- 2) Delivering health care services and care coordination, through controlled substance care teams, to reduce the inappropriate use of opioids by patients and rates of opioid addiction;
- 3) Addressing any unmet social service needs that create barriers to managing pain effectively and obtaining optimal health outcomes;
- 4) Providing prescriber and dispenser education and assistance to reduce the inappropriate prescribing and dispensing of opioids;
- 5) Promoting the adoption of best practices related to opioid disposal and reducing opportunities for illegal access to opioids; and
- 6) Engaging partners outside of the health care system, including schools, law enforcement, and social services to address root causes of opioid abuse and addiction at the community level.

Culturally specific prevention grants – This component specifically addresses the overdose disparities in Minnesota and strives to identify and interrupt the root causes of the overdose epidemic. MDH will distribute grants to organizations working directly with urban American Indians (including the homeless), African Americans, and Minnesota's 11 tribal nations. The community organizations and tribal nations will implement components of the Menomonie Project, a whole health initiative designed by the Menomonie Nation (Wisconsin) that has resulted in clear reductions in overdose death and hospitalizations. The Menomonie Project emphasizes high school graduation rates, employment, reclaiming language, prescribing practices, social services, and family supports. (\$2.4 million in FY20 and \$4.5 million each year thereafter and 3 FTEs—two planner principal positions and one management analyst)

Naloxone – This evidence-based strategy provides funding for training and provides Naloxone medications to first responders, including state troopers, across all of Minnesota. Often, our first responders (state troopers, sheriffs, local law enforcement, Tribal police, fire, and EMS) have opportunities to save lives and can do so when equipped with training (so ensure proper administration of either the injectable or inhalation Naloxone) and are provided with at least two doses of Naloxone per first responder (\$1 million each year).

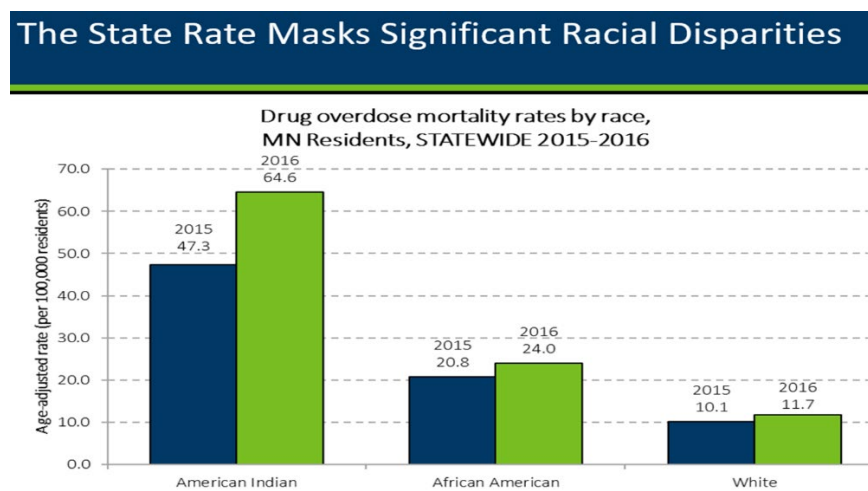

Fatality Review Data and Analysis – This component provides funding for overdose fatality reviews, a systematic process that enables the state and local communities to understand the circumstances of these preventable deaths and identify strategies to prevent future overdoses. Nine states have recently authorized the fatality review process to examine and understand drug overdose fatalities.

Overdose fatalities are not unpredictable and random. An in-depth, multi-disciplinary review of each fatality can identify failures or oversights in medical care, gaps in community services (e.g. access to mental health or medical treatment, coordination between service providers, including emergency medical services), the need for changes to state laws or government practices, or emerging causes of death (i.e. new synthetic opioids or drugs in the community).

MDH staff will support and develop overdose fatality reviews across Minnesota. We will partner with tribal governments, counties, local public health, law enforcement, health care providers, other state agencies, and other community groups. Some reviews will be led by MDH staff; however, part of their responsibility will be to train partners across the state to lead fatality reviews at the local level. Most of the requested funding will support the work of the fatality reviews through grants awarded at the community level. (\$1.3 million in FY 20 and \$1.4 million each year thereafter and 3 FTEs—an epidemiologist, a planner principal, and a research analyst)

Equity and Inclusion:

Minnesota's overall overdose death rate is among the lowest ten states in the nation. However, Minnesota's white overdose rate compared to American Indians and African Americans reveals that Minnesota has the greatest racial disparity in the nation. In 2016, African Americans were two times more likely to die of a drug overdose than were whites. In 2016, American Indians were almost six times more likely to die of a drug overdose than were whites. MDH is using in-person meetings, focus groups, surveys, advisory meetings, and professional forums to understand how best to prevent substance use disorder and overdose death.

Results:

The proposal will reduce the number of drug overdose deaths for all Minnesotans and particularly for American Indian and African American Minnesotans. Potential performance measures could include: number of community prevention programs funded; number of doses of Naloxone purchased; number of drug reversals (proxy for lives

saved); number of grants to Tribal Nations; number of policies changed at the local level; and number of opioid prescriptions each year compared with the preceding year.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Results	Drug Overdose Fatality Rate for American Indian	47.3 per 100,000	70.0 per 100,000	2015 / 2017
Results	Drug Overdose Fatality Rate for African American	20.8 per 100,000	27.4 per 100,000	2015 / 2017

FY 2020-21 Biennial Budget Change Item

Change Item Title: Comprehensive Suicide Prevention

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	3,730	3,730	3,730	3,730
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	3,730	3,730	3,730	3,730
FTEs	4.8	4.8	4.8	4.8

Recommendation:

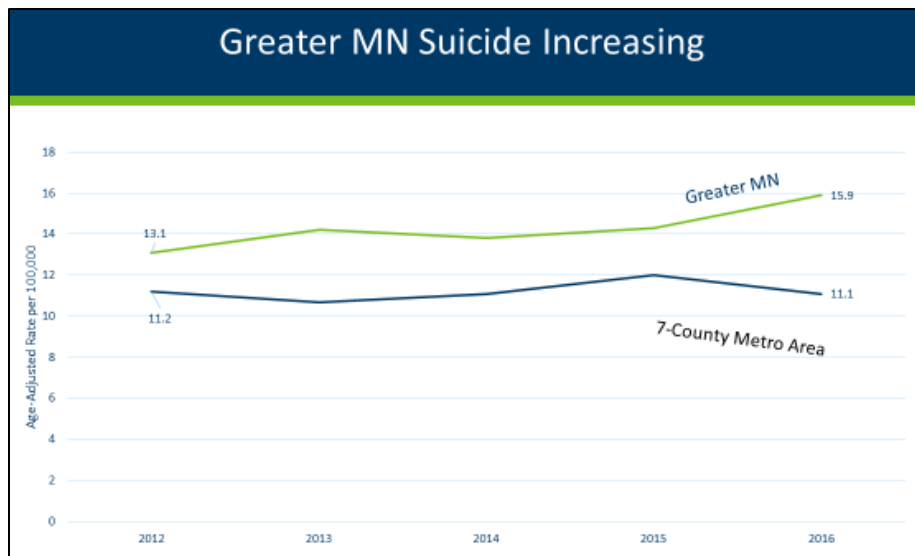

The Governor recommends a General Fund appropriation to support a comprehensive, community-based suicide prevention program. This proposal builds upon a public/private partnership to expand, strengthen, sustain, and support community-based suicide prevention across Minnesota. The proposal includes four components: 1) expanding community-based programs, 2) purchasing program materials and resources for private and public school systems statewide, 3) implementing Zero Suicide in health systems, and 4) funding the national suicide prevention lifeline in Minnesota.

Rationale/Background:

Suicide is the eighth leading cause of death in Minnesota. Our state has experienced a 40 percent increase in suicide deaths since 1999. Between 2016 and 2017, the number of Minnesotans who died by suicide increased from 745 to 771 Minnesotans, almost a four percent increase compared to only two percent in the previous year and one percent in the year prior.

The increase in Minnesota's suicide rate in recent years is due to more suicide deaths in Greater Minnesota.

Evidence shows that most suicides are preventable, mental illness is treatable, and recovery is possible. The 2015 Minnesota State Suicide Prevention Task Force five-year prevention roadmap recommended that prevention efforts be comprehensive, community-based, and culturally specific; involve collaboration across sectors; and include the voices of those with lived experience – suicide attempt survivors and suicide loss survivors.

MDH’s base funding for statewide suicide prevention initiatives is \$350,000 per year, including community-based suicide prevention programming and training. The current appropriation supports one statewide prevention coordinator and six local prevention programs (tribal, local community, and two organizations with statewide reach). It does not include resources for curricula, the Lifeline, or Zero Suicide model implementation.

This proposal will help Minnesota turn the curve on the alarming increases in rates of death by suicide.

Proposal:

This comprehensive prevention approach to suicide has four components:

1. Expand existing state-funded suicide prevention efforts in those communities and populations that have the greatest number and rates of suicide death. MDH will work in communities to assess conditions and circumstances that contribute to suicide death and implement evidence-informed strategies.
 2. Increase protective factors within our communities and youth to promote healthy individuals and decrease suicide risk by using evidence-based and research-informed resources and tools.
 3. Increase the number of behavioral/health care organizations implementing the Zero Suicide Model (currently receives some federal funding).
 4. Build a robust Minnesota-based National Suicide Prevention Lifeline (MSPL) network to increase the timely access of crisis services to all Minnesota residents 24 hours a day.
-
1. **Community-based suicide prevention grants** – This component increases grant funds for community-based programming and trainings from six grantees to 21 grantees. This will result in more communities working to prevent suicide and a decrease in suicides in Minnesota, and in particular, will focus on those communities with the greatest disparities. (\$1.291 million each year, 2.2 FTEs)
 2. **Evidence-based Training and Resources** – This component funds the increasing need for evidence-based training for educators and suicide prevention curriculum for schools to decrease suicide risk among students. Minnesota law requires all teachers to take one hour of evidence-based suicide prevention training as part of renewing their teacher’s license. These funds will support professional and staff training and will purchase curriculum for student use statewide. (\$913,000 each year, 1.2 FTEs)

3. **Zero Suicide Model** – The Zero Suicide Model is becoming the new practice of care for behavioral and healthcare organizations to treat individuals at risk for suicide and to support them across systems of care and upon discharge. Evidence shows that the period post discharge for suicide attempts is the highest risk period of suicide among these individuals. The Zero Suicide model is a commitment to patient safety based upon the understanding that suicidal individuals can be lost to follow-up in a fragmented system. MDH is working with 16 behavioral/health care organizations to implement Zero Suicide, using \$100,000 from a federal grant. This component requires additional funding for a Zero Suicide Academy to implement the model and support related training activities and resources needed for an additional 16 organizations to be successful. (\$205,000 each year, 0.7 FTEs)
4. **Minnesota-based National Suicide Prevention Lifeline (MSPL)** – This component provides funding to establish a Minnesota-based resource for answering the estimated 66,000 calls that are currently generated from Minnesota, into the MSPL. Until July 2018, Minnesota had one MSPL call center in the state; when they were no longer able to function, Minnesota had to depend on MSPL call centers from neighboring states. MSPL is the most recognized and used hotline for suicide prevention. It is a requirement that states have an in-state line and that this line is answered at least at a 70 percent rate in order to be eligible for all future suicide prevention grants (SAMHSA grant requirement). MSPL can be a help and hope for many people that are contemplating suicide. It can get them through the immediate issue before it becomes a significant mental health crisis or suicide attempt. Phone service is part of the continuum of care. This will decrease the use of other already stretched services – such as emergency department and mobile crisis services. New funding will support grants to providers serving the entire state. A state-based lifeline reduces call wait times from 3+ minutes per call to about 30 seconds and is more effective than calls going to a multi-state regional hub. Individuals waiting longer than 30 seconds have time to make impulsive decisions, which they may not have made if their call would have been answered by an in-state call center. State-based call centers have specific and intimate knowledge of community resources and health care providers available to meet immediate needs. The planned Minnesota Network does not duplicate county-based crisis services; rather, the proposed network enhances and integrates with current crisis services. Functioning lifelines have resulted in a decrease in the use of emergency departments and other emergency services. (\$1.322 million, 0.7 FTEs)

Equity and Inclusion:

This proposal will reduce current disparities in suicide. Minnesota currently has disparities by race, geography, gender, and age. An American Indian youth is three times more likely to attempt suicide than a white Minnesotan. In addition, in Minnesota 18 to 24 year olds, suicide is the second leading cause of death, with youth rates three times higher than the average Minnesotan.

Results:***Expand community-based suicide prevention grants:***

- Number of communities funded to do suicide prevention
- Number of communities implementing evidence-based suicide prevention activities

Evidence-based training and resources:

- Number of educators and teachers trained in identifying students at risk for suicide and how to connect them to services (gatekeeper trained)
- Number of educators and school staff confident in their ability to identify students at risk for suicide and connect them to services
- Number of students who are identified as at risk for suicide and are connected to services

Expand Zero Suicide Model in behavioral/health care systems

- Number of behavioral health providers screening all patients at every visit for suicidal thoughts
- Number of providers implementing Zero Suicide Model
- Number of clients who screened positive for suicide risk that have a client safety plan developed
- Rate of suicide attempts

National Suicide Prevention Lifeline (MSPL) in Minnesota

- Percent of calls answered within Minnesota
- Number of MSPL providers in Minnesota
- Timeliness of crisis services
- Rate of use of emergency departments for suicidal ideation

Statutory Change(s):

Change Item Title: Statewide Tobacco Cessation Quitline

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	1,598	2,748	2,878	2,878
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,598	2,748	2,878	2,878
FTEs	3	3	3	3

Recommendation:

The Governor recommends funding from the General Fund to operate a statewide tobacco cessation quitline to provide tobacco cessation counseling, nicotine replacement therapies (NRT), and cessation promotion activities to increase public awareness at the Minnesota Department of Health (MDH). The proposed state-funded quitline will replace the current ClearWay Minnesota QUITPLAN® Services, which will close by March 2020 due to ClearWay's legally required sunset plan.

Rationale/Background:

Quitlines are widely recognized as an evidence-based means of helping tobacco users quit and a core component of a comprehensive tobacco control program. All 50 states have a quitline, with 47 of them operated by tobacco control programs within state health departments (Hawaii, Oklahoma, and Minnesota all have quitlines funded by tobacco settlement "trust agencies," such as ClearWay Minnesota). Providing access to free cessation resources complements tobacco control and smoke-free policies that motivate smokers to quit.

In addition to providing needed cessation services to the uninsured and underinsured, MDH will address the cessation needs of populations most disparately impacted by the harms of tobacco. Minnesota is at risk of becoming the only state in the U.S. without a statewide quitline, leaving smokers who want to quit without the necessary cessation support. Smokers are three times as likely to quit with the aid of counseling and medication, than if they try on their own.

Tobacco use is still the number one cause of preventable disease in Minnesota. Public health efforts have driven down smoking rates (see the graph below), but 580,000 adults in Minnesota still smoke and need help quitting. A 2017 Blue Cross and Blue Shield of MN cost analysis estimates there are \$3 billion in tobacco-related excess health care costs in Minnesota. Annual costs to the Minnesota Medicaid program total \$563 million. Over 14% of adults and 10% of youth in Minnesota still smoked in 2017. Failure to offer a statewide quitline could jeopardize Minnesota's success in decreasing adult tobacco use. ClearWay Minnesota reports that their QUITPLAN Services reach hundreds of thousands of tobacco users every year. In 2017 alone, more than 225,000 people visited QUITPLAN.com or called the QUITPLAN Helpline.

Note: In 2011 the Behavioral Risk Factor Surveillance System (BRFSS) added cell-phone sampling and improved weighting procedures. Readers should not compare 2011 and later prevalence estimates with those from previous years, but instead consider the 2011 results a new baseline to compare with subsequent survey results.

Proposal:

Under this proposal, MDH will operate Minnesota's statewide tobacco cessation quitline. MDH will contract with a specialized vendor to operate a new, fully-operational and state-administered, 24/7 call center and online registration process that provides smokers with ongoing counseling with trained cessation counselors, distribution of free nicotine replacement therapies, and texting and email services. This proposal will replace ClearWay Minnesota's call line and a percentage of their budget for cessation awareness promotion activities. MDH will offer a regularly updated website as an effective resource for people trying to quit including a tobacco cost calculator, quitting readiness quiz, and other resources that can be accessed without professional help (\$650,000 in FY20 and \$1.3M each year thereafter).

MDH will also contract for statewide cessation promotion activities to encourage smokers to use the quitline, conduct outreach to disparately impacted populations, and offer quit challenges and other activities throughout the year to encourage smokers to quit tobacco. Like ClearWay Minnesota, we hope to offer specialized, culturally appropriate quitline services for American Indian and the behavioral health populations. The target for these promotion activities is approximately 574,000 adult smokers and 56,000 high school users. (Statewide public awareness activities: \$500,000 in FY20 and \$1 million each year thereafter.) MDH will contract for an evaluator beginning in year 2022 once the quitline is fully established and has been operating to identify trends, assess impact, and make recommendations for improvement.

MDH will require three FTE's (\$336,000 total each year) to administer the program, including:

- A tobacco cessation manager to coordinate and oversee the cessation program and services,
- A cessation planner to coordinate the quitline contract and monitor the weekly call progress and the day-to-day operations of the vendor, and
- A cessation outreach coordinator for statewide promotional activities, including culturally specific targeted campaigns.

The MDH quitline will serve an important role as the centralized, 800-number clearinghouse and triage for all smokers to provide seamless, barrier-free access to free cessation. Unlike most states, several private health plans in Minnesota also operate their own quitlines or wellness programs that include cessation support, but these services are limited to their members. The MDH statewide quitline will be accessible to smokers who do

not have access to cessation counseling or nicotine replacement therapies. If health plan members call the MDH quitline, it will triage them to their insurance-covered quitline, providing a seamless experience for the user.

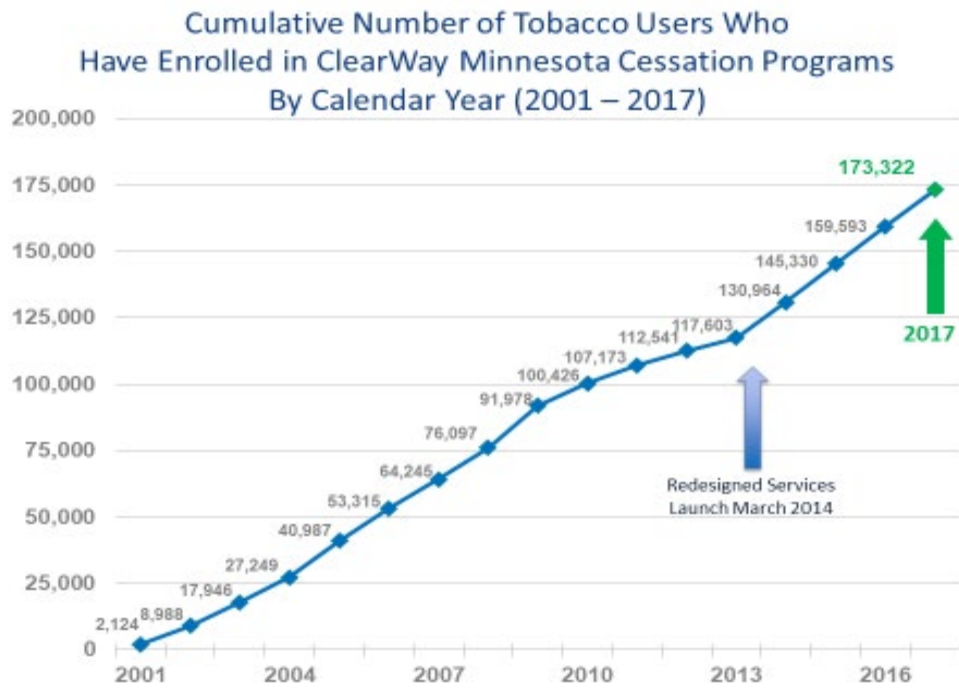

Equity and Inclusion:

Significant tobacco-related disparities among populations historically targeted by the tobacco industry through decades of marketing continue to persist. American Indians, African Americans, LGBTQ, low-income individuals, and people with mental health problems and substance use disorders have dramatically higher tobacco use rates which has had devastating health impacts in the form of chronic disease and death. A 2017 national study found that progress in reducing tobacco use has been uneven in the United States, and substantially higher rates of tobacco use persist among population groups defined by race/ethnicity, occupation, socioeconomic status, sexual orientation, and other factors. MDH's proposal will reduce these disparities and address the devastating consequences from tobacco use in these communities.

Results:

MDH will use standard quitline metrics to evaluate results. From the baseline launch in 2020, MDH expects to increase calls to the statewide quitline, increase quit attempts and increase successful quits (defined as seven continuous months without smoking). The 2017 adult smoking rate in Minnesota is 14.5% (2017 Behavioral Risk Factor Surveillance System). With continued expansion of tobacco control policy changes and a statewide cessation program, MDH aims to further reduce the adult smoking rate to 12% or lower by 2022. MDH also expects to decrease smoking-related health disparities by reducing smoking rates among populations most impacted by the harms of tobacco. MDH anticipates continuing the progress illustrated in the ClearWay Minnesota graph below.

Statutory Change(s):

144.396 Tobacco Use Prevention. Creation of a new section providing authority and funding to operate a state quitline.

Health

FY 2020-21 Biennial Budget Change Item

Change Item Title: Maintaining and Improving Provider Network Adequacy Reviews

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	231	231	231	231
Transfers In	(77)	(77)	(77)	(77)
State Government Special Revenue Fund				
Expenditures	77	77	77	77
Transfers Out	(77)	(77)	(77)	(77)
Net Fiscal Impact = (Expenditures – Revenues)	308	308	308	308
FTEs	3.0	3.0	3.0	3.0

Recommendation:

The Governor recommends a General Fund appropriation each fiscal year for health plan product reviews and licensing of Health Maintenance Organizations (HMOs). Additionally, the Governor recommends eliminating a \$77,000 appropriation transfer from the State Government Special Revenue fund (SGSR) to the General Fund initiated by a 2008 session law. The proposed funding will provide salary support for increased costs related to the complexity of network adequacy reviews for all carriers and health plans offered both on and off the exchange (MNSure) as well as to enhance the Minnesota Department of Health's ability to assess whether network providers are available to consumers who are seeking care.

Rationale/Background:

The ability to access the care they need, when they need it, and within a reasonable distance, is critical for patients. If patients lack access to clinicians in their network who can support their needs in a timely fashion, they may face long wait times for care, inconvenient travel to a distant provider, or substantial out-of-pocket costs.

The Managed Care Section at the Minnesota Department of Health (MDH) regulates Health Maintenance Organizations (HMOs), including assuring that they meet network adequacy requirements, under Minnesota Statutes, Chapter 62D. MDH also reviews provider network submissions of non-HMO commercial health insurers under Minnesota Statutes, Chapter 62K. The intent of this review is to ensure that the networks offered in Minnesota's commercial health insurance market meet minimum state and federal requirements related to network adequacy. However, additional resources are needed for this work to address feedback from consumers statewide who have experienced challenges when they sought care within an approved network. This funding will also ensure that MDH has the capacity to enforce state requirements.

MDH's annual network adequacy reviews only assess whether requirements related to geographic accessibility (miles to a provider) are being met. However, state statute also requires that each network include a sufficient number and type of providers to ensure that covered services are available to all enrollees without unreasonable delay. We know that some patients have found, often at a time when the need for care is critical, that although a provider is included in their network and is within the required geographic range, they are unable to get a timely appointment with that provider. This may be because the provider is not accepting new patients, or in some cases the provider is no longer providing services at all due to retirement or closure. This leads to a great deal of frustration for consumers and delays in care. These patients may ultimately be forced to seek care out-of-network and face substantial out-of-pocket costs.

Currently, MDH does not have the capacity to assess whether the providers included in networks are truly available to enrollees in a timely manner or are even still actively practicing. Network adequacy reviews are based on information submitted by health plans, with no independent verification by MDH of the accuracy of information or the availability of providers throughout the year. As a result, we are unable to assess whether all requirements under Minnesota Statutes, Section 62K.10 are being met.

In prior years, MDH received \$200,000 annually in federal funds via MNsure for its work related to provider network review and also dedicated a portion of its SGSR funds from HMO and County Based Purchaser filing fees to support this work. As of SFY2019, MNsure's federal grants have ended. With the loss of federal funding for provider network review, the Department is unable to review networks for commercial insurance health plans. The General Fund request would ensure continuity of this activity and avoid the issue of cross-subsidizing the work of commercial insurance network review using SGSR funds supported by HMO fees.

Proposal:

This proposal will provide funding to sustain two FTEs to conduct provider network adequacy reviews which would otherwise be discontinued. Additionally, the proposal will allow for the addition of 1.0 FTE in new staffing to assess, throughout the year, whether listed providers are currently active, actually in network, and accepting new patients. The work of the new FTE will lay the groundwork for more effectively enforcing state requirements and identifying additional capacity that may be needed to assist with that enforcement in the future.

Equity and Inclusion:

The proposal addresses the review of health plan provider networks, which affect health care quality, access and affordability in the health care system. To the extent that these health care system factors affect health disparities and access to care for underserved persons and communities, including racial and ethnic groups, LGBT persons and populations, veterans, persons with disabilities and chronic health concerns, or other underserved communities, this proposal supports health care systems to provide access and quality health care for all Minnesotans.

Results:

Under Chapter 62K, MDH undertakes health plan reviews for health plans offered in the Minnesota individual and small group employer (employers with 50 or fewer employees) health insurance markets. In 2017, these plans covered approximately 450,000 Minnesotans, or about 8.3 percent of the Minnesota insurance market.¹

The following table provides an overview of the volume of activity for recent health plan review periods:

Reviews per Year

Year	Networks Reviewed	Waivers Approved	Plans Reviewed/Approved		
			Commercial/PPO	HMO	Dental
2016	41	5,058	625	383	117
2017	50	3,822	592	336	54
2018	41	4,488	531	298	28
2019	44	4,985	506	435	14

Statutory Change(s):

Laws of 2008, Chapter 364, Section 17(b)—repeal of the annual transfer required from SGSR appropriations to the General Fund.

¹ MDH – Health Economics Program, enrollment reported as of December 2017. Market includes both private and public insurance.

Health

FY 2020-21 Biennial Budget Change Item

Change Item Title: MN Health Access Survey

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Health Care Access Fund				
Expenditures	450	0	450	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	450	0	450	0
FTEs	0	0	0	0

Recommendation:

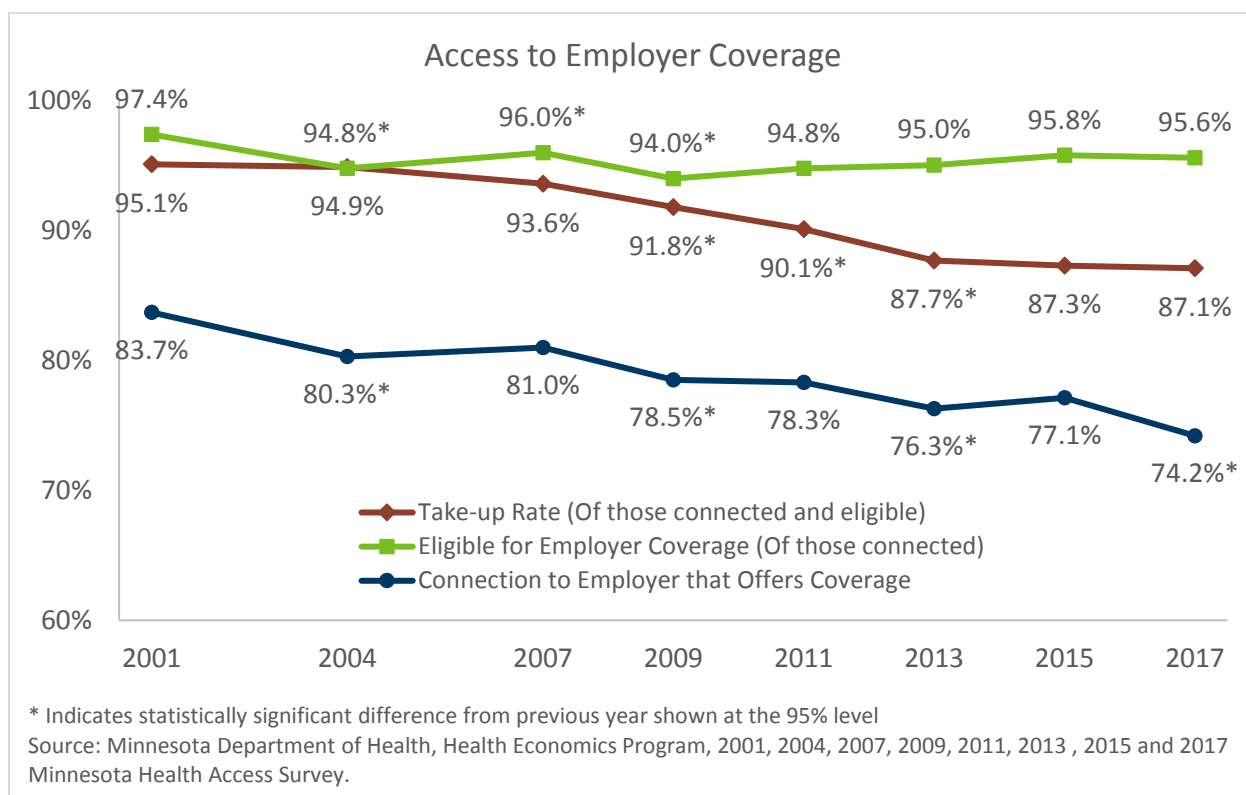

The Governor recommends an increased appropriation of \$450,000 from the Health Care Access Fund (HCAF) in the first (even) year of each biennium beginning with FY 2020 for the continued operations of the Minnesota Health Access Survey (MNHA). The MNHA is a biennial population survey of Minnesotans that collects information on health insurance coverage including the percentage of Minnesotans without health insurance and barriers to accessing health care services. MDH currently receives \$750,000 each biennium from the HCAF to conduct the survey.

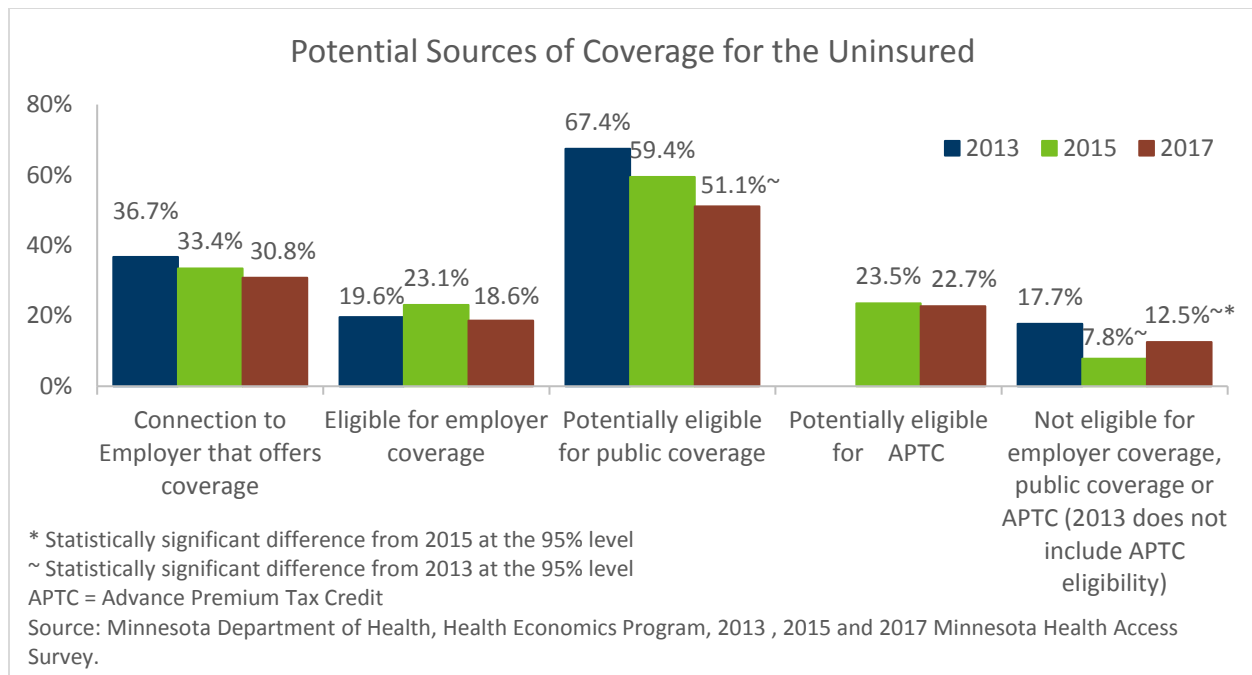

Rationale/Background:

The MN Health Access Survey, conducted biennially by MDH in partnership with the University of Minnesota, is the definitive statewide source of information on access to health insurance coverage and barriers to coverage and care. Policymakers, academic institutions, and organizations working to increase coverage in Minnesota use the survey results to understand the dynamics of the health insurance market, trends in who is gaining or losing coverage and why, the characteristics of the remaining uninsured, and the potential paths to coverage for those who lack insurance. The data are also critical to the Departments of Human Services (DHS), Revenue (DOR), and Management and Budget (MMB) for assessing the potential impact of state and federal policy proposals related to health coverage and costs.

While MDH already receives a base appropriation to conduct the survey, costs have risen substantially over the past 10 years, reaching nearly \$1.2 million in 2017, with the expectation of ongoing increases. For recent survey cycles, MDH has received some supplemental funding from DHS, in recognition of the value of the data to that agency. However, it is uncertain whether these funds will continue to be available in the future.

Examples of MNHA results:

Proposal:

This proposal would appropriate an additional \$450,000 to cover the costs of existing data collection. This would allow MDH to purchase sufficient sample sizes to provide analysis on key populations that are small in numbers, including: the uninsured, young adults, persons with lower incomes, enrollees in Minnesota’s individual market, rural Minnesotans, and Minnesotans of color and American Indians.

The new funds will also enable MDH to cover higher costs for telephone interviews, driven significantly by a need to reach out to more individuals for every completed interview (low response rates across all modes of interviews) and by recent federal requirements to manually dial phone numbers. Additional funding will allow MDH to continue to collect this critical data at a level of precision consistent with prior surveys.

Equity and Inclusion:

Absent this funding, the scope of the survey and the precision of the estimates would need to be significantly scaled back. A smaller survey sample will impact MDH’s and the public’s ability to understand populations in the state experiencing the greatest barriers to coverage (people of color and American Indians, young adults, and people with lower incomes or lower educational attainment). The survey may lack details on those who struggle with barriers to care because of costs (people with individual market coverage, the uninsured, and young adults), or who live in lower populated parts of the state with unique geographic challenges. The survey would become less effective in providing data and evidence for policy proposals to address health access challenges of these populations.

Results:

Young adults (aged 18 to 25) are a key uninsured demographic because they are typically healthy, very price sensitive, and represent a transition population. The Health Access Survey highlighted major gains in their coverage after the Affordable Care Act (dependent coverage expansion, access to individual market, and Medicaid) followed by significant decreases in their coverage rate two years later. This reflected problems with the viability of the individual health insurance market and the impact of policies around access to insurance coverage. Without sufficient funding for a full sample, this increase in the uninsurance rate among 18 to 25 year olds would not have even been detected.

Similarly, one of the highlights of our findings in 2015 was that fewer people without health insurance experienced problems with medical bills – from 40.0% in 2013 to 29.9% in 2015. This was mainly because fewer Minnesotans were uninsured for the entire year and therefore only had health insurance to assist them for part of the year. A reduced sample would not be able to detect this difference.

Without increased funding, we will decrease the length of the survey, eliminating questions like:

- The number of healthy days, both mental and physical health, experienced by Minnesotans.
- The kind of providers people have trouble accessing (used by DHS federal reporting on access to care for Medicaid recipients).
- What types of assistance was used to enroll in coverage.
- Measures of health insurance literacy.
- What percent of Minnesotans are enrolled in a high deductible health plan

Statutory Change(s):

N/A

Health

FY 2020-21 Biennial Budget Change Item

Change Item Title: Repeal Unnecessary Infection Control Law

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
State Government Special Revenue				
Expenditures	(107)	(214)	(214)	(214)
Revenues				
Net Fiscal Impact = (Expenditures – Revenues)	(107)	(214)	(214)	(214)
FTEs	(1)	(2)	(2)	(2)

Recommendation:

The Governor recommends repealing unnecessary blood borne infection control requirements first enacted in 1992 (Minn. Stat. 214.17-25). The Governor also recommends a corresponding reduction in funding for this activity. New drugs and standards of practice in health care settings are now highly effective at minimizing transmission of blood borne infections making these requirements unnecessary. State health boards that license health professionals retain the power to suspend or revoke licenses for professionals that pose an imminent risk to the public.

Rationale/Background:

In 1992, Minnesota mandated that the Minnesota Department of Health (MDH) or the professional licensing boards evaluate and monitor licensed health care professionals (HCPs) who have human immunodeficiency virus (HIV), hepatitis B virus (HBV), or hepatitis C virus (HCV). These HCPs, which the law refers to as regulated persons, include any registered or licensed nurse, physician, physician's assistant, podiatrist, dentist, dental hygienist, dental assistant, chiropractor, or a medical resident. The law also requires a person with knowledge of a regulated person having HIV, HBV, or HCV to file a report with MDH. A regulated person must report within 30 days of learning of their infection or 30 days after licensure, whichever comes first.

Each professional board pays into a special revenue fund based on its number of monitored licensees; MDH uses the funds to conduct the necessary evaluation, counseling, and follow up monitoring of the regulated person. MDH has an annual appropriation in the state government special revenue fund of \$214,000 for this activity that it largely uses for 2 FTEs: 1 nurse specialist and portions of salaries of three administrative staff that support the program. As of July 2018, MDH was monitoring 92 HCPs.

In the last 26 years, there have been many scientific advances in care and treatment for bloodborne infections, including medications to cure HCV and treatments that can decrease HIV to a level that is not detectable with lab testing. While there is no cure for HIV, people living with undetectable HIV have effectively no risk of transmitting HIV to their sex partners. There have been no documented cases of transmission of HIV, HBV, or HCV in a Minnesota healthcare setting since the program began in 1992.

“Standard Precautions” have also now become a standard of practice, effectively minimizing infection transmission in healthcare settings. Standard precautions are a set of infection control practices used to prevent transmission of diseases that can be acquired by contact with blood, body fluids, non-intact skin (including rashes), and mucous membranes. These measures are used when providing care to all individuals, whether or not

they appear infectious or symptomatic. Moreover, there are national Society for Healthcare Epidemiology of America standard practice guidelines for HCPs who are infected with HBV, HCV, or HIV.

The current law results in redundant and unnecessary regulation of health care workers infected with HBV, HCV, or HIV. State health boards that regulate the licensed professionals retain the power to suspend, either temporarily or permanently, any licensed health professional who is an imminent risk to the public. They also have formal disciplinary processes to address improper infection control practices.

Proposal:

This proposal repeals Minnesota Statutes 214.17-.25 and eliminates the HIV, HBV, and HCV Prevention Program for licensed health care professionals. Minnesota is the only state in the U.S. with a monitoring program for licensed healthcare professionals who have a bloodborne infection. The program would formally end on December 31, 2019. Prior to that date, MDH will rescind current monitoring agreements.

The professional health licensing boards (Board of Medical Practice, Board of Nursing, Board of Dentistry, and Board of Chiropractic Examiners) all question the necessity of this outdated program and believe that with the current infection control practices are adequate.

Equity and Inclusion:

This proposal helps remove stigmatization of individuals living with bloodborne infections. Certain disadvantaged racial and ethnic communities, as well as gay, bisexual, and transgender individuals have a higher risk of bloodborne infection and thus, disproportionately bear the burden of this outdated regulation. Organizations who work with diverse populations, such as Justus Health (formerly known as the Minnesota AIDS Project), also support this proposal.

Statutory Change(s):

Minn. Stat. §§ 214.17-.25 - Repeal of HIV, HBV, and HCV Prevention Program

Health

FY 2020-21 Biennial Budget Change Item

Change Item Title: Office of Medical Cannabis Operational Costs

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
State Government Special Revenue				
Expenditures	813	668	668	668
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	813	668	668	668
FTEs	2	3	3	3

Recommendation:

The Governor recommends funding from the State Government Special Revenue fund (SGSR) for the Office of Medical Cannabis (OMC) to maintain current levels of service, anticipate projected patient growth, and conduct needed system improvements.

Rationale/Background:

Minnesota's medical cannabis program was authorized in law in 2014 and began registering qualified patients on July 1, 2015. The original statutory appropriation for the program was the best estimate MDH could make at the time—prior to the creation of the program in 2014. Since that time, the program has more than doubled the enrollment projections made in 2014. The program's current appropriations (\$738,000 from the General Fund and \$1.160 million from the SGSR fund) have not kept pace with the demand for services. We have experienced a growth in the number of new patients and an expansion in the number of qualifying medical conditions. Not only has this challenged the OMC to meet its statutory requirements, it has dramatically increased program revenues. Current projections for FY 2019 show that revenues will exceed expenditures by \$1.169 million, which will be more than sufficient to support an increased appropriation.

Additional funds will allow OMC to meet the growing demand for services without compromising service levels or the research and evaluation components that are the cornerstone of the program. Since 2014:

- Patient enrollment continues to grow to more than 14,400 people
- Legal and regulatory costs for the program are growing
- Qualifying medical conditions have been added
- Program IT needs are still evolving

As the medical cannabis program adds qualifying conditions, patient participation continues to grow. The increased patient enrollment creates pressure on the OMC patient enrollment staff to maintain high levels of customer service and meet application processing timelines set in law. Increased patient enrollment also leads to increased demand for product from the manufacturers, which is causing a strain on product inventory. Business practices need to be refined to accommodate the demand. As the manufacturers refine their processes and standard operating procedures, OMC staff must re-inspect each facility to assure that they continue to meet quality and safety standards, leading to increased demand on OMC inspection staff.

Proposal:

This proposal addresses the increased costs of operating the medical cannabis program by increasing the SGSR fund appropriation within available fee revenues. This is necessary to maintain current service levels, protect

patient safety, provide security and oversight of program participants, and protect the important research and evaluation components of the program. New funding would be for three FTEs (one inspector and two customer service specialists) and for IT database system upgrades that could handle the current patient volume as well as handle large scale expansion and maintenance costs.

Results:

Statutory Change(s):

FY 2020-21 Biennial Budget Change Item

Change Item Title: Safe Drinking Water Fee Increase

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
State Government Special Revenue				
Expenditures	2,117	4,234	4,234	4,234
Revenues	2,117	4,234	4,234	4,234
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	14	28	28	28

Recommendation:

The Governor recommends increasing the safe drinking water fee by \$3.36, from \$6.36 to \$9.72, per water service connection to ensure Minnesota's public water supply continues to be safe to drink.

This fee directly funds Minnesota's vital strategy to protect drinking water activities, specifically to:

- Test water quality for 7,000 public water supplies,
- Provide expert review of test results and trend analysis,
- Perform specialized engineering review of treatment plant plans or source changes,
- Assist in prevention or treatment of contamination issues,
- Train and certify water operators,
- Conduct regular site visits to systems to identify and prevent potential problems while still small and relatively inexpensive to fix,
- Support testing for and risk management of unregulated contaminants, and
- Increase replacement of failing infrastructure by reducing use of Drinking Water Revolving Fund for program activities.

Rationale/Background:

Safe and abundant drinking water is often taken for granted in the United States. However, when problems arise with drinking water—as was the case in Flint, Michigan - the results can be catastrophic. No community or state is immune from threats to its drinking water, but prevention strategies can help minimize costs and risks.

For decades, Minnesota has relied on a unique and effective strategy to protect public drinking water. Unlike states that rely on public water systems to monitor water quality and report back to the state, Minnesota Department of Health (MDH) staff conduct water quality testing for 7,000 public water systems to ensure correct sampling procedures, accurate results, and timely reporting. In addition, MDH addresses increasing threats to drinking water that fall outside the scope of the Safe Drinking Water Act (SDWA), such as pharmaceuticals, personal care products, cyanotoxins, and other unregulated contaminants. Staff go on site to monitor and conduct inspections, building strong relationships with water suppliers. Trust in the expertise and experience of MDH staff prompts systems to contact MDH when a problem occurs, take action before contaminant levels reach the level of a violation, or go beyond regulatory requirements for contaminants not covered by regulations. However, inadequate funding and new threats (such as harmful algal blooms, increasing nitrate in source water, unregulated contaminants, and a new recognition that no level of lead exposure is safe) jeopardize the viability of this approach and the safety of our drinking water.

Past investments in protecting Minnesota's public water supplies largely prevented disruptions to safe, reliable water. However "invisible" these systems have become, they are not invincible. The MDH approach provides in-depth understanding of individual systems, so MDH is able to give systems tools to prevent the crises that make national news in other states. While MDH provides these services to all public water supplies, this robust technical assistance is especially valuable for smaller systems in Greater Minnesota with limited resources and technical capability. Without this additional assistance, small systems have lower compliance with standards. More than just maintaining a consistently high level of compliance with the SWDA, Minnesota's proactive strategy protects our drinking water, our health, and provides a reliable water supply for economic development.

MDH's work is funded primarily by the safe drinking water fee. The current fee of \$6.36 per connection per year was set in 2005. During the 14 years since the last fee increase, inflation has eroded the effectiveness of these funds by 28 percent. While MDH has worked to become more efficient through continuous improvement and strategic staff alignments, efficiency alone is no longer enough to compensate for the combined impact of inflation and a lack of additional resources. In addition, we have tapped the Drinking Water Revolving Fund (DWRF) to the extent allowable, to help cover the gap between available resources and expected service delivery. These efforts cannot continue to cover the current service costs. The use of the DWRF for these administrative purposes has reduced funds available to address over \$7.4 billion of local water system infrastructure needs. Reducing MDH program dependence on DWRF will restore \$80 million in 20 years for local infrastructure needs.

The growing gap in funding to support current program work may lead to increases in violations, a shift in costs to public water suppliers, and unmanaged risks to public health, especially in Greater Minnesota. A further potential loss of federal funds threatens MDH's ability to provide services and technical assistance. Without additional funding, MDH's monitoring and technical assistance efforts will be scaled back. We will no longer have the resources to collect samples, analyze them at our lab, and review the results before sending them back to the systems with advice. Instead, systems will need to take the samples, send them to a separate lab, and eventually get the results to us; this process will result in unnecessary delays and increased time for us to find and resolve problems. MDH staff time will be spent pursuing sampling results and following up on monitoring violations with less time to proactively anticipate, prevent, or address contamination.

Community water systems provide water to people in their homes. Looking at all community water systems as a group, Minnesota has an excellent record of compliance with the SDWA. By taking a closer look at where the violations do occur reveals that there are significant differences by size of the population a system serves. Systems that serve large cities have a larger customer base, greater access to resources, and staff with technical expertise so they are able to anticipate and prevent contaminant levels from exceeding the standards for safe drinking water. Medium and small systems often lack these resources and so most of the violations in Minnesota occur in these systems. MDH's specialized engineering assistance is essential for preventing violations in these smaller systems.

Headline events in nearby states underscore the urgency for adept management of public health risks from known and newly recognized threats: lead in Flint, Michigan; nitrate in Des Moines, Iowa; unregulated contaminants in Charleston, West Virginia; and toxins from algal blooms in Toledo, Ohio. Recent developments in Minnesota warrant increased vigilance; for example, in 2016, a surface water system had a nitrate violation for the first time in Minnesota history. The number of systems that are treated to remove nitrate has increased from six systems serving 15,000 people in 2005 to eight systems serving 50,000 people today.

The graphs below reflect annual MDH funding without an increase in the fee.

Funding by Source

(\$ in thousands)

Spending by Area of Work

Area of Work	% of Total
Public Drinking Water <i>Monitoring, assistance & enforcing the Safe Drinking Water Act</i>	67%
Public Drinking Water Infrastructure <i>Providing plan review, project inspection, and oversight</i>	8%
Drinking Water Source Protection <i>Providing assistance with plans and funding</i>	23%
Special Studies and Projects <i>Organizing research projects and Think Tank (new)</i>	2%

Proposal:

This proposal will increase the safe drinking water fee to \$9.72 per customer service connection per year to restore support for MDH's drinking water protection activities for 7,000 public water supplies that serve water to people where they live, work, gather, and recreate.

This increase, which amounts to a \$3.36 increase per Minnesota household per year (less than a penny a day per household), would start on January 1, 2020, and raise \$4.234 million per year (\$2.117 million in fiscal year 2020). The increase in appropriation supports 25 scientific and program experts at MDH to monitor and assist public water supply systems. These funds will maintain service levels in the face of rising costs and increased monitoring of contaminants not regulated by the SDWA. Increasing the fee will also reduce MDH's reliance on unpredictable federal funding, restore funding for infrastructure, and prevent monitoring costs from shifting to public water suppliers, many of whom are small business (resorts, restaurants, daycares, etc.) owners.

The increased fee affects roughly 1.26 million households, institutions, and businesses connected to municipal water systems. This proposal protects the health of all citizens and visitors to Minnesota, since most Minnesotans drink water from a public supply daily or occasionally. Interested parties include the public water suppliers, MN Rural Water Association, American Water Works Association – MN Chapter, Water Utility Council, and League of MN Cities.

Additional funding supports MDH's ability to track contaminants and intervene before people's health is harmed. Without additional funding, MDH will have to reduce services, leaving local public water systems with a greater burden of testing and reduced technical assistance. There will likely be an increase in violations of federal drinking water standards among community public water supplies and delays in treating contaminants as MDH will have to rely on a protracted regulatory process. Smaller, rural systems with smaller customer bases will have fewer resources for testing, investigations, and infrastructure improvements.

Equity and Inclusion:

Smaller public water supply systems in greater Minnesota face challenges due to their smaller customer base and lack of technical resources. Monthly rates for water tend to be higher and also a larger portion of household income in greater Minnesota. In other states that do not have a proactive technical assistance model, these smaller systems are left to linger with inconsistent monitoring or a series of violations while contamination

problems await resolution. Smaller systems and the people they serve benefit from consistent and accurate water quality monitoring and expert technical assistance as they consult with MDH staff to prevent problems. Timely technical assistance, grants, and loans keep manufactured home parks in business and provide affordable housing in very limited, rural markets.

Results:

More than 99 percent of Minnesotans served by community water systems have drinking water that meets or exceeds safe standards, a performance indicator included on the Minnesota Dashboard (<https://mn.gov/mmb/mn-dashboard/health/safe-drinking-water/>). Overall, and in comparison to national averages, Minnesota has an outstanding record of compliance with the Safe Drinking Water Act. Our robust system of monitoring and specialized engineering support is largely invisible, but not invincible.

Small community water systems have as many as five times the violations as medium or large systems.

FY 2020-21 Biennial Budget Change Item

Change Item Title: Operating Adjustment (Revised)

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	1,222	1,639	1,639	1,639
Revenues	0	0	0	0
State Government Special Revenue				
Expenditures	798	1,480	1,480	1,480
Revenues	0	0	0	0
Health Care Access Fund				
Expenditures	202	349	349	349
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,222	3,468	3,468	3,468
FTEs	16	28	28	28

Recommendation:

The Governor recommends additional funding of \$2,222,000 in FY 2020 and \$3,468,000 each year thereafter from the General Fund, State Government Special Revenue Fund, and the Health Care Access Fund to maintain the current level of service delivery at the Minnesota Department of Health (MDH).

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, pension contributions, FICA, and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent, IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

Agencies face challenging decisions to manage these costs within existing budgets while maintaining the services Minnesotans expect. From year to year, agencies find ways to become more efficient with existing resources, however, cost growth typically outstrips efficiencies, and without additional resources added to agency budgets, service delivery erodes.

For MDH, an erosion of services could result in some or all of the following:

- Delays in forwarding reports of elevated blood lead levels in children to the appropriate local agencies for follow up; timely follow up is important so local agencies can identify the source of the lead and ensure the children receive appropriate follow up medical care.
- Decreased ability to ensure trauma care in rural hospitals meets minimum standards for rapid treatment of life-threatening injuries. Elimination of education and training for trauma hospital staff in rural areas.
- Less capacity to establish health risk limits used to determine when contaminants in groundwater pose a risk to human health; with 84,000 chemicals in use and 700 new chemicals introduced every year, updating risk limits regularly is important to keep pace with changes in the contaminants present in our environment.
- Delays in laboratory testing to determine if a person has been exposed to rabies; time is of the essence with rabies testing because giving rabies shots to people who don't need them puts people at risk for side effects and puts extra burden on the health care system since it is cheaper to do a rabies test than to administer the shots.

- Inability to properly maintain laboratory equipment used to test for infectious diseases like measles, mumps, influenza, and Zika, which could cause delays in testing if equipment doesn't function properly. MDH performs over 12,000 tests for these diseases each year. Rapid testing for these diseases is critical so that public health interventions can stop the spread of diseases. Also, since laboratory testing is less expensive than public health interventions that are ultimately unnecessary, maintaining rapid response capability in the laboratory ensures cost-effective use of public health resources.
- Less capacity to test for radiation in the environment near nuclear power plants, to ensure people living near power plants are not exposed to the harmful effects of radiation.
- Inability to meet state match requirements for federal funds used to increase access to oral health care for underserved populations in Minnesota.
- Less capacity to administer the Safe Harbor for Youth program which connects victims of sexual exploitation with supportive services, shelter, and housing. MDH staff coordinate a system of regional navigators who connect youth to services and train educators, law enforcement professionals, social service providers, and other community members on how to best serve youth who have been sexually exploited.
- Less flexibility to respond to state-level priorities and emergencies. More than half of MDH funding comes from federal grants with specific requirements, so general fund budgets are the primary funding to address state-specific priorities. As state budgets become more stretched, we are unable to respond as quickly or as effectively to local priorities as Minnesotans have come to expect.
- Decreased ability to ensure effective and appropriate use of grant dollars. More than half of MDH funding goes out the door in grants. With fewer grants management staff, MDH cannot monitor grantees' use of funds in accordance with state law and federal guidelines. With fewer staff, MDH cannot provide meaningful technical assistance to grantees and to evaluate how grant dollars improve public health.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the Minnesota Department of Health, this funding will cover anticipated cost growth in employee compensation, including employer-paid insurance; technology services provided by MN.IT; and leased space maintained by the Department of Administration.

In the FY20-21 biennium, MDH will transition from a local to an enterprise service delivery model for workstation management (laptop/desktop computer support and refresh) and service/help desk support. Regular replacement of workstations will be included as part of the service rate, in order to ensure the security and supportability of state agency computers. MDH will also transition to the enterprise service/help desk, which provides 24/7 support to agency staff.

In addition, for the FY20-21 biennium, MDH's portion of MN.IT administrative overhead expenses is projected to increase. MN.IT overhead expenses include HR, finance, procurement, enterprise project management, and security activities. These expenses are allocated to agencies based on their total IT spend and total number of dedicated MN.IT staff as of fiscal year 2017.

Results:

This proposal is intended to allow MDH to continue to provide current levels of service and information to the public.

Statutory Change(s):

N/A

Health

FY 2020-21 Biennial Budget Change Item

Change Item Title: Community Solutions for Healthy Child Development Grant

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	2,000	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,000	0	0	0
FTEs	1.5	0	0	0

Recommendation:

The Governor recommends \$2 million in FY 2020, available to be spent over the next four years, to support and promote health and racial equity for young children and their families. The Minnesota Department of Health (MDH), in collaboration with community partners, will reduce racial disparities in children's health and development, from prenatal to 3rd grade, and promote racial and geographic equity.

Rationale/Background:

Minnesota is home to roughly 423,100 children under the age of six of which about 30 percent are children of color or American Indian children. Of the 30 percent, 69 percent live in the moderate to high and high composite risk counties. This further describes economic, health, and family stability risk factors that are at play throughout Minnesota.¹ Cumulative risk can cause toxic stress and have a compounding effect throughout life – negatively affecting children's brain development, learning ability, and lifelong health and well-being. While no single risk factor determines a child's developmental trajectory, cumulative risk is the most predictive of adverse outcomes in childhood and across the lifespan. Communities of color and Tribal communities report strength in culture and community and the support of these strengths may mitigate the effects of cumulative risk. Supporting economic stability and safe, stable, and nurturing relationships and environments (as defined by communities) at home, at school, and in community systems are top priorities to promote healthy development and well-being for pregnant and parenting families with young children.

Supporting cultural and community strengths builds capacity for action and requires the commitment to developing authentic partnerships that lift up community voice and co-creates solutions. Developing authentic partnerships drives sustainable change to equitably support healthy development and well-being for pregnant and parenting families with young children. An intentional focus on families and communities experiencing racial, geographic, and economic inequity assures that their strengths will be part of solutions.

Proposal:

The Governor recommends that MDH, in collaboration with community partners, reduce the disproportionate rates of children of color, American Indian children, and rural children living in poverty experiencing the effects of cumulative risk in Minnesota. Grants will be available to Tribal and community partnerships to identify and implement strategies that promote optimal health and wellbeing for pregnant and parenting families with young

¹ Wilder (2018) Risk, Reach, and Resilience Report. Retrieved from <https://www.wilder.org/wilder-research/research-library/minnesota-early-childhood-risk-and-reach#page=95>

children. Grants will build on the capacity of communities to promote child and family well-being and address social determinants of healthy child development. Grants will focus on increasing racial equity and healthy child development and reducing health disparities experienced by children of color and American Indian children from prenatal to 3rd grade.

A Community Solutions Advisory Council will be appointed by the Commissioner to advise on the implementation of this proposal, development of the request for proposals, reviewing community responses to the proposals received, and advise the Commissioner on outcomes the grantees should achieve. The Council will be comprised of 12 members and be reflective of the communities experiencing the effects of cumulative risk.

A community of practice approach will be applied so that grantees and the state will have the opportunity to learn from and grow with each other. This approach also allows for determining which prevention, mitigation, and accessibility strategies are scalable beyond individual grantees.

Key MDH Activities:

- Work with the Advisory Council to:
 - Develop RFP, award, and accountability criteria related to healthy child development grants
 - Review proposals and determine awards
 - Provide disaggregated data to communities
- Provide outreach, technical assistance, and program development support to increase capacity to new and existing service providers/community partners/potential grantees
- Lead community of practice

Key Grantee Activities:

- Use data to inform decision making
- Identify practices and programs contributing to disparate outcomes related to child-wellbeing within early-learning, health and development, and economic security
- Choose or develop culturally and linguistically appropriate strategies based on community circumstances that promote program, policy, system, and environmental change to reduce community based risk and promote positive outcomes in early learning; health and development; and economic security;
- Execute strategies developed by community
- Support and participate in program evaluation

This proposal includes 1.5 FTEs over the project period to support the Advisory Committee, develop the RFP, review and award grants, provide accountability protocols, monitor grantee activities, provide oversight of funding, provide technical assistance to potential applicants and grantees, and provide analysis of data and report on findings. This proposal is expected to award approximately four grants.

Equity and Inclusion:

This proposal partners with communities experiencing the greatest amounts of risk to ensure that pregnant and parenting families with young children living with the most inequities are able to experience culturally and linguistically appropriate programs and services that work for them.

Supporting community strengths and community-sourced solutions are key strategies in achieving health and racial equity. In order to reduce and eliminate disparities in economic stability, health, and education, the inequities that exist within communities need to be addressed. Data indicates that children of color and American Indian children are living within geographic communities experiencing economic, health, and family stability risk factors at higher rates than white children. In many cases these risk factors may be caused by structural (or systemic) inequities. This proposal will work with communities to review data, clearly identify the inequities in the community, and implement community sourced solutions to mitigate and eliminate the identified inequities,

reduce risk, and promote positive outcomes for young children, their families, and the communities in which they live.

IT Related Proposals:

N/A

Results:

Results include identifying inequities and developing and implementing strategies to combat those inequities in order to promote positive outcomes in health and development. Over time, results may also include measurable reductions in community-based risk factors (economic, health, family stability) for families with young children as measured by Pregnancy Risk Assessment Monitoring System (PRAMS) and the MN Risk, Reach, and Resilience Report. For example, 51% of all children under age six live in communities within 41 counties experiencing moderate to high and high composite risk.² Using that as a baseline, we would be able to gauge reduction in composite risk at the county level, but also improvements in population level child and family outcomes such as, but not limited to, healthy and well-timed births, numbers of children entering the child welfare system, and the Kindergarten Entrance Profile results. Focusing our efforts explicitly on young children and families experiencing racial and economic inequities helps us to reduce risk for all people living within these geographic areas. These types of results would not be seen within the first year of the grant cycle, rather these are the types of results we would expect to see over an extended time period.

Statutory Change(s):

N/A

² Wilder (2018)

Change Item Title: Family Planning Special Projects

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	2,500	2,500	2,500	2,500
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,500	2,500	2,500	2,500
FTEs	2	2	2	2

Recommendation:

The Governor recommends an increase in funding for the Family Planning Special Projects (FPSP) program, which offer services and information that improve pregnancy outcomes. These funds will support continued statewide access to culturally appropriate family planning counseling and education, contraception services, preconception care, and sexually transmitted infection (STI) screening and treatment. Family planning is the voluntary planning and action taken by individuals to prevent, delay, or achieve a pregnancy.

Rationale/Background:

Nearly 23 percent of all pregnancies in Minnesota are unintended, with significantly higher rates among African American/Black (43 percent) and American Indian women (33.2 percent). Unintended pregnancy is a critical public health problem with consequences for infants, families, and society. Family planning services provide information and resources to families before a pregnancy to promote optimum health of the women and healthy pregnancy outcomes for the baby. Family planning services offer opportunities for parents to prepare physically and financially, take advantage of pre-pregnancy risk identification and implement appropriate management, and initiate needed changes in diet, exercise, smoking and drinking that can help ensure a healthy pregnancy outcome. Unintended pregnancies are associated with economic hardship, poor child health and development, and child abuse and neglect. In 2018, family planning grantees reached 96,000 individuals through activities such as classes and health fairs and provided reproductive health counseling to over 40,000 individuals. These providers, positioned throughout the state, assure access to services and to culturally appropriate care and translation services to populations with the most significant disparities.

Sexually transmitted infections rates continue to rise in Minnesota. In 2017, the number of new chlamydia, gonorrhea, and syphilis cases combined increased by 8 percent in 2017 compared to 2016. Persons of color continue to be disproportionately affected by STIs. Chlamydia rates are almost ten times higher for African Americans and five times higher for American Indians in Minnesota than they are for whites. Asian and Pacific Islanders experience chlamydia rates twice as high and Hispanics three times higher as that in the white population. STIs can have serious consequences for the family. Family planning visits include prevention, testing, and treatment for STIs.

The Family Planning Special Projects program has provided low-income, high-risk individuals with pre-pregnancy family planning services since 1979. Cities, counties, tribal governments, and nonprofit organizations are eligible applicants and provide family planning services, including STI screening, in communities located throughout the state. Funding is competitive within regions and distributed on a population-based formula to eight regions of the state to assure statewide access. In FY 2018, over 40,000 individuals received family planning counseling with

almost 30,000 individuals receiving family planning methods and over 27,000 individuals receiving chlamydia screening. For the FY 2019 grant year, \$6.353 million in family planning special project funds were awarded to 24 grantees providing statewide access to reproductive health services.

Proposal:

This proposal increases funding to the Family Planning Special Project program by \$2.5 million per year to address disparities in access to reproductive health information and services, improve pregnancy outcomes, and reduce the number of unintended pregnancies. Since the grant applications for the last funding cycle exceeded current funding, the additional appropriation will allow MDH to meet more of the demonstrated need for family planning services and to reach those populations disproportionately impacted by poor pregnancy outcomes. Of the total requested, \$2,240,000 is to expand grants to communities. This proposal also provides \$260,000 a year for MDH to manage and oversee funding, coordinate reproductive health efforts with Title X and Medicaid, and to promote best practices such as STI screening and treatment. We anticipate an additional 14,000 individuals will receive family planning information and services ultimately leading to better birth outcomes and healthier children.

Equity and Inclusion:

People of color and American Indians are disproportionately impacted by unintended pregnancies, infant and fetal deaths, and STIs. Efforts to assure access and to offer culturally and ethnically appropriate reproductive health services are strategies to improve these disparities.

FY 2020-21 Biennial Budget Change Item

Change Item Title: Reduce Positive Alternatives Grants

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	(850)	(850)	(850)	(850)
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	(850)	(850)	(850)	(850)
FTEs	0	0	0	0

Recommendation:

The Governor recommends a general fund reduction for Positive Alternatives grants by \$850,000 per year beginning in FY 2020. The current annual base appropriation for this activity is \$3,357,000. Recommended grant base funding will be \$2,507,000 per year beginning FY 2020.

Rationale/Background:

The legislature established the Positive Alternatives program in 2005 to support and assist women in carrying their pregnancies to term and caring for their babies after birth (Minnesota Statute 145.4235). Local community nonprofit organizations provide services such as prenatal care, nutritional education, parenting classes, safe sleep information and cribs for families in need, and referral to and assistance in securing necessary services to promote having a successful pregnancy and caring for their babies after birth. The Positive Alternatives program's grant annual appropriation of \$2,357,000 was recently increased by \$1,000,000 a year beginning in state fiscal year 2016 (Laws of 2015, Ch. 71, Ar. 14, Sec. 3, Subd. 2). The recommended reduction maintains a portion of the 2015 increase to continue to provide additional services to pregnant and parenting women.

Since the Positive Alternatives program was established, funding for statewide home visiting programs has increased. Home visiting programs offer some of the same services. The impact of this reduction to services and supports to pregnant and parenting women could be offset by the recent expansion of statewide home visiting programs.

Proposal:

This proposal reduces base funding for the Positive Alternatives grant program to \$2,507,000.

Results:

Type of Measure	Name of Measure	Current	Future	Dates

Health

FY 2020-21 Biennial Budget Change Item

Change Item Title: Understanding and Reducing Community Health Risks from TCE

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Environmental Fund				
Expenditures (MPCA)	272	272	0	0
Expenditures (MDH)	121	121	0	0
Net Fiscal Impact = (Expenditures – Revenues)	393	393	0	0
FTEs	3	3	0	0

Recommendation:

The Governor recommends an appropriation of \$272,000 in FY 2020 and \$272,000 in FY 2021 from the Environmental Fund to the Minnesota Pollution Control Agency's (MPCA) Industrial Division and an appropriation of \$121,000 in FY 2020 and \$121,000 in FY 2021 from the Environmental Fund to the Minnesota Department of Health's (MDH) Environmental Health Division to develop a statewide program to further evaluate the use of Trichloroethylene (TCE) and related industrial chemicals in industrial applications as well as address concerns about the potential health impacts of TCE air emissions on communities.

Rationale/Background:

Trichloroethylene (TCE) is a solvent most commonly used to degrease metal parts during various manufacturing processes. Industries that may use TCE include platers, machine shops and manufacturing facilities. Breathing TCE, especially at high levels or over long periods, can cause negative health effects.

Based on environmental and health concerns from the recent release of TCE from a manufacturing facility in White Bear Township, the MPCA and MDH propose initiating a statewide program to further evaluate the use of TCE (and related industrial chemicals) in industrial applications as well as address concerns about potential health impacts of TCE air emissions on communities.

Proposal:

The Governor recommends development of a program to address the risks associated with use of chemicals that are harmful to the environment and human health during industrial processes. The recommendation includes \$363,000/year for two new staff at MPCA and one new staff at MDH (\$121,000/FTE x 3 FTE = \$363,000), and \$30,000/year for sampling costs.

MPCA/MDH staff will complete a statewide evaluation of facilities with air permits that use and emit TCE. This evaluation will include:

- Reviewing MPCA data to determine facilities with TCE, or potential TCE, emissions
- Assessing potential health risks based on location, quantity of TCE emissions, environmental factors, type of pollution control equipment and permit conditions
- Prioritizing facilities based on the determined risks

MPCA/MDH will work with the regulated facilities and other partners to reduce/eliminate TCE from processes and, if appropriate, increase regulatory oversight at the regulated facilities, including:

- Conducting environmental audits and inspections at the regulated facilities
- Working with existing pollution prevention organizations such as Minnesota Technical Assistance Program (MNTAP) to assist with the phase out of TCE (or related industrial chemicals) at the regulated facilities.
- Updating and reissuing air permits, if appropriate

- Issuing compliance agreements or enforcement documents, as necessary
- Requiring additional facility monitoring and site assessments, as necessary

In communities where it is determined that there are significant potential impacts, the MPCA/MDH will work with local units of government and community members to develop outreach and communication plans and to implement health screening tools, including:

- Creating health registries where community members (current or past) can register their names to receive communications on regulated facility information, emissions data, and health information
- Using existing screening tools such as the MDH's Birth Defect Registry and the Cancer Surveillance System to determine if there are existing community health conditions.
- Conduct additional community health assessments, as appropriate, including drinking water supply assessments and private well testing

The Governor's recommended goal is to reduce or eliminate the use of TCE at regulated facilities in the state. In those communities where we have determined that there might be potential significant health risks from TCE emissions, the state will take action to evaluate impacts and share information with community members.

Equity and Inclusion:

Several metro and Greater Minnesota communities in the State that are characterized by a legacy of industrial use will see additional investigations and cleanups occur to address environmental and public health risks. As many industries and businesses were located at time of construction either in densely populated areas or in rural areas where there is a higher economic disparity, those communities will receive greater risk identification, education, partnership and regulatory attention efforts.

Results:

- Number of completed statewide evaluation of facilities with air permits that use and emit TCE
- Number of environmental audits, inspections, updated permits and enforcement actions at regulated facilities
- Number of developed outreach and communication plans and to implement health screening tools,
- Number of developed community health registries
- Number of community health assessments completed

FY 2020-21 Biennial Budget Change Item

Change Item Title: Groundwater Restoration and Protection Strategies (Clean Water Fund)

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Clean Water Fund				
Expenditures	650	650	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	650	650	0	0
FTEs	1	1	0	0

Recommendation:

The Governor recommends additional funding from the Clean Water Fund in FY 2020-21 for groundwater protection activities. This proposal supports the development of Groundwater Restoration and Protection Strategies (GRAPS) for watersheds that are engaged in developing a local comprehensive water plan, referred to as a “One Watershed, One Plan.”

Rationale/Background:

Approximately 75% of Minnesotans get their drinking water from groundwater sources. Formal needs assessment studies conducted by the Freshwater Society, the University of Minnesota, the Minnesota Department of Natural Resources (DNR) and the Minnesota Department of Health (MDH) have shown that local water resource managers and technical staff in Minnesota feel ill equipped to tackle groundwater management. At the same time, changes in the local water management framework in Minnesota are creating strong reasons for comprehensive approaches (i.e. surface water, groundwater, land use management, etc.). It is neither practical nor efficient to expect local units of government to build capacity and expertise relative to groundwater at a scale equivalent to what exists at the state level. Rather, the aim of this initiative is to leverage state resources to achieve beneficial outcomes relative to groundwater protection at the local level.

Groundwater Restoration and Protection Strategies (GRAPS) is an MDH-led, multiple agency effort to distill state and local data, information, and expertise on groundwater to help local implementers set management priorities, target resources to areas where they are most needed and predict measurable outcomes. The scope of this proposal is statewide. GRAPS projects will primarily coordinate with local comprehensive watershed-scale water planning (“One Watershed, One Plan”) being organized by the Board of Water and Soil Resources (BWSR). BWSR is currently staging the watershed planning efforts at a rate of 6 to 8 per year. GRAPS is one of the very few organized approaches to consider the needs of private well owners within the framework of groundwater management and thus, advances health equity. Without this initiative, groundwater management to benefit all drinking water users will be uneven across the state. The amount appropriated for this activity in the FY 2018-19 biennium was \$400,000.

Proposal:

This effort will build on existing efforts supported by the Clean Water Fund to develop GRAPS for every watershed in Minnesota. The GRAPS process and associated deliverables will provide clear and concise information and strategies to local water managers (i.e., counties, soil and water conservation districts, and watershed districts). A key objective of this work is to provide the information and appropriate, actionable strategies for groundwater protection to local partners. These strategies will align with state and local priorities to justify their incorporation

into local comprehensive watershed plans. In FY 2020 and 2021, proposed funding will continue to support facilitation of interagency collaboration on GRAPS, provide grants to local partners to help pilot state/local collaboration on GRAPS and develop technological tools to provide information electronically statewide. The intent is to provide a GRAPS for each of the One Watershed, One Plans developed through BWSR. This is estimated to be 7-9 per year.

Results:

Much of this initiative is driven by gaps identified in the qualitative needs assessments described earlier. Performance will be measured, in part, by comparison of future such assessments with the existing assessments. In addition, progress can be measured by the number of completed GRAPS projects.

Health

FY 2020-21 Biennial Budget Change Item

Change Item Title: Virus Study (Clean Water Fund)

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Clean Water Fund				
Expenditures	250	250	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	250	250	0	0
FTEs	2	2	0	0

Recommendation:

The Governor recommends funding from the Clean Water Fund in FY 2020-21 to continue a virus study. The Clean Water Fund Virus Study conducted in FY 2014-16 found higher than expected detections of viruses, bacteria, and protozoa (microbes) in groundwater-sourced drinking water at selected public water supply wells. Ninety six percent of the public water supply wells monitored had a microbial detection at least once during the study. Some of these microbes can make people sick (pathogens) and some are indicators of contamination. More in-depth analyses are needed to understand the risks and to develop strategies and tools to increase public health protection.

Rationale/Background:

A majority of the population in Minnesota drinks groundwater that has not undergone disinfection. This includes those drinking water from 35% of community public water supplies, the majority of the non-community public water systems, and the 1.1 million Minnesotans who get water from their own private wells. These populations could be subject to increased risk of illness. Consumption of contaminated groundwater is still a significant source of drinking water outbreaks in the United States. While we have few outbreaks in Minnesota, outbreaks represent only the tip of the iceberg and it is likely that additional illnesses due to groundwater contamination go unreported or unrecognized.

The Safe Drinking Water Act relies on source water protection, filtration, and disinfection to reduce and address microbial contamination health risks. The FY 2014-16 study results are concerning since monitoring for pathogens is prohibitive due to costs and technological limitations. Existing state and federal regulations and policies to protect groundwater-sourced drinking water may not be sufficient in protecting public health from microbial contamination and waterborne illness.

Proposal:

The goal of the proposed FY 2020-21 project is to incorporate protozoa data into the epidemiological study analyses, to verify the transport pathways of viruses and other pathogens into groundwater drinking water sources and to develop strategies to protect groundwater supplies. We will partner with Department of Natural Resources (DNR) and University of Minnesota experts and public water supply owners and operators. Funding will retain 1 hydrologist FTE and 1 senior epidemiologist FTE for two years.

Microbial contamination was intermittent but more widespread than expected. It is not clear how these microbes are reaching public water supply wells, given there are safeguards in place. We need to determine where breaches in these safeguards exist or are inadequate. Strategies must be developed to address microbial

contamination through improving safeguards and through treatment of the drinking water. An increase in funding over FY 2018-19 levels will cover both epidemiological and drinking water protection work.

Objectives:

- Evaluate the risk of *Cryptosporidium* detections in public water supply wells using available illness data in Minnesota
- Verify pathogen transport pathways from contaminant sources such as buried sewers, leaky septic systems, surface water bodies or animal feedlots to well intakes
- Develop new wellhead protection measures or well code requirements based on the study results
- Define conditions when microbial risk will need to be addressed with disinfection

Equity and Inclusion:

The systems that do not provide disinfection are typically small systems and private wells and these systems will be most impacted by microbial contamination. If filtration or a new well is required, costs may be out of reach for systems without financial capacity. It is therefore important to develop targeted control strategies to ensure safe drinking water for all Minnesotans while using resources wisely.

Results:

Recommendations for wellhead protection measures, well code requirements, or treatment will better protect Minnesota's groundwater drinking water sources and reduce public exposures to waterborne illnesses due to microbial contamination. The study focuses on public water supply wells but future implications may impact the 1.1 million Minnesotans who get water from their own private wells.

Statutory Change(s):

N/A

Change Item Title: Private Well Protection (Clean Water Fund)

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Clean Water Fund				
Expenditures	850	850	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	850	850	0	0
FTEs	3.75	3.75	0	0

Recommendation:

The Governor recommends funding from the Clean Water Fund in FY 2020-21 to reduce health risks from drinking water for private well owners. This proposal increases understanding of the magnitude and occurrence of contaminants in private wells and increases testing and treatment of private well water through education and outreach. As a result of this proposal, a lower percentage of new private wells will have arsenic or nitrate levels above the drinking water standard and a higher percentage of Minnesota private well owners will regularly test their well water and treat it appropriately when necessary.

Rationale/Background:

Approximately 1.2 million Minnesotans rely on a private well for their drinking water supply. In contrast to highly monitored water public water supplies, water from a private residential well is not required to meet Safe Drinking Water Act standards and any actions to sample or treat depend on the owner's initiative and vigilance. Minnesota Rules require that water samples from newly constructed private wells be collected and analyzed for nitrate, arsenic, and coliform bacteria (wells cannot be put into service until the well tests negative for coliform bacteria).

- About 40% of newly-constructed wells have detectable levels of arsenic and about 10% of new wells have arsenic levels above 10 micrograms per liter—the Safe Drinking Water Act standard.
- About 1% of newly constructed wells have a nitrate level above 10 milligrams per liter—the Safe Drinking Water Act standard. However, the Minnesota Department of Agriculture Township Testing Program found a much higher percentage of wells in the central and southeastern regions of the state have elevated levels of nitrate.

MDH provides brochures about arsenic and nitrate to well owners who have an elevated level of arsenic or nitrate in their new well. However, it is the well owner's responsibility to decide whether they will continue testing their well water or take protective action to reduce their household's exposure to a contaminant.

In 2016, MDH used Clean Water Fund dollars to conduct a survey with 798 households on private wells with elevated levels of arsenic to learn whether the households took action to reduce their exposure to arsenic and what hinders or encourages them to test their well water. MDH is using the results of this survey to conduct evidence-based outreach. The survey found about 34% of the respondents did not take action to reduce their exposure to arsenic and that less than 20% of the respondents had tested their well water within the last two years. This initiative will continue work started during the previous biennia to increase private well owners' knowledge about well water contaminants, make private well testing and treatment more feasible, and to develop information and guidance to reduce risk to private well owners. The amount appropriated for this activity in the FY 2018-19 biennium was \$800,000.

Proposal:

This proposal will further the groundwater quality goal set forth in the Clean Water Fund Roadmap: 50% decrease in the number of new wells that exceed the Safe Drinking Water Act standard for arsenic and a 20% decrease in nitrate levels in groundwater by 2034. This proposal provides the resources to work toward this goal.

This proposal also supports the investigation of additional contaminants (such as radium) in Minnesota's groundwater. Developing a better understanding of the magnitude and occurrence of these contaminants will help find ways to better protect private well owners' health.

Finally, this proposal provides resources to increase the rate of testing and treatment among private well owners. Funds will be used to improve and expand existing educational resources for private well owners and local partners and will include small-scale grants to local agencies to provide subsidized water-testing services in their communities. This proposal supports and equips hydrological and planner staff positions at MDH. Partners in this effort include Minnesota Department of Agriculture, Minnesota Pollution Control Agency, United States Geological Survey, local governmental agencies, and private well owners. The proposal includes grants in FY 2020-21 to local governments for education and outreach efforts.

Equity and Inclusion:

This proposal focuses on health equity for people who get their drinking water from a private well. Private well owners are not afforded the same water quality safeguards as people who get their water from public water systems. While public water systems make sure water is safe for the consumers, private well owners are responsible for making sure their water is safe for everyone in the household to drink. This proposal will also facilitate translating educational materials into appropriate languages to ensure all Minnesotans on private wells have access to information about how they can protect their private well water.

Results:

To date, this effort has conducted studies to better understand the occurrence of arsenic in Minnesota groundwater and the most effective sampling methods to get an accurate result of the long-term arsenic level in well water. A survey with 798 private well owners in Minnesota provided evidence on how to most effectively reach out to private well owners, persuade them to test their well water, and treat when necessary. An interdisciplinary team works on implementing outreach strategies informed by the survey results.

Going forward, this effort is intended to:

- Increase understanding of the occurrence and distribution of arsenic and other contaminants in Minnesota groundwater.
- Help reduce the percentage of new private wells that have arsenic levels above the Safe Drinking Water Act standard by 50% by 2034.
- Help reduce the levels of nitrate in groundwater by 20% by 2034. Since 2014, there has been a slight decrease. It is not clear if there is a relationship between this trend and actual nitrate levels in groundwater since new well construction is not uniformly distributed across the state and the number of new wells is not consistent from year to year.

- Increase the percentage of private well owners who regularly test their well water (baseline is the 2016 Private Well Household Survey that found less than 20 percent of respondents had tested their well water within the past two years).
- Increase the percentage of private well owners who take protective action when notified of an unsafe level of arsenic in their drinking water (baseline is the 2016 Private Well Household Survey that found 64% took protective action after learning their well water had an elevated level of arsenic.)

Statutory Change(s):

N/A

FY 2020-21 Biennial Budget Change Item

Change Item Title: Drinking Water Protection (Clean Water Fund)

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Clean Water Fund				
Expenditures	350	350	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	350	350	0	0
FTEs	1	1	0	0

Recommendation:

The Governor recommends funding from the Clean Water Fund in FY 20-21 in drinking water protection planning. This proposal supports a two phased approach to individual actions that protect Minnesota's drinking water as well as the development of a statewide, multi-agency Drinking Water Protection plan.

Rationale/Background:

Drinking water should be safe for everyone, everywhere in Minnesota. People who drink from private wells do not have the same protections as those who drink from public water supplies. Yet even for public water systems, new threats that are not addressed by the federal Safe Drinking Water Act (SDWA) have increased in recent years. This initiative engages local and national experts to develop an action plan and policies that go beyond current regulatory requirements to address emerging threats and ensure long-term safe drinking water in Minnesota.

The amount appropriated to this initiative in the FY 2018-19 biennium was \$300,000. FY18-19 activities that were conducted in collaboration with the University of Minnesota's Water Resource Center and the Humphrey School of Public Affairs, include:

1. Conducting an analysis to determine the scope of the lead problem in Minnesota's drinking water and estimate costs to eliminate lead exposure in drinking water
2. Developing public health policies and an implementable action plan to address emerging threats and ensure long-term safe drinking water in Minnesota.
3. Identifying the regulatory, technological, and behavioral barriers that need to be overcome to implement cost-effective public health policies and actions to address emerging threats.

Proposal:

We propose the continued development of public health policies and actions to address individual emerging threats and ensure long-term safe drinking water in Minnesota. Ensuring safe and sufficient drinking water to protect public health and meet citizen expectations for safe and reliable drinking water will require a series of strategic safeguards from our drinking water sources to the taps in our homes, and state policies that go beyond the minimum requirements of the federal Safe Drinking Water Act. Prevention of threats to the safety of our drinking water requires new partnerships, expertise from national and local experts, and academic institutions to help identify the regulatory, technological, and behavioral barriers that need to be overcome to develop public health policies and actions that are the most cost-effective to address emerging threats.

Lead is a component of many drinking water service lines and plumbing systems, particularly in older homes and buildings. As there is no safe level of lead exposure, it is critical to better understand the level of lead in drinking water to determine appropriate actions. Based on the scope of the lead problem in Minnesota's drinking water and expected costs as outlined in the MDH 2018 reducing exposure to lead in drinking water report, we need to develop a prioritized, cost-effective implementation plan that reduces lead exposure to the lowest level practical.

At this time, there is no comprehensive, statewide plan for protecting Minnesota's drinking water within the context of broader water resource efforts. Minnesota's transition to the watershed approach and limited local capacity for groundwater protection signal the need for increased integration of drinking water concerns into Clean Water Act implementation and local planning processes. We propose to use the recommendations of the expert and stakeholder panels to create a statewide drinking water protection strategic plan that includes both public and private drinking water and fully integrates drinking water protection into the watershed management framework used by the Executive Branch water agencies.

Equity and Inclusion:

Inequities exist for smaller, rural systems that lack large customer bases to share the costs of new infrastructure. Private well owners are responsible for testing and treating for contaminants in their home wells, but often lack technical understanding or the resources for testing and treatment. Both public water systems and private well owners bear the cost of treating for contamination from sources outside of their control.

Results:

The Future of Minnesota's Drinking Water workgroup at the University of Minnesota is responsible for establishing an expert panel, a broad stakeholder group, and a series of deliverables. These deliverables include:

- Review of the lead report (complete)
- Analysis of other jurisdictions' policies regarding drinking water and contaminants
- Recommendations for public engagement related to drinking water risk management
- Recommendations for a risk management framework for Minnesota

Health

FY 2020-21 Biennial Budget Change Item

Change Item Title: Source Water Protection (Clean Water Fund)

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Clean Water Fund				
Expenditures	2,747	2,747	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,747	2,747	0	0
FTEs	15.09	15.09	0	0

Recommendation:

The Governor recommends funding from the Clean Water Fund in FY 20-21 to address source water protection planning and implementation. Source water protection planning is a science-based process to manage and protect sources of drinking water used by public water systems. Protection and management of drinking water sources is one of a series of solutions promoted by the Minnesota Department of Health (MDH) to help public water systems manage their water system and deliver safe drinking water at a low cost. Implementation of the plans is supported by a grants program. This proposal continues MDH's work to accelerate source water protection planning and implementation for all public water systems in the state.

Rationale/Background:

The 2008 Clean Water Land and Legacy amendment to the Minnesota constitution has provided the impetus for change in many aspects of land and water resource management in the state. A key objective of the amendment is to protect drinking water sources. Source water protection connects water resource work with public health protection and is a critical complement to other Safe Drinking Water Act programs. It focuses on safeguarding the sources of supply for the 80% of Minnesotans who receive their drinking water from a public water supply. Prior appropriations from the Clean Water Fund allowed MDH to increase the rate at which source water protection plans have been developed and implemented for public water systems. However, most public water systems have yet to complete planning efforts aimed at protecting their drinking water sources. The performance measure we use for source water protection is the number (and associated population) of community public water systems in Minnesota with MDH-approved source water protection plans. That measure has been increasing in recent years in large part because of Clean Water Fund support.

In addition, Clean Water Fund support has also stimulated the evolution and development of a host of other activities in the water resource management arena. The rapid change that is taking place within the context of water resources has exposed some limitations and shortcomings of the Source Water Protection program. We therefore seek 1) to continue our existing plan development and implementation work and 2) to expand it for surface water systems and to dovetail cleanly with the planning and implementation efforts of our local partners. The amount appropriated for this activity in the FY 2018-19 biennium was \$5.494 million; this proposal requests the same level of funding.

Proposal:

While Source Water Protection planning for groundwater-based public water systems is required under Minnesota Rules (4720.5500 – 4720. 5590), lack of resources available to conduct this work has hampered the pace of progress for the 960 community public water supplies in Minnesota. Additionally, there is neither the

authority to mandate that surface water based public water systems engage in source water protection planning and implementation, nor the resources to induce them to do so voluntarily. Lastly, an integral part of effective implementation of source water protection activities requires that MDH strategically engage local officials. The framework for doing this is rapidly developing because of recent legislative directives and availability of Clean Water funds.

Clean Water funds will be used to continue providing assistance for Source Water Protection planning and implementation work which has focused on communities with vulnerable water supplies and small public water systems that are challenged by health equity issues. Additional work will address gaps in source water protection planning and implementation for surface water systems. There will also be an effort to increase coordination and integration with the state's comprehensive watershed planning efforts. Three FTEs were added in FY 2018-19 to address these deficiencies and their efforts will be supported moving forward. In addition, grant funds will be made available to assist surface water based systems with their source water protection efforts

Equity and Inclusion:

The work of the Source Water Protection program affects all Minnesotans because they depend on clean, safe drinking water sources. Health equity considerations are used in determining priorities, making grants, and communications.

Results:

The graph below shows the number of source water protection plans approved by the MDH.

The Source Water Protection grants program exists to facilitate the implementation of source water protection efforts. Since inception of the SWP Grants program in 2010, the program has executed 709 grant agreements and distributed over \$5.08 million to public water systems across the state. In addition, these grants leveraged an additional \$5 million in cost share to support local implementation of source water protection efforts. In FY18, 107 grants were issued, totaling \$803,000.

N/A

Health

FY 2020-21 Biennial Budget Change Item

Change Item Title: Contaminants of Emerging Concern (Clean Water Fund)

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Clean Water Fund				
Expenditures	1,376	1,376	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,376	1,376	0	0
FTEs	7	7	0	0

Recommendation:

The Governor recommends funding from the Clean Water Fund in FY 20-21 to address contaminants of emerging concern (CECs). CECs are often chemicals that the scientific community knows little about, especially their potential impact on people's health. This proposal continues the Minnesota Department of Health's (MDH) work to address the health risks of CECs in water.

Rationale/Background:

Studies are finding unexpected chemicals in lakes, rivers, and groundwater and health officials need to understand if people's exposures to these chemicals could pose a health risk. There are over 84,000 chemicals in commercial use with 700 new chemicals being introduced every year. The Drinking Water Contaminants of Emerging Concern initiative investigates and communicates the exposure potential and health risk of CECs in groundwater and drinking water. The program develops human health-based water guidance values (i.e., how much of a substance is safe to drink). These guidance values are developed using available toxicity and exposure information. MDH scientists calculate guidance values that will protect people who drink from a water source for different time periods, whether briefly, occasionally, or daily for a lifetime. The work is facilitated by collaborative relationships with the public; various local, state, and federal government agencies; academic organizations; nonprofit groups; industry groups; and drinking water and wastewater professional organizations. Guidance values are primarily used by MDH and partner agencies (Minnesota Pollution Control Agency and the Minnesota Department of Agriculture) to evaluate groundwater, surface water, or drinking water quality to determine if response actions are needed under their specific authorities. In the first 10 years of funding towards these special projects, 17 total special projects were conducted with these organizations.

Results from new monitoring efforts can help inform the selection process for contaminants relative to the development of health-based guidance values. The amount appropriated for this activity in the FY 2018-19 biennium was \$2.2 million; the increased request is to support CEC monitoring efforts at selected public water systems statewide.

Proposal:

This proposal maintains the scientific capacity of the CEC initiative to investigate and communicate the exposure potential and health risks of CECs in drinking water. MDH will collect new data and develop new models and methods in risk assessment for emerging concerns in water. MDH will also continue the work of the public health laboratory to test for CECs in water supplies. Additional effort will be put into developing rapid assessment values for groups of chemicals where appropriate, allowing for a greater program output that better meets customer needs. The agency will provide up to \$130,000 in grants each year to local or tribal governments, non-profits,

academic institutions, or water resource organizations to reduce the health impacts associated with exposure to CECs in drinking water. This level of funding could support anywhere from four to twenty individual grants.

Equity and Inclusion:

The work of the CEC program affects all Minnesotans because they depend on clean, safe drinking water sources. Where possible, health equity considerations are used in determining priorities, making grants, and communications.

Results:

The CEC initiative is within the Health Risk Assessment (HRA) unit, which protects human health by providing health-based guidance to the public, risk assessors and risk managers so that drinking water exposures are managed, pollutants remediated, and water contamination prevented. The chemicals selected and the type of value developed are intended to meet the needs of state programs and public interests.

The graph below shows the number of chemical-specific health-based guidance and rapid assessments developed per fiscal year by both the CEC initiative as well as existing Health Risk Limits program in the HRA unit, and the cumulative total contaminants with guidance available.

The graph below shows the cumulative guidance completed specifically in the CEC initiative, including health-based guidance derived and rapid assessments.

The HRA unit is also called upon to offer technical assistance to other governmental programs and citizens. This assistance can range from providing general risk advice (Technical Assist) to review, interpretation, and quantification of risk (Consultation). Staff from the HRA unit are also actively involved in improving the science of risk assessment through participation in national workgroups (Risk Assessment Advancement). Tracking of these activities began in FY 2016. The chart below shows the number of activities completed per year as well as cumulative totals.

FY 2020-21 Biennial Budget Change Item

Change Item Title: Water Reuse (Clean Water Fund)

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Clean Water Fund				
Expenditures	275	275	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	.2	.2	0	0

Recommendation:

The Governor recommends funding from the Clean Water Fund in FY 2020-21 to proceed with water reuse recommendations. This funding supports planning and implementation of the eight Minnesota-specific water reuse recommendations outlined in the interagency report, *“Advancing Safe and Sustainable Water Reuse,”* released in March 2018. Interagency partners include the Departments of Health (MDH), Natural Resources (DNR), Labor and Industry (DLI), Minnesota Pollution Control Agency (MPCA), Board of Water and Soil Resources (BWSR), Metropolitan Council, University of Minnesota, and a citizen stakeholder group.

Rationale/Background:

There is an increasing demand by agencies, organizations, and cities in Minnesota to implement water reuse strategies including harvested rainwater, storm water reuse, and reuse of graywater and reclaimed municipal wastewater. Water reuse has the potential to reduce demand on water resources, improving long term sustainability and may help reduce the release of contaminants and sediment to surface waters. Reusing water also poses potential risks to public health and the environment. There are a variety of regulatory and non-regulatory approaches for reuse applications across the country. Currently, there is no comprehensive statewide approach for development of a regulatory or non-regulatory framework and guidance for municipalities, industries, and other parties interested in implementing water reuse. The March 2018 interagency report describes eight recommendations for clarifying regulatory requirements for reuse and providing ongoing support for this water management practice. This proposal increases funding above FY 2016-17 levels of \$350,000; the water reuse project was not funded in FY 2018-19.

Proposal:

This proposal builds on the interagency initiative that prepared recommendations to help increase water reuse in Minnesota. The first recommendation is to create an expanded workgroup to include a broader range of practitioners, advisors, and stakeholders. The workgroup’s role is to prioritize the recommendations, develop work plans, and continue development of standards and programs. The second recommendation is to address questions about water reuse by prioritizing research needs and integrating ongoing research. This proposal would fund the facilitator needed to create and manage the expanded workgroup and begin the highest priority research related to storm water reuse.

The overall goal is to move forward with the recommendations; increase water reuse by municipalities, businesses, and citizens; and reduce demand on ground and surface water resources including drinking water supplies.

Equity and Inclusion:

Water resources are managed for the benefit of all Minnesotans. Due to the low cost of both groundwater and municipal drinking water, water reuse is often more expensive than more traditional sources of water. Water reuse as a practice may be more accessible to some Minnesotans at this time. The goal is to make water reuse standards, practices, expectations, and implementation clear, consistent, and accessible to all.

Results:

The results of this proposal will be a roadmap to address the interagency report’s recommendations, leading to increased safe and sustainable water reuse. Increasing water reuse may help reduce release of contaminants and sediment to surface waters and reduce demand on water resources, improving water resource sustainability.

FY 2020-21 Biennial Budget Change Item

Change Item Title: Well Sealing (Clean Water Fund)

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Clean Water Fund				
Expenditures	250	250	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	250	250	0	0
FTEs	0.1	0.1	0	0

Recommendation:

The Governor recommends funding from the Clean Water Fund in FY 2020-21 for well sealing. This proposal uses funds for cost sharing to help Minnesotans seal unused wells and borings, increasing the number sealed by 200 per year. Well sealing eliminates the pathway for contaminants to reach groundwater aquifers that serve as the primary drinking water source for 75% of Minnesotans.

Rationale/Background:

Unused, unsealed wells, can pose a threat to groundwater quality and public health by providing a direct conduit from the surface to groundwater—allowing contaminants to travel deep into the ground, bypassing the natural protection usually provided by layers of clay, silt, and other geologic materials. Approximately 75% of Minnesotans use groundwater as their primary source of drinking water. Although Minnesota leads the nation in sealing unused wells (the Minnesota Department of Health was awarded the Groundwater Protection Award in 2006 by the National Ground Water Association) and has sealed 300,000 wells in the past 25 years, an estimated 500,000 unused wells remain unsealed.

The amount appropriated for this activity in the FY 2018-19 biennium was \$500,000.

Proposal:

This proposal will increase the number of unused wells sealed by 200 per year, removing potential pathways for contaminants to reach groundwater. The funds from this proposal provide incentive for well owners to seal wells through a cost share approach; they might not otherwise seal the well if they had to bear the entire cost. It also provides resources for unused public water supply wells that are often deep and large in diameter. These wells can be very costly to seal, pose a significant risk to deep aquifers and can be a physical hazard. Well owners will need to apply for cost share funding and have their wells sealed by a licensed well contractor.

Results:

Wells no longer in use are required to be sealed by a licensed well contractor. Over the past 23 years approximately 6,000 to 14,000 wells have been sealed annually. While there are limited or no records of unsealed wells, an estimated 250,000 wells in the state remain to be sealed. The recent downward trend in sealing is likely related to several factors including a reduction in property transfers and early effort to get problem wells sealed. While the financial assistance provided through this initiative is not sufficient to significantly reverse the recent trend, it will increase the rate at which wells are sealed and provide incentive to seal wells that might not otherwise be sealed. The sealing of these wells will eliminate the pathway for contaminants to reach groundwater aquifers which serve as the primary drinking water source for 75% of Minnesotans.

PURPOSE & CONTEXT

Activities in the Health Improvement budget program are responsible for maintaining and improving the health of all Minnesotans. The purpose, services, results, and authorizing statutes of each activity is described in the following pages. The fiscal page for Health Improvement reflects a summation of activities under this budget program area.

Program: Health Improvement

Activity: Community and Family Health

health.state.mn.us/divs/cfh/program/cfhe

AT A GLANCE

2017 data indicate:

- Healthy food and nutrition services provided to over 181,000 pregnant women, infants, and young children
- Breastfeeding peer counseling services provided to 8,648 women
- Prenatal, parenting, child safety, and other support services provided to more than 15,500 pregnant or parenting women
- Family planning counseling services provided to more than 41,000 low-income or high-risk individuals
- Home visiting services provided to more than 12,200 at-risk families
- Almost 35,000 children with special health needs and their families connected to supports and services
- Teen pregnancy prevention efforts reached more than 29,500 teens
- Commodity foods provided to almost 15,000 low-income seniors every month

PURPOSE & CONTEXT

Individuals' health outcomes are greatly influenced by factors of their early-life experiences. The Community and Family Health Division improves long-term health outcomes by supporting Minnesota's children and families. Services focus on populations experiencing disparities in health outcomes including: families living in poverty, families of color, American Indian families, and children and adolescents with special health care needs. The division seeks to improve those factors that predict a child's success such as being born healthy; growing up in a safe, stable and nurturing environment; receiving adequate nutrition; early identification of health, developmental or social emotional problems with appropriate intervention; avoiding teen pregnancy and substance use; and graduating from high school.

SERVICES PROVIDED

- **Improve outcomes for children by giving them the healthy food they need for a strong body and brain.** The Women Infant Children (WIC) Supplemental Nutrition program improves the health and nutritional status of pregnant and postpartum women, infants, and young children, by providing breastfeeding resources and support, connecting families to community services, and providing nutrition consultation and nutritious food.
- **Increase the proportion of planned pregnancies, so families are better prepared to raise a child.** The Maternal and Child Health program provides pre-pregnancy family planning funds to ensure that family planning services are available to low-income and high-risk individuals across the state.
- **Support adolescents and their families so adolescents are better prepared to do well in school and to graduate.** The Maternal and Child Health program offers teen and parent education, training on supporting healthy behaviors and works with communities to support families in their development of strong, caring relationships with youth.
- **Identify children with special needs early so that they can receive services and support to help them perform better in school.** The Children and Youth with Special Health Needs program provides trainings and grants to local public health agencies so that infants and children can access early and ongoing screening, intervention, and follow-up services. The Family Home Visiting program routinely screens and refers children to appropriate services for families who are participating in their programs. The Maternal

and Child Health program develops and trains health care providers on screening protocols. With early identification and intervention, children with health, developmental, or social emotional challenges are better able to catch up with their peers. Research has also shown that early intervention can have long lasting and substantial gains in outcomes such as school performance, high school graduation rates, employment, and ultimately decreased reliance on public programs.

- **Support families at risk for child abuse and neglect, poor health, and poor school performance.** The Family Home Visiting program provides consultation, training, and grants management to our grantees across the state. Family Home Visiting provides social, emotional, health-related and parenting support and information to families, while also linking them to appropriate resources. Evidenced-based home visiting programs reduce child abuse and neglect, improve maternal and child health, improve a child's readiness for school, and improve family economic stability.
- **Help children and youth with special health care needs reach their full potential.** The Children and Youth with Special Health Needs program supports infants and young children with special needs, including serious birth defects, deaf or hard of hearing, or inherited conditions to ensure they are connected to public health, primary and specialty care, and community resources. Children and families connected early to appropriate services do better than if they receive services later in life.
- **Help young children develop the skills they need to be ready for kindergarten.** The Children and Youth with Special Health Needs, Family Home Visiting and Maternal and Child Health programs provide consultation and grant funding, establish screening and referral policies, and train local public health agencies, health care clinics and providers to promote screening of all children for developmental and social-emotional delays, and screen new mothers for depression.
- **Improve the health of women so that babies are born healthy.** The Maternal and Child Health program encourages early access to prenatal care, provides necessary support services to high-risk pregnant women, and encourages preventive care and increased knowledge of healthy behaviors prior to and during pregnancy.

RESULTS

Breastfeeding

The WIC program serves approximately 40 percent of infants born in Minnesota and works to create an environment supportive of breastfeeding. Breastfed babies are less likely to suffer from serious illnesses, such as asthma and ear infections. The percentage of WIC participating infants that are still breastfeed at six months of age is increasing over time. Infants who are breastfed for six months or longer have significantly better health outcomes, than infants breastfed for less than six months related to gastrointestinal disease, otitis media, respiratory illnesses, and atopic disease.

Source: Minnesota Women, Infant, and Children (WIC)

WIC Peer Breastfeeding Support Services

Breastfeeding rates vary greatly by race and ethnicity. The WIC Peer Breastfeeding Support Program seeks to increase the breastfeeding rate among all groups. Among WIC mothers without a peer, only East African and Hispanic mothers exceeded the Healthy People 2020 objective of 81.9 percent breastfeeding initiation. However, among WIC mothers who received peer services, all groups of mothers exceeded the objective.

Source: Minnesota Women, Infant, and Children (WIC)

Maternal Depression

A mother with maternal depression or postpartum depression (PPD) has an increased risk for other health problems. Because PPD can reduce the mother's interaction with her child, PPD is also a risk factor for the child's health including delayed social, emotional, and cognitive development. PPD usually develops within the first few weeks after giving birth, but may begin earlier – during pregnancy – or later – up to a year after giving birth. MDH informs pregnant and parenting families of PPD, screens new mothers through family home visits, and trains providers and assists clinics in implementing maternal depression screening. Postpartum women are increasingly reporting that a health care provider has talked with them about postpartum depression.

Source: Minnesota Pregnancy Risk Assessment Monitoring System (PRAMS)

Early Hearing Detection and Intervention

Each year in Minnesota, approximately 250 infants and children are identified as deaf or hard of hearing. The MDH Early Hearing Detection and Intervention program works to identify all children who are deaf and hard of hearing and build a system of care to ensure that they receive appropriate and timely services. Without early identification and intervention, children with hearing loss often experience delayed development in language and learning. The percentage of kindergarteners with a hearing loss identified through MDH's program is increasing over time.

Program: Health Improvement

Activity: Health Promotion and Chronic Disease

health.state.mn.us/divs/hpcd/index.html

AT A GLANCE

- We screened 11,692 low-income women for breast and/or cervical cancer in 2017 and detected 116 new cases of cancer
- Our statewide registry of newly-diagnosed cancer cases registered 29,847 cases in 2015
- 25,162 Minnesotans with a traumatic brain or spinal cord injury received services in 2017 through MDH grant funded programs
- We trained 101 individuals statewide to provide diabetes prevention classes to people at risk of developing diabetes
- Provides funding to the Minnesota Poison Control System who responded to 46,715 calls in 2017 regarding patients who either were poisoned or were exposed to potentially harmful substances

PURPOSE & CONTEXT

The Health Promotion and Chronic Disease Division provides leadership in the prevention and management of chronic diseases and injury and reduces health disparities in chronic disease and injury. Chronic diseases are ongoing, generally incurable illness or conditions, such as heart disease, cancer, and diabetes. These diseases are often preventable and frequently manageable through early detection, improved diet, exercise, and treatment therapy. Chronic diseases and injuries exact a substantial toll on the health of the population by contributing to long-term disability and often diminishing the quality of life.

Our Role:

- Monitor chronic diseases and injuries to report on their incidence, costs, and risk factors
- Improve clinical services to prevent and manage chronic diseases and injury
- Ensure that patients are referred to services that improve the management of chronic conditions

SERVICES PROVIDED

We help health systems implement changes to deliver high-quality care for all patients, especially those most likely to become disabled or die from chronic diseases and injuries.

- Promote collaboration among providers to improve the delivery of cancer screening and other preventive services.
- Develop and promote services designed to heal the trauma experienced by sexually exploited youth.
- Support guidelines and quality measures for early identification and management of chronic disease risk factors.
- Provide funding for health care improvement programs, such as dental sealants, cancer screening, and poison control.
- Pay health care providers through grants and reimbursements to offer free breast, cervical, and colorectal cancer screening, along with follow-up services and counseling, to low-income, uninsured, and underinsured Minnesotans.

We facilitate community-medical relationships that improve the management of chronic conditions.

- Disseminate self-care and management education programs statewide
- Develop curriculum to train Community Health Workers to better work with underserved and at-risk populations to prevent and manage chronic diseases.
- Support our community and medical partners in implementing statewide plans for chronic disease injury and violence prevention.
- Provide grant funds for Minnesotans with a traumatic brain or spinal cord injury to receive medical follow-up, employment, education, and family counseling sessions.

We develop, collect, and disseminate data to inform chronic disease and injury prevention and management initiatives.

- Operate a statewide registry of all newly-diagnosed cancer cases.
- Analyze and report on the prevalence, disparities, and trends in deaths and disabilities from specific chronic diseases (such as heart disease, stroke, cancer, asthma, arthritis, diabetes, oral diseases, injuries, violence, and poisoning).
- Collect, analyze, and report on rates and trends of workplace hazards, illnesses, and injuries.
- Use data to identify possible linkages between chronic diseases and environmental exposures.

RESULTS

Expanding Access to Designated Stroke Centers

Timely access to stroke care is a critical factor influencing health outcomes for acute stroke patients. In 2012, only 60% of Minnesota's population lived within 30 minutes of designated stroke centers. MDH worked throughout the state to increase the number of hospitals designated for stroke care, ultimately providing a higher standard of care through more timely and better treatment. Currently, 93% of Minnesotans live within 30 minutes of a designated stroke center.

While this increase is remarkable, persistent disparities remain for some populations in the state. MDH is working to increase access to acute stroke ready centers for American Indian communities and older populations. For five percent of Minnesotans, the hospital nearest to them is not yet designated as acute-stroke ready.

30 Minute Drive Times to Designated Hospitals

Improving Cancer Screening Rates for Low Income Women

The MDH Sage Screening Program works to connect Minnesota women to breast and cervical cancer screening services and pays for screening for uninsured and underinsured women. Sage maintains a patient navigation call center to answer questions and aid appointment making, which is an evidence-based strategy to increase screening. In 2017, of call center guided appointments, 84.9% of Sage clients and 94.5% Minnesota Health Care Programs (MHCP) clients completed appointments.

Increasing Effectiveness in Handling Poisoning Calls

Each year Minnesota has approximately 46,000 poisoning incident calls, many involving young children. Some of these incidents require travel to a clinic or emergency room, but most can be safely managed at home. MDH provides funding to the MN Poison Control Center to provide assistance to parents, families, and others regarding poisoning incidents. Over the last decade the percent of poison calls managed at home has increased substantially, with over 90% managed at home in 2017 instead of necessitating a visit to a medical clinic or emergency room.

Program: Health Improvement

Activity: Health Partnerships and Equity

health.state.mn.us/divs/hpart/

AT A GLANCE

- Support Minnesota's 51 community health boards (local public health).
- Coordinate the emergency preparedness and response activities between the state (MDH), community health boards, and eight regional health care preparedness coalitions.
- Distribute \$81 million per biennium in grant funds to local governments, hospitals, and community-based organizations to support local public health activities, emergency preparedness activities, and to eliminate health disparities.
- Provide support and guidance on reducing health disparities to more than 150 community-based organizations from populations of color and American Indian communities.
- Collect, analyze, and communicate health-related data.
- Work as a team to provide planning, facilitation, and coaching to other MDH programs on skills like quality improvement, community engagement, working with tribal governments, and incident management.

PURPOSE & CONTEXT

Our 51 community health boards rely on MDH for guidance, direction, and assistance in meeting the many challenges of delivering effective public health services at the local level. Challenges such as:

- Ensuring their capacity to respond to public health emergencies such as flooding or disease outbreaks;
- Meeting the needs of their communities despite widespread turnover of local public health leadership;
- Improving their ability to use data; and
- Addressing the disparities in health caused by significant social, economic and environmental barriers.

Health Partnerships and Equity works across MDH and with community partners to face these challenges and contribute to MDH's vision of "all communities thriving" by:

- Supporting Minnesota's local public health system;
- Ensuring that all communities are ready to respond to public health emergencies;
- Serving as a source of health statistics;
- Working to advance health equity; and
- Supporting community-based grantees.

SERVICES PROVIDED

Emergency Preparedness and Response

- Provide subject-matter expertise and training to assist organizations in preparing for, responding to, and recovering from incidents affecting the public's health.
- Administer an alert network for rapidly notifying thousands of health care, public health, and community partners about emerging disease threats or other health hazards such as contaminated medications or food.
- Prepare for the need to rapidly receive, stage, store, and distribute vaccines and medication to protect people and communities during an emergency.
- Conduct risk assessments, detailed planning, and testing of emergency response plans.

Health Equity & American Indian Health

- Monitor and analyze health disparities and how they relate to health equity.
- Identify and invest in best practices for providing culturally responsive services and advancing health equity.
- Collaborate with Minnesota communities experiencing health inequities to improve outcomes.
- Provide consultation and liaison services between Minnesota's Tribal Nations and MDH staff.
- Provide training on working with Minnesota's Tribal Nations and coordinate efforts within MDH on issues related to American Indian health.

Health Statistics

- Conduct surveys to measure the health status of Minnesotans and analyze health trends in Minnesota, such as: the Minnesota Student Survey (every 3 years) the Behavioral Risk Factor Surveillance System (annually); Youth Tobacco Survey (every 3 years), School Health Profiles (every 2 years).
- Provide staffing and direction to the MDH's Institutional Review Board.

Public Health Practice

- Develop policies, practices, and guidance to ensure the best delivery of public health services at the local level.
- Provide facilitation and coaching of performance management, quality improvement, and community engagement for MDH divisions and local health departments.
- Provide funding, guidance, tools, and training to assist local public health departments in effectively meeting their missions.
- Collect, analyze, and disseminate data about public health financing, staffing and performance.
- Help MDH and local and tribal health department seek and maintain public health accreditation to ensure that Minnesota's public health system meets and exceeds national Public Health Accreditation Board standards.

RESULTS

MDH staff who would have leadership responsibilities in the event of a public health emergency should prepare for their roles by completing twelve trainings. The Center for Emergency Preparedness and Response is responsible for assuring that staff participate in the required trainings. Between 2015 and 2017 the percentage of employees who had completed between nine to twelve courses rose from 10% to 46%.

The Center for Health Statistics seeks to provide data on births and deaths in Minnesota in a timely manner. Between March and July 2018, the Center responded to all data requests within two weeks.

MDH has an important role in addressing health inequities. In order to fulfill that role, MDH leadership must understand and be able to explain to staff how to fully incorporate health equity into their ongoing work. The Center for Health Equity is responsible for providing support across the department and as a result of the Center’s work, 10% more directors, managers, and supervisors between 2016 and 2018 reported that they understood how to advance health equity as a part of their job.

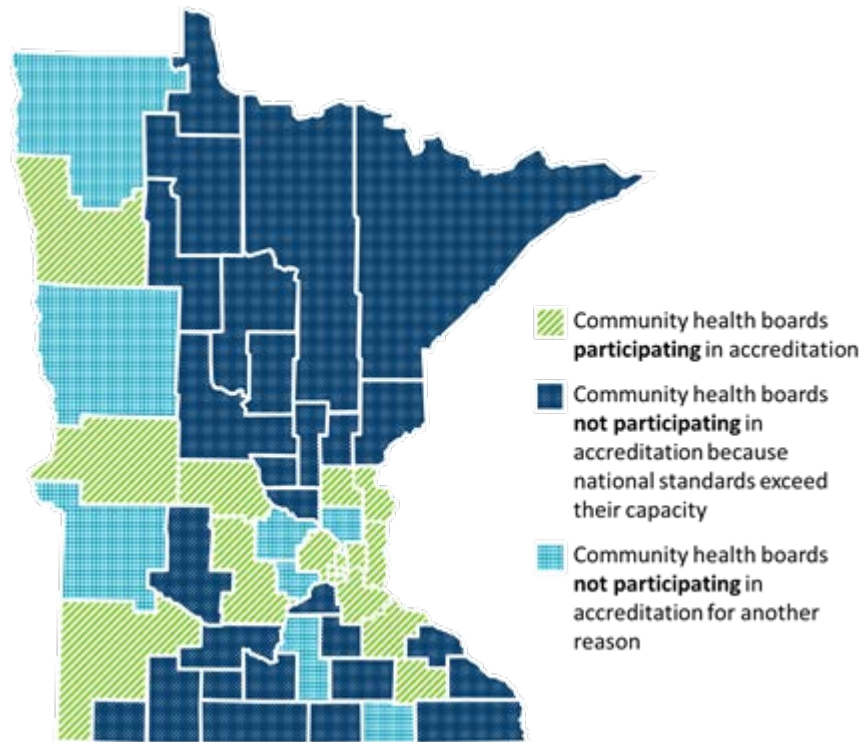

The Center for Public Health Practice provides consultation and technical assistance to community health boards, local public health, other MDH divisions, and Tribal Nations. Throughout 2017 and the first half of 2018, our customers have overwhelmingly reported satisfaction with the support we provided. Approximately 60% of our customers responding to the survey were local public health and 40% were staff from other MDH divisions. Both groups report similar levels of satisfaction.

The Public Health Accreditation Board sets national standards for public health departments. In 2010, the State Community Health Services Committee recommended adoption of those standards for Minnesota. Currently, MDH and 10 of the 51 community health boards are accredited. While another seven have applied or reported that they plan to do so, the remainder of the health boards are not participating in national accreditation because the standards exceed their capacity or for another reason.

Community health boards lacking the capacity to meet national public health performance standards, 2017

Program: Health Improvement

Activity: Statewide Health Improvement

health.state.mn.us/divs/oshii/

AT A GLANCE

- The Office of Statewide Health Improvement Initiatives (OSHII) works in partnership with local public health agencies, tribal governments, and community-based organizations to ensure all Minnesotans have the opportunity to lead healthier lives by preventing chronic disease well before it starts.
- Statewide Health Improvement Partnership (SHIP) grants provide \$17.5 million per year in funding and support to all of Minnesota's 87 counties and 10 tribal nations across the state to improve policies and create environments that support healthy eating, physical activity, and decrease commercial tobacco use and exposure to secondhand smoke.
- Tobacco-Free Communities grants provide \$3.2 million per year to reduce tobacco use among youth in Minnesota and promote tobacco prevention activities.

PURPOSE & CONTEXT

Obesity and tobacco use are two major drivers of chronic illnesses in our state. Three of five Minnesota adults are overweight or obese – conditions caused, in part, by unhealthy eating and insufficient physical activity – leading to increased risk of heart disease, diabetes, and other chronic illnesses. More than one in seven Minnesotans still smokes, leading to heart disease, stroke, and increased cancer risk. The conditions where we live, work, learn, and play determine our options for making healthy decisions and influence our behavior. Further, environmental factors and institutional policies, practices, and procedures contribute to the development of health disparities between populations related to race and ethnicity, economic status, and geographic location. Statewide, the economic cost associated with obesity and tobacco use in Minnesota is significant. Minnesotans with diagnosed chronic conditions accounted for 83 percent of all medical spending in the state in 2012.

The Office of Statewide Health Improvement Initiatives (OSHII) supports all Minnesotans in leading healthier lives and building healthier communities by preventing chronic diseases before they start. OSHII works in partnership with local public health and tribal nations, community leadership teams and other stakeholders to create community-level policy and environmental changes that promote and support individual choices that lead to increased healthy eating and active living and reduced commercial tobacco use.

We achieve success by:

- Leveraging local and state partnerships;
- Strengthening communities' capacity to create their own healthy futures;
- Offering the best evidence-based strategies in policies, systems, and environmental changes; and
- Evaluating the effectiveness of those strategies.

SERVICES PROVIDED

We provide funding through grants to all 87 of Minnesota's counties, 10 tribal nations, and 10 community-based organizations to implement locally driven community solutions that expand opportunities for residents to be healthier.

We build community capacity to implement evidence-based and practice-informed strategies.

- Link grantees with nutritional, physical activity, and tobacco prevention content experts who provide coaching on effective ways to adopt and implement policy changes.

- Provide comprehensive technical assistance to grantees through telephone calls, in-person meetings, webinars, communities of practice, and monthly content-specific consultation calls.
- Use state-of-the-art online technology to facilitate grantee peer sharing through webinars, video calls, and forums.

We conduct rigorous evaluations to monitor implementation and assess impact of our strategies.

- Actively monitor grantee work and collect data to assess progress and impact.
- Assess the impact of evidence-based activities by measuring impact of environmental and policy change.
- Support communities to evaluate local activities and identify lessons learned.

We collect, analyze, and disseminate data and research to inform program initiatives.

- Support implementation of statewide surveillance surveys to measure trends in obesity, fruit and vegetable consumption, levels of physical activity, and commercial tobacco use and secondhand smoke exposure, which helps inform program planning and implementation.

RESULTS

OSHII has a statewide impact. OSHII-funded programs engage 4,000 community partners in all 87 counties and 10 tribal nations to implement evidence-based strategies aimed at increasing access to healthy eating, opportunities for physical activity, and reducing access and exposure to commercial tobacco. The map to the right shows the geographical location of OSHII's community partners.

Figure 1. Statewide Health Improvement Partnership (SHIP) Community Partner Sites and Tobacco Free Communities Grant

OSHII grantees report that technical assistance and training were helpful. OSHII provides high quality training and technical assistance that support communities making sustainable changes. Four out of five Tobacco-Free Communities (TFC) grantees report that the technical assistance they receive from OSHII helps them to address community-specific needs. Likewise, in both 2016 and 2017, 94% of SHIP grantees reported that the regional trainings provided by OSHII met or exceeded their needs.

4 in 5 grantees report tobacco TA helps them address community-specific needs.

Percentage of SHIP Grantees Reporting Regional Training Met or Exceeded Needs

SHIP crosses many sectors. In 2016-17 SHIP grantees engaged with more than 800 community leaders who represent a broad spectrum of interests and backgrounds including healthcare, business, education and nonprofit sectors. The community leaders worked to set SHIP priorities, implemented environmental and policy changes and coordinated resources between organizations to improve community health outcomes.

In a survey of Community Leadership Team members 8 in 10 community leaders reported their participation had a moderate or major effect on the health of their community.

SHIP and Tobacco Free Communities have had a large impact on smoke-free housing. Multi-unit housing facilities, such as apartments, are common sources of secondhand smoke exposure, especially among youth and seniors. Smoke-free housing efforts are aimed at supporting the implementation of voluntary smoke-free housing policies. SHIP and TFC grantees have played a substantial role in supporting smoke-free housing in Minnesota. In conjunction with statewide partners, the number of smoke-free units in Minnesota grew from under 8,000 in 2008 (a year before SHIP's inception) to over 115,000 units 10 years later.

Program: Health Improvement

Activity: Health Policy

health.state.mn.us/divs/hpsc/index.html

AT A GLANCE

- The Statewide Quality Reporting and Measurement System (SQRMS) collects data submitted by Minnesota clinics on ten measures of quality health care to drive quality improvement.
- Minnesota Health Access Surveys measure the changing percentage of uninsured Minnesotans each year, demonstrating the impact certain health care policies can have on health insurance coverage.
- The Minnesota All Payer Claims Database supports evidence-based research on health policy impacts.
- The Office of Vital Records issues more than 600,000 birth and death certificates annually and facilitates the certification of over 99% of death records online, making them available to families more quickly.
- 389 certified health care homes provide high quality, coordinated care to 3.9 million people and, according to an independent evaluation from the University of Minnesota, have saved more than \$1 billion in Medicaid and Medicare healthcare spending costs over five years.
- Nearly \$20 million dollars in grants and loan forgiveness awards are distributed statewide, supporting recruitment of health professionals in rural and underserved communities and a stronger health care infrastructure.

PURPOSE & CONTEXT

The Health Policy Division provides policymakers and other stakeholders with policy research, analysis, and design and implementation of programs and reforms to improve health care value, quality, and accessibility. It also manages the statewide vital records system for birth and death records.

Our role:

- Promote access to high quality, affordable health care across Minnesota, including for vulnerable, underserved, and rural populations.
- Streamline and reduce health care administrative burden and costs.
- Promote the secure exchange of health information among health care providers.
- Train and certify clinics to be health care homes that provide high quality, patient-centered, coordinated care to complex patients.
- Provide financial and consulting assistance to health care providers and systems in underserved areas.
- Issue timely birth and death certificates and provide accurate birth or death data for public health research.
- Support medical education to build a strong health workforce.
- Measure and report on the health care marketplace, access and quality of care, patient safety, and health workforce capacity to help target state resources and funding to their best use.

SERVICES PROVIDED

- **Collect data and perform research** to inform policymakers. Monitor and understand: health care access and quality, market conditions and trends, health care spending, health status and disparities, health behaviors and conditions, and the impact of state/federal reform initiatives.
- **Monitor clinical quality and safety** in Minnesota health care facilities, through implementing the Statewide Quality Reporting and Measurement System and the Adverse Health Events system.

- **Certify primary care clinics as Health Care Homes** to ensure patient-centered, coordinated care for Minnesotans.
- Certify Minnesota's **Health Information Exchange** providers to ensure that all health providers have the health information they need to ensure coordinated, safe, quality care.
- **Administer the statewide hospital trauma system** by collecting and analyzing trauma data, promoting interagency coordination, and providing technical expertise to hospitals caring for trauma patients.
- Award up to \$60 million in Medical Education and Research Costs grants each year to support **clinical training placements** for health care providers.
- Provide financial support and data regarding **Minnesota's rural and underserved urban health care delivery system** to address current needs and plan for future needs.
- **Increase efficiencies and reduce costs in the health care system** by collaborating with providers, payers, consumers, and other stakeholders to develop standards and best practices for the exchange of business and administrative data. National studies have shown that increasing automation of business and administrative data would save the healthcare industry billions annually.
- **Administer a secure, real-time, web-based vital records system.**

RESULTS

Much of our work focuses on providing high-quality, reliable research, policy and data analysis, and standards development for legislators, policymakers, providers, payers, and consumers to aid in their work in the improvement of healthcare quality and safety, the reduction of healthcare costs, and the improvement of population health.

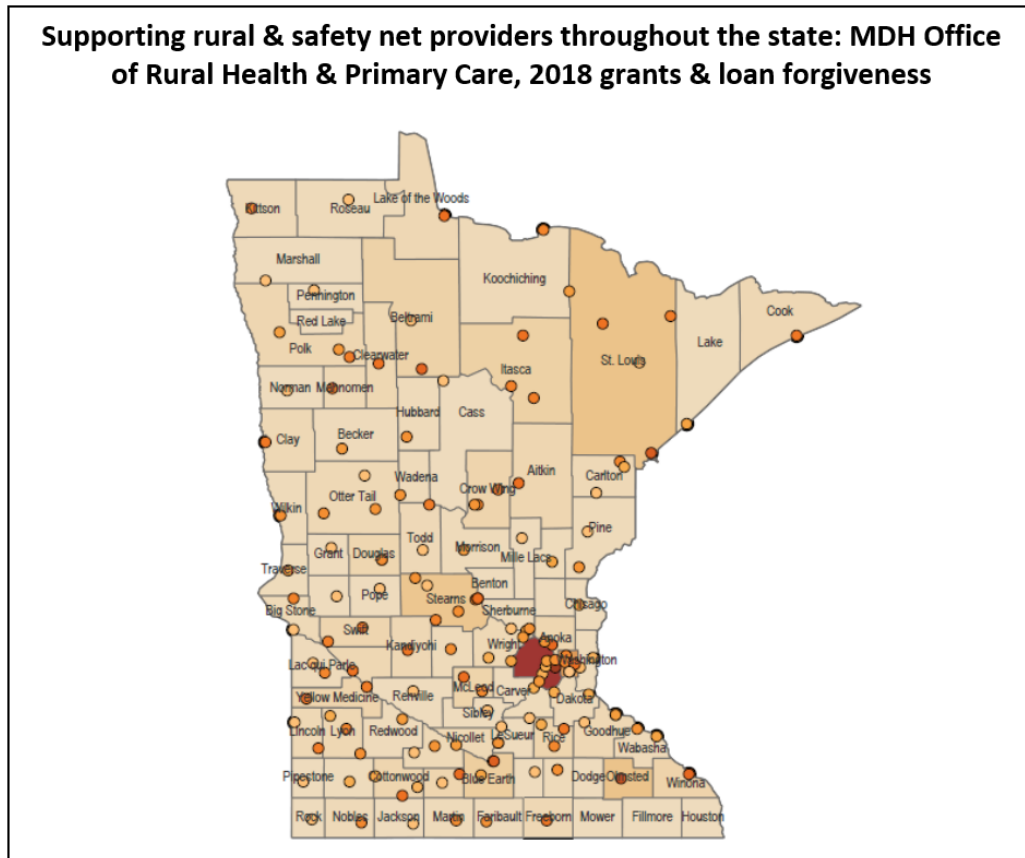

In large part, as a result of work led by our programs, Minnesota has made strides in the following ways:

Numerous national and state studies have shown the increased use of electronic health records and health information exchange has helped to reduce duplication of services, provide coordinated patient care, and improve health outcomes of individuals and communities.^{iiiiiiiivv}

Exchanging Data for Care Coordination: Percent of MN acute care hospitals exchanging clinical data with outside health care providers to support care coordination.

Clinics, hospitals, and other health care providers in rural and underserved urban areas across Minnesota received more than \$19M in grants and loan forgiveness in 2018.

A secure, web-based system of registering birth, death, and fetal death records has produced more accurate, complete, real-time data, and faster services for individuals and families.

Health care home certification has been shown to improve quality outcomes for asthma, vascular care, diabetes, depression, and colorectal measures, while saving money and improving patient satisfaction. More than half of all Minnesota primary care clinics have now been certified by MDH.

Program: Health Improvement

Activity: Medical Cannabis

health.state.mn.us/topics/cannabis/

AT A GLANCE

- Began distributing medical cannabis to registered patients on July 1, 2015.
- Approved the enrollment of 15,794 patients and authorized 1,250 healthcare practitioners to certify patients as of mid-2018.
- Oversee 2 manufacturers and 8 cannabis patient centers in Minnesota.
- Added Post-traumatic stress disorder as a qualifying medical condition on December 1, 2016 and Obstructive Sleep Apnea and Autism Spectrum disorder on December 1, 2017.

PURPOSE & CONTEXT

The Office of Medical Cannabis connects Minnesota residents with qualifying medical conditions to a registered manufacturer to obtain medical cannabis. Registered health care practitioners must first certify that a patient has a qualifying medical condition. Then patients must sign up for the MDH registry, and if approved, they may obtain medical cannabis in pill, liquid, or topical form from any of the eight distribution sites, which are supplied by two state-registered medical cannabis manufacturers.

State law requires Minnesota residents with one or more of the qualifying medical conditions who would like to access medical cannabis for therapeutic or palliative purposes to join the state's patient registry. An updated list of qualifying medical conditions is available on the Office of Medical Cannabis' website.

SERVICES PROVIDED

- Administer the statutorily required, secure, online patient registry through which qualified Minnesota residents can acquire medical cannabis to treat certain serious health conditions.
- Register and oversee the two medical cannabis manufacturers that are responsible for the production and distribution of medical cannabis. The two manufacturers each operates four cannabis patient centers in the state for a total of eight patient centers.
- Inspect the cultivation, production, and distribution facilities operated by the two medical cannabis manufacturers.
- Conduct program evaluation based on patient and healthcare practitioner self-reported data submitted into the registry through surveys.
- Operate a call/support center to quickly and accurately respond to citizens needing information and assistance with the medical cannabis program and the patient registry.
- Administer public petition process for citizens to propose additional qualifying medical conditions or delivery methods.

RESULTS

The number of patients OMC enrolls in the patient registry each month has growth substantially, tripling and at times quadrupling the 2015 rates.

As Minnesota adds more qualifying conditions, we have experienced an increase in the number of calls our call center handles.

Adding Qualifying Medical Conditions or Delivery Methods

Minnesota Statutes authorize the Commissioner of Health to add approved delivery methods (e.g. liquid, pill, topical, or vaporized) and qualifying medical conditions. In 2016, the Office of Medical Cannabis established a process in Minnesota Rules through which members of the public may petition the commissioner to consider approving a new medical condition or delivery method. A seven-member volunteer review panel assists the commissioner's review of the medical conditions (the panel does not weigh in on delivery methods). The Office of Medical Cannabis prepares research briefs for each of the petitioned medical conditions describing current scientific studies of cannabis products as therapy. The volunteer review panel met four times in fall 2016 to review nine conditions and it met three times in 2017 to review eight medical conditions. Final determinations to

add a qualifying medical condition or delivery method are listed in the table below. Medical conditions petitioned in 2018 are: Alzheimer's disease, Hepatitis C, Juvenile Rheumatoid Arthritis, Opioid Use Disorder, Panic Disorder, Psoriasis, and Traumatic Brain Injury. No delivery methods or forms are under consideration in 2018.

Qualifying Medical Conditions and Delivery Methods Added by the Commissioner of Health		
Qualifying Medical Conditions:	<i>date approved</i>	<i>effective date</i>
Intractable Pain*	December 1, 2015	August 1, 2016
Post-Traumatic Stress Syndrome (PTSD)	December 1, 2016	August 1, 2017
Autism Spectrum Disorder	December 1, 2017	August 1, 2018
Obstructive Sleep Apnea	December 1, 2017	August 1, 2018
<i>* Added under the authority of Laws 2014, chapter 311, section 20.</i>		
Delivery Methods:	<i>date approved</i>	<i>effective date</i>
Topical Applications	December 1, 2016	August 1, 2017

Note: Nine qualifying medical conditions were authorized in the original legislation in 2014 creating the medical cannabis program including cancer or its treatment, accompanied by severe/chronic pain, nausea or severe vomiting, or cachexia or severe wasting; glaucoma; HIV/AIDS; Tourette's Syndrome; Amyotrophic Lateral Sclerosis (ALS); seizures, including those characteristic of epilepsy; severe and persistent muscle spasms, including those characteristic of multiple sclerosis; Inflammatory Bowel Disease including Crohn's Disease; and terminal illness, with a life expectancy of less than one year, if the illness or treatment produces severe/chronic pain, nausea or severe vomiting, cachexia or severe wasting.

Program: Health Protection**AT A GLANCE**

- Environmental Health
- Infectious Disease
- Public Health Laboratory
- Health Regulation

PURPOSE & CONTEXT

Activities in the Health Protection budget program are responsible for protecting the health of all Minnesotans. The purpose, services, results, and authorizing statutes of each activity is described in the following pages. The fiscal page for Health Protection reflects a summation of activities under this budget program area.

Health Protection

Program: Health Protection

Activity: Environmental Health

health.state.mn.us/divs/eh/

AT A GLANCE

- Test drinking water at more than 7,000 public water systems.
- Ensure safe food, drinking water, lodging, and swimming pools in 23,000 establishments statewide.
- Annually certify 12,000 food managers and support 35,300 active food managers.
- Annually regulate the installation of 6,000 new wells and the sealing of 7,000 wells no longer in use.
- Promote healthy indoor environments and the reduction of unnecessary radiation exposure for over 11,000 facilities and individual contractors.

PURPOSE & CONTEXT

Whether it is clean air to breathe, clean water to drink, or wholesome food to eat, having a healthy environment is a key determinant for individual and community health. The Environmental Health Division strives to protect, promote, and improve public health in Minnesota by monitoring and managing environmental health risks and hazards around the state. We do this by:

- Ensuring that food served in Minnesota restaurants and other food establishments is safe,
- Keeping drinking water safe,
- Evaluating potential health risks from exposures to toxic environmental hazards, and
- Keeping our indoor environments healthy.

SERVICES PROVIDED

The Drinking Water Protection Program

- Ensures compliance with safe drinking water standards through inspection, contaminant monitoring, technical assistance, and education.
- Promotes prevention-based protective measures of Minnesota's ground and surface waters.
- Works collaboratively with other state agencies to protect water resources.

Food, Pools and Lodging Services

- Ensures compliance with state health standards to ensure sanitary conditions in the state's public swimming pools, hotels, schools, resorts, restaurants, manufactured home parks, recreational camping areas and children's camps.
- Provide public information, education, training, and assistance about safe food handling and hand-washing to the general public, business owners, and local government partners to reduce the risk of foodborne illness.

Environmental Surveillance and Assessment

- Evaluate potential health risks to the general public from exposures to toxic environmental hazards such as contaminated sport fish, waste disposal sites, operation of power plants, and agricultural and industrial activities. Recommend actions to minimize exposures and manage risks.
- Develop risk analysis data that is used by government agencies and others to protect the general public, ground water, and source water from environmental risks.
- Design and test public health interventions intended to reduce the level of mercury and other contaminants in women of childbearing age and newborns, especially in the Lake Superior basin.

- Test and reduce lead levels in children’s blood and promote healthy home environments.

Indoor Environments and Radiation Programs

- Inspect and provide compliance assistance in the areas of asbestos and lead abatement.
- Enforce the Minnesota Clean Indoor Air Act, which prohibits smoking in most indoor public areas and workplaces.
- Provide public information about the potential health effects of asbestos, lead, radon, mold, and other indoor air contaminants.
- Register, inspect, and provide technical assistance to all x-ray facilities and license the use of radioactive materials.
- Monitor radiation near Minnesota’s two nuclear power plants.
- Help local and state governmental agencies prepare for and respond to radiological emergencies and incidents.
- Help schools address indoor air quality concerns and other environmental health hazards.

Well Management Program

- Protect public health and groundwater resources by ensuring the proper construction, maintenance, and sealing of wells and borings.
- Contribute to interagency activities to protect water resources and public health through the Clean Water Fund by well sealing and improving protection of those served by private wells.

RESULTS

Drinking Water Compliance with Standards

Overall, Minnesota has an excellent record of compliance with the federal Safe Drinking Water Act. Currently better than 99% of our public water systems (numbering more than 7,000 total systems) meet all the requirements. MDH’s ongoing work to protect source water, inspect, monitor, collaborate, certify operators, and provide source water protection grants has allowed Minnesota to maintain a high rate of compliance and address violations when they arise.

As part of continuous improvement efforts, knowing where the violations are occurring and whether the trend is improving over time is important. The graphs to the right show the number and contaminants for which the violation

occurred from 2005 to 2017. They show that MDH and public water systems have been successful in reducing the number of violations. Non-community water systems are places where people do not live or are not part of a larger community public water system. These locations can include businesses, schools, resorts, and restaurants.

The graphs clearly show the impact of a new, lower standard for arsenic in the early years and the subsequent decline as MDH staff and public water supplies collaborated to address those violations. The graphs do not show why the curve is improving, but the number of compliance visits, staffing levels, grants and loans awarded, operator training, and changes in technology all play a role.

Food, Pools and Lodging Services Inspection Frequency

Assurance that food service, pools and lodging services are provided in a safe manner to the public is important for public health. The frequency at which inspections of these establishments are conducted helps assure the safety of those operations. The graph to the right shows that the percentage of past due inspections is decreasing despite the number of licensed establishments needing to be inspected rising.

Children with Elevated Blood Lead Levels

Children with elevated blood lead levels are at significant risk of health and development problems. Prevention and early intervention are critical aspects to reducing blood lead levels in children. Children with confirmed blood lead levels above 15 µg/dL are required to receive an in-home inspection for lead. The number of Minnesota children with blood lead levels above this amount has decreased significantly since 2001.

Homes with Reduced Radon

Exposure to high indoor radon presents a significant lung cancer risk in Minnesota. Installing radon mitigation systems reduces the risk. The number of mitigation systems installed in Minnesota homes has increased from 1,030 in 2008 to 5,007 in 2017. This can be attributed to several factors: 1) a new disclosure law in home sales; 2) the Indoor Air Unit's statewide radon awareness campaigns, radon home test kit distribution, partnerships with over 100 organizations, and MDH staff research and policy work; and 3) a stronger economy over the past 10 years. Data are from the radon reporting system.

How Reporting Radon Mitigations to IAU Has Increased

Program: Health Protection

Activity: Infectious Disease

<http://www.health.state.mn.us/divs/idepc/>

AT A GLANCE

- Investigated 1,408 cases of Lyme disease, 638 cases of anaplasmosis, and 59 cases of babesiosis in 2017. Worked with partners to identify several new tick-borne disease causing agents.
- Investigated 601 cases of syphilis in 2017; confirmed treatment for 585 of the cases; interviewed 426, and identified 696 sex partners for testing and treatment.
- Coordinated programs to immunize the 70,000 infants born each year.
- Provided free vaccines to one in every three children in Minnesota.
- Coordinated with many partners to respond to the 2017 measles outbreak. Due to massive public health efforts, only 75 measles cases resulted from almost 9,000 known exposures in health care, schools, and child care settings.
- Managed treatment for 168 new tuberculosis cases and evaluated 1,954 individuals exposed to the case in 2016. Investigated largest multi-drug resistant TB outbreak in the U.S., within Ramsey County.
- Tracked incidence of hepatitis B and C and the increase in C associated with injection opioid use.
- Developed a toolbox that provides the components all hospitals should have in place to identify, isolate, and inform authorities regarding a patient with a high consequence infectious disease.

PURPOSE & CONTEXT

The Infectious Disease Epidemiology, Prevention and Control Division provides statewide leadership to ensure Minnesotans are safe from infectious diseases.

Our role:

- Maintain systems to detect, investigate, and mitigate infectious disease outbreaks and threats.
- Recommend policy for detecting, preventing, or controlling infectious diseases.
- Coordinate with the health care and public health systems to prevent further transmission of diseases.
- Provide access to vaccines and medications to prevent and treat infectious diseases.
- Provide advice to health care providers on diagnosis and management of emerging infectious diseases (e.g., Ebola and Zika).
- Evaluate the effectiveness of our infectious disease activities.

SERVICES PROVIDED

Prevent, identify, investigate and mitigate infectious disease threats.

- Maintain a 24/7 system to detect, investigate and control cases of infectious disease including emerging diseases (e.g., pandemic influenza, Ebola, Zika).
- Analyze disease reports to identify unusual patterns of infectious disease, detect outbreaks, identify the cause, and implement control measures.
- Alert health care providers and the public about outbreaks and how to prevent them from spreading.
- Maintain a foodborne illness hotline to receive complaints from the public and identify possible foodborne outbreaks quickly.
- Manage tuberculosis treatment and provide medications for patients to prevent disease spread.

- Investigate health care-associated infections or infection prevention breaches, work collaboratively with health care facilities to prevent the spread of infection, and conduct follow-up on those who were exposed to infectious disease.
- Coordinate refugee medical screenings to identify and treat health problems.
- Distribute publicly purchased vaccines for children whose families cannot afford them.
- Provide leadership for the statewide immunization information system.
- Conduct studies on infectious diseases of concern to the public and the medical community.
- Educate the public, especially high-risk populations, on disease testing, treatment, and prevention.
- Provide funding to local public health agencies and nonprofit organizations for infectious disease prevention activities.
- Enhance infection prevention and antibiotic stewardship by providing assessment and technical assistance to health care facilities.
- Involve high-risk communities, health care providers, and concerned citizens in responding to infectious disease challenges.
- Prevent the spread of infectious disease (such as hepatitis C and HIV) by encouraging pharmacies to provide clean syringes without a prescription to injection drug users.
- Alert the public where and when the risk of infectious disease is the greatest.
- Evaluate the effectiveness of infectious disease public health programs by monitoring disease trends and outcomes.

RESULTS

Percentage of eligible* tuberculosis patients who complete therapy in 12 months.

Source: MDH TB Program Data

*Only includes patients for whom 12 months of treatment or less is recommended.

Percentage of foodborne disease outbreaks in which the source of the outbreak was identified.

Source: MDH Foodborne Outbreak Data

In 2016, MDH identified the sources of outbreak in 51% of the foodborne disease outbreaks. This exceeds the national level of 39% in the same year as reported by the National Outbreak Reporting System.

Number of on-site infection control assessment, training, and technical assistance visits to acute care hospitals, long-term care facilities, dialysis centers, and outpatient facilities throughout Minnesota.

Source: ICAR data

Percentage of early syphilis cases investigated for whom treatment was confirmed.

Source: Partner Services Data

Program: Health Protection

Activity: Public Health Laboratory

health.state.mn.us/divs/phl/index.html

AT A GLANCE

- Provide testing for contaminants in the environment and to evaluate exposures to contaminants in people. In FY 2018, the lab received 40,507 samples and performed 116,304 analyses.
- Provide testing for viruses and other microbes that make people sick, as well as look for outbreaks related to food and water. In FY 2018, the lab performed 84,091 tests on 44,907 samples.
- Screen for rare disorders in newborn babies, including hearing loss and critical congenital heart disease. In FY2018 the lab screened 67,127 newborns for 61 rare treatable disorders.

PURPOSE & CONTEXT

The Public Health Laboratory provides many services that help keep Minnesotans safe, including:

- Detecting infectious disease outbreaks and other public health threats;
- Screening newborns for rare conditions which greatly improves their outcomes;
- Identifying chemical, radiological, and biological hazards;
- Preparing and responding to emergencies; and
- Producing high-quality laboratory data used to inform public health decisions.

We do this by collaborating with local, state, and federal officials; public and private hospitals; laboratories; and other entities throughout the state.

SERVICES PROVIDED

We test environmental samples for chemical, bacterial and radiological contaminants.

- Test drinking and non-drinking water for various compounds that can be hazardous to human health and our environment. We analyze an average of about 4,300 drinking water samples for Coliform/*E. coli* bacteria per year with several hundred positive results.
- Develop methods to test potentially harmful chemicals in human samples to help make the connection between an environmental hazard and human exposure.
- Develop new methods for analyzing environmental samples for chemicals or materials with a perceived, potential, or real threat to human health or those that lack published health standards.

We test samples for rare and common infectious diseases.

- Test to identify microbes that impact public health including bacteria, viruses, parasites, and other organisms that make people sick. Many of the tests performed are for rare and/or emerging threats such as rabies, Ebola virus, and Zika virus.
- Perform DNA fingerprinting of bacteria to identify outbreaks caused by exposure to contaminated food and water.
- Conduct specialized tests to determine if a microbe is resistant to antibiotics and figure out how it has become resistant, to estimate how well vaccines work, or to determine why some germs cause more severe disease.
- Report results to public health and health care professionals, who then offer treatment and stop the spread of disease-causing microbes.
- Ensure quick discovery and control of outbreaks to minimize the spread of illness.

We screen newborns for treatable conditions.

- Screen all Minnesota newborns for 61 treatable, hidden, rare disorders including hearing loss and critical congenital heart disease.
- Ensure that treatable disorders are detected and babies receive follow-up testing and care, resulting in improved long-term health outcomes and quality of life for these babies and their parents.
- Educate Minnesota's new and expectant parents and medical providers about newborn screening.

Emergency Preparedness and Response

- Detect and respond to many kinds of hazards, including harmful chemicals, radioactive materials, and biological organisms that can make people sick.
- Serve as a member of Minnesota's Radiological Emergency Preparedness program, which would respond in the event of a release of radioactive chemicals at Minnesota's nuclear power plants.
- Detect harmful germs in air samples through an air-monitoring program.
- Train public and private laboratories to be able to recognize and report possible agents of chemical, disease, and other public health threats.
- Prepare to offer services in response to a mass casualty event involving harmful chemicals anywhere in the country.
- Conduct rapid testing on clinical or environmental samples of concern (e.g., unknown white powders).
- Develop and maintain new testing methods to identify potentially harmful agents.

RESULTS

Percent of Environmental Samples Tested and Reported to Program Partners within Specified Timeframe

Meeting turnaround times, i.e. the time it takes to test a sample and report the results, ensures that our program partners receive timely information to make decisions about what actions they need to take to protect public health. This graph shows the laboratory's ability to meet partner expectations by providing results of water testing within the agreed upon timeframe. Reliable and timely reporting of testing helps state programs assure the quality and safety of water that Minnesotans use for drinking, swimming, and fishing.

Number of Actionable Clusters of Salmonella Enteritidis Found with Whole Genome Sequencing vs. Pulse-Field Gel Electrophoresis

The laboratory recently evaluated a new technology called whole genome sequencing (WGS) to identify *Salmonella* Enteritidis, a bacterium that causes foodborne illness. This graph shows that we are able to find more actionable clusters that indicate an outbreak using WGS than with the old method, pulsed-gel electrophoresis (PFGE). Using this new technology enables our laboratory to identify more outbreaks, allowing us to find the source and prevent more people from becoming sick.

Percent of Newborn Screening Samples Collected within 48 Hours of Birth

Collecting newborn screening samples within 48 hours of birth helps reduce the time needed to identify infants at risk for newborn screening disorders. The sooner identification occurs, the sooner medical actions can happen for infants identified with disorders on the screening panel. Early actions result in better health outcomes. Minnesota has exceeded the national benchmark for all quarters reported.

Program: Health Protection

Activity: Health Regulation

health.state.mn.us/divs/fpc/index.html

AT A GLANCE

The Health Regulation Division (HRD) in MDH consists of 250 staff statewide for the following regulatory activities: state licenses and federal certifications; completing inspections, investigations, reviews, or audits; administering registries; taking enforcement actions when necessary; and providing information to consumers and providers. HRD regulates 40 different types of providers and organizations including healthcare facilities, health professions, health plans, and body artists and piercers. HRD's regulatory activities protect Minnesotans from before birth to after death (douglas and birth centers to morticians and funeral establishments). There is a strong relationship with the Centers for Medicare and Medicaid Services (CMS) in our regulation of the many health facilities that are federally-certified.

- Monitor 4,200 health care facilities and providers for safety and quality
- Review qualifications and regulate more than 6,700 health professionals
- Monitor nine health maintenance organizations and three county-based purchasing organizations that provide health care to 1.1 million Minnesotans
- Enforce interagency agreement with DHS who conducts 130,000 criminal background checks for healthcare workers at facilities the Health Regulation Division (HRD) regulates
- Maintain a registry of more than 60,000 nursing assistants
- Inspect 560 funeral establishments and license 1,300 morticians
- Process more than 1 million and audit more than 8,000 federal nursing home resident health assessments to ensure accurate submission, completion and billing for services
- Register more than 3,400 spoken language health interpreters

PURPOSE & CONTEXT

HRD protects the health and safety of Minnesota's nursing home residents, home care clients, hospital patients, clients with developmental disabilities, enrollees of health maintenance organizations (HMOs) and county-based purchasing plans, families obtaining services at funeral establishments, birth center clients, body art establishment clients, and other clients of healthcare.

A great deal of HRD's work focuses on protecting older Minnesotans and vulnerable adults. As Minnesota's population ages over the next 20 years, older residents will require an increasing amount of health services and the need for health protection will become even more important.

SERVICES PROVIDED

Licensing & Certification

- Evaluate license, registration, or federal certification submissions from applicants for the minimum requirements so that all providers meet the same minimum qualifications and are qualified to practice
- Ensure that fire and safety inspections are conducted and that health facilities meet the physical plant requirements that protect the health and safety of patients and residents
- Review funeral service providers to ensure that pre-need funds paid by families are protected and available to pay for services when needed
- Regulate body art establishments and technicians to prevent blood borne infections

- Regulate HMOs and County Based Purchasing entities to ensure compliance with statutes and rules governing financial solvency, quality assurance, network adequacy and consumer protection
- Conduct audits of federally certified nursing homes to ensure they are accurately completing the resident health assessment and billing Medicaid appropriately for services provided

Complaints, Investigations & Enforcement

- Respond to thousands of citizen calls each year, investigate complaints, and initiate enforcement actions when appropriate against health facilities and providers found to be violating state or federal laws
- Enforce the laws protecting persons from maltreatment under the Vulnerable Adults Act and Maltreatment of Minors Acts.
- Verify that health facilities have properly taken steps to protect residents in the event of emergencies, such as fire, tornadoes, floods, and health provider strikes.

RESULTS

At the end of 2017, we had a report and investigation backlog of 3,147. Our goal was to address the backlog and reduce it to 0 by 12/31/18. We achieved our goal early on 8/26/18.

Minnesota has approximately 1,200 licensed home care providers that MDH needs to inspect at least every three years. In order to accomplish this, we need to inspect an estimated 400 providers each year. We have not met this statutory requirement during the past three years.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Federal standard: inspect each nursing home at least every 15.9 months	100%	100%	FFY14 FFY15
Quality	Total onsite Vulnerable Adults Act investigations completed within 60 days	40%	31%	SFY13 SFY14
Quantity	Inspect each temporary home care license within the first twelve months	100%	100%	SFY17 SFY18
Quantity	Inspect each licensed home care provider at least once every three years	29%	30%	SFY17 SFY18
Quality	Enforcement Actions (licenses denied or issued with conditions)	3	26	SFY17 SFY18

Program: Health Operations**AT A GLANCE**

- Health Operations

PURPOSE & CONTEXT

Health Operations provides leadership and support to all program and activity areas at MDH. The purpose, services, results and authorizing statutes of each activity is described in the following pages. The fiscal page for Health Operations reflects a summation of activities under this budget program area.

Program: Health Operations

Activity: Health Operations

AT A GLANCE

- Provide human resource services to over 1,500 MDH employees in ten locations across the state
- Provide information technology services support for 250 software applications, 256 servers, and 2,070 personal computers
- Oversee and guide nearly \$325 million in outgoing grants to 500 unique grantees
- Process over 25,500 payment transactions and execute 1,700 contracts and grant agreements for MDH programs each year
- Review and release 45 separate legislatively-mandated reports

PURPOSE & CONTEXT

Health Operations provides overall vision and strategic leadership to achieve our mission and create effective public health policy and practice in Minnesota. We provide operational support for employees and programs within the agency to ensure strong stewardship of human, financial, and technical resources at MDH. We provide planning, policy development, legislative relations, internal and external communications, and legal services for the department.

We strive to achieve efficient and accountable government services by promoting strong internal controls, evaluating process improvement opportunities, and using project management tools. We carry out our mission in partnership with a wide range of external organizations that help to promote and protect the health of all Minnesotans.

SERVICES PROVIDED

Our **Agency Project Planning** office provides project management services for business process improvements and agency-wide technology projects. In addition, this office supports a number of IT applications that are central to how we do our work.

The **Communications** team works closely with the news media to issue nearly 60 news releases and advisories and respond to over 900 media inquiries per year. We work with divisions to ensure that accurate, timely, and clear information on a wide range of public health topics is shared with the public, with a special focus on coordinating public awareness and outreach related to emerging public health concerns.

Facilities Management provides space planning, physical security, lease management, fleet services, and operations support at MDH district offices.

Financial Management provides stewardship of MDH financial resources through centralized accounting and procurement service, and oversight of cash management and financial reporting for federal grants. Our Grants Management office coordinates the work of nearly 175 MDH grant managers to ensure consistent procedures are followed across the department and to improve consistency and effectiveness of outgoing grants. Our Budget office coordinates budget planning and fiscal analysis for the Governor and the Legislature.

Human Resource Management provides strategic personnel management and workforce development. We manage staffing and labor relations; administer compensation, benefits and payroll services, and provide training

programs to strengthen employee capacity and management skills. We consult with employees, managers, and supervisors on complex employment issues.

The **Office of Diversity and Inclusion** promotes an inclusive workplace with equal opportunity and affirmative action programs.

Our **Internal Audit** program provides independent, objective assurance to MDH management over a variety of financial and compliance matters and provides investigative and consulting services as needed. Through this work, we improve agency policies and procedures to strengthen internal control structures.

Our **Legal Services** unit serves the commissioner in a general in-house counsel capacity, while providing overall direction to and oversight of legal services provided to MDH. The Legal Unit responds to all legal need of the department in areas such as emergency preparedness and response, rulemaking, data practices and privacy, contracts, records management, delegations of authority, infectious disease control, medical cannabis, health facility complaints, managed care, and statutory and regulatory compliance. The Legal Unit also serves as the primary liaison with the Office of the Minnesota Attorney General in complicated legal issues and ongoing civil litigation matters where MDH is a party.

Legislative Relations staff lead and coordinate state legislative activities and monitor federal legislative activities to advance the department's priorities and mission. We work closely with the Governor's Office, department divisions, legislators, legislative staff, and other state agencies on the department's strategies and priorities. We also serve as a contact for the public, other departments, legislators and legislative staff throughout the legislative session and during the interim.

MDH works in **partnership with MN.IT** to manage our IT resources and ensure that technology meets our business needs. MN.IT @ MDH provides expertise, planning and development of our technology systems, high-level security for all departmental data, systems and communications; manages our communication and IT infrastructure; and provides desktop support, training, and problem solving for employees.

RESULTS

The Office of Legislative Relations' goal is to respond to 90% of legislative requests within seven days, recognizing that some requests are complicated or have a wide scope and cannot be completed in such a short time frame. The legislative relations team came close to meeting its goal in 2014-2016 and met the goal in 2017.

Statutes

Health Operations supports the work of all areas of MDH. Statutes governing MDH's work can be found primarily in Chapters:

M.S. 144, (<https://www.revisor.leg.state.mn.us/statutes/?id=144>)

M.S. 145, (<https://www.revisor.leg.state.mn.us/statutes/?id=145>)

M.S. 145A (<https://www.revisor.leg.state.mn.us/statutes/?id=145A>)

M.S. 62J (<https://www.revisor.leg.state.mn.us/statutes/?id=62J>)

Narrative

The Department of Health relies on substantial federal investments in order to protect, maintain and improve the health of all Minnesotans. In FY 2018, federal funding accounted for \$248 million—almost half—of all department expenditures. The largest source of federal funding was from the U.S. Department of Agriculture’s Women, Infants and Children program at \$118 million or 48%. Other large federal contributors included the Centers for Disease Control and Prevention (\$68 million or 27%), the Health Resources and Services Administration (\$23 million or 9%), Centers for Medicare and Medicaid Services (\$16 million or 6%) and Environmental Protection Agency (\$8.5 million or 3%). The department uses federal funding to plan for and respond to public health emergencies, supply and equip a modern laboratory, track the spread of deadly diseases and debilitating conditions, promote health, maintain a highly skilled workforce and support communities with expertise and grant funding. The forecast for federal funding in FY 2020-21 is based on projected awards, but actual amounts are subject to annual congressional appropriations and agency determination.

Acronyms:

- ACF – Administration for Children and Families
- ACL – Administration for Community Living
- ATSDR – Agency for Toxic Substances and Disease Registry
- CDC – Centers for Disease Control and Prevention
- CFDA – Catalogue of Federal Domestic Assistance

Program Name Federal or State or Both (citation)	Purpose	Recipient Type(s) Eligibility Criteria	FY 2018	FY 2019
Community and Family Health:				
Abstinence Education Both (145.9261 and 145.9255)	Promote healthy youth development through education, community activities and parent support.	RFP – Competitive Nonprofit Organizations; Community Health Boards; Tribal Governments	694	626
Birth Defects Information System Both (144.2215)	Provide support and linkages to community resources for infants born with a birth defect and their families.	Non-Competitive – Formula Community Health Boards	279	323
Breastfeeding Peer Counseling Federal (144.0742)	Promote and support breastfeeding of WIC participants.	RFP –Competitive WIC grantees	1,010	850
Children and Youth with Special Health Needs Grant State (CYSHN) State (144.0742)	Improve care coordination for CYSHN	RFP- Competitive Clinics	160	160
Commodity Supplemental Food Program (CSFP) Federal (144.0742)	Provide nutrition information and supplemental foods to low-income individuals at least 60 years old.	RFP-Competitive Nonprofit Organizations	1,025	900
Evidence-based home visiting State (144.0742)	Supports evidence-based home visiting programs to at risk families.	RFP- Competitive Nonprofit Organizations; Community Health Boards, Tribal Governments	5,580	5,580
Families with Deaf and Hard of Hearing Children State (144.0742)	Parent to parent support for families with young children who are deaf or are hard of hearing.	RFP-Competitive Nonprofit Organizations	590	590
Family Home Visiting Program Federal (145A.17)	Promote family health and self- sufficiency.	Formula Community Health Boards; Tribal Governments	7,827	7,827
Family Planning Federal/State (145.925)	Provides pre-pregnancy family planning services to high-risk, low- income individuals.	RFP – Competitive Nonprofit Organizations; Community Health Boards; Tribal Governments	6,343	6,343
Fetal Alcohol Syndrome (FAS) State (145.9265)	Supports FAS prevention and intervention activities.	Single Sole Source Nonprofit Organization	2,000	2,000
Follow Along Program Federal (144.0742)	Supports anticipatory guidance and developmental screening for young children.	Formula Community Health Boards	157	157
Hearing Aid Loan Bank State (144.0742)	Support for a statewide hearing aid loaner program for young children newly diagnosed with a hearing loss.	Single Sole Source Nonprofit Organization	69	69

Program Name Federal or State or Both (citation)	Purpose	Recipient Type(s) Eligibility Criteria	FY 2018	FY 2019
Maternal, Infant, and Early Childhood Home Visiting (MIECHV) Federal (144.0742)	Supports evidenced based home visiting to pregnant or parenting families of young children.	RFP-Competitive Community Health Boards; Tribal Governments	5,649	6,056
Minnesota Student Parent Support Initiative Federal (144.0742)	Supports pregnant and parenting young women and men to accomplish their educational goals.	RFP – Competitive Nonprofit Organizations; Community Health Boards; Tribal Governments	769	670
Nurse Family Partnership State (144.0742)	Supports Nurse Family Partnership home visiting programs serving first time mothers.	RFP – Competitive Community Health Boards; Tribal Governments	2,000	2,000
Personal Responsibility Education Program Federal (144.0472)	Promote personal responsibility and educate high risk adolescents regarding pregnancy and STI prevention utilizing evidence based curricula.	RFP – Competitive Nonprofit Organizations; Community Health Boards; Tribal Governments	496	468
Positive Alternatives State (145.4236)	Provide support and assistance to pregnant women and on the birth of their child.	RFP – Competitive Nonprofit Organizations	3,357	3,357
Preconception Grants State (144.2215)	Prevent birth defects through preconception education efforts.	RFP – Competitive Nonprofit Organizations; Community Health Boards; Tribal Nations; Clinics	240	240
Support Services for Deaf and Hard on Hearing State (144.966)	Provides deaf and/or hard of hearing adult mentor support to parents of children who are deaf or hard of hearing, including American Sign Language.	RFP – Competitive Nonprofit Organizations	156	156
Title V Maternal and Child Health Block Grant Federal (145.882)	Provides public health services to high risk, low income mothers and children, including children and youth with special health care needs.	Formula Community Health Boards	6,070	6,036
Women, Infants and Children (WIC) Federal (144.0742)	Provides nutritional education and healthy foods to low-income pregnant women and young children.	RFP – Competitive Community Health Boards; Tribal Governments; Nonprofit Organizations	23,399	22,500
WIC Infrastructure	Provide assistance to WIC grantees for special projects above the scope of normal EIC operations.	RFP – Competitive WIC Grantees	67	63
Vendor Integration Grants Federal 144.0742	Provide support to retail stores in updating their Point of Sale system for integrated eWIC transactions.	Application Process WIC Authorized Stores	70	1,300
Health Promotion and Chronic Disease:				
Sage Health Systems Change grants Both (MS 144.0742 & 144.05)	Increase access to breast and cervical cancer screening services for low income uninsured and underinsured women through recruitment, patient navigation and case management.	Non-Profit Organizations Sole Source	181	65

Program Name Federal or State or Both (citation)	Purpose	Recipient Type(s) Eligibility Criteria	FY 2018	FY 2019
Advance Care Planning, State Laws of Minnesota 2017, 1st Spec. Sess., chapter 6, article 18, section 3, Subd. 2(n)	Develop, implement and evaluate a statewide advance care planning initiative using public health approaches through coordination of community-based strategies to encourage individuals, families, caregivers and health care providers to begin and sustain conversations regarding advance care planning.	Non-Profit Organization RFP - Competitive	241	32241
Cancer Legal Line Federal (MS 144.0742 & 144.05)	Prevent or reduce the financial and legal burdens on cancer patients through screening, education, and navigation within accredited cancer centers.	Non-Profit Organization Sole Source	25	13
American Indian Cancer Foundation Both (MS 144.0742 & 144.05)	Build capacity for stronger, more effective colon cancer education, outreach, screening and navigation in tribal health systems and communities.	Non-Profit Organization Sole Source	74	33
Sage Scopes Clinic Quality and System Improvement Grant Both (MS 144.0742 & 144.05)	Support quality improvement and increase colorectal cancer screening rates within Federally Qualified Health Centers.	Non-Profit Organizations; Tribal sites Sole Source	140	45
Safe Harbor Grants, Both federal and state funding Program and Technical Assistance 145.4716 - 145.4718	Funds shall be used for grants to increase the number of regional navigators; to train professionals who engage with exploited or at-risk youth; implement statewide protocols and best practices for effectively identifying, interacting with, and referring sexually exploited youth to appropriate resources; and program operating costs.	RFP - Competitive Local public health and social service agencies, nonprofit organizations, tribal governments, units of government, schools and/or school districts, health care organizations	2,650	2,650
Sex Trafficking Report State 145.4715	Development of a comprehensive statewide strategic plan and report to address the needs of sex trafficking victims statewide.	This was awarded via competitive RFP to a triumvirate of applicants including higher education and community organizations.	67	0
Safe Harbor Program and Technical Assistance State 145.4716	The Safe Harbor Program also includes training and technical assistance to individuals and organizations that provide Safe Harbor services and receive funds.	These funds are awarded via competitive RFP. Local public health and social service agencies, nonprofit organizations, tribal governments, units of government, schools and/or school districts, health care organizations	744	744

Program Name Federal or State or Both (citation)	Purpose	Recipient Type(s) Eligibility Criteria	FY 2018	FY 2019
Opioid Abuse Prevent Grants - State 15.061	This one-time funding appropriation supports a technical contract to advise the MDH and state of MN in best practice opioid overdose prevention (\$300,000). The appropriation also supports eight community opioid overdose prevention projects (\$700,000).	RFP - Competitive Tribal governments, local units of government, health care providers, health plan companies and other entities	1,000	0
Brain Injury/Trauma Registry State 144.661 - Stat 144.665	Repository of all hospitalized cases of traumatic brain and spinal cord injury in Minnesota. Data supports determination of appropriate community-specific intervention strategies and to identify service needs and gaps.	This funding is distributed via sole source to the Minnesota Brain Injury Alliance.	949	986
Suicide Prevention Grants State 145.56	Community-based suicide prevention in Minnesota, which will serve the needs of Minnesotans at risk of suicide.	RFP - Competitive Local public health and social service agencies, nonprofit organizations, tribal governments, units of government, schools and/or school districts, health care organizations, faith communities, emergency response organizations	248	248
Early Dental Prevention Initiative - Federal 144.0742	Statewide initiative to increase awareness of the importance of early preventive dental intervention for infants and toddlers.	Sole source Local public health and social service agencies, nonprofit organizations, units of government, schools and/or school districts, health care organizations, and faith communities	128	128
Poison Center Grants State 145.93	The poison control system reduces emergency room and physician office treatment for minor poison cases and produces corresponding increases in home management of poisoning.	Funds are awarded via competitive RFP Non-Profit Organizations, For-Profit Organizations and Units of government are all eligible to compete provided they meet the criteria.	2,379	2,379
Rape Prevention & Education Federal (144.0742)	Supports statewide prevention and education programs that address sexual violence.	Funds are awarded based upon a mix of competitive RFP and sole source Local public health, social service agencies, nonprofit organizations, tribal governments, units of government, schools and/or school districts, health care organizations	182	293

Program Name Federal or State or Both (citation)	Purpose	Recipient Type(s) Eligibility Criteria	FY 2018	FY 2019
Prevention & Control Diabetes & Cardiovascular Health Federal; MN State Public Health Actions Federal (144.0742)	Prevent obesity, diabetes, heart disease, and stroke.	Sole source Local public health and social service agencies, nonprofit organizations, tribal governments, units of government, schools and/or school districts, health care organizations, and faith communities	337	1208
Oral Disease Prevention Federal and Oral Health Workforce Act; MN Actions to Improve Oral Health Federal (144.0742)	Supports the development of state-level infrastructure to improve oral health in the state. Reduce oral health disparities and increase access to quality oral health care by fostering innovation in existing systems, develop and pilot new programs that positively impact Minnesota's underserved populations.	Sole source Local public health, social service agencies, nonprofit organizations, tribal governments, units of government, schools and/or school districts, health care organizations	119	107
MN Comprehensive Asthma Control Federal (144.0742)	Supports statewide activities to train health professionals, educate individuals with asthma and their families, and explain asthma to the public.	Sole source Local public health and social service agencies, nonprofit organizations, tribal governments, units of government, schools and/or school districts, health care organizations	23	50
MN Stroke Program MS 144.492 MN Stroke Registry Program Federal (144.0742)	Supports a hospital-based stroke registry that is used to improve care for stroke patients.	RFP - Competitive Health care organizations	3	28
Improving the Health of People with Mobility Disabilities Federal (144.0742)	Develop, implement, and measure the effectiveness of interventions that promote the health and wellness of people with disabilities and prevent secondary conditions across the lifespan	Sole source Local public health and social service agencies, nonprofit organizations, tribal governments, units of government, schools and/or school districts, health care organizations	101	76
Core Injury & Violence Prevention Federal (144.0742)	Supports comprehensive injury prevention and control activities, with a focus on traumatic brain injury.	Funds are awarded based upon a mix of competitive RFP and sole source grants; also an interagency agreement with MnDOT to support the Towards Zero Death Initiative.	0	23
Minnesota Safe Harbor Expansion Federal (144.0742)	This Office for Victims of Crime's (OVC) grant, Improving Outcomes for Child and Youth Victims of Human Trafficking, is focused on direct services to promote safety and security of victims.	RFP - Competitive Local public health, social service agencies, nonprofit organizations, tribal governments, units of government, schools and/or school districts, health care organizations	298	797

Program Name Federal or State or Both (citation)	Purpose	Recipient Type(s) Eligibility Criteria	FY 2018	FY 2019
Youth Suicide Prevention in MN Federal (144.0742)	Build local capacity and strengthen the coordination, implementation and evaluation of statewide (including tribal communities) youth suicide prevention and early intervention strategies to decrease suicide by 10% in five years, 20% in 10 years towards zero deaths	Funds are awarded via sole source. Local public health, social service agencies, nonprofit organizations, tribal governments, units of government, schools and/or school districts, health care organizations	269	405
MN Enhanced Opioid Surveillance Federal 144.0742	Improve state tracking and reporting on opioid-involved morbidity and mortality and its associated risk factors.	Funds are awarded based upon sole source (Minnesota Hospital Association)		151
Minnesota Addressing Arthritis Federal (144.0742)	Implement state-based approaches to improve arthritis management and quality of life for adults with arthritis.	Sole Source Local public health and social service agencies, nonprofit organizations, units of government, schools and/or school districts, health care organizations		61
Public Health Opioid Crisis Response Federal (144.0742)	Advance the understanding of the opioid epidemic and scale up prevention activities.	Funds are awarded based upon sole source capacity to provide the requirements of the federal funding.		587
DHS EMS Naloxone Federal (144.0742)	This one-time grant funding flows through DHS to the MDH for EMS regional programs and is for the express purpose of purchasing and distributing Naloxone, training first responders, and purchasing supplies needed for training and dispensing of Naloxone.	These grant dollars are only awarded to the EMS Regions in Minnesota - Sole Source Emergency response organizations	103	177
MN Drug OD & Substance Abuse Pilot Federal (144.0742)	This award allows for the testing of an emergency department-based drug overdose surveillance system	Funds are awarded via sole source to participating hospitals and the Minnesota Hospital Association	57	0
Surge Funding Components 1-4; National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention (NCHHSTP), and the NCIPC. Federal (144.0742)	These one-time funds will support staff in the collection and analysis and evaluation. Staff will increase the number of pharmacies participating in the MDH naloxone protocol, continue to provide training to / for pharmacists and pharmacy staff, and improve how we collect data on naloxone administration. A contract with the Minnesota Hospital Association will support work across many hospitals to test strategies for improving timeliness of reporting of overdose data to the MDH.	Sole source Minnesota Hospital Association Board of Pharmacy		2,790
MN Occupational Health and Safety Surveillance Federal (144.0742)	Occupational surveillance and related prevention activities.	No grants are awarded with these funds.	134	130

Program Name Federal or State or Both (citation)	Purpose	Recipient Type(s) Eligibility Criteria	FY 2018	FY 2019
Prescription Drug Overdose – data driven prevention initiative Federal (144.0742)	These funds support the translation of data into information that can be used at the state and local levels to guide program, policy and practice.	No current Grants are supported with these funds	0	258
Health Partnerships & Equity:				
Local Public Health Grant (145A.131)	For CHBs to address the areas of public health responsibility and local priorities developed through the community health assessment and community health improvement planning process.	Community Health Boards	21,665	21,665
Eliminating Health Disparities Initiative State (145.928)	Improves the health of the four minority racial/ethnic groups in MN (American Indians, Asian Americans, African Americans, and Latinos/Hispanics). Grants focus on 7 health priorities.	RFP - Competitive Community Health Boards; Local Government; Nonprofits	3,142	3,142
Local Public Health to Tribal Governments State (145A.14 Subd. 2a)	Develops and maintains an integrated system of American Indian tribal health services under tribal administration and within a system of state guidelines and standards.	Formula Tribal Governments	1,166	1,166
Racial Disparities Federal TANF (145.928)	Support closing the gap in the health status of populations of color and American Indians.	RFP - Competitive Community Health Boards; Local Government; NGOs	2,000	2,000
Public Health Emergency Preparedness (PHEP) Federal (MS 144.0742)	Increasing and maintaining operational readiness to respond to a public health disaster or emergency.	Formula – Community Health Boards, Tribal Health Departments	4,742	4,659
Hospital Preparedness Program (HPP) Federal (MS 144.0742)	Improve surge capacity and enhance health care coalition and hospital preparedness within Minnesota.	Formula Non-profit hospitals and EMS Associations	2,646	2,646
Hospital Preparedness Program Ebola Preparedness and Response Activities Grant Federal (MS 144.0742)	Improved capacity to safely and successfully identify, isolate, assess, transport, and treat patients with Ebola or patients under investigation for Ebola	Formula Non-profit hospitals and EMS Associations	950	950
Hospital Preparedness Program Ebola Preparedness and Response Activities Grant Regional Treatment Facility Federal (MS 144.0742)	Development of a regional Ebola and other special pathogen treatment center with significantly enhanced Ebola and other infections disease capabilities.	Sole source Non-profit hospital	570	570

Program Name Federal or State or Both (citation)	Purpose	Recipient Type(s) Eligibility Criteria	FY 2018	FY 2019
Public Health Crisis Response Grant (CDC Opioids) Federal (MS 144.0742)	Advance the understanding of the opioid epidemic and scale up prevention activities.	Sole source Non-profits, MN State Agencies	0	697
Statewide Health Improvement:				
Statewide Health Improvement Program (State) 145.986	Increase healthy behaviors and prevent the leading causes of illness and death. Tobacco & obesity. Improve the health of Minnesotans by reducing the burden of chronic disease through evidence based policy, systems, and environmental change strategies.	Community Health Boards and Tribes. Competitive.	14,634	14,634
Tobacco Use Prevention (State) 144.396	Grant program to reduce youth tobacco use and secondhand smoke exposure by creating tobacco-free environments.	Tribes, Community Health Boards (CHB), Nonprofit Organizations, health care organizations and local units of government. Competitive	3,221	3,221
State Physical Activity and Nutrition Program (Federal) 144.0742	CDC's State Physical Activity and Nutrition Program (SPAN) funds state recipients to implement evidence-based strategies at state and local levels to improve nutrition and physical activity.	Tribes, Community Health Boards (CHB), Nonprofit Organizations, health care organizations and local units of government. Application process.	0	923
Health Policy:				
Health Information Exchange State (62J.495)	Support provider and hospital organizations in more easily sharing data for two priority types of information exchange – care summary exchange and alerting notifications for admission, discharge, and transfer to/from hospitals.	Health care organizations, including but not limited to hospitals, clinics, local health departments. Competitive RFP Connectivity through a State- Certified Health Information Organization	0	500
Health Care Homes State (MS 144.0742)	Promote community partnerships between primary care and local public health to improve community health.	Primary care providers partnered with local public health.	50	
Health Care Homes State (MS 144.0742)	Promote health information exchange between primary care, local public health and behavioral health.	Primary care partnered with local public health and behavioral health.		83
Clinical Dental Education Innovations Grants State (621.692)	To promote innovative clinical training for dental professionals and programs that increase access to dental care for underserved populations.	RFP - Competitive Clinics; Institutions of Higher Education	1,122	1,122
Community Clinic Grants State (145.9268)	Assist clinics to serve low- income populations, reduce uncompensated care burdens or improve care delivery infrastructure.	RFP - Competitive Clinics	561	561

Program Name Federal or State or Both (citation)	Purpose	Recipient Type(s) Eligibility Criteria	FY 2018	FY 2019
Dental Safety Net Grants - State (145.929)	Support for dental clinics that serve uninsured children	RFP - Competitive Clinics	113	113
Family Medicine Residency State (144.1912)	Assist rural family medicine residency programs	Formula Clinics; Hospitals	1,000	1,000
Federally Qualified Health Centers (FQHC) subsidy State (145.9269)	Support Minnesota FQHCs to continue, expand and improve services to populations with low incomes.	Formula Clinics	3,639	3,639
Home and Community Based Services (HCBS) Scholarship grant State (144.1503)	Funding to support HCBS employee scholarship programs	RFP - Competitive HCBS providers	950	950
Hospital Safety Net Grants State (145.929)	Support for hospitals that serve high-cost Emergency Medical Assistance (EMA) patients	RFP - Competitive Hospitals	1,315	1,315
Indian Health State (145A.14)	Provides health service assistance to Native Americans who reside off reservations -- RFP offered every two years.	RFP - Competitive Clinics	348	
Loan Forgiveness Program State (144.1501)	Health education loan forgiveness for providers serving underserved areas or populations.	RFP - Competitive Individuals	3,240	3,240
Medical Education Research Costs (MERC) Federal; State (621.692)	The MERC trust fund was established to address the increasing financial difficulties of Minnesota's medical education organizations.	Formula Higher Education Inst.; Clinics; Hospitals	59,127	59,127
Mental Health Safety Net Grants State (145.929)	Support for mental health centers and clinics that serve uninsured children	RFP - Competitive Clinics	394	394
Primary Care Residency Expansion Grant Program State (144.1506)	Trains medical residents in the specialties of family medicine, general internal medicine, general pediatrics, psychiatry, geriatrics or general surgery.	RFP - Competitive Clinics; Hospitals	1,500	1,500
Regional Trauma Advisory Councils Federal (144.0742)	Support activities of the regional trauma advisory council.	Single/Sole Source Nonprofits; Hospitals	30	30
Rural Hospital Capital Improvement State (144.148)	Update, remodel, or replace aging hospital facilities and equipment necessary to maintain the operations of small rural hospitals.	RFP - Competitive Hospitals	1,755	1,755
Rural Hospital Plan and Transition Grant State (144.147)	Assist with strategic planning; transition projects.	RFP - Competitive Hospitals	300	300

Program Name Federal or State or Both (citation)	Purpose	Recipient Type(s) Eligibility Criteria	FY 2018	FY 2019
Small Hospital Improvement Federal (144.0742)	Supports small hospital Health Insurance Portability and Accountability Act (HIPAA) compliance, patient safety, quality improvement, and Prospective Payment System (PPS) costs.	Formula Hospitals	726	726
State Loan Repayment Program (SLRP) Federal; State (144.0742)	Health education loan forgiveness for physicians in rural and urban underserved areas.	RFP - Competitive Individuals	100	100
Summer Health Care Internship State (144.1464)	Funding for student internships in health care settings	RFP - Non Competitive Clinics; Hospitals, Nursing Homes	300	300
Health Professions Clinical Training Expansion Grant State (144.1505)	Funds expansion of clinical training opportunities for Nurse Practitioner, Physician Assistant, Pharmacy, Dental Therapy students	RFP – Competitive Health Professions training programs	500	500
International Medical Graduates Residency grant State (144.1911)	Funds residency preparation and program placement for International Medical Graduates	RFP – Competitive	500	500
Healthy Homes State 144.0742	Promote Healthy Homes and addressing housing-based health threats.	Nonprofit Organizations; Community Health Boards RFP –Non Competitive	240	240
Lead Abatement State 144.0742	To train workers to provide lead screening, education, outreach and swab team services for residential properties across the state.	Nonprofit Organizations; Community Health Boards; RFP Competitive	479	479
Environmental Health:				
Fish Consumption Program Federal 144.0742	To increase the reach of messages about safe fish consumption among women of childbearing age and their children through further dissemination of materials currently being distributed to women receiving medical care from HealthPartners.	Non-Government Sole Source	242	76
Clean Water Fund-State 144.0742	To enhance the public's understanding and knowledge of contaminants of emerging concern in water that may be used for drinking.	Nonprofit Organizations; Community Health Boards; Tribal Governments RFP -Competitive	38	10
Lead Federal 144.0742	To increase the number of small contractors that can competitively bid on lead hazard control primary prevention projects completed by neighborhood housing agencies	Community Health Board Master Contract Sole Source	60	0

Program Name Federal or State or Both (citation)	Purpose	Recipient Type(s) Eligibility Criteria	FY 2018	FY 2019
Well Sealing-State 144.0742	Funding to public water suppliers to seal their unused Wells.	Cities, Counties and Towns Sole Source	181	0
Private Well Protection-State 144.0742	Analyze water samples for coliform bacteria, nitrate and arsenic.	Counties Sole Source	0	6
Safe Drinking Water -Act- WM State 144.381 to 144.387	Data entry for Well Construction Records	Recipient: Nonprofits, Governments, Higher Education. Eligibility: Competitive, Single Source	26	0
Safe Drinking Water Act- State 144.381 to 144.387	On-site technical assistance for small public water supply operators.	Recipient: Nonprofits, Governments, Higher Education. Eligibility: Competitive, Single Source	3	0
Safe Drinking Water Act- State 144.381 to 144.387	To insure safe drinking water in all public water supplies.	Recipient: Nonprofits, Governments, Higher Education. Eligibility: Competitive, Single Source	5	11
Clean Water Fund -State 144.072, 114D.50	To protect drinking water sources.	Recipient: Local Governments, Public Water Supply Systems. Eligibility: Competitive	122	56
Drinking Water Revolving Fund-Federal	The Drinking Water Revolving Fund helps communities build drinking water storage, treatment and distribution systems that comply with standards in the Safe Drinking Water Act.	Recipient: Nonprofit Eligibility: Single Source	394	308
Infectious Disease:				
HIV Prevention – Both 144.074	Develop, plan, implement, monitor, and evaluate a Human Immunodeficiency Virus (HIV) program	Community Health Board, tribal governments, higher education, non-profit Competitive	1,811	1,811
EIS Program - Federal 144.0742 and 144.05	Providing HIV outreach and early intervention services to targeted populations across the state	Community Health Board, non-profit, tribal governments Non-competitive	1,506	1,506
PrEP Program – Federal 144.0742	Develop, plan, implement, monitor, and evaluate a Pre-Exposure Prophylaxis	Community Health Board, non-profit Competitive	400	400
Prevention with Positives – Federal – 144.0742	Develop and provide a peer support program for people living with HIV/AIDS	Community Health Board, non-profit Competitive	222	222
FIMR – Fetal and Infant Mortality Review – – Federal 144.0742 and 144.05	Implement the CDC’s Fetal and Infant Mortality Review/Human Immunodeficiency Virus program	Hospital – Sole source	25	25
EGISP – Federal – 144.0742	Expand capacity to conduct N.gonorrhoeae surveillance	Community Health Board – Non competitive	25	0

Program Name Federal or State or Both (citation)	Purpose	Recipient Type(s) Eligibility Criteria	FY 2018	FY 2019
GISP – Federal – 144.0742	Conduct N.gonorrhoeae surveillance	Community Health Board – Sole source	2	2
Partner Services – Federal	Ensure individuals exposed to STD's and HIV are properly treated to prevent spread of the disease	Community Health Board, other non-profit – Sole Source	212	212
SSuN – Federal - 144.074	Get more complete picture of total burden of STD's	Community Health Board – Sole source	30	30
Syphilis – Federal - 144.074	Receive community input to address STD's in sexually exploited individuals	Community Health Board – Sole source	149	159

Higher Education Facilities Authority

<i>Agency Profile</i>	1
Agency Expenditure Overview	3
Agency Financing by Fund	4
Agency Change Summary	5

AT A GLANCE

- The Minnesota Higher Education Facilities Authority (MHEFA) assists nonprofit institutions of higher education in financing capital projects through the issuance of tax-exempt debt
- MHEFA is authorized to have a maximum total of \$1.3 billion outstanding bond principal
- In FY 2018 MHEFA issued bonds for 4 new projects and refinanced 6 previously financed projects with a total of \$271,673,000 in bonds issued
- Total bond principal outstanding at 6/30/2018 was approximately \$929 million
- 21 nonprofit, post-secondary institutions in Minnesota have utilized MHEFA's program and realized interest savings on financing capital improvements.

PURPOSE

The Higher Education Facilities Authority (MHEFA) was created by the state legislature (136A.25- 136A.42) in 1971 to assist nonprofit institutions of higher education throughout Minnesota with financing or refinancing capital construction projects by issuing tax exempt revenue bonds. MHEFA receives no general fund tax dollars or any legislative appropriations. The operating funds come from fees charged to the institutions that benefit from the financings. MHEFA operates with the advice and leadership of a board of ten people. Eight are appointed by the Governor, one member is a representative from the MN Office of Higher Education and one member is the President of the MN Private College Council. The staff consists of two full-time employees.

MHEFA work contributes to the following statewide outcome:

- Minnesotans have the education and skills needed to achieve their goals

BUDGET

Historical Spending

Source: Budget Planning & Analysis System (BPAS)

STRATEGIES

MHEFA is authorized to issue tax-exempt bonds for private post-secondary institutions in Minnesota. In 1988, the legislature gave MHEFA additional authority to issue bonds for very limited projects at public higher education

institutions. MHEFA is authorized to have up to \$1.3 billion of outstanding bonds. The outstanding principal as of June 30, 2018 is approximately \$929 million. MHEFA issues tax exempt revenue obligations and enters into agreements with higher education institutions to be responsible for the use of the loan proceeds and to repay the bondholders. The State of Minnesota or MHEFA have no liability to repay bondholders.

MHEFA also provides education for its constituents on the process of issuing tax exempt bonds and provides support on secondary market disclosure and post issuance compliance requirements.

RESULTS

Since its creation in 1971, MHEFA has completed 229 bond issues totaling over \$2.8 billion. There has never been a default in payment on any bonds issued. Operational efficiencies are used to keep the expenses low, thereby keeping the fees low. MHEFA has been able to provide a consistent and efficient process for obtaining tax-exempt financing and has educated the institutions through newsletters, one-on-one information sessions, and an annual educational conference on market, legal and accounting considerations of tax-exempt debt financing. The nonprofit colleges and universities of Minnesota have facilities that offer an education competitive with other educational institutions in the nation. Many students that are educated in Minnesota stay in the state after graduation and provide a well-educated workforce.

AT A GLANCE

- Minnesota State Grant program, the largest of OHE's student financial aid programs, served 81,023 students and awarded \$186M in FY17.
- Student Loan Program provided \$66M in low interest loans to 8,587 low-income students in FY17.
- Protects consumers by registering and licensing 186 post-secondary institutions in the state of Minnesota. Oversees approximately 110 schools that disburse state aid and loan funds.
- Minnesota Indian Scholarship served 845 students and awarded \$2.75M in FY17.
- Publishes original research on postsecondary education, state student financial aid programs, student financing issues, retention, and completion.
- The Get Ready program is a college readiness program, funded by a federal grant of \$3.46M/year, and targeted to low-income students.
- Minnesota 529 College Savings Plan supports 67,625 accounts, 38,498 account owners, and \$1.39B in assets.

PURPOSE

The mission of the Minnesota Office of Higher Education (OHE) is to support the pursuit and completion of a higher education credential by every Minnesotan, regardless of race, gender, or socio-economic status, in order to enhance our democracy, the State's economic vitality, and individual quality of life. Our goals are to make postsecondary education accessible and affordable to all Minnesotans and foster best practices to ensure completion. Our financial aid programs serve low- to moderate-income people. Our outreach programs target populations that are historically underrepresented in postsecondary education. We work closely with the legislature, postsecondary institutions, foundations, and the federal government. OHE contributes to these statewide outcomes:

- Minnesotans have the education and skills needed to achieve their goals; and
- A thriving economy that encourages business growth and employment opportunities

BUDGET

"Other Funds" includes the Office of Higher Education fund, which is not in the consolidated fund statement

Source: Consolidated Fund Statement

STRATEGIES

- **Financial aid administration:** OHE administers several financial aid programs, including the State Grant, Child Care Grants, Work Study, American Indian Scholarships, Occupational Scholarships, Dual Training, the GI bill, and the SELF Loan Program. We work closely with approved postsecondary institutions to manage and disburse funds to students, which allow them to enroll, persist, and complete postsecondary education.
- **Policy and research activities:** We conduct original, independent research to provide lawmakers, educators, and other policy leaders with objective information about postsecondary enrollment, attainment, finance, accountability. We are the lead agency for the State Longitudinal Education Data System (SLEDs), which uses early childhood through postsecondary and workforce data to identify the most viable pathways for individuals to achieve successful outcomes in education and work. SLEDs data informs education and workforce policy and practice in Minnesota.
- **Consumer protection:** We register or license approximately 186 private non-profit and for-profit postsecondary institutions and oversee 110 of those schools that disburse state aid and loan funds. In 2014, we added a Student Consumer Advocate position, created to provide support and information to students who have a dispute with their postsecondary institution and to identify best practices in postsecondary education.
- **Minnesota 529 College Savings Plan:** We work closely with the Teachers Insurance and Annuity Association of America (TIAA) to administer a program allowing families to save future postsecondary education expenses in tax-advantaged accounts.
- **Get Ready:** Get Ready is a college readiness program, funded by a federal GEAR UP grant of \$3.46M/year. The state continues to experience racial inequities in the areas of postsecondary enrollment, retention, and completion. While college aspirations are high (over 90% across grade levels) amongst students of color, program data shows that lower rates of academic preparedness, academic tenacity, college knowledge, and a perceived lack of affordability act as significant barriers to postsecondary enrollment and completion. Through evidence-based postsecondary readiness interventions, Get Ready is working to eliminate these inequities by building schools' capacity to equip students and families with the necessary information, skills, tools, and strategies for overcoming these barriers. Get Ready is also committed to forming strong partnerships with employers, postsecondary institutions, and community organizations to ensure long-range sustainability in postsecondary readiness services after the GEAR UP grant expires.

M.S.136A (<https://www.revisor.mn.gov/statutes/?id=136A>) provides legal authority for OHE's student financial aid services.

M.S. 136G.01-136G.14 (<https://www.revisor.mn.gov/statutes/?id=136G>) provides legal authority for the Minnesota College Savings Plan.

M.S. 141.21 – 37 (<https://www.revisor.mn.gov/statutes/cite/136A.821>) provides legal authority for OHE's licensing and registration services.

Request:

Beginning in FY2020, the Governor recommends investing an additional \$43.076 million in the State Grant program to provide all Minnesotans with the promise of upward economic mobility through postsecondary attainment. This recommendation improves the affordability of Minnesota's postsecondary education system, particularly for low-wage working adults and middle-income families, which helps ensure a strong foundation of skilled workers supporting the infrastructure of Minnesota's economy. Five key strategies for reaching the state's attainment goal by ensuring affordability and enhancing access include:

1. Increasing the Living and Miscellaneous Expenses allowance to 108% of poverty, which ensures that students have a minimum standard of living (equal to the poverty level) and additional resources to pay for necessary books and supplies without having to compromise meals and housing,
2. Decreasing the Assigned Family Responsibility for all families by 5 percentage points, which helps to ensure economic security for all families and supports upward economic and social mobility for lower- and middle-income families,
3. Allowing the State Grant to fill in for unawarded Pell Grants within the State Grant program so that critical, under-served students receive necessary assistance for postsecondary education,
4. Begin administering child care grants as a supplement to the State Grant (pilot program) using funds from the current Postsecondary Child Care Grant program, and
5. Implementing a plan for communications and outreach to inform students and families about college costs and financial aid, which encourages the development of a college-going culture.

Compared to the FY18-19 appropriation for the State Grant program, the percentage increase in funding is +11%.

Rationale/Background:

The Minnesota State Grant program is a need-based financial aid program created to assist Minnesota resident undergraduates attending public and private postsecondary institutions in Minnesota. The program was first established in 1969, and in Fiscal Year 2018 it awarded approximately \$194 million in grants to approximately 80,793 students. The program is designed to complement the Federal Pell Grant program and provide choice and access to undergraduate students to attend the postsecondary institutions that best meet their needs.

Since 1983, Minnesota State Grant policy has been based on the Design for Shared Responsibility model. This model was initially built on the work of the Carnegie Commission on Policy Studies in Higher Education. The goal of the program is established in Minnesota Statute 136A.095:

The legislature finds and declares that the identification of men and women of the state who are economically disadvantaged and the encouragement of their educational development in eligible institutions of their choosing are in the best interests of the state and of the students.

This policy statement guides Minnesota policymakers in responding to changes in tuition and fees and living expenses faced by students. State Grant policy distributes the price of postsecondary education based on family income and attendance choices among students, families, and taxpayers.

Minnesota State Grants primarily assist lower-income students in paying educational costs.

- 60% of students receiving a State Grant have family incomes less than \$40,000.
- 38% of State Grant recipients are students of color.

Minnesota State Grants primarily assist students at public institutions.

- 63% of students receiving a State Grant attend a Minnesota State College or University,
- 15% attend the University of Minnesota, and
- 22% attend a private college or university.

Without adequate State Grants, students work more hours or borrow more in order to afford basic living needs, which limits their study and classroom time and negatively impacts their probability of completion. Increasing grants to students reduces the number of hours they need to work and reduces the need for debt.

- State Grant recipients at four-year public colleges graduated with significantly lower levels of total student loan debt (\$16,000) than non-recipients (\$23,400) in 2008.

Minnesota ranks 16th in state grant spending per full-time equivalent undergraduate. Although Minnesota tuition and fee rates at public institutions outpace many other states, State Grant spending per undergraduate (\$873) lags leading states such as South Carolina (\$2,190) by more than \$1,000 according to the National Association of State Scholarship and Grant Aid Programs in academic year 2016-2017.

Need-based grants are a proven-effective method of increasing student persistence and graduation rates. According to figures released by Minnesota Management and Budget, need-based grants like the State Grant program offer a total return on investment to the state of \$4.10 per dollar spent (Minnesota Management and Budget, 2018).

Proposal:

1. **Increase the LME** by moving to 108% of poverty.

Living and miscellaneous expenses for state grant recipients are currently set at the poverty level plus 1% (\$9,422 in FY2020). At this level, students are expected to live at a standard equal to poverty. This allows students no additional funds for books or supplies needed for coursework unless they reduce spending on food or housing. Food and housing insecurity places educational goals at risk.

In order to maintain adequate coverage of living expenses for students, OHE recommends increasing the LME to 108% of poverty. Such a change will increase state grants for full-time students by approximately \$300 per year. This change increases grants to all current State Grant recipients (approximately 81,000 students) and adds 1,650 new recipients, while increasing the average grant by about \$185. Estimated Cost: \$17.332M for the biennium.

2. Lower the assigned family responsibility modifier by 5 percentage points.

The robust Minnesota economy means that fewer students are enrolling in educational and workforce programs. Now — before the next recession — is the critical time for the state to increase its investment in individuals seeking to upgrade their job skills. Lowering the assigned family responsibility for all students will help low-wage working adults and middle-income families receive additional assistance in paying for education while lowering the need to borrow. Higher education is key to economic security for all families and to upward economic mobility for lower- and middle-income families. Further, as the state's demographics change, we will need more workers to replace retirees, requiring a higher percentage of Minnesotans to complete college. This change increases grants to all State Grant recipients projected to receive an award (approximately 81,000 students) and adds approximately 1,200 new recipients. This change also increases the average State Grant by about \$100 for all students. Full-time students would see an average award increase of about \$140. Estimated cost: \$21.078M for the biennium.

3. Fill in for unawarded Pell Grants within the State Grant program so that critical under-served students receive necessary assistance for postsecondary education.

Federal funding policies have created a situation in which targeted groups (e.g. students without a high school credential) and Minnesota Dreamers are ineligible for federal Pell Grants. Since the State Grant formula uses the Pell Grant in determining State Grant awards, these students must make up for the Pell Grant they do not receive by working more or borrowing. By allowing the State Grant to fill in for the missing Pell Grant, the state can increase awards to students from underserved and under attaining populations. Increasing the State Grant award amount for these students to “fill in” for the Pell Grant will improve their ability to enroll and persist in postsecondary education. This proposal would amend the State Grant award calculation statute to discontinue subtraction of the Federal Pell Grant for students who financially qualify for a Pell Grant but are not receiving one because they do not meet program eligibility requirements. Estimated: \$3.645M for the biennium.

4. Begin administering child care grants as a supplement to the State Grant (pilot program).

OHE currently administers the Postsecondary Child Care Grant program. However, the program is currently underutilized by Minnesota students. OHE staff believe that the source of this underutilization stems from the complex award formula and the potential for auditing — two reasons why colleges are choosing not to participate. In order to resolve this issue, OHE proposes allowing colleges to add a child care expense component to the LME within the existing State Grant formula. This would allow State Grants to increase in proportion to child care expenses. Ultimately, this will maximize program efficiency while increasing the number of students receiving a child care grant. Last year, nearly one in six State Grant applicants were student parents, and most of these students were also adult learners. Many of these student parents face significant hurdles to achieving their education, including parenting demands, work, and ongoing financial obligations. Providing a more accessible child care grant option may help alleviate the burden of paying for child care while taking classes, allowing these students to increase their course load and hasten completion of a postsecondary degree. We believe this program change can be accomplished using funds from the current child care grant program (\$6.694M for FY 2019), but will require OHE to have the ability to transfer unspent funds between programs in year one.

5. Communications and outreach to support the development of a college-going culture.

As a complement to increased state investment in higher education, the Office of Higher Education will provide outreach to students and families, making them aware of the expected costs of college and the various grant options made available to them through the state. A communications plan includes a coordinated campaign to reach students and families. Specifically, coordinated outreach to students that begins in middle or high school encourages the development of a college-going culture and encourages students to believe that a postsecondary education is attainable. The following resources are required:

- Staff 1 FTE — \$120,000 per year

- Website design, email marketing, social media — \$300,000 in the first year, \$100,000 ongoing
- Print materials — \$15,000 per year
- Training for staff at schools, businesses, and community organizations on how to provide prospective students with resources regarding paying for college and applying for financial aid — \$65,000 in the first year, \$15,000 ongoing

Estimated cost: \$0.750M for the biennium.

Total spending includes \$0.271M for the biennium that is currently unallocated: \$0.70M for FY2020, \$0.201M for FY2021.

Equity and Inclusion:

38% of State Grant recipients are students of color.

This proposal will address inequity in postsecondary access and completion by providing additional State Grant dollars to students underrepresented in higher education. The grant particularly benefits students from low income families, where students of color are traditionally overrepresented. In providing additional aid to students in lower income brackets, this proposal seeks to improve educational outcomes for students of color, which will have long-lasting, intergenerational impacts on economic stability and social mobility. Overall, providing and increasing state aid to low-income students reduces racial disparities in the state.

Recommendation:

The Governor recommends \$4 million in FY2020-2021 to fund a new program, MN Reconnect, to help adult learners re-enroll and finish their postsecondary education. Through MN Reconnect, former students who started their postsecondary studies but didn't complete will receive personalized support and assistance as adult learners to re-enroll, stay engaged in their studies, and complete their degrees. Four Minnesota State colleges have been selected to participate as pilot sites in the launch phase of MN Reconnect: Inver Hills Community College, Lake Superior College, Riverland Community College and South Central College. Funding may include additional community and technical colleges as eligible institutions beginning in FY2020 if fewer than 500 students enroll at current participating colleges. The pilot colleges have demonstrated a commitment to adult learners through adoption of best practice policies, programs and services. It is expected that participating institutions will complete the Council for Adult and Experiential Learning (CAEL) Adult Learner Assessment (paid by the institution) prior to participation in the program in order to assess their policies and practices as facilitating success for adult learners.

The program received initial funding from the Lumina Foundation for FY 2019 as Minnesota was selected as one of five pilot states to develop similar programs modeled after the Tennessee Reconnect program. Minnesota Reconnect targets former students aged 25-44 who have completed 15 or more credits of a certificate or degree program in order to facilitate re-enrollment in college and certificate/degree completion. The program has four components: targeted outreach and re-enrollment, system navigation and support, targeted financial assistance, and program evaluation.

The FY2020-21 proposal funding totals \$4,000,000 (\$2,000,000 per year):

- **Grants** of \$1,000 per semester to students for tuition and fees \$2,500,000 (\$1,250,000 per year)
 - 1,000 students in fall term = \$500,000
 - 1,000 students in spring term = \$500,000
 - 500 students in summer term = \$250,000
- **Designated student advising** at a cost of \$700 per recipient (500 recipients) per year \$700,000 (\$350,000 per year),
- **Funding to resolve existing financial holds** preventing re-enrollment \$100,000 (\$50,000 per year; assumes 20% of students at \$500 per student),
- **Funds to improve campus services** as identified by the CAEL assessment \$120,000 (\$60,000 per year),

- **Targeted outreach to former students** (outreach products, website design, enrollment web application) \$200,000 (\$70,000 per year statewide communications, \$30,000 per year college-based communications),
- **Financial aid program and competitive grant administration** at OHE \$130,000 (\$65,000 per year), and
- **Student advising program administration** at Minnesota State \$250,000 (\$125,000 per year).

This is a new program.

Rationale/Background:

Among Minnesota adults age 25 to 44, an estimated 10 percent of the state's population or 143,000 individuals enrolled in college but dropped out without completing a certificate or degree. The 143,000 individuals includes:

- 2,300 American Indians,
- 5,900 Asians,
- 11,800 Blacks,
- 5,300 Hispanics,
- 3,300 Multiracial Minnesotans, and
- 114,300 Whites.

Assisting these individuals in completing college will move Minnesota closer toward its educational attainment goal and augment workforce preparation. Workers having successfully completed their education program are more likely to be employed and more likely to pursue additional training required for their career pathways.

Minnesota has experienced 8 straight years of enrollment declines which are concentrated on the two-year sector. Taking advantage of available capacity from prior enrollment declines allowed TN Reconnect to increase enrollment at two-year colleges by 14,700 students in fall 2018 at its 13 community colleges and 27 colleges of applied technology.

It is the goal of OHE and Minnesota State that the program serve as a model which we can scale statewide to re-enroll college dropouts in order for them to complete their program and to enhance services supporting all students to reduce college dropout rates overall, especially for students of color.

Proposal:

MN Reconnect is a new program for state funding. Program administration is currently funded by a grant from the Lumina Foundation. The FY2020-21 proposal funding totals \$4,000,000 (\$2,000,000 per year):

- **Grants of \$1,000 per semester to students for tuition and fees** \$2,500,000 (\$1,250,000 per year) for 500 students per year – Working adults without children are often excluded from eligibility for federal and state grants due to income. If working full-time, full-time students earning more than \$20,000 per year in income are disqualified from Pell Grants; incomes above \$25,000 are disqualified from State Grants. Grants are limited to two academic years. Cost estimates assume 500 students funded in fall and spring terms plus 250 funded in summer term. OHE assumes a large number of initial enrollees with FY21 enrollees using funds made available through prior students completing or dropping out.
- **Designated student advising \$700,000** (\$350,000 per year) – The MN Reconnect program relies on advisors dedicated to adult learners and providing a single point for contact called Navigators from initial outreach to graduation. This form of advising is high touch and requires staff maintain a lower number of advisees than traditional advising models. MN Reconnect seeks to staff 1.0 FTE at each of the participating colleges at a cost of \$700 per student recipient.

- **Funding to resolve existing financial holds** preventing re-enrollment \$100,000 (\$50,000 per year) – Many students drop out of school due to an unpaid bill from the college. Failure to settle these bills results in a financial hold which prevent a student from enrolling at any Minnesota State college. Furthermore, these charges are often referred to the Minnesota Department of Revenue or collection agencies for payment, thus incurring fees and additional interest. Providing a means of repayment for small charges while staying enrolled is a critical component of degree completion for adult learners. MN Reconnect seeks to provide 20% of MN Reconnect participants with \$500 in one-time grant funds to resolve financial holds.
- **Funds to supplement services** on campus to address adult learner needs (flexible financial aid and advising hours, food insecurity, on campus child care, and similar services) **\$120,000** (\$60,000 per year) – complementing existing efforts to address adult learner needs and research-based student success supports. The needed supports will be identified by the CAEL Adult Learner 360 assessment. Adult Learner 360 helps a college or university map the route to adult student success. Made up of two surveys, one for institutions and one for adult students, Adult Learner 360 compares institutional perceptions against adult students' using CAEL's Ten Principles for Effectively Serving Adults. It is assumed that colleges will pay for the assessment in order to participate in MN Reconnect. This is the institutional buy-in component. Institutional costs for the CAEL Adult Learner 360 assessment will average \$7,000.
- **Targeted outreach to former students \$200,000** \$200,000 (\$70,000 per year statewide communications, \$30,000 per year college-based communications; outreach products, website design, enrollment web application) – MN Reconnect contacts former students via direct mail, email, social media, and general media. The request also includes funds for development of a MN Reconnect web portal for students to explore available programs and the benefits provided to program participants by the participating colleges. This budget also includes direct funding for institution-specific marketing to promote on-campus or local engagement of former students.
- **Financial Aid program administration** at OHE \$130,000 (\$65,000 per year) - the program relies on 0.5 FTE program staff at OHE who coordinates financial aid applications, institutional payments, and competitive grant applications across participating campuses at a cost of \$300,000 per year.
- **Grants to Minnesota State for program administration** \$250,000 (\$125,000 per year) - the program assumes 1.0 FTE program management at Minnesota State central who would coordinates student advising and supplemental services activity across campuses at a cost of \$125,000 per year per FTE.

In addition to state funding, colleges are providing benefits and services to students beyond the scope of funding provided by the Lumina Foundation. Funding from the Lumina Foundation sustains the current program administration (not scholarships or other financial assistance) through August 2019 for the initial planned 500 student cohort. MN Reconnect compliments existing efforts by Minnesota State to address educational challenges for adult learners. The program is modeled after successful programs in Tennessee, Mississippi, and Indiana. Funding provided by the Lumina Foundation provided critical start-up money but without sustained financial support from the state, the program is unlikely to realize intended benefits.

Equity and Inclusion:

In the equity description of the change item, please address the following questions:

One-quarter of students dropping out of college are students of color. The program will increase completion rates for persons of color in Minnesota. Increasing the completion rates for persons of color in Minnesota will reduce the gap in educational attainment between Whites and American Indian, Black and Hispanic students. Completion of an educational program has been correlated with higher wages and lower levels of unemployment. As a new program, the goal is implementation and scale-up. It is expected

that OHE and Minnesota State will continue to refine the program to increase success of participants. In addition, lessons learned from the program will improve retention and completion rates for all students and thus, over time, lessen demand for MN Reconnect.

IT Related Proposals:

This is not an information technology proposal.

Results:

As a new program, specific program performance measures will be used:

- **Quantity:** How many participants enrolled? How many participants persisted term to term?
- **Quality:** How many participants successfully completed a certificate or degree?
- **Result:** How do post-participation employment outcomes compare to pre-participation employment outcomes?

Statutory Change(s):

Sec. XX. MN RECONNECT PROGRAM.

Minnesota Office of Higher Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: Statewide Longitudinal Education Data System (SLEDs)/Early Childhood Longitudinal Data System (ECLDS)

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	1,000	1,000	1,000	1,000
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,000	1,000	1,000	1,000
FTEs	1	1	1	1

Recommendation:

The Governor recommends increasing general fund appropriation for SLEDs by \$2 million in FY20-21. This proposal would:

1. Fully integrate the Early Childhood Longitudinal Data System (ECLDS) into SLEDs,
2. Create efficiency within IT and administrative processes, and
3. Maximize outreach, training and technical assistance to local schools, districts, colleges and communities.

Rationale/Background:

Minnesota's Statewide Longitudinal Education Data System (SLEDs) informs individual, local and state policies, programs and decisions related to viable college and career paths and barriers to education and employment success. Currently, SLEDs provides data to the state legislative reports, federal reports, high school and college feedback reports, and the SLEDs website for providing information to parents and students.

Minnesota's Early Childhood Longitudinal Data System (ECLDS) web tool combines data collected by the Department of Education, the Department of Human Services and the Department of Health into one online, interactive database. The system shows population results on children's growth and achievement in relation to their participation in a variety of educational and social programs over time. ECLDS, the data system dedicated to informing programs at the preschool level, was developed under federal grants over the past 8 years and requires state support in order to be sustained.

Proposal:

A substantial portion of the request is for funds to maintain the Early Childhood Longitudinal Data System. The ECLDS was developed and built utilizing funds from two federal grants – Race to the Top grant 2010, and State Longitudinal Data System grant 2015. The system is active and provides reports to policymakers, program staff and the public on utilization of early childhood services, early childhood predictive factors related to K-12 and later educational success.

New SLEDs funding: \$405,300 for the biennium (\$202,650 each year):

1. Local training, outreach and research support – \$25,300 in new funds (\$12,650 per year) includes funds for training and outreach for local providers.

Within the K12 arena, the partnership with the Lakes Country Service Cooperative and the Southwest West Central Cooperative has yielded large increases in SLEDs utilization in the southwest and northwest

regions of the state. The service cooperatives have assisted SLEDs in developing training materials, informing districts of how to use SLEDs data for materials for parents and state reports to MDE. SLEDs training staff work with local staff to take a “deep dive” into the public data or to access and use their secured reports. SLEDs would like to replicate and expand this model to all 9 K12 service cooperatives for an additional two years.

SLEDs also has made great progress in assisting postsecondary institutions in using SLEDs data. Staff from Century College work directly with staff from Minnesota State, the University of Minnesota, and other institutions to create internal planning reports related to graduate employment and wage outcomes, and enrollment planning using MDE data sets and SLEDs public reports. The number of postsecondary users with access to secured reports has increased from 19 in September 2016 to 83 currently. SLEDs would like to continue this model to the remaining 40 institutions (26 Minnesota State institutions, 14 private non-profit institutions) for an additional two years.

Finally, the SLEDs grant allowed us to contract with external entities for research support. In this regard, the model had limited success. Therefore SLEDs would prefer to return to a more direct partnership with DEED’s regional labor market analysts. The SLEDs research produced by the regional labor market analysts is high quality and responsive to local stakeholders, though the resulting products would benefit from a more direct partnership with K12 and higher education staff in order to ensure it resonates with education-based audiences.

The \$25,300 represents the net new money needed to fund training and technical assistance activities. An additional \$139,500 in costs will be paid for through re-allocation of base appropriations and remaining federal grant dollars available through September 30, 2019.

2. MNIT Staffing –\$380,000 in biennial funding (\$190,000 per year) SLEDs currently produces data for 2 websites, 1 tableau visualization, 12 mobile reports with 24 filter options covering 11 years of data, K12 secured reports for all 800 high schools and districts, 2 postsecondary secured reports for all 120 institutions, and 54 approved SLEDs data requests. Increased demand for SLEDs data and reporting has meant that OHE needs to increase staffing in two key positions (0.50 FTE Business analyst, 1.00 FTE Quality assurance).

The business analyst will document and prepare technical specification for data requests, data marts and reports. Currently these technical specifications are prepared by SLEDs coordinators, agency staff and the IT project manager. Their time is needed on other requirements of the SLEDs project. The quality assurance (QA) staff reviews data products before they are released publicly ensuring high data quality. The number of SLEDs products has increased dramatically over the most recent 2 years and requires us to bring on additional QA capacity in order to maintain the timely release of reports. Without additional QA capacity, we risk the quality of all SLEDs reports and data products.

Integrate ECLDS into SLEDs: \$1,594,700 for the biennium (\$797,350 per year):

1. MNIT Staffing – \$1,080,200 for the biennium (\$540,100 per year) which in prior years had been funded through federal grant funds and state appropriations from OHE/SLEDs.
2. Administrative staff– \$304,000 for the biennium (\$152,000 per year) which includes the ECLDS manager and communications staffing; in prior years, these positions had been funded through federal grant funds.
3. MNIT hardware and software costs - \$169,500 for the biennium (\$84,750 per year) to support software and hardware costs including required upgrades.
4. Local training and outreach – \$27,000 for the biennium (\$13,500 per year) includes funds for training and outreach for local providers; in prior years, these expenses had been funded through federal grant funds.

5. Equipment or supplies, travel and employee development – \$14,000 for the biennium (\$7,000 per year) which includes basic employee development, grant development, and program expenses related to census data purchase and development of communications products; in prior years, these expenses had been funded through federal grant funds and state appropriations from OHE/SLEDs.

Equity and Inclusion:

SLEDs and ECLDS allow access to data and information on outcomes for individuals, including people of color, persons with disabilities, and veterans. Access to this level of detail permits policymakers to understand disparities across groups in order to improve outcomes for all Minnesotans.

SLEDs is fully integrated into federal and state reporting and is likely to be sustained into the future. ECLDS is the newer component and the partnering state agencies are working on similar integration strategies to ensure we maximize the information produced and system sustainability.

Statutory Change(s):

127A.70 MINNESOTA P-20 EDUCATION PARTNERSHIP.

Minnesota Office of Higher Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: Summer Academic Enrichment Program (SAEP)

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	125	125	125	125
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	125	125	125	125
FTEs	0	0	0	0

Recommendation:

The Governor recommends increasing base funding for the Summer Academic Enrichment Program (SAEP) by \$250,000 in FY2020-2021. Program funds provide a stipend for low-income Minnesota students completing grades 3 to 11 to attend OHE-approved summer academic enrichment programs offered by Minnesota postsecondary institutions and nonprofits.

Rationale/Background:

Summer vacation takes a toll on students' knowledge and skills. When they report to school in the fall, they perform, on average, one month behind where they left off in the spring. Summer learning loss disproportionately affects low-income students, and summer learning loss is cumulative over time, with the difference between the summer learning rates of low-income and higher-income students contributing substantially to the achievement gap.

For the 2017-2018 academic year, 37.7% of Minnesota's public school students qualified for free or reduced price meals. The 2017 Minnesota public high school graduation rate for free/reduced price lunch eligible students was 69%; 14 percentage points lower than the state's overall graduation rate. While graduating from high school is the key to future educational attainment, data from the 2018 Minnesota Comprehensive Assessment show that only 40% of free/reduced price eligible 10th grade students were proficient in reading, and only 26% of the same population were proficient in grade 11 mathematics. Minnesota public high school graduates in 2016 who had been free or reduced price lunch eligible at some point in high school enrolled in college at lower rates (63%) than those who were not free or reduced lunch eligible at any point in high school (75%).

Over the past several years OHE has been using unspent funds from other areas in the agency to cover the shortfall in this program. The request is to fund the program a level more in line with program demand. The legislature provided a small increase of \$50,000 for the 2018-19 biennium for the program.

Proposal:

This is a change in funding for an existing program.

Low-income students in Minnesota have been identified as being at risk for not enrolling in or completing postsecondary education. Based on eligibility for free or reduced price lunch, 3rd-11th grade students may receive a stipend for up to \$1,000 to cover the fee for attendance at a summer academic enrichment program offered by Minnesota postsecondary institutions and nonprofit organizations that provide rigorous education programs.

The base appropriation for the Summer Academic Enrichment Program remains at \$125,000 each fiscal year, with \$3,000 of the appropriation to be used each year for program administration. With an increase in funding, participation would be expanded to include more low-income students statewide. The appropriated amount, \$122,000, serves approximately 122 low-income students. Increasing the amount available for grants to \$250,000 would allow approximately 250 low-income students to participate in academically rigorous summer programming.

This proposal compliments work done in the agency by the federal GEAR Up/Get Ready program and compliments work done by the agency's Intervention for College Attendance Program. Both programs provide sustained program support for students over the academic year and the Summer Academic Enrichment Program compliments and supports work of these two programs by extending academic support benefits to students over the summer months.

The program has 20 organizations currently providing academic programming for SAEP funded low-income students.

This proposal would increase the number of low-income 3rd-11th grade students able to participate in rigorous summer academic learning programs. Key outcomes to advance equity and reduce disparities include increasing rigorous course taking and high school graduation for low-income students and increasing their academic preparation for postsecondary programs.

Implementation will occur at the start of the 2020 fiscal year. Steps are already in place to award the stipend for eligible low-income students at approved summer program sites.

Equity and Inclusion:

Low-income communities would be positively impacted by an increase in program funding. Minnesota's low-income communities have a disproportionate representation of American Indians, communities of color, women, rural residents, and people with disabilities. The proposal would increase the number of low-income 3rd-11th grade students able to participate in rigorous summer academic learning programs. Impact on equity would occur as rigorous course taking would enhance high school graduation for low-income students and increase their preparation for success in academic programs and the career of their choice. Representatives of these groups are administrators and staff in the academic projects that enroll low-income students and they provide guidance on how to increase positive academic outcomes for the targeted student group.

Positive impacts would occur as disparities in educational attainment for low-income students would be directly addressed through supporting student engagement in rigorous course taking. Students participate in programs that allow them to spend focused time on core curricular areas, improve academic skills, and gain exposure to a college environment. With concentrated time on core curricular areas, students counter the summer learning loss that accounts for about two-thirds of the academic achievement gap between less advantaged students and their more advanced peers.

Ongoing funding will be needed to sustain efforts to enroll low-income students in summer academic programs. Successful changes include increasing the number of low-income students who enroll in summer academic enrichment programs, experience and recognize the value of rigorous academic work, continue their education beyond high school, and pursue their ideal education/career profile. Implementation strategies include vetting of programs for their offering of academic rigor prior to including them as a provider of services for students, monitoring of programs after students are enrolled, account auditing and follow-up to determine outcomes for students.

Minnesota Office of Higher Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: Intervention for College Attendance Program (ICAP)

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	168	168	168	168
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	168	168	168	168
FTEs	0	0	0	0

Recommendation:

The Governor recommends an increase of \$336,000 for FY2020-2021 to the Intervention for College Attendance Program (ICAP). This is a competitive grant that support programs fostering academic success and pre-college services for students who are underrepresented in higher education.¹ Eligible grant recipients include non-profit agencies, postsecondary institutions, school districts, and professional associations.

Funds will be used to expand and enhance academic support, college preparation, and career awareness programs in order to 1) reach a greater number of Minnesota students, 2) target specific high-need student populations with records of traditionally low academic attainment, 3) deepen services offered to current ICAP participants in order to consolidate and offer a full range of college/career awareness and academic success programs.

Rationale/Background:

Despite being the second most educated state in the nation, Minnesota continues to experience some of the largest disparities based on race, ethnicity, and income in terms of educational attainment. According to the National Center for Education Statistics, Minnesota ranked last and second-to-last among all states for Latino and black high school graduation rates; Minnesota placed fifth-to-last among all states in high school graduation rate among low-income students. Graduation rates for American Indian high school students are among the worst in the country.

Low high school graduation rates among students of color and low-income students lead to urgent disparities in college enrollment and degree attainment among these populations. Meanwhile, the economic need for a highly skilled/educated workforce continues to grow in Minnesota. As the state's demographics continue to shift as a result of an aging population, and communities of color continue to grow, the need to address educational disparities in Minnesota becomes urgent. If there is not an increased and intentional investment in interrupting patterns of low-opportunity and low-achievement for these communities, Minnesota's economy will be stifled due to a shortage of a qualified workforce.

ICAP directly targets students in grades 5-12 who are underrepresented in higher education (racial/ethnic minority, low-income, first in their families to go to college, English language learner, and/or has a disability) and creates supportive and compelling pathways to achieving a college education. ICAP funds programs that use the most innovative, culturally appropriate, and proven pedagogies/strategies to reach students and ensure their success in high school and college. ICAP has historically seen incredible success in terms of impact across Minnesota, with some programs boasting high school graduation and college enrollment rates up to 40

¹ First generation students, students of color, low-income students, English language learners.

percentage points higher for students in the funded-program than their peers. Currently, the program awards funds to 24 grantees (\$27,958 average award) for a total cost of \$670,922.

The Minnesota Office of Higher Education has consistently re-directed unused agency funds into ICAP in order to fully support the program and sustain the grantees' work. In FY 2019, an additional \$85,000 of unused agency funds were re-directed into ICAP and granted out in small amounts to six of twenty-four existing grantees in order to reach more students and add culturally competent models into their work.

The Minnesota Office of Higher Education currently uses high school graduation and college enrollment rates as the main measurement of success among students who participate in ICAP programs. Other measurements include ACT pre/post test scores, college retention rate, and number of students impacted by the program. In addition to these measures, each program funded with ICAP dollars creates their own goals, objectives, and measurements based on the pedagogies and cultural competencies that are relevant to their communities. Every ICAP grantee presents a logic model for impacting student success annually, with at least two check-ins to ensure that the mission and vision of the programs are aligned with program activities, which lead to real student outcomes. In addition to quantitative data measures, grantees report on the successes and challenges of their individual programs, including student success stories and testimonies. Grantees also have the opportunity to share knowledge and best practices amongst each other.

Proposal:

This proposal is a request to increase the state's annual investment in ICAP, an existing program. The intended impact of an increased investment in ICAP would be:

1. to reach more students in grades 5-12 in Minnesota who are underrepresented in higher education and connect them to appropriate programming,
2. to increase high school graduation rates for all students underrepresented in higher education in Minnesota,
3. prepare students underrepresented in higher education and students who lack appropriate social capital for college or a sustainable career after high school, and
4. to support collaboration between high school and postsecondary grantees so that ICAP students not only enroll in postsecondary institutions, but persist and earn a certificate or degree.

By increasing the investment in students of color and low-income students, educational disparities will be addressed on a broader level. ICAP programs would submit plans to leverage the additional funds in order to increase the number of eligible students in their programs and strengthen/further innovate their work so that these programs successfully see students through college. Because of the variation in programs that are funded under ICAP, it is important to create individualized measures for success based on the student population that they work with and the local/regional context. All programs funded under ICAP are scalable and have potential to transform entire communities based on their influence, scope, and dedication to student success.

The Minnesota Office of Higher Education would be minimally impacted by the increase in funding. The grants administration team would work with existing grantees to identify areas that require strengthening in order to make a broader impact. Then, staff would work with grantees to create measurements and goals based on the impact statements listed above. Staff would also create contract amendments and add additional monitoring goals for grantees who receive this funding. Implementation of the steps listed in the bullet above would begin as soon as this proposal is accepted.

Additional funding will provide:

- Grants – Funding will be distributed to nonprofit organizations, postsecondary institutions, school district programming, and professional associations who are selected by a stakeholder committee on a competitive basis. In FY 2019, twenty-four grantees will receive funding through ICAP with an average award amount of \$28,000. An additional \$168,000 in annual funding will allow the Minnesota Office of Higher Education to increase the size of grants, thus deepening services for current grantees, and awarding funds to new grantees doing similar work across Minnesota. Essentially, the funding would 1)

allow organizations to invite more students into their program/expand their program, 2) allow organizations to provide additional services to their student cohorts, and 3) allow for new grantees to receive funding for providing pre-college services.

- Administrative or programmatic capacity – Currently, a competitive grants administrator manages the ICAP grant program in addition to 4 other grant programs. With an increase in funding, this will not change; however, an existing grants coordinator will provide backup support in order to manage the increased volume of grantees in the program.
- Equipment or supplies – No additional equipment or supplies will be needed.
- Sustainable Funding – Students eligible for ICAP program participation are first generation students, students of color, students of an ethnic minority, low-income students (based on free/reduced-price lunch participation), English language learners, or students with a disability. Each grantee has additional criteria for their programs. For example, two programs work exclusively with American Indian students; one program works exclusively with African American male high school students. Many programs have broad student participation based on the factors provided above. Current number of students served annually through ICAP is 4,312. With a 25% increase, the Minnesota Office of Higher Education expects to increase number of participating organizations by 25%.

The ICAP grant program compliments many programs in the agency, such as the State Grant Program, the Emergency Assistance for Postsecondary Students grant program, the Equity in Education and Jobs Connection grant program, and the Summer Academic Enrichment grant program. The effective implementation date would be July 1, 2019. The Minnesota Office of Higher Education would immediately be able to grant out new awards based on the increased funding.

Equity and Inclusion:

Groups directly impacted by the proposed budget change include: communities (particularly youth) of color, including American Indian populations, ethnic minorities such as Hispanic populations, and immigrants; middle school/high school students whose parents did not attend college; middle school/high school students who participate in the federal free/reduced-price lunch program and/or whose parents participate in the federal Temporary Assistance for Needy Families (TANF) program. The above groups are directly impacted due to the pre-college/career awareness services available for them as a result of the ICAP grant. While the focus of these services is largely direct academic interventions, all programs impact these students and families' social-emotional development and sense of belonging both in a community and as lifelong learners.

ICAP requires that stakeholders, grantee organizations, and students have direct input into evaluation of funded programs, both in the proposal review process and throughout the grant cycle. Increased funding in ICAP will reduce large gaps in educational outcomes for students of color/low-income students/first generation students and their peers. This is because the programs offer these students resources to help “catch up” academically, socially, and emotionally to students who have paid resources available to them (e.g. ACT prep), and who have families who have been through the college process. It also prepares them to adapt to cultural experiences that are different from their own, while valuing and honoring their own identities.

ICAP grantees undergo a scrupulous competitive process in order to avoid the occurrence of negative impacts on vulnerable communities. Potential negative impacts include grantees selecting already high-achieving students to participate in the programs in order to show success. Selecting grantees that intentionally offer services to a broad base of qualifying students and regular monitoring of programs helps mitigate this. All other impacts resulting from increased funding would be positive. All grantees must show evidence of an at least 50% match based on their annual award. This shows that the selected grantees can sustain their basic activities beyond the competitive grant funding.

Results:

ICAP currently uses a combination of performance measures that include high school graduation rate, college application rate, college enrollment rate, ACT scores, social-emotional development measures, number of

students impacted, number of students enrolled in honors/advanced high school coursework, and college participation/retention rate, and qualitative student successes and challenges using student surveys. Current performance measures are consistently positive. In fiscal year 2016 alone, 20 programs were funded through ICAP, reaching 3,606 students. The tables below outline basic successes of the ICAP program. ICAP participants consistently “catch up” to the high school graduation rates of their resourced peers, and out-perform on every indicator when compared with peers of their same demographic group. Data is collected formally twice per year from grantees through an extensive reporting process. In addition, each grantee is visited at least once per grant period.

Minnesota Office of Higher Education

FY 20-21 Biennial Budget Change Item

Change Item Title: Amend Transfer Language Laws 2017, Chapter 89 Art 1, Sec 2, Subd. 40

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Request:

The Governor recommends adding the following programs to the transfer authority language: Intervention for College Attendance Grants, Summer Academic Enrichment Program, Student and Parent Information.

Rationale/Background:

Adding Intervention for College Attendance, Summer Academic Enrichment Program and Student-Parent Information to the transfer language would allow the agency the flexibility to use any outstanding funds for programs as needed. Transfer language goes back as far as 1989 Session Laws, Chapter 293. The original language allowed for transfers to the State Grant Program.

Over the years the transfer language has been expanded (in order to meet the needs of students) to allow for transfers to other programs, such as Work Study, Child Care, Reciprocity, Safety Officer Survivor, Indian Scholarships, and more recently State Get Ready was added. We evaluate current year spending and in the instance that there is an unexpended balance in financial aid and administrative funds we would reallocate them to areas of need to help elevate wait lists and grant shortages.

If money is not expended it returns to the general fund. Programs have been added to this rider over years and we would like to add the Intervention for College Attendance, Summer Academic Enrichment Program, and Student-Parent Information to the transfer language.

In fiscal year 2017, through indirect transfers the Agency made a \$750,000 transfer to for the Summer Academic Enrichment program to provide access grants for approximately 842 low-income students to high quality educational experiences this summer to help prepare them to enter postsecondary education. An additional \$1,213,000 transfer was made to provide additional Intervention for College Attendance grants to postsecondary institutions and community based organizations to increase access and success to students traditionally underrepresented in higher education.

Proposal:

The proposal is to add ICAP, SAEP, and Student Parent Information to the list of allowable transfers. This proposal made it into the higher education omnibus bill that was rolled into the larger finance omnibus of the 2018 legislative session, but the large finance omnibus was vetoed.

Statutory Change(s):

Laws 2017, chapter 89, article 1, section 2. Subd. 40.

Minnesota Office of Higher Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: Recruit and Retain Quality Teachers

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	4,000	4,000	4,000	4,000
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	4,000	4,000	4,000	4,000
FTEs	0	0	0	0

Recommendation:

The Governor recommends increasing funding to programs dedicated to expanding and recruiting quality teachers, particularly teachers of color and American Indian teachers. This proposal funds:

- \$1,817,500 increase in student teacher grants.
- \$182,500 increase in expanded concurrent enrollment grants to provide “Introduction to Teaching” courses.
- \$2.0 million to create mentoring, induction and retention incentive program grants for teachers of color and American Indian teachers.

Rationale/Background:

Minnesota is facing a teacher shortage. According to the 2019 Teacher Supply and Demand report:

- Slightly more than half (52.5 percent) of teachers holding an active teaching license are not currently working as a teacher in a Minnesota public school.
- The percentage of teachers of color remain stagnant while the percentage of students of color continues to grow in Minnesota.
- Teacher shortages are a problem across Minnesota: 41.9 percent of districts reported that it is a major problem and 51.8 percent reported that it is a minor problem. Only 6.4 percent of districts indicated that it is not a problem for them. More than 1 in 10 school districts (12.7 percent) reported that they had to cancel classes or programs due to a shortage of teachers.
- Most teachers in Minnesota identify as white (95.7 percent), followed by Asian (1.5 percent), black (1.4 percent), Hispanic (1 percent), and American Indian (0.4 percent). Most school districts reported that it is difficult to recruit teachers that reflect their student body. 83.1 percent of schools have less than 10 percent teachers of color or American Indian teachers, while 64.3 percent of students are in schools with more than 10 percent students of color or American Indian students. Percent persons of color

Proposal:

To address the teacher shortage overall—and shortage of teachers of color and American Indian teachers in particular—the Governor recommends the following in order to support student teachers, attract new teacher candidates, and retain teachers.

- \$1,817,500 increase in student teacher grants under Minnesota Statutes 136A.1275.
 - The Office of Higher Education provides grants to student teachers from low-income families who intend to teach in a shortage area after receiving their teaching license or who belong to an underrepresented racial or ethnic group. Currently statute requires that at least 36.5 percent of

these grants go to teacher candidates of color or American Indian teacher candidates. These grants are up to \$7,500. This proposal will fund up 230 student teachers, including up to an additional 84 teacher candidates of color or American Indian teacher candidates.

- The Office of Higher Education may retain up to 3 percent of this funding for administration of the grant.
- \$182,500 increase in expanded concurrent enrollment grants to provide “Introduction to Teaching” courses.
 - Grants under Minnesota Session Laws - 2017, 1st Special Session, Chapter 5, Article 2, Sec. 57, Subd. 9 allow school districts and charter schools to develop innovation programming to encourage high school students to pursue teaching through concurrent enrollment courses in “Introduction to Teaching.” This allows a student to take a number of college courses in education in high school, and launch their career in education. Currently 33.5 percent of Minnesota public schools students identify as people of color or American Indian.
 - Minnesota Department of Education may retain up to 5 percent of this funding for administration of the grant.
- \$2 million to create mentoring, induction and retention incentive program grants for teachers of color.
 - Create grants to provide for teacher mentoring and retention for teachers of color and American Indian teachers. These funds can be used to retain teachers by paying stipends to mentor teachers, spreading best practices by creating professional learning communities focused on supporting diverse teachers, and supporting licensed and non-licensed educator participation in professional development including workshops and graduate courses.
 - Minnesota Department of Education may retain up to 5 percent of this funding for administration of the grant.
- Broaden non-traditional pathways to teacher licensure known as “Grow Your Own” grants to more school districts while requiring that grants focus on teacher candidates of color or American Indian teacher candidates.
 - “Grow Your Own” grants under Minnesota Session Laws - 2017, 1st Special Session, Chapter 5, Article 2, Sec. 57, Subd. 23 allow school districts with more than 30 percent students of color or American Indians students to apply for grants to fund a Professional Educator Licensing and Standards Board-approved nonconventional teacher residency pilot program. Many school districts with a higher concentration of white students have been launching innovative programs in the area of nonconventional teacher residency programs. The Governor recommends removing this limitation, while requiring that a majority of the teacher candidates in the nonconventional program identify as teacher candidates of color or American Indian. This allows more school districts to take part in these programs, while ensuring the goal of launching more people of color or American Indian people in the field of teaching.

Equity and Inclusion:

This proposal is focused on expanding supports to low income student teachers and teachers of color and American Indian teachers. This will benefit the teacher candidates or teachers, as well as the students they will encounter in the classroom. Students that have a teacher from their background are more likely to graduate and feel that the adults in their school care about them.

Having a review of students’ access to effective teachers that reflect the diversity of the student body is required to be built into school districts’ World’s Best Workforce plans.

Results:

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Percent licensed teachers of color/American Indian teachers working in their field	4.23%	4.3%	2015, 2018

Statutory Change(s):

M.S. 124D.09, subdivision 10; M.S. 136A.1275; Minnesota Session Laws - 2017, 1st Special Session, Chapter 5, Article 2, Sec. 57, Subd. 23

Office of Higher Education (OHE)

FY 2020-21 Biennial Budget Change Item

Change Item Title: Remove Student and Employer Connection Program

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	(\$405)	(\$405)	(\$405)	(\$405)
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	(\$405)	(\$405)	(\$405)	(\$405)
FTEs	0	0	0	0

Recommendation:

The Governor recommends eliminating \$810,000 in funding in FY2020-21 for the Student Employer Connection program. This was a new program supported by the MN Chamber of Commerce, however, the MN Chamber of Commerce Foundation and its vendor for the program have indicated in writing that they do not need the funds on a continuing basis.

Rationale/Background:

A grant of \$405,000 a year was provided to the Minnesota Chamber Foundation for the creation of a web-based app. This job and intern-seeking online tool blind matches the needs of employers located in Minnesota with the individual profiles of high school seniors and postsecondary students attending Minnesota high schools and postsecondary institutions.

Proposal:

This proposal would eliminate ongoing funding for the Student and Employer Connection Program at the request of the MN Chamber of Commerce Foundation, who have indicated in writing that they no longer require funding for this program.

Program: Student Financial Aid Services
<http://www.ohe.state.mn.us/>
AT A GLANCE

- Provided a total of \$185.5 million in need-based financial assistance to 81,023 Minnesota students in FY2017 through the Minnesota State Grant program.
- Administered state financial aid programs with a total of 7.0 full-time employees.

PURPOSE & CONTEXT

The Office of Higher Education's Student Financial Aid Services support the state's strategy to keep education affordable and accessible for all Minnesota residents. These programs support the Minnesota Dashboard's goals of:

- A thriving economy that encourages business growth and employment opportunities
- Minnesotans have the education and skills needed to achieve their goals

Student financial aid programs enable students to access and choose the postsecondary institution and training provider that best meets their educational needs, regardless of their financial circumstances.

SERVICES PROVIDED

The Student Financial Aid Services division administers several programs that support students pursuing postsecondary education and training. The division also serves student loan borrowers serving Minnesota in particular occupations. Additionally, the division administers several grants that go to a variety of external organizations instead of directly to students. As a result, it is not always possible to determine the number of students that directly benefit from the grant. In the Table below, data is only provided in the student column if the grant goes directly to students.

<i>Program</i>	<i>Year</i>	<i>Students</i>	<i>Expenditures</i>	<i>Description</i>
MN State Grant	FY2017	81,023	\$185.5 million	Need-based grant to MN residents attending MN colleges
Interstate Tuition Reciprocity	FY2017	28,370	\$ 5.5 million	Waives non-resident tuition rates for MN residents attending public colleges in reciprocity states
State Work Study	FY2017	9,642	\$14.3 million	Funds allocated to MN colleges to pay 75% of wages for student employment on or off campus
Postsecondary Child Care Grant	FY2017	1,693	\$6.0 million	Need-based grants to student parents using child care services while attending college
MN Indian Scholarship	FY2018	845	\$2.75 million	Need-based scholarships to MN resident students who have at least one-quarter American Indian ancestry
United Family Practice & HCMC Family Medical Residency Program	FY2018	-	\$1.146 million	Financial support for family practice training programs

Program	Year	Students	Expenditures	Description
Tribal College Supplemental Grants	FY2018	-	134,249	Direct financial support to tribal colleges in MN to support the cost of educating non-tribal members
Safety Officers Survivor's Grant	FY2017	10	\$78,952	Non-need-based college grants to survivors of MN public safety officers killed in the line of duty
Teacher Candidate Grant	FY2018	486	\$3.212 million	Grants to eligible students completing required student teaching experiences. Awards prioritized for teacher candidates in shortage areas and teacher candidates who belong to racial or ethnic groups underrepresented in the MN teacher workforce.
Various State Loan Repayment Programs	FY2018	885	\$1.233 million	Teacher Shortage Loan Repayment (835 teachers and \$833,307), Agricultural Educator Loan Repayment (Awards begin in FY2019), Aviation Degree Loan Repayment (Awards begin in FY2019), LRAP of MN (45 attorneys and \$25,000), Large Animal Vet Loan Forgiveness (5 Vets and \$375,000)
Federal John R. Justice Student Loan Repayment	FY2018	-	\$37,436	Federal grant funds used for student loan repayment assistance to public defenders and prosecutors
PIPELINE Dual Training Grants	FY2018	-	\$1.064 million	Grants to employers to train employees through dual training programs in identified occupations in the advanced manufacturing, health care services, information technology, and agriculture industries
Grants for Students with Intellectual and Developmental Disabilities	FY2018	-	\$0	Financial assistance to students with intellectual and development disabilities who attend Comprehensive Transition & Postsecondary (CTP) programs at eligible Minnesota postsecondary institutions. Program to begin making awards in FY2019.
Minnesota Life College (Now named Minnesota Independence College & Community)	FY2018	49	\$1 million	Grant to Minnesota Independence College & Community (formerly Minnesota Life College) to provide need-based scholarships and tuition reduction for their participants

Program	Year	Students	Expenditures	Description
Minnesota 529 College Savings Program	FY2018 (As of 3/31/2018)	67,625 Active Accounts 38,498 Account Holders	\$1.386 million in assets	A tax-advantaged 529 college savings plan to help families save for higher education tuition and expenses. The Plan is administered by the Office of Higher Education and State Board of Investment (SBI). There is no state appropriation.

RESULTS

Student Financial Aid Services evaluates the outcomes of its strategies and services by determining their impact on student access to -and choice of- higher education institutions by:

1. Assessing the average net price students and families pay for postsecondary attendance and its relation to family income
2. Monitoring the median cumulative student loan debt of bachelor's degree completers at Minnesota four-year public and private campuses to determine if cumulative debt amounts are stable and monthly loan payments are reasonable
3. Tracking the percentage of students who take out student loans to attend college
4. Comparing the percentage of Minnesota State Grant recipients who attend the various sectors in Minnesota with nationwide averages to determine if the program continues to support student choice

1. Average Net Price in Minnesota

The State Grant program and the Federal Pell Grant program are important drivers of net price (gross price minus grants and scholarships) because they are the major form of grants for college students in Minnesota. Over the past six years, average net price of postsecondary institutions has been relatively stable in Minnesota, which is some indication that grants and scholarships are keeping pace with increasing college costs. For first-time, full-time undergraduates with family incomes below \$75,000 at Minnesota postsecondary institutions, the average net price decreased to \$13,988 during the 2015-2016 academic year.

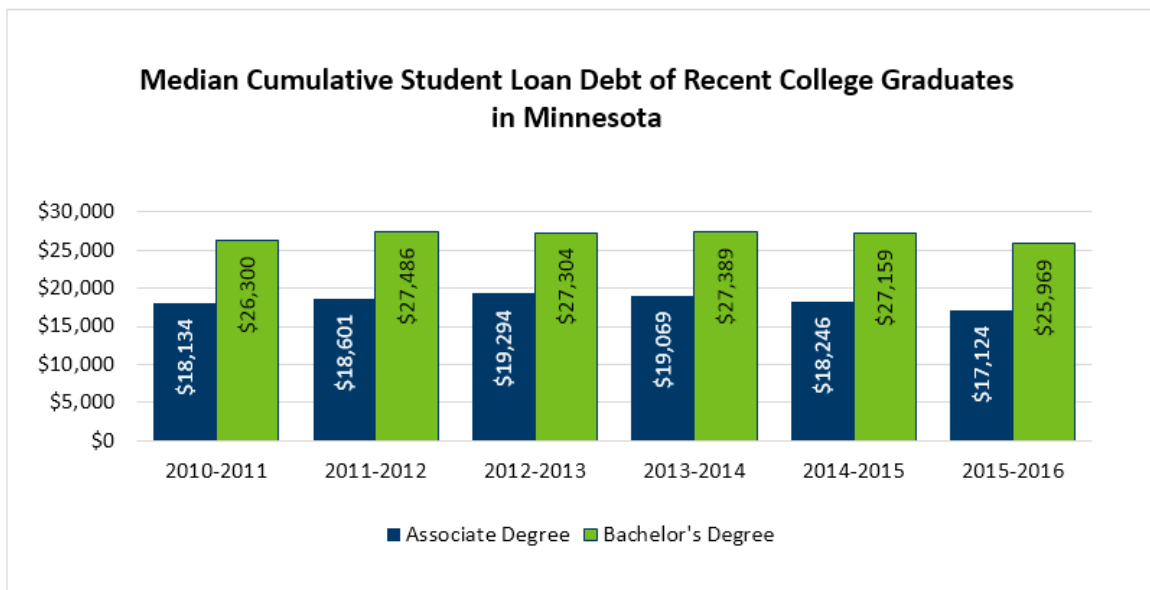

Source: Office of Higher Education Analysis of U.S. Department of Education IPEDS Data, 2018.

2. Median Cumulative Student Debt & Percentage of Students Borrowing in Minnesota

State financial aid programs help reduce the cumulative amount students must borrow to cover educational costs. Median student loan debt in Minnesota has been stable over the past five years. Students who graduated from Minnesota four-year public and private institutions had median student loan debt of \$25,969 in 2016 and associate degree recipients had a median student loan debt of \$17,124 in 2016.

Affordability of future student loan payments is also an important measure, since some students may opt out of postsecondary education or attend less expensive institutions to avoid an unmanageable debt load. Monthly payments on Minnesota's median cumulative loan debt of \$25,969 for Bachelor's degree completers would be approximately \$173-\$299 depending on the repayment plan chosen. The corresponding payment amount for associate degree completers would be \$114-\$197. Neither amount exceeds eight percent of gross monthly salaries for degree-completers in Minnesota, which is the Consumer Financial Protection Bureau's measure of an affordable loan payment.

The percentage of Minnesota four-year college graduates with student loans has also been declining slightly over the past four years, from 72 percent of Bachelors' degree graduates borrowing during 2012 to 69 percent in 2016, and 72 percent for associate degree recipients borrowing in 2012 to 65 percent in 2016.

Source: Minnesota Office of Higher Education, 2017.

3. Enrollment at Private Postsecondary Education Institutions in Minnesota

Minnesota's undergraduate students continue to attend in-state private institutions at a higher rate (28 percent) than the national average (22 percent). The percentage of students enrolled at private institutions in Minnesota has decreased over the most recent six years from its peak of 30% in Fall 2010, which corresponds to recent closures of several private for-profit institutions and declining enrollments in all higher education institutions.

Program: State Supplemental Loans

<http://www.selfloan.state.mn.us/> and <http://www.selfrefi.state.mn.us/>

AT A GLANCE

- Over 50,000 borrowers currently have loans through the SELF program, which offers low-interest loans for Minnesota residents or students enrolled at a Minnesota school, and owe nearly \$500 million.
- Over 900 borrowers currently have loans through the SELF Refi program, a low-interest student loan refinance program available to Minnesota residents, and owe nearly \$25 million.
- There is a \$100 million cap on the SELF Refi program.
- Seven full time employees work on the SELF and SELF Refi programs.

PURPOSE & CONTEXT

The Office of Higher Education offers the Student Educational Loan Fund (SELF) program to help finance postsecondary education with low-interest loans. The SELF program contributes to the agency's mission by supporting students in earning a higher education credential by providing loan funds to attend college. SELF Loans are not limited to people with certain income levels. Students are eligible as long as they meet minimum program requirements and have a cosigner.

The SELF Refi program is available to help Minnesota residents refinance their student loans by offering low interest rates and favorable repayment terms. A wide variety of people are able to use the loan as long as they meet program eligibility requirements.

SERVICES PROVIDED**SELF Program**

The SELF program provides loans to students and families to help pay for college. The SELF Loan is available to Minnesota residents attending a participating college nationwide, or a Minnesota resident or nonresident attending a college in Minnesota. The program provides money to students to cover the cost of attending college beyond what is available through scholarship and grant money. Students can choose either a fixed or variable rate. SELF interest rates as of August 1, 2018 are: 4.3% variable and 6.0% fixed.

Current activities of the SELF program:

- The Agency is in the process of proposing amendments to the Administrative Rules governing the SELF program. The proposed amendments are intended to provide more flexibility to respond to the needs of borrowers and co-signers, reduce default risk, and align statute and rule language.
- In 2016, the Agency hired an in-house attorney with delegated authority to assist with the collection of defaulted loans. This action has improved collection on defaulted loans and the goal is to eliminate the use of private collection agencies in 2019.

SELF Refi

The SELF Refi program provides loans to help Minnesota residents refinance their postsecondary education debt. The SELF Refi Loan is available to Minnesota residents who have earned a credential, are currently employed, meet credit and debt-to-income requirements, and have at least \$10,000 in qualified education loans to refinance. There is also an option for a co-signed loan if the borrower does not qualify individually but meets minimum credit and debt-to-income requirements with a co-signer. The maximum SELF Refi loan is \$70,000. There are six different loan options based on loan term and type of interest rate. Rates range from 4.25% to

6.75% as of August 1, 2018. The debt-to-income ratio of the borrower and co-signer (if needed) determine which of the six options the borrower can select from. Current activities of the SELF Refi program:

- Various enhancements to the program are under consideration. Loan volume has declined since the launch of the program. The Agency is considering changes that would increase the number of Minnesota residents who can benefit from the program without a significant increase in the risk of default. The Agency has been moving cautiously with changes since it can take years to see trends in defaulted loans.

RESULTS

SELF Program

Source: Office of Higher Education

Quantity:

The number of SELF Loans and total dollars given to students was decreasing between 2009 and 2015; however, loan volume has been relatively stable the last three years. There are two primary reasons for the decrease:

- Loan volume increased in fiscal year 2016 as a result of increasing the loan limit from \$10,000 to \$20,000 for students enrolled in 4-year or graduate programs. Since the increase, the volume has remained stable.
- The federal government passed a law in 2008, which greatly restricts the ability of colleges to give students information about non-federal loans. Before this law was in place, colleges could give students information about the SELF Loan and the low interest rates available.
- The amount students could borrow through the SELF program was not keeping up with the cost of going to college. This means students borrow from private banks or other financial sources in order to get all the money they need from one place, even though it may cost them more in interest and fees.

Quality:

Gross defaults represent the loan balance at the time of default. The amount owed after payments have been made on the defaulted loans is the net default. Both the gross and net default rates for SELF loans are fairly low in comparison to other private loan programs.

SELF Loan Program Default Rates as of 2017

Source: Minnesota Office of Higher Education

Result:

We effectively collect money owed on defaulted loans resulting in net default rates of less than 3%. Low default rates help keep interest rates low for students, since people not repaying their loans is a program expense.

SELF Refi

Quantity:

The legislature limited the SELF Refi program to a maximum amount of \$100 million in loans outstanding. Currently, borrowers owe \$25 million dollars.

Quality:

The SELF Refi program provides a low-cost option to Minnesota residents who are looking to refinance their student loans to better manage their student debt by changing the interest rate, the interest rate type and/or the repayment term. Consumers can compare the SELF Refi rates to other refinancing products available through the federal government, other states, or private lenders to determine whether the SELF Refi Loan is beneficial for them.

Result:

The program is relatively new (2016) and will continue to be evaluated for its effectiveness and future enhancements. Loan volume will be evaluated annually.

M.S. 136A.1701 (<https://www.revisor.mn.gov/statutes/?id=136A.1701>) provides the legal authority for the SELF program.

M.S. 136A.1704 (<https://www.revisor.mn.gov/statutes/?id=136A.1704>) provides the legal authority for the SELF program.

Program: Research, Policy, and Analysis

<http://www.ohe.mn.us/>

AT A GLANCE

- Provides research and analysis on postsecondary education for the Governor, the Minnesota Legislature, and the people of the State of Minnesota.
- Awarded \$748,000 in external grant funds in FY2017 for cross-agency collaborative projects.
- \$3,340,000 appropriated for diverse grant programs, ranging from Spinal Cord & Traumatic Brain Injury Grants to Concurrent Enrollment Grants in FY2018.

PURPOSE & CONTEXT

The Research, Policy and Analysis Division provides credible, politically neutral, research-based data, information and analysis on higher education. Research products are used to operate programs, develop and inform policies, and provide assistance to individuals, colleges, communities, and the state.

SERVICES PROVIDED

- Provides credible and timely analysis of state higher education enrollment, completions, and funding, including: college preparation and access, financing of higher education (student & state), student outcomes (credentials, debt, employment), and system/institutional performance.
- Leverages data and analysis to guide planning, administering and budgeting for Minnesota's state financial aid programs (e.g. Minnesota State Grant, Tuition Reciprocity).
- Serves as the lead agency for the Statewide Longitudinal Education Data System (SLEDs), which uses early childhood through postsecondary and workforce data to identify the most viable pathways for individuals to achieve successful outcomes in education and work. SLEDs data informs education and workforce policy and practice in Minnesota. SLEDs provides reports and data to high schools and colleges to inform planning and improvement at the local level.
- Engages in cross-agency, philanthropic and non-profit collaboration to broaden data and information available to Minnesotans.
- Manages collection of student enrollment and completion records from over 100 postsecondary education institutions operating in Minnesota.
- Develops and runs several grant programs created by the Minnesota Legislature (Equity in Attainment and Job Connection Grants, Spinal Cord & Traumatic Brain Injury Research Grants, and Concurrent Enrollment Grants).

Program: Postsecondary Access and Outreach

<http://www.minitex.umn.edu/> and <http://www.getready.state.mn.us/>

AT A GLANCE

- **Get Ready Program:** \$3.46M/year Federal grant, 20 FTEs. Programming associated with the recently renewed federal grant launches in September 2018. An estimated 47,000 students from low-income background and communities of color will receive services during the seven-year grant cycle.
- **Intervention for College Attendance Program (ICAP):** \$671,000/year in funding serving 3,760 students in grades six through 12, as well as postsecondary students.
- Over 60 million searches in the Electronic Library for Minnesota (**ELM**) in FY2018.
- **College Possible:** \$250,000/year in funding serving 7,362 high school and postsecondary students.
- **Minitex Resource Sharing** processed almost 355,000 requests.
- Receiving \$125,000/year, **Summer Academic Enrichment Program (SAEP)** provided awards to 899 students in summer 2017.
- **Student Parent Outreach:** The Summer Nudging program reached over 4,700 students this year. The program works in partnership with Minnesota State University Mankato, Anoka Technical College, Bemidji State University, Minnesota State University Moorhead, and Fond du lac Tribal and Community College.
- Users launched 60,608 sessions and viewed over 179,000 digital objects related to MN history and culture using **Minnesota Reflections**.
- **Campus Sexual Violence Prevention and Response Program:** \$175,000/year in funding to serve as a resource to postsecondary institutions to prevent and respond to sexual violence.

PURPOSE & CONTEXT

The Agency is charged in statute with reaching students from grades K-12 through adulthood with information about preparing and paying for college and postsecondary options. OHE outreach and access programs include Get Ready, the Intervention for College Awareness Program, Campus Sexual Violence Prevention and Response Program, Summer Academic Enrichment Program, College Possible, Minnesota Education Equity Partnership (MnEEP), and other programs such as MNLink/Minetex, Student Parent Outreach, and a Student Employer Connection Information System.

Get Ready, which receives federally funding through GEAR UP a grant, and \$180,000 annually in state funding, aims to increase the number of students from low-income backgrounds and communities of color who are graduating from high school, participating in postsecondary education, and successfully transitioning into a career pathway. The program builds high-need middle and high schools' capacity to deliver postsecondary readiness programming to students and their families, effectively utilize data to drive continuous improvement, and make the systemic changes necessary to sustain a culture of college-going.

The Intervention for College Attendance Program provides competitive grants to postsecondary institutions, professional organizations, community-based organizations, or other service providers to strengthen student preparation and aptitude for postsecondary success.

The Summer Academic Enrichment Program provides funding of up to \$1,000 per participant for students in grades three through 11 to attend an academically-enriched summer program.

The mission of Minitex services, including MNLINK and the ELM (Electronic Library for Minnesota), is to provide statewide support functions to assist academic, public, state government, school and special libraries. Minitex is an information and resource sharing program of the Minnesota Office of Higher Education and the University of Minnesota Libraries. It leverages the resources from 2,200 participating institutions to provide direct benefits to students, educators, library staff, and the general public. It reduces costs for local libraries and reaches residents in every community in the state, providing access to information, educational resources, and ebooks throughout Greater Minnesota, leveling the playing field for those with less access to quality resources.

The Campus Sexual Violence Prevention and Response Program provides technical assistance and content expertise to campuses throughout Minnesota on sexual violence prevention and response. The program also creates and facilitates a network of practitioners in Minnesota that do sexual violence prevention and response work. Additionally, resources and tools are created and shared with campuses as well as the general public around campus sexual violence.

The Student Parent Outreach initiatives provide a range of services from publishing information and conducting presentations on postsecondary access and finance to launching a Summer Nudging program designed to help college-bound students successfully enter into college in the immediate fall following high school graduation (preventing "summer melt") by sending weekly text messages, or "nudges." Data shows that one in five college bound students fail to matriculate in the fall following high school graduation. The Summer Nudging program reached over 1,800 students at 300 high schools in Minnesota last year

SERVICES PROVIDED

Get Ready employs a comprehensive approach, serving 6th-12th grade students, their families, and the educators that support their learning. The following represent Get Ready's core interventions:

- *Postsecondary Pathways Curriculum:* Get Ready's research-based, student-led exploration of personal and social identity, individual skills and interests, learning techniques for academic success, career choices, and options for extending the education process beyond high school. Students receive 25 lessons per year.
- *Postsecondary Pathways Counseling:* Students receive one-on-one and small group assistance with academic planning, goal setting, exploring college and career options, financing a postsecondary education, and completing the college application process.
- *Postsecondary Pathways Field Experiences:* Students participate in college visits, job shadowing, internships, service learning, and academic enrichment activities offered in collaboration with Get Ready's community partners.
- *Parent Empowerment Initiatives:* Parents receive the necessary information, tools, and strategies to support their children during the postsecondary planning process via one-to-one advising, seminars, and culturally-specific workshops.
- *Professional Development for Educators:* School staff receive training and technical support related to postsecondary readiness best practices, effective data utilization, equity mindsets, leading change, and resource management.

Intervention for College Attendance Program (ICAP) - grants provide secondary and college students with the following services:

- Academic counseling, and mentoring
- Fostering and improving parental involvement in planning for and facilitating a college education
- Services for students with English as a second language
- Academic enrichment activities and tutoring
- Career awareness and exploration
- Assistance with high school course selection
- Information about college admission requirements, financial aid counseling, and orientation to college life

Minnesota Minority Education Equity Partnership (MnEEP) – OHE serves as the fiscal agent for an annual pass-through state appropriation of \$45,000 to help fund MnEEP operations and activities. MnEEP was founded to increase the success of students of color and American Indian students in Minnesota schools, colleges, and universities. MnEEP achieves its mission by researching race equity in Minnesota education and fostering collaborative efforts between students, parents, and educators to better align the Minnesota education system with communities of color.

College Possible - Twin Cities - OHE serves as the fiscal agent for a \$250,000 annual pass-through state appropriation. College Possible's mission is to help capable low-income students become college graduates.

MNLINK - the online discovery and interlibrary loan portal for libraries, provides access to materials across the region. MNLINK provides 24/7 access to request books, articles, media and other physical or online resources.

- ELM, the Electronic Library for Minnesota, is an electronic collection of research and information databases that Minnesotans can access 24/7. Schools and libraries can directly link to ELM at no charge.

Minitex - provides overnight delivery of physical materials to participating libraries, including delivery to the state's residents from the University of Minnesota's library collections.

- Through Resource Sharing, 350,000 interlibrary loan requests were processed, 75,000 articles were delivered directly to patrons online, and approximately 121,650 physical and electronic delivery requests from the University of Minnesota's library were filled.
- Over 265,000 items from Minnesota's history and culture are findable and preserved through the Minnesota Digital Library's primary service, Minnesota Reflections. This service has helped 180 libraries, museums, historical societies, and other Minnesota organizations digitize their collections and host them online and share the objects with the Digital Public Library of America.
- The newest service is Ebooks Minnesota, a collection of ebooks for academic, public, and school libraries. The collection launched with over 2,500 titles in February 2016, and since then, 27,000 state residents have read 36,000 titles.
- Through AskMN, online reference librarians answer students' and professors' questions and help them locate educational materials.
- Group discounts are negotiated for online databases, information resources, library supplies, and training opportunities.
- Professional education opportunities are provided for library staff, K12 school students, and the general public.
- Minnesota Library Access Center (MLAC) is a long-term, underground storage facility and makes 1.5 million volumes from 21 libraries available upon request. To date it has circulated 16,942 volumes.

The Campus Sexual Violence Prevention and Response program serves as a resource to all postsecondary institutions in Minnesota providing professional development and trainings, guidance on best practices, hosting community listening sessions, and providing materials to institutions. The program also provides guidance for fulfilling the requirements delineated in the Postsecondary Education Sexual Harassment and Violence Policy (Minnesota Statute 135A.15) as well as oversees the statewide campus sexual assault reporting required under Minnesota Statutes 135A.15.

A grant of \$405,000 a year was provided to the Minnesota Chamber Foundation for the creation of a web-based app. This job and intern-seeking online tool blind matches the needs of employers located in Minnesota with the individual profiles of high school seniors and postsecondary students attending Minnesota high schools and postsecondary institutions. It was named the **Student and Employer Connection Information System**.

RESULTS

GET READY Direct Service Indicators

Program: OHE Administration

School Licensure & Registration www.ohe.state.mn.us/mPg.cfm?pageID=197

Financial Reports <http://www.ohe.state.mn.us/investors/financialStatements.cfm>

Publications <http://www.ohe.state.mn.us/sPages/pubsGR.cfm>

AT A GLANCE

- Support the operation of seven financial aid programs.
- Provide leadership, supervision and support functions for 64 full-time employee staff.
- Provide information through websites and publications on higher education and college planning.
- Register higher education providers to operate in Minnesota.

PURPOSE & CONTEXT

Administrative services provide management, leadership, and administrative support to further the Agency's mission to advance the promise of higher education to all Minnesotans and provide critical information to make higher education decisions.

Primary customers include: students, postsecondary institutions, the Governor's Office, legislators, Minnesota Management and Budget, vendors, media and our internal staff.

SERVICES PROVIDED

- The Commissioner advises the Governor on higher education policy and works closely with the legislature to develop postsecondary education policies. The Deputy Commissioner oversees our day-to-day operations.
- Financial Services provides accounting, auditing, budgeting, and purchasing services as well as revenue bond management.
- Regulatory Services protects consumers by licensing and registering private degree and non-degree institutions to:
 - Ensure that schools operating in MN, or providing education to Minnesotans, meet quality standards
 - Monitor school compliance to MN statutes and degree standards
 - Provide information and assist students to resolve disputes with schools
 - Consumer complaints are accepted, reviewed and investigated by the Student Consumer Advocate
 - When necessary our office will assist a school with revision of programs, or the closing of an entire school
- Human Resources ensures that we have qualified staff to operate programs and provide services.
- Communications and Outreach convey information about preparing, choosing and paying for college to thousands of students each year, through web sites, publications, presentations and social media. The Summer Nudging program, which helps first-year college students prepare for their freshmen year, has nearly quadrupled since last year, and new collaborative efforts between OHE and the Get Ready grant program are maximizing federal funds to reach more students. Communications handles proactive and reactive media relations and serves as the public relations arm of the agency.
- The Midwest Higher Education Compact (MHEC) is a statutorily created interstate compact whose core functions are cost savings, student access and success, policy research and analysis. They operate the State Authorization Reciprocity Agreement (SARA) for institutions offering online instruction. OHE receives an annual appropriation of \$115,000 for payment of membership dues to the MHEC.

Minnesota Statute 136A.01 provides the legal authority for OHE’s Administration Services (<https://www.revisor.mn.gov/statutes/?id=136A.01>)

Minnesota Statute 136A.658 authorize OHE to enter into reciprocity agreements and to exempt participating out-of-state institutions from the Minnesota Private and Out-of-State Public Postsecondary Education Act.

Minnesota Statutes 136A.61 to 136A.71 – Minnesota Private and Out-of-State Public Postsecondary Education Act provides the legal authority for the registration of private degree granting institutions in Minnesota, out-of-state private institutions and out-of-state public institutions that provide classes, programs or degrees to Minnesota residents. This includes programs offered by distance education/online institutions.

Minnesota Statutes 136A.82 to 136A.834 – Minnesota Private Career School Act provides the legal authority for the Licensure of non-degree- granting private career schools in Minnesota.

Minnesota Statutes 136A.171 to 136A.187 provides the legal authority for the issuance of student loan revenue bonds.

Narrative

1. GEAR UP is a discretionary grant program that is designed to increase the number of low-income students who are prepared to enter and succeed in postsecondary education. The program achieves this by delivering college and career readiness programming directly to students and families, engaging in targeted community outreach, and creating systemic change within its partner schools. Minnesota received its fourth 6-year GEAR UP grant beginning with FY2019.

2. The Improving Teacher Quality Program, Title II, Part A of the No Child Left Behind Act, supports competitive grants to postsecondary institutions to increase K-12 student academic achievement through improving the effectiveness of classroom instruction. Grants support sustained high-quality professional development for teachers in mathematics, science, history, geography, civics/government, and economics. The program was not a part of the reauthorization of the Elementary and Secondary Education act and funding ends September 30, 2018.
3. John R. Justice (JRJ) Grant Program provides loan repayment assistance for public defenders and prosecutors who commit to continued employment as public defenders and prosecutors. The program intends to encourage lawyers to pursue public service careers and retain them as prosecutors and public defenders. Minnesota received its first JRJ award in Federal Fiscal Year 2010.

AT A GLANCE

- The Minnesota Historical Society (MNHS) preserves and provides access to Minnesota's past
- We serve more than 1,000,000 in-person customers each year, including visitors to historic sites and the History Center Museum and Library
- We host 4,700,000 visits each year to our award-winning website
- We preserve more than 1,000,000 items in the collection:
 - 340,313 photographs
 - 500,650 publications
 - 6,431 works of art
 - 251,372 objects
 - 50,100 cubic feet of manuscripts
 - 60,000 cubic feet in State Archives, plus 60 terabytes of digital records

PURPOSE

Created in 1849 by the Minnesota Territorial Legislature, the Minnesota Historical Society (MNHS) serves as the repository of state archival, documentary, photographic, archaeological, and museum collections, and as a center for research. MNHS also preserves and operates the historic sites network, consisting of 26 sites throughout the state. As an educational organization, we use our collections and sites to engage, inform, and inspire the people of Minnesota. These efforts, as well as MNHS' partnerships in heritage preservation, support the MNHS mission: **Using the Power of History to Transform Lives: Preserving > Sharing > Connecting.**

By telling the stories of our state's past, our goal is to create community for all Minnesotans, whether new arrivals or citizens whose families have been in Minnesota for generations. We support the goal of having a well-informed citizenry that understands how people and events of the past have shaped the Minnesota of today.

MNHS contributes to the fulfillment of the following statewide outcome goals:

- **Minnesotans have the education and skills needed to achieve their goals**
- **A thriving economy that encourages business growth and employment opportunities**
- **A clean, healthy environment with sustainable uses of natural resources**
- **Strong and stable families and communities**
- **Efficient and accountable government services**

BUDGET

Approximately two thirds of our funding comes from the State of Minnesota. We deliver functions designated by law, such as preserving historic landmarks and resources, managing critical records and collections, and operating cultural destinations important to tourism. State support also includes capital funding to preserve historic buildings and construct new ones, as well as Legacy Amendment (Arts and Cultural Heritage Fund) support for new statewide history programs, including grants for local history organizations.

MNHS supplements state appropriations through private fundraising and earned revenue. Gifts from donors and members support everything from general operations and school field trips to important acquisitions, conservation work, and community outreach. Endowment funds give MNHS strength for today and tomorrow. Earned revenue from rental events, museum stores, admission fees, publication sales, and many other activities also provide a base of funding while keeping history accessible and at family-friendly prices.

Spending by Category

FY 17 Actual

Source: MNHS Audited Financial Statements

Historical Spending

Source: MNHS Audited Financial Statements;

Note: "Other Funds" includes earned revenue such as admissions, fees, retail sales, memberships, and other donations. These funds do not pass through the state's treasury, as they are managed by MNHS

STRATEGIES

- Collect and preserve Minnesota's cultural heritage
- Maintain and operate a network of historic sites and museums across the state to reach Minnesotans and visitors in order to share history where it happened
- Provide resources and training for teachers, and support and inspire students through participation in programs like National History Day
- Engage with diverse communities throughout Minnesota and reflect the diversity of Minnesotans in MNHS collections, programs, staffing, and governance
- Advance new efforts to collect and preserve digital materials that document the state's history and culture
- Serve as a customer-oriented and accessible repository of state archival, documentary, photographic, archaeological, and museum collections

Recommendation:

The Governor recommends additional funding of \$450 thousand in FY 2020 and \$1 million each year thereafter to maintain the current level of service delivery at the Minnesota Historical Society.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related cost increases. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

The Minnesota Historical Society (MNHS) generates revenue from other sources in addition to state funding. State general funds support approximately 44% of the total salary and benefit costs for MNHS. Other funds – earned revenue, contributions and memberships – are expected to increase to support the remaining 56% of salary and benefits cost.

- When salary and benefit costs increase without a commensurate increase in funding, those costs are absorbed through reductions in staffing levels, and therefore, programs and services delivered to the public.
- State funding supports Library/Archives/Collections, Statewide Outreach activities, Historic Sites and Museums, educational programs for students and life-long learners, as well as the shared services within MNHS.
- MNHS faces challenging decisions to fund salary increases within existing resources. Cost growth typically outstrips the ability to absorb increases through efficiencies, which makes it difficult for MNHS to sustain current service levels and provide quality programs and exhibits to its diverse constituents.
- In addition to salary increases, employer-paid health care contributions and pension contributions have increased since the previous biennium. According to Minnesota Management and Budget (MMB) projections, employer-paid health care contributions are projected to increase by 2.99% and 5.63% effective January 2019 and 2020, respectively. Employer-paid pension contributions increased as a result of 2018 pension reform legislation, in which MNHS did not receive a funding increase to pay for these liabilities.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the MNHS, this funding will cover known employee compensation growth and pension costs and will allow MNHS to continue to provide current levels of service and information to the public.

Equity and Inclusion:

Funding for compensation will allow MNHS to be competitive as it seeks to hire and retain talented employees, particularly in high demand areas, as well as increase the diversity of its workforce.

IT Related Proposals:

N/A

Results:

Long-term trends and experience have shown that reduced levels of service result in reduced visitation and, in turn, reduced revenue levels. In contrast, more recent experience with enhanced funding levels has shown that support for infrastructure has helped to maintain visitation and revenue levels.

Program: Fiscal Agent / Pass-through**AT A GLANCE**

- Fiscal agent / Pass-through appropriations for various cultural organizations are processed by the Minnesota Historical Society at the request of the Minnesota legislature. Descriptions of project activities are provided by recipient organizations.

PURPOSE & CONTEXT

At the request of the Minnesota Legislature, the Minnesota Historical Society handles funds for legislatively-designated appropriations to a number of cultural organizations. These appropriations are not part of the MNHS operating budget.

SERVICES PROVIDED

MNHS disburses funds, as requested by the Legislature, to the following organizations:

Global Minnesota

Global Minnesota (formerly Minnesota International Center) connects individuals, organizations, and communities to the world. Through unique programs, Global Minnesota informs with relevant and timely information on international issues, foreign policy, and cultural topics and provides space and opportunities for Minnesotans to engage and discuss. A nonpartisan, nonprofit organization for nearly 65 years, Global Minnesota delivers programs that allow audiences to participate in international settings and for Minnesota to extend its influence around the globe, including 60 statewide foreign policy discussion groups, more than 30 global-themed public forums, and visits from nearly 400 international professionals through the U.S. Department of State.

Minnesota Air Guard Museum

The Minnesota Air Guard Museum serves as a community resource for the preservation of Minnesota's rich aviation history, especially its military history. The Museum offers activities and education for all ages. The private, nonprofit Minnesota Air National Guard Historical Foundation has the funding responsibility for the museum. The museum is located on the Minnesota Air National Guard Base at the Minneapolis/St. Paul International Airport. Currently 21 aircraft are displayed in an air park next to the museum.

The principal sources of financial support for the museum are: 1) the \$16,000 state biennial grant; 2) membership dues from approximately 500 members, and donations from museum visitors, tour groups, and organizations that hold events at the museum; and 3) private gifts and other grants.

US Hockey Hall of Fame

The United States Hockey Hall of Fame Museum is America's hockey showcase. Since 1973, the Hall has honored and recognized outstanding coaches, players, builders and administrators who have contributed to the success and promotion of American Hockey. Visitors to the United States Hockey Hall of Fame Museum can experience the thrilling game action and inspiring achievements via physical displays, exhibits, video, theater, and memorabilia.

Eveleth, Minnesota has been designated "The Capital of American Hockey," and is known as the home of the United States Hockey Hall of Fame Museum because of its rich hockey traditions. Furthermore, the Iron Range and Minnesota in general have had significant impact on US Hockey.

Minnesota Military Museum

The Minnesota Military Museum, located at Camp Ripley, is the primary outreach effort of the Military Historical Society of Minnesota Inc., a 501c 3 educational organization with a mission to "be Minnesota's premier educational resource on military history and conflict resolution through exhibits and outreach efforts." The museum assists the Minnesota Historical Society as a resource to history organizations across the state and averages 15,000 visitors a year including, 65 school and group tours.

The Museum is supported by the largest military-themed library in the state, a 500 cubic foot archival collection, and over 100,000 artifacts representing all branches of the military from Minnesota's early years to the present. State support is essential as the museum receives no operational funding from the federal government, the military, or local government. The organization raises roughly 70 percent of its operating revenue, primarily from museum store sales, small grants, and contributions from individuals, organizations, and businesses.

Minnesota Agricultural Interpretive Center (MAIC) also known as Farmamerica

The governor and Minnesota state legislature commissioned the Minnesota Agricultural Interpretive Center (MAIC) in 1978 to preserve and promote the rich rural agricultural heritage of the state and its people. MAIC is a not-for-profit educational institution administered by a 15-member volunteer board of directors. The vision of the MAIC is to be the destination and primary resource where people and organizations can experience and learn about the history and the future of Minnesota Agriculture. The mission of the Minnesota Agricultural Interpretive Center is to create opportunities for children and adults to learn about Minnesota's agricultural and environmental systems and how these systems provide food, fiber and energy for the people of Minnesota and the world. MAIC maintains a 360-acre interpretive site and facilities located four miles west of Waseca.

At MAIC, the story of agriculture is being told through guided tours, hands-on learning experiences, festivals, and exhibitions. Visitors travel on a one-mile timeline road and become involved in activities as they move through the Prairie Interpretive Center, the pond/marsh, and to the settlement farm of the 1850s. The handicapped accessible walkway continues past the one-room schoolhouse, the country church, the 1920/1930s depression-era family dairy farm, the feed mill, and the blacksmith shop and town hall. New signage is underway to inform visitors about issues of the modern era. Visitors can also stop at the Agri-Hall Museum and the 1970s farmstead. In its 38 year history, MAIC has hosted hundreds of thousands of visitors. It is not uncommon to host 20,000 people each year through the school and group tours programs, outreach activities, and festivals throughout the year.

RESULTS

The Minnesota Historical Society is responsible for disbursing funds to these five organizations, and collecting an annual report from each of the organizations, describing how funds were spent. MNHS does not receive an administrative fee for administering these funds, since, at this level of funding and with this number of organizations, minimal staffing is required.

Program: Historic Preservation (Grant-in-Lieu of Credit)

<https://mn.gov/admin/shpo/>

AT A GLANCE

- Since 2010, the state of Minnesota has partnered with the private sector to preserve some of our state's most significant historic structures.
- Minnesota's Historic Rehabilitation Tax Credit has leveraged millions of non-state dollars that have been invested in our state's economy, while preserving dozens of historic structures and creating thousands of construction jobs.
- Under the law, project developers have the option to receive either a credit or a "grant in lieu of credit."

PURPOSE & CONTEXT

For the first eight months of FY2018, the Minnesota Historical Society's State Historic Preservation Office (MNHS/SHPO) and the Minnesota Department of Revenue (DOR) administered the Historic Rehabilitation Tax Credit program to preserve Minnesota's most significant historic structures, create quality construction jobs, and encourage revitalization of our communities.

In March 2017, Governor Dayton recommended that the 2017 Legislature transfer Minnesota's State Historic Preservation Office (SHPO) from the Minnesota Historical Society to the Department of Administration. The Laws of Minnesota 2017 First Special Session, Chapter 4 included SHPO's transfer to the Department of Administration, which was made effective March 1, 2018.

This narrative and budget information describe activities of the State Historic Preservation Office in this transitional period. Additional information can also be found in the MN Department of Administration's budget pages.

SERVICES PROVIDED

Through this program, building projects that rehabilitate historic structures can receive a tax credit, or a grant in lieu of credit. The state credit parallels an existing federal historic rehabilitation tax credit, which is administered by the National Park Service. SHPO reviews state and federal tax credit projects in order to determine whether they have met historic preservation architectural standards. In order to carry out its review responsibilities for the state tax credit program, SHPO is permitted to charge a fee to help support the costs of administering the state program and the preparation of an economic impact report required by the law.

For the state program, developers are given a choice of claiming a tax credit or a grant in lieu of credit. MN Department of Revenue administers the tax credit funds, and MNHS (or SHPO/Admin, since the transfer) administers the grant in lieu of credit funds, which were previously contained in this budget program. While proportions have varied, the majority of projects have used the tax credit rather than the grant.

Actions under this budget program include administering the Historic Rehabilitation Tax Credit program, which entails reviewing proposed historic preservation projects and managing the financial activities related to the grant in lieu of credit program and fees.

Further information about the Minnesota Historic Rehabilitation Tax Credit program can be found at:

<https://mn.gov/admin/shpo/incentives/state/>

RESULTS

As required by the law, the Minnesota Historical Society, with assistance from the University of Minnesota Extension Center for Community Vitality, has prepared an annual economic impact report: "Economic Impact of Projects Leveraged by the Minnesota Historic Rehabilitation Tax Credit." It is important to note that the economic analysis is based on estimates produced at the time of preliminary approval of projects, rather than final expenditures.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of projects receiving preliminary approval	23	N/A	FY15
Quantity	Direct spending on qualifying rehab expenditures*	\$244.0 million	N/A	FY15
Results	Overall economic impact per state dollar invested	\$11.67	N/A	FY15
Results	Number of direct jobs created by program *	1,447	N/A	FY15

*Note: overall dollars spent on projects and jobs created will vary based on project size.

Program: Historic Programs and Operationswww.mnhs.org**AT A GLANCE**

- More than 1,000,000 in-person visitors to 26 sites statewide
- 4.7 million visits to our website, of which over 2.6 million are unique visitors
- Over 1,000,000 items in the collections are cared for and preserved for today's and future Minnesotans
- Provide service to 30,000 persons at History Center Library via in-person visits, telephone inquiries, classes, social media, and e-mail requests
- The Arts and Cultural Heritage Fund provided \$5.2 million through 219 grants awarded across Minnesota

PURPOSE & CONTEXT

The Historic Programs and Operations program area is the main vehicle for MNHS' efforts to preserve history and deliver history programs to Minnesotans.

We serve the State of Minnesota and all Minnesotans, educators, schoolchildren, families and life-long learners with a variety of services and products, including, but not limited to:

- State Archives – MNHS is statutorily responsible for working with state and local units of government to evaluate the historical importance of all of Minnesota's governmental records and arrange for their permanent preservation or disposal. This activity has experienced constant growth, and we continue to examine how best to handle records that are increasingly more complex and varied in their form and media format.
- Processing and conservation of materials selected for inclusion in MNHS' collections are organized, catalogued, and treated to ensure their long-term stability and usability.
- Maintenance and repair of historic sites including 152 buildings, many of which are more than 100 years old, 1,514 acres of land, and 23 miles of interpretive trails.
- *Northern Lights*, Minnesota's state social studies textbook, including an interactive digital edition, serves 57,000 students, or 80% of Minnesota's 6th graders.
- National History Day in Minnesota builds in-depth research and critical analysis skills as students research a topic related to an annual theme. Participants share their scholarship in one of five presentation categories and can enter their work into a series of competitive events. This program serves more than 25,000 students each year.
- Statewide teacher professional development programs served more than 700 participants during the 2017-2018 school year. Goals of the program include assisting teachers in meeting state academic standards, providing opportunities for teachers to deepen content knowledge, promoting the use of primary sources and multiple perspectives, and sharing MNHS' education resources.
- Historic sites, museum exhibits, and interpretive programs serve citizens statewide.

Further information about educational programs can be found at: <http://education.mnhs.org> including how MNHS programs help fulfill requirements of state-mandated academic standards for social studies.

MNHS also serves the life-long learning needs of seniors, family historians, and scholars through innovative public programs, the Gale Family Library at the Minnesota History Center, and on-line resources.

The work of MNHS fulfills several Statewide Outcomes, including:

A thriving economy that encourages business growth and economic opportunities. History and cultural tourism is a very important component of the state's \$15 billion tourism economy. Visitors to Minnesota want authentic educational experiences, which are provided by historic sites and museums.

Strong and stable families and communities. An important element that creates strong and healthy families and communities is an awareness of how we got to where we are today. MNHS provides opportunities for individuals to learn about their own family histories through genealogy resources. Citizens can become aware of the history of the larger Minnesota community through public programs, information resources such as MNopedia and outreach initiatives. <http://www.mnhs.org/genealogy/> <http://www.mnopedia.org>.

A clean, healthy environment with sustainable uses of natural resources. According to state statutes (MS 116B.02 and 116D.02) and long-time tradition, historic and cultural resources are included in the definition of natural resources. MNHS works through our Historic Sites Division, our Grants Office, our Statewide Outreach Office, the Minnesota Historic Preservation Office (now housed at the MN Department of Administration), and other areas to preserve these irreplaceable, non-renewable resources.

Efficient and accountable government services. MNHS strives to deliver efficient service to the people of Minnesota in all aspects of its work. We help Minnesotans explore their family history, preserve objects and records documenting Minnesota's past, and create quality visitor experiences at historic sites and museums.

SERVICES PROVIDED

The Minnesota Historical Society preserves, and provides access to, evidence of Minnesota's past. This work is carried out for many different audiences, using a variety of methods. History happens in the following areas:

- Exhibits and Educational Programs (students and life-long learners)
- Education Outreach (History Day and youth history programs)
- Historic Sites and Museums (26 sites statewide)
- Heritage Preservation /Field Services & Grants
- Archaeology
- MNHS Press publishing
- Collections Management and Conservation
- Reference / Library
- State Archives
- Institutional Support (including Finance, Human Resources (incl. volunteers and interns), Facilities, Marketing & Communications, Development and Information Technology)

A full listing of MNHS functions and departments can be found at: www.mnhs.org

AT A GLANCE

- Minnesota Housing provided more than \$1 billion in housing assistance, serving nearly 70,000 households
 - We hold Aa1 and AA+ credit ratings with Moody's and Standard & Poor's
 - We provided loans to more than 4,035 first-time homebuyers and assisted nearly 45,000 renters
 - We created or rehabilitated more than 2,700 units of affordable rental housing
 - We provided state rental assistance and homelessness prevention resources to over 11,200 households
- All numbers are for Federal Fiscal Year 2017*

PURPOSE

Success in life starts at home for all ages and all people. When we have safe, secure places to live, parents earn more, kids learn better, health and well-being improve, communities prosper, and we all thrive. Our homes are the foundation of our flourishing communities; they fuel the engine of our economy. Yet the affordability of homes in Minnesota, relative to our ability to pay for them, has been declining for years as rising costs for homes, transportation, health care, education and other basic goods outpace the increase in average incomes. Currently 25 percent of all Minnesotans and more than 45 percent of renters are cost-burdened, paying more than 30 percent of their income for housing. More than 7,600 households are homeless on a given night.

At Minnesota Housing we believe that housing is the foundation for success, so we collaborate with individuals, communities and partners to create, preserve and finance affordable housing. Our vision is that all Minnesotans live in a safe, stable home they can afford in a community of their choice. We finance affordable homeownership and rental housing to provide opportunities across the housing continuum for individuals and families throughout the state. We contribute to the statewide goal of **strong and stable families and communities and a thriving economy that encourages business growth and employment opportunities.**

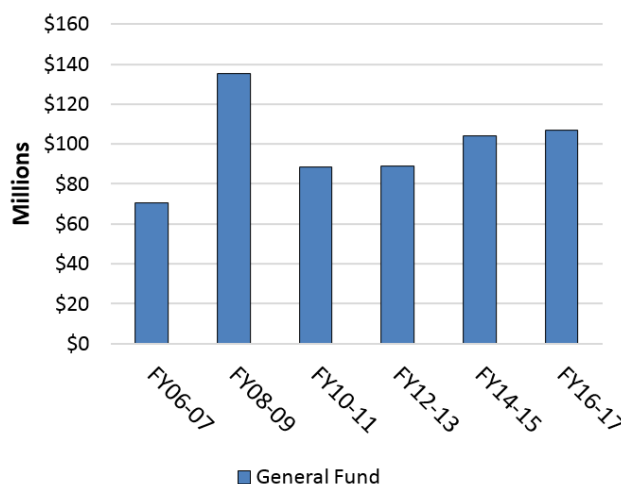

BUDGET

**State Appropriation Spending by Program
FY 17 Actual**

Source: SWIFT

Historical Spending

Source: General Fund Balance Statement

We finance our programs through a combination of bond proceeds, federal resources, state appropriations, state capital investments and agency resources. We do not rely on state appropriations to fund our operating expenses, allowing 100 percent of state appropriations to go directly to programs. We issue tax exempt and taxable debt, using the proceeds to finance loans for rental developments and provide loans to low- to moderate- income homebuyers. We pay for our operating expenses using the spread that remains from loan repayments after we have repaid our bond holders. We have an independent board of directors, which has management and control of our activities. Legally, the board is the agency. The board is comprised of six citizen members appointed by the Governor, with the state auditor as an ex-officio member. The board directs our policies and approves all funding decisions, and has monthly public meetings.

Our bond issuer ratings are AA+ and Aa1 from Standard and Poor’s Rating Services and Moody’s Investor Services, Inc. Our credit ratings are separate from and not directly dependent on ratings on debt issued by the State of Minnesota.

Minnesota Housing Funding By Source 2018

STRATEGIES

We achieve our mission by serving a wide range of Minnesotans through rental, homeownership and homelessness assistance programs. We deliver these programs through a statewide network of local lenders, community-based organizations, local housing and redevelopment authorities, and for-profit and nonprofit developers. We work with other public and private funders to make funds for housing development and redevelopment available in a comprehensive, one-stop competitive application process.

To help communities identify their housing needs, we have developed [Community Profiles](#) that provide demographic indicators in each of Minnesota’s 87 counties.

- **Affordable Rental Housing:** We finance new construction, rehabilitation and preservation of affordable rental housing using federal low income housing tax credits, state appropriations, and first mortgages. We also provide rental assistance and administer federal Section 8 contracts.
 - We served nearly 42,000 Minnesota households through our multifamily rental programs in 2017.
 - More than three-quarters of renters served made less than \$20,000 per year.
 - We funded the new construction and preservation of 2,767 units of affordable rental housing in 2017.
 - We preserved 1,715 units of federally assisted rental housing in 2017 and 3,096 in 2016. Federally-assisted rental housing includes housing with rental assistance funded by the U.S.

Department of Housing and Urban Development (HUD) and USDA Rural Development, as well as public housing.

- **Homeownership Opportunities:** We offer first-time homebuyer loans, downpayment assistance programs, a refinance program, and two home improvement loan programs to support Minnesota homebuyers and homeowners.
 - We provided home mortgage loans to 4,035 Minnesota households in 2017.
 - The homebuyers we served had a median annual household income of \$54,349.
 - Thirty-two percent of the homebuyers we served were households of color or Hispanic ethnicity.
 - Ninety-three percent of the homebuyers who received a Minnesota Housing first mortgage (3,742 households) also received assistance with their downpayment and closing costs.
- **Preventing and Ending Homelessness:** We provide rental assistance and short-term financial assistance to individuals and families who are homeless or who face housing instability.
 - We provided state-funded rental assistance to 2,556 households in 2017. These households have a median annual household income of \$9,415.
 - We provided assistance to 6,914 households (with an average household income of \$12,000) to prevent homelessness.
 - Eleven state agencies including Minnesota Housing updated the statewide *Plan to Prevent and End Homelessness* and committed to achieving the goals: finish the job of ending veteran and chronic homelessness, to prevent and end homelessness for youth unaccompanied by parents or guardians by the end of 2020, and to prevent and end homelessness for families with children by the end of 2020.
 - There has been an overall 8 percent decrease in homelessness since 2014, including a 20 percent decrease in family homelessness, 27 percent decrease in chronic homelessness and a 56 percent decrease in veteran homelessness. Unsheltered homelessness – people experiencing homelessness in outdoor locations and living in vehicles – has increased significantly.

M.S. 462A (<https://www.revisor.mn.gov/statutes/?id=462A>) provides the legal authority for Minnesota Housing.

FTEs	0	0	0	0

Recommendation:

The Governor recommends \$6 million for the Homework Starts with Home program to serve an estimated 375 families. This recommendation funds an evidence-based practice that will provide rent and other housing assistance to families with school-aged children that lack housing stability. Rent and housing-based assistance have been proven to enhance housing stability and increase school attendance rates for homeless and highly mobile students.

Rationale/Background:

On any given day more than 9,000 children are identified as homeless or highly mobile in school districts across the state. This impacts 1,200 schools and 300 school districts in 76 of Minnesota's 87 counties.

In the last three biennial budgets, the Legislature approved a total of \$6 million in one-time funding for the Rental Assistance for Homeless and Highly Mobile Students program and the Homework Starts at Home program. Under these initiatives, Minnesota Housing provided rental assistance to highly mobile families with school-aged children. As families entered the program, all the students had housing stability and/or school mobility issues, and two-thirds were homeless or doubled up on the day they entered the program. At the end of the program, 90% of the students with a known housing status were stably housed. The Homework Starts with Home Initiative builds upon the success of the Highly Mobile Students Initiative.

Homeless children and youth face educational barriers and trauma when they do not have a safe and affordable place to live, and their education can be disrupted by moves and changing schools as they transition between temporary locations. Students experiencing homelessness are more likely to experience developmental delays; face physical and mental health problems; have increased exposure to violence; suffer from stress, depression and trauma; repeat a grade; be chronically absent; have frequent school changes; and have higher rates of disciplinary actions.

Homeless students demonstrate third-grade reading proficiency at rates less than half of the general student population and substantially below their low-income but housed counterparts. Recent research indicates that a single episode of homelessness impacts educational achievement for two to three years. Families experiencing homelessness are often hard for a community's homeless response system to identify and serve since they may live "doubled up" with family and friends. Schools can be the trusted community touch-point to identify and connect homeless students and their families to the resources and services they need.

Three convergent factors make this a crucial moment to create housing stability for homeless students:

- *First, we know what works.* Providing housing stability resources stabilizes families, improves a child's education, attendance, performance, and increases parent income.
- *Second, public and private leaders are committed to addressing educational achievement and equity.* These commitments are demonstrated through interagency collaboration, the Minnesota Interagency Council on Homelessness, and private initiatives including; Generation Next, the Heading Home Minnesota Funders Collaborative, and business partners which support critical education and homelessness initiatives.
- *Third, efforts to support homeless students can leverage existing resources.* Every school district across the state is federally mandated to designate district homeless liaisons and school point people. The responsibilities of school homeless liaisons are to identify policy barriers to enrollment, attendance and success; build awareness and provide outreach; link school and community resources; and enroll the child or youth who is homeless and provide support services.

Minnesota Housing, the Office to Prevent and End Homelessness, Minnesota Management and Budget, Department of Education, Department of Human Services and the Heading Home Minnesota Funders Collaborative (HHMFC, a group of philanthropic organizations that work collectively to prevent and end homelessness) worked collaboratively to award funds for the \$2 million that was appropriated for Homework Starts with Home. We received 14 applications that represented 21 counties, 37 public and charter school districts and seven early childhood programs. Total requests were \$13.6 million. We awarded funds to 5 applicants: two applicants from greater Minnesota, two from the metro and one from the suburban metro with unique approaches and innovative models, including increasing equity, leveraging federal Section 8 vouchers, and serving Native Americans living within and outside the tribal nation.

Proposal:

Funding will be awarded through a competitive request for proposal (RFP). Resources will be provided to families based on their individualized needs. Families receiving rental assistance under the Housing Trust Fund will be families in need of longer term assistance to achieve housing stability. Resources through the Family Homeless Prevention and Assistance Program (FHPAP) will serve homeless or highly mobile families who do not need longer term rental assistance. These families will instead receive homeless prevention and rapid rehousing services. These cost-effective short term interventions have been demonstrated to prevent or end homelessness for families in many cases. Housing instability for some families could be resolved primarily through improved connections with existing human services or economic assistance programs.

Minnesota Housing will continue to partner with the Office to Prevent and End Homelessness, Departments of Education, Human Services, Minnesota Management and Budget and the Heading Home Minnesota Funders Collaborative as well as other key stakeholders to provide technical assistance, advice, and consultation.

Equity and Inclusion:

Student homelessness disproportionately impacts students of color, American Indian students, LGBTQ students, and students with disabilities.

Under the Rental Assistance for Highly Mobile Families Initiative, 90% of the students that received housing assistance were households of color.

Results:

An evaluation of the Rental Assistance for Highly Mobile Students Program found that at the end of the pilot, 90 percent of the students with a known housing status were stably housed. The students who achieved stable housing during the pilot had stable and better attendance than homeless students statewide. In contrast,

homeless students who did not receive rental assistance missed enough school to be considered chronically absent.

In addition to this evaluation, the University of Minnesota has awarded a Grand Challenge grant for the Homework Starts with Home initiative. Researchers at the University will be evaluating the efficacy of the initiative with more information available Spring 2019.

FY 2020-21 Biennial Budget Change Item

Change Item Title: Build More Homes: Workforce Housing

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Appropriation	5,000	5,000	1,000	1,000
Transfer Out	5,000	5,000	1,000	1,000
Housing Fund				
Transfer In	5,000	5,000	1,000	1,000
Expenditures	5,000	5,000	1,000	1,000
Net Fiscal Impact = (Expenditures – Revenues)	5,000	5,000	1,000	1,000
FTEs	0	0	0	0

Recommendation:

The Governor recommends a \$10 million increase to the Economic Development and Housing Challenge program in the FY 2020-21 biennium and \$2 million in subsequent biennium to produce more new workforce housing opportunities across the state, with a focus on increasing housing opportunities in growing communities. Minnesota Housing estimates that \$10 million will create an additional 150-350 new workforce housing opportunities across the state under this program.

Rationale/Background:

The affordability of homes has been a competitive advantage for Minnesota and our employers, but a growing shortage of homes and other market conditions are pushing prices beyond the reach of many individuals and families. This is limiting economic growth and household mobility. Additionally, new housing construction has not kept pace with household growth, as evidenced by the short supply of homes for rent or sale. In Minnesota today, the statewide rental vacancy rate is about 4 percent – and as low as 2.2 percent in the metro area – and there is less than a two-month supply of homes for sale. These conditions limit options for families and make it harder for many to have a stable place to live.

The development of new housing is also critical for economic growth and job creation. As businesses expand throughout the state, many are struggling to hire workers, in part because of a lack of affordable homes. Through the Challenge program, the Minnesota Housing will work with local partners to develop new rental housing and single family housing options throughout the state. We will also help communities and partners to redevelop existing sites to create new housing opportunities to better serve low- to moderate-income homeowners, homebuyers and renters.

Proposal:

The Challenge Program allows Minnesota Housing to provide no-interest, deferred loans, to for-profit and nonprofit developers and local units of government to develop workforce housing in their communities. The Challenge Program is flexible; letting communities identify the type of housing that best fits their needs. It can be used for new construction or rehabilitation and funds both rental housing and homeownership opportunities. At least 50 percent of Challenge Program funds must be used for housing projects that include a financial contribution from non-state resources.

Minnesota Housing finances workforce rental housing in both the metropolitan area and Greater Minnesota. Resources are available through a competitive Request for Proposals process published each spring. Income limits for rental housing are up to 80 percent of the greater of area or statewide median household income. For most of the state, this is a maximum household income of \$67,400 per year.

The Challenge Program also funds the development and rehabilitation of single-family, owner-occupied affordable in communities across Minnesota. Resources are available through a competitive Request for Proposals process published each spring. The income maximum for owner-occupied housing is 115 percent of the greater of state or area median household income. Currently, that is a maximum median household income of \$96,900 per year for most of the state.

Equity and Inclusion:

The Challenge program serves a high percentage of households of color. In 2017, 68.9% of the families in rental units funded by the Challenge program were households of color and 45.3 percent of families served by the Challenge program for homeownership were households of color. With the new funding, Minnesota Housing will work to continue serving a high percentage of households of color. Additionally, we have been working to provide technical assistance to help organizations owned by people of color better compete in the application process, but more work is still needed.

Results:

Minnesota Housing measures its performance in this budget program by examining the percentage of units financed in top job growth areas and the level of affordability. Under the Challenge Program, all rental units must be affordable to households earning 80 percent of median income. However, the agency also wants to ensure that it is serving a range of households, so the number of Minnesotans served at lower income levels is reviewed as well.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>

Net Fiscal Impact = (Expenditures – Revenues)	2,000	2,000	2,000	2,000
FTEs	0	0	0	0

Recommendation:

The Governor recommends a \$4 million increase to the Family Homelessness Prevention and Assistance Program to serve an estimated 3,100 households. Program funds are used for support services and direct assistance to prevent homelessness or rehouse homeless households as quickly as possible. Services include case management and housing navigation assistance while, direct assistance can include short-term rent assistance, security deposits, utility assistance and transportation assistance to improve housing stability.

Rationale/Background:

The 1993 Minnesota Legislature established the Family Homeless Prevention and Assistance Program (FHPAP) to assist families who are homeless or at imminent risk of homelessness. The program goals are to prevent homelessness, minimize periods of homelessness and eliminate repeat episodes of homelessness. In 1995, the program expanded to include single adults and youth. Tribal nations became eligible applicants in 2016.

Minnesota statute outlines the program requirements, which require that each grantee establish an advisory committee to ensure that project design, implementation and evaluation is reflective of local need. The advisory committee's membership includes homeless advocate organizations, providers, people who have experienced homelessness, and a state staff person from the Minnesota Interagency Council on Homelessness (MICH). Other members include law enforcement, service providers, faith-based organizations, counties and landlords.

This statewide program serves all 87 counties. In the metro area, counties are eligible to apply for funding. In greater Minnesota, it may be a county, group of contiguous counties, nonprofit organizations with board approval of counties in their service area and tribal nations. The majority of grantees also utilize sub-grantees such as youth providers, mental health providers and outreach providers to best meet unique local needs.

Currently, Minnesota Housing provides funds to 20 grantees across the state. FHPAP funds are used for support services and direct assistance to prevent homelessness or rehouse people quickly as possible. Services include case management and housing location assistance. Direct assistance can include short-term rent assistance, security deposits, utility assistance and transportation assistance to improve housing stability. Current funding levels only serve about 65% of those eligible to receive FHPAP assistance.

The number of households served has decreased over the past two biennia due to the program expanding to include a rapid rehousing strategy. The U.S. Department of Housing and Urban Development (HUD) has identified rapid rehousing as a promising practice to reduce homelessness. Rapid rehousing has three key components, including short-term rental assistance, housing location services and case management to assist households with

higher needs to find and maintain housing. Minnesota Housing has supported the shift to serving fewer households in order to target funds to households with higher needs.

Proposal:

The additional resources will be distributed through a competitive Request for Proposal process that Minnesota Housing puts forward every two years. In the last RFP, Minnesota Housing awarded all of the appropriations and had more than \$6 million in requests that were not able to be funded. Grant awards to administrators range from \$400,000 to \$4.5 million and are based on need statistics such as number of households in poverty, unemployed and severely cost burdened (paying 50% or more of their income in rent). Applications are also reviewed for planning, project design, monitoring and evaluation, budget, history of performance, and program capacity. The average assistance per household is \$1,300 and the programs serves nearly 7,000 households each year.

The RFP is reviewed and the program is supported by several state agencies including Department of Human Services (DHS) - Office of Economic Opportunities, DHS - Community Living and Supports, DHS - Office of Indian Policy, the Department of Education and the Department of Corrections.

Equity and Inclusion:

Nearly 60% of the households receiving FHPAP assistance were households of color. Programs are designed to meet local needs and issues. Advisory groups must include someone with lived experience.

In the past, tribal nations have not been eligible grantees. However, both Red Lake and White Earth have had experience as sub grantees. In support of the Governor's Executive Order to Strengthen Tribal Relationships with State Government Agencies, Minnesota Housing requested a change in statute to allow tribal nations to apply. The Minnesota Tribal Collaborative is a partnership between five tribal nations, including: White Earth, Leech Lake, Red Lake, Mille Lacs and Bois Forte. The Minnesota Tribal Collaborative has successfully applied for other state funding, and the collaborative works together to address and end homelessness in tribal nations. This is their first application for FHPAP funds acting as the grant administrator, and White Earth is acting as the lead applicant.

Results:

In order to measure the success of this program, Minnesota Housing tracks the percentage of households served who are identified as at risk for homelessness and who do not return to shelter within 12 months. Data on homelessness comes from the Homeless Management Information System (HMIS).

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>

Minnesota Housing

FY 2020-21 Biennial Budget Change Item

Change Item Title: Support and Strengthen Homeownership: Homeownership Capacity Program

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Appropriation	1,000	1,000	1,000	1,000
Transfer Out	1,000	1,000	1,000	1,000
Housing Fund				
Transfer In	1,000	1,000	1,000	1,000
Expenditures	1,000	1,000	1,000	1,000
Net Fiscal Impact = (Expenditures – Revenues)	1,000	1,000	1,000	1,000
FTEs	0	0	0	0

Recommendation:

The Governor recommends a \$2 million increase for the Homeownership Capacity program to serve an estimated 1,667 households. This program provides intensive homebuyer and financial education to prospective low- to moderate- income homebuyers, with an emphasis on serving households of color. This recommendation is an evidenced-based practice, proven to increase homeownership and wealth.

Rationale/Background:

Minnesota has one of the nation's highest rates of homeownership, while at the same time it has the worst disparity in homeownership rates between white households and households of color. As 76 percent of white households own their home compared to only 41 percent of households of color who own their home, our disparity rate is unacceptable. With more than 64,000 income-eligible households of color, Minnesota Housing believes this gap can close through intensive financial education and coaching to remove barriers, such as low credit scores, or lack of savings to qualify for homeownership.

Proposal:

The Homeownership Capacity Initiative helps households of color increase their probability of becoming successful homeowners through comprehensive homeowner training. Homeownership Capacity supplements traditional homeownership training programs and provides intensive services, including financial education, one-on-one coaching regarding asset building, credit report education, consumer protection, family budgeting, and education on issues such as basic home maintenance, home insurance coverage and other financial empowerment services such as workforce development, technology training, career development and entrepreneurship opportunities.

Funds will be awarded to nonprofit and community housing organizations through a competitive Request for Proposal (RFP) process. Minnesota Housing will continue to work with organizations that serve traditionally underserved communities and communities of color. These organizations provide the homebuyer education and financial training directly to potential homeowners. Current administrators include: African Development Center, Bii Gii Wiin, Build Wealth (through a direct appropriation), Community Action Duluth, Community Action Partnership of Hennepin County, Comunidades Latinas Unidas En Servicio (CLUES), Hmong American Partnership, Lutheran Social Service of Minnesota (LSS Financial Counseling), Mankato Economic Development Authority, Minneapolis Urban League, Neighborhood Development Alliance (NeDA), NeighborWorks Home Partners (NWHP), PRG, Inc., Project for Pride in Living, Inc. (PPL), Southwest Minnesota Housing Partnership (SWMHP), and Three Rivers Community Action, Inc.

Minnesota Housing currently administers the Homeownership Capacity program with agency resources. The program has been established in partnership with community housing organizations that will seek funding under this program. Therefore, Minnesota Housing will be able to get the funds committed to grantees quickly through Request for Proposals (RFP) process. Additionally, more permanent resources will help organizations reach more Minnesotans and help close the homeownership gap.

Equity and Inclusion:

This program was created specifically to address the gap in homeownership rates between white households and households of color. When Minnesota Housing initially created the pilot program, the agency met with organizations that serve communities of color to assist in the design of the program. Funds have been awarded to nonprofit organizations and local units of government that represent and serve communities of color. The agency continues to work closely with these administrators to ensure that the program is working to reach communities of color and other traditionally underserved communities.

As of December 31, 2017, 2,193 clients had entered the program, nearly 90% of them identifying as a household of color.

Results:

More than 80% of clients experienced an increase in their credit score

- The median credit score of clients with a reported outcome increased from 611 at program entry to 658 at the time of program completion.

Program participants increased savings or paid off debt

- Of people who completed the program, 73% increased their savings.
- Many of those who did not see an increase in savings chose to use funds to pay off debt collections and/or purchase their first home.
- On average, clients experienced a \$3,600 improvement in their financial picture (increased savings and/or reduced debt collections), while those that purchased a home had a \$5,000 improvement.

Clients who completed the program increased their knowledge and are taking positive financial actions.

- More than 79% of clients reported an increase or significant increase in their understanding of the banking system, the importance of a spending plan, and how credit and savings affect their ability to obtain a loan.
- At least, 76% of clients reported an increase or significant increase in the frequency that they track their spending, make good financial decisions, and take steps towards improving their credit and saving money.
- Seventy-nine percent reported an increase in their ability to handle financial obstacles.

Increased homeownership:

- Nearly 60% of those with a reported outcome bought a home within a year of completing the program, and another 19% were still pursuing homeownership after one year.
- The remaining 22% decided not to pursue homeownership at this time.

Housing Finance

FY 2020-21 Biennial Budget Change Item

Change Item Title: Preserve The Homes We Have: Rehabilitation Loan Program

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Appropriation	500	500	500	500
Transfer Out	500	500	500	500
Housing Fund				
Transfer In	500	500	500	500
Expenditures	500	500	500	500
Net Fiscal Impact = (Expenditures – Revenues)	500	500	500	500
FTEs	0	0	0	0

Recommendation:

The Governor recommends a \$1 million increase for the Rehabilitation Loan Program. This program provides funding for health, safety and energy efficiency improvements for very low-income homeowners. More than 40 percent of households served by this program are seniors who want to stay in their home and age in place and nearly one-third of households have a family member with a disability. The increase will allow Minnesota Housing to serve an additional 40 homeowners each year.

Rationale/Background:

The Rehabilitation Loan Program provides deferred, forgivable loans to very low-income homeowners throughout the state. Expanding the program was a recommendation made by the Governor's Housing Task Force.

In recent years, more than 50 percent of the homeowners served by the program live in Greater Minnesota and use the program to help make health, safety and energy efficiency improvements to their homes. The loans maintain or restore owner-occupied housing to decent and safe conditions. The program serves homeowners who often have incomes that are too low to qualify for loans in the private sector. In 2017, the median annual income of households served was \$14,286, and the average assistance per household was \$25,542.

Without funding for health, safety and energy efficiency improvements, these homeowners may be forced into rental housing, assisted living or may need to relocate to another community to find safe, affordable housing. Relocating is often less affordable to the homeowner than remaining in their home. A recent Wilder Research study found that the monthly cost for seniors remaining in their own home and receiving home and community-based services is 78% lower than the cost of going into a nursing home, and 40% lower than the cost of assisted living.

The study also found that 51,500 senior homeowner households in Minnesota are income eligible for the Rehab Loan Program and 16,400 of these households (32%) have home rehabilitation or improvement needs that are necessary for them to stay in their home another 5 years.

In recent years Minnesota Housing supplemented state appropriations with agency resources to try to meet this growing demand. With the current combination of state appropriations and agency resources, we are only able to serve about 400 homeowners per biennium.

The Rehabilitation Loan Program is an important program that meets the state's goals of allowing seniors to age in place and helping persons with disabilities remain in their homes if they choose to do so. The Rehabilitation

Loan Program will also help meet vision of the state’s Olmstead Implementation Plan, ensuring that Minnesotans with disabilities will have the opportunity to live close to their families and friends, to live more independently, to engage in productive employment and to participate in community life.

Proposal:

The Rehabilitation Loan Program is administered through a network of non-profit community development organizations, which are primarily community action agencies. Community action agencies receive an origination fee when they administer loans to homeowners.

With \$1 million in additional funding, Minnesota Housing would be able to serve approximately 40 additional homeowners, roughly split equally between the metro and Greater Minnesota. One-hundred percent (100%) of the increase will go towards funding the program because we do not use state appropriations to pay for operating expenses.

With the additional resources Minnesota Housing plans to work more closely with the Department of Human Services (DHS) to provide support to seniors accessing this program.

Equity and Inclusion:

The Rehabilitation Loan Program serves very low-income households. Households in which at least one member has a serious disability made up 40 percent of the households served. Nearly 10 percent of the households served in 2017 were households of color.

Results:

Minnesota Housing tracks the number of seniors and the number of households with a person with a disability served in order to measure outcomes of this program. The agency also examines the number of people most in need – those earning less than 30 percent of HUD area median income – who receive rehabilitation loans in order to measure the program’s success.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Results	Percentage of households most in need (less than 30% of median income) that received rehabilitation loans.	70%	60%	FFY2016, FFY2017
Results	Percentage of rehab loans provided to seniors.	34%	42%	FFY 2016, FFY2017
Results	Percentage of rehab loans to households that identified as having at least one household member with a disability.	42%	32%	FFY2016, FFY2017

Statutory Change(s):

Housing Finance

FY 2020-21 Biennial Budget Change Item

Change Item Title: Build More Housing: Local Housing Trust Fund Match

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Appropriation	2,000	0	0	0
Transfer Out	2,000	0	0	0
Housing Fund				
Transfer In	2,000	0	0	0
Expenditures	2,000	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,000	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends a one-time appropriation of \$2 million to provide state matching funds to incentivize communities to dedicate local resources to a Housing Trust Fund. Local Housing Trust Funds allow communities to attract additional resources from public and private organizations and jump start housing initiatives that generate investment and jobs. Administered by local jurisdictions, these Trust Funds enable communities to prioritize developments that maximize benefit to the local community.

Rationale/Background:

To grow and sustain their local economies, cities are looking for creative ways to make housing development work. Local Housing Trust Funds (LHTF) are a proven tool to help meet local housing needs.

In 2017, legislation was passed that provides local jurisdictions with clear direction promoting the establishment of local trust funds to bring together public and private investment. While some additional communities are moving forward with establishing a Local Housing Trust Funds, we believe others would be more willing to create a Fund with a state-based incentive.

Proposal:

The \$2 million recommended in this proposal would provide grants to communities that establish a Local Housing Trust Fund and dedicate local revenue to the fund for affordable housing projects. Minnesota Housing will establish an RFP to award funds and anticipates awarding match funds to 7-13 communities. Local Housing Trust Funds have broad uses to meet locally identified issues and needs, including:

- Making grants, loans, and loan guarantees for the development, rehabilitation, or financing of rental and single family housing
- Match other funds from federal, state or private resources for housing projects
- Provide down payment assistance, rental assistance and homebuyer counseling services.

Equity and Inclusion:

Local Housing Trust Funds have been used to meet locally identified housing needs. These programs allow communities to direct resources to projects and issues of concern of their choosing. This allows communities to better respond to changing demographics and cultural preferences, such as households that prefer multi-generational living arrangements. It also allows communities to address their unique needs such as the loss of affordable housing that leads to the displacement or a workforce housing shortage.

Results:

Minnesota Housing is planning to track the amount of local revenue and other private resources leveraged by the state funds and require reporting on the local uses of funds, including:

- type of housing,
- number of households served,
- average household income served,
- % of households served that are households of color

Housing Finance

FY 2020-21 Biennial Budget Change Item

Change Item Title: Increase Home Stability: Bridges Rental Assistance Program

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Appropriation	500	500	500	500
Transfer Out	500	500	500	500
Housing Fund				
Transfer In	500	500	500	500
Expenditure	500	500	500	500
Net Fiscal Impact = (Expenditures – Revenues)	500	500	500	500
FTEs	0	0	0	0

Recommendation:

The Governor recommends a \$1 million increase to the Bridges rental assistance program. This program supports people with a serious mental illness and allows them to live in integrated settings in their communities by ensuring they are also provided access to supportive mental health services and stable housing. This increase in resources will provide rental assistance to an additional 80 households.

Rationale/Background:

Stable housing is an integral part to treating a mental illness. Prior to receiving a rental assistance voucher through Bridges, individuals served by this program frequently live with family or friends, in housing that is more expensive than they can afford, in emergency shelters, or at an institution.

Through the Bridges program, Minnesota Housing provides rental assistance for households with at least one adult member who has a serious mental illness. Households with incomes below 50 percent of the area median income are eligible for Bridges. Currently this threshold is below \$42,900 for a four-person household in the metropolitan area and \$38,600 for a four-person household in much of the remainder of the state).

The program plays a key role in the Agency's contribution to Minnesota's Olmstead Implementation Plan goals, and is cooperatively administered, monitored and evaluated by Minnesota Housing and the Department of Human Services. This collaboration is essential to the effective operation of the program, as is the collaboration of housing and mental health agencies at the regional and county level. Bridges grantees are required to work with their local Adult Mental Health Initiative (AMHI) or tribal nation mental health agency to implement the program.

Funds available under the Bridges program provide temporary rental subsidy payments and, in some instances, security deposits, for eligible adults with a serious mental illness. The program requires participants to register for a permanent rental subsidy, primarily Housing Choice Vouchers, formerly known as Section 8, when the waiting lists are open. The Bridges program is designed to provide a relatively seamless transition-in-place for participants when they receive a Housing Choice Voucher.

Under this program, families can afford stable housing in the community until a federal Section 8 certificate or voucher or public housing becomes available. This program plays an important role in the state's Olmstead Plan, as it helps people with disabilities live, work and learn in the most integrated setting.

Proposal:

This proposal represents an increase to an existing program. This increase will allow Minnesota Housing and partners to serve an additional 80 households. This funding will help reduce the current waiting list and will help meet the goals outlined in the state's Olmstead Implementation Plan. People with mental illness are often among the most challenging to house, and given current market conditions (low rental vacancies, increase cost of rent) are having more challenges finding and maintain stable housing.

Minnesota Housing works with local government agencies to deliver the Bridges program. Administrators are selected or re-certified each biennium following the legislative session. Minnesota Housing will also continue to work directly with DHS to administer the program.

Equity and Inclusion:

100% of the households served by the Bridges program have a disability. Nearly 1/3 of those who receive rental assistance are households of color.

Results:

Through the programs under this budget activity, Minnesota Housing provides a variety of resources to create supportive rental housing opportunities and serve people who have experienced homelessness or who have a disability. These programs keep some of Minnesota's most vulnerable citizens out of homelessness and institutions. To measure Minnesota Housing's performance in this activity, the agency tracks outcomes including housing stability and changes in income levels.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Percentage of people who remained in housing for at least a year or had a positive exit (moved to permanent affordable housing).	85%	84%	State FY2016 State FY 2017
Results	Percentage of households with increased income from entry to exit.	40%	40%	State FY2016, State FY 2017

Housing Finance

FY 2020-21 Biennial Budget Change Item

Change Item Title: Manufactured Housing Relocation Trust Fund

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Housing Fund				
Transfer In	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends changes related to the Manufactured Home Relocation Trust Fund. The Trust Fund assists owners of manufactured homes with relocation expenses in the event that their manufactured home park closes. Part of this proposal includes raising the maximum level in the Trust Fund from \$1 million to \$3 million.

Rationale/Background:

There are nearly 800 manufactured home communities in Minnesota. These communities provide significant affordable housing opportunities across the state and offer the most affordable form of homeownership. New communities are not being built and in recent years the state has seen several large park closures, including the closing of Lowry Grove in St. Anthony, which displaced 100 families and received significant press coverage. Other park closures occurred in Bloomington, Rothsay and Garrison.

As a result of these park closures, the Trust Fund balance fell below \$100,000. Due to the recent increase in closures and in anticipation of future park closures due to sales and park infrastructure issues, Minnesota Housing is pursuing changes to the Relocation Trust Fund to ensure adequate resources are available to provide payments to homeowners. In current law, the state stops collecting when the Trust Fund reaches the maximum level. At the current \$1 million maximum level, it is possible the Trust Fund is depleted and therefore inaccessible to help residents in the event of a park closure.

Proposal:

The proposal includes the following specific items:

- Increase trust fund maximum balance from \$1 million to \$3 million
- Increase the current allowable relocation radius from 25 to 50 miles of the closed park without raising maximum relocation costs for households that receive funds
- Require local governments to determine if there was an ordinance in effect on May 26, 2007 that provided compensation to displaced residents, rather than requiring Minnesota Housing to make this determination
- Allow for manufactured homeowners applying for funds to only provide a statement from park owner that rent is current, rather than provide documentation that \$15 payments to the trust fund have been made
- Address timing issues:
 - Change minimum notice for park closures from 9 months to 12 months
 - Extend deadline for residents to vacate from 60 days to 90 days after the required public hearing
 - Add requirement for re-issuing closure statements if a park does not close within 24 months of initial closure statement
- Change “municipality” to “local government authority” in several places because not all parks are located in municipalities

Equity and Inclusion:

Minnesota has one of the nation's highest rates of homeownership, while at the same time it has the worst disparity in homeownership rates between white households and households of color. As 76 percent of white households own their home and only 41 percent of households of color own their home, our disparity rate is unacceptable. Manufactured homes offer homeownership opportunities to families for whom ownership is otherwise out of reach. Recent park closures have led to displacement and have disproportionately impacted households of color.

Results:

This proposal would allow Minnesota Housing to more efficiently administer payments to manufactured homeowners when parks close. This would provide homeowners more opportunity to move in a reasonable amount of time and the resources to help find a new location for their homes.

Each year we provide a report to the Legislature that includes: the balance of the fund, the total revenues received in the previous fiscal year, the amount of payments to homeowners and the ending balance in the fund.

Statutory Change(s):

M.S. 327C.095

Housing Finance

FY 2020-21 Biennial Budget Change Item

Change Item Title: Homelessness Management Information System Support

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	680	680	680	680
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	680	680	680	680
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$680,000 annually to the Department of Human Services, in partnership with Minnesota Housing, to support the ongoing cost of the Homelessness Management Information System, a local information technology system that is required to receive state and federal homelessness resources.

Rationale/Background:

HMIS is a local information technology system operated by the Department of Human Services and used to collect data, both at the client-level and community level. The HMIS collects information from all homeless service providers throughout the state, regarding more than 20,000 homeless beds across the state. These beds include emergency shelters, transitional housing programs, permanent supportive housing providers, homeless prevention programs, and other service providers in contact with people experiencing homelessness, such as outreach programs and drop-in centers.

Data reported within the HMIS includes individual client demographic (gender, age, ethnicity) and household information (housing status, services provided, income). Centralizing data in one place allows service providers, regional planning bodies and state agencies to look at both client outcomes at the program level and evaluate service-use patterns across the entire network of providers to ensure that all resources are being invested in the most efficient services and targeted to the most appropriate populations. It provides a clearer picture of people who experience homelessness, their needs, and how that population changes over time. HMIS allows programs to manage data in a secure and standardized environment that also offers an aggregate view of state-wide efforts to end homelessness.

The state is required to maintain the HMIS system to receive federal homelessness funding. The state receives more than \$40 million per year in federal homelessness funds. Additionally, all service providers that receive state homelessness resources are required to use the system.

Proposal:

The additional funding will pay for a portion of the costs of operating the state Homeless Management Information System (HMIS) by the Department of Human Services. It will support integration of data between HMIS and other key state data assets and enhance existing HMIS capacity to help providers target state and federal homelessness resources more strategically. Currently, HMIS is supported by local Continuum of Care organizations, federal grantees and service providers.

Equity and Inclusion:

Households of color and people with disabilities are disproportionately represented in the homeless population. Equity remains an area of focus for the HMIS Governing Board as HMIS is being used to support regional Equity

and Inclusion projects such as Supporting Partnerships for Anti-Racist Communities (SPARC) which disaggregates data to focus on systemic racism in homelessness response systems.

Results:

We know from many [examples across the country](#) that when communities use their data well, they make the most progress to prevent and end homelessness. With this additional funding, Minnesota will be positioned to target resources to prevent and end homelessness even more effectively and efficiently.

Current measures include:

- Bed Coverage
- Data Quality, specifically universal data element completeness
- HUD performance measures:
 - Length of time homeless
 - Returns to homeless
 - Number of homeless persons
 - Job and income growth
 - First time homeless
 - Stabilizing people experiencing homelessness
 - Housing placement and retention

The above result and performance measurements reflect key data points that the state and federal government use as indicators of success when making funding decisions. The ability to enter, extract and analyze HMIS data, and use it as evidence to either continue making investments in effective programming or to shift resources to better target both populations and activities is vital. Underperformance in this area puts the federal funding (more than \$40 million) at risk.

State staff, community partners and the HMIS system administrator have developed a [governing infrastructure](#) to ensure data is protected and all security measure meet and/or exceed requirements. This governing body and committee structure are also charged to ensure data quality and integrity, which is regularly reviewed and reported to the governing board.

Furthermore, philanthropic partners recently announced an investment in a data analyst position at Minnesota Housing and the Office to Prevent and End Homelessness to work with HMIS and other data systems to focus and drive statewide efforts to prevent and end homelessness.

Request:

The Governor recommends \$82.464 million in FY 2020-2021 to support his 2019 capital budget recommendations. Of this total:

- \$76.073 million is from the general fund to pay for cash-financed projects and debt service on \$1.018 billion in general obligation bonds and \$120 million in appropriation bonds.
- \$6.391 million is from the trunk highway fund for debt service on \$92 million in trunk highway bonds.

Rationale/Background:

The Governor recommended a total of \$1.27 billion in capital projects. Both general fund cash and debt service are needed to finance these projects.

Proposal:

More information about the Governor's 2019 capital budget recommendations can be found in the "Current Capital Budget" section of MMB's website.

Equity and Inclusion:

The Governor's 2019 capital budget includes 73 individual projects. Of those, 37 are statutory programs that impact projects across the state, 20 projects are located in the metro-area, and 16 projects are located in greater Minnesota.

Results:

This recommendation will allow the state to meet its financial obligations with respect to debt service and the financing of capital projects.

Program: Development & Redevelopment

mnhousing.gov/

AT A GLANCE

- The Economic Development and Housing Challenge program funded 530 homes in 2017
- Median annual income of households served under this program is \$21,413 for rental housing and \$40,280 for homeownership
- At least 50 percent of funds must be used for projects in which there is a contribution from non-state resources
- Since 2012, we have financed more than 1,900 new workforce housing homes in job growth areas in Greater Minnesota

Numbers are for FFY2017, unless otherwise noted

PURPOSE & CONTEXT

The affordability of homes has been a competitive advantage for Minnesota and our employers, but a growing shortage of homes is pushing prices beyond the reach of many individuals and families. New housing construction has not kept pace with household growth since the Great Recession, as evidenced by the short supply of homes for rent or sale. In Minnesota today, the statewide rental vacancy rate is about 4 percent – and as low as 2.2 percent in the metro area – and there is less than a two-month supply of homes for sale. These conditions limit options for families and make it harder for many to have a stable place to live.

The development of new housing is critical for economic growth and job creation. As businesses have been expanding throughout the state, many are struggling to hire workers, in part because of a lack of affordable homes. We finance development of new rental housing and single family housing for homeownership throughout the state. We also help communities redevelop existing sites to create new housing opportunities to better serve low- to moderate-income homeowners, homebuyers and renters.

SERVICES PROVIDED

We finance the activities under this program through the state-appropriated Economic Development and Housing Challenge program and the Greater Minnesota Workforce Housing Development program, as well as through federal funding, federal low income housing tax credits and agency loan resources.

Economic Development and Housing Challenge (“Challenge”) Program: The Challenge Program allows us to provide no-interest, deferred loans, to for-profit and nonprofit developers and local units of government to develop workforce housing in their communities. The Challenge Program is flexible; letting communities identify the type of housing that best fits their needs. It can be used for new construction or rehabilitation and funds both rental housing and homeownership opportunities. At least 50 percent of Challenge Program funds must be used for housing projects that include a financial contribution from non-state resources.

Rental Development:

We finance workforce housing in both the metropolitan area and Greater Minnesota. Resources are available through a competitive Request for Proposals process published each spring. Income limits for rental housing are up to 80 percent of the greater of area or statewide median household income. For most of the state, this is a maximum household income of \$67,400 per year. Since 2012, we have financed 1,900 new workforce homes in Greater Minnesota, including Perham, Worthington, Glenwood, St. Michael, Mankato, Austin, Duluth, Cambridge,

Warroad, Thief River Falls, Jackson, Roseau, Rochester and Owatonna. We also supported the development workforce housing in the metropolitan area.

Homeownership Development:

The Challenge Program funds the development and rehabilitation of single-family, owner-occupied affordable and workforce housing activity in communities across Minnesota. Resources are available through a competitive Request for Proposals process published each spring. The income maximum for owner-occupied housing is 115 percent of the greater of state or area median household income. Currently, that is a maximum median household income of \$96,900 per year for most of the state.

Greater Minnesota Workforce Housing Development Program: This program targets small to mid-size cities in Greater Minnesota with rental workforce housing needs. Funding is available to build market-rate residential rental properties in communities with proven job growth and demand for workforce rental housing. Communities are required to secure matching funds, one dollar for every two dollars in funding offered through the program. This program meets the needs of smaller communities by helping to finance new construction of 12 or fewer homes. In 2017, five cities were awarded funds to finance 91 units in Albert Lea, Baudette, Duluth, Luverne and Pelican Rapids. Prior to 2017, this program was administered by the Department of Employment and Economic Development.

RESULTS

We measure our performance in this budget program by examining the percentage of units financed in top job growth areas and the level of affordability. Under the Challenge Program, all rental units must be affordable to households earning 80 percent of median income. However, we also want to ensure we're serving a range of households, so we review how many Minnesotans we are serving at lower income levels.

Housing that is "affordable to the local workforce" generally includes households earning between \$30,000 and \$50,000 annually. This range varies from county to county. We base our wage calculations on data from the Department of Employment and Economic Development (DEED).

Program: Prevent and End Homelessness

Activity: Supportive Housing

mnhousing.gov/

AT A GLANCE

- Assisted more than 2,800 households in 2017
- Median annual income of households served is \$8,000-\$9,000
- Nearly 8,700 students experience homelessness in Minnesota's public and charter schools based on fall student enrollment data for the 2017-18 school year. These students attend 1,239 different schools located in 312 different public and charter school districts across 76 of Minnesota's 87 counties.
- This activity contributes to the goals of the Minnesota Interagency Council on Homelessness' *Plan to Prevent and End Homelessness* and the State's Olmstead Plan

Numbers are for FFY2017

PURPOSE & CONTEXT

Many Minnesotans will need services in their homes at some point during their lives. An estimated 70 percent of people age 65 or older will need long-term care related to daily living. People with disabilities and individuals who have experienced trauma also benefit when healthcare and support services are available to them in their homes, and research shows that people do better when needed services and stable homes are coordinated. The broader community benefits too, through reductions in expensive public systems, such as emergency room visits or police time.

Minnesota Housing funds affordable housing with support services. This activity is essential to our efforts to prevent and end homelessness. Supportive housing serves individuals and families with multiple barriers to obtaining and maintaining housing. Supportive housing provides stability for the poorest households and households with special needs so they can successfully address barriers to employment, complete school or training and achieve independent living.

SERVICES PROVIDED

Housing Trust Fund Program: Through the Housing Trust Fund program, we fund rental assistance for households living in permanent supportive housing. Renters pay 30 percent of their income towards rent. In 2017, 1,674 households received rental assistance under this program with an average annual assistance of \$7,400. Sixty-five percent of those who received rental assistance in 2017 were households of color or Hispanic ethnicity. We have a priority to serve households with incomes that do not exceed 30 percent of the metropolitan area median income, which is currently \$25,750 for a household of four.

The Housing Trust Fund can also be used to provide capital funds in the form of zero percent interest, deferred loans to finance the construction of affordable permanent and supportive rental housing. The state appropriation currently funds rental assistance only while new supportive housing developments are financed through Housing Infrastructure Bonds provided in the State's Capital Investment Bill.

Homework Starts with Home: The Legislature approved two, one-time appropriations of \$2 million for the Rental Housing for Highly Mobile Students Initiative. The goal of the initiative was to create housing stability for children and their families that would ultimately lead to school success. We selected three administrators to provide the rental assistance and services in Minneapolis, St. Paul and Moorhead. An evaluation of this program found that

90 percent of households that received assistance were stably housed within two years. The students who achieved stable housing during the pilot had better attendance than homeless students statewide. In contrast, homeless students who did not receive rental assistance missed enough school to be considered chronically absent. Additionally, household income increased 15 percent during the program and some households went from homeless to homeowners in just over two years.

In evaluating the program we found that assessing needs and providing tiered assistance may be the most effective strategy for serving students and families experiencing homelessness. This research led to the Homework Starts with Home Initiative. In FY 2018-19 we received a one-time appropriation of \$2 million for the program, including \$1.75 million in rental assistance and \$250,000 for homelessness prevention assistance. In 2018, Minnesota Housing, the Heading Home Minnesota Funders Collaborative, the Office to Prevent and End Homelessness, and the Departments of Education and Human Services selected two grantees from greater Minnesota, two from the metro and one from the suburban metro to serve approximately 240 households over the next two years.

Bridges Program: Through the Bridges program, we provide rental assistance for households in which at least one adult member has a serious mental illness. Households with incomes below 50 percent of the area median income are eligible for this program (currently below \$42,900 for a four-person household in the metropolitan area and \$38,600 for a four-person household in much of the remainder of the state). We partner with the Department of Human Services to deliver this program. Households receive both rental assistance and assistance from a social service agency. Under this program, families can afford stable housing in the community until a federal Section 8 certificate or voucher or public housing becomes available. This program plays an important role in the state's Olmstead Plan, as it helps people with disabilities live, work and learn in the most integrated setting.

Our federal programs in this activity include:

Federal Housing Opportunities for Persons with AIDS (HOPWA) Program: Through the HOPWA Program we provide grants that can be used to meet the housing needs of persons with Acquired Immune Deficiency Syndrome (AIDS), HIV-positive status or related diseases and their families. The federal program authorizes grants for both housing assistance and services. Minnesota Housing's HOPWA funds are used for rental subsidies.

National Housing Trust Fund: The state received its first allocation of funding from the National Housing Trust Fund in federal fiscal year 2015 (\$3 million). This is the first year that states have received funding from this resource, which was established in 2008 and provided through a formula based on population. Funds are awarded to developments as part of our consolidated Request for Proposal process and are used for supportive housing and developments serving extremely low income households.

Section 811: This federal program provided funding to states for project-based rental assistance to create integrated, cost-effective supportive housing for people with disabilities. This allows persons with disabilities to live as independently as possible in the community. These funds were awarded to projects through our consolidated Request for Proposal process and we partner with the Department of Human Services on this program. Section 811 plays an important role in implementing the state's Olmstead Plan by creating new supportive housing opportunities across the state.

RESULTS

Through the programs under this budget activity, we provide a variety of resources to create supportive rental housing opportunities and serve people who have experienced homelessness or who have a disability. These programs keep some of Minnesota's most vulnerable citizens out of homelessness and institutions. To measure our performance in this activity, we track outcomes including housing stability and changes in income levels.

Program: Prevent and End Homelessness

Activity: Homelessness Prevention

mnhousing.gov/

AT A GLANCE

- Assisted 6,914 households in 2017, including 60% households of color or Hispanic ethnicity
- Median annual household income of households assisted was \$12,000
- Services available in all 87 counties

All numbers are for Federal Fiscal Year 2017

PURPOSE & CONTEXT

When you lose your home, you lose your community—and the consequences of this major life disruption can last for decades. In Minnesota today, well over half of the lowest-income families in the state spend more than 50 percent of their income on their home costs.

Minnesota Housing programs provide housing and other assistance to households that are at risk of becoming homeless due to a crisis situation, extremely low incomes, and/or physical and mental health problems. This activity is an essential element of our efforts to prevent and end homelessness. Effectively ending homelessness means we need to prevent homelessness whenever possible.

SERVICES PROVIDED

Family Homeless Prevention and Assistance Program (FHPAP): Through FHPAP, we provide flexible grants to counties and nonprofit organizations to assist families with children, single adults or youth who are homeless or at imminent risk of homelessness. We currently fund 19 grantees that serve people in all 87 counties in Minnesota. Grantees use funds for a broad range of activities aimed at homelessness prevention, minimizing episodes of homelessness, and eliminating repeat episodes of homelessness. Grantees provide financial assistance such as security deposits, transportation and utility assistance, short-term rental assistance (also known as rapid rehousing) or mortgage payment assistance. Grantees may also provide referrals for social services or affordable rental housing. Nearly 48 percent of funds were used for support services and 45 percent of funds were used for direct cash assistance.

In 2016, the Legislature approved one-time funding for a Landlord Risk Mitigation Fund, which is being run as a pilot through the Family Homeless Prevention and Assistance Program. The fund provides financial assurance for landlords to encourage them to rent to people they might not normally consider, including people with criminal histories, people who have experienced homelessness, or people with mental illness. Landlords are able to make claims to the fund if they incur expenses beyond the amount of a tenant's security deposit, up to a certain dollar amount. The program is currently serving areas in central Minnesota, northeast Minnesota and suburban Hennepin County.

RESULTS

In order to measure the success of this program, we track the percentage of households served who are identified as at risk for homelessness and who do not return to shelter within 12 months. Data on homelessness comes from the Homeless Management Information System (HMIS).

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Results	Percentage of households who were identified as at risk for homelessness or were homeless, were served, and didn't return to a shelter within 12 months.	94%	94%	FFY2016, FFY2017

Program: Homeownership Assistance

mnhousing.gov/

AT A GLANCE

- Helped 4,048 households buy homes with our loans in 2017
- Provided downpayment and closing cost assistance to 3,742 households
- Median annual income of households served with downpayment assistance is \$47,708
- More than one-third (35 percent) of households served are households of color or Hispanic ethnicity

All numbers are for Federal Fiscal Year 2017

PURPOSE & CONTEXT

We know homeownership is the primary driver for building wealth for low- and moderate-income households. Each year of successful homeownership adds nearly \$10,000 in household wealth. It also creates stability for families and stronger connections within our communities.

Minnesota Housing provides loans for some of the upfront funds needed to purchase a home. Many moderate-income households have sufficient income to make monthly mortgage payments, but lack the wealth necessary for a downpayment and closing costs. This activity helps finance a portion of these costs and makes it possible for these families to purchase a home.

SERVICES PROVIDED

The goal of this activity is to help moderate-income households become successful homeowners. Minnesota has one of the nation's highest rates of homeownership (more than 70 percent), while at the same time it has the fifth worst disparity in homeownership rates between white households and households of color. A lack of the money available for entry costs – including downpayment and closing costs – contributes to the homeownership gap. Other reasons for the gap include credit and lending practices, cultural factors, and discrimination. Currently, over 64,000 renter households of color in Minnesota have the income they need to potentially buy a home and are within the prime homebuying age range. We're helping start these households on the path to homeownership through our mortgage programs, marketing and outreach, homebuyer education, and assistance with downpayment and closing costs.

Homeownership Assistance Fund: Through the Homeownership Assistance Fund, we provide between \$5,000 and \$7,500 in assistance to first-time homebuyers to use toward downpayment and closing costs. We provide the assistance in the form of a second mortgage with no interest. We defer repayment of the loan, and in some cases it may be forgiven. In cases such as a sale or refinance, the loan is repaid to Minnesota Housing. Homebuyers with incomes at or below 60 percent of the area median income are eligible for assistance. In the Twin Cities and Rochester metropolitan areas, this is currently a maximum household income of \$68,000 per year. In Greater Minnesota, the income limit is currently \$61,000 per year.

Homebuyers who receive assistance under the Homeownership Assistance Fund are required to participate in homebuyer education, have a credit score of at least 640 and provide minimum cash investment. Our network of private lenders delivers the downpayment loan programs directly to homebuyers. Minnesota Housing supplements state appropriations with agency resources when possible, and also provides downpayment and closing cost assistance in the form of a monthly payment loan to borrowers with slightly higher incomes.

RESULTS

To track our outcomes under this budget activity, we examine the percentage of loans issued to households of color and Hispanic ethnicity as well as how many of our homebuyers use our downpayment loan programs.

For reference, as of 2016, 34% of households income eligible to buy a home are households of color. We made 33% of our first-time homebuyer loans to households of color or Hispanic ethnicity in Federal Fiscal Year 2016 and 35% in Federal Fiscal Year 2017. By comparison, according to Home Mortgage Disclosure Act (HMDA) data, lending to households of color as a percentage of all mortgage activity in the overall mortgage market was only 14% in 2016.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Percentage of Minnesota Housing loans for first-time homebuyers issued to households of color or Hispanic origin.	32%	33%	FFY2016, FFY2017
Quality	Percentage of downpayment assistance provided to households of color or Hispanic origin.	34%	35%	FFY2016, FFY2017
Results	Percentage of homebuyer loans that included downpayment assistance.	88%	93%	FFY2016, FFY2017

Program: Preservation

Activity: Rental Preservation and Rehabilitation

mnhousing.gov/

AT A GLANCE

- Preserved 2,569 federally assisted units
- There are 114,000 rental homes that have received public investment
- Of Minnesota's roughly 30,000 project-based Section 8 units, over 15,000 are in projects with a contract that will expire in the next 10 years
- 60.7% of households assisted are households of color or Hispanic ethnicity.

All measures are for FFY2017

PURPOSE & CONTEXT

The most cost-effective way to provide homes that are affordable to most Minnesotans is to preserve our existing stock. This is particularly true as the growing demand outpaces new supply and the tight market drives home prices higher. Minnesota has around 366,000 apartments priced at a level that families who earn half the local median income can afford to rent. Naturally occurring affordable rental units (rental homes on the private market that are relatively low in price because of condition, location, lack of amenities, or other market factors) account for over 200,000 of the 366,000 total affordable rental units in Minnesota. We estimate that Minnesota is losing roughly 2,000 naturally occurring affordable rental units per year as low-priced properties are sold and improved, which leads to rent increases.

Minnesota has approximately 114,000 units of rental housing that have received or currently receive federal assistance to keep the units affordable. This represents about five percent of the homes in Minnesota, but they play a vital role in serving the lowest-income households. These include project-based Section 8 properties, USDA Rural Development properties, public housing, and other federally funded properties. These properties are located throughout the state, in large and small communities alike. The affordable housing stock is an essential part of communities' infrastructure, and its preservation is critical to communities' continued vitality. As these properties age, or as the subsidy contracts and regulatory agreements expire, there is a risk that these units may be lost due to physical deterioration or diminished capacity of the owner. There is additional risk that some properties may convert to market rate housing and no longer be affordable for low-income residents.

Thirty thousand (30,000) of these affordable housing units are federally subsidized through the Section 8 program. Section 8 housing is among the most affordable housing available because the tenant is required to pay only 30 percent of household income towards rent. The federal government makes up the difference between the tenant's contribution and an agreed upon contract rent. This is a critical benefit because the median income of Section 8 households is just \$12,000. Another 7,000 privately-owned affordable housing units are federally subsidized through USDA Rural Development, which operates on a similar basis.

Through rental preservation and rehabilitation, Minnesota Housing provides funding for the rehabilitation, repair and stabilization of aging federally assisted rental housing and naturally affordable, unsubsidized rental housing.

SERVICES PROVIDED

Affordable Rental Investment Fund – Preservation (PARIF): Through the PARIF program, we ensure that the health, safety and quality of critical federally assisted affordable housing stock are maintained for low-income

residents well into the future. The Section 8 and USDA Rural Development portfolios were developed primarily from the 1960s to the 1980s. Due to the age of the housing stock, rents may not be able to keep up with the physical demands of the properties. The properties need large injections of capital through PARIF to make physical improvements so that the properties can remain intact and affordable for decades into the future.

In exchange for receiving funding from Minnesota Housing, owners must agree to continue participating in the federal rental assistance program (Section 8 or USDA Rural Development) for the maximum term available.

Rental Rehabilitation Deferred Loan Program: A significant portion of the naturally occurring affordable housing owners in Greater Minnesota struggle to finance major capital improvements and repairs. We provide capital assistance to the owners of naturally occurring affordable housing through the Rental Rehabilitation Deferred Loan Program, which is funded through state appropriations. Through local administrators, we fund capital repairs to housing to keep it in good condition. In exchange for receiving funding from Minnesota Housing, owners of naturally occurring affordable housing agree to maintain rents at affordable levels. A priority is to serve developments with 1-4 units of housing, since that type of building represents nearly 50 percent of the housing stock in Greater Minnesota.

Other Programs and Initiatives: Using agency resources, we also invested in a Naturally Occurring Affordable Housing (NOAH) Impact Fund administered by Greater Minnesota Housing Fund. The fund finances the acquisition and preservation of naturally affordable rental housing to preserve the affordability of such homes for the long term. All investments target rental properties at risk of conversion to higher rents and the threat of displacement of low- and moderate-income residents. We also fund preservation activities through the federally-funded HOME program. Historically, HOME resources administered by Minnesota Housing have been used for preservation. Through the State's Capital Investment bill, we receive resources to preserve and rehab public housing.

RESULTS

Preservation of existing affordable rental housing is one of our five strategic priorities. It is essential that we preserve existing affordable housing so that it is not lost due to deterioration or owners opting out of federal programs. We measure our results by reviewing the number of federally assisted rental units that are preserved and the median income of the households we serve.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of federally assisted rental units preserved.	3,096	1,715	FFY2016, FFY2017
Quantity	Median income of households served.	\$12,246	\$12,177	FFY2016, FFY2017

M.S. 462A.21, subd.8b (<https://www.revisor.mn.gov/statutes/?id=462A.21>) provides the legal authority for the PARIF program. M.S. 462A.33 (<https://www.revisor.mn.gov/statutes/?id=462A.33>) and 462A.05, subd. 14A (<https://www.revisor.mn.gov/statutes/?id=462A.05>) provide the legal authority for the Rental Rehabilitation Deferred Loan program. Federal HOME funds fund the HOME Affordable Rental Preservation Program.

Program: Preservation

Activity: Homeownership Rehabilitation

mnhousing.gov/

AT A GLANCE

- Assisted 260 homeowners in 2017
- Median annual income of households served is \$14,286
- Fifty-two percent of homeowners served reside in Greater Minnesota

All numbers are for Federal Fiscal Year 2017

PURPOSE & CONTEXT

Minnesota has a strong supply of existing owned and rented homes that families and individuals can afford. Three-quarters of the owner-occupied homes in the state are valued at under \$250,000—a level generally considered affordable in today’s market—and 38 percent are valued at \$150,000 or less.

Maintaining older homes often requires rehabilitation or modernization, but these updates are almost always less expensive than building new homes – frequently less than half the cost. Home rehabilitation helps homeowners remain in their homes for a lower cost than buying and moving to a comparable property.

This is particularly true for senior homeowners. A recent study by Wilder Research found that 16,400 extremely low-income senior households (households at or below 30 percent of their area’s median income) have home rehabilitation needs, including both habitability repairs and accessibility improvements. For an estimated cost of just \$16,000 per home, these seniors would be able to stay in their own rehabilitated homes and their communities for another five years. Compared to the cost of assisted-living alternatives, this cost is minimal, and studies show that most seniors prefer to age in place.

Minnesota Housing provides loans to maintain or restore owner-occupied housing to decent and safe conditions. We serve homeowners who often have incomes that are too low to qualify for loans in the private sector.

SERVICES PROVIDED

For lower income homeowners, the most affordable housing choice and typically the most preferred, is often to remain in their home. Through the owner-occupied Rehabilitation Loan Program we provide no-interest forgivable loans of up to \$27,000 for very low income households. The income limit for a two-person household is \$19,900 per year. We forgive the loans after 15 years if the home remains the homeowner’s primary residence. Local units of government and nonprofit organizations, including Community Action Agencies, deliver this program to homeowners. Homeowners may use loans for health, safety, accessibility and energy efficiency improvements.

This activity allows senior households or households with a person with a disability to avoid or delay costly institutionalization by addressing safety or accessibility housing needs. It also helps very low income homeowners retain homeownership by using loan funds to make energy conservation improvements, and health and safety improvements. Many aspects of housing have an impact on residents’ health, including lead paint, radon, mold, poor ventilation and deferred maintenance.

Minnesota Housing supplements state appropriations with agency resources for this program when possible because need greatly exceeds appropriated resources.

RESULTS

We track the number of seniors and the number of households with a person with a disability served in order to measure outcomes of this program. We also examine the number of people most in need – those earning less than 30 percent of HUD area median income – who receive rehabilitation loans in order to measure the program's success.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Results	Percentage of households most in need (less than 30% of median income) that received rehabilitation loans.	70%	60%	FFY2016, FFY2017
Results	Percentage of rehab loans provided to seniors.	34%	42%	FFY 2016, FFY2017
Results	Percentage of rehab loans to households that identified as having at least one household member with a disability.	42%	32%	FFY2016, FFY2017

M.S. 462A.05, subd. 14 (<https://www.revisor.mn.gov/statutes/?id=462A.05>) provides the legal authority for the Rehabilitation Loan Program.

Program: Preservation

Activity: Project-Based Rental Assistance

mnhousing.gov/

AT A GLANCE

- Assisted nearly than 31,000 households
- Median annual income of households served is \$12,000
- Forty-five percent of the households served are elderly and 31 percent are disabled

All numbers FFY2017

PURPOSE & CONTEXT

Minnesota Housing preserves existing affordable housing stock by effectively administering and monitoring federal housing assistance payment contracts on behalf of the federal government. The U.S. Department of Housing and Urban Development entered into contracts with property owners to provide rental assistance for families with incomes less than 80 percent of the area median income. No new development has been funded under this program since the mid-1980s; however, under existing contracts, tenants pay no more than 30 percent of their income in rent. These tenants are among the lowest income of any served by Minnesota Housing, with a median income of \$12,000.

SERVICES PROVIDED

Under this activity, Minnesota Housing manages three separate federal rental assistance programs with similar, but not identical, administrative requirements. The federal programs are Section 8 performance based contract administration, Section 8 traditional contract administration and Section 236. Private owners of these buildings receive subsidies from HUD under each of these programs. The functions provided by Minnesota Housing staff under this program include:

- Analyzing and reviewing tenant data necessary to determine subsidy levels,
- Processing annual rent adjustments,
- Performing annual management and occupancy reviews, including a physical inspection, and
- Responding to tenant concerns.

These activities are required in order for property owners to receive their federal subsidy from HUD in a timely manner. The HUD subsidy ensures the proper maintenance of the housing while keeping rents affordable for the lowest income Minnesotans.

RESULTS

Minnesota Housing has received incentive fees from HUD for its customer service and performance in administering Project-Based Section 8 contracts. The incentive fees reflect the agency's efficiency and effectiveness in administering the Project-Based Section 8 contracts and in providing superior customer service to Section 8 customers. In addition to the incentive fees, we measure our performance by examining the percentage of Section 8 units that could potentially convert to unassisted units, but whose contracts are preserved through one-, five-, 10-, and 20-year renewals.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Results	Percentage of Section 8 rental units at risk of converting to market-rate rents that are renewed.	99%	99%	FFY2016, FFY2017

Minnesota Housing is selected by HUD to administer contracts under this program.

Program: Resident and Organization Support

mnhousing.gov/

AT A GLANCE

- Assisted 18,283 households with Homebuyer Education, Counseling and Training in 2017
- Median income of households served is \$36,000
- 295 organizations locally administer one or more of Minnesota Housing's programs

All numbers are for Federal Fiscal Year 2017

PURPOSE & CONTEXT

Minnesota Housing supports the infrastructure necessary for organizations to effectively deliver affordable housing throughout the state. Through the activities under this program, we serve a variety of individuals and organizations to help ensure that affordable housing is maintained and that our partners serve diverse geographic and cultural communities.

SERVICES PROVIDED

We rely on a robust network of partners to deliver many of our programs. Through resident and organization support, we provide resources to a statewide network of housing counseling organizations that assist homeowners at risk of foreclosure and homebuyers purchasing a home. We also provide assistance to nonprofits to help with regional planning and coordinating activities.

Homebuyer Education, Counseling and Training Program: Through the Homebuyer Education, Counseling and Training (HECAT) program, Minnesota Housing works in collaboration with a network of housing counseling organizations. Together we have designed a comprehensive statewide delivery network for homebuyer training and education. This network is overseen by the Minnesota Home Ownership Center, which is a nonprofit organization based in St. Paul. The homebuyer training network receives support from state and federal appropriations as well as lending institutions and foundations. We award grants to qualified nonprofit counseling organizations through a competitive Request for Proposal process. The organizations provide both pre-purchase and post-purchase counseling for low- and moderate- income first-time homebuyers. We also provide funding for foreclosure prevention counseling to help homeowners avoid foreclosure whenever possible.

Capacity Building Program: Capacity Building funds help organizations expand their ability to deliver our programs and reach diverse geographic and cultural communities. The Capacity Building Program supports a range of organizations and initiatives, including the Continuums of Care that ensure communities in Greater Minnesota have access to federal resources to prevent and end homelessness. The program also supports geographic and cultural community based nonprofit developers and service providers who help communities deploy state and federal programs and compete for development dollars.

Manufactured Home Relocation Trust Fund: The Minnesota Manufactured Housing Relocation Trust Fund was created in 2007 by the Minnesota Legislature to provide participating homeowners in manufactured home parks with compensation in the event that all or part of their manufactured home park closes. The Act requires manufactured home park owners to make payments to the Trust Fund (via Minnesota Management and Budget) when a manufactured home park is being closed or the land will no longer be used as a manufactured home park. Minnesota Housing then processes requests and payments to homeowners relocating from closed parks.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Results	Foreclosures prevented as a percentage of closed counseling cases.	66%	73%	FFY2016, FFY2017
Results	Federal funds leveraged for Continuum of Care organizations per dollar of state money spent.	\$118	\$118	FFY2015, FFY2016

Funding for this program comes from state appropriations to the Homeownership, Education Counseling and Training Program (M.S. 462A.209, <https://www.revisor.mn.gov/statutes/?id=462A.209>) the Nonprofit Capacity Building Grant Program (M.S. 462A.21, Subd. 3b, <https://www.revisor.mn.gov/statutes/?id=462A.21>) and the Manufactured Home Relocation Trust Fund (M.S. 462A.35, <https://www.revisor.mn.gov/statutes/?id=462A.35>).

AT A GLANCE

- Minnesota Housing holds AA+ and Aa1 credit ratings from Standard & Poor's and Moody's
- We provide more than \$1 billion each year to help Minnesotans live in safe, stable, affordable homes

PURPOSE & CONTEXT

Minnesota Housing does not own or operate any housing, so we collaborate with individuals, communities and partners to create, preserve and finance affordable housing. Homebuyers, homeowners and renters with low- to moderate- incomes benefit from the administration and management of our wide range of programs.

SERVICES PROVIDED

We have two primary business divisions (Single Family and Multifamily) that conduct a variety of activities in order to administer state and federal programs. Along with a Finance Division that manages the agency's finances and assets, we have several other support divisions.

Single Family Division: The single family division implements our homeownership, homeowner and community development programs. Their activities include: monitoring homeownership lenders, working with home improvement partners, administering downpayment and closing cost assistance programs, processing loan reservations and disbursements, and compliance monitoring.

Multifamily Division: The multifamily division reviews and oversees multifamily rental properties. Their activities include: underwriting multifamily developments, overseeing construction and initial rent-up, overseeing long-term asset management and oversight of troubled properties. The multifamily division also monitors properties to ensure compliance with federal programs, including: Section 8, Section 236, low-income housing tax credits and the HOME program. The multifamily division manages our rental development, rental preservation, supportive housing and homelessness prevention programs.

Finance: The finance team is responsible for managing the agency's investments and debt and for overseeing the agency's bond sales. As of June 30, 2017 we had more than \$3.5 billion in assets. Our bond issuer ratings were AA+ and Aa1 from Standard and Poor's Rating Services and Moody's Investor Services, Inc. respectively. Our credit ratings are separate from and are not directly dependent on ratings on debt issued by the State of Minnesota.

Support Divisions: In addition to our two primary business divisions and the finance division, Minnesota Housing has a number of support divisions, including: Business and Technology Support, Policy and Community Development, Communications, Planning and Administration, and Legal and Risk Management.

RESULTS

In setting an administrative budget, we seek a balance between maximizing agency resources available for housing needs and investing in adequate staff and technology to ensure efficient operations, appropriate oversight and quality housing. Our total operating costs, as a percentage of assistance provided, typically does not exceed 5 percent.

	Federal Fund – Agency Total		201,165	207,515	207,507	207,801		

Narrative

Federal resources comprise approximately 20 percent of housing program activities for the agency. The awards fit within several program areas of the agency, from rental housing production (new construction and rehabilitation), to rental assistance contract administration, to housing counseling, and resources to prevent and end homelessness.

Minnesota Housing receives federal funds that flow through a variety of channels:

- **Formula based direct appropriations** – Currently direct appropriations (which don't require competitive application) are through the HOME Investment Partnerships, HOPWA, the National Housing Trust Fund programs, and previously the Neighborhood Stabilization Program.
- **Fees and resources for rental assistance contract administration** – Section 8 agency and HUD portfolios HUD Performance Based Contract Administration is competitively awarded and generates revenue based on performance. The Agency portfolio receives funding directly from HUD.
- **Program specific grants** – Section 811 Rental Assistance, and National Foreclosure Mitigation Counseling, both competitively applied for by the agency.

One key trend affecting these awards includes two awards above that are sun-setting and thus we will not see additional grants. The first is the Neighborhood Stabilization Program, which was a temporary program through HUD to aid in community recovery in the wake of the foreclosure crisis. The second is the National Foreclosure Mitigation Counseling program, which was another program through HUD to address the nationwide foreclosure crisis.

Another key trend is the transition between the Section 8 agency portfolio (Traditional Contract Administration) and the HUD portfolio that the agency administers via Performance Based Contract Administration). Over time, developments will transition from the TCA to the PBCA portfolio, per HUD's instruction.

AT A GLANCE

- The Minnesota Department of Human Rights (MDHR) investigates discrimination complaints; ensures equal employment opportunities and equal pay on state contracts; enforces the “Ban the Box” law for private employers; and facilitates education and dialogue on eliminating discrimination and disparate treatment throughout Minnesota.
- MDHR serves vulnerable Minnesotans who have experienced discrimination, are seeking opportunities in employment, and equal access to public services.
- In 2017, MDHR completed 529 discrimination investigations, while opening 698 new cases. These increased case filings reflect increased outreach and growing public confidence in the Department’s work. Disability discrimination is the most common charge and a growing area of MDHR’s work.
- 78% of cases were less than one year old; 155 cases were over one year at the end of 2017.
- At the end of 2017, the average time to close a case was 369 days.
- Workforce inclusion efforts have demonstrated successful outcomes, with recent high profile examples that include the Vikings Stadium Project and the Capitol Restoration Project. In 2017, the Department raised Workforce Inclusion Goals for women statewide, helping to ensure opportunities for women and people of color on state funded projects.
- The Department has taken on issues of systemic discrimination based on disability and race in school discipline practices, with the intent of having schools where all kids can learn safely.
- The Department has lead state government civic engagement efforts as part of Governor Dayton’s Diversity and Inclusion Council; executed tribal consultation agreements; participated as a member of the Interagency Council on Homelessness; and conducts education and outreach statewide in cities, including Duluth, Worthington, St. Cloud, and Albert Lea.

PURPOSE

The mission of the Minnesota Department of Human Rights (“MDHR” or the “Department”) is to eliminate discrimination in education, employment, housing and real property; in public accommodations; and in the delivery of public services. Discrimination threatens the rights and privileges of the citizens of the state and menaces the institutions and foundations of our democracy. The Minnesota Human Rights Act protects all Minnesotans from discrimination in employment, housing, public services, public accommodations, and education.

MDHR supports the following statewide outcomes:

- **Reducing race, gender, and other disparities**
- **A thriving economy that encourages business growth and employment opportunities**
- **Expand economic opportunities and eliminate disparities for Minnesotans of color**
- **Minnesotans have the education and skills needed to achieve their goals**
- **People in Minnesota are safe**

BUDGET

Source: Budget Planning & Analysis System (BPAS)

Source: Consolidated Fund Statement

The Department's budget primarily comes from the State's General Fund, with a small amount of additional revenue generated from issuing Equal Pay and Workforce certificates to state contractors and fees from educational offerings. The Department receives approximately \$300,000 annually under a workshare agreement with the Equal Employment Opportunity Commission (EEOC), as payment for investigation of employment discrimination cases. The vast majority of the Department's expenses (over 90%) are spent on payroll, rent and IT expenses.

STRATEGIES

The work of the Department falls into three broad areas:

- Investigate Claims of Discrimination and Disparate Impact:** Since its establishment in 1967, the Department has been responsible for drafting and investigating complaints, and drafting determinations as to whether probable cause exists that discrimination has occurred. When the Department finds probable cause of discrimination we attempt to conciliate a settlement between the parties that will resolve the discriminatory practices, make the charging party whole, avoid future instances of discrimination, and avoid litigation. On January 1, 2014, the Department became responsible for enforcing the Private Employer Ban the Box law. The law limits the timing of when an employer can request criminal background information from a job applicant. This ensures that individuals with criminal records who are reentering the community can compete for employment, which helps to reduce recidivism and racial disparities. The Department conducted presentations around the state and provided technical assistance to numerous employers to aid in compliance. In 2016 and 2017, the Department conducted 160 Ban the Box investigations.
- Ensure Equal Employment Opportunity with State Contractors:** The Department issues workforce certificates of compliance to large state contract vendors. This ensures that such vendors comply with federal and state equal employment opportunity laws. The Department also monitors the good faith efforts of state contract vendors with a workforce certificate to implement equal employment opportunities. On August 1, 2014, the Department became responsible for issuing equal pay certificates of compliance to large state contract vendors and for ensuring that such vendors comply with federal and state equal pay and anti-discrimination laws. This resulted in the Department issuing 481 Equal Pay Certificates to Minnesota's largest contractors in 2016 and 2017.
- Facilitate Education & Dialogue to Eliminate Discriminatory Practices & Disparate Treatment:** The Department facilitates conversations between Minnesotans to find solutions to overt and subtle discriminatory practices and systems that frustrate individuals as they seek to fully participate in our democracy. The Department has supported inter-agency work on the implementation of the state's Tribal

Consultation Policy and initiative to end homelessness. The Department has also worked with the Department of Education on school bullying issues.

MDHR emphasizes several strategies to deliver its mission and support statewide outcomes. These strategies include:

- Timely and thorough investigations of all charges of discrimination
- Investigation of “Ban the Box” law violations for private employers
- Timely responses to workforce and equal pay certificate applications
- Reviewing of contract vendor practices to ensure equal employment opportunity; equal pay compliance; and non-discriminatory wage and benefit compensation
- Facilitation of dialogue among key stakeholders to eliminate discrimination, disparate practices and disparate outcomes

Recommendation:

The Governor recommends \$1.569 million in FY2020 and \$1.649 million in FY2021 to truly transform the capacity of the Human Rights Department in its efforts to proactively face Minnesota's challenges.

The funds will be used to dramatically increase the Department's capacity statewide, including opening regional offices in Bemidji, Duluth, and Worthington; providing resources for civic engagement work; and increasing work to help individuals with criminal records successfully reenter the community. Minnesota is a state with strong outcomes in education, employment, and economic success in some communities, while having some of the deepest racial disparities in the nation in employment, household income, education, and criminal justice. As Minnesota becomes increasingly demographically diverse, our collective success – economically, socially, and politically – is inexorably connected to our ability to address these disparities. Geographically, Minnesota is seeing divergent outcomes across the state that need to be addressed. Communities in every corner of the state are experiencing aging populations as well as increased diversity based on race and national origin. Achieving equity is a key part of achieving collective success as One Minnesota.

Rationale/Background:

Minnesota has long been a leader in addressing discrimination in all its forms. We value equity as a core part of our society and in the operation of our government. Unfortunately, too often indigenous communities, people of color, individuals with disabilities, recent immigrants, and others have been shut out from the opportunities

Executive Order 19-01 lays out a bold vision for Minnesota with the creation of the One Minnesota Council on Diversity, Inclusion, and Equity. As the order states, "disparities in Minnesota, including those based on race, geography, and economic status, keep our entire state from reaching its full potential." The Department of Human Rights, with its mission to eliminate discrimination, is uniquely positioned to be involved in this effort and to collaborate deeply with communities in this work. Minnesota will not continue to thrive as a state without a comprehensive approach to ensuring meaningful opportunities for all.

The Department's current budget is insufficient to proactively address the critical issues we face. For context, the Department's current staffing level is 15 FTEs fewer than it was in 1996, while the Department faces more complex issues in an increasingly diverse state and the Department has added duties, including enforcing Ban the Box (Minn. Stat. 364.021) and the Equal Pay Certificate of Compliance (Minn. Stat. 363A.44) program. A transformative investment in the Department is needed to allow us to make real progress in fulfilling our mission to make Minnesota discrimination free.

Proposal:

For Minnesota to effectively confront racial, gender, and other disparities, it is imperative to make a proactive effort to reduce discrimination and bias in education, employment, housing, and other areas through civic engagement, public education, and addressing specific cases of discrimination as they arise.

Proposal Area Specifics:***Civic Engagement - Maintain 1 FTE – \$134,500 in FY2020, \$156,500 in FY2021***

This proposal provides ongoing funding for MDHR's current Civic Engagement Coordinator position to continue work to reach targeted populations and geographic communities. The current Civic Engagement Coordinator position was funded in FY18-19 through one-time grant funding from the Bush Foundation. Seeing the success of MDHR's civic engagement efforts, the Department is seeking a general fund appropriations to continue and grow this work during the FY2020-2021 biennium.

The Civic Engagement Coordinator provides support for MDHR's civic engagement work to help ensure that Minnesotans are able to effectively and meaningfully engage with government, and that state government is meaningfully engaging with all of Minnesota's diverse communities. MDHR is requesting dedicated staff to do sustained community engagement, implement the state's civic engagement plan, and assist with targeted messaging to promote inclusion.

As part of our civic engagement work the Department would use \$10,000 of this funding annually beginning in FY2021 to create and administer a micro-grant program to capacity building by local units of government, human rights commissioner, and local diversity groups.

Regional Offices – 10 FTEs - \$1,313,000 in FY2020, \$1,363,000 in FY2021

The work of creating a more inclusive Minnesota can only effectively be accomplished in partnership with local communities. This proposal would open new regional offices in Bemidji, Duluth, and Worthington to build lasting relationships and serve as a base for regional outreach efforts. It would also add capacity to the Department's existing St. Cloud office. The staff of the regional offices will work closely with our civic engagement and outreach staff in convening events and meetings.

The presence of regional offices would help people of Minnesota access the resources of the Department. For Minnesotans facing discrimination, in person interactions are often helpful to build the trusting relationships needed in order to best provide assistance. For employers, landlords, and other in the community these offices will provide education and assistance that is highly accessible.

MDHR will work with other state agencies and others in seeking to co-locate or share resources where practical. The existing St. Cloud Regional Office is located in St. Cloud City Hall, providing centralized access to government services for individuals in that community. We would look for similar opportunities in Bemidji, Duluth, and Worthington. The St. Cloud Office will serve as a model for other offices and community partnerships with those cities.

Ensuring Opportunities for Individuals with Criminal Records in Housing and Employment – 1 FTE - \$121,500 in FY2020, \$129,500 in FY2021

The proposal includes funding for a staff position to work with employers, landlords, and the community to better understand issues of criminal records, risk, and recidivism. Staff would also work with individuals with criminal records who are having difficulty securing housing to understand their legal rights and possible solutions. Staff will also investigate claims, providing warnings, and conducting enforcement actions as necessary. This proposal also includes office space and per person IT costs for these positions.

Equity and Inclusion:

This proposal would impact all Minnesotans, including people of color, individuals with disabilities, LGBTQ individuals, and all other groups protected under the Minnesota Human Rights Act. It will help to reduce disparities proactively through greatly expanded education statewide on issues of diversity and inclusion. Regional offices will ensure that the Department has statewide reach, which is particularly critical as outstate Minnesota becomes increasingly diverse. Increased investigative capacity will help to take on complex discrimination cases, reducing bias in employment, housing, education and other areas. All of these efforts will help to reduce education, economic, and other social disparities for people of color, women, and other groups. Combating overt and systemic discrimination must be a part of a larger strategy to reduce these troubling disparities.

IT Related Proposals:

This is not an IT related proposal.

Results:

This proposal is for a significant enhancement of efforts in multiple areas of the Department's existing duties under the Minnesota Human Rights Act. Currently, the Department of Human Rights is not funded at even the minimum level needed to meet its primary duties under the Minnesota Human Rights Act, in particular in the area of education and outreach. This proposal will provide the resources for significant increases in the Department's proactive work in investigations, contract compliance, and education and outreach, the three primary duties under the Minnesota Human Rights Act.

This proposal will provide the Department with the capacity to improve measures of quantity, quality, and results. For example, the Department will have more regional offices, going from one to five, capacity to issue more case determinations, and conduct more audits of state contractors. The Department will put on more education and outreach events, issue more technical assistance pieces, and coordinate with an increased number of community partners.

The civic engagement and education positions in this proposal will create the capacity for ongoing external communications about all of these outcomes. Regional offices will create a forum to better and more consistently communicate and educate about the Department's work and equity issues, including outcomes, outside of the Twin Cities.

This proposal, in conjunction with other efforts, will also help to impact statewide results metrics like household income in communities of color. These are not listed as specific results here because of their systemic nature, but this proposal will contribute to those changes in conjunction with other public policy efforts.

Statutory Change(s):

None

Minnesota Department of Human Rights

FY 2020-21 Biennial Budget Change Item

Change Item Title: Operating Adjustment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	182	379	379	379
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	182	379	379	379
Maintain FTEs	2	4	4	4

Recommendation:

The Governor recommends additional funding of \$561,000 in the FY 2020-2021 biennium to maintain the current level of service delivery at the Minnesota Department of Human Rights

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

For the FY 2020-2021 biennium, the Minnesota Department of Human Right's portion of MNIT administrative overhead expenses is projected to increase. MNIT overhead expenses include HR, finance, procurement, enterprise project management, and security activities. These expenses are allocated to agencies based on their total IT spend and total # of dedicated MNIT staff as of fiscal year 2017.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the Minnesota Department of Human Rights this funding will cover known employee compensation growth, as well as increasing rent and IT costs.

Results:

This proposal is intended to allow agencies to continue to provide current levels of service and information to the public.

Minnesota Department of Human Rights

FY 2020-21 Biennial Budget Change Item

Change Item Title: OnBase Updates

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	75	75	75	75
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	75	75	75	75
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$75,000 in FY2020 and \$75,000 in FY2021 to maintain the Department's primary workflow and document management software, OnBase. This level of funding is needed to keep this software up to date, helping ensure productivity with this key technological tool, while maintaining security. Without this funding the Department would not be able to keep this system up to date.

Rationale/Background:

OnBase is the Department of Human Rights primary software system; providing electronic workflows, case management, and document storage for the work our contract compliance and enforcement units do to serve Minnesotans and the State's business partners. This system is a critical part of the agencies' productivity tools and keeping it up to date is critical for system security and stability.

Currently, the Department does not have a dedicated appropriation to fund ongoing maintenance needs for this system. This proposal would address that issue.

Proposal:

The proposal provides annual funding of \$75,000 for ongoing maintenance and routine upgrades to MDHR's case management system, OnBase. This ongoing expense has not been included in MDHR's appropriation in the past and has been funded through salary savings at the end of a biennium through Odyssey Fund agreements. This is not a sustainable source of funding for this critical need. OnBase is used by the Department's enforcement and contract compliance units to manage workflows and as a database. It is a critical productivity tool, providing ongoing systems maintenance is necessary to keep it functioning and secure.

This proposal requires no additional FTEs.

Equity and Inclusion:

This proposal would support the basic IT infrastructure that is required for the MDHR's work which impacts all Minnesotans, including individuals with disabilities, people of color, refugees, immigrants, LGBTQ individuals, and all other groups protected under the Minnesota Human Rights Act. The MDHR's work helps to reduce disparities proactively through greatly expanded education statewide on issues of diversity and inclusion.

IT Related Proposals:

This proposal is an IT related proposal, the addendum is included with this proposal.

(Dollars in Thousands)

Federal Agency and CFDA #	Federal Award Name and Brief Purpose	New Grant	FY2018 Actuals	FY2019 Budget	FY2020 Base	FY2021 Base	Required State Match or MOE?	FTEs
Equal Employment Opportunity Commission	Reimbursement from EEOC for investigation of dual jurisdiction cases.	No	350	430	424	430	No match; MOE provision in agreement	3.55
	Budget Activity Total		350	430	424	430		3.55
	Program Total		350	430	424	430		3.55
	Federal Fund – Agency Total		350	430	424	430		3.55

Narrative

The Department of Human Rights has a workshare agreement (contract) with the Equal Employment Opportunity Commission (EEOC) to investigate claims of discrimination that could have been filed with the EEOC. The EEOC reimburses the Department for this work based on the number of cases investigated. The Department has had a workshare agreement with the EEOC for over 30 years.

Maintenance of Effort Contract Provision:

The contractual language of the workshare agreement with the EEOC requires this money be used by the Department to fund its work and not be offset in other appropriations. The contract states, "The Contractor shall... Commit itself to maintenance of effort. Should the Contractor or the governmental body that provides its funds: a) reduce the contractor's resources in anticipation of or as a result of the EEOC contract funds, b) place restrictions on the use of its funds or c) revise the Contractor's operating procedures or regulations that impact on its ability to perform under its contract, the EEOC may consider it to be a material breach of this contract and, may among other things, reduce its funding of this contract or require the return of all or a portion of the funds provided by the EEOC under this contract."

Changing funding levels or trends that may impact future awards:

We do not anticipate major changes in the funding levels under this contract. The Department has had a workshare agreement since at least the early 1980's with the EEOC. This long-term, stable relationship for a specific service being provided by the Department to the EEOC makes it likely that this federal funding will remain at a similar level, barring major federal policy changes.

Major state funding related to federal awards:

The Maintenance of Effort contract provision is required as part of the contract, but there is no specific match amount dictated.

Basis for Estimates

Estimates are based on the projected number of dual jurisdiction cases investigated by the Department and the contractually established reimbursement rate of approximately \$700 per case. The Department and the EEOC agree on an estimated number of cases on a yearly basis. Past numbers guide these future estimates.

AT A GLANCE

- Health care programs (Medical Assistance, MinnesotaCare) — 1,171,735 people on average enrolled per month in 2017
- Supplemental Nutrition Assistance Program (SNAP) — over 429,000 people received help each month in 2017
- Minnesota Family Investment Program and Diversionary Work Program — 33,450 families with low incomes assisted per month in 2017
- Child support — more than 346,000 custodial and noncustodial parents and their 240,000 children receive services
- Child care assistance — more than 14,550 families assisted in a month in 2017
- Adults receiving publicly funded mental health services — 72,384 people per month in 2017
- Children and youth receiving publicly funded mental health services — 36,120 per month in 2017
- DHS Direct Care and Treatment provided services to more than 12,000 individuals in fiscal year 2017
- In FY 2017 DHS all funds spending was \$14.6 billionⁱ

PURPOSE

The Minnesota Department of Human Services (DHS), working in partnership with many others, helps people meet their basic needs so they can live in dignity and achieve their highest potential.

- We focus on people, not programs.
- We provide ladders up and safety nets for the people we serve.
- We work in partnership with others; we cannot do it alone.
- We are accountable for results, first to the people we serve and, ultimately, to all Minnesotans.

DHS contributes to the following statewide outcomes:

- **All Minnesotans have optimal health.**
- **Strong and stable families and communities.**
- **People in Minnesota are safe.**
- **Efficient and accountable government services.**

BUDGET

Represents all funds spending. Forecasted Programs includes: Medical Assistance 89%, MinnesotaCare 3%, Economic support programs 6%, and other health care programs 2%.

Direct Care and Treatment (DCT) includes Minnesota Sex Offender Program and State-Operated Services

Source: Budget Planning & Analysis System (BPAS)

Source: Consolidated Fund Statement

Minnesota has a strong tradition of providing human services for people in need so they can live as independently as possible, and of working to ensure that Minnesotans with disabilities are able to live, work and enjoy life in the most integrated setting desired. DHS provides oversight and direction for most health and human services programs, making sure providers meet service expectations. Most services are delivered directly to people by counties, tribes, health care providers or other community partners. Some DHS employees provide direct care and treatment to people with mental illness, chemical dependency and developmental disabilities as well as to individuals civilly committed for sex offender treatment. Examples of our work include:

- Health care programs which purchase medical care and related home- and community-based services for children, seniors, people with disabilities and people with low incomes.
- Economic assistance programs which provide assistance to low-income Minnesotans to help them move toward greater independence.
- Services to children who have suffered abuse or neglect, to assure their safety and well-being, and early intervention services to children at-risk of abuse or neglect.
- Grant programs to support local delivery of human services for populations in need, including recent refugee immigrant populations, adults and children with mental illness or substance abuse problems, people who are deaf or hard of hearing, seniors and vulnerable adults.
- Direct care provided through a statewide array of institutional and community-based services. Services are targeted to people experiencing mental illness, chemical dependency, developmental disabilities and/or an acquired brain injury, some of whom are civilly committed by the court because they may pose a risk to themselves or others.
- Residential services and treatment to people who are committed by the court as a sexual psychopathic personality or a sexually dangerous person.

STRATEGIES

We have launched the DHS Strategic Plan 2018-2020, with four key initiatives and 12 goals. Work on 31 strategies under the goals will shape improved programs and services for the people DHS serves and will create a brighter future for Minnesota.

Key Initiative: People

Advance equity and reduce disparities by establishing an environment in human services that engages all people.

Goals:

1. Institutionalize an approach to decision-making, program and policy development, implementation and evaluation that improves outcomes and reduces health and human services disparities and inequities for the people we serve.
2. Identify and prioritize key barriers to advance efforts that promote equity and reduce disparities.
3. Build and strengthen the DHS workforce at all levels to better meet the needs of the people we serve.

Key Initiative: Services

Redesign, simplify, and integrate services to achieve positive and equitable outcomes.

Goals:

1. Begin Integrated Services Business Model (ISBM) implementation to create positive, consistent and equitable experiences throughout the human services system.
2. Strengthen authentic stakeholder relationships and establish new relationships to achieve equitable outcomes for the people we serve in the development of services.
3. Strengthen accountability and responsible stewardship through focusing on measurable outcomes affecting the well-being of the people we serve.

Key Initiative: Technology

Implement and support effective and timely technologies through strong partnerships to improve outcomes for the people we serve.

Goals:

1. Improve the timeliness and quality of IT delivery at DHS and for the people we serve.
2. Integrate technology to provide timely and actionable information, improve service delivery and support positive outcomes for the people we serve.
3. Pursue innovative approaches in technology development to better support service delivery.

Key Initiative: Finance

Prioritize financing reform and sustainability practices that ensure funds are used effectively and efficiently in order to support human services and improve outcomes for people.

Goals:

1. Promote economic efficiencies and financial stability by supporting a culture of innovation and continuous improvement within DHS.
2. Manage financial resources to support comprehensive and coordinated services.
3. Support partner- and community-informed financial decision-making that drives innovation in program design and delivery to improve outcomes for the people we serve.

The Department of Human Services' overall legal authority comes from Minnesota Statutes chapters 245 (<https://www.revisor.mn.gov/statutes?id=245>) and 256. (<https://www.revisor.mn.gov/statutes/?id=256>) We list additional program-specific legal authority at the end of each budget activity narrative.

Recommendation:

The Governor recommends a comprehensive approach to ensure Minnesotans have access to high quality health care by addressing rising costs, increasing access to care, providing access to comprehensive coverage, and encouraging stability in the individual market.

This proposal represents a measured approach that creates alignment and continuity of care across Medical Assistance, MinnesotaCare, and new health insurance products that will be available to Minnesotans who can't access employer-based coverage or Medicare. This approach starts by focusing on the immediate challenges of affordability and access related to prescription drugs and dental care. It eventually incorporates these efforts into a comprehensive option for individuals to purchase a health insurance product similar to MinnesotaCare in cases where the individual market fails to provide sufficient coverage, access, or low-cost sharing options.

Rationale/Background:

Many Minnesotans lack affordable and comprehensive health coverage options. According to the Minnesota Department of Health (MDH) Health Care Access Survey, Minnesota saw one of the largest one-time increases in the number of people without insurance between 2015 and 2017, rising from 4.3 percent to 6.3 percent. This leaves approximately 349,000 Minnesotans without health coverage.

Based on figures from the MDH report, Minnesotans main source of health care coverage is through employer-sponsored insurance (52.9 percent down from nearly 70 percent in 2001). The next largest segment of the health insurance market is public insurance (36.5 percent), which includes Medicare, Medical Assistance, and MinnesotaCare. The rest of Minnesotans with health insurance purchase their coverage through the individual market (3 percent), totaling approximately 155,000 people as of April 2018.

Many factors contribute to the increasing numbers of Minnesotans unable to afford or access to comprehensive coverage, including the significant rise of prescription drug prices which also represents a larger portion of health care spending for Minnesotans and the state budget. According Minnesota's All Payer Claims Database (APCD), spending on prescription drugs in Minnesota is rising at a rate much higher than growth in the number of prescriptions. Between 2009 and 2013, prescription drug spending rose 20.6 percent. In Medical Assistance these increases have been substantial, with pharmacy service spending per enrollee increasing by 56.6 percent between 2012 and 2016. These increases have been significantly more rapid in the managed care pharmacy benefit than the fee-for-service benefit.

Access to dental care is another major problem in Minnesota, especially in areas of greater Minnesota. While access to coverage is an important step, coverage has not translated into access to care, as nearly half (49.6 percent) of Minnesotans with dental coverage went without care because of the cost in 2017. This is particularly true for Medical Assistance and MinnesotaCare enrollees. More than 60 percent of children in the Medical Assistance program did not see a dentist in 2016 and 2017. Studies performed by DHS in 2014 and 2015 show that many dentists, and particularly small clinics in rural areas of the state are discouraged from serving public program enrollees. This is attributed to administrative complexity, overall low reimbursement rates and uneven and disparate rate structures that go to only a small number of providers that are already well beyond capacity to serve additional patients.

Even middle-income individuals go without dental coverage. Those that have coverage are required to pay significant amounts of cost sharing. For many, the cost of dental care prohibits people from accessing care, even when they need it. Without dental coverage, people access care in the emergency room and are often prescribed drugs to manage pain without resolution of the dental issue. A comprehensive approach that restructures both the administrative and payment structure for dental services is needed to address the lack of dental care access.

There is also lack of affordable coverage options for individuals whose family members have access to employer sponsored coverage. Individuals cannot access advanced premium tax credits or MinnesotaCare if they have access to “affordable” employer sponsored insurance. Employer sponsored coverage is deemed affordable if the employee’s contribution to the premium does not exceed 9.86 percent of his or her annual household income. However, due to an issue with federal law known as the “family glitch,” this threshold is only applied to coverage for the employee and not the employee’s family. If the coverage is determined affordable for the employee, it is automatically considered affordable for the employee’s spouse and dependents. As a result, some families are barred from enrolling in MinnesotaCare or advanced premium tax credits with the purchase of a qualified health plan, even though the employee’s share of the cost to cover their spouse and dependents exceeds the affordability threshold.

Under the Affordable Care Act (ACA), states are permitted to pursue federal authority to waive certain rules of the ACA. This authority under section 1332 of the ACA, also known as a *state innovation waiver*, allows states to develop and implement creative strategies for providing health care coverage, while retaining the basic protections and goals of the ACA. To receive federal approval, a state must show that its alternative approach provides coverage to as many residents and ensures access to care that is at least as comprehensive and affordable as would have been provided without the waiver.

Proposal:

The ONECare MN package offers a measured approach to increase access to comprehensive coverage options, encourage stability in the individual market, address rising health care costs and improve access to care and the health care experience for Minnesotans. The package leverages the state’s purchasing power to negotiate the costs of prescription drugs that are currently driving health care spending and addresses the oral health disparities that exist in the state, especially in Greater Minnesota.

This proposal initiates a phased and multipronged strategy to ensure Minnesotans have access to comprehensive health care coverage, address rising costs, increase access to care, and encourage stability in the individual market. These efforts will also align and improve the experience for enrollees and providers across Medical Assistance, MinnesotaCare, and Buy-In products.

This proposal will:

- Create a comprehensive health coverage option for Minnesotans statewide by offering a platinum-level buy-in product in Minnesota’s individual market for plan year 2023.

- Ensure health coverage choice and low-cost options by offering silver- and gold-level buy-in products in any region of the state where the individual market fails to provide options.
- Aligns the prescription drug benefits for all state health coverage programs and buy-in products under a common administrative structure to better leverage the state's purchasing power to bring down prescription drug prices, increase transparency and ensure access to comprehensive drug coverage statewide.
- Creates a simpler more and equitable model for purchasing dental benefits by establishing a common administrative structure across all public health coverage programs and buy-in products and increasing provider rates with more reasonable levels of patient cost sharing, providers serve all patients in their community, improving dental access and experiences for Minnesotans.
- Provide the necessary resources to analyze options to ensure affordable premiums and stabilize the individual market, including a study on risk adjustment.
- Remove the family glitch that occurs when employer sponsored coverage is deemed affordable for an entire family based on the cost of coverage for the employee only.

This proposal will be implemented in two phases. The first phase, beginning in fiscal year 2022, will establish a pharmacy benefit for public programs administered by DHS to make prescription drugs cheaper statewide and will expand access to dental care by restructuring the administration and payment rates, allowing the Buy-In products and other entities to be added in the second phase. In the second phase DHS will offer a comprehensive platinum product statewide in the individual market and silver and gold products in areas that experience substantial market instability or failures. This phase will require federal waiver approval.

Provide comprehensive coverage statewide

This proposal creates a comprehensive, platinum-level Buy-in product for consumers purchasing health insurance in Minnesota's individual market statewide. This product will have a 90 percent actuarial value (AV), which means that plan will cover 90 percent of the costs to the consumer. This product will offer a similar provider network and benefit set as the MinnesotaCare program, including dental, vision and behavioral health benefits. Consumer premiums will reflect the full cost of care and administrative costs to operate the program. Payments to providers for covered services will be set no lower than Medicare provider rates.

This product will be made available to consumers for coverage purchased during the 2022 open enrollment effective for services provided on or after January 1, 2023. As with the purchase of any qualified health plan (QHP), individuals eligible for advance federal premium tax credits subsidies will be able to apply this assistance to reduce the cost of the product.

Because the platinum product may attract people with higher health needs and medical expenses, the Department of Commerce will study its effects in the market and evaluate the potential use of state-based risk adjustment in the future.

Ensure choice and low-cost options

DHS will also offer an affordable and comprehensive Buy-in option for consumers purchasing health insurance in Minnesota's individual market in regions of the state that experience one or more market failures, as defined by the Minnesota Department of Health (MDH.) MDH and the Department of Commerce will begin to monitor market stability in January of 2022 to determine whether triggering conditions are met in any given rating region.

A market failure includes zero plan offerings in any county within a rating region and will trigger DHS to offer two Buy-in products in the individual market for that region equivalent to a gold-level and silver-level product. A gold level plan provides 80 percent actuarial value, and a silver level plan provides 70 percent actuarial value. This means that the plan will cover 80 percent or 70 percent of a person's health care expenses for the year,

respectively. As with the purchase of any QHP individuals eligible for advance federal premium tax credits subsidies will be able to apply this assistance to reduce the cost of the product.

These products will be made available to consumers after plan year 2024 if a market failure is declared in a rating region. Once a region experiences a market failure and the Buy-In products are triggered, the gold and silver Buy-In products will be offered for the next five years in that region. This proposal is intended to encourage increased carrier participation and also ensures that all Minnesotans, regardless of where they live, will have access to affordable, comprehensive coverage.

Plan selection and enrollment for the platinum Buy-In product available on MNsure during open enrollment in the fall of 2022 for plan year 2023. DHS will contract with a third-party administrator (TPA) to process claims and other administrative functions for the Buy-In product. Additionally, entities participating in the state's employee health plan, Medical Assistance, and MinnesotaCare, will be required to submit a good faith bid to provide TPA services for Buy-In products in circumstances where a market failure is determined, and a silver and gold product are offered on the individual market.

To make use of all possible federal funding opportunities, Minnesota will seek a 1332 waiver to capture the federal savings to improve affordability for consumers by providing premium assistance through advanced premium tax credits (APTC) and will work to lower cost sharing for those purchasing the platinum product. Federal payments and enrollee premiums will be sufficient to fund the program after the initial implementation.

This proposal would also address the family glitch by determining the affordability of employer sponsored coverage based on the cost of coverage for the entire family, rather than the cost of coverage for the employee only. Families who have access to employer sponsored coverage that is deemed affordable based on the cost of coverage for the entire family would continue to be barred from MinnesotaCare or advanced premium tax credits. However, families whose employer sponsored coverage is deemed not affordable based on the cost of coverage for the entire family would be eligible for MinnesotaCare starting in January 2021 or upon federal approval, or advanced premium tax credits with the purchase of a qualified health plan starting in January 2023 or upon federal approval. Families who receive coverage through MinnesotaCare under this proposal will be funded by the state and through enrollee premiums currently set in state statute.

Reduce prescription drug prices statewide

Under this proposal, DHS will administer the pharmacy benefit for Medical Assistance, MinnesotaCare, and later, the Buy-In for products beginning in plan year 2022. Currently, pharmacy benefits are either administered by DHS or Managed Care Organizations (MCOs) through their Pharmacy Benefit Managers (PBM). By moving management of the pharmacy benefit to DHS, the state will be able to leverage the negotiating power of more than 1 in 5 Minnesotans and have greater visibility and transparency into pricing and operations. This new pharmacy program will rely on the state's preferred drug list process, which is established and maintained transparently with consumer and provider input. Additionally, the state-based program will be designed with the potential to include other groups in the future, like employer-based or self-insured products to negotiate better prices for Minnesotans and the state.

Improve access to dental care

This proposal establishes a simpler and more efficient model for purchasing dental benefits through a common administrative structure, updated payment methodology, and increased provider rates. Implementing a streamlined structure for dental services will result in increased administrative efficiencies for providers and improve the consumer experience.

Additionally, this proposal will equalize payment rates by providing a 54 percent rate increase over the current Medical Assistance fee schedule for adult dental services and a 24.4 percent rate increase for children's dental services (children's dental services rates are currently higher than rates for adults). This investment is made

possible by repurposing both the critical access and rural dental add-on payments for an across-the-board increase that will remove the payment disparities among dental providers across the state.

Administrative simplification combined with an equitable rate structure that pays all dentists the same rates for providing the same services helps to create an environment where dental practices throughout Minnesota, including rural areas, can serve all people in their communities. Making dental care accessible to people in their local communities strengthens those communities by helping to reduce inequities that exist across racial, ethnic and socio-economic groups. Accessible local dental care also reduces the long distances people on state health care programs currently must travel to receive dental care, if they are fortunate enough to find a provider that will see them.

Fiscal impacts of the proposal

The proposal uses a one-time appropriation of \$112 million from the Health Care Access Fund to establish a program reserve to support any cash-flow, coverage, claims and liabilities for the program at the beginning and into the future. This allows DHS to meet any cash flow deficiencies related to the timing of the receipt of federal funds or enrollee premium payments by DHS and the need to expend funds to cover for administrative and enrollee costs.

Additionally, the Buy-In will require funding to maintain benefit and eligibility policy, manage federal waiver processes and reporting requirements, oversee financial operations, contract with third party administrators, and support rate setting and contracting processes. This estimate also assumes that, beginning plan year 2023 and thereafter, the consumer premiums will fund all ongoing costs necessary to manage the program and support ongoing maintenance of IT systems and operational and administrative functions. This includes any costs allocated to support operations related to offering these products in MNsure as a QHP.

This estimate also provides \$500,000 in funding for a study by the Department of Commerce around risk adjustment related to the platinum product potentially reducing rates for the other health plans in the individual market. Additionally, \$710,000 in funding for the Minnesota Department of Health is also included to ensure monitoring of the individual market in the various rating regions.

In the first phase of implementation, administering a uniform pharmacy and dental benefit will require funding for operations and IT systems.

The uniform pharmacy administration moves health plans' or MCO's spending on pharmacy to fee-for-service by identifying the portion of the capitation payment attributable to pharmacy and the effect of removing it from the managed care capitation payments. One dynamic that offsets the anticipated savings is the need to "buy back" some payments currently withheld from health plan payments. Under current law, a portion of health plan payments are withheld over the course of a calendar year and are paid in the following fiscal year. By carving this benefit out of managed care contracts, the state will no longer be delaying a portion of payments. This "buying back" of the withhold offsets state savings until FY 2024.

This proposal also assumes savings are realized on payments for drugs purchased through the 340B drug discount program. Currently MCOs are not able to capture the same level of cost savings that DHS does in Fee for Service (the portion of MA administered directly between DHS and providers) through the 340B program. In Fee for Service, payments for drugs dispensed by 340B providers must reflect the discounted price at which the provider was able to purchase the drug. DHS observes a 40 percent lower cost on 340B drugs in Fee for Service.

The proposal repurposes current dental add-on payments for the across the board rate increases in dental rates. These changes would be effective on January 1, 2022. The total fiscal impact on the program include some savings from lower managed care administrative costs which is offset by new administrative costs for a dental

administrator. This proposal also includes funding for one new full-time employee to manage the dental vendor contract.

This proposal results in a net reduction to MinnesotaCare payment rates from eliminating dental add-on payments and reducing administrative costs. The base rate for dental services in MinnesotaCare was increased by 54 percent during the 2017 legislative session.

Equity and Inclusion:

This proposal targets the more than 349,000 Minnesotans without health coverage today. There are considerable and persistent disparities in insurance coverage by race and ethnicity, income, age and education, as well as their impact on access to health care. In 2017, the following Minnesotans had the highest rates of being uninsured.

- Young adults, ages 18 to 34 (10.9 percent)
- Persons with incomes below 200 percent of the federal poverty guidelines (11.3 percent)
- People with a high school education or less (11.9 percent)
- People of color and American Indians (13.9 percent)

Additionally, people of color and American Indians have less access to employer-sponsored coverage (61 percent) compared to white Minnesotans (79 percent.) Disparities in employer-sponsored rates persisted across income levels, so even at the highest income levels (400 percent of FPL), access to employer-sponsored coverage was lower for people of color and American Indians. At the same time, obtaining health insurance through public coverage or the individual market, can be challenging financially, and in terms of time, documentation needed and complexity in enrollment process. This may also include efforts to ensure enrollment tools offered and the communication about the benefits of coverage are enrollee focused and designed based on individuals' needs or circumstances.

Minnesotans in rural areas are also more likely to purchase their own coverage than in urban counties, and since 2016, were more likely to obtain it through MNsure.

Minnesota living in rural areas also face unique challenges in accessing health care. While the proportion of Minnesotans on Medicaid Assistance and MinnesotaCare is greater in rural Minnesota, people in rural areas are also more likely to purchase their own coverage than in urban counties and obtain it through MNsure. This has been particularly concerning as the number of health plan choices are much more limited than metro areas, and some rural counties have been left with very few options for consumers. Additionally, according to MDH those in greater Minnesota are less likely to visit a doctor each year than those in urban communities due to transportation, not having insurance, and provider network gap issues. Nearly a quarter of rural Minnesotans are still struggling with paying medical bills, and 1 in 5 rural Minnesotans are not getting needed health services because of cost.

While the reasons people do not purchase insurance are complex, there are many ways to address these issues beyond bringing down health care costs. ONECare MN offers a multipronged measured approach to increase access to comprehensive coverage options, encourage stability in the individual market, address rising health care costs and improve access to care and the health care experience for Minnesotans. The package leverages the state's purchasing power to negotiate the costs of prescription drugs that are currently driving health care spending and addresses the oral health disparities that exist in the state, especially in Greater Minnesota.

IT Related Proposals:

This proposal will establish a prescription drug module and IT changes to implement the new rates and administrative structure for dental.

DHS will contract to establish the Buy-In product on MNSure and with a TPA to perform enrollment and claims functions for the Buy-In products.

Recommendation:

To support essential health care services and expand access to health insurance, the Governor recommends repealing the sunset on the two percent taxes on hospitals, surgical centers, health care providers, wholesale drug distributors, and those subject to the legend drug use tax contained in Minnesota Statutes, section 295.52. This proposal increases revenues to the Health Care Access Fund by \$970 million in the FY 2020-21 biennium.

The repeal of the tax sunset restores a provider rate increase that was established in 2003 to offset the cost of paying the provider tax on Medical Assistance and MinnesotaCare covered services.

The additional revenue creates a positive projected balance in the Health Care Access Fund. This balance triggers a statutory transfer to the General Fund of \$122 million per year.

Rationale/Background:

The Provider Tax is an essential source of funding for the Health Care Access Fund which provides health care coverage through the MinnesotaCare and Medical Assistance (MA) programs and supports public health activities through the Minnesota Department of Health. The reinstatement of the Provider Tax would also enable the Health Care Access Fund to support the Health Insurance Premium Subsidy and Health Insurance Tax Credit to stabilize and make the individual health insurance market more affordable.

Minnesota levies a two percent tax on revenue from patient services at hospitals, surgical centers and health care providers. This two percent tax also applies to the gross revenue of wholesale drug distributors as well as on amounts paid for prescription drugs by entities subject to the legend drug use tax.

Under current law, the provider taxes sunset on December 31, 2019. Repealing the sunset of the provider tax provides greater funding stability for the state's initiatives to promote access to health care, improve the quality of care, and contain health care costs. This proposal raises about \$237 million and \$733 million of revenue in fiscal years 2020 and 2021 respectively.

In 2003, the state legislature removed an exemption on taxing health care provider revenue for services provided to recipients of MA and MinnesotaCare and increased provider payment rates by two percent for these services subject to this tax. The November 2016 MA and MinnesotaCare forecast accounted for the provider tax sunset by removing the value of the two percent rate increase effective January 1, 2020. Repealing the provider tax sunset reinstates the two percent rate increase in MA and MinnesotaCare, resulting in a net cost to the state of just over \$39 million in FY 2020-21.

The current tax rate is 2%, although each year the rate must be reduced if the Commissioner of Management and Budget determines that projected revenue to the Health Care Access Fund is greater than 125% of expenditures and transfers, and the cash balance in the fund is adequate.

This proposal also amends existing nexus language and treats interest on overpayments for provider taxes consistent with other taxes. While current statutory language establishes nexus under the United States Constitution, this proposal addresses the impact of the United States Supreme Court decision in *Wayfair v. South Dakota* by providing for minimum economic nexus thresholds. Regarding interest, this proposal provides 90 days from the due date of the return or the date on which the original return is filed, whichever is later, before the amount refunded begins to bear interest.

Proposal:

This proposal repeals the sunset of the two percent provider taxes contained in Minnesota Statutes, section 295.52, to ensure funding for MinnesotaCare, Medical Assistance (MA), and public health activities through the Minnesota Department of Health. The repeal also supports proposals recommended in the Governor's budget to stabilize the individual health insurance market and make insurance more affordable. The individual market stabilization and affordability proposals include the Health Insurance Premium Subsidy and a Health Insurance Premium Tax Credit.

Equity and Inclusion:

Medical assistance is the largest expenditure from the Health Care Access Fund and currently provides health insurance coverage to over 1 million Minnesotans, who meet income limits. MinnesotaCare assists those most in need that are not already covered by existing programs. To be eligible for MinnesotaCare, individuals must meet income limits, not be eligible for Medical Assistance, and satisfy other requirements related to residency and lack of access to other health insurance. MinnesotaCare coverage is available to persons with incomes greater than 133 percent of federal poverty guidelines but not exceeding 200 percent, if other program eligibility requirements are met.

Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	865	7,326	10,419	10,637
FTEs	1.5	2	2	2

Recommendation:

The Governor recommends \$8.2 million in FY 2020-2021 and \$21.1 million in FY 2022-2023 to improve the Child Care Assistance Program (CCAP). This represents a 2.5% increase to the current budget for CCAP for FY 2020-2023. These investments support family stability and improve the safety and school readiness of children served in child care settings across the state. These investments also comply with federal requirements.

Rationale/Background:

The Child Care Assistance Program (CCAP) helps families pay for child care, allowing parents to go to work or go to school. It also helps ensure that children are well cared for and prepared to enter school ready to learn. CCAP serves approximately 15,000 families and 30,000 children each month. Over 60 percent of the children served are ages 5 or younger. Over 67 percent of all children served are children of color or American Indian children. An average of 3,265 providers are paid each month for serving children receiving CCAP. CCAP is administered by county and tribal agencies.

This proposal:

- Ensures families are receiving the benefits of 12-month eligibility;
- Prioritizes homeless families;
- Ensures out-of-state providers meet federal health and safety requirements; and
- Offers expanded due process rights for providers.

Program improvements

These changes are required under the federal Child Care Development Block Grant (CCDBG). In Federal Fiscal Year 2018, Minnesota received \$120.83 million from the federal Child Care Development Fund. These funds help pay for initiatives to improve the quality of child care and for the Child Care Assistance Program, which includes Basic Sliding Fee child care and Minnesota Family Investment Program child care. Most changes to CCAP were federally required to be implemented by Sept. 30, 2016. Minnesota did not comply with this timeline. The federal Office of Child Care approved waiver extensions for most unmet federal requirements by Minnesota until Sept. 30, 2018. Minnesota may face penalties, including a reduction of CCDBG funds, if it is not in full compliance with federal law soon.

Expanding due process for providers

Currently, appeal rights for providers who receive CCAP are limited to a few specific reasons (e.g. overpayments, fraud disqualifications established by an Administrative Disqualification Hearing). For example, under current law,

if a provider loses their CCAP approval for any reason other than being disqualified for fraud, the provider cannot appeal. Only families who use the provider and receive CCAP can appeal this type of adverse action.

Proposal:

These changes will improve the experiences that potentially all children and families have with the Child Care Assistance Program (CCAP). These provisions build on the changes passed by the 2017 Legislature to bring CCAP into federal compliance. This proposal:

Ensures that families do not lose assistance during their 12 month eligibility period by:

- Eliminating the six month limit on Portability Pool for families who move between counties. It is federally required to continue assistance until the family's next redetermination. This provision ensures families do not lose eligibility due to current Portability Pool time limits and meets federal requirements. This change is effective 12/02/2019.
- Making it easier for families who received Minnesota Family Investment Program/Diversions Work Program (MFIP/DWP) to continue receiving child care once MFIP/DWP ends. Families who received MFIP/DWP for at least one of the last six months will qualify for Transition Year child care. It is federally required to continue assistance until the family's next redetermination. This provision meets federal requirements by ensuring all families who received MFIP child care will meet the Transition Year child care requirements. Some families who have not received MFIP child care will qualify for Transition Year child care if they received at least one month of MFIP eligibility in the last six months. This provision also maintains program simplicity. This change is effective 03/23/2020.
- Continuing child care eligibility until the family's next redetermination when a child turns 13 years old or a child with a disability turns 15 years old. It is federally required to continue assistance until the family's next redetermination; this provision meets this federal requirement. This change is effective 06/29/2020.

Makes child care available and accessible to more children experiencing homelessness by:

- Creating an expedited five business-day application process for families who are homeless. Proof of eligibility would be required within three months (but not prior to approval) or assistance would end. It is federally required that states expedite applications for families who are homeless, including processing applications faster and prior to receiving proof of eligibility. This provision meets federal requirements. The federal rule generally requires that assistance be provided for at least three months; therefore, proof of eligibility could likely not be required sooner than three months. States have discretion to determine the processing timeframe. The five day limit aligns with expedited SNAP issuance. This change is effective 09/21/2020.
- Exempting families experiencing homelessness from activity requirements during the three month period following application. Care would be approved for up to 30 hours per week. This provision is not a federal requirement, but aligns with federal direction to prioritize children who are homeless. Families would need to meet activity requirements within the three months for child care eligibility to continue. This change is effective 09/21/2020.

Ensures that children are cared for in safe, nurturing environments by:

- Requiring that out-of-state providers meet federal health and safety requirements to receive Minnesota CCAP payments. It is federally required for providers to meet health and safety standards. This provision meets federal requirements, and has no cost. This change is effective 07/01/2019.

Expands due process rights for providers, effective 02/26/2021. An increase in provider appeals from fewer than 25 to approximately 400 is estimated. This proposal adds two FTEs to the Appeals Division, as compared to the 31 current full-time and six part-time judges. The expansion occurs by:

- Retaining all current due process rights for providers and adding additional due process rights for all other adverse actions CCAP may take against a provider.

- Transferring appeal rights, for adverse actions against the provider, from families to providers who have the knowledge to argue on their own behalf.
- Giving providers the right to either a fair hearing or an administrative review:
 - An administrative review will occur when payments are suspended due to a fraud investigation. In situations where a criminal conviction or an administrative disqualification is pending, this gives providers due process rights without compromising future actions. This mirrors current policies and procedures for health care providers.
 - A fair hearing will occur for all other adverse actions. When a provider's CCAP registration is closed due to a licensing action, the fair hearing occurs after the licensing issue is resolved.

Equity and Inclusion:

People of color are disproportionately likely to be poor in Minnesota. For instance, the poverty rate for African Americans in Minnesota is higher than that of African Americans in Alabama or Mississippi.^[1] Therefore, people of color are disproportionately likely to turn to forms of public assistance, such as child care assistance, because of financial crises. Program complexity adds to the stress already imparted by poverty and discrimination experienced by the people we serve. Access to child care, specifically high quality care, may improve disparities in school readiness.

Because over 67% of the children served by CCAP are children of color or American Indian children, proposals that improve the program for positively impact children of color or American Indian children.

Monthly averages, by percent, of children by race and ethnicity in the Child Care Assistance Program

State Fiscal Year	African-American	American Indian	Asian/Pacific Islander	Hispanic / Latino	Multiple races	White	Unknown
SFY18	52.9	1.2	1.6	5.1	6.4	28.5	4.2
SFY 17	51.4	1.2	1.8	5.2	6.4	29.8	4.2
SFY 16	48.4	1.3	2	5.5	6.8	31.9	4.1
SFY 15	46	1.4	2.1	5.7	7	33.8	4

IT Related Proposals:

The Minnesota Electronic Child Care Systems, or MEC², the automated case management computer system that supports the Child Care Assistance Program, will need to make changes to implement most of these proposals. Costs include \$343,000 in FY 2020-2021.

Results:

Children who participate in high-quality early care and education are more likely to have school success and positive life-long outcomes. The percent of children ages zero to five receiving CCAP who use providers eligible for the higher rates for quality has increased from 29 percent in 2013 to 52 percent in 2018. In 2014 providers with a Parent Aware rating of Three- or Four-Stars began receiving the CCAP higher rates for quality. Previously, only providers with certain accreditations and family child care providers with certain credentials were eligible for the higher rates for quality.

^[1] State Health Facts, the Henry J Kaiser Family Foundation, using the US Census Bureau's March Current Population Survey Data, 2017.

The policies in this proposal work to keep children in child care with fewer disruptions and more consistent schedules. This will allow more families to choose high quality care for their children, and encourage high quality providers to serve more children receiving child care assistance.

Growth of Quality Care Use among Children Receiving CCAP Ages 0 to 5

Child's Provider Credentials	2013	2014	2015	2016	2017	2018
Provider holds Parent Aware 3-4 Star*	NA	28%	34%	40%	43%	48%
Provider holds Accreditation*	29%	8%	6%	5%	5%	4%
Provider holds Parent Aware 1-2 Star	NA	NA	NA	8%	6%	6%
Standard Care	71%	64%	60%	47%	46%	41%

* *These providers are eligible for CCAP higher rates for quality. Additional data notes:*

- Percentages based on unduplicated child count using July service month of each year.
- Any child using multiple providers during the service month is counted based on their providers' highest credential ranking. The ranking, from highest to lowest, is Parent Aware 3-4 Star, Accreditation, Parent Aware 1-2 Star, and Standard Care.
- NA indicates the CCAP data system (MEC²) did not track provider Parent Aware ratings of this type at this time.

Net Fiscal Impact = (Expenditures – Revenues)	2,772	8,064	16,694	34,256
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$10.8 million in FY 2020-2021 and \$51 million in FY 2022-2023 to update maximum rates paid to child care providers under the Child Care Assistance Program (CCAP). This represents a 10.4% increase to the current budget for CCAP in FY 2020-2023. Updating maximum rates supports family stability, provider stability and improved school readiness of children served in child care settings across the state. Additionally, this proposal will bring Minnesota into federal compliance until the next market rate survey is completed.

Rationale/Background:

The Child Care Assistance Program (CCAP) helps families pay for child care so that parents can work or go to school. It also helps ensure that children are well cared for and prepared to enter school ready to learn. CCAP serves approximately 15,000 families and 30,000 children each month. Over 60 percent of the children served are ages 5 or younger. Over 67 percent of all children served are children of color or American Indian children. An average of 3,265 providers are paid each month for serving children receiving CCAP. CCAP is administered by county and tribal agencies.

This proposal will impact approximately 70 – 80 percent of children and families served by CCAP and their providers. Every year that CCAP maximum rates are not updated likely increases the portion of a provider's price that is not fully covered by CCAP's maximum rates. Based on the 2018 market rate survey, statewide approximately 16.3% of licensed family child provider prices and 23% of licensed child care center prices were fully covered by CCAP's current maximum rates. When provider prices are not fully covered by CCAP maximum rates, costs may be passed along to the families on CCAP in addition to their copayment fees. This practice makes child care less accessible to low-income families even with child care subsidies.

Updating CCAP's maximum rates after the most recent completed market rate survey is required under the federal Child Care Development Block Grant (CCDBG). Most changes to CCAP were federally required to be implemented by Sept. 30, 2016. Because Minnesota has not updated the maximum rates using the most recently completed market rate survey, the federal Office of Child Care may require Minnesota to complete a corrective plan to bring our maximum payment rates into full compliance. Minnesota may face penalties, including a reduction of CCDBG funds, if it is not in full compliance with federal law 10/1/2019.

Proposal:

This proposal includes three sections:

1. Update maximum rates paid under the Child Care Assistance Program
2. Update registration fees paid under the Child Care Assistance Program
3. Change the frequency of the child care provider market rate survey to every three years

These changes will improve most payment rates to providers caring for children receiving child care assistance. These provisions will improve accessibility to child care for most families receiving child care assistance. These provisions build on the changes passed by the 2017 Legislature to bring CCAP into federal compliance.

Update maximum rates paid under the Child Care Assistance Program

The Governor recommends updating the maximum rates paid to child care providers to the greater of the 25th percentile of the 2018 market rate survey or the rates in effect at the time of the update. Many maximum rates would increase, some rates would stay the same, and no rates would decrease under this proposal. The rate increase will be updated September 23, 2019.

States are federally required to update payment rates on an ongoing basis to align with the results of the most recent market rate survey. This proposal will bring Minnesota into federal compliance until the next market rate survey is completed.

Update registration fee maximums paid under the Child Care Assistance Program

The Governor recommends updating the registration fees paid to child care providers based on the 2018 market rate survey. The Governor recommends setting separate registration fee maximums for licensed family child care and child care centers.

Registration fee maximums would be set at the greater of the 25th percentile of the 2018 recent market rate survey or the registration fees in effect at the time of the update. Registration fee maximums will be updated September 23, 2019.

The Child Care Assistance Program currently pays for up to two registration fees per child per year. States are federally required to pay registration fees that providers charge to private-paying families. Updating the registration fee maximums increases CCAP program costs by \$65,000 in FY 2020-2021 and \$74,000 in FY 2022-2023.

Change the frequency of the child care provider market rate survey

The child care market rate survey is currently conducted every two years. The most recent survey was conducted in 2018. This proposal would change the frequency of the market rate survey to every three years. Under this proposal, the next market rate survey would be conducted in 2021. Changing to a three year frequency aligns with federal requirements.

Additional federal funds

In Federal Fiscal Year (FFY) 2018, Minnesota received an additional \$29.9 million from the CCDBG through the Consolidated Appropriations Act of 2018. These additional federal funds are to support the full implementation of the CCDBG Act of 2014. This proposal commits these projected CCDBG funds to offset a portion of the projected costs to minimize the state investment. The proposal assumes these additional funds will continue only through FFY 2019 and that the total additional federal funds to support this proposal will be \$59.8 million. The CCDBG funds are sufficient to cover the costs of the increased rates for 2020-2021 and a portion of the cost for the 2022-2023.

Equity and Inclusion:

People of color are disproportionately likely to be poor in Minnesota. For instance, the poverty rate for African Americans in Minnesota is higher than that of African Americans in Alabama or Mississippi.^[1] Therefore, people of color are disproportionately likely to turn to forms of public assistance, such as child care assistance, because of financial crises. Access to child care, specifically high quality care, may improve disparities in school readiness.

Because over 67 percent of the children served by CCAP are children of color or American Indian children, proposals that improve the program for families and children, positively impact children of color or American Indian children.

Monthly averages, by percent, of children by race and ethnicity in the Child Care Assistance Program

State Fiscal Year	African-American	American Indian	Asian/Pacific Islander	Hispanic / Latino	Multiple races	White	Unknown
SFY18	52.9	1.2	1.6	5.1	6.4	28.5	4.2
SFY 17	51.4	1.2	1.8	5.2	6.4	29.8	4.2
SFY 16	48.4	1.3	2	5.5	6.8	31.9	4.1
SFY 15	46	1.4	2.1	5.7	7	33.8	4

IT Related Proposals:

The Minnesota Electronic Child Care Systems, or MEC², the automated case management computer system that supports the Child Care Assistance Program, will need changes to implement most of the proposals. The cost is \$138,610 in FY 2019 (state share of \$76,236) with \$37,670 (state share of \$15,247) ongoing.

Results:

The last time some maximum rates were increased was in 2014. Since then, on a statewide basis the percent of provider prices fully covered has fallen from about 30 percent to about 20 percent, as shown on the graph below. This proposal will result in approximately 70 – 80 percent of maximum rates increasing. This will allow more families to choose child care providers whose prices are fully covered by the CCAP maximum rates. This will create more accessibility for families receiving child care assistance.

Provider prices fully covered by Standard Maximum Rates statewide, by percent

This proposal will also increase the accessibility to quality child care programs. Higher maximum rates may increase families' access to high quality providers by allowing the maximum rate paid by the Child Care Assistance

^[1] [State Health Facts](#), the Henry J Kaiser Family Foundation, using the US Census Bureau's March Current Population Survey Data, 2017.

Program to fully cover more (or an equivalent proportion) of their prices as compared to the prices charged by all providers. This measure indicates the impact of quality differentials by type of care.

Specifically, the 20 percent differential allows the prices charged by center-based four-star rated metro providers to be fully covered by the maximum subsidy in the same proportion as the prices of all metro center providers. The higher maximum rates offer coverage of the prices charged by all other types of quality providers at higher levels than the standard maximum rates.

Prices fully covered by Standard and Quality Differential Maximum Rates – 2018

Minnesota Statutes, Chapter 119B

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Child Care Assistance Program Basic Sliding Fee Waiting List

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures				
Revenues	7,821	17,901	17,901	19,201
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	7,821	17,901	17,901	19,201
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$25.7 million in FY 2020-2021 and \$37.1 million in FY 2022-2023 to provide child care assistance to families on the waiting list for Basic Sliding Fee Child Care. This represents a 5.9% increase to the current budget for the Child Care Assistance Program (CCAP) for FY 2020-2023. These investments support family stability and improve the safety and school readiness of children across the state.

Rationale/Background:

The Child Care Assistance Program (CCAP) helps families pay for child care so that parents can work or go to school. It also helps ensure that children are well cared for and prepared to enter school ready to learn. CCAP serves approximately 15,000 families and 30,000 children each month. Over 60 percent of the children served are ages 5 or younger.

Basic Sliding Fee Child Care is a sub-program of the Child Care Assistance Program. Approximately 55 percent of children served through Basic Sliding Fee Child Care are children of color or American Indian children. Basic Sliding Fee Child Care is a capped allocation that is allocated to county and tribal agencies. Some agencies maintain a waiting list due to demand. As of December 2018, twenty-five counties had a waiting list.

Proposal:

This proposal provides additional funding to provide child care assistance to families on the waiting list for Basic Sliding Fee Child Care. A total of 1,948 families were on the waiting list in December 2018. It is estimated that approximately 1,000 of those families would be determined eligible if given the chance to apply. This proposal provides funding beginning in Calendar Year (CY) 2020 to serve approximately 1,000 additional families through Basic Sliding Fee Child Care.

The additional funding would be targeted to county and tribal agencies with a waiting list for Basic Sliding Fee Child Care. The funds will be distributed proportionately based on the average of the most recent six months of the waiting list. The partners needed to implement these changes include local agencies to process applications from families and administer CCAP.

The proposal includes reinvesting \$2.6 million of underspending from the CY 2018 Basic Sliding Fee Child Care program. Although there is an overall need for the program, individual counties and tribes often underspend allocated funds as they balance meeting the needs of families and the financial obligation of potential overspending of their allocations. This resulted in underspending in CY 2018.

The other sub-program of the Child Care Assistance Program serves families who are on, or who have recently exited, the Minnesota Family Investment Program. This program is included in the State's budget forecast. If the family lives in a county with a waiting list, they are able to remain on the forecast program until funds become available in the Basic Sliding Fee program. By eliminating the waiting list, these families will move into Basic Sliding Fee more quickly, which generates a saving for the forecast program.

Equity and Inclusion:

Access to quality child care can improve school readiness for children while also supporting parental employment. The achievement gaps in Minnesota between white students and students of color are some of the worst in the nation. Providing children of color with access to quality child care can help narrow that achievement gap. This proposal would provide access to child care for additional young children, including children of color.

The race and ethnicity of families on the waiting list for Basic Sliding Fee Child Care is not reported. The race and ethnicity of children currently on the waiting list may be similar to that of families receiving Basic Sliding Fee Child Care in recent years. A break down of that information is below.

Race and Ethnicity, by percent, of children receiving Basic Sliding Fee Child Care

State Fiscal Year	African-American	American Indian	Asian/Pacific Islander	Hispanic / Latino	Multiple races	White	Unknown
SFY18	39.9	1.1	1.7	6	7.1	39.3	4.9
SFY 17	37.7	1.2	1.6	6.1	7.2	41.5	4.7
SFY 16	33.8	1.3	1.9	6.1	7.4	45.1	4.4
SFY 15	32.8	1.4	2.1	6.6	7.3	45.6	4.2

Monthly average percentage of children by race and ethnicity served in Basic Sliding Fee Child Care during the state fiscal year.

Results:

The number of families on the waiting list for Basic Sliding Fee Child Care is at the lowest statewide level in over ten years. While the number of families on the waiting list has decreased, the number of counties that have a waiting list has increased. Under this proposal, the number of families on the waiting list would decrease to nearly zero for a period of time. Eventually, the number of families on the waiting list would likely begin to increase as additional demand for child care emerges.

Recommendation:

The Governor recommends enhancing attendance record keeping requirements, clarifying absent day billing requirements, establishing a method for calculating attendance record overpayments, allowing a penalty for failure to report decreases in attendance, and limiting retroactive eligibility within the Child Care Assistance Program (CCAP). This proposal requests funding for system changes to track attendance record keeping overpayments and limiting retroactive eligibility, which produce overall program savings.

Rationale/Background:

The Child Care Assistance Program (CCAP) helps families pay for child care so that parents can work or go to school. It also helps ensure that children are well cared for and prepared to enter school ready to learn. CCAP serves approximately 15,000 families and 30,000 children each month. Over 60 percent of the children served are ages 5 or younger. Over 67 percent of all children served are children of color or American Indian children. An average of 3,265 providers are paid each month for serving children receiving CCAP. CCAP is administered by county and tribal agencies.

Each of these proposals increases accountability and helps ensure funds are spent with financial and administrative integrity. The proposals related to attendance records, billing for absent days and holidays, and reporting decreases in children's attendance give the Department of Human Services (DHS) stronger legal standing to enforce existing laws and ensure clarity and predictability for providers.

Enhance attendance record keeping requirements

Licensing and CCAP require that providers keep daily attendance records for children receiving CCAP. Records must be kept at the site where care is provided, retained for at least six years, and produced immediately upon request. Keeping accurate and legible attendance records is important because records provide justification for billing and may be needed if children in care are exposed to infectious diseases.

The proposal clarifies that if a county or the commissioner requests attendance records, the provider must make the records available immediately, and attendance records not produced immediately cannot be introduced as evidence in any Fair Hearing or administrative disqualification.

DHS has also issued a Request for Information (RFI) to learn more about electronic methods for monitoring children's attendance as a possible new requirement for CCAP in the future.

Billing for absent days and holidays

Providers bill an absent day when a child does not attend care on a day they are scheduled and authorized to attend and the provider is open. Providers bill a holiday when a child does not attend care on a day they are scheduled and authorized to attend because the provider is not open. Current law allows payment for up to 25 absent days and 10 holidays per child per calendar year. This proposal clarifies that absent days and holidays must be marked on the billing form. Any dates billed as if a child is present where attendance records indicate the child was absent are an overpayment.

Method for calculating attendance record overpayments

Current law gives DHS and counties the authority to charge an overpayment when a provider violates attendance record keeping requirements. This proposal establishes a uniform method for calculating the amount of these overpayments. The overpayment amount assessed to the provider for each child will be equal to the daily rate for any day the provider fails to comply with attendance record keeping requirements.

Penalty for failure to report decreases in attendance

CCAP pays for hours a child is scheduled and authorized to attend (not attended hours). This aligns with federal and state laws. Current law: a) requires providers to report on the billing form when a child's attendance drops to less than half of their scheduled hours or days for a four-week period, and b) allows DHS and local agencies to close a provider's registration for a period of up to three months when a provider violates certain policies.

When a child has a significant decrease in attendance, CCAP may reduce the child's authorization in some cases. Having a penalty if a provider fails to follow the existing attendance reporting requirements increases the likelihood that the child is authorized for care that is actually needed.

Retroactive Eligibility

Current law allows retroactive eligibility for six months. Some families who request long periods of retroactive eligibility may not have used child care during the time requested. An informal survey of Employment Service providers and CCAP workers showed three months is enough time for a family to apply for MFIP, meet all requirements, and become eligible for CCAP. Three months also aligns with Minnesota Health Care Programs policy.

Proposal:

These changes are intended to address program integrity concerns including administrative errors, recipient potential fraud and misuse, and provider fraud. These changes potentially impact all families receiving child care assistance and the providers caring for their children. These provisions build on program integrity changes previously passed by the Legislature. The partners needed to implement these changes include MN.IT at DHS to update MEC², the Office of Inspector General at DHS to update their investigative procedures, and local agencies to change their practices for administering CCAP.

Enhance attendance record keeping requirements, effective 07/01/2019

Providers are currently required to keep attendance records. This proposal clarifies that:

- Creating and maintaining attendance records are conditions of payment for the Child Care Assistance Program.
- Attendance records must be accurate and legible.
- Any attendance records not produced immediately cannot be produced later (current law requires that records be provided immediately upon request).

Billing for absent days and holidays, effective 07/01/2019

Current law allows payment for up to 25 absent days and 10 holidays per child per calendar year. This proposal clarifies that a provider's failure to bill an absent day or holiday when a child does not attend results in an overpayment.

Method for calculating attendance record overpayments, effective 07/01/2019

Current law allows providers to be charged overpayments for violating attendance record keeping requirements but does not specify how to calculate the overpayment. This proposal:

- Simplifies the process for calculating attendance record keeping overpayments. Currently, workers assess the interaction between attendance records, CCAP rates, and payment policies to determine the overpayment amount. This proposal allows workers to subtract the maximum daily rate from the provider's payment for each day with a violation. It creates a standard method and standard consequence applied to all providers when this occurs, vs. current law which may or may not result in an overpayment.
- Reduces administrative burden for county and tribal agencies and promotes statewide consistency in how agencies calculate this type of overpayment.

Penalty for failure to report decreases in attendance, effective 07/01/2019

Current law requires providers to report on the Billing Form when a child's attendance drops to less than half of their scheduled hours or days during a four-week period. Current law also allows DHS and local agencies to close a provider's registration for up to three months when a provider violates certain policies. This proposal allows agencies to enforce a penalty when a provider fails to meet the existing requirement to report significant decreases in a child's attendance.

Retroactive Eligibility, effective 07/01/2019

Current law allows retroactive eligibility for six months. This proposal reduces the retroactive eligibility to three months.

Equity and Inclusion:

In 2017, more than 66 percent of all children served by CCAP were children of color or American Indian children. Accordingly, any impact on children and families receiving child care assistance is likely to disproportionately impact children of color and American Indians.

Attendance record keeping and billing are responsibilities of the child care provider. The proposals related to attendance record keeping and billing for absent days and holidays are expected to have a limited impact on individual children and families, including children and families from communities of color.

The proposals related to retroactive eligibility and penalties for failure to report decreases in attendance may increase out-of-pocket child care costs for children and families, including children and families from communities of color. DHS will work with stakeholders to minimize the likelihood of this occurring by creating strategies to inform MFIP families and the providers who accept families without a child care authorization about the three month retroactive period limitation and work with the provider community to continue education efforts about the importance of keeping attendance records.

IT Related Proposals:

System changes to MEC² are needed to track attendance record keeping overpayments and decrease the retroactive eligibility period for families. Costs include \$233,234 in FY 2020-2021 with the state share being \$128,279 for the necessary system changes.

Results:

The provisions related to attendance records and billing for absent days and holidays encourage providers to keep more accurate records. DHS will achieve greater accountability and ensure that tax dollars are spent responsibly.

Since 2016, the OIG has completed attendance record reviews on 165 centers. Of centers reviewed, 7% had significant attendance record violations that resulted in referrals for overpayments. Overpayments may occur when records lack required components (e.g. date care was provided, child's first or last name, and/or in- and out-times) or records are missing or unavailable.

Recommendation:

The Governor recommends \$44.8 million in FY 2020-2021 and \$65.1 million in FY 2022-2023 to increase the Minnesota Family Investment Program (MFIP) and Diversionary Work Program (DWP) cash grant by \$100 per month starting February 1, 2020. Funding for this proposal will come from the General Fund.

Rationale/Background:

The Minnesota Family Investment Program is the state's only cash assistance program to address poverty for families with children and pregnant women. The Minnesota Family Investment Program provides income support, food benefits, and employment services to low-wage workers with children. The annual earned income limit for a family of three receiving MFIP is \$26,784 per year.

The vast majority of parents turning to the Minnesota Family Investment Program and the Diversionary Work Program are low-wage workers. About half, depending on labor market conditions, are coming straight from a job. Another 30% have had jobs in the period just before applying for assistance. They are concentrated in the same four industries that account for the majority of workers using Supplemental Nutrition Assistance Program and Child Care Assistance Program benefits: hotel/restaurant, retail, temporary placement agencies and low wage health care and social services. Low-wage workers are two and a half times as likely to lose a job as higher wage workers, but only half as likely to receive unemployment insurance benefits, according to the federal Government Accountability Office.

The MFIP grant no longer provides a strong foundation for children and families to build economic well-being. Monthly cash assistance for a family of three in Minnesota is \$532 – a level unchanged since 1986. Some MFIP families also receive a \$110 housing assistance grant. Despite this, the number of homeless families with children has grown almost fourfold since 1986. In 1986, HUD fair market rent for a 2-bedroom apartment in the Twin Cities was \$480. Today, HUD fair market rent for the same apartment is \$1,151.

Children, who constitute 72% of the MFIP caseload, are often most at risk of experiencing poverty. According to the most recent five-year American Community Survey (ACS), 13.4% of Minnesotans below the age of 18, and 14.8% of Minnesotans below the age of five, were under the federal poverty level. This compares to just 7.3% of

those between the ages of 35 and 64, and just 7.2% of those over the age of 65.¹ The poverty line for a family of three is \$20,784 per year.

The current cash assistance levels provided by MFIP, even when paired with the \$110 housing assistance grant, are clearly no longer sufficient to provide a strong foundation for children and families to build economic well-being.

Proposal:

This proposal would increase the cash portion of the MFIP and DWP grant by \$100 per month for each household. This would be the first time since 1986 that the basic cash assistance for families with children has been raised. In 2013, the legislature created a \$110 a month MFIP housing grant for many, but not all, of the families receiving MFIP. This proposal would build on the progress made in 2013 with the housing grant by creating a cash benefit increase that applies to all MFIP and DWP participants.

DHS has convened a work group with staff from county and tribal human services agencies, local employment services agencies, Legal Services Advocacy Project, Children's Defense Fund, and Hunger Solutions Minnesota. This proposal is the top priority for the work group.

Equity and Inclusion:

The poverty rate for African Americans in Minnesota is more than four times higher than that for whites. The rate for American Indians is very close to four times higher than for whites. Unemployment rates for American Indian, Black, and Hispanic/Latino workers in Minnesota are 2 to 3 times the unemployment rates for White and Asian workers. Minnesota's economic disparities are reflected in the families who have to turn to MFIP in financial crisis.

- African Americans make up 27 percent of the MFIP caseload as compared to 5.8 percent of state residents.
- American Indians make up 6 percent of the caseload as compared to 1.1 percent of state residents.
- Overall, people of color and American Indians make up 62 percent of the MFIP caseload as compared to 9 percent of state residents.

In addition, women make up 81 percent of adults in MFIP households. By increasing the MFIP cash grant, we can help families of color, American Indian families, and women with children move beyond the level of deep poverty.

IT Related Proposals:

This proposal will require a change to the MAXIS system. The initial cost of this change is \$155,123, with a state share of \$85,318, and ongoing costs of \$31,025, with a state share of \$17,064.

Results:

One study found that for families with incomes less than about \$18,000 the effect of an additional \$1,000 on child achievement was almost double the effect for families with incomes over \$18,000 (Dahl and Lochner, 2012). This proposal would increase a family's income by \$1,200 a year.

The children whose families turn to MFIP during a job loss, a health crisis, family violence, homelessness or other events leave them in deep poverty would be positively impacted from a modest increase in the benefit amount. It would especially impact parents who get jobs but whose earnings are not enough to discontinue assistance. An increase to the MFIP benefit would help parents find more stable financial assistance as they

¹ United States Census Bureau, 2013-2017 American Community Survey Five-Year Estimates.

https://factfinder.census.gov/bkmk/table/1.0/en/ACS/17_5YR/S1701/0100000US|0400000US27|0400000US27.05000.

build up their hours and earnings. In 2018, an average of 90,736 people received cash assistance through MFIP and DWP in 31,737 families each month. Children make up over 70 percent of the people receiving cash assistance through MFIP and DWP.

The current grant levels keep children well below the deep poverty line, which the census bureau defines as living at less than half the poverty line (\$10,392 per year for a family of three).

Since 2008, the state has made incremental progress in improving benefits:

- Getting rid of the “family cap” – a law that had frozen benefits when families receiving assistance had a new baby (more than 15% of families had been affected by this policy)
- Decreasing benefits when a family included a disabled family members receiving SSI was ended in 2008. In 2015, almost 8,500 adults or children receiving SSI were in MFIP households.
- Increasing the earned income disregard which meant families with earnings were more likely to qualify to supplement those earnings with a small amount of MFIP assistance.
- Not counting up to \$100 or \$200 of child support received by a parent receiving MFIP assistance (affecting 18-19% of the families)
- Creating a \$110 MFIP housing assistance grant that now covers about 75% of MFIP families.

This proposal would continue that momentum. Increasing the cash portion of the grant would be the first action taken since 1986 to increase benefits for all families receiving MFIP or DWP benefits. For a family of three receiving the MFIP housing assistance grant, it would put them within \$124 a month of moving beyond deep poverty. If they are among the families also receiving child support payments, it could put them over the deep poverty line. This increase would create the foundation for future increments which could succeed in moving all families over that line.

Net Fiscal Impact = (Expenditures – Revenues)	1,643	2,517	2,754	3,007
FTEs	2.25	13	13	13

Recommendation:

The Governor recommends \$4.16 million in FY 2020-21 and \$5.76 million in FY 2022-23 to meet increased demand for child welfare workforce training and development and to meet expanded training required to implement the Family First Preservation Services Act of 2018 (FFPSA). This will be accomplished through the creation of a regionalized Child Welfare Training Academy and one-time funding to conduct a child welfare caseload study. Included in the Child Welfare Training Academy request are funds for 13 additional staff, phased in over two years, investments for the regional development hubs, and funds to expand a state-university partnership with the University of Minnesota to jointly administer the Training Academy. Also included in the request is \$400,000 for a workload/caseload study in 2020.

Rationale/Background:

The Governor's Task Force on the Protection of Children made several recommendations regarding the training of child protection workers, as well as a recommendation to decrease caseloads of child protection workers to 10 to 1. In response, the 2015 Legislature appropriated \$23 million to local county social service agencies to hire additional staff. However, despite the recommendations for additional training, no additional funds were appropriated for this purpose. The increase in staffing resulted in a significant increase in the demand for mandatory Child Welfare Foundation Training (CWFT). Per Minnesota Statutes § [626.559, Subd. 1a](#), new child protection workers are required to complete CWFT within their first six months of employment. However, the number of staff requiring new worker training has quadrupled in the last four years. Due to that increase, the waitlist for new staff to begin CWFT, which consists of 9 days of training over 3 months, grew from 2 – 6 weeks to nearly 6 months, meaning the system cannot support workers completing training within the required timeline.

If demand for CWFT continues at the current pace and no additional investments are made, the child welfare training system will be unable to provide training for experienced workers, resource (foster) care providers, and supervisors. This advanced training typically provides skill development in topics such as intake, investigations, screening, and safety-focused practice. It would also significantly impair the State's ability to provide the expanded training and support required to implement the FFPSA.

Simultaneous to the strains on the child welfare training system, Minnesota is experiencing dramatic increases in the number of children entering the child protection system. In 2014, there were around 26,000 children involved in screened-in child protection reports; in 2017, there were nearly 40,000.

The increases in children involved with child protection, and increasing work demands for each case as a result of recommendations by the Governor's Task Force on the Protection of Children, mean caseloads and workloads are

on the rise. Recent research by the University of Minnesota supports that workers in Minnesota are feeling the strains of high caseloads (Piescher, LaLiberte, and Goodenough, 2016). Higher caseloads lead to increased burn out (Thomas, Kohli, & Choi, 2014) and worker turnover (Social Work Policy Institute, 2010). Indeed, Minnesota's estimated turnover rate is close to 20 percent in the most recent year (2017), up from an estimated 5 percent turnover rate in 2013.

Worker turnover has both negative fiscal impacts and negative impacts on children's outcomes. The fiscal impact of worker turnover is estimated to cost an agency between one-third and two-thirds of a worker's annual salary due to ongoing recruitment and training costs (Social Work Policy Institute, 2010). More importantly, studies demonstrate that high worker turnover contributes to delays in timeliness of investigations, reduced frequency of worker visits with children, and a reduction in the percentage of children achieving permanency.

There are two key components to addressing the challenges faced by Minnesota's child welfare system. The first is related to caseload and workload. This is a key area of improvement recommended by the Governor's Task Force on the Protection of Children. However, there is currently little data on the number of workers or on the amount of time that the different components of work in child welfare require. The workload/caseload study will begin to address this challenge, including developing a process for the ongoing monitoring of caseloads and workloads. The second component needed is improvements to the training of the child welfare workforce.

Training is a key strategy to improve the department's ability to monitor and ensure consistency and quality of practice statewide. In addition to the fact that the current resources of the Training System are insufficient to address current workforce need for training, Minnesota's current system is centralized and relies primarily on face-to-face training, creating inefficiencies such as long travel times for both trainers and workers. The current system has a limited ability to track what trainees have learned. Further, there is no capacity to support the transfer of learning into practice through coaching and mentoring despite evidence that these strategies are the most effective means for adult learning (Brittain and Potter, 2009). Finally, the current training system has limited training that is specific to child welfare supervisors and is unable to provide supervisor training without additional investments.

Proposal:

To address the sharp increase in child welfare caseloads as a result of an increasing number of children and families involved with child protection, and a resulting increase in worker turnover, the Department proposes investment in the Child Welfare Training System to support the creation of a Child Welfare Training Academy. The Department also proposes a study to review and recommend guidelines on caseload size for both child protection workers and supervisors. These changes are expected to:

- Inform the development of guidelines on caseload size for workers and supervisors;
- Bring the Training System into compliance with statutory timelines for new worker training;
- Improve child welfare practice through training on evidence-based practices, as well as ensure consistency and stability in practice across Minnesota; and
- Increase retention, stability and well-being in the workforce to improve outcomes for children and families.

Training academy

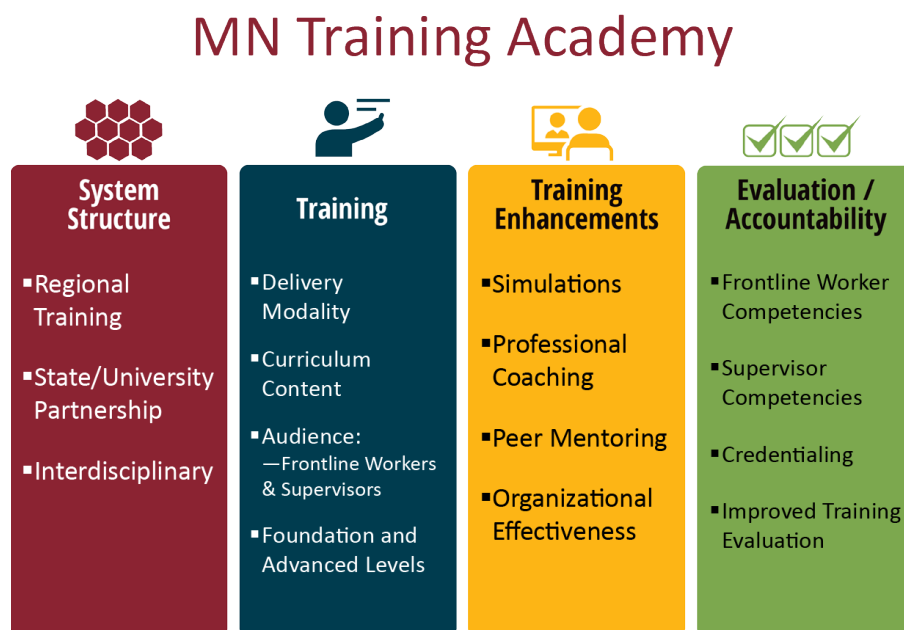

The training academy structure that is represented in this proposal lays the foundational infrastructure to implement a framework that was developed over 9 months (September 2015 – May 2016) by a multidisciplinary team of 26 experts and stakeholders from across the state. In the summer of 2016, the proposed training structure (see Figure 1) was then presented to 7 stakeholder focus groups around the state for feedback that has been incorporated into the final proposal design below. The current proposal would establish the first phase of the training academy (regionalized training, state-university partnership, simulations, credentialing) with other enhancements to be added in later phases (coaching, mentoring, organizational effectiveness, workforce well-

being). For more detail on the proposed training academy model and focus group feedback, see the 2017 [Report and Recommendations for Training System Reform](#) released by the Center for Advanced Studies in Child Welfare.

The training academy design will meet the requirement that states include in their five-year prevention plan a system that supports the child welfare workforce in order to use the funding available through the FFPSA. Additionally, the training academy design directly addresses recommendations 34, 55, 63, 65, 66, 69, 72, 73, and 91 in the [Final Report and Recommendations of the bipartisan Governor’s Task Force on the Protection of Children](#). The training academy will address the limits of the current training system, and will support both improved monitoring and consistency of practice and better retention and stability of the workforce through the following mechanisms:

1. **Regionalization** – the training academy would be administered through five regional training hubs. This will ensure timely access to adequate training facilities throughout the state and result in an overall reduction in the per trainer expenditures for travel and lodging. More importantly, regionalization allows training to be targeted to the needs of each region, taking into account varying demographics, resources, and practice outcomes. This was a top priority cited by county and tribal child welfare agencies.
2. **Training methods** – the training academy would include a coach-like approach to help apply classroom learning and assess worker competency. Most of the formal training content would be delivered via online classes to save worker time and keep them in the field as much as possible. Classroom time would focus on implementing evidence-based practices through skill development and application of new content, using simulated practice whenever possible.
3. **Certification** – a competency-based certification using Minnesota’s child welfare practice model will require all new child welfare workers to complete a competency-based knowledge test as well as a skills demonstration. Annually, workers will have to document the completion of ongoing training requirements and pass the appropriate knowledge test and skills demonstration for each professional development activity to certify competency.

Figure 1. Components of Child Welfare Training Academy

Infographic developed by the Center for Advanced Studies in Child Welfare (CASCW) 2018.

The training academy will require regionalized staffing, a shift of several major training functions (e.g. curriculum development, evaluation, trainer support) to the university partner, and greater focus on child welfare worker competency in safety-focused practice knowledge and skills based on Minnesota’s Child Welfare Practice

Framework. This strategy is designed with a four-year phased implementation of the training academy with infrastructure and initial staffing implementation proposed to start July 1, 2019. Particular attention will be given to strategies to address consistency of practice skills impacting child safety and prevention of removal. The training academy will use evidenced-based training strategies to ensure safety-focused skill development and application in realistic practice settings, and certification to ensure rigorous evaluation of worker readiness to practice competently.

There are currently 20 staff employed in Minnesota's child welfare training system. For comparison, other states that are comparable in geographic size, children served, and workforce employ 2 to 4 times as many staff. It is estimated that the department would need another 13 training staff to implement and maintain the initial phase of the proposed training academy.

- Colorado = 41 FTEs
- Washington = 45 FTEs
- Pennsylvania = 100 FTEs

The framework of the training academy is based on the expansion of a joint powers agreement with the University of Minnesota to collaborate in the administration of workforce training. Many other states have used this model successfully to leverage the strengths of the university partner in the design of curriculum, delivery of training to adult learners, and robust research methodologies. The local child welfare agencies, including 74 individual counties, four county partnerships, and two tribal initiatives that administer child welfare in Minnesota, are critical partners in this proposal.

Caseload/workload study

This proposal would also provide \$400,000 in one-time funding for a study of the child welfare workforce to measure both caseloads and workloads as there is currently no reliable method to measure in Minnesota given the data available on the workforce. The study will review and recommend a sustainable method for ongoing measurement of workload, appropriate caseload sizes, funding needed to meet those caseload sizes, and how funds should be distributed to promote consistent practice across the state. The Governor's Task Force on the Protection of Children recommended a caseload ratio of 10:1 for child protection workers and a staffing ratio of 8:1 for supervisors.

Breakdown Training Academy Investments

Training academy costs are eligible for federal Title IV-E reimbursement that is estimated at 42.78%. The federal funds are retained under Minnesota Statutes, § 626.559, subdivision 5. Federal Title IV-E reimbursement earned through this proposal will be reinvested in the training academy budget to reduce financial impact to the state.

The current 20 department training system staff would be redeployed into new roles within the new training academy model. New staff positions will phased in over time: 3 positions in FY 2020, and a total of 13 positions by FY 2023. These new positions are required to staff the regionalized model and ensure consistent content and delivery across regions.

Primary expenditures for the proposed additions to the training academy budget include:

- \$1.3 million Staffing (13 FTEs)
- \$364,000 Consulting contracts (RFP to third party for curriculum development/consultation and learning management system development/maintenance)
- \$1 million Operating expenses (technology support, networking support, software licenses, space rental, printing, employee development, trainer supplies, equipment, repairs to equipment, in state travel)
- \$2.6 million University partnership (additional staffing, contract management, curriculum development, evaluation, educational technology)

The above costs above are based on the 2023 budget when the training academy is fully operational. They are calculated prior to federal reimbursement. The state share is 57.26% or \$3 million.

The workforce study on caseload and workload accounts for \$400,000 of the FY 2020 request. This work will be subcontracted to an external evaluator through a competitive RFP process.

Equity and Inclusion:

All groups served by child protection will be impacted by the changes contained in this proposal. Populations served by child protection include all racial and ethnic groups in Minnesota, people with disabilities, and lesbian, gay, bisexual and transgender groups. Currently, African American and American Indian children are disproportionately served by the child welfare system, as are children with disabilities. There are also disparate outcomes for African American children and American Indian children for many measures being targeted by this proposal. In order to address these disparities, the proposed child welfare training academy will develop training that challenges workers to consider both implicit and explicit bias in their work. A portion of the budget for the training academy is specifically designated for consultation with cultural/community stakeholders and to design professional development experiences to address disparities and increase culturally responsive practice.

IT Related Proposals:

Not applicable.

Results:

Immediate results will include a decrease in waitlists for new worker training so that new workers can receive the required training within the statutorily-required timelines. Additionally, it is expected that this investment will decrease worker turnover and burnout, with a goal of reaching the previous 2013 rate of 5 percent turnover within two years of full implementation. The proposal also includes the development of a competency-based evaluation, as measured by knowledge and skills testing, which will allow the state to ensure adherence to Minnesota's established competencies regarding child welfare work with children and families. This investment in Minnesota's child welfare workforce is expected to impact areas of significant need in Minnesota, including improved timeliness of investigations, monthly caseworker visits for children, and permanency timelines.

FTEs	1.5	2	2	2

Recommendation:

The Governor recommends investing \$15.4 million in FY 2020-21 and \$25 million in FY 2022-23 for increased support to and expansion of the American Indian Child Welfare Initiative (Initiative) projects to strengthen tribal delivery of child welfare and child abuse prevention services to American Indian children and families. Currently, the General Fund appropriation for the Initiative is \$4.8 million annually and this proposal represents a 206% change to state funding for the Initiative over four years. The child welfare and abuse prevention grants for tribal delivery of these services is \$100,000 annually and the proposal investment represents a 26-fold increase in the child welfare and abuse prevention grants to support tribal delivery of these services over four years.

Rationale/Background:

When compared to white children, American Indian children experience a higher rate of involvement in the child welfare system. Despite efforts to reduce disparities, the problem continues. According to 2017 child welfare data, American Indian children:

- Have the highest rates of contact with Minnesota's child protection system.
- Are five times more likely to be reported as abused or neglected than white children.
- Are 18.5 times more likely to be placed in foster care than white children.

Recent data from Minnesota health care programs show American Indian infants and women are being impacted at alarming rates for neonatal exposure and dependency on opiates:

- American Indian infants are 7.4 times more likely to be born with Neonatal Abstinence Syndrome, as a result of exposure to addictive illegal or prescription drugs during pregnancy, than non-Hispanic white children.
- American Indian women are 8.7 times more likely to be diagnosed with maternal opiate dependency or abuse during pregnancy than non-Hispanic white women.
- Eighty percent of opiate-affected children born in Minnesota are Medicaid recipients.

The American Indian Child Welfare Initiative received legislative approval in 2005 and the first two Initiative programs with Leech Lake Band of Ojibwe and White Earth Nation became operational in 2008. The Leech Lake Band of Ojibwe and White Earth Nation are still the only Initiative tribes in Minnesota. Initiative tribes have built and sustained a full continuum of child welfare services, transferring statutory child welfare responsibilities from county to tribal governments for Initiative-eligible children (Minn. Stat. 256.01, subd.14b). Services include child abuse prevention, family preservation, a 24/7 child protection response system (intake and assessment), and foster care and permanency for families including reunification, transfer of custody, and customary adoptions. These tribal programs significantly expanded the services they offer by utilizing traditional and cultural values.

Families within these communities are benefiting from having services close to home and services offered by workers who have a unique understanding of American Indian families, history, and child rearing.

The initiative grants have not increased since they were implemented and both Leech Lake and White Earth have had to increasingly rely on tribal dollars to fund their Initiative programs. Partially as a result of the aforementioned opioid epidemic disproportionately impacting American Indian infants and women, the costs for the Initiative programs to Leech Lake and White Earth have grown substantially over recent years.

In addition to Leech Lake and White Earth, both the Mille Lacs Band of Ojibwe and Red Lake Nation seek to become Initiative tribes and have engaged in initial planning to take over child welfare services for Initiative-eligible children and their families. This proposal seeks (1) to continue to support Mille Lacs Band of Ojibwe in their planning for Initiative implementation; (2) to expand the Initiative to Red Lake Nation; and (3) to provide funding for early intervention services to tribes and tribal communities. This proposal supports tribal sovereignty by building tribal capacity to serve American Indian families in a way that is both culturally-relevant and more effective.

Proposal:

This proposal has three key interventions to improve child welfare services to American Indian children and families and to prevent American Indian families from entering the child welfare system.

Increased support for the Leech Lake Band of Ojibwe and White Earth Nation

This proposal will provide the Leech Lake Band of Ojibwe and White Earth Nation additional state funding to help cover more of the costs of out-of-home placement for Initiative-eligible children on the White Earth and Leech Lake reservations and provide funding for staff to adequately operate the initiatives. The current annual Initiative allocation is \$2.4 million for Leech Lake Band of Ojibwe and \$2.4 million for White Earth Nation. The allocation for each tribe was based on data from 2003 and has not increased since 2005 while operating costs, cost of living, and out-of-home placements have substantially increased for both tribes since then.

Investments made in support of a tribal child welfare delivery system mean that when American Indian children need to enter foster care, they are placed with people they know and trust. Their families receive culturally specific services, which are shown to produce improved outcomes and save counties money.

The proposal allocates new state general funds to the tribes as follows:

- Leech Lake Band of Ojibwe: \$1,600,000 operations (on-going)
- White Earth Nation: \$1,600,000 operations (on-going)

Expansion of the Initiative for Mille Lacs Band of Ojibwe and the Red Lake Nation

The proposed funding is to prepare for the transfer of child welfare cases for American Indian children who are eligible from Aitkin, Crow Wing, Kanabec, Mille Lacs, Morrison and Pine counties to Mille Lacs Band of Ojibwe, and for the transfer of child welfare cases for American Indian children who are eligible from Beltrami and Clearwater counties to Red Lake Nation.

Funding is provided for two years of planning for Mille Lacs Band of Ojibwe and eighteen months of capacity building for the Red Lake Nation to prepare for participation in the Initiative. The tribes are at different places in the planning process with Red Lake being ready to proceed sooner. The tribes will work closely with the Minnesota Department of Human Services (DHS) to define the scope of the program, conduct analysis of complex legal, program and financial issues, find mutually agreed upon solutions, and to assess and identify areas for capacity building.

Funding is also provided so that beginning January 1, 2021, Red Lake will transfer child welfare responsibilities from counties, providing a full continuum of services including family preservation, early intervention and out-of-

home care. Red Lake will hire and train a full complement of child welfare staff including intake workers, child protection workers, Title IV-E coordinators, and supervisors.

The Red Lake Nation has already been working in partnership with Beltrami County to plan for the transfer of cases to the tribe, which will include the tribe directly paying for the costs of foster care. Beltrami County receives \$3 million annually, under section 477A.03 subdivision 2b, in state aid for out of home placement costs through 2024. For aids payable in 2020 through 2024, this state aid will go directly to Red Lake Nation once the tribe has assumed financial responsibility for out of home placement costs under the out-of-home placement reimbursement program under section 477A.0126. The proposal costs have been adjusted for the anticipated receipt of state aids by Red Lake Nation.

The proposal allocates new state general funds to the tribes as follows:

- Mille Lacs Band of Ojibwe
 - \$400,000 (year one - planning)
 - \$400,000 (year two – planning)
- Red Lake Nation:
 - \$892,000 (year one – capacity building)
 - \$5,470,000 (year two – capacity building/implementation)
 - \$8,218,000 (year three – operation)
 - \$7,933,000 (year four – operation)

The department anticipates that expansion of the Initiative will:

- Build new working partnerships and governance arrangements with counties and tribes to improve client services;
- Decrease the disproportionate number of American Indians in out-of-home placement; and
- Improve child safety, permanency and well-being outcomes for American Indian children.

Establish American Indian Family Early Intervention Program

The American Indian Family Early Intervention Program (Early Intervention) intends to serve approximately 400 American Indian families in FY 20-21 and 900 families in FY22 and FY23. Indian families living on tribal reservations and in urban areas in Minnesota will have access to culturally appropriate early intervention services and resources to assist them in addressing issues that place them at risk of entering Minnesota's child protection system.

The American Indian Family Early Intervention Program will be modeled after the Parent Support Outreach Program. Through culturally specific early intervention, outreach and support services to American Indian families, child maltreatment will be prevented, and the number of American Indian children entering Minnesota's child welfare system will be reduced.

In support of the three key interventions outlined above, the proposal includes funding for DHS to hire two full-time staff to provide extensive technical assistance to the tribes. It is critical to the Initiative that these staff work across programs and information systems within the department and with MN.IT, as well as coordinating work with the two tribes. These staff positions will:

- Take a lead role in facilitating the coordination and collaboration among the tribes and counties;
- Work with tribal programs to identify areas for capacity building;
- Collaborate with the tribes to achieve mutual understanding of the complex legal, program and financial issues involved in the transfer of child welfare cases from counties to the tribes;
- Provide critical systems support to tribes in order to maximize their billing capacity for Title IV-E and Child Welfare Targeted Case Management; and
- Oversee and manage the Initiative contracts.

The department will work with tribes to review and assess the unique needs of the tribe to deliver services under Tribal Child Welfare Initiative. This will involve examining out-of-home placement costs, and administrative needs. The administrative review will include personnel, non-personnel, infrastructure and information systems needs of the tribes in order to operate Child Welfare programs. DHS will review the information and work with the tribes to address identified needs in the future.

Other department staff will support the transition by providing subject matter expertise in many areas of the child welfare system, including Title IV-E, foster care, adoption, Northstar Care for Children, child welfare training, federal relations, health care, child support and contracts.

Equity and Inclusion:

The American Indian Child Welfare Initiative has had a direct impact on reducing the number of American Indian children placed by the Leech Lake Band of Ojibwe and White Earth Nation. We anticipate similar results by expanding the Initiative to the Mille Lacs Band of Ojibwe and Red Lake Nation. It is expected that Early Intervention will help reduce the disproportionate number of American Indian children in Minnesota's child welfare system. Funding for tribes to intervene before a child is removed will provide resources to Indian families to prevent child abuse and keep families together.

IT Related Proposals:

This proposal requires modification to the Social Service Information System and includes a MN.IT cost of \$755,038 (with a state share of \$453,022) to implement the changes.

Results of Tribal Child Welfare Expansion:

Expansion of the Initiative is expected to allow Mille Lacs Band of Ojibwe and Red Lake Nation to meet or exceed federal and state child welfare performance measures.

The Initiative tribes have produced a number of positive results on both federal and state performance measures. In 2017, the White Earth Nation exceeded statewide performance on maltreatment recurrence, 24 month permanency, maltreatment in foster care, and foster care re-entry. When compared to American Indian children across the state, they also experienced lower rates of maltreatment re-reporting and 12-23 month permanency. Leech Lake Band of Ojibwe exceeded performance on maltreatment recurrence, maltreatment in foster care, family investigation 5-day response, and maltreatment re-reporting.

Maltreatment Recurrence – Of all children who enter foster care in the year, what percent are discharged to permanency (i.e., reunification with parents, caregivers, living with relative, guardianship, adoption) within 12 months of entering foster care?

Federal Standard	9.1% or less
Statewide Performance	9%
White Earth Performance	0% (exceeds statewide and federal standard)
Leech Lake Performance	0% (exceeds statewide and federal standard)

Maltreatment in Foster Care – Of all children in foster care during the year, how many children had a maltreatment determination while in care per 100,000 days spent in foster care?

Federal Standard	8.5 victimizations or less per 100,000 days in care
Statewide Performance	9.0 victimizations
White Earth Performance	2.5 victimizations (exceeds statewide and federal standard)
Leech Lake Performance	0 victimizations (exceeds statewide and federal standard)

Foster Care Reentry – Of all children who enter foster care two years prior to the reporting year who were discharged within 12 months to reunification, living with a relative, or guardianship, what percent re-enter foster care within 12 months of the discharge date associated with the entry episode?

Federal Standard	8.3% or less
Statewide Performance	17.3%
White Earth Performance	15.8% (exceeds statewide standard)

Permanency 12-23 Months – Of all children in foster who had been in foster care between 12 and 23 months on the first day of the year, what percent discharged from foster care to permanency within 12 months of the first day of the year?

Federal Standard	43.6% or greater
Statewide Performance	51.2%
White Earth Performance	51.4% (exceeds federal standard)

Permanency 24 Months – Of all children in foster care who had been in foster care for 24 months or more on the first day of the year, what percent discharged to permanency within 12 months of the first day of the year?

Federal Standard	30.3% or greater
Statewide Performance	28.8%
White Earth Performance	41.4% (exceeds statewide and federal standard)

Placement Stability – Of all children who enter foster care in the year, what is the number of placement moves per 1,000 days spent in foster care?

Federal Standard	4.12 moves or less per 1,000 days in care
Statewide Performance	3.8 moves
Leech Lake Performance	4.1 moves (exceeds federal standard)

Results of American Indian Family Early Intervention Program:

Data from the Parent Support Outreach Program indicates the following:

- Family improvements occurred most often in:
 - Household Relationships/Domestic Violence (85.7 percent)
 - Alcohol and Other Drug Use (75 percent)
 - Family Relationships (71.4 percent)
 - Social Support Systems (66.7 percent)

Program evaluation will be conducted by an outside research agency. Because the new program is based on the Parent Support Outreach Program, it is anticipated culturally specific programming for American Indian families will show further improvements to reduce disparities for American Indian children in Minnesota's child welfare system.

Recommendation:

The Governor recommends investing \$1.9 million in FY 2020-21 and \$1.4 million in FY 2022-23 for the infrastructure needed to implement new federal child welfare requirements of the Family First Prevention Services Act (FFPSA). The purpose of the FFPSA is to provide enhanced support to children and families and prevent foster care placements through the provision of evidence-based mental health and substance abuse prevention and treatment services, in-home parent skill-based programs, and kinship navigator services. The FFPSA also places stricter standards on congregate foster care settings and requires additional background studies for staff working in those settings. This proposal prepares the state for the opportunities and mitigates the risks of the Act by looking at ways to invest in upstream services and decreasing the risks in the future, including disruptions to children and families. In 2017, Minnesota had 16,593 children who experienced out-of-home care.

The infrastructure created by this proposal should result in more children being served with their families or kin prior to a potential removal from the home and placement in a foster care setting as well as moving more children from congregate foster care settings to more family-like settings. The FFPSA is complex, and the federal administering agency has not issued complete guidance for implementation. This budget page reflects current understanding of the law.

The recommendations in this budget proposal are organized into the following categories:

- Requirements that must be addressed during the 2019 session because the implementation date is prior to the end of the 2020 session; and
- Requirements that must be addressed during the 2019 session to allow time for adequate preparation for future compliance and for appropriate services to children and families.

The costs in this proposal reflect infrastructure needs. The Minnesota Department of Human Services is not yet able to present the additional costs for direct services under the FFPSA. The non-federal share of service expansion for FFPSA-allowed activities will need to be addressed by future legislatures as additional federal guidance is issued and state analyses are completed.

Currently, the general fund appropriation for state child welfare services administration is \$4.3 million. This proposal represents a 48% change to state funding for the biennium.

Rationale/Background:

The FFPSA permits optional prevention funding under title IV-E, the foster care and adoption assistance provision of the Social Security Act, for the delivery of evidence-based prevention practices, but only if title IV-E payment

limits are applied on placements that are not family foster homes. Federal payments will be limited to two weeks for eligible children placed in settings that are not family foster homes.

States may delay the effective date for up to two years for restrictions on the Federal Financial Participation (FFP) for children placed in settings that are not family foster homes; however, they will not be eligible for FFP for evidence-based prevention services until that delayed effective date. When Minnesota fully adopts the FFPSA, the state will no longer be eligible to receive federal reimbursement for the costs of children's placements in some types of group foster care settings that can currently be reimbursed. The Minnesota Department of Human Services has indicated a non-binding intent to delay the opt-in provisions for up to two years (until September 29, 2021) in order to better analyze the impacts and work closely with our county and tribal partners to transition to the new requirements as further federal guidance is provided.

Proposal:

To conform to the new federal law, the Minnesota Department of Human Services is requesting the following:

- A. Requirements that must be addressed during the 2019 session because the implementation date is prior to the end of the 2020 session:
 - 1. The state is required to complete background studies for any adult working in a children's residential facility. Each study will include fingerprint-based FBI checks and a name-based maltreatment check in any state where the person has lived in the last five years. The enhanced studies were required by September 2018. Minnesota is under a program improvement plan (PIP) that outlines the steps needed to come into compliance, including the Legislature approving these enhanced studies by July 1, 2019. This proposal creates a fee of \$51 per study to pay for the work associated with conducting enhanced checks. These fees are deposited into a special revenue fund and used to pay for staff time and criminal check fees.
 - 2. The state was required to allow title IV-E foster care room and board payments for children co-located with their parent in a licensed residential family-based substance use disorder treatment facility by September 30, 2018. While the Minnesota Department of Human Services issued a bulletin by this date, it will need to amend statute to make this requirement clearer for social service agencies and courts to administer.
 - 3. The state is required to document proof of foster care for youth aging out of foster care. This was required by August 9, 2018. A bulletin was published to bring the state into compliance with this requirement. Statutory language is needed for improved compliance.
- B. Requirements that must be addressed during the 2019 session, to allow time for adequate preparation for future compliance and for appropriate services to children and families:
 - 1. The state must conform licensing statutes to reflect allowable reasons that a family foster home can exceed the maximum number of foster children (6). While a two-year delay is permitted—the implementation date must be no later than September 29, 2021—it is necessary to implement this requirement in the 2019 legislative session.
 - 2. Three Family First Prevention Services policy positions are necessary to develop and expand the evidence-based prevention services array that meet Title IV-E requirements and creates linkages to Medical Assistance/MCO contracts for service payments. Two positions will focus on culturally appropriate prevention and early intervention services for American Indian families and for African American families. One FTE will focus on linking to Health Care – Medical Assistance/Managed Care Organization contracts for access and reimbursement to a full array of mental health and substance abuse placement prevention services. (3 FTEs)
 - 3. Two full-time positions are necessary to lead development of residential facility requirements and to develop policy regarding assessment standards for residential services in coordination with the Behavioral Health Division. (2 FTE)
 - 4. One foster care policy position is necessary to develop and maintain a statewide kinship navigator program information to assist kinship caregivers in learning about finding and using programs and services to meet the needs of children they are raising and to develop reunification policy consistent with the FFPSA. (1 FTE)

5. One fiscal operations position is necessary to develop and manage title IV-E claiming and federal reporting changes for Foster Care, Adoption Assistance, Guardianship Assistance, Prevention Services, and Kinship Navigator Program. (1 FTE)
6. One Licensing Division position is necessary to ensure that the impact on the regulatory part of the Minnesota Department of Human Services is fully considered and incorporated into the analysis of and planning for implementation of these significant policy changes. FTE would be a temporary unclassified position in FY20 and FY21. (1 FTE)

Federal title IV-E child welfare revenues to Minnesota currently total \$114 million annually. Title IV-E covers foster care, adoption assistance, guardianship assistance, administration, training, and automated systems. Eligible service payments are matched at 50%. Administration and systems are matched at 50% of eligible costs and training is matched at 75%. The state pays the non-federal share of some of these activities and the counties pay the non-federal share of others. For some programs, the state and county split the non-federal share. FFPSA prevention services and administration is matched at 50%.

Non-compliance with the new requirements will jeopardize Minnesota's IV-E claims by making certain activities ineligible, such as residential placements that do not meet the new more restrictive standards and losing IV-E completely if basic safety standards, such as background checks, are not carried out per the new requirements. In 2017, almost \$18 million was spent on children for residential treatment/congregate care placements. Federal reimbursement for these expenditures was approximately \$7 million. 3,073 children were served with these funds. A very limited number of the programs receiving these funds would continue to be eligible based on the specific populations they serve. All other programs would need to meet the QRTP standards. Because we do not currently collect data on all of the Qualified Residential Treatment Program (QRTP) standards, such as which programs are accredited and which are providing 24/7 medical care, we cannot assess which programs would likely meet them. Lost reimbursement that does result from a lack of alignment with QRTP standards would primarily fall on county budgets.

Equity and Inclusion:

Disproportionality among children experiencing out-of-home care remains an ongoing challenge for the Minnesota child welfare system, paralleling opportunity gaps experienced by children and families of color and American Indian children and families across the state.

- White children remain the largest group, both entering and continuing in care in 2017, accounting for 46.3 percent of enterers and 42.4 percent of continuers.
- African-American/Black children comprised the second largest number and percent of enterers, at 18.4 percent and American Indian children comprised the second largest group of continuers, at 24.1 percent.
- American Indian children were 18.5 times more likely, African-American children were more than 3 times more likely, and those identified as two or more races were 4.8 times more likely than white children to experience care, based on Minnesota population estimates from 2016 (rates of entry per 1,000 children in the population by race).

Number and percentage by race/ethnicity of children in care in 2017

Rate per 1,000 for children in care in 2017

This proposal should result in more children, including children of color and American Indian children, being served with their families or kin prior to a potential removal from the home and placement in foster care.

IT Related Proposals:

Implementing the FFPSA will have significant impacts on the Social Service Information System (SSIS). This proposal includes initial work for complying with requirements in the FFPSA. The initial analysis and changes to SSIS for FFPSA provisions is \$948,000, with a state share of \$569,000. These costs do not include costs associated with any prevention programs that may result for the FFPSA development work.

Results:

Implementing the FFPSA requirements should result in increased placements with relatives, increase the ability of relatives to care for children, and ensure families are able to provide the necessary supports for children who are candidates for being at imminent risk of entering foster care but who can safely remain in the child's home or in a kinship placement as long as services or programs that are necessary to prevent the entry of the child into foster care are provided. Efforts to support children and their families at risk of out-of-home placement should reduce

the actual number and length of placements and the resulting costs associated with placements. Interim measures to reach this long term outcome of reducing the number of children in care, and in congregate care settings in particular, are to ensure that the appropriate services are available for eligible children.

For a first interim measure, the Minnesota Department of Human Services has partnered with MMB to create a survey tool to begin mapping the available service array for eligible evidenced-based services for the FFPSA. This tool will support the prevention positions in identifying where there are gaps in service availability and where additional resources are necessary.

The public Minnesota child welfare data dashboard can be found at <https://mn.gov/dhs/partners-and-providers/news-initiatives-reports-workgroups/child-protection-foster-care-adoption/child-welfare-data-dashboard/> for the current status of existing child welfare measures, including data by race/ethnicity and by age of child. In addition, data is and will continue to be maintained on the number of allegations and substantiations of child maltreatment, as well as out-of-home placements of children, by race/ethnicity. Recent reports on child maltreatment can be found at <https://edocs.dhs.state.mn.us/lfserver/Public/DHS-5408J-ENG> and on out-of-home care and permanency at <https://edocs.dhs.state.mn.us/lfserver/Public/DHS-5408Ja-ENG>.

Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	363	850	918
FTEs	0	0	0	0

Recommendation:

Effective January 1, 2021, the Governor recommends extending automatic Medical Assistance eligibility to children who receive state-funded Northstar Foster Care and Kinship Care in Minnesota in order to provide equitable access to health care coverage for all children in foster care.

Rationale/Background:

Title IV-E of the Social Security Act grants automatic Medicaid eligibility to children who qualify for Title IV-E foster care or kinship care without consideration of financial and nonfinancial eligibility requirements while receiving foster care or kinship care. To qualify for Title IV-E, a child's removal home must have gross income within limits that are lower than 60 percent of the federal poverty guidelines.

In Minnesota, only 44 percent¹ of children in foster care and 31 percent of children receiving kinship care qualify for Title IV-E funding. The number of Title IV-E-eligible children, both in Minnesota and nationwide, is expected to continue to decrease over time because financial eligibility is tied to historic income limits that were established in 1986 and that do not index for inflation or cost of living.

Most children who receive non-IV-E foster care or kinship care qualify for Medical Assistance as low-income children. However, under Medical Assistance rules for low-income children, they must comply with all administrative requirements, which include submitting an application form, providing verification of income, citizenship or immigration status and completing annual renewals.

As a result, some children experience delayed enrollment or gaps in coverage when paperwork is late, pending or not submitted. Although county social workers and case managers help foster and kinship families and children with enrollment in public assistance benefits, health care is sometimes overlooked or verifications not submitted timely. Additionally, social workers and case managers must coordinate with county eligibility workers to open health care coverage. The communication process creates delays in eligibility and the potential for errors. Vulnerable foster and kinship care children who may be in need of physical and mental health services sometimes

¹ Minnesota Department of Human Services, Fiscal Reporting and Accounting, Title IV-E Ratios – Child Count Details, 07/25/2018

http://www.dhs.state.mn.us/main/idcplg?IdcService=GET_DYNAMIC_CONVERSION&RevisionSelectionMethod=LatestReleased&dDocName=Fiscal_Reporting#titleiv

go without immediate access to health care coverage, which puts the child's health at risk and is burdensome for foster families.

Proposal:

This proposal extends automatic Medical Assistance to children who receive foster care and kinship care assistance, but who are ineligible for federal IV-E funded assistance. This proposal would align Medical Assistance eligibility for children who receive Northstar Foster Care and Kinship Assistance with that for children who receive Northstar Adoption Assistance.

By extending automatic Medical Assistance eligibility to children in foster care and kinship care who do not qualify for IV-E funding, this proposal removes systemic barriers to health care. This would simplify the health care enrollment process as these children would not be required to complete a health care application, renewals or provide verifications. They would qualify for Medical Assistance based on receiving foster care or kinship care benefits.

Because most children who receive non-IV-E foster care and kinship care in Minnesota are already eligible for Medical Assistance, this proposal is not expected to increase enrollment significantly. However, it will simplify the enrollment process by eliminating any administrative delays or gaps. Aligning health care eligibility for all Northstar children reduces barriers and ensures streamlined access to coverage for all Minnesota children in out-of-home placements. It also reduces county agency administrative burdens, saving administrative time and associated costs.

Minnesota needs to obtain federal approval of an 1115 Medicaid demonstration waiver from the Center for Medicare and Medicaid Services (CMS) to extend automatic eligibility to children who receive non-IV-E foster care or kinship care. Given the time required for waiver approval and the changes required to DHS eligibility systems, this proposal is effective January 1, 2021.

Current enrollment data show that about 97 percent of the roughly 4,400 children in Minnesota not receiving foster care assistance have MA coverage. The fiscal estimate assumes coverage for the remaining 3 percent in this group or about 170 foster care children in FY2022.

Many children in foster care utilize targeted case management (TCM) services administered by the county human service agencies at an average cost of \$309 per month. Counties provide the nonfederal share of TCM for MA enrollees, but may be providing the service for children not enrolled in MA. Providing TCM services to additional MA children will result in additional costs or savings to counties depending on whether or not newly eligible children are currently receiving TCM funded without federal Medicaid funds.

Equity and Inclusion:

This proposal helps reduce disparities and improve equity by reducing barriers to enrollment in Medical Assistance for a vulnerable population and improving health outcomes. Children under the age of 21 who receive foster care and kinship care who are not eligible for Title IV-E funding would be impacted by this change. Children of color and children with disabilities are disproportionately placed in out-of-home care.

- In 2016, 15,004 children experienced 15,654 placement episodes.²
- From 2015 to 2016, there was a 10.2-percent increase in the overall number of children who experienced out-of-home care.³
- The number of children who do not qualify for Title IV-E foster care has increased over the past 30 years because income thresholds for the Title IV-E program are based on old rules in effect in 1986.

² [Minnesota's Out-of-home Care and Permanency Report, 2016](#), pg. 3, October 2017.

³ [Minnesota's Out-of-home Care and Permanency Report, 2016](#), pg. 3, October 2017.

- As of June 30, 2018, 56 percent of children in foster care did not qualify for IV-E funding⁴.
- 69 percent of children who receive kinship assistance do not qualify for Title IV-E funding⁵.
- White children remain the largest group, both entering care (48.7 percent) and continuing in care (42.1 percent) in 2016. However, disproportionality remains a significant concern for children in out-of-home placement.⁶

IT Related Proposals:

Changes to current eligibility requirements for children in foster care not receiving IV-E assistance will require changes to the MMIS and MAXIS systems. The state share of those costs is reflected in the fiscal detail table.

Results:

The results of this initiative will be measured by gathering and reviewing data that demonstrates the Medical Assistance enrollment of children receiving state-funded Northstar Foster Care and Kinship Care. One year following implementation, 100 percent of children who are receiving state-funded Northstar Foster Care or Kinship Care will be enrolled in Medical Assistance, for all months in which they receive Foster Care or Kinship Assistance.

FY 2020-21 Biennial Budget Change Item

Change Item Title: Expand and Strengthen School-Linked Mental Health (SLMH)

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	4,602	4,782	5,293	5,293
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	4,602	4,782	5,293	5,293
FTEs	2	3	3	3

Recommendation:

The Governor recommends expanding school-linked mental health services in order to serve approximately 7,000 more students. The proposal also provides administrative resources to provide on-going support and technical assistance to grantees, as well as measure the impact of the program.

Rationale/Background:

Many children with mental health conditions lack access to the treatment and supports they need. Untreated mental health conditions can be a significant barrier to learning and educational success. To address this, Minnesota has pioneered efforts to bring mental health services to students through the school-linked mental health program.

Under Minnesota's model of school-linked mental health, which began in 2007, community mental health agencies place mental health professionals and practitioners in partnering schools to provide mental health services to students. These mental health providers also consult with teachers and provide care coordination as well as offer classroom presentations and school-wide trainings on mental health issues. The current grantees provided 16,284 students with school-linked mental health services in 2017. In 2019, school-linked mental health services will be available in 953 school buildings (46% of total public-school buildings) across 288 school districts (52% of total school districts) located throughout Minnesota.

With appropriate identification, evaluation, and treatment, children and adolescents living with mental illnesses can achieve success in family life, in school, and in work. Outcomes data shows that when children receive services through school-linked mental health their mental health symptoms decrease and their overall mental health improves.

School-linked mental health services have also proven particularly effective in reaching children who have never accessed mental health services. Many children with serious mental health needs are first identified through this program, including 45 percent of children who met the criteria for Severe Emotional Disturbances. In addition, the program has been effective in addressing equity in access to mental health services. Students of color receiving school-linked mental health services were significantly more likely to be accessing mental health services for the first time compared to white students.

Proposal:

This proposal seeks to increase access to mental health services for students in Minnesota by expanding school-linked mental health grants by \$4.5 million each year in FY 2020 and FY 2021, and by \$5 million annually in FY

2022 and FY 2023 on-going. With the additional funding, school-linked mental health grantees will be able to serve approximately 7,000 more students over the next two years while sustaining the current reach of services. Under this proposal, grantees will also be able to utilize funding to develop the capacity to deliver school-linked mental health services via telemedicine in order to further expand access.

This increase in grant funding will also be used to train grantee organizations to implement best practices for working with children who have experienced trauma as well as specialized training for providers who serve younger children and their parents. Focusing on building the capacity and workforce in areas that have the most barriers to bringing school-linked mental health to their district, school building and students will continue into the next grant cycle.

In addition, the proposal requests funding for 2.0 FTEs in FY 2020 and 3.0 FTEs on-going in the Behavioral Health Division of the Community Supports Administration at the Department of Human Services. These positions will support the expansion of the program and allow for a greater focus on measuring and improving quality through data analysis, proactive support for grantee provider agencies, and will work collaboratively with other systems and agencies to find efficiencies.

This proposal provides \$30,000 annually to allow staff to travel throughout the state to provide technical assistance and monitor programs; \$50,000 annually for a technical contract with Wilder Research for access to their MN Kids Database to allow providers and staff to document and analyze utilization information; and \$10,000 annually for a statewide conference to provide training and sharing of best practices.

Finally, this proposal provides a clear statutory framework for school-linked mental health services and includes a study and evaluation of the program to assess the school-linked mental health grant program and develop recommendations for improvements. This study will be led by the Department of Human Services in consultation with representatives from the education community, mental health providers, and advocates.

Equity and Inclusion:

The school-linked mental health program has been adjusted in recent years to support an expansion of culturally and linguistically diverse services and providers. This includes the first tribal school-linked program, an agency contracting with state academies for deaf/hearing impaired and blind/visually impaired students, and allowing “practice groups” of providers to become eligible grantees in order to encourage small, culturally-specific providers access to the program to support students in their communities.

These grant dollars are intended to continue to develop and to sustain the statewide infrastructure necessary to ensure that children with mental health conditions, regardless of their insurance status or cultural background, receive evidence-based mental health services from highly-trained mental health professionals.

IT Related Proposals:

This proposal does not impact DHS IT systems.

Results:

Success of this proposal will be measured as follows:

- Increase in the number of school districts and schools accessing mental health services through the grant
- Increase in the number of school districts and schools utilizing telemedicine delivery of mental health services
- Increase in the number of clinicians available to provide mental health treatment in a school setting
- Increase in the number of students of cultural minority groups receiving mental health services through the grant
- Improve early identification and interventions of mental health issues in elementary and middle school settings
- Improve system coordination and access for students who have been expelled or suspended from school

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Children's Intensive Services Reform

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	2,866	5,419	7,129	11,058
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,866	5,419	7,129	11,058
FTEs	0	0	0	0

Recommendation:

The Governor recommends sustaining and expanding access to intensive children's mental health services by continuing to allow state funding to replace lost federal funding for certain children's residential facilities and expanding the state's Psychiatric Residential Treatment Facility bed capacity.

Rationale/Background:

This proposal is driven by both an urgent crisis and by increasing capacity within the current continuum of intensive services for children with the serious mental health issues.

Children's Residential Treatment Services

Since 2001, the Centers for Medicare and Medicaid Services (CMS) has allowed Minnesota to receive federal matching funds on residential mental health treatment for children on medical assistance. Counties are responsible for the non-federal share of this service for children on medical assistance who are not enrolled in managed care.

CMS recently required Minnesota to review children's residential mental health treatment programs with over 16 beds to determine if they qualified as an institution for mental disease (IMD) under federal law. DHS submitted its findings to CMS in April 2018. There are currently 8 children's residential facilities within Minnesota now considered to be IMDs, with a combined total of 363 beds.

When a person enrolled in medical assistance is placed in an IMD, the services they receive can no longer be matched with federal funding. To ensure people residing in an IMD continue to have access to needed care, Minnesota has a program that pays for medical assistance services for individuals when they are in an IMD using state-only funds, known as "Program IM".

Children's residential treatment services, however, had not historically been eligible to utilize Program IM funding. The 2017 legislature approved the use of Program IM funding to offset the lost federal funding for children's residential treatment services, but that authority is time-limited. As of May 1, 2019, the authority to use state-funding for these services expires and counties will be responsible for 100 percent of the cost for children's residential treatment services delivered in a facility that is determined to be an IMD.

Psychiatric Residential Treatment Facilities (PRTFs)

In 2015, the legislature approved children's Psychiatric Residential Treatment Facility (PRTF) services as a new Medical Assistance benefit. PRTFs are intended to serve children who require a more intensive level of care due to serious and complex mental health needs and other conditions.

The first PRTF provider began serving children in 2018 and has forty PRTF beds available. Two additional sites are expected to be operational by January 2019, bringing the total number of PRTF beds in Minnesota to 150. In the short time PRTF services have been available, demand is already outpacing the available bed capacity and there is a waiting list.

There are additional willing providers, but state law currently limits the number of PRTFs in Minnesota to 150 beds across up to six sites. Unlike children's residential treatment facilities, PRTFs are exempt from the IMD regulations under federal law.

Children's Intensive Services Study

In 2017, the legislature also passed one-time funding to support the development of recommendations for creating a more sustainable and community-driven continuum of care for children with serious mental health needs. DHS contracted with Wilder Research to conduct this analysis and a report is due to the legislature in February 2019. The analysis consists of an examination of Minnesota's current continuum and treatment models, interviews with providers and families, existing data from state and national studies, as well as models from other states in order to develop recommendations for Minnesota. Recommendations from this report will be utilized to direct implementation of this proposal.

Proposal:

This proposal implements short-term solutions to address the immediate pressures facing the children's mental health systems while supporting longer-term planning and reforms. This proposal has two components:

First, this proposal extends the authority to use state-funding to offset the lost federal funding for children's residential mental health services provided in a facility determined to be an IMD. This will be effective May 1, 2019, when the current authority to use state funding expires, and continue on-going to ensure sufficient time for longer-term planning and implementation of recommendations from the children's intensive services analysis that is underway.

Second, this proposal increases the current cap of 150 PRTF beds to 300 beds and eliminates the requirement that Minnesota has no more than six PRTF sites across the state. New PRTF providers would be selected through a competitive RFP process.

Medical assistance costs in this proposal include the state share for an increase of 80 new PRTF beds by July 1, 2020, and 70 more by July 1, 2023; and ongoing funding for services provided to children in IMDs beginning July 1, 2019, as well as allowing billing for services provided in May and June 2019.

This proposal also provides start-up funding to support new PRTF providers in bringing services online. The proposal refinances current administrative appropriations resulting from 2015 legislation to offset the annual \$400,000 in startup funds for new PRTFs. These funds can be used for administrative expenses, consulting services, HIPAA compliance, therapeutic resources (evidence-based, culturally appropriate curriculums), and training programs for staff and clients as well as allowable physical renovations to the property.

DHS will utilize current PRTF administrative funding for a contract consultant for a DHS Evidence-Based team to implement new PRTFs based on the findings of 'Children's Mental Health Intensive Services Study' and respond to the identified gaps in the service continuum for children. The consultant will support the DHS team to review and analyze the clinical models of PRTFs and other services for children and families through the evidence-based and

cultural responsivity lenses. The contractor will work with providers to develop an effective way to manage and communicate a statewide waiting list system. The contractor will also develop and implement an evaluation plan for PRTF and other services to facilitate adherence to fidelity expectations.

Equity and Inclusion:

The 'Children's Mental Health Intensive Services Study' contracted to be conducted by Wilder Foundation will evaluate the profile and demographics of children who are admitted to PRTFs and children's residential facilities in Minnesota. This will be used to evaluate equity in our current system and inform implementation of this proposal.

IT Related Proposals:

This proposal does not impact DHS IT systems. The functionality to reimburse both PRTFs and Children's Residential Facilities that are considered IMDs exists today.

Results:

- Average length of stay within a PRTF and CRF.
- Percentage of children getting mental health services who experienced a significant improvement in symptoms based upon the SDQ after 6 months of treatment (based upon teacher reports).
- Evaluate if PRTFs change the trajectory of kids entering the juvenile justice systems.

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Certified Community Behavioral Health Clinics Expansion

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	473	4,226	8,869	9,301
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	473	4,226	8,869	9,301
FTEs	2	4	4	4

Recommendation:

The Governor recommends transitioning Certified Community Behavioral Health Clinics (CCBHCs) from a demonstration project to an on-going service model within Minnesota's continuum of mental health and substance use disorder treatment. This is expected to result in five additional providers becoming CCBHCs during this budget period. The Governor also recommends providing resources to support the continuous improvement and long-term sustainability of this model.

Rationale/Background:

Minnesota is one of eight states participating in a federal demonstration project to test a new model of community-based mental health and substance use disorder care, known as Certified Community Behavioral Health Clinic (CCBHC). CCBHCs provide a comprehensive set of mental health and substance use disorder services for both children and adults including screening, assessment and diagnosis, treatment planning, outpatient and rehabilitative services. CCBHC providers are reimbursed under a daily, bundled, cost-based payment rate.

In the first year of the demonstration, over 17,000 children and adults received services through a CCBHC. Early results are very promising: CCBHCs are improving access to care, reducing wait times, improving coordination, expanding the scope of services and improving their ability to meet individual needs.

Minnesota currently has six CCBHCs participating in the federal demonstration project which began in July 2017 and ends in July 2019. Current state law allows the existing six CCBHCs to continue operating under this model and payment structure after the federal demonstration period ends, as long as federal matching funds are available. Minnesota has an 1115 waiver pending approval with the federal Centers for Medicare and Medicaid Services (CMS) to request that federal funding for this model continue beyond July 1, 2019. This will allow Minnesota to continue this promising model but only for the current six sites.

In addition, Congress recently approved several rounds of grant funding to support additional providers to become certified as CCBHCs and two clinics in Minnesota were awarded funding during the first round. While these new federal grants do not include a continuation or expansion of the current demonstration program, it does signal a willingness on the part of the federal government to allow states to continue testing this model and expanding the scope.

Proposal:

This proposal transitions CCBHC services from a demonstration project to a traditional Medicaid benefit, which is expected to result in five new providers becoming CCBHCs over the next four years. The five additional clinics will be certified in two cohorts.

The first cohort will include the two providers who were recently awarded federal grant funding. The federal grant funding for these two clinics will end on September 30, 2020 at which point they will become part of the state's Medicaid demonstration. The second cohort will be available to providers who receive start-up funding to support their transition to the CCBHC model, which will be awarded through a competitive Request for Proposals (RFP) process. Start-up grants will be awarded in January 2020 and the additional three clinics are expected to be certified and delivering services by January 2021. The costs for the state share of Medical Assistance costs once the new CCBHCs are operational is reflected in the fiscal detail table below.

Experience from the first six sites suggests that these providers will require grants of \$100,000 per CCBHC for the planning process. Since the first two programs received federal planning grants, they will not require state funds for this purpose. \$100,000 in SFY20, and \$200,000 in SFY21 will cover the costs of planning, staff training, and other quality improvements which are required to comply with federal CCBHC criteria for the remaining three sites.

This proposal will also simplify the reimbursement process for CCBHC services. Due to the rapid implementation timeline for the federal demonstration, CCBHCs are currently paid outside of the standard Medical Assistance payment system and DHS contracts with an outside vendor who reconciles claims. This proposal will create a structure for CCBHC payments similar to what is currently used for Federally Qualified Health Centers who receive a similar type of payment and eliminate the need to use an outside vendor to support provider payments. See the "IT Related Proposal" section below for more detail.

Additional DHS administrative resources will be needed to support certification reviews, data reporting, evaluation, rate determination, on-going technical assistance and to support clinic expansion. These positions will provide intensive and time-sensitive planning and coordination needed to develop cost-based rates, certify clinics, measure outcomes, assist providers, gather stakeholder input, and aid providers in participating in an intensive evaluation effort.

This proposal also provides additional funding to support continuous improvement of the CCBHC model. This will include funding for professional and technical contracts, data collection and evaluation, and innovative initiatives such as improving the capacity for CCBHCs to share electronic health records with other community providers in a manner that is secure and consistent with data privacy.

Lastly, this proposal would enact technical updates to the state statute governing CCBHCs.

Equity and Inclusion:

In 2016, DHS used the results of a CCBHC needs assessment, which noted significant demographic changes in different parts of the state, to develop the initial implementation of CCBHC services across eighteen (18) rural, urban and frontier counties. The assessment recognized increasing populations of color and persons who speak languages other than English.

Language barriers present a significant, additional challenge to obtaining care when persons needing treatment for mental health conditions and/or substance use disorder do not have access to treatment services in their native and preferred language. The needs assessment, required when Minnesota established the demonstration project, clearly showed that the current care system in Minnesota was not geared to identify and address the treatment needs of persons who speak languages other than English.

Representatives from these impacted groups have been engaged for consultation in a number of ways and venues:

- Representation on each CCBHC's governing board and/or advisory committee
- Client perception of care surveys administered at each CCBHC
- DHS staff involvement in the MH State Advisory Council, DHS Cultural and Ethnic Communities Leadership Council (CECLC), CCBHC statewide advisory committee, and intentional relationship development with the Veterans Administration Medical Centers and regional Continuums of Care for Ending Homelessness.

IT Related Proposals:

MNIT has determined that changes necessary to transition MMIS from the current complex payment structure to a simplified structure, similar to what is currently used for Federally Qualified Health Centers (FQHCs) will require \$20,000 in SFY 20 and \$9,000 in SFY 21; and additional maintenance costs of \$4,000 in SFY21, and \$6,000 annually on-going, beginning in SFY 22. The estimated duration of IT work is 10 months.

Estimated MNIT Costs

	Hours	Cost	State Share @ 29%
Business Analysis	360	\$ 28,339	
Technical	288	\$ 26,646	
Quality Assurance	193	\$ 15,193	
Project Management	<u>168</u>	<u>\$ 13,225</u>	
Subtotal	1,009	\$ 83,403	\$ 24,187
Contingency Fee		<u>\$ 16,681</u>	
Total		\$ 100,084	\$ 29,024
Annual Maintenance Fee:		\$ 20,017	\$ 5,805

Results:

To measure improvements in provider processes and clinical outcomes for CCBHC clients, 22 federally defined quality measures are required to be reported on. Examples of improvements to be measured include:

- Improved follow-up care after emergency department visit/hospitalization for mental illness
- Improved follow-up care after emergency department visit for alcohol use
- Improved initiation and engagement of alcohol dependence treatment
- Reduced readmission rates

The first-year results show that the performance for majority of the measures listed above has improved compared to the two years prior to CCBHC implementation. For example, for children between the ages of 6 to 21 years old, 84% had a follow-up with a CCBHC within 30 days following a hospitalization for a mental illness. This rate was 78% in 2015 and 80% in 2016. As the CCBHC work on improving their ability to use their Electronic Health Records (EHR) for population health management and clinical quality improvement, we anticipate the performance to continue to improve for these quality measures.

DHS, along with the six CCBHCs identified two ambitious goals to achieve during the CCBHC federal demonstration period in Minnesota. These goals were selected to address the lack of access to a full continuum of mental health substance use disorder treatment, especially in the frontier counties, in an integrated clinic. Improving access to the full array of services and support allows individuals to be healthy and successful in their community.

1. Add new benefits and expand access to existing services.
2. Expand access to communities of color and non-native English speakers.

The preliminary results show that the proportion of encounters and persons served by peers in CCBHCs have increased compared to before CCBHC implementation. The percentage of persons served by telemedicine has also increased during the first year of CCBHC compared to previous years. The number of persons being served did increase compared to previous years; however, the number recipients from communities of color and non-primary English speakers remained similar to previous years.

In addition, the CCBHC model has proven effective in expanding the capacity of providers to deliver services. During the first year of the demonstration, CCBHCs have hired 167 additional staff, an increase of 29% over their previous staffing. This includes psychiatrists, mental health professionals, substance use disorder treatment staff, service coordinators, and peer counselors. Many of these new staff are members of the cultural and linguistic communities that they serve. The current CCBHCs serve 18 counties. In these counties, the CCBHCs have expanded their clinic locations from 22 to 29, as well as providing more community services, such as school-based and crisis services, outside the four walls of official clinic locations.

Recommendation:

Effective July 1, 2019, the Governor recommends establishing new standards for substance use disorder (SUD) treatment providers participating in the state's Medicaid substance use disorder reform demonstration project. The proposal provides a payment rate increase for outpatient and residential SUD treatment providers participating in the demonstration and who are able to meet nationally recognized SUD specific program standards established by the American Society of Addiction Medicine (ASAM) within 24 months.

Rationale/Background:

In 2016, the Legislature directed the Department of Human Services (DHS) to recommend reforms to Minnesota's SUD treatment system. The resulting recommendations, submitted to the Governor and the state legislature in 2017, included adding new SUD services to the Medical Assistance benefit set, permitting direct reimbursement for SUD services in settings outside of treatment programs, and modifying the SUD placement system to allow clients direct access to the SUD provider of their choice following an assessment. The legislature authorized the new SUD services and adopted other statutory changes needed to permit direct reimbursement and modify the SUD client placement and assessment processes.

These reforms are an important first step in ensuring Minnesotans have access to high-quality SUD services; however, more still needs to be done to ensure a true continuum of care. DHS recently completed a legislatively mandated report on the payment structure for Minnesota's SUD continuum. One key finding of that report was that "the current business models in the SUD program are often narrowly focused and do not always promote continuity of care. While a few providers offer multiple levels of care or provide after care to the next level of care, most providers reported delivering only a single level of care and not having formal referral arrangements in place in order to move to less/more intense levels of care."

The 2016 legislation also instructed DHS to examine options for mitigating the impact of the federal "institution for mental disease" (IMD) rule which prohibits the use of federal Medicaid funding for care in behavioral health treatment facilities with more than 16 beds. In 2015, the Centers for Medicare and Medicaid Services (CMS) informed state Medicaid directors of a new opportunity for demonstration projects by waiving certain requirements under Section 1115 of the Social Security Act. Under these demonstrations, states implementing SUD service delivery reforms can receive federal Medicaid funds for enrollees receiving residential SUD treatment in an IMD. DHS analyzed the SUD delivery system and identified changes needed to meet requirements for a waiver of the federal IMD rule based on the existing federal guidance. DHS summarized those changes in its 2017 legislative report including the following:

- development of a comprehensive, evidence based benefit package. The package must include a full continuum of evidence based best practices and incorporate industry-standard benchmarks for defining medical necessity, covered services, and provider qualifications;
- implementation of a SUD specific multi-dimensional patient placement and assessment tool;
- adopting an independent medical review process to ensure services are medically necessary and placements are appropriate;
- completing an assessment of SUD provider access including the availability of providers enrolled in MA and accepting new patients; and
- incorporating nationally recognized SUD specific program standards into existing provider requirements for residential treatment facilities.

In March 2018, DHS submitted a demonstration waiver request to CMS seeking federal Medicaid funds for services to individuals receiving short term residential SUD treatment in an IMD. Based on feedback from CMS and providers, additional clarity in the state law, resources for implementation, and incentives for participating providers are needed to ensure the demonstration project can be successful.

Proposal:

This proposal codifies the provider standards necessary for Minnesota to implement the SUD demonstration waiver upon CMS approval. It also provides funding necessary to issue provider agreements, conduct a waiver evaluation, provide technical assistance, conduct medical reviews, and to establish standards of SUD service delivery that are consistent with ASAM criteria.

The IMD exclusion applies to services provided to individuals under age 65 residing in facilities that are over 16 beds and meet the definition of an IMD. Under this exclusion, no Medicaid payment can be made for services either inside or outside the facility for persons residing in an IMD. An IMD is a hospital, nursing facility, or other institution that provides treatment for people with mental illness¹. While roughly half of the 142 residential SUD treatment facilities licensed by the state are classified as IMDs, due to their relative size, these IMD facilities manage over three-quarters of the state's 4,000 residential SUD treatment beds.

Total spending on covered services for MA eligible individuals receiving residential SUD treatment in IMD facilities reached over \$75 million in FY2017. Approval of the state's pending waiver will provide new federal revenue to Minnesota to finance SUD treatment and other health care costs that are currently covered by state funds. About 2/3 of MA enrollees receiving SUD treatment are in the MA adult expansion group and eligible for an enhanced federal match (93% in 2019). With the enhanced Medicaid match, DHS anticipates that nearly three quarters of the cost of services for people residing in participating residential facilities will be covered by federal funds upon waiver approval.

CMS issued letters to State Medicaid Directors in July 2015 and November 2017 announcing the option for state demonstration projects to waive the IMD exclusion for residential SUD services. Medicaid demonstration waivers are granted at the discretion of CMS. Given that CMS sent multiple letters and approved 22 state waivers of the IMD exclusion for substance abuse treatment, this proposal assumes approval of the waiver. Therefore the proposal recognizes the new federal revenue as savings to the state budget and assumes a July 1, 2020 implementation date.

This proposal also includes rate increases for participating providers: a 15 percent rate increase for the treatment portion of the residential rate and a 10 percent rate increase for outpatient individual and group services,

¹ The IMD exclusion does not apply to services for children up to age 21 receiving treatment in an accredited children's psychiatric hospital or a children's psychiatric residential treatment facility (PRTF).

beginning July 1, 2020; and a 10 percent rate increase for comprehensive assessments, beginning January 1, 2021. These rate increases will apply to Medicaid services only, and not the non-Medicaid CCDTF services.

The Behavioral Health Division will need 3 FTEs dedicated to operationalizing the 1115 waiver and meeting federal requirements. This work includes policy development, provider communication, federal reporting, and completing the CMS required waiver evaluation and statewide assessment of SUD provider access. The proposal requires \$250,000 in FY 2020, \$600,000 in FY 2021 and \$900,000 annually beginning FY 2022 for the required waiver evaluation and access assessment, and to implement new post payment and medical review processes for residential SUD services. The project will also require 1 FTE within HCA's Health Research and Quality Division and 1 additional FTE in the licensing division.

Equity and Inclusion:

In 2015, Minnesota ranked first amongst all states when measuring the disparity-rate ratio of deaths due to drug overdose among American Indians relative to whites. Native American Minnesotans are five times more likely to die from a drug overdose than white Minnesotans. African American Minnesotans are twice as likely to die from a drug overdose as white Minnesotans. Both of these rate disparities—between Native Americans/whites and African Americans/whites—are the greatest rate disparity based on race in the United States.

The ASAM criteria does not directly aim to impact the disparities outline above. However, the ASAM criteria is a strengths-based, person-centered approach to substance use disorder treatment that takes into consideration the entire substance use disorder continuum of care. Overall, moving to the ASAM criteria will allow Minnesota to better ensure that people who need substance use disorder treatment are receiving the right care at the right time and are able move between levels of care without having their recovery disrupted.

IT Related Proposals:

The MMIS system will require changes to implement new rates that would apply to specific providers, beginning January 2020, and a second rate change for outpatient services and the comprehensive assessment that would start January 2021.

Results:

- Increase in people accessing the right level of treatment
- Increased number of people accessing treatment
- Integrated substance use disorder programs and primary care
- Increased engagement and retention of people accessing treatment

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Traditional Healing

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	2,493	2,500	2,500	2,500
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,493	2,500	2,500	2,500
FTEs	1	1	1	1

Recommendation:

The Governor recommends \$2.4 million annually in grants to tribal communities to provide traditional healing practices to American Indians and increase the capacity of culturally specific providers in the behavioral health workforce.

This proposal is part of a package of proposals recommended by the Governor to address rising rates of opioid use. The package of proposals is funded by new fees on opioid manufacturers, wholesalers, and entities that handle controlled substances.

Rationale/Background:

American Indians face significant health disparities. Life expectancy is 5.5 years less than other races in the United States, alcohol-related deaths are 6.6 times higher and drug-related deaths are 1.8 times higher when compared to all other races. Recent increases in children involved in child protection due to the drug epidemic has increased the number of American Indian children entering the foster care system and staying in care longer.

Traditional healing is a multi-generational, multi-disciplinary approach to reduce the chronic mental health and substance use disparities experienced by American Indians. Traditional healing is a holistic approach that looks at all aspects of living: emotional, physical, and spiritual to promote health/healing for American Indians. Conventional behavioral health interventions have not yielded the same outcomes within the American Indian population as they have for other populations. However, traditional healing for American Indians has outcomes that are equivalent to the outcomes for conventional interventions in other populations.

Proposal:

This proposal will provide \$2.4 million per year in grants to tribal communities to improve access, coordination and referral processes for traditional healing in Native communities across Minnesota. This proposal would provide grant funding to Tribal Nations across Minnesota and five (5) urban Indian communities. Each of these 16 sites will receive up to \$150,000 to support a full-time traditional healer, increase the capacity of culturally specific providers in the behavioral health workforce and increase access to culturally specific services.

DHS requires one full-time equivalent ongoing beginning in FY 2020 to oversee the initiative. This position will manage contracts with tribal nations and communities, provide oversight, as well as collect and analyze outcome and trend data to support continuous improvement of the program. Additionally, the position will act as a liaison to the Minnesota American Indian Mental Health Advisory Council. DHS and the Council will also monitor the

progress of Arizona, California, New Mexico and Michigan who are pursuing Medicaid funding for traditional healing models and will assess whether a similar approach will also be a good fit for Minnesota.

Equity and Inclusion:

The approach outlined in this proposal seeks to reduce the profound health disparities experienced by American Indians and Alaskan Natives. Planning and implementation will be designed in accordance with the State of Minnesota, Department of Human Services Tribal Consultation Policy. The project will be Tribally-driven and governed by the Minnesota American Indian Mental Health Advisory Council in partnership with the Minnesota Department of Human Services, through its Behavioral Health Division.

IT Related Proposals:

Performance data will be collected and tracked through the Mental Health Information System (MHIS). No new systems work is required.

Results:

DHS will measure the following indicators to understand the impact of the success of the grant funding:

- The number of alcohol/drug related deaths in the American Indian and Alaskan Native communities
- The number of Native people receiving detox services and inpatient and/or residential levels of care
- The number of Native people needing hospitalization(s) and death(s) by suicide
- The number of out-of-home placement, entrance into foster care and/or extended stay in the foster care system within American Indian and Alaskan Native communities
- The number of culturally-specific providers in the behavioral health workforce

Recommendation:

The Governor recommends allowing the use of Screening, Brief Intervention, and Referral to Treatment (SBIRT), a screening tool to identify individuals in need of substance use disorder (SUD) care, to authorize a limited number of substance use disorder treatment services in order facilitate more timely access to care.

Rationale/Background:

The 2017 legislature approved a package of reforms to modernize Minnesota's system of substance use disorder care. A key element of this reform was streamlining the process for accessing SUD treatment by permitting an individual to go directly to a service provider to receive an assessment for SUD treatment services rather than needing a referral from a county, tribe, or managed care organization. While this was an important step forward, there is still more that can be done to ensure people can access treatment in a timely fashion.

Screening, Brief Intervention, and Referral to Treatment (SBIRT) is an approach to the delivery of early intervention and treatment to people with substance use disorders and those at risk of developing these disorders. This approach has three components: 1) Screening: quickly assessing the severity of substance use and identifies the appropriate level of treatment; 2) Brief intervention: Increasing insight and awareness regarding substance use and motivation toward behavioral change; and 3) Referral to treatment: providing those identified as needing more extensive treatment with access to specialty care.

SBIRT is currently available as a billable service under Medical Assistance and MinnesotaCare, but its use is limited and it can only be used to identify someone in need of substance use disorder service, not to authorize any treatment services to be delivered. The use of SBIRT has the potential to expedite access to services as well as provide interim treatment and support for individuals waiting for an opening for more long-term and intensive treatment.

SBIRT can be provided by a physician, physician assistant, or advanced practice registered nurse. The Department of Human Services is also working with the federal Centers for Medicare and Medicaid Services (CMS) to allow additional providers, including mental health professionals to be reimbursed for administering the screening as well.

Proposal:

This proposal would expedite access to substance use disorder treatment services by allowing SBIRT to establish medical necessity for a combination of two hours of counseling sessions (group or individual), two episodes of peer support, and two episodes of service coordination. Upon engagement with a treatment program, a

comprehensive assessment would be required to inform treatment needs for the client going forward, including the approval of any treatment services beyond those initially approved based on the screen.

This will provide an essential tool to help identify substance use disorder in a person early, address the delays in referral to treatment, and provide support to ensure an easier transition to treatment when clients are most vulnerable. It would also support further integration between primary care, mental health, and substance use disorder care delivery systems.

This proposal assumes that more people will use the SBIRT assessment if it can be used to authorize services, which will result in additional cost to the state. A positive SBIRT assessment, would authorize eligibility for the following:

- two units of peer supports,
- two units of care coordination, and
- two units of treatment sessions using one individual session and one group session for pricing, (although the authorization would be for either, and it would be up to the client which type of treatment session is accessed)

There is no additional cost associated with these services, since the assumption is a brief shift in timing only.

The payment rates for providing SBIRT for 15-30 minutes is \$25.03, and the rate for more than 30 minutes is \$49.56. The anticipated growth in use of the SBIRT is assumed to be modest initially based on current usage and increase in FY22 as an alternative to the Rule 25 assessment which will sunset as a result of the Substance Use Disorder Reform legislation passed in 2017.

This proposal is expected to increase access to Medical Assistance reimbursable assessment services, which will result in increased expenditures as indicated below. The state share of the cost of these additional services paid through Medical Assistance would be \$5,625 in FY 2020, \$7,875 in FY 2021 and \$13,500 in FY 2022 and FY 2023.

	FY 2020	FY 2021	FY 2022	FY 2023
Additional SBIRT Assessments	500	700	1200	1200
Average Cost of Assessments	\$37.5	\$37.5	\$37.5	\$37.5
Total MA Cost	\$18,750	\$26,250	\$45,000	\$45,000
Federal share @ 70% (assumes half are adults w/no kids)	\$13,125	\$18,375	\$31,500	\$31,500
State share – BACT 33	\$5,625	\$7,875	\$13,500	\$13,500

Equity and Inclusion:

In 2015, Minnesota ranked first amongst all states when measuring the disparity-rate ratio of deaths due to drug overdose among American Indians relative to whites. Native American Minnesotans are five times more likely to die from a drug overdose than white Minnesotans. African American Minnesotans are twice as likely to die from a drug overdose as white Minnesotans. Both of these rate disparities—between Native Americans/whites and African Americans/whites—are the greatest rate disparity based on race in the United States.

For comparison, the American Indian population represents 1.5% of the total population of Minnesota; the American Indian population represents 6% of all drug overdose deaths to Minnesota residents. The African American population represents 7% of the total population of Minnesota; the African American population represents 10% of all drug overdose deaths to Minnesota residents.

Preliminary 2016 data show the disparity has continued and worsened. While the white drug overdose mortality rate modestly increased from 10.1 to 10.8 per 100,000 white residents, the American Indian mortality rate increased from 47.3 per 100,000 residents to 61.6 per 100,000 residents, and the African American rate increased

from 20.8 per 100,000 residents to 24.3 per 100,000 residents. Although national 2016 mortality data is not yet available, the disparity rate ratio is likely to remain among the highest in the United States.

The hope is that the use of this tool will increase access for those who need substance use disorder services and reduce barriers to receiving those services, however, this proposal does not directly address the specific disparities outlined above.

IT Related Proposals:

Changes to the MMIS system are necessary to be able to identify when an individual screened positive by SBIRT is authorized for the initial, limited quantity, set of services. There will be claims changes, such as a SBIRT code modifier added to indicate whether it was a positive or negative screen; and then if positive, to approve a certain set of services; a change to limit the amount of service units that are approved based on number rather than date span; and a limit that would prevent a SBIRT from overriding an earlier comprehensive assessment authorization of services.

The system changes will take approximately 1 month to complete for a cost of \$ 5,747.68 (\$1,667 state share).

Process	Estimated Hours	Cost	Total hours/cost	\$ 5,747.68
BA	10	\$ 611.90	State Share @29%	\$ 1,666.92
Development	40	\$ 3,350.00		
Testing	27	\$ 1,785.78		

The ongoing maintenance cost beginning in the year 2021 will be tied into the SUD reform proposal that passed during the 2017 session.

Results:

- Decreased wait time to accessing treatment
- Increased number of people accessing treatment
- Integrated substance use disorder programs and primary care
- Increased engagement and retention of people accessing treatment

Recommendation:

The Governor recommends establishing an opioid stewardship advisory council to develop and oversee a comprehensive and effective statewide effort to address the impacts of the opioid crisis in Minnesota. The council will be tasked with making recommendations and providing oversight over the use of funding in the opioid stewardship account. The Governor also recommends targeted investments to county and tribal social services agencies to support child protection activities within communities most impacted this crisis.

This proposal is part of a package of proposals recommended by the Governor to address rising rates of opioid use. The package of proposals is funded by new fees on opioid manufacturers, wholesalers, and entities that handle controlled substances.

Rationale/Background:

The opioid crisis has had a devastating impact on communities across Minnesota and opioid overdose deaths continue to rise in Minnesota. In 2016, there were:

- 395 total opioid overdose deaths—an 18% increase since 2015.
- 194 overdose deaths that involved prescription opioids.
- 150 overdose deaths that involved heroin.

In 2017, the number of overdose death rose to 773 and as the chart below demonstrates, this problem is not limited to any one area of the state.

In addition, Minnesota has seen an increase in the number of children in out-of-home care across the state. In 2014, there were approximately 26,000 children involved in screened-in child protection reports and by 2017, that number was nearly 40,000 children. Parental drug abuse is the most common primary reason for new out-of-home care episodes, accounting for 29 percent of all new episodes during 2017, and the number of children removed for that reason continues to increase each year. Compounding that problem is the fact that, for a variety of reasons, these cases have historically taken longer to reach permanency. Counties are struggling to pay ever-increasing costs for out-of-home placement, as well as the demands of caseloads that are too high.

The Governor and legislature have taken steps to address the issue. Key initiatives include, the Minnesota State Substance Abuse Strategy, the Opioid Prescribing Improvement and Monitoring Work Group, the Integrated Care for High Risk Pregnant Women Initiative grant funds to expand care for pregnant women and substance exposed infants, funding to increase access to naloxone, and efforts to make disposing unused prescription opioids easier. Minnesota has also received a number of federal grants to support Minnesota’s response to the opioid epidemic. While these efforts are an important start, the scope and impact of this crisis requires even more robust, urgent, and sustained action. This proposal seeks to build upon and expand these existing efforts and ensure there are on-going and sustainable resources available to address opioid abuse.

Proposal:

This proposal establishes an advisory council to provide strategic oversight for the distribution of grant funds generated through fees, which are reflected in separate change pages from the Minnesota Board of Pharmacy. Fees collected by the Board of Pharmacy would be deposited in a fund specifically designated for uses designed to address rising rates of opioid use, including the grant program described in this page. .

Opioid Stewardship Advisory Council

This proposal will create a council to advise on the usage of a portion of funds deposited in the opioid stewardship fund. DHS will administer the grants with the oversight and guidance of the advisory council. The council will review local, state, and federal initiatives and funding related to prevention and education, treatment, and services for individuals and families experiencing and affected by opioid abuse and promote innovation and capacity building to address the opioid addiction and overdose epidemic. It will help ensure that opioid stewardship funding aligns with existing state and federal funding to achieve the greatest impact and support a coordinated state effort to address the opioid addiction and overdose epidemic.

The council will also work to align its efforts with the Results First project administered by Minnesota Management and Budget in order to target resources to the most effective initiatives and to provide on-going evaluation of the projects funding through these resources.

The council will be made up of legislators from both bodies, a representative from other state agencies, substance use disorder providers, advocates, and individual's personal impacted by the opioid crisis, Tribal Nations, as well as representation from law enforcement, social service agencies and the judicial branch. While the members of the advisory council will not receive compensation, they will be reimbursed for their expenses. These costs, as well as costs for space rental and other related costs will be funded through the fund.

Opioid Stewardship Grant Distribution

Funds will be appropriated to DHS from the Opioid Stewardship Fund for administrative services to the council and to administer the grant initiatives. Non-administrative funds are to be appropriated to DHS, with the following amounts to be allocated for these purposes:

- \$4 million per year to county and tribal social services agencies. The Commissioner will work with counties and tribes to determine an allocation formula that addresses the additional out-of-home placement costs related to opioid abuse.
- \$4 million per year for grants based on advisory council recommendations.

Equity and Inclusion:

In 2015, Minnesota ranked first amongst all states when measuring the disparity-rate ratio of deaths due to drug overdose among American Indians relative to whites. Native American Minnesotans are five times more likely to die from a drug overdose than white Minnesotans. African American Minnesotans are twice as likely to die from a drug overdose as white Minnesotans. Both of these rate disparities—between Native Americans/whites and African Americans/whites—are the greatest rate disparity based on race in the United States.

For comparison, the American Indian population represents 1.5% of the total population of Minnesota; the American Indian population represents 6% of all drug overdose deaths to Minnesota residents. The African American population represents 7% of the total population of Minnesota; the African American population represents 10% of all drug overdose deaths to Minnesota residents.

Preliminary 2016 data show the disparity has continued and worsened. While the white drug overdose mortality rate modestly increased from 10.1 to 10.8 per 100,000 white residents, the American Indian mortality rate increased from 47.3 per 100,000 residents to 61.6 per 100,000 residents, and the African American rate increased from 20.8 per 100,000 residents to 24.3 per 100,000 residents. Although national 2016 mortality data is not yet available, the disparity rate ratio is likely to remain among the highest in the United States.

Any work to aid in the prevention, treatment, and mitigation of the impact of the opioid crisis would therefore have immense impacts on the above communities.

IT Related Proposals:

No IT cost related to this proposal.

Results:

It is anticipated that the changes proposed in this proposal will have the following impact on opioid use in Minnesota with the following measureable indicators:

- Reduce opioid overdose related deaths;
- Increase the number of people who receive opioid use disorder treatment and recovery services
- Reduce percentage of people reporting past 12-month pain reliever misuse
- Increased the number of buprenorphine waived physicians

Recommendation:

The Governor recommends a multi-phase, comprehensive, reform and simplification of the regulatory structure for publicly funded mental health services. This initiative will align common standards across different services, eliminate requirements that do not add value or enhance treatment quality, ensure greater consistency in the guidance given to providers and improve accountability for improper billing, maltreatment, or other serious breaches.

Rationale/Background:

The complexity of the regulatory structure is a significant problem facing publicly funded mental health services in Minnesota. Current regulations are complex, overlapping and reside in multiple locations within statute, rule, and other authorities. Some regulations date back to the introduction of federal funding for community mental health centers in the 1950s and have not been substantively updated.

Similar mental health service lines can vary in basic requirements without a clear justification. For example, there are forty-seven different locations in statute, rule, or variances to rule where Minnesota defines what qualifies a person as a “mental health professional.” Among these different locations, there are ten substantively different sets of language, each of which has at least one omission or error.

Various areas within DHS including Provider Enrollment, the Behavioral Health Division, and Licensing are conducting reviews of the same providers, often at different times. Some services are licensed, some are certified by the Behavioral Health Division, and others have no clear oversight. Providers report significant costs associated with hours spent on compliance activities that are duplicative or provide little value. They risk unintentionally being out of compliance and experience confusion among staff in learning the complex system. This also limits the ability of DHS to effectively and consistently regulate these services and support providers in delivering high quality care.

All of these challenges call for a simplification of the regulations that govern these services. Mental health providers need requirements that aren’t duplicative, don’t conflict with one another, and can be readily understood by the people who must follow them. Mental health services share enough commonality to allow for a single framework of basic regulatory requirements and those requirements should have direct connection to Minnesotans equitably accessing high quality services.

Proposal:

This proposal is the first phase of a multi-year project to simplify and align standards for publicly funded mental health services. Under this proposal, several requirements will be unified and streamlined across all mental health service lines, including those that are currently licensed and those that are currently unlicensed.

The goal is to align common standards across different mental health service lines and eliminate requirements that do not add value or enhance treatment quality. This includes provider qualifications, policies and administrative procedures as well as standards for conducting diagnostic assessments and treatment planning. This proposal would also repeal outdated administrative rules governing outpatient mental health services and codify in state law the components that are still relevant.

The only service that will receive substantive changes under this proposal is Mobile Crisis Response. This proposal clarifies the situations in which mobile crisis teams can be expected to respond, giving significant priority to calls made by peace officers contemplating taking a person to a hospital, as well as requests made by urgent and emergency medical care settings that lack specialized mental health resources. Changes in this proposal will also make it easier for a friend or family member to call on behalf of a loved one.

Finally, this proposal directs DHS to develop a plan for a unified licensing structure for publicly funded mental health services that incorporates all services whether they are currently licensed or certified. This plan will also identify ways to further align mental health and substance use disorder service requirements where possible to promote and support integrated models of care. This proposal charges DHS with conducting this work in collaboration with stakeholders and returning in a subsequent legislative session with further recommendations and proposed language. The proposal also requires DHS to develop a licensing fee schedule for this new framework and to solicit community input to set fees in a way that is fair to providers, incentives efficient reviews, and appropriately raises revenue to offset regulatory costs.

To facilitate this transformation, this proposal includes additional staff for the mental health unit within DHS' Licensing Division, as well as policy staff within the Community Supports Administration. This proposal appropriates general funds of \$1.2 million in FY 2020-21 and \$741,000 in FY 2022-23. The proposal funds temporary policy staff (FY 2020-22) who will work to align service standards and licensing needs. The proposal also funds ongoing licensing staff as well as systems changes to create the tools necessary to implement the standards created.

The proposal includes \$50,000 to allow staff to travel and collect stakeholder input. Minnesota's regulations across mental health services and substance use disorder services are currently highly varied. Complex analysis is needed to make sure that opportunities for simplification are maximized without losing important protections to ensure health, safety, and integrity of public funding. Because these trade-offs are important, and changes can have unintended consequences, stakeholders have requested that the Department provide detailed information on what potential changes would be made in each service area. These staff will make that important transparency possible.

Equity and Inclusion:

Racial and ethnic minorities are currently substantially less likely to find a mental health provider who shares their culture. There are many factors contributing to this disparity, but one is the high barrier to entry in providing services compared to some other health care types, such as Personal Care Assistance/Community First Services and Supports. This proposal will reduce some of those barriers to entry by simplifying the regulations that a provider must understand and demonstrate compliance.

Increased availability of training opportunities and proactive technical assistance will be additional resources in supporting newer and more diverse provider organizations in performing high quality work. DHS believes that

these changes will benefit all providers but particularly culturally-specific provider organizations, which tend to be smaller and have fewer resources to address compliance and administrative costs.

Outreach to providers serving Tribal communities and racial and ethnic groups experiencing disparities has been part of this work since inception. The American Indian Mental Health Advisory Committee, and Fond du Lac Human Services have provided significant feedback on which regulations have had unintended consequences in their communities or been particularly onerous to comply with.

Stakeholders have raised concerns with potential unintended consequences of the change that would require background studies for license applicants, controlling individuals, and staff to be conducted pursuant to Chapter 245C, the Human Services Background Study Act. Currently, most mental health providers are using commercially available background checks, which typically do not include arrest information or maltreatment findings. In strengthening the criteria for background checks we may reduce the pool of workers able to be employed. Existing disparities in arrest rates and how the same underlying conduct might be charged or plead down can impact who is excluded from employment in a licensed setting. This can reasonably be expected to have an outsized impact on racial and ethnic minorities seeking to enter the mental health workforce.

To address this, the proposal includes outreach to educate providers and potential workforce members about how to understand their rights for appeal if a disqualification occurs. Minnesota's background study laws provide for many remedies where a person or employer can ask for reconsideration when a person no longer poses a risk to clients.

IT Related Proposals:

The following costs have been determined for changes to the Licensing Division's Electronic Licensing Management System (ELMS) database system to support this new activity. These are complex and varied services, delivered in a variety of residential-, facility- and community-based locations, and the Licensing ELMS database is not currently capable of tracking provider functions across these varied settings. Adequately funding IT systems costs will enable providers to access a web-based application to apply for licensure, submit documentation electronically and request changes to services and license terms electronically. This will ensure that the licensing staff have tools available to regulate them in a consistent, fair and efficient manner.

	Hours	Rate	Cost
Business Analysis	1,965	\$78.72	\$154,684
Development	3,501	\$92.52	\$323,913
Quality Assurance	2,346	\$78.72	\$184,677
Project Management	401	\$78.72	\$31,567
Total	8,213		\$726,841
State Share (50%)			\$363,421

Ongoing maintenance cost per year is \$145,368; State Share = \$72,684.

Results:

DHS will conduct a provider survey starting with the current state of the regulatory system and continuing through implementation of the first phase of development. The Department intends to survey providers throughout the additional phases of this project. Providers will rank the clarity and consistency of the feedback they receive, the level of effort required to schedule and respond to site visits from DHS, and the availability of DHS sponsored training or technical assistance to improve their practice. This will measure the extent to which the transition works for providers, and how time and resources previously used for approving providers is being redeployed in support of improved service quality.

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Building an Integrated Behavioral Health Care Continuum

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	(16,429)	1,502	542	553
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	(16,429)	1,502	542	553
FTEs	0	0	0	0

Recommendation:

The Governor recommends aligning the financial structure for mental health and substance use disorder treatment for people enrolled in Medical Assistance to facilitate integration between the two systems and ensure people with behavioral health needs have access to the full continuum of health care services. The Governor also recommends pursuing strategies to support people with mental health and substance use disorders to access housing to support their long-term recovery.

Rationale/Background:

In Minnesota, the mental health and substance use disorder treatment systems continue to operate largely in silos and often in isolation from the broader continuum of health care. This is due in large part to differences between how the two systems are financed.

Substance Use Disorder Payment

Both mental health and substance use disorder services are covered under Medical Assistance. However, substance use disorder services have an additional layer of complexity – the Consolidated Chemical Dependency Treatment Fund (CCDTF). The CCDTF is the fee-for-service payment mechanism for substance use disorder services, regardless of whether the client is enrolled in Medical Assistance, and counties are responsible for a share of the treatment costs.

In a majority of counties, less than 50% of substance use disorder services are billed to Medical Assistance. However, many clients whose services are billed to the CCDTF appear to be eligible for Medical Assistance. Under this dynamic, the state is not maximizing federal funding and this inefficient use of funding sources burdens state and county budgets. In addition, an individual receiving services only funded through the CCDTF does not have coverage for any other health care service, including mental health care.

Room and Board Funding Across Mental Health and Substance Use Disorder

Payment for room and board for people in residential treatment, which is not eligible for Medical Assistance coverage under federal law, operates in two very distinct ways between mental health and substance use disorder treatment settings.

For residential substance use disorder services, room and board is billed as a distinct service to the CCDTF and the provider receives payment in the same manner as for a treatment service (e.g. provider bills and receives payment). For residential mental health services, the client must be enrolled in the Housing Support Program (formerly known as Group Residential Housing or GRH) through a county financial worker and the client may be

liable to pay a share of the room and board costs. The payment structure for room and board in mental health creates unnecessary complexity for providers, counties, and clients and is reimbursed at a lower rate than substance use disorder treatment.

Housing options following residential treatment

Data shows that many individuals receiving treatment are cycling in and out of residential treatment and homelessness. During state fiscal year 2018, 10,117 people exited residential mental health or substance use disorder treatment. Of those, nearly 1 out of every 8 people exited directly into homelessness. Of those that exited into homelessness, nearly 1 out of every 4 people re-entered a residential treatment facility within the same year.

Proposal:

The goal of this proposal is to promote an integrated continuum of mental health and substance use disorder care that is connected with and facilitates access to other health care services and that supports people to transition to the community when they no longer need intensive treatment.

The proposal has four key strategies to accomplish this goal:

Substance use disorder payment reform

This proposal will align how treatment services are billed and paid for under Medical Assistance across mental health and substance use disorder services. To accomplish this, the county share for substance use disorder services paid for under Medical Assistance will be eliminated.

The current county share of 22.95 percent will still apply to individuals who are not enrolled in Medical Assistance and are receiving substance use disorder treatment that is paid for through the CCDTF. The goal of this change is to encourage counties to support individuals accessing substance use disorder treatment to become enrolled in Medical Assistance. This will also ensure these individuals have coverage for other health care and mental health services they are eligible to access and that the state is maximizing federal financial participation. This change will be effective July 1, 2019.

Align payment for room and board in residential treatment

This proposal seeks to create parity between how room and board is paid for residential mental health and substance use disorder treatment services. To accomplish this, residential mental health treatment will be paid for in the same manner as the current room and board payment system used for residential substance use disorder treatment and at the same payment rate. This will also remove the requirement that some clients pay a portion of their room and board while receiving residential mental health treatment. In addition, the county share for room and board will be eliminated. This change will be effective September 1, 2019.

Presumptive Housing Support eligibility following residential treatment

This proposal provides presumptive eligibility for the Housing Support Program for people leaving residential mental health or substance use disorder treatment. Under this proposal, a qualified professional will utilize a streamlined process to sign off on up to three months of Housing Support eligibility for a client upon discharge from a residential behavioral health program, and to connect the individual with a housing provider if one is available. This change will be effective September 1, 2019.

Align state administrative funding for behavioral health to leverage additional federal funding

This proposal changes how the administration of CCDTF is financed in order to provide greater transparency in CCDTF financing and eliminate recurring excess balances in the special revenue account. This change allows federal Medical Assistance revenues generated by the CCDTF to fully offset the cost of CCDTF services and transitions funding for the administration of substance use disorder services from the CCDTF administrative

special revenue account into the state's general fund. The CCDTF administrative special revenue account will be eliminated with the accumulated balance transferring to the general fund effective July 1, 2019.

This step will allow DHS to streamline how administrative oversight and operations of substance use disorder services are financed. DHS is designated as the state's substance use authority and administrative functions are funded almost exclusively by federal funds, either directly or by way of the CCDTF special revenue account. The current situation limits DHS' flexibility in managing substance use disorder programs and in coordinating administrative budgets across Community Supports and the DHS Central Office as a whole. The refinancing also generates a savings to the general fund in the process.

Equity and Inclusion:

Two of the main person-centered goals of this proposal are to encourage counties to support individuals accessing substance use disorder treatment to become enrolled in Medical Assistance and to connect individuals with a housing provider if one is available when they complete treatment. While there will be a benefit to Minnesotans who have a behavioral health condition being enrolled in Medical Assistance and being connected with housing services, this proposal does not change access to mental health and substance use disorder services overall. Due to this, it is difficult to predict the impact that this proposal will have on equity and inclusion and does not specifically address Minnesota's disparities within mental health and substance use services for non-white residents.

IT Related Proposals:

Changes to the MMIS system will allow residential mental health providers to charge the fund in the same manner substance use disorder facilities currently do. The estimated duration of the project to make these changes is 2 months.

MMIS Changes

Process	Hours	FY20 Costs	FY21 Costs	FY22 Costs	FY23 Costs	Total Costs
Business Analysis	90	\$7,110				\$7,110
Tech	160	\$14,880				\$14,880
QA	108	\$8,532				\$8,532
Project Management	60	\$4,740				\$4,740
Ongoing System Cost*		\$7,052	\$8,463	\$8,463	\$8,463	\$23,978

Statutory Change(s):

State of Minnesota

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Expand Transitions to Community Initiative

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	759	1,620	2,319	2,319
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	759	1,620	2,319	2,319
FTEs	0	0	0	0

Recommendation:

The Governor recommends expanding the Transition to Community Initiative in order to help more people transition out of state-operated mental health facilities in a timely fashion once they have completed treatment.

Rationale/Background:

The Transition to Community Initiative was established to reduce the time that individuals remain at the Anoka Metro Regional Treatment Center (AMRTC) or the Minnesota Security Hospital (MSH) after they no longer need the services provided at these two facilities. The initiative, which was established in 2013, provides access to a range of services, including home and community based waivers, flexible grant funding, intensive care coordination, and partnerships with providers and counties to address an individual's unique needs and challenges. By providing additional funding to cover community-based services and address the unique barriers faced by some individuals, the initiative promotes recovery and opens up beds at AMRTC and MSH for other individuals who need them.

The initiative has shown success in helping people with extremely significant barriers to successfully return to the community. Between July 1, 2016 and June 30, 2018, 302 individuals were discharged from AMRTC and MSH received services or support through the Transitions to Community Initiative.

Despite this success, the program has limitations which prevent it from having more of an impact. Currently, the initiative is only available to people at AMRTC and MSH. People in state-operated Community Behavioral Health Hospitals (CBHHs) face similar barriers but cannot access this support. In addition, some people in non-state-operated hospitals who are on the waiting list for AMRTC could be supported to return to their community instead of receiving treatment in a state-operated mental health facility if the right supports were in place. This would create additional capacity for state-operated facilities to serve those who truly need that level of care.

People over age 65 receiving intensive mental health care face an additional set of unique challenges. Programs designed to support individuals age 65 and older are often not sufficient to meet the complex needs of people who require intensive support for their behavioral health challenges. The lack of sufficient resources creates a barrier to an appropriate and timely discharge for this population.

These limitations restrict how quickly individuals can return to the community and limits the capacity of state-operated programs to serve people who need that level of care. In 2017, 410 individuals remained in AMRTC, a CBHH, or MSH when they no longer required that level of care, resulting in a total of 13,133 bed days. Of those, 24 people were over the age of 65 for a total of 1,636 bed days.

Proposal:

This proposal expands the number of people eligible to be served by the Transition to Community Initiative as well as the types of resources that can be accessed. The goal of this proposal is to provide more individuals with the necessary resources, services and supports to leave state-operate facilities (or be diverted from an institutional stay altogether), and return to their community.

Expanding the Transitions to Community program will help reduce the number of individuals who remain in state-operated programs when they no longer require the level of care those programs provide. This will also allow individuals who do need a higher level of care to access it in a more timely fashion. In addition, this will provide relief to counties who are responsible for paying 100 percent of the treatment costs for individuals when they no longer meet medical necessity for care in a state-operated facility.

This proposal expands Transitions to Community Initiative as follows:

Expand eligibility for the Transitions to Community Initiative

The Transition to Community Initiative is currently limited to individuals receiving care at AMRTC or MSH. This proposal expands eligibility for the program to people receiving care at Community Behavioral Health Hospitals. It would also expand eligibility to people who are hospitalized, civilly committed and on the waiting list for admission to Anoka Metro Regional Treatment Center or a state-operated Community Behavioral Health Hospital but who could successfully returned to the community with the necessary resources, services and support.

It is anticipated that the newly eligible clients will begin receiving support through the Transition to Community Initiative in March 2020. DHS anticipates that with these changes the Transition to Community Initiative would be able to serve an additional 110 individuals by 2021.

An additional \$500,000 in grant dollars will be needed annually to support the projected program growth as a result of expanding eligibility. This grant funding will be awarded to grantees via an RFP process and awarded to counties to provide services not otherwise funded that are essential components of individualized treatment plans.

With this proposal, there will also be an increase in the number of individuals served by the Transitions to Community Initiative who access home and community-based waiver services. The increase in home and community-based services waiver costs were calculated based on historical experience with the Transitions to Community Initiative as well as historical data about the population who will be newly eligible under this proposal.

Increased capacity to support individuals age 65 and older

This proposal expands the ability to support people age 65 and older to transition to the community. Specifically this proposal would allow an enhanced individual budget through the Elderly Waiver (EW) program for individuals who have complex needs, require intensive support to live in the community, and are eligible for the transitions to community initiative. The EW program funds home and community-based services for people age 65 and older who require the level of care provided in a nursing facility, but choose to reside in the community. This is the main cost driver in this proposal, but it is necessary in order to address the issue that individual budgets available under EW are often not sufficient to help people over age 65 with complex needs transition to a community setting. Federal approval will be required to make this change.

The EW costs were estimated based on DHS' past experience transitioning a similar population from a state owned psychiatric nursing facility into the community. The Brain Injury and Community Access for Disability and Inclusion waivers now allow people who are over 65 to return to these waivers if they have been enrolled in the past. Data showed that this would apply to about 25% of people over 65 at AMRTC. Since these individuals can move onto a disability waiver and would be covered under the existing Transitions work in current law, they are not accounted for in the fiscal impact for this proposal. The current law EW cap has been adjusted to account for increases tied to projected NF rate increases.

Equity and Inclusion:

The Transition to Community Initiative is a tool for changing the mental health service system toward a more person-centered system. It has shown that the barriers to transition are not in the characteristics of the individuals themselves, but in the flaws in our service system—the gaps in services and funding makes it difficult to respond to each individual's unique needs. The Initiative provides a glimpse of what the future of our person-centered system could look like if we supported people to live integrated lives in the communities of their choice.

IT Related Proposals:

There are no costs to the MAXIS system associated with the proposed expanded eligibility for MSA Housing Assistance. The following costs have been determined for changes to the MMIS system regarding expanding waiver eligibility. As the state share of both the initial and on-going costs round to less than \$1,000, they have not been included in the overall cost of the proposal.

	Hours	Cost
BA Hours	8	\$490
Development Hours	8	\$670
QA hours	5	\$331
Total Hours	21	\$1,491
State Share (29%)		\$432

Ongoing maintenance cost per year is \$300; State Share = \$86.

Results:

To assess the effectiveness of this proposal we will measure the number of individuals, regardless of age, who successfully transition from AMRTC, MSH, CBHH, or off the AMRTC waitlist. Additionally, we will work with our community hospital partners to create a process to identify and measure the effectiveness of diverting individuals from our state-operated facilities via supports, services and resources to community partners.

With this proposal, the Transition to Community Initiative would be able to serve an additional 110 individuals by 2021. These individuals could live successfully in the community with the right supports but would otherwise be unable to be discharged based on insufficient resources and/or services without this proposal.

Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	125	75	0	0
FTEs	0.50	0.30	0	0

Recommendation:

Effective July 1, 2019, the Governor recommends increasing appropriations to Direct Care & Treatment (DCT) Operation in order to support the Community Competency Restoration Task Force.

Rationale/Background:

The task force will engage stakeholders in a process to analyze current practices given the increasing numbers of mentally ill patients being court ordered for competency restoration. In Minnesota, individuals are admitted to state mental health beds through both civil and criminal court processes. Resources are enormously strained, largely because how patients are committed within Minnesota and pressure from the statute prioritizing admission for individuals in correctional settings.

It is critically important for Minnesota to look at this issue holistically – from the perspective of the person experiencing mental illness and across all the systems. To date, the conversations in Minnesota have focused on who is responsible for the treatment, care and education of these patients, and not focused on how we can look at the entire continuum of care – from the point of law enforcement involvement, incarceration, treatment, admission to community placement and/or return to a correctional facility or other setting.

Minnesota is unique in that there is no statutory language requiring the performance of competency restoration services; no state agency, local government or community provider currently has legal responsibility for these activities. As a result, there is a lack of clarity and understanding regarding the duties of the courts, jails, counties and state-operated services. Together, stakeholders need to come to consensus as to which entity or entities share responsibility for competency restoration and make suggestions to improve competency restoration in Minnesota.

Proposal:

This proposal provides funding to compensate task force members and fund a part-time staff position for 19 months to support the task force.

Equity and Inclusion:

Since the passage of the priority admissions statute in 2013, DHS has experienced a significant increase in civilly committed patients referred to our facilities for admission directly from jail. Specifically, between 2014 (the first full year in which the Priority Admissions law was in effect) and 2018, admissions under the law increased 159%. This increase has resulted in displacement of patients who may have more severe needs but who are in community settings.

This proposal will allow stakeholders to come together to assess competency restoration and the increasing numbers of people with mental illness that are entering the criminal justice system.

Results:

Through this process, we hope to achieve the following:

- Identify current services and resources available for individuals in the criminal justice system who have been found incompetent to stand trial and how these services could be expanded into the jails versus admitting clients into the state system;
- Analyze current trends based on the needs of individuals who are referred by county;
- Conduct case studies to identify risk levels of individuals, service usage, housing status and health insurance status prior to being jailed;
- Obtain information from other states on best practices for serving patients that are in need of competency restoration and ongoing education;
- Identify alternatives for competency restoration services;
- Develop recommendations that will address the growing numbers of people deemed incompetent to stand trial including increasing prevention and diversion efforts, providing timely competency evaluations, reducing the amount of time individuals remain in the system, exploring ways to provide competency restoration services in the community, and clarifying the roles of the counties and the state in providing competency restoration.

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Increase Office of Ombudsman for Long-Term Care Staffing

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	892	1,021	1,021	1,021
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	892	1,021	1,021	1,021
FTEs	10	10	10	10

Recommendation:

The Governor recommends \$1.913 million in the FY 2020-21 biennium for the Office of Ombudsman for Long-Term Care. This funding will support an increase in staffing levels which will improve the office's ability to act as consumer advocates for those receiving long-term care services. Currently, staff of the Office of Ombudsman for Long-Term Care are unable to fully meet the demand for services. The Governor recommends the addition of ten full-time equivalents (FTEs), including 9 full-time regional ombudsmen and 1 full-time deputy ombudsman.

Rationale/Background:

The Office of Ombudsman for Long-Term Care is a program of the Minnesota Board on Aging, as required by the Older Americans Act. The Office advocates for person-directed living, which respects individual values and preferences and preserves individual rights. Regional ombudsmen work with consumers, citizens, nursing homes, board and care, hospitals, home care, social service agencies, and public agencies to enhance the quality of life and services for individuals receiving health care and supportive services. The Office's work includes, among other areas, addressing elder abuse in Minnesota long-term care settings, protecting clients from retaliation, working to protect and expand resident rights, and providing information about health laws, assisted living provider standards, and increased protections in housing with services and assisted living.

The ombudsman staff act as independent consumer advocates who investigate complaints, offer information and consultations, and advocate for changes to protect the health, safety, welfare, and rights of long-term care consumers, at no charge to the consumer. The Office provides advocacy in a wide variety of settings, including nursing homes, the five state-run veterans' homes, boarding care homes, housing with services, assisted living, hospitals, and settings where home care and customized living are provided. Complaints investigated by the Office's regional ombudsmen can be initiated from a variety of sources, including consumers, family members, or staff. Regardless who initiates a complaint, the consumer is the client and provides direction to the regional ombudsmen. The Office works to resolve these complaints through mediation, education, and, if necessary, referrals. The Office also provides education about consumer rights to older and vulnerable adults, families, providers, and others, and works to intervene before concerning situations escalate.

The Office does not duplicate or replace the essential role of regulators or law enforcement in holding perpetrators accountable. Rather, Ombudsman staff promote healthy recovery and empowerment of abuse survivors and work to prevent abuse systemically in their regions. The Ombudsman seeks to be a source of support for survivors, ensuring that consumers have access to counseling, medical, and other supportive services.

The Office has seen a substantial increase in complaints regarding critical issues facing older and vulnerable adults. Between October 2016 and September 2017, there was a 43% increase in complaints about abuse, gross neglect, and exploitation (physical, sexual, emotional, financial, and gross neglect). This built upon the increase of 29% seen in these complaints in previous year. Complaints about restraints, activities and social services, diets, environment and safety, staffing, and some other areas each increased by 20% or more between October 2016 and September 2017. Additional staff is needed to address this increase in complaints.

In addition, many ombudsman staff currently spend significant amounts of time traveling. The Older Americans Act mandates that the Ombudsman program provide a statewide presence so that consumers have access to advocacy services. Consequently, many regional ombudsmen are assigned a large geographic regional area of coverage. There are regional ombudsmen in greater Minnesota who spend an average of over 80 hours per month traveling. Much of the work done by regional ombudsmen must be conducted in person in order to meet with facility staff, observe the environment, and communicate effectively with older and vulnerable adults. Providing additional staff will allow ombudsmen to focus more time on representing consumers.

The Office is to ombudsman offices in other states. The number of active beds per regional staff member in the Office is approximately 1/9,000 and the national average for an ombudsman's office is about 1/2,500. The most recent report by the National Opinion Research Center (NORC) at the University of Chicago determined that the number of active beds per staff member in Minnesota was the worst in the country, ranking 52 out of 52. Reducing this disparity of bed to staff ratio will allow staff to handle more casework and assist more consumers in protecting their rights and achieving a higher quality of life.

Proposal:

The proposal will invest in 10 FTEs to fulfill the federal and state duties and requirements of the Office. The FTEs are as follows: 9 regional ombudsmen to receive, investigate, and work to resolve additional complaints from consumers, families, and providers and 1 deputy staff to supervise the work of the regional ombudsmen. The cost will also include space rental for the regional staff, travel and other supplies. Total cost before federal financial participation is \$2.813 million in fiscal years (FY) 2020-21 and \$3.002 million in FY 2022-23.

Equity and Inclusion:

Increased funding will allow the Office to provide advocacy to more older and vulnerable adults facing issues such as abuse. The Office directly represents its clients and, through this work, is aware of the issues facing these individuals. The Office's work will help to reduce disparities for older and vulnerable adults in the use and enjoyment of their housing and services and their integration into the community. The Office promotes these goals by working to address issues affecting clients' quality of life and care and, when appropriate, helping clients to access housing and services in the community.

IT Related Proposals:

There are no information technology impacts to this proposal.

Results:

This proposal seeks to reduce the number of active beds per regional ombudsman, which are currently far above the national average. This funding measure seeks to reduce this disparity by adding full-time regional ombudsmen staff. As stated above, this current ratio is approximately 1 staff to 9,000 beds.

This measure also seeks to increase the number of resident complaints investigated by the office per year to about 6,000. Resident complaints are investigated as part of a case that a regional ombudsman opens and handles. Between October 2016 and September 2017, the number of resident complaints investigated by the office was approximately 3,500.

This proposal further seeks to increase the Office's number of information and consultations to approximately 4,000 (separate from the complaints investigated per month as part of a case). These are contacts to individual clients providing information and consultation about consumer rights, service options, and regulations that apply to long-term care facilities and in-home and community-based services. Between October 2016 and September 2017, staff provided approximately 2,500 of such information and consultations to individuals. In addition, this proposal seeks to increase the number of information and consultations given to others such as providers to approximately 2,000 annually (separate from the complaints investigated part of a case). Between October 2016 and September 2017, staff provided approximately 1,000 of such information and consultations.

Finally, this proposal seeks to increase the number of systemic advocacy cases, which are related to better meeting consumer needs through reform of state and federal legislation and the health care and social services system, to approximately 30 cases annually. Between October 2016 and September 2017, the Office had approximately 20 such cases. These cases address systemic problems affecting multiple clients at a facility.

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Civil and Criminal Coordination for the Protection of Vulnerable Adults

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	2,456	2,135	2,522	3,127
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,456	2,135	2,522	3,127
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$4.59 million in FY 2020-2021 and \$5.65 million in FY 2022-2023 for the protection of the state's vulnerable adults through grants for adult protective services to safeguard maltreated vulnerable adults and through enhancements to the common entry point known as the Minnesota Adult Abuse Reporting Center (MAARC) to improve civil and criminal investigation coordination.

Rationale/Background:

The Minnesota Adult Abuse Reporting Center (MAARC) is the common entry point operated by the Commissioner of Human Services under Minnesota Statutes, section 626.557. MAARC operates phone and web systems for mandated reporters and the public to report suspected maltreatment of a vulnerable adult. Statute requires reporting to be available 24 hours a day 365 days a year. MAARC is required to make immediate notifications to: law enforcement for allegations which may also be criminal; county agencies for an emergency need for adult protective services for the vulnerable adult, or if the vulnerable adult has not been offered a sexual assault examination; medical examiner and Ombudsman for Mental Health and Developmental Disability; and to the lead investigative agency responsible for investigative response and protection of the vulnerable adult. Lead investigative agencies are counties, Department of Human Services – Office of Inspector General (DHS-OIG), and Minnesota Department of Health – Health Regulation Division (MDH-HRD). Lead investigative agencies and law enforcement are required to coordinate civil and criminal investigation and response to protect vulnerable adult victims and hold perpetrators accountable.

24/7 MAARC IT Support

The total cost (federal and state share) is \$300,000 per year for a total of \$1.2 million over FY 2020-23. The state share is \$150,000 per year for a total cost of \$600,000 over the four years.

MAARC operates 24/7. MAARC requires multiple state technology systems and applications to meet statutory requirements, protect vulnerable adults and coordinate civil and criminal investigation of alleged maltreatment. MN.IT does not have the capacity to provide 24/7 support of the IT system. As a result, non-IT program staff receive notifications from the call center when a systems component (for example, the phone system, SSIS connection through CITRIX, Agile web application, etc.) stops working. This causes a delay in addressing the outage and delays in referring reports to the agencies responsible to respond for protection of the vulnerable adult.

Management dashboard

The total cost (federal and state share) is \$1.624 million over FY 2020-2023. The state share is \$812K over the four years.

MAARC operates under a contract managed by DHS. The MAARC SSIS application does not include real time operations data for management, oversight or the ability to monitor statutory compliance. DHS must pull reports from the SSIS application and depend on reports provided by the contractor as the application has limited reporting ability. MAARC web reporting under Agile Apps has the capability for real time management reporting, but resources are not available to develop reports and dashboards for MAARC management.

DHS waits 24-48 hours for data uploads and is dependent on non-IT program staff visually matching over 2,000 nine-digit numbers for reports submitted to MAARC by the public and mandated reporters with required report referrals to law enforcement, counties and state agencies. DHS is unable to verify that MAARC reports are referred to county and state agencies, as required, for 24-48 hours.

Lack of real time data management poses risks to vulnerable adults and to DHS. Lack of a management dashboard inhibits DHS's ability to manage the contractor and to identify and remediate compliance issues. Lack of real time operations data has resulted in multiple audits, as risks from systems failures or referral errors or omissions were discovered. An operations dashboard supports timely protection of vulnerable adults, timely required referrals, and timely response by law enforcement and lead investigative agencies. Real time management data supports DHS in responsible contract oversight.

Law Enforcement Notification and GIS mapping:

Total cost (federal and state share) is \$1.549 million over FY 2020-2023. The state share is \$817K over the four years.

Immediate law enforcement notification is made by MAARC to over 340 law enforcement agencies. MAARC does not have access to technology to identify which law enforcement agency has jurisdiction for the allegation. The agency is determined by MAARC using information provided by the reporter for the city and county location of the incident and alleged victim. After determining the law enforcement agency with jurisdiction, MAARC enters the email address provided by that agency to send a secure email of the report. Law enforcement then requests and enters the passcode received to review the MAARC report.

Addresses provided by the reporter may not correlate to the law enforcement agency with jurisdiction for the report, which may result in notifying an agency without jurisdiction and delaying an investigation and protection response. Law enforcement must take time to obtain and enter passcodes. Errors can occur impacting law enforcement's ability to open notifications. Law enforcement must coordinate outside of MAARC to notify another law enforcement agency when MAARC refers a report based on information provided by the reporter, but the location was outside of that agency's jurisdiction and other law enforcement agency was responsible.

Mapping technology and application logic for law enforcement notification would support MAARC's correct identification of the law enforcement agency with jurisdiction for the alleged crime and efficient and timely report referral and response. Timely and accurate law enforcement notification is necessary for compliance and for coordination between law enforcement and the lead investigative agency responsible for response to the alleged vulnerable adult victim.

Data Transmission between MAARC and Law Enforcement

Total cost (federal and state share) is \$1.612 million from FY 2020-2023. Total state share is \$806K over the four years.

Law enforcement, as mandated reporters, are required to enter MAARC reports. MAARC is required to immediately notify law enforcement of civil reports which may also be criminal. Law enforcement must re-enter data from an existing incident complaint report into the MAARC web application to meet mandated reporter duty. They also must re-enter data received from a MAARC required notification into an incident complaint report resulting in duplicate data entry and diversion of resources from responding to the vulnerable adult victim and alleged perpetrator.

State Grants

Invests \$7.205 million over FY 2020-2023.

In calendar year 2014, counties were responsible for adult protective services response to approximately 15,000 vulnerable adults who were the subject of 40% of statewide reports of suspected maltreatment. In calendar year 2017, counties were responsible for responding to approximately 53% of MAARC reports, including over 42,000 vulnerable adults. This represents a 95% increase year to year. DHS's coordination and oversight of the MAARC system is resulting in increasing awareness by the public and mandated reporters. Lead investigative agencies such as MDH-HRD and DHS-OIG, are increasingly aware of the need to coordinate with county agencies related to protection needs discovered by these lead investigative agencies during investigation of the MAARC report. Data on referrals by the OIG and MDH for emergency adult protective services are not captured in the data.

Protection of vulnerable adults who have been abused, neglected or financially exploited is accomplished by counties offering the vulnerable adult victim adult protective services. These services are dependent on funding counties receive from the Vulnerable Children and Adults Act, Title XX, state grants for adult protection and county tax revenue. Reform 2020 provided the first state funds (\$3 million) dedicated to county adult protective services in grants to counties based on the number of MAARC reports opened by the county to investigate the maltreatment and offer services to safeguard the vulnerable adult. A 35% increase in vulnerable adults received adult protective services in response to a report of suspected maltreatment in the year following Reform 2020 grant allocations. State adult protective services grants to counties are allocated through the Vulnerable Child and Adult Act (VCAA). Title XX Social Services Block Grant federal funds allocated through VCAA are not stable. These federal block grants are slated for reduction or deletion annually. Federal funding is allocated to states for adult protective services. Statewide county expenditures for adult protection increased from \$3.7 million in calendar year 2014 to \$9.7 million in calendar year 2017.

This proposal creates a new formula to allocate new state grant funds for the sole purpose of adult abuse maltreatment investigations and adult protective services (similar to what was done in 2015 for child maltreatment) from \$1 million to \$2.6 million annually, with increases based on a 10% annual estimated percentage increase for MAARC reports. The new formula provides an opportunity for tribes to take a role as a lead investigative agencies responsible for adult protective services under this statute. The performance measure will be based on percentage of reports screened in based on state policy using the state required structured decision making tool until additional measures are approved by the Council for the Human Services Performance Management System. Performance measures will be used for county and tribal agencies.

Proposal:

In CY 2017 over 50% of the 57,000 reports received by MAARC contained potentially criminal allegations requiring law enforcement notification. MAARC makes required notification to over 350 different law enforcement agencies by sending a secure PDF of the report to the agency, which is then reentered it into their system. Law enforcement, as mandated reporters of suspected vulnerable adult maltreatment, must enter reports into MAARC that already exist in their agency. This proposal supports MAARC issuing immediate notification to the law enforcement agency with jurisdiction for the criminal allegation, timely coordination between law enforcement and civil investigators protecting the vulnerable adult and provides a secure communication method between law enforcement and MAARC.

County agencies were responsible for adult protective services response for over 42,000 vulnerable adults who were the subject of MAARC reports. DHS estimates county agencies expended \$9.7 million for adult protective services. \$3 million in state grants are allocated for adult protective services under Reform 2020. Currently, state grants for adult protective services are not allocated to tribes and no tribal governments act as lead investigative agencies under the Vulnerable Adult Act. Allocations inconsistent with expenditures result in inconsistent responses to vulnerable adults across the state based on their county locations. Response varies from 0-90% of the reports being opened for investigation and adult protective services for vulnerable adults across the state. This proposal supports consistent adult protective services response and outcomes for vulnerable adults regardless of their location in the state.

This proposal includes:

- 24/7 Systems and application support for Minnesota Adult Abuse Reporting Center (MAARC);
- MAARC dashboard for real time IT operations management, compliance and contract oversight;
- GIS mapping to identify the law enforcement agency with jurisdiction for reported allegations;
- Data transmission between law enforcement and MAARC supporting efficient use of resources, reduction in unnecessary data entry and secure transmission between agencies;
- An initial 67% increase in FY 2020 for the dedicated state appropriation for county or tribal response to vulnerable adults who have been abused, neglected or exploited. In FY 2020, \$1.0 million is added to the \$3.0 million state grant base with an ongoing base adjustment of 10% each year through FY 2023. The 10% base adjustment is based on number of reports meeting state policy opened for investigation and services.

Equity and Inclusion:

Tribes are not included in current state grant allocations for adult protective services. No tribes currently provide adult protective services under section 626.557. There is no state funding sources for tribes. This proposal, if passed, would bring equity between county agencies and tribes when a tribe assumes those duties for adult protective services and investigation under section 626.557 from counties.

IT Related Proposals:

This proposal includes resources for MNIT to support the Minnesota Adult Abuse Reporting Center (MAARC).

FTEs	1.5	2	2	2

Recommendation:

The Governor recommends creating an assisted living consumer and family survey process and report card to establish quality reporting in assisted living and registered housing with services establishments. This proposal has four parts: (1) engage a stakeholder workgroup to help design assisted living quality measures; (2) pilot the measures, including piloting new data collection methods; (3) develop an online report card platform; and (4) fully launch and maintain the report card.

Rationale/Background:

Assisted living is a growing model of support to older Minnesotans who are looking for more accessible places to live that have services that help people live semi-independently. There are three components to quality in assisted living: (1) the assisted living setting which includes the quality and maintenance of the physical building space (provided by the housing with services establishment and governed by landlord-tenant law); (2) home care services (with compliance by the Minnesota Department of Health (MDH) Home Care and Assisted Living Program); and (3) services such as housekeeping or meal preparation. There are approximately 69,000 beds at registered Housing with Services settings in Minnesota, in about 1,700 sites. Many of these providers are enrolled to receive Medical Assistance payments for the services or home care provided within the setting. These three components may be offered by one company/provider, or the housing with services establishment and the arranged home care provider may be separate entities.

Unlike nursing facilities, data on the quality of the services provided in these settings is not easily accessible to the public. Providers have developed some quality information including awards and designations that offer consumers a way to compare one assisted living provider against another. However, the state-generated information related to quality is limited to home care surveys by the Minnesota Department of Health, and the Medicare Home Health Compare tool is limited to Medicare-certified home care providers.

As a payer of assisted living services for those eligible for Medicaid-funded home and community-based services waivers, DHS has an interest in ensuring that services provided in these settings are provided in a quality manner, support positive outcomes for people who live there, and are an effective investment of taxpayer dollars. Minnesota families who pay for assisted living services with their own funds also want to know that they are selecting quality providers and getting a good value for their money.

Proposal:

This proposal creates a report card to increase consumer information about assisted living facilities. The report card will assess all assisted living settings in Minnesota and will include measures from existing data sources, as well as new measures from new data gathered through consumer experience and family satisfaction surveys. Both private pay and Medical Assistance (MA) payer residents and their families would be surveyed starting in FY 2020 using the two surveys. These surveys will then be conducted every other year.

This proposal has four parts:

- 1) Design assisted living quality measures, with stakeholder engagement. This work has already begun through a contract with the University of Minnesota using existing resources. Measure development will continue, with stakeholder engagement, and conclude in late 2019.
- 2) September 2020: Pilot the measures.
- 3) January 2021: Develop an online report card platform to display the measures.
- 4) September 2021 to August 2022: Fully launch all measures, including those based on consumer and family survey results, and report results through the online report card.

Funding in this proposal will pay for:

- Quality measure development, including the facilitation of the stakeholder engagement process;
- Contract oversight;
- Implementation of new data collection through consumer and family surveys;
- Translation of quality measurement data into report card ratings; and
- Resources to develop, implement, and maintain a report card website.

As evidenced in the [Nursing Home Report Card](#), surveys of assisted living residents will increase transparency for assisted living consumers and their families, increase consumer information about the products available, and incent providers to increase quality.

This proposal will include contract costs for the resident experience survey and the family satisfaction survey. The resident experience survey will include an estimated 31,000 in-person interviews and 16,000 paper surveys delivered in-person with optional in-person interviews. The family survey will include a mailed survey for one family or friend for each resident which could include up to 50,000 surveys and 2,000 follow-up phone interviews.

The proposal costs will also include report card measure development including stakeholder development, testing of data collection instruments and ongoing refinement and development as new data becomes available through surveys and regulatory work. In addition, two FTE's will be needed for this initiative. The first FTE will analyze data from surveys and regulatory collection from the Minnesota Department of Health. The second FTE will develop the survey, measure development, and manage the contract.

In addition, grant funding was appropriated during the 2013 legislative session for developing the initial infrastructure for Home and Community Based Services report cards. The initial development of the report cards was granted, through the Minnesota Board on Aging, to the Area Agencies on Aging who pulled existing data on home and community-based service providers into the www.minnesotahelp.info website, developed online "finder" search tools highlighting features of providers, and tested the use of an online consumer review tool. The ongoing funding from this appropriation is \$1,000,000 a year. This proposal will repurpose these existing funds as administrative funds to develop the first Home and Community Based Services report card for assisted living. To accomplish this, it is necessary to contract directly with a research entity to research, develop, and statistically analyze quality measures. Once the measures are established, these funds will be used to support ongoing data analysis to regularly update the measures and to support the development of measures for additional Home and Community-Based Services Report Cards.

Equity and Inclusion:

DHS will build equity considerations into the design of the assisted living quality measures, with support from an outside contractor.

IT Related Proposals:

MNIT will build a website tool for the public to view the results of the report card ratings. The work is estimated to take two years to fully complete the website and is estimated to cost a total \$421,000 in development costs. The state share of this cost is 50%.

Results:

The report card is a data-driven project. DHS will be able to track the improvement of assisted living providers by a wide array of provider characteristics and quality measurement results. The report card will provide data over time, which will allow DHS to understand trends in assisted living services delivery.

As with the Nursing Home Report Card, DHS plans to develop value based payment, or pay for performance, strategies. Through these strategies, public payment for customized living services delivered in Housing with Services settings could be varied based on a provider's quality measurement results.

Revenues	(1,192)	(1,192)	(1,192)	(1,192)
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	10.0	10.0	10.0	10.0

Recommendation:

The Governor recommends adequately staffing the Licensing Division's Home and Community-Based Services (HCBS) unit so that it is able to complete on-site licensing reviews once every three years. The proposal would also allow the Department to respond in a timely manner to licensing violations, appeals of licensing actions, and provider requests for technical assistance. Timely response to licensing violations and performing ongoing monitoring on a three-year schedule are keys to ensuring the safety and integrity of waiver services provided to Minnesotans. It would also bring the Department into compliance with its federal waiver plan.

Licensing fees would be increased to offset the costs of this proposal. HCBS providers pay fees in accordance with a fee schedule listed in Minnesota Statutes Chapter 245A.10, Subd. 4(b). Those fees range from \$200 to \$18,000 based on the provider's annual revenue from public programs. The current fee schedule is regressive: the license fees for the smaller providers are a much larger percentage of their public program revenue than is the case for the larger providers. Under this proposal, all licensed HCBS providers would see an increase in fees, but the percentage increase would be less for the smaller providers earning less in revenue. Conversely, the larger providers would see fee increases of larger percentages.

Rationale/Background:

In 2012 and 2013, the Legislature enacted new and comprehensive home and community-based services licensing standards that combined 19 services, many of which were previously unlicensed, under one statewide license governed by standards in Chapter 245D, and shifted responsibility for certain licensing and maltreatment investigative functions from the counties to the State. Specifically, the Legislature recognized that because many waiver services were unlicensed, consumers did not have basic protections consistently applied or enforced, due to county variations in enforcement activities of these unlicensed services. Therefore, the Legislature transferred oversight of all licensed home and community-based services and maltreatment complaints from the counties to the state so that concerns about the quality of care or allegations of maltreatment of vulnerable adults receiving licensed waiver services are sent to DHS to investigate and take appropriate action. As a result, the number of licensed providers increased from 650 to 1,250 when new licensing standards took effect in 2014; the number of service recipients increased from 12,000 to 32,000.

In 2013, the Department advanced a fee structure that was not enacted; instead, the Legislature adopted a three-year interim license fee schedule for providers with a full conversion to fees based on revenues beginning in calendar year 2017. During the transition period to the fee schedule based on revenues, providers previously licensed under Minnesota Statutes, chapter 245B, paid an annual license fee for calendar years 2014, 2015, and

2016 equal to the total license fees paid under chapter 245B for calendar year 2013, which ranged as high as \$74,000; previously unlicensed providers paid a license fee based upon revenue.

The interim fee schedule was also supplemented by a general fund appropriation. This appropriation was envisioned to be temporary until the Department completed a legislatively mandated cost-study report and proposed a new fee structure if warranted. Following the completion of the report, the Governor's budget proposed a new licensing fee structure in 2016 that would have funded the unit at a level to complete biennial visits. This proposal was not adopted, and the General Fund appropriation was made part of the Division's base funding. The Governor again proposed a new licensing fee structure in 2017 sufficient to fund 245D licensing activities at a two-year monitoring cycle, but again the licensing fee structure was not adopted. Provider trade associations opposed the new licensing fee structure each time.

The interim fee schedule expired in July 2016; beginning with calendar year 2017, all providers pay a fee based upon their revenue. However, with the significant increase in the number of licensed providers, the General Fund appropriation and the revenue-based fee schedule established in 2013 do not adequately fund the Department's work related to HCBS licensing activities under Chapter 245D so that the Department can inspect providers at least every three years. Moreover, in its federally approved waiver plans, the Department stated that it will inspect providers at least every three years. If no changes are made, the current fee schedule only allows for reviews of all providers once every four or five years.

Since the inception of HCBS licensed services on January 1, 2014, the number of services have expanded from 19 services to 26 services. The number of license holders has also increased significantly from 1,256 in fiscal year 2014 to 1,560 licenses at the end of fiscal year 2018 -- a growth of 24% -- and the number continues to increase in the first quarter of SFY19. In addition to the license holder's statewide program license, many license holders also have a significant number of facility licenses that fall under the HCBS license. For the year ending 2017 there were 310 day service facilities where people can receive a number of employment services and 3,566 community residential settings where people reside in corporate group homes receiving 245D services. Additionally, there are approximately 430 adult foster homes that are the homes of the license holders and persons receive 245D services from these individuals who also hold 245D licenses. Community residential settings and adult foster homes are routinely inspected by county agencies with a focus on the physical plant; however, the Department's licensors also visit a percentage of these settings to ensure the services are provided according to 245D standards. Day service facilities require ongoing site inspections from the Department. In short, more than 1,600 licensed providers deliver services to more than 33,000 disabled adults and children in more than 4,000 licensed settings or in the service recipient's own home. These additional settings licenses add complexity to the monitoring review.

As the number of providers and service recipients increases, so too does the number of licensing related complaints that the Licensing Division must respond to. Licensing complaints for 245D licensed providers increased by 16% from 2015 to 2017 and the number that warranted an onsite investigation after initial assessment doubled. The Licensing Division is struggling to meet the demands of investigating complaints while also staying current on scheduled monitoring reviews. With current staffing levels, providers are only reviewed on a 4.8 year cycle unless a poor compliance history warrants additional licensing reviews.

With this proposal, the Department would be able to provide licensing reviews at a 3-year interval. The Department would also be able to meet in a more-timely manner the additional needs of providers including technical assistance and training, application reviews and approvals, complaint investigations, and sanction activity related to providers with significant compliance issues.

Proposal:

This proposal would provide adequate resources for the Department's Licensing Division's HCBS section to meet federal waiver plan, statutory, and policy requirements applicable to programs licensed to provide services under Minnesota Statutes Chapter 245D.

Currently, the Department conducts on-site reviews of 245D license holders on average of once every 4.8 years. Under this proposal, the Department would conduct an on-site review of each 245D license holder at least once every three years. Providers with licensing compliance concerns, including conditional licenses, would continue to receive heightened monitoring and assistance from the agency.

The table below shows the current and proposed fee schedules. As indicated in the table:

- Providers with annual revenue up to \$5 million would see a 20% increase in fees. While still regressive, the new fee structure would be less regressive than the current model. Under the proposed plan, the average annual license fee would range from 0.16 – 2.4% of this group's annual revenue from public programs.
- Providers earning over \$5 million in annual revenue would see their fee increase by 29% to 300%. While the percentage increase may appear significant, the average annual license fee for those large providers would range from 0.12 – 0.18% (less than one percent) of large providers' annual revenue from public programs.

Equity and Inclusion:

Licensing activity related to 245D supports the provision of quality services to persons with disabilities and to seniors age 65 and older.

There are no anticipated negative effects to the identified group. We anticipate a significant positive impact to persons receiving services as more frequent licensing activity should increase compliance with health, safety, and rights standards.

The additional FTEs would support the current number of license holders. The Department will assess each year the census of providers related to the number of licenser FTEs.

IT Related Proposals:

The Licensing Division created an online application and provider dashboard to facilitate electronic review of documents, pre-licensure requirements and provider requests for variance and change in terms. The proposal includes \$200,000 annually to fund HCBS IT maintenance and improvements.

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Adult Day Center Oversight Improvements

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	134	135	135	135
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	134	135	135	135
FTEs	2.0	2.0	2.0	2.0

Recommendation:

The Governor recommends \$135,000 per year ongoing to add 2.0 FTE adult day center licensors to provide additional support to the adult day center licensing activity.

The Department of Human Services (DHS) Licensing Division currently has 2.0 FTE licensors working with licensed adult day center services. The current base budget for adult day center licensure is \$210,000 per year.

Rationale/Background:

DHS licenses adult day centers according to standards in Minnesota Statutes Chapter 245A, the Human Services Licensing Act, and Rule 223.

Adult day centers were historically developed to serve seniors who needed supports – often located in or adjacent to a nursing home or hospital. Over time, centers have been developed independent of hospital or nursing homes and are now provided in an integrated manner in neighborhoods and communities. In addition, adult day centers have expanded their service base beyond seniors who needed supports to serve persons with disabilities. This has led to a significant increase in the number of licensed centers in the past two years. At the end of 2016, there were 165 licensed centers. As of December 1st, there were 210 licensed centers. This is an increase of 27% in just under 2 years.

Along with the increase in the number of licensed centers has been an increase in the number of centers that show substantial concerns regarding non-compliance with licensing standards. This has increased the severity of licensing sanctions that DHS has taken with some centers, which requires substantial amounts of staff time. This concern regarding non-compliance was highlighted in a report from the Office of Inspector General (OIG), U.S. Department of Health and Human Services (May 2018 A-05-17-00009). Based on information provided by the state, the federal OIG visited 20 adult day centers and found non-compliance at all centers. While the nature and severity of the non-compliance varied greatly, DHS recognized and agreed with many of the federal OIG's conclusions. Of particular concern was the identification of the lack of observable services during their visits. DHS has focused on these centers and others with similar concerns; however, the number of licensors limits the amount of action and support that DHS can provide.

Previously, two FTEs were adequate to provide the required licensing activity and oversight when there were far fewer centers and there were not the substantial compliance concerns that exist today. However, with the growth in the number of programs and significant concerns about non-compliance in areas related to health and safety, DHS is unable to adequately provide oversight within desired timeframes.

This proposal would allow DHS to provide licensing reviews at a 2-year interval. Current staffing supports a 4-year licensing review cycle.

Proposal:

This proposal would provide adequate staffing to meet statutory and policy requirements of licensing activity related to adult day centers. With this proposal, DHS' Home and Community-Based Services Licensing section would be able to conduct on-site reviews of licensed adult day centers at least once every two years. Adult day centers with licensing compliance concerns, including conditional licenses, would continue to receive heightened monitoring and assistance.

This proposal has a net General Fund impact of \$135,000 per year to add 2.0 FTE adult day center licensors to provide additional support to the adult day center licensing activity and provide biennial reviews of adult day care centers.

The additional FTEs will support the current number of license holders. DHS will assess each year the census of adult day centers related to the number of licensor FTEs.

Equity and Inclusion:

Licensing activity related to adult day centers primarily supports the provision of quality services to seniors who need supports and persons with disabilities.

There are no anticipated negative effects on the impacted group.

Recommendation:

The Governor recommends initiating a strategic redesign of the Disability Waiver Service System to promote equity, program sustainability, and increased personal authority for Minnesotans with disabilities receiving services, while updating management strategies for increased efficiency and accountability.

Rationale/Background:

Over 47,000 Minnesotans with disabilities live, work, and engage with their community with support from disability home and community-based services waiver programs administered by the Minnesota Department of Human Services (DHS), and counties and tribes. The four disability waivers – the Brain Injury (BI), Community Alternative Care (CAC), Community Access for Disability Inclusion (CADI), and Developmental Disabilities (DD) waivers – have different eligibility criteria, different services, distinct administrative requirements, and different resource allocation methods. While the programs provide critical supports, people with disabilities and other stakeholders agree that the disability waiver system is complex and could be easier to understand and use.

The 2017 legislature required the state to conduct two studies to:

- 1) Identify efficiencies, simplifications, and improvements through reconfiguring the waiver program structures (Minnesota Laws 2017, Article 18, section 2, Subd. 7(h)); and
- 2) Recommend an individual budgeting model for disability waiver recipients, linking a person's needs to the amount spent in their service plan (Minnesota Laws 2017, Article 18, section 2, Subd. 7(c)).

Together these studies are known as the Waiver Reimagine project. DHS contracted with the Human Services Research Institute to identify ways to make the waiver programs easier to understand, more efficient to administer, more equitable and more person-centered.

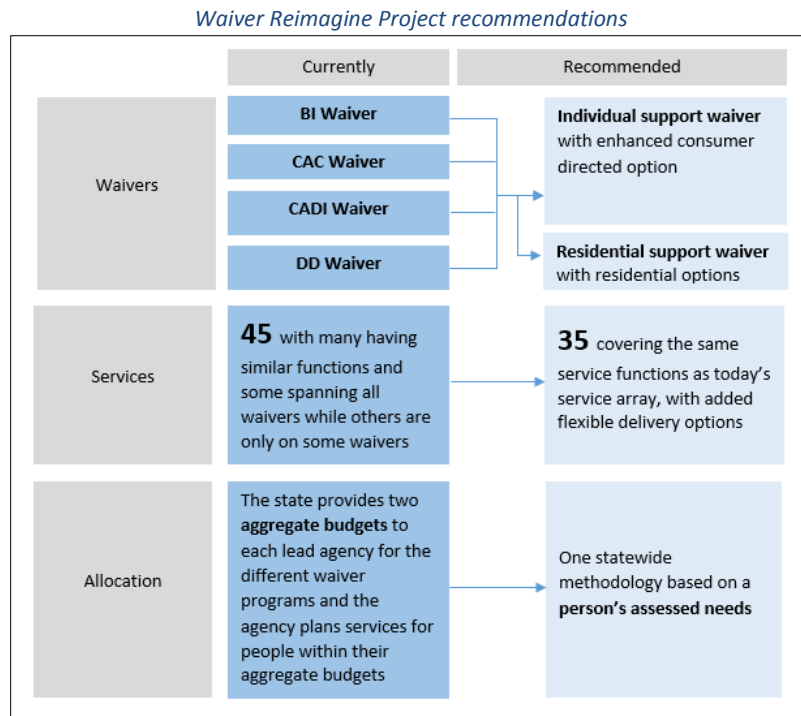

Throughout 2018, DHS and stakeholders worked to develop the project recommendations. Central to the project was extensive stakeholder engagement across the state and comprehensive research spanning the state, counties, and tribes. The project team conducted over 30 meetings and 14 focus groups that collected feedback from people with disabilities, families, advocates, providers, and lead agencies in every county in Minnesota.

The project also conducted a comprehensive review of the possible HCBS federal funding sources available to states, successes and challenges experienced by other states that attempted similar efforts, and data analyses of Minnesota's existing services that support people with disabilities.

Based on the work during this period, the project recommended:

- Combining the four disability waivers into a two waiver structure that reflects support needs based on the type community living setting an individual resides in;
- Standardizing and simplifying the services available under the new two-waiver structure so that service options are understandable to people and families; and
- Allocating resources using an individual budget allocation method that links a person's needs to a range of service plan costs.

The [Waiver Reimagine legislative report](#), which was released in January 2019, provides a detailed explanation of the project, including the analysis, stakeholder engagement, and recommendations. The figure below illustrates the differences between the current waiver system and the Waiver Reimagine recommendations. Together these recommendations will provide a streamlined, understandable system.

Given the scope of these changes, DHS recommends implementing the recommendations in a two-phase process. Both phases would require legislative and administrative activity. The first phase, beginning in fiscal year 2019, would prepare the system for the transition to a new waiver structure and finalize implementation plans. The second phase will require legislative changes during the 2021 legislative session and federal approval of program changes. The table below illustrates the high level tasks in each phase:

Phase 1: FY2019-2021	Phase 2: FY2022-2023
<ul style="list-style-type: none"> Continued stakeholder engagement Statute, rule, policy, and waiver plan review and modification Technical system development Streamline services available Enhance resources available to people and families about their supports Finalize budget allocation method 	<ul style="list-style-type: none"> Seek legislative approval in 2021 session Seek federal approval post 2021 session Continued stakeholder engagement Prepare a communication and technical assistance plan Implement a transition to new waiver and allocation structure

Proposal:

This proposal makes crucial changes to the four disability waivers to begin implementation of Waiver Reimagine Project recommendations. This proposal will:

- Streamline services available under the existing four disability waivers to align the service menu and to prepare for future reconfiguration;
- Finalize and prepare for implementation of an individual budget methodology;
- Require the preparation for aligning the four disability waivers into a consolidated two-waiver structure;
- Develop strategies for value-based payment and integrated support models; and
- Enhance resources available to people and families about their supports.

Streamlining the service menu

This transformational shift begins to implement the Waiver Reimagine project recommendations to simplify the service system for people with disabilities and their families and prepare the service delivery system for phase two of a new waiver structure. The table below summarizes these changes.

Services	Summary of Changes
Residential Services	Currently services have different names under the different waivers. This proposal: <ul style="list-style-type: none"> • Consolidates 6 services into 4 based on where it takes place: corporate, family, and single-unit • This includes a new service (Integrated Community Supports) to support people in single-unit settings such as apartments and tiered standards for Customized Living to comply with federal standards • Requires a study on the rate methodology for family foster care services
Day Services	Currently services have different names under the waivers and some waivers do not include all service functions. This proposal: <ul style="list-style-type: none"> • Consolidates 4 services into 3 based on function: basic health/social needs (adult day); develop/maintain life skills (day support); and develop general work skills (prevocational services) • To comply with federal standards, discontinues the use of Adult Day for new recipients and incorporates time limits for prevocational services • Modifies the rate methodology for all services to align with cost research
Individual Support Services	Currently services within each waiver and across different waivers have very similar functions. This proposal: <ul style="list-style-type: none"> • Consolidates 7 services into 3 based on function: support with daily living; support with skills and training development; and support with skills and training development that includes assisting a person's family • Enables remote and shared provision of services

This proposal streamlines services available across the four waivers, clearly defines services based on the setting it is provided in, adds innovative new service options, and makes service choices easier to understand. This proposal decreases the number of services that provide similar types of support, improving program understanding for people with disabilities, their families, service providers, and lead agencies.

These changes will impact program spending under the disability waivers. All service changes will be implemented on January 1, 2021, except for implementation of Integrated Community Supports (ICS) on the CAC and DD waivers will occur on January 1, 2023. This proposal includes two temporary FTEs to manage service consolidation and develop communications; one FTE to support implementation of ICS in conjunction with federal requirements, four temporary FTEs to support provider enrollment and assistance to providers, and one licenser.

Disability waiver reconfiguration

This proposal takes preliminary steps toward consolidation of the BI, CAC, CADI, and DD waivers into two home and community-based services waivers:

- One waiver that serves individuals living independently or at home with family, including a Consumer-Directed Community Support option; and
- One waiver that serves individuals living in residential settings.

In order to implement this reconfigured structure, the state must update existing systems; identify and adapt statutes, rules, and policies; develop a proposed waiver plan for submission to CMS; and continue engaging with lead agencies, service providers, and people with disabilities about this change.

Beginning July 1, 2019, this proposal allocates resources to continue developing this reconfiguration plan, with the requirement of providing an implementation proposal to the Legislature in the 2021 session. This proposal includes 3 FTE for planning future waiver redesign. These FTE's will conduct research and analysis of existing systems, statutes, rules, and policies. These FTE's will also communicate, conduct outreach and engagement, and train counties, providers, individuals receiving services, and their families. Funding will also include \$100,000 per year for planning and resource costs. There is also 1 temporary FTE (through 2023) to help coordinate federal requirements and work with CMS.

Individual Budget Model

In conjunction with waiver reconfiguration, this proposal provides planning resources to transition the resource allocation methodology from a lead agency budget model to an individualized budget model across all waiver programs. Beginning July 1, 2019, this proposal provides resources for this development and a requirement for a final implementation plan to the legislature by January 2021.

The recommended individual budgeting methodology that determines a service cost range for each person based on their assessed needs and living arrangement will replace the current Consumer-Directed Community Supports (CDCS) methodology. The model promotes transparent and flexible budgeting to provide valuable information to each person with disabilities and, as appropriate, their family about their budget range as they plan for services.

Budget model development will be done in conjunction with other changes identified in this proposal. To implement the recommended individual budgeting methodology, the state must:

- Update existing technical systems to calculate and store the budget based on the MnCHOICES assessment and community support plan;
- Update existing systems to provide individuals online access to view their budget and support plans;
- Rebase the initial budget methodology to incorporate changes that occur with the MnCHOICES 2.0 assessment, and service rates;
- Identify and adapt policies;
- Develop and submit waiver plan amendments to CMS; and
- Continue engagement with lead agencies, service providers, and people with disabilities to plan for, implement, and evaluate this change

This proposal includes necessary resources for implementation. . This includes 2 temporary FTEs to conduct research and coordinate with counties on allocations, waiver management system transition, outreach to individuals and stakeholders on impact and implementation of individual budgeting. This also includes contract funding to finalize the budget model and conduct annual reliability and validity testing.

Value-based payment strategies

As the state prepares for a transition to a new waiver structure, this proposal will require the Commissioner to conduct a study on value-based payment strategies for fee-for-service home and community based services. This proposal requires an October 2020 report detailing identified strategies to increase the quality, efficiency, and effectiveness of services and supports through integrated systems and outcome-based payment methodologies.

Supporting people and families

This proposal enhances the resources available to people as they plan for their services and lives by providing the following tools and support:

- **Access to service and life planning resources-** better connect people with disabilities and families who support them to planning resources.
- **Benefits planning-** Increase funding dedicated to optimizing the statewide capacity for individualized benefits planning services for people who receive disability-based public assistance benefits.
- **Regional support for person-centered practices-** to extend and expand regional capacity for person-centered practices to align policy and practices, by building on work that began in 2015.

Enhancing the resources available to people with disabilities and their families, this proposal also includes:

- \$50,000 per year to expand the Disability Hub for families, \$50,000 per year for Life Course materials, \$100,000 for small innovation grants for families in FY 2020 and \$200,000 ongoing; and .5 CSA FTE on an ongoing basis to provide staff dedicated to supporting families
- \$600,000 in additional funds each year for the Disability Hub to support benefits planning. These grants are eligible for 50% FFP due to the work related to eligibility.
- Grant funding to support regional cohorts for person-to-person planning and 1 CSA FTE to administer the grants. In FY 20-21, there will be two regional cohorts and then it is expanded to five cohorts by FY 2023. Regional cohorts will receive multi-year training, coaching and mentoring to use person-centered and collaborative safety practices in ways that benefit people served, employees, organizations, and communities to achieve systems change with measurable positive outcomes.

The full impact of the changes concerning the competitive workforce factor will occur when the banding period ends. This analysis is based on the February Forecast, which assumed that the banding period would end on December 31, 2019.

Equity and Inclusion:

This proposal affects over 47,000 Minnesotans with disabilities across the state who receive home and community-based services on the BI, CAC, CADI and DD waiver programs. This proposal implements strategies that will promote equitable distribution of resources across the state by streamlining the system to make it easier to navigate and restructuring the system to be centered around people's needs. We are committed throughout the restructuring of the home and community-based services system to create improved opportunities to measure and address disparities people receiving waiver services experience.

The individual budget model developed through this proposal will enhance equity across the state by distributing waiver service dollars based on a person's individual needs, regardless of waiver program and regional location.

This proposal will enhance the authority, flexibility, and accountability people with disabilities and their families' exercise over their services by providing information about the budget available as well as providing resources that people can choose to use to help them plan for services. These strategies will support all people with disabilities and families by providing more information to help them plan for their future and choose the right service at the right time.

IT Related Proposals:

This proposal will require programming changes to MMIS and the MnCHOICES Support Planning Application. This proposal requires systems changes in MMIS to incorporate new procedure codes, frameworks, and edits. Also, systems changes are needed for creating new procedure codes and updating rule and logic in MMIS service agreements and claims and updating all reporting requirements for federal reporting.

The funding will also include building an individual portal for support planning and building merged categories for individual budgeting in MNCHOICES.

MNCHOICES is assumed to have a 50% state share, MMIS has a 29% state share and other systems are assumed to have a 50% state share.

Results:

This proposal will result in increased access to the right service at the right time. Changes in service access will be measured through standardized access measurements defined and established through the Home and Community Based Services Access Project currently being conducted through calendar year 2018.

This proposal also seeks to improve the experiences of people with disabilities accessing disability waiver programs as measured through the National Core Indicators and LTSS Improvement Tool efforts.

This proposal will provide resources to people with disabilities and their families to assist in planning their future and making decisions about their services. Surveys and website data will be conducted to determine the usage and effectiveness of tools.

This proposal will expand the capacity to provide quality benefits planning and as a result will help reduce the barrier of fear of the impact work could have on benefits many people face. The following performance measures would be implemented: increase the number of people who have more monthly income and equal or better healthcare coverage after benefits counseling; increase the number of people who are interested in work and have community employment as a goal in their service plan; and increase the number of people who have a benefit plan associated with working.

Recommendation:

The Governor recommends incenting recruitment and retention of the direct care workforce through modifications to the Disability Waiver Rate System (DWRS). This proposal will enable the state to better address the current unprecedented challenges experienced by service providers in attracting and retaining quality direct care staff for disability home and community based services waivers by investing in wage and benefit increases to direct care staff, as well as enabling the rate formulas to keep pace with changing economic conditions.

Rationale/Background:

In 2013, the Minnesota legislature authorized the Department of Human Services to implement a statewide rate setting methodology for disability waiver services. The new system (Disability Waiver Rate System or DWRS) established a consistent formula in statute for setting rates for disability waiver programs - Brain Injury (BI), Community Alternative Care (CAC), Community Access for Disability Inclusion (CADI), and Developmental Disability (DD) waivers. Minnesota was under a corrective action plan with the federal Centers for Medicare and Medicaid Services (CMS) due to inconsistent rate setting methods throughout the state. Failure to comply with the corrective action plan jeopardized all federal funding of the disability waivers. Implementation of the DWRS, as well as other changes required by the corrective action plan, brought Minnesota's four disability waivers into federal compliance.

Under the direction of CMS, DWRS established rate formulas (called frameworks) that are based on the statewide average costs required for Home and Community Based Services (HCBS) waivers. These rate frameworks ensure that the state pays the appropriate value for the service and that people have equal access to needed services throughout the state. State statute details the rate setting frameworks, including the value of each cost component used to calculate rates. Cost components vary by service and include factors such as staff wages, employee benefits, employer-paid taxes, paid time off, indirect staff time, and program expenses.

After implementation of this system in 2014, the state conducted in-depth analysis on the cost of providing home and community based services waivers, the impact of the implementation of DWRS, and the changing economic conditions related to the direct care labor market. This proposal is a result of that analysis. After implementing this cost-based, prospective reimbursement model, the solutions in this proposal were identified as data-based mechanisms in the payment structures that could address challenges experienced in the direct care workforce in order to promote equitable service access to people across the state.

Proposal:

Qualified and available direct care staff are the cornerstone of home and community-based services that help people live and work in their homes and communities. As the demand for long term services and supports grows with shifting demographics and the supply of direct care staff decreases with the changing economy, the state should enact solutions that attract and retain workers in the labor market.

This proposal modifies existing language in the rate setting for Minnesota's disability waivers to provide data-based solutions to the state's workforce challenges. This proposal will achieve the following outcomes:

- **Address challenges in the direct care workforce by investing in wage and benefit increases to direct care workers**

The average wage paid to direct care staff is significantly lower than the average wage of workers in competing occupations. This proposal adds a Competitive Workforce component of 4.70% to service rate formulas dedicated to increasing direct care staff compensation. This change will enable the state to better address challenges in attracting and retaining quality direct care staff to meet the demands of people needing support across the state.

- **Enable the rate formulas to keep pace with economic changes**

This proposal adjusts the frequency that rate formulas are adjusted according to changes in inflation from every five years to every two years. This change will help the state address challenges in retaining and attracting direct care workers by enabling the rate formulas to regularly keep pace with the quickly changing economy.

- **Enable the state to assess HCBS direct care labor market trends and provider costs over time**

This proposal recommends an annual Direct Care Workforce Report that will assess the health of the labor market over time. This proposal also makes changes to current legislative reports on the DWRS rate formulas to add important outcome measures related to rate setting, provider costs, and the changing economy.

Altogether, the components of this proposal will result in service rates that improve compensation to recruit and retain a qualified direct support workforce and help ensure that rate formulas support access to needed services across the state.

Competitive Workforce Factor

This proposal will help the state of Minnesota address challenges in attracting and retaining qualified direct care staff in the home and community based service industry by incentivizing direct care staff compensation increases. The direct care workforce is not keeping pace with the growing demand of an aging population and persons with disabilities who need services and supports. Minnesota has about 135,000 persons in the direct care/support professions and will need an additional 59,000 in the coming years to meet the demand of service needs.

In addition to the growing demand for services due to demographic changes in the state, supply in the direct care labor market is particularly impacted by changes in the economy. While other industries may have the capacity to be agile in responding to changing economic conditions, the direct care industry is heavily reliant on human capital and revenue, especially in disability services, based exclusively on government-set funding. In many instances, service providers are competing for workers with other industries that are able to offer more incentives, while the job of direct care work may be more challenging than competing occupations.

Vacancies in the direct care labor market are drastically increasing. The graph below details the estimated vacancies from MN Department of Employment and Economic Development's [Job Vacancy Survey](#). This graph shows the estimated job vacancies over time in Minnesota for employees classified under the Bureau of Labor Statistics code for Personal Care Aides, which many times includes PCA staff, staff in day services, and staff in residential services.

Job Vacancies in MN, 4th Quarter BLS Code 39-9021 Personal Care Aides

While this data includes all jobs designated in this category and goes beyond the services paid for and provided under the disability waivers, it illustrates the current condition of the industry in Minnesota. The risk of not having an adequate labor pool for the direct care workforce of home and community based services provided under the disability waivers could dramatically impact people's lives and limit their ability to receive care in their homes and communities.

The state has been concerned about these challenges in the direct care workforce for several years and many people have worked together to recommend strategic solutions. In 2016, DHS hosted a [Direct Care/Support Workforce Summit](#) of over 200 people comprised of direct care workers, persons receiving support, provider organizations, advocates, higher education, and state and local government. Of the solutions identified, increasing staff wages was the top solution. Staff wages in the direct care field are low and many times are comparable to or below other industries with fewer demands of the employee.

In March 2018, the Cross-Agency Direct Care and Support Workforce Shortage Working Group submitted a recommendations report to the Olmstead Subcabinet. This report laid out a strategic vision for tackling the crisis in the direct care and support workforce. In July 2018, the group submitted a [work plan](#) that recommended defined strategies. The content of this proposal, increasing direct care staff wages and benefits and providing a mechanism to track and analyze the direct care workforce, were two proposed strategies in the work plan.

The Disability Waiver Rate System (DWRS) sets rates for most services provided under the disability waivers. The DWRS rate frameworks are composed of average costs incurred by providers across the state. The costs incorporated in the rate frameworks include factors such as direct care staff wages, employee benefits including health insurance, service costs, and administrative costs. The primary driver in the rate calculation is the direct care staff wage. This value is based on the statewide average hourly wage for applicable occupations, per Bureau of Labor Statistics data. These wages in the frameworks range from \$12.27 to \$33.42. The wage value in residential services is \$13.53 and the wage in day services is \$15.30. The weighted average wage in the frameworks across all services is \$14.03.

This proposal will incorporate a new factor to the rate formulas, a Competitive Workforce Factor, which will increase the direct care staff wage value to a level that is competitive with the average wage paid to employees in other competing industries. This factor is based on research published in the work plan submitted to the Olmstead subcabinet. This research compared all Bureau of Labor Statistics occupation codes that have the same education, experience and training requirements as direct care staff in home and community based services. The analysis found that the average direct care staff wage is 11.35 percent lower than the average wage for all

occupations with the same classifications. This research suggests that competing industries may have modified compensation to align with inflation over time, whereas the direct care service industry has had slower growth in compensation.

Beginning January 1, 2020, or upon federal approval, whichever is later, rate calculations will include a Competitive Workforce Factor applied directly to the direct care wage value in the framework in order to move direct care staff wages closer to the average wage of competing occupations. This change will occur on a rolling basis as service agreements renew.

As a prospective rate model based on statewide average data, there is currently no requirement for providers to attribute the rate formula's component values as their actual cost drivers. This means that the wage and employee benefit values that determine the provider agency's rate are not necessarily the wage rates and benefits that provider agencies pay their direct care staff. It also means that any legislated increase to the rate calculations, such as the automatic inflationary adjustments largely based on wage increases, will increase the dollars received by the provider agency but may not necessarily result in changes to compensation received by direct care staff. This proposal requires providers paid with rates determined under Minn. Stat. §256B.4914 to develop a plan identifying any increased revenues from the competitive workforce factor and explaining how those funds will be allocated. This plan must be publicly available to all employees of the company and made available to the commissioner, upon request. This proposal requires providers to use additional revenues from the competitive workforce factor to increase wages and benefits of direct care staff.

In order to monitor whether the increased compensation will result in positive outcomes to the direct care labor market, DHS will monitor wage changes over time using the workforce analysis described below. This analysis will evaluate how competitive workforce funding investments impacted the wage and benefits provided to employees.

This proposal will provide recommendations to the legislature for rebasing the Competitive Workforce Factor in conjunction with inflationary updates occurring in DWRS. Rebased recommendations will incorporate (1) analysis of provider-submitted workforce data about the effects of the competitive workforce factor on wages and benefits and (2) a biennial analysis utilizing Bureau of Labor Statistics wage data for direct care staff and comparable occupations. The goal of implementing this factor is to narrow the gap between wages and benefits in the direct care industry and competing occupations, with the understanding that the impact on individual service rates may vary. Because there are many factors at play in the economy, this renewed analysis could result in rebasing the factor, as authorized by the legislature.

Inflationary Updates

In addition to adding the Competitive Workforce factor, this proposal will help the state of Minnesota address challenges in retaining and attracting direct care workers by enabling the rate formulas to regularly keep pace with the rapidly changing economy over time.

Under current law, DWRS rate formulas are updated once every five years according to inflationary changes. While this requirement enables rates to be re-based over time, the five-year cycle does not support an agile response to rapidly changing economic and business realities that service providers often experience in the marketplace.

This proposal will modify the inflationary updates to occur once every two years beginning July 1, 2022, using data available the year prior. Utilizing older data will enable the adjustment to be estimated and published prior to the adjustment occurring, contributing to the stable ability to conduct business planning. The table below summarizes how this change compares to current law:

	Current Law	Proposed Change
Next Update	July 1, 2022	July 1, 2022
Frequency	5 Years	2 Years
Data	Most Recently Available (data published 3/2022)	Available on December 31, two years prior (data published 3/2020)

This change will result in smaller, more frequent adjustments than what occurs under current law. This change will encourage service rates to keep pace with the changing economy, and it will support providers in anticipating projected revenue and executing more frequent wage increases for direct care staff.

This proposal will also provide a technical clarification that will align DWRS statute to the re-basing requirements in Minnesota's federal waiver plans.

Assessing Labor Market Measures Over Time

This proposal will ensure that the state is able to effectively assess the health of the direct care labor market over time, provider costs under DWRS, and measure the effectiveness of the Competitive Workforce factor investments.

In order to assess the health of the home and community based service industry's direct care workforce and the efficacy of the Competitive Workforce Factor, this proposal will require DWRS providers to submit workforce data in an annual Direct Care Workforce Report. The data collected will include labor market indicators such as average wages, number of workers, benefits paid, and job vacancies. The department will be required to publish findings on the health of the direct care workforce each November beginning November 15, 2020. To ensure statistically significant data analysis, providers who do not comply with work force reporting requirements will be subject to a temporary stop payment action until reporting is provided.

This proposal will also make changes to legislative reports required for the Disability Waiver Rate System. This proposal adds the following measures to the list of required report components: a time-series evaluation of labor market measures, evaluation of the Competitive Workforce Factor, and evaluation of the Support Needs Factor. This proposal also modifies the effective date for the next legislative report to align with the data collection on labor market trends and the legislative budget cycle. This section of the proposal includes administrative costs for conducting a survey on annual labor market workforce data and also compiling the report.

The full impact of the changes concerning the competitive workforce factor will occur when the banding period ends. This analysis is based on the February Forecast, which assumed that the banding period would end on December 31, 2019.

Equity and Inclusion:

17% of people on the disability waivers identify themselves as a race or ethnicity other than white. Providing the opportunity for increased staff wages may improve the diversity of direct care staffing, as more people are drawn to the field, and improve retention of qualified staff. Providing the opportunity for increased staff wages increases the ability for people with disabilities to access and be included in their communities, with appropriate supports.

IT Related Proposals:

This proposal will require programming changes to the Rate Management System within the MNCHOICES Support Plan and Microsoft Excel service framework. This proposal will also require adaptation to provider cost reporting systems. The expected FFP rate is 50%.

Results:

The home and community based service industry is able to attract and retain more employees, leading to increased access to quality services and supports that people need.

This proposal will increase compensation to direct care staff employees. Increased compensation will increase the likelihood of staff wanting to work in the industry. Outcomes will be measured through the Direct Care Workforce Report where the department will assess the compensation paid to direct care staff, turnover of direct care staff, and vacancies in the industry. Changes in service access will be measured through standardized access measurements defined and established through the Home and Community Based Services Access Project. **Service rates will keep pace with economic changes in the market over time.**

This proposal will help ensure that the rate formulas keep pace with changing labor and business costs over time by incorporating more frequent inflationary adjustments. Provider service costs will be measured through provider cost reporting required under DWRS statute. The inflation-adjusted cost components will be compared these findings and modifications to the cost components will be incorporated into reports submitted to the legislature at least once every four years.

Recommendation:

The Governor proposes the following changes to nursing facility rates:

- Revising Value Based Reimbursement (VBR) rate limit formulas to create an incentive for better quality and limit rate growth for poorer performing facilities, establish a cap on the annual rate growth of the other operating rate, eliminate a hold-harmless clause, and continue suspension of the Critical Access Nursing Facility provision.
- Requiring nursing facilities to conduct an additional assessment following the end of therapy treatment to reclassify that resident into the appropriate Resource Utilization Group (RUG) for the remainder of the required quarterly assessment.
- Reforming the property payment rate setting system for nursing facilities enrolled as Medical Assistance providers in Minnesota. The intent is to implement a new property payment rate system that will be more equitable, transparent as well as encourage providers to maintain and improve the existing nursing facility buildings.

Rationale/Background:

Value Based Reimbursement Updates

In 2015, the Minnesota legislature enacted major reform to nursing facility reimbursement through Medical Assistance (MA). This system is referred to as Value Based Reimbursement (VBR). This proposal is based on initial analysis of the effects of VBR on quality adjusted payment limits and the growth rate of direct care costs, which is a sub-set of operating costs.

VBR incorporates pay for performance by setting nursing facilities' care-related payment rate limits based on quality. The formula used to set the care-related spending limits uses the median of care-related costs of nursing facilities in the seven-county metro area, multiplied by a factor representative of their composite quality score. The quality score is computed using the most recent available data on three quality measures from the Minnesota Nursing Home Report Card: Resident Quality of Life interviews (50% of score); Minnesota Clinical Quality Indicators (40% of score) and State Inspection Findings (10% of score).

Under the current rate calculation methodology, most nursing facilities are significantly under their care-related spending limits. With the gap between actual costs and the facility specific rate limit, there is no incentive for the facility to improve its quality performance as they are being reimbursed for all their direct care costs regardless of the quality of their services. This proposal modifies the quality incentive with two approaches effective January 1, 2020. The details of the proposed modifications can be found in the Proposal section of this document.

Removal of Therapy Incentive for Medical Assistance from the Minnesota Case Mix

Minnesota law establishes a Resident Reimbursement Classification system based on the assessments of residents of nursing homes and boarding care homes to determine a resident's clinical and functional status. These resident assessments are used to determine a case mix classification for a resident for purposes of determining the daily rate that the facility charges for the resident's care.

The assessment intervals for determining the resident's case mix classification are specified by statute. Each resident receives a quarterly assessment, every 90 days. Residents assessed at a higher therapy RUG at the beginning of a quarterly assessment may not need or receive therapy after a certain point into the quarter after the assessment, but will remain in (and be billed for) that therapy group for the entire 90 days regardless of how many days therapy is actually provided. While this proposal affects the MA budget, it also affects what private pay residents will pay for nursing home care. The number one complaint by private paying residents to the Minnesota Department of Health (MDH) Case Mix Section is having to pay for services at a higher level when the services are not provided.

Nursing Facility Property Payment Reform

The current property rate system is extremely complex and allows for multiple avenues to adjust a facility's property rate. As a result, there have been many special legislative requests for individual nursing facilities creating a customized daily property rate. These property rates are based on factors that are not applied equally across all nursing facilities because they are not standard formula-driven calculations. It is not a transparent approach and results in inequities and variations within the property rate system.

There are two major areas of inequity. First, the property rate is based on costs and appraisal values that are largely out of date, between 12-22 years for the base rates. Second, the additions to the property rate received by individual nursing facilities for projects and bed modifications vary due to the complications of the formula. The current property system is difficult to administer, and is not easy for consumers, stakeholders, or providers to understand.

In addition, the system does not allow additional property funds to be used in the most efficient manner. For example, the current system rewards large remodeling projects with higher rates than rates for a complete replacement of an existing nursing facility. The current property system does not properly recognize interest costs, depreciation and adjustments to the rate for changes in the use of space as a result of some construction projects.

The proposed changes are intended to reduce the average age of nursing facilities in Minnesota (which is reflective of how many major portions of the facility have been upgraded or improved); and improve quality of life for residents due to more private rooms, more common spaces such as activity rooms, day spaces, a library, etc. The current property rate system is not supportive of needed property improvements and, as a result, nursing facilities are not incented to make these improvements.

Proposal:

Value Based Reimbursement Updates to the Quality Incentive

Proposed Revision 1: First, the proposal changes the method in determining a facility's quality performance. Under current statute (256R.16), the commissioner may adjust the methodology for computing the total quality score with five months advance notice. Under this authority, this proposal establishes a more robust methodology of determining the total quality score by adding a short-stay quality component (consumer experience survey and hospitalization rate) and expanding the number of quality indicators used in the calculation for long-stay (family satisfaction survey). In order to account for differences between facilities, DHS determined a weighted average quality score that considers the amount of short stay and long stay residents served on an annual basis.

Proposed Revision 2: The proposal lowers the quality-related limit on care related costs. Facilities with a quality score of 70 would have a limit established at the metro median cost level. A quality score of 60 would receive 80% of the metro median cost and a quality score of 80 would receive 120% of the metro median cost. Another feature of this proposal is the recognition that a major component of care-related costs are worker salaries. It is common for salary levels to differ substantially between rural and urban settings. In order to address this, the proposed approach adjusts the limit for each facility according to the Medicare county wage index. This approach incentivizes quality improvement for facilities in rural areas without creating a competitive disadvantage in hiring and recruiting workers for facilities in urban areas.

In 2019, under current law, only 2.5% of nursing facilities are limited by the quality incentive and another 3.5% of nursing facilities are protected by the 5% stop loss. This stop loss feature retained from current law, establishes a floor of a 5% drop of the quality limit from year to year, and will serve as a phase-in feature. The table below demonstrates the increase in numbers of NFs who will have costs limited by the quality incentive.

Rate Year	2019	2020	2021	2022	2023
% of facilities below limit	97.5%	94.4%	88.0%	78.3%	76.9%
% of facilities above limit	2.5%	1.9%	2.5%	11.1%	18.9%

The tables below reflect the current baseline in quality and the proposed change:

Current Baseline: There are only eight facilities that exceeded the quality adjusted payment limit as indicated by the “Xs” above the diagonal line with the quality adjusted payment limit for rates established January 1, 2018.

Most nursing facilities are significantly under their care-related spending limits and would need to increase their spending significantly to reach their limits as currently defined. With the gap between actual costs and the facility specific rate limit, there is no incentive for the facility to improve its quality performance as they are being reimbursed for all their direct care costs regardless of their quality of services.

Baseline: Current Rate Calculation

60/80 20 Percent Wage Index Adjusted Limit (Metro Median):

This scenario demonstrates a quality score of 60 with costs 20% below the median and a quality score of 80 with costs 20% above the median. The costs are divided by the Medicare county Wage Index factor in order to make them comparable in terms of salary costs.

Points below the line indicate facilities whose costs are below the quality limit and are therefore not impacted. The X's noted on the graph indicate a facility with costs exceeding their rate. The +s indicate facilities whose actual limit is higher than the quality line due to the limit on rate reduction from prior year (a rate cannot be reduced by more than 5% of the current metro median cost). A triangle indicates that the actual rate is higher due to the hold harmless provision. The +s above the line indicate that costs exceeded the quality adjusted payment limit.

Other Operating Rate

Under VBR, the other operating rate component pays for dietary staff, housekeeping, laundry, utilities and administrative costs. The seven-county metro area median other operating daily cost is determined and then multiplied by 105%. The resulting amount is the other operating rate paid to all nursing facilities in the state. This proposal assumes the other operating rate grows over time at the same rate as the total operating rate which is forecasted to be 6.4% to 7.0%. This proposal would cap the annual growth rate of the other operating rate to the published Skilled Nursing Facility Market Basket Index which is currently 3.05%. The goal of this change is to slow the rate of growth within operating costs and promote operating efficiency. The effective date of this change is January 1, 2020.

Continued Suspension of Critical Access Nursing Facility Program (CANF)

Legislation enacted in 2012 authorized the creation of the CANF program with a goal to preserve access to nursing facility services in isolated areas and under financial distress by establishing rates based on actual costs and other rate enhancement features. In 2015 with the enactment of VBR, which implemented full rebasing of payment rates to facility costs, the partial rebasing under the CANF program was not of value and the program was suspended for two years and no CANF funds were available between January 1, 2016 and December 31, 2017.

This proposal continues to suspend CANF funding for four years from January 1, 2020 through December 31, 2023.

Other Features of VBR

VBR contains a hold harmless clause which states that facilities at least receive the rate they had for the year prior to the implementation of the new VBR system. The analysis shows that the hold harmless clause is no longer needed as very few facilities continue to benefit from it, and these facilities have had adequate time to adjust to the new reimbursement system. This proposal would eliminate the hold harmless clause effective January 1, 2020.

The Value based reimbursement portion of the proposal which includes the quality incentive, the operating price cap, and the CANF suspension, produces savings. The proposal also contains an investment in administrative resources for two auditors to ensure an effective implementation of the changes and timely issuance of annual rate notices.

Removal of Therapy Incentive for Medical Assistance from the Minnesota Case Mix

This change, effective January 1, 2020, impacts the Minnesota's Resident Reimbursement Case Mix Classification statute. The change will require nursing facilities to conduct an additional assessment following the end of therapy treatment to reclassify that resident into the appropriate RUG for the remainder of the required quarterly assessment period. There will be savings to MA because the number of days in a higher and more expensive RUG classification will be shortened and the remaining days where therapy is not being provided will be paid at a lower, less expensive RUG classification level.

Nursing Facility Property Payment Reform

This change replaces the current property reimbursement system with a fair rental value based system for determining the daily property rates for nursing facilities. It will rebase each nursing facility's property rate using a recent valuation of their property. A fair rental value system establishes a price for the use of a space, based on an appraised value of the property. The price is established without consideration of the actual accounting cost to construct or remodel the property. The goal of using a fair rental value system to set property rates for nursing facilities is to determine a fair price (property payment rate) to pay for lodging Medical Assistance (MA) residents. The intended results are to simplify and create transparency in property rate setting, reduce inequities of the current system, move to a value based payment system and create incentives to maintain and/or invest in replacement buildings.

Current property rates will be preserved via a hold harmless provision that will phase out over six years. The number of nursing facilities in a hold harmless status will decrease each year as the market value catches up to their current rate or the hold harmless rate is phased out. Year 1 – full hold harmless (HH); Year 2 – 20% new fair market value rate (FMV)/80% HH; , Year 3 – 40% FMV, 60% HH; Year 4 – 60% FMV, 40% HH; Year 5 – 80% FMV, 20% HH; Year 6 – 100% FMV.

DHS will contract with an appraisal firm to update the fair market value of all nursing homes on an annual basis for purposes of setting the annual property rate. The appraisal firm will conduct an on-site re-appraisal for one third of the nursing homes each year and those homes who have completed a major construction project. The appraisal firm will provide DHS with an updated market value for the remaining two-thirds of the nursing homes each year, utilizing an appropriate market value indexing system. Rates will be established based on a 5.5% rate of return and will be limited by square feet per bed and a dollar value cap per bed, assuming a 90% occupancy rate. Medicaid will pay a 10% add-on for medically necessary single bed rooms.

A number of mechanisms allowing for a property rate adjustment under the current system such as planned closure rate adjustments, bed layaways, relocations and consolidations and construction projects under the moratorium threshold will be eliminated. The actions themselves will still be allowable but it will not trigger a

property rate adjustment. The fair market value system will account for these actions through the re-appraisal process and capacity changes rather than a cost-based rate calculation. The new system will preserve the current moratorium exception process. This process is a competitive application process for major construction projects exceeding an established threshold. The proposal contains an investment of \$1.5 million dollars to fund future moratorium exception projects. Total investment for transitioning to a new fair rental value property system is \$4.7 million for FY20/FY21 and \$900,000 for FY22/FY23. One additional staff position is needed to implement and provide ongoing program administration. The proposed fair rental value system will also have an annual administrative cost of \$225,000 in FY 2020 to \$265,000 in FY 2023 to hire an appraisal firm for on-going valuation of the nursing facilities.

Interaction with Elderly Waiver and Alternative Care Programs:

Monthly budget limits for Elderly Waiver (EW) and Alternative Care (AC) program participants increase every January 1st based on the weighted average impact of Home and Community Based Service rate increases or nursing facilities operating payment increases, whichever is greater. Since this proposal results in a decreased rate of growth in nursing facility operating payments, monthly budget limits for EW and AC would also increase at a slower rate than under current law, resulting in savings in both of these programs. The overall state share savings for the Elderly Waiver is about \$713,000 in FY 2023 and state share savings is about \$69,000 for the Alternative Care program in FY 2023.

Equity and Inclusion:

The VBR reform proposed changes do not impact any identifiable racial or ethnic group differently than the general population of nursing facility residents. The proposal supporting modification to the formula that limits the reimbursement of care-related expenditures in ways that are more sensitive to individual nursing facilities. The impact will be positive if the revised formula incentivizes nursing facilities to improve the quality of care they provide to residents. The ongoing funding mechanism for reimbursing direct care costs is built into VBR and is tracked using quality indicator performance measures.

There are no specific groups that are impacted by the change to therapy assessments. There will be positive benefits for anyone that is in a RUG group who has been paying a higher daily rate for services that were no longer being provided within the quarterly assessment window because their daily rate will decrease. This is a sustainable change and will be tracked through Case Mix Review audits and MA payment summaries.

The property reform proposal will most directly affect persons in nursing facilities with disabilities that require upgrades to the physical plant for purposes of building accessibility for ADA compliance (wider doorways, toilets, showers, larger dining rooms), for accommodation of mobility devices such as wheelchairs and scooters, ability to install ceiling lifts for bariatric patients, etc. The ability to increase private rooms may expand access to a more diverse resident population by being able to better meet accommodation and service needs.

Approximately 5.5% of nursing facility residents self-identify as belonging to one or more non-white racial/ethnic groups. Twenty nursing facilities have a proportion of minority residents of 25% or greater and nearly all 20 of those facilities are in Hennepin County in older facilities. A more transparent and equitable property rate system will incent more facilities to upgrade their facilities and improve quality of life for their residents.

IT Related Proposals:

No infrastructure, hardware, software or training changes are anticipated for this proposal. Some programming changes are needed related to the quality incentive, limit on other operating rates and establishment of a fair rental value property rate and will involve about 120 hours of a programmer's time.

Results:

We will track results of this proposal using the following measures.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Current</i>	<i>Dates</i>
Quantity	Medicaid Therapy RUG group paid days.	24% of all therapy days paid by MA	CY2020 – CY2023
Quantity	Actual other operating costs compared to the established rate	Annual Cost Report	Cost Report Years 2019 - 2023
Quality	Quality Measures (Report Card)	See Below*	2016-2022
Quality	Annual Appraised Property Values	2016 Values**	2021 – 2023

*The quality indicators are publically shared data, individual by nursing facility, via the Minnesota Nursing Home Report Card website (<http://nhreportcard.dhs.mn.gov/>). DHS, per statute, is required to analyze the impact and outcomes of the VBR payment system.

**DHS will contract with an appraisal firm to update the fair market value of all nursing homes on an annual basis for purposes of setting the annual property rate. The appraisal firm will conduct an on-site re-appraisal for one third of the nursing homes each year and those homes who have completed a major construction project. The appraisal firm will provide DHS with an updated market value for the remaining two thirds of the nursing homes each year, utilizing an appropriate market value indexing system.

Recommendation:

The Governor recommends allocation of funds to meet obligations under the contract between the State of Minnesota and the Service Employees International Union (SEIU) negotiated for FY 2020-2021. The total investment for this proposal for FY 2020-21 is \$36.5 million and in FY 2022-23 is \$38.9 million.

Rationale/Background:

The 2013 Legislature authorized collective bargaining for individual providers of direct support services. (Laws of Minnesota 2013, chapter 128, article 2). In August 2014, workers in self-directed programs in the state voted to form a union. The union includes workers in the Personal Care Assistance (PCA) Choice program, and the other self-directed programs, Consumer Directed Community Supports, and the Consumer Support Grant. This union's exclusive representative is the Service Employees International Union (SEIU).

The state completed negotiations for a new contract in January 2019 with SEIU. This request funds contractual obligations for FY 2020-2021 based on the terms of the negotiated contract. While SEIU does not represent all Personal Care Assistance workers, Federal Medicaid requirements do not allow differential payment rates based on union membership.

M.S. §179A.54 states that individual providers of direct support services, as covered under section 256B.0711, subdivision 4, shall be considered executive branch state employees for the sole purpose of collective bargaining. The current contract between the State of Minnesota and these workers' exclusive representative, SEIU, will expire June 30, 2019. This request is to fund contractual obligations for FY 2020-21.

Proposal:

This proposal includes increased rates for wages and benefits for individual providers, as well as additional funding for training. There are 29,000 workers covered by the collective bargaining agreement.

The proposal:

- Increases the minimum wage floor in state fiscal year 2019 to \$13.25/hour
- Increases paid time off (PTO) accrual rate to 1 hour for every 40 hours worked
- Establishes holiday pay at time and a half for hours worked for 3 additional permanent holidays, for a total of 5 holidays.

Costs for increasing wage floors, holiday pay, and PTO requirements are incorporated into the Medical Assistance payment rate for the Personal Care Assistance program, and the budgets for Consumer Directed Community Supports, Alternative Care and the Consumer Support Grant. This represents a 2.37% rate increase on July 1, 2019 to pay for the wage and PTO costs negotiated in the agreement and to pay time and a half for hours worked on the additional 3 holidays permanently added in FY 20-21 contract. The FY 18-19 contract included these holidays on a one time basis.

Effective July 1, 2019, for service recipients who are eligible for 12 or more hours of PCA services per day (as described in Minnesota Statutes 256B.0652) and whose workers have additional training, this proposal gives a 7.5 % increase to the rate for the Personal Care Assistance services, and the budgets for Consumer Directed Community Supports, Alternative Care and the Consumer Support Grant. Prior to this contract, the enhanced rate was negotiated at 5%. Because the 5% enhanced rate has already been implemented, no significant IT or administrative resources are necessary to increase the rate from 5% to 7.5%

An additional \$375,000 in FY 2020 and \$375,000 in FY 2021 is allocated for stipends to pay for training. Each stipend is \$500; the stipends are available for individual providers who have completed designated, voluntary trainings made available through or recommended by the State-SEIU committee. This training is capped at 1,500 individual providers in fiscal year 2020.

This proposal allocates \$125,000 in FY 2020 and \$125,000 in FY 2021 to the State-SEIU committee to pay for expenses associated with developing additional new worker orientation.

This proposal allocates \$125,000 for administrative costs in FY 2020, including Disability Services Division grant administration costs and costs for HCA to adjust contracts mid-year. In FY 2021, \$75,000 is allocated for grant administration to the Disability Services Division. This funding is one time only.

In addition, the proposal adjusts the 2017 legislative tracking for PCA negotiations to match the final negotiations that occurred after the end of the 2017 legislative session. At the end of the 2017 legislative session, the legislature reduced the total value of the original negotiations that had occurred in early 2017. To allow for new negotiations with the union, the end of session rider language for the negotiations permitted transfer authority between the different budget activities. However, the language did not include all transfers. The tracking has been corrected to match the final contract agreement for 2017. This is a budget neutral change.

This table shows the breakout of costs for the different components in the union contract:

Self-Directed Union contract- 2020-2021						
	FY 20	FY 21	FY 20-21	FY 22	FY 23	FY 22-23
13.25/hour minimum wage	14,783,098	14,802,629	29,585,727	15,427,649	15,580,622	31,008,271
Paid time off- 1 hour for every 40 worked	750,411	751,403	1,501,814	783,129	790,895	1,574,024
Holiday pay at time and a half worked for 3 additional holidays	2,176,192	2,179,067	4,355,259	2,271,075	2,293,594	4,564,669
Complex needs- 7.5% for 12+ hours	501,622	770,333	1,271,955	788,732	808,060	1,596,792

Self-Directed Union contract- 2020-2021						
	FY 20	FY 21	FY 20-21	FY 22	FY 23	FY 22-23

Administrative costs to administer grants and actuarial costs	125,000	75,000	200,000	0	0	0
Interactive effects, FFP, payment delay	(1,491,875)	54,132	(1,437,743)	81,098	82,173	163,271
Total	17,344,448	19,132,564	36,477,012	19,351,683	19,555,344	38,907,027

Equity and Inclusion:

The PCA program is one of the most diverse long-term service and support programs in Minnesota and has been growing more diverse over time. In January 2017, 61% of program participants were people of color or Native American. Approximately 33% of PCA recipients were non-Hispanic white, compared to an estimated 80% of Minnesotans statewide. The graph below illustrates PCA participants by race and ethnicity.

* Hispanic includes people of all races

The PCA program is vital to ensuring that people are able to live and receive services in the communities of their choice and avoid institutionalization to meet long-term care needs. Because the people that use PCA services are diverse, changes made to wages and benefits for PCA providers via the contract negotiations will positively impact an extremely diverse community. Increased wages and benefits allow people to retain the individual provider of their choice and attract more providers into the pool of direct support workers.

IT Related Proposals:

No additional IT costs are needed for the enhanced rate increase from 5% to 7.5% for those PCA recipients receiving 12 or more hours of services. The systems funding was received in the 2017 legislative session.

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Minnesota Sex Offender Program Funding (DC41)

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	9,758	9,758	9,758	9,758
Revenues	(1,758)	(1,758)	(1,758)	(1,758)
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	8,000	8,000	8,000	8,000
FTEs - Maintained	84.00	84.00	84.00	84.00

Recommendation:

Effective July 1, 2019, the Governor recommends increasing appropriations to the Direct Care and Treatment (DCT) Minnesota Sex Offender Program (MSOP) by \$19.5 million for the FY 2020-21 biennium and \$19.5 million for the FY 2022-2023 biennium. These new resources will:

1. Provide clinical and operational services to the increased number of clients who have been Court ordered to Community Preparation Services (CPS), a less restrictive alternative setting on the St. Peter campus.
2. Provide Reintegration Services to clients that have been provisionally discharged to assure close supervision and a successful community transition.
3. Provide MSOP with the ability to charge Counties 25% for the Cost of Care for clients that are Provisionally Discharged from MSOP.
4. Maintain 84.00 FTEs.

This request represents approximately a 9.1% increase to the MSOP General Funds base funding for the FY2020-FY2021 biennium.

Rationale/Background:

Under current law, MSOP is required to provide sex offender specific treatment for individuals that receive a civil commitment as a sexual psychopathic personality and/or a sexually dangerous person. In the last five years, growth in the number of new clients civilly committed has stabilized. Meanwhile, the number of clients progressing through treatment and being court ordered for transfer to the Community Preparation Services (CPS) program continues to increase. Additionally, the number of clients receiving a court order for provisional discharge is increasing as well. As of January 31, 2019, there were 36 individuals with court orders to be transferred to Community Preparation Services (CPS) yet still waiting transfer, 21 clients living in the community on Provisional Discharge Orders, and 3 clients that have Provisional Discharge Orders waiting to be discharged to a community setting.

When an individual is Provisionally Discharged from MSOP, MSOP is required by statute to provide supervision, aftercare and case management services. MSOP must also act as the designated agency to assist with establishing client eligibility for public welfare benefits and it must provide all necessary services, including those services exclusively available through county government. At present, there is no statutory language that establishes or specifies a county share for the cost of these services. The statute only addresses county responsibility for Cost of Care during the time a client is housed at the MSOP facility.

An additional constraint for MSOP are resources for Reintegration Services. There are a limited number of supervised housing options in the community for clients court-ordered for Provisional Discharge from MSOP. Further, as of December 2018, approximately, 70 municipalities have enacted residency restrictions that prohibit clients from locating in those communities. It is anticipated that additional municipalities will enact these restrictions. Frequently, these restrictions are enacted shortly after learning that a sex offender, who is provisionally discharged from MSOP or released from prison, plans to locate in that municipality. As a result of these residency restrictions, MSOP has begun partnering with private owners to lease properties so that provisionally discharged clients can obtain placement in a supervised setting outside of the St. Peter campus, so that these individuals may safely reintegrate into the community.

In order to assist clients in safely and successfully reintegrating back into society, clients initially live in a supervised setting for a period of time after being provisionally discharged; this process better prepares clients for eventual independent living. DHS opened one supervised transitional home for 4 clients staffed by trained and experienced MSOP employees for clients provisionally discharged to the community in 2018. At this facility, each client is assigned a Reintegration Agent who closely monitors the client to assure conditions of provisional discharge are being followed.

Proposal:

Effective July 1, 2019, this proposal provides funding for Community Preparation Services (CPS) and Reintegration Services that have not received any base appropriation funding. Changes within the MSOP program over recent years has increased the professional staffing levels in order to comply with court requirements. This has resulted in an increase in the cost per position. To staff within available funding, the program has needed to reduce the number of direct care positions. This proposal would appropriately fund Community Preparation Services (CPS) and Reintegration Services allowing current program resources to again be available for new commitments into the program.

This proposal also expands the county cost of care responsibility to include individuals on provisional discharge. Unlike provisionally discharged individuals from other programs within DCT, MSOP has the responsibility for aftercare and case management of these individuals and not the county of financial responsibility. This proposal would expand the cost of care statute to add a 25% county cost of care liability for individuals provisionally discharged to the community.

Equity and Inclusion:

- This proposal will provide a positive impact in recruitment efforts for MSOP, and thus more cultural responsiveness in working with clients. It provides the opportunity to increase the ability to have, and maintain, a diverse workforce to meet the needs of the current clients in MSOP.
- Targeted recruitment initiatives with funding will improve efforts and the opportunity to partner with culturally specific organizations, tribal and historically Black colleges, Lesbian, Gay, Bi-Sexual, and Transgender organizations, Veterans, and Persons with Disability services in addressing additional staffing needs.
- Provide the opportunity to reduce disparities in the hiring process by addressing affirmative action goals.

Many of the culturally specific services on the St. Peter campus are currently located inside the secure perimeter. This proposal would increase access to available services outside the secure perimeter.

Since this community setting will be less-restrictive than either campus, this proposal will provide more opportunity for access to a variety of community-based resources and activities. In addition, reintegration staff will assist individuals with connecting with more resources in their communities that better align to their preferences.

Department Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Minnesota State Operated Services (MSOCS) Operating Adjustment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	1,594	3,729	3,729	3,729
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,594	3,729	3,729	3,729
FTEs Maintained	20.3	46.5	46.5	46.5

Recommendation:

Effective July 1, 2019, the Governor recommends an operating adjustment of \$5.3 million for the FY20-21 biennium and \$7.5 million for the FY22-23 biennium from the General Fund to the Direct Care and Treatment (DCT) Minnesota State Operated Community Services (MSOCS) program to provide on-going funding for previously approved salary, insurance, and pension increases for the program.

This funding is needed to continue to provide services to over 1,000 individuals throughout the state.

Rationale/Background:

Minnesota State Operated Community Services (MSOCS), which is part of Community Based Services (CBS) within Direct Care and Treatment, provides residential and vocational support services for people with disabilities.

Services include:

- **Residential Services** for individuals with mental illness, intellectual disabilities or related conditions. The program supports approximately 450 individuals annually; and
- **Vocational Services** for individuals with mental illness, intellectual disabilities or related conditions. In FY18 the program supported 671 individuals in the community through supported or customized employment

MSOCS is an enterprise program that operates on collections from individually determined rates for services provided to clients. The Disabilities Waiver Rates Management System (RMS) must be used to calculate rates based on the service framework. State salary and other personnel costs consistently exceed the maximum allowed under RMS rate setting process. DHS is unable to change rates to as costs, such as employee salaries, grow.

Proposal:

This proposal seeks to provide an operating adjustment to support the financial sustainability of the MSOCS program. The operating adjustment will help fill the gap between the cost of operating the program and the revenue generated by the program.

To further mitigate operating losses, MSOCS is in the process of transitioning its services to support individuals consistent with the DCT strategic vision and who require an exceptional level of care. This plan includes:

- Transitioning programs supporting individuals that no longer require MSOCS level of care to private community-based providers
- Consolidating residential homes that have had long-term vacancies to allow for more effective use of the properties and/or staffing resources available
- Working with counties to fill vacancies within other MSOCS residential homes
- Consolidating vocational services sites to reduce the number and size of the sites as more individuals are being supported in community jobs so less day treatment space is required
- Creating new programs for individuals who have exceptional needs and have been unable to secure other placements in a community setting

Approximately 85-90% of total operating costs for MSOCS is for staff salary and benefits. The table below shows the projected increase in State Salary Expense for the MSOCS program.

SWIFT Salary Projections as of 11/21/2018

	Base FY19	FY20	FY21
Regular Salaries	\$ 66,223	\$ 66,376	\$ 67,212
Fringe Benefits	\$ 30,293	\$ 31,734	\$ 33,033
Total	\$ 96,516	\$ 98,110	\$ 100,245
Increase from Base		\$ 1,594	\$ 3,729
Average Salary		\$ 78	\$ 80
FTEs Maintained		20.32	46.52

Average Salary is based on 1,250.50 Filled FTEs as of 11/21/2018

Equity and Inclusion:

This proposal impacts all cultural, racial, and ethnic groups, as well as lesbian, gay, bi-sexual, transgender individuals, persons with disabilities, and their families currently being provided services and those who in the future may or may not meet the changing criteria for services.

The changes could provide the opportunity to have more culturally specific homes to meet the needs of clients that require special needs such as those individuals whose primary or preferred language is not English, refugees, or other diverse populations that has specific communication and cultural needs.

IT Related Proposals:

N/A

Results:

The operating adjustment will provide funding that will:

- Support the financial stability of the program;
- Increase the ability of MSOCS to serve more challenging individuals in order to reduce inappropriate hospital or jail stays; and
- Provide stability for the individuals living in MSOCS programs while MSOCS transitions to be a provider for individuals who cannot or will not be supported by private providers

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Increase Bed Capacity within DCT's Minnesota Specialty Health Services (MSHS) Programs

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	4,352	4,352	4,352	4,352
Revenues	(19,068)	(6,068)	(6,068)	(6,068)
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	(14,716)	(1,716)	(1,716)	(1,716)
FTEs	15.95	15.95	15.95	15.95

Recommendation:

Effective July 1, 2019, the Governor recommends increasing appropriations to the Direct Care & Treatment (DCT) Mental Health & Substance Abuses Services (MHSATS) in order to fully utilize the licensed bed capacity and enhance the services provided to individuals in two of its four Intensive Residential Treatment Services (IRTS) facilities. This increased appropriation is offset by returning collections currently deposited to the State-Operated Services Account to the state General Fund.

Rationale/Background:

Direct Care & Treatment operates four (4) Intensive Residential Treatment Services (IRTS) sites located in Brainerd, Wadena, Willmar and St. Paul-Como. Each site is licensed as a 16-bed program. The Brainerd site specializes in services for individuals with neurocognitive conditions. Services provided are billed to medical assistance and insurance, when it is available. Room and board is billed to group residential housing, when individuals qualify, or to the individual, if they do not qualify. Collections received for Brainerd, Willmar and Wadena are deposited into the State-Operated Services Account, which is a dedicated revenue account in accordance with Minnesota Statute, section 246.18, subdivision 8. Collections for the St. Paul-Como site are deposited into the General Fund. Operating funds for the Brainerd, Wadena and St. Paul-Como sites are provided through a General Fund appropriation; funding for the Willmar site is provided through an appropriation from the State-Operated Services Account.

As of December 2018, all four of the sites are operating at a staffed capacity of 12 beds, as a result of both funding levels and the staffing mix required to work with the challenging population being served. The Willmar site has operated at the same funding level since 2013, when a bill was passed, to keep the site open. There has been no additional funding to cover cost of living increases to offset additional staff costs.

Proposal:

This proposal will: 1) increase the funding for two IRTS facilities to allow the sites to operate at full capacity with appropriate staffing; 2) appropriate funding from the General Fund for the Willmar site; 3) move collections from the State-Operated Services Account to the General Fund; and, 4) transfer any remaining balances within the State-Operated Services Account to the General Fund.

This proposal is intended to simplify the funding of the programs and allow for the operation of two of the facilities at the full bed capacity. Operating these sites at full bed capacity will increase available discharge locations for clients who need a residential level of care, freeing up hospital beds for those that need a hospital

level of care. This proposal will also provide additional program funding to increase staffing ratios at these two sites to better serve individuals, increase clinical efficacy, and provide regulatory required individualized care and treatment. The IRTS programs are a vital part of the Direct Care & Treatment care continuum, serving as a step down from Anoka-Metro Regional Treatment Center (AMRTC) and the Community Behavioral Health Hospitals (CBHHs). Increasing the bed capacity at the IRTS will allow more flexibility and timeliness in discharges from hospital level of care.

Equity and Inclusion:

This proposal will provide Direct Care & Treatment an opportunity to recruit and maintain a diverse workforce to better reflect the patients served, such as by partnering with community-based culturally-specific organizations. It will also enable Direct Care & Treatment to provide more programming into evenings and weekends, as well as increase emphasis on person-centered and culturally competent services.

Statutory Change(s):

Repeal MS statutes 246.18, Subd. 8

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Repeal 2010 Rider Language

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends repealing Minnesota Session Law to eliminate outdated language related to Direct Care and Treatment operations. This is a no-cost proposal.

Rationale/Background:

Laws of 2010 First Special Session Chapter 1, Article 25, Section 3. Subdivision 10 includes language specifying that “[n]otwithstanding any contrary provision in this article, this rider shall not expire.” All items that provided direction to DHS have been completed. This rider, however, also included a requirement that DHS continue to operate the Direct Care & Treatment (DCT) Dental Clinics at the same level of staffing, in the same locations, and provide the same level of services as provided as in effect on March 1, 2010. Accordingly, this rider restricts DHS from relocating and/or expanding services to meet the needs of the individuals served by the DCT clinics including in-home and tele-dentistry.

Removing the rider will allow Direct Care & Treatment Dental Clinics to provide additional services and serve an increased number of individuals with developmental and mental health disabilities. Staffing used in 2010 did not include a mix of dental professionals that are needed today to provide home-based care or specialized care that would greatly benefit the individuals served by Direct Care & Treatment. The rider also restricts the possibility of participating in co-locating and creating a public/private collaboration that could reduce costs while providing enhanced care to individuals. Lastly, this proposal would create an opportunity to locate services closer to their targeted populations.

Proposal:

This proposal would remove language that was put in place to direct the Commissioner to:

- Provide funding for the Mankato Crisis service. (This funding is now handled through a mental health grant.)
- Continue to lease space in the former Eveleth transition site until another tenant could be found or the lease expired. (The lease has expired and a new tenant was found.)
- Convert the Community Behavioral Health Hospitals in Wadena and Willmar to Intensive Residential Treatment Service. (This conversion was completed.)
- Continue to operate the DCT dental clinics at the same level of care and staffing in effect on March 1, 2010 and seek a cost-based medical assistance rate. (Cost-based payment rate was approved.)

- Convert the Minnesota Neurorehabilitation Hospital in Brainerd to a neurocognitive psychiatric extensive recovery treatment service. (The facility was converted to a Neurocognitive Intensive Residential Treatment Service.)
- Convert the Minnesota Extended Treatment Options (METO) to community-based services. (This conversion is complete.)
- Not move beds from Anoka-Metro Regional Treatment Center to the psychiatric nursing facility in St. Peter. (No beds were moved.)
- Implement changes to save a minimum of \$6,006,000 beginning in fiscal year 2011. (Changes were implemented.)
- Seek certification or approval from the federal government for the new services under paragraph (a) that are eligible for federal financial participation and deposit the revenue associated with these new services in the account established under Minnesota Statutes, section 246.18, subdivision 8, unless otherwise specified. (Collections from the services provided at the Wadena, Willmar and Brainerd Intensive Residential Treatment Services are deposited in the specified account.)
- Finally, Section (e) of this rider states: Notwithstanding any contrary provision in this article, this rider shall not expire.

Accordingly, the only portion of this rider that continues to apply is the section relating to the Direct Care & Treatment Dental Clinics that restricts the program from changing, moving or providing additional services. Repealing the Rider would allow the Dental Clinics to provide enhanced services, relocate, if necessary, and to provide services in client homes.

Statutory Change(s):

Repeal Laws of 2010 First Special Session Chapter 1, Article 25, Section 3. Subdivision 10 (e).

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Service Delivery Transformation

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	10,000	10,000	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	10,000	10,000	0	0
FTEs				

Recommendation:

The Governor recommends \$20 million in FY 2020-21 to transform the human services delivery system in order to provide a more integrated, person-centered user experience for all Minnesotans served by the system. The Department of Human Services will work in partnership with counties, tribal nations and other partners and providers of human services on service delivery redesign, program simplification and alignment, and long-term implementation planning. This funding will leverage, on average, 68% federal funding (federal financial participation, or FFP) that is currently available to states. For eligible activities, every \$10 dollars spent in state funds, DHS is able to leverage an estimated \$27 to \$35 in federal funds.

The development and implementation of an integrated delivery system will include cross-cutting simplification efforts with the goal of improving people's experience with the human services system, leading to more equitable outcomes across all services. These efforts will also result in efficiencies in both the delivery of services as well as the technology that supports it. The results of this initiative will be:

- Simplified, more timely and improved access to human services programs so that families and individuals are able to achieve positive outcomes
- Lessened administrative burden to counties, tribal nations and state agencies, allowing more time to be spent working to improve services for Minnesotans
- Active and intentional engagement with counties, tribal nations, the legislature and people served in identifying barriers to access, and alignment of priorities for simplification, and modernization of the human services system

Rationale/Background:

Currently, Minnesota's human services programs are delivered through siloed service delivery models, funded by separate budgets and supported in individual and complex technology systems that are more than 20 years old. The way services are provided, and the information technology (IT) systems used to support delivery, are fragmented and cumbersome to navigate for both participants and staff. This outdated approach to service delivery, focused on programs rather than people, relies on aging technology that is becoming increasingly difficult and expensive to maintain. It is also funded through highly targeted budgets that prevent integration. The current model does not meet today's demands by Minnesotans for an integrated and easily accessible human services delivery system, and continues to perpetuate inequitable and disparate outcomes for Minnesotans.

More than one million Minnesotans participate in state programs and depend on aging systems to connect them to the services they need. Over 30,000 county, tribal nation, and state staff and 200,000 providers use these systems to deliver and pay for services. The siloed nature of service delivery results in a fragmented experience

for the people receiving services. The drive toward integrated, person-centered delivery of services is intended to help individuals and families achieve positive outcomes and ultimately to build healthier communities.

Current policies, statutes, federal regulations and budgets have all contributed to the siloed and complex-nature of the programs we have in place today. Transforming the service delivery system is a huge undertaking, which will require dedicated resources to design and implement, while maintaining capacity to sustain existing systems. The current DHS IT systems have technical limitations and cannot fully support an integrated and modern access experience for people served and workers at the state, counties, and tribal nations.

This proposal is being brought forward to ensure that all Minnesotans touched by the human services system receive person-centered, community-based services designed to improve equitable outcomes. An indicator of delivering on this vision is the human services system's increased capacity to work across organizations, people, and programs to achieve a shared enterprise vision for service delivery transformation, while simultaneously building capacity to consider the diverse and unique needs of the people being serve.

Proposal:

In the spring of 2017, DHS partnered with the Minnesota Association of County Social Service Administrators (MACSSA) and White Earth Tribal Nation to set a vision for how human services should be delivered in Minnesota. The group's work resulted in the "Integrated Services Business Model", which will guide the transformation of how people experience the human services system. Integrated service delivery is research-driven, focused on person-centered and multi-generational approaches, and grounded in root-cause analysis. It is an outcome-based way of designing services to make people's lives better.

Establishing and introducing a large-scale redesign of the service delivery system is a multi-phase endeavor, which will take several years and require dedicated resources at each phase. Lessons learned from previous systems development attempts and research involving other states that have modernized and integrated services show the importance of having a clear understanding of the business needs and goals prior to starting IT projects. Thus, the Department of Human Services and its partners will focus on the foundational work needed to lay the framework for our shared vision of an integrated human service delivery system. The work completed in the next biennium will result in detailed foundational work that will guide multi-year phased efforts to implement our future state.

This request includes \$8.8 million over the biennium to fund foundational activities necessary to pursue an integrated service delivery system. These foundational activities will lay the framework for the agency and our partners to begin to change our operational model, including:

- Cultural change management, stakeholder engagement, communications and training
- Establishment of architecture and standards for business, data, technology and security
- Business readiness and program simplification activities related to the service delivery transformation
- Evaluation and continuous improvement of our decision making structure
- Development of evaluation, performance and outcomes measurement and data analytics
- Development of a long-term roadmap and funding strategy
- Identifying and defining baseline technology needs

These activities are the framework and foundation to service delivery transformation and all other business improvement and system development in the future. Specifically, business readiness efforts will strategically plan for, rethink, redesign and simplify the state's human services delivery system infrastructure, processes and enabling technologies. In coordination with business readiness efforts and to prepare for the future, dedicated efforts will pursue simplification and alignment of program policies and practices, consistent with the new vision for the human services delivery system. The deliverables of these business planning activities will provide the foundation for systems modernization.

While foundational activities are being completed and a long-term modernization plan is established, approximately \$11.2 million of the \$20 million for the biennium will be invested to continue to address system improvements related to defect and compliance fixes. The majority of the fixes will be spent on the Minnesota Eligibility Technology System (METS) which is the enrollment and eligibility information technology (IT) system for all of Minnesota's insurance affordability programs — Medicaid, MinnesotaCare and qualified health programs with advanced premium tax credits. It also interfaces with other systems to provide the necessary information required for payment or coverage.

The results of this initiative will be:

- Greater compliance with state and federal regulations, and
- A reduction in the burden to processing entities that use METS and currently must perform onerous manual workarounds to achieve accurate results

The dollars received through this request will be used to sustain a portion of the state share of DHS and [MN.IT@DHS](#) staff and contractors. This proposal represents a decrease in the current level of spending on IT projects and includes business-led efforts to develop a unified vision of a human services system that meets the needs of Minnesotans. The IT modernization projects funded through this request will support continued improvements to systems to reduce identified pain points for the end user.

Equity and Inclusion:

All groups of people will be positively impacted by this proposal. Some of the key guiding principles of the new business model include racially and culturally appropriate efforts to support an equitable service delivery system, utilizing a person-centered framework, using the “social determinants of health” to identify root causes of an individual or family's need for services, and using a multi-generational approach which takes into account the needs of the whole family. In developing the new business model, stakeholder feedback was gathered from representatives of impacted groups. In addition, the new business model's ongoing development and implementation will be intentionally inclusive, and offer opportunities for broad stakeholder input and collaboration, including people served and advocates. Overall, the change to the business model will drive promises to reduce or eliminate disparities for all groups.

IT Related Proposals:

This proposal includes non-IT related activities as well as IT related activities. It is estimated that \$11.2 million over the biennium will be dedicated to systems improvement efforts. An additional \$8.8 million will be directed for work at DHS, counties, tribal nations and other providers of services to engage in service delivery transformation efforts that are in preparation for, but prior to, IT development work occurring. The table below reflects \$5.6 million annually, which is the state share of funding that is estimated to be directly attributable to IT systems development and user support.

Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	31	(935)	(1,005)	(1,078)
FTEs	3	4	4	4

Recommendation:

The Governor recommends new program integrity measures for the Nonemergency Medical Transportation (NEMT) program in response to state and federal audit findings.

Rationale/Background:

NEMT provides Medical Assistance enrollees with the safest, most appropriate and cost-effective mode of transportation to get to and from medical appointments.

In September 2017, the federal Office of Inspector General finalized an audit of Minnesota's NEMT program that showed that over 75% of NEMT rides that were audited did not comply with either state or federal requirements. Of the rides that did not meet the requirements, the ride either lacked sufficient documentation, lacked any documentation, or did not have a corresponding Medical Assistance service to warrant the trip.

These findings were consistent with an evaluation the Minnesota Office of Inspector General conducted of the NEMT program in 2014. As a result of the federal 2017 audit, the state had to pay \$1.9 million dollars, the federal share of improper reimbursement, to the Centers for Medicare and Medicaid Services.

Proposal:

This proposal seeks to improve the integrity of the NEMT program through two strategies:

First, DHS would issue a request for proposal to contract with an entity to perform on-going integrity audits of the NEMT program to ensure fee-for-service providers are complying with state and federal standards. The audits would include, but are not limited to, review of driver documentation, confirmation of a medical appointment, and confirmation of distance traveled.

Second, the proposal would also provide resources to DHS to enroll individual NEMT drivers. This would ensure each driver is meeting the program requirements and allow DHS to enforce actions as necessary on an individual driver rather than an entire company. Data from DHS shows that approximately 82% percent of NEMT claims in FY 2017 occurred on the same day as a claim for another health care service, and that rides occurring the same day as a health care service accounted for 90% percent of the total spending on fee-for-service NEMT. This estimate assumes that additional oversight and ongoing audit activity will prevent NEMT providers from billing the MA program where the ride does not accompany a health care service resulting in a 10 percent reduction in payments to NEMT providers.

The fiscal impact of this proposal includes the cost of a vendor contract for ongoing audits of the NEMT program for MA fee-for-service, the cost of 4 FTE to enroll individual NEMT drivers, and IT changes to MMIS to implement the proposal. Total state MA fee-for-service expenditures on NEMT services for families and children is expected to reach \$35 million in FY2020-21. This proposal is expected to reduce total spending by \$2.2 million or 6% in FY2020-21.

In addition, this proposal clarifies that DHS does not need to verify that every single requirement is met within the Special Transportation Certification overseen by the Department of Transportation (MnDOT). As of July 1, 2016, all NEMT providers are required by law to be certified as Special Transportation Service providers. In reviewing the requirement, there have been questions whether DHS is supposed to confirm a provider is certified by MnDOT or if DHS is supposed verify that the provider has fulfilled each individual requirement to obtain a certificate. This proposal would clarify that DHS is required to verify that a provider is certified by MnDOT, not verify every component of the certification requirements.

Results:

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Percentage of NEMT Claims with Proper Documentation	25%

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: SIRS & CCAP Investigation Expansion

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	526	400	400	400
Revenues	500	500	500	500

Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	26	(100)	(100)	(100)
FTEs	4.0	4.0	4.0	4.0

Recommendation:

The Governor recommends expanding the Department's capacity to investigate and prevent fraud in the Medical Assistance (MA) program. The proposal requests funding to add 4 FTE staff to the Office of Inspector General's Financial Fraud and Abuse Investigation Division (FFAID) that oversees MA providers. The Governor also recommends additional funding for a case tracking system to track a case from initiation to conclusion in FFAID.

Rationale/Background:

FFAID at the Department of Human Services is responsible for supporting program integrity in Minnesota's public assistance programs, including its MA program. Working with law enforcement, business partners, and regulators, FFAID identifies, investigates, and prevents suspected cases of fraud and abuse.

MA, the Department's largest program, provides coverage to approximately 1.1 million low-income Minnesotans each month, ensuring that many of the state's most vulnerable residents have the health care they need. CCAP helps families pay for child care so that parents can work or go to school. It also helps ensure that children are well cared for and prepared to enter school ready to learn. The program serves approximately 15,000 families and 30,000 children each month. Strengthening the Department's capacity to oversee these programs increases accountability and helps ensure that funds are spent effectively for the people we serve. Program integrity measures also decrease the risk and potential harm to recipients who do not receive necessary services, are exposed to unnecessary or inappropriate services, or may be subject to coercion and exploitation.

In 2017, approximately \$11.4 billion in state and federal funds were paid to 230,000 Medicaid providers. During 2017, SIRS recovered \$14.3 million in overpaid state and federal funds. SIRS also terminated, suspended or stopped payments to 189 MA providers who had been paid \$21.2 million the preceding 12 months. In addition, FFAID's child care investigations unit has received hundreds of tips and leads involving suspected cases of overbilling and other misuses of CCAP funds. As of December 2018, 171 child care centers had been assessed \$382,000 in identified CCAP overpayments, and more than \$1.6 million in restitution has been court-ordered in cases with convictions. Nevertheless, attaining recoveries from providers who commit program violations or misuse public funds is difficult and rarely occurs, resulting in multimillion-dollar losses to MA and CCAP that could otherwise be used for the children, families, and individuals we serve. By strengthening the capacity of the Office of Inspector General to oversee financial and administrative accountability in MA and CCAP, the Department will be able to better safeguard the integrity of these important public programs.

Proposal:

First, this proposal will strengthen the Department's capacity to prevent, detect, and investigate fraud by expanding FFAID's Surveillance and Integrity Review Section (SIRS) that oversees Medical Assistance providers.

Specifically, this proposal adds 4 investigators in SIRS. The additional investigators in SIRS will increase its investigative capacity, which will allow SIRS to conduct more investigations and cover more provider types in MA that warrant surveillance, investigation, and intervention.

The Child Care Assistance Program (CCAP) investigations unit within FFAID is also in need of a system to record, track and report on its investigative activity. The case tracking system is already utilized by the BCA and will strengthen FFAID's fraud prevention and investigation activities for CCAP.

Each MA investigator is expected to yield \$125,000 per year in state recoveries and receives a federal financial participation allocation. The case tracking system for CCAP is estimated to cost \$355,000 for the first year of implementation, and \$105,000 each year thereafter. After recoveries and FFP are taken into account, this proposal will cost approximately \$26,000 in General Fund dollars for FY 2020 and will result in net savings to the General Fund of \$100,000 per year thereafter.

Equity and Inclusion:

There are no anticipated negative effects.

IT Related Proposals:

N.A.

Results:

SIRS investigations yield recoveries which are returned to the General Fund. One performance measure for this proposal is the increase in federal and state funds recovered by SIRS because of this proposal.

Additionally, Providers found to have committed significant program violations because of fraudulent or abusive conduct are terminated or suspended from the public program. Recovering funds paid to these providers is very difficult, but by removing them from the program, fraudulent payments are stopped. An increase in program integrity staff will increase the number of fraudulent providers removed from public programs. A well-recognized benefit to program integrity activity is the prevented loss of funds associated with terminating, suspending, and/or implementing a payment withholds. This means that 180 former MA providers were no longer able to obtain millions of dollars of public funds.

DHS/GO Specific Considerations:

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Fraud Prevention Investigations Expansion

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	(15)	(173)	(173)	(173)
Revenues	0	0	0	0
Other Funds				
Expenditures	(7)	(9)	(9)	(9)
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	(22)	(182)	(182)	(182)
FTEs	1.0	1.0	1.0	1.0

Recommendation:

The Governor recommends increasing funding to the Department of Human Services (DHS) for the Fraud Prevention Investigation grant program by \$425,000 per year to provide counties with additional resources to investigate recipient fraud in human services programs. This will enable counties to hire additional fraud investigators. The increased funding request includes \$425,000 for county grants, which will be matched with federal funds of \$311,000, increasing grant funding for the program by \$736,000 per year. This would be an increase to the total grant funding for county investigations to approximately \$3.9 million.

The Governor further recommends adding one FTE in the Office of Inspector General's Financial Fraud and Abuse Investigation Division (FFAID) to assist in monitoring the grant and to provide training to the counties.

Rationale/Background:

Through the Fraud Prevention Investigation (FPI) program, the Office of Inspector General's Financial Fraud and Abuse Investigation Division (FFAID) works with counties to investigate recipient fraud. The division currently administers a \$3.2 million (\$1.9 million state funds, \$1.3 million federal funds) annual grant that funds investigator positions in counties and regions covering 79 of Minnesota's 87 counties.

Current funding for the FPI program has been stagnant for a number of years, preventing the expansion of FPI program activities conducted by counties. In several FPI regions in the state, one investigator is responsible for investigations in multiple counties. Increased funding in this area will allow for additional staffing in regions where investigators are spread thin, in more populated counties where the caseload is greatest, and to expand into some counties that have not been a part of the program. By having additional funding for recipient investigations, counties can: 1) react more quickly to reports of public benefit fraud, 2) complete investigations in a more timely manner, and 3) stop benefits sooner to those who are not eligible.

In accordance with Minnesota Statutes, section 256.983, the program has operated on a cost-neutral basis for 29 years. When all program benefits are considered, the program has returned at least \$4 for every dollar spent on the program. This trend is dependent upon county human services workers making fraud referrals to investigators when they see conflicting information or suspect that fraud is occurring. The cost savings are also dependent upon having investigator positions filled. Turnover in these positions reduces overall benefits derived until the positions can be filled and new staff is trained.

All Minnesota counties are statutorily required (256.986) to submit to DHS a state fiscal year plan to coordinate county duties related to the prevention, investigation, and prosecution of fraud in public assistance programs. The state partners with grant and non-grant funded counties, helping to stretch the limited funds used to conduct investigations. This is done through training, monitoring work products, and assuring that grant programs are run

cost effectively, as required by state statute. Resources that counties contribute to maintain investigative programs include the hiring and supervision of additional employees, as well as providing technological resources, equipment, office space, grant oversight, additional training and vehicles.

Proposal:

This proposal will add \$425,000 in state funds to the FPI grant program. With the federal match, it will increase grant funding by \$736,000, for a total ongoing budget for county grants of approximately \$3.9 million. Grant funds will increase the number of investigators in a given county or region, and fund positions in counties that are not currently participating in this program. One additional FTE is needed to assist DHS with grant oversight and training.

This proposal would allow for the hiring of approximately seven additional FPI investigators in counties. This number assumes an average of \$100,000 in personnel costs per FPI investigator under the grant. The average takes into consideration that the cost of an FPI investigator varies significantly across the state. For example, an investigator who is a sworn peace officer has a much higher cost than a non-sworn investigator. Additionally, there is a significant difference in the personnel costs in greater Minnesota compared with the metro area.

This proposal will also allow FFAID to hire one FTE to assist in grant oversight and training to counties. There are currently two staff in FFAID overseeing this grant as well as providing training around the state and fielding questions from investigators, and it will be necessary to fund one additional FTE at DHS to perform these duties for a larger group of investigators.

The costs in this proposal are offset by benefit savings from unpaid claims that were determined to represent real or potential fraud. In FY 2020, the overall net fiscal impact is projected to be \$22,000 in savings to the General Fund, which assumes total savings of approximately \$518,000 as the additional investigators are brought onboard in the first year. By FY 2021, all new investigators would be onboard and total projected savings are \$689,000 across multiple public assistance programs. This results in total savings of approximately \$689,000, and a net fiscal impact of \$182,000 in savings to the General Fund in FY 2021 and each year thereafter.

Equity and Inclusion:

There are no anticipated negative effects or groups impacted.

IT Related Proposals:

N.A.

Results:

As described above, a key result of the FPI grant program is the benefit savings derived from unpaid claims that were determined by investigators to represent real or potential fraud. Other benefits of FPI grant funding include the identification of overpayments. As illustrated in the chart below, FPI investigators identified \$7.5 million in overpayments across multiple assistance programs in FY 2017. Considering the totality of benefits, FPI program grants historically return at least four dollars for every dollar of state and federal funding.

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Electronic Visit Verification

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	192	716	(2,721)	(4,614)
Revenues		0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	192	716	(2,721)	(4,614)
FTEs	2.0	3.0	11.0	9.0

Recommendation:

The Governor recommends requiring providers of personal care and home health services to use an electronic visit verification system that meets implementation requirements and standards developed by the commissioner of human services. Effective January 1, 2020, use of electronic visit verification will be federally-mandated for providers of personal care services, including home and community-based services that support activities of daily living or instrumental activities of daily living delivered in a person's home. Effective January 1, 2023, use of electronic visit verification will be mandatory for home health service providers.

Rationale/Background:

In 2016, the federal government passed the 21st Century Cures Act, requiring electronic visit verification. The 2017 Legislature required DHS to establish implementation requirements and standards for an electronic service delivery documentation system to comply with the 21st Century Cures Act (Laws of Minnesota, 2017 First Special Session, Ch. 6, art 3, s 49). The Commissioner was required to convene stakeholders to review the requirements and report information to the legislature based on the stakeholders' feedback, to establish the electronic service delivery system requirements and standards. The [report](#) was submitted to the chairs and ranking members of the legislative committees with jurisdiction over human services with recommendations in January 2018.

The 2017 legislation (Laws of Minnesota, 2017 First Special Session, Ch. 6, art 3, s 49) requires that the Department of Human Services ensure that the electronic visit verification requirements are minimally disruptive to the person receiving services, minimally burdensome to the provider (both administratively and financially) and consistent with existing policies related to covered services, including flexibility of service use, quality assurance and effective methods for fraud prevention when balanced with the burden on providers and recipient.

Based on the feedback heard during the stakeholder engagement process, the Department of Human Services determined that the hybrid model with a data aggregator meets the widest range of needs, minimizes burden and provides the greatest flexibility to providers, service recipients and workers. This approach allows providers to select an electronic visit verification system that works best for their business, while maintaining accountability to the state. Allowing for flexibility in vendor selection encourages innovation, competitive pricing and technological advances among vendors.

The hybrid model allows providers who have already invested in an electronic visit verification system to continue using their investment, while providers who have not yet purchased a system can elect to use the state system or another vendor of their choosing based on their needs and finances. Choosing to offer an existing, off-the-shelf electronic visit verification system rather than developing its own will better position the Department of Human

Services to respond to federal requirements. Providing a state-selected vendor option allows smaller providers with less capacity or interest in choosing their own system to meet electronic visit verification system requirements with minimal burden. The hybrid model also provides agencies the opportunity to select an electronic visit verification system that they feel will be most amenable to their workers, in order to better recruit and retain staff in an era of workforce shortage. Over time, providers who select the state's electronic visit verification system may experience the added benefit of having a workforce and group of service recipients that are accustomed to using the state system, thus lessening the burden of training individuals to use their system.

Finally, the hybrid model supports agreed upon values that any electronic visit verification system in Minnesota not disrupt services, allow flexibility of service location and scheduling and provide adequate training for users of the system. Service users can elect to work with an agency that offers a system that best meets their individual needs.

Proposal:

This proposal seeks to implement federally-mandated systems that will alter the way that personal care services are documented and verified in Minnesota. Electronic visit verification will affect both people receiving personal care services, direct support workers and agencies that employ the support workers.

The 21st Century Cures Act requires that six data elements be electronically verified:

- the type of service provided,
- the person who provided the service,
- the person to whom the service was provided,
- the date of the service,
- the time in and time out of the person providing the service, and
- the location where the service was provided.

Only those personal care services (beginning in 2020) and home health services (beginning in 2023) electronically verified will be eligible for the full Medicaid match, whether administered as fee-for-service or managed care. The 21st Century Cures Act requires that states implement this requirement in a manner that is minimally burdensome, takes into account existing best practices and existing use of electronic visit verification systems in the state, ensures training for providers of these services, is compliant with HIPAA privacy and security law, takes into account a stakeholder process and doesn't impede provider selection, worker selection, or the manner in which services are delivered.

This proposal recommends implementing a hybrid model of electronic visit verification within the state, which gives providers the option of using their own visit verification system or using a state-contracted system. The hybrid model includes both a state-approved electronic visit verification system and a single statewide data aggregator.

In the hybrid model, providers have the option of using their own electronic visit verification system as long as it meets the requirements set by the 21st Century Cures Act and standards established by the commissioner. Or, the provider may elect to use a vendor under contract with DHS. The state option would provide "off-the-shelf" electronic visit verification system to all providers who do not have or do not wish to develop their own system. This involves the state contracting with one or more electronic visit verification vendors to develop and operate a system that meets the requirements outlined in the 21st Century Cures Act. The state would be responsible for configuring the system(s) to meet specific requirements, enrolling and training providers. The vendor(s) would be responsible for ongoing maintenance, updates, and technical assistance to providers to ensure compliance with the Cures Act.

The second component of a hybrid electronic visit verification system is a statewide data aggregator. The aggregator compiles data from providers using their own system of choice as well as providers using the state-contracted option. The aggregator provides a single repository of data that supports post-payment review of claims for personal care services and home health services subject to electronic visit verification. Potential future enhancements to the aggregator could enable pre-payment review to identify non-reimbursable claims due to potential fraud, waste, abuse or error. A third party aggregator allows the state to get the most capability to identify fraud, waste, abuse and errors from an electronic visit verification system, without requiring the state to create and install expensive new technology, since the collection and normalization of the data is handled by a third party.

The appropriation from the 2017 legislative session covers the initial costs for purchasing a system and also partially provides the operational costs for the system into the future. However, the overall costs operationalizing the electronic visit verification system were not included in that appropriation. Since the 2017 session, other options have been reviewed. This proposal includes a contract with one or more electronic visit verification vendors to develop and operate a system as identified through a request for proposals process starting in FY 2020. The contracted vendor would be responsible for configuring the system to meet specific requirements, enrolling and training providers. In addition, the vendor would be responsible for ongoing maintenance, updates and technical assistance to providers.

It is expected that most providers will opt to use the state contracted vendor, so the contract would also provide funding for subscription costs for providers who use the vendor. The cost of using vendor managed electronic visit verification systems is typically based on volume and transaction. A transaction may be a phone call or other technology used to log-in and out when the worker begins and ends work. This analysis estimates electronic visit verification subscriptions at \$.21 per transaction. The number of transactions will likely increase over time, since the program caseload and number of providers is projected to continue growing. The Department of Human Services will pursue federal approval of an enhanced federal financial participation rate of 75 percent for the costs of system operation and maintenance for the state-operated system as well as 90 percent federal funding for the cost of design, development and installation of the state-operated system. The costs in the fiscal note assume that we will receive both the 90% and 75% federal participation rates for development and implementation. Other states have received these federal financial participation rates to develop their electronic visit verification systems.

This proposal also includes grant funding of \$500,000 in FY 2021 and \$500,000 in FY 2022. This funding is a onetime cost that will help offset the electronic visit verification costs for those providers who use a different vendor other than the state contract. This funding will also offset increased costs for providers using systems that come into compliance as a result of the contracts with existing system providers. The number of providers served would grow over time as existing systems are upgraded. These providers would be required to follow an application process as determined by the commissioner.

The proposal would also include administrative costs to administer the contracts and grants. Included is one FTE for training and outreach to individuals and families starting in FY 2021, and two FTE's for administering the grants and contracts in the Community Supports Administration for the Disabilities Services Division starting in FY 2020. As part of the implementation, the Provider Help Desk in the Health Care Administration would need two FTE's in FY 2022 to handle the increased questions from providers. These FTE's are not ongoing beyond FY 2022. A permanent FTE would be needed in the Operations Data Integrity unit of the Health Care Administration to provide data analytics in FY 2022. With the increase in auditable data, the Surveillance, Investigations and Review Unit within the Office of Inspector General will need three investigators for increased activity, a data analyst focused on electronic visit verification data and claims, and a supervisor for the unit starting in FY 2022.

The Centers for Medicare and Medicaid Services (CMS) have also indicated that electronic visit verification devices used by providers are not eligible for FFP. This analysis assumes that an additional 15% of the total cost of using the system would need to be 100% state funded. It assumes that all of the maintenance, tracking and administering the devices would still be done by the vendor.

The automatic reporting features and enhanced ability for payment reviews using electronic visit verification data is expected to reduce inappropriate service payments due to record keeping inaccuracies, administrative errors and fraud by 1%. This estimate is based on the experience and projections of other states implementing electronic visit verification systems. The costs included in this proposal have also accounted for the appropriation received in the 2017 legislative session.

Equity and Inclusion:

Minnesota's PCA program, which will be subject to electronic visit verification, is the most diverse long-term service and support programs in Minnesota and is growing more diverse each year. In January 2017, 61% of people receiving PCA services were people of color or Native American. Approximately 33% of people receiving PCA services were non-Hispanic white, compared to an estimated 80% of Minnesotans statewide. According to fiscal year 2016 data, 36.1% of home and community-based services recipients in Minnesota identified themselves as non-white. Any changes to home and community-based personal care services will have an impact on communities of color.

Compliance with the federal electronic visit verification requirement will ensure the financial stability of this foundational long-term care service. Implementation of electronic visit verification will improve information about the delivery of services authorized for people with disabilities and older adults and reduce errors and fraud in the billing of these services. Personal care services are essential to achieving community inclusion for the diverse populations that rely on them to live, work and enjoy life in the communities of their choosing.

The hybrid model allows for flexibility for providers of all sizes – from small businesses to national health care providers – to implement electronic visit verification that is affordable and works with the existing systems unique to that provider. The selection of the vendor for the state-approved data collector will depend heavily on the vendor's ability to provide a system that is minimally disruptive for people receiving the service and financially manageable to ensure that providers from diverse ethnic and cultural groups are able to continue providing personal care services to members of that particular community.

IT Related Proposals:

This proposal will require work in the MMIS system for claims and internal reporting. However, the primary IT-related work for the electronic visit verification system will be done by a contracted vendor. The costs noted below are the full cost (federal and state). Note- The costs in FY 2020 and FY 2021 are covered by the 2017 appropriation for systems costs for EVV so an additional appropriation is not needed for IT work in those two fiscal years.

Statutory Change(s):

Session Law is needed to require electronic visit verification. This change may also require modifications to M.S. §256B.0659 and §256B.0653. Minnesota Stat. §256B.0705 is repealed.

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Child Care Assistance Program – Provider Registration and Oversight

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	71	82	0	0
Revenues				
Other Funds				
Expenditures				
Revenues				
Net Fiscal Impact = (Expenditures – Revenues)	71	82	0	0
FTEs	.75	1	0	0

Recommendation:

The Governor recommends investing \$153,000 in FY 2020-2021 for one full time employee to plan for improvements to provider registration and oversight for the Child Care Assistance Program (CCAP). This proposal would result in a plan for addressing recent audit and report recommendations related to provider registration and program oversight.

Rationale/Background:

The Child Care Assistance Program (CCAP) helps families pay for child care so that parents can work or go to school. It also helps ensure that children are well cared for and prepared to enter school ready to learn. CCAP serves approximately 15,000 families and 30,000 children each month. Over 60 percent of the children served are ages 5 or younger. Over 67 percent of all children served are children of color or American Indian children. An average of 3,265 providers are paid each month for serving children receiving CCAP. CCAP is administered by county and tribal agencies.

Two audits related to CCAP program integrity concerns were conducted in 2018. The Office of the Legislative Auditor (OLA) conducted a special review of the Child Care Assistance Program and the Office of Inspector General. The Department of Human Services also hired a consulting firm, PFM, to assess procedures and give recommendations. Findings for the audits and a report by PFM were released in March 2019.

This proposal will help address the following audit recommendations to ensure public dollars are spent responsibly:

- Implement an electronic record-keeping system, eventually linked to billing.
- Require electronic billing and direct deposit for all registered centers.
- Strengthen tracking and controls for users submitting bills through MEC² PRO.
- Move provider registration and MEC² PRO enrollment to DHS.
- Strengthen provider registration controls.

Proposal:

This proposal provides funding for one full-time employee in the Children and Family Services Division at the Department of Human Services to plan for improvements to CCAP provider registration and oversight.

The primary areas that the employee will explore include:

- Options for the use of electronic attendance record keeping systems. Currently providers are allowed to use paper or electronic methods to maintain attendance records.
- Options to improve monitoring of billing practices, including the possibility of requiring electronic billing and/or direct-deposit. Currently some providers bill using an electronic system (MEC² PRO), and others bill using paper billing forms. Providers choose to be paid via warrant (i.e. check) or direct-deposit.
- Options to centralize registration for CCAP providers. Currently providers register with the county or tribal agency that they receive payment from. If a provider serves families living in various counties, the provider must register with each family's county or tribal agency.

The employee will be charged with the following activities:

- **Research and stakeholder engagement:** Other states have implemented electronic attendance record keeping systems and can provide guidance and information about how their systems work and what lessons they learned. Further, currently provider registration is done at the local agency level. Local agencies would have significant insight and information about how to make the transition to state-wide provider registration. Finally, child care providers who would be impacted by these changes should be consulted and engaged early in the process for information about how to effectively implement and avoid unintended consequences.
- **Planning:** These requirements will require new staffing and resources at the state level. The employee in this position will be charged with developing planning and implementation proposals for how the department would move forward with each of these changes (e.g., how would this work, what resources are needed, how changes would be implemented, etc.).
- **Legislative report development** The department will report back to the Legislature in early 2021 with findings, which will inform possible statute changes and funding requests in the 2021 session to implement changes.

Equity and Inclusion:

In 2018, 68 percent of all children served by the Child Care Assistance Program (CCAP) were children of color, specifically African-American, Asian/Pacific Islander, Hispanic/Latino, multiple races, and American Indian children. Of all children served, 53 percent are African-American. Accordingly, any impact on children and families receiving child care assistance, and/or the providers who serve them, is likely to disproportionately impact African-American children.

Attendance record keeping and billing are responsibilities of the child care provider. Changes to attendance record keeping and billing may have a negative impact on providers who serve children with low incomes, including children of color and American Indian children. If new methods for billing and/or attendance record keeping are not well-researched, this could increase negative impacts for children and providers.

Stakeholder engagement is essential to minimize unintended consequences and to explore solutions to program integrity concerns addressed in recent reports. Stakeholders must be involved to better understand impacts of new technology, requirements, and/or procedures.

Results:

The OLA and PFM reports recommended these changes to improve child care assistance program integrity. This proposal will help achieve greater accountability and ensure that tax dollars are spent responsibly.

By undertaking a planning period, DHS will more fully understand what is needed to centralize provider registration and update billing methods and electronic attendance record keeping, which could streamline processes for child care providers and enhance the department's ability to provide oversight. It will also allow time for important stakeholder input.

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Strengthening Oversight of the Child Care Assistance Program

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	1,023	1,071	1,211	1,211
Revenues	0	0	0	0

Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,023	1,071	1,211	1,211
FTEs	10	10	10	10

Recommendation:

The Governor recommends funding to add 10 FTE staff to the Office of Inspector General (OIG) to strengthen the state's oversight of the Child Care Assistance Program (CCAP).

Rationale/Background:

The Financial Fraud and Abuse Investigations Division (FFAID) in the Office of Inspector General (OIG) is responsible for supporting program integrity in Minnesota's public assistance programs, including CCAP. Working with law enforcement, business partners, and regulators, FFAID identifies, investigates, and prevents suspected cases of fraud and abuse. Fraud, waste, and abuse in Minnesota's public programs – including its CCAP program – costs millions of dollars every year, diverting funds that could otherwise be used for the people we serve.

CCAP helps families pay for child care so that parents can work or go to school. It also helps ensure that children are well cared for and prepared to enter school ready to learn. The program serves approximately 15,000 families and 30,000 children each month. Strengthening the Department's capacity to oversee this program increases accountability and helps ensure that funds are spent effectively for the children and families who truly need them. Program integrity measures also decrease the risk and potential harm to recipients who do not receive necessary services, are exposed to unnecessary or inappropriate services, or may be subject to coercion and exploitation.

Obtaining recoveries from providers who commit fraud is difficult and rarely occurs, resulting in multimillion-dollar losses to public programs. By strengthening the data analytic capacity of the OIG to intervene in suspected cases of fraud and abuse, the Department will be able to better safeguard Minnesota's CCAP program.

The Licensing Division is responsible for licensing and regulating child care centers in Minnesota. Child care center licensors help to ensure that child care centers provide healthy, safe and developmentally-appropriate services to children. Through the course of their work, licensors identify programs that are struggling to provide services that meet the minimum licensing standards. Sometimes they are the same programs that are committing CCAP fraud. Whenever licensors recognize potential indicators (red flags) of fraud, they report that information to FFAID staff.

Historically, licensors strived to visit child care centers for an on-site visit every other year; however, the Licensing Division lacked adequate staffing to complete biennial reviews while also addressing licensing complaints and assisting new applicants through the complex process of obtaining a license. In the past year, the Licensing Division has instituted quarterly visits for programs on a conditional license that are struggling to meet licensing standards. These more frequent visits allow the Department to provide ongoing technical assistance and monitor their progress in making the required changes to have their full license reinstated. In 2017, the Minnesota

Legislature provided funding for additional licensors and now requires that child care centers have at least one unannounced visit each year. However, the Licensing Division lacks the resources to visit new centers at regular intervals during the first year of operation.

Finally, FFAID contracts with the BCA for two law enforcement officers to conduct criminal investigations of child care providers in the CCAP program. With only two agents, the criminal investigative capacity in CCAP is limited.

Proposal:

This proposal will strengthen the state's capacity to oversee CCAP by expanding the OIG in the following ways:

First, FFAID will add two data analysts to strengthen the Department's ability to identify, detect, and prevent fraud and abuse in Minnesota's CCAP program. By strengthening the Department's capacity for data analysis, this proposal will allow the Department to leverage fraud and abuse data analytics for both preventive and retrospective activity. The Department is increasingly reliant on automated systems to administer public programs and to prevent, detect and take corrective action on fraudulent and abusive behavior. At the same time, those that commit fraud and abuse are becoming more technology and billing savvy, allowing them to exploit weaknesses within the DHS payment system and within program policies. Adding data analytic capacity will provide needed assistance in finding fraud and allow the CCAP Investigations Unit within FFAID to focus its limited resources in areas with the greatest risk of fraud.

Second, this proposal will allow the Licensing Division to conduct more frequent inspections to ensure the health and safety of children in care, provide technical assistance for newly-licensed programs, monitor struggling programs more closely, and evaluate whether the program should be referred to FFAID for further evaluation. Specifically, funding to hire eight additional staff would allow licensing staff to conduct quarterly visits for newly-licensed centers during the first twelve months of operation and also for existing centers who are either on conditional status or have a recent history of significant noncompliance with licensing requirements. In all cases it will allow the Department to provide the programs with a significantly higher level of technical assistance to help them succeed and sufficient monitoring to identify issues, including potential fraudulent activity, before it flourishes.

The additional technical assistance and licensing visits that will result from this proposal will benefit the prospective and newly-licensed centers in complying with licensing regulations and program rules and will contribute to greater oversight of CCAP.

This proposal also allows for an increase to an existing BCA contract, which would fund two additional law enforcement officers who would conduct criminal investigations in CCAP cases.

Fiscal Impact:

This proposal adds 2 CCAP Data Analysts and 8 FTEs in the Licensing Division, for a total of 10 FTEs in the OIG. The 8 FTEs for the Licensing Division are made up of five licensors, one supervisor, one administrative support staff, and one data analyst, who will assist with monitoring, determining whether a program should receive heightened monitoring, and tracking measurable outcomes of the unit. These FTEs will cost \$673,354 for FY2019 and \$721,790 every year thereafter.

Currently, there is \$310,000 allocated to contract with the BCA for two law enforcement officers. An additional \$350,000 is being requested to increase the BCA contract to add two additional law enforcement officers who will conduct criminal investigations in CCAP cases.

Equity and Inclusion:

The Department is committed to balancing program integrity with equitable and inclusive policies for the people we serve. This proposal seeks to address program integrity issues in CCAP by bolstering the oversight capacity of

the Department of Human Services and its Office of Inspector General, while ensuring that child care centers needing technical assistance from the Department, but who are not displaying signs of fraudulent behavior, receive the support and guidance they need to remain licensed rather than be referred to FFAID.

IT Related Proposals:

N/A

Results:

Providers found to have committed significant program violations because of fraudulent or abusive conduct will be suspended or disqualified from the program. Recovering funds paid to these providers is very difficult, but by removing them from the program, fraudulent payments will be stopped. This proposal will increase the number of fraudulent providers removed from the program, ensuring that CCAP funds are being spent on the children and families who truly need them.

Net Fiscal Impact = (Expenditures – Revenues)	234	3,584	3,654	3,819	4,082
FTEs	0	0	0	0	0

Recommendation:

Effective April 1, 2019, the Governor recommends modernizing the fee-for-service Medical Assistance reimbursement for outpatient prescription drugs to more accurately reflect their costs and the cost of dispensing them. These changes will bring Minnesota into compliance with the federal 2016 Covered Outpatient Drugs final rule.

Rationale/Background:

In March 2016, the Centers for Medicare and Medicaid Services (CMS) finalized a new administrative rule on covered outpatient drugs. The rule, which applies to fee-for-service Medical Assistance, is intended to ensure that pharmacy reimbursements more accurately reflects what pharmacies pay to acquire and dispense drugs.

The rule requires that prescription drug reimbursement not exceed the actual acquisition cost of the drug plus a professional dispensing fee. Actual acquisition cost measures a pharmacy's actual cost to obtain a prescription drug from a wholesaler or manufacturer. Both the acquisition cost and the dispensing fee must be based on a survey or other reliable supporting data.

The rule also changed how pharmacy providers who have access to discounted drug pricing through the 340B program are reimbursed. The 340B program allows disproportionate share hospitals, critical access hospitals, family planning clinics and federally qualified health centers to purchase drugs at a significant discount. The federal Health Resources and Service Administration (HRSA) establishes a ceiling price which is the maximum price a manufacturer can charge for a medication sold to a 340B provider. Under the new rule, reimbursement cannot exceed the HRSA 340B ceiling price plus a professional dispensing fee for 340B procured medications.

The rule became effective in April 2017 and states were given a grace period to come into compliance. Minnesota is currently one of only four states not in compliance with the rule. The state faces the potential loss of an estimated \$190 million per year in federal matching funds if we do not come into compliance.

Proposal:

This proposal updates Minnesota's pharmacy reimbursement formula for outpatient prescription drugs under fee-for-service Medical Assistance to comply with federal requirements. The new reimbursement methodology would be effective April 1, 2019.

This proposal updates the reimbursement methodology for outpatient pharmacy services under fee-for-service Medical Assistance in the following ways in order to comply with the federal rule:

- Requires the medication itself be reimbursed for the actual acquisition cost according to nationally recognized benchmarks. The proposal would also provide a 2 percent add-on payment to cover the cost of the provider tax that is applied to pharmacy wholesalers and passed on to pharmacy providers, subject to federal approval.
- Increases the professional dispensing fee for pharmacy providers from \$3.85 to \$10.48 (based on survey data from a similarly situated state, Indiana). This proposal also establishes ongoing cost-of-dispensing surveys for Minnesota, which would be conducted every three years. Survey results will be reported to the legislature to inform future updates to the dispensing fee to help ensure fees reflect the actual cost.
- Aligns the reimbursement for drugs purchased through the federal 340B program with the federal rule's requirement that medications purchased through the 340B program be reimbursed at the provider's cost. This proposal also includes a supplemental payment of \$1.5 million per year (state share) to mitigate the impact on hospital providers that are most impacted by this change.

The proposal also changes how the state manages a particularly expensive class of prescription drugs, hemophilia clotting factor, in order to achieve savings to offset the cost of coming into compliance with the federal rule. This proposal repeals a statute prohibiting DHS from managing hemophilia clotting factor on the state's Preferred Drug List. Once this prohibition is eliminated, the state could achieve savings through supplemental drug rebates and/or shifting the market to less expensive, therapeutically appropriate alternatives. Currently, there is no incentive for drug manufacturers to offer DHS discounts as they don't have to compete to have their drugs listed as preferred because of this prohibition. Removing the prohibition is expected to prompt manufacturers to offer supplemental drug rebate offers.

This proposal assumes the continuation of the 2 percent increase to payment rates to providers and managed care organizations to offset the cost of paying the provider tax on Medical Assistance and MinnesotaCare expenditures, as proposed in a separate Governor's budget recommendation.

The total fee-for-service reimbursement for pharmacy services was approximately \$245 million in 2017. Based on modeling of claims data using the existing methodology compared to the new methodology, it is estimated that the higher dispensing fee, reimbursement at actual acquisition cost, and the 2 percent add-on to offset provider tax payments will result in a 4.06 percent increase to overall fee-for-service pharmacy spending. The cost will be offset by a projected 1.95 percent reduction in pharmacy spending due to the savings associated with changing 340B reimbursement to the HRSA ceiling plus a professional dispensing fee and a 0.22 percent reduction from managing hemophilia clotting factor. The result is net increase of 1.89 percent in outpatient pharmacy payments.

DHS will also need additional contracts with vendors to record 340B pharmacy data in order to perform the new pricing calculations and to conduct a cost of dispensing survey every three years.

Equity and Inclusion:

This proposal updates the reimbursement methodology for outpatient drugs under Medical Assistance. It is not anticipated that these changes will expand or restrict access to prescription drugs for Medical Assistance enrollees. However, hospitals that participate in the 340B program and dispense high-cost medications (e.g. HIV/AIDS medications), will be disproportionately impacted by these changes. This proposal includes funding to help mitigate these impacts to ensure that it does not create barrier to accessing care for enrollees.

IT Related Proposals:

System changes to the MMIS claims system will be needed to pay for prescriptions using the new pricing methodology. The cost of these changes is reflected in the fiscal detail.

Results:

This proposal brings Minnesota into compliance with federal requirements.

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Updating Durable Medical Equipment Payment Methodology

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	(4,742)	(2,910)	(566)	(696)
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	(4,742)	(2,910)	(566)	(696)
FTEs	0	0	0	0

Recommendation:

The Governor recommends modifying the payment methodology for durable medical equipment under Medical Assistance to align with federal law that limits the amount of federal matching funds available to pay for certain products. The Governor also recommends modifications and reforms to how payment rates are calculated for items that are not subject to the new federal limits in order to simplify the payment structure and provide greater transparency.

Rationale/Background:

For several years, Medicare has competitively bid for durable medical equipment, prosthetics, orthotics and supplies. In doing so, Medicare has recognized savings by lowering their rates. Federal legislation was passed directing the Centers for Medicare and Medicaid Services (CMS) to cap federal financial participation under Medicaid at the aggregate value that would have been paid for certain durable medical equipment products had they been paid at the Medicare rate. The 21st Century Cures Act passed in December of 2016 moved up the effective date for this provision to January 1, 2018.

Under this new federal law, DHS is required to provide an annual analysis of durable medical equipment to show CMS whether the state pays more than the Medicare rate. Minnesota currently pays rates in excess of the Medicare competitively bid rates and must recover overpayments from providers beginning in 2019 in order to comply with the new federal payment limits. Due to the timing of claim payments, this analysis will be performed up to 18 months after a provider has been paid. The model of paying more than the Medicare rate and later recovering the overpayment creates financial uncertainty for the state and providers. In 2017, the legislature approved the use of state funding to replace the lost federal funding for one specific type of ventilator, and therefore that item is not subject to payment recoveries.

In addition, current state law does not define a payment methodology for durable medical equipment that do not have a Medicare rate. The rates are based on a methodology outlined in administrative rule and are calculated in a complex manner that is based on a percentage of billed charges. As billed charges have no correlation to a provider's acquisition cost, this methodology is inefficient, unpredictable and administratively complex. Reforming the calculations to be based on provider costs, rather than billed charges, will ensure that DHS purchases equipment efficiently. Stating the calculation in state law ensures transparent rate setting for all parties.

Proposal:

This proposal changes the Medical Assistance reimbursement formula for durable medical equipment that is also covered by Medicare to pay equivalent to the Medicare rate. Aligning the Medical Assistance rate with the

Medicare rate is one way to bring Minnesota into compliance with federal law and eliminates the risk that providers may experience take backs. This proposal does not change the state law providing supplemental state funding for the specific ventilator rate that was addressed in 2017.

This would reduce payment for durable medical equipment starting in FY 2019 and reduce the value of recoveries in the forecast starting in FY 2021. The fiscal effect of this proposal is the state share of the difference between the savings from lower durable medical equipment payments offset by the cost of no longer recovering payments over the Medicare limit. Projected fee for service Medical Assistance expenditures for durable medical equipment are expected to reach nearly \$171 million in FY 2020-21. This change in payment timing and the reimbursement formula are expected to reduce expenditures in the FY 2020-21 biennium by roughly \$8.2 million or 4.7 percent.

This proposal also simplifies the reimbursement formula for products that don't have a Medicare rate. The new methodology would be based on the provider's costs, not billed charges, to ensure the state pays a fair, predictable and efficient rate. At this time, DHS cannot provide the cost impact of rebasing durable medical equipment that do not have a Medicare rate as we do not have provider cost data to compare against current rates.

Equity and Inclusion:

This proposal is not anticipated to adversely impact any particular group of individuals in need to durable medical equipment. DHS will be monitoring any impact on access as a result of these changes.

IT Related Proposals:

This proposal would require changes to the payment rates loaded in the MMIS system.

Results:

A decrease in the number of DHS member help desk calls concerning enrollee access to DME.

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Medical Assistance for Employed Persons w/Disabilities Federal Conformity

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	33	7	7	7
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	33	7	7	7
FTEs	0	0	0	0

Recommendation:

The Governor recommends updating state law governing Medical Assistance for Employed Persons with Disabilities (MA-EPD) to conform to components of the Medicaid state plan amendment approved by the federal Centers for Medicare and Medicaid Services (CMS) regarding continued eligibility and the treatment of assets when an individual reaches age 65 and is no longer working.

Rationale/Background:

The Medical Assistance program contains a category of eligibility known as “Medical Assistance for Employed Persons with Disabilities” (MA-EPD) that encourages people with disabilities to become employed by allowing them to keep more of their assets, via disregards, while maintaining the health care services that allow them to work.

In 2012, the Minnesota Legislature responded to concerns from consumers and advocates that:

- Once a person retired and wanted to maintain Medical Assistance coverage they had no choice but to spend their assets and retirement savings down to the \$3,000 asset standard (\$6,000 for a couple) under the “elderly” category of eligibility.
- Once a person reached the age of 65, they became ineligible for MA-EPD even if they wanted to continue working.

In response, the law governing MA-EPD was revised to:

- Allow people to stay in MA-EPD after age 65 if they continued working; and
- To provide the same disregards they had in MA-EPD category as they retired and moved to the “elderly” category of eligibility. This “portable” disregard would only apply to people who had been continuously enrolled in MA-EPD for two years before their 65th birthday.

DHS consulted with CMS several times prior to enactment of these changes and CMS confirmed that this approach was permissible under federal law. There were also other states that had similar disregards already approved. Based on that information, the new policy was implemented in 2012, and the state plan amendment was submitted to CMS for approval.

However, upon submission of the state plan amendment CMS raised concerns that resulted in years of discussion and negotiation. Ultimately, CMS approved portions of the state plan amendment with some modifications and disapproved other elements. DHS has requested a formal reconsideration of the disapproved state plan amendment.

Proposal:

This proposal would amend state law to comply with the approved state plan components that are most consistent with the original legislative intent. DHS will continue to apply the policy of the other state law provisions that were not approved by CMS until the appeal is resolved.

This proposal changes state law to:

1. Amend the 24-month rule to state that the enrollee only has to be enrolled in MA-EPD for any 24 consecutive months, rather than the 24 consecutive months prior to turning age 65, and
2. Require MA-EPD enrollees to designate assets as an Employment Incentive Asset Account (EIAA) while they are enrolled in MA-EPD in order for the assets to be disregarded from counting toward the Medical Assistance asset limit when the enrollee stops working and moves from MA-EPD to the Medical Assistance for people age 65 and older eligibility category.

This proposal affects the rules for assessing assets for MA eligibility of former MA-EPD enrollees. It could lead to some individuals losing months of MA eligibility, and to other individuals gaining months of MA eligibility. Periods of eligibility loss or gain relative to current law are likely to be short as assets may be spent down to address health care or long-term care needs during a period of ineligibility. Given the limited scope of impact, and without any evidence of whether the net impact is more likely to be positive or negative, we assume a negligible fiscal impact on total months of MA eligibility and MA program expenditures. The costs reflected in the fiscal detail are related to IT systems updates to implement these changes.

Equity and Inclusion:

MA-EPD is designed to encourage individuals with disabilities to work and allows them to earn additional income and assets while maintain their health care coverage.

IT Related Proposals:

This proposal requires systems updates to MAXIS.

Results:

This proposal conforms state law to the approved Medicaid state plan amendment.

Other Funds				
Expenditures				
Revenues				
Net Fiscal Impact = (Expenditures – Revenues)	120	161	161	161
FTEs	2.3	2.3	2.3	2.3

Recommendation:

The Governor recommends \$281,000 in FY 2020-21 to pay for the search of up to three additional databases for child care background studies. This change is required by federal law as a part of the Child Care Development Block Grant. The funding allows providers to continue to pay the current background study rate.

The General Fund dollars will pay for the new study elements for an estimated 15,000 child care providers per year who are not currently affiliated with a licensed, certified, or enrolled program. Each check will be good for five years.

This proposal also brings the state into compliance with FBI standards for obtaining out-of-state records for all DHS background studies.

Rationale/Background:

The federal Child Care and Development Block Grant was reauthorized in 2016. This is Minnesota's primary source of federal funding for the Child Care Assistance Program (CCAP). As a part of the new law and regulations, states were required to expand health and safety requirements for licensed child care programs and providers who receive CCAP. Included within the health and safety changes were new standards for background studies.

In 2017 and 2018, the Legislature made changes to state law to bring Minnesota into compliance with the federal law. As a result, providers are now receiving studies that include a search of five of the eight required databases. The remaining three were not available or reasonable to implement at the time of other legislative changes.

Currently, Minnesota is working under the last available waiver to come into federal compliance. All child care providers will need to have a fully federally compliant study by the end of 2020. This proposal requires providers who have already had an enhanced study to acknowledge receipt of a revised privacy notice, but they would not need to submit a new study or re-pay.

For all DHS background studies, the FBI has strict protocols for the use and dissemination of data they possess. This proposal requires DHS to obtain the source record for any potentially disqualifying crime from the court or law enforcement entity in another state, which will bring Minnesota into federal compliance.

Proposal:

This proposal requires child care providers to have a fully federally compliant study by 2020. The provider types include: licensed child care centers, licensed family child care programs, legal non-licensed providers, and certified license-exempt centers. The three additional name-based searches that must be conducted include:

- The National Crime Information Center
- National Sex Offender Registry
- For anyone who lives outside of Minnesota or who has lived outside of the state in the last five years, a search of the criminal and sex offender databases in the other state(s).

These searches are required of:

- Individuals who are employed by a child care program or who are supervising children in a program
- Household members over the age of 18 in licensed family child care programs and legal non-licensed child care providers.

These searches, especially of the out-of-state criminal and sex offender registries, cannot easily be automated. When communicating with other states, there are typically four postal service-based exchanges of information that must be completed by the study subject, DHS staff, and the other state.

This proposal also includes two policy changes related to compliance with federal child care law. The first change clarifies that a child care worker cannot have direct contact until the Minnesota criminal and, for adults, the FBI check, is completed. The second change updates the definition of who needs a study as it relates to supervision and contractors.

For FBI compliance, when an FBI check is required by law and a rap sheet is returned to DHS, this proposal requires that the Department obtain the source record for any potentially disqualifying crime directly from court or law enforcement entity that created it. This is currently done on about 84% of studies where out of state information is used to disqualify a person. DHS anticipates a 20% increase in work to obtain these records because of these changes.

Searching the three child care databases is expected to take about 4,200 hours annually – or about 2 FTEs. These FTEs will cost approximately \$148,000. There is also an estimated \$75,000 in annual fees that DHS needs to pay to other states to complete these checks. In total, the child care changes will cost about \$213,000 annually.

In order to comply with the FBI requirements, this proposal estimates a 20% increase in the number of out of state records that will need to be requested and provides funding for one-third of an FTE to manage this increase. This one-third of an FTE will cost about \$23,000 annually.

Equity and Inclusion:

None.

IT Related Proposals:

System changes to NETStudy 2.0 will be needed.

Results:

These additional checks will improve protections for hundreds of thousands of children served throughout the state.

MS 245C

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: False Claims Act Compliance

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends legislation which would bring Minnesota into compliance with the Federal False Claims Act, preserving Minnesota eligibility for the federal financial incentive.

Rationale/Background:

In January of 2017, Minnesota was notified by the U.S. Department of Health and Human Services (DHHS), Office of Inspector General, that Minnesota's False Claims Act did not qualify for the federal incentive because the potential penalty is fixed in statute, and because this penalty is lower than is federally required. Minnesota's current penalty is defined in statute as not less than \$5,500 and not more than \$11,000 per false or fraudulent claim. The federal penalty, which is currently in the range of \$10,781 to \$21,563 per false claim, is tied to the Federal Civil Penalties Inflation Adjustment Act of 2015, which may cause the penalties to fluctuate from year to year. This proposal allows Minnesota to remain eligible for the federal financial incentives without the need for changes in legislation every time there are changes to the penalties at the federal level due to inflation.

Minnesota is currently eligible for the Federal Financial Incentive, due to the Department of Health and Human Services giving Minnesota a grace period until December 31, 2018. This means that for any action brought by Minnesota under the Minnesota False Claims Act, the federal share is reduced by 10% and that money is retained by Minnesota. Changes to the False Claims Act must happen during the 2019 legislative session because Minnesota will be out of compliance and therefore not eligible for the 10% federal financial incentive as of January 1, 2019.

Proposal:

This proposal seeks to amend Minnesota's False Claims Act so it will always comply with the Federal False Claims Act penalty requirements, allowing Minnesota to be eligible for the federal financial incentive.

Equity and Inclusion:

There are no groups that are specifically targeted by this proposal. This proposal will benefit all Minnesotans.

IT Related Proposals:

N.A.

Results:

While it is difficult to predict when and if Minnesota will submit claims under the Federal False Claims Act, this proposal will ensure that the state continues to qualify for the federal financial incentive in the event that claims are submitted.

Statutory Change(s):

15C.02

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Create Separate Skilled Nursing Visit Code

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	(29)	(276)	(260)	(244)
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	(29)	(276)	(260)	(244)
FTEs	0	0	0	0

Recommendation:

The Governor recommends complying with federal HIPAA codes and billing requirements by creating billing code for home health agencies to bill Medical Assistance (MA) for a skilled nurse visit performed by a licensed practical nurse (LPN).

Rationale/Background:

In 2017, Minnesota was notified that a single procedure code for skilled nursing visits was noncompliant with current Health Insurance Portability and Accountability Act (HIPAA) procedure codes. Separating the RN and LPN billing codes is essential to ensure ongoing compliance with federal procedure code requirements for skilled nursing visits and provides cost savings.

Proposal:

This proposal will bring Minnesota into compliance with the appropriate use of federal HIPAA compliant codes and the 8371 Minnesota Uniform Companion Guide by using separate procedure codes for RN and LPN services for skilled nurse visits. Currently, home health agencies are billing for both RN and LPN skilled nurse visits under one code. Home health agencies will continue to utilize the current code when an RN provides the nursing services during a skilled nurse visit. This proposal seeks to activate a second code and create a different rate for LPN skilled nurse visits. The rate for a LPN will be lower than the rate for a RN skilled nurse visit, so this proposal will result in savings. Currently, the rate is \$75.02 per skilled nurse visit. The LPN rate will be 84% of the RN rate, or \$63.01 per visit. This proposal will impact Medical Assistance state plan home health costs, through fee-for-service and through managed care, as well as Alternative Care.

There will be a systems impact for changes in the Medicaid Management Information System (MMIS). MNIT estimates that it will take 9 months to implement so the savings are reduced in FY2020. This proposal does not have any impact to local government.

Equity and Inclusion:

This proposal impacts people with disabilities and older adults that receive skilled nurse visits. These visits are a vital component to ensuring people with complex health needs are able to live in communities of their choosing and still receive services from nurses to avoid institutionalization. Splitting skilled nurse visit codes provides savings and ensures ongoing compliance with federal rules.

IT Related Proposals:

This proposal will impact the MMIS system and will have a total cost of \$67,525 in FY 19 and \$13,505 of ongoing maintenance costs to add a new procedure code for billing LPN skilled nurse visits. The existing code will only be used to bill for RN skilled nurse visits. The work to create the new code is currently estimated to last 9 months, following approval. The MMIS state share is 29% of the total cost.

Results:

DHS will monitor the implementation of this proposal by monitoring the proportion of the number of paid units between LPN and RN's.

For comparison, paid units for Skilled Nurse Visits are provided in the table below:

Skilled Nurse Visits, Paid Units		
Payer Type	FY2015	FY2016
Fee for Service	176,100	164,605
Managed Care	381,867	384,725
Total	557,967	549,330

FY 2020-21 Biennial Budget Change Item

Change Item Title: Modernization of the Telephone Equipment Distribution Program

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends implementing the recommendations made in the 2018 Department of Human Services (DHS) legislative report, “Modernizing Minnesota’s Telephone Equipment Distribution (TED) Program.”¹ The recommendations include adding new telecommunications products to be offered through the program and adding two new services to assist program participants who have hearing loss, combined hearing and vision loss, speech disabilities and physical disabilities.

This request has no impact on the General Fund. The TED program is funded through the Telecommunications Access Minnesota (TAM) special revenue account. The impact on the TAM account is estimated to be less than \$21,000 per year. It is not expected to result in an increase to the telephone surcharge amount needed to fund the TAM account.

Rationale/Background:

Many people with communication disabilities² do not have ‘functionally equivalent’ access to Minnesota’s telecommunications services. Several factors are at play: telephone equipment isn’t designed for people with communication disabilities, modern telephone service provided through cell phones and the internet are not readily and affordably available in all areas of the state, and assistive devices such as hearing aids that could improve communication for many people with hearing loss are expensive.

The TED program was established as one avenue to improve that access by providing specialized telephone equipment. To be eligible for the TED program, a person must 1) be deaf, deafblind, hard of hearing, or have a speech or physical disability that affects communication abilities over the telephone, 2) meet income guidelines, 3) have telecommunications services in place or be applying for telecommunications services, and 4) be a resident of Minnesota.

The statutes creating the TED program were established in the late 1980s when the telephone service landscape looked much different than it does today. As the telecommunications industry evolved, DHS and the Commission of Deaf, DeafBlind and Hard of Hearing received many comments from people with communication disabilities about their frustration with inequitable access to telecommunication services. The TED program has seen

¹ “Modernizing Minnesota’s Telephone Equipment Distribution Program”; https://mn.gov/dhs/assets/2018-01-modernizing-TED-report_tcm1053-323922.pdf

² For purposes of the TED program, these are people who are deaf, deafblind, hard of hearing, or who have speech or physical disabilities that affect their ability to effectively use telecommunications.

declining numbers of participants in part due to the equipment options offered in the TED program but also due to the difficulty people have accessing affordable cell phone and internet service.

As the department responsible for delivering the TED program, DHS began to strategize about modernizing the TED program to reach more of the Minnesotans who could be eligible for the program and find benefit from it. DHS started a pilot program to test the effectiveness of distributing smartphones and tablets. Tablets can be useful for visual telecommunications for people who use sign language. Planning for phase two of the pilot will be soon underway.

At the same time, the 2015 legislature asked DHS to conduct an analysis of its Deaf and Hard of Hearing Services. In FY16, DHS conducted two studies and produced a report for the legislature analyzing the services of the Deaf and Hard of Hearing Services Division (DHHSD), including the TED program.³

The 2017 legislature then asked DHS for a follow-up report with specific recommendations and recommended statute language for modernizing the TED program. DHHSD worked with the Commission of Deaf, DeafBlind and Hard of Hearing to create the January 15, 2018 report and recommendations.⁴ Commerce Department staff provided subject matter expertise as the recommendations were being developed but Commerce was not involved in deciding the final recommendations.

This proposal expects to impact the number of people who apply for and participate in the TED program. Since FY11, the TED program has seen a steady decline in the number of new program participants. With the addition of more modern equipment and a service to assist people in applying for discounted telecommunication service programs, TED expects to reach a broader audience who can benefit from and are eligible for the program.

DHS/Commerce/Public Utilities Commission (PUC) connection

Minnesotans pay a surcharge on telephone lines. The surcharge is deposited in the TAM account. Each year, the surcharge amount is determined by the PUC, depending on how much money is needed in the TAM account. As administrator of the TAM account, the Commerce Department determines the total amount of funding needed in TAM for the coming year and recommends a surcharge amount to the PUC.

Commerce is responsible to create an interagency agreement with DHS to fund the TED program. Each spring, DHS submits a TED budget to Commerce. Commerce submits the TED budget to the PUC within its comprehensive package of TAM account expected costs.

The TAM fund pays for the TED program, Minnesota Relay Services, Relay Outreach, Rural Real-Time News Captioning grants, Accessible News for the Blind, operational costs of the Commission of the Deaf, DeafBlind and Hard of Hearing, coordinating technology accessibility and usability in MN.IT, captioning of live legislative activity streaming, and administrative costs for Commerce to oversee the fund.

Proposal:

This proposal updates an existing program by expanding the products and services offered in the Telephone Equipment Distribution (TED) program.

Specifically, the TED program would:

- Offer telecommunications interconnectivity products. These are products that act as bridge for improving communications such as a Bluetooth streamer that connects to hearing aid, a communication app for a smart phone, or other sound amplifying devices that allow a person with a communication disability to use effectively use telecommunications.

³ The 2015 report is available at https://mn.gov/dhs/assets/2017-01-dhhs-report_tcm1053-275360.pdf.

⁴ The 2017 report is at https://mn.gov/dhs/assets/2018-01-modernizing-TED-report_tcm1053-323922.pdf.

- Offer multi-functional alerting devices. These are devices that flash a light or vibrate when a specific sound occurs, such as a ringing telephone. Alerting devices have become more sophisticated over time and most provide several functions. They not only send alerts for phones but also for ringing doorbells, smoke detector alarms, carbon monoxide alarms, etc.
- Introduce program participants to assistive technology used in other aspects of daily life, outside of telecommunications. While meeting with program participants about telephone equipment, the TED program staff will educate participants about assistive technology and assess their needs to determine communication equipment that could be useful in other situations; for example, personal listening devices ('pocket talkers') for one-to-one conversations or TV sound amplification devices.
- Assist program participants in applying for programs that offer discounts on monthly telecommunications service.

The impact on DHS will be minimal. TED is able to realign staff responsibilities to provide the additional services in this proposal because the work required for these changes is closely aligned to the current work of the TED program. No new positions are needed to accomplish this work. Funding for the interconnectivity products, multi-functional alerting devices, and outreach costs to inform the public about program changes will come from special revenue funding.

The TED program is funded through the Telecommunications Access Minnesota (TAM) special revenue account. The impact on the TAM account is estimated to be less than \$21,000 per year. Base funding for the TED program in State Fiscal Year 2019 is just under \$1.5 million.

DHS estimates this proposal, on its own, would not result in a need to increase in the current surcharge. Even if an impact to the surcharge was expected, no additional legislative action would be needed because the current surcharge is well within the limitation established in law. The maximum amount allowed per telephone line is twenty cents (\$.20) and the current surcharge is \$.05 per line.

The estimated costs to the special revenue account are for purchasing equipment to provide to participants, for outreach and website modifications, and for the DHS indirect charge.

TED costs (in thousands)	FY 20	FY 21	FY 22	FY 23
Interconnectivity	10	8	8	8
Multi-functional devices	6	5	5	5
Outreach, website updates	3	3	3	3
DHS indirect	2	2	2	2
Total	21	18	18	18

The implementation date for the program changes will be October 1, 2019, to allow time for DHS and Commerce to negotiate changes to the TED Interagency Agreement and for the PUC to approve the Agreement and review the surcharge.

Equity and Inclusion:

Persons who are deaf, deafblind, hard of hearing, or who have speech or physical disabilities that affect their ability to use telecommunications equipment will be impacted by this change. This proposal will give them more options for equipment that is designed to provide functionally equivalent access to telecommunications services.

Communication disabilities present barriers to interpersonal, social and professional relationships; engagement in the family and community; and the acquisition of information and knowledge. As a result, people with communication disabilities frequently experience lack of inclusion and inequitable access to services that are readily available to others.

The population of people with communication disabilities has representatives from all racial and ethnic groups, Lesbian, Gay, Bisexual and Transgender groups and Veterans. About 10% of new TED participants in FY17 were members of a non-white racial or ethnic group. This proposal will reduce the disparity in telecommunications access experienced by people with communication disabilities.

This budget change item will be easily sustainable in the long term. The ongoing cost of this proposal is expected to fall within the scope of current law governing the TAM special revenue account. In law, the telephone surcharge that funds the TAM account has a maximum limit of twenty cents (\$.20) per telephone line. The current surcharge is \$.05 per line. DHS estimates this proposal on its own would not result in an increase in the current surcharge.

IT Related Proposals:

This proposal has no IT related costs.

Results:

Since the TED program began in 1988, over 38,000 Minnesotans have been served. Some receive an assessment and equipment once and do not need follow-up services. Others need follow-up training on their equipment, accessories, or a repeat assessment and new equipment when their telecommunications needs change. It is common for a person's needs to change over time due to, for example, a hearing loss that becomes more severe.

TED is experiencing declining numbers of new participants each year because a) most of the current equipment TED offers are for landlines and the use of landlines has dropped dramatically, b) monthly phone/internet service costs for wireless devices are too expensive for some people who fall within TED's income guidelines, and c) over-the-counter telecommunications devices have become more affordable and are 'worth the cost' for people who do not want to do the paperwork to apply for TED.

At the same time, the people who join the TED program find the equipment useful. 65% of TED participants who joined the program three years ago continue to use the equipment they received. 19% needed further services such as a re-assessment, extra training on their equipment, or replacement equipment.

DHS is starting the second phase of a TED pilot program to test whether it should distribute advanced wireless devices such as the iPhone and iPad. 86% of participants in the first phase reported having increased independence because of communication access the devices provide. The second phase will provide additional data to help DHS and the Department of Commerce decide the role of these devices in the TED program.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of new program participants	563	524	FY16 to FY17
Quantity	Number of participants needing additional services or equipment	1337	1358	FY16 to FY17

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Current</i>	<i>Date</i>
Quality	Percent of current participants still using TED equipment after 3 years	65%	FY17
Quality	Percent of current participants needing re-assessment and/or other additional services after 3 years	19%	FY17
Results	Percent of advanced communications pilot program participants who report increased independence as a result of having their TED product	86%	FY17

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Greater Minnesota Sign Language Interpreting Services Capacity

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	211	211	211	211
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	211	211	211	211
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$211,000 per year from the general fund to increase the availability of sign language interpreting services in Greater Minnesota communities. This funding would expand several existing grant programs.

This proposal increases the total Deaf and Hard of Hearing Services (DHSS) Division grants base by 7.9%. The specific increase to Greater Minnesota interpreting service capacity building activity is 110%.

Rationale/Background:

Minnesota's sign language interpreter referral agencies process and fill tens of thousands of requests for interpreters every year. Despite their best efforts, some Greater Minnesota communities still struggle to find enough interpreters to fill all the requests they receive. This results in a lack of communication access for people who use American Sign Language (ASL) in many aspects of daily life including medical appointments, human and social services, banking, community involvement, etc. In many communities outside of the Twin Cities, the demand for sign language interpreters is sporadic and unpredictable, which results in a sporadic and unpredictable income for interpreters. Because the demand is not sufficient to support full-time work, there is not an adequate supply of interpreters residing and working in Greater Minnesota.

The current annual base funding for Deaf and Hard of Hearing Services grantsspecific to interpreting service capacity building in Greater Minnesota is \$191,000. The total base grant funding for Deaf and Hard of Hearing Services is \$2,675,000 per year.

[Minnesota Statute 256C.233, subd. 2](#) requires the Department of Human Services (DHS) Deaf and Hard of Hearing Services Division to assess the supply and demand statewide for interpreter services and build the base of service providers across the state. The Minnesota legislature provides grant funding to DHS to develop programs and services that address the interpreting services supply issues. In the early 1980's, state grant funding was used to subsidize the interpreter referral process. With the passage of state and federal laws requiring reasonable accommodations, the demand for sign language interpreters increased. Referral agencies became self-sustaining by charging fees for their referral services. State funding was no longer needed to ensure the existence of referral services because they could operate on the fees they generated.

In larger metropolitan areas, the demand for interpreting services is relatively consistent because of the concentrated populations of people who are deaf, deafblind, and hard of hearing. This consistent demand makes

it possible to have a readily available supply of interpreters who can make a full-time living providing interpreting services.

In many areas of Greater Minnesota, the demand for interpreting services is less consistent due to smaller numbers of people who are deaf, deafblind, and hard of hearing. With inconsistent demand, fewer interpreters are available and referral services have difficulty finding qualified interpreters to fill the requests they receive.

DHS focuses the grant funding provided by the legislature on creating innovative solutions for increasing the availability of interpreting services to people in all corners of the state. DHS currently has a contract with one provider to offer several programs and services that have had successful results.

DHS receives data about the program and services provided by the current grantee. Its grantee is one of nine referral agencies offering services in Greater Minnesota. To get a more comprehensive look at Greater Minnesota, DHS contacted the other eight interpreter referral services providers and requested data related to their interpreting service requests in Greater Minnesota. Of the eight providers contacted, three sent data and a fourth sent anecdotal information. One agency processed 12 requests in FY17 and a second processed 57. A third agency managed over 3,700 requests in FY17. The state's current grantee processed over 7,300 requests for interpreting services in Greater Minnesota in FY17 and over 10,000 in FY18.

For the agencies that provided DHS with data, they were able to find interpreters for 94% of the requests they received in FY17 in Greater Minnesota. Over 11,000 requests were processed and only 629 went unfilled. This is an excellent result for many of the people in Greater Minnesota who need interpreting services but more is still needed. The 629 unfilled requests may have been for a young mother who is deaf and needed to take her infant son to the emergency room, or an older person whose first language is ASL who has a chronic medical condition and needs regular follow-up care, or a father of a growing family who needs interpreting services at his workplace to be able to keep his job.

Education to Excellence (E2E)

The E2E program was developed to help prepare K-12 interpreters for community interpreting work. Interpreting in K-12 classrooms requires a significantly different skill set compared to community interpreting. K-12 interpreters are an excellent resource within a community who, if only occasionally are available for community interpreting, are part of the solution for filling community interpreting needs.

The E2E program matches an educational interpreter with a Deaf Mentor and a community interpreter mentor to learn the differences between roles and responsibilities of educational interpreting and community interpreting. The mentors also help the interpreters develop the specific skills needed for working with a wide range of people and community settings.

Since the fall of 2016, 40 interpreters from areas around Moorhead, Duluth, Brainerd, and Faribault have received training through E2E. They provided interpreting services for a total of 1,370 community assignments in Greater Minnesota.

The 1,370 filled assignments are those received and processed through the one agency that holds the DHS grant. Because it is common for interpreters to work for more than one referral agency, it is possible the E2E participants have also worked through other referral agencies and filled even more than the 1,370 assignments tracked through the current grant.

The current grantee has processed a total of over 24,000 requests for interpreting services in Greater Minnesota for the 2 ½ year time period the E2E program has been in place.

Developing Deaf Interpreters (DDI)

DDI started in FY18. The purpose is to prepare deaf people to obtain the Certified Deaf Interpreter credential. Ten Deaf people from locations throughout Greater Minnesota joined the training program. Eight completed the first year (phase one) and took the knowledge portion of the national professional certification exam. Five (63%) passed the knowledge exam. They will begin accepting limited types of interpreting assignments in Greater Minnesota during FY19 while they complete the second year of training to prepare for the performance portion of the exam. Minnesota currently has 7 Certified Deaf Interpreters who work primarily in the Twin Cities.

A Deaf Interpreter works alongside a 'hearing' sign language interpreter. Deaf Interpreters are native ASL signers or have native-like ASL fluency and extensive understanding of Deaf Culture and the world experience of a person who is Deaf. They have the ability to do deep translations for individuals who are deaf and monolingual, or use an atypical sign language, or come from other countries with little exposure to any sign language, or have limited language skills of any sort. They also frequently provide interpreting services for people who are deafblind.

Interpreting work involves much more than word-for-word, or in this case word-for-sign, translation. Successful communication and understanding requires a message to be delivered in a language or communication system the person understands and within a cultural and experiential framework familiar to the person. For a person who does not have a strong language or experiential base, a Certified Deaf Interpreter is able to interpret and reframe a message in a way that a hearing interpreter without the same 'lens' would not be able to.

12-Step Meeting and Funeral Access

12-step groups such as Alcoholics Anonymous are not mandated under the Americans with Disabilities Act (ADA) or Minnesota human rights laws to provide reasonable accommodations for their participants with disabilities. While 12-step groups welcome all people as members, it is uncommon that a self-sustaining 12-step group can afford the ongoing cost of interpreting services for a member who is deaf and uses sign language. When no other funding source can be found, this grant pays for the interpreting services.

From FY16 to FY18, the demand for this funding has increased 66%. In FY18, 178 requests for interpreting services were received and 177 were successfully filled. Four consumers utilized the funding, attending an average of 44 meetings per person per year.

For funerals, the ADA applies in some situations but not all. This program pays for the interpreting services in those situations that are not covered by the ADA. In FY18, 45 requests for interpreting services were received and 43 were successfully filled.

Travel Cost Support

Many entities are responsible to provide reasonable accommodations under the Americans with Disabilities Act and Minnesota human rights laws. In rural communities with only sporadic demand for interpreting services, there often are no locally-based professional interpreters. In the more remote areas of the state, travel costs can be prohibitive to bring in an interpreter after paying for the interpreting time itself.

This program pays for an interpreter's travel time and costs as long as the entity responsible for providing the accommodation is willing to pay for the actual interpreting service. The vast majority (98% in FY18) of the time, travel costs associated with filling an interpreting request are paid by the entity that is responsible to provide the interpreting services. For the remaining 2% of interpreting requests that relied on the Travel Cost Support, the funding needed increased by 29% from FY17 to FY18.

Video Remote Interpreting (VRI) Education

VRI is an alternative method of providing interpreting services in some situations when an in-person interpreter is not available. VRI services are currently available in Minnesota but there is a general lack of understanding about when this is a viable alternative and how to effectively use interpreting services through video technology.

VRI has both opportunity and limitations. The opportunity is getting on-demand interpreting services when needed regardless of whether an interpreter lives nearby. At the same time, there are significant limitations:

- 1) VRI is a two-dimensional presentation of a three-dimensional language. It requires extra visual and cognitive processing and communication adaptations to be used effectively.
- 2) VRI requires high quality internet service or cell phone service to transmit the most clear video and audio information. Not all areas of Minnesota have the quality needed available.
- 3) VRI limits the interpreting process. In many situations the interpreter needs to see all the participants to be able to understand the communication interactions and effectively interpret. VRI also has limitations in 'high stakes' situations such as emergency rooms, legal testimony, etc., where the level of emotional stress is high due to the nature of situation.

Many individuals who use sign language are reluctant to use VRI because they do not have enough information about how it works and in what situations it could be a successful alternative to an in-person interpreter. Entities that hire interpreters need information about the limitations of VRI so that they do not rely on it as a single solution for meeting their obligation to provide reasonable accommodations.

Interpreting Student Internship Stipends

If an interpreting student can develop a professional network by completing their college internship in Greater Minnesota, it may lead to job opportunities after graduation. Minnesota has three interpreter education programs, all located in the Twin Cities area. Each of Minnesota's programs requires students nearing graduation to complete an internship. It is generally easiest for interpreting students to complete their internships in the Twin Cities areas. The cost of commuting or temporarily relocating to a place outside the Twin Cities is a barrier to drawing students to Greater Minnesota. The goal of offering stipends is to draw more students to Greater Minnesota.

Proposal:

This proposal expands the successful programs that were created with grant funding and adds two new services designed to increase Greater Minnesota's capacity to fulfill the interpreting service needs of people living in Greater Minnesota who use American Sign Language (ASL).

Expanded programs:

Education to Excellence (E2E) (\$42,000 per year for both E2E and E2E- Speciality). This proposal adds funding to the E2E program so that interpreters in additional communities in Greater Minnesota have the opportunity to develop competency in community interpreting. DHS expects to prepare an additional seven interpreters per year and fill an additional 504 requests for interpreting services in Greater Minnesota per year.

Education to Excellence—Specialty is the second phase of the E2E program. It launched in FY19. In this phase, interpreters work with mentors to focus on developing the skills and language needed to interpret in highly specialized community settings such as medical, legal and mental health. This proposal provides funding to allow this second phase to be offered each year rather than every other year. DHS expects to prepare between ten and 15 interpreters per year for specialty community interpreter work. This program began in fiscal year 2019 teaching the speciality of medical interpreting.

Developing Deaf Interpreters (DDI). (\$17,000 per year) Additional funding will allow two phases of DDI to be offered each year. Phase 1 is preparing for the written knowledge and professional code of conduct exam of the national certification process; Phase 2 is preparing for the skills demonstration exam. DHS expects six Deaf Interpreters to participate in Phase 1 and six more to participate in Phase 2.

12-Step Meeting and Funeral Access. (\$41,000 per year for 12-step meetings access, funeral access and travel cost support) This proposal increases the available funding so that more people in Greater Minnesota communities can benefit from interpreting services in these situations. DHS expects at least four more people to

participate in 12-step meetings each year. In fiscal year 2018, 4 people were served in the program and they participated in an average of 45 meetings per year.

Travel Cost Support. This proposal increases the funding for this activity. Based on the increase in the demand for travel cost supports from FY 17 to FY18, DHS expects to subsidize travel costs for at least 22 more interpreting requests in Greater Minnesota.

New services:

Video Remote Interpreting (VRI) Education. (\$49,000 per year) This proposal will fund the development of VRI educational materials and delivery of information and training activities to consumers and purchasers of sign language interpreting services in Greater Minnesota.

Interpreting Student Internships. (\$62,000 per year) This proposal will provide stipends to Minnesota residents who are college students majoring in sign language interpreting in a Minnesota college or university and who need to complete an internship as part of their graduation requirements through an accredited institution. Stipends would range between \$2,500 and \$7,500 per student depending on the length of the internship and would be available to up to 8 students per year to offset the internship expenses. Stipends will also be available to internship site hosts to offset their costs of hosting an intern. A part-time liaison will work with each university's internship placement staff to assist with the extra arrangements needed for a Greater Minnesota internship and will oversee stipend allocations and use.

Equity and Inclusion:

Persons who are deaf, deafblind, and hard of hearing in Greater Minnesota will be positively impacted by this change by increasing access to sign language interpreting services.

People with hearing loss who use sign language often face barriers in interpersonal, social and professional relationships, engagement within their family and community, and the acquisition of information and knowledge. When there is insufficient availability of interpreting services, they frequently experience lack of inclusion and inequitable access to services that are readily available to others.

The population of people who are deaf, deafblind, and hard of hearing includes people from all racial and ethnic groups, those who identify as LGBTQIA, and veterans. This proposal will reduce the disparity in communication access often faced by people who are from these diverse groups and who are also deaf, deafblind, and hard of hearing.

IT Related Proposals:

This is not an IT related proposal.

Results:

The various programs and services in this proposal are designed to have a positive impact on one broad performance measure – the number of successfully filled requests for sign language interpreters in Greater Minnesota. Successfully filled means an interpreter accepted the request and delivered the interpreting service. While grant funding does not pay for the day-to-day operations of an interpreter referral service, it impacts the number of requests that are filled by preparing interpreters for community-based work and paying for interpreting service costs that fall outside the scope of communication access laws.

Expanded programs:

For the current grantee, the overall rate of filled requests improved from 96% in FY16 to 97% in FY18. The number of requests they received increased by 54% over that same time period. In FY18, the grantee received 10,256 requests for interpreting services in Greater Minnesota.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of Greater Minnesota interpreting assignments filled by E2E participants	314	504	FY16 to FY18
Quality	Percent of E2E participants who report the program met or exceeded their expectations	100%	100%	FY16 to FY17
Results	Percent of Greater Minnesota 12-step meetings that had interpreting services when services were requested	100%	99%	FY16 to FY18
Results	Percent of Greater Minnesota funerals that had interpreting services when services were requested	79%	96%	FY16 to FY18

New services:***Video Remote Interpreting (VRI) Education***

Performance measures will include:

- Number of people who are deaf, deafblind, hard of hearing who participate in VRI educational activities
- Number of purchasers of interpreting services who participate in VRI educational activities
- Percent of participants who would refer others to the educational activities
- Percent of participants who are purchasers of interpreting services who demonstrate improvement in their understanding of best practices for use of VRI

Interpreting Student Internships

Performance measures will include:

- Number of students receiving internship stipends and number of internship sites
- Percent of participating interns who would recommend the program to others
- Percent of participating interns who have a positive response when asked if they would consider working in Greater Minnesota after graduation
- Percent of participating interns who work at least part time in Greater Minnesota after graduation

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Early Intensive Developmental & Behavioral Intervention Criminal Background Studies

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	20	20	20	20
Revenues	(20)	(20)	(20)	(20)
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends including Early Intensive Developmental and Behavioral Intervention (EIDBI) autism benefit service providers within the background study requirements of Minnesota Statutes Chapter 245C, including a requirement for provider staff to undergo a background study through the commissioner's NETStudy system, the new fingerprint based system for conducting background studies.

Rationale/Background:

Currently, EIDBI providers are excluded from the NETStudy system if they do not also provide other services that require background studies subject to the requirements under Chapter 245C. As a result, many of these providers are on their own to find a source to conduct background studies for prospective staff. Further, if a staff person is identified as having a criminal background, state exclusion criteria under 245C.15 do not currently apply – only federal criteria describing certain crimes involving Medicaid fraud and other financial crimes may be applied.

Proposal:

This proposal adds EIDBI providers to the list of providers subject to the background study requirements and restrictions in Chapter 245C, and requires them to use the NETStudy system (the department's uniform system for conducting background studies) to complete staff background studies under that chapter.

As a result, providers and DHS will have clear exclusion criteria to apply to persons who have criminal backgrounds that would otherwise prohibit them from working directly with children and vulnerable adults. It will also identify a single source for EIDBI providers that is a timely, trusted, and responsible resource for background studies.

EIDBI service providers will need to be informed of this change and trained to use the NETStudy system to implement this proposal. Since the number of providers are small, the costs for the training can be completed within existing resources.

Additional administrative and staff resources will be needed to compensate for the increased workload of the NETStudy system. However, the cost is budget neutral as the proposal recovers the cost of the

background studies through a per-study fee paid by EIDBI service providers. The fee will be \$32 per transaction.

Equity and Inclusion:

- Children and young adults with autism spectrum disorder and related conditions will be directly impacted by this proposal; they will be protected by applying 245C background study and criminal background disqualification criteria to prospective staff. The EIDBI Advisory Group and other parent advocates have been consulted in the development of this proposal.
- The anticipated positive impact is fewer people with disqualifying criminal backgrounds will be able to access children and vulnerable adults with autism spectrum disorder and related conditions who may not be in a position to defend themselves or report maltreatment.
- Ongoing funding for department staff and administrative costs will be reimbursed via background study fees paid by EIDBI service providers.

IT Related Proposals:

This is not an IT-related proposal.

Results:

The following information will be collected from NETStudy, DHS Provider Enrollment, and SIRS audits.

- **Quantity:** How many prospective EIDBI staff persons were subject to a background study during any given year?
- **Quality:** How many of these prospective staff persons were identified as disqualified due to criminal background, and proactively blocked from working with children and vulnerable adults?
- **Result:** Have prospective staff with disqualifying criminal histories been identified and prevented from having access to children and vulnerable adults as a result of applying 245C criteria?

Recommendation:

The Governor recommends improving access to Minnesota's healthcare coverage program for low-income Minnesotans living with HIV or AIDS to assure eligible individuals can access and maintain healthcare coverage. This proposal impacts (1) individuals who opt out of employer-sponsored insurance due to out-of-pocket costs and (2) individuals who are on Medical Assistance and MinnesotaCare and are subject to cost-sharing requirements under Minn. Stat. § 256B.0631, subdivision 2. This proposal is budget neutral because it reallocates state insurance grant dollars without a need for additional funding.

Rationale/Background:

Minnesota primarily purchases insurance and drugs for low-income people living with HIV or AIDS through its Ryan White HIV/AIDS Program (Ryan White) Part B AIDS Drug Assistance Program, which is administered by the Department of Human Services (DHS). The HIV/AIDS healthcare coverage program authorized under Minn. Stat. §256.9365 supplements the Ryan White Program to fill gaps in coverage. A gap currently exists between the state and federal programs, resulting in some people not receiving coverage for insurance premiums and prescription drug copays, despite their eligibility for state and federal programs.

The federal Health Resources Services Administration (HRSA) requires states to either eliminate drug copays or track them as program income with a sliding scale fee and cap charges to ensure clients have access to necessary medications. Cost-sharing was eliminated for non-Medical Assistance and non-MinnesotaCare AIDS Drug Assistance Program clients effective January 2018. In order to eliminate copays at the point of sale for Medical Assistance and MinnesotaCare clients, DHS has launched long-term administrative and IT system projects. To ensure access to prescription drugs in the interim, DHS began a retroactive reimbursement process for clients.

The gap in health care coverage has impacted eligible individuals without access to medical care and treatment for their HIV or AIDS diagnosis. Such care includes routine testing for viral load and CD4 counts. This testing often gets skipped due to costs or shifted to uncompensated care by clinics and doctors, despite necessity. Managing viral suppression is essential in reducing the transmission of HIV. It also is essential in achieving improved health outcomes for people living with HIV and AIDS. A study done with AIDS Drug Assistance Program enrollees in San Diego showed that viral suppression was achieved by more patients enrolled in health insurance than only in the drug assistance program (85.5% vs 78.7%). Reaching this percentage of clients through direct reimbursement for their premiums costs would improve their ability to achieve and/or maintain viral suppression.

Align Eligibility Requirements

The current eligibility requirements in the state's healthcare coverage program, which include an asset test, need to be updated to align with the Affordable Care Act and Minnesota's expansion of the Medicaid program. In addition, a goal of [the HIV/AIDS Unmet Need and Rebate Funds Use Report](#) submitted to the 2015 Minnesota Legislature, was to expand the income requirements for the Minnesota Ryan White Part B AIDS Drug Assistance Program, from 300% to 400% of the Federal Poverty Guidelines. This report was the result of input from community stakeholders to prioritize spending of 340B drug rebate funds that accumulated in the AIDS Drug Assistance Program. The AIDS Drug Assistance Program has not collected asset limit documentation from clients since the Affordable Care Act was implemented in 2014.

Expand Insurance Premium Assistance

Nearly 20% of AIDS Drug Assistance Program clients are eligible for employer sponsored insurance, but opt out due to unaffordable out-of-pocket costs. This leaves them uninsured and only able to access the prescription drug assistance under AIDS Drug Assistance Program. DHS will utilize an existing grant program, the Health Insurance Premium Program, to reimburse AIDS Drug Assistance Program clients for out-of-pocket insurance premiums using state grant funding.

Drug Copays and Medical Assistance/MinnesotaCare Cost-Share Relief

In order to comply with HRSA guidance related to prescription drug co-pays, the DHS AIDS Drug Assistance Program eliminated copays. Copays were eliminated for non-Medical Assistance and non-MinnesotaCare AIDS Drug Assistance Program clients effective January 2018. Eliminating copays for clients on MA or MinnesotaCare will be implemented in two phases.

In the first phase, DHS will utilize the Health Insurance Premium Program, to reimburse AIDS Drug Assistance Program clients for out-of-pocket drug copays using available state funding. Under this phase, patients pay their copays at the point of sale and are reimbursed upon submitting records of the purchase. Patients are reimbursed with state HIV/AIDS funds because HRSA guidelines prohibit federal Ryan White grant dollars and AIDS Drug Assistance Program 340B drug rebate dollars to be used to reimburse clients directly. In the second phase, DHS will implement an administrative solution to ensure clients do not have any out-of-pocket drug copay at the point of sale, allowing seamless access to prescription drugs. In the second phase, the AIDS Drug Assistance Program and 340B drug rebates will pay for those costs as it will not require direct reimbursement to clients. Development of the phase two solution is currently underway.

Proposal:

This proposal modifies spending in an existing program under Minn. Stat. § 256.9365, to purchase health insurance for low-income Minnesotans living with HIV or AIDS by: 1) aligning statutory eligibility requirements with federal standards and current practice; 2) addressing gaps in coverage for the purchase of health insurance and prescription drugs; and 3) meeting compliance with federal requirements for full coverage of prescription co-pays. This proposal is effective July 1, 2019.

This proposal aligns with federal guidance by clarifying that persons eligible for the Minnesota's HIV/AIDS program are not subject to the cost-sharing requirements under Minn. Stat. § 256B.0631, subdivision 2.

Currently, the state insurance appropriation, which is about \$1.1 million per year, is used for the purchase of health insurance premiums. Staff, payment for services, and all other program costs are covered by the Ryan White Part B grant and through the AIDS Drug Assistance Program 340B drug rebate funds. All dollars spent at the state level are for direct client benefit and access.

This proposal will reallocate some of the state appropriation to pay for co-pays for those individuals whose co-pays are not currently being paid. This will not result in additional costs for the general fund, as more spending will be shifted and occur in the federal Ryan White and the rebate program.

Equity and Inclusion:

In Minnesota, of people living with HIV or AIDS, 55% are men who identify as same gender loving, 53% are people of color, 37% are African American or African born, and 33% are over the age of 55. Any changes to expand access to the insurance premium assistance or drug cost-sharing will have significant impact on people of color, LGBTQIA, and aging populations.

IT Related Proposals:

It is estimated that there will be no system costs. However, any costs that might be identified would be funded through the federal AIDS Drug Assistance Program 340B drug rebate funds.

Results:

This proposal will:

- Increase the number of people living with HIV in Minnesota eligible for the Ryan White Part B and AIDS Drug Assistance Program who are insured. As of September 2018, 22% were uninsured.
- Increase the number of people living with HIV in Minnesota retained in care and virally suppressed.

Statutory Change(s):

Amend Minnesota Statute § 256.9365.

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Semi-Independent Living Services Grant Program Funding Restructuring

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends reducing the Semi-Independent Living Services (SILS) state grant program contribution required of Minnesota counties and tribes from 30 percent to 15 percent. This proposal is budget neutral and does not have a fiscal impact on the state's general fund.

Rationale/Background:

The SILS state grant program supports adults with developmental disabilities in the community by funding training and assistance in managing money, preparing meals, shopping, hygiene, and other activities. The SILS program provides less intensive and less expensive community living supports than those offered through the Developmental Disabilities (DD) waiver to people who do not meet the eligibility requirements for waiver services. Minnesota counties and tribes administer the SILS program.

SILS currently requires a 30 percent contribution of local funds by the lead agency (county or tribe) that authorizes these services. DHS has learned that lead agencies do not always have funds for the 30 percent match. Without a 30 percent local funding match, lead agencies cannot access the state funding to administer the SILS program. As a result, people who may otherwise receive SILS may not receive the minimal supports to help them retain housing and employment.

Proposal:

This proposal seeks to incentivize use of the SILS state grant program, which supports adults with developmental disabilities in ways that enable them to achieve personally-desired outcomes and lead self-directed lives. The SILS program provides minimal supports that allow people to live independently.

This proposal will increase equitable statewide access to SILS by reducing the amount of local funds counties and tribes must contribute, from 30 percent to 15 percent. Within current funding, the state's share of program funding would increase from 70 percent to 85 percent.

The SILS grant is an existing program, and this proposal does not change current program policies. The current base general fund appropriation for the SILS program is about \$8.3 million a year.

As seen in the table below, over \$2 million of the fiscal year 2017 SILS program allocation was unspent, due to underutilization. This proposal is budget neutral as the increased State share of funding, from 70 percent to 85 percent, will draw from the available unused state allocation funds.

Year	SILS State Funds Used	SILS Local Contribution	Unspent SILS State Allocation
FY 2017	\$5,946,367	\$2,547,077	\$2,381,995

Equity and Inclusion:

The SILS state grant program supports adults with developmental disabilities by funding training and assistance services that support community living. The 30 percent lead agency contribution currently required under SILS creates geographic service access inequities. This contribution is paid using local funds and, depending on other local budget pressures, a lead agency may not have funds for the SILS program. As a result, residents of some lead agencies may access SILS services while others may not.

IT Related Proposals:

There are no system costs associated with this proposal.

Results:

The performance measures for the SILS grant program are:

Type of Measure	Name of Measure	Previous	Current	Dates
Results	Unspent SILS State Allocation	N/A	\$2,381,995	FY2017

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Community First Services and Supports Eligibility for Pregnant Women

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends authority to use state-only funding to provide Community First Services and Supports (CFSS) for a small category of people who are eligible under Minnesota Statute §256B.055, subd. 6. This authority ensures that all those eligible for PCA now, will also be eligible for CFSS when implemented. It also allows for CFSS to be implemented without building an interface between MMIS, METS and MAXIS, shortening the implementation timeline. This proposal does not have a fiscal impact.

Rationale/Background:

CFSS is designed to offer participants more choice, control, and flexibility with their services and supports needed to live in the community. Similar to Personal Care Assistance (PCA) services, CFSS offers assistance with activities of daily living (ADLs), instrumental activities of daily living (IADLs), health-related tasks, and back-up systems to assure continuity of services and supports based on assessed functional needs for people who require support to live in the community. Unlike Personal Care Assistance (PCA) services, CFSS offers permissible services and supports associated with a participant's assessed need or goal. When implemented, CFSS will replace the PCA program and the Consumer Support Grant.

Originally CFSS was designed to include three federal authorities, ensuring that all people currently eligible for PCA would remain eligible for CFSS: (1) a state plan amendment under § 1915(k) of the Social Security Act; (2) A state plan amendment under § 1915(i) of the SSA; and (3) a demonstration project waiver under § 1115 of the SSA. Expanded financial eligibility criteria, under the Affordable Care Act, resulted in the majority of eligible recipients falling into two of the original authorities: 1915(k) and 1915(i). A small eligibility category of pregnant women with incomes between 150% and 278% FPG would be eligible, only under the 1115 authority.

Proposal:

This proposal seeks authority to use state-only funds to ensure CFSS eligibility for pregnant women who: (1) do not have an institutional level-of-care and (2) meet all statutory CFSS eligibility requirements. This proposal also reduces the time required to implement CFSS by pursuing an option that eliminates the need for a federal waiver.

While the Department needs legislative authority to use state-only funds to pay for services for this population, the number of people impacted is projected to be so small that any additional cost would be negligible. Recent research from 2016 and 2017 found approximately three people that might have been impacted by this proposal. Given the small number of people potentially impacted, this proposal will not have a measureable impact on the Medical Assistance forecast.

Equity and Inclusion:

The PCA program is one of the most diverse long-term service and support programs in Minnesota and is growing more diverse each year. In January 2017, 61% of people receiving PCA services were people of color or Native American. Approximately 33% of people receiving PCA services were non-Hispanic white, compared to an estimated 80% of Minnesotans statewide. The transition from PCA to CFSS will occur for these groups generally, but the changes in this proposal will not affect these communities any differently from other groups receiving PCA.

Results:

DHS will monitor the implementation of this proposal as we transition from PCA to CFSS.

Statutory Changes

Amend [256B.85, Subd. 3.](#)

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Updating Indian Health Services Provider Payments

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	9	2	2	2
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	9	2	2	2
FTEs	0	0	0	0

Recommendation:

The Governor recommends modifying the payment formula for Indian Health Centers serving people who are enrolled in both Medical Assistance and Medicare to be consistent with how other similar providers are reimbursed.

Rationale/Background:

For people dually eligible for Medicare Part B and Medical Assistance, Medicare is the primary payer for most health care services outside of long term care. State Medicaid programs provide varying levels of support for Medicare premiums and cost sharing. For services provided to dually eligible individuals in Minnesota, Medicare pays 80 percent of the Medicare allowed amount and Medical Assistance pays the remaining 20 percent on what are commonly referred to as “crossover claims.”

In 2011, the legislature modified the treatment of Medicare Part B claims for dually eligible individuals by limiting the total payment to the Medical Assistance rate. On average Medical Assistance rates for most services are lower than amounts paid by Medicare, and the new limit reduced the amount Medical Assistance paid for cost sharing on crossover claims. In 2015, the legislature exempted federally qualified health centers and rural health centers from this limit, restoring Medical Assistance payment of the full Medicare cost sharing amount. Indian Health Service (IHS) providers have a similar payment methodology to federally qualified health centers and rural health centers and had been expected to be included in the exemption. However, due to a drafting error, the language did not include IHS providers.

Proposal:

The proposal would make a change to the Medical Assistance statute to add Indian Health Centers to a payment limit exemption for cost sharing on Medicare part B cross over claims. This would align the treatment of IHS providers with how similar claims are treated for Federally Qualified Health Centers and Rural Health Centers. This proposal corrects the error and adds IHS providers to the exemption as was originally intended. This will allow all three similarly situated provider types to be treated consistently.

All Medical Assistance covered services provided by an IHS are 100 percent federally funded. As such, restoring payment of the full Medicare cost sharing amount for services to duals has no impact on the state funding for Medical Assistance. Removing the limit on crossover payments to IHS providers will require minor change to DHS claims payment systems. The cost of the necessary systems changes is reflected in this estimate.

Equity and Inclusion:

This proposal corrects an unintended disparity in how Indian Health Centers are reimbursed compared with other similar providers.

IT Related Proposals:

This proposal will require a minor change to MMIS.

Results:

This proposal will result in Indian Health Centers receiving reimbursement in a manner that is equitable with other similar providers.

Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	(19)	16	13	(108)
FTEs	0	0	0	0

Recommendation:

The Governor recommends improving the state's ability to ensure that Medical Assistance serves as the payer of last resort through implementation of an electronic case management system and improved data sharing between the Department of Human Services (DHS) and the Department of Public Safety (DPS).

Rationale/Background:

Under federal law, Medical Assistance serves as the payer of last resort. This means that other insurers or programs must pay their share of costs before a Medical Assistance payment is made. This is known as "third party liability" or TPL. Federal law requires states to take steps to ensure that medical providers bill third parties first before requesting payment from Medical Assistance. If a state has paid claims and later discovers the existence of a liable third party, the state must attempt to recover the money from the liable third party. When a recovery is made, the federal and county shares are reimbursed and the remainder is returned to the state general fund.

Minnesota currently recovers or cost-avoids over \$900 million annually through TPL related activities but there are opportunities to expand this work and generate additional savings for the state budget. DHS currently manages over 10,000 cases related to this work. There is currently no electronic management system in place to track, maintain and monitor cases, and the majority of Minnesota's TPL activities involves paper and/or manual processes. This limits the effectiveness and efficiency of this work. Sophisticated web-based case management systems are available that track and house all TPL activities and are being put in place by other states. Implementation of an electronic case management system will make the work more efficient and increase recoveries.

Another opportunity for improving the state's TPL activities relates to situations in which a Medical Assistance enrollee is involved in a motor vehicle accident and there is an insurance settlement to cover their related health care costs. DHS currently identifies these cases primarily through required legal notification once an attorney has been retained by the injured party or through Medical Assistance payment data. These processes can take months after the initial date of injury and medical treatment, and by then the medical payment may have been exhausted by other sources. Additionally, providers have a year to bill Medical Assistance from the date of service. This time lag may mean that settlement discussions are occurring before DHS is aware of the injury. Obtaining this information more quickly increases the opportunity for the state to join in legal settlements before they are final. Improving the timeliness of motor vehicle accident information will result in some additional revenue to the state.

Data sharing is useful for identifying potential new recovery cases proactively and efficiently when there is an accident. Federal Medicaid regulations require an exchange of data for the purpose of determining the legal liability of third parties for health care costs, particularly from State Motor Vehicle Accident Report files.ⁱ State law (Minnesota Statute 256.015, subdivision 7) authorizes DPS to share motor vehicle accident data with DHS for the purposes of complying with federal Medicaid rules regarding third party liability, but this law does not explicitly authorize DPS to share Social Security data with DHS. In 2009, DPS began sharing motor vehicle accident data for this purpose, but the data shared included a large volume of duplicate names and birth dates. Accurate data matches are not possible without a unique personal identifier.

Permitting DHS access to personal identifiers within motor vehicle accident data would accelerate tort recoveries and allow DHS to participate in more settlements. The data received would come from Accident Reports and driver's license records, which house the Social Security numbers. DPS has confirmed that there would be no information provided through the MNLARS system and no DHS data would be matched with that system.

Proposal:

This proposal provides funding for DHS to purchase and implement an electronic case management system for the state's TPL activities in order to improve the efficiency and effectiveness of this work. DHS will solicit estimates with vendors through state contracting processes to modify and develop code to implement the case management system. This proposal assumes the state will implement the first phase of the electronic system by January 1, 2021.

The first phase would address global case management needs for tort, estate recovery, and cost effective health insurance activities. This systems improvement project is eligible for enhanced federal funding, and the tracking reflects the anticipated state share for the vendor contract. The second phase would update functionality to include case management of the cost-effective health insurance program and additional case management functionality for estate recovery, both of which are completed by counties, that is giving counties the ability to work in this system. The third phase would add the capacity to process third party insurance electronically.

Implementation of a case management system for these recovery efforts will make this work more efficient and should ensure increased recoveries and more effective oversight of DHS staff and the work of partners. The overall cost of the case management system for development and implementation is estimated at \$2.1 million for the first phase, and \$1.5 million for each of the second and third phases. We assume a 90% federal match so the costs reflected in the proposal are state share only.

This proposal will also allow DPS to exchange motor vehicle accident data that include the last four-digits of an individual's Social Security number with DHS through an existing secure web portal on a biweekly basis. DHS will match the data against Medical Assistance enrollee eligibility data. Once the match is complete, DHS will destroy the data received from DPS. Permitting DHS access to personal identifiers within motor vehicle accident data will accelerate tort recoveries and allow DHS to participate in more settlements.

DHS assumes that the accelerated collections will result in an increase in FY2020 collections for no fault insurance recoveries from motor vehicle accidents equal to 25 percent of the FY2017 total and an ongoing increase of 15 percent of the FY2017 amount resulting from additional accident data. Additional accelerated collections are assumed for medical claims in tort cases in FY2020 collections equal to five percent of the FY2017 total and an ongoing increase of 2.5 percent beginning in FY2021.

Equity and Inclusion:

This proposal seeks to improve the state's ability to ensure that Medical Assistance is the payer of last resort. The proposal does not impact an enrollee's ability to access services.

IT Related Proposals:

This proposal does not require any changes to DHS IT systems, but may require some configuration and integration with the new TED case management system. DPS has previously provided DHS with a file containing motor vehicle accident information. This proposal will allow for the exchange of a personal identifier within the motor vehicle data which can be added to the existing DPS file.

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clarify and Strengthen Provider Screening and Enrollment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	143	147	151	155
Revenues	(143)	(147)	(151)	(155)
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends strengthening and clarifying provider enrollment, reenrollment, revalidation, and background studies requirements for Medical Assistance providers to support implementation of federal provider screening requirements, to improve the ability to identify and address potential waste and to improve the efficiency of the screening and enrollment process.

Rationale/Background:

DHS has authority to impose sanctions, payment withholds, suspensions or terminations when a provider is non-compliant with specific requirements. However, it's unclear if this ability applies to issues that arise during enrollment or reenrollment. This limits the Department's ability to take action.

Strengthen PCA Provider Requirements and Revalidation Processes

Personal Care Assistance (PCA) agencies are required to have bonds and insurances as a condition of participation in the PCA program. This includes a surety bond that ensures a benefit to the State of Minnesota if the provider fails to comply with program rules. However, not all providers maintain bonds and insurances on a continued basis.

In addition, DHS must currently perform a review of PCA agencies once every year, known as the "annual review", and must complete a full revalidation for providers at least once every five years. The annual review provision requires PCA agencies to respond to annual review requests within 30 days. Agencies that fail to respond in that time period are subject to suspension or termination of enrollment. Experience shows that few agencies are able to respond within 30 days and suspension or terminations result in interruptions to service authorizations, which creates conflict for recipients. Further, annual review is no longer necessary because the provider screening requirements of the Affordable Care Act (ACA) require more stringent screening processes.

Electronic Communication of Screening and Enrollment Actions

Currently, DHS is required to provide notice via certified mail for provider screening and enrollment actions. Communicating the same information both electronically and by mail is a duplicative and inefficient process that does not serve DHS or the provider and often leads to confusion.

Background Studies

Historically, it was very easy for "high risk" providers to submit paperwork, become enrolled, and start billing without having any employed qualified staff, or the capacity to operate a legitimate business. However, under updated federal provider screening regulations, states are required to conduct fingerprint-based criminal history record checks through the FBI on owners and managerial officials of providers that have been categorized, either

by federal Centers for Medicare and Medicaid Services (CMS) or by a state, as “high risk” for fraud, waste or abuse.

High risk providers with owners and managerial officials who have been convicted of a crime related to their involvement in Medicare, Medicaid, or CHIP within the previous 10 years are ineligible to enroll as a provider in Medicaid. While authority already exists in federal regulation to conduct the fingerprint-based criminal background checks through the FBI, state law has not been updated. Additionally, the “fitness criteria” – or what defines a crime related to involvement in federal health care programs –are not adequately defined in federal regulation.

Proposal:

This proposal makes the following updates and clarifications to provider enrollment, reenrollment, revalidation, and background studies requirements:

Strengthen Enforcement of Federal Law

Federal law requires DHS to screen all Medical Assistance providers during initial enrollment, reenrollments, as well as during revalidation. This proposal would clarify the activities performed during the screening of providers and standardize the timelines for providers to comply as well as the frequency of ongoing screenings. These changes are technical updates to support implementation of the federal screening requirements and to provide clarity to providers and a more consistent experience across service lines.

DHS currently has the authority to impose payment withholds, fines, suspensions, or terminations when a provider is non-compliant with specific requirements of being an enrolled provider. However, Minnesota law is unclear if this ability applies to issues that arise during enrollment or reenrollment. This limits DHS’ ability to take action. This proposal adds clear legislative authority for the Provider Enrollment area to collect or stop the payment of Medicaid funds when a provider is found to have been non-compliant with enrolment, reenrollment or revalidation requirements. This change will allow DHS to take action when issues are first identified during the enrollment process.

Strengthen PCA Provider Requirements and Revalidation Processes

This proposal requires PCA agencies to maintain bonds and insurances for each practice location and adds clear statutory authority to deny payments during times of non-compliance or to suspend and terminate providers who display patterns of noncompliance with the bond and insurance requirements. These changes are intended to give DHS clearer authority to both stop a provider’s ability to receive payment when a bond and insurance has lapsed, to recapture money paid during times required bonds and insurances were or are not in force, as well as terminate enrollment for habitual offenders.

This proposal also updates the PCA review and revalidation process to require revalidation every three years and eliminates the annual review process. This proposal will also require PCA provider agencies to submit a written record of grievances and resolution of the grievances that the personal care assistance provider agency has received to DHS upon request. Grievances are currently part of the annual review process and this would allow DHS to continue to review grievances more frequently, as issues arise, without waiting for the next revalidation. It will also allow for more frequent in-depth reviews of provider agencies. This will increase work in DHS’ provider enrollment area. DHS currently collects a fee in the amount of \$569 per provider for enrollment and reenrollment or revalidation from certain provider types. The amount is set by CMS, and deposits are dedicated to DHS to pay for screening and enrollment activities.

Electronic Communication of Screening and Enrollment Actions

This proposal clarifies that DHS has the authority to electronically communicate actions related to screening and enrollment, as is current practice, and would eliminate the requirement to also send notice by mail, unless a provider does not have a MN-ITS account. MN-ITS is the electronic communications system DHS uses to communicate with providers.

Background Studies

This proposal clarifies that background checks will be conducted under the provisions in Minnesota law under Chapter 245C and provides the authority for DHS to submit fingerprints to the FBI for the national record check. This proposal will result in additional background studies which, because they include an FBI check, will include offenses in other states. Including a national record check through the FBI in the background study will provide the state a more complete criminal history on providers seeking to enroll as a provider in Minnesota Health Care Programs which have been designated as a high-risk to commit fraud, waste and abuse.

Ultimately this proposal will limit the risk of harm to which Minnesotans participating in DHS program services are exposed by ensuring providers with disqualifying criminal histories are not able to enroll as providers. The expanded background checks prevent these fraudulent providers from even starting operations or billing DHS. Additionally, this proposal brings Minnesota into compliance with Federal Regulation under Title 42, Part 455, Subpart E, Section 455.434.

This proposal also clarifies the fitness criteria by leveraging the NetStudy 2.0 process. It uses the disqualification criteria in Chapter 245C as the fitness criteria for enrollment as a provider in Minnesota Health Care Programs.

Equity and Inclusion:

Providers impacted by this proposal represent a broad and diverse group who serve a broad and diverse group of vulnerable citizens. The increased screening of these providers will help to assure more thorough vetting of high-risk providers who are ultimately approved to provide services to some of Minnesota's most vulnerable citizens.

IT Related Proposals:

The provider enrollment aspects of this proposal have no impact on DHS IT systems. The background studies portion of this proposal requires updates to the DHS background study system.

Results:

These changes are intended to result in increased program integrity, allow the department to establish a baseline measurement for compliance over time, implement additional process improvements upon identifying trends and areas of potential fraud waste and abuse, utilize current infrastructure already in place and streamline processes already known and used by the provider population. The increased screening of high-risk providers will assure more thorough vetting of those who are providing services to some of Minnesota's most vulnerable citizens.

FTEs	0	0	0	0

Recommendation:

The Governor recommends aligning incentive payments to organizations that help people enroll in health care coverage so that payments are consistent regardless of the type of health care coverage the person is eligible for.

Rationale/Background:

Currently, entities providing application assistance receive an incentive payment when they successfully enroll an individual in Medical Assistance, MinnesotaCare, or a Qualified Health Plans (QHP). Under current state law, organizations receive a \$25 payment for people who successfully enroll in Medical Assistance and \$70 for people who successfully enroll people in MinnesotaCare or a QHP.

In FY 2018, approximately 600 navigators across the state of Minnesota provided application and renewal assistance to about 61,137 Medical Assistance and MinnesotaCare enrollees. The disparities between these two incentive payments unfairly impact organizations assisting people to enroll in Medical Assistnace.

Proposal:

This proposal reallocates existing DHS administrative funds, from a Special Revenue Fund with a balance of \$2.3 million, to increase the incentive payments from \$25 to \$70 per application for organizations providing application assistance for Medical Assistance. This would align the payment structure to provide consistent incentive payments for successful enrollment in Medical Assistance and MinnesotaCare. This proposal reallocates existing funds within the DHS administrative budget.

Equity and Inclusion:

Equalizing this payment amount will fairly pay organizations to reach out to and assist all populations of uninsured people in Minnesota, and is intended to improve access to affordable care and reduce the percentage of Minnesotans lacking health insurance.

IT Related Proposals:

This proposal does not impact DHS IT systems.

FY 2020-21 Biennial Budget Change Item

Change Item Title: Rebasing Inpatient Hospital Payment Rates

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	22	4	4	4
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	22	4	4	4
FTEs	0	0	0	0

Recommendation:

The Governor recommends several updates to the process of rebasing of inpatient hospital payment rates under Medical Assistance, which is required every two years. This proposal helps to better align inpatient hospital payments, streamline the payment, simplify the system and rates for hospitals, and extend the commissioner's authority to use policy adjusters when developing inpatient hospital rates. It also allows Hennepin County Medical Center (HCMC) to maintain its level of payments associated with disproportionate share hospital (DSH), preventing an unintended loss of about \$5 million or 40 percent of their current DSH payments.

This proposal is effective for hospital discharges that are on or after July 1, 2019.

Rationale/Background:

Section 256.969 Minnesota Statutes requires DHS to rebase inpatient hospital rates every two years. Rebasing is the process used to recalculate payment rates using more current cost data. The next rebasing is due to be implemented July 1, 2019 for Prospective Payment System (PPS), Critical Access (CAH) and Long Term Acute Care (LTAC) hospitals. This will be the third rebasing of the rates since the new methodology was first implemented in November 2014.

Proposal:

This proposal addresses an unintended consequence of current law that would reduce payments to Hennepin County Medical Center (HCMC) by about \$5 million. HCMC currently qualifies for the disproportionate share hospital (DSH) factor applied to hospitals that have a very high Medicaid Inpatient Utilization Rate for rebasing. The qualifying threshold of three standard deviations above the statewide mean is specified in statute. Based on utilization data, HCMC will not meet the three standard deviation threshold in this rebasing. This would cause a significant reduction to payments made to a safety net hospital that serves a considerably higher proportion of Medicaid patients than any other hospital in the state. However, if the threshold were lowered to 2.5 standard deviations, HCMC would qualify and would still be the only hospital that would qualify. This allows HCMC to maintain its level of payments associated with DSH.

This proposal extends the commissioner's authority to use policy adjusters when developing inpatient hospital rates. DHS' authority to use policy adjusters expires after this rebasing. The authority was included in the establishing legislation with a sunset date because hospitals were unsure how DHS would use the policy adjusters. We have now been through two rebasings and are in the midst of the third and we have had no complaints about our use of the policy adjusters from advocates or hospitals. Moreover, policy adjusters are essential to setting

accurate payment rates, particularly to ensure that mental health, births, and other services important to the Medicaid population are supported and accessible throughout the state.

This proposal includes a per claim charge limit on inpatient payments so that DHS would not pay more than a hospital bills for that claim. The statute currently imposes a payment limit of aggregate charges, however, limiting a claim payment to 100 percent of billed charges is a standard payer rule and applies to most other provider types. This will align inpatient hospital payments to the same standard applied to other services and a general best practice which is to pay either the payment rate as established under the inpatient payment methodology or the providers total billed charges, whichever is lower.

This proposal incorporates the current \$20 add-on for a screening into the base payment rates for birth stays rather than paid as a separate add-on. This will streamline the payment methodology, as well as simplify the system and reconciliation of claims payment for hospitals.

IT Related Proposals:

This proposal requires systems changes.

Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	1,363	748	1,080
FTEs	0	1	1	1

Recommendation:

Effective January 1, 2021, the Governor recommends modernizing the payment methodology for Federally Qualified Health Centers (FQHC) and Rural Health Clinics (RHC) in order to accurately account for and cover the cost of all Medical Assistance (MA) services and reduce administrative burden for both providers and payers.

This proposed change has a health care access fund cost of \$1,363,000 in the 2020-21 biennium and \$1,828 million in the 2021-2022 biennium.

Rationale/Background:

FQHCs and RHCs are nonprofit community health care providers. They are located in communities identified as having elevated poverty, higher than average infant mortality, and access to fewer practicing physicians. These centers are open to all residents regardless of insurance status or ability to pay and play a critical role as part of the safety net provider community that primarily serve enrollees on state Medicaid programs. FQHCs and RHCs tailor services to fit the special needs and priorities of their communities and provide services in a linguistically and culturally appropriate manner. There are currently 76 FQHC and 110 RHC delivery sites in Minnesota. FQHCs and RHCs served 175,000 recipients in 2014. This proposal also aligns payment rate methods under the state's basic health program (BHP), MinnesotaCare, simplifying rate development and establishing uniform payment structure and administration within that program. Making these adjustments helps to keep cost sharing down for MinnesotaCare enrollees.

Federal law requires state Medicaid programs to pay FQHC and RHC providers using a prospective payment system (PPS) cost-based rate methodology, which is based on 1999 and 2000 costs/visits and then adjusted for inflation. The basis of a prospective payment is to make a single payment per day to a clinic on any day where there is a face to face encounter involving services. A prospective payment in effect divides the allowable costs of a clinic by the expected number of qualifying encounters to establish the encounter rate. This prospective encounter rate structure provides clinics with a level of stability and predictability with respect to their payments. The prospective encounter rate payment applies to services delivered to MA enrollees in both fee-for-service and managed care delivery systems.

States also have the option to offer alternative payment methodologies (APMs) in place of PPS as long as they pay at least what the center or clinic would receive under PPS. Under current law, Minnesota has three different APMs. DHS is required each year to ensure the APM payments to each provider are equal to or greater than the payments the provider would have received under the PPS methodology. The current APMs, because they generally build off of the original PPS rate, are based on very old costs and apply historical restrictions established

by Medicare that can reduce the per encounter payment rate. The historical costs and calculated rates are trended forward annually for inflation. However, costs within FQHCs and RHCs have changed dramatically since the PPS was originally established.

DHS and FQHC and RHC providers agree the current methodologies do not adequately reflect current health care cost trends and results in payment rates that may not accurately reflect a clinic's costs. This causes financial hardship to these provider groups. The current payment system also presents significant operational challenges for providers and DHS. The encounter payments, particularly those for services delivered to managed care enrollees, have been administratively challenging for both DHS and the clinics.

The 2015 Legislature requested recommendations for a new APM for FQHCs and RHCs that cover the cost of all MA services. DHS, in collaboration with FQHC and RHC providers, developed a report which details the recommendations for a new APM rate structure which could be adopted upon enabling legislation.

Proposal:

This proposal replaces the three existing APM options with a single new APM designed to cover the cost of all MA encounter generating services. This new payment methodology will bring greater transparency to the actual costs of and payments made for services provided by FQHC and RHC clinics, modernize and clarify the processes for establishing and updating rates, and promote greater efficiency and accountability for both DHS and providers.

The new rate methodology established by this proposal reflects current health care costs and trends and accounts for increases in the average length of a visit due to more complex care management models. It will allow providers to more easily calculate potential rate changes that result from changes in service and will encourage providers to expand services. In addition, a workgroup will be formed to discuss future performance measurements and reasonable cost containment measures.

The proposal also ends the payment of cost based rates to FQHC, RHC, and Indian Health Service (IHS) providers for MinnesotaCare starting in 2021. The federal requirement to pay cost based rates applies to Medicaid programs and does not apply to MinnesotaCare since its transition from a Medicaid waiver program to a federal BHP in 2015. Under the federal funding mechanism of the BHP the state receives a fixed payment amount per person instead of a federal Medicaid match. This transition aligns the payment method with the federal funding mechanism of the BHP, aligns payment rates across all populations in MinnesotaCare, and prevents the implementation of the new APM (and other cost based rates) from increasing cost sharing for MinnesotaCare enrollees. The MinnesotaCare program's 94% actuarial value requires enrollees to pay 6 percent of costs of services under the program. Cost sharing for MinnesotaCare is reviewed and adjusted annually.

The new FQHC/RHC rate methodology for Medical Assistance will be effective for services provided on and after January 1, 2021 and will be rebased every two years beginning in January 2022.

Equity and Inclusion:

Minnesota is among the healthiest states in the nation and enjoys relatively high rates of health insurance coverage. However, when compared with white people in Minnesota, people of color and American Indians residing in the state experience significant disparities in health status and in rates of health insurance coverage. While the majority recipients enrolled in Medical Assistance are white, people of color, especially African Americans and American Indians make up a disproportionate share of total program enrollment. Over 60 percent of African Americans and American Indians residing in the state were enrolled in public health care programs in July 2014. In 2015, Minnesota boasted the fifth lowest rate of un-insurance in the country at 4.3 percent. However, the rates of un-insurance for African Americans and American Indians residing in the state was roughly double the statewide average, and the rate for Hispanics was about three times the state average. Because Minnesota's health care programs play a significant role in providing health care coverage to racial and ethnic

minority populations in the state, DHS has the opportunity to play a larger role in reducing health disparities in the state.

On average, 62 percent of the people served by FQHCs and RHCs are from communities of color. They provide quality care, reduce disparities and improve patient outcomes. The Institute of Medicine and the Government Accountability Office have recognized health centers as models for screening, diagnosing, and managing chronic conditions such as diabetes, cardiovascular disease, asthma, depression, cancer and HIV. Their efforts have led to improved health outcomes and lowered the cost of treating patients with chronic illness. (<http://nachc.org/wp-content/uploads/2016/03/MN16.pdf>)

The proposed modernization and simplification of the payment rate methodology ensures these organizations are paid their costs for treating this diverse and often medically complex population while continuing to provide high quality, cost effective care and improving health outcomes.

IT Related Proposals:

Recent legislative action permitting DHS to carve these provider payments out of managed care and back in to fee-for-service established much of the PPS logic in to the claims payment systems. With this work already completed, the new rate methodology detailed in this proposal will require only minor changes to DHS claims payment systems. The cost of making these changes is included in the fiscal detail section.

FY 2020-21 Biennial Budget Change Item

Change Item Title: Child Care Federal Compliance and Fees for Certified License-Exempt Centers

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	(72)	(73)	(73)	(74)
Revenues	0	0	0	0
Other Funds				
Expenditures	84	75	75	76
Revenues	(72)	(73)	(73)	(73)
Net Fiscal Impact = (Expenditures – Revenues)	(60)	(71)	(71)	(72)
FTEs	0	0	0	0

Recommendation:

The Governor recommends implementing an administrative fee to support regulatory activities for certified license-exempt child care centers (certified centers). The certified centers would pay a \$200 initial application fee and a \$100 annual renewal fee. Revenues from the new fee would refinance the General Fund appropriation needed for this activity. The Governor also recommends several changes to the regulations affecting certified centers, some of which are required to achieve compliance the Federal Child Care and Development Block Grant Reauthorization Act of 2014.

Rationale/Background:

Minnesota Statutes 245H.12 requires the Commissioner of Human Services to provide recommendations on administrative fees for Certified License-Exempt Child Care Centers (certified centers) to the legislative committees with jurisdiction over health and human services policy and finance by February 15, 2019. The statute requires the Commissioner to consult with stakeholders in the development of the administrative fee recommendation.

The proposed \$200 initial application fee and \$100 renewal fee are reasonable, especially when compared to the fees for licensed Child Care Centers which pay a \$500 application fee and between \$200 and \$1,100 in renewal fees, based upon the center's capacity.

Certified centers are a new service class for the Department – one that has been added to comply with federal law. Many of these centers have operated for years without oversight from the Licensing Division, because they were legally exempt from licensure. Under federal law, these centers are required to have some oversight by the Department, and thus the certification was added to Minnesota law in 2017 and the Department began certifying centers in the fall of 2018.

The requirements to be a certified center are significantly less than the requirements to be a licensed child care center, resulting in shorter, simpler applications and inspections. As such, the Department has fewer staff dedicated to the regulation of certified centers, and these staff are in lower job classifications than the staff hired to regulate the licensed child care centers. The Department's certified center staff conduct initial and renewal application reviews, inspect the certified centers, and conduct investigations of possible certification requirement violations. Staff in the Department's Licensing Division Intake and Maltreatment Investigation section triage calls with complaints against certified centers and investigate any allegations of maltreatment.

As the Department has begun to certify centers, gaps in the statute have become evident. The Department lacks the authority to issue variances for background study disqualifications for certified center staff as it has for

licensed child care center staff. The current statute also fails to provide certified centers with any due process rights in the case that their application for certification is denied.

In addition, there are a few additional changes to statute needed to fully comply with the Federal Child Care and Development Block Grant Reauthorization Act of 2014 – for certified centers as well as for licensed family child care and licensed child care centers. These gaps have only become evident as the federal Office of Child Care has finalized its rules and begun reviewing states' statutes to ensure compliance.

In accordance with state statute, the Department consulted with stakeholders as it developed its fee proposal and it has been well received. The vast majority of staff from certified centers with whom we have spoken appreciate that the proposal recognizes the differences between certified centers and licensed centers and provides certified centers with lower fees and more flexibility in meeting requirements than typically provided to licensed child care centers. Nevertheless, a few of the smallest certified centers that have very few children who participate in CCAP raised concerns about being required to pay any fee, especially when combined with the cost of paying for background studies for any new staff they hire.

Proposal:

This proposal recommends that certified centers pay a \$200 initial application fee and a \$100 annual renewal fee, which generates approximately \$140,000 in State Government Special Revenue per biennium. This proposal would appropriate this SGSR revenue to the Department for this activity and reduce the General Fund appropriation for this activity by an equal amount.

In addition, the proposal brings certified centers into compliance with federal law by requiring all staff and unsupervised volunteers to have health and safety trainings, including pediatric First Aid and CPR, before having unsupervised direct contact with children. It establishes a process for centers newly applying for certification to obtain inspections by the Fire Marshal, using the same process and \$50 fee in place for licensed child care centers. (As part of the transition to legally unlicensed centers becoming certified, the Department has covered the fees for fire inspections.)

Other provisions for certified centers are included to meet federal requirements: including prohibiting certain kinds of corporal punishment and ensuring that certified centers have analyzed the risks presented by known hazards.

The proposal allows the Department to grant variances to certified center staff for background study disqualifications that mirrors the Department's authority for child care center staff.

This proposal also establishes due process rights for certified centers in the instance that an applicant is denied certification or the center loses certification due to maltreatment. While a center can continue to operate without certification, the center cannot participate in Minnesota's Child Care Assistance Program and receive child care assistance payments.

The proposal includes two new health and safety requirements that the state should establish for certified centers: (1) that they supervise the children in their care and (2) that they use positive behavior guidance. Adding this language is not expected to be burdensome for providers, because allows for significant flexibility; adding the language will simply give the Department clear authority to hold providers accountable in cases that they fail to meet these minimum expectations.

In addition, the proposal includes changes to statute for license providers required for the State to fully comply with the Federal Child Care and Development Block Grant Reauthorization Act. Over the last year, the federal administration has clarified that many of the training requirements apply more broadly than the Department initially understood. As such, this proposal requires all staff, caregivers, substitutes, emergency substitutes, and unsupervised volunteers to take health and safety trainings, including pediatric CPR and First Aid, before having unsupervised contact with children and on an ongoing basis. It also requires all these individuals and helpers to

take courses in child development on a regular basis. The proposal also adds an item to the current requirements for a provider's emergency plan that has also been identified as needed to comply with federal law.

In addition to items required for federal compliance,

For Licensed Family Child Care Providers, this proposal:

- Eliminates confusion by aligning family child care standards with the current State Fire Code
- Provides more flexibility in use of substitutes, by measuring use in terms of hours instead of whole days, and allowing a variance in cases in which more time is needed
- Clarifies that cell phones can be used to meet the requirement to have a working telephone, as long as it remains charged, and override the requirement that emergency numbers have to be posted by the phone
- Reduces county liability to remove a barrier to counties providing variances to licensed family child care providers, as another step towards increasing consistency
- Reorganizes and consolidates training requirements to add clarity

For Licensed Child Care Centers, this proposal:

- Restructures training requirements for staff, conforming with federal law and bringing the number of hours more into alignment with other states
- Allows more flexibility in supervising school-age children,
- Allows the use of reusable water bottles and cups for water under certain conditions (instead of requiring the use of single-use cups)
- Allows more flexibility in who can transport children
- Clarifies the circumstances under which a cell phone can be used as the child care center's primary telephone and removes the requirement that emergency numbers be posted

In addition, this proposal includes a provision to expand access now:

- Allows for the expansion of Special Family Child Care already in statute, by clarifying standards for and broadening who is eligible to provide this type of licensed child care

This proposal would generate the following fee revenue:

Fiscal Year	Initials	Revenue	Renewals	Revenue	Total
2019	700	\$0	0	\$0	\$0
2020	10	\$2,000	695	\$69,500	\$71,500
2021	10	\$2,000	700	\$70,000	\$72,000
2022	10	\$2,000	705	\$70,500	\$72,500
2023	10	\$2,000	710	\$71,000	\$73,000
2024	10	\$2,000	715	\$71,500	\$73,500

This revenue would be appropriated to the Department for this activity, and the General Fund appropriation for this activity would be reduced by an equal amount, after accounting for a small modification to an IT system required to track this new fee.

Equity and Inclusion:

The proposed fee is low enough so that it should not pose an undue financial burden for the vast majority of the certified child care centers. Several of the policy changes will further equity and inclusion, by providing the Department with the authority to grant variances for offenses that could be disqualifying and otherwise prevent staff from serving children, even when safeguards can be put in place to ensure that children are protected. In addition, the few ways in which the proposal increases health and safety standards will benefit children that attend certified, license-exempt child care centers.

The additional flexibility for Special Family Child Care is likely to provide additional options for licensed child care in communities of color and indigenous communities and therefore benefit these communities.

Aligning the standards for licensed family child care providers with the current Fire Code may help prospective family child care providers obtain licenses, because they will not be required to ensure that their homes are in compliance with a standard that is higher than otherwise required by the Fire Code.

IT Related Proposals:

The Licensing Division uses the Electronic Licensing Management System (ELMS) database, a web-based licensing system, to manage the application, onboarding, licensure, and certification process for some of the service classes. The Department needs IT to increase ELMS database capability to process, manage and track license-exempt centers. Therefore, this request includes that the Department to be adequately funded for IT system costs in order to ensure license-exempt centers are able to access licensing web-based application system for certification. Additionally, the Licensing Division certification staff will be equipped to support, guide and manage license-exempt centers during the certification process.

The total estimated IT costs include initial system changes cost of \$12,000 in FY 2020, and annual maintenance costs of \$2,000 in subsequent fiscal years after system implementation phase is complete.

Results:

This proposal will generate revenue to cover part, but not all, of the Department's administrative costs for the Certified Centers regulatory program. General Fund dollars will subsidize this activity, as is the case with the Department's other service classes.

Change Item Title: Prohibition on Imputation of Income to Incarcerated Child Support Payers

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	5	1	1	1
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	5	1	1	1
FTEs	0	0	0	0

Recommendation:

The Governor recommends prohibiting the imputation of income to child support payers who are incarcerated due to nonpayment of child support in order to achieve federal compliance. Programming changes to the state's automated child support system (PRISM) are required to implement this change.

Rationale/Background:

When calculating child support, the court may impute income to either or both parents. Imputed income is income that a parent does not actually receive, but that a court finds the parent could earn. To address whether it is appropriate to impute, a court must decide whether the parent is voluntarily unemployed or underemployed. Because incarceration is not voluntary, since 2007 Minnesota law has specified that an incarcerated person must not be considered voluntarily unemployed for purposes of determining child support. However, state law includes an exception to this prohibition for cases when a child support payer is incarcerated due to nonpayment of support.

Unlike Minnesota, other states have considered incarceration for any reason to be “voluntary” unemployment and have imputed income to incarcerated parents when setting child support orders. This often resulted in the accrual of high arrears balances during incarceration, and the inability of the parent to pay that balance upon reentry. To address this issue, the federal government released an update to federal rules in 2016 that barred this practice. Though Minnesota’s law already substantially complies with this new rule, the federal Office of Child Support Enforcement has indicated that because of the statutory exception, the Minnesota State Plan will be considered non-compliant unless there is a statutory change. The deadline for Minnesota to comply was December 2019.

There are no data regarding the frequency and length of incarceration for nonpayment of child support in Minnesota. However, because of the resources involved and the harshness of the remedy, incarcerating payers through a contempt proceeding is a last resort, and child support workers report that incarceration for nonpayment is rare. Additionally, because the processes for setting or modifying child support take time, a payer would need to be incarcerated for a significant amount of time for this provision to be relevant. Accordingly, it is very unlikely that a child support order imputing income to the payer would be set during an incarceration for nonpayment.

Proposal:

Effective upon enactment, this proposal would prohibit the imputation of income to child support payers who are incarcerated due to nonpayment of child support, bringing the state into full federal compliance on this issue. This

proposal will not change the amount of support owed by payers or collected for child support recipients or the state (for public assistance reimbursements) given the unlikelihood of a child support payer having income imputed while incarcerated for nonpayment of support.

The entire cost of this proposal is due to necessary programming changes to ensure relevant PRISM forms and pleadings generated for court proceedings to set and modify child support reflect the statutory change. While changes to PRISM will take time, implementation can occur upon enactment. The department will issue implementation guidance to our county partners and workers will need to manually alter pleadings and court forms to reflect the new law until PRISM changes have been completed. The department has consulted our county partners on this proposal and have not received any concerns.

Equity and Inclusion:

This proposal is not intended to address equity and inclusion issues. It is unlikely this proposal will make a change to current practice, this proposal is unlikely to have any impact on equity and inclusion issues.

IT Related Proposals:

This proposal requires MN.IT to change PRISM generated forms. The entire cost is \$13,902, with a state share of \$4,727, for these changes to be made to PRISM. A total of \$2,782, with a state share of \$946, is also needed for ongoing MN.IT administration costs to complete and maintain updates to PRISM forms that reference the exception.

Results:

Because very few people are incarcerated for nonpayment of child support, and any potential incarceration would be briefer in time than it would take to obtain an order for support that imputes income, it is not anticipated to have a noticeable impact on caseload, performance measures or child support payers. Rather, it will bring Minnesota into federal compliance with the new rules.

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Homelessness Management Information System Support

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	680	680	680	680
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	680	680	680	680
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$680,000 annually to the Department of Human Services, in partnership with Minnesota Housing, to support the ongoing cost of the Homelessness Management Information System, a local information technology system that is required to receive state and federal homelessness resources.

Rationale/Background:

HMIS is a local information technology system operated by the Department of Human Services and used to collect data, both at the client-level and community level. The HMIS collects information from all homeless service providers throughout the state, regarding more than 20,000 homeless beds across the state. These beds include emergency shelters, transitional housing programs, permanent supportive housing providers, homeless prevention programs, and other service providers in contact with people experiencing homelessness, such as outreach programs and drop-in centers.

Data reported within the HMIS includes individual client demographic (gender, age, ethnicity) and household information (housing status, services provided, income). Centralizing data in one place allows service providers, regional planning bodies and state agencies to look at both client outcomes at the program level and evaluate service-use patterns across the entire network of providers to ensure that all resources are being invested in the most efficient services and targeted to the most appropriate populations. It provides a clearer picture of people who experience homelessness, their needs, and how that population changes over time. HMIS allows programs to manage data in a secure and standardized environment that also offers an aggregate view of state-wide efforts to end homelessness.

The state is required to maintain the HMIS system to receive federal homelessness funding. The state receives more than \$40 million per year in federal homelessness funds. Additionally, all service providers that receive state homelessness resources are required to use the system.

Proposal:

The additional funding will pay for a portion of the costs of operating the state Homeless Management Information System (HMIS) by the Department of Human Services. It will support integration of data between HMIS and other key state data assets and enhance existing HMIS capacity to help providers target state and federal homelessness resources more strategically. Currently, HMIS is supported by local Continuum of Care organizations, federal grantees and service providers.

Equity and Inclusion:

Households of color and people with disabilities are disproportionately represented in the homeless population. Equity remains an area of focus for the HMIS Governing Board as HMIS is being used to support regional Equity and Inclusion projects such as Supporting Partnerships for Anti-Racist Communities (SPARC) which disaggregates data to focus on systemic racism in homelessness response systems.

Results:

We know from many [examples across the country](#) that when communities use their data well, they make the most progress to prevent and end homelessness. With this additional funding, Minnesota will be positioned to target resources to prevent and end homelessness even more effectively and efficiently.

Current measures include:

- Bed Coverage
- Data Quality, specifically universal data element completeness
- HUD performance measures:
 - Length of time homeless
 - Returns to homeless
 - Number of homeless persons
 - Job and income growth
 - First time homeless
 - Stabilizing people experiencing homelessness
 - Housing placement and retention

The above result and performance measurements reflect key data points that the state and federal government use as indicators of success when making funding decisions. The ability to enter, extract and analyze HMIS data, and use it as evidence to either continue making investments in effective programming or to shift resources to better target both populations and activities is vital. Underperformance in this area puts the federal funding (more than \$40 million) at risk.

State staff, community partners and the HMIS system administrator have developed a [governing infrastructure](#) to ensure data is protected and all security measure meet and/or exceed requirements. This governing body and committee structure are also charged to ensure data quality and integrity, which is regularly reviewed and reported to the governing board.

Furthermore, philanthropic partners recently announced an investment in a data analyst position at Minnesota Housing and the Office to Prevent and End Homelessness to work with HMIS and other data systems to focus and drive statewide efforts to prevent and end homelessness.

FTEs	38	38	30	30

Recommendation:

The Governor recommends appropriations from the general fund and state government special revenue fund for the Minnesota Department of Health and the Department of Human Services to continue necessary current operations improvements to the regulatory activities, systems, analysis, reporting and communications that contribute to the health, safety, care quality, and abuse prevention for vulnerable adults in Minnesota.

Rationale/Background:

Two sets of recommendations were released in early 2018, one from the Office of the Legislative Auditor and one from Governor Dayton's Elder Abuse Prevention workgroup, on how specific programs within the Health Regulation Division (HRD) should implement new systems, staffing, processes and reporting practices that would contribute to the health, safety, and quality assurance of care at healthcare facilities for vulnerable adults.

The recommendations identified and addressed concerns over the rise in maltreatment allegations in Minnesota; the inability of certain programs at MDH to meet statutory requirements; outdated processes and IT systems; and inadequate staffing and funding to ensure timely notifications in addition to the analysis, reporting and communications activities that support stronger public transparency, accountability and engagement.

Proposal:

This proposal takes a comprehensive, division-wide approach to vulnerable adult health, safety, care quality and abuse prevention and focuses on four components: regulatory capacity, case management, data analysis and reporting, and communications and engagement.

The request drives more efficient management of existing financial resources and increases the capacity of subject matter experts within MDH and partner agencies to implement needed changes. It identifies opportunities for cross-agency systems partnership and builds on existing IT systems and data reporting to inform enhancements. This proposal stabilizes necessary funding for program activities and IT systems that respond to stakeholder service expectations and regulatory requirements. It also creates a new business intelligence capacity that supports robust cross-agency data analysis, reporting, and stakeholder communications that vulnerable

adults and their families demand and the Office of Legislative Auditor recommended. Additional request details are described below:

1. **Regulatory capacity** – Funding increases and program improvements are needed to better meet state and federal statutory requirements. This component includes needed funding for licensing, certification, investigations and inspections.
 - a. **State and federal regulatory work requirements**, including increased complaints activity. Federal cost participation in MDH regulatory work varies according to the type of work and the type of facility, and is based on standards and guidance set by the Centers for Medicare and Medicaid Services (CMS). CMS reimbursement requires a financial match from state funds to equitably share costs. This proposal will increase available general fund resources for the required state match for Health Care Facility Licensing and Certification work by \$3 million each year, beginning in FY 2020. Of the \$3 million annual request, \$2.4 million per year is for state licensing activities, and \$0.6 million per year is for the required state match for Medicaid-funded work.

Current funding for the state share is inadequate to meet the demands of our regulatory work. The number of federal complaints, especially from nursing homes, has been increasing in recent years along with the increasing number of residents in such facilities. This growth has increased the workload and the need for state matching funds. Over the past year, revisions to current cost sharing agreements with CMS were made to correctly account for state work and state financial share requirements. As a result, both the proportion of state costs and the volume of work for the state have increased, but the allocations used to pay the state financial match have not kept pace. Without a corresponding increase in allocations, Minnesota will not be able to fully meet state and federal requirements for health care facility licensing and certification work; the allocation shortfall is a constraint to accomplishing the required workload.
 - b. **Home Care and Assisted Living Program survey activities**. This proposal increases the SGSR appropriation by \$1.1 million each year in the FY 2020-21 biennium for the Home Care and Assisted Living Program (HCALP) to add one additional survey team to improve the frequency of home care provider inspections. Current law requires that each provider be inspected once every three years. MDH is only able to meet this requirement with 30 percent of the providers. An additional survey team, along with Continuous Improvement efforts, will significantly improve our inspection rate. This funding increase can be accommodated within existing fee revenues; no fee increase would be necessary. This funding increase is only for the FY2020-21 biennium, based on the impact that the Governor’s Vulnerable Adult Regulatory Reforms proposal would have on the number of home care providers.
2. **Case Management** – HRD currently relies on a 15-year-old electronic system to manage our work around inspections, investigations, enforcement, time-reporting and federal reimbursement. This creates a significant operational and financial risk for the agency. Continued use of this legacy system perpetuates an inefficient, expensive and paper-based process and restricts the ability to innovate and gain critical efficiencies. The current system cannot store documents or manage workflow and is extremely limited in the ability to extract stored data. These limitations severely impact the ability of the Health Regulation Division to provide information to the public, analyze operations, coordinate state and federal activities, and forecast future needs.

Creating a modern, centralized framework for case management that integrates existing systems and technology would mitigate the risks posed by the legacy system and further support the continuous improvement activities underway to protect vulnerable adults. The framework will be based on DHS’s Social Services Information System (SSIS) for case management. It will integrate existing IT systems for electronic

licensing and document management, and incorporate a single entry point with the Minnesota Adult Abuse and Reporting Center (MAARC), the state's abuse allegation reporting system. The case management system will be aligned with a public reporting website where visitors can search, sort and compare information about providers.

- a. The new, integrated **MDH case management system** would be built in two phases over four years for a total estimated cost of \$ 6.5 million including MDH and DHS costs. The first biennium request (\$ 3.3 million for FY 2020-21) for the new case management system will include:
 - i. **Connection to DHS through SSIS for maltreatment investigation** case management
 - ii. **Implementation and integration of in-house IT systems** across the division for electronic licensing and document management, with the goal to leverage existing systems and minimize unnecessary redundancy
 - iii. **Development of a time-reporting module** to support federal reporting across multiple HRD programs
 - iv. **Access to data and new business intelligence** gathered through the adoption of SSIS and optimized workflows of programs responsible for prevention of abuse, neglect and maltreatment
 - v. **Evaluation of the functionality of the integrated systems**, including additional needed requirements and develop a plan for optimization in Phase 2 (\$2.8 million in FY 2022-23)
 - b. Creation of a **common landing page and functional enhancements for MAARC and nursing home self-reports** (\$250,000 for 2020-21 biennium, \$60,000 for the 2022-23 biennium). All reporters will start their required online reports through an updated drop-down menu on the MAARC landing page. The revised drop-down menu on the MAARC page will direct nursing home self-reports to the existing NHIR login page. This user-friendly approach will create a unified user experience with updated policy guidance, yet still ensure that required data elements and timelines are met. Improvements include more robust data collection and reporting through additional data elements and enhanced data transfer capabilities. This work will be done in collaboration with the Department of Human Services.
 - c. Building a **public reporting website** where visitors can search, sort and compare information about providers. \$1.6 million for 2020-21 biennium, \$0.5 million annual support and maintenance thereafter.
- 3. Data analysis and reporting** – Enhanced capacity to support timely notification of maltreatment complaints, respond to the growing number of complex data practices requests, and generate robust analysis and reports to drive continued improvement and public engagement. (4.75 FTEs, \$1.2 million for the FY2020-21 biennium)
- 4. Communications and engagement** – Dedicated resources to support work groups and committees, stakeholder engagement, and develop more effective online content and other materials for key audiences. (2 FTEs, \$0.4 million biennial request)

Grand Total	9,634	5,405	6,018	5,587

Equity and Inclusion:

This proposal addresses substantial needs within the Health Regulation Division for modernization and capacity building that directly affect the quality and safety of services and facilities for vulnerable adults across Minnesota. To the extent that facility quality and safety affect health disparities and access to care for underserved persons and communities, including racial and ethnic groups, LGBTQ persons and populations, veterans, persons with disabilities and chronic health concerns, or other underserved communities, this proposal supports access and quality health care for all Minnesotans. Additionally, the health department as part of its regulatory responsibilities, enforces federal and state law to ensure that facility residents are protected from discriminatory policies and practices that affect the ability of Minnesotans to receive health care.

IT Related Proposals:

This proposal makes \$5.9 million in information technology improvements and upgrades over the 2020-21 biennia. The projects relate to creating the case management framework and establishing a MAARC single entry point and other website improvements.

Department of Human Services

FY 2020-21 Biennial Budget Change Item

Change Item Title: Head Start Background Studies

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	51	8	8	8
Revenues	(51)	(8)	(8)	(8)
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends that statutory authority be given to the Minnesota Department of Human Services (DHS) to add Head Start programs that are license-exempt and not receiving Child Care Assistance Program (CCAP) funds and Tribal Head Start programs to the list of programs that can use DHS's background study system, which currently serves DHS licensed Head Start and other individuals working licensed early childhood programs. This brings these Head Start Programs into compliance with federal requirements.

Rationale/Background:

- Head Start programs must fully implement a new federally required background check process no later than September 30, 2019.
- DHS amended legislation two years ago to meet new Child Care Development Block grant background study requirements that will also meet the Head Start performance standards but some Head Start programs are not currently eligible to have access to the system.
- This proposal is built on analysis and collaboration between Minnesota Department of Education (MDE) and DHS. DHS provided the amended language for their background check system services. DHS welcomes the change and recognizes the improvements to the system and improvement in implementation of background checks for all Head Start programs.
- The background studies would increase revenues to DHS, but because the fees only cover the cost of doing the studies, the proposal is revenue neutral.

Proposal:

This proposal would provide DHS the statutory authority to add Head Start programs that are license-exempt and not receiving CCAP funds and Tribal Head Start programs to the list of program that can use DHS's background study system. Head Start programs often have a mix of locations that are licensed and licensed exempt within one Head Start grantee agency. If accepted, this legislative proposal will allow a Head Start grantee agency to use one background study process for all of their staff and locations.

This proposal would streamline administration of the background check process for all Head Start grantee agencies though access to the DHS background study system that is compliant with Head Start federal requirements for background studies. This will result in a reduction of paperwork, lessen hiring delays and strengthen the ability to move staff across Head Start sites when needed.

It is critical for federal compliance of the Head Start performance standards that this proposal be adopted in 2019. MDE's Head Start Collaboration Office continues to hear from programs that this proposal is a critical fix.

Equity and Inclusion:

This proposal supports Head Start programs that are license-exempt or tribally licensed serve children and families who live in poverty and American Indian children. As Head Start programs provide services to low-income families, this proposal will support low-income families by removing administrative barriers on providers that can stymie staffing classrooms.

Results:

Currently about 60 percent of Head Start programs do have access to the DHS background study system. This change will allow all Head Start programs to use the DHS background study system and meet federal Head Start performance standards.

Activity: Operations

AT A GLANCE

- Conducts more than 15,000 administrative appeals per year (CY 2017)
- Reviews and approves more than 6,000 contracts of different types and amendments per year
- Provides human resource management for about 7,140 state staff and about 4,100 county staff
- Resolves more than 100 requests for disability accommodations, investigates over 50 employment discrimination complaints, and resolves over 300 complaints relating to service delivery per year
- Sponsors development, accreditation, and engagement opportunities for all 7,140 DHS employees
- Promotes continuous improvement and accountability across the 11 essential human services in all 87 counties.
- Licenses approximately 21,000 service providers.
- Conducts more than 8,800 recipient and 700 provider fraud investigations resulting in over \$7.4 million and \$12.9 million in identified overpayments (CY2017) respectively. To the extent we can realize recoveries, they are returned to county state and federal funding sources.
- Receives 4,340 maltreatment and 3,774 licensing reports; investigates 737 maltreatment allegations and 1,227 licensing reports (FY2017).
- All funds spending for Operations activities for FY 2017 was \$101 million. This represents 0.6 percent of the Department of Human Services overall budget.

PURPOSE & CONTEXT

The Operations area within the Department of Human Services (DHS) serves external customers, internal staff, and ensures integrity in spending of public resources. To external customers, we license service providers and conduct background studies – key activities that keep Minnesotans safe and protect our most vulnerable citizens. We also provide appeals processes, tribal, county, and community relations, and communication resources.

To internal staff, we provide human resources services, financial management, legal services, technology planning and facilities management.

Finally, we work to ensure the prudent use of public dollars by investigating, preventing, and stopping fraudulent uses of state and federal money.

SERVICES PROVIDED

Our Compliance Office is responsible for legal and compliance activities throughout the agency:

- The **Appeals Division** conducts administrative fair hearings for applicants and recipients appealing the denial, reduction, sanction or termination of benefits in cash and food programs, health care programs, social services programs and residential programs. We also hold administrative hearings when a state or county agency has determined a person committed program fraud, maltreated a child or vulnerable adult, or believes a person should be disqualified from having access to or working with vulnerable populations in a program licensed by the department.
- The **Contracts, Purchasing and Legal Compliance Division** is the agency wide facilitator of DHS goods and services acquisitions including agency-wide asset management, commodities procurements, professional and technical services, and services delivered directly to program clients through grant contracts. The

Division provides legal analysis and advice regarding contract development and vendor and grantee management.

- The **Internal Audits Office** tests, analyzes, evaluates and maintains the overall internal control environment at DHS. The Office has of three primary functions: Internal Audits, Program Compliance and Audits, and the Digital Forensics Lab. Our staff conducts audits of DHS grantees, contractors, vendors, and counties.
- The **General Counsel's Office** provides legal advice, counsel, and direction for all of DHS' legal activities.
- The **Management and Policy Division** oversees prevention, providing counsel on ethics, risk management, business continuity, records management, agency internal administrative policies, Commissioner Delegations of Authority, and policy bulletins.

Our **External Relations Office** oversee and provides direction to communications and key stakeholder relation efforts across the agency.

- Our **Office of Indian Policy** helps implement and coordinate programs with Tribes and provides ongoing consultation for program development for the delivery of services to American Indians living both on and off reservations. This office promotes government-to-government relations, and works to enhance tribal infrastructure, reduce disparities, and design effective programs.
- Our **Communications Office** leads agency communications efforts. We respond to inquiries from the news media and prepare information that helps the general public understand the agency's services and human services policies.
- Our **Legislative Relations** area participates in all aspects of legislative session planning and activities. We serve as a resource to managers and staff regarding the legislative process, prepare information for lawmakers, budget recommendations and position statements, as well as monitoring, tracking and analyzing legislative bills.
- Our **Community Relations** area supports, develops, and facilitates relationships between DHS and the community.
- Our **County Relations** area takes a lead role in the agency's relationships with Minnesota's 87 counties. These counties administer most of the human services system that the agency oversees.

Our **Human Resources Division** provides human resources management services for 7,140 staff at the agency and for approximately 4,100 county human services employees. This division provides staffing, health, safety, compensation, job classification, labor relations, management consulting, benefits administration, workers compensation and employee assistance services to managers and employees. The division is also responsible for the agency's continuous improvements training and initiatives, and for recycling, facilities management, mail processing, security, information desk services, and vehicle management.

Our **Office for Equity, Performance, and Development** helps DHS to maintain and cultivate a diverse and inclusive workforce, ensures that DHS uses equitable practices in employment and service delivery, provides consultation on performance measurement and continuous improvement, data analytics, survey development, and strategic planning, and promotes employee development, learning, and engagement.

The **DHS Office of Inspector General** (<http://mn.gov/dhs/general-public/office-of-inspector-general/>) manages financial fraud and abuse investigations; licenses programs such as family child care, adult foster care, and mental health centers; and conducts background studies on people who apply to work in these settings:

- Our Licensing Division (<https://mn.gov/dhs/general-public/licensing/>) licenses residential and nonresidential programs for children and vulnerable adults to ensure that the programs meet the requirements and the law. These programs include child care centers, family child care (via counties), foster care, adoption agencies, and services for people with developmental disabilities, chemical dependency, and mental illness. Our staff also completes investigations of maltreatment of vulnerable adults and children receiving services licensed by DHS.

- Our Background Studies Division (<https://mn.gov/dhs/general-public/background-studies/>) annually conducts over 350,000 background studies on people working with children or vulnerable adults.
- Our Fraud Investigations Division (<http://mn.gov/dhs/general-public/office-of-inspector-general/fraud-investigations/index.jsp>) oversees fraud prevention and financial recovery efforts in health care, economic assistance, child care assistance, and food support programs.

Our **Office of the Chief Financial Officer** provides fiscal services and controls the financial transactions of the agency, including the Central Office and Direct Care and Treatment. Core functions include preparing budget information, paying agency obligations, providing federal fiscal reporting, conducting patient revenue generation and collections, administering the Parental Fee program, processing agency receipts and preparing employees' payroll. The Reports and Forecasts Division (<http://mn.gov/dhs/general-public/publications-forms-resources/reports/financial-reports-and-forecasts.jsp>) is responsible for meeting federal reporting requirements for economic assistance programs, Minnesota Health Care Programs, and the Supplemental Nutrition Assistance Program. Our staff provides forecasts of program caseloads and expenditures, provides fiscal analyses of proposed legislation affecting these programs, and responds to requests for statistical information on the programs.

The **Business Solutions Offices** works across the agency and with external stakeholders to partner with MNIT in providing technology systems that support the delivery of human services. Staff in this office develop the business architecture to support system design, serve as the business owners for enterprise applications, coordinate the submission of federal funding applications, align data strategies, work throughout the agency and with external stakeholders on business readiness efforts and implement governance oversight for information management and technology work of the agency.

RESULTS

Number of background studies completed annually: Individuals who provide direct contact services to clients

Number of Appeals processed and completed by fiscal year

Operations' legal authority is in several places in state law: M.S. chapter 245A (Human Services Licensing); chapter 245C (Human Services Background Studies) and sections 144.057, 144A.476, and 524.5-118; and chapter 245D (Home and Community-Based Services Standards), M.S. Chapter 43A, sections 43A.19, 43A.191 (Affirmative Action), M.S. Chapter 363A (Human Rights), M.S. Chapter 402A (Human Services Performance Management).

Additional statutes give the agency authority to investigate fraud: M.S. sections 119B.125, 152.126, 256.987, 256D.024, 256J.26, 256J.38, 609.821, 626.5533, and chapter 245E (Child Care Assistance Program Fraud Investigations).

M.S. sections 626.556 and 626.557 authorize the agency's work conducting background studies and investigating reports related to maltreatment of minors and of vulnerable adults.

M.S. chapter 256 (Human Services) provides authority for many of the agency's general administrative activities. M.S. sections 256.045 to 256.046 give authority for the agency's appeals activities.

NOTE: MN.IT spending, which previously was reported under Operations, is now reflected on its own budget activity page.

Program: Central Office Operations

Activity: Children & Families

mn.gov/dhs/people-we-serve/children-and-families/

AT A GLANCE

- Provides child support services to more than 346,000 custodial and non-custodial parents annually and 240,000 children
- Provides child care assistance to more than 29,000 children in an average month
- 1563 children were either adopted or had a permanent transfer of legal custody to a relative in 2017
- Facilitates Supplemental Nutrition Assistance Program (SNAP) payments to more than 429,000 Minnesotans every month
- All funds administrative spending for the Children and Families activity for FY 2017 was \$45.4 million. This represented 0.27 percent of the Department of Human Services overall budget.

PURPOSE & CONTEXT

Children and Families administers, and provides administrative support to counties, tribes and social service agencies for programs that provide child safety and well-being services, and for economic assistance programs serving low-income families and children.

These services help ensure that low-income people receive the support they need to be safe and help build stable families and communities. Programs administered in this area seek to:

- Keep more people fed and healthy by increasing nutrition assistance participation,
- Keep more children out of foster care and safely with their families,
- Decrease the disproportionate number of children of color in out-of-home placements, and
- Increase access to high quality child care.

Our statewide administration of these programs ensures that federal funds are used according to federal regulations, resources and services are distributed equitably across the state, and quality standards are maintained.

SERVICES PROVIDED

The Children and Family Services Administration is organized into five principal Divisions:

- Child Safety and Permanency,
- Child Support,
- Community Partnerships and Child Care Services,
- Economic Assistance and Employment Supports, and
- Management Operations.

In the Children and Families Services Administration our staff provides administrative direction and supports to counties, tribes and community agencies. Our work includes:

- Researching, recommending and implementing statewide policy and programs,
- Managing grants,
- Training and giving technical assistance to counties, tribes and grantees,
- Evaluating and auditing service delivery, and

- Conducting quality assurance reviews to make sure that effective services are delivered efficiently and consistently across the state.

Our areas of responsibility include administering several forecasted programs: the Minnesota Family Investment Program (MFIP) and Diversionary Work Program, and MFIP Child Care Assistance. Our staff also supports grant programs that provide funding for housing, food and child welfare services. We also administer the federal Supplemental Nutrition Assistance Program (SNAP). We review approximately 2,600 SNAP cases annually to see if benefits and eligibility were determined correctly. In addition, we review overall county and tribal administration and management of SNAP in 30-35 agencies each year. We provide oversight of statewide child welfare services that focus on ensuring children's safety while supporting families. We ensure that core safety services focus on preventing or remedying neglect, and providing basic food, housing and other supports to the most at-risk adults and children. In 2015, we provided more than 950 classroom and over 3,800 on-line trainings for county staff on SNAP, family cash assistance and child care assistance.

Funding for our programs comes from a combination of state and federal dollars. Major federal block grants that support programs in our Administration include Temporary Assistance for Needy Families, the Child Care and Development Fund, the Social Services Block Grant and the Community Services Block Grant. Funding from these four federal sources totaled \$458 million in federal fiscal year 2017.

RESULTS

We provide administrative support to a broad array of programs and services for low-income families and adults and children.

Key Measures for programs serving families and children:

<i>Type of Measure</i>	<i>Description of Measure</i>	<i>2014</i>	<i>2015</i>	<i>2016</i>	<i>2017</i>
Quality	Percent of children not experiencing repeated abuse or neglect within 12 months of a prior report	94.3%	94.5%	91.8%	91%
Quality	Percent of all children who enter foster care in the previous year that are discharged to permanency (i.e., reunification with parents, caregivers, living with relative, guardianship, adoption) within 12 months	60%	56.1%	50.6%	47.5%
Quality	Percent of all children in foster care who had been in care between 12 and 23 months on the first day of the year that were discharged to permanency within 12 months of the first day of the year	50%	44.8%	48.1%	51.2%
Quality	Percent of all children in foster care who had been in care for 24 months or more on the first day of the year that were discharged to permanency within 12 months of the first day of the year	17.4%	23.1%	25.2%	28.8%

Data for quality measures provided by Children’s Research Unit at the Department of Human Services.

The two key measures in MFIP/DWP are:

- The **Self-Support Index (S-SI)**, which is a results measure. The S-SI shows the percentage of adults eligible for MFIP or DWP in a quarter who have left assistance or are working at least 30 hours per week three years later. Customized targets are set for each county or tribe using characteristics of the people served and local economic conditions. State law requires the Department of Human Services to use the Self-Support Index to allocate performance bonus funds. The chart following shows that about two-thirds of participants have left MFIP or DWP and/or are working at least 30 hours per week three years after a baseline period.

<i>Year ending in March of:</i>	<i>S-SI</i>
2016	68.0%
2017	65.9%
2018	64.6%

- The federal Work Participation Rate (WPR), which is a measure of quantity. The WPR shows parents engaging in work and specific work-related activities. We calculate an estimated WPR for counties, county consortiums and tribes monthly, and it is annualized to allocate performance bonus funds. (Beginning in calendar year 2016, the bonus will be based solely on the S-SI.) The chart following shows the WPR for 2015 to 2017.

<i>Federal Fiscal Year</i>	<i>WPR</i>
2015	37.9%
2016	39.4%
2017	38.9%

Another employment-related, state-mandated performance measure tracked is:

- **MFIP/DWP Median Placement Wage**, a quality measure that reflects the number of people getting jobs and the median wage. The chart shows the statewide median hourly starting wage. (Tribes are not included.)

<i>Calendar Year</i>	<i>Median Placement Wage Per Hour for MFIP Clients</i>	<i>Median Placement Wage Per Hour for DWP Clients</i>
2015	\$11.00	\$11.00
2016	\$11.50	\$11.50
2017	\$12.00	\$12.00

Program: Central Office Operations

Activity: Health Care

AT A GLANCE

- **Medical Assistance** provided coverage for an average of 1,082,654 people each month during FY 2017.
- **MinnesotaCare** provided coverage for an average of 89,081 people each month during FY 2017.
- In FY2017 our member services call center fielded 671,527 telephone calls from recipients.
- In FY2017 our provider help desk answered 313,607 calls from providers.
- All funds administrative spending for the Health Care activity for FY 2017 was \$104 million. This represents 0.7 percent of the Department of Human Services overall budget.

PURPOSE & CONTEXT

The Minnesota Department of Human Services (DHS) Health Care Administration administers the following two health care programs for low-income Minnesotans:

Medical Assistance (MA) is Minnesota's Medicaid program which provides health coverage for low-income people including children and families, people 65 or older, people who have disabilities and adults without dependent children.

MinnesotaCare provides coverage for those who do not have access to affordable health care coverage but whose income is too high for Medical Assistance.

Our goals are to:

- Increase the number of insured Minnesotans by helping eligible people get MA or MinnesotaCare coverage
- Improve and streamline Medicaid processes through the way we administer and deliver programs
- Improve the health outcomes, beneficiary experience and value of care delivered through Minnesota Health Care Programs (MHCP)
- Reform payment and delivery models by designing rates and models to reward quality and emphasize transparency
- Use research, data and analysis to develop policy recommendations, support DHS health care programs and evaluate results
- Encourage stakeholder communication to support our clients, partners and programs

SERVICES PROVIDED

The Health Care Administration's (HCA) divisions and operational units include the following:

Office of the Assistant Commissioner

This office performs central functions including:

- Managing the partnership between DHS and the federal Centers for Medicare and Medicaid Services for all Medicaid state plan and waiver services
- Conducting care delivery and payment reform projects including the Integrated Health Partnerships and the CMS State Innovation Models

- Ensuring that benefit and payment policies are supported by best clinical practices through the Office of the Medical Director
- Coordinating the development of recommendations on health care policy and legislation

Health Care Eligibility Operations

- Processes paper applications for MinnesotaCare and the Minnesota Family Planning Program
- Provides ongoing case maintenance and processes changes in enrollee circumstance that may influence eligibility
- Provides in-person and online training, responds to system-related questions from counties, and provides systems support.

Health Care Eligibility and Access

- Administers all eligibility policy for the Medical Assistance and MinnesotaCare programs including long term care services.
- Provides policy support for county social service agencies, tribal governments, and other entities processing applications for MHCP
- Conducts disability determinations to determine Medical Assistance eligibility under a disability basis
- Develops business requirements for eligibility systems including MAXIS, MMIS, and the Minnesota Eligibility Technology System (METS)

Purchasing and Service Delivery (PSD)

- Coordinates the purchasing and delivery of services in state health care programs and administers coverage, benefit policy
- Establishes payment policies and calculations for fee-for-service and managed care rates
- Negotiates and manages annual contracts between DHS and managed care organizations

Member and Provider Services (MPS)

- Supports MHCP members and providers, conducts benefits recovery and claims processing, runs the member and provider call centers, enrolls health care providers, and manages all provider training and communication regarding the health care programs
- Assures that Medical Assistance program remains the payer of last resort by billing any insurers or other parties with primary responsibility for paying medical claims
- Responds to enrollee phone calls regarding eligibility, covered services, and provider availability
- Ensures the timely and accurate payment of health care services

Healthcare Research and Quality

- Conducts data analysis, research, and data reporting responsibilities for the MHCP and oversees quality assurance activities for the managed care organizations contracting with DHS
- Uses health care claims data to inform policy and program development and monitors the quality of health care services purchased by DHS

Our staff shares some health care coverage policy and rates development functions with the Community Supports Administration for the services under the purview of those other administrations.

Our work supports the following strategies:

- Improve access to affordable health care
- Integrate primary care, behavioral health and long-term care
- Maintain a workforce committed to fulfilling the agency mission
- Expand the number of providers and enrollees participating in Integrated Health Partnerships
- Modernize eligibility and enrollment systems

- Reduce disparities so that cultural and ethnic communities have the same access to outcomes for health care
- Hold managed care plans accountable for health equity outcomes related to depression, diabetes and well child visits

RESULTS

DHS works to make Minnesota a national leader in promoting and implementing policy and payment initiatives that improve access, quality and cost-effectiveness of services provided through publicly funded health care programs. DHS contracts with managed care organizations to serve enrollees in Minnesota's public health care programs.

As part of Minnesota's commitment to deliver quality health care more efficiently, DHS began a new payment model in 2013 that prioritizes quality preventive care and rewards providers for reducing the cost of care for enrollees in MA and MinnesotaCare programs. This nation-leading reform effort has saved \$277 million in health care costs over four years and continues to show how financial incentives and value-based payment can lower costs and maintain or improve health care quality and outcomes. Providers participating in the program currently serve more than 460,000 Minnesotans.

In 2010, DHS was directed to develop and implement a demonstration testing alternative health care delivery systems, including accountable care organizations (ACOs). This led to the development of the Integrated Health Partnerships (IHP) program in 2013. The goal of the program is to improve the quality and value of care provided to Medicaid and MinnesotaCare enrollees while lowering the cost through innovative approaches to care and payment.

The program allows participating providers to enter into an arrangement with DHS to care for enrollees under a payment model that holds the participants accountable for the costs and quality of care their Medicaid patients receive. Providers who participate work together to better coordinate and manage care, resulting in better outcomes.

IHP providers have experienced better health outcomes for their Medicaid and MinnesotaCare populations, reducing inpatient admissions by 14 percent and emergency room visits by 7 percent. They also rank highly on statewide quality benchmarks.

The IHP program continues to expand. Providers that deliver care for less than the targeted cost are eligible to share in the savings; some providers also share the downside risk if costs are higher than targeted. As IHPs progress into their second and third contract years, a portion of their payment is tied to their performance on quality metrics.

In 2017, IHP savings to the health care system totaled nearly than \$60.7 million. This comes on top of savings of \$48 million in 2016, \$87.5 million in 2015, \$65.3 million in 2014 and \$14.8 million in 2013. These savings are shared by providers, managed care organizations, the federal government, and the state.

Beginning in 2018, DHS expanded and enhanced the IHP model in several important ways. DHS introduced multiple tracks to accommodate a diverse set of provider systems, added a quarterly population-based payment to providers to support their care coordination and infrastructure needs, modified the quality measurements methodology, and increased accountability for nonmedical social factors affecting the health of and disparities found within the IHP population.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quality	Percent of electronically submitted claims paid within two days ¹	98.28%	98.36%	FY2015 and FY2017
Quantity	Number of Providers Enrolled in an Integrated Health Partnership ²	19	24	2016 and 2018
Quantity	Total MA Benefit Recoveries (excluding fraud and cost avoidance) ³	\$58 million	\$61 million	FY2015 and FY2017

Performance Measure Notes:

1. Source: FY 2015 Member and Provider Services Operational Statistics. Compares Fiscal year 2015 (Previous) to Fiscal year 2017 (Current). Our goal is to pay 98 percent of electronically submitted claims within two days. The trend is stable.
2. Measure is the number of providers voluntarily contracting with DHS as an IHP to serve MA and MinnesotaCare recipients. Compares 2016 (Previous) to 2018(Current)
3. Source: Member and Provider Services Operational Statistics. Measure is the total amount of recoveries conducted by the benefit recovery unit at DHS and contractors performing recovery activities on its behalf. Compares FY 2015 (Previous) and FY 2017 (Current).

M.S. chapter 256 (Human Services) provides authority for many of the agency's general administrative activities. Some of the authority to administer MA is also in that chapter. Additional legal authority to administer MA is in M.S. chapter 256B (Medical Assistance for Needy Persons). Our authority to administer MinnesotaCare is in M.S. chapter 256L.

Program: Central Office Operations

Activity: Continuing Care For Older Adults

mn.gov/dhs/people-we-serve/seniors/

AT A GLANCE

- Oversees services to over 400,000 older Minnesotans each year with a value \$1.4 billion in state and federal funds.
- Provided nursing facility services to 14,529 people per month in FY 2017.
- Provided Elderly Waiver services to 33,654 people per month in FY 2017.
- Performs statewide human services planning and develops and implements policy.
- Obtains, allocates, and manages resources, contracts, and grants.
- Senior Nutrition grants provide congregate dining to 38,000 people and home delivered meals to 12,000 people.
- Provides comprehensive assistance and individualized help to more than 125,000 individuals through over 277,000 calls in 2017 through the Senior LinkAge Line®.
- Provided \$50.2 million in services to providers under Aging and Adult Service grants and \$1.6 million under Other Long Term Care grants in FY 2017.
- Sets standards for, and evaluates, service development and delivery, and monitors compliance
- Provides technical assistance and training to county and tribal agencies and supports local innovation and quality improvement efforts.
- All funds administrative spending for the Continuing Care Administration activity for FY 2017 was \$18.4 million. This represented 0.12 percent of the Department of Human Services overall budget.

PURPOSE & CONTEXT

The Continuing Care for Older Adults Administration administers Minnesota's publicly funded long-term care programs and services for older Minnesotans and their families. Our Administration's mission is to improve the dignity, health and independence of the people we serve.

We have four goals:

- Support and enhance the quality of life for older people,
- Manage an equitable and sustainable long-term care system that maximizes value,
- Continuously improve how we administer services, and
- Promote professional excellence and engagement in our work

SERVICES PROVIDED

The Continuing Care for Older Adults Administration is composed of the following Divisions and units, each charged with particular areas of responsibility:

- Aging and Adult Services Division,
- Fiscal Analysis and Performance Measurement,
- Nursing Facility Rates and Policy Division,
- Operations and Central Functions, and
- Planning and Aging 2030

Our work includes:

- Administering Medical Assistance long-term care waiver programs and state plan services. This includes developing, seeking authority for and implementing policies, projects, and research. We also oversee state and federal grants and contracts, including Senior Nutrition Grants and Moving Home Minnesota, a federal Money Follows the Person Rebalancing Demonstration Program. These programs serve both seniors and people with disabilities;
- Providing training, education, assistance, advocacy and direct services, including overseeing the state's adult protective services system;
- Monitoring service quality by doing evaluations and measuring results using county waiver reviews;
- Staffing of the Governor-appointed Minnesota Board on Aging (<http://www.mnaging.org>), a state agency administratively placed within DHS with oversight of the Office of Ombudsman for Long-Term Care;
- Working to improve the quality of services and share best practices across providers;
- Providing administrative, financial, and operational management and support for both the Continuing Care for Older Adults Administration and the Community Supports Administration;
- Supporting both Continuing Care for Older adults and Community Supports administrations on IT modernization projects, IT project portfolio oversight, and business process improvement efforts; and
- Providing outreach, staff support and technical assistance to stakeholders and stakeholder workgroups.

Direct services we provide include:

- Providing statewide referrals to services, care transitions support, health insurance and long-term benefits counseling through the Senior LinkAge Line® to older Minnesotans and their caregivers so that they can get answers about long-term care and how to pay for it, assistance resolving issues with Medicare and prescription drugs, connections with volunteer opportunities, or help finding resources;
- Providing long-term care ombudsman services, which help people resolve complaints and keep their services; and
- Developing, maintaining, and publishing provider quality rankings for consumers using the nursing home and HCBS report cards.

RESULTS

We use several information sources and data to monitor and evaluate quality outcomes and provider performance. Much of the information we analyze is from the DHS Data Warehouse or from surveys of consumers, providers, and lead agencies. More explanation of these measures is in the performance notes below the table.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quality	1. Average statewide risk-adjusted nursing facility quality of care score out of a possible 100 points	64.4	74.0	Jan. 2012 to Dec. 2017
Result	2. Percent of older adults served by home and community-based services	68.4%	72.9%	2013 to 2017

More information is available on the DHS Dashboard (<http://dashboard.dhs.state.mn.us/>).

Performance Notes:

1. Measure one compares January 2012 data to December 2017 data. (Source: Minimum Data Set resident assessments)
2. Measure two compares FY2013 to FY2017. This measure shows the percentage of older adults receiving publicly-funded long-term services and supports who receive home and community-based services

through the Elderly Waiver, Alternative Care, or home care programs instead of nursing home services.
(Source: MMIS Claims)

M.S. chapter 256 (Human Services) provides authority for many of the agency's general administrative activities. Some of the authority to administer MA is also in that chapter. Additional legal authority to administer MA is in M.S. chapter 256B (Medical Assistance for Needy Persons). For other activities administered under Continuing Care for Older Adults, we list legal citations that apply to the program at the end of each budget narrative.

Program: Central Office Operations

Activity: Community Supports

AT A GLANCE

- Provided 47,280 people with disability home and community-based services waivers in FY2017.
- Provided 42,550 people with Personal Care Assistance (PCA) services in FY2017.
- Provided 2,617 people living with HIV/AIDS medical and support services in FY2017.
- 22,169 people received assistance from the Deaf and Hard of Hearing Services Division in FY2017
- In SFY 2017, lead agencies administered over 150,000 assessments for long-term services and supports. (This includes MnCHOICES, legacy LTCC and DD screenings, and PCA Assessments)
- 270,651 adults received mental health services through Minnesota Health Care Programs (MHCP) in CY 2017
- 88,000 children and youth receive publically funded mental health services each year
- 5,713 individuals at risk of or experiencing long-term homelessness received supportive services in FY 2017
- All funds administrative spending for the Community Supports Budget Activity for FY 2017 was \$41 million. This represented 0.26% of the Department of Human Services overall budget.

PURPOSE & CONTEXT

The Community Supports Administration (CSA) within the Department of Human Services oversees service delivery systems for mental health, people with disabilities, alcohol and drug abuse, people who are deaf, deafblind and hard of hearing, and people needing housing supports. This includes prevention, treatment, long-term services and supports, including home and community based services and grant programs.

CSA trains, develops capacity and provides guidance and oversight for community partners including tribes, health plans, counties and community-based providers. Our current work encourages and supports research-informed practices and expanded use of successful models.

CSA goals are to support people to achieve meaningful outcomes, improve our operational excellence, and to manage an equitable and sustainable service delivery system.

SERVICES PROVIDED

We have four divisions within the Community Supports Administration (CSA):

- Behavioral Health Division (combination of former Alcohol and Drug Abuse and Mental Health Divisions)
- Disability Services Division
- Deaf and Hard of Hearing Services Division
- Housing Supports Division

Collaborating both with partners within state agencies and in local communities, our administration shapes and implements public policy on mental health, substance use disorder treatment and prevention services, home and community based services, services for people who are deaf, deafblind and hard of hearing and housing supports.

Specifically, our staff:

- Lead efforts to shape and implement public policy directed towards prevention, early intervention, and treatment of persons with a mental illness or substance use disorder.

- Administer payment policy and manage grant programs for mental health and substance use disorder services, such as the Consolidated Chemical Dependency Treatment Fund, Minnesota Health Care Programs, Adult Mental Health Grants, Child Mental Health Grants and Substance Use Disorder Treatment Support Grants.
- Manage and administer the four disability home and community-based services waivers, home care services (including Personal Care Assistance), intermediate care facilities for people with developmental disabilities, and various grant programs that support people with disabilities living in the community.
- Administer programs to assure access to services, facilitate community engagement, provide technical assistance on best practices, develop local service capacity, and provide general program oversight and guidance.
- Promote access to core medical and support services to people living with HIV/AIDS by paying premiums to maintain private insurance, co-payments for HIV-related medications, mental health services, dental services, nutritional supplements, and case management.
- Promote equal access to communication and community resources for Minnesotans who are deaf, deafblind and hard of hearing by delivering direct services through statewide regional offices, the Telephone Equipment Distribution (TED) program and the DHHSD mental health program.
- Manage grant programs for services to adults and children who are deafblind, mentors for families with very young children who have hearing loss, Certified Peer Support Specialists and other mental health services for people with hearing loss who use American Sign Language and have mental health challenges, psychological assessments for children and youth with hearing loss, increasing capacity of interpreting services in Greater Minnesota.
- Facilitate many stakeholder groups, including the Governor-appointed Commission of Deaf, DeafBlind and Hard of Hearing, a state agency housed within DHS (<http://mn.gov/deaf-commission>);
- Provide housing assistance support and related services to people experiencing homelessness or who are in danger of becoming homeless.
- Work to encourage the development of local service capacity, including related professional workforce development activities.
- Train and guide service delivery partners on best practices.
- Provide supervision, guidance, and oversight to service delivery partners including counties, tribes and non-profit providers.
- Partner with stakeholders to improve prevention and early intervention efforts and the service delivery system.
- Secure funding outside of state appropriations and seek such opportunities to leverage goals.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	The percent of adults in Assertive Community Treatment (ACT) who receive an annual comprehensive preventative physical exam. ²	27.8%	74.0%	2013 vs. 2016
Result	Past 30 day use of alcohol by youth in communities receiving prevention funding. ³	14.7%	11.2%	2013 vs. 2016
Result	Percentage of babies born with negative toxicology reports. ⁴	84%	58.9%	2014 vs. 2017

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Result	Percent of working age adults on certain Medical Assistance programs earning \$600 or more per month. ⁵	12.2%	15.7%	FY 2014 to FY 2016
Result	Percent of people with disabilities who receive home and community-based services at home. ⁶	53.1%	58.5%	2013 to 2017
Result	Percent of long term service and support spending for people with disabilities in home and community-based services rather than institutions. ⁷	88.3%	90.6%	2013 to 2017
Quality	Percent of consumers in DHHS grant-funded programs who are satisfied with quality of services they received. ⁸	94%	94%	2014 to 2017

Performance Measure Notes:

1. With parental consent, counties conduct mental health screenings for children in the child welfare and juvenile justice systems who have not had a recent assessment. The Previous measure is Calendar Year 2012; the Current measure is CY 2015. (Source: Minnesota Department of Human Services Dashboard, <http://dashboard.dhs.state.mn.us/>)
2. Compares CY 2013 (Previous) and CY 2016 (Current). The measure is based on ACT recipients who are not Medicare eligible and who are enrolled 12 months in MA or Minnesota Care. (Source: Minnesota Department of Human Services Dashboard, <http://dashboard.dhs.state.mn.us/>)
3. This measure consists of data as reported in the Minnesota Student Survey for 9th grade users. Previous represents calendar year CY 2013 and Current represents CY 2016.
4. The percentage of babies with negative toxicology results during a 12-month period, born to women served by the state Women's Recovery grants. Previous represents FY 2014 and Current represents FY 2017.
5. Measure compares monthly earnings for people age 18-64 who receive services from one of the following Medical Assistance programs: Home and Community-Based Waiver Services, Mental Health Targeted Case Management, Adult Mental Health Rehabilitative Services, Assertive Community Treatment and Medical Assistance for Employed Persons with Disabilities (MA-EPD). Source: DHS Data Warehouse.
6. This measure compares people who receive disability waiver services in their own home rather than residential services. Source: DHS Data Warehouse.
7. This measure compares spending of long term service and support for people with disabilities in home and community-based services rather than institutions. Source: DHS Data Warehouse.
8. Data source: Consumer satisfaction surveys and grantee reports.

M.S. chapter 256 (Human Services) provides authority for many of the agency's general administrative activities. Some of the authority to administer MA is also in that chapter. Additional legal authority to administer MA is in M.S. chapter 256B (Medical Assistance for Needy Persons). For other activities administered under Community Supports, we list legal citations that apply to the program at the end of each budget narrative.

Program: Central Office Operations

Activity: Central IT

mn.gov/mnit/about-mnit/offices/

AT A GLANCE

- Operate and maintain over 385 active applications serving over 2.8 million people across all programs and used by 31,000 county, tribal, and state workers, more than 200,000 providers, other client assistants and DHS and MNSure business partners
- Oversee more than 750 IT employees
- Manage over 175 active IT projects
- Coordinate 4 major DHS IT Transformation programs:
 - Minnesota Eligibility Technology (METS) System
 - Integrated Service Delivery System (ISDS)
 - Medicaid Management Information System (MMIS) Modernization
 - Direct Care & Treatment System Modernization
- Total all funds spending for this budget activity in FY 2017 was \$222 million, which represents 1.5 percent of the agency budget.

PURPOSE & CONTEXT

The Central IT budget activity funds MNIT@DHS to provide IT solutions that support agency business goals, and build and maintain the computer applications that automate the delivery of agency programs. MNIT provides secure and cost-effective information technology systems that support individuals who participate in DHS social services, health care, public assistance and direct care programs across the state. The work of MNIT@DHS helps DHS meet their mission to provide essential services to Minnesota's most vulnerable residents.

Please refer to the Office of MNIT Services Agency Profile for more information about the central MNIT organization.

SERVICES PROVIDED

MN.IT@DHS provides the following services to DHS:

1. Leadership and planning support in the delivery of IT services to DHS at a high-value and cost-effective manner. This includes:
 - Implementation and participation in the DHS IT governance structure which allocates funding and guides IT program design, including the sequence/prioritization of IT work
 - Ensure that user experience design, accessibility and plain language are incorporated into DHS technology solutions
2. Program management activities to develop and operate the DHS IT project and portfolio management. This includes:
 - Business Architecture,
 - Business analysis,
 - Project and portfolio management, and
 - Quality assurance
3. Application development and support to automate and maintain DHS services and operations. This includes:
 - Release Management,

- Enterprise architecture,
 - Methodologies to determine technology solutions,
 - Programming and coding, and
 - Ongoing maintenance to help ensure federal/state/industry compliance for DHS IT systems
4. IT services, including all of the computing, telecommunications and wide area network (WAN) services that underlie and support DHS program applications. This includes:
- Desktop, server and network support,
 - Operations support,
 - Firewall support & incident management,
 - Contact center support, and
 - Telephony, telepresence support

MNIT@DHS is funded through a combination of state general fund, health care access fund and dedicated federal revenues administered within the state systems account.

RESULTS

MN.IT contributes to the State's results-based outcome of efficient and accountable government services and supports the State's results-based outcomes for Community, Health, and Safety, by providing IT computing and telecom resources to support DHS business goals, and managing the applications that run agency programs.

Program: Forecasted Programs

Activity: Minnesota Family Investment Program (MFIP)/ Diversionary Work Program (DWP)

mn.gov/dhs/people-we-serve/children-and-families/economic-assistance/income/programs-and-services/

AT A GLANCE

- In 2017, MFIP and DWP provided assistance for approximately 33,450 low-income families a month, 71 percent of those served are children.
- The average monthly cash payment for an MFIP family was \$810, including the food portion of MFIP. The average monthly cash payment for a DWP family was \$386.
- All funds spending for the MFIP/DWP activity for FY 2017 was \$309 million. This represented 1.94 percent of the Department of Human Services overall budget.

PURPOSE & CONTEXT

MFIP and DWP provide temporary financial support to help meet the basic needs of low-income families with children and low-income pregnant women.

Half the parents receiving MFIP or DWP were employed in the three months before they turned to the program for assistance. Common causes for job losses are layoff, reduced hours, birth of a baby by a parent with no leave time, need to care for an ill child or spouse with a disability, or transportation and child care costs that wages do not cover.

The goal of these related programs is to stabilize families and improve economic outcomes through employment. Without these benefits, families have little or no other resources available to help meet their basic needs.

These programs are funded with a combination of state, federal Supplemental Nutrition Assistance Program (SNAP), and federal Temporary Assistance for Needy Families (TANF) funds. Counties and tribes administer the MFIP and DWP programs.

SERVICES PROVIDED

MFIP provides job counseling, cash assistance and food assistance to low-income families with children and to low-income pregnant women. Families receive time limited benefits (60 months or fewer). The amount of benefits is based on family size and other sources of income. Families may request an extension of their benefits if, for example, an eligible adult has a disability or needs to care for a family member with a disability. A family of three - a parent with two children - with no other income can receive \$532 in financial assistance and \$453 in SNAP benefits per month. The benefits are structured to reward families who work and are gradually reduced as income rises. Parents are required to participate in employment services to develop the skills needed to move into the labor market as soon as possible. Families may also be eligible for child care assistance and for health care coverage under Medical Assistance.

DWP is designed to meet specific crisis situations and help families move to employment rather than go on MFIP. The program includes intensive, up-front services to focus on families' strengths and break down barriers to work. Families can participate in the program for four months within a 12-month period. A family receives cash benefits based on its housing, utility costs and personal needs up to a maximum based on the number of people in the family. Housing and utility costs are paid directly to the landlord or utility company. The maximum that a family of three – a parent with two children – can receive is \$532 in financial assistance. Most families are also eligible for SNAP benefits, child care assistance and for health care coverage under Medical Assistance.

Families who receive MFIP (with some exemptions) may also be eligible for the MFIP housing assistance grant of \$110 per month if they do not receive a rental subsidy through the federal Department of Housing and Urban Development.

RESULTS

The two key measures in MFIP are:

- The **Self-Support Index** (S-SI) is a results measure. The S-SI gives the percentage of adults eligible for MFIP or DWP in a quarter who have left assistance or are working at least 30 hours per week three years later. Customized targets are set for each county or tribe using characteristics of the people served and local economic conditions. State law requires the Department of Human Services to use the Self-Support Index to allocate performance bonus funds. The following chart shows that about two-thirds of participants have left MFIP and/or are working at least 30 hours per week three years after a baseline period.

<i>Year ending in March of:</i>	<i>S-SI</i>
2010	67.0%
2011	65.2%
2012	65.3%
2013	66.9%
2014	68.5%
2015	68.8%
2016	68.0%
2017	65.9%
2018	64.6%

- The federal **Work Participation Rate** (WPR) is a measure of quantity. The WPR reflects parents engaging in work and specific work-related activities. We calculate an estimated WPR for counties, county consortiums, and tribes monthly and it is annualized to allocate performance bonus funds. (Beginning in calendar year 2016, the bonus will be based solely on the S-SI.) The following chart shows the WPR for 2008 to 2015.

<i>Federal Fiscal Year</i>	<i>WPR</i>
2010	40.2%
2011	43.9%
2012	45.3%
2013	45.1%
2014	46.2%
2015	37.9%
2016	39.4%
2017	38.9%

The state legal authority for the Minnesota Family Investment Program (MFIP) and Diversionary Work Program (DWP) is under M.S. chapter 256J (<https://www.revisor.mn.gov/statutes/?id=256J>).

Program: Forecasted Programs

Activity: MFIP Child Care Assistance

mn.gov/dhs/people-we-serve/children-and-families/economic-assistance/child-care/programs-and-services/child-care-assistance.jsp

AT A GLANCE

- In 2017 MFIP Child Care Assistance paid for child care for 15,927 children in 7,644 families in an average month.
- The average monthly assistance per family was \$1,672.
- All funds spending for the MFIP Child Care Assistance activity for FY 2017 was \$161 million. This represented 1 percent of the Department of Human Services overall budget.

PURPOSE & CONTEXT

In order to work, families need safe and reliable child care. The annual cost of full time licensed care for one child can exceed \$10,000. Many low-income families struggle to find affordable child care that fits their needs. Minnesota Family Investment Program (MFIP) Child Care Assistance provides financial subsidies to help low-income families pay for child care. To support quality child care experiences and school readiness the program can pay a higher subsidy rate when a child is being cared for in a setting that meets quality standards.

SERVICES PROVIDED

The program provides supports to help improve outcomes for the most at risk children and their families by increasing access to high quality child care.

The following families are eligible to receive MFIP child care assistance or Transition Year child care assistance once they leave MFIP:

- MFIP and Divisionary Work Program (DWP) families who are employed, pursuing employment, or participating in employment, training or social services activities authorized in approved employment plans
- Employed families who are in their first year off MFIP or DWP (this is known as the “transition year”)
- Families in counties with a Basic Sliding Fee (BSF) child care waiting list who have had their transition year extended
- Parents under age 21 who are pursuing a high school or general equivalency diploma (GED), do not receive MFIP benefits, and reside in a county that has a BSF waiting list that includes parents under age 21.

As family income increases, so does the amount of child care expenses paid by the family in the form of copayments. All families receiving child care assistance and earning 75 percent or more of the federal poverty guideline make copayments based on family income. A family of three leaving MFIP and earning 115 percent of the federal poverty level (\$23,184) would have a total biweekly child care provider payment of \$24 for all children in child care.

The MFIP child care assistance activity is part of the state’s Child Care Assistance Program. Maximum rates in the Child Care Assistance Program are set in state law. Maximum rates are set for each type of care: child care centers, family child care and legal non-licensed child care. Providers are paid at the rate they charge private pay families, up to this limit. The program pays a higher rate to providers who have met quality standards through Parent Aware, are accredited, or hold certain educational credentials.

Child care must be provided by a legal child care provider over the age of 18 years. Allowable providers include legal non-licensed family child care, license-exempt centers, licensed family child care and licensed child care centers. Families choose their providers in the private child care market. Counties administer the Child Care Assistance Program.

All families who meet eligibility requirements may receive this help. MFIP child care assistance is funded with state and federal funds that include the federal Child Care and Development Fund and the Temporary Assistance for Needy Families (TANF) fund.

RESULTS

PERCENT OF PROVIDER PRICES FULLY COVERED BY CHILD CARE ASSISTANCE PROGRAM - Maximum rates paid to providers under the Child Care Assistance Program may not cover the full cost of child care. This may be a barrier for some families, if the family cannot find a provider in their community whose prices are covered by the maximum allowed under the program. **The percent of child care provider prices that are fully covered by the Child Care Assistance Program increased when the maximum rates were raised in 2014, but the maximum rate paid remains low compared to prices in the market.**

This quality measure shows approximately 22 percent of all family child care providers and approximately 29% of child care centers charge prices that are fully covered by the Child Care Assistance Program maximum rates.

Provider prices fully covered by Standard Maximum Rates statewide, by percent

QUALITY DIFFERENTIAL IMPACT - Parent Aware is Minnesota's rating tool for helping parents select high quality child care and early education programs. The Child Care Assistance Program allows up to a 15 percent higher maximum rate to be paid to providers with a Parent Aware 3-star rating, or who hold certain accreditation or education standards established in statute. Up to a 20 percent higher maximum rate can be paid to providers with a 4-star Parent Aware rating.

This quality measure shows that higher maximum rates may increase families' access to high quality providers by allowing the maximum rate paid by the Child Care Assistance Program to fully cover more (or an equivalent proportion) of their prices as compared to the prices charged by all providers. This measure indicates the impact of quality differentials by type of care. It is first presented as a statewide total, and then broken out by metro and non-metro counties.

Prices fully covered by Standard and Quality Differential Maximum Rates – 2016

Specifically, the 20 percent differential allows the prices charged by center based four-star rated metro providers to be fully covered by the maximum subsidy in the same proportion as the prices of all metro center providers. The higher maximum rates offer coverage of the prices charged by all other types of quality providers at higher levels than the standard maximum rates.

Use of High Quality Care - Children who participate in high quality early care and education are more likely to experience school success and positive life-long outcomes. This quality measure shows that the percent of all children receiving child care assistance through providers eligible for the higher subsidy rates for quality has increased from 23 percent in quarter four of 2013 to 48 percent in quarter three of 2017.

Child's Provider Credentials	2013	2014	2015	2016	2017
Provider holds Parent Aware 3-4 Star*	NA	28%	34%	40%	43%
Provider holds Accreditation*	29%	8%	6%	5%	5%
Provider holds Parent Aware 1-2 Star	NA	NA	NA	8%	6%
Standard Care	71%	64%	60%	47%	46%

* These providers are eligible for CCAP higher rates for quality.

In 2014 a statute change allowed providers to qualify for the higher maximum subsidy rate through receiving a Parent Aware rating of 3-or-4-Stars. Previously only providers holding certain accreditations and family child care providers meeting certain education standards were eligible. In this figure, child care settings were categorized according to the quality standard they meet to be eligible for the CCAP quality differential.

- In 2013 settings meeting quality standards though accreditations/credentials may also have been highly rated by Parent Aware. In 2014-2015 settings that hold both a 3-or-4 Star Parent Aware rating and an accreditation or educational credential, are included in the Parent Aware rated category.

The data source for the prices charged by providers is a biennial survey of provider prices conducted by the Department. To assess the portion of provider prices fully covered, provider prices are compared to the applicable maximum subsidy rates.

The data source for children in care with provider's eligible for the higher rates for quality is from MEC2, Minnesota's child care electronic eligibility and payment system.

The legal authority for the MFIP/TY Child Care Assistance program is in M.S. chapter 119B (<https://www.revisor.mn.gov/statutes/?id=119B>)

Program: Forecasted Programs**Activity: General Assistance**mn.gov/dhs/people-we-serve/people-with-disabilities/economic-assistance/income/programs-and-services/**AT A GLANCE**

- In FY2017, the General Assistance (GA) program supported a monthly average of 23,238 people.
- The typical monthly benefit is \$203 for an individual and \$260 for a couple.
- All funds spending for General Assistance activity for FY 2017 was \$49.6 million, which represented 0.3 percent of the overall agency budget.

PURPOSE & CONTEXT

General Assistance (GA) is the primary safety net for very low-income people without children who are unable to work and do not have enough money to meet their basic needs. The most common reason people are eligible is illness or incapacity (50 percent). GA helps people meet some of their basic and emergency needs. Without this income support, they would likely fall further into poverty and become homeless.

Many people receive GA while they wait for more stable assistance such as Supplemental Security Income (SSI), a federal income supplement program that helps people who are aged, blind or have a disability and have little or no income. Forty-seven percent of people eligible for GA have signed an Interim Assistance Agreement. That indicates they plan to apply for other income benefits such as SSI or Retirement, Survivors and Disability Income (RSDI).

SERVICES PROVIDED

General Assistance provides state-funded, monthly cash grants to people without children who have a serious illness, disabilities or other issues that limit their ability to work and are unable to fully support themselves. GA's maximum monthly benefit is \$203 for a single adult (about 21 percent of the Federal Poverty Guideline of \$990 per month for one person) and \$260 for a couple. Additional emergency funds may be available if a recipient cannot pay for basic needs and the person's health or safety is at risk. People eligible for GA may also be eligible for health care coverage under Medical Assistance.

The Department of Human Services (DHS) works with the federal Social Security Administration and the state's Disability Linkage Line® to streamline the disability determination process. DHS also connects recipients with resources to help them with the SSI application process. People who become eligible for SSI are no longer eligible for GA. They become eligible for Minnesota Supplemental Aid to supplement their SSI income.

DHS works with counties and tribes to administer the GA program.

RESULTS

GA is a safety net program that helps people achieve better outcomes by stabilizing crisis situations, avoiding homelessness and making connections to other resources.

GA recipients who may be eligible for SSI must apply and sign an Interim Assistance Agreement (IAA). If a person on GA is eligible for SSI, having an IAA in place allows the state to collect federal reimbursement for GA benefits paid while the person's application for SSI was pending. An increase in the percent of GA recipients with a signed IAA shows a better opportunity for stable income for recipients and state savings.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Percent of GA recipients with an Interim Assistance Agreement (IAA) signed within the calendar year.	47.9%	41.7%	Dec 2016 Dec 2017

GA is a safety net for people who do not have adequate income or resources to meet their basic needs. It is intended to be short-term while they apply for other benefits, look for employment, or secure other income. It is not intended as a long-term solution to meet a person's basic needs. Data below shows that while around 39 percent of cases are on the program for more than 12 months, only 25 percent of cases remain on the program after two years.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Percent of GA cases with more than 12 months of continuous GA usage	40.8%	39.1%	Dec. 2016 Dec. 2017
Quantity	Percent of GA cases with more than 24 months of continuous GA usage	25.4%	24.7%	Dec. 2016 Dec. 2017

One of the goals of the GA program is to help people prepare to obtain permanent work and become self-sufficient. Some features of GA act as work incentives. For example, the GA program allows some earned income to be disregarded when a person's GA eligibility and benefits are calculated. A person can work and still remain on GA if his or her earned income is minimal.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Percent of GA cases with earned income	3.4%	4.1%	Dec. 2016 Dec. 2017

The source for these outcomes are from data used for the DHS report, December 2016 General Assistance Caseload: Cases and Eligible People (<https://edocs.dhs.state.mn.us/lfserver/Public/DHS-6128I-ENG>), and the forthcoming report for December 2017.

The legal authority for the General Assistance program is M.S. chapter 256D (<https://www.revisor.mn.gov/statutes/?id=256D>)

Program: Forecasted Programs

Activity: MN Supplemental Assistance

mn.gov/dhs/people-we-serve/people-with-disabilities/economic-assistance/income/programs-and-services/

AT A GLANCE

- In FY2017, the Minnesota Supplemental Aid program supported a monthly average of 30,576 people.
- The typical benefit is \$81 for an individual and \$111 for a couple.
- This supplements a typical monthly federal Supplemental Security Income (SSI) benefit of \$750 for an individual living alone.
- All funds spending for Minnesota Supplemental Aid activity for FY 2017 was \$38.3 million, which represented 0.24 percent of the overall agency budget.

PURPOSE & CONTEXT

Minnesota Supplemental Aid (MSA) helps to prevent homelessness and poverty by supplementing the incomes of Minnesotans who are eligible for the federal Supplemental Security Income (SSI) program. It was established in 1974 and federal regulations require payments to be at a minimum of that paid in March 1983. MSA benefits are intended to cover basic daily or special needs. Nearly half of MSA recipients are age 60 or older and 78 percent have a disability.

SERVICES PROVIDED

MSA provides a state-funded monthly cash supplement to help people who are aged, blind or disabled, and who receive SSI benefits. Some recipients who do not receive SSI because their income is too high may still be eligible for MSA if they meet other eligibility criteria.

MSA housing assistance is available to qualified recipients, adding \$194 to the MSA benefit to help pay housing costs. To be eligible for housing assistance, applicants must:

- Be under age 65 at the time of application,
- Have total housing costs in excess of 40 percent of their total income,
- Apply for rental assistance if eligible, and
- Be relocating from an institution, or eligible for Medical Assistance personal care attendant services, or receiving waived services and living in their own place.

MSA may also provide additional payments for other special needs such as special diets and household repairs or furnishings.

The Department of Human Services works with counties, tribes, the Social Security Administration, service providers, and other nonprofit agencies to identify people eligible for the program, and to advise and administer MSA program policy.

RESULTS

People who receive federal Supplemental Security Income are categorically eligible for MSA, but must apply for MSA in order to receive the benefits. The MSA program has had stable enrollment of around 30,500 individuals over time, but the number of adults who receive SSI and yet do not receive MSA is increasing. This indicates some eligible people are not accessing the benefit. The Department of Human Services is working with the Social Security Administration to inform people about this benefit.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Results	Percent of SSI beneficiaries over age 18 who receive MSA	38.5%	38.3%	Dec. 2016 Dec. 2017

MSA provides additional money to help people who qualify and have high housing costs move into affordable housing or be able to afford their current housing costs.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Percent of MSA recipients who receive MSA housing assistance	2.8%	3.2%	Dec. 2016 Dec. 2017

The MSA and SSI programs support efforts of people who want to work. MSA follows work incentives used by the Social Security Administration to encourage people with disabilities to work.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Percent of MSA recipients with earned income	5.2%	5.2%	Dec. 2016 Dec. 2017

The source for these outcomes are from data used for the DHS report, December 2016 Minnesota Supplemental Aid: Cases and Eligible People, and the forthcoming December 2017 report, along with the Social Security Administration report on SSI Recipients by State and County 2017 (https://www.ssa.gov/policy/docs/statcomps/ssi_sc/2017/index.html).

Program: Forecasted Programs**Activity: Housing Support (formerly known as Group Residential Housing)**mn.gov/dhs/people-we-serve/people-with-disabilities/economic-assistance/housing/programs-and-services/housing-support.jsp

AT A GLANCE

- In 2017, the Housing Support program served a monthly average of 20,222 participants.
- The current room and board rate limit is \$904.
- The average monthly payment per recipient in FY 2017 is \$657.12.
- All funds spending for the Housing Support activity for FY 2017 was \$159.5 million, which represented 1.0 percent of the overall agency budget.

PURPOSE & CONTEXT

Housing Support is a state-funded income supplement program that pays for room and board in approved locations for adults with low incomes who have a disability or are 65 years or older. Participants must meet a combination of eligibility requirements set by the federal Supplemental Security Income (SSI) program, state General Assistance program or residential crisis mental health facilities to qualify for help. Housing Support also has income and asset limits.

Seventeen percent of Housing Support recipients are older adults. Those who are younger than 65 years of age all have a combination of factors that limit their self-sufficiency, including a physical or mental health disability, visual impairment or chemical dependency. Program recipients likely would be in institutional placements or homeless without Housing Support.

SERVICES PROVIDED

The Housing Support room and board rate is currently \$904 per month. This rate is paid for residents in approximately 9,000 authorized settings in Minnesota. About 4,700 of those are adult foster care homes. Other settings include board and lodging facilities, supervised living facilities, boarding care homes, supportive housing and other assisted living facilities.

Housing Support providers receive payments on behalf of eligible recipients. The monthly room and board payment is to pay for rent, utilities, food, household supplies and other items needed to provide room and board to a recipient. Recipients are required to pay a portion of their income directly to providers toward the room and board rate. Housing Support can pay for additional supportive services in some settings if a recipient is not eligible for home and community-based waiver services or personal care assistance.

Counties and tribes also manage Housing Support agreements with providers. County human services agencies process eligibility and payments for people in the program.

RESULTS

An increase in the number of Housing Support recipients who are no longer homeless shows efforts are working to reduce homelessness.

Housing Support recipients who may be eligible for SSI must apply and sign an Interim Assistance Agreement (IAA). If a person receiving Housing Support is eligible for SSI, having an IAA in place allows the state to collect

federal reimbursement for state payments made while the person's application for SSI was pending. An increase in the percent of Housing Support recipients with a signed IAA shows a better opportunity for stable income for recipients and state savings.

An increase in the percent of Housing Support applications processed within 30 days shows people get the help they need more quickly.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Results	Number of Housing Support recipients moving out of homelessness	2,633	2,788	May 2016, May 2017
Quantity	Percent of Housing Support recipients with signed Interim Assistance Agreement	17.40%	16.40%	May 2016, May 2017
Quality	Percent of Housing Support applications processed within 30 days	62%	63%	May 2016, May 2017

The information in these measures comes from MAXIS administrative data.

The legal authority for the Group Residential Housing program is M.S. chapter 256I (<https://www.revisor.mn.gov/statutes/?id=256I>).

Program: Forecasted Programs

Activity: Northstar Care for Children

mn.gov/dhs/people-we-serve/children-and-families/services/foster-care/

mn.gov/dhs/people-we-serve/children-and-families/services/adoption/

AT A GLANCE

- 16,593 children experienced an out-of-home placement in 2017
- 1,563 children were either adopted or had a permanent transfer of legal custody to a relative in 2017
- State spending for the North Star Care for Children activity for FY 2017 was \$51.8 million

PURPOSE & CONTEXT

Northstar Care for Children is designed to help children who are removed from their homes and supports permanency through adoption or transfer of custody to a relative if the child cannot be safely reunified with parents. Financial support is provided to adoptive and foster parents to encourage permanent placement of children in safe homes. The benefit varies with the child's age, but across the program averages about \$12,000 annually per child. Northstar Care for Children consolidates and simplifies administration of three existing programs: Family Foster Care, Kinship Assistance (which replaces Relative Custody Assistance) and Adoption Assistance. Northstar Care for Children will help more children grow up in safe and permanent homes.

SERVICES PROVIDED

The comprehensive, simplified Northstar Care for Children program:

- Combines three child welfare programs — Family Foster Care, Adoption Assistance and Kinship Assistance — into a single program with uniform processes and unified benefits
 - Northstar Foster Care is for family foster care, in which children might become permanent members of families, not for group housing or residential treatment.
 - Northstar Kinship Assistance replaced the previous Relative Custody Assistance, simplifying ongoing requirements for caregivers and bringing in federal Title IV-E foster care funds.
 - Northstar Adoption Assistance turns more decision-making over to adoptive parents that previously required detailed state review and approval.
- Provides a monthly basic benefit based on children's age
- Uses a uniform assessment for all children to determine any needs beyond the basic payment for one of 15 levels of monthly supplemental difficulty of care payments
- Maintains the highest range of the current foster care benefits for children with the highest need
- Grandfathers children in existing programs under their current programs unless specifically transitioned into Northstar Care for Children (the current programs are slowly phased out as children exit them)
- Reduces barriers to permanency by eliminating disparities in benefits across the existing programs
- Reduces racial disparities among the children who remain in long-term foster care

Funding for Northstar Care for Children comes from state general fund appropriations, federal payments for foster care and adoption assistance, and county or tribal spending on foster care.

RESULTS

The Department of Human Services (DHS) monitors the performance of counties and tribes in delivering child welfare services, including services provided under Northstar Care for Children. DHS expects to see better outcomes for children under Northstar Care in that a larger portion of children in the system will find permanent homes.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quality	Rate of Relative Care: Of all days that children spent in family foster care settings during the given period, what percentage of days were spent with a relative?	40.4%	56.3%	2014 to 2017
Quality	Placement Stability: Of all children who enter foster care in the year, what is the number of placement moves per 1,000 days spent in foster care?	4.5 per 1,000	3.8 per 1,000	2014 to 2017
Quality	Permanency, 12-23 months: Of all children in foster care who had been in foster care between 12 and 23 months on the first day of the year, what percent discharged from foster care to permanency within 12 months of the first day of the year?	50.0%	51.2%	2014 to 2017
Quality	Permanency, 24 months: Of all children in foster care who had been in foster care for 24 months or more on the first day of the year, what percent discharged to permanency within 12 months of the first day of the year?	17.4%	28.8%	2014 to 2017

Performance Measures notes:

Program: Forecasted Programs

Activity: MinnesotaCare

mn.gov/dhs/people-we-serve/adults/health-care/health-care-programs/programs-and-services/minnesotacare.jsp

AT A GLANCE

- In FY 2017, MinnesotaCare had an average monthly enrollment of 89,081.
- MinnesotaCare expenditures reached \$397 million in FY 2017. This represented 2.7 percent of the Department of Human Services overall budget.
- The Minnesota state share of total MinnesotaCare program expenditures in FY2017 was \$11.6 million.

PURPOSE & CONTEXT

The MinnesotaCare Program was established in 1992 to provide affordable health coverage for people with incomes too high for Medicaid but unable to afford other health insurance. It provided a subsidized program for children and parents and later expanded to include adults.

Passage of the Affordable Care Act (ACA) in 2010, and subsequent state legislation, made many MinnesotaCare enrollees eligible for Medical Assistance (MA). Under the authority of the ACA, Minnesota established MinnesotaCare as a Basic Health Plan to provide health coverage for people with incomes between 138 percent and 200 percent of federal poverty guidelines. As a Basic Health Plan, Minnesota receives federal funds equal to 95 percent of the advanced premium tax credits that would otherwise be available to eligible people enrolled in commercial health care coverage through MNsure. In fiscal year 2017, federal Basic Health Plan funding covered 88 percent of MinnesotaCare's costs.

Today, MinnesotaCare provides comprehensive health care coverage for more than 89,000 Minnesotans who pay no more than \$80 a month in premiums. The program also includes additional benefits not necessarily available or as affordable on MNsure, including dental, vision and a broad array of behavioral health benefits.

SERVICES PROVIDED

MinnesotaCare covers a broad range of health care services including:

- primary and preventive care,
- inpatient and outpatient hospital care,
- coverage for prescription drugs,
- chemical dependency treatment,
- mental health services, and
- oral health services.

People seeking coverage under MinnesotaCare can apply directly through the MNsure web site or by submitting a paper application to MNsure, to DHS, or to their county human services or tribal office. Applicants are not eligible if they have access to affordable health insurance coverage through an employer. There are no health condition barriers for eligibility, but applicants must meet income guidelines and pay a premium (if applicable) to receive coverage¹. Premiums are based on income and are charged for each enrollee, up to a maximum of \$80 per month.

¹ Income eligibility guidelines (<https://edocs.dhs.state.mn.us/lfservlet/Public/DHS-3182-ENG>) and estimated premium amounts (<https://edocs.dhs.state.mn.us/lfservlet/Public/DHS-4139A-ENG>) by income are available on the DHS web site.

RESULTS

Quality	Estimated reduction in health care expenditures (below projections) for providers in Integrated Health Partnership demonstration project ⁴	\$48.3 million	\$60.6 Million	2016 to 2017

Performance Measure Notes:

1. Measure is the percent of Minnesotans that do not have health insurance. Source: Minnesota Health Access Survey, Minnesota Department of Health. Compares 2015 (Previous) and 2017 (Current)
2. Measure is the percentage of uninsured Minnesotans with family income below 200% of poverty. Source: Minnesota Health Access Survey, Minnesota Department of Health. Compares 2015 (Previous) and 2017 (Current)
3. Measure is the number of enrollees served by an IHP provider. Compares 2015 (Previous) and 2017 (Current).
4. Measure is an estimated reduction in annual medical costs below projections for 2016 and 2017 for the providers enrolled in the IHP demonstration. IHP provider contracts require this measure be calculated in the same manner each year. These reductions do not represent lower state spending.

Minnesota Statutes, chapter 256L provides the legal authority to operate the MinnesotaCare program. Many of the covered services, provider rates, and other elements of the MinnesotaCare program overlap with the Medical Assistance program and are detailed in the Medical Assistance statute. The statutory authority for Medical Assistance is located in M.S. chapter 256B.

mn.gov/dhs/people-we-serve/adults/health-care/health-care-programs/programs-and-services/medical-assistance.jsp

AT A GLANCE

- In FY 2017, MA served a monthly average of 1,082,654 people. This is 19.4 percent of the state's population.
- In FY 2017, MA provided coverage for:
 - 28,096 births in (about 4 in 10 of all live births in Minnesota)
 - 217,061 people receiving mental health services
 - 433,682 people receiving dental services
- In FY 2017, the families with children group made up 65 percent of total MA enrollment, but only 23 percent of total program expenditures.
- In FY 2017, coverage for the elderly and disabled made up 16 percent of total enrollment, but 61 percent of total basic care expenditures.
- MA is funded with state general funds, the health care access fund, federal Medicaid funds, and with local shares for a few particular services.
- All funds spending for the Medical Assistance activity for FY 2017 was just over \$11 billion. This represented over 69 percent of the Department of Human Services overall budget.
- The Minnesota state share of total MA expenditures in FY 2017 was about \$4.6 billion.

PURPOSE & CONTEXT

Medical Assistance (MA) is Minnesota's Medicaid program. MA is Minnesota's largest public health care program and serves children and families, pregnant women, adults without children, seniors and people who are blind or have a disability. It covers one out of every five Minnesotans. As the third largest insurer in the state after self-insured employer-based coverage and Medicare, it makes up nearly 16 percent of the state's health insurance market.

MA provides basic health care, home-and community-based services and long-term care services. Most people who have MA get health care through health plans. You can choose a health plan from those serving MA members in your county. Members who do not get health care through a health plan get care on a fee-for-service basis, with providers billing the state directly for services they provide.

On July 30, 1965, President Lyndon B. Johnson signed into law legislation that led to the establishment of Medicare and Medicaid. Medicaid serves 24 percent of the nation's population. Medicaid contributes significantly to the financing of the U.S. health care system, supporting local public health infrastructure, hospitals, mental health centers, at-home care, community clinics, nursing homes, physicians and many other health professions. Medicaid — not Medicare — is the primary source of coverage for people who need long-term care services, such as nursing home services. In 1966, Minnesota implemented Medical Assistance (MA).

Currently, the federal government shares financial responsibility for the Medicaid program by matching state costs with federal dollars. While certain federal requirements outline who and what must be covered in each program, states generally have flexibility to tailor and expand their Medicaid program to meet the needs of their population and state budgets.

The Minnesota Department of Human Services (DHS) is the state Medicaid agency and partners with all 87 Minnesota counties and several Minnesota Indian Tribes to administer MA. DHS contracts with both health plans and health care providers across the state to deliver basic health care to MA enrollees.

Minnesotans may enroll in MA if they meet certain eligibility requirements under the following categories: (a) parents and children; (b) age 65 or older, blind or have disabilities; (c) adults without dependent children

An individual's eligibility is determined by factors such as household income, family size, age, disability status, and citizenship or immigration status. These criteria are set by federal and state law and vary by category. Enrollees must demonstrate their program eligibility at least once a year. All individuals who meet federal eligibility requirements are guaranteed coverage. States can expand upon the minimum federal requirements, add optional or special populations to their programs or increase the income eligibility limits. Individuals eligible for Medicaid are guaranteed a basic set of benefits covering specific services and settings.

Minnesota is known for its comprehensive approach to providing Medicaid coverage. Minnesota covers a broad group of people and services beyond the minimum standards set in federal law. This includes expanding coverage to higher-income children and adults and covering long-term care in the home and community instead of an institutional setting. Minnesota also covers many special populations in need of services who would otherwise be ineligible for Medicaid because of their income level, including children with disabilities whose parents are given the option to access Medicaid by paying a parental fee, women who have been diagnosed with breast or cervical cancer through the state's cancer screening program, and families in need of family planning services.

MA provides coverage for preventive and primary health care services for low-income Minnesotans. MA differs from the state's other health care program, MinnesotaCare, in that it has lower income eligibility guidelines, does not have premiums, and pays for previously incurred medical bills up to three months prior to the month of application. Additionally, MA can pay for nursing facility care and intermediate care facilities for people with developmental disabilities. It can also cover long term care services and supports for people with disabilities and older adults so that they can continue living in the community.

Home and community-based services (HCBS) waivers were established under section 1915(c) of the federal Social Security Act of 1981. These waivers are intended to correct the institutional bias in Medicaid by allowing states to offer a broad range of HCBS to people who may otherwise be institutionalized. Minnesota began serving people under the HCBS waiver in 1984, and these services have facilitated Minnesota's shift away from institutional care.

Minnesota's MA program has expanded since the mid-1980's. The expansions have focused on low-income, uninsured, or under-insured children as well as eligibility changes to better support seniors and people with disabilities in their own homes or in small, community-based settings. During this time, a moratorium was placed on nursing facilities and intermediate care facilities for people with developmental disabilities as efforts to develop home and community-based alternatives gained momentum.

The most significant recent changes to the Minnesota MA program followed legislative action during the 2013 session and applied to people without an aged, blind, or disabled basis of eligibility. These changes included an elimination of asset tests and an increase to the income eligibility limits for adults without children, parents and relative caretakers, children, and pregnant women. Under the higher income standards, people formerly eligible for MinnesotaCare including pregnant women and children with income up to 275 percent of poverty and adults below 133 percent of poverty became eligible for MA, resulting in over 110,000 former MinnesotaCare recipients transitioning to coverage under MA in January of 2014.

SERVICES PROVIDED

MA enrollees fall under one of five general categories, and receive either long term care services and supports, basic health care, or both long term care and basic care. The five categories include the following:

MA Coverage of Long-Term Services and Supports (LTSS)

Thirty years ago, people who needed help with daily living tasks, such as bathing, dressing, eating and preparing meals, and going to the bathroom, were faced with the choice of when, not if, they would move from their home into an institution or similar setting. Today, older Minnesotans and people with disabilities have many options and services available. This approach provides a higher quality of life for people as they have access to the right service at the right time, and it leads to more cost-effective services over time.

LTSS are a spectrum of health and social services that support Minnesotans who need help with daily living tasks. The services generally consist of ongoing care or supports that a person needs to manage a chronic health condition or disability. The services can be provided in institutional settings, such as hospitals and nursing homes, or in people's homes and other community settings. Federal law requires all state Medicaid programs to cover these services when provided in an institutional setting or nursing facility.

MA Coverage of Long-Term Care Facilities

A nursing home provides 24-hour care and supervision in a residential facility setting. Nursing homes provide an all-inclusive package of services that covers: nursing care, help with activities of daily living and other care needs, housing, meals and medication administration. Alternatively, an intermediate care facility for persons with developmental disabilities (ICF/DD) provides 24-hour care, active treatment, training and supervision to people with developmental disabilities. Additionally, day training and habilitation (DT&H) services help people living in an ICF/DD develop and maintain life skills, and take part in the community. DT&H services include supervision, training and assistance in self-care, communication, socialization, behavior management, and supported employment and work-related activities, among others.

MA pays for long-term care services for people who reside in facilities. In FY 2017, an average of 16,000 people per month received facility based long-term care services. Total spending on this group was nearly \$1.1 billion, \$563 million of which came from state funds. Care provided under this segment of MA includes 24-hour care and supervision in nursing facilities or intermediate care facilities for persons with developmental disabilities (ICF/DD). It also includes day training and habilitation (DT&H) services for people who live in an ICF/DD.

To receive MA long-term care services a person must have income and assets that are below allowable limits and have an assessed need for the services. DHS works with community providers, counties and tribes, and the Department of Health in administering and monitoring services in these long-term care settings. More information is available at <https://edocs.dhs.state.mn.us/lfserver/Public/DHS-5961-ENG>.

MA Coverage of Care Through Home and Community-Based Services

Home and community-based services are long-term services and supports delivered in homes or communities and not institutional settings. Congress established home and community-based services waivers in 1983 in section 1915(c) of the Social Security Act, giving states the option to seek a waiver of Medicaid rules governing institutional care to allow them to expand Medicaid services to home and community settings.

Minnesota has a long history of working to help all people live with dignity and independence. For more than 35 years, Minnesota has expanded long-term services and supports coverage to individuals receiving services in their homes and communities, which is often more effective and desirable than an institutional setting. In order to ensure that people with disabilities and older adults enjoy the same quality of life as other Minnesotans, the services and supports that they depend on must be available in the homes and communities where they choose to live.

By 1995, Minnesota had shifted from predominantly institution-based care to predominantly home- and community-based care. These services became a Medicaid state plan option in Minnesota in 2005. Home and community-based services are generally more cost effective and preferred by the people who rely on services.

The chart below shows that more enrollees receiving LTSS choose home and community-based services in Minnesota each year.

Minnesota has received federal approval to use Medicaid dollars to pay for these services through its home and community-based services waiver programs. These programs allow Medicaid to pay for services for people in their homes and communities if the services would otherwise be eligible for coverage in nursing facilities or hospitals.

DHS administers waiver programs in collaboration with county and tribal social services and public health programs. The vast majority of Minnesota's Medicaid spending on long-term care services and supports goes to enrollees in home- and community-based waiver programs. For example, more than 90 percent of Medicaid long-term care spending for people with disabilities in Minnesota goes toward services provided in the community.

In FY 2017, an average of about 61,000 people received home care and waived services per month. Total spending on waiver and home care services was just over \$3 billion FY2017, and roughly half of this was from state funds.

Minnesota operates five home and community-based waivers:

- **Brain Injury (BI):** Allows Medicaid to cover services for people with a brain injury who need the level of care provided in a nursing facility or neurobehavioral hospital and choose to receive such care in home and community-based service settings.
- **Community Alternative Care (CAC):** Allows Medicaid to cover services for people who are in need of the level of care provided at a hospital and choose to receive such care in home or community-based service settings.
- **Community Access for Disability Inclusion (CADI):** Allows Medicaid to cover services for people who need the level of care provided in nursing facilities and choose to receive such care in home and community-based service settings.
- **Developmental Disabilities (DD):** Allows Medicaid to cover services for people with developmental disabilities who need the level of care provided at an intermediate care facility for people with developmental disabilities and choose to receive such care in home and community-based service settings.
- **Elderly Waiver (EW):** Allows Medicaid to cover services for those age 65 and older who need the level of care provided in a nursing facility and choose to receive such care in home and community-based service settings.

These waivers can offer:

- in-home and residential supports
- medical and behavioral supports
- customized day services
- employment supports
- Consumer-Directed Community Supports (a self-directed option)
- caregiver supports
- transitional services to support people to move out of institutions or other congregate settings
- transportation
- home modifications and assistive technology
- case management
- other goods and services

Medical Assistance Basic Health Care

MA also provided comprehensive coverage outside of long-term care to over one million Minnesotans in FY 2017. Total spending for basic health care services reached about \$6.9 billion in FY 2017, with \$2.5 billion coming from state funds. The enhanced federal share available with the MA expansion in 2014 reduced the overall share of basic care expenditures to just over 36 percent in FY 2017, a decrease from about 50 percent in FY 2013.

Basic health care services covered in the MA benefit include:

- primary and preventive care
- inpatient hospital benefits
- mental health and chemical dependency treatment
- medical transportation
- medical equipment
- prescription drugs
- dental care
- coverage for eyeglasses and eye care

MA Coverage of Basic Health Care for Elderly and Disabled

People receiving these services are low-income elderly (65 years or older) and people who are blind or have a disability. Their income and assets must be below allowable limits. As MA enrollees they receive health care coverage or financial assistance to help them pay for their Medicare premiums and cost sharing/copayments. This latter approach is often less expensive for the state than if the state provided their health coverage under MA alone.

This segment of the MA program also includes the Medical Assistance for Employed Persons with Disabilities (MA-EPD) program. MA-EPD working individuals with disabilities to receive the full MA benefit set. This program encourages people with disabilities to work and enjoy the benefits of being employed. It allows working people with disabilities to qualify for MA without an income limit and under higher asset limits than standard MA. More information on MA-EPD is available in the Medical Assistance for Employed Persons with Disabilities brochure (<http://edocs.dhs.state.mn.us/lfserver/public/DHS-2087L-ENG>).

In FY2017, this segment of MA funds supported an average of 177,262 people per month, many of whom are also enrolled in Medicare and so are “dual eligible beneficiaries.” Total spending on this group was over \$2.5 billion in FY2015, about half of which came from state funds.

MA Coverage of Basic Health Care for Families with Children

Enrollees in this eligibility category include low income pregnant women, children, parents and caretaker relatives. This segment of the MA program also includes funding for the Minnesota Family Planning Program (MFPP) and the MA Breast and Cervical Cancer Treatment program (MABC). MFPP provides coverage of family planning and related health care services for people not currently enrolled in MA or MinnesotaCare. MABC covers treatment costs for breast cancer, cervical cancer or a precancerous cervical condition for women without health insurance. In FY 2017, this segment of MA funds supported an average of 705,441 people per month. Total spending on this group was nearly \$2.6 billion, about half of which came from state funds.

MA Coverage of Basic Health Care for Adults without Children

In FY 2017, MA covered an average of 199,951 adults without dependent children people per month. Total spending on this group was about \$1.8 billion, with about \$40 million coming from state funds.

A full list of Medical Assistance populations, income and asset limits is in a Minnesota Health Care Programs brochure (<https://edocs.dhs.state.mn.us/lfserver/Public/DHS-3182-ENG>).

Today, Minnesota's Medicaid program is a cornerstone of our state's system of health and long-term care coverage, with more than one million people covered in 2017, including children, parents, people with disabilities and seniors.

RESULTS

Type of Measure	Name of Measure	Previous	Current	Dates
Quality	Percent of older adults served by home and community-based services ¹	68.4%	72.9%	FY2013 to FY2017
Quality	Percent of people with disabilities served by home and community-based services ²	93.5%	94.6%	FY2013 to FY2017
Result	Percent of Minnesotans without health insurance ³	4.3%	6.3%	2015 to 2017
Result	Percent of Low Income Minnesotans without Health Insurance ⁴	8.5%	11.3%	2015 to 2017
Quantity	Number of MA and MinnesotaCare program enrollees served by an IHP ⁵	350,000	460,000	2015 to 2017
Quality	Estimated reduction in health care expenditures (below projections) for providers in Integrated Health Partnership demonstration project ⁶	\$48.3 million	\$60.7 Million	2016 to 2017

Performance Measure Notes:

1. This measure reflects the percentage of older adults receiving publicly-funded long-term care services who receive HCBS services through the Elderly Waiver or Alternative Care program instead of services in nursing homes. Measure compares FY 2013 and FY 2017 data. (Source: DHS Data Warehouse)
2. This is the percent of people with disabilities receiving publicly-funded long-term care services who receive HCBS services through disability waiver or home care programs instead of services in nursing homes or Intermediate Care Facilities. Measure compares FY 2013 and FY 2017 data. (Source: DHS Data Warehouse)
3. Measure is the percent of Minnesotans that do not have health insurance. Source: Minnesota Health Access Survey, Minnesota Department of Health. Compares 2013 (Previous) and 2015 (Current)
4. Measure is the percentage of uninsured Minnesotans with family income below 200% of poverty. Source: Minnesota Health Access Survey, Minnesota Department of Health. Compares 2013 (Previous) and 2015 (Current)
5. Measure is the number of enrollees served by an IHP provider. Compares 2015 (Previous) and 2017 (Current).
6. Measure is an estimated reduction in annual medical costs below projections for 2016 and 2017 for the providers enrolled in the IHP demonstration. IHP provider contracts require this measure be calculated in the same manner each year. The lower health care spending does not result in savings to the state of the same amount. This number includes savings to providers, health plans, the federal government, and the

state. Integrated Health Partnerships (IHPs) allow participating providers to enter into an arrangement with DHS to care for enrollees under a payment model that holds the participants accountable for the costs and quality of care their Medicaid patients receive. The goal of the program is to improve the quality and value of care provided to Medicaid and MinnesotaCare enrollees while lowering the cost through innovative approaches to care and payment.

Minnesota Statutes, chapter 256B provides the legal authority for the Medical Assistance program. An example of legislative directives to improve and innovate in Medical Assistance is M.S. section 256B.021 (Medical Assistance Reform Waiver).

Activity: Alternative Care

mn.gov/dhs/people-we-serve/seniors/services/home-community/programs-and-services/alternative-care.jsp
mn.gov/dhs/people-we-serve/seniors/services/home-community/programs-and-services/essential-community-supports.jsp

AT A GLANCE

- The Alternative Care Program served 3,659 people, averaging 2,543 enrollees per month with an average monthly benefit of \$924 in FY 2017.
- Enrolled consumers contributed a total of \$1.9 million towards their cost of care.
- Essential Community Support grants are included as part of the Alternative Care Budget activity and serve 244 enrollees each month with an average monthly benefit of \$227 in FY 2017.
- All funds spending for the Alternative Care activity for FY 2017 was \$28.9 million. This represented 0.18 percent of the Department of Human Services overall budget.

PURPOSE & CONTEXT

The Alternative Care (AC) Program is a cost-sharing program that provides certain home and community-based services for Minnesotans age 65 and over. Alternative Care services support seniors, their families, caregivers and communities to help seniors to stay in their homes and communities and avoid costly institutionalization.

The program is a cost-effective strategy to prevent or delay people from moving onto Medical Assistance long-term care services, such as Elderly Waiver and nursing home care. The program helps prevent the impoverishment of eligible seniors and maximizes the use of their own resources by sharing the cost of care with clients. AC is available to individuals who need the level of care provided in a nursing home but choose instead to receive services in the community, and whose income and assets would be inadequate to fund a nursing home stay for more than 135 days.

SERVICES PROVIDED

Alternative Care (AC) services are used in a person's own home. AC covers the following services: adult day services, caregiver assessment, case management, chore services, companion services, consumer-directed community supports, home health aides, home-delivered meals, homemaker services, environmental accessibility adaptations, nutrition services, personal emergency response system, personal care, respite care, skilled nursing, specialized equipment and supplies, training and support for family caregivers and transportation.

Beginning January 1, 2015, some people who have a lower level of need for long-term care services no longer qualify to have Medical Assistance pay for nursing facility care and community-based alternatives. Those people will instead be served by Essential Community Support grants. Essential Community Support grants cover the following services: adult day services, service coordination (case management), chore services, home delivered meals, homemaker services, personal emergency response, caregiver education/training, and community living assistance. People can qualify for up to \$424 a month for these services. These grants are included as part of the Alternative Care budget activity.

DHS partners with community providers, counties, tribal health groups and the Department of Health in providing and monitoring services.

The AC program is funded with state and federal money along with monthly fees paid by the person receiving services. Payments made by the state for AC services are also subject to estate recovery. Essential Community Support grants are state funded only.

More information is available on the Alternative Care fact sheet (<https://edocs.dhs.state.mn.us/lfserver/Public/DHS-4720-ENG>).

RESULTS

The agency monitors performance measures that show how this program is working. One key measure is how well people who are eligible for publically funded long-term services and supports access the services in their homes and community rather than in nursing facilities.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Result	Percent of older adults served by home and community-based services ¹	68.4%	72.9%	2013 to 2017
Quantity	Percent of long-term services and support expenditures for older adults spent on home and community-based services ²	45.1%	48.6%	2013 to 2017
Quantity	Percent of AC spending on Consumer-Directed Community Supports (CDCS) ³	5.4%	9.9%	2013 to 2017

Performance Notes:

1. Measure 1 compares FY2013 to FY2017. This measure shows the percentage of older adults receiving publicly-funded long-term services and supports who receive home and community-based services through the Elderly Waiver, Alternative Care, or home care programs instead of nursing home services. (Source: MMIS Claims)
2. Measure two compares FY2013 to FY2017 data. This measure shows the percentage of public long-term service and support funding for older adults that is spent on Elderly Waiver, Alternative Care or home care services instead of nursing home services. (Source: MMIS Claims).
3. Measure three compares FY2013 to FY2017 data. CDCS gives persons more flexibility and responsibility for directing their services and supports—compared to services provided through the traditional program – including hiring and managing direct care staff. (Source: MMIS Claims)

More information is available on the DHS Dashboard (<http://dashboard.dhs.state.mn.us/>).

The Alternative Care and Essential Community Support programs are authorized by Minnesota Statutes, sections 256B.0913 (<https://www.revisor.mn.gov/statutes/?id=256B.0913>) and 256B.0922 (<https://www.revisor.mn.gov/statutes/?id=256B.0922>).

Program: Forecasted Programs

Activity: Chemical Dependency Treatment Fund

mn.gov/dhs/people-we-serve/children-and-families/health-care/substance-abuse/programs-and-services/

AT A GLANCE

- In the United States, 20.1 million people aged 12 and older had substance use disorders (CY 2016).
- Statewide, there were 56,157 admissions for substance use disorder treatment in 2016, which represents a 6 percent increase over 2015.
- The Chemical Dependency (CD) Treatment Fund pays for a little more than 43.6 percent of all admissions for substance abuse disorder treatment in Minnesota.
- The percentage of people completing substance use disorder was 51 percent in 2016.
- All funds spending for the CD Treatment Fund activity for FY 2017 was \$189 million, which represents 1.2% of the Department of Human Services overall budget.

PURPOSE & CONTEXT

The Chemical Dependency (CD) Treatment Fund activity pays for residential and outpatient substance use disorder (SUD) treatment services for eligible low-income Minnesotans.

People access the SUD treatment services paid by the fund by first being assessed as needing treatment for Substance Use Disorder, and second by meeting financial eligibility guidelines. Financial eligibility standards are similar to those for Medical Assistance, the state's Medicaid program.

Counties and tribes are responsible for providing assessments (known as "Rule 25" assessments) to individuals seeking access to these funds. These assessments not only determine an individual's eligibility for services paid for by the CD Treatment Fund but also determine the appropriate level or intensity of services the person may need based on their condition and circumstances. Through legislation passed in 2017, Minnesota is transitioning from Rule 25 assessments to provider-based comprehensive assessments. This allows for direct access to placement for people in need of SUD treatment services. The 2017 legislation allows providers to be reimbursed for comprehensive assessment, treatment coordination and/or peer support services, in addition to formal treatment services, while delivering long term care to the recipient.

SERVICES PROVIDED

The Consolidated Chemical Dependency Treatment Fund (CCDTF) is the single fee-for-service public payment source that funds residential and outpatient substance use disorder treatment services for eligible low-income Minnesotans. The CCDTF combines multiple funding sources – state appropriations, county funding, federal Medicaid funding and the federal Substance Abuse, Prevention and Treatment block grant – into a single fund with common eligibility criteria and a single process for evaluating treatment need and placement options. Federal Medicaid matching funds are collected on eligible treatment services provided to Medical Assistance recipients. Counties also contribute a share toward the cost of treatment. Counties pay 30 percent of the non-federal share of treatment costs for Medical Assistance (MA) recipients and 22.95 percent for non-MA recipients (this amount was reduced to 20.2 percent for FY 2017). The CCDTF pays for services that are part of a licensed residential or non-residential SUD treatment program. The CCDTF ensures that all clients have the same access to high quality, effective treatment programs.

All of these programs provide a continuum of effective, research-based treatment services for individuals who need them. Treatment services include individual and group therapy in outpatient or residential settings, and may

also include treatment for a mental illness, other medical services, medication-assisted therapies (with or without adjunct behavioral services), and service coordination.

SUD treatment providers use a variety of evidence-based practices, such as the twelve-step facilitation program, cognitive behavioral therapies, specialized behavioral therapy, motivational interviewing and motivational enhancement therapy as methods to ensure success.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous (CY2013)</i>	<i>Current (CY2015)</i>	<i>Dates</i>
Quantity	Number of treatment admissions to substance use disorder treatment ¹	54,242	56,157	2015 to 2016
Result	Percent of persons completing substance use disorder treatment	51.5%	51%	2015 to 2016
Result	Change in percent of clients who reported alcohol use within the last 30 days at time of admission and then again at the time of discharge	Admit 36.7% Discharge 11.1%	Admit 34.7% Discharge 9.3%	2015 to 2016 2015 to 2016

Measure Notes:

1. This indicator is from the Drug and Alcohol Abuse Normative Evaluation System (DAANES) in the Performance Measurement & Quality Improvement section in the Alcohol and Drug Abuse Division of the Minnesota Department of Human Services.

Minnesota Statutes chapter 254B (<https://www.revisor.mn.gov/statutes/?id=254B>) provides the legal authority for the CD Treatment Fund. M.S. section 254B.01, Subd.3 (<https://www.revisor.mn.gov/statutes/?id=254B.01>) defines chemical dependency services payable by the CD Treatment Fund. This definition applies to a wide variety of services within a planned program of care to treat a person's chemical dependency, or substance use disorder.

Program: Grant Programs

Activity: Support Services Grants

dhs.state.mn.us/main/id_004112

<http://mn.gov/dhs/people-we-serve/children-and-families/economic-assistance/food-nutrition/programs-and-services/e-and-t.jsp>

AT A GLANCE

- Provides employment services to approximately 26,500 people per month receiving Minnesota Family Investment Program/Diversionary Work Program (MFIP/DWP).
- Provides employment services to approximately 2,000 people per month receiving Supplemental Nutrition Assistance Program (SNAP).
- All funds spending for the Support Services Grants activity for FY 2017 was \$96.8 million. This represented 0.61 percent of the Department of Human Services overall budget.

PURPOSE & CONTEXT

Support Services Grants cover the cost of services creating pathways to employment for low income families receiving benefits from the Minnesota Family Investment Program (MFIP), Diversionary Work Program (DWP) and the Supplemental Nutrition Assistance Program (SNAP). This is accomplished by addressing barriers, helping stabilize families and adults, and building skills that ensure participants are prepared to find and retain employment.

The primary focus of MFIP and DWP is self-sufficiency through employment, by building on job placements in today's economy and focusing on future workforce development. Support Services Grants ensure that a foundation is there to deliver key activities to help families meet their basic needs and achieve their highest potential.

SERVICES PROVIDED

The Support Services Grants activity provides funding for the MFIP Consolidated Fund. Counties and tribes use the MFIP Consolidated Fund to provide an array of employment services including job search, job placement, training and education. The Consolidated Fund also provides other supports such as emergency needs for low-income families with children.

In addition to helping those on MFIP/DWP, the Support Services Grants activity also provides funding for employment supports for adults who receive benefits through the Supplemental Nutrition Assistance Program (SNAP), or the SNAP Employment and Training program.

Services are delivered by Workforce Centers, counties, tribes and community agencies. Service providers evaluate the needs of each participant and develop an individualized employment plan that builds on strengths and addresses areas of need. Services include:

- Referrals to housing, child care, and health care coverage, including any needed chemical and mental health services, to aid in stabilizing families
- Basic education, English proficiency training, skill building and education programs to prepare participants for the labor market
- Job search assistance and job placement services to help participants locate employment that matches their skills and abilities
- Innovative programs to address special populations or needs such as: a single point of contact for teen parents that includes public health home visits, subsidized work experiences, integrated services for

families with serious disabilities and support for the FastTRAC program, which links education and credentials to high demand careers

Support Services Grants also fund a portion of county and tribal costs to administer MFIP and DWP. Support Services Grants are allocated to counties and tribes, and are funded with a combination of state and federal funds, including from the federal Temporary Assistance for Needy Families (TANF) block grant.

RESULTS

The two key measures in MFIP/DWP are:

- The **Self-Support Index (S-SI)**, which is a results measure. The S-SI shows the percentage of adults eligible for MFIP or DWP in a quarter who have left assistance or are working at least 30 hours per week three years later. Customized targets are set for each county or tribe using characteristics of the people served and local economic conditions. State law requires the Department of Human Services to use the Self-Support Index to allocate performance bonus funds. The chart following shows that about two-thirds of participants have left MFIP or DWP and/or are working at least 30 hours per week three years after a baseline period.

<i>Year ending in March of:</i>	<i>S-SI</i>
2010	67.0%
2011	65.2%
2012	65.3%
2013	66.9%
2014	68.5%
2015	68.8%
2016	68.0%
2017	65.9%
2018	64.6%

- The federal Work Participation Rate (WPR), which is a measure of quantity. The WPR shows parents engaging in work and specific work-related activities. We calculate an estimated WPR for counties, county consortiums and tribes monthly, and it is annualized to allocate performance bonus funds. (Beginning in calendar year 2016, the bonus will be based solely on the S-SI.) The chart following shows the WPR for 2008 to 2015.

<i>Federal Fiscal Year</i>	<i>WPR</i>
2008	29.9%
2009	29.8%
2010	40.2%
2011	43.9%
2012	45.3%
2013	45.1%
2014	46.2%
2015	37.9%
2016	39.4%
2017	38.9%

Another employment-related, state-mandated performance measure tracked is:

- **MFIP/DWP Median Placement Wage**, a quality measure that reflects the number of people getting jobs and the median wage. The chart shows the statewide median hourly starting wage. (Tribes are not included.)

<i>Calendar Year</i>	<i>Median Placement Wage Per Hour for MFIP Clients</i>	<i>Median Placement Wage Per Hour for DWP Clients</i>
2008	\$9.00	\$9.39
2009	\$9.00	\$9.30
2010	\$9.50	\$9.50
2011	\$9.50	\$9.50
2012	\$9.95	\$10.00
2013	\$10.00	\$10.00
2014	\$10.29	\$10.00
2015	\$11.00	\$11.00
2016	\$11.50	\$11.50
2017	\$12.00	\$12.00

The legal authority for Support Services Grants is M.S. sections 256J.626
(<https://www.revisor.mn.gov/statutes/?id=256J.626>) and 256D.051
(<https://www.revisor.mn.gov/statutes/?id=256D.051>)

Program: Grant Programs

Activity: Basic Sliding Fee Child Care Assistance Grants

mn.gov/dhs/people-we-serve/children-and-families/economic-assistance/child-care/programs-and-services/basic-sliding-fee.jsp

AT A GLANCE

- In 2017 Basic Sliding Fee (BSF) child care program provided child care assistance to 13,241 children in 6,911 families in an average month.
- As of June 2018, there are 1,968 families eligible for assistance but on a waiting list for services.
- The average monthly assistance per family was \$1,142.
- All funds spending on BSF child care assistance grants for FY 2017 was \$96 million. This represented 0.61 percent of the Department of Human Services overall budget.

PURPOSE & CONTEXT

In order to work, families need safe and reliable child care. The annual cost of full time licensed care for one child can exceed \$10,000. Many low-income families struggle to find affordable child care that fits their needs. The Basic Sliding Fee (BSF) child care program provides financial subsidies to help low-income families pay for child care through the Child Care Assistance Program. Families earning no more than 47 percent of the state median income (\$36,365 in 2015 for a family of three) are eligible to enter the BSF program. Families leave the Child Care Assistance Program when their earnings are greater than 67 percent of state median income (in October 2015, that level was set at \$51,841 for a family of three) or when their copayment exceeds their cost of care.

SERVICES PROVIDED

BSF child care assistance grants provide support to help improve outcomes for the most at-risk children and their families by increasing access to high quality child care.

Families must be working, looking for work or attending school to be eligible for the Basic Sliding Fee Program. The program helps families pay child care costs on a sliding fee basis. As family income increases, so does the amount of child care expenses (copayment) paid by the family. All families receiving child care assistance and earning 75 percent or more of the federal poverty guideline make copayments based on their income. A family of three earning 55 percent of the state median income (\$42,555) would have a total biweekly copayment of \$138 for all children in care.

BSF child care assistance grants are part of the state's Child Care Assistance Program. Maximum rates for provider payment in the Child Care Assistance Program are set in state law. Maximum rates are set for each type of care: child care centers, family child care and legal non-licensed child care. Providers are paid at the rate they charge in the private child care market, up to this limit. The program pays a higher rate to providers who have met quality standards through Parent Aware, are accredited, or hold certain educational credentials.

Child care must be provided by a legal child care provider over the age of 18 years. Allowable providers include legal non-licensed family child care, license-exempt centers, licensed family child care and licensed child care centers. Families choose their providers in the private child care market. Counties administer the Child Care Assistance Program.

BSF funding is a capped allocation. It includes a combination of state funds and federal funding from the Child Care Development Block Grant and the Temporary Assistance for Needy Families program. The Department of

Human Services allocates funding to counties for program administration. Demand for the program exceeds available funds and families are waitlisted based on prioritization established in law. As of June 2018, there were 1,968 families on the waiting list.

RESULTS

Percent of Provider Prices Fully Covered by CCAP - Maximum rates paid to providers under the Child Care Assistance Program may not cover the full cost of child care. This may be a barrier for some families if they cannot find a provider in their community whose prices are covered by the maximum allowed under the program. The percent of child care providers who charge prices that are fully covered by the Child Care Assistance Program increased when the maximum rates were raised in 2014, but the maximum rate paid remains low compared to prices in the market.

This quality measure shows approximately 22% of family child care providers and approximately 29% of child care centers charge prices that are fully covered by the Child Care Assistance Program maximum rates.

Provider prices fully covered by Standard Maximum Rates statewide, by percent

Quality Differential Impact - Parent Aware is Minnesota's rating tool for helping parents select high quality child care and early education programs. The Child Care Assistance Program allows up to a 15 percent higher maximum rate to be paid to providers with a Parent Aware 3-star rating, or who hold certain accreditation or education standards established in statute. Up to a 20 percent higher maximum rate can be paid to providers with a 4-star Parent Aware rating.

This quality measure shows that higher maximum rates may increase families' access to high quality providers by allowing the maximum rate paid by the Child Care Assistance Program to fully cover more (or an equivalent proportion) of their prices as compared to the prices charged by all providers. This measure indicates the impact of quality differentials by type of care. It is first presented as a statewide total, and then broken out by metro and non-metro counties.

Prices fully covered by Standard and Quality Differential Maximum Rates – 2016

Specifically, the 20 percent differential allows the prices charged by center based four-star rated metro providers to be fully covered by the maximum subsidy in the same proportion as the prices of all metro center providers. The higher maximum rates offer coverage of the prices charged by all other types of quality providers at higher levels than the standard maximum rates.

Use of High Quality Care - Children who participate in high quality early care and education are more likely to experience school success and positive life-long outcomes. This quality measure shows that the percent of all children receiving child care assistance through providers eligible for the higher subsidy rates for quality has increased from 23 percent in quarter four of 2013 to 48 percent in 2017.

Child's Provider Credentials	2013	2014	2015	2016	2017
Provider holds Parent Aware 3-4 Star*	NA	28%	34%	40%	43%
Provider holds Accreditation*	29%	8%	6%	5%	5%
Provider holds Parent Aware 1-2 Star	NA	NA	NA	8%	6%
Standard Care	71%	64%	60%	47%	46%

* These providers are eligible for CCAP higher rates for quality.

In 2014 a statute change allowed providers to qualify for the higher maximum subsidy rate through receiving a Parent Aware rating of 3-or-4-Stars. Previously only providers holding certain accreditations and family child care providers meeting certain education standards were eligible. In this figure, child care settings were categorized according to the quality standard they meet to be eligible for the CCAP quality differential.

- In 2013 settings meeting quality standards though accreditations/credentials may also have been highly rated by Parent Aware. In 2014-2015 settings that hold both a 3-or-4 Star Parent Aware rating and an accreditation or educational credential, are included in the Parent Aware rated category.

The data source for the prices charged by providers is a biennial survey of provider prices conducted by the Department. To assess the portion of provider prices fully covered, provider prices are compared to the applicable maximum subsidy rates.

The data source for children in care with provider's eligible of the higher rates for quality is from MEC2, Minnesota's child care electronic eligibility and payment system.

The legal authority for the Basic Sliding Fee (BSF) Child Care Assistance program is in M.S. chapter 119B. (<https://www.revisor.mn.gov/statutes/?id=119B>)

Program: Grant Programs

Activity: Child Care Development Grants

mn.gov/dhs/people-we-serve/children-and-families/services/child-care/

AT A GLANCE

- As of July 2018, 2,763 child care and early education programs have a Parent Aware rating.
- 2,538 family child care providers and 10,191 child care center staff are active users on *Develop*, Minnesota's Quality Improvement and Registry Tool.
- 3,790 individuals received coaching and support services to increase quality of care to children in FY18.
- All funds spending for the Child Care Development Grants activity for FY 2017 was \$18.1 million. This represented 0.1 percent of the Department of Human Services overall budget.

PURPOSE & CONTEXT

Child Care Development Grants fund services that promote children's development and learning through initiatives that increase the availability of quality care and education in Minnesota. These grants support Parent Aware, Minnesota's Quality Rating and Improvement System. Parent Aware offers tools and resources that help families access quality child care and early education that will prepare them for school and for life. It also provides resources to help child care programs improve their practices.

It is important that all children and their families have access to high quality child care and early education programs. The first few years of children's lives are key to their intellectual, emotional and social development. Everyone wants to know that children are being well cared for while family members are at work or school. High quality child care that is available and affordable is important to children's safety and healthy development, and to families' self-sufficiency.

SERVICES PROVIDED

The Department of Human Services (DHS) works with public and private agencies, as well as individuals to promote school readiness through education and training. Child Care Development Grants are used to support services that improve the quality of early childhood and school-age care, and increase access to high quality care, especially for high-needs children. This grant activity also supports consumer education services for parents searching for child care. Services support:

- Information for parents searching for quality child care and early education for their children through Parent Aware, an online search tool (Parent Aware website, <http://parentaware.org/>), and other parent education services provided by Child Care Aware of Minnesota
- Grants, financial supports and other incentives for child care programs to improve quality, including for those participating in the voluntary Parent Aware Quality Rating and Improvement System
- Training, coaching, consultation and other workforce supports for early childhood and school-age care providers to increase their knowledge and skills in child development, instructional practices and ways to meet the needs of individual children
- Reimbursement to child care programs and providers to cover some of the fees charged to complete a nationally recognized child care accreditation program

Child Care Development Grants are funded primarily through the federal Child Care and Development Block Grant.

RESULTS

Use of High Quality Child Care - Children who participate in high quality child care and early education are more likely to experience school success and positive life-long outcomes. This measure shows that the percent of all children receiving child care assistance through providers eligible for the higher subsidy rates for quality has increased from 23 percent in quarter four of 2012 to 38 percent in quarter three of 2016. This represents a 65 percent increase over the 4-year period.

Number of Programs Rated by Parent Aware – Parent Aware improves children’s outcomes by improving families’ access to high quality child care. This measure shows that the percentage of child care and early education programs with a Parent Aware rating increased from 2015 to 2016.

Provider Education Levels – Child care and early education professionals with degrees or credentials are needed to provide the kind of early learning opportunities that will make a difference for children’s outcomes. This measure shows that the number of early childhood educators who earned a degree or credential in Minnesota increased from 947 in 2014 to 1,136 in 2015.

Searches for Quality Care Through Parent Aware - A new and improved website for parents was launched in FY2015 to better meet parents’ needs in choosing child care. After this launch, the website experienced a large increase in visitors in a short period of time.

<i>Type of Measure</i>	<i>Description</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Result	Percent of children receiving child care assistance in high quality settings ¹	38%	47%	2016 & 2017
Quantity	Percent of child care and early education programs with a Parent Aware rating ²	22%	25%	2017 & 2018
Quantity	Number of family child care providers and teachers working directly with children with a Credential, CDA or Degree (AAS, BA/BS or higher) ³	4,436	4,785	2017 & 2018
Quantity	Number of unique visitors on Parent Aware.org ⁴	92,193	98,658	2017 & 2018

Performance Measures notes:

1. Data is from the Department of Human Services (DHS) and includes the number of children receiving child care assistance served in high quality settings that were accredited or credentialed in 2016 (Q3), and the number of children receiving child care assistance served in high quality settings that were accredited or credentialed in 2017 (Q3).
2. Data is from DHS and includes licensed child care programs (DHS and tribally licensed family child care and child care centers), Head Start/Early Head Start programs, and public schools prekindergarten sites as of Dec. 31 of the reporting year.
3. Data is from Develop on Aug. 13, 2018, with the parameters of July 1, 2016 to June 30, 2017 for SFY17; and July 1, 2017 to June 30, 2018 for SFY18. This included only persons identifying as Teachers or Family child care providers. It is not a requirement for members of the child care and early education workforce to be registered or using Develop.
4. Data is collected via Google Analytics reports from Parent Aware.org using the State Fiscal Year.

The legal authority for the Child Care Development Grant activities is M.S. chapter 119B (<https://www.revisor.mn.gov/statutes/?id=119B>).

Program: Grant Programs

Activity: Child Support Enforcement Grants

mn.gov/dhs/people-we-serve/children-and-families/services/child-support/

AT A GLANCE

- County and state child support offices provide services to more than 346,000 custodial and non-custodial parents and their 240,000 children.
- In 2017, the child support program collected and disbursed \$580 million in child support.
- Access and visitation funds served 675 children in 2017.
- All Funds spending for the Child Support Enforcement Grants Activity for FY 2017 was \$1.6 million dollars. This represented 0.01 percent of the Department of Human Services overall budget.

PURPOSE & CONTEXT

Every child needs financial and emotional support. Minnesota's child support program benefits children by enforcing parental responsibility for their support.

The MN child support program plays an active role in reducing the reliance on other state income maintenance programs given the significant amount of child support that is collected and sent directly to families.

Child support represents a high proportion of income for low income custodial parents. Eleven percent of cases are currently on public assistance and 48 percent of cases were former on public assistance cases. Eighty-seven percent of custodial parents who are eligible for child support are women.

Child Support Enforcement Grants help strengthen families by providing financial supports. Child support helps families become self-sufficient.

SERVICES PROVIDED

Child support activities are administered by counties and tribes under state direction and supervision. Staff provides assistance for custodial parents in obtaining basic support, medical support and child care support for children, through locating parents and establishing paternity and support obligations. Without this assistance, many families would not have the financial resources to remain self-sufficient.

The following activities help to support and stabilize families:

- Establish paternity through genetic testing, Recognition of Parentage or other means;
- Establish and modify court orders for child support, medical support and child care support, based on statutory guidelines;
- Enforce court orders to assure payment through remedies established in federal regulation and state law, such as income withholding, driver's license suspension and passport denial; and
- Collect and process payments from employers, parents, counties and other states, and issue support funds to families.

Additional grants provide federal funding to improve non-custodial parents' access to their children. Funding is a mix of federal funds, state general funds and fees.

RESULTS

The federal government funds state child support programs in part through performance incentives. These are calculated by measuring the state's performance in core activities: Paternity establishment, order establishment, collection of current support, collection of arrears (past due support) and program cost effectiveness. States are

ranked by their scores on the measures and earn higher incentives as performance increases. Each percentage measurement has a threshold of 80 percent to earn the maximum incentive for that measure. To maximize the incentive for cost-effectiveness, states must collect \$5.00 for every dollar spent on the child support program.

Minnesota's child support performance has increased in all measures over the last five years. Minnesota ranks among the top five states on child support collections measures. In 2015, Minnesota earned \$12 million dollars in federal incentives. The federal incentives are passed on to counties to help cover their administrative costs of the program.

<i>Type of Measure</i>	<i>Performance Measures¹</i>	<i>FFY 2017</i>	<i>FFY 2016</i>	<i>FFY 2015</i>	<i>FFY 2014</i>	<i>FFY 2013</i>
Quantity	Paternities established: percent of children born outside marriage for whom paternity was established in open child support cases for the year	101%	101%	99%	100%	102%
Quantity	Orders established: percent of cases open at the end of the year with orders established	89%	89%	88%	88%	86%
Quantity	Collections on current support: percent of cases with current support due within the year that had a collection on current support	75%	74%	73%	72%	71%
Quantity	Collections on arrears: percent of cases with arrears due within the year that had a collection on arrears	72%	72%	72%	70%	70%
Quality	Cost effectiveness: dollars collected per dollar spent	\$3.30	\$3.30	\$3.54	\$3.58	\$3.63

Performance Measures notes:

1. Federal performance measures are listed in the 2017 Minnesota Child Support Performance Report (<https://www.leg.state.mn.us/docs/2018/other/180484.pdf>).
2. FFY = federal fiscal year
3. Paternities established can be higher than 100 percent because the results include children born in prior years for whom paternity has been established in that year.

The legal authority for Child Support Enforcement Grants comes from federal and state laws.

Federal law 42 U.S.C. secs. 651-669b requires that states establish a child support program and gives general guidelines for administering the program. (Title 42 651) (<http://www.gpo.gov/fdsys/pkg/USCODE-2012-title42/pdf/USCODE-2012-title42-chap7-subchapIV-partD.pdf>)

State law:

Requires a person receiving public assistance to assign child support rights to the state and cooperate with child support services (M.S. sec. 256.741, <https://www.revisor.mn.gov/statutes/?id=256.741>)

Provides legal authority to establish child support (M.S. sec. 256.87, <https://www.revisor.mn.gov/statutes/?id=256.87>) and to establish paternity (M.S. sec. 257.57, <https://www.revisor.mn.gov/statutes/?id=257.57>)

Provides legal authority to set and collect fees for child support services (M.S. sec. 518A.51, <https://www.revisor.mn.gov/statutes/?id=518A.51>), and requires the state to establish a central collections unit (M.S. sec. 518A.56, <https://www.revisor.mn.gov/statutes/?id=518A.56>).

Program: Grant Programs

Activity: Children's Services Grants

<https://mn.gov/dhs/people-we-serve/children-and-families/services/child-protection/>

AT A GLANCE

In 2017:

- 30,927 reports of child abuse and neglect were assessed involving 39,606 children
- Of these, 8,447 children were determined to be victims of child maltreatment
- 16,593 children experienced an out-of-home placement
- All funds spending for the Children's Services Grants activity for FY 2017 was \$73 million. This represented 0.46 percent of the Department of Human Services overall budget.

PURPOSE & CONTEXT

The purpose of Children's Services Grants is to provide families and communities with resources to keep children safe, especially in times of stress. The goal of grants is to strengthen families and provide resources to help children thrive in stable, nurturing environments. Grants help to minimize long-term intervention costs for crime, corrections, truancy, hospitalization, special education and mental health care.

SERVICES PROVIDED

The Children's Services Grants activity funds child welfare services around the state, including Indian child welfare services, child protection, homeless youth services, and child abuse and neglect services through counties, tribes, and community-based providers. Grants provide supports to help keep more children out of foster care and safely with their families, and to decrease the disproportionate number of children of color in out-of-home placements. Most recently these grants have been used to:

- Reform the child welfare system to focus on ensuring children's safety while supporting families
- Improve the Minnesota Child Welfare Training System
- Work with tribes to design and develop tribal approaches that ensure child safety and permanency
- Transfer responsibilities from counties to tribes to deliver a full continuum of child welfare services to American Indian children and families on two reservations
- Expand the Parent Support Outreach Program (PSOP <https://edocs.dhs.state.mn.us/lfserver/Public/DHS-4472A-ENG>) by doubling the number of counties in the program.

These services are essential in keeping children safe and families stable. Children's Services Grants include state and federal funding for child welfare services.

RESULTS

The Department of Human Services monitors the performance of counties and tribes in delivering child welfare services. Minnesota outcomes match or exceed most federal standards. Efforts to engage families early and collaboratively with evidence-based interventions have resulted in improving safety and timely permanency outcomes.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>2014</i>	<i>2015</i>	<i>2016</i>	<i>2017</i>
Quality	Percent of children not experiencing repeated abuse or neglect within 12 months of a prior report	94.3%	94.5%	91.8%	91%
Quality	Percent of all children who enter foster care in the previous year that are discharged to permanency (i.e., reunification with parents, caregivers, living with relative, guardianship, adoption) within 12 months	60%	56.1%	50.6%	47.5%
Quality	Percent of all children in foster care who had been in care between 12 and 23 months on the first day of the year that were discharged to permanency within 12 months of the first day of the year	50%	44.8%	48.1%	51.2%
Quality	Percent of all children in foster care who had been in care for 24 months or more on the first day of the year that were discharged to permanency within 12 months of the first day of the year	17.4%	23.1%	25.2%	28.8%

Performance Measures notes:

Measures from the Research and Evaluation unit of the Child Safety and Permanency Division at the Department of Human Services.

(http://www.dhs.state.mn.us/main/idcplg?IdcService=GET_DYNAMIC_CONVERSION&RevisionSelectionMethod=LatestReleased&dDocName=dhs16_148137).

Several state statutes provide the legal authority for the Children's Services Grants activity:

Provisions for reasonable efforts, Interstate Compact on Placement of Children and Minnesota Indian Preservation Act are in M.S. chapter 260 (<https://www.revisor.mn.gov/statutes/?id=260>)

Provisions for juvenile protection are in M.S. chapter 260C (<https://www.revisor.mn.gov/statutes/?id=260C>)

Provisions for voluntary foster care for treatment are in M.S. chapter 260D (<https://www.revisor.mn.gov/statutes/?id=260D>)

Reporting of Maltreatment of minors is under M.S. section 626.556 (<https://www.revisor.mn.gov/statutes/?id=626.55>)

Program: Grant Programs

Activity: Child & Community Service Grants

Child Protection:

(http://www.dhs.state.mn.us/main/idcplg?IdcService=GET_DYNAMIC_CONVERSION&RevisionSelectionMethod=LatestReleased&dDocName=id_000152)

Adult Protective Services Unit:

(http://www.dhs.state.mn.us/main/idcplg?IdcService=GET_DYNAMIC_CONVERSION&RevisionSelectionMethod=LatestReleased&dDocName=id_005710)

AT A GLANCE

In 2017:

- 30,927 reports of child abuse and neglect were assessed involving 39,606 children
- 1,563 children were either adopted or had a permanent transfer of legal custody to a relative
- 57,180 reports of suspected maltreatment of a vulnerable adult were received, screened and dispatched
- 27,969 reports of suspected maltreatment of a vulnerable adult were assessed by a county
- 7,962 reports of suspected maltreatment of a vulnerable adult were investigated by a county
- All funds spending for the Children & Community Services activity for FY 2017 was \$88.6 million. This represented 0.56 percent of the Department of Human Services overall budget.

PURPOSE & CONTEXT

Under the state Vulnerable Children and Adult Act, Child and Community Services Grants provide funding to support core safety services for vulnerable children and adults, including response to reports of maltreatment, assessments of safety and risk, case management and other supportive services that help keep children and adults safely in their own homes.

The grants provide funding that support counties' administrative responsibility for child protection services and foster care. The funding also helps counties to purchase or provide these services for children, vulnerable adults and families.

SERVICES PROVIDED

Funding through these grants provides core safety services that focus on preventing or remedying vulnerable adult maltreatment and child neglect, preserving and rehabilitating families, and providing for community-based care. Services include:

- Response to reports of child and adult maltreatment, and assessment of safety and risk of harm
- Adoption and foster care supports for children
- Case management and counseling

Children and Community Services Grants provide child protection services to help keep more children out of foster care and safely with their families, and to decrease the disproportionate number of children of color in out-of-home placements. They help ensure that vulnerable children and adults are better protected and receive support services in their communities.

Allocated to counties through the state's Vulnerable Children and Adult Act, these grants include state funds and the federal Social Services Block Grant.

This budget activity also includes a smaller set of grant funds that support initiatives by the White Earth and Red Lake Nations to operate their own human services systems.

RESULTS

The Department of Human Services monitors the performance of counties in delivering child welfare and adult protective services. Minnesota outcomes match or exceed most federal child welfare standards. Efforts to engage families early and collaboratively with evidence-based interventions have resulted in improving safety and timely permanency outcomes for children.

Measures provided by the Child Safety and Permanency Division at the Department of Human Services

Also see the DHS Child Welfare Data Dashboard

(www.dhs.state.mn.us/main/idcplg?dcService=GET_DYNAMIC_CONVERSION&RevisionSelectionMethod=LatestReleased&dDocName=dhs16_148137).

The legal authority for the Vulnerable Children and Adult Act is in M.S. chapter 256M

(<https://www.revisor.mn.gov/statutes/?id=256M>). This Act establishes a fund to address the needs of vulnerable children and adults in each county under a service plan agreed to by each county board and the commissioner of human services.

Program: Grant Programs

Activity: Child & Economic Support Grants

SNAP (mn.gov/dhs/people-we-serve/children-and-families/economic-assistance/food-nutrition/programs-and-services/supplemental-nutrition-assistance-program.jsp)

Activity Website: Economic Opportunity (http://www.dhs.state.mn.us/main/id_002550)

AT A GLANCE

Annually:

- More than 429,000 Minnesotans receive help through the Supplemental Nutrition Assistance Program (SNAP) every month; the average monthly benefit is \$112 per person.
- More than 11,400 people receive emergency shelter and services with state and federal funds.
- More than 4,700 individuals in 2,600 households receive transitional housing services
- All funds spending for the Child & Economic Support Grants activity for FY 2017 was \$492 million. This represented 3.09 percent of the Department of Human Services overall budget.

PURPOSE & CONTEXT

People living in poverty often face numerous barriers and have complex needs. Through the Children and Economic Support Grants activity the Department of Human Services (DHS) funds efforts to stabilize both short-term crises and long-term strategies to help people leave poverty and sustain financial security for themselves and their families.

The largest part of this budget activity is federal funding for the Supplemental Nutrition Assistance Program (SNAP), which amounted to over \$449 million in FY 2017. Outreach and nutrition education are conducted under this activity. These efforts help keep more people fed and healthy, and increase nutrition assistance participation.

DHS also administers nearly 200 grants annually to more than 100 organizations through the Children and Economic Support Grant activity. These grants help people in poverty meet their basic needs for food, clothing and shelter. Funds are also used to help people get the skills, knowledge and motivation to become more self-reliant. Without these funds, more people would be hungry, homeless and poor.

SERVICES PROVIDED

Children and Economic Support Grants fund food, housing, poverty reduction, and financial capability services for low-income families and individuals. Services include:

- Help for low income persons to purchase food and associated outreach and education activities funded through the federal SNAP program.
- Help under the Minnesota Food Assistance Program (MFAP) for legal non-citizens who do not qualify for federal SNAP due to citizenship status
- Funding for food banks, food shelves and on-site meal programs
- Help for homeless individuals and families to find safe and stable housing
- Supportive services for people who experience long-term homelessness
- Emergency shelter and essential services for homeless adults, children, and youth
- Specialized emergency shelter and services for youth who have been victims of sex trafficking
- Funding, training, and technical assistance to counties and tribes for services to reduce barriers for long-term homeless adults, youth and families.

These grants also support:

- Programs administered by regional Community Action Agencies that help low-income people become more economically secure
- Financial capability services through the Family Assets for Independence in Minnesota (FAIM) and related financial education initiatives.

In addition to the federal funding for SNAP, other funding sources include state grants and federal grants from the U.S. Departments of Agriculture (USDA), Health and Human Services (HHS), Housing and Urban Development (HUD) as well as private foundations.

RESULTS

Several programs, such as the Transitional Housing Program and Homeless Youth Act help people with their shelter needs.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Results	Percent of transitional housing participants that moved into permanent housing.	72%	74%	2014 2016
Quality	Percent of transitional housing participants that maintained permanent housing six months or more	66%	70%	2014 2016
Quantity	Number of youth heads of household served in emergency shelter or in housing.	690	1549	2015 2017

Program: Grant Programs**Activity: Refugee Services Grants**mn.gov/dhs/people-we-serve/children-and-families/services/refugee-assistance/e**AT A GLANCE**

- In 2017, an average of 1,835 people per month received employment and social services through Refugee Services grants.
- The average monthly cost per recipient in 2017 was \$416 for employment-related services such as assessment, employment development planning, supported job search, placement and follow-up services.
- All funds spending for the Refugee Services Grants activity for FY 2017 was \$6.4 million. This represented 0.04 percent of the Department of Human Services overall budget.

PURPOSE & CONTEXT

Refugees are individuals who fled their country of origin and are unable to return because of a well-founded fear of persecution. When no other options exist, the United States, as well as most Western nations, provides refugees an opportunity for permanent resettlement. Most refugees resettled in Minnesota over the last decade have been from Somalia, Burma, Laos, Ethiopia, Liberia, Bhutan, Iraq and Moldova.

Refugee Services Grants provide assistance to refugees, asylees and victims of human trafficking to resettle in Minnesota. These federally-funded grants are provided to state and local agencies, including county and voluntary resettlement agencies, school districts and community agencies to enhance human, health, educational, employment and training services. Absent these services, fewer refugees will find work and more will lack the medical, social and financial supports necessary to resettle successfully.

SERVICES PROVIDED

The Department of Human Services (DHS) Refugee Resettlement Programs Office works with many others to support the effective resettlement of refugees in Minnesota by coordinating services to help refugees transition to life in the United States. These services may include: resettlement and placement; food, cash and health care assistance; employment services; or social services.

Most refugees who resettle in Minnesota are members of families with minor children who qualify for the same cash assistance (Minnesota Family Investment Program) and health care programs available to state residents with low incomes. Refugees who do not qualify for one or both of these programs can apply for Refugee Cash Assistance (RCA) and Refugee Medical Assistance (RMA). These programs are available for the first eight months after refugees arrive in Minnesota. Applications for these programs are taken at county human services agencies and at voluntary resettlement agencies for refugees in the Twin Cities metro area and Olmsted County. The Resettlement Programs Office works to ensure existing systems and supports that are available to Minnesota residents are also accessible to residents with refugee status.

In addition, Refugee Services Grants support limited supplemental services for refugees, including:

- Supported employment services and transportation
- Case management services
- Information and referral
- Translation and interpreter services
- Citizenship and naturalization preparation services

- Refugee student services
- Health screening coordination

Grants are used to supplement existing services to better meet the needs of refugees through local community partners, counties, and refugee communities to ensure refugees and their families are healthy, stable and live and work in strong, welcoming communities. The activity is funded with federal grants from the United States Department of Health and Human Services.

RESULTS

The DHS Resettlement Programs Office uses several client outcome indicators to measure performance and determine the effectiveness of our grant management activity.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Results	Percent of refugees employed within the same year of enrollment	68%	69%	Sept.2015 Sept 2017
Quantity	Percent of refugees receiving health screening within 90 days of arrival	97%	97%	Sept.2015 Sept 2017
Result	Job retention rate within 90 days	75%	79%	Sept.2015 Sept 2017
Quantity	Average hourly wage	\$9.99	\$11.60	Sept.2015 Sept 2017

Performance Measure Note: The average hourly wage is the average wage over the previous year for all participants.

Program: Grants Program

Activity: Health Care Grants

AT A GLANCE

- There are currently 655 navigators and in person assisters available statewide to aid people in obtaining health care coverage.
- Navigators and in person assisters provided application assistance to over 61,000 individuals or families enrolled in public health care programs during FY 2017
- All of Minnesota's 87 counties collect and track Child and Teen Check-up immunization data with the help of grant funds from this activity.
- All funds spending for the Health Care Grants activity for FY 2017 was \$30.2 million. This represents 0.2 percent of the Department of Human Services overall budget.

PURPOSE & CONTEXT

Health Care Grants activity funding provides supports, infrastructure investments and outreach. These grants benefit enrollees in Minnesota Health Care Programs (Medical Assistance (MA) and MinnesotaCare) and some uninsured or underinsured individuals. These grants have historically targeted projects or work that supplements the direct health care services funded under the MA or MinnesotaCare programs.

Some grants in this budget activity augment the agency's own operational efforts. In doing so, we engage experts outside of the Department of Human Services (DHS) to help ensure that eligible Minnesotans are enrolled in the appropriate health care program and that those enrolled, especially our youngest and/or most vulnerable or hard to reach, receive the needed health care for which they are eligible.

SERVICES PROVIDED

The particular set of active health care grants in this budget activity administered by DHS can change over time depending on the length of the funding or project. Health care grants may be for one year or may be ongoing. Grantees can range from providers, counties, or community organizations.

Funding is generally dedicated to a specific project, demonstration or function as directed by legislation. The grants currently funded under this budget activity include:

- **In Person Assister and Minnesota Community Application Agent (MNCAA) Programs.** These funds provide incentive payments to entities assisting people applying to and enrolling in MinnesotaCare and Medical Assistance.
- **Emergency Medical Assistance Referral and Assistance Grants:** These grants fund organizations to provide immigration legal assistance to people with emergency medical conditions whose immigration status is a barrier to Medical Assistance or MinnesotaCare eligibility. In 2016 and 2017, these funds supported legal assistance to 268 people receiving care through Emergency Medical Assistance (EMA). 87 of these individuals became eligible for MA or MinnesotaCare because of changes in their immigration status.
- **Immunization Registry Grants.** Provides administrative funds for counties to support immunization registries
- **Child and Teen Checkup Grants:** Provides funding to over 50 tribes and community health boards for outreach and education to children on Medical Assistance related to Child and Teen Checkup services.

- **Integrated Care for High Risk Pregnancies (ICHRP).** This pilot program provides funding for community-led collaborative care models to improve birth outcome disparities in the MA program. ICHiRP grants support planning, systems development, and the integration of medical, chemical dependency, public health, social services, and child welfare coordination to reduce maternal opiate use and improve birth outcomes. Grantees include 5 American Indian Tribal Organizations and three community based organizations in the metro area that promote the healthy development of African American babies.
- **Minnesota Medicaid Promoting Interoperability Program (formerly the EHR Incentive Program).** Distributes federal funds to eligible providers and hospitals that purchase and use a certified electronic health record. The goal of the Promoting Interoperability program is to improve the patient experience of health care and population health, at a reduced cost to providing care. In FY2017, this program allocated \$20,715,378 in federal funding to a total of 1,841 eligible providers and hospitals across the State.

Health Care Grants are funded with appropriations from the state general fund, health care access fund and with federal funds.

RESULTS

The Health Care Grants activity contributes to the statewide goal of reducing the percentage of Minnesotans that do not have health insurance. DHS collects information on the number of successful applications completed by application agents under the MNCAA and In Person Assister programs.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Enrollees receiving support from MNCAAs/In Person Assisters ¹	40,922	61,138	FY2015 and FY2017
Quantity	Individuals receiving immigration legal assistance	112	156	2016 and 2017

1. Measure is the number of MNCAAs and In Person Assisters receiving incentive payments as reported by MNsure and DHS staff.

Minnesota Statutes section 256.962 provides the authority to provide incentives for application assistance under the MNCAA program.

Minnesota Statutes section 256B.021 is the legal authority for grants related to reforms in the Medical Assistance program.

Minnesota Statutes section 62V.05 provides authority for the In Person Assister program.

Program: Grant Programs

Activity: Other Long-Term Care Grants

AT A GLANCE

- The Home and Community-Based Service (HCBS) Incentive Pool funding was awarded to 11 grantees in FY 2017 and 35 grantees in FY 2018, the first year of full implementation of the program. Approximately 425 people were served in FY 2018.
- The Other Long-Term Care grants budget activity was established in FY2016. All funds spending for the Other Long-Term Care grants activity for FY 2017 was \$1.6 million.

PURPOSE & CONTEXT

The purpose of other long-term care grants is to serve more people in community-based settings and to encourage creativity in how services are delivered for people with disabilities, mental illness, and seniors.

Currently, there are three grants that are included in Other Long-Term Care Grants, which will expand as more cross-population grants are developed. The HCBS Incentive Pool grant incentivizes providers to innovate in achieving integrated competitive employment, living in the most integrated setting, and other outcomes. The Incentive pool began distributing funds in FY 2017. There are two Money Follows the Person (MFP) grants: the Rebalancing Demonstration grant and the Tribal grant.ⁱ

SERVICES PROVIDED

- The Home and Community-Based Service (HCBS) Incentive Pool rewards providers, service recipients, and other entities for innovation in achieving outcomes that improve quality of life, including integrated, competitive employment and living in the most integrated setting in the community. In FY 2017, the funds were distributed via a request for proposal (RFP) process. There are three ways that the money was distributed:
 1. Large grants. These grants incentivize innovation in HCBS services by using pay for performance concepts and models that utilize outcome-based payments. For the purpose of the RFPs, outcome-based payments consist of financial incentives based on the outcomes proposed, produced and achieved.
 2. Micro grants. The micro grant program provides modest amounts of money to people with disabilities so they can accomplish their own goals and aspirations. The funds complement and supplement what can already be paid for through other sources of funds and have a lasting and ongoing impact for the micro-grant recipient.
 3. Small grants. This is for grants of under \$50,000 per year for 1-3 years. This solicits participation from diverse grantees, beyond typical responders. This could include individuals, small groups, sole proprietors, small businesses, etc.
- Under the Money Follows the Person (MFP) Rebalancing Demonstration grant, rebalancing funds may be used by the state to invest in or support activities that will promote improvements to the state's delivery of long-term services and supports and move the state toward more integrated and inclusive community-based service delivery systems. MFP awards are eligible for enhanced federal financial participation (FFP) which is deposited into the special revenue fund and will be paid out starting in FY 2019.
- Funds under the Money Follows the Person Tribal Initiative is used to improve access to community-based long-term care services and supports (CB-LTSS) for American Indians and Alaska Natives who have been in an institutional setting for over 90 days. In addition, the Tribal Initiative may be used to advance the

development of an infrastructure required to implement CB-LTSS for American Indians and Alaska Natives using a single, or a variety of applicable Medicaid authorities. Funding is intended to support the planning and development of:

1. An in-state Medicaid program CB-LTSS (as an alternative to institutional care) tailored for American Indians and Alaska Natives who are presently receiving services in an institution; and
2. A service delivery structure that includes a set of administrative functions delegated by the state Medicaid agency to Tribes or Tribal organizations, such as enabling tribe(s) to design an effective program or package of Medicaid CB- LTSS, and operating day-to-day functions pertaining to the LTSS program(s).

The Tribal Initiative may be used to cover costs necessary to plan and implement activities consistent with the objectives of this funding and within Federal grant regulations. The funds are subject to all the terms and conditions of the MFP Program. Tribal Initiative is funded through a federal grant.

RESULTS

The agency monitors data, reviews counties, and administers surveys to consumers to evaluate services. Minnesota has seen continuous improvement in the number of people with disabilities served by community-based rather than institution-based services.

More information is also available on the DHS dashboard (<http://dashboard.dhs.state.mn.us/>) and the Continuing Care Performance Report (<http://mn.gov/dhs/partners-and-providers/continuing-care/data-measures/public-planning-performance-reporting/performance-reports.jsp>).

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Result	Percent of working age people on certain Medical Assistance programs earning \$600 or more per month. ¹	12.2%	15.7%	FY 2014 to FY 2016
Result	Percent of people with disabilities who receive home and community-based services at home. ²	53.1%	58.5%	2013 to 2017

Performance Measures Notes:

1. Measure compares monthly earnings for people age 18-64 who receive services from one of the following Medical Assistance programs: Home and Community-Based Waiver Services, Mental Health Targeted Case Management, Adult Mental Health Rehabilitative Services, Assertive Community Treatment and Medical Assistance for Employed Persons with Disabilities (MA-EPD). Source: DHS Data Warehouse.
2. This measure compares people who receive disability waiver services in their own home rather than residential services. Source: DHS Data Warehouse.

ⁱ The Money Follows the Person grant accounts were under the Disability Grants budget activity in FY16-17. These grants were transferred to Other Long Term Care Grant accounts in FY2018.

Program: Grant Programs

Activity: Aging & Adult Services Grants

mn.gov/dhs/people-we-serve/seniors/

AT A GLANCE

- Provides congregate dining to 38,000 people and home delivered meals to 12,000 people.
- Supports more than 17,000 older volunteers per year who provide services through the Retired and Senior Volunteer Program (RSVP), Foster Grandparents, and Senior Companions.
- Provides comprehensive assistance and individualized help to more than 125,000 individuals through over 277,000 calls in 2017 through the Senior LinkAge Line®.
- Funds home and community-based service options for more than 11,000 people and increased capacity by 8,700 volunteers through the Community Service/Services Development (Live Well at Home) grant program.
- All funds spending for the Aging & Adult Services Grants activity was \$50.2 million in FY2017. This represented 0.3 percent of the Department of Human Services overall budget.

PURPOSE & CONTEXT

The purpose of Aging and Adult Services Grants is to provide non-medical social services and supports for older Minnesotans and their families to allow older adults to stay in their own homes and avoid institutionalization.

These funds increase the number and kind of service options for older Minnesotans in both urban and rural communities. This gives greater opportunity for Minnesotans to age at home. Several of the state grant programs are coordinated with the services provided under the federal Older Americans Act (OAA). Federal OAA funds in Minnesota are administered through the Minnesota Board on Aging. These funds provide core social services to at-risk older adults and their family caregivers who are not yet eligible for public programs. Services are targeted to people with the greatest social and economic need.

SERVICES PROVIDED

Aging and Adult Services Grants promote affordable services that are both dependable and sustainable. These grants are often used along with local private money, including donations. Aging and Adult Services grants provide:

- Nutritional services including congregate meals, home-delivered meals, and grocery delivery.
- Increased service options for older Minnesotans through service development activities funded by the Community Service/Community Services Development (CS/SD), Family Caregiver Support, and ElderCare Development Partnership (EDP) grant programs. Those services include: transportation, help with chores, help with activities of daily living, evidence-based health promotion, chronic disease management, falls prevention services, respite and other supportive services to family caregivers, and other services that help people stay in their own homes.
- Support to older volunteers who provide services through the Retired and Senior Volunteer Program, Foster Grandparent, and Senior Companion programs.
- Comprehensive and individualized help through the Senior LinkAge Line®. The Senior LinkAge Line® trains long-term care options counselors that assist individuals to find community resources and financing options for beneficiaries of all ages.
- Information about community-based resources and customized long-term care planning tools through www.minnesotahelp.info, (<http://www.minnesotahelp.info/>) a web-based database of over 45,000 services.

- Long-term care options counseling services provided by the Senior LinkAge Line®, known as Return to Community, that help people successfully remain in their homes after discharge from a nursing home. Since the launch of this service in 2010 and through 2017, over 14,000 consumers have been contacted for discharge support. Of those 14,000, direct assistance was provided to over 3,400 older adults at their request to return home and nearly 1,100 are receiving five years of follow up at home.
- Home and community-based services quality information which includes a tool to help people who need long-term services and supports and their caregivers find and locate services. The tool includes 340 features about services. In addition, consumer reviews are being piloted for assisted living providers, supported employment and independent living services.
- Core Service provides grants to nonprofit providers who deliver in-home and community-based services to older adults. These grants expand the number of organizations that can be supported, which increases the number of individuals served.

The Agency administers these grants in partnership with regional Area Agencies on Aging, counties, tribes, and community providers.

RESULTS

Minnesota has seen improvement in the proportion of older adults served by community-based rather than institution-based services. The percent of older adults served in the community has improved over the past four years. Through our partners, we surveyed users of the Senior LinkAge Line® and found a consistent proportion of people would recommend Senior LinkAge Line® services to others.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Result	Percent of older adults served by home and community-based services ¹	68.4%	72.9%	2013 to 2017
Quality	Percent of consumers who would recommend the Senior LinkAge Line® to others ²	93%	94%	2012 to 2017
Quantity	Number of people who have moved from nursing homes back to the community through the Return to Community Initiative to date ³	2,896	5,229	Q4 2015 to Q4 2017

Results Notes:

1. Measure 1 compares FY2013 to FY2017. This measure shows the percentage of older adults receiving publicly-funded long-term services and supports who receive home and community-based services through the Elderly Waiver, Alternative Care, or home care programs instead of nursing home services. (Source: MMIS Claims)
2. Measure 2 compares 2012 data to 2017 data (Source: Consumer Surveys, Web Referral database)
3. Measure 3 compares cumulative quarter 4 CY2015 data to quarter 4 CY2017 data (Source: Return to Community Database)

Program: Grant Programs

Activity: Deaf & Hard of Hearing Grants

mn.gov/dhs/people-we-serve/adults/services/deaf-hard-of-hearing/programs-services/

AT A GLANCE

- Deaf and Hard of Hearing Grants supported 658 people in FY 2017.
- Participants in deafblind programs chose consumer-directed services option 30 percent of the time in FY 2017.
- Certified Peer Support Specialists worked with 27 people in FY 2017 who are deaf and have a serious mental illness.
- The Deaf & Hard of Hearing Role Model and Deaf Mentor Family programs supported 37 families who have a young child with hearing loss in FY 2017.
- All funds spending for the Deaf and Hard of Hearing Grants activity for FY 2017 was \$2.747 million. This represented 0.01 percent of the Department of Human Services overall budget.

PURPOSE & CONTEXT

National research estimates 20 percent of the population has some degree of hearing loss. In Minnesota, this means approximately 1.1 million people are likely to have some degree of hearing loss. Of those, an estimated 11 percent are deaf and as many as 1,640 individuals are deafblind.

One-third of people between ages 65-74 have hearing loss and nearly half of those over age 75 have hearing loss. According to the Minnesota Department of Health, permanent childhood hearing loss affects 200-400 infants born in Minnesota each year.

Deaf and Hard of Hearing Services grants help Minnesotans of all ages who are deaf, deafblind and hard of hearing with services and supports they need to live independently and be involved in their families and communities. The Deaf and Hard of Hearing Services Division (DHHSD) administers these grants.

SERVICES PROVIDED

Deaf and Hard of Hearing Grant programs include:

- Sign language interpreter-related services that allow Minnesotans who are deaf, hard of hearing, and deafblind to access every day activities and core services such as medical care, mental health services, human services, the judicial system, and self-help; this activity includes two programs to increase the number of interpreters in Greater Minnesota available to provide community interpreting services and pays travel costs to bring interpreters to areas where there are no local interpreters.
- Deafblind grants to support adults who are both deaf and blind so they can live independently and stay in their own homes. Supports include service providers fluent in American Sign Language and trained in specialized communication methods and assistive technology; consumers have an option for consumer-directed services.
- Services for children who are deafblind to provide experiential learning and language development through service providers called interveners.
- Specialized mental health programs for adults and for children and youth that provide linguistically and culturally appropriate services including home-based outreach, inpatient therapy, outpatient therapy, family counseling, psychological assessments and educational opportunities for families, schools, and mental health providers.
- Certified Peer Support Specialists for individuals who are deaf and have a serious mental illness.

- Mentors who work with families that have children with hearing loss to develop the family's communication competence, including an option to have an American Sign Language mentor or a hard of hearing role model.
- Real-time television captioning grants that allow consumers statewide who are deaf, deafblind, hard of hearing or late deafened to have equal access to their community and statewide live news programming.

We partner with statewide community providers, mental health professionals, local television stations and the Department of Commerce to provide services.

Deaf and Hard of Hearing grants are primarily funded by the state general fund. In addition, the Telecommunications Access Minnesota (TAM) funds collected by the Department of Commerce provide the grants for real-time television captioning of local news programs.

RESULTS

People served in deaf and hard of hearing grant-funded programs fill out surveys to measure satisfaction with the quality and timeliness of services. Over the last three years, they have reported a high level of satisfaction with the quality of services. Across the Deaf and Hard of Hearing grant-funded mental health programs, the percent of clients who have completed or are making good progress on their treatment goals remains consistently above 80 percent. In a variety of programs that support families with a child who is deaf, deafblind, or hard of hearing, at least 80 percent of parents report noticeable improvement in their child's progress in communication, social development and community integration as a result of the services they receive.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quality	Percent of consumers in DHHS grant-funded programs who are satisfied with quality of services they received	94%	94%	2014 to 2017
Quality	Percent of consumers in DHHS grant-funded programs who are satisfied with timeliness of the services they received	86%	87%	2014 to 2017
Quality	Percent of clients in DHHS grant-funded mental health programs who completed or are making good progress on their treatment plan goals	86%	81%	2014 to 2017
Quality	Percent of parents in DHHS grant-funded programs who observed progress in the communication ability, community integration and social development of their child who is deaf, hard of hearing, or deafblind.	83%	80%	2014 to 2017

Performance Notes:

Program: Grant Programs
Activity: Disabilities Grants

mn.gov/dhs/people-we-serve/people-with-disabilities/services/home-community/a-z/index.jsp

AT A GLANCE

- The Family Support Grant served 1,985 people in FY 2017
- The Consumer Support Grant supported an average of 2,419 people a month in FY 2017.
- Semi-independent living services served 1,434 people in FY 2017.
- HIV/AIDS programs helped 2,617 people living with HIV/AIDS.
- The Disability Linkage Line, now known as Disability Hub MN, served 28,443 people in FY 2017, had 68,313 contacts with people receiving services, and participated in 163 educational events.
- All funds spending for the Disabilities Grants activity for FY 2017 was \$62.6 million. This represented 0.39 percent of the Department of Human Services overall budget.

PURPOSE & CONTEXT

The US Census Bureau estimates that nearly 550,000 or 10.3 percent of Minnesotans have a disability or disabling condition. Disabilities Grants provide services and supports to help Minnesotans with disabilities remain in their communities and avoid institutionalization. This work is done by counties, tribes, families and local providers. These funds increase the service options for people with disabilities and their families; help people with HIV/AIDS with medical expenses; provide information and assistance on disability programs and services; and support county and tribal service infrastructure.

SERVICES PROVIDED

Disabilities Grant programs include:

- The Family Support Grant (FSG) provides cash to families to offset the higher-than-average cost of raising a child with a disability due to the child's disability.
- The Consumer Support Grant (CSG) is an alternative to home care paid through the state plan, which helps people purchase home care, adaptive aids, home modifications, respite care, and other help with the tasks of daily living. This program will be sunsetted when Community First Services and Supports (CFSS) replaces the services provided by CSG.
- Semi-Independent Living Services (SILS) grants help adults with developmental disabilities, who do not require an institutional level of care, live in the community. The funding is used for instruction or assistance with nutrition education, meal planning and preparation, shopping, first aid, money management, personal care and hygiene, self-administration of medications, use of emergency resources, social skill development, home maintenance and upkeep, and use of transportation.
- HIV/AIDS programs help people living with HIV/AIDS pay premiums to maintain private insurance, co-payments for HIV-related medications, mental health services, dental services, nutritional supplements, and case management.
- The Disability Linkage Line (DLL), now known as Disability Hub MN, provides one-to-one assistance to make it easier for people with disabilities to understand their options, find solutions, and engage in possibilities.

- Local planning grants assist counties and tribes in development of community alternatives to corporate foster care settings. This funding is used to implement specific county plans to address the needs of people with disabilities in their communities.
- Day Training and Habilitation (DT&H) grants are allocated to counties. Counties pay for DT&H costs for some residents. This funding is allocated to counties to help offset costs for legislative rate increases to day training and habilitation facilities.
- State Quality Council and Region 10 grants fund state and regional quality councils. The State and Regional Quality Councils, in collaboration with DHS exist to support a system of quality assurance and improvement in the provision of person directed services for people with disabilities.
- Work Empower grants help people with disabilities maintain or increase stability and employment, increase access to and utilization of appropriate services across systems, reduce use of inappropriate services, improve physical / mental health status, increase earnings and achieve personal goals.
- Autism Spectrum Disorder grants appropriated in the 2017 legislative session were awarded to an organization that provides life skills training to young adults with learning disabilities to meet the needs of individuals with autism spectrum disorder. This grant is only appropriated in FY 2018 and FY 2019.
- Institutional Settings and Intellectual and Developmental Disability grants fund a disability advocacy organization to maintain and promote self-advocacy services and supports for persons with intellectual and developmental disabilities throughout the state.
- Waiver rate system transition grants are for home and community-based disability waiver services providers that are projected to receive at least a ten percent decrease in revenues due to transition to rates calculated under the disability waiver rate setting system.

The Disabilities Grants activity is funded by the state general fund, federal funds and special revenue funds. The HIV/AIDS programs receive federal funds from the Ryan White Care Act and also rebate funding from pharmaceutical companies for drugs and insurance.

RESULTS

The agency monitors data, reviews counties and tribes, and administers surveys to consumers to evaluate services. Minnesota has seen continuous improvement in the number of people with disabilities served by community-based rather than institution-based services.

The agency tracks the percent of people with disabilities who receive home and community-based services in their own home instead of in a congregate residential setting, such as foster care. There is now a reduced reliance on corporate foster care.

More information is also available on the DHS dashboard (<http://dashboard.dhs.state.mn.us/>).

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Result	Percent of people with disabilities who receive home and community-based services at home. ¹	53.1%	58.5%	2013 to 2017
Result	Percent of people served in corporate foster care or corporate living services. ²	35%	30%	2013 to 2017
Quality	Percent of consumers who would recommend the Disability Hub MN to others. ³	98%	91%	2015 to 2017
Quantity	Annual number of people served through the Technology for Home Services grant. ⁴	348	372	2013 to 2017

1. This measure compares people who receive disability waiver services in their own home rather than residential services. Source: DHS Data Warehouse
2. This measure represents the proportion of disability waiver participants using corporate foster care or corporate supported living services (SLS), when the service is billed in a daily unit. It does not include SLS billed in 15 minute unit, since that is typically not provided in a residential setting.
3. The change in this measure reflects better randomization of surveys and a more accurate measure of satisfaction. It continues to show over 90 percent satisfaction with the Disability Hub services. Source: DLL Customer Satisfaction Surveys.
4. This measure represents the unduplicated annual number of people served through the Technology for Home Services grant, which provides assistive technology for people in their own homes. Source: Technology for Home report. Source: DHS Data Warehouse

Program: Grant Programs

Activity: Housing & Support Services Grants

<https://mn.gov/dhs/partners-and-providers/program-overviews/housing-and-homelessness>

AT A GLANCE

- Supportive services were provided to 5,713 individuals at-risk or experiencing long-term homelessness in FY 2017.
- The Community Living Infrastructure funding was awarded to 17 grantees beginning in FY 2018.
- The Real Time Housing funding was awarded to one grantee to develop the website beginning in FY 2018.
- The Housing Access Service grant served 207 clients and had 4,493 inquiries for service in CY 2017.
- The Housing and Support Services Grants activity includes \$7.3 million moved from Children and Family Services Grants, and \$489,000 from Disability Services Grants. The remainder are new funds beginning in FY 2018. This activity represents .06 percent of the Department of Human Services overall budget.

PURPOSE & CONTEXT

According to the 2016 Point-in-Time count by the Minnesota Interagency Council on Homelessness, 7,304 Minnesotans were experiencing homelessness on January 28, 2016 of which 3,660 were individuals in families with children.

DHS works to ensure that appropriate housing is available for the people we serve by supporting systems that integrate housing, services and income supports to enable people to live in the community of their choice. This work is done by counties, tribes, families and local providers.

SERVICES PROVIDED

Housing and Support Services grant programs include:

- The Long-Term Homelessness grant program provides funds for supportive services to serve individuals, unaccompanied youth, and families with children experiencing long-term homelessness. The goal is to link those persons who are long-term homeless and have been evaluated to have the most significant need for permanent supportive housing, as determined by the respective Continuum of Care Coordinated Entry System, with housing that is permanent and sustainable.
- The Community Living Infrastructure grant program supports the needs of people with disabilities and housing instability who want to live in the community but are faced with significant barriers in transitioning into community living from institutions, licensed facilities or homelessness. The purpose of the program is to increase and improve opportunities for Minnesotans with disabling conditions by improving access to community options. This grant program funds three areas of service: 1) outreach efforts; 2) housing resources specialists; 3) and funding for counties, tribes, and collaboratives to administer and monitor the Housing Support program.
- The Real Time Housing Website grant is for the design, development and maintenance of a fully accessible and usable website, including an application, to track real-time-housing openings for people with disabilities across the state of Minnesota. The website is to help support the needs of people with disabilities who want to live in the community. It will help connect individuals, their advocates, and family members to housing options and educate about community living resources available.
- Housing Benefit grant money pays for the development and maintenance of the Housing Benefits 101 website which helps persons with disabilities understand types of housing available to them depending

the person's situation, needs and desires. The website has information on housing programs that can make housing more affordable along with information on different types of housing options and services that can improve quality of life. HB101 has a Vault feature in which persons can securely store their personal information related to housing and utilize a Personalized Housing Planning Tool in their search for housing in the community of their choice.

- Housing Access Services grants have been used to support a non-profit organization that helps individuals who are eligible for home care, other state plan services, or waiver services, to move out of licensed settings or family homes and into their own homes. Since the fall of 2009 more than 2,000 people have used Housing Access Services to move from licensed or unlicensed settings to homes of their own that are not owned, leased, or controlled by disability services providers.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>

Program: Grant Program

Activity: Adult Mental Health Grants

mn.gov/dhs/people-we-serve/adults/health-care/mental-health/index.jsp

AT A GLANCE

- Approximately 230,972 adults in Minnesota have a serious mental illness.
- Assertive Community Treatment was provided to 2,041 people in CY 2017.
- Projects for Assistance in Transition from Homelessness (PATH) served 417 persons who were chronically homeless and 902 persons who were at imminent risk of homelessness in CY 2017. An additional 451 persons were contacted through outreach.
- Crisis Housing Assistance services were provided to prevent homelessness of 231 people in facility based treatment in CY 2017.
- Housing with Support services assisted 1,716 persons with serious mental illness in accessing and retaining permanent supportive housing by the end of CY 2017.
- Crisis Response Services served 17,515 people in response to crisis episodes in CY 2017.
- All funds spending for the Adult Mental Health Grants activity for FY 2017 was \$84.9 million. This represented 0.53 percent of the Department of Human Services overall budget.

PURPOSE & CONTEXT

The Adult Mental Health Grants support services for adults with mental illness and are administered by the Behavioral Health Division of the Community Supports Administration, using both federal and state funds. These funds, combined with county dollars, are used to identify and meet the local service need by developing and providing a range of mental health services in the community. Adult Mental Health Grants support the mission of the Minnesota Comprehensive Adult Mental Health Act by supporting community mental health system infrastructure and services. The grants are used in conjunction with healthcare coverage and other funding sources to support individuals in independent living through community-based service and treatment options. Services are delivered using best practice and evidence-based practice models that are person-centered and effective.

SERVICES PROVIDED

Adult Mental Health Grants support a broad range of vital community service needs. The grants provide funding for infrastructure, community services, supports, and coordination activities not covered by Medical Assistance (MA), and/or for persons who are uninsured or under-insured by public or private health plans. These grants are delivered in a number of ways. Some are block grants to counties who have the flexibility to use the funding for a number of services. Others are grants to counties, mental health providers, and other organizations for specific services, projects, and programs. Services include, but are not limited to the following:

Transitions to Community Initiative - This initiative reduces the time that individuals remain at the Anoka Metro Regional Treatment Center (AMRTC) or the Minnesota Security Hospital (MSH) once they no longer need hospital care. By providing funding to cover community-based services and address the unique discharge barriers faced by some individuals, the initiative promotes recovery, allows individuals to move to integrated settings of their choice as outlined in the Minnesota Olmstead Plan, and opens up beds at AMRTC and MSH for other individuals who need them.

Targeted Case Management – These activities coordinate services and help adults with serious and persistent mental illness gain access to needed medical, social, educational and vocational services. These activities include

developing a functional assessment, an individual community support plan, and ensuring coordination of services and monitoring of service delivery.

Assertive Community Treatment (ACT) – These intensive, non-residential mental health services are provided by a multidisciplinary staff using a team model. The team includes, at a minimum, a psychiatrist, mental health professional, registered nurse, vocational and substance abuse specialists. ACT services are available 24 hours a day. ACT teams assume full responsibility for the individual’s mental health treatment. This service keeps people in the community and prevents hospitalization.

Adult Rehabilitative Mental Health Services (ARMHS) - ARMHS are services that enable a recipient to develop, retain and enhance their mental stability and functioning by providing education on medication management, basic social and living skills, household management, employment-related skills, and also by assisting with transitions to community living.

Adult Outpatient Medication Management - Provides for prescriptions, medication education, and reviews to help individuals manage their symptoms.

Basic Living /Social Skills and Community Intervention - Basic living /social skills and community intervention services provided to help individuals live safely and inclusively in the community.

Project for Assistance in Transition from Homelessness (PATH) - PATH is a federal program with a state match to provide homeless outreach, service coordination, and related services designed to find and engage persons with serious mental illness who are homeless or at imminent risk of becoming homeless and provide them with in services, basic needs, resources, and housing.

Crisis Housing – This program provides direct payments for rent, mortgage, and utility costs, to assist persons with retaining their housing while getting needed facility based treatment. The program prevents homelessness while the individual uses their income to pay for treatment or loses income while getting needed treatment.

Housing with Supports - These grants fund the development of permanent supportive housing for persons with serious mental illness, by providing options that assist individuals who need housing with linked supports to help maintain an individual’s mental health and housing stability while living in the community.

Crisis Response Services – Provides an array of services from mobile crisis response teams to crisis stabilization beds and aftercare services. Mobile crisis teams respond to an individual’s call for help in their home, place of employment, or possibly to an emergency department in a hospital in cases where they are experiencing a severe mental health problem that requires immediate assistance. Many components of crisis services are not reimbursable under Medicaid, such as telephone contacts with a person in crisis, linkage and coordination, benefits assistance, and post-hospital transition services. Ancillary services that are not able to be billed to MA are being provided through grant funding.

Culturally specific services – These grants expand capacity for ethnically and culturally-specific, trauma-informed, adult mental health services within target cultural and ethnic minority communities in Minnesota.

Individual Placement Supports (IPS) Supported Employment - Counties use adult mental health grants to fund evidence-based practices such as the IPS model of supported employment to improve the ability of adults with serious and persistent mental illness to find and maintain competitive employment. These grants extend and support the work done by the Department of Employment and Economic Development.

Minnesota Center for Chemical and Mental Health (MNCAMH) - These grants fund training and technical assistance from the Minnesota Center for Chemical and Mental Health (MNCAMH), a program of the University of Minnesota drawing from the strengths of the School of Social Work, the College of Continuing Education, and the

Department of Psychiatry. MNCAMH is a center of excellence for workforce training created to advance the professional development of the treatment services workforce on research informed practices for recovery-oriented systems of care.

Certified Peer Specialist (CPS) Implementation and Training - Selected and qualified individuals with a lived experience of mental illness are trained to work as Certified Peer Specialists in Assertive Community Treatment (ACT), Adult Rehabilitative Mental Health Services (ARMHS), Crisis Response Services and Intensive Residential Treatment (IRTS) services.

Mental Health Innovations – These grant funds are dedicated to finding innovative approaches for improving access to and the quality of community-based, outpatient mental health services. Programs are focused on helping people with mental illness receive effective and culturally specific services in their community.

RESULTS

Transitions to Community – Fiscal Year 2017

- 92 unduplicated individuals received support through the Transition to Community program.
- Of the 92 individuals served, 47 individuals were discharged: 33 from AMRTC and 14 from MSH.
- Technical assistance was provided by DHS staff to navigate discharge options for an additional 19 individuals.

Assertive Community Treatment (ACT), Adult Rehabilitative Mental Health Services (ARMHS), and Crisis Response

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of Adults receiving Assertive Community Treatment (ACT) ¹ services	1,991	2,015	CY 2015- CY 2017
Quantity	Number of Adults with Serious Mental Illness who received Adult Rehabilitative Mental Health Services (ARMHS)	19,149	20,800	CY 2015 to CY 2017
Quantity	Number of episodes for which Mental Health Crisis Services were provided	13,449	17,515	CY 2015 to CY 2017
Result	Percent of people needing hospitalization after receiving crisis service interventions	14%	14%	CY 2015 to CY 2017

Measure Notes:

1. Previous measure is the number of ACT clients served in CY 2015. Current measure is the number served in CY 2017. The department goal is to reduce the need for hospitalization and keep persons served in the community.

MS § 256E.12, 245.4661, and 245.70 provide the authority for the grants in this budget activity.

Program: Grant Programs

Activity: Children's Mental Health Grants

mn.gov/dhs/people-we-serve/children-and-families/health-care/mental-health/

AT A GLANCE

- An estimated 108,000 children and youth in Minnesota (from birth to age 21) need treatment for serious emotional disturbance.
- Each year about 88,000 children and youth receive publicly funded mental health services in Minnesota.
- Approximately 12,150 children and youth received mental health screenings in 2017.
- 9 percent of school-age children and 5 percent of preschool children in Minnesota have a mental health concern that becomes longer lasting and interferes significantly with child's functioning at home and in school.
- All funds spending for the Child Mental Grants activity for FY 2017 was \$24.3 million. This represented 0.15 percent of the Department of Human Services overall budget.

PURPOSE & CONTEXT

Children's Mental Health Grants are administered by the Behavioral Health Division of the Community Supports Administration, which receives both federal and state funding, to support services for children with mental illness. These grants fund community, school, home, and clinic-based children's mental health services provided by non-profit agencies, schools, Medicaid-enrolled mental health clinics, tribes, counties, and culturally specific agencies.

SERVICES PROVIDED

Children's mental health grants promote integration of mental health services into the state's overall healthcare system by:

- filling gaps in the continuum of services and supports, especially those not covered in the broader Minnesota Health Care Programs benefits set;
- paying for necessary ancillary services, supports, and coordination activities that are not eligible for federal Medicaid reimbursement;
- covering treatment and supports for children who remain uninsured or under-insured by private health plans;
- building statewide service delivery capacity in workforce-shortage areas, where key services are not available regardless of insurance coverage;
- expanding access to direct treatment by providing care in community, school, home, and clinic-based children's mental health settings;
- providing coordination of mental and chemical health services with physical healthcare, services for persons with disabilities, and county social services;
- training providers on evidence-based practices;
- funding measurement of treatment outcomes;
- developing new levels of care for children and youth with complex mental health conditions;
- developing a new model to serve youth with first episode psychosis; and
- expanding the current system of mental health care for youth experiencing serious mental illness and their families by piloting and demonstrating new and enhanced services and creating finance and policy reforms necessary to sustain a system of care that is family driven, youth-guided, culturally and linguistically competent and grounded in scientific evidence.

Partners are essential in order to develop and maintain a dynamic and competent mental health service delivery system. For children, coordination of care must include other child-serving sectors of the public and private health and human service systems of Minnesota, including families and youth —such as:

- primary health care,
- day care,
- substance abuse treatment facilities,
- schools,
- public health entities,
- child welfare system,
- juvenile justice system,
- tribes,
- health plans,
- counties, and
- adult transition services.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Service Utilization Rate (per 10,000)	422	450	CY2013-CY2015
Quality	Percent of children in the child welfare system who received a mental health screening	57%	64%	CY2012-CY2015

Measure Notes:

- Service Utilization Rate: An indicator of service access, this indicator counts the number of children (under age 18) receiving any mental health service from the publicly financed health care system, per 10,000 children in the general child population. A higher utilization rate denotes more access to services for children.
- Percent of children receiving a mental health screening: This activity funds screenings for children in the child welfare system. Counties conduct mental health screenings for children in the child welfare system who have not had a recent assessment.

Minnesota Statutes, section 245.4889 (<https://www.revisor.mn.gov/statutes/?id=245.4889>) provides the legal authority for Children’s Mental Health grants.

Program: Grant Programs

Activity: Substance Use Disorder (SUD) Treatment Support Grants

mn.gov/dhs/people-we-serve/adults/health-care/substance-abuse/

AT A GLANCE

- In the United States in 2016, 20.1 million people over the age of 12 had substance use disorders (SUD).
- 56,157 people in Minnesota received treatment for substance use disorder in CY 2016.
- 51 percent of people who sought substance use disorder treatment in 2016 completed their program.
- The compulsive gambling helpline receives more than 1,000 calls and texts each year for information or referrals to treatment.
- All funds spending for the SUD Treatment Support and Primary Prevention grant activity for FY 2017 was \$17.9 million, which represented 0.1 percent of the Department of Human Services overall budget.

PURPOSE & CONTEXT

The Substance Use Disorder (SUD) Treatment Support and Primary Prevention Grants activity uses both federal and state funding to support state-wide prevention, intervention, recovery maintenance, case management and treatment support services for people with alcohol, or drug addiction. Treatment support services include subsidized housing, transportation, child care, and parenting education.

This activity also houses the state Compulsive Gambling Treatment Program, which funds statewide prevention, intervention, treatment and recovery services for individuals and families impacted by problem gambling through evidence based practices, education, supports, and protective financial resources.

SERVICES PROVIDED

Substance Use Disorder Treatment Support and Primary Prevention Grants provide:

- community drug and alcohol abuse prevention, intervention, and case management services for communities of color, the elderly, disabled, individuals with a mental illness and substance use disorder, individuals experiencing chronic homelessness, and people involved in the criminal justice system;
- treatment supports specifically targeted to women, women with children, the elderly, and other diverse populations;
- a statewide prevention resource center that provides education and capacity building on the misuse of alcohol and other drugs. Education includes delivering information and training to counties, tribes, local communities, and other organizations;
- community-based planning and implementation grants that use a public health approach to preventing alcohol use problems among young people;
- regional prevention coordinators across MN to provide substance use prevention technical assistance and training locally to prevention professionals; and
- a tobacco merchant educational training and compliance check project, as well as funding for Synar inspectors, who conduct random inspections of tobacco retailers.

Additional information is in the March 2013 report, [Minnesota's Model of Care for Substance Use Disorder](http://www.leg.state.mn.us/docs/2013/mandated/130622.pdf) (www.leg.state.mn.us/docs/2013/mandated/130622.pdf).

Most of the funding for SUD Treatment Support and Prevention Grants comes from the U.S. Dept. of Health and Human Services Substance Abuse and Mental Health Services Administration (SAMHSA) Block Grant. Additional

funding comes from the SAMHSA Strategic Prevention Framework Partnerships for Success grant focusing on the prevention of alcohol and marijuana use/abuse on college campuses. State appropriations provide additional funding for drug and alcohol abuse prevention, treatment support and recovery maintenance services for Native Americans.

The state's Compulsive Gambling Program provides:

- public awareness campaigns to promote information and awareness about problem gambling;
- a statewide help phone and text line and problem gambling awareness resources and supports;
- funding for problem gambling assessments, outpatient and residential treatment of problem gambling and gambling addiction;
- compulsive gambling assessments of offenders under section 609.115, subdivision 9;
- training for gambling treatment providers and other behavioral health service providers; and
- research that evaluates awareness, prevention, education, treatment service and recovery supports related to problem gambling and gambling addiction.

Public awareness campaigns target Minnesotans statewide, with specific initiatives aimed at young adults, women, military and veterans, and diverse race and ethnic communities that experience higher rates of problem gambling. The Compulsive Gambling statewide helpline, <http://www.getgamblinghelp.com/about-us/>, (1-800-333-HOPE or text HOPE to 61222) generally receives about one thousand calls/texts requesting information, supports or referrals for treatment services each year. The Compulsive Gambling Treatment program provides funding for approximately 700 people per year for outpatient treatment services. An average of approximately 177 people receive residential treatment each year.

The Compulsive Gambling Treatment program is largely funded by a portion of state lottery proceeds, and a dedicated one-half of one percent of the revenue from the state tax on lawful gambling proceeds.

The Congratulate and Educate tobacco merchant education and compliance project funds local law enforcement and public health departments to conduct undercover buy checks and provide publications. The project, activated in 2014, is designed to promote community policing and to both congratulate clerks who pass an educational tobacco compliance inspection (do not sell to the minor) and to provide education to clerks and owners about youth access tobacco laws and consequences.

The Synar Program which is funded by the federal Substance Abuse Prevention and Treatment Block Grant. Synar conducts annual inspections of randomly selected tobacco retailers in Minnesota to determine the State's Retailer Violation Rate. Synar requirements include the facilitation of the annual Tobacco Enforcement Survey (TES), the coverage study which is required every three years and the Annual Synar Report which is a required deliverable under the terms and conditions of the Federal Block Grant Award.

The Behavioral Health Division, a division of the agency's Community Supports Administration, administers the programs and grants within the SUD Treatment Support Grants activity.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Result	Past 30-day use of alcohol by 9th grade youth in communities that received a Planning & Implementation (P&I) grant for prevention work in 2006	35.5%	14.3%	CY2004 vs CY2016
Result	Babies born with negative toxicology results	84%	59%	FY2014 vs. FY2017

Additional Measurement Efforts: The Minnesota Student Survey (MSS) is one viable data source to understand the prevalence of problem gambling among youth and adolescents. Program staff partnered with University of Minnesota researchers to ensure the inclusion of gambling specific questions in the 2016 MSS. Data from the 2016 survey will establish baseline measures for at-risk gambling among youth and adolescents.

Measure Notes:

- The Past 30 day use of alcohol measure consists of data as reported in the Minnesota Student Survey (<http://www.health.state.mn.us/divs/chs/mss/>) for 9th grade students who self-report on their use of alcohol in the last 30 days.
 - P&I grant communities were 7.7 percentage points above the MN State average in 2004 and were 3.1 percentage points above the MN State average in 2016. The MN State average was 27.8 percent in 2004 and 11.2 percent in 2016.
- The babies born with negative toxicology measure is the percentage of babies with negative toxicology results during a 12-month period, born to women served by the state Women's Recovery grants. Note: This data reflects Women's Recovery grant program participants only and is not a population based measure.
 - The decrease in percentage can be attributed to two factors. One key provider provided recovery services to fewer pregnant women in 2017. In addition, the reporting of toxicology was notably less consistent in 2017.
 - Infant toxicology: 59% of infants born in this period tested negative for substances at birth, while 27% tested positive, mostly for marijuana. Results were not available for the remaining 14% of infants born.

Minnesota Statutes, chapters 254A (<https://www.revisor.mn.gov/statutes/?id=254A>), 254B (<https://www.revisor.mn.gov/statutes/?id=254B>) and 256, (<https://www.revisor.mn.gov/statutes/?id=256>) and sections 245.98 (<http://www.revisor.mn.gov/statutes/?id=245.98>) and 297.E02, subd. 3 (<https://www.revisor.mn.gov/statutes/?id=297E.02>) provide the legal authority for CD Treatment Support and Primary Prevention Grants.

Program: Direct Care and Treatment

Activity: Mental Health & Substance Abuse Treatment Services

mn.gov/dhs/people-we-serve/people-with-disabilities/services/direct-care-treatment/

AT A GLANCE

- Mental illness affects one in five families.
- Direct Care and Treatment (DCT) provided mental health inpatient and residential services to approximately 1,125 people in FY 2017.
- DCT operates Anoka Metro Regional Treatment Center, a 110-bed psychiatric hospital that served 354 unduplicated patients in FY18.
- DCT operates six 16-bed Community Behavioral Health Hospitals located across the state, which served a total 677 individuals in FY 2018.
- 759 clients were served in the Community Addiction Recovery Enterprise (C.A.R.E.) program during FY 2017.
- All funds spending for this budget activity was \$114 million for FY 2018. This represents approximately 25 percent of the total Direct Care and Treatment (DCT) all funds spending. Total DCT spending is less than 3 percent of the overall spending for DHS.

PURPOSE & CONTEXT

- As part of the Department of Human Services Direct Care and Treatment (DCT) Administration, Mental Health and Substance Abuse Treatment Services (MHSATS) provides specialized treatment and support services to individuals with mental illness, chemical dependencies/substance abuse and other complex conditions.
- One of the Department of Human Service's goal is to serve people with disabilities by providing access to care close to their home community and natural supports. DCT provides services to individuals with the goal of allowing them to move through the system and back to the community.

SERVICES PROVIDED

The following services are funded with general fund appropriations:

- Adult inpatient services at the Anoka Metro Regional Treatment Center (AMRTC)
- Adult inpatient services at the Community Behavioral Health Hospitals (CBHHs) located in Alexandria, Annandale, Baxter, Bemidji, Fergus Falls, and Rochester
- Child & Adolescent Behavior Health in-patient Services (CABHS) in Willmar
- Minnesota Specialty Health System (MSHS) – providing Intensive Residential Treatment Services (IRTS) for adults in Brainerd, St. Paul, Wadena and Willmar

Services funded with other revenues:

- Community Addiction Recovery Enterprise (C.A.R.E.) – provides inpatient and outpatient treatment to persons with chemical dependency or substance abuse problems. C.A.R.E. programs operate in Anoka, Carlton, Fergus Falls, St. Peter, and Willmar. Inpatient treatment is provided at all five locations, while outpatient treatment is only provided at the Anoka site.

All services:

- are person-centered, focusing on the needs of the individual,
- are provided in a safe environment at the appropriate level of care and,

- allow individuals to move through treatment and back to the most integrated setting possible.

To assure a successful community transition, we use key strategies such as:

- Prompt psychiatric follow-up upon people's return to a community setting and,
- Reducing the number of medications necessary to control the individual's symptoms.

We also reach out to partner with community providers to remove the barriers that limit successful transitions back to the community.

RESULTS

We measure non-acute bed days. A non-acute bed day is a day spent in the hospital when the client no longer needs that level of care. When a client does not need hospital level of care but cannot be discharged, it is costly and causes other clients who need hospital level of care to remain on the waiting list. Our goal for inpatient services is that less than 10% of total bed days be classified as non-acute bed days.

The graph above shows that the non-acute bed day percentage at AMRTC is decreasing, but there has been a slight increase in the last quarter of FY 2018. The slight increase is due in part to the number of admissions directly from jails. A number of these clients need competency restoration services. DCT is working with the counties and the courts to develop processes that would allow discharges of these clients to community providers.

The CBHH non-acute bed days percentage has increased slightly but remains close to the 10% goal. The CABHS program operates few beds, so having just one or two clients who do not meet hospital level of care has a great impact on the non-acute bed day measure.

Another measure of success is the screening for cardiometabolic syndrome indicators. Cardiometabolic syndrome prevention is a key component of improving the lives of those we support and mirrors national trends towards improving healthcare quality systems. Increasing the number of people who are at a healthy weight will help us reduce the incidence of metabolic syndrome and chronic diseases among our patients. These rates also help to determine appropriate interventions. Integrating Body Mass Index (BMI) education into existing programming can reduce the likelihood of the onset and progression of obesity and related chronic diseases, as well as increase healthy eating and physical lifestyle skills. We are collecting information via our Electronic Medical Record (EMR)

and monitoring it closely to help those served maintain an appropriate BMI, reduce incidences of chronic disease, and enable them to live healthier lives.

Managing and maintaining a healthy blood pressure reduces an individual's risk of cardiovascular disease and other chronic diseases. Increasing the number of people with a healthy blood pressure will help us assist our patients to lead healthier lives. Increased screening will also aid in the development of appropriate interventions, increase disease management and prevention, and assist with creating individualized treatment plans.

The graph above shows the work that has been done to improve screening for two key components of cardiometabolic syndrome, Body Mass Index (BMI) and blood pressure. Our goal is to have a 95% screening rate for both BMI and blood pressure. There has been a slight reduction in screening rates this calendar year and work is underway to better support sites in increasing screening rates and using the information for meaningful interventions.

Minnesota Statutes Chapter 246 (<https://www.revisor.mn.gov/statutes/?id=246>) provide the legal authority for Direct Care and Treatment State Operated Services.

NOTE: The budget structure for DHS Direct Care and Treatment programs was modified during the 2018-2019 Biennial Budget to better reflect the services provided and the administrative structures supporting them. This modification brought all DCT under a single Program containing five Budget Activities.

Program: Direct Care and Treatment

Activity: Community Based Services

mn.gov/dhs/people-we-serve/people-with-disabilities/services/direct-care-treatment/

AT A GLANCE

- 346 people were served by Community Support Services mobile teams during FY 2017.
- 20 children and adolescents with severe emotional disturbance were served in individual foster homes during FY 2017.
- 529 clients with developmental disabilities were served in community residential services during FY2017.
- 752 clients with developmental disabilities were served in day treatment and habilitation vocational services during FY 2017.
- All funds spending for this budget activity was \$118 million for FY2018. This represents approximately 27 percent of the total Direct Care and Treatment (DCT) all funds spending. Total DCT spending is less than 3 percent of the overall spending for DHS.

PURPOSE & CONTEXT

- As part of the Department of Human Services Direct Care and Treatment (DCT) Administration, Community Based Services (CBS) provides treatment and residential care to individuals with behavioral health issues and developmental disabilities. CBS programs specialize in the treatment of vulnerable people with complex needs for whom no other providers are available.
- The majority of CBS programs operate as an enterprise service. Enterprise services operate on the revenues generated from services provided to clients. Revenues are collected from third-party payment sources such as Medical Assistance, private insurance, and the clients themselves.

SERVICES PROVIDED

Service programs within this activity include:

- **Community Support Services (CSS)** – statewide specialized mobile teams providing crisis support services to individuals with mental illness and/or disabilities in their home community or transitioning back to their home community. Their overall goal is to support people in the most integrated setting by addressing behavior associated with mental illness or intellectual disabilities that would cause individuals to be admitted to institutional settings.
- **Crisis Residential Services and Minnesota Life Bridge (MLB)** – crisis and MLB have a total of eight short-term residential programs throughout the state. Their overall goal is to support people in the most integrated setting close to their home community or natural supports by addressing behavior associated with mental illness or intellectual disabilities that would cause individuals to lose their placements or be admitted to a less integrated setting.
- **Minnesota Intensive Therapeutic Homes (MITH)** – provides foster care to children and adolescents who have severe emotional disturbance and serious acting-out behaviors. Homes are located throughout the state. Each child's treatment structure is individualized and is based on a combination of multidimensional treatment, wrap-around services and specialized behavior therapy.
- **Minnesota State Operated Community Services (MSOCS) Residential Services** – provides residential services in small group homes (typically 4 beds) located throughout the state for individuals with mental illness and/or developmental disabilities. Staff members assist clients with activities of daily living and

help integrate them into the local communities. Individual service agreements are negotiated with counties through the Rate Management System (RMS) for each client based on their needs.

- **Minnesota State Operated Community Services (MSOCS) Vocational Services** – provides vocational support services for people with developmental disabilities. Staff provide evaluations, training, and client assistance at job sites. Individual services agreements are negotiated for each client based on historic rates established for the identified vocational site.

Quantity	The percent of individual workers within MSOCS vocational services who have community employment ²	74%	88%	June 2016 vs. June 2018

Minnesota Statutes Chapter 246 (<https://www.revisor.mn.gov/statutes/?id=246>) provide the legal authority for Direct Care and Treatment State Operated Services.

NOTE: The budget structure for DHS Direct Care and Treatment programs was modified during the 2018-2019 Biennial Budget to better reflect the services provided and the administrative structures supporting them. This modification brought all DCT under a single Program containing five Budget Activities.

¹We continue to reduce our footprint (the number of homes we operate), while transitioning clients into the community when appropriate. This allows us to fulfill our mission of specializing in serving only the most behaviorally complex individuals.

²Community Employment offers a more person-centered approach to employment by giving individuals the opportunity to secure a variety of employment options outside the traditional contracted services that are brought into a Day Treatment & Habilitation (DT&H) site based employment setting.

Program: Direct Care and Treatment

Activity: Forensic Services

mn.gov/dhs/people-we-serve/people-with-disabilities/services/direct-care-treatment/

AT A GLANCE

- Minnesota Security Hospital (MSH) served 271 individuals during FY 2017; 65 were discharged with an average length of stay of 5.8 years.
- Transition Services served 102 individuals during FY 2017; 41 were discharged with an average length of stay of 6.9 years.
- Forensic Nursing Home served 45 individuals during FY 2017; 15 were discharged with an average length of stay of 1.2 years.
- 135 individuals received Competency Restoration Services during FY 2017.
- Overall, the Forensic Services census is currently forecast to increase by 2-3 individuals per year.
- All funds spending for this budget activity was \$94 million for FY 2018. This represents approximately 21 percent of the total Direct Care and Treatment (DCT) all funds spending. Total DCT spending is less than 3 percent of the overall spending for DHS.

PURPOSE & CONTEXT

- As part of the Department of Human Services Direct Care & Treatment (DCT) Administration, Forensic Services in St. Peter provides multidisciplinary treatment services to adults with severe and persistent mental illness who usually have also come to the attention of the criminal justice system because they are at risk of endangering others and/or they present a serious risk to the public.
- Clients are admitted as a result of judicial or other lawful orders. Clients come from throughout the state. Most are under a civil commitment as mentally ill and dangerous.
- The 2017 Legislature appropriated \$25 million for FY 2018-19 biennium to increase staffing to improve client care and increase staff safety.
- The 2017 Legislature appropriated \$70 million in general obligation bonds for Phase 2 construction of residential and program areas to help create a safer and more therapeutic environment at MSH.
- The 2018 Legislature appropriated \$2.2 million in general obligation bonds to remodel the dietary building on the St. Peter campus.

SERVICES PROVIDED

Forensics Services programs provide a continuum of services:

- **Minnesota Security Hospital** – provides a secure inpatient setting for treatment of severe mental illness for individuals committed as mentally ill and dangerous (MI&D).
- **Transition Services** - provide a supervised residential setting for individuals committed as MI&D and offers social rehabilitation treatment to increase self-sufficiency and build skills necessary for a safe return to the community.
- **Forensic Nursing Home** - provides nursing home level of care to individuals committed as mentally ill and dangerous, a sexual psychopathic personality, sexually dangerous person or on medical release from the Department of Corrections.
- **Competency Restoration Services** – evaluates and treats individuals who have been committed as mentally ill and determined to not be competent under Minnesota Court Rules of Criminal Procedure [Rule 20.01 Subd. 7](#). This service is provided in conjunction with mental health treatment in DCT programs.

- **Court-ordered evaluations** – include evaluations of a person’s competency to stand trial and pre-sentencing mental health evaluations. These can be done on either an inpatient basis at the Minnesota Security Hospital or in a community setting, including a community corrections facility.

All of these services are provided through a direct general fund appropriation except court-ordered evaluations, which is funded with other revenues.

RESULTS

We measure success by the number of individuals discharged from Forensics Services programs to more integrated settings, reflective of the Minnesota Olmstead Plan. In the chart below, the solid line is the average number of discharges. The dotted line is the trend line over the past three years.

It should be noted that in January 1, 2016, the definition of more integrated settings was converted from data on discharges to any non-forensic/correctional setting, to data on discharges to non-segregated settings. During the second half of FY18, there was an increase in the number of individuals discharged to more integrated settings.

We care about the safety of our clients and staff. One measure of safety is the Occupational Safety and Health Administration (OSHA) Total Case Incidence Rate (TCIR). The OSHA Total Case Incident Rate is the total number of workplace injuries or illnesses per 100 full time employees (FTE) working in a year. This is a metric used nationally to compare rates of workplace injuries with national averages of similar industries, which in our case is state healthcare nursing and residential facilities. In the chart below, the blue line is the annual data for Forensic Treatment Services (FTS). The orange line denotes the industry code average rate for state government nursing and residential facilities. For 2016, the national average among state government nursing and residential care facilities was 13.7 incidents per 100 FTE. The average for 2017 is not yet available.

There have been many efforts taken within Forensic Services that contributed to the reduction in TCIR over the past few calendar years:

- Designing the new facility to focus on creating an environment that would be safe for the patients and the staff who care for them.
- Recognizing inconsistency in our trainings, rewriting curriculum, training and/or retraining staff, as well as continuing to monitor for integrity of the training.
- Initiating quarterly safety skills fairs, where the focus of training is on noted incidents that occurred during the last quarter where staff and/or patient injuries occurred.
- Continuously evaluating equipment used during needed containment of patients to minimize risk.
- Establishing a behavioral support team of professionals that review incidents and can then wrap some additional clinical services around those patients by working with their treatment teams.

Minnesota Statutes Chapter 246 (<https://www.revisor.mn.gov/statutes/?id=246>) provide the legal authority for State Operated Services. See also, Minnesota Statutes Chapter 253 (<https://www.revisor.mn.gov/statutes/?id=253>) for additional authority that is specific to Forensic Services.

NOTE: The budget structure for DHS Direct Care and Treatment programs was modified during the 2018-2019 Biennial Budget to better reflect the services provided and the administrative structures supporting them. This modification brought all DCT under a single Program containing five Budget Activities.

Program: Direct Care and Treatment

Activity: Minnesota Sex Offender Program

mn.gov/dhs/people-we-serve/adults/services/sex-offender-treatment/

AT A GLANCE

- Minnesota Sex Offender Program (MSOP) population as of June 30, 2018 was 736.
- Clients progress across three phases of treatment through active participation in group therapy and opportunities to demonstrate meaningful change.
- As of June 30, 2018, approximately 85 percent of MSOP treatment-eligible clients voluntarily participated in treatment.
- As of June 30, 2018, 15 MSOP clients are provisionally discharged in the community.
- All funds spending for this budget activity was \$87 million for FY 2018. This represents approximately 20% of the total Direct Care and Treatment (DCT) all funds spending. Total DCT spending is less than 3 percent of the overall spending for DHS.

PURPOSE & CONTEXT

- As part of the Department of Human Services Direct Care and Treatment (DCT) Administration, the Minnesota Sex Offender Program (MSOP) provides services to individuals who have been civilly committed to receive sex offender treatment.
- MSOP's mission is to promote public safety by providing sex offender treatment.
- Minnesota is one of 20 states with civil commitment laws for sex offenders.
- Most MSOP clients come from the Department of Corrections through the civil commitment process after they have finished their period of incarceration.
- Transfer to Community Preparation Services, provisional discharge or discharge from MSOP must be ordered by the court.

SERVICES PROVIDED

We accomplish our mission by:

- Creating a therapeutic environment that is safe for clients and staff. The treatment model is client-centered and has a clear progression for each phase of treatment.
- Providing core group therapy, psycho-educational groups, and other programming opportunities in a three phase sex offender treatment program. Clients also participate in rehabilitative services including: education, therapeutic recreational activities and vocational work program assignments.
- Providing risk assessment and professional treatment reports to courts to assist in their decisions.
- Working together with community, policy makers, and other governmental agencies.
- Developing resources for provisionally discharged clients to succeed in the community.

MSOP uses a three-phase treatment process. Clients initially address treatment-interfering behaviors and attitudes (Phase I) in preparation for focusing on their patterns of abuse and identifying and resolving the underlying issues in their offenses (Phase II). Clients in the later stages of treatment focus on deinstitutionalization and reintegration, applying the skills they acquired in treatment across settings and maintaining the changes they have made while managing their risk for re-offense (Phase III).

MSOP is funded by general fund appropriations. When a county commits someone to the program, the county is responsible for part of the cost of care. For commitments initiated before August 2011, the county share is ten

percent. For commitments after that date, the county share is 25 percent. When a client is court ordered to provisional discharge (continued community supervision by MSOP), there is no county share.

RESULTS

As more clients move through the program, we expect to see increases in the number of clients participating in the latter stages of treatment. The chart below shows the treatment progression of clients since 2013.

The legislature requires an annual performance report on the Minnesota Sex Offender Program. Two important measures in the performance report are the program wide per diem and client counts. For MSOP the program wide per diem is the calculated daily comprehensive cost of the program for each client.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Per diem	\$344	\$373	FY16 to FY18
Quantity	Increase in client population	723	736	FY16 to FY18
Quality	Increase in client population on Provisional Discharge	5	15	FY16 to FY18

Results Notes

- Treatment progression graph is produced by the MSOP Research Department.
- The reported measure is the published per diem rate. It is the rate charged to counties when figuring a county's share of the cost of a client's care.
- Client population counts in the table below are as of June 30th (the end of each fiscal year).

Minnesota Statutes, chapter 246B (<https://www.revisor.mn.gov/statutes/cite/246B>) governs the operation of the Sex Offender Program and chapter <https://www.revisor.mn.gov/statutes/cite/253D> governs the civil commitment and treatment of sex offenders.

NOTE: The budget structure for DHS Direct Care and Treatment programs was modified during the 2018-2019 Biennial Budget to better reflect the services provided and the administrative structures supporting them. This modification brought all DCT under a single Program containing five Budget Activities.

Program: Direct Care and Treatment

Activity: DCT Administration

mn.gov/dhs/people-we-serve/people-with-disabilities/services/direct-care-treatment/

AT A GLANCE

- Direct Care and Treatment (DCT) offers programs in more than 200 sites throughout Minnesota.
- We provide services to over 12,000 individuals annually.
- There are over 4,500 employees in Direct Care and Treatment (DCT) with an annual budget of over \$450 million.
- All funds spending for this budget activity was \$31 million for FY 2018. This represents approximately 7 percent of the total DCT all funds spending. Total DCT spending is less than 3 percent of the overall spending for DHS.

PURPOSE & CONTEXT

Direct Care and Treatment (DCT) operates as a health care system providing a wide range of services to individuals with behavioral health needs. These services are provided throughout the state with 24/7 operations of sites that include psychiatric hospitals, residential treatment sites, vocational services, secure facilities and community clinics. DCT Administration oversees and manages the business operations of this health care system. The administration also provides strategic plan development and implementation as well as oversight to integrate DCT's 7 pillars of excellence (Quality, Services, People, Growth, Financial, Technology, Legislative) into all programs, divisions and staff.

SERVICES PROVIDED

Our **Compliance Office** is responsible for managing the relationships with several regulating entities that provide oversight to DCT programs. The staff in this area work with program staff to assure that the programs understand the regulatory, court and legislative requirements and that all standards are being followed.

Our **Health Information Management Services (HIMS) unit** manages all patient and client records to assure that information is properly documented and protected. HIMS provides support to the direct care staff to assure medical records are accurate, timely, and up-to-date, laws are followed related to civil commitment, records are properly stored and access to private information is appropriate and documented. HIMS will also be developing, implementing, and auditing the business processes incorporated into the Behavioral Health Medical Records to ensure the system meets regulatory requirements and business needs.

Our **Utilization Management unit** is responsible for assuring that all patient care is appropriate and is being provided within the right level of care. When individuals are being served in the proper level of care they are able to receive the most appropriate services to meet their needs. Services can then be billed which allows the state to recapture the cost of serving the individual.

On-going training is essential to providing quality care within a health care organization. Our **Learning and Development** office ensures that staff have the necessary training needed to meet regulatory requirements/standards and to best serve the individuals in our care. Each division within DCT has a Learning Advisory Committee and a team of individuals that help develop and manage training to ensure DCT meets regulatory requirements and that training is completed in a timely manner. These groups also ensure ongoing employee training is managed and documented appropriately.

Performance Improvement is a regulatory compliance requirement. This office ensures our programs meet quality assurance and performance improvement standards. Performance improvement projects are done with a

goal of improving the processes and systems that support our healthcare services. Projects allow us to be proactive in identifying areas of risks and potential problems but also to respond to a problem that has been identified by an oversight entity so measures can be put in place to eliminate future risks.

Our **Safety and Infection Control** staff ensure that standards set by various licensing agencies are in place to protect the people we serve and our staff. On-going identification of hazards assures that practices are put in place to maintain safety and supports the business continuity planning and emergency response by the organization. This includes the ongoing monitoring of things such as tuberculosis, influenza, safe patient handling, falls prevention, and safe operation of equipment.

Our **Financial Management** office provides fiscal services and controls the financial transactions and reporting to assure prudent use of public resources. Core functions in this area include preparing operating and legislative budget requests, patient services billing and accounts receivable, contract management support, accounts payable, Medicare and/or Medicaid Cost reporting for our hospitals and clinics, financial reporting, and resident trust services for our institutional patients and clients.

Our **Facilities Management** unit is responsible for buildings occupied by DCT programs including the strategic planning necessary to complete capital budget requests. Core functions include leasing of space for DCT, project management of design and construction projects, asset management, conditional facility assessment, department sustainability activities and strategic planning to meet the on-going needs of our programs.

Our **Business Process Services** unit provides support to direct care staff on consistent and standardized processes for doing business. These business processes cross all programs/divisions to develop core ways of providing electronic documentation of admissions, assessments, treatment progress, discharge, etc. Another core function is to ensure these standardized business processes are incorporated into the DCT Behavioral Health Medical Record, which is the backbone of our health care system.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	The number of background checks completed for hand gun permits ¹	10,118	11,761	FY16 & FY18
Quantity	The number of requests for releasing client specific information	2,085	6,031	FY16 & FY18
Quantity	The number of unique claims processed for client billings	140,203	162,797	FY16 & FY18

¹ DCT HIMS staff complete the process as required under Minnesota Statute 245.041 to provide commitment information to local law enforcement agencies for the sole purpose of facilitating a firearms background check.

Minnesota Statutes Chapter 246 (<https://www.revisor.mn.gov/statutes/cite/246>) provide the legal authority for Direct Care and Treatment State Operated Services.

NOTE: The budget structure for DHS Direct Care and Treatment programs was modified during the 2018-2019 Biennial Budget to better reflect the services provided and the administrative structures supporting them. This modification brought all DCT under a single Program containing five Budget Activities.

Program: Fiduciary Activities

Activity: Fiduciary Activities

mn.gov/dhs/people-we-serve/children-and-families/services/child-support/

AT A GLANCE

- Child Support program payments are the bulk of this activity, amounting to \$602.7 million in the same year.
- All funds spending for the Fiduciary Activities activity for FY 2017 was \$636.5 million.

PURPOSE & CONTEXT

The Fiduciary Activities budget program:

- Collects money from individuals and organizations (for example people who owe child support)
- Distributes the collected funds to people owed the money (such as children receiving child support)

Because these are not state funds and belong to others, they are not included in the state's budget or consolidated fund statement.

SERVICES PROVIDED

The following services make up most of the transactions of this budget activity:

- Child Support Payments: Payments made to custodial parents, collected from non-custodial parents
- Recoveries: Money recovered from clients that cannot be processed in the state computer systems. Funds are held here until they can be credited to the correct area, such as:
 - US Treasury
 - Supplemental Security Income (SSI)
 - Counties
 - Clients
- Long-Term Care Penalties: These are funds collected by the federal government (Centers for Medicare and Medicaid Services) related to penalties for nursing home violations. We use these to fund approved projects to improve nursing homes.

RESULTS

The Child Support Program makes timely distribution of collected child support payments to custodial parents and ranks in the top tier of states in terms of percent collections and payments on both current obligations and arrears.

State Performance on Current Obligations

<i>State</i>	<i>FFY 2016 (%)</i>	<i>Due 2016 in Millions (\$)</i>	<i>Paid 2016 in Millions (\$)</i>	<i>FFY 2015 (%)</i>	<i>FFY 2014 (%)</i>

Program: Technical Activities

Activity: Technical Activities

AT A GLANCE

- Accounts for approximately \$600 million in annually federal administrative reimbursement to counties, tribes and other local agencies.
- Processes and returns roughly \$40 million each year in administrative reimbursements to the state Treasury.
- All funds spending for the Technical Activities activity for FY 2017 was approximately \$700 million.

PURPOSE & CONTEXT

The Technical Activities budget program includes transfers and expenditures between federal grants, programs and other agencies that would result in misleading distortions of the state's budget if the Department of Human Services did not account for them in a separate budget activity. This arrangement helps us to make sure that these transfers and expenditures are still properly processed in the state's accounting system and helps us comply with federal accounting requirements

SERVICES PROVIDED

We include several different types of inter-fund and pass through expenditures in the Technical Activities budget program:

- Federal administrative reimbursement earned by and paid to counties, tribes and other local agencies.
- Federal administrative reimbursement earned by and paid to other state agencies.
- Administrative reimbursement (primarily federal funds) earned on statewide indirect costs and paid to the general fund.
- Administrative reimbursement (primarily federal funds) earned on DHS Central Office administrative costs and paid to the general fund, health care access fund or special revenue fund under state law and policy.
- Transfers between federal grants, programs and state agencies that are accounted for as expenditures in the state's SWIFT accounting system.
- Other technical accounting transactions.

Staff members in our Operations Administration, which is part of our Central Office, are responsible for the accounting processes we use to manage the Technical Activities budget program.

RESULTS

We maintain necessary staff and information technology resources to adequately support accurate, efficient, and timely federal fund cash management. We measure the percentage of federal funds deposited within two working days.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quality	Percent of federal fund deposit transactions completed (deposited in State treasury) within two working days of the amount being identified by the SWIFT accounting system.	94%	98.5%	FY2013 to FY2015

M.S. sections 256.01 (<https://www.revisor.mn.gov/statutes/?id=256.01>) to 256.011 (<https://www.revisor.mn.gov/statutes/?id=256.011>) and Laws 1987, chapter 404, section 18, provide the overall state legal authority for DHS's Technical Activities budget program.

Federal Agency and CFDA#	Federal Award, Grant Purpose, People Served	New Grant	SFY 2018 Actual	SFY 2019 Budget	SFY 2020 Base	SFY 2021 Base	Required State Match or MOE\$	FTEs
Dept. of Health & Human Services, CMS 93.506	ACA-Nationwide Program for National and State Background Checks for Direct Patient Access Employees of Long-term Care Facilities and Providers: DHS conducts background studies for health and human services programs licensed by DHS, MDH, and some at the Department of Corrections (DOC). This grant provided increased fingerprint identification resources and included a "rap back" feature to identify staff who may need to be disqualified after the initial routine background check.		390	0	0	0	Yes	9.0
Dept. of Health & Human Services, Admin. for Children and Families 93.558	Temporary Assistance for Needy Families (TANF) Block Grant: Grants to assist needy families with children so that children can be cared for in their own homes; to reduce dependency by promoting job preparation, work, and marriage; to reduce and prevent out-of-wedlock pregnancies; and to encourage the formation and maintenance of two-parent families. These funds are used to provide grants to counties and tribes to provide support services for Minnesota Family Investment Program (MFIP)/Diversionary Work Program (DWP) participants that include job search/skills, adult basic education, GED classes, job coaching, short-term training, county programs to help with emergency needs, and help accessing other services such as child care, medical care and CD/Mental health services. An average of 27,000 people were enrolled in employment services each month. TANF also helps fund the MFIP/DWP cash benefit program and child care assistance programs as well as other programs that help low-income families with children.		268,270	273,621	274,650	276,246	Yes	14.7
Dept. of Health & Human Services; Admin. For Children & Families 93.575 and 93.596	Child Care and Development Block Grant (CCDF): Provides funds to States to increase the availability, affordability, and quality of child care services for low-income families where the parents are working or attending training or educational programs. This grant helps fund the Minnesota Family Investment Program (MFIP) and Basic Sliding Fee Child Care Assistance Programs that help low-income families pay for child care so that parents may pursue employment or education leading to employment. Also funded are Child Care Development Grants that promote services to improve school readiness, and the quality and availability of child care in Minnesota. In FY 2017, an average of 14,554 families per month received child care assistance subsidies.		149,153	151,541	155,598	152,186	93.575-Yes 93.596 - No	33.9

Federal Agency and CFDA#	Federal Award, Grant Purpose, People Served	New Grant	SFY 2018 Actual	SFY 2019 Budget	SFY 2020 Base	SFY 2021 Base	Required State Match or MOE\$	FTEs
Dept. of Health & Human Services, CMS	Federal Basic Health Funding: The MinnesotaCare program is currently operating as a federal basic health plan (BHP) under section 1331 of the Affordable Care Act. Under the BHPHS currently receives federal basic health plan funding equal to 95 percent of federal tax credits and cost sharing subsidies available to people who would otherwise enroll in a health insurance exchange. In FY 2017, MinnesotaCare had an average monthly enrollment of 89,081.		368,675	400,835	444,224	470,882	Yes	0.0
Dept. of Health & Human Services, CMS 93.777	State Survey and Certification of Health Care Providers and Suppliers: This grant provides funding for a contract with Minnesota Department of Health (MDH) to certify nursing homes and rehabilitation providers in accordance with requirements from the Centers for Medicare and Medicaid Services. These providers may not participate in the Medicaid program unless they are certified.		14,589	8,523	8,523	8,523	Yes	0.0
Dept. of Health & Human Services, CMS 93.778	Medical Assistance Program: The state earns administrative FFP for activities which support Medical Assistance (MA) which is Minnesota's Medicaid program. This grant is an administrative pass-through of federal financial participation (FFP) to counties, DHS systems, and the state general fund for approved MA administrative activities.		478,164	620,868	622,186	623,236	Yes	0.0
Dept. of Health & Human Services, CMS 93.778	State Innovation Model Testing: This grant builds upon the Minnesota health care delivery system reforms with a focus on patient centered services across a continuum of health care, mental health, long-term care, and other services. The goal of this grant is to create multi-payer models with a broad mission to raise community health status and reduce long term health risks for beneficiaries of Medicare, Medicaid, and CHIP. The Minnesota Accountable Health Model will offer a comprehensive, statewide, imitative to close the current gaps in health information technology, secure exchange health information, quality improvement infrastructure, and workforce capacity needed to provide team-based coordinated care.		8,146	0	0	0	No	8.0
Dept. of Health & Human Services, CMS	Medical Assistance Program: Medicaid program grants provide comprehensive health care coverage and access to long term care services and supports to an average 1.1 million uninsured or underinsured Minnesotans who meet income and other eligibility requirements. This program is managed by the state under guidance from the federal government. The amounts reported here are the federal share of spending for this joint federal-state program.		7,100,894	6,834,576	7,686,509	7,560,553	Yes	0.0

Federal Agency and CFDA#	Federal Award, Grant Purpose, People Served	New Grant	SFY 2018 Actual	SFY 2019 Budget	SFY 2020 Base	SFY 2021 Base	Required State Match or MOE\$	FTEs
Dept. of Health & Human Services, CMS 93.778	Medical Assistance Program: The Federal Children's Health Insurance Program (SCHIP) grants provide coverage to over 3,500 uninsured low-income children and pregnant women who do not qualify for regular Medicaid. Minnesota also applies a portion of its federal CHIP allotment to enhance the regular 50 percent federal share for children on Medical Assistance with household incomes above 138 percent of poverty.		141,983	117,129	101,490	80,960	Yes	0.0
Dept. of Health & Human Services, Substance Abuse & Mental Health Administration 93.959	Block Grants for Prevention and Treatment of Substance Abuse: The Consolidated Chemical Dependency Treatment Fund (CCDTF) combines otherwise separate funding sources – the federal Substance Abuse, Prevention and Treatment block grant, MA, Minnesota Care and other state appropriations – into a single fund. (The CCDTF provides funding for residential and non-residential addiction treatment services for eligible low-income Minnesotans who have been assessed as needing treatment for chemical abuse or dependency. In CY2016 there were 56,157 substance abuse treatment admission for Minnesota residents, the CCDTF fund covered services for (43.6%) of these admissions. Almost all treatment providers in the state are enrolled as CCDTF providers). These amounts are the federal CD block grant.		23,571	25,824	26,098	26,098	Yes	31.7
Dept. Of Agriculture, Food and Nutrition Service 10.561	State Administrative Matching Funds for the Supplemental Nutrition Assistance Program (SNAP): These service grants represent revenues to the general fund from the federal Supplemental Nutrition Assistance Program (SNAP) Employment & Training program which provides 50% federal matching funds for support services such as child care and other employment supports provided to eligible SNAP recipients. There are approximately 26,500 participants in SNAP employment and training activities during the year. Matching funds for child care and diversionary work program ended 6/30/17.		2,819	13,350	13,350	13,350	Yes	0.0
Dept. of Health & Human Services; Admin. for Children & Families 93.563	Child Support Enforcement: This funding is the federal financial participation (FFP) for the Supreme Court, Department of Corrections, county federal incentives, County Income Maintenance (both administrative and indirect costs), systems fund, general fund and 1115 grants.		115,299	118,823	120,000	120,000	Yes	0.0
Dept. of Health & Human Services, Admin. for Children and Families 93.597	Grants to States for Access & Visitation Programs: Grant provides resources to states to help establish programs to support and facilitate noncustodial parents' access to and visitation of their children. The grant serves approximately 675 families.		132	190	276	276	No	0.0

Federal Agency and CFDA#	Federal Award, Grant Purpose, People Served	New Grant	SFY 2018 Actual	SFY 2019 Budget	SFY 2020 Base	SFY 2021 Base	Required State Match or MOE\$	FTEs
Dept. of Health & Human Services, Admin. for Children and Families 93.564	Digital Marketing Grant: New grant to increase participation in the Child Support Program.	Yes	0	0	340	340	No	0.0
Dept. Of Agriculture, Food and Nutrition Service 10.568	Trade Mitigation Program: Grant to support food banks store and distribute The Emergency Food Assistance Program (TEFAP). Funds assist with the operational costs of the receipt, storage, and distribution of additional food for the Food Banks to serve low income households with income at or below 200% of the federal poverty guidelines.	Yes	0	250	500	500	No	0.0
Dept. of Health & Human Services; Admin. For Children & Families CFDA 93.658	Foster Care Title IV-E: This grant helps states provide temporary safe and stable out-of-home care for children whose parents cannot safely care for them. In 2017, 16,573 children experienced out-of-home placements.		63,554	66,624	68,170	69,801	Yes	0.0
Dept. of Health & Human Services; Admin. For Children & Families CFDA 93.669	Child Abuse Prevention and Treatment Act (CAPTA): Grant is used to improve child protective services systems. In Minnesota, grants to five counties are used to administer the federally required Citizen Review Panels for child protection services. The counties are Chisago, Hennepin, Ramsey, Washington and Winona. This is a requirement of all states to be able to access other federal reimbursement.		418	1,852	2,078	2,078	No	3.2
Dept. of Health & Human Services; Admin. For Children & Families 93.645	Child Welfare Services Title IV-B1: Grant to promote state flexibility in the development and expansion of a coordinated child and family services program that utilizes community-based agencies and ensures all children are raised in safe, loving families. These funds provide grants to counties and tribes to provide core child protection services to strengthen families and to prevent out-of-home placement when it is safe to do so. Grants support services to approximately 30,000 families per year.		4,417	4,783	4,783	4,783	Yes	35.5

Federal Agency and CFDA#	Federal Award, Grant Purpose, People Served	New Grant	SFY 2018 Actual	SFY 2019 Budget	SFY 2020 Base	SFY 2021 Base	Required State Match or MOE\$	FTEs
Dept. of Health Human Services; Admin. For Children & Families 93.643	Children's Justice Grants to States: Grants to encourage states to enact reforms designed to improve (1) the assessment and investigation of suspected child abuse and neglect cases, including cases of suspected child sexual abuse and exploitation, in a manner that limits additional trauma to the child and the child's family; (2) the assessment and investigation of cases of suspected child abuse-related fatalities and suspected child neglect-related fatalities; (3) the investigation and prosecution of cases of child abuse and neglect, including child sexual abuse and exploitation; and (4) the assessment and investigation of cases involving children with disabilities or serious health-related problems who are suspected victims of child abuse or neglect. In Minnesota these grants provide training for county and tribal law enforcement, county attorney, and county and tribal child protection professionals on assessment and investigations, including training on forensic interviewing of potential child abuse victims. This grant supports training for approximately 183 participants annually.		287	299	349	349	No	1.0
Dept. of Health & Human Services, Admin. for Children & Families 93.674	Chafee Foster Care Independence Program: Federal funding passed in 1999, provides funding to and governs the program known as the Support for Emancipation and Living Functionally (SELF) Program in Minnesota. The intent of the funds is to reduce the risk that youth aging out of long term out-of-home placement will become homeless or welfare dependent. Funds are therefore awarded for the provision of services designed to help older youth, currently or formerly in out-of-home care, prepare for a successful transition to adulthood. Approximately 1,420 high-risk youth are served annually.		2,066	1,984	2,979	2,979	Yes	2.8
Dept. of Health & Human Services, Admin. for Children & Families 93.659	Adoption Assistance: Federal financial participation for payments to individuals adopting Title IV-E special needs children. Approximately 7,127 children receive IV-E adoption assistance. This assistance is intended to prevent inappropriately long stays in foster care and to promote the healthy development of children through increased safety, permanency and well-being.		32,993	46,556	53,063	59,732	Yes	0.0
Dept. of Health & Human Services, Admin. for Children & Families 93.599	Chafee Education and Training Vouchers Program (ETV): Grant provides resources to States to make available vouchers for postsecondary training and education to help defray the costs of post-secondary education to approximately 120 youth who age-out of foster care at age 18.		826	699	1,083	1,083	Yes	0.7

Federal Agency and CFDA#	Federal Award, Grant Purpose, People Served	New Grant	SFY 2018 Actual	SFY 2019 Budget	SFY 2020 Base	SFY 2021 Base	Required State Match or MOE\$	FTEs
Dept. of Health & Human Services: Admin. for Children & Families 93.556	Promoting Safe and Stable Families (Title IV-B2 Child Welfare Program): Grant provides funds to help prevent the unnecessary separation of children from their families, improve the quality of care and services to children and their families, and ensure permanency for children by reuniting them with their parents, by adoption or by another permanent living arrangement. Funding provides grants to community-based agencies, counties and tribes to provide services to families to reduce the risk of maltreatment, to prevent child maltreatment and improve family functioning for families reported to child protection services, and provide child protective services to strengthen families and prevent out-of-home placement when it is safe to do. This grant helps serve approximately 20,000 families.		3,875	3,624	4,022	4,022	Yes	3.6
Dept. of Health & Human Services: Admin. for Children & Families 93.590	Community-Based Child Abuse Prevention Grants (Child Trust Fund) : Grant supports community-based efforts to develop, operate, expand, and enhance, and coordinate initiatives, programs, and activities to prevent child abuse and neglect and to support the coordination of resources and activities to better strengthen and support families to reduce the likelihood of child abuse and neglect; and (2) to foster understanding, appreciation and knowledge of diverse populations in order to effectively prevent and treat child abuse and neglect. Funds provide grants to community based agencies (such as non-profits, school districts, and human service agencies) to provide services to families to reduce the risk of child maltreatment and enhance family capacities.		2,394	2,370	2,838	2,653	Yes	1.4
Dept. of Human Services: Admin. for Children & Families 93.603	Adoption Incentive Payments: provide incentives to States to increase annually the number of foster child adoptions, special needs adoptions, and older child adoptions. These funds are used for grants to providers for adoption-related services, including post adoption.		244	874	887	887	No	0.0
Dept. of Health & Human Services, Admin for Children & Families	Federal financial participation (FFP) to states who opt to provide guardianship assistance payments for the care of children by relatives who have assumed legal guardianship of eligible children for whom they previously cared as foster parents. This assistance is intended to prevent inappropriately long stays in foster care and to promote the healthy development of children through increased safety, permanency, and well-being.		4,793	4,950	5,045	5,145	Yes	0.0
Dept. of Health & Human Services: Admin. for Children & Families 93.667	Social Service Block Grant (Title XX): Grant provides social services best suited to meet the needs of individuals that must be directed to one or more of five broad goals: Achieve or maintain economic support to prevent, reduce or eliminate		31,619	32,167	32,164	32,164	No	11.7

Federal Agency and CFDA#	Federal Award, Grant Purpose, People Served	New Grant	SFY 2018 Actual	SFY 2019 Budget	SFY 2020 Base	SFY 2021 Base	Required State Match or MOE\$	FTEs
	dependency, achieve or maintain self-sufficiency, including reduction or prevention of dependency, preventing or remedying neglect, abuse or exploitation of children and adults unable to protect their own interest or preserving, rehabilitating or reuniting families, preventing or reducing inappropriate institutional care by providing for community-based care, home-based care or other forms of less intensive care, securing referral or admission for institutional care when other forms of care are not appropriate or providing services to individuals in institutions. Funds provide grants to counties to purchase or provide services for vulnerable children and adults who experience dependency, abuse, neglect, poverty, disability, or chronic health conditions. This grant contributes to costs for services to more than 311,000 adults and children annually. Grants also provide child care in a number of counties for children whose parents, guardian or current caretakers have changed residence recently to obtain employment in a temporary or seasonal agricultural activity (approx. 900 children per year) and grants provide legal advocacy, training and technical assistance in cases regarding custody, Children's Medicaid, permanency, adoption, tribal court proceedings, long-term foster care and others services to the Indian Child Welfare Law Center.							
Dept. Of Agriculture, Food and Nutrition Service 10.551	Supplemental Nutrition Assistance Program (SNAP): More than 429,000 Minnesotans receive help through the Supplemental Nutrition Assistance Program every month; the average monthly benefit is \$112 per person.		523,221	567,690	571,726	575,059	No	0.0
Dept. of Housing and Urban Development; Office of Community Planning & Development CFDA 14.231	Emergency Solutions Grant Program: Grant provides funding to: (1) engage homeless individuals and families living on the street; (2) improve the number and quality of emergency shelters for homeless individuals and families; (3) help operate these shelters; (4) provide essential services to shelter residents, (5) rapidly re-house homeless individuals and families, and (6) prevent families and individuals from becoming homeless. This grant provides funding to shelters for operating costs, essential services, and homelessness prevention and costs to administer the federal grant. Approximately 4,700 individuals were served in shelters with these funds.		2,055	2,068	2,154	2,154	Yes	1.0

Federal Agency and CFDA#	Federal Award, Grant Purpose, People Served	New Grant	SFY 2018 Actual	SFY 2019 Budget	SFY 2020 Base	SFY 2021 Base	Required State Match or MOE\$	FTEs
Dept. of Agriculture, Food and Nutrition Service 10.561	State Administrative Matching Funds for the Supplemental Nutrition Assistance Program (SNAP): Under Federal Supplemental Nutrition Assistance Program regulations, states have the option to include nutrition education activities in the State Plan filed with the Food and Nutrition Service (FNS) of the United States Department of Agriculture. This option allows states to include the costs of nutrition education activities as administrative costs of SNAP. Minnesota adopted this option in the early 1990's. The Minnesota Department of Human Services (DHS) contracts with the University of Minnesota Extension (U of M), White Earth Nation, Red Lake Nation, Leech Lake Band of Ojibwe, Bois Forte Band of Chippewa, Grand Portage Band of Chippewa, Fond du Lac Band of Lake Superior Chippewa, and Mille Lacs Band of Ojibwe to provide nutrition education services.		4,329	12,633	7,942	7,770	Yes	2.6
Dept. Of Agriculture, Food and Nutrition Service 10.551	Supplemental Nutrition Assistance Program: SNAP reimbursement is received for some Group Residential Housing (GRH) recipients who live in certain facilities where they receive all their meals.		4,352	14,003	5,826	5,826	No	0.0
Dept. Of Agriculture, Food and Nutrition Service 10.568	Emergency Food Assistance Program: Provides funding to States to enable processing storage and distribution costs incurred in providing food assistance to needy persons. Funds are used to Distribute U.S. Department of Agriculture (USDA) donated food commodities to individuals and families who use on-site meal programs, food shelves and shelters. This program design ensures an equitable distribution of commodities to all 87 counties.		1,523	1,965	2,006	2,006	Yes	1.9
Dept. Of Agriculture, Food and Nutrition Service 10.561	State Administrative Matching Funds for the Supplemental Nutrition Assistance Program: Federal funds for State and County administrative costs for the Supplemental Nutrition Assistance Program (SNAP).		57,804	53,556	53,556	53,556	Yes	0.0
Dept. of Health & Human Services; Admin. for Children & Families 93.569	Community Services Block Grant (CSBG): Grants to Community Action Agencies and Tribal Governments to focus local, state, private and federal resources to support low-income families and individuals to attain the skills, knowledge and motivation to become economically secure. Approximately 515,000 low income individuals in 201,000 families are served with these funds.		6,252	14,835	9,814	9,814	No	2.9
Dept. Of Agriculture, Food and Nutrition Service 10.561	State Administrative Matching Funds for the Supplemental Nutrition Assistance Program: Federal funds for state and county costs related to employment and training for Supplemental Nutrition Assistance Program (SNAP) recipients.		2,403	2,112	1,565	1,565	No	2.0

Federal Agency and CFDA#	Federal Award, Grant Purpose, People Served	New Grant	SFY 2018 Actual	SFY 2019 Budget	SFY 2020 Base	SFY 2021 Base	Required State Match or MOE\$	FTEs
Dept. Of Agriculture, Food and Nutrition Service 10.551	Supplemental Nutrition Assistance Program (SNAP): Grant benefits cash out provided to SSI and elderly recipients.		25,511	26,000	26,000	26,000	No	0.0
Dept. Of Agriculture, Food and Nutrition Service 10.561	State Administrative Matching Funds for the Supplemental Nutrition Assistance Program (SNAP): Grants to Community Action Agencies and anti-hunger organizations to conduct statewide outreach to assist people in determining if they are eligible for SNAP benefits. Under Federal Supplemental Nutrition Assistance Program regulations, states have the option to include outreach activities in the State Plan filed with the Food and Nutrition Service (FNS) of the United States Department of Agriculture. This option allows states to include the costs of outreach activities as administrative costs of SNAP. Costs are reimbursed by FNS at a rate of 50%. Annually more than 429,000 Minnesotans received nutrition assistance through the program every month.		2,564	2,694	2,778	2,778	Yes	2.0
Dept. of Health & Human Services, Admin. for Children & Families 93.566	Refugee Cash and Medical Assistance Program: Grant reimburses states for the cost of cash and medical assistance provided to refugees (and certain Amerasians from Viet Nam, Cuban and Haitian entrants, asylees, victims of a severe form of trafficking, and Iraqi and Afghan Special Immigrants) who are not eligible for the Minnesota family Investment Program or Medical assistance. Refugees and other populations are eligible for Refugee Cash or Medical Assistance during the first eight months after their arrival in the U.S. or grant of asylum. Also funds program coordination and planning expenses of DHS Resettlement Program Office and oversight of statewide refugee health screening administration.		1,773	3,276	3,236	3,236	No	8.0
Dept. of Health & Human Services, Admin. For Children & Families 93.584	Refugee Targeted Assistance Grant: Program provides funding for employment-related and other social services for refugees, certain Amerasians from Vietnam, Cuban and Haitian Entrants, asylees, victims of a severe form of trafficking, and Iraqi and Afghan Special Immigrants in areas with large refugee populations. An arrival must be within five years of arriving in this country or grant of asylum to be eligible for services under these grants.		899	400	200	0	No	0.0

Federal Agency and CFDA#	Federal Award, Grant Purpose, People Served	New Grant	SFY 2018 Actual	SFY 2019 Budget	SFY 2020 Base	SFY 2021 Base	Required State Match or MOE\$	FTEs

Dept. of Health & Human Services, Admin. for Community Living 93.761	Evidenced Based Falls Prevention Programs Financed Solely by Prevention and Public Health Funds. The Minnesota Board on Aging (MBA) received a grant to increase the number of evidence based falls prevention programs across Minnesota and to work with the Area Agencies on Aging (AAA) and their partners to build a network that provides information and access to evidence based falls prevention programs.		16	0	0	0	No	0.0
Department of Health and Human Services, Admin. For Community Living	Adult Protection Person-Centered Data Reporting system. The work of the grant will move the state from data reporting by the number of reports and the number of allegations of maltreatment to a person-centered data system with data reporting focused on the vulnerable person who was the subject of the report. Grant outcomes will include the creation of a data warehouse for enhanced data reporting on vulnerable adults and state case level submission to the National Adult Maltreatment reporting system. (NAMRS).		117	373	50	0	Yes	0.7
Department of Health and Human Services, Admin. For Community Living	Grants to Enhance State Adult Protective Services. This grant designs and builds development and quality assurance environments to mirror the state's person-centered adult protection data warehouse, add customized reporting for structured tool data, evaluate tool reliability and identify factors impacting report intake outcomes. The intended goal is to improve data quality, increase case level reporting capacity to Administration for Community Living and improve consistency in adult protection assessment and screening response for vulnerable adults. Products for this grant will include creation of quality assurance and development environments for the state's person-centered adult protection data warehouse for improved quality of NAMRS case level reporting.		0	400	368	334	Yes	2.00
Department of Health and Human Services, Admin. For Community Living 93.048	Innovations in Nutrition Programs. Dept. of Health & Human Services, Health Resources and Services Administration 93.917	HIV Care Formula Grants: Dedicated federal funding that helps individuals with HIV / AIDS obtain access to necessary medical care, nutritional supplements, dental services, mental health services, support services and outreach to high risk, underserved populations. Federal funding dedicated to maintain private insurance coverage for people living with HIV and/or purchase HIV related drugs. Funds used in conjunction with state and special revenue funds. (Approximately 2,600 people served.) Federal funding to provide outreach and education services to minority populations by identifying individuals with HIV/AIDS and make them aware of and enroll them in treatment service programs. (Approximately 100 people served). Grant includes administrative funding for administering and implementing the grant.		8,215	8,619	11,308	12,008	No	0.0
Dept. of Health & Human Services, Health Resources and Services Administration 93.917	HIV Care Formula Grants: This grant which supplements the Ryan White grant is a competitive grant that is awarded to states with demonstrated need. The funding helps low income persons living with HIV/AIDS get access to HIV/AIDS medications. The Supplemental grant also covers outreach to underserved high risk populations.		400	2,038	700	0	No	0.0
Dept. of Health & Human Services, Administration for Community Living (ACL) 93.234	TBI Demo Grant: Grant funds will be used to improve Minnesota's TBI system to better support person centered approaches and maximize the independence, well-being and health of people with TBIs and their families. The objectives are to: 1) expand the MN Trauma registry system to collect and analyze data that directly supports policy and services for Minnesotans with a TBI and their families; 2) establish a statewide and cross-agency plan for TBI; 3) increase education and supports for Native Americans living with TBIs; and 4) streamline access to person centered supports resulting in informed choice.		0	148	148	148	Yes	1.00
Dept. of Health & Human Services, Substance Abuse & Mental Health Administration 93.150	Projects for Assistance in Transition from Homelessness (PATH): Grants to counties and non-profit agencies for outreach and mental health services to homeless people. About \$500,000 per year of Adult MH Integrated state funds are used as match for these federal funds. Provided services to 417 persons who were chronically homeless and 902 persons who were at imminent risk of homelessness in CY 2017. An additional 451 persons were contacted through outreach.		784	824	808	808	Yes	0.3

Program Name Federal or State or Both (citation)	Purpose/ Recipient Type(s) Eligibility Criteria	FY 2018	FY 2019	FY 2020	FY 2021
Forecasted Grants (current law) 2018 November: General Fund					
Minnesota Family Investment Program (MFIP) / Diversionary Work Program (DWP) (M.S. 256J)	Minnesota Family Investment Program (MFIP) / Diversionary Work Program (DWP) grants provide temporary financial support to help meet basic needs of low-income families with children and low-income pregnant women. In FY 2018, an average of 31,730 low income families per month received help through these programs. See also federal funds.	\$90,699	\$85,730	\$86,594	\$87,423
MFIP Child Care Assistance Grants (M.S. 119B)	The Minnesota Family Investment Program (MFIP) Child Care Assistance grants provide financial subsidies to help low-income families pay for child care so children are well-cared for and prepared to enter school ready to learn and parents may pursue employment or education leading to employment. This grant serves families who currently participate in the MFIP or DWP programs, or who have recently done so. In FY 2018, an average of 7,830 families per month were served.	\$89,853	\$91,641	\$102,931	\$108,453
General Assistance Grants (M.S. 256D)	General Assistance (GA) grants provide state-funded, monthly cash grants for very low-income people without children who are unable to work and do not have enough money to meet their basic needs. The most common eligibility reason for people at enrollment is illness or incapacity. In FY 2018, an average of 23,238 people per month received these grants.	\$48,883	\$49,614	\$50,563	\$51,200
MN Supplemental Assistance (MSA) Grants (M.S. 256D)	Minnesota Supplemental Aid (MSA) grants provide a state-funded monthly cash supplement to help people who are aged, blind or disabled, and who receive federal Supplemental Security Income (SSI) benefits to meet their basic needs that are not met by SSI alone. In 2018, an average of 30,885 people per month received these grants.	\$39,066	\$40,601	\$41,834	\$45,866
Housing Support Program (formerly Group Residential Housing (GRH) Grants) (M.S. 256I)	Housing Support is a state-funded income supplement program that pays for room and board costs in approved locations for adults with low incomes who have a disability or are 65 years or older. These grants assist individuals who have illnesses or disabilities, including developmental disabilities, mental illnesses, chemical dependency, physical disabilities, advanced age, or brain injuries, to prevent or reduce institutionalization or homelessness. In FY 2017, an average of 20,502 people received Housing Support payments each month.	\$158,963	\$167,639	\$171,722	\$176,206
Northstar Care for Children (M.S. 256N)	Northstar Care for Children is a new program that began in January 2015. It is designed to help children who are removed from their homes and supports permanency through adoption or transfer of custody to a relative if the child cannot be safely reunified with parents. Northstar Care for Children consolidates and simplifies administration of three programs: Family FosterCare, Kinship Assistance (which replaces Relative Custody Assistance) and Adoption Assistance. Northstar served an average of 17,326 children per month in FY 2018.	\$66,513	\$77,636	\$86,921	\$94,528

Program Name Federal or State or Both (citation)	Purpose/ Recipient Type(s) Eligibility Criteria	FY 2018	FY 2019	FY 2020	FY 2021
Medical Assistance (MA) Grants General Fund (M.S. 256B)	These funds meet the state's matching funds requirement for Minnesota's Medicaid programs that provide health and long term care coverage to an average of 1.1 million uninsured or underinsured Minnesotans who meet income eligibility requirements. This program is managed by the state under guidance from the federal government.	\$4,743,918	\$4,706,208	\$5,356,329	\$5,371,290
Medical Assistance (MA) Grants- HCAF (M.S. 256B)	These funds meet the state's matching funds requirement for Minnesota's Medicaid programs that provide health and long term care coverage to an average of 1.1 million uninsured or underinsured Minnesotans who meet income eligibility requirements. This program is managed by the state under guidance from the federal government.	\$385,159	\$438,848	\$438,848	\$438,848
Alternative Care (AC) Grants (M.S. 256B.0913)	The Alternative Care (AC) Program is a cost-sharing program that supports certain home- and community-based services for eligible Minnesotans age 65 and over. In November 2013 the program became eligible for federal Medicaid financial participation through an approved waiver. The program provides services to prevent and delay transitions to Medical Assistance-funded services, such as Elderly Waiver and nursing home care. The AC program served a monthly average of 2,579 older Minnesotans in FY2018, at an average monthly cost of \$990.	\$15,202	\$17,516	\$19,554	\$21,931
Minnesota Care Health Care Grants; BACT 31: Health Care Access Fund (HCAF)					
Minnesota Care Grants M.S. 256L and 256B	Minnesota Care Grants pay for health care services for about 83,000 Minnesotans who lack access to affordable health insurance.	\$20,800	\$22,860	\$26,772	\$29,526
Chemical Dependency Entitlement Grants; BACT 35 : Special Revenue Fund					
Consolidated Chemical Dependency Treatment Fund (CCDTF) Grants M.S. 254B.02, Sund.1	The Consolidated Chemical Dependency Treatment Fund (CCDTF) provides funding for residential and non-residential addiction treatment services for eligible low-income Minnesotans who have been assessed as needing treatment for chemical abuse or dependency. Almost all treatment providers in the state are enrolled as CCDTF providers.	\$118,294	\$124,951	\$171,153	\$155,719
Support Services Grants BACT 41: General Fund					
MFIP Consolidated Support Services Grants M.S. 256J.626	The Minnesota Family Investment Program Consolidated Fund is allocated to counties and tribes to provide an array of employment services for MFIP/DWP participants including job search, job placement, training and education. Funds provide other supports such as emergency needs for low-income families with children and also fund a portion of counties' costs to administer MFIP and DWP. See also Federal Funds.	\$8,679	\$8,679	\$8,679	\$8,679
CFS Injury Protection Program M.S. 256J.68	Payments to medical providers for the treatment of injuries suffered by persons while participating in a county or tribal community work experience program.	\$0	\$10	\$10	\$10
Food Stamp Employment and Training (FSET) Service Grants M.S. 256D.051	Grants to counties to provide employment supports to adults who receive benefits through the Supplemental Nutrition Assistance Program. The grant is now called Supplemental Nutrition Assistance Program Employment & Training (SNAP E & T).	\$18	\$26	\$26	\$26

AT A GLANCE

The Minnesota Humanities Center (MHC) brings the humanities to all Minnesotans through building relationships, active engagement, and programs of the highest quality. In fiscal year 2018:

- 77 organizations chose to partner with MHC.
- 15,395 people participated in 90 events.
- MHC reached 41 counties through programming and partnerships.
- 370 meetings and events were held at the MHC Event Center, serving 11,137 clients.
- More than 1,000 original resources were available in an online Absent Narratives Resource Collection, presented to 687 educators at 13 schools and conference events.

PURPOSE

The mission of the Minnesota Humanities Center (MHC) is to build a thoughtful, literate, and engaged society.

MHC partners with individuals, groups, and organizations to engage multiple perspectives, promote excellence in teaching, and build a more inclusive Minnesota.

MHC's full-service Event Center is a community resource where diverse organizations gather in conversation and active participation.

MHC supports the following statewide outcome:

- **Minnesotans have the education and skills needed to achieve their goals**

BUDGET

Source: Consolidated Fund Statement Consolidated Fund Statement and Humanities Center records.

Federal funds for the Humanities Center do not flow through the state's budget or treasury and are typically not included in statewide reporting, these funds are appropriations from the National Endowment for the Humanities, etc. Other Funds include Legacy funds, grants from state agencies, and individual, corporate & foundation

donations. Legacy and state agency funds flow through the state's budget and treasury, other funds in this category do not and thus are typically not included in statewide reporting.

STRATEGIES

MHC's humanities-based K-12 Education Strategy builds partnerships with schools and districts across the state to provide rigorous professional development opportunities for K-12 educators that further the schools' and districts' priorities. Through immersion-based learning, an online resource collection, and in-person workshops, educators in Minnesota are building their networks, and increasing student engagement in the classroom. Offerings include: Learning From Place trips, Increase Engagement Through Absent Narratives workshops, and a weeklong Summer Institute.

Veterans' Voices is an initiative that cultivates a network of Veterans who draw on the power of the humanities to call attention to their stories and contributions. This initiative amplifies, honors, and recognizes the voices of Minnesota Veterans and fosters connection through storytelling, educator and literature, and documentary-based discussion groups, and the Veterans' Voices Award.

We Are Water MN is a traveling exhibition and community engagement initiative that emerged from the Smithsonian Institution's Museum on Main Street project. Continued by the Humanities Center and several state partners, six greater Minnesota communities (Spicer, St. Peter, Red Wing, Sandstone, Lanesboro, and Detroit Lakes) hosted the exhibit in 2016-2017, and eight communities are scheduled to host the exhibit in 2018-2019 (Saint Paul, Bemidji, Crookston, Cloquet, Austin, Northfield, Grand Rapids, and Onamia). Through this initiative, the public explores the meaning of water as part of their identity, history, and culture.

MHC debuted the Cascading Conversations series as part of the Public Humanities program, bringing acclaimed and diverse authors together in conversations about war, memory, humanity, and connection. The Public Humanities initiative allows MHC to be responsive to emerging needs in communities through the humanities.

Other programming includes:

- Grant-making: Administering 17 legislatively mandated state grants, and awarding 43 small competitive grants to cultural organizations that foster statewide connections with other cultural organizations making an impact.
- Why Treaties Matter: Self-Government in Dakota and Ojibwe Nations exhibit, in partnership with Minnesota Indian Affairs Council, received new funding for the FY18-19 biennium that will result in a new statewide tour and educational resources beginning October 2018 through June of 2019. The exhibit is also now permanently displayed at the Minnesota State Capitol.

RESULTS

Since no one is required or obligated to use any of our services or programs, one key measure of success is demand: Do people and communities use MHC's programs and services and is there continuing and increased demand? Do partners and participants experience a new level of engagement in their communities, classrooms, and organizations as a result of working with MHC?

MHC evaluates and learns from how its programs and projects are working through the implementation of Utilization-Focused Developmental Evaluation plans. Internal and/or external evaluations are completed, with close attention focused on outcomes, criteria for success, and highlighting information and findings that key stakeholders can use to make improvements.

The success of MHC's work can be attributed to many factors. Program staff work in close partnership with community members, partner organizations, and community leaders to ensure authentic programming that meets real needs. MHC monitors and responds to feedback in real time, ensuring the most relevant and

meaningful experience possible for participants. MHC staff also seeks out resources to support important initiatives as needs emerge.

Indian Affairs Council

<i>Agency Profile</i>	1
<i>Agency Expenditure Overview</i>	4
<i>Agency Financing by Fund</i>	5
<i>Agency Change Summary</i>	7
<u>Change Item(s)</u>	9
<i>Private Cemeteries Act Amendments (M.S. 307.08)</i>	9

AT A GLANCE

- The Council serves the entire state and the eleven sovereign Tribal Nations in Minnesota.
- There are approximately 61,000 American Indians statewide
- The Council has five full-time staff and two offices located in St. Paul and Bemidji
- The 28 member board is comprised of elected Tribal Leaders, the Governor's Office, members of the State Legislature, and State Agency Commissioners
- 6 member Urban Indian Advisory Board (UIAB) that advises the Council on issues specific to the urban American Indian communities in Minneapolis, St. Paul, Bemidji, and Duluth

PURPOSE

The mission of the Minnesota Indian Affairs Council (MIAC) is to enhance the sovereignty of the eleven Tribal Nations in Minnesota, and to ensure the well-being of American Indian citizens throughout the state. Established in 1963, the MIAC serves as the primary liaison between sovereign Tribal Nations and state government. The Council also advises and makes policy recommendations to the Governor and Legislature. The MIAC proposes the yearly agenda for the annual Governor/Tribal Leaders summit. The MIAC also fulfills duties under M.S. 307.08 and M.S. 138.00, through its Cultural Resource program. The Cultural Resource program works in collaboration with the office of the State Archaeologist to protect American Indian cemeteries, gravesites, and burial mounds statewide.

The Minnesota Indian Affairs Council contributes to the following statewide outcomes through its own work and by partnering with other agencies:

- **Strong and stable families and communities**
- **A thriving economy that encourages business growth and employment opportunities**
- **Minnesotans have the education and skills needed to achieve their goals**
- **All Minnesotans have optimal health**
- **A clean and healthy environment with sustainable uses of natural resources**
- **People in Minnesota are safe**
- **Efficient and accountable government services**

BUDGET

Grants Aid and Subsidies are the appropriations from the Arts and Cultural Heritage Fund for Language Revitalization and Cultural Resources.

Source: Budget Planning & Analysis System (BPAS)

Legend: General Fund, Federal Funds, Other Funds

MIAC no longer receives any federal funds in FY 14-15

Source: Consolidated Fund Statement

The Minnesota Indian Affairs Council has a total biennial budget of approximately \$3.8 million. The biennial General Fund support is approximately \$1.1 million. Funding from the Arts & Cultural Heritage Fund, consisting of grants to communities for Dakota and Ojibwe Language Revitalization, is approximately \$2.7 million.

STRATEGIES

To accomplish its mission, the Minnesota Indian Affairs Council uses the following strategies:

- Convene quarterly board meetings which bring together elected Tribal leaders representing eleven Tribal Nations (MIAC Executive Board), state government elected and appointed officials, key agency program staff, and the public. Executive Board discussion and formal action through adoption of resolutions leads to increased collaboration and coordination with state agency leadership.
- Make policy recommendations to the Governor, State Legislature, and state agencies.
- Educate the public and local governments on issues important to American Indian tribes and people.
- Promote the revitalization and preservation of the Dakota and Ojibwe Languages through the grants program supported by the Legacy Amendment.
- Coordinate with state agency Tribal liaisons to ensure effective program implementation.
- Partner with state agencies to plan and facilitate the Minnesota Tribal-State Relations Training.
- Assist state agencies in coordinating government-to-government consultation discussions.
- Citizen and public outreach through participation on State, Tribal, and community advisory boards, commissions, committees, and task forces.
- Educate the public and state agency employees through the use of the Why Treaties Matter Exhibit.

In 2017, MIAC secured a permanent installation of the Why Treaties Matter banner exhibit on the 3rd floor public space in the newly-renovated State Capitol building, elevating the visibility of Tribal Nations, and creating an educational opportunity for the public.

Recommendation:

The Governor recommends amending the Private Cemeteries Act (MS 307.08) to more effectively protect American Indian cemeteries and burial features from inadvertent discovery or unintentional unearthing of human remains. The Governor also recommends additional funding of \$533 thousand in FY 2020 and \$520 thousand each year thereafter at the Minnesota Council of Indian Affairs (MIAC) for four additional staff and operating costs to comply with the Private Cemeteries Act amendments.

Rationale/Background:

American Indian cemeteries, burial mounds, and cultural sites are protected under state and federal law. The Minnesota Indian Affairs Council is responsible to manage, oversee, and protect American Indian cemetery sites, and is the sole authority to recover and rebury American Indian human remains that have been unintentionally disturbed, primarily due to construction and development. At any given time, the Minnesota Indian Affairs Council, in collaboration with the Minnesota Office of State Archeologist (OSA), are involved in multiple rescues and recoveries of unintentionally unearthed human remains. These burial recovery projects occur on public and private land, and involve multiple land jurisdictions and authorities, including: tribal, city, county, state, federal, and private.

MIAC, Tribes, cities, counties, and the state continue to be at risk for additional cemetery disturbances that could be prevented with appropriate review of proposed construction project and development plans. The most recent cemetery disturbances have caused a significant strain on state resources, including costly project delays, costly emergency burial recovery efforts, and strained relationships between the state and Minnesota Tribal Nations.

Proposal:

The Governor recommends amending the Private Cemeteries Act in an effort to more effectively protect American Indian cemeteries and burial features from inadvertent discovery or unintentional unearthing of human remains. This recommendation also promotes a more collaborative relationship between the Minnesota Indian Affairs Council and the Office of State Archeologist through the creation of an MOU between the two agencies. It strengthens the authority of the Minnesota Indian Affairs Council over cemeteries deemed to be American Indian, and provides greater flexibility in the qualified professionals and appropriate experts that can be utilized to assess or identify cemeteries. Finally, this recommendation provides greater protection to American Indian cemeteries by proposing additional construction and development plan review by the Indian Affairs Council if a proposed project is within 300 feet of an American Indian cemetery, burial features, historic American Indian villages, or historic cultural features.

The current base agency budget of the Indian Affairs Council is \$580,000. MIAC has also received a one-time biennial appropriation of \$200,000 from the Legacy Amendment – Arts and Cultural Heritage Fund for FY18-19, to fulfill its duties under MS 307.08 (Private Cemeteries Act). A majority of the agency budget is dedicated to supporting 5 FTE, including 2 FTE that work exclusively on cultural resources and cemetery protection. These two FTE have the responsibility to review all construction and development plans that come to the Indian Affairs Council requesting review, in addition to all other duties required, including archeology and burial recovery.

This recommendation includes funding for 4.0 new FTEs, office space and equipment, travel, training, contracted services, and supplies:

Expense	FY20	FY21
4 FTEs, 2 SPA Coordinators, 2 SPA seniors	\$406	\$420
Rent Administration Building (175 sq. ft. per person) for 4 new FTEs	\$18	\$18
Furniture \$7,000 per workstation (cubes for 4 new FTEs, cube and office for existing OSA staff)	\$24	\$0
Computer/Telephone Equipment	\$3	\$0
Communications & IT Support/Maintenance	\$8	\$8
Travel In-State	\$24	\$24
Travel Out-of-state	\$6	\$6
Supplies	\$4	\$4
Training	\$5	\$5
Contracted Services	\$35	\$35
Total	\$ 533	\$520

Equity and Inclusion:

American Indian citizens and Tribal Nations have been most impacted historically. Elected Tribal leaders and the Minnesota Indian Affairs Council have been advocating for these statute and policy amendments for years. Former State Archeologists weren't receptive to previous attempts to amend the statute, which promote a collaborative effort between MIAC and OSA, and strengthen the authority of the MIAC over American Indian cemetery sites. Tribal leaders have also personally requested these changes from the Governor, including this year when elected leaders representing Minnesota's four Dakota Tribes met with the Governor to express concern about the lack of resources and staff available to MIAC to fulfill their statutory duties. MIAC also issued a resolution in support of policy amendments and a request for additional appropriations. Tribal Elected Officials, Tribal Historic Preservation Officers, and American Indian communities have been consulted and collaborated with to develop the policy amendments and accompanying appropriation.

IT Related Proposals:

N/A

Results:

MIAC estimates close to 100 construction and development plans are currently reviewed per year. MIAC estimates that plans sent by state agencies and local governmental entities will increase to 800-1000 per year with implementation of the new 300-foot buffer that triggers review. State agencies that have typically conducted cultural resource reviews in-house, will now be required to send construction and development plans to both the Indian Affairs Council and the Office of State Archeologist. MnDOT has an estimated 600 projects that they would send MIAC for review on an annual basis. An additional 200 additional reviews would come from local government projects, once they become more aware of MN Stat. 307.08 regulations and requirements. The work volume for the Indian Affairs Council is anticipated to increase fivefold. Since current staff reviews close to 100

plans per year in addition to other duties, we assume the additional volume could be addressed by two additional FTE with responsibility to conduct plan review.

MIAC also currently performs preliminary condition assessments through low tech methods (shovel tests, records/map review) and does not have financial resources to contract for additional expertise needed such as ground penetrating radar or other non-invasive technologies that American Indian communities prefer to manual invasive testing. Currently, each cemetery assessment can take between 40 hours to 120 hours depending on the complexity of the assessment. In collaboration with OSA, MIAC staff complete approximately 20 assessments/year for a total of 1,500 hours.

MIAC assumes an increase in the number of request for cemetery condition assessments to increase from 20 to 100 resulting in the need for an additional 2 FTEs. Cemetery condition assessments require travel across Minnesota, and travel costs will be significant. There are eleven separate Tribal Nations in Minnesota that are all geographically located in greater Minnesota. MIAC has state-wide responsibility, and will be conducting assessments and initial project review on-site.

Agency Change Summary 6

AT A GLANCE

- The Minnesota State Board of Investment (SBI) has a total of \$96.2 billion under management as of June 30, 2018.
- Assets under management have grown by 69% since June 30, 2008 (Ten Year Period).
- The SBI manages money for retirement organizations, trust accounts, other post-employment benefit accounts, State accounts and numerous volunteer fire fighter accounts for a total of 387 plans.
- The three largest plans (Combined Funds) are the retirement organizations of PERA, TRA and MSRS. Together they account for \$68.3 billion in pension assets under management.
- The Combined Funds outperformed the benchmark for the 5, 10, 20 and 30 year time periods.
- The SBI manages the State's cash account, which totaled \$13.4 billion on June 30, 2018.
- The SBI manages funds for 333 volunteer fire fighter accounts.

PURPOSE

The State Board of Investment (SBI) develops and implements investment policies and strategies for the state's retirement funds, trust funds, and cash accounts. The statutory mission of the SBI is "to ensure that state and pension assets subject to this legislation will be responsibly invested to maximize the total rate of return without incurring undue risk" (Minnesota Statutes 11A.01).

The SBI supports the following statewide outcome(s).

- **A thriving economy that encourages business growth and employment opportunities**
- **Strong and stable families and communities**
- **Efficient and accountable government services**

BUDGET

**Spending by Category
FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

In FY2007 the MN SBI began invoicing plans for actual SBI expenditures.

Source: Consolidated Fund Statement

The SBI is primarily funded through dedicated receipts by billing our customers for the services provided. In addition to dedicated receipts, the SBI receives a small general fund appropriation. The split between dedicated

receipts and general fund is 97% (\$4,582,000) dedicated receipts and 3% (\$139,000) general fund for Fiscal Year 2017.

STRATEGIES

The Minnesota State Board of Investment (SBI) is established by Article XI of the Minnesota Constitution to invest all state funds. Its membership, as specified in the Constitution, is comprised of the Governor (Chair), State Auditor, Secretary of State and the State Attorney General. All investments undertaken by the SBI are governed by the prudent person rule and other standards codified in Minnesota Statutes Chapter 11A and Chapter 356A.

Areas of Responsibility:

- Combined Funds (MSRS, TRA and PERA): The overriding responsibility of the SBI with respect to the three retirement plans pension assets is to achieve a maximum total rate of return given an appropriate level of risk such that sufficient funds are available to finance promised benefits to plan participants.
- Cash Accounts: The SBI manages the cash balances in state agency accounts with the objective, in priority order, of preserving capital, meeting state agency liquidity needs and providing competitive money market rates of return.
- Additional Funds: The SBI also manages assets for a number of additional funds, including various Trust Funds, which have varying risk tolerances and investment objectives.

The SBI provides investment management services to the three statewide retirement plans (Combined Retirement Funds), the Permanent School Fund, the Environmental Trust Fund, Closed Landfill Fund, the Assigned Risk Plan, the Supplemental Investment Funds, Invested Treasurer's Cash and over 300 other plans.

- Combined Funds (Market Value June 30, 2018, \$68.3 billion) The SBI manages the retirement assets with the objective of providing sufficient funds to finance the promised benefits to participants. Our strategy is to take advantage of the long term nature of the pension liabilities and invest in appropriate return opportunities that will enhance the probability of meeting or exceeding the actuarial return target over the long-term. Pensions provide a positive contribution to strong and stable families, communities and the economy overall.
- Cash Accounts (Market Value June 30, 2018, \$13.4 billion) In order to preserve capital, ensure that state agency cash is available as needed, and is earning competitive money market rates of return, SBI invests the cash accounts in short-term, liquid, high-quality debt securities.
- Additional Funds (Market Value June 30, 2018, \$14.5 billion) The SBI also manages assets for the funds listed above with varying investment strategies as well as approximately 333 volunteer firefighter accounts.

To carry out its mission, SBI retains an executive director, an internal investment staff, internal accounting and support staff and external investment managers to execute its policies. In performing its duties, the SBI is assisted by the Investment Advisory Council (IAC), which is comprised of 17 individuals with investment and retirement fund expertise.

SBI staff:

- Execute board decisions;
- Recommend strategic planning alternatives to the IAC and board;
- Monitor and evaluate investment performance to ensure long-term investment objectives are met;
- Provide internal investment management for the state agency cash accounts;
- Seek and retain superior external money managers by monitoring the performance of all external managers retained by the board;
- Establish and periodically update the investment objectives, asset allocation and investment management structure for each of the funds;

- Assess developments in the broad financial markets and evaluate their potential impact on SBI operations and policies;
- Review prospective investment vehicles for legislative consideration.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quality	1. Meet or Exceed 10 Year Composite Index Total Return	FY17	FY18	6/30/2018
	Combined Funds 10 Year Annualized Return	6.2%	7.8%	
	Benchmark 10 Year Composite Annualized Return	6.0%	7.4%	
	Difference from Composite Benchmark	+2%	+4%	
Quality	2. Provide 20 year Real Return of 3-5 percentage points above inflation (CPI)			6/30/2018
	Combined Funds 20 Year Annualized Return	7.2%	6.8%	
	Benchmark 20 Year Annualized Return	2.1%	2.2%	
	Difference from CPI Benchmark	+5.1%	+4.6%	

Note: The outperformance of SBI relative to the broad capital markets (referred to as “benchmarks”) over the long-term is evidence of SBI’s ability to add value to returns, which is achieved through asset allocation and manager selection decisions made by the SBI. Additionally, SBI’s strict adherence to re-balancing activity enhances returns by imposing a low risk discipline of “buy low-sell high” among asset classes on a total fund basis.

Department of Iron Range Resources & Rehabilitation

<i>Agency Profile</i>	1
Agency Expenditure Overview	3
Agency Financing by Fund (REVISED)	5
Agency Change Summary (REVISED)	7

AT A GLANCE

- The mission of Iron Range Resources & Rehabilitation is to promote and invest in business, community and workforce development for the betterment of northeastern Minnesota.
- The Department of Iron Range Resources and Rehabilitation differs from other state agencies in that it operates on an annual budget that is established by the commissioner and approved by a nine-member board and the Governor.
- The agency is primarily funded by a portion of local taconite production taxes paid by mining companies on each ton of iron ore pellets or concentrates produced.
- Production taxes are paid by mining companies in lieu of local property taxes.
- The agency reinvests its income in businesses, cities and townships in a service area comprised of 13,000 square-miles of northeastern Minnesota.

PURPOSE

Established in 1941, the Department of Iron Range Resources and Rehabilitation was created to diversify the economy within a region largely dependent on the removal of minerals (iron ore and taconite) and other natural resources.

IRRR supports the following statewide outcomes:

- **A thriving economy that encourages business growth and employment opportunities**
- **Strong and stable families and communities**
- **Minnesotans have the education and skills needed to achieve their goals**

BUDGET

Spending by Program

FY 17 Actual

Historical Spending

*Include DJJ Corpus, Event Center Construction & School Bond Payments

Source: Consolidated Fund Statement

STRATEGIES

- Iron Range Resources and Rehabilitation conducts business retention and expansion and recruits businesses from outside the area who may be considering expanding or relocating. The agency works individually with business clients to customize financial assistance packages that meet business goals and objectives. The agency also collaborates with funding partners – other businesses, banks, and economic development organizations to leverage capital and regional resources.
- The agency provides grants to local units of government and non-profits that contribute to stable, livable and healthy communities.
- The agency provides grants for innovative education and workforce development initiatives that address workforce skills needed by business and industry.

RESULTS

Iron Range Resources & Rehabilitation assists small businesses with the information and financing needed to stabilize and grow; provides larger business developments with agency and partnership support to encourage them to expand and relocate to northeastern Minnesota; and provides communities the resources to leverage financial investments that improve quality of life.

Results are measured in businesses/communities served by agency programs, agency investment, and total project investment.

- The agency served more businesses and communities in the current biennium than previously although the amount of funds per customer was lower.
- Overall agency investment was reduced in the current biennium because of decreased taconite production during the last three years – tax revenue from that downturn impacts agency income over several years due to averaging.
- Total project investment in the current biennium decreased less than 5%. This amount varies depending on project types, timing, the capacity of the businesses or municipalities, and their ability to access other state, federal or private funds.

AT A GLANCE

The Board on Judicial Standards:

- Investigates complaints of judicial misconduct or disability
- Seeks or imposes discipline on judges when appropriate
- Advises and educates judges on proper conduct
- Has jurisdiction over all Minnesota trial and appellate judges (315 positions), retired judges in active service (92), referees, and other judicial officers.

PURPOSE

The mission of the Board on Judicial Standards is to maintain public confidence in the integrity and impartiality of the Minnesota judiciary by enforcing the Minnesota Code of Judicial Conduct and by educating and advising judges how to comply with the Code.

A society cannot function without a fair and effective way to resolve disputes. Acceptance of judicial rulings is based on public recognition that the judiciary and the court system are worthy of respect and trust. Public confidence in our judicial system directly depends on the proper conduct of our judges.

The Minnesota Constitution authorizes the Legislature to provide for the retirement or discipline of any judge who is disabled or guilty of conduct prejudicial to the administration of justice. The Legislature created the Board on Judicial Standards to carry out this task. The Minnesota Supreme Court adopted the Code of Judicial Conduct which sets forth the standards for judges to follow.

The Board has ten members: one judge from the Court of Appeals, three district court judges, two lawyers, and four citizens who are not judges or lawyers. All members are appointed by the Governor and, except for the judges, require confirmation by the Senate. The Board is supported by an Executive Secretary, a Staff Attorney, and an Executive Assistant. The Board on Judicial Standards supports the statewide outcome of efficient and accountable government services.

STRATEGIES

To accomplish its mission, the Board uses the following strategies:

- The Board promptly reviews complaints alleging judicial misconduct or disability, conducting investigations when necessary.
- The Board uses fair and open procedures that respect the judge's right to due process.
- If the Board finds serious misconduct, the Board may issue a public reprimand; or, if the misconduct is isolated and non-serious, the Board may issue a private admonition.
- If the Board issues a private admonition, the judge may request a panel to consider the Board's decision in a private hearing.
- In serious cases, the Board files a formal complaint against the judge, which can result in a public hearing by a panel and a recommendation to the Minnesota Supreme Court for discipline such as censure, suspension, or removal from office.
- The Board and its Executive Secretary advise and educate judges on applications of the Code of Judicial Conduct.
- The Board is not a substitute for the Court of Appeals. The Board does not review judicial decisions for legal error unless the judge acts in bad faith, or otherwise violates a provision of the code.

The Board continues to successfully reduce its expenditures for litigation by increasing its educational activities and through the thorough investigation and preparation of cases before seeking public discipline.

The Board continually strives to become more transparent to the judges, the public, and the Legislature. The board regularly updates its website with greatly revised and supplemented content to display more information about the Board's activities and to provide better guidance on ethics issues faced by judges.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Formal advisory opinions (published)	2	0	2016-2017
Quantity	Informal written advisory opinions to individual judges	140	122	2016-2017
Quantity	Supreme Court discipline	1	0	2016-2017
Quantity	Public reprimands	1	0	2016-2017
Quantity	Private admonitions, letters of caution, deferred dispositions	7	9	2016-2017

Performance Measures Notes:

The data shown is for calendar years 2016 (previous) and 2017 (current). The Board's activities in previous years are described in the Board's Annual Reports, available at the Board's website.

The Minnesota Constitution authorizes the Legislature to "provide for the retirement, removal, or other discipline of any judge who is disabled, incompetent, or guilty of conduct prejudicial to the administration of justice." Minn. Const. Art. 6, Sec. 9 (https://www.revisor.mn.gov/constitution/#article_6).

The 1971 Legislature created the Board on Judicial Standards to carry out this task. M.S. 490A.01-.03. (<https://www.revisor.mn.gov/statutes/cite/490A/pdf>). The Board operates under the Rules of Board on Judicial Standards adopted by the Minnesota Supreme Court.

Maintain FTEs	0.33	0.17	0.17	0.17

Recommendation:

The Governor recommends additional funding of \$61,000 in the FY 2020-2021 biennium to maintain the current level of service delivery at the Board on Judicial Standards.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the Board on Judicial Standards, this funding will cover known employee compensation growth, pending retirement of board staff, and replacement of staff computers and printers.

This request is for additional funds to maintain the Board's current staffing and service levels. Among the cost drivers are personnel costs resulting from payroll and benefit increases, increased workload, pending retirement of Board staff, and the need to replace staff computers and printers.

Results:

This proposal is intended to allow agencies to continue to provide current levels of service and information to the public.

Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	5	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends one-time funding of \$5,000 to for the Board on Judicial Standards to create a website enhancement that allows for complaints to be submitted on-line using a standard web browser. The Board currently requires that complaints regarding Minnesota judges and judicial officers be submitted in writing by postal mail or facsimile.

Rationale/Background:

The Board's complaint submission process is currently paper-based. The public, board members, and other stakeholders increasingly expect public services to be consistent with the digital age. An on-line complaint submission feature will facilitate the public's access to the Board and to the process of submitting a complaint.

Proposal:

The Board proposes to use the funds to create an enhancement to the Board's current website. The enhancement would permit a complaint to be submitted to the Board by entering information into an on-line form using a standard web browser.

Because this is an upgrade to the Board's current website, the firm that developed and built the website will be most likely to do the programming.

It is expected that this upgrade will be implemented in FY2020.

Equity and Inclusion:

The website upgrade will facilitate exploring options for serving groups for whom English is not a native language. On-line complaint submission forms possibly could be more readily tailored for a variety of languages.

IT Related Proposals:

Category	FY 2020	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025
Professional/Technical Contracts	5					

Results:

Initial performance data of interest will be the number of complaints submitted on-line.

AT A GLANCE

The Department of Labor and Industry:

- administers wage and safety laws affecting Minnesota's 2.9 million employees and 167,000 employers;
- oversees workers' compensation claims and benefit payments for approximately 95,000 injuries annually;
- conducts almost 182,000 construction inspections each year;
- issues 86,000 personal and business licenses annually; and
- monitors more than 11,000 registered apprenticeships.

PURPOSE

The mission of the Department of Labor and Industry (DLI) is to ensure Minnesota's work and living environments are healthy, safe and equitable. Our agency provides and enforces reasonable and uniform standards for Minnesota buildings and construction professionals. We also ensure workers' compensation benefits are provided to injured workers quickly and efficiently, and at a reasonable cost to employers. In addition, we ensure workers receive appropriate wages and work to promote work-based career development through registered apprenticeships. Our agency also monitors combative sporting events in Minnesota so they are operated safely and fairly.

Through these activities, DLI contributes to the following statewide outcomes:

- **people in Minnesota are safe;**
- **families and communities are strong and stable;**
- **a thriving economy encourages business growth and employment opportunities.**

BUDGET

FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

The Workers' Compensation Division is funded through an appropriation from the workers' compensation fund. The revenues are collected through an insurer premium surcharge and self-insured assessment. Workers' compensation benefits are paid on behalf of employees of uninsured and bankrupt self-insured employers. Reimbursements to insurers and self-insured employers under the supplemental benefits and second-injury programs make up the bulk of benefit payments.

The Workplace Safety Program is funded with federal grants and state matching funds. The Occupational Safety and Health Administration (OSHA) Compliance activity receives a 50 percent federal funding level. There is a 90 percent federal funding level for the OSHA Workplace Safety Consultation activity. Matching funds are provided through an appropriation from the workers' compensation fund.

The Construction Codes and Licensing Division is funded through a special revenue fund, the Construction Code Fund which is part of the State Government Special Revenue Fund, and operates on a fee-for-service basis. Fees are collected from industry stakeholders and deposited in the Construction Code Fund established in the state treasury.

The Labor Standards unit is financed by an appropriation from the general fund. The unit also collects back-wages owed to employees by employers, which are given to the employees; DLI does not retain these funds.

The Apprenticeship unit is funded by an appropriation from the workforce development fund.

The General Support Division is financed by an appropriation from the workers' compensation fund and by indirect cost revenue recovered from the agency's other programs.

STRATEGIES

To accomplish its mission, DLI uses the following strategies.

- **Dispute resolution:** Provide prompt and fair resolution of workers' compensation disputes.
- **Workplace safety:** Focus OSHA inspection and consultation resources where data indicates the greatest potential for improving workplace safety and health.
- **Education:** Educate employers and workers so they understand their rights and responsibilities under Minnesota labor standards, workers' compensation and OSHA laws.
- **Continuous improvement:** Improve efficiency and customer service by increasing the use of electronic processing of permits, licenses and other filings.
- **Workforce development:** Work with Minnesota employers and others to develop apprenticeship opportunities.

The Department of Labor and Industry's legal authority comes from Minnesota Statutes, chapters 175-178, 181-182, 184, 184B, 326B, 327 and 327B.

FTEs	9	9	9	9

Recommendation:

The Governor recommends \$1.850 million in FY20 and \$1.7 million in ongoing funding for the Department of Labor and Industry (DLI), to expand and enhance prevention and enforcement strategies to combat wage theft in Minnesota.

Rationale/Background:

Wage theft occurs when employers do not compensate their employees for all work performed. Wage theft often disproportionately impacts communities of color, low wage, and female workers. It has been estimated that 39,000 Minnesotans suffer wage theft per year resulting in \$11.9 million in unpaid wages.

There are 167,500 employers in Minnesota with a workforce of 2.9 million. DLI's Labor Standards unit has nine FTEs that process claims for final wages and conduct investigations of minimum wage, overtime, deductions, tips, child labor violations as well as certain provisions of the Women's Economic Security Act. The Division fields more than 20,000 inquiries and processes approximately 1,600 complaints annually. The unit audits employer records primarily on a complaint basis, which does not reflect the scope of the wage theft problem since many complaints are never brought forward by workers for fear of retaliation or loss of employment.

In FY18, DLI received a base increase of \$500,000 to support four additional FTEs which included three wage theft specialists to resolve worker final wages, and an outreach coordinator to engage workers and employers. In CY2018, the department responded to nearly 25,000 inquiries and processed a record 1,363 wage claims and nearly 600 cases resulting in workers receiving more than \$1.1 million in earned final wages and back pay. However, not all wage claims are successful. In addition, the unit is unable to investigate all complaints it receives. Furthermore, there are many workers who fear retaliation and loss of employment so they never report wage theft to the department.

This additional investment will fund 7 FTE labor investigators to perform strategic and employer-location inspections and investigations to identify violations; 2 FTE to provide office administrative support; inspector training development; ongoing case management modernization and reporting efforts; outreach; and grants for community-based partners to raise awareness about wage theft. The goal of this investment is to pivot the unit from a complaint-based desk-audit enforcement model to a strategic enforcement model that performs onsite inspection that identifies systemic wage theft where the violations occur. This investment and strategy promises a greater wage theft deterrent and protection of vulnerable workers who feel they cannot complain.

Proposal:

The Minnesota Wage Theft Prevention proposal strives to strengthen worker safeguards. This initiative proposes to strengthen anti-wage theft laws by:

- Establishing a definition of wage theft as a violation of state law and making wages owed and withheld by an employer in excess of \$10,000 a gross misdemeanor;
- Imposing certain employee notification requirements on employers;
- Establishing penalties for committing wage theft as well as increasing records penalties from \$1,000 to up to \$10,000 when employers do not maintain employee records per current law or do not disclose records when demanded by the Division for compliance;
- Establishing a citation and penalty process to quickly resolve wage theft claims of less than \$1,000 and requires payment of wages every 16 days rather than 31.
- Granting DLI additional subpoena power – similar to that given in other state agencies and units within DLI – to compel production of records when employers refuse to submit them;
- Requiring employers to keep additional records, including copies of personnel policies that are provided to employees; and
- Requiring employers to give employees notice of certain employment-related information, such as rate of pay, employer’s legal name, address and phone number.

The above changes would strengthen safeguards for the 2.9 million workers in the state of Minnesota and provide tools the department needs to ensure good employers don’t have to unfairly compete against employers who are not following the law.

Equity and Inclusion:

- Wage theft can impact all workers but often disproportionately impacts communities of color, low-wage earners, and female workers.
- Studies show that certain ethnic communities are more likely to be working in low-wage jobs and that those in low-wage jobs are more likely to be victims of wage theft.
- The impact of this initiative will result in greater employer compliance and fewer instances of worker exploitation of people of color and/or female workers.
- Workers will gain greater protection from retaliation for reporting their employer for violating the law.
- Workers will also gain greater stability of employment by knowing who exactly they are working for, when they will be paid and how much.

IT Related Proposals:

N/A

Results:

DLI anticipates the number of wage claims and amount of final wages collected will increase initially due to additional wage thefts reported to the agency. This will help more people get their rightful payments faster. Over time the increased penalties and subpoena authority should deter future wage theft activity.

Calendar Year	2017
Final Wages Collected	\$466,120
Number of Final Wage Claims	986
Average Amount of Final Wages per Claimant	\$472

Statutory Change(s):

The changes in the Minnesota Wage Theft Prevention Initiative require statutory changes at Minn. Stat. §§177.27, 177.30, 177.32, 181.03, 181.032, and 181.101.

Minnesota Department of Labor and Industry

FY 2020-21 Biennial Budget Change Item

Change Item Title: Workers' Compensation IT System Modernization

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Workers' Compensation				
Expenditures	3,000	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	3,000	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$3 million in FY20 for the Department of Labor and Industry (DLI) to replace a custom developed Workers' Compensation legacy system. This appropriation will complete the funding for the project, which the legislature appropriated \$16 million to launch in 2015. The additional funds will not require an increase to the special compensation fund assessment and any unspent dollars will return to the fund.

Rationale/Background:

DLI's current workers' compensation computer system was developed 20 years ago. The system maintains records of every reportable workers' compensation injury that occurs in Minnesota and performs a variety of other workers' compensation related functions for DLI, the Office of Administrative Hearings (OAH), and the Workers Compensation Court of Appeals (WCCA).

As part of DLI's continued efforts to drive program efficiency, increase program effectiveness and reduce overall program cost, it seeks additional investment. The new system will improve stakeholder outcomes by:

- Reducing complexity – enabling front end users to get information faster and make determinations that lead to a better workers' compensation system
- Reducing cycle time – enabling faster resolution of disputes and transforming from paper/form based to data driven processes
- Easier access to relevant data – providing stakeholders with secure, accessible and straight forward access to data regarding claims, benefits and disputes
- Improving overall quality of data – implementing automation and shifting data responsibilities to external stakeholders
- One coherent system – enabling a unified system for DLI units and, to the extent possible, with the OAH C-Track case management system and the WCCA.

It is expected that the new system will increase the speed, timeliness, and accuracy of filings, as well as the ability to quickly access the information in the system. This will benefit all stakeholders using the system, particularly injured workers. It will provide quicker access to claim information allowing injured workers to obtain treatment for their injuries and resolve their claims more efficiently, and at lower costs. The new system will also provide a streamlined business process within the division. DLI expects that the new system will incorporate all facets of the workers' compensation system. This will include scheduling of proceedings and vocational rehabilitation activities, as well as increasing the ease and accuracy of administering and reporting benefits by the Special Compensation Fund unit. Utilizing web technology, the new system will be more automated and provide greater online access for all stakeholders, resulting in more effective service to the Department's diverse customer base.

The Governor requested funds for the system replacement during the 2015 legislative session and the legislature funded the project with \$10 million in FY2016-17 and \$6 million in FY2018-19. Since funding was appropriated, DLI and MN.IT developed a project governance structure. A steering team oversees the project including deliverables, budget, and change management. The steering team reports up to an owner's team which monitors progress and manages risk.

Phase 1: Planning (12/1/2014 – 12/15/15)

Phase 1 analyzed the current Workers Compensation system, including business processes, technical design and functionality, workflow processes, and reporting. This phase also identified business and high-level design requirements for a new system, as well as analyzed technology options to meet these requirements.

Phase 2: Initiation (8/26/2016 – 8/1/2018)

Phase 2 published a request for proposals (RFP) from vendors and negotiated a contract with the winning vendor.

Phase 3. System Implementation [8/1/2018 – 12/31/2020]

With the contract negotiated and signed, system implementation began on 8/1/2018. Implementation will last over two years.

Proposal:

After receiving responses to the RFP, DLI evaluated the true costs of the modernization project. The 2015 request was only an estimate based on current processes and known technology at the time. The \$3 million dollars is needed to fully fund the modernization project through its completion in December 31, 2020. Remaining project costs include:

- Contract with CapTech, the winning bidder, to develop the software package;
- Service agreements with MN.IT to provide developers;
- User Acceptance Testing to ensure the system works as intended;
- Business project manager to oversee project and manage risk;
- Training and change management for work comp employees to modify business processes and learn the new system.

Equity and Inclusion:

The proposed change impacts injured workers, employers, insurance companies and their legal representation. The change does not directly impact racial and ethnic groups, lesbian, gay, bisexual and transgender groups, persons with disabilities or veterans. No negative impacts to the groups outlined above are expected.

IT Related Proposals:

The \$3 million dollars proposed is required to fund the project through its completion in December 31, 2020. There are no project related costs past FY2021. DLI'S Workers' Compensation Division (WCD) operating budget will pay for the maintenance and license costs to maintain the system.

Results:

Upon project completion, the result will be a state-of-the art technology system for workers' compensation that will be streamlined and provide greatly improved service to all stakeholders in a more timely and efficient manner.

Success indicators for implementation of the new system include:

- Specifications and requirements are met and fully implemented.
- Staff are trained to enable them to use the new technology and documentation is complete.
- Historical data is successfully converted to allow staff to access the information.
- Interfaces to other systems are implemented and fully functional.

- The replacement system is fully implemented to meet the needs of the WCD and the broader state workers' compensation system to the degree possible; specifically integrating with the OAH C-Track Court Management System.

New quantity measurements post-system implementation.

- Number of phone calls per claim
- Number of times a file is opened/amended
- Number of days to resolve a dispute [filing to resolution]
- Number of active external system users
- Number of fines for failure to comply

Statutory Change(s):

N/A

Minnesota Department of Labor and Industry

FY 2020-21 Biennial Budget Change Item

Change Item Title: Sustaining Youth Skills Training Program

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Workforce Development Fund				
Expenditures	600	600	600	600
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	600	600	600	600
FTEs	1	1	1	1

Recommendation:

The Governor recommends \$1.2 million each biennium for the Youth Skills Training (YST) program. Currently the YST program has a budget of \$1 million per biennium for grants. This proposal increases grant funding for the YST to \$2 million per biennium and adds \$200,000 per biennium for 1 FTE project manager to continue managing the program as no funds are allocated to administer the program after June 30, 2019. In 2017, the legislature passed a one-time appropriation of \$200,000 from the Workforce Development Fund for the Department of Labor and Industry (DLI) to develop the program in FY 2018 and as such there are not sufficient resources for a fully staffed program.

Rationale/Background:

The Youth Skills Training program at the Department of Labor and Industry provides one approach to addressing the shortage of skilled workers in Minnesota. YST does this by supporting the development and implementation of experiential learning opportunities for students 16 and older by providing outreach, consultation, program approval, and grant administration. These locally developed programs are implemented in cooperation with employers, schools and other key stakeholders. YST programs include both classroom instruction and paid part-time employment and are approved and monitored by DLI.

The demand for YST grant funding significantly exceeds the amount of funding available to local partnerships to develop and implement these programs. In FY 2018, 25 partnerships throughout the state applied requesting a total of \$2,388,094 in grant funding. In FY 2019, 33 partnerships throughout the state applied requesting a total of \$3,160,290 in grant funding. Per current statute, DLI was only able to award five partnerships grants totaling \$475,000 for each of the grant rounds. Increasing grant funding allows local partnerships to develop even more YST programs and helps to address the shortage of skilled workers in Minnesota. The project manager position would provide outreach, support partnerships, technical assistance, approve YST programs and provide grant management for the agency. Program success is based on this consultative approach.

Proposal:

Additional funding would double the number of YST partnerships throughout the state by providing partnerships with the necessary grant resources to create and implement employment-based training programs for students 16+ in high-growth, high-demand, and living-wage occupations.

- **Proposal Request Outcomes: Increasing grant funding to \$2 million per biennium (\$1 million per year)**
 - Fund at least 20 local partnerships with grants to create and implement YST programs per biennium compared to the current 10 per biennium;

- Provide the option for local partnerships to receive grant funding in amounts ranging from \$50,000 - \$100,000 per grant;
- Increase industry exposure experiences for students from 2,000 students per biennium to 4,000 students per biennium;
- Increase students participating in meaningful work experiences from 250 student learners to at least 500 student learners per biennium; and
- Maintain the standard of at least 80 percent of eligible YST participants graduating from high school and at least 60 percent of YST participants receiving an industry-recognized credential.
- **Proposal Request Outcomes: Maintain 1 FTE YST project manager: \$200,000 per biennium (\$100,000 per fiscal year)**
 - Continue to monitor grantee progress and outcomes with annual reports;
 - Maintain outreach efforts by exposing over 4,000 new students, schools and businesses to the YST program and resources; and
 - Continue monitoring and managing YST letters of intent, grant applications, grant implementation, grant administration and grant approval. Provide YST programs with support in the creation and implementation of programs, and provide mentorship to YST grantees.

Equity and Inclusion:

This program does not discriminate based on race or ethnicity or any other characteristic. All students in partner schools aged 16+ who are interested in gaining work experiences in high-growth, high-demand occupations can take advantage of the opportunity. This proposal would be positive and proportionate to the student demographics of the schools that develop and implement YST programs.

IT Related Proposals:

N/A

Results:

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Current</i>	<i>Proposed</i>	<i>End Date</i>

Minnesota Department of Labor and Industry

FY 2020-21 Biennial Budget Change Item

Change Item Title: Licensing Solar Contractors as Residential Contractors

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Contractor Recovery (2000)				
Expenditures	13	3	13	3
Revenues	13	3	13	3
Construction Codes (2020)				
Expenditures	7	2	9	2
Revenues	7	2	9	2
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends requiring contractors that install residential solar photovoltaic (PV) systems to be licensed as a residential building contractor or remodeler. This change will increase consumer protection for homeowners by ensuring all installers have the education necessary for the complex installations and that they contribute to the Contractor Recovery Fund, allowing homeowner's access to make claims against the fund if needed.

Rationale/Background:

Installations of residential solar photovoltaic (PV) systems have increased significantly over the past several years due to advances in technology, reduction in the costs of the PV systems, and financial incentives offered by electric utilities and government agencies. The installation of PV panels on a residential roof is a complex endeavor that can require engineering calculations to ensure that the existing roof support system can carry the additional load of the PV panels. In many cases, additional structure must be added to the existing roof support system.

Licensed residential building contractors and remodelers pay into the Contractor Recovery Fund (CRF). The CRF exists to compensate consumers who suffer a financial loss because of a licensed residential building contractor's misconduct. By law, CRF can pay out up to \$300,000 on behalf of a single contractor, though individual homeowners can collect no more than \$75,000.

The largest cost in a PV installation is the solar panels themselves, causing solar contractors to seek higher down payments from their customers than other types of residential contractors. The higher down payment creates more risk to solar customers paying for the installation. DLI has secured a judgement against one solar contractor, licensed as an electrical contractor, who took close to \$2,000,000 from Minnesota consumers and businesses in 2017 and 2018. DLI is also currently seeking the revocation of the company's license and \$50,000 in monetary penalties. Despite the court order its' unlikely the consumers will ever be reimbursed. Had this company been licensed as a residential building contractor, residential customers would have access to share a portion of the \$300,000 available from the CRF. As it is, they will only be able to make claims against the electrical contractor's two \$25,000 surety bonds. Electrical contractors are required to have a minimum of one \$25,000 surety bond.

Proposal:

DLI is proposing to require all contractors who install residential PV systems to be licensed as a residential building contractor or remodeler. At least 15 solar companies are already licensed as residential building contractors, and DLI anticipates that this new requirement would apply to 50 current solar contractors.

The 50 current solar contractors licensed as electrical contractors would need to apply for a residential contractor or remodeler license, take the exam, and pay \$490.00 for the 2 year license.

	2020	2021	2022	2023
Application / Exam Fee	\$50	\$50	\$50	\$50
2 Year Business License	\$120	\$120	\$180	180
2020 Total	\$170	\$170	\$230	\$230
CRF Fee	\$320	\$320	\$320	\$320
Estimated # of Licensees	40	10	40	10
Total CCLD Fund revenue	\$6,800	\$1,700	\$9,200	\$2,300
Total CRF Fund revenue	\$12,800	\$3,200	\$12,800	\$3,200

The requirement increases consumer protection for homeowners interested in pursuing renewable energy installations. The impact to DLI would be small as the number of new license applications would be minimal and claims against the CRF would be included in the current workload of the agency. The CRF revenue would compensate consumers who suffer a financial loss as a result of a licensed residential building contractor's misconduct.

Equity and Inclusion:

The proposed change impacts contractors and their clients. The change does not directly impact racial and ethnic groups, lesbian, gay, bisexual and transgender groups, persons with disabilities or veterans. No negative impacts to the groups outlined above are expected. Requiring contractors installing residential solar photovoltaic systems to be licensed as a residential contractor or remodeler would increase consumer protection for all homeowners installing solar to their residence.

IT Related Proposals:

N/A

Results:

Increased consumer protection for homeowners can be measured by the number of complaints on solar contractors to the department. Payments to homeowners out of the CRF fund will be tracked.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Current</i>	<i>Proposed</i>
Quantity	Number of solar contractors licensed as residential contractors	15 (20%)	75 (100%)
Quantity	Number of homeowners that contact DLI regarding solar contractor misconduct	TBD	TBD
Quantity	CRF Payments due to solar contractor misconduct	0	TBD

Statutory Change(s):

M.S. 326B.805, subd. 1

Minnesota Department of Labor and Industry

FY 2020-21 Biennial Budget Change Item

Change Item Title: DLI IT Systems Modernization

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	1,250	1,550	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,250	1,550	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$2.8 million, over the course of 2 fiscal years, to update the Department of Labor and Industry's (DLI) technology. DLI's applications are reliant on aged technology that will run out of vendor support beginning in January 2021. Moreover, technologists to support existing solutions are becoming increasingly scarce. DLI must update applications to a new platform to maintain service delivery and minimize risk to citizens. The re-platforming provides an opportunity to improve the citizen experience with the technology that is supporting DLI programs and deliver solutions to facilitate greater efficiency and effectiveness of program staff.

Rationale/Background:

Citizens expect improved transparency, accessibility and responsive service delivery from Minnesota state agencies. As part of the Minnesota Department of Labor and Industry's continued effort to preserve and improve service delivery efficiency and effectiveness, funding is recommended to modernize its application portfolio and underlying technical infrastructure.

Many of DLI's applications are reliant on old technology that will run out of vendor support beginning in January 2021. The code used within the applications is outdated and not used by the current IT workforce. The risk of doing nothing is operating DLI business processes on unsupported applications which could increase cyber-security vulnerabilities and over time will degrade service delivery. In addition, operational costs may increase as DLI looks to mitigate risks by paying for costly service contracts with vendors. Moreover, older applications are less flexible limiting DLI's ability to meet changing market demands and regulated industry changes.

Updating the technical infrastructure and applications will ensure seamless service delivery and an opportunity to streamline functions to improve citizen experience and program operations.

Proposal:

The Governor recommends new funds to maintain existing DLI service delivery by re-platforming applications onto supported technology. In addition, the re-platforming will allow the creation of more digital service opportunities for DLI programs to simplify service delivery to citizens that have been out of reach with dated technology.

This recommendation integrates with other technology investments occurring at DLI. The Department has already begun the process of modernizing technology that supports its Workers' Compensation, Labor Standards, and Construction, Codes and Licensing divisions' applications. Once funded, this proposal along with other changes

will complete a 100% modernization of DLI technology resulting in modern, supported, and secure technology solutions to serve citizens and DLI workers alike for years to come.

Several DLI applications and their underlying technology will run out of vendor support January 1, 2021. Specifically the programs effected include: OSHA, Apprenticeship, CCLD Licensing and other DLI general support applications.

To avoid risk and take advantage of opportunities, there is roughly 18-months to: 1. Assess applications; 2. Develop options; 3. Create roadmaps for DLI divisions and its technology; 4. Execute and implement solutions; 5. Retire existing solutions; and 6. Operationalize business and IT changes.

The timeline creates urgency and the need to run multiple projects concurrently. This requires greater resource commitment to effectively run the various projects and ensure timely implementation..

Equity and Inclusion:

The proposed change impacts DLI clients and stakeholders. The change does not directly impact racial and ethnic groups, lesbian, gay, bisexual and transgender groups, persons with disabilities or veterans. No negative impacts to the groups outlined above are expected.

IT Related Proposals:

MNIT@DLI will leverage vendor and contracted resources due to scope and time constraints. State staff, existing and the new FTE, will provide strategic direction and program oversight.

Category	FY 2020	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025
Payroll	250	125				
Professional/Technical Contracts	1,000	1,425				
Infrastructure						
Hardware						
Software						
Training						
Enterprise Services						
Staff costs (MNIT or agency)						
Total	1,250	1,550				
MNIT FTEs	2	1				
Agency FTEs						

Results:

Upon project completion, the result will be an assessment of all DLI technology platforms and up-to-date technology for Apprenticeship stakeholders, the Office of the General Counsel, and a streamlined interface to the SWIFT accounting system.

Success indicators for implementation of the infrastructure technology and applications include:

- Specifications and requirements are met and fully implemented.
- Staff are trained to enable them to use the new technology and documentation is complete.

- Historical data is successfully converted to allow staff to access the information.
- Interfaces to other systems are implemented and fully functional.

New quantity measurements post-system implementation.

- Number of phone calls pre/post technology
- Number of items submitted online pre/post technology
- Number of days to resolve a client question
- Number of active external system users

Statutory Change(s):

N/A

Minnesota Department of Labor and Industry

FY 2020-21 Biennial Budget Change Item

Change Item Title: Minnesota OSHA Federal Penalty Conformance

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Workers' Compensation Fund				
Expenditures	0	0	0	0
Revenues	100	100	100	100
Net Fiscal Impact = (Expenditures – Revenues)	(100)	(100)	(100)	(100)
FTEs	0	0	0	0

Recommendation:

The Governor recommends raising maximum penalties for willful, repeat, serious, nonserious, failure to correct, and posting violations of workplace safety standards to conform to federal law. This recommendation would also tie future penalties to the implicit price deflator. Penalties assessed by MN OSHA Compliance are deposited as nondedicated revenue in the Workers' Compensation Fund. The increase in total penalties will vary from year to year, but on average the change represents a 5% increase in OSHA Penalty revenue.

Rationale/Background:

MN OSHA is referred to as a "state plan," which means the federal Department of Labor delegates authority to Minnesota to enforce workplace safety and health laws. As a state plan, MN OSHA receives half of its funding in the form of matching grants from the federal Department of Labor. To meet the requirements of these grants, MN OSHA must be "at least as effective as" the federal OSHA laws. Congress recently passed legislation that increased the maximum penalties for federal OSHA. This proposal makes the state's penalty maximums comparable to federal penalty maximums. If Minnesota does not make the changes it may lose federal OSHA funding. Losing federal funding would result in the state forfeiting OSHA administration to the federal Department of Labor. Under this scenario, 750,000 state and local government employees would lose OSHA coverage, as federal OSHA does not cover public employees. Further, without conformity, higher federal penalties would go into effect without the availability of health and safety credits MN OSHA applies, causing employers to be faced with higher overall penalties.

Proposal:

MN OSHA penalties have not been adjusted in over 20 years. Conforming the maximum penalties to federal law and tying future penalty changes to the implicit price deflator encourages employers to take workplace safety and health violations more seriously. Without federal conformity the state would forfeit OSHA administration to the federal Department of Labor. Education and outreach to employer and safety organizations would start upon passage of the legislation. The new penalties would go into effect on July 1, 2019.

Equity and Inclusion:

The proposed change impacts only those Minnesota employers with willful, repeat, serious, nonserious, failure to correct, and posting violations of workplace safety standards. The change does not directly impact racial and ethnic groups, lesbian, gay, bisexual and transgender groups, persons with disabilities or veterans. No negative impacts to the groups outlined above are expected. Increased penalties should increase workplace safety for all Minnesota employees.

IT Related Proposals:

N/A

Results:

The increase in maximum penalties will ensure continued federal funding and encourage employers to do more to keep workers safe.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Total Workplace Injuries/Illness per 100 FTE	5.3	3.3	2004 2017
Quantity	Total Fatal Occupational Injuries	80	101	2004 2017

Statutory Change(s):

MN Statutes 182.659 and 182.666

Minnesota Department of Labor and Industry

FY 2020-21 Biennial Budget Change Item

Change Item Title: Combative Sports Fee Reductions

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Special Revenue Fund				
Expenditures	0	0	0	0
Revenues	(2)	(2)	(2)	(2)
Net Fiscal Impact = (Expenditures – Revenues)	2	2	2	2
FTEs	0	0	0	0

Recommendation:

The Governor recommends reducing license fees for the following combative sports officials: judges, managers, ring announcers, timekeepers, doctors and referees. The fee changes would decrease dedicated revenue deposited to the Special Revenue Fund by \$1,945.

Rationale/Background:

Minnesota does not have enough licensed officials for combative sports events held in the state. The Office of Combative Sports performed a fee analysis, comparing license fees in the surrounding states of Iowa, North and South Dakota and Wisconsin, and found Minnesota's fees were significantly higher.

Reducing license fees to align Minnesota with the surrounding states is intended to increase the number of licensed combative sports officials which will allow additional events to be scheduled and held in Minnesota.

Proposal:

The following changes are proposed to the current combative sports license fee structure:

	Current Fee	Proposed New Fee
Referees	\$80	\$25
Judges and Knockdown Judges	\$80	\$25
Ring Announcers	\$80	\$0
Timekeepers	\$80	\$25
Managers	\$80	\$0
Ringside Physicians	\$80	\$25

DLI is proposing to eliminate the manager and ringside announcer fees as those roles are not related to the safety of the event and therefore do not need to be licensed. There are currently 34 licensed officials in Minnesota. It is anticipated that the reduction of the license fee would attract 25 additional licenses however, the initial impact of the fee reduction would be a revenue reduction of \$1,945.

Upon passage of the fee changes, the Office of Combative Sports will engage in education and outreach within the combative sports community to ensure stakeholders are informed of the reduction and elimination of fees to ensure effective implementation.

Equity and Inclusion:

DLI does not anticipate any positive or negative impacts to any racial and ethnic groups, lesbian, gay, bisexual and transgender groups, persons with disabilities and veterans with this proposal.

The fee reductions would align Minnesota's combative sports fees with surrounding states, creating a more equitable playing field for the combative sports community.

IT Related Proposals:

N/A

Results:

Lowering or eliminating license fees should result in additional individuals holding licenses and more events being held in Minnesota.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Proposed</i>	<i>Previous Dates</i>

Quantity	Number of Licenses (<i>may be more than one license per individual</i>)	34	59	FY2016

Statutory Change(s):

Minn. Stat. 341.30, Minn. Stat. 341.32 and Minn. Stat. 341.321

Program: Workers' Compensationdli.mn.gov/business/workers-compensation-businesses**AT A GLANCE**

In fiscal year 2018, the Workers' Compensation Division:

- resolved more than 5,000 disputes involving insurers, employers, employees, vocational rehabilitation providers and health care providers;
- conducted 338 mandatory coverage investigations;
- proactively contacted 5,762 new businesses to educate them about workers' compensation laws;
- maintained more than two million workers' compensation files; and
- provided vocational rehabilitation and placement services to more than 170 injured workers each month.

PURPOSE & CONTEXT

Workers' compensation ensures proper benefits and services are delivered to injured workers quickly and efficiently, and at a reasonable cost to employers. The division educates employers and employees about Minnesota's workers' compensation laws and enforces those laws. It also administers the Special Compensation Fund, also known as the Workers' Compensation Fund, which provides benefits to injured workers whose employers failed to carry workers' compensation insurance. The division provides alternative dispute resolution to quickly and cost-effectively resolve workers' compensation disputes.

SERVICES PROVIDED

The Workers' Compensation Division provides services in four primary areas through its four work units:

1. Alternative Dispute Resolution;
2. Compliance, Records and Training;
3. Special Compensation Fund; and
4. Vocational Rehabilitation.

The division:

- educates employees and employers about their rights and responsibilities under workers' compensation laws;
- provides mediation, ombudsman assistance and other dispute-resolution services;
- provides workers' compensation benefits to injured workers whose employers did not carry workers' compensation insurance;
- collects and maintains records pertaining to all workers' compensation injuries in Minnesota with claimed wage-loss or permanency; and
- provides vocational rehabilitation services to injured workers.

The Workers' Compensation Division is funded through an appropriation from the Workers' Compensation Fund. The revenues are based on the forecasted funding liability and collected through both an insurer premium surcharge paid by insurers and a self-insured assessment paid by self-insured employers. Workers' compensation benefits are paid on behalf of employees of uninsured and bankrupt self-insured employers. Reimbursements to insurers and self-insured employers under the supplemental benefits and second-injury programs make up the bulk of benefit payments.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Fiscal Year</i>

Program: Construction Codes and Licensingdli.mn.gov/business/codes-and-laws**AT A GLANCE**

The Construction Codes and Licensing Division annually:

- issues or renews 128,000 personal and business licenses;
- administers 9,000 license exams;
- completes 3,000 building plan reviews;
- issues 120,000 construction permits; and
- performs 157,000 inspections.

PURPOSE & CONTEXT

The Construction Codes and Licensing Division (CCLD) works to protect the health, safety and welfare of the public by providing reasonable, uniform and balanced standards for Minnesota's buildings and construction professionals. This provides for the safety of the people of Minnesota and fosters a competitive construction economy that encourages business growth and employment opportunity.

SERVICES PROVIDED

CCLD performs the following services to protect the health, safety and welfare of the public.

- Code adoption and administration: Assures building safety through a comprehensive and effective process of code adoption and uniform statewide code administration.
- Licensing: Assesses the qualifications of construction professionals and protects consumers and workers through contractor licensing.
- Plan review: Reviews construction plans for state-owned and state-licensed facilities, plumbing installations and manufactured structures in a timely manner to ensure safe, code-compliant buildings that result in value for the owner.
- Construction permitting: Expedites safe building construction through the efficient processing of permits.
- Inspection services: Provides for the competent inspection of all building construction work under the authority of the state and regularly ensures the safe and operational integrity of elevators, boilers and high pressure piping.
- Enforcement: Provides fair and balanced enforcement to achieve compliance with licensure and code requirements.
- Outreach and education: Fosters and promotes safe, accessible and energy-efficient building design and construction through outreach and education to construction professionals and the public.
- Contractor recovery fund: Compensates owners or lessees of residential property in Minnesota who have suffered an actual and direct out-of-pocket loss due to a licensed contractor's fraudulent, deceptive or dishonest practices, conversion of funds or failure of performance.

RESULTS

Program: General Supportdli.mn.gov/about-department/about-dli**AT A GLANCE**

In fiscal year 2018, the unit:

- supported approximately 428 agency employees located statewide;
- administered a \$146 million annual budget;
- facilitated nearly 5.6 million web hits;
- represented Department of Labor and Industry (DLI) programs in more than 165 legal cases;
- had more than 132,000 subscribers to DLI electronic publications; and
- responded to 110 requests for statistical data.

PURPOSE & CONTEXT

The General Support Division provides leadership and support to agency programs so they can be successful. Activities are customized to meet the unique needs of each activity while assuring adherence to statewide and agency standards for performance, management and documentation of decisions. Critical goals are to:

- develop and adhere to operating policies and services that meet or exceed statewide standards and policies;
- offer support services within the agency to meet particular programs goals as efficiently as possible while adhering to accepted audit standards;
- manage agency resources in as transparent a manner as possible to assure stakeholders our stewardship of their investments is sound; and
- create opportunities for electronic government transactions to assure existing resources can meet the needs of Minnesota's citizens.

This division serves agency programs that focus on the needs of workers, builders, building owners and employers in Minnesota.

SERVICES PROVIDED

The General Support Division strives to provide effective and efficient services and offer solutions to support agency programs. This is accomplished by each unit as follows.

- Communications: provides stakeholder outreach through the website and publications; promotes the work and services of the department.
- Financial Services: protects and ensures accountability for the financial resources entrusted to the department.
- Human Resources: recruits, assesses employee development needs and assists in retaining needed skill sets. Also provides services that promote a healthy, productive and respectful work environment and promotes diversity goals in all U.S. Equal Employment Opportunity Commission (EEOC) Job Groups for people with a disability.
- Office of Combative Sports: ensures combative events are conducted to minimize injuries and ensures fair competition.
- Office of General Counsel: provides legal advice to the department and advocates for the agency in enforcement and other administrative proceedings.
- Research and Statistics: collects, analyzes and reports workplace safety, workers' compensation and workplace standards data to inform decisionmakers and the public.

- Projects and Planning: provides organization development and continuous improvement support services, maintains and communicates the business continuity and emergency response plans for the agency.
- PIPELINE Program; the Private Investment, Public Education, Labor and Industry Experience program, that supports the growth and development of dual-training programs in the state. Dual training programs provide workers a combination of related instruction strategically paired with on-the-job training.
- DLI maintains its information technology services through a service-level agreement with MN.IT Services.

These infrastructure services provide agency support that enables programs to focus on their mission and achieve agency goals.

RESULTS

Program: Labor Standards and Apprenticeship<http://dli.mn.gov/business/employment-practices>**AT A GLANCE**

In 2018, the Labor Standards unit:

- recovered \$604,372 in final wages for 1,182 workers;
- completed 150 wage and hour investigations and collected \$175,399 in back wages for 744 workers;
- completed 29 prevailing-wage investigations and collected \$145,185 in back wages for 160 workers; and
- completed 51 on-site project reviews of state-funded construction.

In 2018, the Apprenticeship unit:

- registered 3,696 new apprentices, including 639 minorities and 525 females;
- assisted 210 registered apprenticeship program sponsors; and
- conducted 96 program reviews and 173 technical assistance visits to sponsors.

PURPOSE & CONTEXT

The Department of Labor and Industry's (DLI's) Labor Standards unit protects Minnesota's economy by ensuring workers are paid correctly and workplace rights and responsibilities are enforced. It conducts outreach and investigations to ensure compliance with Minnesota's Fair Labor Standards laws, including minimum wage, prevailing wage, pregnancy and parental leave, and child labor.

DLI's Apprenticeship unit supports Minnesota's economy as it fosters and promotes work-based career development through registered apprenticeship programs that provide structured training to develop a skilled workforce.

SERVICES PROVIDED

The Labor Standards unit:

- protects workers and promotes compliance through enforcement of wage, hour and payment laws, including minimum wage, overtime, child labor, women's economic security and prevailing wage;
- investigates wage theft complaints and audits employers to ensure employees are paid for their work and employers are competing fairly in the marketplace;
- increases awareness of wage theft through outreach and education;
- provides outreach and training through its child labor initiative to educate employers, schools and parents to protect youth in the workplace;
- provides outreach and education to employers and workers about the state's minimum wage law passed in 2014 and annual wage-rate changes associated with that legislation;
- conducts outreach and enforcement efforts related to the Women's Economic Security Act that includes protections for pregnancy accommodation, pregnancy and parenting leave, sick and safe leave, nursing mothers and wage disclosure; and
- conducts an annual prevailing-wage survey to establish wage rates for workers on publicly funded construction projects.

The Apprenticeship unit:

- engages and assists employers and associations in developing registered apprenticeship programs to recruit, train and retain a highly skilled workforce;
- conducts ongoing technical assistance and compliance activities to ensure each program delivers the training, instruction and rigor outlined in its standards registered with the department;
- engages various community-based organizations, labor groups, employers and associations to foster and promote greater ethnic, racial, gender and veteran participation in registered apprenticeship programs;
- assists registered apprenticeship programs in developing personalized outreach and diversity recruiting plans;
- assists workers and apprentices in connecting with apprenticeship resources;
- develops and supports introductions to construction careers programs for youth, including Construct Tomorrow; and
- fosters and promotes the expansion of registered apprenticeship programs in health care, manufacturing and other industries.

Program: Workplace Safetydli.mn.gov/business/safety-and-health-work**AT A GLANCE**

Each year, on average, the Minnesota Occupational Safety and Health Administration (MNOSHA):

- conducts almost 1,900 compliance inspections;
- assists employers through 855 consultation visits;
- responds to 1,200 employee complaints;
- investigates 23 workplace fatalities;
- provides safety grants for 155 employer safety projects;
- presents safety and health outreach to 20,000 participants;
- works with 100 cooperative programs and alliances with employers; and
- affects the safety and health of 2.9 million workers at 168,000 Minnesota worksites.

PURPOSE & CONTEXT

The goal of MNOSHA is that every employee returns home safe and healthy at the end of each working day. MNOSHA believes workplaces must share a commitment to workplace safety by employers, employees and their authorized representatives. MNOSHA focuses on regulation through its Compliance unit and on assistance through its Workplace Safety Consultation unit, helping industries with the highest injury and illness rates. MNOSHA is a state plan, one of 28 states and territories authorized by Congress to administer an occupational safety and health program “at least as effective as” the federal OSHA program.

SERVICES PROVIDED

MNOSHA keeps Minnesota employees and workplaces safe by:

- conducting planned compliance inspections focused on high-hazard industries;
- investigating workplace fatalities, serious injuries and catastrophic events;
- responding to complaints by employees about unsafe conditions at their workplace;
- reviewing employee’s protected rights after alleged improper termination or other adverse action;
- providing training and outreach to employee, employer and citizen groups about safety and health topics;
- making consultation visits to employers that request assistance about how to make their workplaces safer;
- working cooperatively with employers through voluntary prevention programs and partnerships; and
- issuing safety grants to help employers boost their safety and health programs.

RESULTS

Fatal occupational injuries per 100,000 full-time-equivalent workers, 2016

State	Fatality rate		
	2014	2015	2016
Minnesota	2.3	2.7	3.4
Wisconsin	3.5	3.6	3.6
Iowa	6.0	3.9	3.8
South Dakota	4.8	4.9	7.5
North Dakota	9.8	12.5	7.0

Source: Census on Fatal Occupational Injuries (CFOI), Bureau of Labor Statistics. The CFOI accounts for all fatalities resulting from a work injury. Minnesota has a lower percentage of employees dying from work-related injuries than neighboring states, demonstrating success of the MNOSHA program.

Source: Survey on Occupational Injuries and Illnesses (SOII), Bureau of Labor and Statistics (BLS). The SOII surveys a sample of employers to gather OSHA log data and estimates the number of work-related injuries and illnesses and the rate at which they occur.

Minn. Statute 182, provides the legal authority for this program's activities. As a state plan, Minnesota OSHA enforces 29 CFR 1904, 1910, 1915, 1917, 1918, 1926, and 1928; and Minn. Rules 5205 through 5208, 5210 & 5215.

WSC: 29 CFR 1908; 29 CFR 1910.266; Minn. Stat. 79.253; Minn. Stat. 90.145; Minn. Stat. 176.130 and Minn. Rules 5203

	Federal Fund – Agency Total		\$6,333	\$5,546	\$6,210	\$5,557		38.16

Narrative:

The Occupational Safety and Health Administration (OSHA) Compliance and Consultation grants are essential to continue the downward trend in occupational fatalities, injuries, and illnesses, and thereby reduce the suffering of workers and families and containing workers' compensation costs. Compliance efforts concentrate inspection efforts on high-hazard industries, companies with high workers' compensation injury rates, and employee complaints. OSHA consultation efforts focus on small- and medium-sized employers.

The Bureau of Labor Standards, Occupational Safety and Health Statistics grant provides the funding necessary to conduct surveys to collect, analyze, and report data on workplace injuries.

The U.S. Department of Labor Employment and Training Administration grants support the development and implementation of strategic initiatives to allow Apprenticeship Minnesota to foster and promote the registered apprenticeship model through innovation, communication, engagement and reporting. The Accelerator grant ended in FY2018 and the Expansion grant will end October 2020.

Federal funding contributes to 4% of the agencies expenditures. Federal funds received through the OSHA Compliance and Bureau of Labor Statistics programs require matching state funds of 50%. The OSHA Consultation program requires matching state funds of 10%. The required state match is provided by the Workers' Compensation fund. Funding levels are anticipated to be stable and is based on historical trends.

AT A GLANCE

The Minnesota Council on Latino Affairs represents more than 276,000 Latinos in Minnesota. The Council advises the governor and legislature on legislation and works to keep Latino Minnesotans informed on policy and legislation. The Council focuses on the areas of Education, Economic Development, Health, and Immigration.

General State of the Minnesota Latino Community

One-third of the Latino population lives in greater Minnesota
 The median age of the Minnesota Latino population is 24 years old
 Latinos have the highest labor force participation rate in Minnesota

PURPOSE

Minnesota Statute 15.0145 states that the council must work for the implementation of economic, social, legal, and political equality for its constituency. The council shall work with the legislature and governor to carry out this work by performing the following duties:

- Advise the governor and the legislature on issues of importance to the Latino community such as:
 - Administrative and legislative changes needed to improve the economic and social condition
 - Implications and effect of proposed administrative and legislative changes
- Serve as a liaison between state government and organizations that serve the Latino community
 - May include working with other organizations to develop informational programs or publications
- Design and execute studies designed to suggest solutions to the problems in the Latino community in the areas of education, employment, human rights, health, housing, social welfare, and other related areas.

MCLA supports the following statewide outcomes:

- **A thriving economy that encourages business growth and employment opportunities – in all communities in Minnesota**
- **All Minnesotans have the education and skills needed to achieve their goals**
- **All Minnesotans have optimal health**
- **That Minnesota has strong and stable families and communities regardless of their make up**
- **All people in Minnesota are safe and have an equal opportunity to pursue life, liberty and the pursuit of happiness**

BUDGET

Spending by Category
FY 17 Actual

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

The Minnesota Council on Latino affairs activities are funded through general fund appropriations and grants from Minnesota foundations. MCLA has a total FY 2018-2019 biennial appropriation of \$971 thousand dollars, with an additional \$57,500 from foundations. This funding serves to cover expenses to operate MCLA's office, which includes four full time employees, contractors, and student workers that carry out the agency's statutory requirements.

STRATEGIES

Four focus areas: Education, Economic Development, Health, and Immigration

Our strategies are focused on the legislative and policy making process which include the following:

- Trusted source of information to the Governor's office, Legislature and community
- Draft legislation derived from community input and needs
- Consult with legislators and state agencies
- Provide research based testimony, position statements, reports and policy recommendations
- Facilitate constituency input and participation in the legislative process

Direct constituency communication

- Consistent and Targeted information to state wide constituency by focus areas and geographical location
- Targeted meetings and conference calls with Latino serving organizations state wide
- Intentional use of social media to inform and connect with constituency

Community outreach

- Connect constituency with legislators, state program administrators and other Latino serving agencies
- Collaborate in inter-agency and community efforts to address Latino Minnesotan needs through legislative and policy recommendations
- Organize and collaborate with other agencies on legislative and policy forums and presentations
- Attend community events and gatherings

Minnesota Council on Latino Affairs

FY 2020-21 Biennial Budget Change Item

Change Item Title: Addition of Communications Specialist and Office Assistant

Recommendation:

The Governor recommends additional funding of \$320 thousand in the FY 2020-2021 biennium to expand the capacity of the Minnesota Council of Latino Affairs.

Rationale/Background:

The Latino community is estimated at about 276,000 people, or about 5.6% of Minnesota's total population. The Council was created to address state-wide disparities and promote equity for the Latino community. The four most important areas to the Latino community are education, economic development, health, and immigration. The Council has become a trusted source of information in these areas in the legislative, policy, and research process, and as the demand from the general public for equity in these areas continues to grow, so does the demand to the Council for support.

Within the four areas of focus, the Council conducts community engagement on behalf of all state government within the Latino communities. The Council is a critical contact point for state government and has developed and maintains good working relationships with the Latino community across the state. Community members and organizations regularly request information in both English and Spanish so that they can disseminate information to their networks. To accommodate these request, the Council strives to provide certified interpreters at its community events and listening sessions. The Council also translates all official reports and most official communication on our website, social media, and other communication platforms.

The Council does not have a dedicated communications position, so these and all other communications tasks are distributed amongst the Executive Director and three staff. This impacts staff productivity as it limits staff time dedicated to the Council's four policy areas, and requires ongoing training in areas outside of the legislative and policy realm. This position will support our efforts to provide constant bilingual communication and engage Minnesotans statewide through both traditional and social media platforms.

Additionally, the Council does not have a dedicated office assistant. All administrative needs are currently handled by the Executive Director and three staff. With the growing demand for the Council, the time spent on administrative tasks reduces the effectiveness and support that the Council provides, including official correspondence, preparing documents for the legislative session, supporting the Council's community engagement, and planning official events logistics. The need to have a designated person to support the overall daily needs of the Council are of great importance for future success.

Proposal:

The Governor recommends additional funding for the Council to operate more efficiently and effectively, supporting equity and inclusion efforts at a time when racial equity is of such high importance to Minnesotans. The funding will allow the Council to add two new FTEs: a Communications Specialist and an Office Assistant. The Communications Specialist would lead the Council's bilingual communication efforts, using both traditional and social media platforms. The Office Assistant would support the Executive Director and all staff administrative needs in order for the Council staff to be able to provide more timely and technical support in their designated area of focus. This recommendation includes \$5 thousand in FY2020 for one-time staff set up and administrative costs, and \$5 thousand in FY 2020 and each year thereafter for IT costs.

Equity and Inclusion:

The Latino community is a significant part of the state's economic and social fabric, and it will continue to grow. Investing in and improving the lives of the Latino community is vital for the overall prosperity of Minnesota. All members of the Latino community, which includes those that are Spanish speaking, bilingual, LGBTQ, persons with disabilities, veterans, undocumented, mix status families, and others, would be positively impacted by this recommendation. The additional FTEs would increase the Council's capacity to reduce and eliminate disparities issues in education, economic development, health, and immigration across the state.

Results:

Currently the performance of the Council has seen positive growth in most areas measured. This is due to the larger number of requests coming from stakeholders as well as the significant increase in the Councils community engagement, and production of reports and studies.

Recommendation:

The Governor recommends additional funding of \$24 thousand in FY 2020 and \$30 thousand each year thereafter to maintain the current level of service delivery at the Minnesota Council of Latino Affairs.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related cost increases. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the Council, this funding will cover a reclassification of current employees' compensation to properly reflect the level of expertise and work produced by the Council.

Equity and Inclusion:

N/A

IT Related Proposals:

N/A

Results:

This proposal is intended to allow agencies to continue to provide current levels of service and information to the public.

Legal Professions Boards

<i>Agency Profile</i>	1
Agency Expenditure Overview	4
Agency Financing by Fund	5
Agency Change Summary	6

AT A GLANCE

- The Boards regulate approximately 29,000 licensed Minnesota lawyers and assist the public of the state that use legal services.
- The Office of Lawyers Professional Responsibility (OLPR) processed 1,110 complaints against Minnesota attorneys in calendar 2017.
- 40 Minnesota lawyers were publicly disciplined in 2017; 5 lawyers were disbarred.
- The Client Security Board (CSB) authorized payment of approximately \$750,000 to 67 victims of lawyer dishonesty in FY 2017.
- The Office of the Board of Law Examiners (BLE) received 1,199 applications from law graduates and out-of-state lawyers seeking admission to the Minnesota bar in 2017.
- The Minnesota Board of Continuing Legal Education (CLE) approved 14,009 courses in 2017.
- The Lawyer Registration Office (LRO) processed 28,718 annual registration statements.
- The Minnesota Board of Legal Certification (BLC) oversaw 5 agencies that certified 883 Minnesota-licensed lawyers as specialists.

PURPOSE

The Minnesota Supreme Court has the inherent constitutional as well as statutory authority to regulate the practice of law in Minnesota. The Supreme Court has established several regulatory boards to assist in the regulation of lawyers licensed to practice law in Minnesota. Key issues addressed by these agencies include:

- The Board of Law Examiners (BLE) conducts a background investigation of each Bar applicant and twice a year administers the Bar Exam to assess lawyer competence.
- The Board of Continuing Legal Education (CLE) accredits qualifying courses as continuing legal education (CLE) and ensures that lawyers, as a condition of continued licensure, fulfill their obligation to continue their professional education.
- The Board of Legal Certification (BLC) reviews and accredits qualifying agencies that have the authority to certify lawyers as specialists.
- The Office of Lawyers Professional Responsibility (OLPR), working in conjunction with district ethics committees throughout the state, investigates complaints of unprofessional conduct against lawyers, and recommends and prosecutes discipline, public and private, where appropriate. The Court is assisted in its oversight of the OLPR by the Lawyers Professional Responsibility Board (LPRB).
