULTS

Safety

Safety on the MSAS system is measured in both the total number of crashes that occur and the number of serious crashes (fatalities and life changing crashes).

Note: In 2016, the Department of Public Safety revised the crash reporting system. The new system modified the classifications and definitions of injury severity bringing Minnesota in compliance with the Federal Standards. As a result the 2016 Crash Facts saw a spike in the number of serious injuries. Due to the change in injury severity definitions, direct comparisons to historical data cannot be made.

Bridges

The percentage of bridges rated in “Poor” condition has decreased slightly since 2011.

AT A GLANCE

- Accounts for 1.5% of MnDOT's directly appropriated operating budget in FY18
- Processed 224,000 payments to all agency vendors in FY18
- Processed more than \$837 million in Construction & Right of Way payments in FY18
- Completed 322 data practice requests in FY18
- Administered 2,130 contracts in FY18
- Audited 434 contracts totaling \$169 million in FY17 and 465 contracts totaling \$127 million in FY18
- Resolved more than 1,000 cases by the Ombudsman's Office since the office was established in 2008
- 12.8 million unique visitors to the MnDOT website and more than 126,000 email subscribers in FY18
- More than 44,000 Facebook followers and 50,000 followers of agency's two primary Twitter accounts in FY18

PURPOSE & CONTEXT

Agency Services directs the department's administrative, financial, technology, human and capital resources, audit, public engagement, policy, and legal compliance and counsel for the agency. Agency Services ensures that activities are based on sound policy, federal and state compliance measures are in place, and proper accounting procedures are used in handling federal, state, and local funds. This activity also includes all aspects of planning for, employing, and servicing a diverse and talented workforce of 4,979 full time equivalent employees (as of FY18).

SERVICES PROVIDED

Human Resources/Workforce Development services provide a full range of human resource management and staffing services, workforce development and training, recruitment and retention, labor relations, policy development, employee insurance and benefits, consultation, planning, and oversight of human resources services.

General Administrative Support incorporates a range of services including emergency management and continuity of operations, occupational safety and health services, workers compensation, materials management, business improvement process, publishing and design, business services, building and facilities operations, purchasing and payables, employee services, mobile device management, security, mail, document services, and administrative business rules.

Financial services include statewide financial planning, accounting, payroll services, forecasting, analysis, budgeting, and management of federal, state, local, and bond funds. Financial services also include management of our internal control program, Safeguarding MnDOT.

Technology Investment Management provides leadership and management of agency wide information technology plans, resources and investments, in addition to assuring collaboration with the Chief Business Technology Officer (CBTO) for IT staff and services at MnDOT.

Organizational Planning and Management (OPM) provides leaders with tools and practices that advance the strategic management of operating resources. OPM is focused on delivering and supporting implementation of the 5-Year Strategic Operating Plan and district and office business plans.

Audit includes internal auditing of our operations, external auditing of contracts and coordinating with the Office of the Legislative Auditor. Audit ensures costs are paid in compliance with laws, rules, and regulations, and that contracts are administered properly and efficiently.

Legal services includes providing legal counsel to the commissioner, transactional legal assistance to all offices and districts, and coordinating legal support from the Office of the Attorney General. Legal Services manages agency compliance with the data practices act, the official records act and the open meeting law. It also produces documents for litigation, and reviews and approves MnDOT contracts.

Public Engagement and Constituent Services promotes continuity across the department's statewide public participation efforts by monitoring engagement practices, cultivating partnerships, capturing customer feedback and aligning resources to ensure a positive customer experience. This allows those served and impacted by MnDOT's work to have a participatory role in shaping decisions and identifying priorities to advance transportation policies and projects.

Communications provides clear, reliable, and timely information to diverse audiences about transportation projects, initiatives, and policies. This is accomplished across a variety of communication channels, including traditional news media, email, websites, events, video and print publications, and through messages in plain language with a consistent MnDOT brand.

Diversity & Inclusion includes compliance with non-discrimination laws, affirmative action programming, organizational development, building inclusive work environments, and training for increased cultural competence.

Ombudsman services provide a neutral, informal, and independent resource to help the public and MnDOT resolve over 100 cases annually by focusing on common interests, generating issue-specific options, and making recommendations for resolution.

Government Affairs facilitates communication between the department and elected officials, ensuring policy changes and legal authority are enacted to enable efficient operation of the department and the transportation system. This also includes close coordination with tribal governments and training for state officials in tribal/state relations.

RESULTS

MnDOT leadership is in the process of implementing our Strategic Operating Plan (SOP), which will translate long-term policy plan objectives into actionable strategies. These strategies reflect our highest priority goals, align our long-range vision with near-term actions and identify performance metrics to monitor progress. The SOP will also guide resource decisions and better align efforts across the agency to achieve our vision and mission. Priorities identified in the Strategic Operating Plan are intended to advance three broad goal areas:

- Customer Trust
- Operational Excellence
- Workforce Excellence

Safeguarding MnDOT, the agency's internal control program, ensures agency goals are achieved while avoiding fraud, waste, and abuse of resources. Minnesota Management and Budget has approved our internal control certification annually since FY10.

We continue to work on strategic staffing and workforce development plans to identify skills and competencies needed for our future workforce. With a 5.8 percent turnover rate for fulltime permanent employees, we are far below the industry standard of 10 percent. Some of our strategies for building a more diverse workforce include targeted recruitment efforts, internships and student worker positions, and Employee Resource Groups.

The Office of Public Engagement and Constituent Services (PECS) provides market research services for MnDOT to capture the voice of the customer and share insights with policymakers and technical staff to better understand:

- the experiences and perceptions of MnDOT’s customers and stakeholders;
- community members’ perceptions of agency communication, engagement, and project management efforts during large construction projects; and
- public opinions about MnDOT’s performance in delivering key transportation services such as building and maintaining roads and bridges; removing snow and ice from roads; making roadways safe; and communicating reliable and accurate information about transportation planning and projects.

Results from MnDOT’s most recent statewide public opinion tracking study in 2017 of over 1,400 Minnesotans indicate that seven in ten Minnesotans rate MnDOT’s performance of delivering our mission favorably. Additionally, trust in MnDOT has remained strong over the years, particularly for prioritizing roadway users’ safety and delivering Minnesota’s transportation system - with 88 percent and 87 percent (respectively) agreeing that MnDOT prioritizes roadway users’ safety and can be relied upon to deliver Minnesota’s transportation system.

**Trust in MnDOT -2017 Public Opinion Study
(Agree Somewhat and/or Agree Strongly)**

In addition to the public opinion tracking study, PECS also administers MnDOT’s customer experience survey to those who have requested general information from MnDOT and/or specific assistance from the Ombudsman program. In 2017, 78 percent of customer experience survey respondents rated MnDOT’s time for initially responding to their inquiry as meeting or exceeding their expectations for timeliness. In addition, 85 percent rated the responses from MnDOT as meeting or exceeding their expectations for quality.

Since the function was enacted in statute in 2013, Ombudsman staff have consistently gathered and provided information to the general public while also facilitating discussions and mediating conflicts when appropriate. Common topics for investigation include construction, maintenance, traffic signals, signage, and noise.

One of the ways we build public trust and confidence is through sound financial management practices. Our Office of Financial Management ensures adherence to legislatively approved budget and internal policies that promote effective stewardship of transportation dollars. These policies relate to:

Program: Agency Management

Activity: Building Services

dot.state.mn.us/maintenance/facilities.html

AT A GLANCE

MnDOT owns and operates 1,075 individual buildings (of which 187 are radio equipment shelters) at 269 sites with the total area of buildings measuring over 6.6 million square feet, including:

- 133 truck station sites (an addition 4 truck station sites are leased)
- 18 regional headquarters and maintenance sites
- 5 special service sites: MnROAD Research Facility, Arden Hills Training Center, Central Shop, Maplewood Materials Lab, and the Aeronautics building
- 193 salt and sand delivery sites (an additional 4 salt and delivery sites are leased)
- 68 rest area buildings
- 6 weigh stations

PURPOSE & CONTEXT

MnDOT facilities are located throughout the state to enable prompt and efficient service to the traveling public. MnDOT District Facility Management staff oversee operations and maintenance of these buildings. MnDOT Building Services provides planning, design and construction contract administration for building repairs, improvements, additions, and new construction.

The efforts of both groups support the core mission of the department, as well as the other state agencies and local partners that are co-located at MnDOT facilities. Our agency objective is to plan, build, and operate facilities effectively and efficiently. We continue to manage our resources strategically in an effort to ensure that our facilities provide safety and security of our assets, employees, and the travelling public.

SERVICES PROVIDED

Building Services provides the following services:

- Long-range program planning and scoping
- Building programming and pre-design services for new and renovated buildings and sites
- Scheduling new facility projects
- Hiring and overseeing consultants for large capital and specialty projects
- Preparing design and construction documents, bid letting and administering construction contracts
- Program planning and management for emergency building repairs
- Managing and tracking building energy use
- Maintaining building data to track building conditions and deferred maintenance
- Research projects on water use and wastewater treatment
- Ensure facilities are safe for staff and are accessible and strategically located throughout the state to efficiently deploy services

The truck station network is the center of MnDOT's maintenance and operations program. Agency facilities are strategically located across the state so customer needs, especially snow and ice operations and system emergencies, can be addressed promptly. These facilities provide building space for staff, equipment and materials, including snow plows and salt. MnDOT often shares space with other state agencies or local governments to take advantage of opportunities to reduce costs.

MnDOT Building Services is financed by a direct appropriation from the Trunk Highway Fund which is used for salaries, consultant contracts, asset preservation, and small capital projects. Large capital projects are typically funded by Trunk Highway bonds. Building Services staff deliver 120 - 150 projects and manage approximately 50 consultant contracts per year.

Planning, scoping and budget development services: During the annual building budget process, MnDOT reviews and plans for future building space requirements. The Facilities Investment Plan provides the framework for project delivery for the next four years. In addition, 10 and 20 year plans offer a longer range view. These timelines align with concurrent highway planning efforts.

The Facilities Investment Plan is driven by operational deficiency evaluations and data captured in the Enterprise Real Property Facilities Condition Assessment (FCA). This information is used to assist decision makers in prioritizing capital projects of all sizes, including district headquarters, truck stations, and specialty buildings. Other processes identify annual maintenance and repair projects, which require licensed architects and engineers to develop plans and specifications.

Professional architecture and engineering services: MnDOT's architects and engineers perform or oversee all aspects of building design and construction. This includes conceptual design through preparation of contract documents, bidding and construction contract administration. Building Services is adopting the same project scheduling tool that MnDOT uses to manage bridge and highway projects. This tool should improve project delivery in multiple ways; lettings will occur at the most favorable time of the year, construction will commence as soon as weather permits, and district customers will be able to track project start dates and schedules.

Building Operations and Maintenance: MnDOT Building Services develops and enforces facility standards, building codes, regulatory requirements, and partnership agreements with political subdivisions. This includes the administrative functions associated with custodial work, supplies and services, and telecommunications support.

Results

During the FY 2018-19 biennium the design or construction of the following building projects will be completed:

Regional Headquarters: District 6 Rochester radio shop and lower level conference center; District 2 Crookston warm storage addition

Truck Stations: Granite Falls Truck Station addition; Evansville Truck Station replacement; Wheaton Truck Station; Oakdale Welding Shop; Mankato unheated storage building; Oakdale sign shop replacement

Safety Rest Areas: Straight River Northbound; Goose Creek; Clear Lake; Des Moines River

Facility Condition Assessments (FCA)

MnDOT is one of 19 state agencies implementing a program of periodic FCAs. The FCAs, combined with operational functionality assessments of buildings and sites, allow MnDOT to make data driven building investment decisions and inform the development of the 4, 10, and 20 year plans. The continuous assessment and evaluation of our building stock allows us to target asset preservation dollars where they will do the most good and maximize the value of our existing resources.

The initial assessment of 884 MnDOT owned buildings established a baseline condition for each building which will allow us to track building condition changes over time. The assessments are updated every three years on a rolling basis. As of July 2018, 129 buildings are rated excellent, 415 are rated good, 263 are rated fair, 58 are rated poor, and 19 are rated crisis/emergency.

The current replacement value of all our buildings is approximately \$1.27 billion and the FCA algorithmically derived deferred maintenance is approximately \$186 million. Both numbers are generated using the Department of Administration's standardized FCA Program. Deferred maintenance is the total of essential, but unfunded, facilities maintenance work necessary to bring facilities and collateral equipment to the required acceptable facilities maintenance standards. This is the total work that should be accomplished in order to maintain the

facilities but that cannot be achieved within available resources. It does not include new construction, additions, or modifications. Deferred Maintenance does include unfunded maintenance requirements, repairs, and replacement of obsolete items.

Aging Infrastructure

The expected service life of a MnDOT truck station facility is 50 years. At the current replacement rate of two truck stations per year, we are operating on a replacement cycle of approximately 70 years. As the graph below indicates, many of our buildings have already exceeded their expected service life. Over half of the 133 existing truck stations are more than 30 years old and will be candidates for replacement within the next 20 years.

Building Energy Management

MnDOT continues to utilize the State's B3 (Buildings, Benchmarks, and Beyond) Energy Benchmarking Tool, which contains utility consumption data from 98 percent of MnDOT sites. This data is analyzed on an ongoing basis to ensure that our buildings use energy in the most efficient way possible. As of 2017, building energy use per square foot was 17.5 percent lower during the most recent 12 months of complete data than in the baseline year of 2008 (weather normalized). MnDOT's [Sustainability Report](http://www.dot.state.mn.us/sustainability/docs/2017-sustainability-report.pdf) (<http://www.dot.state.mn.us/sustainability/docs/2017-sustainability-report.pdf>) outlines our sustainability efforts and performance targets. It is used to support strategic direction and oversight for sustainability activities.

MnDOT Building Services also identifies and implements energy efficiency improvement opportunities and renewable energy measures. Specific initiatives include web-connecting building automation systems to monitor facility operational trends and adjust statewide mechanical systems from any remote location. Other efforts include assessment and recommissioning of existing equipment based on data provided by the automation systems and replacement of outdated and over-sized equipment with energy efficient upgrades.

Narrative

Please provide a brief narrative overview of all the agency's federal funds to give a general overview of the role of the federal funds within the agency. The narrative should be written in plain language. Also, include the following information, where applicable:

1. **For new grants, provide a narrative description of the short-and long-term commitments required, including whether continuation of any full-time equivalent positions will be condition of receiving the federal award.**

The major federal fund accounts include federal grants revenue deposited in the federal fund either on an advance or reimbursement basis. Federal Highway Administration (FHWA) federal aid, the agency's largest federal program, is on a cost reimbursement basis, with a significant portion of program reimbursements deposited directly into the Trunk Highway Fund for the department's state road construction program.

2. Maintenance of effort levels (MOE)

Programs funded by federal dollars are also support by state dollars. State funds would continue to support the programs In the event federal funding ended.

3. Changing funding levels or trends that may impact future awards

The current federal authorization act known as FAST Act ends on September 30, 2020. While the federal government has never reduced the major federal transportation spending programs in the past, the potential for Minnesota to receive less federal funds in the future is increasingly likely. A major stumbling block for the FHWA and Federal Transit Administration (FTA) is the insolvency of the Federal Transportation trust fund, both the Highway and Transit components and the unwillingness of legislators to come together on funding sources to solve the problem. If new funding sources are not identified, at some point legislators may be forced to reduce the level of federal participation in Transportation. In the past transitions between federal authorization acts have resulted in a series of short continuing resolutions that interrupt the flow of federal reimbursement to the state trunk highway fund.

4. Major state funding related to federal awards

Federal funds are matched by varying state funds depending on the program. For example, the major FHWA program is matched by a combination of trunk highway fund, municipal and county state aid funds, and local government funds depending on the project. The major Federal Aviation Administration program is matched by local government funds and state airport funds. General funds, revenues from the motor vehicle sales tax and local government funds match the federal funding from the FTA programs. The regular formula federal funds are typically split 80% federal 20% state.

5. Basis for estimates

Estimates are based on the best funding information currently available to MnDOT program managers. Overall, federal funds anticipated during the FY 2020-21 biennium are relatively consistent with the FY 2018-19 biennium.

2020 - 2021 County and Municipal Turnback Account Budget

January 2019 update

Data provided by MnDOT State Aid Office

List of projects likely to be funded required by MN Laws of 2017, 1st Special Session, Chapter 3, Article 3, Section 19

<https://www.revisor.mn.gov/statutes/cite/161.081>

(h) As part of each biennial budget submission to the legislature, the commissioner must: (1) describe how the money in the flexible highway account will be apportioned among the county turnback account, the municipal turnback account, the trunk highway fund for routes turned back to local governments by agreement, the highway safety improvement account, and the routes of regional significance account; and (2) specify the turnback projects likely to be funded with the amounts available in the county turnback account and municipal turnback account, and provide the cost associated with each project.

Uniform Laws Commission

Agency Profile 1

Agency Expenditure Overview 3

Agency Financing by Fund 4

Agency Change Summary 5

Change Item(s) 6

Operating Adjustment 6

AT A GLANCE

- Eleven Commissioners, as members of the National Conference of Commissioners on Uniform State Laws (ULC), volunteer their services to draft uniform acts for adoption by the states and promote their adoption in Minnesota.
- Minnesota adopted two uniform acts in the past two years and has over 85 currently in statute.
- Commissioners worked with legislators and stakeholders to secure adoption of uniform acts.

PURPOSE

Eleven unpaid Minnesota Uniform Law Commissioners work with Commissioners from other states, the District of Columbia, U.S. Virgin Islands and Puerto Rico to prepare uniform acts that address complex and technical issues of commercial and other private law for introduction in their legislatures. Uniform acts establish the legal framework for economic growth, trade, and business development, criminal justice, and support the rule of law and federalism.

- Uniform acts enable states to carry out their responsibilities by providing rules and procedures that are consistent from state to state but that also reflect the diverse experience of the states, preserving the role of state law in our federal system.
- Uniform acts provide the legal framework to support stable families and communities.
- The ULC keeps state law up-to-date by addressing important and timely legal issues.
- Uniform acts promote efficiency by reducing the need for individuals and businesses to deal with different laws as they move and do business in different states.
- The ULC's work facilitates economic development and provides a legal platform for U.S. citizens and businesses when dealing with foreign citizens and entities.

Historical Spending

Source: Consolidated Fund Statement

The total FY 2017 budget of \$84,000 was provided by a general fund appropriation. Funding is used to pay dues to the National Commission and expenses incurred by Minnesota Commissioners attending the annual conference.

STRATEGIES

Minnesota Uniform Law Commissioners donate hundreds of hours of their time and legal and drafting expertise every year as a public service, and receive no salary or compensation for their work.

ULC's deliberative and uniquely open drafting process draws on the expertise of commissioners, but also utilizes input from legal experts, and advisors and observers representing the views of other legal organizations or interests that will be subject to the proposed laws.

Drafting committees prepare acts for debate and approval at annual meetings. Each drafting committee meets two to three weekends per year, usually for two and one-half days. Drafting an act typically takes three years. Before an act is approved and promulgated, it is read line-by-line, scrutinized and debated by the entire Uniform Law Conference at two annual meetings.

Minnesota commissioners fulfill their statutory responsibilities by participating in the development, drafting, approval and promulgation of uniform acts. Commissioners do this by (1) serving on drafting committees that prepare acts, (2) participating in the mandatory annual meeting at which proposed acts are debated, amended and approved, (3) promoting adoption by the legislature, and (4) securing support from people and organizations interested in an act such as the Minnesota State Bar Association. Minnesota commissioners have been chosen leaders of the ULC serving as presidents, chairs of the Executive, Scope and Program, and Legislative committees, chairs of drafting committees and continue to serve on study and drafting committees. Commissioners develop a legislative agenda for each legislative session.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Result	Acts adopted by the legislature 1892-2016. Over 155 uniform acts have been adopted since 1892. Over 94 are currently in effect.	N/A	155	Before 2017
Result	Minnesota Commissioners secured adoption of the following Uniform Acts in 2017 and 2018: 1. Revised Uniform Law on Notarial Acts. 2. Revised Uniform Athlete Agents Act	9	2	2015-2016 2017-2018

M.S. 3.251-.253 (<https://www.revisor.mn.gov/statutes/?id=3.251>) provides the legal authority for the Uniform Laws Commission.

Recommendation:

The Governor recommends additional funding of \$10,000 in the FY 2020-2021 biennium to maintain the current level of service delivery at the Uniform Laws Commission. The changes include an expected increase in Minnesota dues to the National Conference of Commissioners on Uniform State Laws (ULC) and expected increases in commissioner travel costs to attend the FY 2020 and FY 2021 annual meetings

Rationale/Background:

The work of the ULC assists the states in performing their responsibilities in our federal system of government. It drafts well developed, functional, effective, and uniform acts to address problems with national and international implications. ULC acts integrate important changes in complex legislation governing commerce, entities such as corporations, partnerships, limited liability companies and others, enforcement of judgments, and child support acts that are required for states to receive federal funds.

By adopting ULC acts, states establish uniform standards that national and international organizations and businesses need to operate efficiently. The uniform acts are carefully drafted over two or more years with the participation of all stakeholders. In the absence of uniform state standards these organizations and businesses do seek federal legislation to establish a single standard, preempting the role of states in our federal system.

Commissioners volunteer their time and receive no compensation. They serve hundreds of hours on study, drafting, and other conference committees, and in seeking adoption by the legislature. Since Minnesota became a member of the Conference it has adopted 157 uniform acts.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services.

Commissioners' duties and responsibilities remain the same each year. This is not a new initiative or change to an existing program. No additional staff is needed. Current annual dues of \$60,600 are expected to increase 1% each year. Travel expenses are based upon the contracted hotel rates and the estimated air fares based upon current ticket prices to the conference cities. Air fares vary considerably by city and are expected to increase. The annual meetings will be held in Anchorage in 2020 and Madison in 2021. Annual meeting registration costs are expected to remain the same at \$600 per commissioner.

Commissioners will continue, as they have done, to present 4-6 uniform acts each session to the legislature for its consideration and adoption. Commissioners work extensively with the legislature to obtain authors, hearings, and passage of acts.

Commissioners have a statutory obligation and duty to participate in the annual meeting. The funds are necessary to support this obligation. Unless commissioners volunteer their time, participating in drafting committees and the annual meeting, the work of the ULC cannot be performed and problems will not be addressed.

Commissioners serving on a drafting committee will spend 2-4 weekends per year in a conference room drafting an act. The typical drafting committee meeting begins early Friday morning and runs through Sunday noon.

The ULC drafts acts that address significant state, national and increasingly international problems. To the extent that the legislature adopts them the rationale for federal legislation is undercut and Minnesota continues to have the benefit of this significant resource of uniform acts that effectively addresses evolving state problems.

The ULC promulgates new acts at its annual meeting each year and proposes them to the states for adoption. Each year commissioners bring to the legislature the uniform acts and seek adoption. This occurs during the legislative session. At the same time the ULC continues to study new issues and to make decisions to create committees to address these developing issues.

Results:

Results are measured by the number of acts passed and how well the acts work. Minnesota has adopted over 157 uniform acts since 1892 and over 80 are currently in force. In calendar years 2017 and 2018 two acts were signed into law.

AT A GLANCE

- Five Campuses (Crookston, Duluth, Morris, Rochester, Twin Cities)
- Seven Research and Outreach Centers throughout the state
- Budget: \$3.8 billion (FY18)
- 20,389 faculty & staff; 6,511 graduate student & professionals in training employees (as of 10/17)
- Enrollment: 67,949 (Fall 2017 Total)
 - 44,544 Undergraduate
 - 13,283 Graduate
 - 3,860 First Professional
 - 6,262 Non-Degree
- Degrees awarded: 15,985 (2017)
- Sponsored research awards: \$793 million (FY18)

PURPOSE

The University of Minnesota's statutory mission is to offer undergraduate, graduate, and professional instruction through the doctoral degree and be the primary state supported academic agency for research and extension service (MN Statute 135A.052). The University's mission is threefold: research and discovery, teaching and learning, and outreach and public service. The University of Minnesota is the state's only land grant and research institution, and has a unique responsibility to better the lives of Minnesotans. As one of the nation's top research institutions, the University is a venue where human talent, ideas and innovations, and discoveries and services converge to fuel Minnesota's economy and improve our quality of life. In carrying out its mission on five campuses and research and outreach centers throughout the state, the University contributes to all eight of the state's outcome areas through knowledge generation and by providing services, but advances most directly the following statewide outcomes:

- A thriving economy that encourages business growth and employment opportunities
- Minnesotans have the education and skills needed to achieve their goals;
- All Minnesotans have optimal health; and
- Sustainable options to safely move people, goods, services, and information.

BUDGET

**Spending by Category
FY 17 Actual**

Source: University of Minnesota, General Ledger

Historical Spending

Source: University of Minnesota, General Ledger

The University's FY18 \$3.8 billion budget is based on revenue support from a variety of sources: tuition (26%), state appropriation (18%), sponsored research grants from federal government and other sources (15%), philanthropy and contracts (17%), miscellaneous income from sales, fees, etc. (14%) and auxiliary business operations (10%). The University's budget includes funding for the Crookston, Duluth, Morris, Rochester, and Twin Cities campuses as well as seven research and outreach centers, fifteen regional Extension offices, a multitude of research institutes, and MN Extension staff in every county in the state. The University uses its State appropriation for all aspects of the University system.

Although the University is dependent on its partnership with the State of Minnesota to continue to succeed, this partnership has changed significantly over the last two decades. In 1996, the State's portion of the University's total tuition plus state appropriation was 70%. In 2018, the State's portion of that same total was 43%. As a percent of total revenues (including gifts, sales, grants etc.), the State's portion has dropped from 32% to 18%. Although the University has continued to serve more students and improve student success, ongoing State operating support for the University has declined since its 2008 peak and as a result, the University has become more dependent on tuition and other revenue sources and has greatly enhanced its efficiency to achieve success.

STRATEGIES

In recent annual operating budgets, the President and the University of Minnesota Board of Regents have focused revenue and spending plans on achieving the goals of Access, Affordability, Academic and Operational Excellence, and Accountability. In fall 2016, the University began system wide strategic planning to better align its resources and leverage system strengths - a system including five unique campuses and an array of Extension and Outreach centers and services effecting people statewide. As examples, the University will capitalize on the following:

- **Crookston Campus:** Known for its focus on experiential learning for its campus-based students, the University of Minnesota Crookston is also one of the nation's pioneers in online and distance education.
- **Duluth Campus:** The University of Minnesota Duluth is a highly-ranked, regional research and liberal arts university with a global reputation for freshwater research. With over 160 majors and minors and eight pre-professional programs, UMD offers an expansive array of high-quality academic choices for students. In addition, UMD's Large Lakes Observatory is the only institute in the country dedicated to the study of large lakes throughout the world.
- **Morris Campus:** The University of Minnesota Morris is a nationally ranked, undergraduate-focused liberal arts campus with a deep commitment to environmental sustainability and diversity. The "Morris experience" emphasizes faculty-student collaborative research, study abroad opportunities, and service learning.
- **Rochester Campus:** The University of Minnesota Rochester prepares health science professionals and maintains unique collaborations with world-renowned medical organizations in the community. This includes high quality, more individualized instruction. To date, 100 percent of Rochester's Bachelor of Science in Health Professions graduates have passed the exams for their professions and are employed in their chosen fields.
- **Twin Cities Campus:** The University of Minnesota Twin Cities campus is the University's flagship campus and is one of only five campuses in the country with schools of engineering, medicine and veterinary medicine, law, and agriculture on a single campus. Because of the Twin Cities campus size and scope of programs, unique opportunities exist for interdisciplinary education, research, and outreach. The Twin Cities campus will continue its excellence in:

- Education: The Twin Cities campus attracts high caliber students from across the globe due to its world-renowned faculty and staff. As an example, 84.3 percent of freshman are admitted from the top 25 percent of their class and the average freshman ACT score is greater than 28.
 - Research: Twin Cities campus faculty led Forbes magazine to name Minneapolis one of the top 10 innovative cities. Examples of innovations include: the invention and patent of the “black box” flight recorder in the United States; the development of Ziagen, one of the world’s most effective AIDS drugs; medical firsts such as the first open-heart surgery and first pancreas and human bone marrow transplants, and nearly 30 new apple varieties including the beloved Honeycrisp.
 - Outreach: The Twin Cities campus continues its vast array of outreach efforts through initiatives and partnerships such as its mobile dental clinic and the Community-University Health Care Center partnership.
- **Minnesota Extension:** Extension researchers and educators engage individuals and organizations in asking the challenging questions to discover science-based answers that make a difference. As an example, Extension’s Regional Sustainable Development Partnerships serve Greater Minnesota with 145 active sustainable development projects across the state.

To capitalize on these strengths, President Kaler charged a System wide Strategic Planning Committee to develop a plan to benefit students and citizens across the state and to articulate the common values, processes, and expectations across campuses. Through this process, the Committee developed a System wide Strategic Framework. The Board of Regents adopted the Framework in June 2017. The Framework highlights ways to better connect, leverage, and align the system’s distinctive statewide resources. The Framework is available at https://president.umn.edu/sites/president.umn.edu/files/swsp_framework.pdf.

Later that fall, President Kaler subsequently charged the System wide Strategic Planning and Oversight Committee to lead the development of system priorities in focus areas that align with the University’s mission and System wide Strategic Framework. This work will yield an academic program investment strategy and a long-term financial framework with the following focus areas: Teaching and Learning; Research and Discovery; Outreach and Public Service; Medicine and Health; and Supporting the Mission.

Through these strategic planning efforts, the University will make decisions on investments that strengthen student success, enhance knowledge transfer between the University and Minnesota and communities and businesses, build upon research opportunities affecting Minnesotans, and align the University’s health sciences work with Minnesota’s health policy and workforce needs. The University is committed to providing high-value education and research to improve outcomes for all Minnesotans and to optimize communications with Minnesota communities to deliver useful, actionable information to stakeholders.

RESULTS

The University pursues excellence in education, research, and outreach to produce discovery and innovation that improves the lives of individuals and communities throughout our state and world. The University’s inspired and motivated community of faculty, staff, and students and its strong sense of purpose drives the focus on continual improvement. To help chart its progress on providing high-value education, research, and public engagement services, the University measures and tracks its progress on a variety of results-based performance measures. The Board of Regents adopted the measures in the spring of 2016, which are showcased on the University’s Progress Card. The Progress Card helps the Board of Regents focus oversight on a limited number of strategically measurable outcomes (Gold measures), which have quantifiable goals for 2021. These measures track the University’s progress on improving graduation rates (four-year by campus, six-year by campus, Pell-eligible students systemwide), average freshman ACT on the Twin Cities campus, institutional gift aid, R&D expenditures, Medical School ranking, faculty awards, participation in the employee engagement survey, and progress on the University’s operational excellence goal.

The University has made progress on many of these measures over the last several years, which helps to exemplify the University's commitment to providing high-value services:

- Graduation rates for a variety of different student groupings have increased over time, resulting in a financial gain for students through lower total spending on tuition/fees/housing/debt and earlier entry into the workforce;
- Twin Cities campus ACT scores have increased indicating the campus is attracting high quality students who have the best chance to succeed academically at the University of Minnesota;
- Institutional gift aid has increased showing an increase in support for students;
- R&D expenditures have increased indicating the University's continued role in producing high-value research for Minnesota and the world; and
- The University continues to meet its administrative cost reallocation goals, which highlights the University's commitment to administrative efficiency.

Each of these measures is an indication that the University is providing a greater and greater value to Minnesotans each year.

The Progress Card also provides insight into important trends (Maroon measures), that are a signal of institutional strength. These items are important to monitor, but the University alone cannot significantly influence them. They include measures such as the Twin Cities transfer student 3-year graduation rate, number of graduate and professional degrees awarded, median undergraduate debt at graduation, students of color with a favorable sense of belonging on campus, national research ranking, among others. The full set of measures can be found at: <https://oir.umn.edu/planning-metrics/progress-card>.

The University also publishes annually the "University Plan, Performance, and Accountability Report" (<https://conservancy.umn.edu/handle/11299/174174>), which reflects the institution's progress against its key strategic goals and identifies areas for improvement. This report is required under the University's charter, 1851 Territorial Laws, Chapter 3, Section 16, where it states that "[the regents shall] make a report annually, to the Legislature...exhibiting the state and progress of the University...and such other information as they may deem proper, or may from time to time be required of them."

Minnesota Statutes 137 (<https://www.revisor.mn.gov/statutes/cite/137>) provides the legal authority for the University of Minnesota.

Net Fiscal Impact = (Expenditures – Revenues)	16,865	34,168	34,168	34,168
FTEs	0	0	0	0

Recommendation:

The Governor recommends an increase of \$51.034 million in FY 2020-2021 and \$68.336 million in FY2022-2023 to the University of Minnesota. This funding will support all five campuses and the University of Minnesota's core missions of research and discovery, teaching and learning, and outreach and public service.

Rationale/Background:

In the FY2019 approved operating budget for the University of Minnesota, revenues are estimated to be \$3.8 billion. Within that total, individual sources of revenue differ as to how restricted they are (purpose and use dictated by external source), and in terms of opportunity for growth necessary to cover cost increases. Thirty-five percent of the University's revenues are restricted by the source and cannot be used at the discretion of leadership to pay for general operations. Twenty-four percent is directly related to sales and miscellaneous revenue-generating activity, such as the bookstores, parking, sales of educational goods and services, course fees, etc. where the revenues pay for the direct costs of the associated goods and services. These sources are largely not available to cover general operations. The final forty-one percent of the University's revenues are from the Operations and Maintenance (O&M) state appropriation and tuition: unrestricted and relied upon to support a wide range of the University's general cost of operations across the teaching, research and public service missions. The only way these general operating revenues grow to cover cost increases is by a decision of the Board of Regents to increase tuition or a decision by the state of Minnesota to increase the University's O&M appropriation.

Within this context, the University remains committed to minimizing tuition rate increases for resident undergraduate, graduate, and professional students. However, general operating costs (salaries, healthcare, facility and technology costs, library materials, equipment, etc.) continue to grow with inflation running at 2.7% (CPI-August) and 3.7% (Higher Education Price Index-2017). There is a level of internal reallocation that can be sustained every year with little impact to University priorities, but if tuition revenue is significantly constrained and the state O&M appropriation remains flat, the total reallocation necessary to address cost increases and needs can reach a level of magnitude that requires some very difficult choices on the part of the University:

1. Raise tuition on students at rates at or above inflation in order to maintain the current scope of quality programs;
2. Reduce the breadth and depth of the University's impact but maintain quality; or
3. Maintain the current scope of the University's work but sacrifice quality in some areas of the institution.

Key variables in evaluating those choices include the following:

- **Excellence:** Excellence in education, research, and outreach is the University's top priority. This drive to excellence is apparent in the University's progress on its metrics, which can be found at: <https://oir.umn.edu/planning-metrics/progress-card>. The key components to generating such high-level results are recruiting and retaining world class faculty and staff, and supporting equipment and facility needs for the instruction and research activities that take place on all five campuses. To simply maintain the current scope of activities, inflationary costs related to personnel (including health care benefits) and infrastructure must be addressed.
- **Commitment to Controlling Costs:** Over the last six years, the University reduced administrative costs by \$90 million in order to pay for inflationary cost increases University-wide. These reallocations were critical from an efficiency and effectiveness standpoint. Over 70% of implemented cost reductions involved the elimination or restructuring of employee positions. Of the remaining reductions, many involved deliberate decisions to get by with less: supplies, travel, development opportunities, equipment replacement and so forth. Across the University, units are "working smarter," such as in the example of transitioning from departmental-level desktop support functions to a model of centralized University-wide support for improved consistency and efficiency across the entire University system. Although reallocations will remain one of the University's key budget balancing tools, the University cannot rely on reallocations alone to balance its budget without impacts on quality or scope of operations.
- **Infrastructure and Compliance Cost Pressures:** The University has experienced annual cost increases in significant areas of general operations. For example, annual cost increases in the millions of dollars must be addressed for utility services, debt service, technology license and maintenance agreements, laboratory health and safety improvements, student and employee accommodations, and library collections and subscription prices.
- **Increased Need for Student Support:** Total undergraduate enrollment has increased at the University by roughly 4,000 or 10% over the last 10 years. To adequately serve the student body, specialized costs have increased dramatically: Disability Resource Center services (captioning, testing accommodations and so on), mental health services through Student Affairs and Boynton Health Services, tutoring and academic support.

Proposal:

This proposal would fund inflationary cost increases to the University of Minnesota's appropriation at 2.6% each year of the biennium. This percent increase is the five-year average of the Higher Education Price Index (HEPI).

In conjunction with continued internal reallocations, potential increases in some resident tuition rates, and planned increases in nonresident tuition rates, this O&M support will allow the University to maintain excellence within the current scope of programs, consistent with the priorities of the Board of Regents as elected by the Minnesota legislature. Specific allocation of dollars across the institution will be determined through the internal annual budget development process as directed by the President and academic leadership and approved by the Board of Regents. The most pressing priorities are in the areas of competitive compensation, classroom and equipment maintenance, compliance with federal and state regulations, research and technology infrastructure, maintenance of core facilities, and support for key activities throughout the state currently facing financial challenges.

Additional funding from the state will not eliminate difficult choices in balancing the University's budget, but it will relieve pressure for higher tuition increases for resident students, and it will help maintain quality University programs across the state.

Early estimates of cost increases for the next biennium (in activities funded by state appropriation and tuition only) are as follows:

	FY 2020	FY 2021	Biennial Math (Yr 1x2) + Yr 2
Budget Challenge (\$ in 000s)			
Compensation (including benefit costs)	\$40,000	\$40,000	\$120,000
Facilities (utilities, debt, operations)	3,000	3,000	9,000
Technology Maintenance	3,000	3,000	9,000
Unit Specific Needs/Investments	15,000	15,000	45,000
Statewide Initiatives	<u>6,000</u>	<u>6,000</u>	<u>18,000</u>
Estimated Total	67,000	67,000	201,000

Equity and Inclusion:

This request will maintain existing programs and support for under-represented faculty, staff and students; this remains a priority for the University. Although this proposal does not target a specific population group, students from low- and middle-income families will benefit the most from restraint on tuition increases. By continuing the University's tradition of providing a high quality education at a reasonable cost, the University will continue to increase equity by helping to close opportunity gaps and prepare students to succeed in the workforce.

Results:

Funding this request will result in direct benefits to students, researchers, and communities statewide:

- Minimizing tuition increases
- Maximizing researchers' talents and abilities to advance knowledge and commercialize technologies
- Retaining excellent instructional faculty and staff across all colleges and campuses
- Providing strong student services related to physical and mental health, career development, degree completion
- Ensuring safe indoor and outdoor environments for faculty, staff, students and visitors
- Maintaining facilities for the hundreds of thousands of people who work, study and visit the University annually

It will have a positive impact on helping the University to make progress on performance metrics previously approved by the Board of Regents, which can be found at: <https://oir.umn.edu/planning-metrics/progress-card>.

Change Item Title: CWF Carp Management

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Clean Water Fund				
Expenditures	250	250	0	0
Net Fiscal Impact = (Expenditures – Revenues)	250	250	0	0
FTEs	0	0	0	0

Recommendation

The Governor recommends \$500,000 in FY2020-2021 to fund a pilot project examining how a new method of carp management can be used as a nutrient reduction strategy.

Rationale/Background

Common carp are a powerful and direct driver of poor water quality and high nutrient levels in lakes of south-central Minnesota, including the Metro area. Yet, carp management is not included in nutrient reduction strategies (NRS) for Minnesota, which focus primarily on land-based management practices. This creates potential inefficiencies in NRS. This program aims to increase the efficacy and cost-effectiveness of nutrient reduction strategies by developing comprehensive carp management programs, documenting their effectiveness and developing a new roadmap for NRS in Minnesota.

Proposal

The University will field-test a new method of carp management in two lakes and document year-round changes in phosphorus and nitrogen levels both within the lakes as well as the downstream export of nutrients from the lakes. To do so, the research team will partner up with a University of Minnesota startup company that developed a new way of managing carp, University limnologists who will document changes in nutrient dynamics, and local watershed districts that will provide a logistic support. Using this data, the research team will show how carp management can be incorporated into more effective and affordable nutrient reduction strategies for Minnesota.

Results

This is the first time this project has been funded. Results of this work will be disseminated via University websites and peer-reviewed publications. They will be also included in the biennial Clean Water Fund Performance Report.

Change Item Title: CWF County Geologic Atlas

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Clean Water Fund				
Expenditures	175	175	0	0
Net Fiscal Impact = (Expenditures – Revenues)	175	175	0	0
FTEs	0	0	0	0

Recommendation

The Governor recommends \$350,000 in FY2020-2021 to accelerate the production of County Geologic Atlases. The Atlases provide stakeholders with accurate information to manage groundwater resources sustainably.

Rationale/Background

Geologic atlases provide maps and databases essential for improved management of ground and surface water. This is foundational data that supports management of drinking water, domestic and industrial supply, irrigation, and aquatic habitat. Understanding the distribution of geologic materials defines aquifer boundaries and the connection of aquifers to the land surface and to surface water resources to enable a comprehensive water management effort. These atlas products are often used in local watershed planning, water supply planning, and many water related permit decisions. Informed decisions often prevent expensive mistakes. County Geologic Atlases are specifically identified as essential data in the Statewide Conservation Plan, and in the efforts of the Environmental Quality Board, DNR Eco-Waters, and the Water Resources Center at the University of Minnesota to design a sustainable water management process. Many of these agencies have advocated that the pace of work on the county geological atlases by the MGS should be increased to allow statewide completion within a decade, followed by review and updating on a regular schedule. However, production of the Atlases, due to the level of funding made available to date, has fallen short of the recommended timeline.

Proposal

The Governor recommends that County Geologic Atlas (CGA) funding be increased to make up for recent reductions in funding from other sources due to increased number of projects in competition. MGS is staffed for the \$2.4 million per year effort to meet their commitment to statewide completion in a reasonable time frame. \$500,000 per year from CWF is needed to maintain current pace. The program utilizes funds from a contract with DNR, federal matching fund programs, Clean Water Funds, and the Environment and Natural Resource Trust Fund and strives to maintain an annual combined budget of \$2,400,000. The program seeks to provide atlases statewide, and funding at this rate should accomplish that goal in about a decade.

Equity and Inclusion

The objective of the MGS/DNR program is to ensure that every Minnesota County will have an Atlas as soon as reasonably possible, so that every Minnesota resident will enjoy a similar standard of drinking water protection, followed by ongoing maintenance of this information infrastructure.

Results

Atlases are complete for 41 counties and of these, 3 have been revised and 3 revisions are underway. There are 13 new atlases underway; 33 counties have not yet been started. With a completion rate of ~5 per year and ~40 are partially complete or not yet started, at the current pace, statewide coverage would be achieved in about a decade – enhanced funding will shorten this timeline.

A complete atlas consists of a Part A prepared by MGS that includes the water well database and 1:100,000 scale geologic maps showing properties and distribution of sediments and rocks in the subsurface, and a Part B constructed by DNR that includes maps of water levels in aquifers, direction of groundwater flow, water chemistry, and sensitivity to pollution. Atlases in most cases are initiated by a request from a county and an offer to provide in-kind service. A User's Guide to Geologic Atlases helps non-geologists understand the information products and their uses. Atlases are available in print, or in digital formats, including pdfs and GIS files.

Change Item Title: CWF Return on Investment Estimations

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Clean Water Fund				
Expenditures	172	171	0	0
Net Fiscal Impact = (Expenditures – Revenues)	172	171	0	0
FTEs	0	0	0	0

Recommendation

The Governor recommends \$343,000 in FY2020-2021 to continue fund a project measuring the return on the Clean Water Fund's investments. The tools developed through this process will be used by future decision makers to strategically improve Minnesota's water quality and human well-being.

Rationale/Background

The University of Minnesota is partnering with the Clean Water Council (CWC) to better account for the public benefits of investments in the Clean Water Fund (CWF) and equip the CWC with the tools to make smart, strategic investments. In the first phase of the partnership (ending June 2019), the project aims are:

- 1) A statewide survey of public values and preferences for clean water designed to understand what types of clean water benefits are the most highly valued by Minnesotans.
- 2) Development of spatially-explicit ecosystem service metrics that reflect the multiple co-benefits of investments in improved water quality.
- 3) Guidance for CWC on how to determine and report on the value of different programmatic activities (e.g. planning, technical assistance, monitoring, implementation).

Proposal

Continued funding of the project will provide guidance and tools in support of the CWC's efforts to measure progress, evaluate outcomes, and promote transparency in clean water fund investments. Research will assist the Council in communicating the public benefits of the fund and making more strategic decisions that protect and improve water quality and human well-being. In particular, funding will allow the UMN team to expand our support for the CWC and in two dimensions:

- 1) Public engagement and stakeholder collaboration at the watershed-level to integrate UMN findings with agency-led "One Watershed One Plan" processes and build capacity to maximize co-benefits of public investments in clean water, identify new cross-sector partnerships, and better communicate the benefits of the CWF.
- 2) Analysis of alternative scenarios for future CWF expenditures and assessment of key tradeoffs, including the equity and distributional impacts of changes in water quality.

Equity and Inclusion

The benefits of clean water are not equally distributed in our state. Communities of color, native communities, and rural populations are more likely to experience water shortages, contaminated drinking water, unsafe recreational opportunities, unsafe levels of fish consumption, and higher water prices. In phase I of the project, social and demographic data was included in their analysis of co-benefits to visualize the distribution of water benefits and costs statewide. The researchers will continue to prioritize communication and evaluation of the equity implications of water investments in their work, including engagement that seeks to elevate underrepresented voices in water decision-making statewide.

Results

For FY2018-19 funding, the following activities are complete as of February 2019:

- 1) A statewide survey of public values and preferences for clean water designed to understand what types of clean water benefits are the most highly valued by Minnesotans.
- 2) Development of spatially-explicit ecosystem service metrics that reflect the multiple co-benefits of investments in improved water quality

For FY2020-21 funding, the UMN team will produce two additional work products; a web platform that visualizes the benefits of CWF investments across multiple social, biophysical, and economic metrics, and a report on current and potential future public benefits of CWF investments in partnership with the CWC and key stakeholders.

Change Item Title: CWF Stormwater BMP Performance Evaluation and Technology Transfer

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Clean Water Fund				
Expenditures	750	750	0	0
Net Fiscal Impact = (Expenditures – Revenues)	750	750	0	0
FTEs	0	0	0	0

Recommendation

The Governor recommends \$1.5 million in FY2020-2021 to fund stormwater projects throughout the state. These stormwater efforts focus on research, University of Minnesota Extension education, and technology transfer to industry professionals and all levels of government to prevent, minimize, and mitigate the effects of runoff from the built environment.

Rationale/Background

Stormwater runoff from built environments have major impacts on water resources in Minnesota. Some 1.4 million Minnesotans rely on drinking water impacted by stormwater from upstream communities, and over half of all state residents live within one mile of a lake in developed landscapes. Starting in the 2016-17 biennium, an appropriation from the Clean Water Fund was targeted for research and technology transfer to help Minnesota communities address unmet and growing stormwater management needs. The Water Resources Center (WRC) at the University of Minnesota coordinated the portfolio of projects, with input from the Pollution Control Agency and the Minnesota Stormwater Research Council (MSRC). One of the first projects was to develop a Stormwater Research Roadmap, which used a structured approach to gather stakeholder input and identify priority research needs for the next decade. With the Clean Water Fund appropriation for FY2018-19, the WRC established an open, competitive application process to identify the most meritorious projects to meet identified priorities. In consultation with the MSRC, nine projects were selected that address a variety of stormwater issues in multiple locations around the state. A requirement of funded projects is to integrate research with technology transfer and outreach activities. The WRC supports these projects with pass-through funding, while also providing oversight, administrative support, and program-level technology transfer.

Proposal

The proposal is to continue funding for FY2020-21. With the competitive application and selection process in place, the WRC will implement the next set of research priorities. Guided by the Stormwater Research Roadmap and in consultation with the MSRC, the WRC will issue one or more competitive calls for research proposals open to all research organizations in Minnesota. Projects will be selected for pass-through funding with guidance from the MSRC board and with input from scientific peer reviewers. The WRC will continue to manage newly funded projects and will communicate results from completed projects to stakeholders.

Equity and Inclusion

Diversity, inclusion, and equity are central aspects of the prioritization, selection, and oversight of funded projects. The WRC follows the University of Minnesota's diversity and inclusion practices to ensure equitable and inclusive selection of project teams. Further, reaching underrepresented groups is a pillar of research and technology transfer activities. A current funded project is examining the factors motivating community engagement in ethnically diverse neighborhoods.

Results

Clean Water Fund appropriations have supported twelve major projects addressing a variety of issues and emerging technologies. Projects are led by teams from many research organizations around the state including the University of Minnesota, St. Cloud State University, state agencies, local units of government, and private consultants. Additional projects and in-kind support come from leveraged funds contributed by a diverse group of entities comprising the MSRC. Information on current and completed projects, the MSRC, and the Minnesota Stormwater Research Roadmap are available at: www.wrc.umn.edu/projects/stormwater.

Initial work focused on the role of detention ponds in removing contaminants from stormwater before it reaches downstream waters. With more than 30,000 such ponds in the state, they collectively have a major impact on water quality throughout Minnesota. One study found that some ponds may actually increase phosphorous loading to downstream waters because of phosphorous releases from the accumulated sediments below. A second study sampled the sediments in ponds in multiple communities for polycyclic aromatic hydrocarbons (PAHs), a class of carcinogenic chemicals. PAHs exceeded the industrial soil reference value for 35% of sampled ponds. When contaminated ponds are dredged, the sediments must be transported for disposal in a secure landfill.

mn.gov/mdva/

AT A GLANCE

- Provide six major program areas under two divisions, each with numerous veteran services including:
 - Long-term, Skilled nursing and Domiciliary care
 - Adult Day Center and resources for caregivers
 - Education and employment services
 - Federal VA Claims and outreach services
 - Homeless Veteran prevention and assistance services
 - State benefits (State Soldiers Assistance Program)
- Operates 5 State Veterans Homes and 3 State Veterans Cemeteries
- Serve more than 327,000 Veterans in Minnesota
- Employ approximately 1,400 staff statewide

PURPOSE

The mission of Minnesota Department of Veterans Affairs (MDVA) is “Dedicated to serving Minnesota Veterans and their families.” We are a “post wartime agency” and were created by the 1943 state Legislature to consolidate the services provided to service members, and since 2007, we have operated the Minnesota Veterans Homes. Today, there are more than 327,000 veterans in Minnesota (about six percent of the state’s population).

Since 9/11, approximately 75,000 Minnesotans have been discharged from active duty and more than 45,000 have served in a combat zone. Veterans face many challenges including translating their military skills and experiences to civilian occupations, unemployment and underemployment, and short- and long-term medical issues resulting from their military duty. In addition, many veterans and their families experience both mental fatigue and physical injuries associated with military deployments. Finally, approximately 23 percent of the state’s population aged 65 and older are veterans, many with unique long-term care needs.

MDVA exists to fulfill the needs of these veterans and their families by providing innovative programs and services to maximize their quality of life, while monitoring and adapting to emerging needs. In doing so, MDVA contributes to achieving the statewide outcomes of: **All Minnesotans have optimal health, Minnesotans have the education and skills needed to achieve their goals, and Strong and stable families and communities.**

BUDGET

Source: Budget Planning & Analysis System (BPAS)

Source: Consolidated Fund Statement

MDVA activities, as a whole, were funded approximately 52% from the general fund, 12% from federal funds and 36% from special revenue funds in the FY2016-17 biennium.

The Program & Services program receives a majority of its funding from the general fund. Program-specific federal funding is also received for cemetery development & maintenance and for the State approval of higher education institutions.

The Veterans Home Healthcare program is funded through general fund appropriations, resident maintenance fees, VA per diem, Medicare and other reimbursements. In recent years, a portion of the federal funds were used to complete the construction of two new 100-bed skilled nursing buildings on the Minneapolis campus. In addition, the Legislature has approved state-funding for the construction of three new state veterans homes. The historical spending graph reflects the following breakdown:

- A general fund appropriation of \$110 million in the FY2016-17 biennium was received and transferred to the special revenue or other fund. The graph above reflects the expenditure of these funds out of the general fund in order to show its source of funding.
- An additional \$92 million of receipts was received from the Federal VA Administration for veteran full and partial per diem, Medicare reimbursements for Medicare Part A, B & D, and receipts from resident maintenance fees and other reimbursements. The graph above reflects the expenditure of these funds in the other funds category.
- \$33 million of federal grant funds were received and expended for two new skilled nursing buildings, Building 21 & 22, on the Minnesota Veterans Home - Minneapolis Campus. MDVA anticipates the receipt of additional federal grant funding for the construction of three new Minnesota state veterans homes to be located in Bemidji, Montevideo, and Preston.

STRATEGIES

We strive to enhance the lives of those we serve through the development and implementation of services that are tailored to meet the current, ongoing and future needs of veterans and their families. We do this through two divisions: **Programs & Services** and **Veterans Health Care** (Minnesota State Veterans Homes).

Many veterans are not aware of the benefits that they have earned through their military service. **The Programs & Services Division** collaborates with its partners in the veteran's services community to assist veterans in obtaining these benefits. Examples include securing or assisting in the provision of financial, educational and medical benefits. Additionally, there are an estimated 253 veterans without safe, stable or affordable housing on any given night in Minnesota (<https://www.hudexchange.info/resources/documents/2016-PIT-Estimate-of-Homeless-Veterans-by-State.pdf>). By working with partners and stakeholders through its Homeless Veteran Registry (<https://mn.gov/mdva/resources/homelessnessandprevention/homelessveteranregistry.jsp>), MDVA works to identify and develop housing plans for veterans who are homeless or at risk of homelessness. Finally, our Programs & Services Division and partners provide resources for financial, family, and mental health counseling, as well as operating three Veterans cemeteries and coordinating funeral honors benefits.

For more information, visit: <https://mn.gov/mdva/resources/>

The Veterans Health Care Division currently operates five Minnesota Veterans Homes. Located in Fergus Falls, Hastings, Luverne, Minneapolis, and Silver Bay. MDVA works to ensure that veterans and their families have options for meeting their long-term skilled nursing and care needs while providing the highest-quality care. The homes offer multiple long-term care options including 24-hour Skilled Nursing, Domiciliary, and Adult Day Care. The homes also offer specialty care units for Alzheimer's and dementia, as well as dental care, physical rehabilitation, work therapy, transportation, chemical dependency, psychological, spiritual, and recreational services to improve the health and quality of life of its residents. In addition, MDVA is currently working with

community partners in the development of plans for three new Minnesota Veterans Homes to expand our capacity and geographic presence.

For more information, visit: <https://mn.gov/mdva/homes/>

Minnesota Department of Veterans Affairs

FY 2020-21 Biennial Budget Change Item

Change Item Title: Veterans Programs & Services - Operating Adjustment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	173	371	371	371
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	173	371	371	371
FTEs	2.3	5.0	5.0	5.0

Recommendation:

The Governor recommends additional funding of \$544,000 in the FY2020-2021 biennium to maintain the Veteran Programs & Services division's current level of service delivery at the Minnesota Department of Veterans Affairs (MDVA).

This funding is a 1.6% increase to the Veterans Programs & Services division's base operating budget.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, information technology and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

Agencies face challenging decisions to manage these costs within existing budgets, while maintaining the services Minnesotans expect. From year to year, agencies find ways to become more efficient with existing resources. However, cost growth typically outstrips efficiencies, and without additional resources added to agency budgets, service delivery erodes.

For the MDVA Programs & Services division, statutorily required services will likely have to be diminished without this operating adjustment, including federal VA disability and pension claims development, and fewer opportunities for engagement with Veterans in challenging geographic or demographic areas. Additionally, without this funding there will be fewer staff providing higher education support services to Veterans and military members across the state. It will be necessary to reduce service in these areas in order to support the core functions of the division, such as the State Soldiers' Assistance Program, federal VA claims assistance, and State Veterans' Cemetery operations. Non-statutorily required areas of special emphasis will also likely need to be reduced or eliminated, including areas such as Outreach, the Women Veteran program, and Tribal Veterans Service Officers (TVSO).

Proposal:

The Governor recommends additional operating funds to maintain the agency's current level of service to Minnesota Veterans and their families. This funding is needed to support the increased costs for employee compensation and benefits.

Equity and Inclusion:

This proposal directly impacts Veterans and their family members. Veterans cover a broad spectrum of racial and ethnic groups, as well as members of the LGBTQ community. 94,054 Minnesota Veterans are service-connected disabled, another 3,481 receive VA disability pensions for total and permanent disability, and women make up 7.1% of all Minnesota Veterans (FY16). In addition, MDVA is an equal opportunity employer who wholeheartedly supports equity and diversity.

Results:

Minnesota is experiencing an increased demand for services due to both the aging of the veteran population and as a result of 17 years of continuous conflict and ongoing military operations worldwide. This proposal is intended to allow MDVA Programs and Services to continue to provide these levels of service and information to the public. The following are a sampling of those service areas and the growth that has occurred.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Per capita average of federal VA dollars being expended on benefits and services provided to Minnesota Veterans, their dependents and survivors.	\$7,937	\$8,445	Federal FY16 & FY17
Quantity	Number of Veterans and their dependents who have MDVA staff acting as their accredited representative to the federal VA.	51,793	54,473	7/31/16 & 7/19/18
Quantity	Number of Minnesota GI Bill participants approved for Higher Education programs or OJT/Apprenticeship programs.	1,071	1,470	FY16 & FY17
Quantity	Number of interments and inurnments at the Minnesota State Veterans Cemeteries.	564	621	FY16 & FY17
Quantity	Number of Veterans and their dependents who were provided statewide, community-based counseling through C.O.R.E. program participation.	575	748	FY16 & FY17
Quality	Percent of C.O.R.E. program participants that were satisfied with the services received and indicated that the services met their needs	100%	100%	FY16 & FY17
Results	Number of Homeless Veterans identified in MN during HUD's annual Point in Time (PIT) Count.	644	253	Jan. 2010 & Jan. 2017

Minnesota Department of Veterans Affairs

FY 2020-21 Biennial Budget Change Item

Change Item Title: State Veterans Cemeteries Operating Adjustment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	375	400	400	400
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	375	400	400	400
FTEs	5.0	5.25	5.25	5.25

Recommendation:

The Governor recommends additional funding of \$775,000 in the FY 2020-2021 biennium to maintain three State Veterans Cemeteries at the current and expected service delivery levels at the Minnesota Department of Veterans Affairs (MDVA).

This additional funding represents a 2.3% increase to the Veterans Programs & Services Division's base operating budget.

Rationale/Background:

State Veterans Cemeteries generate revenue annually on a per-burial basis. This revenue comes from two sources: plot allowances from the US Department of Veterans Affairs for burial of Veterans and burial fees collected from the family of deceased family members who are eligible to be buried in a State Veterans Cemetery. Revenue collected from these two sources are put into cemetery maintenance and development (CMD) accounts and supplement the department's general fund appropriation. The CMD accounts for each cemetery are intended to cover non-salary operational costs, including: utilities, fuel, equipment repairs, equipment procurement, facility repairs, office supplies, and grounds keeping supplies. The accounts are not intended to fund staffing costs.

The original general fund appropriations for each cemetery are different for each location (\$347,000 for Little Falls, \$425,000 for Preston and \$500,000 for Duluth) and don't support all the staff costs for each cemetery. As a result, the department has had to use the CMD accounts and other program funding to support staff costs. Continued use of the CMD accounts to support staff cost is not sustainable and jeopardizes the department's ability to cover emergency and routine equipment repairs, equipment replacement, facility repairs, and other non-salary costs to operate the cemeteries safely and provide the burial services to veterans and family members.

Proposal:

The Governor recommends additional operating funds to support salary and benefit costs at each of the three State Veterans Cemeteries in order for the agency to provide burial services to Minnesota Veterans and their families. This request will bring each of the cemeteries' base level general funding up to \$550,000 per year to be dedicated to salary and benefit costs and to reduce the demand on the CMD accounts.

Without this additional funding, the department will need to reduce FTEs at each cemetery, which will reduce the level of burial services to veterans and their families. This reduction would cause a significant degradation of services. Cemetery maintenance and appearance would be noticeably affected and could negatively impact considerations by the National Cemetery Administration on awarding future funds to expand operations.

Equity and Inclusion:

This proposal directly impacts Veterans and their family members. Veterans cover a broad spectrum of racial and ethnic groups, as well as members of the LGBTQ community. 94,054 Minnesota Veterans are service-connected disabled, another 3,481 receive VA disability pensions for total and permanent disability, and women make up 7.1% of all Minnesota Veterans (FY16). In addition, MDVA is an equal opportunity employer who wholeheartedly supports equity and diversity.

IT Related Proposals:

N/A

Results:

Individuals who wish to be buried in one of the three State Veterans Cemeteries can pre-register. This ensures eligibility in advance and eliminates delays in providing military documents to the cemetery.

* Note: the Duluth cemetery is not included because it opened in FY 2019.

Minnesota Department of Veterans Affairs

FY 2020-21 Biennial Budget Change Item

Change Item Title: Minnesota Service Core Expansion

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	250	250	250	250
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	250	250	250	250
FTEs	0	0	0	0

Recommendation:

The Governor recommends funding of \$500,000 in the FY 2020-2021 biennium to provide additional funds for the Minnesota Service CORE Program at the Minnesota Department of Veterans Affairs (MDVA).

The additional funding increases the Veterans Programs & Services division operating budget by 1.5%, and is a 50% increase to the Minnesota Service CORE Program.

Rationale/Background:

Many Minnesota Veterans and their families experience challenges as they navigate various aspects of life, from reintegration and managing finances, to building a support network, and addressing mental health or substance use concerns. Limited access to these services and the increase in need highlights the importance of offering services and programs that address barriers and increase access across the state. The CORE program responds to these challenges by bringing casework, financial counseling, housing stability, and behavioral health (mental health and substance use) services to Veterans and their families across the state, in their community.

Since 2014-2015 the service has seen a 65% increase in enrollment, serving a total of 822 Veterans and their families statewide in 2017. Additional funding would allow the program to sustain services and to meet the increase in demand, especially in greater Minnesota. Last year the program served Veterans and their families in 63 of 87 counties, and with additional funding, the infrastructure will remain in place and able to respond to requests for service in every county across the state.

Proposal:

The Governor recommends additional funds to increase the grants to cover the costs associated with increased demand and allow the program to expand the provision of casework, behavioral health, financial counseling, housing stability services, and coordination and training with Veteran service officers in areas of the state seeing the greatest increase in enrollment.

Grants- Lutheran Social Service of Minnesota currently provides CORE program services, and through several competitive requests for proposal (RFP) bids has done so since 2008. In two of the last three years the costs of providing the program has exceeded the original budgeted amount due to a 65% increase in program enrollment. If this request is not funded the program will need to institute a cap in the services provided, limit the number of Veterans served and/or eliminate service components to meet the current and forecasted demand.

Programmatic Capacity- The current programmatic need outweighs the programmatic capacity due to funding shortages. In FY 2018, the agency supplemented the \$500,000 CORE budget with a \$135,000 Support our Troops Grant to Lutheran Social Services so they could continue to support Veterans who were currently receiving counseling services. Further, in June 2018 Lutheran Social Services withheld their billing statement as the contract ran out of money in May 2018, and during this time they continued to serve Veterans, showing a gracious dedication to the agency's mission and partnerships.

During FY 2018 the agency started to implement several cost saving measures. First, Lutheran Social Services checked every client for insurance so that their primary insurance carriers could be billed reducing the overall amount billed to the contract. Second, Lutheran Social Services inserted contract language with their third party providers that they use to expand their network to provide services statewide to ensure that their third party providers are required to bill a client's primary insurance provider.

Lastly, there was the need to reduce counseling time in late FY18 to 45 minutes from 60 minutes in an effort to reduce monthly costs and stretch the contract costs further through FY 2018. Even with these cost saving measures the original contract amount was approximately \$204,000 short for FY 2018. An increase in annual funding of \$250,000 will allow the agency to continue to provide these much needed counseling services to the current client base and continue to serve the growing need.

If additional funding is not provided, the agency will need to look at implementing additional cost saving measures such as limiting the number of appointments an individual can make under the CORE contract, limiting the number of clients the agency can serve, and limiting the geographical area that is served. All of these measures are counterproductive to an individual's mental health treatment and negatively impacts progress that has been made with their current Lutheran Social Services provider.

Equity and Inclusion:

This proposal directly impacts Veterans and their family members. Veterans cover a broad spectrum of racial and ethnic groups, as well as members of the LGBTQ community. 94,054 Minnesota Veterans are service-connected disabled, another 3,481 receive VA disability pensions for total and permanent disability, and women make up 7.1% of all Minnesota Veterans (FY 2016). In addition, MDVA is an equal opportunity employer who wholeheartedly supports equity and diversity.

FTEs Reduction	(4.85)	(4.85)	(4.85)	(4.85)

Recommendation:

The Governor recommends a general fund budget reduction of \$1.06 million in the FY 2020-2021 biennium for the Veterans Healthcare Program at the Minnesota Department of Veterans Affairs (MDVA). The reduction is the result of a realignment of care provided by physicians, nurse practitioners, and all other resident care team members in three of the State Veterans homes. The homes will ensure appropriate staff levels based on the needs of each individual home. All direct care resident service providers will deliver care within their scope of their licensure; this includes Nursing, Social Work, Psychology, Therapy, Nurse Practitioner, and Physician. This realignment will allow each discipline to assess, develop the plan of care, deliver resident care, and as indicated, contact the appropriate team member, including the Nurse Practitioner and Physician for needed higher level issues.

This is a .5% reduction to the Veterans Healthcare division's total operating budget.

Rationale/Background:

Currently, the Minneapolis, Silver Bay and Hastings Veterans Homes have physicians and nurse practitioners providing scheduled and as needed assessments and histories, as well as diagnosing and treating residents. The requests for provider intervention did not often contain complete review of the Veteran's condition. As a result, this current care model requires larger than necessary provider involvement. The homes will now adjust staff compliments and provide clinical education and mentorship for staff to ensure that all staff are providing the care within the scope of their clinical licensure. The goal is development of a more effective model for delivering clinical care that is provided by the right staff at the right time.

Proposal:

The Governor recommends that MDVA realign current medical provider services at the Minneapolis, Hastings, and Silver Bay Veterans Homes. This resident-focused realignment will result in more efficient care delivery, all while maintaining the level of access to, and quality of, care that is currently provided across all of the homes.

There will be a reduction in FTEs as a result of this recommendation. The reductions will be realized through attrition and the right-sizing of positions.

Equity and Diversity:

This proposal directly impacts Veterans and their family members. Veterans cover a broad spectrum of racial and ethnic groups, as well as members of the LGBTQ community. 94,054 Minnesota Veterans are service-connected disabled, another 3,481 receive VA disability pensions for total and permanent disability and women make up

7.1% of all Minnesota Veterans (FY16). In addition, MDVA is an equal opportunity employer who wholeheartedly supports equity and diversity.

Results: This proposal is intended to allow MDVA Healthcare division to continue to provide current levels of care that these resident veterans and eligible family members have earned.

Minnesotans expect that our Veterans and eligible family are taken care of at this stage of their lives with care and quality measures that meet or exceed community standards, MDVA Healthcare does that in all of its facilities (see table below).

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quality	Resident Satisfaction Survey. Customer satisfaction surveys are conducted at all five Veterans Homes by Pinnacle Quality Insight on a monthly basis, dating back to 2009, and comparative results are calculated quarterly and annually. The company surveys residents and families on a number of key indicators which include nursing, response to individual needs, therapy, safety, and cleanliness. The results are then compared to other Veterans Homes and nursing homes across the country. Minnesota Veterans Homes have earned “Best in Class” certificates for their scores.	4.64 (low = 1, high = 5)	4.72 (low = 1, high = 5)	2015 & 2017
Quantity	Staff turnover rates. It is important to our residents and their families that we maintain a stable, highly trained staff. While a certain amount of turnover is inevitable we strive to have a steady staffing roster.	25.2%	19.9%	2015 & 2017
Quality	The annual CMS 5 Star Staffing Report from Equip was calculated for the 2015-2016 time frame, so the Veterans Homes are compared to the national staffing standard. They continue to score at the higher end of the rating. Our goal is to maintain a 4-5 star overall staffing ratio at the Skilled Veterans Homes, and we have met those goals for the past two years.	4-5 Star	4-5 Star	2015 & 2017

Statutory Change(s):

N/A

Program: Programs & Servicesmn.gov/mdva/**AT A GLANCE**

- Serve veterans of all ages and wartime periods by:
 - Acting as the agent of a resident of the state having a claim against the United States for benefits arising out of or by reason of service in the armed forces
 - Administering the State Soldiers' Assistance Fund
 - Working to provide Veterans with a seamless transition from their military service through approved education and training programs, resulting in a career with permanent, full-time employment
 - Providing outreach and state-wide benefits advocacy to include services on tribal reservations
 - Providing burial and perpetual care for veterans and their eligible dependents in three state Veterans' cemeteries
 - Preventing and ending Veteran homelessness
- Work closely with community, state and federal partners
- Approximately 100 employees throughout the state

PURPOSE & CONTEXT

The mission of the Programs and Services Division (PSD) is to meet the needs of Minnesota Veterans and their families by providing proven and innovative programs and services, helping to maximize their quality of life and provide final resting places that commemorate their service and honor their sacrifice to our Nation.

Minnesota is experiencing an increased demand for services due to both the aging of the veteran population and as a result of 17 years of continuous conflict and ongoing military operations worldwide. For example, in 2014 the Minnesota Department of Veterans Affairs (MDVA) filed 1,841 state and federal benefits claims, while in 2016, MDVA filed 2,209 of the same benefits claims. Burials at our State Veterans Cemeteries increased from 418 in 2014 to 621 in 2017. MDVA's work with Lutheran Social Services (LSS) C.O.R.E. served 509 clients in 2014 and 748 in 2017. It should be noted that the veteran population in the state of Minnesota dropped from about 369,000 to 337,000 during the same period. There is no foreseeable change to the military situation, so it is expected that demand for services will continue to increase in the coming months and years. Additionally, the state and federal goal of bringing an end to Veteran homelessness is an area of special emphasis.

We stand ready to meet veterans' needs when they return to Minnesota. Many veterans return with visible combat injuries such as amputated limbs, while many more carry invisible wounds such as traumatic brain injury and post-traumatic stress disorder. We help them meet their needs by providing assistance and support in accessing their higher education, medical, and financial assistance benefits.

The division also works to identify gaps in programming and services which may exist in the veterans' services community, and addresses those shortcomings by providing innovative, veteran-focused services to Minnesota veterans, their dependents, and survivors.

SERVICES PROVIDED

We administer the following programs to meet the needs of eligible veterans, their dependents and survivors.

- **Claims and Field Operations** staff represent veterans and their family members by acting as their advocate in matters pertaining to the U.S. Department of Veterans Affairs (VA) benefits and entitlements. This division consists of the St. Paul and Fargo Claims offices, the Gold Star Families and Women's Program, Tribal Veterans Service Officers, and Veterans Outreach. (<http://mn.gov/mdva/resources/healthdisability/>)
- **Veterans Employment and Education Division** helps veterans and eligible family members navigate the complicated higher educational benefits system and promotes employment and self-sufficiency for those individuals. This division includes the Higher Education Veterans Program (Veterans' Campus Representatives), the State Approving Agency and also administers the Minnesota GI Bill and Veterans Employment Preference. (<http://mn.gov/mdva/resources/education/>)
- **State Veterans Cemeteries and Memorial Affairs** assures that Veterans and their families are honored with final resting places that have national significance and lasting tributes that commemorate their service and sacrifice to our nation. The division operates three Veterans' cemeteries: one in Little Falls, one in Preston, and the newly opened facility in Duluth. It also manages the Military Funeral Honors Stipend Program and the Bronze Star Marker Program. (<http://mn.gov/mdva/memorials/>)
- **State Veterans Benefits Division** provides programs and services unique to Minnesota's Veterans, leads the implementation of the goal in the State Plan to End Veteran Homelessness and supplements certain federal programs. The division manages the State Soldiers Assistance Program, Veterans homelessness initiatives, Minnesota Veteran S.O.A.R., LinkVet, Minnesota Service C.O.R.E., and the Minnesota Operation for Veterans Empowerment (M.O.V.E.). (<http://mn.gov/mdva/resources/familyassistance/>)
- **MDVA Grant Programs** provide needed funding to our partners who assist us in our goals of serving veterans.
 - **Veterans Service Organizations (VSO) Grants** are provided to Congressionally Chartered Veterans Service Organizations in Minnesota to assist veterans and their families receive all the federal, state, and local benefits they are entitled to.
 - **County Veterans Service Officers (CVSO) Grants** are provided to all 87 counties to provide outreach for the reintegration of combat veterans into society, to collaborate with social service agencies, educational institutions, and other community organizations to enhance services offered to veterans, to reduce homelessness, and to enhance the operations of the county veterans service office. (<http://www.macvso.org/>)
 - **Minnesota Assistance Council for Veterans (MACV)**, funded through a grant from MDVA, provides assistance throughout Minnesota to veterans and their families who are homeless or in danger of homelessness. (<http://www.mac-v.org/>)
 - **Support Our Troops (SOT) Grants** are competitive grants provided to eligible foundations and other organizations approved by the Commissioner, whose purpose is supporting and improving the lives of veterans and their families. These grants are funded through the Support Our Troops License Plate Account. (<http://mn.gov/mdva/resources/federalresources/grants/>)

Partners – We partner with the U.S. Department of Veterans Affairs (VA), Veterans Services Organizations (VSOs), County Veterans Service Officers (CVSOs), the Minnesota Assistance Council for Veterans (MACV) and other organizations in all of the ways listed above in order to provide benefits and services to Veterans. Additionally we partner with a number of state agencies to accomplish our work.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>

Program: Veterans Healthcare

mn.gov/mdva/

AT A GLANCE

- Five State Veterans Homes in Fergus Falls, Hastings, Luverne, Minneapolis, and Silver Bay
 - Provide 24/7 Skilled Nursing and Domiciliary Care
 - Centers for Medicare and Medicaid Services (CMS) Certification achieved at all four skilled homes
 - One of only three Adult Day Health Care Programs (Medical Model) in the country
- The 2018 bonding bill provided \$32 million in state funding for three new State Veterans Homes – Individual Federal Applications for federal matching funds will be submitted prior to April 1, 2019
- MDVA's first advanced care dental clinic opened in the summer of 2018 at the Minneapolis home
- Approximately 1,300 employees providing care to Veterans
- Work closely with state, federal, and community partners

PURPOSE & CONTEXT

The first Veterans Home was established in 1887 in Minneapolis as the Minnesota Soldiers Home to “reward the brave and deserving.” This Soldiers Home in Minneapolis was not primarily designed as a medical facility, but as the needs of Veterans changed, so too have the Veterans Homes. In the 1960s, Minnesota started shifting its primary focus to meet the healthcare needs of Veteran residents in our homes. Today, MDVA operates five Veterans Homes located in Fergus Falls, Hastings, Minneapolis, Luverne, and Silver Bay, and one Adult Day Care program in Minneapolis.

Healthcare initiatives are reviewed annually both centrally and locally by all homes in an effort to ensure that quality care and operational excellence is achieved. The following health care initiatives were developed with staff and stakeholder input, including agency level policy and procedures to maintain consistent statewide outcomes. The MDVA healthcare program's goal is to ensure that all are working as one agency providing the highest level of care. Calendar year 2018 includes the following initiatives:

1. Dementia Care –
 - a. **Goal:** Each facility will develop a dementia care strategy which includes identification of a dementia philosophy, integration plan of that philosophy into daily operations and resource allocation for dementia programming and educational plan.
2. Hospice/Palliative Care
 - a. **Goal:** Develop staff competencies in the areas of palliative care, advance care planning and hospice in all Veterans Homes to further enhance the clinical care provided to residents and ensure dignity at end of life.
3. Tobacco Use
 - a. **Goal:** The Centers for Medicare and Medicaid Services (CMS) and Minnesota Department of Health (MDH) have a smoking safety and smoking reduction focus. The MDVA Healthcare Division will continue to support efforts for a tobacco free environment for all residents, employees, volunteers and visitors.
4. Business Office Operations
 - a. **Goal:** To maximize revenues from all available resources and develop division level healthcare policies and procedures regarding evidenced based best practices for standard senior healthcare business operations.

5. Oral Health Care

- a. **Goal:** The Healthcare division will develop an integrated oral health care strategy within all of the homes that includes education for direct care staff on daily oral care, applying for grants to provide dental care services, use of the federal VA dental benefits for those Veterans eligible to receive them, and evaluating the possibility of expansion to add advanced dental clinics at the other Minnesota Veterans Homes in greater Minnesota. Currently, veterans comprise 23 percent of the state's 65 years or older population and nearly one quarter of the state's 75 years or older population. The number of veterans over the age of 75 is expected to increase by approximately 9 percent over the next 20 years.

SERVICES PROVIDED

MDVA provides care that is designed and delivered according to the individual needs of the resident. MDVA homes have the goal of restoring, optimizing and/or maintaining each resident's level of function, personal autonomy, and dignity while recognizing the individual's service to the country.

The following programs and services are offered in each Veterans Home:

- Specialty care units for those diagnosed with dementia
- Rehabilitation services, including occupational, physical therapy and physical fitness
- Social services, recreational therapy, and behavioral services
- Coordination of appointments with the closest federal VA Medical Center, including transportation and clinical coordination
- Volunteer programs
- Drug and alcohol supportive services
- Vocational rehabilitation
- On-site specialty services – dental, ophthalmology, audiology, podiatry
- Primary medical care

In recent years, our homes have undergone a number of changes to improve the quality of care being provided. These changes include:

- Implementation of resident-centered care models at all of the Veterans Homes to meet the unique individualized care of Veterans
- Analysis of Domiciliary Care and program changes to best meet the needs of the Vietnam era and peacetime era Veteran
- Asset Preservation and repair and betterment funding of \$14 million to extend the useful life and maintain aging facilities at all locations
- Building 22 was completed on the Minneapolis campus in March 2018, marking the completion of a three phase construction project of new skilled nursing homes, serving 300 residents. A secure 12 bed unit is planned to open in October of 2018, this unit will care for Veterans who have had challenges residing at other facilities.
- Compliance with the Centers for Medicare and Medicaid Services (CMS) standards for the purpose of enhancing the level of care provided at the Veterans Homes and generating an opportunity to bill services to the federal government under the Medicare insurance programs.

RESULTS

The healthcare MDVA provides to Veterans and other eligible residents residing in the Veterans Homes optimizes activities of daily living and is designed to improve quality of life. The MN Veterans Homes provide a community environment for Veterans and families that promotes respect, dignity, and mental, physical, and spiritual well-being. Providing enhanced mental health and chemical dependency training and dedicated professionals, our staff can promote and support transition of domiciliary residents back to their communities. The key measures reviewed to understand if we are meeting these goals are customer satisfaction, staff turnover, and the prevalence of citations or recommendations from the Minnesota Department of Health, the Federal Department of Veteran Affairs, and CMS.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quality	Resident Satisfaction Survey. Customer satisfaction surveys are conducted at all five Veterans Homes by Pinnacle Quality Insight on a monthly basis, dating back to 2009, and comparative results are calculated quarterly and annually. Narrative

Federal Funds have played a significant role in the construction budgets of the Minnesota Department of Veterans Affairs in years past. During fiscal years FY17 and FY18, MDVA received VA construction grants to replace a 100 bed skilled nursing building on the Minneapolis Veterans Home campus and federal funds to build a new Veterans Cemetery in Duluth, Minnesota. The federal funds shown above are grant amounts received for the completion these two projects.

VA Construction Grants for State Cemeteries

The VA's construction grant program for State Veterans Cemeteries requires the State to provide 100% of the funding for the base design of a cemetery project whether new construction or expansion of phased gravesite development. The State must certify the availability of these funds before a project can be considered for federal grant funding. Once a project is awarded a federal grant, the grant does reimburse the State for the base design costs and all construction costs as there is no state match requirement other than on-going State funds to operate the cemetery. A memorandum of understanding signed by the State is required prior to federal grant funding which requires a maintenance of effort provision that states that the State will operate and maintain the cemetery according to standards and measures as defined by the National Cemetery Administration. The State is also required to follow the eligibility criteria for burials as defined in federal law. The VA's construction grant program for State Veterans Cemeteries also has a recapture provision allowing the federal government to recapture 100% of the grant dollars awarded if the State doesn't abide by the signed memorandum of understanding.

The Department anticipates that additional federal grant funds could be received in the near future for the construction of a new cemetery in S.W. Minnesota. These additional funds are not recognized in this summary due to the uncertainty of when these funds will be received. The department is expected to receive over \$8 million to cover the cost of construction for this new cemetery.

VA Construction Grants for State Veterans Homes

The VA's construction grant program for State Veterans Homes requires the State to provide 35% of the funding for the predesign, design and construction of a new Home or remodel of an existing one. The State must certify the availability of these funds before a project can be considered for federal grant funding. Once a project is

awarded a federal grant, the grant reimburses 65% of the construction costs within the parameters of the Memorandum of Agreement. A memorandum of agreement signed by the State is required prior to federal grant funding which requires a maintenance of effort provision that states that the State will operate and maintain the Home according to standards and measures as defined by the Federal Department of Veterans Affairs, as well as other State (MDH) and Federal regulatory agencies (CMS). The VA's construction grant program for State Veterans Homes also has a recapture provision allowing the federal government to recapture 100% of the grant dollars awarded if the State doesn't abide by the signed memorandum of agreement. These additional funds are not recognized in this summary due to the uncertainty of when and if these funds will be received.

MDVA is prepared to submit a request for a VA construction program grant in April of 2019 to provide federal funds for the construction of three new State Veterans Homes which received State funding approval in the 2018 legislative session. The following language is contained in 2018 Minnesota session law, Chapter 214.

Subd. 3. Bemidji, Montevideo, and Preston-New Veterans Homes \$32,000,000

(a) \$12,400,000 of this appropriation is to predesign, design, construct, furnish, and equip a veterans home in Bemidji. \$9,400,000 of this appropriation is to predesign, design, construct, furnish, and equip a veterans home in Montevideo. \$10,200,000 of this appropriation is to predesign, design, construct, furnish, and equip a veterans home in Preston.

(b) These veterans homes are subject to the requirements of the People's Veterans Homes Act in article 2.

Sec. 44. VETERANS HOMES CONSTRUCTION

Subdivision 1. Short title. This section may be cited as the "People's Veterans Homes Act."

Subd. 2. Veterans homes established. (a) The commissioner of veteran's affairs may apply for federal funding and establish veterans homes with up to 72 beds per facility available to provide a continuum of care, including skilled nursing care, for eligible veterans and their spouses in the following locations:

- (1) Preston
 - (2) Montevideo
 - (3) Bemidji
- (a) The state shall provide the necessary operating costs for the veterans homes in excess of any revenue and federal funding for the homes that may be required to continue the operation of the homes and care for Minnesota Veterans.

Subd. 3. Nonstate contribution. The commissioner of administration may accept contributions of land or money from private individuals, businesses, local governments, veterans service organizations, and other nonstate sources for the purpose of providing matching funding when soliciting federal funding for the development of the homes authorized by this section.

Other Federal Funds

The department also received operational funding reimbursements from the U.S. Department of Veterans Affairs (VA) for the following programs in FY18 that were not reported above.

- 1) State Approving Agency Program for the Federal GI Bill educational benefits = \$382,000
- 2) State Veterans Homes Program-Medicare A, B, D and Aid & Attendance for care of Veterans = \$2,396,757
- 3) State Cemetery Program for Veteran burials = \$322,000 (reported on Departmental Earnings Report)
- 4) State Veterans Homes Program per diem for care of Veterans = \$32,521,000 (reported on Departmental Earnings Report)

AT A GLANCE

- 3,454 veterinarians served: 3,023 active licenses and 431 inactive licenses
- 60% of Minnesotans estimated to own animals
- Veterinarians renew licenses every two years
- Average of 170 new licensees yearly
- 91 complaints from the public investigated annually
- Two full time staff persons

PURPOSE

The mission of the Minnesota Board of Veterinary Medicine (BVM) is to promote, preserve, and protect the health, safety, and welfare of the public and animals. We achieve this through the effective control and regulation of the practice of veterinary medicine on behalf of animals and their owners. We ensure Minnesota veterinarians have the education and skills needed to become licensed, and that they will work to optimize animal health. We curb the unlicensed practice of veterinary medicine that endangers animals and the public.

We work effectively to maintain current standards for the practice of veterinary medicine in Minnesota. These services include assessment of veterinarians' qualifications for licensure, investigation, and remediation of public complaints pertaining to veterinary medicine, and provision of public access to disciplinary and corrective actions. To prevent substandard veterinary care, we monitor veterinarians' ongoing completion of continuing education and communicate strategies to optimize veterinarians' professional conduct.

The Board of Veterinary Medicine's work significantly contributes to the following statewide outcomes:

- **Minnesotans have the education and skills needed to achieve their goals**
- **People in Minnesota are safe**
- **Efficient and accountable government services**

BUDGET

Source: Budget Planning & Analysis System (BPAS)

Source: Consolidated Fund Statement

The Board is funded by licensure fees and receives no general fund dollars. Minnesota Statutes section 214.06, subdivision 1(a) compels the Board to collect fees in the amount sufficient to cover direct and indirect expenditures. Funds are deposited as non-dedicated revenue into the state government special revenue fund. From this fund, the Board receives a direct appropriation to pay for agency expenses such as salaries, rent, costs associated with disciplinary/contested cases and operating expenditures. It also pays statewide indirect costs through an open appropriation.

In addition to Board operations, licensure fees fund activities that support multiple boards and/or other agencies. Some of these are: the Administrative Services Unit (inter-board), Health Professionals Services Program (inter-board), Office of the Attorney General for legal services, and the Criminal Background Check Program (inter-board).

STRATEGIES

To accomplish our mission, we utilize the following strategies:

1. Regulatory:

- ensure license applicants are qualified to practice veterinary medicine in Minnesota by careful review of credentials
- examine each license applicant's knowledge of standards of veterinary practice, laws, and rules
- evaluate declarations of any criminal charges, license discipline or insufficient continuing education
- hold veterinarians accountable for their professional conduct based on legal, ethical and professional standards
- require veterinarians to stay updated on advances in veterinary medicine through continuing education
- investigate complaints pertaining to veterinarians or unlicensed practice of veterinary medicine
- take corrective or disciplinary action if a risk to human or animal safety is identified, and determine what course of action will improve a veterinarian's performance
- register professional firms practicing veterinary medicine
- facilitate license application, license renewal, and filing of complaints via our interactive website
- provide other states with verification of the license status of a veterinarian when requested
- collaborate with the other MN government agencies: Board of Pharmacy, Board of Chiropractic Examiners, Criminal Background Check Program, Health Professionals Services Program, Board of Animal Health, Department of Health, Racing Commission, and Department of Revenue
- collaborate with federal government agencies: Drug Enforcement Administration, US Department of Agriculture, and Internal Revenue Service
- participate in committees and programs presented by the American Association of Veterinary State Boards pertaining to current regulatory issues and best practices to address these in Minnesota

2. Education:

- inform veterinarians of any regulatory changes that impact the practice of veterinary medicine
- provide education on regulatory issues via: written materials on our website, newsletters, direct mail, and presentations at veterinary conference, webinars, and the University of Minnesota
- assist the public by relaying information regarding the scope of practice of veterinary medicine, complaint process and past corrective and disciplinary action for veterinarians
- address questions posed by the media, legislature, veterinarians, public, agencies, firms, and associations

Recommendation:

The Governor recommends additional funding and spending authority of \$28,000 in the FY 2020-2021 biennium to maintain the current level of service delivery at the Minnesota Board of Veterinary Medicine.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year. The Board is solely fee supported and will collect revenue sufficient to meet projected operational cost increases.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the Board of Veterinary Medicine, this funding will cover known employee compensation growth, centralized IT services, and IT database maintenance. The increase in spending authority will cover anticipated salary reassignment for the executive director and agreement for greater salary increases within staff's bargaining unit. IT cost growth drivers may include dedicated MN.IT staff compensation-related increases, increased volume usage of enterprise IT services, increased software licensing costs, and/or application support and maintenance cost increases. Implementation will begin as soon as increased spending authority is granted.

Small Agency Increase:	FY2020	FY2021	FY2022	FY2023
Salary Increases (current staff increases)	\$10,000	\$12,000	\$12,000	\$12,000
Centralized MN.IT costs	\$3,000	\$3,000	\$3,000	\$3,000
Total	\$13,000	\$15,000	\$15,000	\$15,000

Equity and Inclusion:

The Board does not discriminate on the basis of race, ethnicity, gender, sexual orientation, or disability. The positive impact of this change will be to continue to provide services for all people of the State of Minnesota without discrimination.

IT Related Proposals:

A portion of this request includes an increase for database maintenance and to cover annual MN.IT service rates.

AT A GLANCE

- Small agency of conservation professionals
- Local conservation delivery system
- Governing board of local officials, citizens, and agency partners
- Focus on conservation of private lands (78 percent of Minnesota)
- Collaborative model for results including, since 1987:
 - 29,650 conservation practices installed
 - 7,793 easements funded
 - 275 local water management plans approved
 - 16,144 wetland credits deposited into the state's wetland bank
- 240 local government accountability assessments completed annually

PURPOSE

The Board of Water and Soil Resources' (BWSR's) mission is to improve and protect Minnesota's water and soil resources by working in partnership with local organizations and private landowners. The agency has a unique business model that is designed to:

- Operate as an efficient state-level source of technical and financial assistance to the local government delivery system.
- Target implementation of conservation practices and projects that support local goals and meet state objectives.
- Focus on Minnesota's private lands.

BWSR contributes to the statewide outcome of **a clean, healthy environment with sustainable uses of natural resources** by providing for targeted resource planning, protecting and restoring important water and habitat resources, and ensuring compliance with environmental laws, rules, and regulations.

BWSR also contributes to the statewide outcomes of **efficient and accountable government services** by maximizing local and federal partnerships and evaluating the effectiveness of local governments and conservation outcomes.

BUDGET

Source: Budget Planning and Analysis System (BPAS)

Legacy Funds are reflected in FY 10-17 in "Other Funds"
Source: Consolidated Fund Statement

Funding for agency operations and conservation activities comes from a mix of state and federal funds. General fund support has declined since FY08-09, and today the clean water fund and outdoor heritage fund make up the majority of BWSR's current budget. The other funds category is made up of these two legacy funds in addition to transfers from other agencies, the environment and natural resources trust fund, and special revenue funds.

Approximately 85 percent of BWSR's budget is granted to local governments for approved conservation programs and projects. The remaining 15 percent is retained for agency programs and agency operations, of which personnel is the largest expenditure.

STRATEGIES

BWSR's mission is implemented through the following core functions:

- Serve as the statewide soil conservation agency
- Direct private land soil and water conservation programs through the actions of soil and water conservation districts, counties, cities, townships, watershed districts, and other water management organizations
- Link water resource planning with comprehensive land use planning
- Provide resolution of water policy conflicts and issues
- Oversee comprehensive local water management
- Provide a forum (through the board) for local issues, priorities, and opportunities to be incorporated into state public policy
- Coordinate state and federal resources to realize local priorities
- Administer implementation of the Wetland Conservation Act and Riparian Protection laws

BWSR accomplishes its mission through these key strategies:

- Developing programs that address priority state and local resource concerns (such as keeping water on the land, maintaining healthy soils, reducing pollutants in ground and surface water, assuring biological diversity, and reducing flood potential)
- Prioritizing on-the-ground conservation projects in the best locations to achieve multiple benefits and measurable improvements to water and habitat resources
- Ensuring compliance with environmental laws, rules, and regulations
- Implementing agency operations through board and administrative leadership, internal business systems, planning and effectiveness evaluation, and operational support, including the board and board management, financial and accounting services, legislative and public relations, communications, and human resources

The legal authority for the Board of Water and Soil Resources comes from the following Minnesota Statutes:

M.S. 103A (<https://www.revisor.mn.gov/statutes/?id=103A>)

M.S. 103B (<https://www.revisor.mn.gov/statutes/?id=103B>)

M.S. 103C (<https://www.revisor.mn.gov/statutes/?id=103C>)

M.S. 103D (<https://www.revisor.mn.gov/statutes/?id=103D>)

M.S. 103E (<https://www.revisor.mn.gov/statutes/?id=103E>)

M.S. 103F (<https://www.revisor.mn.gov/statutes/?id=103F>)

M.S. 103G (<https://www.revisor.mn.gov/statutes/?id=103G>)

Net Fiscal Impact = (Expenditures – Revenues)	748	563	563	563
FTEs	0	0	0	0

Recommendation:

The Governor recommends appropriating \$748,000 from the General Fund in FY20 and \$563,000 in FY21 to cover agency compensation cost and lease increases, MNIT cost increases, the performance assessment statutory mandate, and retirement costs to maintain the current level of service delivery for the Board of Water and Soil Resources (BWSR).

Rationale/Background:

Increases to staff salaries, MNIT costs, lease costs, and staff retirement costs, has left the agency in a position where it is unable to cover these costs going into the next biennium. Continued shortages would significantly compromise the agency's ability to implement its responsibilities.

Much of BWSR's non-general fund budget is pass-through dollars from constitutionally-dedicated funds. While BWSR's overall budget has increased to support these supplemental programs and requirements, those funding sources (non-general fund) - cannot support some vital activities related to the work of the agency. The agency takes its commitment to Minnesota's taxpayers seriously and must have appropriate funding to support the agency's financial management so that staff may be the best steward possible of these resources.

Proposal:

Salary Base Adjustment

An increase of \$130,000 this biennium and of \$65,000 annually thereafter will cover rising staff compensation and fringe benefits. BWSR's funding source-complexity has magnified over the past eight years and several of these sources provide limited operational support, such as the Environment and Natural Resources Trust Fund, bonding, federal funds, and other dedicated funds. General agency staffing cost increases average 2 percent per year. This investment will benefit state and local governments by maintaining the agency's capacity for basic financial services, budget management and analysis, grant allocations, and effective internal and external processes.

MNIT Base Adjustment

An increase of \$276,000 this biennium and of \$141,000 annually thereafter will cover basic system and server requirements along with increased rates for MN.IT services in maintenance, standardized equipment, workstation support, fiscal administration, and program management. This request includes \$62,000 in FY20 and \$68,200 in FY21 and ongoing to provide secure servers and database. It also includes general agency staffing increases averaging 2 percent per year for MN.IT@BWSR staff and \$67,000 each in FY20 and FY21 to fully cover the agency's support of the MNIT@BWSR IT manager position.

Retirement Costs

An increase of \$185,000 this biennium and of \$37,000 annually thereafter will cover the expected costs of retirement payouts for agency and MNIT employees. This includes \$65,400 for a one-time payout in FY20 for retirement obligations for a long-time state employee. Further, this includes \$36,500 per year ongoing to cover expected retirement payouts. This amount assumes two retirements per biennium and is based on an average cost to the agency. Lastly, this includes a one-time retirement payout for an IT manager assigned to BWSR by MN.IT Enterprise.

Lease Increases

An increase of \$278,000 this biennium and of \$99,000 annually thereafter will fund rising lease and sub-lease expenses. \$22,000 each year provides for increased obligations in eight field offices; the St. Paul office has additional obligations including a square footage correction, lease increase, and maintenance obligation that has resulted in \$107,000 additional cost in FY20 and \$77,000 each additional year; Finally, a one-time cost for a FY20 planned co-location with other agencies in Rochester.

Maintenance of Project Tracking and Reporting Databases

An increase of \$442,000 this biennium and \$221,000 annually thereafter will support critical software infrastructure. These costs are ongoing and maintain BWSR's current service levels.

Equity and Inclusion:

This proposal would not disproportionately impact any ethnic, racial or other minority group in either a negative or positive way, nor would it eliminate or reduce any disparities.

Results:

The results and measures related to this proposal are directly tied to the outcomes and measures of agency operations and programs described in our budget narratives.

Statutory Change(s):

Not applicable.

Board of Water and Soil Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Base Adjustment for Fiscal Services

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	170	170	170	170
Revenues	0	0		
Other Funds			0	0
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	170	170	170	170
FTEs	2	2	2	2

Recommendation:

The Governor recommends \$170,000 annually from the General Fund starting in FY20 and ongoing to cover immediate agency fiscal service needs.

Rationale/Background:

The Board of Water and Soil Resources (BWSR) has historically approached agency operations with a minimalist lens, focusing on implementing programs by sending most of its appropriations to local governments. This is still the main objective of its operations, however several drivers must now also be considered.

BWSR's funding source complexity has magnified over the past eight years, and several of these sources provide limited operational support, such as the Environment and Natural Resources Trust Fund, bonding, federal funds, and other dedicated funds. The agency needs General Fund sources for some of the administrative work that originates from these funding sources. Compounding this complexity, while BWSR's overall budget has increased, the agency's base General Fund has declined. These limitations have had a substantial impact on the agency's ability to hire sufficient fiscal staff to meet statutory, legal, and MMB requirements for proper compliance. The agency urgently needs to build capacity to meet existing needs.

Proposal:

Salary Base Adjustment

This request funds salaries, benefits, and overhead for two fiscal staff. This investment, also recommended by the Office of the Legislative Auditor, will benefit the state and local governments by increasing the agency's capacity to meet its basic financial services: budget management and analysis, grant allocations, and internal and external processes.

Equity and Inclusion:

This proposal would not disproportionately impact any ethnic, racial or other minority group in either a negative or positive way, nor would it eliminate or reduce any disparities.

Results:

The results and measures related to this proposal are directly tied to the outcomes and measures of agency operations and programs described in our budget narratives.

Statutory Change(s):

Not applicable.

Board of Water and Soil Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Critical IT Repairs and Cybersecurity

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	269	259	60	60
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	269	259	60	60
FTEs	.4	.2	.1	.1

Recommendation:

The Governor recommends \$269,000 from the General Fund in FY20 and \$259,000 in FY21 to cover critical IT repairs and cybersecurity measures.

Rationale/Background:

This request covers two components:

MN.IT eLINK and PTM app development (One-time)

\$51,000 in FY20 and \$161,000 in FY21 will cover General Fund-related costs of upgrades and security improvements to BWSR's main statewide technology project for local grant management and reporting, called eLINK. The current version will be over eight years old when a new version is released. The overall need is \$2.1 million, and this portion covers the general fund use of the system.

Online Permitting System and Wetland Banking Database

\$218,000 in the first year and \$98,000 in the second year and \$60,000 ongoing will be used to develop a wetland banking database to replace the existing outdated, vulnerable, and unsupported system and to complete a business analysis and development plan for an on-line application, permitting, and reporting system for projects impacting wetlands.

Equity and Inclusion:

This proposal would not disproportionately impact any ethnic, racial or other minority group in either a negative or positive way, nor would it eliminate or reduce any disparities.

IT Related Proposals:

Board of Water and Soil Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Easement Stewardship

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	375	375	375	375
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	375	375	375	375
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$750,000 this biennium to fund easement stewardship activities for Reinvest In Minnesota (RIM) Reserve easements that do not already have a stewardship endowment.

Rationale/Background:

Easement monitoring and enforcement activities include ongoing easement inspections, maintenance, repair, enhancements, or lawsuits. Since 2004, the number of easements has steadily increased and the amount available for monitoring and enforcement has declined to less than \$50 per easement per year. Each easement inspection costs \$300.

In its 2013 evaluation report, “Conservation Easements,” the Office of the Legislative Auditor (OLA) recommended that the legislature “amend Minnesota Statutes 2012, Chapter 84C, to require all holders of state-funded conservation easements to have long-term stewardship plans and funding identified for monitoring.” The report noted that while BWSR has implemented a long-term easement stewardship plan, the agency does not have sufficient dedicated funding for this purpose.

In 2015, MS 103B.103 established a stewardship account for monitoring and enforcement purposes, stating “Unless otherwise provided by law, the board shall determine the amount of the contribution or payment, which must be an amount calculated to earn sufficient money to meet the costs of managing the easement at a level that neither significantly over-recovers nor under-recovers the costs.” BWSR began phasing in requests for easement stewardship funds from funding sources including the Clean Water Fund (CWF), Outdoor Heritage Fund (OHF) and Environment and Natural Resources Trust Fund (ENRTF). Using a version of the Land Trust Alliance easement stewardship calculator modified to fit state government and RIM program needs, the BWSR Board determined the necessary one-time stewardship account deposit to be \$6,500 per easement. These calculations are based upon a 5 percent rate of return and a 5 percent appropriation back to BWSR from the State Board of Investment annually.

MMB has determined that bonding funds may not be used for easement stewardship. This reduces the agency’s availability of stewardship funds. Bonding has historically been the most significant source of funding for the RIM program. There are approximately 7,500 easements taken by the RIM program. Of that, 6,663 RIM easements do not have dedicated easement stewardship dollars.

Proposal:

This \$750,000 will increase the agency's ability to fund ongoing monitoring costs for perpetual easements.

BWSR protocol is to monitor easements every year for the first five years and then once every three years thereafter. At a state and local cost of \$300 per monitoring event, and approximately 2,500 easements monitored each year based on this rotation, the ongoing agency cost is \$750,000 per year. BWSR contracts with local Soil and Water Conservation Districts (SWCDs) because of two key benefits: 1) travel costs are greatly reduced and, 2) SWCD personnel work in the local area, which is important to cultivating good working relationships with landowners.

Equity and Inclusion:

This proposal would not disproportionately impact any ethnic, racial or other minority group in either a negative or positive way, nor would it eliminate or reduce any disparities.

IT Related Proposals:

N/A

Results:

- An additional 1,250 easements monitored per year (at \$300 per easement).
- Continued monitor of older RIM easements.
- Capacity to address conservation concerns found through monitoring.
- Added capacity for tracking.

Statutory Change(s):

None required

Board of Water and Soil Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund – Water Management Transition (One Watershed, One Plan)

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Clean Water Fund				
Expenditures	2,270	2,270	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,270	2,270	0	0
FTEs	5	5	0	0

Recommendation:

The Governor recommends \$4.54 million from the Clean Water Fund for the FY20-21 biennium to implement the permanent One Watershed, One Plan program. This represents a \$550,000 increase from the FY18-19 biennium. The agency also requests 5.0 FTE, which represents an increase of 0.5 FTE from the FY18-19 biennium, primarily associated with an increase in watershed areas participating in the program.

Rationale/Background:

In 2012, the Minnesota Legislature enacted one of the most significant overall water policy reforms since the mid-1980s. The watershed approach unites the water planning efforts of counties, soil and water conservation districts, and watershed districts by allowing water management plans to be completed on a watershed scale. Continued Clean Water Fund investment in One Watershed, One Plan allowed it to move from a pilot program in FY14-15 to a permanent program in FY16-17. The program will continue work with local units of government on the transition to watershed-based plans, leading to 1) a reduction from 200 plans based on geopolitical boundaries to around 60 plans based on watershed boundaries; 2) future efficiencies that are both scientifically and economically sound; and 3) targeting of private, local, and state investments towards restored and protected water quality.

The current system of local water management in greater Minnesota is largely along county boundaries, yet water is defined by natural boundaries called watersheds. The One Watershed, One Plan builds off existing studies and assessments being done by Minnesota Pollution Control Agency (MPCA), Department of Natural Resources (DNR), Minnesota Department of Health (MDH) and Minnesota Department of Agriculture (MDA) and creates focused watershed implementation plans that are prioritized, targeted, and capable of achieving measureable results.

Short-term success will be measured by the number of state-approved plans that are completed with the goal of having all of greater Minnesota completed by 2025. Long-term success will be measured by how many lakes and streams are meeting water quality standards and drinking water supplies are protected.

One Watershed, One Plans developed and implemented by local government working with citizens is the most direct, efficient, and effective means to implement the projects and programs needed to achieve the state's clean water goals.

On a statewide level the Clean Water Road Map has set long-term goals for lakes, rivers, streams, and groundwater. BWSR will be using these as measures for the expected outcome with full-scale development, adoption, and implementation of One Watershed, One Plans.

Proposal:

The proposed funding will be used to develop and approve six to 10 plans each year with all of greater Minnesota watersheds completed by 2025. Counties, soil and water conservation districts, and watershed districts are the principal partners and will be the main local governments that will organize and collaborate on the development of watershed implementation plans. The DNR, MPCA, MDA, and MDH will also be partners and will participate through the establishment of a formal agency team assigned to work with each watershed area.

These types of focused watershed-based implementation plans provide the best mechanism to advance state investments in Watershed Restoration and Protection Strategies (WRAPS) and other state studies and plans. They inform development of a focused watershed implementation plan that is science-based, prioritized, targeted, and capable of achieving measureable improvement in water quality, flood control, and groundwater protection.

Equity and Inclusion:

This proposal would not disproportionately impact any ethnic, racial or other minority group in either a negative or positive way, nor would it eliminate or reduce any disparities.

IT Related Proposals:

Not applicable

Results:

This program is part of a comprehensive clean water strategy to reduce the amount of pollutants that enter Minnesota waters. This funding will continue to improve water quality by providing grants to local governments to collaboratively work with their upstream and downstream neighbors to develop a comprehensive watershed management plan and take action for clean water.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Current</i>	<i>Goal</i>	<i>Dates</i>
Quantity	Number of One Watershed, One Plans in development	22	33-36	By 2022
Quality	State approved based on established plan content requirements	5	19	By 2022
Results	Percentage of lakes with good water quality, as measured by acceptable Trophic State Index	62%	70%	By 2034
Results	Percentage of rivers and streams with healthy fish communities, as measured by the Index of Biotic Integrity	60%	67%	By 2034

Statutory Change(s):

Board of Water and Soil Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund - Grants with Multi-Year Plans

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Clean Water Fund				
Expenditures	14,711	14,711	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	14,711	14,711	0	0
FTEs	8.5	8.5	0	0

Recommendation:

The Governor recommends \$29.422 million from the Clean Water Fund for the FY20-21 biennium. This request represents an \$18,422,000 increase from the FY18-19 appropriation. This increase represents implementation of prioritized and targeted conservation activities associated with grants and grant administration, and is in response to an increase in the number of areas across the state that will complete a comprehensive watershed management plan under the One Watershed, One Plan program.

Rationale/Background:

Comprehensive watershed based implementation plans, like those developed under One Watershed, One Plan, provide the best mechanism to build off current state investments being made in Watershed Restoration and Protection Strategies (WRAPS) and Groundwater Restoration and Protection Strategies (GRAPS) as well as other state studies and plans. They inform the building of a focused watershed implementation plan that is science-based, prioritized, targeted, and capable of achieving measureable improvement in water quality, flood control, and groundwater protection.

Providing systematic funding for local water management authorities on a watershed basis will improve water management outcomes. The efficiencies created by this change will benefit both organizations and landowners by streamlining processes, which will allow more projects to be implemented in a timely manner and ensure limited resources are spent where they are needed most. This funding will also provide greater opportunities for local governments to leverage federal and private funding.

Proposal:

This program is a continuation of a Clean Water pilot grant program that based eligibility for these funds contingent on a state approved and locally adopted water management plan developed under the One Watershed, One Plan or the Metropolitan Surface Water and Groundwater Management framework. The planning requirement ensures that state funded projects are targeted to address water quality restoration or protection needs most effectively. The State's investment will leverage local and federal funds because the grants require a match.

Equity and Inclusion:

This proposal would not disproportionately impact any ethnic, racial or other minority group in either a negative or positive way, nor would it eliminate or reduce any disparities.

IT Related Proposals:

Not applicable

Results:

This program is part of a comprehensive clean water strategy to reduce the amount of pollutants that enter Minnesota waters. This funding will continue to improve water quality by providing grants to local governments that will increase the implementation of water quality improvement practices. Short-term success will be measured by the prioritized projects and activities that are completed and associated pollution reduction estimations.-. BWSR also will measure progress against the long-term goals outlined in the Clean Water Roadmap.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Current</i>	<i>Goal</i>	<i>Dates</i>
Results	Percentage of lakes with good water quality, as measured by acceptable Trophic State Index	62%	70%	By 2034
Results	Percentage of rivers and streams with healthy fish communities, as measured by the Index of Biotic Integrity	60%	67%	By 2034

Statutory Change(s):

Board of Water and Soil Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund – Accelerated Implementation

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Clean Water Fund				
Expenditures	5,950	5,950	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	5,950	5,950	0	0
FTEs	8	8	0	0

Recommendation:

The Governor recommends \$11.9 million from the Clean Water Fund for the FY20-21 biennium. This represents a \$3,900,000 and 0.6 FTE increase from the FY18-19 appropriation for accelerating targeted local resource protection and enhancement, statewide program supplements for groundwater and drinking water technical assistance, and building a capable local workforce through a technical training and certification program, database, and targeting tool enhancements.

Rationale/Background:

A majority of water management implementation activity is conducted by local governments. It is in the State's interest for local governments to have the technical skill and capacity to develop and implement priority water management projects. This program addresses an existing gap in technical assistance and training to ensure local government staff have these necessary skills to deliver meaningful and measurable projects.

Advanced inventories, diagnostic and feasibility studies, and targeting tools to assist in building prioritized, targeted, and measureable strategies into water management or comprehensive plan amendment and revisions, and routine implementation activities, will increase the effectiveness of water quality protection or accelerate water quality restoration.

Proposal:

This program contributes to a strategic approach of local water management implementation. Funds are used to enhance the capacity of local governments to accelerate implementation, including: increasing technical assistance through regional technical service areas, technical training and certification, inventories of potential restoration or protection sites, and developing and using analytical targeting tools that fill an identified gap. This funding will support critical infrastructure of the agency such the targeting tool Prioritize, Target, and Measure Application (PTMApp) and eLINK. It will also provide funding to local governments to support staff participation in training and increased capacity to deliver priority water quality projects.

Local government eligibility for these funds is contingent on state approved and locally adopted water management plans-- the plans that link scientific information and citizen priorities including county comprehensive local water management plans, watershed district management plans and city surface water management plans. The planning requirement ensures that state funded projects are targeted to address water quality restoration or protection needs most effectively.

Equity and Inclusion:

This proposal would not disproportionately impact any ethnic, racial or other minority group in either a negative or positive way, nor would it eliminate or reduce any disparities.

IT Related Proposals:

This IT proposal is for the enhancement of the targeting tool PTMapp and the grant tracking database eLINK.

Board of Water and Soil Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund – Conservation Drainage Management and Assistance

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	1,500	1,500	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,500	1,500	0	0
FTEs	1.75	1.75	0	0

Recommendation:

The Governor recommends \$3 million from the Clean Water Fund for the FY20-21 biennium to provide funding for Minnesota drainage authorities under M.S. 103E to plan and construct drainage water quality management practices into drainage system projects. The request represents a \$1.5 million and .25 FTE increase from the FY18-19 appropriation.

Rationale/Background:

Recent studies indicate that the observed increase in stream flows in Minnesota can be attributed to post-European settlement changes in land use, connected to agricultural practices, wetland drainage, and expansion of artificial drainage networks. These land use changes have caused decreased surface water storage and evaporation from fields due to crop conversion.

Together those changes have resulted in increased river flows and increased erosion, sedimentation, and nutrients to downstream waters. Regardless of the exact increased flow cause, strategies that increase the amount of time water sits on the landscape will have a positive impact on controlling stream flows. Similarly, widespread expansion of water storage mechanisms will be particularly important if increasing precipitation patterns continue as part of climate change.

The Minnesota Pollution Control Agency Sediment Reduction Strategy for the Minnesota River Basin and other studies identify that public and private drainage infrastructure can affect peak channel flows, soil erosion, and water quality, including both surface ditches and subsurface tile. In recent years, a number of new best management practices (BMPs) have been identified and developed under the umbrella of “conservation drainage” to better enable multipurpose drainage management. Providing technical and financial assistance to local drainage authorities will help achieve the public benefit of clean water alongside the private and public benefit of maintaining these public drainage systems/infrastructure.

Proposal:

This program provides financial and technical assistance to Minnesota’s Public Drainage Authorities and Soil and Water Conservation Districts to facilitate planning, design, and installation of conservation practices on drainage systems resulting in water quality improvements. These practices promote retention of rainfall and runoff on the land, soil erosion reduction, and water quality improvement in drainage systems and receiving waters while maintaining agricultural production. The program is implemented through partnering with the State’s public drainage system authorities, principally counties and watershed districts. The State’s investment leverages local investment as the grants require a 25 percent local match.

Equity and Inclusion:

This proposal would not disproportionately impact any ethnic, racial or other minority group in either a negative or positive way, nor would it eliminate or reduce any disparities.

Board of Water and Soil Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund - Conservation Reserve Enhancement Program (CREP)

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Clean Water Fund				
Expenditures	12,500	7,500	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	12,500	7,500	0	0
FTEs	9	8	0	0

Recommendation:

The Governor recommends \$20 million from the Clean Water Fund for FY20-21 to implement a Minnesota Conservation Reserve Enhancement Program (MN CREP) in partnership with the United States Department of Agriculture (USDA), local governments, state agencies, and landowners.

Rationale/Background:

The MN CREP aims to address state water quality and habitat goals by focusing on priorities established in local and statewide management strategies, such as the state Nutrient Reduction Strategy, Watershed Restoration and Protection Strategies, and the Minnesota Prairie Conservation Plan. The geography for MN CREP includes 54 counties that have phosphorus or nitrogen problems as determined by the Minnesota Nutrient Reduction Strategy or Watershed Restoration and Protection Strategies, vulnerable drinking water areas, and Prairie Corridor areas.

This effort is a partnership of five state agencies—the Board of Water and Soil Resources (BWSR), Department of Natural Resources (DNR), Department of Agriculture (MDA), Pollution Control Agency (PCA), and Department of Health (MDH)—as well as the USDA Farm Service Agency (FSA), local soil and water conservation districts, and several nongovernmental organizations.

With over 12,400 acres already enrolled, the state is well-positioned to continue to deliver this program. USDA, local soil and water conservation districts, state agencies, and non-governmental organizations have a strong field-based presence through coordinated efforts such as the Farm Bill Assistance Partnership, Prairie Plan Implementation Teams, and many watershed-based planning projects. These efforts have ramped up with the technical and financial assistance services necessary to provide landowners and producers the information they will need to secure their interest.

Proposal:

The MN CREP will benefit water quality by protecting critical riparian areas and address water quality impairments due to modifications in hydrology, sedimentation, and nutrient transport. This program will focus on three practices: buffers, wetlands, and wellhead protection areas – all in environmentally sensitive and important areas. This effort will leverage state and local technical expertise, strategic planning, and fiscal resources to assure that projects are cost effective and provide significant environmental benefits for both water quality and habitat. MN CREP will achieve water quality and habitat goals through implementation of Conservation Reserve Program (CRP) practices such as vegetated buffers and wetland restorations, along with the state's Reinvest in Minnesota (RIM) program, which provides permanent conservation easements.

Equity and Inclusion:

The CREP provisions offer eligibility waivers to landowners who are socially disadvantaged, have limited resources, or are a beginning farmer or rancher as defined by the USDA so that their application will be included in this scoring process. Other groups are not impacted negatively by the CREP.

IT Related Proposals:

Board of Water and Soil Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund – Critical Shoreland Protection Permanent Conservation

Easements

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Clean Water Fund				
Expenditures	1,750	1,750	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,750	1,750	0	0
FTEs	3.0	3.0	0	0

Recommendation:

The Governor recommends \$3.5 million from the Clean Water Fund for the FY20-21 biennium to purchase permanent conservation easements on lands adjacent to public waters with good water quality, but threatened with degradation. The agency also requests 3.0 FTEs for the biennium. The request represents a \$1.5 million and 1.1 FTE increase to the FY2018-2019 appropriation, associated with easement purchase and easement administration and processing.

Rationale/Background:

With more than 10,000 lakes, 100,000 river and stream miles, and extensive groundwater systems, water is a major part of Minnesota's culture, economy, and natural ecosystems. About half of Minnesota's surface waters have been assessed for water quality, and of those, about 40 percent do not meet basic water quality standards.

Shallow lakes and rivers in the forest are very susceptible to the impacts of shoreline development. The alteration of shoreline vegetation, construction of impervious surfaces, placement of in-lake structures, and increased boat and water-based recreation can result in a reduction in emergent and floating plant abundance; mixing of bottom sediments, increased nutrient loading (including substantial changes in phosphorous) and shoreline erosion. The impact of development is cumulative, and over time, such changes can severely reduce water quality of these important water bodies.

Proposal:

This easement program helps fill the need for shoreland protection on key water bodies. Beyond public ownership, current shoreline protection is limited to county shoreland ordinances and limited conservation efforts by non-governmental organizations. Even the most stringent shoreland ordinances still allow for some subdivision and development that can be detrimental to water quality. Voluntary, incentive-based conservation protection options for shoreland landowners are few. Unlike the prairie portion of the state where state funded easement options exist for conservation-minded landowners, private land protection options are limited for shoreland in the forest due to funding constraints. Further, many easement programs are targeted for restoration and not protection.

Using the Reinvent in Minnesota (RIM) program, conservation easements are acquired on critical shoreland areas, targeting the highest priority areas through science-based conservation methods. Conservation activities are prioritized based on a methodology that determines the areas where dollars spent maximize return on investment. The thousands of acres of restored wetlands, adjacent native grassland and buffers on privately-

owned lands remain on local tax rolls. Dollars are primarily used for easement payments to landowners and program implementation (surveying, engineering designs, and realty transactions). Local SWCDs perform regular monitoring inspections of all conservation easements and the state will maintain baseline, monitoring, and geospatial data.

Equity and Inclusion:

This proposal would not disproportionately impact any ethnic, racial or other minority group in either a negative or positive way, nor would it eliminate or reduce any disparities.

IT Related Proposals:

Not applicable

Results:

This program is part of a comprehensive clean water strategy to reduce the amount of pollutants that enter Minnesota waters. To measure the success of this program, BWSR will look at the number of acres protected, with the goal being 1,100 acres over the biennium. The agency also will measure progress against the long-term goals outlined in the Clean Water Roadmap.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Current</i>	<i>Goal</i>	<i>Dates</i>

Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,000	1,000	0	0
FTEs	7	7	0	0

Recommendation:

The Governor recommends \$2 million from the Clean Water Fund for the FY20-21 biennium to implement a comprehensive program of conservation quality control and assurance through oversight, assessment, assistance, and reporting and communication of local government performance and results. The agency requests 7 FTE to implement this component of the Clean Water Fund. The fiscal request is an increase of \$100,000 from the previous biennium to help ensure functionality of BWSR's oversight tools (such as eLINK database).

Rationale/Background:

With more than 10,000 lakes, 100,000 river and stream miles, and extensive groundwater systems, water is a major part of Minnesota's culture, economy, and natural ecosystems. About half of Minnesota's surface waters have been assessed for water quality, and of those, about 40 percent do not meet basic water quality standards.

Local governments are foundational to delivering the results of the state's conservation programs that implement water quality solutions. BWSR will provide accountability to the state while supporting and providing assistance to local governments implementing Clean Water projects by:

1. Building strong technical skills within the local government delivery system
2. Providing assistance to local governments for improved program implementation, streamlining reporting requirements, and providing transparency regarding local government performance in meeting clean water program goals
3. Evaluating the success and value of on-the-ground restoration and protection activities in order to better target implementation funds
4. Communicating information about its grants to local governments and the environmental outcomes achieved through multiple media venues.

Proposal:

This proposal is a continuation of BWSR's previous efforts to provide oversight and accountability for grants to local governments and to measure, track, and communicate results of projects funded with Clean Water funds. Central to BWSR's effort is the agency's eLINK, an on-line conservation tracking system, which features grants tracking from application to reporting, contract management, tracking of water plans goals and outcomes, including estimates of pollution reductions.

Another component of this proposal is BWSR's grant reconciliation process, through which BWSR staff conducts field visits with local governments to ensure compliance with state policies, guidance and fiscal best management practices.

Finally, BWSR communicates information about its grants to local governments and the outcomes achieved through a “Clean Water Stories” program and by working with local units of government to highlight work in their community newspapers and other media.

Equity and Inclusion:

This proposal would not disproportionately impact any ethnic, racial or other minority group in either a negative or positive way, nor would it eliminate or reduce any disparities.

IT Related Proposals:

This IT proposal is for on-going maintenance of eLINK.

Category	FY 2020	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025

Board of Water and Soil Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund – Shoreland Buffer Compliance

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Clean Water Fund				
Expenditures	2,500	2,500	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,500	2,500	0	0
FTEs	4	4	0	0

Recommendation:

The Governor recommends \$5 million for the FY20-21 biennium from the Clean Water Fund to support local government work to facilitate compliance with state riparian buffer or alternative best management practice requirements. This funding request matches the FY18-19 appropriation.

Rationale/Background:

Often Minnesota's lakes, streams, and ditches do not have sufficient riparian buffers. Minnesota's buffer initiative, which was signed into law in 2015, will help protect the state's water resources from erosion and runoff pollution by establishing roughly 110,000 acres of buffer along waterways. Statewide compliance for public waters is 99 percent. Preliminary compliance for public ditches is 84 percent.

Proposal:

This existing program is part of a comprehensive clean water strategy to prevent sediment and nutrients from entering Minnesota's lakes, rivers, streams, and ditches. Funding supports soil and water conservation district monitoring and technical assistance to landowners to achieve full and ongoing compliance of buffer and soil erosion laws.

Equity and Inclusion:

This proposal would not disproportionately impact any ethnic, racial or other minority group in either a negative or positive way, nor would it eliminate or reduce any disparities.

IT Related Proposals:

Not applicable.

Results:

BWSR will measure progress against the long-term goals outlined in the Clean Water Roadmap.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Current</i>	<i>Goal</i>	<i>Dates</i>

Board of Water and Soil Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund – Water Quality Buffers – Conservation Easements

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Clean Water				
Expenditures	4,875	4,875	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	4,875	4,875	0	0
FTEs	4.4	4.4	0	0

Recommendation:

The Governor recommends \$9.75 million from the Clean Water Fund for the FY20-21 biennium to purchase and restore conservation easements on riparian lands adjacent to public waters. This funding request matches the FY18-19 appropriation.

Rationale/Background:

Minnesota has more than 10,000 lakes, 100,000 river and stream miles, and extensive groundwater systems. About half of Minnesota's surface waters have been assessed for water quality, and of those, about 40 percent do not meet basic water quality standards.

This problem is further compounded by changes in land use that affect the quality of water. Minnesota currently is experiencing a significant loss of grasslands – further complicated by the expiration of over 500,000 acres of Minnesota Conservation Reserve (CRP) contracts over the next five years. Unless action is taken to continue protection of the most environmentally sensitive acres, they will likely be converted back into cropland, and the benefits to both water quality and wildlife will be lost.

Studies show that buffers in riparian areas reduce sediment and nutrients entering waterways, stabilize streambanks, and provide food and habitat for many species of wildlife. Buffers are an effective and proven method to protect surface water quality in environmentally sensitive or highly erodible soils along rivers and streams.

Proposal:

This existing and ongoing program is part of a comprehensive habitat and clean water strategy to prevent sediment and nutrients from entering Minnesota's lakes, rivers and streams; enhance fish and wildlife habitat; and protect groundwater and wetlands. For example, one of the unique features of the water quality buffer easement program is that it is the only program that can leverage both Clean Water Fund and Outdoor Heritage Fund appropriations for multiple benefits to water and wildlife by creating buffers on riparian lands adjacent to prioritized waters. In addition, this statewide program may leverage the Minnesota Conservation Reserve Enhancement Program and other critical multi-benefit programs.

Through the Reinvest in Minnesota (RIM) Reserve Program and in partnership with soil and water conservation districts and private landowners, the state will purchase conversation easements and may establish native plant buffers.

This program is highly targeted and is prioritized based on current land use, erodibility, priority in other plans, the most critical expiring CRP acres and/or water quality impairment.

Equity and Inclusion:

This proposal would not disproportionately impact any ethnic, racial or other minority group in either a negative or positive way, nor would it eliminate or reduce any disparities.

Board of Water and Soil Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund – Surface and Drinking Water Protection/Restoration Grants

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Clean Water Fund				
Expenditures	16,300	16,300	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	16,300	16,300	0	0
FTEs	7	7	0	0

Recommendation:

The Governor recommends \$32.6 million from the Clean Water Fund for the FY20-21 biennium for Surface and Drinking Water Protection and Restoration Grants. This represents an increase of \$13,100,000 and 3.2 FTE which reflects an increase in the amount of funding for grants and associated grant administration.

Rationale/Background:

Minnesota has more than 10,000 lakes, 100,000 river and stream miles, and extensive groundwater systems. . About half of Minnesota's surface waters have been assessed for water quality, and of those, about 40 percent do not meet basic water quality standards.

Protecting and restoring Minnesota's waters is a collaborative effort between federal, state, and local partners. This program provides Clean Water Funds to local governments to support the implementation of high priority projects derived from state approved, locally adopted water management plans. Local governments use these funds to plan, design and install conservation practices targeted to protect and restore water quality. Practices installed are designed to address water quality problems specific to the targeted water body, but generally retain rainfall and runoff on the land, and reduce the transport of sediment and nutrients to surface and ground waters.

Local governments have been aggressive in identifying projects to address water quality needs. For FY18-19, local governments proposed more than \$53 million in projects under this program, while \$20 million of State Clean Water Funds were available, resulting in funding only 38 percent of project requests. Local governments are ready and able to deliver on significantly more water management projects than BWSR has been able to fund. Continued and increased funding for grants to finance local government led restoration and protection projects will provide the necessary support for their efforts, and make progress toward state water quality goals.

Proposal:

This program is a continuation of a highly successful Clean Water grant program, where demand for dollars far exceeds the dollars available. Funds are used to protect, enhance and restore water quality in lakes, river and streams and to protect groundwater and drinking water. Activities include structural and vegetative practices to reduce runoff and retain water on the land, feedlot water quality projects, subsurface sewage treatment system abatement grants, and stream bank, stream channel and shoreline protection projects.

Eligibility for these funds is contingent on a state approved and locally adopted water management plan. The plans that link scientific information and citizen priorities include county comprehensive local water management plans, watershed district management plans and city surface water management plans. The planning requirement

ensures that state funded projects are targeted to address water quality restoration or protection needs most effectively. The State's investment leverages local and federal funds as the grants require a 25 percent match.

Equity and Inclusion:

This proposal would not disproportionately impact any ethnic, racial or other minority group in either a negative or positive way, nor would it eliminate or reduce any disparities.

IT Related Proposals:

Not applicable

Results:

This program is part of a comprehensive clean water strategy to reduce the amount of pollutants that enter Minnesota waters. This funding will continue to improve water quality by providing grants to local governments that will increase the implementation of water quality improvement practices. Short-term success will be measured by the number of projects and activities that are completed with appropriated funds. BWSR also will measure progress against the long-term goals outlined in the Clean Water Roadmap.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Current</i>	<i>Goal</i>	<i>Dates</i>

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund – Water Legacy Grants

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Clean Water Fund				
Expenditures	1,000	1,000	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,000	1,000	0	0
FTEs	1	1	0	0

Recommendation:

The Governor recommends \$2 million from the Clean Water Fund for the FY20-21 biennium for a small grants program that expands partnerships for clean water. This includes 1 FTE staff time to cover staff time required to provide additional administration and oversight of grants with the expansion of the program to include direct grants to non-governmental organizations.

Rationale/Background:

Minnesota has more than 10,000 lakes, 100,000 river and stream miles, and extensive groundwater systems. About half of Minnesota's surface waters have been assessed for water quality, and of those, about 40 percent do not meet basic water quality standards.

Active and engaged citizens and communities help achieve long-term clean water goals. This proposal will use existing program delivery mechanisms to address a current funding gap and allow citizens to take action in managing and protecting their local water resources through a 'small grants partners' program.

The efforts and resources of active and engaged community groups, such as lake associations, non-profits, conservation groups and tribal government, will be supported through this program.

Proposal:

This is a new program adapted from a former Clean Water Fund small projects grant program (Community Partners Program). It will ensure that community groups such as non-governmental organizations wishing to implement projects, programs, community service, and education can be direct recipients of these funds.

This program provides competitive grants or contracts of up to \$100,000 to governmental, non-governmental, and tribal organizations for implementation projects that protect, enhance, and restore water quality or protect groundwater and drinking water sources from degradation. The State's investment leverages local and federal funds as the grants require a match.

Equity and Inclusion:

This proposal would not disproportionately impact any ethnic, racial or other minority group in either a negative or positive way, nor would it eliminate or reduce any disparities.

Board of Water and Soil Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Funds – Enhancing Landowner Adoption of Cover Crops

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	500	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	500	0	0	0
FTEs	.1	0	0	0

Recommendation:

The Governor recommends \$500,000 from the Clean Water Fund for the FY20-21 biennium (available in year one) for grants to enhance landowner adoption of cover crops in areas where there are direct benefits to public water supplies. The agency requests 0.1FTE to support program implementation.

Rationale/Background:

Access to safe and reliable drinking water is essential to the health of Minnesotans and the vitality of our communities. This program is part of a comprehensive clean water strategy to reduce nutrients and sediment from entering drinking water supplies. Incorporating cover crops into row crop rotations within drinking water supply management areas can improve water quality by decreasing nitrogen losses, reducing runoff and improving soil health.

Vulnerabilities of drinking water systems have come into the spotlight over the last several years. While Minnesota has not experienced a large scale drinking water crisis, the risk of drinking water contamination is of particular concerns in some areas of Minnesota. Several Minnesota communities have seen increased water treatment rates due to contamination of ground water from excess nitrate coming from agricultural areas. These incidents are indicative of the widespread vulnerability of many rural communities because much of Minnesota's rural landscape is heavily dominated by intensive row-crop agriculture.

Reports, such as the Minnesota Pollution Control Agency Nutrient Reduction Strategy, indicate that despite widespread best management practice (BMP) adoption, nitrate levels in Minnesota are not decreasing. Even perfect timing, rate, and placement of nitrogen fertilizer won't stop all the leaks in the current cropping systems. For a good portion of each spring and fall, large portions of the landscape are bare. Given the significant influence of land uses on water quality, this study and several other reports, such as the Environmental Quality Board Water Policy Report and the Clean Water Council's Living Cover for Drinking Water Protection policy, indicate that to reduce nitrate from leaching into our groundwater and running off into our surface waters, a shift in the cropping systems will be required. One component of this shift is the recommended use of cover crops to scavenge excess nitrogen from the soil.

Proposal:

This new cover crops initiative is highly targeted and will provide an opportunity for a large acre and participant increase in areas where there will be benefits to a drinking water supply. Clean Water Funds will be made to eligible landowners and retailers to plant cover crops, provide payments to reduce risk, and purchase specialized inter-seeding equipment in one or two targeted areas within the state.

This initiative can leverage existing Natural Resources Conservation Service financial assistance programs and will be implemented by soil and water conservation districts (SWCDs). Short term success will be measured by the number of acres of cover crops installed with appropriated funds. Long term success will be measured against the long-term groundwater goals set by the Clean Water Road map.

Equity and Inclusion:

This proposal would not disproportionately impact any ethnic, racial or other minority group in either a negative or positive way, nor would it eliminate or reduce any disparities.

Board of Water and Soil Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund –Targeted Wellhead/Drinking Water Protection

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Clean Water				
Expenditures	2,375	2,375	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,375	2,375	0	0
FTEs	2.5	2.5	0	0

Recommendation:

The Governor recommends \$4,750,000 from the Clean Water Fund for the FY20-21 biennium to implement best management practices, land acquisition, or permanent conservation easements in wellhead or source water protection areas where the action needed to protect drinking water are known. The agency also requests 2.5 FTE to implement the program.

Rationale/Background:

As noted by our interagency water discussions, groundwater in Minnesota is at risk of overuse and contamination. This program is part of a comprehensive clean water strategy to prevent sediment and nutrients from entering drinking water supplies. Restoring and permanently protecting land, or implementing best management practices, within drinking water supply management areas improves water quality by increasing the distance between drinking water sources and agricultural chemical uses.

Proposal:

This proposal is a continuation of a successful Clean Water Fund easement program. The purpose of this highly targeted program is to convert agricultural land to grasslands and wetlands or install other water quality practices in areas designated with high or very high vulnerability to contamination. BWSR will continue to work with Minnesota Department of Health and Minnesota Department of Agriculture to determine the list of targeted areas. The agency will then work with soil and water conservation districts (SWCDs) or other community partners in those areas to implement the needed solutions and reduce nutrients and sediment from entering drinking water supplies. This work may include conservation easements, as has been the focus in past phases, or it may also include land acquisition, and/or water quality practices.

Equity and Inclusion:

This proposal would not disproportionately impact any ethnic, racial or other minority group in either a negative or positive way, nor would it eliminate or reduce any disparities.

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund – Tillage and Erosion Transects

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Clean Water				
Expenditures	425	425	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	425	425	0	0
FTEs	0.5	0.5	0	0

Recommendation:

The Governor recommends \$850,000 million from the Clean Water Fund for the FY20-21 biennium to continue implementation of a systematic survey of annual soil erosion rates, adoption of crop residue management practices, and cover crops in 67 Minnesota counties. This funding request matches the FY18-19 appropriation.

Rationale/Background:

About half of Minnesota's surface waters have been assessed for water quality, and of those, about 40 percent do not meet basic water quality standards.

Soil erosion, and the nutrients carried with it, are a significant environmental pollutant in Minnesota. Soil erosion on cropland has on-site impacts to soil quality and crop productivity as well as off-site impacts on water quantity and quality, air quality, and infrastructure maintenance. Tillage is the most widespread land use practice that influences erosion and one of the least expensive options to avoid and mitigate onsite and offsite impacts of erosion.

The Tillage and Soil Erosion Survey is a comprehensive long-term program to systematically collect data and produce county, watershed, and state-wide estimates of soil erosion caused by water and wind along with tracking adoption of high residue cropping systems and implementation of cover crops. Tillage and cover crop trend data and soil erosion data are critical to measuring progress towards goals and recommendations set forth in Minnesota's Statewide Nutrient Reduction Strategy (2013), Sediment Reduction Strategy for the Minnesota River and South Metro Mississippi River (2014), Watershed Restoration and Protection Strategies (WRAPS), and Total Maximum Daily Loads (TMDLs). This data allows tracking of local trends in adoption of conservation practices, effectiveness of local targeting efforts, and helps set local and state priorities.

This critical data is not collected anywhere else. The last statewide effort capable of providing county and watershed reliable data took place in 2007. The current trend in soil erosion statewide has largely gone unchanged, since 1982 and is over twice the amount considered tolerable as established by the United States Department of Agriculture.

Estimated average annual sheet, rill and wind erosion on non-federal cultivated land in tons per acre per year – 2010 National Resources Inventory Summary Report

1982	1987	1992	1997	2002	2007	2010
8.42	9.22	8.65	7.83	7.72	6.59	7.28

Proposal:

This is a continuation of a program that implements a tillage, cover crop and soil erosion survey to systematically collect data and produce county, watershed, and state-wide estimates of soil erosion caused by water and wind along with tracking adoption of high residue cropping systems and cover crops. Tillage, cover crop, and soil erosion data will be collected in the 67 Minnesota counties with greater than 30 percent of land dedicated to agricultural row crop production.

The principal result will be statistically-valid numeric estimates, produced on a county-level, for soil loss from both wind and water erosion and the annual adoption rate of high residue tillage management systems and cover crops. Providing county and watershed-level statistically-accurate data requires annual and statewide data collection over the long-term.

Tillage and residue data enhances existing watershed water quality models. The improved models are better able to identify critical areas for conservation best management practice (BMP) implementation and better estimate pollutant load reductions for both planned and applied conservation practices. Up to date tillage and erosion data can aid local government staff in reaching WRAPS/TMDL implementation goals by comparing current conditions with potential management scenarios designed to reach sediment and nutrient reduction goals. These efforts will help address the following statewide goals:

- *Minnesota Nutrient Reduction Strategy* - Achieving phosphorus phase 1 milestones:
 - Field Erosion Control – conservation tillage adoption rate of 85 percent in available area.
 - Increase and Target Living Cover – cover crop adoption rate of 10 percent.
- *Minnesota Nutrient Reduction Strategy* – Achieving nitrogen phase 1 milestones:
 - Increase and Target Living Cover – cover crop adoption rate of 10 percent.
- *Minnesota Statewide Conservation and Preservation Plan* – Land Use Recommendation 7: Enable improved design and targeting of conservation through improved and timely data collection and distribution
 - A periodic detailed survey of benchmark sampling sites to determine trends in soil erosion, as was carried out by the NRCS for the Natural Resources Inventory.
- *Minnesota Sediment Reduction Strategy for the Minnesota River and South Metro Mississippi River* – Priority Initiatives, Flow Duration and Magnitude Goals:
 - Increase Living Cover.
- *Minnesota Sediment Reduction Strategy for the Minnesota River and South Metro Mississippi River* – Example Tools for Prioritizing and Targeting Watershed Restoration Efforts:
 - Tracking Systems – Tools such as eLINK and the Tillage Transect Survey for use in tracking upland implementation practices.

Equity and Inclusion:

This proposal would not disproportionately impact any ethnic, racial or other minority group in either a negative or positive way, nor would it eliminate or reduce any disparities.

Board of Water and Soil Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund - Technical Evaluation

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Clean Water				
Expenditures	84	84	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	84	84	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$168,000 from the Clean Water Fund for the FY20-21 biennium for the evaluation of a sample of habitat restoration projects completed with Clean Water Funding, as required by M.S. 114D.50, Subd.6. The agency also contributes to a joint position with the Department of Natural Resources (DNR) (equivalent to 0.5 FTE) to lead the evaluation effort. This funding request matches the FY18-19 appropriation.

Rationale/Background:

State law requires restoration evaluations be conducted on habitat restoration projects completed with funds from the Clean Water Fund (M.S. 114D.50), Outdoor Heritage Fund (M.S. 97A.056), and Parks and Trails Fund (M.S. 85.53). BWSR is the responsible agency for Clean Water Fund restoration evaluations; DNR is the responsible agency for Parks and Trails Fund restoration evaluations; and DNR and BWSR are jointly responsible for Outdoor Heritage Fund restoration evaluations (M.L. 2010, Ch. 361, Art.1). These evaluations assess project performance to ensure and improve conservation outcomes across the state.

Proposal:

This proposal is a continuation of the required restoration evaluations that were initiated in 2012. DNR and BWSR have combined administration and reporting for the three statutory requirements in a single Legacy Fund Restoration Evaluation program. Accordingly, one restoration evaluation panel was created and one report is produced on an annual basis.

The evaluation panel is responsible for:

- Evaluating restorations relative to the law, current science, and the stated goals and standards in the restoration plans; and
- Providing findings on the evaluations, determining whether restorations are meeting planned goals, identifying problems with implementation of restorations, and, if necessary, providing recommendations on improving restorations.

Equity and Inclusion:

Not applicable

IT Related Proposals:

Not applicable

Results:

This program evaluates the effectiveness of habitat restorations funded through the Clean Water Fund, helping to measure the performance of projects in meeting habitat goals and providing recommendations to improve effectiveness of future projects. Findings are summarized in an annual report to the legislature and governing councils. All projects evaluated thus far have been implemented in compliance with applicable appropriation laws and reporting requirements, including presenting measurable outcomes and planning to evaluate results.

Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,045	15,250	15,250	15,250
FTEs	0	0	0	0

Recommendation:

The Governor recommends creating an ongoing property tax credit to compensate landowners required to maintain riparian buffers or a water quality equivalent on agricultural land. In addition, the Governor recommends appropriating \$2.045 million from the general fund to the Board of Water and Soil Resources (BWSR) in FY 2020 to provide payments to local soil and water conservation districts (SWCDs). SWCDs will be responsible for reporting landowner noncompliance with the buffer law to counties.

Rationale/Background:

Laws enacted during the 2015 legislative session require riparian buffers or a water quality equivalent to be established on many public waters and drainage systems. Owners of agricultural land abutting public waters must have had buffers in place by November 1, 2017. For land abutting public drainage systems, the deadline was November 1, 2018.

Proposal:

Under this proposal, landowners can claim a property tax credit of \$50 per acre for land required to be maintained as a riparian buffer. Alternatively, landowners can claim an equivalent tax credit if they choose to instead implement an alternative practice with equivalent water quality benefits.

Parcels must meet the following requirements in order to be eligible for the credit:

1. The buffer or alternative practice must be on land classified as 2a agricultural;
2. The buffer or an alternative practice is required under Minnesota Statutes, Section 103F.48, and identified on the state's buffer-protection map;
3. There are no delinquent taxes on the parcel;
4. The land has not been compensated for damages consistent with Minnesota Statutes, Chapter 103E, for the purposes of installing a buffer; and
5. The SWCD has not found the landowner noncompliant with buffer requirements.

Landowners must apply for the riparian buffer credit and certify their amount of eligible land by December 31, 2019. Landowners only apply for the first year they receive the credit. Once approved, the credit will continue into future years. Beginning in 2020 applications for the buffer tax credit will be allowed only when ownership of the land changes or when compliance with at least one of the above conditions changes.

Counties, in consultation with SWCDs, other local water management authorities, and BWSR, will verify applicants' eligibility for the credit. BWSR will distribute a \$30,000 payment from the general fund to MnGeo and \$2.015 million in payments from the general fund to SWCDs in FY 2020. MnGeo will determine which parcels are both subject to the buffer law and are classified as 2a agricultural land. BWSR will provide \$5,000 to \$40,000 each to 89 SWCDs. The size of the payments will depend on the number of parcels BWSR anticipates the SWCD will review for compliance.

The Department of Natural Resources estimates approximately 317,000 acres will be eligible for this credit. Counties will administer the credit, and the Department of Revenue will reimburse the counties. The state estimates the total value of the credit for landowners will be \$15.8 million annually. In addition, the buffer credit reduces property taxes on farm land. Because property taxes can be claimed as income tax deductions for businesses, the buffer credit will reduce income tax deductions and increase revenue to the state by \$550,000 annually.

Equity and Inclusion:

This proposal will not increase inequities.

Results:

The credit will provide property tax relief for landowners complying with the riparian buffer requirement.

Statutory Change(s):

New section – Minnesota Statutes, Section 273.1388

Minnesota Statutes, Section 273.1393

Program: Land and Water Conservation Projectsbwsr.state.mn.us/**AT A GLANCE**

- Deliver conservation programs through local governments, in cooperation with private landowners
- Implement high priority erosion control, native buffers, feedlot, and weed management projects
- Leverage local and federal funds
- Provided 90 grants to local governments that leverage both local and federal dollars to support conservation implementation in FY18

PURPOSE & CONTEXT

The goal of this program is to meet state objectives for clean water, productive soil, and abundant fish and wildlife habitat. Focused on partnerships with local governments, the Board of Water and Soil Resources (BWSR) meets these objectives by implementing targeted projects and practices on private lands to prevent soil erosion and pollution from entering surface and ground water.

Projects are implemented through grants to local governments, including soil and water conservation districts, counties, cities, watershed districts, and watershed management organizations.

SERVICES PROVIDEDConservation Projects Cost Share Program

This program “shares” the cost of implementation between state and local resources. Grants to local governments provide funding for a variety of on-the-ground projects that address state conservation objectives. Specifically, these projects:

- *Keep water on the land:* natural hydrology restoration and runoff reduction is achieved by restoring wetlands, installing raingardens, constructing stormwater treatment ponds, and implementing conservation drainage practices.
- *Maintain healthy soils:* healthy soils are supported through conservation tillage and erosion control projects.
- *Reduce pollutants in surface and ground water:* reducing pollution in sensitive ecological areas is accomplished by upgrading feedlots and subsurface sewage treatment systems, and sealing abandoned wells.
- *Ensure biological diversity:* protection of native plants and animals and their habitats is accomplished through the installation of permanent buffers of native vegetation and cooperative weed management programs that address invasive species management.
- *Maintain stream integrity:* healthy stream hydrology and abundant fish populations are achieved through streambank and shore stabilization.

BWSR works through local governments to ensure private landowners have access to a local, trusted resource that can help address conservation needs. BWSR provides funds to local governments for the costs of constructing conservation projects and practices in addition to the costs of project design, construction oversight, and fiscal and outcomes reporting. Eligibility for funding is contingent on a state-approved and locally adopted water management plan that links scientific information with local priorities to ensure state funds are targeted to the most critical needs. Local governments also leverage local and federal funds for these projects.

Grant Management

BWSR uses a comprehensive grant management system to track the use of state funds in the most efficient manner possible. It establishes eligibility criteria, determines grant program policies, reviews work plans, issues grant agreements, and conducts close-out reviews upon project completion. This grant management system is compliant with the policies adopted by the Department of Administration and the Office of Grants Management.

RESULTS

The measures in the table below represent BWSR's two key goals of this budget program: to reduce water pollutants to improve water quality and to deliver services that encourage trust in government. Specifically, projects funded under this program contribute toward meeting the state's pollution reduction goals for sediment, phosphorus, and nitrogen. It is important that landowners have access to a trusted local resource that is responsive to conservation needs. Experience and research supports the notion that landowners trust local government more than state government and, therefore, are more likely to engage in a conservation activity if they have access to a valued and credible resource within their local community. For example, data from an annual Pew Report shows that trust in local government has largely been stable at 70 percent, while trust in state and federal government has shown considerably more variation, with the current level at 57 percent trusting in state government, and 28 percent trusting in the legislative branch of the federal government.

Type of Measure	Name of Measure	Previous	Current	Dates
Result	Amount of phosphorus removed compared to state goals (statewide)	6.4% 79,313 pounds annually	10.7% 116,785 pounds annually	2015, 2017
	Amount of nitrogen removed compared to state goals (statewide)	0.22% 93,667 pounds annually	0.3% 114,429 pounds annually	2015, 2017

**Statewide goals for phosphorus and nitrogen reduction as found in the Nutrient Reduction Strategy (<https://www.pca.state.mn.us/water/nutrient-reduction-strategy>)*

The legal authority for Land and Water Conservation projects comes from Minnesota Statutes, chapter 103C.501 (<https://www.revisor.mn.gov/statutes/?id=103C.501>) and Minnesota Administrative Rules, chapter 8400 (<https://www.revisor.mn.gov/rules/?id=8400>).

Program: Resource Protection Rules and Lawbwsr.state.mn.us**AT A GLANCE**

- State laws and rules implemented by local governments with state assistance and oversight:
 - Wetland Conservation Act
 - Drainage Law
 - Shoreland Management
 - Subsurface Sewage Treatment Systems
 - Riparian Protection and Soil Loss

PURPOSE & CONTEXT

This program supports state and local implementation of and compliance with environmental protection laws, rules and regulations such as the Wetland Conservation Act, drainage law, shoreland rules, subsurface sewage treatment system rules, riparian protection, and soil loss.

Local implementation of state laws and resource management programs allows for regulation to occur in close proximity to the program activity and is more efficient and effective than state implementation alone. The Board of Water and Soil Resources (BWSR) provides important coordination, program development, implementation assistance, and oversight to ensure that local governments have current knowledge as well as financial and staff capacity to properly implement state programs.

SERVICES PROVIDEDOversight of the Wetland Conservation Act

In 1991 Minnesota enacted the Wetland Conservation Act (WCA), one of the most sweeping comprehensive wetlands protection laws in the country, the purpose of which was to retain the benefits of wetlands and attain no-net-loss of wetlands. WCA requires anyone proposing to drain, fill, or excavate a wetland first to try to avoid disturbing the wetland; second, to try to minimize any impact on the wetland; and, finally, to replace any lost wetland acres, functions, and values. Local governments—cities, counties, watershed management organizations, soil and water conservation districts, and townships—implement the act locally; BWSR administers the act statewide, and it is enforced by the Department of Natural Resources.

BWSR supports local implementation of WCA by providing:

- technical and administrative assistance.
- oversight through project review and annual reporting.
- administration of the state wetland banking system by approving wetland bank applications and managing credit accounting.
- an appeals process when disputes occur regarding local decisions.

BWSR also implements the Local Government Roads Wetland Replacement Program, a statutory mandate that requires the state to replace wetlands impacted as part of local transportation improvement projects. This approach consolidates the necessary technical, financial, and record-keeping components to provide high quality, cost-effective wetland replacement. Underfunding has impacted local road authorities' assurance of wetland mitigation for their road projects.

Riparian Protection and Soil Loss

The purposes of Minnesota Statutes 103F.48, Riparian Protection and Water Quality Practices—commonly referred to as the Buffer Law—is to:

- Protect state water resources from erosion and runoff pollution.
- Stabilize soils, shores, and banks.
- Protect or provide riparian corridors (the land area adjacent to water).

The original law was signed by the Governor in June 2015. The law was amended by the Legislature in 2016 and 2017 to provide clarifications to several provisions, including the riparian protection requirement by ensuring it only applies to public waters and public ditches, compliance and enforcement responsibilities and processes, and compliance waivers for hardships. As of summer 2018, nearly 99 percent of land adjacent to public waters was in compliance with the law.

BWSR is charged with oversight and implementation of the law, which includes a new approach to soil loss. Minnesota's previous soil erosion law, enacted in 1984, stated that a person may not cause excessive soil loss. The law encouraged local governments to adopt soil erosion ordinances and could not be implemented without one. Under the revised law, implementation moves from a county ordinance approach to a complaint-based process. BWSR is charged with implementing these changes.

Drainage Management

BWSR provides essential support to public drainage authorities and stakeholders through:

- Advisory review of watershed district engineers' reports and plans for drainage, flood damage reduction, water quality, and other natural resource enhancement projects.
- Collection of Ditch Buffer Strip Annual Reports, a requirement of county and watershed district public drainage authorities to report miles of buffer strips established in accordance with statute, as well as system inspections and enforcements actions.
- Facilitation of the Drainage Work Group, which provides a forum for agency and stakeholder representatives to discuss and develop recommendations for updates to drainage law, and the Drainage Management Team, which coordinates information and technical assistance to local governments.

Natural Resources Block Grants

As required by statute, some state resource management programs are implemented by counties. To create efficiency, BWSR coordinates and packages the financial support for these programs in cooperation with the Department of Natural Resources (DNR) and the Pollution Control Agency (PCA). These programs include:

- Comprehensive Local Water Management.
- Wetland Conservation Act.
- Shoreland Management.
- Subsurface Sewage Treatment Systems.

RESULTS

The measures detailed below represent the key goal of this budget program, which is to ensure effective local implementation of state resource management laws, rules, and programs. Specifically, BWSR aims to maintain and protect Minnesota's wetlands and the benefits they provide, and ensure that Minnesota has an effective stakeholder forum (the Drainage Work Group) through which consensus can be achieved on issues related to drainage law and policy and an updated Public Drainage Manual that promotes uniformity in interpretation and

implementation of drainage law. BWSR also strives for agency coordination and efficiency through a composite of five grants to local governments that helps reduce the administrative costs of these state natural resource programs.

Type of Measure	Name of Measure	Previous	Current	Dates
Result	Percent gain over date range of wetland acres in Minnesota*	0.02%	0.04%	2006-2011, 2009-2014
Quality	Number of wetland appeals made of local Technical Evaluation Panel decisions	11	8**	2015, 2017
Quantity	Percent of drainage authorities reporting on ditch buffers	100% counties 100% watershed districts	100% counties 100% watershed districts	2015, 2017
Result	Percent of Public Drainage Manual updated	20%	100%	2015, 2016
Quantity	Number of block grants issued to local governments for state resource management programs	87	87	2015, 2018
Result	Percent of Public Waters buffers compliance statewide	94%	98.5%	2017, 2018
Result	Percent of Public Ditches buffer preliminary compliance statewide	NA	76%	2018

*[Monitoring Changes in Minnesota Wetland Area and Type from 2006 to 2014](https://files.dnr.state.mn.us/eco/wetlands/monitoring-wetland-changes.pdf). Minnesota Department of Natural Resources. September 2017. <https://files.dnr.state.mn.us/eco/wetlands/monitoring-wetland-changes.pdf>

**The number of wetland appeals can be used as one measure of the effectiveness of local Technical Evaluation Panels implementing the Wetland Conservation Act (a low number of appeals is desirable).

The legal authority for the Resource Protection Rules and Laws program comes from Minnesota Statutes, Chapter 103E (<https://www.revisor.mn.gov/statutes/?id=103E>) and 103G, (<https://www.revisor.mn.gov/statutes/?id=103G>) Minnesota Administrative Rules, chapter 8420 (<https://www.revisor.mn.gov/rules/?id=8420>)

Program: Board Administration and Agency Operationsbwsr.state.mn.us/**AT A GLANCE**

- 20-member governing board includes local officials, citizens, and agency partners
- 127 staff in nine offices
- 1,183 grants to local governments issued in FY18

PURPOSE & CONTEXT

The goal of Board Administration and Agency Operations is to provide high quality, timely, and cost-effective operational and administrative service.

In addition to providing resources to agency staff, it provides direct support to the 20-member Board, as well as support and information to external partners such as local governments, non-governmental and other community groups, businesses, legislators, and citizens.

SERVICES PROVIDEDAdministrative Services

Administrative Services provides human resources, labor relations, budgeting, payroll, purchasing, contracting, accounting, facilities, motor pool service, and financial reporting services to the agency.

Board Operations

The Board, as appointed by the Governor, provides direction and governance on policy development and grants funds to implement the state's conservation programs and regulatory decisions. The Board comprises three citizens, representatives from local governments (two city, three county, one township, three watershed district, and three soil and water conservation district), and a state agency representative from Department of Agriculture, Department of Natural Resources, Pollution Control Agency, Department of Health, and University of Minnesota Extension Service. Staff provides operational and logistical support to the Board.

Agency Leadership and External Relations

BWSR's Executive Team provides leadership and direction for the agency, develops and implements Board policies, manages regulatory and legislative affairs, and represents the agency in interactions with stakeholders and local, state, and federal agencies.

Internal Controls/Evaluation

Internal Controls provides appropriate internal control policies and related oversight and accountability for agency programs, financial oversight and verification of grants to local governments, and assessment of local government performance.

Information Technology

Information Technology provides direction to MN.IT@BWSR and the business-side expertise to develop and implement essential programming systems, coordinate geographic information systems, and manage telecommunication and network infrastructure.

Communications

Communications provides for strategic agency communication, including implementing the Governor's directive to use social media as part of the agency's External Communications Plan.

Training

BWSR provides high quality and intentional training for both its staff and local government partners to increase their effectiveness in implementing their work to improve and protect the state's soil and water resources.

RESULTS

To understand the impact of this budget program, BWSR reviews agency operations for efficiency and adequate internal controls. This includes completing an agency Risk Management Plan and implementing an annual internal control self-assessment certification. BWSR also seeks to understand the public's awareness of the agency's work. BWSR's communications work is directed by an External Communications Plan. Finally, BWSR reviews the efficiency and program effectiveness of its local government grantees. Since 2007, BWSR has been methodically assessing the performance of the local units of government that constitute Minnesota's delivery system for conservation of water and soil resources. BWSR also reviews grants for full compliance with the Office of Grants Management policy and other management best practices.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quality	Percent of total budget spent on local program implementation (grants and projects)	85%	83%	2015, 2017
Quantity	Number of overdue local water plans	8	3	2016, 2017
Quantity	Print Media Coverage	28 million aggregated people reached	48.2 million aggregated people reached	2017, 2018
Quantity	Social Media Coverage	911 Facebook and Twitter followers	2,380 Facebook and Twitter followers	2015, 2018
Quality	Percent grant funds to local governments reconciled (should be at least 10% per Office of Grants Management policy)	11%	16%	2014, 2017

The legal authority for the Board of Water and Soil Resources comes from Minnesota Statutes Chapter 103B (<https://www.revisor.mn.gov/statutes/?id=103B>).

Program: Permanent Resource Protection

bwsr.state.mn.us/

AT A GLANCE

- Uses science-based conservation methods to achieve multiple benefits:
 - Creates and restores wildlife habitat
 - Improves hunting and fishing
 - Reduces soil erosion and improves water quality
 - Provides flood retention
 - Enhances groundwater recharge
 - Creates and sustains Minnesota jobs
- Funded more than 7,700 easements, protecting more than 290,500 acres since 1986

PURPOSE & CONTEXT

This program is a critical component of the state's goals to protect and improve water quality, protect and enhance wildlife habitat, and reduce flooding. Through the Reinvest in Minnesota (RIM) Reserve program, the Board of Water and Soil Resources (BWSR) acquires conservation easements to permanently protect, restore, and manage resources while keeping the land in private ownership. Specifically, RIM easements protect the state's water and soil resources by:

- Retiring marginal agricultural lands.
- Restoring drained wetlands and associated buffers.
- Acquiring buffers in sensitive landscapes.
- Reducing flood potential by expanding flood retention areas along rivers.

Today, RIM is the largest non-federal private lands permanent protection program in the country. Anchored in the work of local soil and water conservation districts, the program uses an effective system of local delivery and key federal and non-governmental organization partnerships.

SERVICES PROVIDEDConservation Easement Acquisition

The RIM Reserve program consists of several sub-programs aimed at protecting and restoring wetlands, wild rice lakes, and areas along lakes, rivers, and streams. RIM is the state program that supports the Minnesota Conservation Reserve Enhancement Program (MN CREP), a federal-state partnership launched in 2017 that will permanently protect up to 60,000 acres of environmentally sensitive land in a 54-county area in western and southern Minnesota. The MN CREP will leverage up to \$350 million dollars in federal payments directly to landowners. BWSR also works to protect lands from intensive development within a three-mile radius around Camp Ripley, ensuring both the protection of high quality wildlife habitat and continued use of Camp Ripley as a National Guard training facility. RIM Reserve targets the highest priority areas through science-based conservation methods. Conservation activities are prioritized based on a methodology that determines the areas where dollars spent maximize return on investment. Agency staff provide the necessary administrative, legal, and engineering expertise to secure perpetual conservation easements with private landowners through local soil and water conservation districts (SWCDs). The State of Minnesota holds conservation easements on restored wetlands, adjacent native grassland and buffers while the land remains in private ownership. RIM Reserve dollars are primarily used for easement payments to landowners, project construction costs associated with restoring

wetland basins and establishing native vegetation, and program implementation (surveying, engineering designs, and realty transactions).

Conservation Easement Management

Effective long-term easement management requires documenting baseline conditions at the time of acquisition as well as regular ongoing monitoring, and enforcement when necessary, to ensure compliance. Local SWCDs perform regular monitoring inspections of all conservation easements. BWSR maintains baseline, monitoring, and geospatial data.

RESULTS

Measuring performance of this program is guided by progress toward goals outlined in state habitat and water quality plans and strategies, like the Minnesota Prairie Conservation Plan and Nutrient Reduction Strategy, which call for increasing connected areas of wildlife habitat and using conservation easements in strategic locations to reduce the amount of pollutants reaching Minnesota's waters. For example, according to the Minnesota Pollution Control Agency study on Nitrogen in Minnesota Surface Waters, the two most significant treatments for reducing nitrogen are putting riparian land that is currently in corn into grass and putting into perennials those areas where corn grows only marginally. BWSR aims to create and sustain Minnesota jobs. Based on a report from the Natural Resources Conservation Service, for every \$100,000 in RIM funding, one new non-agency job is created or maintained and \$128,000 in total economic output is achieved. Finally, in order to make sure this program is effective into the future, BWSR needs to ensure the long-term integrity of conservation easements. BWSR accomplishes this through regular monitoring.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Acres protected under RIM Reserve	263,750	290,500	2015, 2017
Quality	Percent easements monitored on schedule	100%	100%	2015, 2017
Results	Percent of easements with compliance issues (should be <5%)	0.5%	0.5%	2015, 2017

The legal authority for the Permanent Resource Protection Program is found in Minnesota Statutes, Chapter 103F.501-103F.535 (<https://www.revisor.leg.state.mn.us/statutes/?id=103F>).

Program: Program: Local Water Managementbwsr.state.mn.us/**AT A GLANCE**

- Five approved *One Watershed, One Plan* plans, 22 plans in process
- 90 Conservation Delivery grants issued in 2018, totaling \$1.7 million
- 30 grants to improve and protect Minnesota's waters issued in 2017, totaling \$6.5 million
- \$8.7 million in grants for a watershed-based funding pilot program in seven-county metro area and approved *One Watershed, One Plan* plans
- \$11 million in capacity funding annually for soil and water conservation districts statewide

PURPOSE & CONTEXT

The goal of this program is to develop and maintain local capacity to protect and enhance Minnesota's water and soil resources. The Board of Water and Soil Resources does this by ensuring adequate technical resources and capacity are in place to implement protection and restoration projects at the local level and by providing adequate training, oversight, and accountability.

This includes the capacity to plan and implement local water management plans. BWSR has oversight responsibilities to ensure that local water plans are prepared and coordinated with existing local and state efforts and that plans are implemented effectively. These local plans focus on priority concerns, defined goals and objectives, and measurable outcomes.

SERVICES PROVIDEDConservation Delivery Grants

These grants represent a long-standing partnership between state, local, and federal governments to provide base-level resources for operating expenses associated with the local delivery of state conservation programs by providing each soil and water conservation district (SWCD) with a certain degree of funding stability. These funds help provide shared engineering and technical assistance for SWCDs through eight regional Technical Service Areas. They also provide resources for SWCD staff to monitor Reinvest in Minnesota (RIM) Reserve conservation easements to ensure compliance with those easements.

Water Management Planning

Protecting and restoring Minnesota's water resources relies on the knowledge, authorities, partnerships, commitment, and resources of state and local governments. Working with local governments on their water management plans ensures the water resources of the state will be effectively managed. Specifically, BWSR guides local government staff and boards as they develop comprehensive water management plans that address local priorities while meeting state requirements and goals. Local water plans include Comprehensive Local Water Management Plans (County Water Plans), Watershed District Watershed Management Plans, Metro Watershed Management Plans, Metro County Groundwater Management Plans, and Soil and Water Conservation Comprehensive Plans. BWSR's Board reviews and approves local water plans. Agency staff provide overall program guidance, process affiliated grants, and provide plan review and comments.

The *One Watershed, One Plan* concept was initiated in 2011 by the Local Government Water Roundtable, authorized by the Legislature in 2012, and formally launched in 2013. The program moves the planning and implementation of water management from county boundaries to a watershed scale. Five plans have been approved and 22 are in process. This year, BWSR launched a watershed-based funding pilot program for the five approved plans and the seven-county metro area that will support conservation work on a watershed scale.

Water Management Implementation

Working through the local conservation delivery system, BWSR provides grants that allow local governments to fund water quality projects that are prioritized and targeted to the most critical source areas. These grants include projects and practices that protect and restore surface and drinking water, water quality-focused easements, conservation drainage, and work that accelerates implementation. This strategic approach helps to meet locally-identified water quality goals within the larger scope of Minnesota's clean water efforts, helping to meet statewide water quality goals through the prevention and reduction of non-point source pollution.

Pass-Through Grant Management

This area includes pass-through funding for two local water entities: Area II and the Red River Basin Commission. Area II was formed in 1978 as a non-profit organization and works to alleviate the recurrent flood problems in southwestern Minnesota—specifically in Brown, Cottonwood, Lac qui Parle, Lincoln, Lyon, Murray, Pipestone, Redwood, and Yellow Medicine counties. The Red River Basin Commission works toward comprehensive and integrated natural resource planning, management and implementation in the Red River Basin.

RESULTS

This program aims to ensure that SWCDs have a base level of capacity to address water and soil resource concerns. Since 2007 BWSR has been methodically assessing the performance of the local units of government that constitute Minnesota's delivery system for conservation of water and soils resources through the Performance Review and Assistance Program. BWSR also aims to enhance management of water resources due to long-range plans being in place according to the 10-year planning cycle. Plans are improving by becoming more focused and watershed-based as demonstrated by the launch of the watershed-based funding pilot program.

Narrative

Federal funds use is intermittent in the agency.

- Natural Resource Conservation Service (NRCS).
- U.S Army Compatible Use Buffer (ACUB)
- U.S Army Corp of Engineers (COE)
- Environmental Protection Agency (EPA)

1. The U.S. Army Compatible Use Buffer (ACUB) Program provides funds for purchases of easements. The program is ongoing and entirely dependent on federal fund availability year to year. FY2018 and beyond are estimates only. There is no state match or MOE.

2. The U.S. Army Corp of Engineers (COE) contracts with BWSR to do federal portion of work that is in shared federal/state programs. BWSR already has staff doing the state side of the work, and sometimes the COE enters into Interpersonal Agreements for state staff to do some federal project work. There is no state match required and the federal work offsets state work time. There is no MOE. Agreements are short term and estimates are based on history.
3. The Environmental Protection Agency (EPA) agreement has increased from FY18 to FY19. The state and federal government are partners in wetland mitigation and wetland restoration. This agreement will have a 75% contribution. There is no MOE.
4. The Technical Training and Certification program agreement with NRCS has increased from FY18 to FY19 with the addition of staff. It will increase training efforts of local government conservation employees who work in partnership with BWSR in conservation efforts. There is a 50% state match and no MOE. The funding estimate is based on the state/federal agreement.
5. The Wetland Banking Mitigation Program is an agreement with NRCS to help agricultural producers to meet wetland conservation compliance requirement necessary to remain eligibility for USDA Programs. The goal of the partnership is to increase quality wetland mitigation opportunities for Minnesota producers through the State Agricultural Wetland Bank administered by BWSR. There is no state match requirement and no MOE. The funding estimate is based on the state/federal agreement.
6. The Targeted Watershed Based Conservation Planning Program is an agreement with NRCS to provide landowners in up to eleven sub-watersheds in MN additional technical and financial assistance to conduct on-farm environmental assessment, conservation plans. These assessments and plans will lead to accelerated enrollment in federal and state conservation assistance programs in the targeted watersheds with the goal of scaling up the adopting and implementation of soil and water conservation practices that will have a measureable effect on improving water quality and soil health. BWSR will receive 1.5 million of federal funds from NRCS and will provide 1.5 million in matching funds.
7. The Targeted Stories is a new program to increase conservation practice adoption in Minnesota is an agreement with NRCS. The program is a new program to BWSR. Both BWSR and NRCS have a mutual interest in the furtherance of USDA conservation programs administered by the NRCS to assure they are effectively implemented and address federal, state, and local priorities. The proposal is for a targeted communication effort will fund an information officer to create and share stories on successful partnership and NRCS projects that improve soil and water resources and create wildlife habitat while maintaining farming operations. The stories will be distributed through the media, soil media and local organizations. There is a 50% state match and no MOE. The agreement is 240K with BWSR receiving 120K from NRCS and BWSR will provide 120K in matching funds. Length of agreement (09-01-2018 thru 08/31/2021).
8. The Soil Health Assistance is a new program. It's agreement with BWSR and the NRCS. Both have a mutual interest to protect and improve soil resources and water quality by developing the knowledge, skill, and ability of local conservationists to more effectively partner with stakeholders and promote sustainable land management. This project is essential to build the knowledge for NRCS employees, Extension Educators, Soil and Water Conservation District (SWCD) staff, and Certified Crop Advisor (CCA) to assist farmers in practical application of soil health practices. There is almost 50% state match and no MOE. The agreement is 230K with BWSR receiving 110K from NRCS and BWSR will provide 120K in matching funds. Length on agreement (09/01/2018-12/31/2021).

<i>WCCA Operational Increases</i>	6

AT A GLANCE

- Five appellate judges, who sit as panels of three or five.
- Budget 100% funded by the Workers Compensation Fund.
- We review workers' compensation appeals from the Office of Administrative Hearings, the Department of Labor & Industry and union workers' compensation arbitration.
- We also decide petitions to reopen workers' compensation settlements.
- Our website provides information, rules and searchable text of decisions of the court.
- Appeals from our decisions proceed directly to the Minnesota Supreme Court.

PURPOSE

The Workers' Compensation Court of Appeals' mission is to provide equal access to fair and timely review of disputed workers' compensation issues which affect entitlement to and delivery of workers' compensation wage loss and medical benefits.

Outcomes advanced include:

- **Efficient and accountable government services**
- **A thriving economy that encourages business growth and employment opportunities**
- **People in Minnesota are safe**
- **All Minnesotans have optimal health**

BUDGET

**Spending by Category
FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

STRATEGIES

We work to provide equal access to fair and timely review of disputes before us by:

- Reviewing the evidentiary record created by the initial decision making body;
- Presiding over oral arguments;
- Conducting necessary legal research;

- Deciding the issues; and
- Issuing appropriate written orders, decisions and memoranda.

RESULTS

We decide disputes before us promptly under our statutory mandate to:

- Ensure the quick and efficient delivery of benefits to injured workers at a reasonable cost to employers;
- Maintain economic stability for injured workers and their families;
- Provide for appropriate medical treatment of work-related illnesses and injuries;
- Support a competitive business climate for Minnesota employers by reducing the amount of litigation; and
- Support employers in creating safe and healthy work environments.

Decisions are written to inform the parties and the public of the basis for the court's decisions and to create a consistent body of law interpreting and applying the Minnesota Workers' Compensation Act. Our decisions are provided to the public both in published volumes and at: <https://mn.gov/workcomp/decisions/>.

Request:

The Governor recommends additional funding of \$270,000 in FY20 and \$331,000 in FY21 to maintain the current level of service delivery at the Worker's Compensation Court of Appeals (WCCA). This includes increases for current projected compensation, MN.IT rate increases and rent increases.

Rationale/Background:

Each year, the cost of operating this court increases due to budget pressures including salaries, technology and system upgrade costs, as well as other operating costs like rent. The increase in compensation for this court includes \$230,000 in FY20 and \$281,000 in FY21. Additionally, it is estimated that the court will need \$5,000 more per year to cover MN.IT costs as it relates to the Workers Compensation System upgrade in partnership with the Department of Labor and Industry and the Office of Administrative Hearings. Finally, rent increases require an additional \$35,000 in FY20 and \$45,000 in FY21.

IT cost growth drivers may include dedicated MNIT staff compensation-related increases, increased volume usage of enterprise IT services, increased software licensing costs, and/or application support and maintenance cost increases.

This recommendation is to keep the court's current and future level of service and furthers the court's mission to produce high quality and consistent decisions in a timely manner, ensuring quick and efficient delivery of workers' compensation benefits to qualified injured workers at a reasonable cost to employers.

Proposal:

The Governor recommends increasing the agency's operating budget to maintain the delivery of current services. For the Worker's Compensation Court of appeals this funding will cover employee compensation growth, increased technology costs, and growing rent pressures.

Equity and Inclusion:

This proposed change will allow the WCCA to continue the court's initiative to create a process for easier access for all into the workers' compensation system through its modernized IT system as well as ensures that service levels are adequate to help all people in need of the court's services.

IT Related Proposals:

This change will allow the WCCA to continue technology interactions with MN.IT and the systems maintained.

Results:

This proposal is intended to allow the agency to continue to provide current levels of service to the public.

Statutory Change(s):

There are no statutory changes.

AT A GLANCE

- A world-class conservation venue that is home to more than 4,900 animals—many endangered
- 485 acre campus with 121 buildings and related facilities
- 1.3 million visitors annually
- The state's largest environmental educator, with more than 400,000 participants each year
- \$222.7 million annual economic impact, supporting more than 2,200 jobs
- More than 89,000 free admissions to Minnesotans who qualify for assistance programs such as the Supplemental Nutrition Assistance Program and MinnesotaCare through Free to Explore

PURPOSE

The mission of the Minnesota Zoological Garden (Minnesota Zoo or Zoo) is to connect people, animals and the natural world to save wildlife.

The Minnesota Zoo is a primary recreation destination for the state, as well as the state's largest environmental education center and a worldwide leader in conservation. While physically located in Apple Valley, the Minnesota Zoo serves and belongs to all Minnesotans.

When the Minnesota Zoo opened 40 years ago, it introduced people to a new kind of zoo: a zoo where animals lived in open, naturalistic settings rather than inside cages with steel bars. Today, that forward thinking has set a new standard for zoos throughout the world. The Zoo's exhibits include Russia's Grizzly Coast, Discovery Bay, Medtronic Minnesota Trail, 3M Penguins of the African Coast, Tropics Trail, Northern Trail and the Wells Fargo Family Farm. Exploring these exhibits encourages guests to engage in conservation issues, learn about ecosystems worldwide, and celebrate Minnesota's natural history. In addition, the Zoo features amenities like Hanifl Family Wild Woods and Woodland Adventure, which promote nature-based play and an appreciation for the natural world. The Zoo's vision is to increase efforts to connect guests with nature and inspire actions to conserve wildlife habitats.

The Zoo is engaged in conservation efforts not only onsite, but also throughout Minnesota and the world. Through partnerships with other state and federal agencies, it conducts work to save imperiled prairie butterflies, restore endangered native freshwater mussel species, and breed/reintroduce bison (tested free of cattle genes) to state parks throughout Minnesota. Zoo guests experience these programs directly through exhibits and interpretation, while Zoo staff execute programs in the field and behind-the-scenes. With private funding, the Zoo is involved in conserving critically-endangered black rhinos, Asian wild horses, Amur tigers and other species abroad.

More than 500,000 people participate in the Zoo's environmental education programs each year. The Zoomobile outreach program brought the Zoo to more than 51,000 Minnesotans in 42 counties in FY18, and more than 91,000 participants from 55 counties participated in Zoo field trips. The Zoo Safari and Zoo Explorers programs allowed nearly 15,000 of those participants to come for free, including transportation and lunch. Zoo naturalists and keepers provide guests with conservation-focused education programs about animals at the Zoo.

Recognizing that ticket cost can be a barrier to accessing the Zoo's campus and programming, the Zoo ensures that admission is free for Minnesotans who qualify for assistance programs, such as the Supplemental Nutrition Assistance Program, the Special Supplemental Nutrition Program for Women, Infants, and Children, and MinnesotaCare. The Free to Explore program served more than 89,000 Minnesotans in FY18.

Further, the Zoo offers programs targeted to serve communities with special needs through autism camps, American Sign Language (ASL) days at the Zoo, and Dream Night for children with chronic healthcare needs. In 2018, the Zoo launched MNZoo4All, an app to help people with autism and sensory-processing disorders navigate the Zoo in ways that best meet their needs. The Zoo bridges additional access barriers by providing maps of the campus in ten foreign languages, ASL interpreters, sighted guides, and tactile tours. A recent evaluation examining the Zoo's compliance with the Americans with Disabilities Act found that it provides an environment that allows guests of all abilities to travel throughout the campus. The layout of the campus ensures that mobility devices are able to reach all Zoo exhibits and amenities.

Through these programs and its operations, the Zoo contributes to the following statewide outcomes: **a thriving economy that encourages business growth and employment opportunities; Minnesotans have the education and skills needed to achieve their goals; strong and stable families and communities; a clean, healthy environment with sustainable uses of natural resources; and efficient and accountable government services.**

BUDGET

The Zoo is committed to using its resources efficiently and effectively. In addition to the state's investment, it has a diverse mix of earned revenue, private investment and corporate support through charitable contributions and volunteer services. More than 1,200 volunteers collectively donate more than 95,000 hours of time each year, serving an essential role in the Zoo's daily operations.

The Zoo's primary source of revenue (55 percent) is earned income from admissions, memberships, food and gift concessions, programs and events and facility rentals. Charitable contributions to the Zoo's nonprofit partner, the Minnesota Zoo Foundation, support its mission and account for approximately 6 percent of annual revenues. The state's investment in the Zoo's operating budget through the general fund represents 32 percent of the Zoo's total revenue. The Zoo has historically received additional funding from the arts and cultural heritage fund and the environment and natural resources trust fund.

The state's investment is key to maintaining the sustainability of the Zoo's business model, wherein it depends on the state's general fund for approximately one third of its operating budget and its own revenue and charitable contributions for the remaining two thirds. Investment from the general fund ensures the Zoo's ability to withstand the unanticipated expenses inherent in running a large campus with many outdoor areas, such as extreme weather events or fluctuations in the economy that can negatively affect attendance.

Source: Statewide Integrated Financial Tools System (SWIFT)

Source: Consolidated Fund Statement

Because the Zoo cares for more than 4,900 animals and a campus regardless of whether the Zoo is open for admission, it has significant fixed operating costs. With more than 350 annual employees, 65 percent of the Zoo's budget is allocated to personnel compensation and related expenses. Another 6 percent (approximately \$1.8 million) covers fixed utility costs. As state personnel costs and utility expenses continue to rise, the Zoo's fixed costs increase correspondingly.

STRATEGIES

In 2016, the Zoo revised its strategic plan to solidify its critical role in helping Minnesotans connect with nature and increase the value they attach to the natural world. With a new strategic plan, the Zoo began a master planning process in July and will conclude it in early 2019. Four overarching goals drive this process to revitalize, naturalize and mobilize the Zoo:

1. Deliver extraordinary on- and off-site Zoo experiences
2. Position the Zoo as a trusted conservation organization that saves wildlife
3. Develop a comprehensive approach for activating the Zoo's unique resources for all people to play and explore in the natural world
4. Develop and implement a sustainable business model befitting a zoo in the 21st century

Qualitative and Quantitative	Conservation impact	Edward A. Bean Award for Significant Achievement in Conservation (Tigers)	Dakota skipper butterflies reintroduced; 237 Ulysses S. Seal grants since 2002; 500 students involved in the <i>Show Us Your Mussels</i> campaign	2015/2018	2

Performance Measure Notes:

Attendance: Attendance directly affects the Zoo’s long-term financial sustainability and ability to deliver its conservation message. Attendance numbers are captured daily. Many factors affect the Zoo’s attendance, including weather, marketing, price, and general economic conditions. While many of these elements are uncontrollable, the Zoo remains responsible for creating the best experience for guests. Guest satisfaction is directly related to future attendance. In turn, attendance has a demonstrable impact on the economy of the region. The Zoo conducts a guest intercept survey each year. Guests rate their satisfaction with the Zoo experience on a scale of 1 to 10, where 1 is “poor” and 10 is “excellent.”

Economic Impact: The University of Minnesota completed studies of the Zoo’s economic impact on the seven-county metropolitan area in 2007, 2010, 2012 and 2017. Each study showed an increase in the Zoo’s impact in the area. These studies do not reflect any effects from construction projects at the Zoo, which would further increase the impact of the Zoo on the local economy.

Conservation Impact: The conservation impacts include increased numbers and healthy populations of endangered species in the Zoo’s care, increased engagement with partners in the field (in situ initiatives) and recognition of the Zoo’s work by professional partners, peers and other stakeholders. Ulysses S. Seal grants give Zoo employees the opportunity to champion a conservation project, and where they have skills to share, travel to an offsite location and work on the project itself. Outreach programs like *Show Us Your Mussels* get local students involved in the Zoo’s conservation work and generate new educational materials.

See Minnesota Statutes Chapter 85A (<https://www.revisor.mn.gov/statutes/?id=85A>) for an overview of the Minnesota Zoo’s purpose, organization and authority.

Request:

The Governor recommends \$482,000 the first year and \$626,000 each year thereafter to maintain current service levels at the Minnesota Zoo. These funds will support core Zoo operations including care and well-being for 4,990 animals, safety and security for 1.3 million annual guests, and maintenance and utilities across the Zoo's 485-acre campus.

This investment is key to a sustainable business model for the Zoo, which as a private-public partnership relies on a mix of state appropriations, earned income, and contributions.

Rationale/Background:

The Zoo's 485-acre campus operates on the scale of a small city. Zoo staff must ensure the unique needs of each animal is met, that infrastructure and grounds are well-maintained, and that guests are safe, comfortable and satisfied with their Zoo experience. As with other state agencies, staffing costs at the Zoo rise each year due to changes in salary rates and employer-paid health care. To maintain its large campus and meet the unique needs of its animals and guests, the Zoo also experiences rising costs in other areas such as utilities, animal food and medical care, and equipment.

In the FY20-21 Biennium, the IT services the Zoo receives from MNIT will transition from a local to an enterprise service delivery model for workstation management (laptop/desktop computer support and refresh) and service/help desk support. Regular replacement of workstations will be included as part of the service rate, in order to ensure the security and supportability of state agency computers. The agency will also transition to the enterprise service/help desk, which provides 24/7 support to agency staff. Due to budget limitations and high fixed costs in other areas, the Zoo has historically underinvested in technology relative to other state agencies. As a result, moving to the enterprise rate structure will ensure a more consistent level of service but increased costs.

Also during the upcoming biennium, statewide indirect costs assessed on the Zoo will increase to pay for a routine audit completed in 2018 by the Office of the Legislative Auditor. A portion of this request allows the Zoo to pay the higher technology and indirect costs without affecting pricing or programming.

The Zoo is committed to fiscal responsibility. From year to year, the Zoo finds ways to become more efficient with existing resources. The Zoo also grows earned revenues from admissions, events, education programs and other Zoo activities where possible while maintaining affordable access for Minnesotans. The Zoo also works with its private fundraising partner, the Minnesota Zoo Foundation, to seek contributions from individuals and corporations. However, cost growth typically outstrips efficiencies and increases in earned and contributed

income. Without additional resources, the Zoo cannot maintain the quality programs, outreach, and experiences that Minnesotans have come to expect.

Proposal:

This request will allow the Zoo to continue providing the quality programs, outreach and experiences that Minnesotans have come to expect. These funds will maintain the State's share of current operating costs as well as cover the full cost of moving to the MNIT enterprise rate structure (\$167,000 per year starting in FY 2020) and increasing statewide indirect costs (\$140,000 for the biennium).

Because the Zoo's earned income must cover the remaining two-thirds of rising operating costs, the FY 2020-21 budget for the Zoo assumes a corresponding increase in earned income, which would come from a combination of price increases and new ventures.

Equity and Inclusion:

The Minnesota Zoo is the Zoo of the State of Minnesota, and strives to be accessible to all Minnesotans:

- The Minnesota Zoo is free to all Minnesotans who need it to be free. The Free to Explore Program offers free admission to the more than 450,000 Minnesotans accessing public assistance programs including SNAP, WIC, MinnesotaCare, General Assistance, etc. In FY 2018, 89,314 people from 80+ counties visited the Zoo using Free to Explore.
- In FY 2018, 14,880 participants from 163 schools visited the Zoo for free (including transportation and lunch) through the Zoo Safari and Zoo Explorer programs.
- Each year, the Zoo hosts Dream Night, a family experience for children with disabilities or special health care needs.
- The Zoo provides ASL interpreters upon request.
- The Zoo's campus map is made available in 10 languages in addition to English
- The Zoo recently underwent an ADA site survey and is improving the Zoo's accessibility.

Continued State investment in the Zoo at one third of our yearly operating costs ensures that we can deliver these programs at the same level of service into the future.

Minnesota Zoological Gardens

FY 2020-21 Biennial Budget Change Item

Change Item Title: Communication and Security Systems

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	499	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	499	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$499,000 one-time in FY 2020 to replace obsolete communication and security technology at the Minnesota Zoological Garden. Upgraded phone, radio and security camera systems are necessary to operate efficiently and keep animals and guests safe.

Rationale/Background:

The Zoo's 485-acre campus operates on the scale of a small city. Modern communication and security systems are critical to protecting the health and safety of the thousands of staff, volunteers and guests who visit the campus each day, as well as the nearly 5,000 animals who live on campus.

The Minnesota Zoo currently operates with obsolete communications and security technology, which interferes with the ability of Zoo staff to operate efficiently and keep animals and guests safe and secure. Critical technology needs include:

- A new phone system. The Zoo's phone system is nearly 20 years old and the cabling it runs on is 40 years old. The system is no longer supported by the manufacturer, can no longer receive security patches, and does not have basic functions like caller ID.
- A new radio system. The Zoo uses a two-way radio system to communicate in real-time about the safety of guests, animals and staff. Therefore, it is imperative that these radios are reliable and work at all sites within the Zoo grounds. The Zoo's analog radio system must be replaced to ensure greater reliability across the 485-acre site and meet the federal mandate to convert to a digital system.
- An upgraded security camera system. Existing cameras do not have adequate coverage or high enough resolution to meet modern security needs of a major cultural attraction.

Keeping pace with aging physical infrastructure, rising staff compensation costs and the high fixed costs of animal care has limited the Zoo's ability to invest in technology improvements over time. This request allows rapid modernization of critical communication and security systems without affecting pricing or programming.

Proposal:

This request will allow the Zoo to continue providing the quality programs, outreach and experiences that Minnesotans have come to expect. These funds will cover the cost of critical technology upgrades, including:

- Replacing the obsolete phone system (\$350,000),
- Converting to a digital two-way radio system (\$92,000) and
- Upgrading the security camera system (\$57,000).

IT Related Proposals:

Category	FY 2020	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025
Payroll						
Professional/Technical Contracts						
Infrastructure	499,000					
Hardware

Enterprise Services						
Staff costs (MNIT or agency)						
Total	499,000					
MNIT FTEs	0					
Agency FTEs	0					

Results:

The Zoo expects the following results from these investments:

- Minimize phone system interruptions (compared to six interruptions in 2018)
- Significantly faster phone line moves/adds/changes (from hours to minutes)
- Full conversion to digital radio system and 100% digital compatible radios (compared to 50% digital-compatible radios used in a solely analog system currently)
- Adequate security camera coverage and resolution at all priority locations throughout the campus (compared to significant gaps currently)

Narrative

Federal funding to the Minnesota Zoo provides additional resources to advance its mission of connecting people, animals and the natural world to save wildlife. The Minnesota Zoo's Conservation and Education departments primarily receive and spend federal funds, which have come from competitive grants. Federal grants generally allow the Minnesota Zoo to hire staff and purchase equipment that it would not otherwise be able to within existing resources. Federal funds represent less than one percent of the Minnesota Zoo's budget for the FY 2018-2019 biennium, and would grow to slightly more than one percent of its FY 202-2021 biennial base budget if the Zoo is successful in receiving a proposed new grant. The Minnesota Zoo will continue seeking out federal funding resources when they are in line with the Zoo's mission, Strategic Plan and Master Plan.
