AT A GLANCE

In FY 2017-18, the Board:

- Renewed over 19,800 certificates and firm permits annually
- Evaluated 1,273 applications for CPA licensure
- Revoked 859 CPA certificates for failure to renew
- Issued 1,295 new individual licenses
- Issued 216 new firm permits
- Investigated 167 new complaints

PURPOSE

The mission of the Minnesota Board of Accountancy is to protect the public through the regulation of the practice of accounting by Certified Public Accountants, Registered Accounting Practitioners and others in Minnesota by:

- Ensuring that those entering the practice meet standards of competency by way of education, experience and examination;
- Establishing standards of practice for those certified or registered to practice;
- Requiring that anyone practicing or offering to practice accounting be certified or registered and continue to maintain their professional competence; and
- Enforcing the laws, rules and standards governing the practice of accounting in Minnesota in a fair, expeditious and consistent manner.

The Board contributes to the statewide outcomes of:

- **A thriving economy that encourages business growth and employment opportunities**
- **Efficient and accountable government services**

BUDGET

**Spending by Category
FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

The Board collects application and licensure fees which are deposited in the State's General Fund. The Board's budget is funded through General Fund appropriations.

STRATEGIES

To accomplish its mission, the Board uses the following strategies:

1. **Regulatory** – Collaborating with the National Association of State Boards of Accountancy on consistent standards for examination, licensure and enforcement. Evaluating applications to ensure that those entering professional practice have completed the required education, examination and experience.
2. **Enforcement** – Investigating complaints and taking action against licensees and unlicensed individuals who violate the Board's statutes and rules. Removing individuals from practice when necessary. Exchanging enforcement data across jurisdictions. Providing public access to license status, discipline history and the complaint process. Ensuring that the Board's statutes and rules are up-to-date and understandable.
3. **Outreach and Education** – Providing information to Minnesota citizens, legislators, other state agencies, schools, professional societies and the national council about the value of licensure and the requirements of competent practice.

The Board of Accountancy contributes to the statewide outcome of creating a thriving economy that encourages business growth and employment opportunities by:

- Issuing permits to firms and licenses to individuals who practice public accounting, ensuring that those individuals and firms comply with statutes, rules, and accounting and auditing standards, and contributing to a stable and secure financial network;
- Ensuring that statutes and rules reflect the minimum standards to protect the public; and
- Updating statutes and rules to remove unnecessary barriers to licensure and certification.

We contribute to providing efficient and accountable government services by:

- Responding quickly and professionally to applicants, licensees, certificate holders, and the public;
- Providing education and information to the public, students, and licensees; and
- Thoroughly and efficiently investigating complaints and taking enforcement action when appropriate.

The Board strives for equity in licensure and certification by:

- Ensuring that standards for Minnesota residents are not easier or harder to achieve than standards for those already licensed or certified in another state transferring to Minnesota;
- Consistently applying the statutes and rules to all applicants, licensees, and firms; and
- Using plain language on application forms and in administrative rules.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Percentage of applications for initial licensure submitted online Note: Online initial apps launched in November 2017	0%	62%	Before and after Nov. 2017
Quality	Average days to licensure (individuals)	18	18	FY 15/16 & FY 17/18
Quality	Average days to licensure (firms)	26	22	FY 15/16 & FY 17/18
Quality	Average days to resolve a complaint	93	60	FY 15/16 & FY 17/18

The Board of Accountancy's legal authority comes from M.S. 214.01 and M.S. 326A.

Board of Accountancy

FY 2020-21 Biennial Budget Change Item

Change Item Title: Operating Adjustment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	43	24	24	14
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	43	24	24	14
FTEs	0	0	0	0

Recommendation:

The Governor recommends additional funding of \$67 thousand in the FY 2020-2021 biennium and \$38 thousand in the FY 2022-2023 biennium to maintain the current level of service delivery at the Board of Accountancy, and for one-time legal and rulemaking costs.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related cost increases. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

Enforcement of statutes and rules (i.e. complaint resolution) is one of the major ways the Board fulfills its mission to protect the public health, safety, and welfare. The Board has several enforcement cases that are in the appeal process. In addition to its legal fees for the Attorney General's Office, the Board anticipates increases in non-AGO-related legal fees in FY 2020-2023, estimated at \$10 thousand annually.

Additionally, the Board's administrative rules require updates based on changes to accounting standards on a national level. Rulemaking expenses for the Board are estimated at \$20,000 in FY 2020 and include publication of notices in the *State Register*, mailing notifications to affected parties, and holding public hearings.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the Board, this funding will cover known employee compensation. It also includes one-time funding for rulemaking costs in FY 2020 and legal costs from FY 2020-2023.

	FY 2020	FY 2021	FY 2022	FY 2023
Compensation	\$13	\$14	\$14	\$14
Rulemaking	20			
Legal Fees	10	10	10	
Total	43	24	24	14

Results:

This proposal is intended to allow the Board to continue to provide current levels of service and information to the public.

Statutory Change(s):

N/A

Board of Accountancy

FY 2020-21 Biennial Budget Change Item

Change Item Title: Online Permitting System

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	50	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	50	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends additional, one-time funding of \$50 thousand in FY 2020 for website and application system updates at the Board of Accountancy.

Rationale/Background:

During the FY 2018-2019 biennium, the Board successfully launched its online application system for initial Certified Public Accountant certificates. Applicants are able to check the status of their application 24/7 and print customized reference and experience forms that are required as a part of the application process. The online system has been well-received by applicants and by the end of the biennium - just seven months after launch - over 80% of the applications the Board received were through the online system. The Board would like to enhance its online application system to allow Certified Public Accounting firms to apply for a firm permit online.

Additionally, for each credit card transaction for online initial applications or renewals, the Board is charged a fee. The actual fee varies depending on the user's credit card (Visa, MasterCard, Discover, etc.) and the rewards the user gets from using that card, however the Board must charge a set fee for each transaction. The Board has been processing applications for renewal online for over a decade and each year goes through a lengthy process of analyzing the fees charged to the Board by the bank relative to the amount the Board collected from its applicants the previous year to set the fee for the upcoming year. The process is cumbersome and unreliable and results in the Board either over-recovering or under-recovering the fees. There is a new process available whereby US Bank processes the convenience fees on behalf of the Board. In order to take advantage of this new process, the Board must make changes to its website and interface with US Bank.

Proposal:

The Governor recommends this one-time increase to the Board in order to complete the modernization of its application system and more efficiently process payment transactions.

IT Related Proposals:

The Board will use an external vendor to complete this project.

Results:

The additional funding will help the Board achieve the following results:

1. Expand the Board's online initial application system to include allowing Certified Public Accounting firms to apply for a permit online. The Board's goal is that 80% of firm applications will be submitted online.

2. Updating the interface with US Bank will result in more accurate fee collection, and reduce the amount of money the Board must contribute from its operating budget to cover the cost of under-recovery.

AT A GLANCE

- 489 employees in FY17
- Oversee nearly \$2.5 billion in state procurement annually, including negotiating more than \$21 million in contract savings and increasing purchasing from diverse businesses
- Reduced Capitol complex energy consumption by 21% percent and increased reliance on renewable energy sources to nearly one-third of annual usage since 2008
- Manage more than 280 construction projects and 850 property leases
- Monitor facility conditions and asset preservation needs of over 6,000 state-owned buildings
- Oversee a fleet of more than 1,800 vehicles, increasing use of electric and fuel efficient vehicles
- Trained over 1,350 public officials and stakeholders about open government laws in FY18
- Provided direct training and informational resources to more than 10,812 individuals with developmental disabilities or family members in FY18

PURPOSE

The Department of Administration is a core central service agency serving the Governor, legislature, state agencies, local governments, and the public. Our mission is to benefit all Minnesotans by leading innovation, creating solutions, and providing exceptional services. That mission is achieved by focusing on diversity and inclusion, customer satisfaction, technology optimization, sustainability, employee engagement, and best value.

The purpose and benefit of effective centralized core administrative services is to achieve better value for state agencies by leveraging economies of scale, ensuring open and fair competition, reducing risk, and promoting success through standardized processes. Centralizing and standardizing core services, things like—procurement processes, contract terms, leasing, risk management, and many other centralized administrative functions—makes it easier for policy-makers and the public to be aware of what is expected to occur, and what does occur, in government, and to evaluate both.

Specifically, we provide enterprise leadership for a broad range of professional services and business functions essential to the efficient operation of government, including:

- overseeing real property and sustainable state operations;
- helping agencies comply with state procurement and contracting laws while also achieving the best value in purchasing goods, services, and vehicle fleets;
- overseeing state facilities' construction and leasing;
- providing property, liability, and workers compensation insurance coverage for state operations;
- establishing best practices for state grants administration and training agency staff;
- leading state 2020 Census efforts and providing government and non-governmental agencies, businesses, and the public with population data and demographic services;
- providing financial management and human resource support to a growing number of small state agencies, boards, and commissions;
- operating the Capitol Complex and other buildings efficiently and keeping the Capitol grounds beautiful;
- providing technical assistance to small businesses seeking federal or state contracts; and
- overseeing state and federal historic preservation laws and administering the state and federal historic preservation tax credits.

In addition, Admin provides key services directly to the public. We help individuals and organizations understand and access their rights to government data. We provide opportunities for those with developmental disabilities

and their families to advocate for their rights to education, work, and community participation. And, we provide assistive technology so those with physical disabilities can lead more independent and productive lives.

By ensuring Minnesota’s executive branch agencies receive excellence in enterprise services, Admin contributes to the statewide outcome of: **Efficient and accountable government services.**

By providing persons with disabilities assistive technology to help them be productive and involved in their communities, Admin contributes to the statewide outcomes of: **Minnesotans have the education and skills needed to achieve their goals; and Strong and stable families and communities.**

BUDGET

Source: Budget Planning & Analysis System (BPAS)

Source: Consolidated Fund Statement

Our mix of funding is as complex and diverse as the services we provide, with fully 87% of funds spent through the internal service, special revenue, and enterprise funds we manage. Additionally, more than half of the general fund dollars we are appropriated are passed on to, or spent on behalf of, other entities via our fiscal agent program.

STRATEGIES

We utilize multiple strategies and service delivery models to support the statewide outcomes of efficient and accountable government services and ensure the best value in government administrative services. These include:

- Sustainable services that leverage our enterprise expertise in fleet, leasing, construction, facilities, and purchasing services, and the expertise of our partner agencies to advance environmentally sustainable operations, avoid costs, and reduce the State’s carbon footprint.
- Real property services that provide a single, enterprise-wide inventory of facility conditions necessary to strategically plan for asset preservation, workforce, and citizen service investments.
- Procurement services that leverages bulk purchasing opportunities to achieve best value by developing contracts for use by multiple government units; standardizing and consolidating purchases; and aggressively negotiating contract terms and pricing.
- Facilities management services such as maintenance, engineering, and energy retrofits that provide well-maintained facilities necessary for the daily operations of the state’s executive, legislative, and judicial branches.
- Construction and space leasing services such as serving as the state’s leasing agent and owner’s representative on construction projects. We provide efficient and effective oversight of capital

construction projects, ensure facility solutions that meet the space needs of state agencies and their customers, and facilitate effective management and optimal use of state real property assets.

- Government-to-Government shared services that provide financial and human resource services to small agencies, boards and commissions, continuous improvement (Lean) training, workers compensation, archeological services, and vehicle fleet services.
- Government management consultation to help agencies on achieve energy reduction goals, comply with open government requirements, reduce workers' compensation costs, and reduce the state's reliance on gasoline.
- Public services that include assistive technology, demographic services, and resources for people with developmental disabilities. We also facilitate the public's access to state government by educating citizens on their rights to government data, granting permits to stage public rallies, and administering public spaces in the State Capitol building.

FY 2020-21 Biennial Budget Change Item

Change Item Title: In Lieu of Rent Increase

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	500	500	500
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	500	500	500
FTEs	0	0	0	0

Recommendation:

The Governor recommends additional funding of \$500 thousand in FY 2021 and each year thereafter for In Lieu of Rent (ILR) at the Department of Administration. ILR is used to fund space costs of the legislature, veterans' organizations, ceremonial space, the Capitol grounds, and statutorily free space on the Capitol complex in St. Paul.

The FY 2020 and FY 2021 appropriation for ILR is \$9.391 million annually. This proposal represents a 5.3% increase over the FY 2021 base budget.

Rationale/Background:

ILR funds rent expenses in the State Capitol and other buildings on the Capitol complex for entities that do not directly pay for their leased spaces, including:

- Ceremonial space - space in the Capitol Building such as the Rotunda, ceremonial grounds, monuments/memorials in the Capitol area, and the Governor's Residence;
- State Services for the Blind space - space used for vending operators and convenience stores at eleven building sites statutorily assigned to the State Services for the Blind (MS 2408.07. subd.7); and,
- Rent Waived space - Capitol public space and space occupied in the Capitol, State Office Building, and Veterans Service Building by the House of Representatives, Senate, Revisor of Statutes, Legislative Reference Library, and Congressionally chartered veterans' organizations (MS 197.55 to 197.58).

ILR-funded space is billed in the same manner and at the same rate as other tenant-occupied space in the same building. Lease rates in the Capitol building are increasing in FY21. Like other buildings on the Capitol complex, lease rates are increasing due to inflationary pressures such as compensation, supplies, and utility costs. The ILR funding model works well because it provides the budget consistency needed to plan for and conduct routine building operations and basic infrastructure maintenance to public and legislative spaces.

The restored Capitol has many additional spaces and systems that require maintenance including restrooms, elevators, HVAC and mechanical systems, and operable bollards and wedge barriers. The restoration allows for the Capitol's Loggia (the outside balcony on the front side of the building) to again be opened to the public, but such access necessitates more frequent and extensive cleaning to remove natural elements such as bird waste. Specific projects that will take place in this biennium include the application of balcony and loggia sealants, exterior window sealants, and caulking of drum and dome windows.

Equity and Inclusion:

This proposal is intended to allow agencies to continue to provide current levels of service and information to the public.

IT Related Proposals:

N/A

Proposal:

The Governor recommends increasing the ILR budget to maintain the delivery of current services. ILR funding is critical as it is the only available source of funding for maintenance and operation of the facilities and space where rent cannot be charged on the Capitol Complex. This funding will provide for the known costs of operating and maintaining spaces utilized by veteran services organizations, the Legislative Branch, Services for the Blind, and the public while interacting with their government in St. Paul.

This recommendation also recognizes that with the renovation, some of the Capitol's space has transitioned from office space to ceremonial and public spaces. With more space dedicated to public use, use of the Capitol building has increased. There is space available for reservation for the public and exhibition space, and statutory changes in the past several years support greater public use of the building. Such a change in space usage is a great benefit, but requires additional resources to pay for increased operating time for building utility systems, more custodial staff, reservations capability, greater restroom capacity, and added insurance.

FY 2020-21 Biennial Budget Change Item

Change Item Title: Procurement Technical Assistance Center Match

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	441	441	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	441	441	0	0
FTEs	4.0	4.0	0.0	0.0

Recommendation

The Governor recommends \$882,000 in the FY 2020-2021 biennium to provide cost sharing funds for the Procurement Technical Assistance Center (PTAC). This funding represents the state's 40 percent of the total program budget and the required match for its Cooperative Agreement with the Federal Department of Defense Logistics Agency (DLA).

Rationale/Background:

The Procurement Technical Assistance Center (PTAC) program has been a program available to Minnesota businesses since 1991. The primary purpose of PTAC is to offer free counseling, education, training, certification, and guidance for Minnesota businesses including small, women, minority, and veteran owned small businesses wishing to sell their products and services to local, state, and federal government entities. Minnesota's program was first funded, in part, by a non-profit and then moved to another non-profit in 2003. In July 2017, the Metropolitan Economic Development Association (MEDA), the host, determined that they would no longer support the PTAC program and sought out the Department of Administration (Admin) to assume that role. PTAC's 5.5 FTEs were transitioned to state employment and have continued to offer PTAC services to businesses statewide.

Since joining Admin in July 2017, PTAC has had significant impacts across the state, including:

- Met with 1,104 Minnesota businesses;
- Conducted 6,549 one-on-one counseling hours;
- Hosted or partnered on 105 events with nearly 6,000 participants; and
- Assisted Minnesota vendors in achieving nearly \$300 million in prime and subcontractor contracts at all levels of government.

PTAC staff are geographically located throughout the state. Greater Minnesota personnel provide training and counseling services in a variety of communities allowing government services to extend to all Minnesotans. The ability to connect with a local PTAC representative makes government contracting less intimidating and more accessible for all women, minority, and veteran business owners.

Minnesota has a unique funding structure for the PTAC program, which has proved challenging. Other states that host PTAC programs receive their primary funding from DLA and the cost sharing as a budget line item. In Minnesota, the cost sharing is currently taking place via compensation and other expenditures of the Office of Equity in Procurement (OEP). A direct appropriation would allow Minnesota's PTAC to be funded and operate the same as other states' programs.

As a result of the current funding model, OEP personnel are required to focus the majority of their time on PTAC instead of OEP activities. A direct appropriation will allow OEP staff to fully dedicate its resources to serving state agencies in areas such as: expanding the Equity Select and Sheltered Market programs and streamlining the process; redesigning and growing the certification and recertification processes; identifying and engaging in targeted outreach; participating in pre-construction and pre-bid community meetings; and implementing the Disparity Study recommendations.

Proposal:

The Governor recommends new funding for PTAC to meet federal match requirements, which will allow OEP to provide its full array of services. This proposal will fund 40 percent of PTAC's 9.5 FTEs, which will include 3.5 FTEs in the Twin Cities Metro Area, as well as six FTEs located in Greater Minnesota. This will allow for better distribution of PTAC services across Greater Minnesota. The DLA will provide the remaining 60 percent of the total operating budget.

Equity and Inclusion:

The purpose of the PTAC program is to assist all businesses interested in government contracting opportunities, and has particular impact on small, women, minority, and veteran owned businesses. Much of the PTAC work is concentrated on assisting vendors who qualify under these categories with the appropriate local, state, and/or federal certifications, which helps promote equity and inclusion in our contracting practices.

IT Related Proposals:

N/A

Results:

This proposal is intended to allow Admin to maintain full levels of service for both PTAC and OEP.

Statutory Change(s):

N/A

Administration

FY 2020-21 Biennial Budget Change Item

Change Item Title: Operating Adjustment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	76	56	56	56
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	76	56	56	56
FTEs	0	0	0	0

Recommendation:

The Governor recommends additional funding of \$76 thousand in FY 2020 and \$56 thousand each year thereafter to maintain the current level of service delivery at the Department of Administration (Admin). This funding will support increased rent costs and prospective retirement costs at Admin.

Admin's direct appropriated general fund base budget is \$24.396 million annually in the FY 2020-2021 biennium. This additional funding represents a 0.3% increase in FY 2020 and 0.2% increase in FY 2021.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

While the department continuously seeks and finds ways to become more efficient with existing resources, base appropriation amounts assume no inflationary increases. Efficiencies alone do not offset the need for operating appropriation increases in order to maintain current service levels expected by Minnesotans and partner agencies.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For Admin, this funding will pay for increases in rent each year, \$2,000 in FY 2020 and \$5,000 in FY 2021. This increase will also support retirement costs – \$74,000 in FY 2020 and \$56,000 in FY 2021. Admin has 131 staff eligible to retire during the FY 2020-2021 biennium, with a total estimated payout of \$1.9 million. This funding will be used to pay the General Fund share, approximately 11%, of those retirement costs, assuming that about 30% of those eligible to retire will do so each year.

FY 2020-21 Biennial Budget Change Item

Change Item Title: 2020 Census Mobilization and Outreach

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	1,600	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,600	0	0	0
FTEs	3.5	0	0	0

Recommendation:

The Governor recommends additional, one-time funding of \$1.6 million in FY 2020 for the State Demographic Center at the Department of Administration (Admin) to implement an outreach and engagement plan for the 2020 Census in Minnesota.

The FY20 base budget for the State Demographic Center is \$739 thousand. This includes \$190 thousand annually from FY 2018 to FY 2021 for additional staff at the State Demographic Center for the State's participation in the 2020 Census and to meet federal reporting requirements. The FY 2020 recommended funds will increase the budget for the State Demographic Center by 217 percent. Up to 50 percent of this funding will be passed on to community organizations as grants and the remainder will cover staff augmentation, technical tools, and other resources.

Rationale/Background:

An accurate 2020 Census is essential to the state because it serves as the basis for the distribution of more than \$8 billion dollars of federal funds to Minnesota each year, it determines the number of Congressional Districts the state will have in the coming decade, and it directs the distribution of political representation within the state through legislative redistricting.

The characteristics of people that tend to be missed by censuses are well-established by past research. Historically undercounted groups include renters, low-wealth communities, immigrants, people of color and indigenous people, highly-mobile residents, college-age students, children under five, and rural residents. While the primary responsibility of conducting the census falls on the U.S. Census Bureau, the state has the ability to boost participation in the census by making sure that local communities, governments, and organizations are fully supported to engage historically undercounted groups with whom they are connected.

These funds are aimed at reducing the number of Minnesota residents that are missed by the 2020 Census, as measured by U.S. Census Bureau post-enumeration surveys and demographic analyses after the census occurs. The census undercount varies from decade to decade, depending upon a number of factors that change over time. In 2020, these factors are expected to include declining survey response rates, a highly mobile population, underfunding of the U.S. Census Bureau, and increasing mistrust of governmental institutions—especially among immigrants whose fear has grown due to the proposal to add a citizenship question to the census.

Proposal:

The Governor recommends additional funding to increase the capacity of the State Demographic Center to support outreach and engagement activities in FY 2020. This will be done by hiring additional communications and program staff to organize and implement the various initiatives and deliverables, by purchasing the electronic tools that support census engagement and promotion statewide, and by administering grants to local governments and community organizations to implement the initiatives in their communities. The specific initiatives include:

- A Census Response Table initiative that will enable community groups to bring the census to historically undercounted communities by provide community tabling kits that can be brought to gathering places and events across the state (e.g. schools, community centers, libraries, grocery stores, etc.);
- A “Commit to Census” initiative to educate community members about the census and organize residents to commit to participate. This is the first census that people will be allowed to respond online or by telephone, and this initiative will deliver the information for people to fill out their census form in April 2020 by text/email;
- Communications to increase awareness of the census among Minnesota’s apartment building managers, owners, and renters;
- A job sourcing recruitment initiative to increase the likelihood that census takers hired by the U.S. Census Bureau in Minnesota come from the communities they are enumerating;
- A grant to support planned community efforts to engage historically undercounted communities; and
- Other shared services, including: the translation of educational materials, digital communications and e-organizing tools into additional languages, a P.O. Box mailing to rural Minnesota residents on how to participate in the Census, and the purchase of Census 2020 promotional items.

Equity and Inclusion:

The census initiatives are aimed at increasing participation by people of color, indigenous people and immigrants, and other historically-undercounted groups. Inclusion in the census will increase the visibility, funding, and political power to these communities.

Representatives of Minnesota’s historically-undercounted communities have been involved with on-going census efforts through the Minnesota Complete Count Committee, local complete count committees, and the Minnesota Census Mobilization Partnership.

IT Related Proposals:

N/A

Results:

The aim of these initiatives is to increase participation in the 2020 Census, especially among historically undercounted groups. Data for the following measures are produced and published by the Census Bureau.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>

Administration

FY 2020-21 Biennial Budget Change Item

Change Item Title: MN Senate Building (MSB) Building Replacement Fund

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Plant Management Fund				
Transfer Out	0	0	0	0
Special Revenue Fund				
Transfer In	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends a no-cost, technical change to create a Minnesota Senate Building (MSB) Building Replacement Fund in statute to properly account for monies that are already being collected through lease rates to pay future asset-preservation costs for the Minnesota Senate Building. This change would align with other non-general obligation bond funded buildings on the Capitol Complex.

Rationale/Background:

2013 Minnesota session law, chapter 143, article 13, section 21 allows the Department of Administration (Admin) to set aside a portion of MSB lease rates in order to pay for future building repairs. This authority ensures proper care and maintenance of the building through at least 2039, when the building's Certificates of Participation debt obligation will be met. The session law also directs Admin to transfer these funds to an account in the special revenue fund.

Proposal:

The Governor recommends codifying the 2013 session law in statute by establishing a dedicated account in the special revenue fund to hold funds collected from MSB lease rates for future repairs and replacements. Funding in this account will be used to address future projects, such as those that address life-safety hazards, building code violations, structural defects, hazardous material abatement, and the repair or replacement of major building components, such as roofs and HVAC systems.

This recommendation will not impact the lease rate at the Minnesota Senate Building. Beginning in FY 2016, the MSB lease rate has included \$1 per square foot for future building repairs. As of the end of FY 2018, \$352 thousand has been collected for future repairs at MSB, and Admin anticipates approximately \$141,000 will be collected annually through 2039.

Equity and Inclusion:

N/A

IT Related Proposals:

M.S. 16B.24

Administration

FY 2020-21 Biennial Budget Change Item

Change Item Title: Office of School Trust Lands Funding

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures (ADM)	(187)	(187)	(187)	(187)
Expenditures (DNR)	187	187	187	187
Other Funds (Perm School)				
Expenditures (ADM)	(300)	(300)	(300)	(300)
Expenditures (DNR)	300	300	300	300
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends moving the responsibilities of fiscal agent for the Office of School Trust Lands (OSTL) from the Department of Administration (ADM) to the Department of Natural Resources (DNR). This proposal does not alter the mission or work of the OSTL. It moves funding for the Office of School Trust Lands to the DNR at the same level that it currently exists at ADM. This proposal is, therefore, budget neutral.

Rationale/Background:

Since 2014, current law appropriates funding for OSTL to the ADM. Additionally, DNR, Department of Education and OSTL entered into a Memorandum of Understanding (MOU) that facilitates the OSTL working relationship with DNR. The multi-agency MOU establishes that ADM will be the primary fiscal agent for OSTL (consistent with current law) and that DNR will provide office space and operations support (fleet, IT, contract review, etc.). Although this operating structure works, it creates administrative inefficiencies as it requires DNR to bill ADM quarterly for the services provided to OSTL. This proposal seeks promote administrative efficiency by discontinuing the dual accounting and quarterly billing between OSTL, ADM and DNR.

Proposal:

This proposal moves the appropriations for OSTL from ADM to DNR. It does not change the purpose or function of the OSTL or request additional appropriations. It merely seeks to gain operational efficiencies by reducing the number of fiscal agents for OSTL.

Equity and Inclusion:

OSTL has not identified any protected class or group that this proposal would negatively impact.

IT Related Proposals:

Not applicable.

Results:

This proposal will increase administrative efficiencies to the OSTL, ADM and DNR.

Statutory Change(s):

Administration

FY 2020-21 Biennial Budget Change Item

Change Item Title: MN Emergency Alert and AMBER Alert System Upgrades (MPR)

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	200	200	200	200
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	200	200	200	200
FTEs	0	0	0	0

Recommendation:

The Governor recommends additional grant funding to Minnesota Public Radio, Inc. (MPR) for upgrades to Minnesota's Emergency Alert and AMBER Alert Systems. The current, base grant to MPR is \$310 thousand annually in FY 2020 and FY 2021. In FY 2018, MPR received a one-time grant of \$400,000 for similar upgrades.

Rationale/Background:

This funding ensures that Minnesota Public Radio, as the backbone for the Minnesota Emergency Alert System (EAS), can continue to provide this essential service. This funding will support needed equipment repairs and replacements in rural Minnesota that are essential to radio broadcasts and emergency signals. Minnesota's radio, television, and cable broadcasters rely on and monitor MPR's radio network 24 hours a day. In the event of an emergency, the appropriate warnings and information can be broadcast by all media organizations to audiences across the state. These broadcasts may include state or federal emergencies, a nuclear disaster, a natural disaster, Emergency alert, or an AMBER (child-abduction) Alert.

MPR has built a statewide radio network with more than 80 stations and translators throughout the region. MPR's signal reaches 95% of the state and over 900,000 listeners tune in each week. There is no other media organization in Minnesota that has this statewide reach, which is why MPR has been designated as the backbone for the EAS. This network allows MPR to distribute the EAS signal statewide to all MN broadcasters.

The maintenance of this critical network faces a variety of problems that state funding eases. Much of the network was built thirty to forty years ago and key infrastructure now needs to be updated, repaired, or in some cases replaced. Minnesota weather can also cause unexpected and large scale equipment damage. In addition, as technology continues to change, MPR's stations need to be kept up to date to ensure maximum working order and coverage.

Proposal:

Many of the MPR stations cover smaller communities in Greater Minnesota, and these stations are not financially self-supporting. No general fund dollars are spent on metro stations or any MPR employee salaries.

The Governor recommends additional funding to MPR for upgrades to Minnesota's Emergency Alert and AMBER Alert Systems. The increase will provide necessary funding for infrastructure updates, repairs, and, in some cases, replacement. Many of the MPR stations cover smaller communities in Greater Minnesota, and these stations are not financially self-supporting. No general fund dollars from these equipment grants are spent on metro stations

or any MPR employee salaries. Up to 5% of the amount appropriated can be used by the Department of Administration for their costs to administer the grant.

Equity and Inclusion:

N/A

IT Related Proposals:

N/A

Results:

At the federal level, EAS is overseen by the Federal Emergency Management Agency (FEMA), the Federal Communications Commission (FCC), and the National Oceanic and Atmospheric Administration (NOAA). The EAS is tested through MPR on a monthly basis, and the FCC also conducts periodic EAS testing. These tests ensure that the system is working properly and identifies issues that need to be corrected. MPR must comply with all EAS laws and regulations. MPR's components of the system must properly function during all tests and fully disseminate and coordinate alerts and warning messages during actual emergencies. This additional funding will help ensure important, necessary information is successfully disseminated across the state, and that MPR remain compliant with federal regulations.

In Minnesota, the Department of Public Safety oversees the Integrated Public Alert and Warning System (IPAWS) – EAS is a part of this system.

Administration

FY 2020-21 Biennial Budget Change Item

Change Item Title: Ford Building Deficit

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	(190)	(190)
Transfer Out	0	0	190	190
Other Funds				
Transfer In	0	0	190	190
Expenditures	0	0	190	190
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	(1.4)	(1.4)

Request:

The Governor recommends repurposing \$190,000 per year from the Department of Administration's (Admin) general fund base budget for the operation and maintenance deficit of the vacant Ford Building, beginning in FY22. The General Fund appropriation will be transferred to the Lease Fund and used to pay down the deficit until it is eliminated, estimated to be in FY28.

Rationale/Background:

Minnesota Session Laws of 2017, First Special Session, Chapter 4, Article 1, Sec. 11, Subdivision 2 appropriates \$190,000 per year to the state demographer for the 2020 census. Since the 2020 census efforts will conclude in FY 2021, the funding will not be needed for this purpose and the Governor recommends redirecting the funding to cover previous financial losses and cover the cost of maintaining the Ford Building going forward.

The costs to operate and maintain Capitol complex buildings are financed through an internal service fund that relies on the collection of lease payments (rent) from building tenants, and from In Lieu of Rent funding. The Ford building, located at 117 University Ave, St. Paul, MN, has been vacant since 2003 with no source of revenue. As of June 30, 2018, with no funding source to pay for building costs, the building has accumulated an operating deficit of \$989,000. This deficit is growing each year.

The Ford Building was constructed in 1912, and was purchased by the state in the late 1960's. The building was most recently used for office space until 2003, but was decommissioned in 2004. It has remained vacant since that time, but has experienced significant distress and deterioration over the last 15 years. The distress is global to the building and includes both structural concrete and exterior wall cladding (brick, terracotta and tile) deficiencies.

Exterior:

Admin first discovered concrete/stucco debris falling off portions of the east-building wall in 1999. By 2005, the south elevation brick, terra cotta, and tile masonry had undergone additional deterioration, and significant brick masonry cracking, and outward bulging of wall sections, were potential safety hazards. Repairs in 2005 removed the loose and hazardous masonry.

A 2009 review revealed additional distress at the south elevation masonry. An assessment in 2012 identified additional distress to an areaway below the south sidewalk. Repairs to the building were completed after each condition assessment, including:

- Adding a supplementary supporting angle below the east concrete masonry stair tower wall;
- Anchoring chain link fence to portions of the east and west walls;
- Removal of loose masonry and salvage of brick for future reuse;
- Removal of steel lintels over windows; and
- Replacement of structural support members over the fuel storage tank.

Known issues with the interior of the building include: efflorescence indicative of water transmission can be observed on the most northwestern column in the stairwell on all three levels, and there is visible distress in the mechanical area at the basement level below the south sidewalk and overhead concrete spalling, efflorescence, and deteriorated reinforcing bars were observed at a few locations. Another condition assessment will be completed over the next several months.

Proposal:

The Governor recommends redirecting \$190,000 per year, beginning in FY 2022, from the Department's base budget to cover previous financial losses and cover the cost of maintaining the Ford Building going forward.

Results:

These funds will cover financial losses from previous years and provide funds for future building maintenance.

Program: Government and Citizen Services

Activity: Council on Developmental Disabilities

<http://mn.gov/mnddc> and <http://mn.gov/mnddc/pipm>

AT A GLANCE

The Council provides information, education, and training including:

- Dissemination of more than 1 million publications and downloads about developmental disabilities during the past biennium.
- Reached milestone of 1,000 Minnesota Partners in Policymaking® graduates in May 2018.
- Creation of the largest online archive of Minnesota and national developmental disabilities history.
- More than 100,000 downloads of Emergency Planning App for people with autism spectrum disorder.

PURPOSE & CONTEXT

The Minnesota Governor's Council on Developmental Disabilities fulfills the requirements of the federal Developmental Disabilities Act (DD Act--P.L. 106-402) for Minnesota. The mission of the Council is to provide information, education and training to people with developmental disabilities and their families in order to increase their independence, productivity, self-determination, integration and inclusion (IPSI) into community life.

Developmental disabilities are significant disabilities that begin during the developmental period, impact three major areas of functioning, and last throughout a person's lifetime. Approximately 1.8% of Minnesotans have a developmental disability. The Council was first appointed in 1971 and the Department of Administration has served as the federally designated state agency since 1991.

SERVICES PROVIDED

The DD Act requires that 70% of the federal allocation must be spent on program goals approved by the federal government. These program goals or services include:

- Leadership training through the Partners in Policymaking program (an 8 month leadership training course designed for people with developmental disabilities (self-advocates) and family members);
- Free training materials, publications, resource materials, and online courses;
- Sponsorship of training conferences;
- Grant funds to assist self-advocates to advocate for themselves;
- Outreach to diverse racial and ethnic communities;
- Innovative employment opportunities for people with developmental disabilities; and
- Customer research studies on topics critical to the field.

The Legislature provided one-time Legacy funding in 2017 for a project to archive developmental disabilities history from 2000-2018. This project archived over 750 documents, 25 interviews with disability advocates, and 120 stories about critical issues and developments.

After approval of Minnesota's Olmstead Plan in 2015, the Legislature provided Olmstead funding to assist in conducting research studies; increase community engagement activities with five racial and ethnic communities; assist in tracking Olmstead Plan results; provide assistance for the statewide Quality of Life study and provide historical archiving of resource materials used in developing and implementing the Olmstead Plan.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of copies of Council publications distributed and number of downloads from Council websites.	94,118	1.05 M	2008, 2017
Quality	Customer satisfaction	97%	98%	2011, 2017
Results	Increased independence, self-determination, productivity, integration and inclusion (IPSII)*	3.0-4.6	4.1-4.8	2011, 2017

*The DD ACT defines federal outcomes of increased independence (making decisions); self-determination (taking control of one's life); productivity (volunteering or working at a paid job); and integration and inclusion (being part of a community) for people with developmental disabilities. The above measures show the range of pre- and post-results for Council-sponsored training programs. The participants (trainees) assess themselves on a scale of 1-5 (5 being the highest) before and after the training to determine if the federal outcomes (IPSII) increased.

The legal authority for the Council is provided in the Developmental Disabilities Assistance and Bill of Rights Act (P.L. 106-402) and M.S. 16B.053 and M.S. 16B.054

Program: Government and Citizen Services

Activity: Fleet and Surplus Services

mn.gov/admin/government/vehicles/

mn.gov/admin/government/surplus-property/

AT A GLANCE

- Manage a fleet of approximately 2,055 vehicles
- Utilize vehicle telematics to increase safety, efficiency, and effectiveness of fleet management
- 88 percent of managed vehicles are capable of using alternative fuels and/or are hybrid vehicles
- Increased number of electric and hybrid vehicles from 56 in FY15 to 496 in FY18
- Increased fuel efficiency by 10 MPG, on average, for vehicle replacements since FY16
- Assist state and local governments with the distribution and disposal of surplus property
- Repurposed nearly 23,242 items through the Surplus Property Distribution Center in FY18
- Returned \$17 million to agencies from surplus property sales in FY18
- Sold 5,756 lots of property through the State Auction Program last year in FY18

PURPOSE & CONTEXT

Fleet and Surplus Services strives to ensure that state agencies have access to critical logistical services related to transportation and state and federal surplus property recapture and reuse or disposal.

Our Fleet Services unit provides safe, cost effective transportation solutions for official government business. We ensure a cost effective operation by tailoring services to actual agency usage. We monitor key data points such as mileage and fuel consumption in order to advise agencies on the best vehicle to meet their needs, how long vehicles should be kept, and other transportation options.

In addition, our green fleet choice initiative aims to reduce vehicle life-cycle costs and greenhouse gas emissions and petroleum consumption. We help agencies transition to “greener” vehicles through scheduled replacement of existing fleet inventory. Forty-six electric vehicle charging stations were added to admin parking facilities in FY17 to support state and public adoption of electric vehicles.

The Surplus Services unit provides assistance to state agencies and local governments to distribute surplus property in an environmentally and financially responsible manner. Additionally, we maximize the public investment in equipment through redistribution to other public entities or sale. We return approximately 90 percent of sale proceeds to the agencies that dispose of surplus property.

Our primary customers are state agencies, local governments, nonprofit organizations, and the public. Fleet Services is organized as an internal service fund and generates its revenue through the fleet vehicle leasing program. Surplus Services is an enterprise fund and generates its revenue through the resale of goods.

SERVICES PROVIDED

The work of Fleet and Surplus Services can be divided into two primary categories: Fleet Services and Surplus Services.

Specific services provided include: full service long-term vehicle rental program; vehicle maintenance service; fuel card program; statewide fleet reporting and information management system; telematics; agency assistance with vehicle utilization and lifecycle management; vehicle usage policy guidance, guidelines and procedures for the management and disposal of state surplus property; management of a surplus redistribution center for state and federal surplus property; live and online auction program; surplus exchange program; and storage services.

RESULTS

Measure (Quantity): Number of fuel efficient vehicles by Year. We measure fuel efficiency with a goal of reducing fossil fuels by utilizing alternative fuels and fuel efficient vehicles. Since 2015 we improved fuel efficiency by an average of 10 MPG on vehicle replacements.

Measure (Quantity): Number of online auction lots sold. MinnBid, our online auction site, is a cost-effective means to dispose of state surplus property. From 2013-2018, the number of items sold online increased 18%.

Type of Measure	MEASUREMENT GOAL	Previous	Current	Dates
Quality	Reduction of agency owned vehicles by converting to Admin leased vehicles. Controlling the life cycle of a vehicle is critical to safety, dependability, and cost effectiveness. Admin's leasing program provides a managed life cycle for vehicles to meet these three objectives. State agencies are converting agency owned vehicles to Admin leased vehicles for management and control of life cycles. Approximately 192 agency-owned vehicles were converted to lease vehicles in FY 17 and FY18. It is dependent on agency participation to convert remaining agency vehicles to lease vehicles during their vehicle replacement planning.	943	751 FY20 Goal is 500	2016, 2018
Quantity	Increase Surplus Services program active donee customer participation. Over 325 government entities and eligible non-profit organizations (donees) utilized the Surplus Services programs in FY18. Our goal is to bring awareness to the surplus property disposal and reuse programs and increase our donee and auction sales participation. We track the number of new active organizations participating in the Surplus Services re-purposing program with a goal of increasing participation by 7% over the next year.	320	436	2016, 2018

<i>Type of Measure</i>	<i>MEASUREMENT GOAL</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Increase the total number of electric/hybrid vehicles in Admin fleet. The Admin fleet currently has 496 electric and hybrid vehicles. Adding more energy and fuel efficient hybrid and electric vehicles as we replace current vehicles will help us meet our sustainability goals of reducing greenhouse gas emissions and petroleum consumption.	39	496	2016, 2018

M.S. 16B.24 (<https://www.revisor.mn.gov/statutes/?id=16B.24>) and M.S. 16B.54 (<https://www.revisor.mn.gov/statutes/?id=16B.54>) provides the legal authority for these programs.

Program: Government and Citizen Services

Activity: Data Practices Office

<https://mn.gov/admin/data-practices/>

AT A GLANCE

- Provides data practices and open meeting law technical assistance and in-person or webinar training to over 3,300 customers each year
- Maintains a website with data practices and open meetings informational pages and training materials, including 1,000 advisory opinions drafted on behalf of the Commissioner of Administration
- Issued 14 Advisory Opinions in FY 2018
- Hosted or attended 38 training or outreach events across the state in FY 2018
- Receives over 100,000 webpage views each year

PURPOSE & CONTEXT

The Data Practices Office is a statewide resource on Minnesota's data practices and open meeting laws. We help ensure government transparency and accountability by promoting compliance with those laws by issuing Advisory Opinions and by providing accurate and conveniently accessible information, participating in training, responding to technical inquiries received via telephone calls or emails, and maintaining an informational website and library of over 1,000 relevant Advisory Opinions.

We promote compliance with and understanding of these laws by providing technical consultation and training resources to state and local government, members of the public, the media, and the Legislature. This activity is primarily funded through a general fund appropriation.

SERVICES PROVIDED

Technical Assistance and Consultation

- Assist government, public, media, and legislative customers with questions about data practices and open meeting laws
- Informally resolve formal advisory opinion requests when possible

Training and Resource Development

- Develop resource materials (for example: model policies and guides)
- Present training on data practices and open meeting laws

Statutory Duties

- Assist the Commissioner of Administration by drafting advisory opinions
- Assist the Commissioner in handling requests for temporary classification of government data
- Provide services related to appeals of challenges to the accuracy and completeness of government data
- Review law enforcement agencies automated license plate reader audits

All of these functions help promote government accountability and efficiency by providing government entities with resources to ensure compliance with the laws and providing the public, media, and legislature with an understanding of their rights and implications of the laws.

RESULTS

Our performance measures show consistently high ratings for the usefulness of training and we remain committed to reaching even more people who need our help. We will continue to collect data and measure the success of training by having attendees rate their increase in knowledge about data practices and open meeting laws and whether they can utilize the information they receive at training in their day-to-day job tasks. We will work to maintain high numbers of customer contacts both through informal consultations (e.g. phone calls, emails, in-person meetings) and training events.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>

Program: Government and Citizen Services

Activity: Office of State Procurement

mn.gov/admin/osp

AT A GLANCE

- Oversee Minnesota state agency purchasing valued over \$2.3 billion in FY17 and \$2.5 billion in FY18
- Established the Office of Equity in Procurement (OEP) in FY16 to promote equity in contracting
- Manage about 2,300 contracts offering volume discounts to state agencies, counties, cities, and school districts in FY18
- Review about 7,100 professional/technical contract documents prepared by agencies annually
- Negotiate over \$21 million in contract savings for government entities in FY17 and FY18

PURPOSE & CONTEXT

The Office of State Procurement strives to achieve the best value for taxpayers through strategic contracting and purchasing of goods and services. We oversee and facilitate purchasing across the enterprise valued at over \$2 billion annually.

Our primary customers are state agencies, counties, cities, school districts, public health care facilities, the public, and vendors doing business with the state and competing for state contracts.

A general fund appropriation funds the contracting and purchasing services we provide to state agencies. Vendor-paid contract administration fees fund the services we provide to other government entities and health-related facilities.

SERVICES PROVIDED

The Office of State Procurement utilizes four key strategies to achieve best value in state procurement:

- Statewide procurement policy and process leadership
- Objective competitive vendor solicitations
- Contracting expertise
- Targeted procurement with small women, minority, disabled and veteran owned businesses toward eliminating contract disparities

Specific services provided include:

- Purchasing and contracting for goods, services, utilities, and construction;
- Promoting equity in contracting and environmentally responsible purchasing;
- Providing oversight of professional/technical contracts;
- Working with businesses to ensure fair and open competition;
- Managing procurement functions manually and through the Statewide Integrated Financial Tools (SWIFT);
- Monitoring compliance with state procurement law and policy;
- Conducting training for state agencies, vendors, and other customers;
- Operating a cooperative purchasing program for almost 1,400 local units of government; and
- Operating the Minnesota Multi-State Contracting Alliance for Pharmacy (MMCAP), a pharmaceutical/medical supplies purchasing program on behalf of thousands of participating facilities in all 50 states and the District of Columbia.

RESULTS

We use a variety of quantity, quality and result metrics to monitor our success.

**Performance Measure (Result of Program):
Dollars saved through our contract negotiations.**

In FY18 we tracked savings and cost avoidance of \$7.8 million, which is more than three times greater than our general fund appropriation of \$2.4 million for the same period.

**Performance Measure (Quality of Program):
Average time it takes to provide a legal review.**

Agencies need prompt turnaround on the nearly 7,100 contract documents they send us annually for compliance review. We measure our work quality by assessing the average time it takes to provide a legal review with the goal being less than 3 days.

Performance Measure (Quantity of Program): The number of local governments and healthcare facilities that use our contracts.

We track this measure because local governments and healthcare facilities can choose among a wide variety of purchasing programs and contract options that they determine provides the best value to their organization.

Program: Government and Citizen Services

Activity: Continuous Improvement

mn.gov/admin/continuous-improvement/

AT A GLANCE

- Worked with 96% of cabinet-level agencies on problem solving projects, consulting, or specialized training
- Implemented the second biennial CI Index, a survey tool that assists agencies in measuring whether their employees feel they have the tools and abilities to improve services and products
- Trained more than 480 managers in nearly every cabinet-level state agency in how to champion and lead continuous improvement efforts during FY17
- Facilitated the Governor's Better Government awards, reviewing a near-record 60 continuous improvement project nominations

PURPOSE & CONTEXT

The Minnesota Office of Continuous Improvement (MNCI) works with state agencies, boards, and commissions to improve Minnesota government operations, consistent with the Department of Administration's mission: to benefit all Minnesotans by leading innovation, creating solutions, and providing exceptional services. Local government and federal agency staff may also attend trainings.

MNCI's focus is on enterprise level improvements that have the greatest impact on services across state government. MNCI's goal: implement work that significantly and sustainably impacts the efficiency and effectiveness of government services for Minnesotans. This work helps prepare for and respond to challenges facing state government including:

- An aging state population
- Public pressure for greater accountability and transparency
- Increasing customer expectations, declining or static budgets
- Increasing employee retirement rate

This program is funded by the general fund.

SERVICES PROVIDED

Specific services provided to all cabinet-level agencies include:

- Providing innovation and continuous improvement training to all new state managers/supervisors
- Highlighting best practices and new practices in the public sector
- Leading training courses in how to implement (or use) continuous improvement, problem solving, and design thinking concepts, methodologies, and tools (state, county, and local government teams may attend)
- Working with agencies to help them utilize continuous improvement to achieve strategic goals
- Managing enterprise-wide projects from initial scoping through implementation
- Supporting state agency improvement projects with consulting and project management
- Facilitating the annual Governor's Continuous Improvement Awards

RESULTS

The chart above shows the percentage of respondents to the CI Index of cabinet agency staff at all levels who worked on improvement projects. Our goal is to create the culture for change within each agency.

The chart above shows the percentage of cabinet agencies with staff participating in the MNCI training. Our goal is to build a foundation for continuous improvement and create the capacity for change within each agency.

The chart above shows the impact of our training across the enterprise: how many respondents reported doing at least one of the following activities within the six months after their trainings:

- Used what I learned to analyze a problem in a new way
- Independently made an improvement to my individual work area or process
- Sponsored, led, facilitated, or co-facilitated an improvement effort

M.S. 16B (<https://www.revisor.mn.gov/statutes/?id=16b>) provides the statutory authority for this activity.

Program: Government and Citizen Services

Activity: Office of Grants Management

<https://mn.gov/admin/government/grants/>

AT A GLANCE

- Provide guidance to state grant making entities through the administration of 13 comprehensive grant policies to improve state grant-making
- Maintain two websites that provide information and assistance to grant-makers and grant-seekers
- Provide consultation and technical assistance for over 400 inquiries annually
- Our web-based resources received more than 65,000 visits in the last year

PURPOSE & CONTEXT

The Office of Grants Management (OGM) provides policy leadership and direction to promote consistent grants administration between state agencies, funders, and grantees. This increases access to state grant opportunities and state grants policies and leads to greater program accountability and transparency.

Overtime, OGM has also been assigned responsibility for administering certain public broadcasting and other legislatively named grants. The number of grants administered by OGM has increased from 19 in 2009 to 90 today. The agency received administrative funding for 37 grants. Although we strive best practice grants administration to all grantees, oversight for some grants is necessarily limited to basic compliance.

Our primary customers are state and local government, nonprofit organizations, private foundations, and citizens. This activity is funded through the general fund.

SERVICES PROVIDED

We provide the following services to promote more efficient and effective management of state grants and to provide access to state-wide grant opportunities:

- Policy development and state grants leadership
- Training, consulting, and development
- Technical assistance

Specific services include: develop, enhance, and revise state grants management policies to create greater oversight, consistency, and transparency for state grant expenditures; develop policies that promote equity and inclusion in grantee selection; convene governance committee to provide guidance and promote cooperation between state agencies, grantees, and community partners; create and share information and resources about best practices in state grants management through in-person and web-based training, presentations, and consulting; and provide and manage two informational websites that provide a complete listing of state grant opportunities and resources for grant-makers. OGM is also a granting agency and provides grant administration for a \$25.8 million portfolio (\$5.6 million from the general fund and \$20.1 million from the Arts and Cultural Heritage Fund for the FY18/19 biennium) representing 37 grantees.

Program: Government and Citizen Services

Activity: State Archaeologist

<https://mn.gov/admin/archaeologist/>

AT A GLANCE

- Oversees and licenses archaeological work on Minnesota's public (non-federal) land
- Maintains files for all recorded archaeological sites in Minnesota
- Works closely with the Indian Affairs Council to preserve American Indian cemeteries and archaeological sites
- Records archaeological sites and un-platted cemeteries, and recovers human remains
- Fosters collaboration between professional archaeologists, tribal communities, governmental agencies, and the public

PURPOSE & CONTEXT

The Office of the State Archaeologist (OSA) is the enterprise archaeology function. With 2 FTEs, we strive to preserve archaeological sites and un-platted burials, encourage communication between state agencies, foster collaboration between the archaeological and tribal communities, and promote archaeological research and education in Minnesota. We work with developers, tribal representatives, governmental agencies, and the public to preserve, protect, and interpret our archaeological resources. Other agencies also employ in-house archaeologists in order to comply with state and federal law and meet their agency missions.

Our primary customers are landowners, state and local governments, developers, tribal communities, professional archaeologists, students, and the public. The office is funded by the general fund.

SERVICES PROVIDED

The OSA works closely with the Indian Affairs Council, State Historic Preservation Office, tribal representatives, professional and amateur archaeologists, and agencies to discuss proposed development projects, un-platted cemetery sites, and the future of archaeology in Minnesota.

The OSA serves Minnesota by:

- Promoting collaboration between cultural resource professionals, state and local agencies, and tribal representatives, by answering questions, giving presentations, and providing cultural resource-related training opportunities
- Compiling and maintaining up-to-date information on recorded archaeological sites and un-platted cemeteries in the site files and via the internet on the OSA Portal
- Educating the public about cultural resources by meeting with individuals, answering questions, giving public presentations, and organizing Minnesota Archaeology Month
- Facilitating research activities by prioritizing, promoting, and managing the Legacy-funded Statewide Survey of Historical and Archaeological Sites
- Reviewing development plans to limit harm to archaeological sites and cemeteries cost-effectively and efficiently
- Evaluating professional qualifications and licenses of professionals working on public lands

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Development projects reviewed during the planning stages	101	203	2016, 2017

Program: Government and Citizen Services

Activity: Facilities Management

mn.gov/admin/government/buildings-grounds

AT A GLANCE

- Maintain 4.7 million square feet of office, laboratory, ceremonial, meeting, and other space in 23 buildings, including State Capitol building public spaces
- Maintain the grounds of the 140 acre Capitol Complex
- Maintain 25 monuments and memorials
- Operate and maintain over 600 parking stalls in 31 facilities
- Issue 450 special event permits annually
- Processed 17 million pieces of mail and achieved \$1.7 million in postage savings in FY18
- Serve over 45,000 Minnesota Bookstore customers
- Reduced energy consumption by 21 percent from 2008 to 2018 even while building portfolio and occupancy increased.
- Oversee a 'Toward Zero Waste' recycling program.

PURPOSE & CONTEXT

Facilities Management's (FMD) maintains facilities and grounds on the State Capitol Complex and other select locations in the State of Minnesota while keeping lease and parking rates low. We seek innovative solutions for parking asset management and to ensure sustainability through energy management and environmental stewardship. FMD operates as an internal service fund with revenue generated from building lease rates charged to state agencies, the in-lieu-of-rent appropriation, and other tenants. Revenue also comes from central mail postage rates, parking fees, and bookstore sales. There is a general fund appropriation for processing federal mail and for interagency mail delivery.

Additionally, our mail processing, publishing and distribution services through Central Mail and Minnesota's Bookstore provide cost-effective solutions critical to state agency functions. Our publication of the State Register provides the public a convenient way to find critical state information.

Our primary customers are state agencies and their customers, state employees, the Governor's Office, the Legislature, and visitors to the Capitol Complex. Minnesota's Bookstore serves state and local governments, school districts, and higher education entities.

SERVICES PROVIDED

FMD provides services in four primary categories:

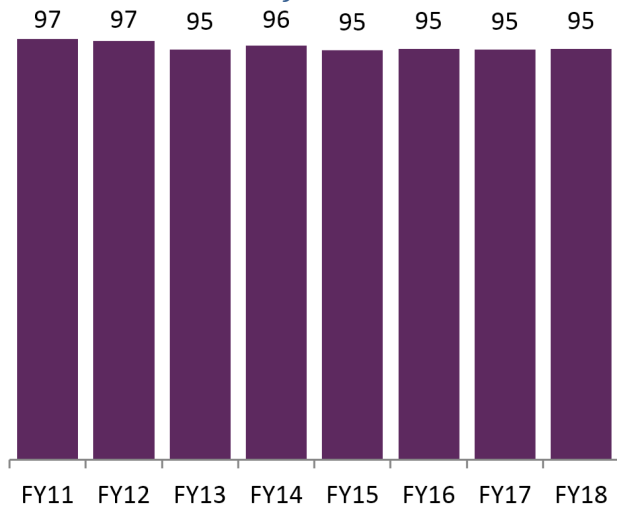

- Facilities
- Parking and alternative transportation
- Grounds
- Centralized mail service for agencies located in St. Paul

Specific services provided include: provide clean, safe, and environmentally-sound facilities; energy management; recycling; event permitting and coordination; Capitol Complex food service oversight; maintenance of green spaces including monuments and memorials; process federal and inter-office mail for state agencies; maintain and manage parking facilities; and publish the State Register.

RESULTS

We measure performance in multiple ways including: customer satisfaction, service disruptions, work completion rates, recycling rates, energy consumption, and carbon reduction. We also continually monitor the conditions of the buildings we manage by conducting annual facility condition audits.

Result: Customer Satisfaction

Customer Satisfaction: Data is taken from Building Occupant Annual Survey results. The percentage identifies consistently high tenant satisfaction with Admin managed facilities.

Quality: Work Order Completion Percentage

Best Value: Percentage of work orders completed on-time statistics show improved timeliness of work order completions.

Quality: FMD-caused Service Disruptions

Best Value: Our goal is to have zero FMD caused-service disruptions. A service disruption is any change or interruption in a building service such as heating, cooling, plumbing, or electrical service that degrades an occupant's ability to accomplish their mission.

Result: Sustainability

Sustainability: Although we have exceeded the state's recycling goal of 75% by 2030, we will strive to improve on our current rate of 78% as of CY 2017.

Result: Capitol Complex Annual Energy Use (MMBTU) and CO2e Emissions (Tons)

Sustainability: All Capitol Complex energy sources for all facilities in millions of British Thermal Units (MMBTUs). The current energy reduction of 21% has been normalized for weather.

M.S. 16B.24-28 (<https://www.revisor.mn.gov/statutes/?id=16B>) provides the legal authority for Facilities Management Division's services.

Program: Government & Citizen Services
Activity: Real Estate & Construction Services

mn.gov/admin/government/real-estate/

mn.gov/admin/government/construction-projects/

AT A GLANCE

- Managed 850 non-state-owned and state-owned real property leases in FY18
- Leased 3.8 million useable square feet of non-state-owned space at an annual cost of \$70 million
- Managed over 280 construction projects for state-owned facilities in FY18
- Oversaw \$117 million in capital appropriations in FY18.

PURPOSE & CONTEXT

Real Estate and Construction Services delivers project management and leasing services to achieve facility solutions that help state agencies deliver efficient and effective services. Through development of building sustainability guidelines in partnership with the Department of Commerce and the University of Minnesota, our construction services team increases sustainability standards in buildings constructed or renovated with state funds.

Additionally, by utilizing statutory contracting preferences, subcontracting goals, and sheltered market contracts, we are increasing the participation of women, minority, disabled, and veteran-owned small businesses in public construction projects.

Our effective lease negotiations ensure that agencies receive competitive rates in the market. We also help agencies get the most functionality and efficiency from their space through implementation of space standards and oversight of space lease terms and conditions.

Our activities are primarily funded through general fund and capital appropriations.

SERVICES PROVIDED

Construction

- Project management of new, remodel, and asset preservation building projects
- Management of capital asset preservation and replacement funds
- Management of predesign program
- Capital improvement planning
- Management and oversight of the Minnesota Sustainable Building Guidelines and Benchmarking Tool

Real Estate

- Acquiring and selling real property
- Coordination of transfers of real property between agencies
- Space utilization services for efficient facility management
- Negotiation and drafting of easements and permits

Leasing

- Negotiation and drafting of lease documents
- Management of state-owned and non-state-owned real property leases

RESULTS

Performance Measure (Result of the Program): Key performance areas include: 1) Diversity and Inclusion; 2) Sustainability and, 3) Best Value.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quality	Achieve at or below market rental rates for all office / warehouse lease renewals and new leases	100%	100%	FY2017, FY2018
Quality	Incorporate at least one new sustainability measure into all lease renewals and new leases	0%	100%	FY2017, FY2018
Quantity	Review Capital Improvement projects to determine if eligible for a limited bid to qualified TGBs (Targeted Group Businesses)	0%	Implemented for 100% of projects	FY2017, FY2018
Quantity	Send 10% or more of professional / technical services solicitations to Targeted Group vendors	0%	Implemented for 100% of solicitations	FY2017, FY2018

Program: Government and Citizen Services

Activity: Enterprise Real Property Program

mn.gov/admin

AT A GLANCE

- Manages data for approximately 6,000 state owned buildings consisting of more than 36 million square feet, and more than 3.1 million acres of land
- Preserves a catalog of floorplans for more than 87% of state-owned space
- Performs standardized and consistent Facility Condition Assessments on 80% of state owned space
- Tracks approximately 125,000 maintenance and work orders annually for state facilities
- Manages and tracks more than 850 active leases
- Inventories more than 78,000 facility-supporting assets and equipment
- Facilitates employee relocations that will allow for the most effective use of space

PURPOSE & CONTEXT

Enterprise Real Property provides the tools and information necessary for data-driven facility investment and management across state government.

By leading collaboration and data analysis among the 19 state agencies that maintain state-owned property, we help operate state facilities more cost-effectively. Our consistent real-time data also allows policymakers the opportunity to understand a space's condition, occupancy, how it is used, operated, and maintained.

The Enterprise Real Property Program, Archibus, consolidates data from 19 agencies that maintain state-owned property into one database and one application. We utilize this data to standardize real property management across state government. We direct collaborative efforts for developing and establishing policies, procedures, consistent standards, and guidelines for operating, sustaining, and managing the state's real property portfolio. This data is also used to help determine state asset preservation funding needs and the fiscal impact of deferring needed facility maintenance.

Our system modules track space management, building operations, Facility Condition Assessments, employee moves, project management, asset management, and lease management to manage the state's real property.

SERVICES PROVIDED

Services provided include:

- Data management
- Maintaining standards, policies, and processes to ensure consistency
- User training to maximize program results
- Maintain functionality of existing technology
- Research new technologies to leverage data and optimize operations
- Application installations and new technology implementations
- Implementation of agency work plans and agency consultation
- Issue resolution and system fixes within staff expertise
- System enhancements for functionality
- Manage implementation of real property system upgrades
- Create enterprise-level facility reports and assist agencies with specific reports

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Active facilities personnel using system	423	1,554	2011, 2018
Quantity	Number of work orders	96	215	2012, 2018
Quantity	Number of data applications	4	9	2011, 2016
Quality	Percentage of agencies that have trained Facility Condition Assessment assessors	79%	89%	2013, 2016

The Enterprise Real Property Program support and maintain compliance with Minnesota Statutes:

Program: Government and Citizen Services**Activity: Risk Management**mn.gov/admin/risk**AT A GLANCE**

- Provide cost-effective management of the state's property, auto, general liability and workers' compensation self-insurance program
- Insure \$16.5 billion in state property and 13,616 vehicles for auto liability
- Manage 3,500 new liability, property and workers' compensation claims annually
- Cover over 60,000 employees in the executive, legislative, and judicial branches of state government, the Minnesota State Colleges and Universities, and quasi-state agencies such as the Minnesota Zoo
- Lead MnSAFE, the statewide injury reduction effort, which has helped prevent more than 2,500 injuries to state employees
- Provide \$1 million Disaster Management Services coverage for natural and man-made disasters on state owned or leased properties that result in 3 or more critical injuries – services include counseling, victim assistance, behavioral health and communications management

PURPOSE & CONTEXT

The Risk Management Division serves as the state's insurance expert by providing risk management advice and property, liability, and workers' compensation insurance services to all of Minnesota state government, quasi-state agencies, and the Minnesota State Colleges and Universities.

We help our customers understand their operational risks and maintain financial stability through insurance or the use of other risk management strategies. In addition, we help state agencies develop and promote a safe, productive workplace that helps protect state employees and state resources. We deliver comprehensive, cost-effective property, liability, and workers compensation services through proactive and innovative risk, loss-control, and claims management practices. The Workers' Compensation Program operates as a special revenue fund and the Property and Casualty Program operates as an internal service fund.

SERVICES PROVIDED

Risk Management helps state agencies and employees return to serving Minnesota citizens following unexpected events or accidents.

The services provided by Risk Management include:

- Advising customers about how to best control operational and contractual risks
- Helping customers acquire cost specialty insurance coverage when self-insuring the risk is not cost-effective
- Protecting state property and the public through loss control efforts
- Preventing injuries to employees and providing benefits when injuries occur that are work related
- Returning employees to work as soon as possible following workplace injuries
- Resolving property damage and injuries to the public caused by our customers
- Repairing our customers' damaged property and vehicles

RESULTS

Performance Measure (Result of the Program): The number of workplace injuries is declining

Performance Measure (Result of the Program): The number of lost time injury claims is declining

Performance Measure (Quality of the program): To ensure cost effective services, we routinely compare our costs with those of private and public employers. Our workers' compensation cost per every \$100 of payroll is less than that of other Minnesota employers.

Performance Measure (Quality of the Program): We strive to keep our administrative expenses low and measure our costs annually against insurance market averages. Our property and casualty operating expenses are less than the average insurance industry operating costs.

M.S. 16B.85 (<https://www.revisor.mn.gov/statutes/?id=16B.85>) and M.S. 176.541 (<https://www.revisor.mn.gov/statutes/?id=176.541>) provide the legal authority for Administration’s Risk Management Division.

Program: Government and Citizen Services

Activity: Small Agency Resource Team (SmART)

mn.gov/admin/government/small-agency/

AT A GLANCE

- Serves 20 diverse agencies, boards, and councils
- Financial guidance for budgets totaling \$76 million in FY18
- Human resource services for approximately 300 employees in FY18

PURPOSE & CONTEXT

The Small Agency Resource Team (SmART) provides accounting, budgeting, and human resources services to small agencies, boards, and councils. SmART agencies retain ultimate human resource, financial and budget decision making authority.

Staff learn the needs of state agency customers being served and provide expert technical knowledge of policies, procedures, and best practices to help customers maximize their effectiveness. We eliminate the need for these agencies, boards, and councils to hire dedicated administrative staff to handle transactional functions so that they can focus on delivering their core missions. Through SmART's work, customers more accurately and easily navigate the complexities of performing state government financial and human resources functions.

Our program is required by statute to serve the state's three ethnic councils, the Indian Affairs Council, and the Minnesota Council on Disability. By directing resources to these entities, they are able to dedicate their resources to supporting the state's goals surrounding diversity and inclusion in public programs and services. Currently, we serve 15 additional agency customers ranging from the Minnesota Racing Commission to the Minnesota Department of Human Rights. This work is supported by a combination of general fund resources and pay agreements. Under either funding source, SmART delivers high value services at a lower cost than hiring administrative staff for each program.

SERVICES PROVIDED

SmART provides customers with the financial and human resources information and services they need to operate effectively and efficiently:

Financial Management

- Budget support
- Biennial budget guidance and entry
- Fiscal note assistance and processing
- Budget entries
- Processing of purchase orders, professional/technical contracts, grant contracts, inter-agency agreements annual plans and employee business/travel reimbursements
- Payment processing
- Deposits
- Reporting
- Training

Human Resources

- Affirmative action planning
- Payroll services
- Personnel transactions entries
- Benefits administration
- Performance management and labor relations
- Classification and compensation analysis
- Vacancy filling
- Reporting
- Training

Program: Government and Citizen Services

Activity: State Assistive Technology (STAR) & State Accommodation Reimbursement

mn.gov/star

AT A GLANCE

During FY18, STAR provided:

- 187 long-term loans of assistive technology that saved Minnesotans with disabilities \$351,997
- 702 short-term loans of assistive technology for trial or temporary use
- 203 demonstrations of assistive technology
- Facilitated a cross-agency collaboration to create [Minnesota's Guide to Assistive Technology](#)

During FY18, the State Accommodation Reimbursement Fund approved:

- 112 accommodation reimbursement requests from 13 State Agencies totaling \$143,691

PURPOSE & CONTEXT

STAR is Minnesota's Assistive Technology Act program and is 100% federally funded.

We help Minnesotans of all ages who have disabilities find and get the assistive technology (AT) they need to function more independently at home, school, work, and in their communities. AT can be any item or product that helps an individual with a disability perform a task. Examples of assistive technology include, communication devices, handheld magnifiers, software that reads text aloud, assistive listening devices, adapted eating utensils, and grab bars.

STAR also administers the State's Accommodation Reimbursement Fund which was approved during the 2015 legislative session to provide support to applicants with disabilities applying for state jobs and to provide a more inclusive workplace for current state employees with disabilities.

SERVICES PROVIDED

STAR provides the following **free** services to Minnesotans with disabilities so they may function more independently at home, school, work, and in their communities:

- Device loans
- Device demonstrations
- Information and Assistance
- Public awareness

We also provide technical assistance and training to state agencies.

Demonstrations and short-term loans (30-days or less) help Minnesotans better understand product features and gain hands-on experience with assistive technology before selecting and buying a device. STAR's services minimize the possibility that Minnesotans will buy an item that doesn't meet their needs. Minnesotans may also borrow AT to use while waiting to receive a new device or while their device is being repaired. Long-term loans allow Minnesotans to borrow older devices for as long as needed to use in school, at work or for essential daily living needs.

The Minnesota Department of Administration (Admin) is authorized to reimburse up to 50% of the cost of expenses incurred by the Executive Branch for reasonable accommodations.

RESULTS

In addition to providing 120 short-term device loans for temporary use, STAR loaned 582 devices for short-term trial during FY18. Below is the percentage of borrowers who were able to determine if a device would meet their needs based on their experience during the loan period.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Result	Percentage of device loans that resulted in borrowers determining if AT would meet their <u>educational</u> needs	98.21% (112 loans)	95.11% (348 loans)	2017, 2018
Result	Percentage of device loans that resulted in borrowers determining if AT would meet their <u>employment</u> needs	100% (17 loans)	97.22% (36 loans)	2017, 2018
Result	Percentage of device loans that resulted in borrowers determining if AT would meet their <u>community living needs</u>	97.69% (131 loans)	96.95% (198 loans)	2017, 2018

Agencies submitted the following number of requests for reimbursement.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Result	One-time expenses (e.g., assistive technology) for a state employee that totals more than \$1,000.	4	9	2017, 2018
Result	Expenses for current state employee for services provided on a periodic or ongoing basis (e.g., American Sign Language interpreter)	104	101	2017, 2018
Result	Combination of one-time expenses and services for current state employee	1	1	2017, 2018
Result	Number of individual job applicants agencies submitted expenses for reimbursement from the Accommodation Fund	5	1	2017, 2018

(PL 108-364) (<http://www.gpo.gov/fdsys/pkg/PLAW-108publ364/html/PLAW-108publ364.htm>) and also authorized in M.S. 16B.055 (www.revisor.mn.gov/statutes/?id=16B.055). The State Accommodation Reimbursement Fund is authorized in M.S. 16B.4805 (<https://www.revisor.mn.gov/statutes/cite/16B.4805>)

Program: Government and Citizen Services

Activity: State Demographer

mn.gov/admin/demography/

AT A GLANCE

- Act as a liaison to the U.S. Census Bureau to ensure a complete and accurate Census count
- Prepare estimates of people and households for all counties, cities, and townships in the state
- Produce updated data projections about people by age and gender for Minnesota, its Economic Development Regions, and all counties — to guide planning in the coming decades
- Provided data to state agencies, local government, the Legislature, businesses, nonprofits, researchers, and others on 428 occasions in FY18
- Delivered 95 presentations about critical issues, reaching 6,500 listeners in FY18

PURPOSE & CONTEXT

The MN State Demographic Center, a part of the Community Services Division, plays a lead role in coordinating Minnesota's Decennial Census response and assists state and local leaders in making informed decisions by providing timely and reliable demographic information. We help leaders locate and understand the best data available so that they can match their policies and programs to the state's ever-changing needs and be wise stewards of their resources.

Our assistance helps legislators anticipate and plan for the future, helps state government and nonprofit leaders understand and serve their clients, aides business in understanding their markets and workforce, and helps media raise awareness to key issues shaping our state.

SERVICES PROVIDED

The work of the State Demographer's Office can be divided into three broad categories:

- Facilitate Minnesota's 2020 Census Complete Count Committee and support the independent efforts of local governments and non-governmental entities to champion the Census
- Data production and Data analysis
 - Prepare annual estimates of the number of people and households in all counties, cities, and townships in the state to assist with planning and distributing resources
 - Create projections of the population and labor force by age, gender, race, and location to plan for impacts to the state budget, economy, and services in the coming decades
 - Produce new data for Minnesota's unique needs and populations — such as on our immigrant groups and languages spoken in Minnesota homes, moving patterns of people by education and income, and different age patterns among Minnesota's communities
- Public awareness
 - Convene state-level Census Complete Count Committee to plan and implement promotional and engagement strategies for Minnesota
 - Support cities and counties to do their own census promotion and engagement for the Census
 - Work with the U.S. Census Bureau and local grant-making and non-profit leaders to create a Minnesota-specific Census plan

RESULTS

Program: Government and Citizen Services

Activity: State Historic Preservation Office

mn.gov/admin/shpo

AT A GLANCE

- There are 1,707 National Register of Historic Places properties in Minnesota. In FY17, the State Historic Preservation Review Board nominated 13 properties to the Register
- SHPO reviewed 3,822 federal and 307 state projects to protect historic and cultural resources during FY17
- In FY17, the total estimated economic impact of the Minnesota Historic Rehabilitation Tax Credit was \$66.4 million and an estimated 285 full-time jobs were created
- Supports the work of 44 Certified Local Governments who have agreed to conduct preservation activities based on federal and state standards and practices

PURPOSE & CONTEXT

The State Historic Preservation Office (SHPO) administers federal and state programs aimed at preserving historic and cultural resources important to all Minnesotans. The SHPO was transferred to the Department of Administration on March 1, 2018 as a result of 2017 legislation, prior to this the SHPO was part of the Minnesota Historical Society.

The SHPO, as outlined in the National Historic Preservation Act of 1966, plays a lead role in identifying, evaluating, and registering historic properties; administering federal and state historic rehabilitation tax credits; consulting with federal and state agencies to ensure historic properties are taken into consideration at all levels of planning and development; and advising and assisting federal and state agencies and local governments in carrying out historic preservation responsibilities.

The SHPO is also responsible for creating and implementing a comprehensive statewide historic preservation plan. To develop the comprehensive plan, the SHPO partners with federal, state and local agencies, local Heritage Preservation Commissions, Tribal Historic Preservation Offices, tribal communities, professional organizations, nonprofit and preservation groups, owners and developers of historic properties, and county and local historical organizations. SHPO activities are generally funded through the federal Historic Preservation Fund (HPF), state general fund appropriation, and Historic Rehabilitation Tax Credit funds.

SERVICES PROVIDED

The State Historic Preservation Office provides services in the following program areas:

- Statewide Historic Preservation Planning
- Disaster Planning for Historic Resources
- National Register of Historic Places
- Environmental Review Program for Both Federal and State Projects
- Federal and State Historic Rehabilitation Tax Credit Programs
- Certified Local Government Program, Including Grants to Heritage Preservation Commissions
- Statewide Survey and Inventory Program for Historic and Cultural Resources
- Education, Training, and Technical Assistance
- Historic Preservation Easements and Covenants

RESULTS

SHPO was moved to the Department of Administration in March, 2018 and continues reporting program results as stipulated by the National Park Service. A division work planning process is underway with goal setting that addresses the organizational transition into state government.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>

Program: Strategic Management Services

Activity: Executive Leadership/Partnerships

<https://mn.gov/admin/about/who-we-are/commissioners-office.jsp>

AT A GLANCE

- Provide executive leadership to the agency
- Establish and lead implementation of agency strategic vision to implement statutory responsibilities and meet the needs of Minnesotans
- Ensure a safe, inclusive, and productive work environment
- Leadership of statewide efforts on sustainability
- State Historic Preservation Officer
- Agency-wide executive, legislative, and public communications and transparency

PURPOSE & CONTEXT

Executive Leadership and Partnerships drives the agency mission, vision, and values. Providing leadership and strategic direction across the agency we set aggressive goals, expect a high level of customer service, and hold ourselves and the agency accountable. We oversee and manage the administrative functions of other executive branch state agencies, including their purchasing and contracting, facilities management and more. We also manage strategic planning efforts for the state and investigate and study the management of state agencies, reorganizing them when necessary to ensure effective and efficient operations.

SERVICES PROVIDED

Executive Leadership

- Executive Management Support
- Internal and External Communications
- Data Practices Compliance
- Website Management

Partnerships

- Intra-agency and inter-agency coordination
- Legislative Coordination
- Media Relations
- Continuity of Operations – Emergency Preparedness
- Enterprise Sustainability

Program: Strategic Management Services

Activity: Financial Management and Reporting

<https://mn.gov/admin/about/contact-us/fmr.jsp>

AT A GLANCE

- Financial management, accounting, and purchasing support of the agency's \$217 million expenditures in FY17
- Produce more than 75 monthly, quarterly, and annual financial statements each year
- Serve each of the agency's 19 divisions
- Support the financial management and accounting needs of 17 SmART agencies
- Coordinate internal control activities

PURPOSE & CONTEXT

Financial Management and Reporting (FMR) provides administrative services within the agency, overseeing strategic and operational planning, performance management, financial management, internal controls, and budget planning.

SERVICES PROVIDED

FMR serves as the agency's financial liaisons and consultants conforming to Generally Accepted Accounting Principles (GAAP). Fiscally responsible utilization of available resources, as governed by applicable laws, policies, and procedures, are achieved through effective financial management. FMR provides the following agency services:

- Annual, biennial, capital, and supplemental budget preparation
- Purchasing
- Transaction review and approval
- Financial reporting
- Internal control coordination
- Financial statement preparation for proprietary funds
- Billing and accounts receivable management
- Cash and asset management
- Business plan and rate review oversight
- Fiscal note management
- Policy and procedure development and training (e.g. training new managers on travel policies and expense reimbursement)
- Financial analysis
- Accounts payable
- SWIFT security management
- Assurance review
- Financial verification
- State accounting system coordination, implementation, and maintenance

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Result	Agency prompt payment: Percent of valid obligations to vendors within the vendor's early discount period, or in the absence of a stated period, within 30 days following receipt of the invoice for the completed delivery of the product or service.	98.02%	97.67%	2017, 2018
Result	Customer satisfaction: Percent of agency and SmART agency managers who receive financial training in first quarter of their tenure	100%	100%	2017, 2018
Result	Employee engagement: Percent of FMR staff who engage in at least four hours of professional development per quarter	100%	100%	2017, 2018

M.S. 16A.124 (<https://www.revisor.mn.gov/statutes/cite/16A.124>) describes agency's goals for prompt payment of vendors.

Program: Strategic Management Services

Activity: Human Resources

mn.gov/admin/employees/hr/

AT A GLANCE

- 292 vacancies filled for customers, including the Departments of Administration, Minnesota Management and Budget, Human Rights and small agencies in fiscal year 2018
- 95% of labor grievances for fiscal years 2017 and 2018 were resolved without arbitration
- 4,181 total transactions processed for fiscal year 2018
- In 2018, established Administration's Joint Labor-Management Committee to help maintain open communication between employees and management concerning safety and health.
- More than 200 FMLA requests processed per year
- Provide services for 1,130 employees, supervisors, and managers

PURPOSE & CONTEXT

The Human Resources Division provides human resources services to the employees, prospective employees, and management of the Department of Administration, Minnesota Management and Budget, Department of Human Rights, and SmART Agencies, Boards and Commissions, by actively recruiting, hiring, developing, and retaining a productive, diverse, and highly competent workforce. The division's work is subject to compliance with federal and state law as well as internal policies and procedures.

SERVICES PROVIDED

The Human Resources Division provides the following services:

- Recruitment and staffing
- Fringe benefits enrollment and administration
- Labor contract administration and employee relations
- Employee training and develop
- Bi-weekly payroll processing
- Performance management
- Compensation/wage administration
- Worker's compensation administration
- Safety administration, including Occupational Safety and Health Administration (OSHA) compliance and general safety and wellness program administration
- Consultation on human resources management issues

Program: Strategic Management Services

Activity: School Trust Lands

AT A GLANCE

- Developed first School Trust Land Strategic Plan 2018-2028, available at <https://mn.gov/school-trust-lands/projects/strategic-planning/>
- Completed school trust land asset evaluation of 2.5 million acres with an estimated market value of \$1.9 billion in real estate value alone
- Initiated research and analysis projects related to school trust land management costs and accounting structures, and future economic opportunities on school trust lands
- Presentations to numerous stakeholder and beneficiary groups on the history of school trust lands, benefits of school trust lands to public education, and future management plans

PURPOSE & CONTEXT

The 2012 legislature established the purpose for the School Trust Lands Director/Office of School Trust Lands in Minn. Stat. sec. 127A. 351. The School Trust Lands Director is to “recommend management policies for Minnesota’s school trust lands in accordance with the provisions of the Minnesota Constitution, Article XI, Section 8.”

During the strategic planning project the Office of School Trust Lands created the following mission statement **“Advocate for sustainable asset management strategies that maximize revenue for Minnesota’s public schools.”** The Office of School Trust Lands and School Trust Lands Director serves as a co-trustee by advising the executive and legislative branches with respect to legislative initiatives and management policies. The School Trust Lands Director also acts as a liaison for school trust beneficiary representatives and beneficiary stakeholder groups.

SERVICES PROVIDED

- Established strategic plans and goals for future management of school trust lands. Reviewed and made recommendations on management proposals and legislation to ensure the long-term best interests of school trust land beneficiaries were being met. Researched and analyzed current management structures in an effort to maximize current revenues without negatively impacting future economic opportunities.
- Developed and initiated implementation of School Trust Strategic Plan. Valuation analysis of 2.5 million acres of school trust lands. Project-specific analysis of proposals involving school trust land assets. BWCAW (Boundary Waters Canoe Area Wilderness) project management and recommendations to resolve 40-year management issue with the USDA Forest Service.
- Advised the Permanent School Fund Commission and the Legislature on various legislative initiatives that could affect school trust land management.
- Advised the Department of Natural Resources on management of school trust timber resources in the Sustainable Timber Harvest Analysis.
- Collaborated with the Department of Natural Resources to create an Operating Agreement between the Office of School Trust Lands and the DNR.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>

Program: Fiscal Agent
Activity: Public Broadcasting

mn.gov/admin

AT A GLANCE

- Administered and managed 25 public broadcasting general fund grant contracts in FY18
- Administered and managed 45 arts and cultural heritage fund grant contracts to public broadcasting stations in FY18
- Conducted 55 financial reconciliations and monitoring visits with grantees in FY18

PURPOSE & CONTEXT

The fiscal agent function ensures that grants and other special funding received through specific appropriations are distributed and managed according to all applicable laws, statutes, policies, and procedures. Administration of these funds allows us to provide value to the recipients and public by ensuring resources are used as intended.

The fiscal agent function serves a variety of entities representing public television and radio; arts and cultural heritage fund grantees representing museums, zoos, small theatres and local government; and other funds appropriated by the legislature.

SERVICES PROVIDED

The fiscal agent function oversees funding for:

- Administered and managed 25 public broadcasting general fund grant contracts to 24 grantees in FY18
 - 24 Grants to public broadcasting stations (M.S. 129D.11-16)
 - One Grant to Pioneer Public Television per Minnesota Laws, 2017, First Special Session, Chapter 8, Article 1, Section 11, Subdivision 4, to purchase equipment for a newly constructed facility
- Administered and managed 45 arts and cultural heritage fund grant contracts to public broadcasting entities (M.S. 129D 17-19)
- Conducted 45 financial reconciliations and site visits with public broadcasting grantees in FY18

Specific services provided include: administer grants and ensure state grant policies and procedures are followed; provide consultation and technical assistance to grantees; conduct focus groups with grantees to improve effectiveness; and maintain information on the state's Legacy website (<https://www.legacy.mn.gov/>).

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Percent of required reports from grantees received in a timely manner	96%	100%	2016, 2018

Program: Fiscal Agent
Activity: In Lieu of Rent (ILR)

AT A GLANCE

- Used to fund the space costs of the: the legislature, veterans' organizations, and ceremonial space on the Capitol Complex
- ILR funded space is billed in the same manner, and at the same rate per square foot, as other tenant-occupied space in the same buildings.

PURPOSE & CONTEXT

The In Lieu of Rent (ILR) appropriation is essential to the proper stewardship and operation of buildings that are integral to the State's democratic process, as well as offices that provide support and advocacy on behalf of Minnesota's veterans and vocational opportunities for the blind. ILR is used to fund space costs of the legislature, veterans' organizations, ceremonial space, the capitol grounds, and statutorily free space. Rent is funded by ILR in areas that are either ceremonial or where occupants do not directly pay rent. More specifically, the ILR appropriation covers rent for:

- **Ceremonial Space** – space in the Capitol Building such as the Rotunda, Governor's Residence, ceremonial grounds, and monuments/memorials in the Capitol area.
- **State Services for the Blind** – Space occupied by State Services for the Blind to operate vending operations and convenience stores at eleven sites (M.S. 248.07 Subd. 7).
- **Rent Waived** – Space in the State Capitol Building, the State Office Building, or Veterans Service Building that is occupied by the House of Representatives, Senate, Revisor of Statutes, Legislative Reference Library, and Congressionally-chartered veterans' organizations (M.S. 197.55 – 197.58). The newly created public areas in the restored Capitol are also included in this area.

The core of state government is located in buildings on or near the State Capitol Complex, including the entire Legislative Branch, the Supreme Court and Court of Appeals, most Executive branch functions, and state employees. In general, the funding required to operate and maintain state-owned buildings in the Capitol Complex comes through rents paid from the operating budgets of the state government entities that occupy that space. Lease rates are determined by the Commissioner of Administration and approved by the Commissioner of Minnesota Management and Budget. In contrast, the costs to operate and maintain certain legislative and other space defined in law is funded by ILR which is a direct appropriation to the Commissioner of Administration. ILR funded space is billed in the same manner, and at the same rate per square foot, as other tenant-occupied space in the same buildings.

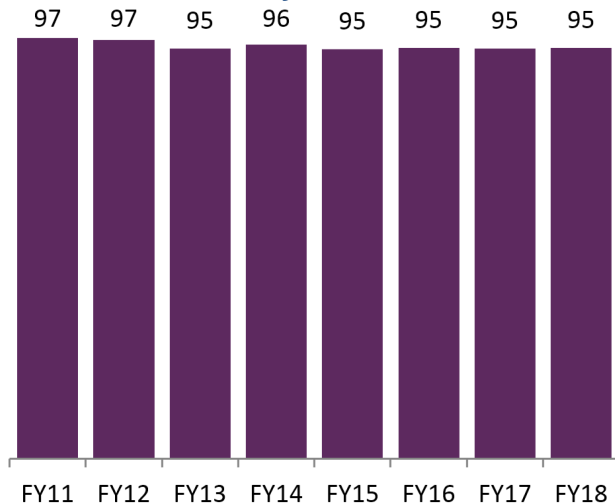

SERVICES PROVIDED

Provide the staffing and maintenance necessary to care for many of the State's most valuable real property assets, including the state's recent investment in the restoration of the State Capitol. These services are intended to provide clean, safe, and environmentally-sound facilities and include: energy management, recycling, event permitting and coordination, Capitol Complex food service oversight, and maintenance of green spaces including monuments and memorials.

RESULTS

We measure performance in multiple ways including: customer satisfaction, service disruptions, work completion rates, recycling rates, energy consumption, and carbon reduction. We also continually monitor the conditions of the buildings we manage by conducting annual facility condition audits.

Result: Customer Satisfaction

Customer Satisfaction: Data is taken from Building Occupant Annual Survey results. The percentage identifies consistently high tenant satisfaction with Admin managed facilities.

Quality: Work Order Completion Percentage

Best Value: Percentage of work orders completed on-time statistics show improved timeliness of work order completions.

Quality: FMD-caused Service Disruptions

Best Value: Our goal is to have zero FMD caused-service disruptions. A service disruption is any change or interruption in a building service such as heating, cooling, plumbing, or electrical service that degrades an occupant's ability to accomplish their mission.

Result: Sustainability

Sustainability: Although we have exceeded the state's recycling goal of 75% by 2030, we will strive to improve on our current rate of 78% as of CY 2017.

Result: Capitol Complex Annual Energy Use (MMBTU) and CO2e Emissions (Tons)

Sustainability: All Capitol Complex energy sources for all facilities in millions of British Thermal Units (MMBTUs). The current energy reduction of 21% has been normalized for weather.

M.S. 197.55-197.58 (<https://www.revisor.mn.gov/statutes/cite/197.55>) and M.S. 248.07, Subd. 7 (<https://www.revisor.mn.gov/statutes/cite/248.07>) provide the legal authority for In Lieu of Rent.

Program: Fiscal Agent**Activity: Misc Grants/Studies/Others****AT A GLANCE**

- This activity has been established to administer certain grants and other appropriations the agency receives through legislative appropriations.

PURPOSE & CONTEXT

Each of the activities within this program is established and operated under specific state legislation.

Many of the grants in this activity are made from the Arts and Cultural Heritage Fund. Grants managed by this activity include past grants to the Como Zoo, Lake Superior Zoo, the Science Museum, Minnesota Public Television, Wilderness Inquiry, Minnesota Public Radio, and Minnesota Outdoors Unlimited.

SERVICES PROVIDED

Processes have been established and maintained for handling financial transactions, tracking information, and reporting the information as required by the legislature. Contracts and agreements are an integral function of this activity.

M.S. 4.071, M.S. 16A.016(2), M.S. 15B.32, Minnesota Laws of 2017, Chapter 91 Section 4 Subdivision 2

Narrative

Developmental Disability Council

The Governor's Council on Developmental Disabilities (DDC) receives an annual formula grant from the U.S. Department of Health and Human Services, under a federal program, with state participation, to provide assistance to state councils for the benefit of individuals with developmental disabilities and their families in the state (Developmental Disabilities Assistance and Bill of Rights Act of 2000, P.L. 106-402). This program requires maintenance of efforts (MOE) by the states. The federal share of the cost of all program and operating activities cannot be more than 75% of the aggregate costs of such activities. The remaining 25% share of aggregate costs is the non-federal share that is provided by the state and sub-grantees. The federal act requires reasonable participation by the state. The DDC currently receives a \$74,000 general fund appropriation each fiscal year. Federal funding is expected to remain at its current level through FY 2023. Spending estimates are based on historical expenditures plus changes in demographics.

Assistive Technology

STAR is Minnesota's Section 4 Assistive Technology (AT) Act Program and is 100% federally funded under a discretionary formula grant award by the U.S. Department of Health and Human Services. STAR works with

community partners to provide free statewide AT services to Minnesotans of all ages who have a disability or functional need.

Procurement Technical Assistance Center

The Procurement Technical Assistance Center (PTAC) receives federal funding from the Defense Logistics Agency through an annual cost sharing cooperative agreement. State matching funds are required. Federal funds cover 50% of the cost of work benefiting non-distressed areas of the state, and 75% of costs for distressed areas. The fiscal year 2019 agreement also includes 100% federal funding for a small amount of training and travel costs. State match includes a portion of operating costs for the Office of Equity in Procurement and limited leadership and administrative support costs. The level and percentage of future federal funding may vary, but changes cannot be accurately predicted at this time, so future available federal funds are anticipated to remain at the current level.

Historic Preservation Fund

The State Historic Preservation Office (SHPO) receives an annual formula grant from the U.S. Department of the Interior, National Park Service. Since 1976, the Historic Preservation Fund (HPF) has supported SHPOs and Tribal Historic Preservation Offices (THPOs) throughout the U.S. to help recognize, save, revitalize and protect America's historic places. The HPF is funded by revenue from federal offshore drilling (non-tax dollars) and has been authorized through 2023, however, each year the HPF must be allocated and approved.

States are required to match at least 40% of the funding they receive from the HPF. The combined funds allow SHPO to carry out their federal and state mandated responsibilities of identifying and protecting historic resources as well as evaluating the impact of federal and state projects upon them. The SHPO's are also required to pass-through at least 10% of the HPF to local governments (sub-grantees) that have preservation programs that are certified by SHPO. The 40% matching share is provided by the state general fund (through the Minnesota Historical Society and State) and sub-grantees.

Each annual SHPO award has a two-year time period and only 25% can be carried over into the second year. A waiver must be requested and approved if more than 25% is carried over into the second year of the grant agreement. During federal fiscal year 2018, the SHPO was authorized \$986,092 HPF with a minimum matching share of \$657,428.

Census Bureau Count Review Program

The Minnesota State Demographic Center (SDC) serves as the State of Minnesota's liaison to the Census Bureau in the U.S. Department of Commerce. For the 2020 Census, the SDC will be assisting the Census Bureau with its Count Review program which helps ensure that the Census Bureau has an accurate list of Minnesota addresses. The U.S. Census Bureau will reimburse the state for up to \$50,000 in costs related to conducting this review. No matching grant is required. In addition, the Census Bureau may have additional funds and in-kind materials that they offer states to help with the promotion of the 2020 Census. We anticipate that these funds and in-kind materials could amount to up to \$25,000.

Facilities Management - MN Bookstore

Fund 4500

Brief Narrative

Background:

Minnesota's Bookstore, an enterprise fund, provides publishing and retail services to state agencies, publishes the State Register, and manages the sale of public data from select state agency licensing files.

Detail of any loans from the general fund, including dollar amounts:

None

Proposed investments in technology or equipment of \$100,000 or more:

None

Explanation of changes in net assets (formerly retained earnings increases, operating losses):

Effective FY18, GASB issued Statement No. 75 to establish new accounting and financial reporting requirements for Other Post Employment Benefits other than pensions, this resulted in a Change in Accounting Principle of \$(37,000). In FY18, the total operating loss was \$(106,447.72).

Explain any reasons for rate changes:

To reduce retained earnings, State Register billable page fees were waived through FY 2017.

Impact of rate changes on affected agencies:

Brief Narrative

Background:

Materials Management Division operates a cooperative purchasing program for Minnesota's local units of government and other authorized entities and the Minnesota Multi-State Contracting Alliance for Pharmacy (MMCAP), a pharmaceutical purchasing program on behalf of 48 states. The cooperative purchasing program is a self-sustaining enterprise fund.

Detail of any loans from the general fund, including dollar amounts:

None

Proposed investments in technology or equipment of \$100,000 or more:

None

Explanation of changes in net assets (formerly retained earnings increases, operating losses):

Effective FY18, GASB issued Statement No. 75 to establish new accounting and financial reporting requirements for Other Post Employment Benefits other than pensions, this resulted in a Change in Accounting Principle of \$(326,000). In FY18, the total operating loss was \$(575,349).

Explain any reasons for rate changes:

Contract fees paid by vendors are determined on a case-by-case basis and may either increase or decrease as specific contracts are negotiated.

Impact of rate changes on affected agencies:

None

Central Motor Pool - Fleet Services

Fund 5100

Brief Narrative

Background:

Fleet Services provides long term vehicle leasing services and fleet management.

Detail of any loans from the general fund, including dollar amounts:

None

Proposed investments in technology or equipment of \$100,000 or more:

None

Explanation of changes in net assets (formerly retained earnings increases, operating losses):

The implementation of GASB 68, "Accounting and Financial Reporting for Pensions," which required the recording of the net pension liability and the deferred inflows and outflows of resources associated with pensions, has caused many funds to end the fiscal year in a deficit net position. The actuarially determined amounts are likely to vary significantly from year to year and are managed by the retirement systems and state Legislature to ensure the defined benefit plans are adequately funded to pay plan benefits to employees participating as they become due. For these reasons, the state does not include the pension-related liabilities or deferred inflow and outflows of resources in the rate-setting process for managing these funds as long as the funds are contributing the monitored by the retirement systems administering these plans and the state Legislature statutory required contributions. The amounts will continue to be monitored by the retirement systems administering these plans and the state Legislature.

Effective FY18, GASB issued Statement No. 75 to establish new accounting and financial reporting requirements for OPEB other than pensions. This new requirement resulted in reporting additional \$77k Net OPEB Obligation, \$3k deferred OPEB outflows, \$3k deferred inflows, and salary expenses in FY18 comparing to FY17. These changes contribute to the net position balance for Fund 5100 as well.

Explain any reasons for rate changes:

Individual Fleet vehicle rates are based on vehicle type, acquisition cost, fuel economy, and life cycles. Actual expenses will vary based on contract parking, vehicle type, and lease terms. Fleet administration rates for leased vehicles will decrease in FY19.

Impact of rate changes on affected agencies:

Fleet's rates should favorably impact customer by the reduction in administration rates, and, where applicable, charging "actual costs" empowers agencies to manage their expenses respectively.

Central Mail

Fund 5203

Brief Narrative

Background:

Central Mail provides the following mail services to state agencies: Inserting, addressing, folding, postage automation services, postage metering and processing outgoing USPS mail.

Detail of any loans from the general fund, including dollar amounts:

An amount of \$1,803,431.99 is due to other funds due to the cash overdraft position of the fund on June 30, 2018.

Proposed investments in technology or equipment of \$100,000 or more:

With the assistance of an external business analyst, a solution was identified for improvements to Central Mail's billings system. The estimated costs of this improved billing system is \$400,000.

Explanation of changes in net assets (formerly retained earnings increases, operating losses):

Effective FY18, GASB issued Statement No. 75 to establish new accounting and financial reporting requirements for Other Post Employment Benefits other than pensions, this resulted in a Change in Accounting Principle of \$(38,000). In FY18, the total operating loss was \$(313,702.68).

Explain any reasons for rate changes:

Central Mail is proposing an overall revenue increase of 12% in FY2019. The folding rate will increase and bar code credits will be reduced. The folding rate is changing on order to be more competitive with the current market prices. All other rates will remain the same.

Impact of rate changes on affected agencies:

With the new OCR and the ability to sort to the 5-digit zip code, the historical method for calculating bar code credits resulted in credits exceeding bar code sorting charges. Therefore we will reduce the average credit per piece provided to customers so it is equal to the historical credit per piece. In addition, the minimum pieces to qualify for this credit is being raised from 500,000 to 750,000. DHS will no longer qualify for this credit based on the change in minimum.

Risk Management - Property & Casualty

Fund 5300

Brief Narrative

Background:

The property and casualty program operates as an internal service fund, charging fees based on insurance options requested by customers.

Detail of any loans from the general fund, including dollar amounts:

None

Proposed investments in technology or equipment of \$100,000 or more:

None

Explanation of changes in net assets (formerly retained earnings increases, operating losses):

The implementation of GASB 68, "Accounting and Financial Reporting for Pensions," which required the recording of the net pension liability and the deferred inflows and outflows of resources associated with pensions, has caused many funds to end the fiscal year in a deficit net position. The actuarially determined amounts are likely to vary significantly from year to year and are managed by the retirement systems and state Legislature to ensure the defined benefit plans are adequately funded to pay plan benefits to employees participating as they become due. For these reasons, the state does not include the pension-related liabilities or deferred inflow and outflows of resources in the rate-setting process for managing these funds as long as the funds are contributing the monitored by the retirement systems administering these plans and the state Legislature statutory required contributions. The amounts will continue to be monitored by the retirement systems administering these plans and the state Legislature.

Effective FY18, GASB issued Statement No. 75 to establish new accounting and financial reporting requirements for OPEB other than pensions. This new requirement resulted in reporting additional \$59k Net OPEB Obligation, \$4k deferred OPEB outflows, \$3k deferred inflows, and \$11k salary expenses in FY18 comparing to FY17. These changes contribute to the net position for Fund 5300 as well.

Explain any reasons for rate changes:

In FY19 no standard rate change, but a 9% increase in the hourly fee for non-insured tort claims management; and 5% reduction to Minnesota State general liability due to a "A" rating.

Impact of rate changes on affected agencies:

Due to favorable loss experience, Risk received a rate guarantee for property reinsurance program (three year through FY17 and a three year through FY20). This rate guarantee creates stability to customers. In addition, Customer with favorable claims experiences will receive dividend payments in FY19. Minnesota State a 5% reduction because of A rating.

Facilities Management - Leases, Repair and Other Jobs Plant Management

Fund 5400

Brief Narrative

Background:

The PMD internal service fund (ISF) is made up of two activities: leases, and repair and other jobs. The predominant customers are state agencies located in custodial control buildings that pay for space through lease rental rates.

Detail of any loans from the general fund, including dollar amounts:

None

Proposed investments in technology or equipment of \$100,000 or more:

\$100,000 for John Deere 4 WD Loader replacement in FY2020.

Explanation of changes in net assets (formerly retained earnings increases, operating losses):

The implementation of GASB 68, "Accounting and Financial Reporting for Pensions," which required the recording of the net pension liability and the deferred inflows and outflows of resources associated with pensions, has caused many funds to end the fiscal year in a deficit net position. The actuarially determined amounts are likely to vary significantly from year to year and are managed by the retirement systems and state Legislature to ensure the defined benefit plans are adequately funded to pay plan benefits to employees participating as they become due. For these reasons, the state does not include the pension-related liabilities or deferred inflow and outflows of resources in the rate-setting process for managing these funds as long as the funds are contributing the monitored by the retirement systems administering these plans and the state Legislature statutory required contributions. The amounts will continue to be monitored by the retirement systems administering these plans and the state Legislature.

Effective FY18, GASB issued Statement No. 75 to establish new accounting and financial reporting requirements for OPEB other than pensions. This new requirement resulted in reporting additional \$1,188k Net OPEB Obligation, \$87k deferred OPEB outflows, \$70k deferred inflows, and \$13k salary expenses in FY18 comparing to FY17. These changes contribute to the deficit net position for Fund 5400 as well.

Explain any reasons for rate changes:

Building life expectancy, vacant space, breakeven rates, positive/negative retained earnings, planned construction projects, and working capital are factors that are considered when developing each building's rate. The difference between actual revenues and expenses versus budgeted amounts will be reflected in future lease rates. The proposed rates reflect overall rate increases of 0.3% in FY 2020 and 1.6% in FY 2021. There is a rate decrease for the MSB and rate increases in 9 buildings. The rate increase of 5% each year for the Judicial Center is due in large part to ongoing water intrusion repairs. It is important to note, this building has had previous rate decreases for reasons described in the historical section on page 8. The FY 2021 rate of \$22.00 reflects an 11% decrease over the 18 year period from FY 2003 when the rate was \$24.63.

Impact of rate changes on affected agencies:

In FY2020, the lease for Dept of Human Services, Dept of Agriculture, Dept of Revenue, and Dept of Transportation will be increased; the lease for Dept of Health, MN Senate, and Dept of Public Safety will be decreased. In FY2021, the lease for Dept of Human Services and Dept of Public Safety will be increased.

AT A GLANCE

- 1,442 new cases filed; 270 hearings held in cases involving challenges to government actions in FY17-18.
- 19,812 new cases filed and 881 hearings held in workers compensation cases in FY17-18.
- Utilized interpreter services in 72 different languages to assure public access in hearing processes.
- Conducted 112 administrative rulemaking cases for 30 state agencies in FY17-18.
- In FY17-18, issued orders on petitions resulting in 223 municipal boundary adjustments affecting 8,111 acres in 62 counties.
- With 32 judges and 41 administrative staff in FY17-18, ensured that individual rights were protected and due process provided in all proceedings.

PURPOSE

The Office of Administrative Hearings (OAH) administers justice as an independent judicial tribunal within the executive branch. We provide fair and impartial hearings for individuals and residents challenging actions taken by state and local government agencies, and for injured workers and employers in contested workers' compensation matters. OAH also reviews all rulemaking proceedings initiated by state agencies to ensure statutory compliance, and conducts municipal boundary adjustment proceedings throughout the state. All of the agency's work serves to guarantee the public's access to and participation in their governments' processes.

Because OAH provides due process hearings for Minnesotans challenging state agency actions, OAH serves a vital role in contributing to the following statewide outcomes:

- **Economy – A thriving economy that encourages business growth and employment opportunities**
 - Licensing hearings (DHS, Commerce, medical boards); veteran's preferences cases; public employee discharges.
- **Education – Minnesotans have the education and skills needed to achieve their goals**
 - Special education hearings related to services provided by school districts; PELSB licensing matters.
- **Health – All Minnesotans have optimal health**
 - Hearings involving nursing home inspections; restaurant and catering administrative penalties.
- **Community – Strong and stable families and communities**
 - Child care and adult foster care maltreatment cases; campaign practices cases; boundary adjustment matters.
- **Safety – People in Minnesota are safe**
 - Hearings involving community notification ratings for sexual predators being released from confinement.
- **Environment – A clean, healthy environment with sustainable uses of natural resources**
 - Hearings involving utility rates and routes as well as environmental permits or civil citations.
- **Accountability – Efficient and accountable government services**
 - All hearings involve claims that government has overstepped its legal authority by misapplying the facts and/or the law. The neutral and impartial judges at OAH serve as a valuable check on the exercise of government power.

BUDGET

**Spending by Category
FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

The agency's funding comes from three sources: (1) over 75 percent of the annual funding comes from the Workers Compensation Special Fund; (2) the agency receives small general fund appropriations (less than \$500,000) to support its work in municipal boundary adjustments, campaign practices challenges, and expedited data practices matters; and (3) operating as an enterprise fund, the agency raises the remaining \$3 million by charging other agencies for its services.

STRATEGIES

As directed by M.S. 176 and associated rules, the Workers' Compensation Division conducts pretrial and trial functions associated with petitions for workers' compensation benefits. Workers' Compensation Judges rule on motions, conduct settlement and pretrial conferences, preside at trials, and issue awards and final decisions. The judicial staff of the division consistently provides well-reasoned, fair and neutral decisions in a timely manner in service to injured workers and employers throughout the state.

Under the authority of M.S. 14 and related rules, the Administrative Law Division provides contested case hearings in matters involving the public's challenges to state agency actions. The subject matter of these proceedings varies widely among the 170-plus state and local agencies which bring cases before OAH. The division is staffed with a highly-experienced team of Administrative Law Judges who preside over contested case hearings and provide mediations and other conflict resolution services throughout the state. The Administrative Law Judges also review all state agency rule submissions for necessity and reasonableness, hear claims of unfair campaign practices in non-statewide elections, and enforce government accountability in accordance with the Minnesota Government Data Practices Act when challenges are filed by members of the public. In all matters, the division's judges serve as fair and impartial decision-makers and produce legally accurate, easily understandable, and timely written decisions.

Pursuant to M.S. 414, the Municipal Boundary Adjustment Unit, acting through administrative law judges, issues orders on petitions for the creation or dissolution of municipalities, alteration of municipal boundaries through consolidation, annexation, or detachment of real property, and the establishment of sanitary districts. Matters are commenced by involved municipal governments and/or affected property owners. As a means of ensuring government accountability and public access, the Unit maintains a searchable electronic database of all docketed information including maps of real property included in boundary adjustment proceedings.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Average days for workers' compensation judges to issue final decision after record close.	38	39.6	FY15/ FY16, FY17/ FY18

FTEs	0	0	0	0

Recommendation:

The Governor recommends \$9,000 in FY 2020 and each year thereafter from the Workers' Compensation Fund for the Office of Administrative Hearings (OAH) to fund a correction to OAH salaries, which are set in statute. This recommendation increases the salary of the OAH assistant chief administrative law judge and also the OAH supervisory judges so that their salary will be higher than that of the judges that they supervise, correcting a mathematical error made in the 2017 legislative session when salaries were adjusted.

This recommendation is equal to a 0.1% increase to the OAH Workers' Compensation Fund base budget for the FY 2020-2021 biennium.

Rationale/Background:

OAH made a mathematical error when it submitted its FY18-19 biennial budget change item for salary parity for OAH judges. The salary of the assistant chief administrative law judge and administrative law judge supervisors was proposed at 93.60 percent of the salary of a chief district court judge. When calculated, this resulted in a total for judge supervisors that was less than the judges they supervise.

Proposal:

OAH seeks to correct this error by increasing the salaries of the assistant chief administrative law judge and administrative law judge supervisors from 93.60 percent of the salary of a chief district court judge to 100 percent of the salary of a district court judge. This will ensure that a judge supervisor is paid more than a judge supervisee and less than the chief judge, which will conform the salary structure to every other court in the state.

Statutory Change(s):

MS 15A.083, subd. 6a, as follows:

Subd. 6a. **Administrative law judge; salaries.**

The salary of the chief administrative law judge is 98.52 percent of the salary of a chief district court judge. The salaries of the assistant chief administrative law judge and administrative law judge supervisors are ~~93.60~~ 100 percent of the salary of a ~~chief district court judge~~. The salary of an administrative law judge employed by the Office of Administrative Hearings is 98.52 percent of the salary of a district court judge as set under section 15A.082, subdivision 3.

Office of Administrative Hearings

Administrative Hearings - Fund 5201

Brief Narrative

Background:

Administrative Hearings Fund 5201 is both an enterprise and internal service fund. It provides fair and impartial contested case hearings for individuals challenging actions taken by state and local governments.

Detail of any loans from the general fund, including dollar amounts:

None.

Proposed investments in technology or equipment of \$100,000 or more:

The Office of Administrative Hearings plans to make technology improvements in the future to better support e-filing and add e-service.

Explanation of changes in net assets (formerly retained earnings increases, operating losses):

None.

Explain any reasons for rate changes:

By law (*see* Minn. Stat. sec. 16A.126, subd. 1 (2016)), OAH's enterprise fund rates are approved annually by MMB. The agency's rates were approved as of July 1, 2018, and are in effect for the current fiscal year.

Impact of rate changes on affected agencies:

Office of Administrative Hearings

Workers' Compensation Transcript - Fund 5202

Brief Narrative

Background:

The Workers' Compensation Transcript revenues are dedicated to the purposes of maintaining record of hearings conducted and preparation of transcript of those hearings for appeals to the Workers' Compensation Court of Appeals. Additional revenue is generated through filing fees.

Detail of any loans from the general fund, including dollar amounts:

None.

Proposed investments in technology or equipment of \$100,000 or more:

none.

Explanation of changes in net assets (formerly retained earnings increases, operating losses):

None.

Explain any reasons for rate changes:

No rate change.

<i>Expand Operations (REVISED)</i>	6

AT A GLANCE

- The Council for Minnesotans of African Heritage was established in 1980. We are one of three Ethnic Councils governed under Minnesota Statute 15.0145 that includes the Asian and Latino councils.
- The Minnesota State Demographer estimates the Minnesota African Heritage population in Minnesota at 425,197.
- The Council is comprised of 11 appointees from the Governor, 4 Legislative members and staffed by 3.5 fulltime employees. Currently the Council has 8 members appointed by the Governor, 2 active Legislators and we are fully staffed.

PURPOSE

According to Minnesota Statute 15.0145, a council must work for the implementation of economic, social, legal, and political equality for its constituency. The council shall work with the legislature and governor to carry out this work by performing the duties in this section. Duties in this section include:

- Advise the governor and the legislature of administrative and legislative changes needed to improve the economic and social condition of the African Heritage community.
- Advise the governor and the legislature of the implications and effect of proposed administrative and legislative changes on the African Heritage community.
- Serve as liaison between state government and organizations that serve the African Heritage community.
- Facilitate studies designed to suggest solutions to the African Heritage community in the areas of education, employment, human rights, health, housing, social welfare, and other related areas.

The Council for Minnesotans of African heritage contributes to the following statewide outcomes:

- **A thriving economy that encourages business growth and employment opportunities for all Minnesotans.**
- **All Minnesotans have the education and skills needed to achieve their goals.**
- **All Minnesotans have optimal health a clean, healthy environment with sustainable use of natural resources.**
- **Minnesota has strong and stable families and communities regardless of their background.**
- **All people in Minnesota are safe.**

BUDGET

Spending by Category
FY 17 Actual

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

The Council is funded through an appropriation from the general fund. Other fund spending in prior years represents grants and other external funding the Council has received. For example, during the FY2010-11 and FY2013-14 biennia the Council partnered with Blue Cross and Clearway to address tobacco use in the African Heritage community, and with the Department of Human Services on foster care and adoption initiatives.

In FY17 compensation accounted for 54 percent of the Council's spending. It should be noted that the Council has undergone several staff changes in the last five years, and as of September 2018 is fully staffed for the first time in over a year. Moving forward, the Council anticipates that compensation will represent at least 75% of spending.

STRATEGIES

Our work ensures that families have access to the Council as a resource. Through the Council, our constituents advocate for policies that encourage a thriving economy, access to education, health and a sustainable environment. Our work focuses on making sure Minnesota families are safe, stable, and have a Council that advises the Governor and legislature on their behalf. The Council achieves its mission through three strategies:

Statewide Outreach – We currently target 4 regions of the state (Twin Cities, Rochester, Saint Cloud and Duluth) with a goal of developing relationships and partnering with our constituents in those areas to build and advance a shared agenda.

Legislative Advocacy – The Council works with our statewide partners to build a legislative policy and budgetary agenda. We then work hand in hand with our partners and lawmakers to advance our agenda.

Advisory Role – When the Council has a position on a certain issue, we submit our advice in writing to the Governor and Legislature with a request for specific action steps. We then partner with the appropriate authorities to advance our position.

RESULTS

Recommendation:

The Governor recommends additional funding of \$274 thousand in FY 2020 and \$275 thousand each year thereafter to expand the capacity of the Council for Minnesotans of African Heritage.

Rationale/Background:

The Minnesota Legislature created the Council on Black Minnesotans in 1980 to ensure that people of African heritage fully and effectively participate in and equitably benefit from the political, social, and economic resources, policies and procedures of the State of Minnesota. In 2015, the Council for Minnesotans of African Heritage (Council) was created out of the restructuring of the state's ethnic councils.

MN Statute 15.0145 charges the Council with the following duties:

- Advise the Governor and the Legislature on issues confronting the African heritage community.
- Serves as a liaison between state government and organizations that serve the African heritage community.
- Perform or contract for the performance of studies designed to suggest solutions to the problems faced by Minnesotans of African heritage.
- Report on the measurable outcomes achieved in the Council's strategic plan to meet its mandated duties.

Since its restructure in 2015, the Council has struggled to maintain effective levels of staffing. As a result, the agency has lost the capacity to perform certain duties, including:

- The Council's staffing structure accounts for 3.5 FTEs. The Council currently has a .5 Legislative Coordinator who operates at full time capacity 6 out of 12 months a year. The Council requires 1 FTE to execute its legislative duties.
- The Council has a duty to conduct research and report on activities, concerning the African heritage community. Currently, these duties are divided between 3.5 FTEs. 1 FTE is needed to fully execute reporting and research duties.
- Adjusting the staff structure will require acquiring vacant office space in the Council's suite. This space will be used to house unpaid interns and a Research Analyst. This space is available and accessible within our current suite.

Proposal:

The Governor recommends additional funding for the Council to maintain and enhance the delivery of current services. The increase will allow the Council to fully fund its Legislative Coordinator year round, add a dedicated research analyst to help fulfill its statutory responsibilities, and add a new staff person to focus on expanding the

Council's statewide outreach strategy. The additional funding will also enable the Council to modify its office space to accommodate the new staff and activities.

	FY 2020	FY 2021	FY 2022	FY 2023
Compensation	\$198	\$209	\$209	\$209
Operating Expenses	76	66	66	66
Total	274	275	275	275

The FY 2020-2021 biennial recommendation of \$549,000 represents a 67% increase to the Council's current budget. This proposal will adjust the staff structure of the Council to provide the basic capacity to execute its duties. The full time Legislative Coordinator will lead the Council's legislative strategy, which is a core function of the Council. The Research Analyst will empower the Council to tell a more complete story behind legislation, demographic, economic, and social trends in the community. The new outreach position will help guide the creation of a narrative report focused on the state of the African Heritage community and community driven policy recommendations to address racial disparities. The shift in staffing will require the agency to occupy the full suite which will provide space for unpaid interns who are an additional resource to Council's constituency.

IT Related Proposals:

N/A

Equity and Inclusion:

Statute requires the Council to "work for the implementation of economic, social, legal, and political equality for its constituency." The Council represents a statewide constituency of 425,197 African and African American Minnesotans. This community is diverse and located across the state. While most live in Hennepin and Ramsey County, the number of African and African Americans in Greater Minnesota are growing. Kandiyohi, Stearns, and Nobles County have all seen a substantial shift in population. As these changes happen all over our state, the structure of the state's ethnic councils continue to be an important tool to increase equity and inclusion.

Results:

The Council achieves its mission by utilizing three key strategies. Advising the Legislature and Governor, building and advancing a legislative agenda and statewide outreach. This proposal will fully staff the Council's legislative strategy and enhance the agency's ability to advise lawmakers using the information gathered from the Council's outreach program.

AT A GLANCE

The Agricultural Utilization Research Institute (AURI) helps create a thriving economic environment by developing new business opportunities in Minnesota. Clients served between state fiscal years 2011 and 2017 reported direct impacts resulting from AURI assistance. Using an input-output model of these results to assess the direct, indirect, and induced effects on the state's economy, a U of M study reports annually recurring impacts of increased gross sales:

- 935 jobs created or retained;
- \$141.8 million in increased economic activity.

Further, direct capital investment in new plants or equipment resulted in:

- \$168.8 million of total economic contribution;
- 1,010 jobs; and
- \$68 million in labor income.

Results above reflect the full economic impact of AURI-assisted projects between state FY 2011 and 2017, based on a 2018 study conducted by the University of Minnesota Extension's Center for Community Vitality.

PURPOSE

The purpose and mission of the Agricultural Utilization Research Institute (AURI) is to foster long-term economic benefit for Minnesota through value-added agricultural products. It accomplishes this by offering a unique mix of research and development, hands-on scientific assistance, and innovation networks.

AURI helps Minnesota businesses and entrepreneurs identify and develop new markets for agricultural commodities and byproducts. This, in turn, strengthens Minnesota's agriculture industry and economy.

AURI significantly contributes to this statewide outcome:

- **A thriving economy that encourages business growth and employment opportunities**

BUDGET

Source: AURI Microsoft GP Accounting System

Past funding came from three general sources:

- 1) Minnesota's General Fund
- 2) Federal funds such as U.S. Department of Agriculture and U.S. Department of Energy grants.
- 3) Other funds including matching project funds from commodity research and promotion councils, grants from Minnesota initiative foundations and an Xcel Energy Renewable Development Fund grant in FY08.

Source: AURI Microsoft GP Accounting System and Annual Audited Financial Statements

AURI utilizes its funding to provide Minnesota agricultural producers, entrepreneurs and agribusinesses with the following resources and services:

- **Applied research and development** identifies opportunities for innovation and commercialization in collaboration with commodity organizations, higher education institutions, federal agencies, and research organizations. Public-domain research spurs innovation in new uses and value-added agriculture.
- **Innovation networks** convenes events for a variety of groups, including industry leaders, academics and project management staff. This program offers access to extensive knowledge and insight into Minnesota's agricultural industry, commercialization and state resources for business development. Innovation networks provide participants with techniques for managing innovation and supporting entrepreneurship, while considering the dynamics and challenges faced by rural communities.
- **Hands-on scientific assistance** gives entrepreneurs and small- to medium-sized businesses access to laboratories and scientific expertise, critical aspects of product and process development that may otherwise be prohibitively expensive.
- **Commercialization services** help entrepreneurs prepare their product or service for market consumption. This includes economic or feasibility assessments and providing counsel on how to best formulate product mixes for scaling up production size.

STRATEGIES

AURI utilizes five primary strategies to spur innovation and grow Minnesota's economy when working with entrepreneurs and agricultural processors. Strategies proven effective to successfully bring new and enhanced agricultural products and processes to market and to support organizational goals include:

- **Generate ideas for new agricultural innovations for the marketplace.** AURI utilizes applied research and development to grow the economy and create new jobs.
- **Select the best ideas for agricultural innovation.** AURI works with small businesses, entrepreneurs, stakeholders, industry thought leaders, and other research leaders to select ideas most likely to succeed in the marketplace.
- **Connect the best ideas to the marketplace.** Staff assist small businesses and entrepreneurs with the hands-on scientific assistance and leverage resource networks to bring an idea to reality.
- **Innovation network building.** AURI events connect interested parties to build synergy and capacity for innovation.
- **Conducting public initiative research.** AURI conducts multiple public domain research projects per year to further spur innovation.

Recommendation:

The Governor recommends additional funding of \$211,000 in the FY 2020-2021 biennium to maintain the current level of service delivery at the Agricultural Utilization Research Institute (AURI).

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

Without being able to provide increases to staff wages annually, AURI is subject to staff turn-over which leaves the organization vulnerable. Retaining current talent at AURI will allow the organization to provide its services to the agriculture industry.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the AURI, this funding will cover known employee compensation growth.

Equity and Inclusion:

AURI serves a variety of communities in Minnesota and equally protects all citizens of the state, providing services for all people of the State of Minnesota without discrimination.

Results:

This proposal will allow AURI to continue to provide current levels of service and information to the public.

AT A GLANCE

- 450 employees across the state
- Analyzed over 5,000 dairy product samples and 3,000 meat and poultry samples in partnership with the MDA Laboratory Division
- Conducted over 2,800 manufactured food, 7,000 retail food, and 1,000 animal feed inspections to ensure the safety and quality of products manufactured and distributed in Minnesota.
- Approximately 1.6 billion pounds of ag products certified as plant pest free for export to 70 countries by 136 Minnesota companies during 2017
- Assisted Minnesota counties, townships, and cities with the enforcement of noxious weed issues
- Annual Agricultural Growth, Research, and Innovation (AGRI) \$10.235 million state investment in FY17 was matched by \$78 million in private investment with an estimated 1,740 jobs created
- More than 1,300 farms and farmers' markets licensed to use the Minnesota Grown logo
- In partnership with all Minnesota counties, collected over 500,000 pounds of waste pesticides in 2017

PURPOSE

Our mission is to enhance Minnesotans' quality of life by ensuring the integrity of our food supply, the health of our environment, and the strength of our agricultural economy.

The Minnesota Department of Agriculture (MDA) provides many services to Minnesota farmers, their consumers, and the agriculture economy. Among our many efforts, we:

- Invest in farmers through education and grants aimed at modernizing the family farm;
- Invest in the future of the agricultural economy with grants for research and value-added processing;
- Ensure that state and federal regulations for food and health safety are followed;
- Educate producers, suppliers, and consumers on proper production and handling of food products;
- Educate Minnesotans about environmental hazards to keep our farms, homes, businesses, and neighborhoods safe;
- Promote the consumption of Minnesota-grown foods; and
- Promote the export of Minnesota crops and livestock.

We support the following statewide outcomes:

- A thriving economy that encourages business growth and employment opportunities
- All Minnesotans have optimal health
- People in Minnesota are safe
- A clean, healthy environment with sustainable uses of natural resources

BUDGET

**Spending by Program
FY 17 Actual**

Source: BPAS

Historical Spending

Source: Consolidated Fund Statement

Our budget comes from three primary sources. The most significant funding resource is fee revenues. These revenues must be spent to support the activities from which they are collected and currently make up just over one-third of the agency's budget. The state's General Fund is also a large part of the agency's budget at just over one-third of the budget. A large portion of the general fund budget passes through MDA in AGRI (Agricultural Growth, Research, and Innovation) and other assistance programs. In FY16-17 and FY18-19 federal funds accounted for about 10 percent of MDA's budget.

STRATEGIES

We use a range of regulatory and voluntary strategies to support our mission. This includes the use of registration, labeling, licensing, permitting, inspection, and enforcement efforts. Additionally, we coordinate and conduct outreach activities such as workshops, conferences, and field demonstration projects.

Our staff conduct inspections and verify samples to ensure that producers, processors, wholesalers, haulers, grocery and convenience stores, and other industry personnel are producing and handling dairy, food, meat, and feed products in a safe manner to protect them from unintended alteration and contamination.

We ensure that Minnesota plant products meet the import requirements of our trading partners, meet grading standards established in contracts, that seeds meet viability and purity standards, that general health standards are met for nursery stock, and that standards for freedom from harmful plant pests are met.

Our marketing and promotional initiatives offer producers technical and financial assistance on a variety of issues, including dairy and livestock development, business planning, and emerging water quality and conservation practices.

Our staff facilitates access to new markets through the Minnesota Grown Directory, international trade market research, and client support for trade missions and export assistance. We also support the organic industry through education, direct financial support, and skill development.

Minnesota Statutes Chapter 17, (<https://www.revisor.mn.gov/statutes/?id=17>) creates the Department of Agriculture and provides specific authority to the commissioner.

Agriculture

FY 2020-21 Biennial Budget Change Item

Change Item Title: Agricultural Trade and Marketing

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	200	200	200	200
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	200	200	200	200
FTEs	2	2	2	2

Recommendation:

The Governor recommends funding for the Department of Agriculture (MDA) to expand the capacity for market development by adding two FTEs. One FTE will be dedicated to international trade opportunities and the second will focus on domestic marketing opportunities such as within retail grocery stores and large institutional markets like foodservice.

Rationale/Background:

Demand for MDA's marketing services has outgrown our capacity to provide services to farmers and value-added processors and MDA is unable to capitalize on new market development opportunities. Without increased staff capacity, many of these market opportunities will be lost to producers and processors from other states or countries.

Minnesota agricultural exports have increased by 161 percent since 2007, from \$3.2 billion to \$7.1 billion in 2016. Minnesota is ranked 4th in the nation in total agricultural exports. In order to ensure this trend continues, additional resources are required to maintain quality programming to producers, processors, and companies around the state.

International trade has been an increasingly important market for Minnesota farmers and processors in the last decade. In addition, the trade climate has become more complicated and uncertain due to renegotiated trade agreements and the implementation of tariffs. More resources are needed to keep up with industry and trade trends; to communicate with our state's food and agricultural companies; and to execute current marketing efforts including education, hosting Minnesota Pavilions at domestic and global trade shows, and conducting inbound and outbound trade missions.

The food business is competitive and technical assistance is in demand. MDA marketing programs are a crucial part of an ecosystem of organizations that leverage public and private resources to help companies thrive. MDA seeks to expand services with the growing momentum around food, agriculture, and trade in Minnesota. Small to medium sized businesses will not receive vital marketing services necessary to give their products visibility and receive connectivity to markets without proper funding.

Proposal:

This proposal will augment existing programs and help MDA deliver more services to stakeholders and the business and agricultural community. Additional staffing will allow MDA to coordinate services with partner agencies, work extensively with retailers and wholesalers, and expand programs to serve stakeholders with better

quality and quantity. This market education and improved access will ensure the health of Minnesota's agricultural economy.

This proposal will add two FTE's to the Ag Marketing and Development Division. This proposal will expand our programmatic capacity in the following ways:

- One FTE will be dedicated to international trade opportunities. This will allow the MDA to support Minnesota Pavilions in at least two international tradeshow and reach at least six additional exporting companies and develop business in new markets. This position will also provide export education for new to export companies, which is critical for long-term export success. This position will also leverage dollars available through Food Export of the Midwest to expand programming. MDA is unable to execute both inbound and outbound trade missions with existing staff time. This FTE will also bring international buyers to Minnesota, specifically for the World Pork and World Dairy Expos, and explore new and existing markets with Minnesota businesses.
- A second FTE will focus on domestic marketing opportunities within retail grocery stores and large institutional markets, such as foodservice. MDA is currently unable to tap these markets due to staffing constraints. Results of this additional staff person include networks into additional markets; a larger number of food and ingredient companies seeking entry into these markets; and the ability to create new synergies with local, state, and regional organizations already providing technical assistance to food companies.
- Funding for both positions will cover a State Program Administrator Intermediate position including fringe, office space, and equipment.

Key partners are essential for this work. The MDA has existing relationships and partnerships with a broad network of professionals supporting business development, food entrepreneurship, and trade. These include the Department for Employment and Economic Development (DEED), Regional Development organizations, the Agriculture Utilization Research Institute (AURI), United States Department of Agriculture's (USDA) Market Access Program's (MAP) Cooperators; including Food Export of the Midwest, US Grains Council, US Soybean Export Council, and US Meat Export Federation, local nonprofits; such as Grow North, the Good Acre, Greater MSP, educational institutions, such as the University of Minnesota, and Commodity Councils such as MN Soybean and MN Corn.

Implementation will begin with hiring the two positions as soon as possible. MDA will act fast to strategically integrate the new team members to maximize communication and ensure the most efficient way to expand programming.

Equity and Inclusion:

MDA will recruit from diverse sources when hiring and build on existing relationships with diverse farming communities. We do not anticipate any adverse impacts on any of the groups.

This proposal continues and expands existing activities that are not able to keep up with the growing demand for them. Working collaboratively with partners such as commodity groups, farm organizations, and ag processing companies ensures long-term sustainability of these programs.

IT Related Proposals:

This is not an IT-related proposal.

Results:

The new proposed investment will build on the success of our existing portfolio of trade shows, trade missions, and reverse missions to create additional jobs and economic growth with a modest level of additional public investment.

Type of Measure	Name of Measure	Previous	Current	Dates
Quality	Return on Investment from MDA pavilions at domestic and international trade shows	n/a	\$60:1	2017

Statutory Change(s):

No statutory changes are needed.

Agriculture

FY 2020-21 Biennial Budget Change Item

Change Item Title: Farm and Rural Mental Health Assistance

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	225	225	225	225
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	225	225	225	225
FTEs	0	0	0	0

Recommendation:

The Governor recommends funding to the Agriculture Marketing & Development Division's overall General Fund budget to use towards programs, services, and outreach efforts that support and promote Minnesota farmer mental health.

Rationale/Background:

Farmers and other rural residents are experiencing high levels of stress, linked to farm production challenges, financial distress, changes in the social fabric of rural living, and other factors beyond their control. Farm earnings hit record lows in 2014 and 2015 and declined again in 2017. Corn, soybean, and milk prices continue at or below the cost of production, exhausting working capital and eating into equity. Stresses like these take their toll; there are indications that suicide, divorce, and substance abuse rates are all climbing in this population.

In a 2017 survey of more than 500 Minnesota agriculture advisors (including bankers, veterinarians, county-based agriculture agency staff, and educators), more than 50 percent report they have observed increases in farmers' anxiety, financial worries, and concerns about farm tenure ("Who will take over when I'm gone?") during the past year. Agriculture advisors are concerned about increasing levels of farmer depression, burnout, and marital difficulties. The Minnesota Department of Agriculture (MDA) is also receiving more calls from the media about this topic.

MDA convened farm organization leaders to discuss farmer mental health stressors and their effects. That collaboration led to MDA hosting a series of twelve regional *Down on the Farm* workshops in six locations during 2018. These workshops were widely attended by people who come into contact with farmers on a regular basis (veterinarians, leaders of farm organizations, inspectors, etc.) as well as local and regional service providers (health care professionals, law enforcement, clergy, social service entities, etc.). The idea was to raise awareness of the issue and identify local, regional, and statewide resources that could help assist farmers. MDA was inundated with requests to conduct more workshops in more locations but available resources limit the ability to do so. Participants identified priority actions and efforts; their priorities form the basis of this recommendation.

Proposal:

This recommendation expands our current level of effort by:

- Adding a second Minnesota rural mental health specialist to provide confidential, one-on-one counseling tailored to farmers and their unique concerns: \$115,000 increase from \$113,000 to \$228,000.
- Funding and promoting a 24-hour confidential hotline that connects farmers and other rural residents in distress with a counselor or other resources: \$25,000

- Coordinating public information and outreach activities and engaging farm groups and other agriculture organizations to reduce the stigma of stress, anxiety, and other mental health challenges: \$38,000
- Adding two Farm Advocate advisors and increasing 12 consultants' hourly reimbursement by 2.5 percent. \$47,000 increase from \$220,000 to \$267,000.

This effort continues, expands, and enhances existing activities, like one-on-one farmer counseling and the 24-hour hotline, that are not meeting growing demand for them. Since many partners are involved and interested in working collaboratively, diffusion and sustainability are built into the project. MDA does not bear the entire burden of outreach and delivery.

Equity and Inclusion:

While farmers identify with many racial, ethnic, gender, and ability groups and some are veterans, none of the groups identified in this section will be specifically impacted as a whole by the proposal. The proposal is not submitted to reduce or eliminate ethnic, racial, or gender disparities. We do not anticipate any adverse impacts on the identified groups.

IT Related Proposals:

This is not an IT-related proposal.

Results:

Mental health issues are intensely private and it is difficult to collect data from those who are affected by stress, anxiety, depression, suicide, and other challenges. In addition, there are inherent challenges to measuring prevention (How many suicides prevented? How many divorces prevented? How much is physical illness prevented?) Instead, we will use feedback from agriculture professionals who interact with farmers on a regular basis and metadata from the Farm Advocate program and 24-hour phone anonymous counseling line to monitor changes in levels of farm and rural stress, anxiety, depression, substance abuse, and other challenges. These indicators will help us not only measure impact, but also to determine changes in need.

Statutory Change(s):

We do not anticipate that any statutory changes will be needed.

Agriculture

FY 2020-21 Biennial Budget Change Item

Change Item Title: Agricultural Emergency Preparedness and Response

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Department of Agriculture				
General Fund				
Expenditures	625	300	300	300
Revenues	0	0	0	0
Board of Animal Health				
General				
Expenditures	250	250	250	250
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	875	550	550	550
FTEs	1.65	1.65	1.65	1.65

Recommendation:

The Governor recommends \$300,000 in annual funding from the general fund to support the operations of the Department of Agriculture's Incident Management Team (IMT) and a one-time appropriation of \$325,000 from the General Fund to increase the balance of the Agricultural Emergency Account in FY20, allowing the agency to prepare and respond to agricultural emergencies in a timely manner. Additionally, the Governor recommends \$250,000 in annual funding from the General Fund to prepare and respond to agricultural emergencies at the Board of Animal Health (BAH).

In 2016, the Minnesota Legislature (MS 17.041) established the Agriculture Emergency Account in the Agriculture Fund and appropriated a one-time transfer of \$1,000,000. The 2016 appropriation has allowed the Minnesota Department of Agriculture (MDA) to stand up the Office of Emergency Preparedness and Response (OEPR), implement Palmer amaranth response efforts, and begin creating secure food supply plans for agricultural commodities. Replenishing the funds in the Agricultural Emergency Account threatens will allow the agency to continue its newfound emergency preparedness and response capabilities.

Rationale/Background:

Agriculture is a major contributor to Minnesota's economy, creating \$90 billion in economic activity and more than 340,000 jobs. In addition to our 74,000 farms, Minnesota has nearly 1,000 agricultural and food companies. Seven of Minnesota's top 20 companies have roots in the farm and food sector and Minnesota has several firms with an agricultural focus on Forbes' List of America's Largest Companies.

Minnesota's food and agriculture production systems are national leaders:

- No. 1 in turkey production
- No. 2 hog production
- No. 3 food and agriculture exports (nearly 40% of total MN exports)
- No. 3 soybean production
- No. 4 corn production
- No. 8 dairy production
- No. 9 broiler chicken production
- No. 10 egg production

The 2015 outbreak of HPAI in Minnesota and around the nation highlighted both the strengths and weaknesses in our state's ability to plan, prepare for, and respond to agricultural emergencies. Minnesota was successful in responding to the Highly Pathogenic Avian Influenza outbreak partly because the poultry industry, government, and academia had developed a Secure Turkey, Broiler and Egg Supply Plan. This planning and preparedness gave Minnesota the tools to respond effectively and allow for continuity of business operations in areas of the state not effected by the disease.

However, the size, structure, efficiency, and extensive movement inherent in Minnesota's food, crop, livestock, poultry, and allied industries present unprecedented challenges in the event of a foreign animal disease outbreak. The 2015 outbreak also illustrated that MDA cannot sustain a long-term, high resource-intensive event without a dedicated Emergency Preparedness and Response Program.

Currently there is no long-term dedicated funding to support the development and maintenance of the Office of Emergency Preparedness and Response. Dedicated funding will enable the Department to continue to collaborate and coordinate with federal and state agencies, the MN Board of Animal Health, Minnesota counties, academia, and Minnesota's food and agriculture sector.

Proposal:

The Governor recommends funding for The Office of Emergency Preparedness and Response (OEPR). The OEPR is structured such that it is responsible for the emergency preparedness functions of MDA as well as overseeing, preparing, and training the Department's Incident Management Team (IMT). The IMT is being established through a formal sharing of positions with all divisions in the Department, creating a cross-cutting team that functions agency-wide and leverages the expertise housed within the divisions. Together the IMT equals 1.65 FTEs.

Minnesota is not as prepared as it could be to respond to potentially catastrophic outbreaks such as Foot and Mouth Disease, soybean or cereal rusts, or invasive insects or weeds. In order to better protect our agricultural and food economy, an all hazards business continuity approach, like the one the IMT is developing, should be further developed in collaboration with industry, government, and academia. The development of secure food supply plans are critical to strengthening Minnesota's preparedness and response capabilities and helping our state prevent catastrophic events that could threaten trade partnerships and economic stability. Ongoing funding for the OEPR and its planning efforts will make Minnesota as prepared as possible for an agricultural emergency.

In addition to its emergency preparedness and planning duties, the MDA also has a responsibility to respond to emergencies in real-time. A quick intervention during an emergency can prevent a catastrophic result. The Governor recommends a onetime appropriation of \$325,000 so the Agricultural Emergency Account can be restored to approximately \$750,000.

The importance of a sufficient balance in the Agricultural Emergency Account was illustrated with the MDA's response to Palmer amaranth's discovery in Minnesota in 2016. Using funds from the Agricultural Emergency Account, MDA was able to quickly respond to the detection of Palmer Amaranth. This invasive weed has the potential to cause significant economic harm to Minnesota's crop farmers and these resources allowed MDA to swiftly begin eradication activities.

As our world becomes more interconnected, we face growing threats of disease transfer and invasive species movement that could quickly threaten the health and vitality of the agricultural industry in our state. With this proposal, the MDA and BAH will be better prepared to respond to the next emergency.

Equity and Inclusion:

The MDA believes this initiative equally protects all citizens of the state. We would not anticipate any issues from under-represented communities or negative impacts to the Department's diversity goals.

Results:

Unfortunately, quantifying the true impacts of the OEPR will occur after the next agricultural emergency. Absent an ex-post analysis, the MDA has been tracking the OEPR's impact by examining how the office is engaging industry and building our response capabilities.

Agriculture

FY 2020-21 Biennial Budget Change Item

Change Item Title: Noxious Weed Program

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	900	900	900	900
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	900	900	900	900
FTEs	4.5	4.5	4.5	4.5

Recommendation:

The Governor recommends funding for the Noxious Weed Program within the Department of Agriculture (MDA). This appropriation would support a grant program for local governments, weed law enforcement and training, and the continuation of state-led eradication and management programs for noxious weeds on the eradicate list.

Rationale/Background:

In 2009, the Minnesota Legislature significantly expanded the Noxious Weed Law and the duties of the MDA and local enforcement partners at the county, township, and city level. The revised noxious weed law also requires that MDA address invasive plant and pollinator issues, thus creating the need for an all-inclusive program. Resources are needed to implement and maintain noxious weed and invasive plant control programs throughout Minnesota and to address priority invasive plant problems statewide.

The funding provided during in the 2018-2019 biennium of \$850,000 was the first significant appropriation for terrestrial noxious weed and invasive plant management in the state since the elimination of funds for the MDA Noxious Weed Program in 2002. Funds appropriated during the last session have allowed MDA to make significant strides in development of a robust program that serves the many needs of local governments, farmers, agencies, non-profits, and private landowners.

The recent invasion of Palmer amaranth into Minnesota is an example of why a strong proactive noxious weed program is needed in the state. Based on Minnesota's corn and soybean acreage, estimates extrapolated from states already trying to manage this species suggest that corn and soybean production inputs could increase by as much as \$25/acre or \$3 billion dollars annually. Palmer amaranth is just one of many examples of destructive plant species that threaten Minnesota's agricultural industries and natural resources. Because of the investments made in the Noxious Weed Program this biennium, Minnesota is in a position to prevent Palmer amaranth from rapidly spreading across the state and affecting corn and soybean products.

One-time grant funds from the Environmental and Natural Resources Trust Fund of \$950,000 in FY2018-2019 have allowed the MDA to build an effective program for noxious weed eradication at the local level. This recommendation will provide more reliable and stable funding to address the protection of agricultural and conservation lands, pollinator habitats, natural areas, and other private and public lands throughout the state from the impacts of invasive terrestrial plants.

Additionally, in the past, MDA has utilized \$300,000 in funds from the emergency account for work specifically to respond to Palmer amaranth infestations.

The total short-term funding was \$2.1 million for the FY18-19 biennium and this recommendation will be a permanent investment into the support of the Noxious Weed Program.

Proposal:

The Governor recommends maintaining the Noxious Weed Program at its current level of service but through an ongoing appropriation rather than with short-term grant funds and one-time funding. This recommendation provides grants for control of noxious weeds for local governments as well as 1.5 FTE's to administer the grant program and oversee enforcement of the noxious weed law. In the first year of the grant program, 29 projects were funded at levels ranging from \$3,000 to \$25,300 for local weed control projects. Forty-two projects requesting \$820,000 were received, demonstrating the large need for these funds.

This recommendation also allows for the continuation of the noxious weed eradication and management activities by retaining 3 FTE's who implement those projects. Of the three projects supported by the Environment and Natural Resources Trust Fund, one ends on June 30, 2019 and the other two end on June 30, 2020.

Summary of budget request:

Budget Item	Per Fiscal Year	Per Biennium
Grants for local governments	\$375,000	\$750,000
1 professional staff + 0.5 clerical staff to administer grants and noxious weed law	\$125,000	\$250,000
3 professional staff for noxious weed eradication and management work	\$300,000	\$600,000
Treatment contracts, travel, etc. for noxious weed eradication and management work	\$100,000	\$200,000
Total	\$900,000	\$1.8 million

The MDA Noxious Weed Program has been shaped through consultation with the Noxious Weed Advisory Committee (MS 18.91) over the past six years and is unanimously supported by all representatives of the committee. Moreover, the proposed work compliments the activities already underway by MDA and partner agencies –the Department of Natural Resources (Invasive terrestrial and aquatic programs) and the Minnesota Department of Transportation (Integrated Vegetation Management)—and will continue to improve the implementation of the MDA and Noxious Weed Advisory Committee's statewide weed management plan.

MDA will continue to collaborate with and support the following partners through this proposal: Minnesota Association of County Agricultural Inspectors, Minnesota Association of Townships, League of Minnesota Cities, the University of Minnesota, Minnesota Department of Natural Resources, Minnesota Department of Transportation, Board of Water and Soil Resources, Minnesota Association of Soil and Water Conservation Districts, Minnesota Association of County Land Commissioners, Minnesota Nursery and Landscape Association, Minnesota Crop Improvement Association, The Nature Conservancy, Minnesota Timber Industries, and Minnesota Farmer's Union.

Equity and Inclusion:

The Department believes this initiative equally protects all citizens of the state. We would not anticipate any issues from under-represented communities or negative impacts to the Department's diversity goals.

Agriculture

FY 2020-21 Biennial Budget Change Item

Change Item Title: Meat Inspection Program

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	150	150	150	150
Revenues	0	0	0	0
Other Funds				
Expenditures	150	150	150	150
Revenues	150	150	150	150
Net Fiscal Impact = (Expenditures – Revenues)	150	150	150	150
FTEs	2	2	2	2

Recommendation:

The Governor recommends an increase of \$150,000 per year in the General Fund for the Minnesota Meat and Poultry Inspection Program at the Minnesota Department of Agriculture (MDA). This increase would be matched by the United States Department of Agriculture's Food Safety Inspection Service (USDA FSIS) as a part of the State Inspection Program's Cooperative Agreement. Because of this match, the change would add \$150,000 in state funding to the current meat program resources and generate an additional \$150,000 in federal revenue, increasing the availability of resources by \$300,000 in total. The current budget for the meat program is approximately \$3.6 million (50 percent State/50 percent Federal).

Rationale/Background:

The Minnesota Meat and Poultry Inspection Program is a State "Equal To" meat inspection program which provides food safety-based inspection services to small, local and niche processors who need inspection in order to sell their products freely in Minnesota. It is called "Equal To" because the program provides services that are equal to those provided by the USDA's FSIS. Because it meets the "Equal To" standard, the program currently receives a Federal Fund match from the USDA's FSIS which provides 50 percent of the total program funding.

Inspection Availability

State "Equal To" or USDA FSIS continuous inspection is required for meat and poultry processors and livestock producers to sell their products. The availability of these inspection services can affect these business' ability to sell products and can limit their markets. Adequate funding and staffing make for timely delivery of services. A lack of available inspection can be, and has been, a bottleneck in the local agricultural economy. The addition of new plants to the program, as well as new products and activities in existing plants, is limited by the availability of inspectors in the area. The demand for these services varies based on where the demand is, where inspectors are, and how busy the current inspectors are. When the program cannot provide an inspector, the meat processor must wait until an inspector is available, or pursue inspection with the USDA FSIS if it is available.

Because the State program is more user-friendly and size appropriate for small, local, and ethnically diverse processors, many request inspection from the State, choosing to wait for inspection services, even if the wait is expected to be long.

The Meat Inspection Program must also maintain specific standards in order to maintain its standing with the USDA FSIS and continue to receive the federal match. Daily inspections are required, including inspections of each animal slaughtered under inspection. The program must demonstrate it is meeting those standards on a routine basis. As mentioned above, inspection demand is driven by industry need. It is also driven by inspection complexity. As inspection requirements become more complex, more inspection time is needed to ensure requirements are met. When inspection time increases, existing staff are not able to perform as many quality inspections in the same amount of time as they had previously.

Figure 1. Daily Inspection Rates Over Time

The program measures “Daily Inspection Rates” on an ongoing basis to evaluate how well it is meeting expectations. The trend for the first part of federal fiscal year 2018 is included in Figure 1 (through July 31, 2018). The program achieved its goal of at least 90 percent for many weeks; however, there are also many weeks where it has not met this level. The funding would add an additional inspector to provide the resources needed to boost this inspection rate to acceptable levels, as well as support salaries for existing staff in the program.

Laboratory Capacity

Monitoring of products produced at inspected establishments for food safety pathogens is an important part of ensuring MDA’s inspection program is functioning as intended. In addition, this is also an important part of maintaining the program’s “Equal To” status. Maintaining this status can be costly due to the need to replace laboratory equipment that is aging or needs more maintenance. Additional staff are required to run increasingly complex laboratory analysis, as analysis expands from simple Salmonella and *E.coli* testing to performing tests that differentiate different types of these food safety pathogens based on their genetic profiles, species, and type. These analyses can be complex and take significant laboratory resources and supplies. Laboratory accreditation on all procedures must also now be maintained to support “Equal To” status for the Meat Inspection Program.

Proposal:

This funding will support current staff salaries and fringe equivalent to 1 FTE, the increased costs associated with laboratory supplies and equipment maintenance, and the addition 1 FTE for conducting meat inspections and performing laboratory work associated with the program. This FTE will address resource gaps as well as maintain our current level of service. The inspection program has a very low staff turnover rate (0% in Federal Fiscal 2018), with the most recent staff departure being a retirement for a part-time staff member which occurred in September 2017. All field inspection staff have been employed for at least three years with MDA. The stability of staff is a very positive part of this program as it cultivates strong, consistent working relationships with the industry. Many staff are near the tops of their salary ranges.

Existing resources also must be used efficiently and effectively to accomplish a large amount of work. Increasing complexity in inspection tasks and regulatory requirements means that inspectors must spend more time at individual plants reviewing records and documentation, rather than simply performing slaughter or sanitation

inspections. This change in inspection focus also means additional time must be spent in training –both development of adequate training for staff and conducting training—which is time consuming and resource intense. Resources and inspection personnel will have more opportunities to focus on training and outreach (as an extension of training) with the additional funding.

Laboratory resources needed to support this program have increased substantially in the past two years. Of the \$150,000 being recommended, \$50,000 would be used to support laboratory activities, including supplies and equipment maintenance as necessary. The following table shows the increases in costs of supplies seen in just the past two Federal Fiscal Years, plus the projected costs for Federal Fiscal 2019 which began in October of 2018:

	Federal FY 2017	Federal FY 2018	Federal FY 2019 - Projected
Supplies	\$ 75,886	\$ 82,879	\$ 90,000
Repairs to Equipment	\$ 20,504	\$ 19,981	\$ 30,000

Figure 2. Laboratory Costs for the Past Two Years

Equity and Inclusion:

The meat and poultry inspection program provides resources to any business that requires inspection services to sell their product in the wholesale market. Many of these services are provided to traditional, rural meat processors; however, the program is providing more and more services for a very diverse racial and ethnic community. In order to adequately serve these communities, the program must have adequate resources for inspection, as well as to be able to provide translation services as needed. Many racially diverse ethnic groups, such as Hmong or Somali, have strong agricultural routes; as such they also tend to move into agricultural professions in Minnesota, including meat processing.

As a cooperator with USDA FSIS, the State meat and poultry inspection program must provide services without discrimination and must also work to ensure that we conduct adequate outreach and education with diverse groups. Meeting this requirement is one of the standards required to maintain the “Equal To” status of this program. Having adequate resources is necessary to ensure the program can conduct the necessary inspection and outreach activities. Without adequate resources for inspection, these groups would be more likely to be found operating without the necessary inspection (“underground”), and potentially result in significant food safety related issues that come with the slaughter and processing of animals in an unsanitary environment and without the proper process controls.

IT Related Proposals:

N/A

Results:

Inspection activities are intended to ensure meat and poultry processors are meeting the regulatory requirements. As these requirements become more complex, meat inspection staff invest more effort in outreach and education, as well as inspection. To assess how well establishments and inspection staff are doing, the meat program performs routine audits, called Food Safety Assessments, of the establishments under inspection. The outcomes of these audits are used to measure how well the establishments understand and meet the requirements.

Each year, these outcomes are reviewed and compiled to assess trends and to ensure program outcomes are improving. During the past few years, the program is starting to see a significant increase in more severe enforcement outcomes, such as Notice of Intended Enforcement, which result when significant food safety hazards are identified during these audits. These actions take more inspection resources to address and often

identify gaps in outreach and other educational activities that also need to be addressed. Additional inspection resources are intended to address these issues, as well as build on current outreach efforts.

Statutory Change(s):

This proposal does not include statutory changes.

Agriculture

FY 2020-21 Biennial Budget Change Item

Change Item Title: Industrial Hemp Development Program

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	300	300	300	300
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	300	300	300	300
FTEs	2.5	2.5	2.5	2.5

Recommendation:

The Governor recommends funding from the General Fund to continue providing oversight for the regulatory and licensing responsibilities of the Industrial Hemp Development Act (MS 18K).

Rationale/Background:

Industrial hemp is still developing as a crop in Minnesota and the United States. Adequate resources in FY2020-2021 are needed for: licensing and registering growers, on-site field inspections, variety testing and agronomic research, variety development through the University of Minnesota, facilitating U.S. Department of Justice (Drug Enforcement Agency – DEA) permits, preparing for commercial production activities and rulemaking, coordinating with state and local law enforcement, and developing a regulatory framework for overseeing the statutes. In order to assist Minnesota farmers and processors with development of a viable hemp industry in the state, the Minnesota Department of Agriculture (MDA) will need to increase its role in ensuring that processes are in place to allow producers to succeed at developing viable markets, while at the same time establishing a regulatory framework that deters illegal activity.

Currently, one person oversees all of the required duties of the industrial hemp program statewide. MDA would be able to better serve hemp growers and law enforcement by adding a second FTE to assist with the large workload that this unique program requires. Moreover, MDA is expecting a significant increase in growers, processors, and marketing entities within the state over the next five years. Forty states now have active industrial hemp programs and the demand for hemp products is increasing substantially. This growing demand stresses MDA's ability to oversee the growth, cultivation, and marketing of industrial hemp with current staffing and resources. MDA believes that an additional FTE will dramatically increase the agency's efficiency and oversight of the Industrial Hemp Program. As hemp as a crop grows across the nation and competition from growers in other states. Additional support will keep Minnesota growers competitive in the marketplace.

License fees may eventually support this program, however, it is unlikely that enough fees can be collected to fully support the program until issues related to available hemp markets are resolved. Currently, the annual licensing fees collected are about 10 percent of program expenditures. However, this could change and the program can be re-evaluated before the FY22-23 biennium to determine the viability of sustaining the program through fees.

A one-time appropriation of \$400,000 was made to the MDA for this project in FY 2018-2019 but will expire on June 30, 2019. This recommendation would allow MDA the funding to administer this program.

Proposal:

The Governor recommends funding to pay for salary and benefits for two full-time program staff (\$200,000/year); supervisory and administrative support for those staff (\$40,000/year); field certification, testing, and laboratory costs (\$40,000/year); and travel and agency operating expenses such as travel and IT (\$20,000/year). The funding will arm MDA with the staff and financial resources to effectively register and certify growers, oversee regulation of pilot project and commercial production sites, support agronomic research and variety development with the University of Minnesota, ensure that all laws are being adhered to, and assist industrial hemp growers as they attempt to develop this emerging industry for an alternative cropping system in MN and throughout 40 additional states with industrial hemp programs.

Implementation of the proposed work will occur immediately upon funding. MDA has already established an Industrial Hemp Program Coordinator and has established procedures for registration and certification of growers and crop testing fields to ensure that THC levels fall below the maximum allowed limit for industrial hemp.

Due to the federal and state regulatory nature of the Cannabis plant, there is no similar or overlapping work within the agency or other agencies. MDA does work closely with the Minnesota Department of Public Safety and the federal Department of Justice. The program has also established a supportive advisory committee with representation from the Minnesota Farmer's Union, Minnesota Farm Bureau, Minnesota Industrial Hemp Lobby, University of Minnesota, Minnesota Crop Improvement, Minnesota Violent Gang and Drug Task Force, and the United Food and Commercial Workers Union.

Equity and Inclusion:

MDA believes this initiative equally protects all citizens of the state. We would not anticipate any issues from under-represented communities or negative impacts to the Department's diversity goals.

IT Related Proposals:

Agriculture

FY 2020-21 Biennial Budget Change Item

Change Item Title: Critical Core Capacity for Plant Pathogens and Pests

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	250	250	250	250
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	250	250	250	250
FTEs	2	2	2	2

Recommendation:

The Governor recommends ongoing funding in the Department of Agriculture's (MDA) General Fund operating budget to expand current capabilities for rapid detection, identification, containment, control, and management of high priority plant pests and pathogens to safeguard Minnesota's agricultural and natural systems.

Rationale/Background:

The Department of Agriculture is responsible for responding to new and emerging plant pests and pathogens affecting or threatening Minnesota's agricultural, horticultural, and natural resources. Harmful pests and pathogens have been documented to spread around the world quickly due to global pathways of distribution and these organisms can have major implications for farmers in terms of production, profitability, and ability to export. Other introduced pests have dramatically affected Minnesota's landscape.

Every year there are new organisms that threaten the production of crops and access to markets. Since 2015, several national issues have arisen which have increased the need for monitoring and analysis to quickly identify their presence in or document their absence from Minnesota. The most significant recent national issues have included: flag smut of wheat in Kansas, blackleg of potatoes in Maine, and a new species of *Xanthomonas* bacteria discovered in multiple states including Minnesota.

There are also organisms that are considered widespread at the national level, but are not yet significantly impacting Minnesota. For instance, in 2016, the Swede midge was found in Minnesota for the first time and is just beginning to cause damage at some localized sites. In other states the Swede midge has caused serious production issues for producers of crucifers such as broccoli, cabbage, and canola. Additionally, the brown marmorated stink bug and velvet longhorn borer are also on the increase in parts of Minnesota. The brown marmorated stink bug has had tremendous impacts on apple producers in the eastern U.S. and can affect a wide variety of crops. The velvet longhorn borer has been recovered from walnut wood products in rustic furniture. Federal funding can be difficult to obtain for these pests of state concern, yet more pre-emptive and responsive work is needed in Minnesota to ensure that our producers, foresters, and citizens are not surprised and harmed by these or other new plant pests.

In the FY 2018-2019 biennium, funding provided an opportunity for the plant analysis lab and the Plant Protection Division to plan for and respond to pests of state concern that are not addressed through federal grants, increased the number of plant pathogen analyses that can be conducted and correspondingly, increased surveillance efforts for pathogens that can affect production and access to markets for Minnesota producers.

Specifically, during the 2018-2019 biennium, MDA added a lab analyst who developed protocols for five high-priority lab analyses, including steps for assessing samples with unknown targets as well as completed foundational work to expand the range of available analyses in the future. This has created a base level of capability for plant analysis that did not exist in the past. Prior to this appropriation the lab was funded inconsistently through unpredictable federal grants. If received, these grants could only fund short-term employees possessing limited skill sets. As a result of this unpredictable funding, only a very narrow range of pest analyses could be conducted. The one-time appropriation also augmented the Plant Protection Division's ability to monitor for and collect samples related to insects and pathogens of state concern. Currently, the Lab Services Division does not have any other appropriations supporting this work. The Plant Protection Division General Fund appropriation is about \$1.75 million per fiscal year but this funding supports work across all areas of the Division.

The improvements in laboratory capability has allowed MDA to expand the range of pathogens that are targeted through surveys and export certification as well as increase the breadth of samples that are submitted for analysis. For example, the number of different insects and pathogens for which MDA was able to monitor increased from 54 in 2016 to 84 in 2018. MDA was also able to provide monitoring for invasive pests in small grains, soybeans, and canola. As a result, our ability to safeguard Minnesota agricultural production and access to export markets has been improved.

Proposal:

This proposal will maintain and grow the capacity that MDA has built to address insects/pathogens of state concern and provide analytical services and monitoring for important pathogens of concern to production and market access. Additionally, it will allow MDA to maintain a laboratory scientist as well as the basic infrastructure needed to respond to changing plant analysis needs.

In addition to a laboratory scientist, this appropriation will allow MDA to maintain the equivalent of one FTE working on insects and pathogens of significant state concern that could otherwise not be funded through federal projects. For instance, in the previous biennium after two incidents of rustic log furniture brought invasive wood boring insects into Minnesota, the appropriation allowed MDA to conduct a survey of furniture importers and pest control operators. Through this survey, we identified that the issue occurs more often than is reported and that there were critical gaps in the knowledge of both industries when these events occur. MDA produced and disseminated informational materials to the two impacted industries and homeowners to address this gap, to avoid similar problems in the future, and to rapidly respond to future pest introductions in these products.

MDA was also able to conduct some basic survey for the velvet longhorned beetle, Swede midge, and brown marmorated stink bug. All three of these insects are established in small areas of Minnesota but only one is widespread at a national scale. These insects require additional work to track their distribution and alert stakeholders in Minnesota before major impacts occur. MDA had the ability to monitor the distribution and abundance of these emerging threats without the availability of federal funds in the past biennium and has identified the need to continue plant pest monitoring and analysis. This additional funding would allow MDA to continue this work and give the flexibility to shift work in order to address the highest priority threats at that time.

Equity and Inclusion:

MDA believes this initiative equally protects all citizens of the state. We would not anticipate any issues from under-represented communities or negative impacts to MDA's diversity goals.

IT Related Proposals:

N/A

Results:

A key measure is MDA's capability to analyze the threat posed by new and emerging plant pests and pathogens and then to monitor and respond to their presence in a timely and effective manner.

MDA has also been able to track the spread and increase of new invasive pests of state concern. For example, MDA was able to document damage from the Swede midge in 2018 at several sites in the Twin Cities metro. During 2018, MDA held a field day for growers at an infested site to highlight the damage and how to recognize it.

During 2018, MDA has been able to track the spread of the brown marmorated stink bug into several apple orchards in the metro area. Apples are one of the crops at greatest risk from this insect. Because of this work, these growers are fully aware of the issue and will be in a position to deal with the insect before damage occurs. This was not the pattern in other areas of the country where growers took significant losses after being surprised by populations of this insect.

MDA has identified one area of the infestation of the velvet longhorn beetle in rustic furniture that is much larger than previously thought, but there could be others remaining to be found. Most importantly, a pathway through which this insect followed into Minnesota has been identified and addressed through outreach efforts by MDA.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of invasive insects and diseases monitored	54	84	2016-2018
Quantity	Number of apple orchards identified with brown marmorated stink bug	0	5	2016-2018
Results	Understanding of exotic wood borer pathway by furniture importers	Low	High	2016-2018

Agriculture

FY 2020-21 Biennial Budget Change Item

Change Item Title: Capital Equipment Replacement

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	618	539	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	618	539	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends one-time funding in FY2020-2021 for replacement of capital assets needed to protect public safety, the natural environment, and the agricultural economy for the Minnesota Department of Agriculture's (MDA) Laboratory Services Division.

Rationale/Background:

The laboratory plays a critical role in emergency response, surveillance, and consumer protection. The MDA Laboratory provides data critical for decision making on issues affecting food safety and security, the environment, plant health, and the overall agricultural sector. In order to provide this data, the laboratory must maintain an extensive array of specialized capital and non-capital equipment. The nature of laboratory work has evolved in the last twenty years to require increasingly more sophisticated equipment to meet program goals and objectives. Most analytical techniques employed in analyses require significant capital investment in laboratory equipment. This equipment is also required in order to meet regulatory standards and the objectives of our customers. The costs associated with these systems can range up to \$500,000 each.

Budgetary pressures have resulted in limited capital program expenditures or investments for maintenance and replacement of laboratory capital equipment, making it difficult to sustain the assets in a condition necessary to provide expected service levels. Deferring essential maintenance or asset replacement reduces MDA's ability to provide appropriate services. Additionally, such deferment of equipment maintenance and/or replacement will increase long-term costs and liabilities to MDA. The laboratory is currently working with equipment past its life expectancy that poses risks to protecting public safety and in performance of analytical services.

Proposal:

This proposal allows the MDA Laboratory to invest in the procurement of strategic capital equipment assets defined as those with a value over \$30,000 during the FY 2020-21 biennium. Funds allocated under this initiative benefit existing programs that depend on capital assets for sample analysis. These include all the regulatory divisions of MDA and the Division of Ecological and Water Resources at the Department of Natural Resources.

Equity and Inclusion:

MDA believes this initiative equally protects all citizens of the state. We would not anticipate any issues from under-represented communities or negative impacts to MDA's diversity goals.

Results:

Laboratory performance is measured, in part, by our ability to respond to issues as they emerge. Having reliable working equipment is critical to effective and timely response in all program areas served. The laboratory evaluates the condition of its capital equipment by tracking its depreciated capital value. The current depreciated capital value shows a trend that, if unaltered, poses risk to laboratory capability, effectiveness, and responsiveness. The Laboratory Services Division has capital assets with a received value of \$6,579,894. At the start of FY18 this equipment had a current value of \$1,888,700. As equipment ages, repair costs increase and more of our program budgets become unavailable for staffing which in turn negatively affects other performance indicators such as turnaround time and results in decreased capacity for analyses. If this trend remains unaltered, by FY22 our capital inventory will have an undepreciated value of \$665,067 putting the laboratory and the programs it serves at great risk.

Every year the MDA Laboratory will provide a plain language Capital Equipment Replacement Plan to elected officials and make available to the general public. The plan will:

- Establish each asset's condition, the remaining life of each asset, and whether they still provide the most appropriate method to deliver services.
- Outline a list of equipment that will be replaced in the upcoming fiscal year and the replacement cost of each item.
- Summary of what changes were made to the previous year's plan and the reason for the change.
- Calculate the depreciation for each year and replacement life cycle(s) along with year-to-year changes in net value of assets.
- Identify investments in new capital equipment technologies.
- Document year-to-year changes in net value of asset.

Statutory Change(s):

N/A

Agriculture

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clarify AGRI Fund Availability Dates in Budget Riders to Match Statute

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends allowing for use of funds appropriated to the Agricultural Growth, Research, and Innovation Program (AGRI) to be expanded to three years in the budget riders as is written in statute.

Rationale/Background:

The Minnesota Department of Agriculture (MDA) administers multiple grant programs where the third year of a project is critical. The AGRI Sustainable Agriculture Demonstration Grant statute (17.116) specifically states that grant projects may last up to three years. These projects typically require three growing seasons to demonstrate and share results. Similarly, the AGRI Crop Research Grant, which does not have a separate statute, funds university-level research that shows promise for delivering near term benefits to farmers. These projects have robust research components that can easily take three years (multiple growing seasons) to complete.

Proposal:

The AGRI statute, M.S. 41A.12, allows grant projects to last up to three years. AGRI budget riders for FY 2016-2017 and FY 2018-2019, however, only make funds available for two years in the second year of biennium. For example, in the FY 2018-2019 rider, funds are available until June 30, 2021. Grants entered into during the first year of biennium (July 1, 2017 to June 30, 2018) have a full three years before the funding expires. In contrast, grants entered into during the second year of the biennium (July 1, 2018 and June 30, 2019), only have two years available. This amendment is technical in nature and will bring the AGRI budget riders in line with the authorizing statute.

Equity and Inclusion:

This is a technical amendment relates to the maximum length of time a grant can be in effect and will not have an adverse impact on any group.

We do take specific efforts to ensure that the underlying grant programs reduce or eliminate disparities for Racial and Ethnic groups, Persons with Disabilities, and Veterans. Specifically, our requests for proposals (RFPs) gives preference to veteran and minority owned businesses and we ensure that our grant review committees includes members of traditionally underserved communities. For example, we reach out to the state's ethnic councils for suggested grant reviewers.

IT Related Proposals:

Results:

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Result	Livestock Investment Grant Program Leverage	\$39 M private/ \$1M state	\$52 M private/ \$2.1M state	2008 - 2017
Result	Value Added Grant Program Leverage	\$4.3M private/ \$1M state	\$18.6M private/ \$2M state	2013 - 2017
Result	Agricultural Jobs Created – Value Added Grants	54	161	2013 - 2017

Statutory Change(s):

The AGRI statute (41A.12) does not need to be changed. The requested changes are to the budget riders covering FY16-17 and FY18-19.

For FY16-17 (Laws of Minnesota, 2015 First Special Session, chapter 4, article 1, section 2, subdivision 4), should be amended as follows:

Notwithstanding Minnesota Statutes, section 16A.28, the appropriations encumbered under contract on or before June 30, 2017, for agricultural growth, research, and innovation grants are available until June 30, ~~2019~~ 2020.

For FY18-19 (Laws of Minnesota 2017, chapter 88, article 1, section 2, subdivision 4), should be amended as follows:

Notwithstanding Minnesota Statutes, section 16A.28, the appropriations encumbered under contract on or before June 30, 2019, for agricultural growth, research, and innovation grants are available until June 30, ~~2021~~ 2022.

Agriculture

FY 2020-21 Biennial Budget Change Item

Change Item Title: Payment for Wolf Depredation Claim Valuations

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends that up to \$5,000 from funds designated for reimbursing livestock producers for losses due to wolves be eligible for payment to U of M Extension for time spent providing valuations for livestock lost.

Rationale/Background:

When livestock producers have losses due to wolf depredation they are eligible for payments to recoup their losses after they have been documented to be due to wolves and a market value for the loss has been assigned. Documentation of wolves as responsible for losses is done by conservation officers, United States Department of Agriculture Animal and Plant Health Inspection Service (USDA APHIS) Wildlife Services personnel, and in some instances by county sheriffs as part of their regular duties. Market valuations are provided by University of Minnesota Extension livestock experts. However, due to the county based structure of the U of M Extension, it becomes problematic for livestock experts to use their work time paid for by their home county to value losses incurred in other counties. Many counties with wolf populations do not have Extension livestock experts in residence. As a result, the Minnesota Department of Agriculture (MDA) must pay U of M Extension for this service out of state General Funds.

Funds are appropriated to MDA annually for the compensation of livestock losses to wolves. For FY 2018-2019, \$175,000 was appropriated for each year. In most years, livestock losses do not reach this level. In 2017 and 2018 there was approximately \$33,000 of these money left unspent in claims, however funds from this appropriation can be shared with a similar appropriation for crop damage from elk.

Proposal:

The Governor recommends that the appropriation language be amended to allow MDA to pay U of M Extension up to \$5,000 for market valuation of losses due to wolves. This would be consistent with a change made in 2017 to the elk depredation funds which allows MDA to pay agents who evaluate and submit farmer claims. This change would allow MDA to cover this program cost out of the appropriation that is designated to pay claims for the program.

Equity and Inclusion:

The Department believes this initiative equally protects all citizens of the state. We would not anticipate any issues from under-represented communities or negative impacts to the Departments diversity goals.

IT Related Proposals:

Results:

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Wolf claims need valuations	94	113	2017-2018

Statutory Change(s):

For FY18-19 (Laws of Minnesota 2017, chapter 88, article 1, section 2, subdivision 2g), should be amended as follows:

(g) \$175,000 the first year and \$175,000 the second year are for compensation for destroyed or crippled livestock under Minnesota Statutes, section 3.737. This appropriation may be spent to compensate for livestock that were destroyed or crippled during fiscal year 2017. If the amount in the first year is insufficient, the amount in the second year is available in the first year. The commissioner may use up to \$5,000 of this appropriation each year to reimburse expenses incurred by university extension educators to provide fair market values of destroyed or crippled livestock.

Agriculture

FY 2020-21 Biennial Budget

Change Item Title: Clean Water Fund—AgBMP Loan Program

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	75	75	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	75	75	0	0
FTEs	0.5	0.5	0	0

Recommendation:

The Governor recommends funding from the Clean Water Fund to provide revolving low interest loans from the AgBMP Loan Program for eligible activities that reduce or eliminate water pollution. The program is administered by local governments, has very low transaction costs, and repayments fund additional projects. Proposed funding will provide for continued 0.5 FTE staff funding to administer the program.

Rationale/Background:

The AgBMP loan program provides low interest loans to farmers and rural landowners to help finance practices, structures, and other improvements that reduce or eliminate water pollution. This loan program is administered by local governments, has very low transaction cost, and as loans are repaid, the repayments are used to fund additional projects. The goal of the AgBMP Loan Program is to implement recognized management practices with proven environmental benefits.

Proposal:

The AgBMP Loan Program is a well-established program to provide funding to address non-point source water quality issues. AgBMP loans are used to fund practices that prevent, reduce, or eliminate a nonpoint source water pollution problems in rural Minnesota, whether on a farm, a residence or business, an unsewered community, or a lakeside cabin. Funded projects typically include manure management, feedlot improvements, septic system upgrades, purchase of conservation tillage equipment, erosion control structures, and the repair or relocation of drinking water wells.

Equity and Inclusion:

The Minnesota Department of Agriculture does not believe this proposal will adversely impact any disadvantaged communities.

IT Related Proposals:

This is not an IT proposal.

Results:

Results will be measured by the number of loans issued, conservation practices implemented, and private dollars leveraged. The number of local governments who collaborate will also be tracked. Results will also be measured by reduction in nutrients, sediment, bacteria, and other pollutants. This is estimated by multiplying the number of practices installed by pollutant load reduction numbers from peer reviewed articles.

In addition, all Clean Water Fund activities include performance measures published in the Clean Water Fund Performance Report. MDA and other agency-specific performance measures are also tracked by project staff and reported on the *Minnesota's Legacy* website.

Statutory Change(s):

No statutory change is required.

FTEs	1.25	1.25	0	0

Recommendation:

The Governor recommends funding from the Clean Water Fund to provide ‘pass through funding’ from the Minnesota Department of Agriculture (MDA) to research institutes and organizations that are developing agricultural best management practices (BMPs). Additionally, funding will go to research that quantifies agricultural contributions to impaired waters with a focus on gaining a better understanding of the processes that underlie these contributions. BMPs will be developed and evaluated to protect and restore water resources while maintaining farm profitability.

Rationale/Background:

There is a need for current and accurate scientific data on the environmental impacts of agricultural practices as well as the need to develop or revise conservation practices that reduce environmental impacts while maintaining farm profitability. Research project results will also be used to validate models and computer simulations and are referenced in most Watershed Restoration and Protection Strategies (WRAPS) and Total Maximum Daily Load (TMDL) studies. The Agricultural Research and Evaluation Program evaluates the effectiveness of agricultural conservation practices, identifies underlying processes that affect water quality, and develops technologies to target critical areas of the landscape. Through technical assistance activities, the MDA shares results from research projects. The goal is to translate scientific information into positive actions that protect and restore Minnesota waters.

Proposal:

The Agricultural Research/Evaluation Program researches and evaluates practices and technologies that will protect and improve water quality. This program is intended to answer questions regarding processes and practices that can lead to clean water such as:

- Where pollutants coming from and what is the magnitude of each source?
- How will we improve water quality? Which practices work best? What are the costs and benefits?
- Where in the landscape should conservation practices be placed?
- What tools can local resource managers use to focus limited funds?

Equity and Inclusion:

The MDA does not believe this proposal will adversely impact any disadvantaged communities.

IT Related Proposals:

This is not an IT proposal.

Results:

Results will be evaluated by whether research is integrated into multi-agency efforts to protect and restore Minnesota waters such as TMDL and WRAPS reports. Long term success will be achieved when research is adopted for such activities such as targeting of conservation practices and implementation of water quality practices such as cover crops.

In addition, all Clean Water Fund activities include performance measures published in the Clean Water Fund Performance Report. MDA and other agency-specific performance measures are also tracked by project staff and reported on the *Minnesota's Legacy* website.

Statutory Change(s):

No statutory change is required.

Agriculture

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund—Monitoring of Pesticides in Surface Water and Groundwater

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	350	350	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	350	350	0	0
FTEs	2.41	2.41	0	0

Recommendation:

The Governor recommends funding from the Clean Water Fund for the Monitoring of Pesticides in Surface Water and Groundwater Program to provide ongoing pesticide monitoring using Clean Water Fund-sponsored state-of-the-art laboratory instruments which provide increased capability and greater capacity. Funding is also used to support staff positions that process and analyze pesticide samples.

Rationale/Background:

This program activity monitors and assesses pesticides in surface and groundwater to ensure water quality standards are met. Pesticides are frequently detected in surface water and groundwater and can be a source for surface water impairments and pose a risk for drinking water. Having reliable long-term data about pesticides in surface water and groundwater is extremely important for informed decision-making about imposing or removing restrictions on pesticide use to protect the environment. Long-term pesticide monitoring allows for the evaluation of trends to protect water quality based on monitoring results. Results indicate whether the water resource is being protected by having low or no pesticide detection findings or if restoration is needed based on monitoring results such as pesticide exceeding a threshold or if an upward trend is found.

Proposal:

The Governor recommends project funding to provide the Minnesota Department of Agriculture (MDA) a greater capacity to continue to effectively monitor the waters of the state for pesticide contamination. Having reliable long-term data on concentration trends for pesticides in surface water and groundwater is extremely important for informed decision-making on imposing or removing restrictions on pesticide use to protect the environment which are ongoing issues of public concern.

Equity and Inclusion:

The MDA does not believe this proposal will adversely impact any disadvantaged communities.

IT Related Proposals:

This is not an IT proposal.

Results:

Clean Water funding for the Monitoring of Pesticides in Surface Water and Groundwater Program has increased the capability of the MDA's pesticide laboratory. It has allowed the MDA to increase the number of detectable pesticides from 44 in 2009 to 150 in 2017, increase the sensitivity of detection of certain pesticides, and increase the overall number of samples that can be analyzed on an annual basis. The increased laboratory capacity has

allowed the MDA to provide cooperative pesticide monitoring and assessment with other state agencies (MDH and MPCA) on lakes, wetlands, and public water supply systems.

In addition, all Clean Water Fund activities include performance measures published in the Clean Water Fund Performance Report. MDA and other agency-specific performance measures are also tracked by project staff and reported on the *Minnesota's Legacy* website.

Statutory Change(s):

No statutory change is required.

Agriculture

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund—Forever Green Initiative

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	1,650	1,650	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,650	1,650	0	0
FTEs	0	0	0	0

Recommendations:

The Governor recommends funding from the Clean Water Fund for the Forever Green Initiative (FGI) at the University of Minnesota for research, implementation, and partnership development. Funding will be used for 1) empirical research related to crop breeding, genetics, genomics, agronomy, food science, and economic aspects of Forever Green crops; 2) implementation of these new crops in targeted, critical areas of the landscape, including wellhead protection areas; and 3) to support working relationships between public, private, and non-profit sectors that are critical to development of new production systems that feature perennial and winter annual crops.

Rationale/Background:

The FGI brings researchers from multiple departments together including plant breeding, agronomy, food science, and economics. FGI's goal is to develop new high-value commodity crops and cropping systems that preserve and enhance water quality and to support development of new supply chains that provide profitable markets for these crops. Examples of FGI crops include intermediate wheatgrass, pennycress, camelina, and winter barley. The crops listed, and others in the FGI portfolio, are now ready for a focused effort to accelerate their commercialization and wide adoption through a concerted and strategic public-private effort.

Many of the new FGI crops could fit into a corn and soybean rotation to provide soil and water protection and new economic opportunity for rural Minnesota. Perennial crops provide continuous cover on the land, while winter annuals and cover crops grow between the time when annual crops are harvested in the fall and a new planting is established in the spring. This is the time when fields are bare and most vulnerable to erosion and nutrient loss.

Proposal:

FGI will provide research on new crops and systems that are protective of water quality. The Minnesota Department of Agriculture (MDA) will also work with researchers at the University of Minnesota and local partners (SWCDs, cities, counties, etc.) to identify opportunities to get perennials and winter annuals out onto vulnerable areas of the landscape. Priority will be given to areas with vulnerable groundwater or surface water and where leverage of other public and private funds are available.

An approximate itemization of these activities for FY20-21:

\$2.5 million for research, \$500,000 for implementation, and \$300,000 for partnership development. Funding will be 100 percent pass through to project partners. All staff time at the MDA is considered in-kind and no charges will be assessed. In addition to continuation of research and implementation, FY 20-21 funding will support a

Steering Council and Network which will provide critically needed coordination and facilitation between all stakeholders involved in the Forever Green Initiative. The goal is new working relationships between public, private, and non-profit sectors that are critical to development of new production systems that feature perennial and winter annual crops.

Equity and Inclusion:

The MDA does not believe this proposal will adversely impact any disadvantaged communities.

IT Related Proposals:

This is not an IT proposal.

Results:

Success will result in planting of Forever Green developed crops and cropping systems that result in significant adoption on the Minnesota landscape.

In addition, all Clean Water Fund activities include performance measures published in the Clean Water Fund Performance Report. MDA and other agency-specific performance measures are also tracked by project staff and reported on the *Minnesota's Legacy* website.

Statutory Change(s):

No statutory change is required.

Agriculture

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund—Impaired Waters Technical Assistance

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	1,625	1,625	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,625	1,625	0	0
FTEs	7.0	7.0	0	0

Recommendation:

The Governor recommends funding from the Clean Water Fund for the Technical Assistance Program to provide technical assistance and on-farm demonstrations to support the adoption of conservation practices that protect and improve water quality. This funding helps ensure accurate scientific information is available and used to address water quality concerns in agricultural areas.

Rationale/Background:

Technical assistance activities are a primary vehicle to work with the agricultural community to promote best management practices. This funding is used to evaluate conservation practices, share information about research and new technologies, and enhance outreach and education to the agricultural community and local government partners. Technical assistance also fills an important need for field demonstration and validation of practices. The Minnesota Department of Agriculture (MDA) uses on-farm, edge-of-field monitoring to assess sediment and nutrient loss at the field-scale and to evaluate the effectiveness of conservation practices. New and existing conservation practices are evaluated at these sites including practices that have been developed or studied within MDA's Clean Water Agricultural Research/Evaluation Program. MDA works with many partners including universities, crop consultants, soil and water conservation districts, farmers, and state agencies. Technical assistance and on-farm demonstration should result in increased adoption of conservation practices protective of water quality. Examples of projects include: Discovery Farms Minnesota, Root River Field to Stream Partnership, Nutrient Management Initiative, Red River Valley Drainage Water Management, and the Clay County Drainage site.

Proposal:

The Governor recommends funding in the form of pass through money from MDA to local governments. Funding also supports the existing conservation delivery system. MDA's technical assistance activities helps translate information from research and on-farm demonstrations with a goal to develop and promote conservation practices that protect and restore water quality.

Equity and Inclusion:

The MDA does not believe this proposal will adversely impact any disadvantaged communities.

Results:

MDA has engaged more than 3,000 agricultural producers, crop advisers, and local government partners through approximately 150 education and outreach events (2013-2017) and manages 42 edge-of-field monitoring stations through four major on-farm demonstration programs. Results from these edge-of-field sites are used for outreach

and education to calibrate computer simulations models (PTMApp, Adapt-N, SWAT, and the Runoff Risk Advisory Tool) and to directly support the Water Quality Framework.

In addition, all Clean Water Fund activities include performance measures published in the Clean Water Fund Performance Report. MDA and other agency-specific performance measures are also tracked by project staff and reported on the *Minnesota's Legacy* website.

Statutory Change(s):

No statutory change is required.

Agriculture

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund—Irrigation Water Quality Protection

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	385	385	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	385	385	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends funding from the Clean Water Fund to provide an irrigation water quality specialist position through a contract with the University of Minnesota Extension. The water quality specialist develops guidance and provides education on irrigation and nitrogen best management practices (BMPs) for Minnesota irrigators. Many farmers, particularly those newly implementing irrigation, will benefit from increased education, training, and direct support. A new proposed activity in FY20-21, complementary to the efforts of the irrigation water quality specialist, is \$500,000 of funding to support expansion of the Irrigation Management Assistant (IMA) scheduling tool to make it a statewide resource for Minnesota Irrigators.

Rationale/Background:

Irrigation of row crops is a potential source of nitrate in groundwater especially in the areas with coarse-textured (sandy) soils which are highly vulnerable to groundwater contamination. These soils are common in central Minnesota. There are many farmers, particularly those newly implementing irrigation, who would benefit from increased education on irrigation and nitrogen BMPs. This funding supports an irrigation water quality specialist who will develop guidance and provide education on irrigation, such as irrigation scheduling, and nitrogen BMPs. This position is located at the University of Minnesota Extension.

The need for an Irrigation Specialist was identified as a critical need by the irrigation community and other agricultural stakeholders to provide education and technical assistance on irrigation and nitrogen management.

Proposal:

Continued funding will support the Minnesota Department of Agriculture's (MDA) ongoing efforts and enable the implementation of irrigation BMPs to protect groundwater. Activities led by an irrigation specialist are critically important for protecting groundwater from a major source of nitrate contamination in sensitive areas. Nitrate is one of the contaminants of greatest concern in Minnesota's groundwater. Nitrate losses from irrigation of nitrogen demanding crops (such as corn, potatoes, and edible beans) is a potential source of nitrate in groundwater. Of new funding, \$500,000 in FY20-21 is for the development and statewide expansion of the Irrigation Management Assistant (IMA) tool. The IMA is an on-line agricultural irrigation scheduling system. It is anticipated that this portion will be a one-time appropriation what will not be continued into FY22-23.

Equity and Inclusion:

The MDA does not believe this proposal will adversely impact any disadvantaged communities.

IT Related Proposals:

This is not an IT proposal.

Results:

Results will be measured by the number of irrigators who receive information and subsequently adopt water and nitrogen management practices. Results will also be measure by the number of local governments and other agricultural stakeholders who collaborate in this effort.

In addition, all Clean Water Fund activities include performance measures published in the Clean Water Fund Performance Report. MDA and other agency specific performance measures are also tracked by project staff and reported on the Minnesota's Legacy website.

Statutory Change(s):

No statutory change is required.

Agriculture

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund—Minnesota Agricultural Water Quality Certification Program

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	3,000	3,000	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	3,000	3,000	0	0
FTEs	7.4	7.4	0	0

Recommendation:

The Governor recommends funding from the Clean Water Fund for the Minnesota Agricultural Water Quality Certification Program (MAWQCP) that combines the technical expertise and financial resources of federal and state government to address water quality in agricultural areas. This first of its kind program is a federal-state partnership between Minnesota Department of Agriculture (MDA), the United States Department of Agriculture (USDA) and the Environmental Protection Agency (EPA). A majority (65 percent) of the requested funding is passed through to local governments to provide technical assistance and implementation funds. State dollars maintain a federal match of \$9 million for FY16-FY19, with a renewal application due to USDA in early 2020.

Rationale/Background:

Agriculture is a key and core industry in Minnesota's economy that can function to improve or harm water quality. The MAWQCP is a voluntary program designed to accelerate adoption of on-farm conservation practices that protect and improve Minnesota's lakes, rivers, streams, and groundwater. The MAWQCP is designed to identify and mitigate risks to water quality on a whole farm basis, thereby correcting potential harm and generating improvement to water quality.

Producers who implement and maintain approved farm management practices will be certified and in turn assured that their operation meets the state's water quality goals and standards for a period of 10 years. Certification will give farmers and the public greater certainty about conservation achievements and regulatory standards.

Proposal:

MDA and its partners are actively enrolling farmers in the MAWQCP statewide and this funding will support current ongoing efforts that are needed to support: 1) program expansion generated by public/private partnership agreements and 2) meeting the increased demand for certification and conservation services and resources by Minnesota's farms.

Additionally, the program has had broad expansion in participation, private partnerships, and new proposals for credit trading and other potential mechanisms for using MAWQCP's unique structure, requiring new resources. The integration of program outreach and delivery of services through private industry partners established in multiple formal agreements are providing both a significant increase in capacity for producer interaction and a higher demand for management of increased, new, and further dispersed program operations. This creates additional financial and staffing resource demands. This recommendation therefore includes an increase of \$500,000 per year for to address these demands.

Equity and Inclusion:

The MDA does not believe this proposal will adversely impact any disadvantaged communities.

IT Related Proposals:

This is not an IT proposal.

Results:

MAWQCP acres will increase and conservation practices will be implemented which will result in improvements to water quality. An increase in certified acres will ensure that farming practices are protective of water quality. Nutrients (nitrogen and phosphorous) and soil loss and sediment models are used to show the estimated annual reductions in these pollutants.

In addition, all Clean Water Fund activities include performance measures published in the Clean Water Fund Performance Report. MDA and other agency-specific performance measures are also tracked by project staff and reported on the *Minnesota's Legacy* website.

Statutory Change(s):

No statutory change is required.

Agriculture

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund—Nitrate in Groundwater

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	2,585	2,585	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,585	2,585	0	0
FTEs	13.0	13.0	0	0

Recommendation:

The Governor recommends funding from the Clean Water Fund to allow the Minnesota Department of Agriculture (MDA) and local partners to reduce the contamination of groundwater due to the use of nitrogen fertilizer and support a variety of project activities that target nitrate in groundwater. Clean Water Funds will include support for: private well testing; best management practices (BMP) promotion; demonstration and adoption; increased education; technical support; and training and direct support at the University of Minnesota Extension and local advisory teams.

Rationale/Background:

Nitrate is one of the contaminants of greatest concern for groundwater in Minnesota. In some shallow vulnerable aquifers, a significant percentage of the drinking water wells exceeds the drinking water standard. In 2015, the MDA revised the state Nitrogen Fertilizer Management Plan (NFMP) to address nitrate contamination of groundwater. MDA will target efforts to vulnerable areas to help prevent groundwater from becoming degraded. MDA works in close partnership with local governments and other local stakeholders.

Proposal:

The Governor recommends funding that will go towards the implementation of the Nitrogen Fertilizer Management Plan (NFMP) which is the state's blueprint for addressing nitrate in groundwater. Implementing these NFMP activities will result in prevention and mitigation of groundwater from exceeding the health standard for nitrate. These efforts include:

- Working with the University of Minnesota and other partners to refine and demonstrate BMPs to protect groundwater;
- Pass through funding to local government to develop and implement locally led nitrogen BMP promotion and evaluation projects;
- Monitoring of private wells for nitrate;
- Working with local governments and farmers to improve water quality in areas that have nitrate levels above the drinking water standard in groundwater; and
- Conducting farm surveys to evaluate on-farm adoption of BMPs.

Equity and Inclusion:

The MDA does not believe this proposal will adversely impact any disadvantaged communities.

IT Related Proposals:

This is not an IT proposal.

Results:

Results will be measured by the number of areas monitored and assessed for nitrate in groundwater and the subsequent prevention and mitigation activity that will occur in those areas. Success will also be measured by the number of local farmers, agricultural organizations, and local governments who collaborate in this effort.

Successful implementation of the NFMP will result in reduction in groundwater contamination from nitrate and safe drinking water in those targeted areas.

In addition, all Clean Water Fund activities include performance measures published in the Clean Water Fund Performance Report. MDA and other agency-specific performance measures are also tracked by project staff and reported on the *Minnesota's Legacy* website.

Statutory Change(s):

No statutory change is required.

Agriculture

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund—Pesticide Testing of Private Wells

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	1,000	1,000	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,000	1,000	0	0
FTEs	2.75	2.75	0	0

Recommendation:

The Governor recommends funding from the Clean Water Fund for the Pesticide Testing of Private Wells Program within the Department of Agriculture (MDA) to identify, monitor, and assess the presence of pesticides in private wells in vulnerable areas of the state.

Rationale/Background:

Citizens may be concerned if pesticides are in their drinking water, especially when nitrate has been detected. Pesticide testing of private wells will address this concern. Due to lack of monitoring, there is limited information on the presence of pesticides in private wells where nitrate is found. Pesticide monitoring of private wells will provide data that can be analyzed to determine the type, concentration, and frequency of pesticides in private wells.

Proposal:

Under the Nitrogen Fertilizer Management Plan (NFMP), all private wells in townships with vulnerable groundwater are offered a free nitrate test through MDA's Township Testing Program. When nitrate is detected, homeowners will also be offered a free pesticide test that provides additional information on the potential health risk from the presence of pesticides in groundwater. Funding is also used to support staff positions who collect private well water samples and for a private laboratory to analyze these samples for a suite of pesticides.

Equity and Inclusion:

The MDA does not believe this proposal will adversely impact any disadvantaged communities.

IT Related Proposals:

This is not an IT proposal.

Results:

The pesticide testing of private wells program will result in increased monitoring of private wells for pesticides and better informed well owners.

In addition, all Clean Water Fund activities include performance measures published in the Clean Water Fund Performance Report. MDA and other agency-specific performance measures are also tracked by project staff and reported on the Minnesota's Legacy website.

Statutory Change(s):

No statutory change is required.

Agriculture

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund—Research Inventory Database

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	50	50	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	50	50	0	0
FTEs	0.6	0.6	0	0

Recommendation:

The Governor recommends funding from the Clean Water Fund for the Minnesota Water Research Digital Library (MNWRL) to support a user-friendly, searchable inventory of water research relevant to Minnesota. This funding will support Minnesota Department of Agriculture (MDA) staff that administer MNWRL.

Rationale/Background:

Water research that is relevant to Minnesota may not be easy to access or available to water resource professionals who could use this information. The MNWRL is a user-friendly, searchable inventory of water research relevant to Minnesota, including both peer reviewed articles as well as white papers and reports. The Library provides one-stop access to all types of water research, enabling users to find, share, and coordinate research to support their efforts to protect, conserve, manage, and restore water in Minnesota.

Proposal:

The MNWRL includes over 2,700 diverse research articles and scientific reports. The MNWRL is intended to provide easy access to a broad collection of water research. The MDA will provide support and training for partner organizations and conduct intensive outreach to Minnesota's water and research organizations and communities that use this resource.

Equity and Inclusion:

The MDA does not believe this proposal will adversely impact any disadvantaged communities.

IT Related Proposals:

This is not an IT proposal.

Results:

This user-friendly searchable inventory provides agency staff, researchers, water planners, and the public with fast access to all types of research relevant to water management in Minnesota. The inventory will grow steadily from its current base of over 2,700 articles (FY 18), increasing the utility of research that was previously scattered across many websites, reports, and journals.

In addition, all Clean Water Fund activities include performance measures published in the Clean Water Fund Performance Report. MDA and other agency-specific performance measures are also tracked by project staff and reported on the *Minnesota's Legacy* website.

Statutory Change(s):

No statutory change is required.

Program: Protection Services

Activity: Pesticide and Fertilizer Management Division

<http://www.mda.state.mn.us/pesticide-fertilizer/pesticide-fertilizer>

AT A GLANCE

- In partnership with all Minnesota counties, collected over 500,000 pounds of waste pesticides in 2017, and over 8 million pounds of waste pesticides have been collected since 1990.
- In our 28 year history, over \$41 million from the Agricultural Chemical Response & Reimbursement Account has been spent to reimburse persons for the environmental cleanup of ag chemicals.
- Funded over \$1.1 million annually for fertilizer research, directed by a council of agriculture organizations.
- Monitored groundwater (690 samples at 168 locations) and surface water (1,218 samples at 208 locations) for pesticides in 2017
- Pesticide monitoring of groundwater since 1985 and surface water since 1991, now analyzing for 150 different chemicals

PURPOSE & CONTEXT

The Pesticide and Fertilizer Management Division is responsible for almost all aspects of fertilizer and pesticide regulation in Minnesota as well as many other water resources protection efforts.

We support the agency's mission by regulating pesticides and fertilizers to ensure the integrity of our food supply, implementing programs that protect and improve the health of our environment, and managing a regulatory system that instills confidence and consistency in support of a strong agricultural economy.

SERVICES PROVIDED

We have broad responsibilities in the regulation of pesticides and fertilizers as it relates to ensuring water quality and protection of the environment. We have a wide variety of services, regulatory activities and voluntary programs that are listed below.

- Inspections
- Pesticide/fertilizer training, licensing, and permitting
- Emergency response 24/7
- Site cleanups and Superfund administration
- Anhydrous ammonia (AA) regulation
- Commercial manure application licensing
- Pesticide and fertilizer use surveys
- Pesticide misuse investigations
- Best Management Practices (BMP)
- Discovery Farms technical support
- Reimbursement for cleanups
- Actions to protect pollinators in both urban and rural settings
- Pesticide Management Plan implementation
- Nitrogen Fertilizer Management Plan implementation
- Groundwater monitoring for pesticides and nitrates
- Surface water monitoring for pesticides and nitrates
- Free waste pesticide collection for agricultural and urban users
- Soil and manure laboratory certification
- Research funding for fertilizer impact on water quality
- Agriculture Water Quality Certification for farmers and landowners
- Nitrate water quality technical support for municipalities
- Anhydrous Ammonia private inspector certification

RESULTS

- **Pesticide Inspections.** Inspections of pesticide facilities are designed to correct violations and assist in compliance. Our electronic/paperless Compliance Information System (CIS) results in more timely, comprehensive and consistent inspections.
- **Waste Pesticide Collections.** The Minnesota Department of Agriculture has conducted Waste Pesticide Collections since the early 1990s. Since 2001, the majority of the waste pesticide has been generated in urban settings. Agricultural waste pesticides have decreased due to changes in technology, packaging, and stewardship.
- **Pesticide Licensing.** The Minnesota Department of Agriculture has been investing in online electronic pesticide testing tools and additional testing locations that have drastically reduced the time it takes for the 12,823 commercial and non-commercial pesticide applicators in MN to begin work after passing their test to demonstrate competency.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Pesticide inspections of various facilities, dealers, and sites	270	268	FY16 to FY17
Quantity	Pounds of waste pesticides collected	400,000	500,770	FY16 to FY17
Quantity	Wait time to receive pesticide license during peak licensing season	5 weeks	10 days	FY16 to FY17

Program: Protection Services
Activity: Plant Protection Division

<http://www.mda.state.mn.us/plants-insects>

AT A GLANCE

- 29 million units of corn and soybeans and 112 million hundredweights of other agricultural seed sold under state permit in 2017
- \$11 billion in grain purchased and over 290 million bushels stored under grain licenses and bonds during 2017
- 249 nursery growers certified and 1,954 dealers inspected to ensure nursery stock sold in Minnesota is free of serious plant pests during 2017
- \$300,000 in grants awarded to local governments for management of noxious weeds in FY18
- Assisting Minnesota counties, townships, and cities with the enforcement of noxious weed issues statewide, costing \$4 million dollars annually or approximately \$170,000/county
- During FY18, \$138,000 paid in claims for wolf depredation and \$120,000 granted to producers for predation prevention programs
- Spread of emerald ash borer held to 1/3 the national average despite 10 years of infestation
- Eight firewood producers certified to offer heat-treated, pest-free firewood to help slow the spread of emerald ash borer and gypsy moth

PURPOSE & CONTEXT

The Plant Protection Division (PPD) has two broad areas of responsibility. First, PPD is responsible for detecting, excluding, containing, and managing invasive or exotic plant pests that threaten both agriculture and Minnesota's forests and the environment. Second, PPD inspects and certifies agricultural commodities for export, grade and freedom from specific pests. These activities contribute to the mission of the agency by protecting agriculture and the environment from pest threats and by verifying the quality of Minnesota products for sale or export. Minnesota farmers are protected by grain bonds, seed labeling laws and inspection, noxious weed programs and many other PPD programs designed to protect public and private land as well as critical pollinator habitat.

SERVICES PROVIDED

We ensure that seeds and plants sold, planted, exported, or stored in Minnesota meet purity, viability, and health standards, and that the environmental, societal, and recreational impacts of plant pests such as noxious weeds, gypsy moth, and emerald ash borer are reduced or eliminated.

These goals are achieved by:

- Inspecting and certifying plants and plant parts (such as seed, grain, fruit, logs, and lumber). Inspection and certification programs ensure Minnesota's plant commodities meet standards for import and export requirements, germination and purity of seeds, health of nursery stock, and the absence of harmful plant pests.
- Excluding, eradicating, or managing plant pests that threaten Minnesota's agriculture or environment. We keep Minnesota as free as possible from harmful plant pests. Our survey, audit, regulatory, quarantines, and treatment programs benefit farmers, the forest and recreation industries, and conservation plantings including critical pollinator habitat and the general public.

Fee-generated dedicated funds comprise over 45 percent of the division activities and about 25 percent of activities are funded through federal and state grants from the Environment and Natural Resources Trust Fund. The remaining 30 percent of our funds are from the state General Fund, of which about 20 percent of those are one-time appropriations for the FY18-19 biennium.

RESULTS

- Minnesota plant products are exported to markets without delays, during 2017, 1.6 billion pounds of agriculture products were certified for export to 70 countries by 136 Minnesota companies.
- Produce for sale is quickly inspected, during 2017, 1.2 billion pounds of potatoes and 21.1 million pounds of fruits and other vegetables were inspected.
- Nursery stock, seeds, and seed potatoes sold in Minnesota are viable and free of serious plant pests. Routine inspections of 250 seed retailers and 1,858 seed samples tested for quality during 2017 demonstrated that 95% of seed is accurately labeled in the state and 4 seed lots contained Palmer amaranth, a prohibited noxious weed seed
- Invasive plant pests are kept out of Minnesota and their impacts on agriculture and the environment are minimized, for example the spread of gypsy moth was reduced by over 40% by placing 20,000 gypsy moth survey traps and treating 76,000 acres to slow the advancing gypsy moth population.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>

M.S. Section 3.737 (<https://www.revisor.mn.gov/statutes/?id=3.737>) and 3.7371

(<https://www.revisor.mn.gov/statutes/?id=3.7371>) provides the authority to compensate farmers and landowners for loss caused by wolf or elk.

M.S. Section 17.445 (<https://www.revisor.mn.gov/statutes/?id=17.445>) provides the authority to provide apiary inspection services for interstate commerce

M.S. Chapter 18F (<https://www.revisor.mn.gov/statutes/cite/18F>) provides authority to issue permits for release of genetically engineered organisms

M.S. Chapter 18G (<https://www.revisor.mn.gov/statutes/?id=18G>) provides the authority to exclude and manage invasive and exotic plant pests and to certify commodities for export

M.S. Chapter 18H (<https://www.revisor.mn.gov/statutes/?id=18H>) provides the authority to inspect and certify nursery dealers and growers

M.S. Chapter 18J (<https://www.revisor.mn.gov/statutes/cite/18J>) defines enforcement procedures for violations of Chapters 18G, 18H, 18K, 27, 223, 231, and 232; sections [21.80](#) to [21.92](#); and associated rules.

M.S. Chapter 18K (<https://www.revisor.mn.gov/statutes/cite/18K>) provides authority to implement an industrial hemp pilot program

M.S. Section 18.75-91 (<https://www.revisor.mn.gov/statutes/?id=18.75>) provides the authority to administer a state noxious weed program

M.S. Chapter 21.71-78 (<https://www.revisor.mn.gov/statutes/cite/21.71>) provides the authority to inspect and certify seed potatoes.

M.S. Section 21.80-92 (<https://www.revisor.mn.gov/statutes/?id=21.80>) provides the authority to inspect seeds for distribution and enforce seed label requirements.

M.S. Chapter 27 (<https://www.revisor.mn.gov/statutes/?id=27>) provides the authority to provide a wholesale produce dealer bonding program.

M.S. Chapter 223 (<https://www.revisor.mn.gov/statutes/?id=223>) provides the authority to provide a bond program for grain.

M.S. Chapter 230 (<https://www.revisor.mn.gov/statutes/cite/230>) provides authority to mediate disputes between elevators or other buying or storing sites of agricultural commodities and railroads

M.S. Chapter 231 (<https://www.revisor.mn.gov/statutes/?id=231>) provides the authority to provide a bond program for warehouses

Program: Protection Services

Activity: Laboratory Services Division

<http://www.mda.state.mn.us/laboratory-services>

AT A GLANCE

For Fiscal Year 2018:

- Performed 8,293 tests for 8,421 analytes (an organism or chemical constituent of a sample) on 3,830 samples for MDA's Dairy and Meat Inspection Division;
- Performed 12,946 tests for 153,643 analytes on 8,646 samples for MDA's Pesticide and Fertilizer Inspection Division;
- Performed 21,817 tests for 41,364 analytes on 2,116 samples for MDA's Plant Protection Division;
- Performed 11,112 tests for 11,138 analytes on 4,185 samples for the Food and Feed Safety Division.
- Performed 14,241 tests for 15,163 analytes on 4,658 samples for the Department of Natural Resources.

PURPOSE & CONTEXT

The Laboratory Services Division's goal is to furnish scientifically and legally defensible testing that supports the Minnesota Department of Agriculture's (MDA) agency objectives. These activities are critical to the protection of Minnesota's food supply, agricultural industry, and natural environment.

SERVICES PROVIDED

The Laboratory Services Division provides analytical testing primarily for:

- MDA Dairy and Meat Inspection Division
- MDA Food and Feed Safety Division
- MDA Pesticide and Fertilizer Management Division
- MDA Plant Protection Division
- Minnesota Department of Natural Resources

Specific Services:

Foodborne outbreaks:

- Ag chemical spills
- Human and animal exposure
- Product tampering
- Plant disease outbreaks
- Food security events
- Natural disasters

Surveillance testing for:

- Food safety
- Pesticides in water
- Dairy product safety
- Interstate marketing of milk
- Seed health
- Meat safety for small producers
- Plant disease

Other services include:

- Method development
- Technical consultation
- Data interpretation
- Quality assessment

RESULTS

The Department grades laboratory performance on our ability to provide accurate defensible data that meets established program objectives in a timely manner. In order to measure this performance we survey our customers annually to measure their satisfaction level with our services. We discuss problem areas and address them through our formal corrective action procedure.

Performance Measures based on customer survey

Satisfaction with technical assistance provided by laboratory

<i>Type of Measure</i>	<i>Dissatisfied</i>	<i>Somewhat Satisfied</i>	<i>Satisfied</i>	<i>Very Satisfied</i>
Previous Score (2016)	0%	5%	15%	80%
Current Score (2017)	0%	0%	9%	91%

Satisfaction with data quality

<i>Type of Measure</i>	<i>Dissatisfied</i>	<i>Somewhat Satisfied</i>	<i>Satisfied</i>	<i>Very Satisfied</i>
Previous Score (2016)	0%	10%	10%	80%
Current Score (2017)	4%	0%	20%	76%

Satisfaction with overall Laboratory performance

<i>Type of Measure</i>	<i>Dissatisfied</i>	<i>Somewhat Satisfied</i>	<i>Satisfied</i>	<i>Very Satisfied</i>
Previous Score (2016)	0%	0%	10%	90%
Current Score (2017)	0%	0%	9%	91%

Authority for this activity is found in M.S. Chapter 17, (<https://www.revisor.mn.gov/statutes/?id=17>) and other statutes authorizing specific protection services activities.

Program: Protection Service

Activity: Food and Feed Safety Division

<http://www.mda.state.mn.us/food-feed/food-feed>

AT A GLANCE

In Fiscal Years 2017 and 2018,

- Conducted over 2,800 manufactured food, 7,000 retail food, and 1,000 animal feed inspections to ensure the safety and quality of products manufactured and distributed in Minnesota.
- Created a new program specific to on-farm produce safety to support Minnesota produce growers in conforming to new Food Safety Modernization Act (FSMA) requirements through outreach, education, and regulatory review.
- Conducted and participated in over 80 outreach activities on food and feed safety related issues which included: providing training on new regulations related to the feed and produce safety, hosting emergency response exercises, presenting at educational conferences, and facilitating meetings with stakeholders and partner agencies.
- Participated in 48 human illness outbreak investigations to rapidly respond to and prevent the spread of illness in partnership with the Minnesota Department of Health.
- Issued 1,762 food and 156 animal feed certificates to Minnesota companies so products could be sold and distributed internationally
- Analyzed over 1,800 animal feed product samples for over 16,000 analytes in partnership with the MDA Laboratory Division

PURPOSE & CONTEXT

The Food and Feed Safety Division (FFSD) supports the Minnesota Department of Agriculture's mission to ensure the integrity of the food supply by conducting regulatory and outreach activities related to the production, manufacturing and sale of food and commercial animal feed products. Our activities contribute to a strong agricultural economy by ensuring food and feed producers have access to interstate and international markets, giving these processors opportunities to expand their business, and providing farmers with access to processing services necessary to market their products within Minnesota, nationally, and internationally.

Inspection work focuses on ensuring that safe food and animal feed handling practices are employed from the farm to processor and distributor so that consumers receive safe food and feed products. Much of this work is also required for manufacturers and farmers to conduct in-state, interstate and international sales of their products. The success of these programs is critical to ensuring the safety of human and animal consumers, as well as strong viable food and animal agriculture industries in the State.

SERVICES PROVIDED

Inspections: Our inspectors conduct food and feed safety based inspections as required by federal and state law that focus on ensuring processors and distributors of food and commercial animal feed have systems in place to ensure products are safe and are produced in a clean and sanitary environment. Changes in inspection focus will continue as the Food Safety Modernization Act (FSMA) is phased in and expands the regulatory requirements for manufacturers of human and animal foods.

Outreach: The Division maintains a strong emphasis on outreach and education, prior to and as a part of regulation. When food business operators have a good understanding of food safety principles and the regulations, they can more effectively apply good food safety practices. Outreach and education are also key to assisting new operators in navigating the rules as they begin a new business, as well as ensuring that existing operators have strong foundational knowledge in food safety risks that exist in their processes.

Investigations, Compliance, and Enforcement: Investigators and staff work to conduct many specialized reviews. Examples of specialized reviews include product labels and equipment plans, analyzing patterns of operators working outside of the regulations and following up when food safety systems fail and a recall of product is necessary or an outbreak is detected. Enforcement actions, such as warning letters, penalties, or license and permit suspensions may be used to address compliance issues when they are more severe and cannot be addressed through inspections or outreach.

RESULTS

Overall compliance rates are routinely assessed by conducting reviews that provide an assessment of how well food and feed producers are meeting the regulatory requirements designed to ensure the products they produce are safe.

Retail Food Inspection: Inspection Rates

The Retail Food Program is responsible for inspecting and licensing all retail food handlers in Minnesota and consists of 24 field inspectors, four supervisors, and one program manager. There are approximately 6,000 retail food facilities and 1,500 retail mobile food licenses in the state. Retail facilities are classified according to food safety risk based on food handling activities. Retail facilities are inspected according to a schedule based on the classified risk.

The Retail Food Program has steadily increased the rate of inspections conducted according to the risk-based schedule as a result of added staff that were hired within the last three years. The inspections conducted review food handling practices and sanitary conditions to meet the requirements of the Minnesota Food Code. These inspections are essential to protect public health and serve to inform retail food handlers when food handling practices require intervention measures due to the potential to foodborne illness.

Number of Retail Food Inspections Conducted by Fiscal Year

Fiscal Year	2016	2017	2018
Inspection Count	2,365	3,388	5,252

Manufactured Food Inspection: Full Implementation of Manufactured Food Regulatory Program Standards

Building an Integrated Food Safety System (IFSS) is mandated by the Food Safety Modernization Act (FSMA). The U.S Food and Drug Administration System (FDA) manages programs and initiatives that build the infrastructure and capacity of state, local, territorial, and tribal regulatory agencies and promote a national IFSS. The Manufactured Food Regulatory Program Standards (MFRPS) are a critical component in establishing the national IFSS. The goal of the MFRPS is to implement a nationally integrated, risk-based, food safety system focused on protecting public health. The ten standards identified in the MFRPS provide a roadmap for effective program management and are based on a quality management systems approach to regulatory program oversight. The MFRPS ten standard element are identified in the table below.

Manufactured Food Program Standards

Standard Number	Element
Standard 1	Regulatory Foundation
Standard 2	Training Program
Standard 3	Inspection Program
Standard 4	Inspection Audit Program
Standard 5	Food-related Illness, Outbreak and Response
Standard 6	Compliance and Enforcement Program
Standard 7	Industry and Community Relations
Standard 8	Program Resources
Standard 9	Program Assessment
Standard 10	Laboratory Services – <i>Partnership with MDA Laboratory Services Division</i>

The Manufactured Food Program has committed to meet the MFRPS, requiring documentation of the program's policies and procedures as well as records of their consistent use to demonstrate the quality management system is in place. In February of 2017, the FDA assessed the Manufactured Food Program and the program demonstrated full implementation of and conformance to the MFRPS. The FFSD Manufactured Food Program is one of only a few food inspection programs in the country to achieve the full implementation and conformance outcome from and FDA assessment. This accomplishment provides the foundation for effective public health protection of manufactured food safety systems in Minnesota and allows for more efficient partnership with partner agencies, such as the FDA.

Commercial Feed Inspection: Sample Analysis Findings

The Commercial Feed Program routinely samples feed and pet food products distributed in Minnesota. The sampling program was structured to represent the Minnesota feed industry geographically and to capture product and seasonal variations. One goal of the feed sampling program is to assist commercial feed producers through the identification of unapproved drug residues and other contaminants which may indicate system design flaws or sanitation concerns. Some samples that do not comply with regulatory standards also require an investigation to be completed by the feed manufacturer. The reports of these investigations are reviewed by Commercial Feed Program Staff.

The percentage of samples found not in compliance with regulations and the percentage of samples requiring a manufacturer's report of their investigation has remained relatively steady to slightly decreasing in the last four calendar years. One variation observed in 2016 may be due to the October 1, 2015 implementation of an amendment to the veterinary feed directive (VFD) drugs section of the Animal Drug Availability Act of 1996 (ADAA). A VFD drug is intended for use in animal feeds, and such use of the VFD drug is permitted only under the professional supervision of a licensed veterinarian.

During this period, the Commercial Feed Program has focused on targeted outreach activities and maintaining a responsive relationship to address challenges the feed industry faces with implementing new regulations. New regulations for the use of animal drugs requiring the professional supervision of a licensed veterinarian may have impacted these findings.

Feed Sample Results by Calendar Year

<i>Calendar Year</i>	<i>Samples Found Non-compliant</i>	<i>Samples Requiring Manufacturer's Report of Investigation</i>
2014	12.8%	4.3%
2015	14.8%	4.1%
2016	8.0%	1.7%
2017	12.5%	3.7%

Program: Protection Service

Activity: Dairy and Meat Inspection Division

<http://www.mda.state.mn.us/food-feed/meat-poultry-and-egg-inspection>

<http://www.mda.state.mn.us/food/dairy-inspection-minnesota>

AT A GLANCE

In State Fiscal Years 2017 and 2018,

- Conducted over 9,000 daily inspections of slaughter and processing operations at Minnesota “Equal To” meat and poultry processors so that they and the farmers they serve could sell their product openly in Minnesota
- Conducted over 80 outreach activities with dairy and meat industry stakeholders, regulated clientele, and other partners.
- Fully implemented two certified dairy industry inspection programs designed to train and certify industry personnel to perform basic regulatory functions.
- Analyzed over 5,000 dairy product samples and 3,000 meat and poultry samples in partnership with the MDA Laboratory Division.
- Issued approximately 600 certificates each year allowing Minnesota companies to sell their products internationally.

PURPOSE & CONTEXT

The Dairy and Meat Inspection Division (DMID) supports the Minnesota Department of Agriculture’s mission to ensure the integrity of the food supply by conducting regulatory and outreach activities related to the production and manufacturing of dairy, meat, poultry, and eggs. Our activities contribute to a strong agricultural economy by ensuring dairy processors have access to interstate and international markets, giving small meat processors opportunities to expand their business, and providing farmers access to slaughter and processing services necessary to market their products within Minnesota.

Dairy, meat, poultry, and egg products are traditionally high-risk food safety products and as such, have specific inspection and regulatory requirements designed to address these unique risks. Inspection work focuses on ensuring safe food handling practices are employed from the farm to processor and manufacturer so that consumers receive safe food. Much of this work is also required for manufacturers and farmers to conduct in-state, interstate, and international sales of their product. These programs are critical to ensuring the safety of consumers as well as strong viable animal agriculture industries in the state.

SERVICES PROVIDED

Inspections: Our inspectors conduct food safety based inspections that focus on ensuring farmers and manufacturers of dairy, meat, poultry and egg products have systems in place to ensure products are safe and are producing food in a clean and sanitary environment. These inspections are also required by federal and state law. The inspection program will also begin to focus its efforts on enforcing the Food Safety Modernization Act requirements in dairy manufacturing facilities; this expands the requirements for these processors, along with other food manufacturers, for systems-based food safety programs in their plants. The program also manages two certified industry inspection programs which help improve dairy industry business continuity by ensuring required inspections are performed on a timely basis and promoting improved food safety practices on an ongoing basis.

Outreach: The Division maintains a strong emphasis on outreach and education, prior to and as a part of regulation. When operators have a good understanding of food safety principles and the regulations, they can

more effectively use good food safety practices daily, not just for an upcoming inspection. Outreach and education are also key to assisting new operators in navigating the rules as they begin a new business, as well as ensuring that existing operators have strong foundational knowledge in food safety risks that exist in their processes.

Investigations, Compliance, and Enforcement: Investigators and specialized staff work to conduct reviews of product labels and equipment plans, identify operators working outside of the regulations and to follow up when food safety systems fail and a recall of product is necessary or an outbreak is detected. Enforcement actions, such as warning letters, penalties, or license and permit suspensions may be used to promote or address compliance issues when they are more severe and cannot be addressed through inspections or outreach.

RESULTS

Overall compliance rates are routinely assessed by conducting audits that provide an assessment of how well inspected entities are meeting the regulatory requirements designed to ensure the dairy, meat, poultry, and egg products they produce are safe.

Dairy Inspection: Interstate Milk Shipment (IMS) Audits

States and industries must participate in IMS in order to be able to ship milk across state lines. IMS audits are used to assess overall compliance of the farms, plants, and dairy program. Failure of an audit results in a lost market until the audit can be passed; achieving passing results is critical to maintaining business continuity and market access and therefore the program targets a 100% passing rate. The percentage of dairy farm, plant, and enforcement food safety audits that achieve passing scores (see table below) is monitored to assess overall conditions of farms and plants, as well as how well the regulatory program is meeting its obligations. This evaluation measures the quality of inspections being performed, as well as how well entities are complying with the regulatory requirements. The overall trend for this measure is stable.

Percent of Passing IMS Audits

	2013	2014	2015	2016	2017	2018
Percent	98%	98%	96%	97%	94%	95%

Meat and Poultry Inspection: Food Safety Assessment Results

In-depth assessments and audits of the food safety systems at each meat and poultry establishment are performed at least once every 3 years and for new establishments after a 90 day operating period. The assessment provides a deeper look at how well establishments are complying with the regulatory requirements as well as how well inspection staff are working with establishments to move toward compliance. The goal for this measure is to have less than 33% of audits result in significant follow up required by the auditor. A follow-up is required if the audit results in a 30 reassessment action or a Notice of Intended Enforcement, which would result in suspension if specific items are not corrected in a timely manner. The overall trend for this measure is stable to declining. This trend reflects the results of a number of new establishments joining the inspection program that have struggled complying with the regulatory requirements, sometimes due to language or cultural barriers. Additionally, federal regulatory requirements continue to grow in complexity and small operators cannot always easily implement these requirements. As a result, the program is focusing on improving outreach and educational activities for new and existing establishments.

Percent of FSA's Requiring Follow-Up

	2013	2014	2015	2016	2017	2018
Percent	58%	36%	37%	33%	36%	55%

Program: Promotion and Marketing

Activity: Agricultural Marketing and Development

<http://www.mda.state.mn.us/business-dev-loans-grants/economic-analysis-and-market-research>

<http://www.mda.state.mn.us/about/mnfarmerstress>

AT A GLANCE

- 1,332 farms and farmers' markets licensed to use the Minnesota Grown logo
- 26 farmers and/or local governments assisted with livestock permitting and or ordinance creation/amendment
- 300 farmers assisted by dairy profit teams
- 101,571 students reached by MN Agriculture in the Classroom with printed resources in 2017/2018 school year
- 868 pre-service and in-service teachers received ag literacy training during the 2015/2016 school year
- 150 farmers using the Farm Link website to assist with the transition of farm ownership
- 504 farmers and processors attend the 2018 Organic Conference

PURPOSE & CONTEXT

Agricultural Marketing and Development works to help farmers and other agricultural businesses:

- Be profitable;
- Protect our natural environment and resources; and
- Meet society's needs for food, fiber, and fuel.

We serve:

- Farmers
- Consumers
- Local government
- Environment and natural resource professionals
- Early care and K-12 teachers and students
- Commodity Councils
- Minnesota agribusinesses including the biofuels industry and agricultural organizations

SERVICES PROVIDED

We provide numerous and diverse services to meet our goals, including:

- Minnesota Grown, an umbrella marketing program that connects consumers and wholesale buyers with producers of specialty crops, livestock, and other agricultural products grown or raised in Minnesota;
- Organic information and financial assistance to growers, processors, and consumers;
- Marketing support, including business development, tradeshow support, and international marketing;
- Women, Infant and Children (WIC) Farmers' Market Nutrition and Senior Farmers' Market Nutrition Programs that distribute vouchers for fresh produce;
- Minnesota Agriculture in the Classroom, an educational resources and professional development provider that embeds agriculture, food, and natural resources education into K-12 classrooms;
- Livestock producer and local government information and assistance on livestock development and permitting, including preparation of conservation grazing plans for use of public land;
- Dairy Profit Team which is one-on-one assistance with farmers to improve dairy farm profitability;
- Licensing and bonding of livestock buyers and weighing of livestock at processing facilities;
- Renewable bio-energy sector technical analysis and assistance, information, and market analysis;

- Economic analysis and domestic and international agricultural market research;
- Conservation, environmental protection, and resource-management activities to increase farmer adoption of innovative practices and technology;
- Farm transition assistance through information on resources and through a new online service, Farm Link, that matches transitioning farmers with beginning farmers;
- Agricultural land use assistance including land access for immigrant farmer community and information on agricultural zoning and business development;
- Agricultural commodity research and promotion councils oversight of creation and operation;
- Good Food Access Program administration;
- Farm safety information and tractor rollover protection rebates; and
- Agricultural Growth, Research, and Innovation (AGRI) Program and Agriculture Research, Education, Extension and Technology Transfer Grant (AGREETT) Program administration.

RESULTS

Program: Value-added Products

Activity: Ag Advancement Programs

mda.state.mn.us/grants/agri

AT A GLANCE

- Annual AGRI \$10.235 million state investment in FY17 matched by \$78 million in private investment with estimated 1740 jobs created.
- 105 livestock operations assisted where 91 were beginning farmers and 99% of livestock operations made environmental improvements
- 49 agriculture businesses expanded or entered new markets
- 22 meat processing businesses upgraded or expanded
- 20 schools increased purchases of Minnesota grown produce, meat, dairy and grains
- \$2.11 million invested in commodity and cover crop research
- 103 Minnesota food businesses received cost share for retail sampling and wholesale tradeshow attendance
- University of Minnesota hired 17 AGREETT agriculture faculty positions.

PURPOSE & CONTEXT

The Agricultural Growth, Research, and Innovation Program (AGRI) provides financial assistance to the agricultural and renewable energy industries to support profitable farms and businesses, generate jobs, and strengthen the agricultural economy.

The Agriculture Research, Education, Extension, and Technology Transfer (AGREETT) passed through grants to the University of Minnesota and provides long-term funding primarily for human infrastructure such as research and extension faculty, extension educators, graduate students, and post-doctoral fellowships.

The Good Food Access Program assists grocery stores and small food retailers in making physical improvements to their buildings and purchasing equipment to stimulate sales of affordable, nutritious, and culturally appropriate food and produce in underserved communities.

We serve:

- Farmers
- Agribusinesses and entrepreneurs
- Schools, early care, and education organizations
- Biofuels and bio-based chemical industries

SERVICES PROVIDED

Through AGRI, we stimulate agricultural business activities by providing financial assistance to:

- Initiate and expand livestock production as well as support environmental improvements;
- Aid entry of new farmers;
- Add value-added enterprises to diversify farm income sources;
- Initiate, upgrade, and modernize value-added businesses including meat processing;
- Accelerate business entry into new markets;
- Improve compliance of farms, meat processors, and food businesses with food safety standards including increasing the number of farms that are Good Agricultural Practices (GAP) certified;

- Increase farmers' processing and aggregating capacity to enter farm-to-institution and other markets;
- Purchase food processing and storage equipment for schools to increase purchase of locally produced food;
- Provide incentives for production of renewable fuels, chemicals, and thermal energy from agricultural and forestry sources; and
- Advance applied crop research to improve agricultural product quality, quantity, and value.

Financial assistance is provided through several grant and cost sharing programs:

- AGRI Livestock Investment Grants
- AGRI Value Added Equipment Grants
- AGRI Value Added Feasibility Study Grants
- AGRI Farm to Schools and Early Care and Education Grants
- AGRI New Market Development, including Tradeshow Support and Minnesota Pavilions
- AGRI Crop Research Grants
- AGRI Sustainable Agriculture Demonstration Grants
- Minnesota Biofuel Infrastructure Partnership Cost Share
- AGRI Bioincentive Program (payments for the production of advanced biofuels, renewable chemicals, and biomass thermal energy)
- AGRI Beginning Farmer Farm Business Management Scholarships
- AGRI Good Agricultural Practices/Good Handling Practices Cost Share Assistance
- AGRI County Fair Grants
- AGRI Urban Agriculture Grants
- Good Food Access Program Equipment/Physical Improvements Grants

Through AGREETT, we provide funds to the University of Minnesota for agricultural faculty positions in the College of Food, Agricultural and Natural Resource Sciences, Extension, and the College of Veterinary Medicine. In addition, funds are provided for rapid response for plant and animal diseases and for agricultural education.

Program: Administration and Financial Assistance

Activity: Grants and Assistance

mda.state.mn.us

AT A GLANCE

- Partnered with and assisted hundreds of organizations and individuals
- Administered a variety of specialized programs
- Assisted and worked with many different sectors of the agricultural industry, including ag youth, farmers and farm customers in need, ag researchers, and others.

PURPOSE & CONTEXT

The Grants and Assistance activity passes money through the Minnesota Department of Agriculture (MDA) to other organizations and programs that focus on specific ag-related subjects. By providing this assistance, MDA helps strengthen the agricultural economy at its “roots” and in areas that might otherwise get overlooked. These programs reach individual farmers, farm youth and specially-targeted customers of agricultural products. The money also supports key efforts to research and promote agricultural activities specific to Minnesota’s climate.

SERVICES PROVIDED

- This activity provides assistance to county fairs and agricultural associations, the Minnesota Livestock Breeders Association, the Minnesota Poultry Association and the Minnesota Agricultural Education Leadership Council. These organizations maintain generations of expertise, enhance it with the latest research, and pass it on to future generations through their educational programs for youth.
- Through the Farm Advocates program, MDA provides one-on-one assistance to farmers who face crisis due to natural disasters or financial problems. Trained, experienced advocates help farmers determine how to address difficulties through agricultural lending options, mediation, farm programs, crisis counseling, disaster programs, and legal and social services. Related to this work, MDA passes funds through to the farm business management program at colleges in the Minnesota State system to provide farm families with mental health counseling support.
- MDA partners with Second Harvest Heartland to help provide food to Minnesota’s food shelves and other charitable organizations. Money provided through MDA has been used to purchase milk for distribution to these organizations and to compensate producers and processors for harvesting and packaging surplus fruits, vegetables, and other agricultural commodities that would otherwise go un-harvested or would be discarded.
- This activity also supports the development of future products for agricultural industries. By partnering with the Minnesota Turf Seed Council, the Minnesota Horticultural Society and the Northern Crops Institute, MDA supports their research, development, and promotion of northern-hardy products and other activities.

RESULTS

Each of our partners reports to MDA on its educational, research, and assistance activities. For county fair assistance, we measure against the formula provided in statute.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Percentage of county fair aid formula that is funded	95%	96%	FY2012; FY2019
Quantity	Tons of food provided to food shelves and other emergency feeding organizations	3,044	3,803	FY2016; FY2018

Minnesota Statutes Chapter 38, (<https://www.revisor.mn.gov/statutes/?id=38>), Chapter 41D (<https://www.revisor.mn.gov/statutes/?id=41D>) and others.

Program: Administration and Financial Assistance

Activity: Agency Services

<http://www.mda.state.mn.us/commissionersoffice>

AT A GLANCE

- Implementation of statewide policies
- Leadership on agricultural issues

PURPOSE & CONTEXT

This activity makes sure MDA stays responsive to the needs of agriculture in Minnesota and stays focused on advancing our mission. *The Department's mission is to enhance Minnesotans' quality of life by ensuring the integrity of our food supply, the health of our environment, and the strength of our agricultural economy.*

SERVICES PROVIDED

This activity provides leadership and support services to the agency and its employees and performs agency-level services for the public, agricultural industries, and other governmental entities. Agency Services includes:

- The Commissioner's Office
- The Human Resources Division
- The Finance and Budget Division, including staffing for loan programs under the Rural Finance Authority, a separate board of state officials and public members, and Ag Best Management Practices (AgBMP) loans.
- Hosting for staff of MN.IT, the state's office of information technology

RESULTS

We maintain communication and coordination with farmers, ag groups, state boards, interagency committees, and national and international associations. Communication and outreach activities are provided in person and through the media, including the agency's web page and social media sites.

www.mda.state.mn.us

twitter.com/mnagriculture

www.youtube.com/mnagriculture

www.facebook.com/mnagriculture

The reach of our social media presence continues to increase and has helped with outreach on many issues, including the recent outbreak of avian influenza in 2015. The following table shows recent social media measurements.

Narrative

The Minnesota Department of Agriculture (MDA) receives funding from many federal sources including the Departments of Agriculture, Health and Human Services, and Department of the Interior as well as the Environmental Protection Agency. MDA obtains federal funds directly from the federal government as the primary recipient or as a sub-recipient of a larger grant from another state agency or outside organization.

Pesticide and Fertilizer Management Division

Federal awards received from the Environmental Protection Agency fund core activities such as pesticide enforcement, applicator certification and training, groundwater monitoring urban initiatives, and endangered species activities. MDA matching funds are provided through special revenue funds from the Pesticide Regulatory account. Since the federal funds support only a small portion of the state's pesticide program, MDA matching funds greatly exceed the amount required under the federal awards.

Plant Protection Division

Through the U.S. Department of Agriculture's Forest Service and Animal Plant Health Inspection Service federal awards support efforts to protect agriculture crops, commodities and forests from a number of plant pests and pathogens. Federal funds are utilized to implement detection programs for invasive pests such as potato cyst nematode, gypsy moth, karnal bunt of wheat and many others. Plant pest surveys serve as a basis for making decisions to eradicate, contain, or manage plant pest threats. These surveys also serve as a basis for MDA to certify that pests do not exist in Minnesota which ensures open access to a number of foreign markets for Minnesota commodities. Federal funds also help to support eradication and suppression programs for emerald ash borer and gypsy moth. When matching funds are required they are provided through State General Fund appropriations, state grants from the Environment and Natural Resources Trust Fund, or local government expenditures. Funds from the U.S. Department of Interior's Fish and Wildlife Service help to compensate farmers and ranchers with damage claims related to elk or wolf and required matching funds are provided by State General Fund appropriations.

Laboratory Services Division

Through the U.S. Department of Agriculture's Food Safety and Inspection Service federal funding to the MDA Laboratory Services is used to analyze food matrices for microbiological and chemical threat agents and improve laboratory capacities for surveillance and outbreak response. In addition, funds are provided to maintain one of two National Food Emergency Response Network Training Centers that will host and conduct training. The USDA also provides funding for the testing of meat sold under their "Equal to Meat & Poultry Inspection" program. These federal dollars are matched with General Fund. Funding received from the Food and Drug Administration funds the laboratory's analytical capability and capacity for the analysis of food and food products in order to rapidly respond to any local or national food safety or security threat from the use of chemical contaminants, toxins, and poisons. The FDA also funds our efforts to expand our scope of methods accredited to the International Organization for Standardization (ISO)/International Electrotechnical Commission (IEC) 17025:2017 laboratory testing standard. The laboratory receives funding from the USEPA to provide regulatory enforcement testing related incident response events and to test ground and surface water for pesticides to determine their environmental fate. Federal funds for the USDA "Equal to Meat & Poultry Inspection" program are expected to increase due to additional costs necessary to support laboratory testing. General fund match dollars have already increased to meet the funding needs. Funding from all other federal sources is expected to remain stable.

Food and Feed Safety Division

Federal awards received by the MDA's Food and Feed Safety Division have been relatively stable with the exception of increased funds provided by the Food and Drug Administration for food safety projects that enable faster response to foodborne disease outbreaks, produce safety implementation and manufactured, retail, and animal feed regulatory program standards. The purposes of these increased funds are project-specific and are intended to support and not supplant existing state resources.

Dairy and Meat Inspection Division

Federal awards received by the MDA's Dairy and Meat Inspection Division (DMID) have increased over the past year. The DMID received federal funding for a drug residue prevention project which is a 3 year project intended to focus on residue prevention and appropriate veterinary drug use education. These funds replace funds received in a previous cooperative agreement, but are increased by \$25,000 per year. The funds support efforts, but do not supplant existing State funds. Federal funding for the meat and poultry inspection program provided from the USDA Food Safety and Inspection Service was increased in FY 2019 to a level which fully matches the State funding used to support these activities. It is expected that the current level of funding will stabilize, but would increase should additional State funds become available to support the program's activities. The required State match is from the General Fund. No fees are currently used to support this activity.

Marketing and Development Division

The U.S. Department of Agriculture's Ag Marketing Services provides funding to enhance the competitiveness of specialty crops and provide support for socially disadvantaged and beginning farmers of these crops. Funding for this grant has increased in recent years. Funding provided to defray the costs of organic certification is expected to remain stable. Currently, there are no required matching funds. The USDA Food and Nutrition Service provides funding for the WIC and Senior Farmers' Market Nutrition programs. Funding is used to educate low income, nutritionally-at-risk families about the value of fresh, locally grown produce and to increase direct sales for farmers through farmers' markets. Matching funds for the WIC FMNP are provided by the General Fund; there is no matching requirements for Senior FMNP. Federal funding for the biofuel infrastructure partnership with USDA Commodity Credit Corporation will end at the end of fiscal year 2019.

Agency Summary

Current federal appropriation levels as well as guidance provided from our federal agencies were taken into consideration to determine Minnesota Department of Agriculture's federal funding level for the biennial budget years 2020 and 2021. Based on informed communication with our federal agencies, no significant change in future federal funding is foreseen at this time.

AT A GLANCE

In FY2018:

- \$76.6 million was spent on amateur sports in Minnesota by sports visitors
- \$53.6 million was spent at the National Sports Center (NSC) by sports visitors
- 5.2 million visitors at Minnesota Amateur Sports Commission (MASC) affiliate facilities
- 4.1 million visitors to the NSC

PURPOSE

The Minnesota Amateur Sports Commission (MASC) was created to promote the economic and social benefits of sport for Minnesota citizens and organizations. The MASC contributes to the statewide outcomes of **a thriving economy that encourages business growth and employment opportunities and all Minnesotans have optimal health by:**

- Generating economic benefits through sport events;
- Providing increased amateur sport opportunities for Minnesota residents; and
- Improving infrastructure through developing new sport facilities and programs.

BUDGET

**Spending by Category
FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

The MASC activities are funded by the general fund, contracts, and the Hennepin County Youth Sports Grant Program. About 88% of the MASC funding is from the General Fund and about 12% is from the MASC contract for services with Hennepin County. The Hennepin County agreement allows the MASC to maintain a minimum of three full-time staff.

The MASC receives annual funding from the general fund of approximately \$300,000 that is primarily used to fund its three full-time staff positions. From FY 2002 to FY 2009 MASC received \$750,000 annually to access space at the Target Center. In addition, the MASC received additional funding in FY2016-17 for the Mighty Ducks Grant Program. This grant program awarded over \$3.5 million in statewide grants to public ice facilities for the purpose

of improving indoor air quality/eliminating R-22 and purchasing electric ice resurfacers. The MASC did not receive funds for the Mighty Duck Grant Program in FY2018-19.

STRATEGIES

The MASC employs several strategies to achieve the agency's goals and mission to bring the economic and social benefits of amateur sports to Minnesota:

1. Develop top class amateur sport facilities in partnership with select Minnesota cities. The Regional Centers are facilities that attract out-of-state visitors and serve many Minnesotans. The Regional Centers are located in Rochester, Marshall, Blaine, St. Cloud, and Biwabik.
2. Create and attract new amateur sports programs and events in Minnesota with a focus on the National Sports Center in Blaine.

RESULTS

The MASC closely tracks the success of its major priorities:

- The performance of the National Sports Center (NSC) in Blaine, which is the flagship amateur sports facility in Minnesota, is the one facility in the state directly overseen by the MASC. The NSC has shown strong financial performance, is operationally self-sufficient, and shows stable attendance and growing economic-impact numbers.
- The MASC has developed a model to compute economic impact for its major sports events. In addition to using this model on its own events, the MASC shares the model with other sport organizations, parks and recreation departments, and anyone hosting sports events in the state. This model was specifically designed to be used by non-economists, but it has been verified as accurate and conservative in its estimates by professionals in the field of event economics.

Recommendation:

The Governor recommends additional funding of \$35 thousand in FY 2020 to maintain the current level of service delivery at the Amateur Sports Commission.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related cost increases. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the Amateur Sports Commission, this funding will cover anticipated retirement costs in FY 2020-2021.

Equity and Inclusion:

N/A

IT Related Proposals:

N/A

Results:

This proposal is intended to allow agencies to continue to provide current levels of service and information to the public.

AT A GLANCE

In FY2018,

- 45 employees across the state.
- Conducted 118 foreign animal disease investigations.
- Permitted and inspected 96 county fairs and the Minnesota State Fair.
- Tested and certified 76 commercial poultry and 77 waterfowl, exhibition, gamebird and backyard Authorized Poultry Testing Agents to submit samples to the Minnesota Poultry Testing Laboratory for routine disease monitoring.
- Received 29,697 Certificates of Veterinary Inspection representing livestock imports and exports for Minnesota during the fiscal year 2018.

PURPOSE

The mission of the Minnesota Board of Animal Health is to protect the health of the state's domestic animals through education and cooperation with veterinarians, producers, owners and communities. As part of its work, the Board provides many services to Minnesota's veterinarians, livestock owners, and the public:

- Partner with veterinarians and farmers to promote animal health through things like vaccination and biosecurity plans.
- Inspect livestock markets and auctions to make sure animals are officially identified and in good health when they are bought and sold.
- Permit exhibitors so they can show their animals at fairs, petting zoos and events throughout Minnesota.
- Teach livestock producers how to collect testing samples from their herd to help identify illness and disease.
- Educate all our stakeholders about biosecurity and the process of minimizing risks of diseases entering their farms on people, equipment, feed and wild animals.
- Protect public health with the Department of Health by monitoring and reporting zoonotic diseases like rabies, which are capable of spreading from animals to people.
- Distribute monthly reportable disease newsletters to remind veterinarians about a different disease each month that could appear in livestock and must be reported to the Board.
- The following is a breakdown of the number of animals we worked to keep disease-free in Minnesota FY18:
 - 35,200 cattle herds
 - 7,895 swine herds
 - 11,055 poultry premises
 - 180 commercial dog or cat breeders
 - 85 kennels
 - 430 deer and elk herds
 - 16,525 farms with registered horses
 - 3,890 sheep herds
 - 3,750 goat herds

BUDGET

**Spending by Category
FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Total expenditures for FY17 = \$5.991 million.

We use our funding for three main activities:

1. Disease surveillance, control, and eradication
2. Inspections
3. Education and outreach

Historical Spending

Source: Consolidated Fund Statement

We have three funding sources:

1. General funds appropriation
2. Federal cooperative agreements
3. Other sources, e.g. licensing and inspection fees

STRATEGIES

Many animals move into and out of Minnesota every day. One of our biggest tasks is to confirm those animals are disease-free. We also work to make sure that if an outbreak does occur, our animals can be traced and the diseases contained. We have a system in place to detect, control, and when necessary, eliminate domestic animal diseases.

Along with detection and containment of diseases, another important role we play is enforcement. Our staff make regular visits to farms, livestock sales, livestock exhibitions, and kennels to assure all rules and laws governing animal health and safety are being followed.

A strategy of economic importance to Minnesota's livestock is our earnest effort to maintain animals free of certain diseases of national and international importance to allow for free trade of animals and animal products with other states and countries.

An example of implementing one of our strategies is the constant vigilance and response of our Foreign Animal Disease Diagnostician (FADD) team. This group is led by our Senior Veterinarian who is in charge of Emergency Planning and Response. A total of 118 Foreign Animal Disease investigations were conducted in Minnesota FY 2018 and 16 investigations have taken place as of August in FY 2019.

These investigations are a collaborative effort between our agency and the farmers, processors, veterinarians, and general public who contact us to report suspicious clinical disease signs in an animal. Once a suspect case is submitted to the Board, it is logged, assigned a case number and assigned a FADD to investigate. The Board has a FADD on call at all times and they respond to the reported site to collect diagnostic samples from the suspect

animal. They then package those samples and submit them to the United States Department of Agriculture's (USDA) National Veterinary Services Laboratory to be tested for foreign animal diseases.

While samples are en-route to the laboratory, the Senior Veterinarian assesses the case and clinical signs to determine if emergency response team notifications are necessary. If they suspect a foreign animal disease they can notify private and federal partner agencies of the pending test. Once results are reported, the Senior Veterinarian makes the decision to stand down the team or pursue a foreign animal disease response.

These situations routinely take place with little to no interruption in our livestock producers' daily work nor in Minnesota's livestock markets and exhibitions. There are enormous economic repercussions for a positively identified foreign animal disease in Minnesota and the FADD team handles cases with discretion and professionalism to maintain public confidence.

RESULTS

Our most noticeable work is during an animal disease emergency like northwest Minnesota's tuberculosis response in the early 2000's and the avian influenza outbreak in 2015, which affected the state's poultry. Minnesota is the top turkey producing state in the country, annually raising between 44 and 46 million birds. The state's approximately \$800 million turkey industry supports families and communities across Minnesota. In 2015, the Minnesota Board of Animal Health worked with poultry producers to stop the spread of Highly Pathogenic Avian Influenza (HPAI). Together, they were able to stop the spread of avian flu and ensure producers were able to restock their barns as soon as possible.

- 2015 avian influenza outbreak farms affected: 108
- Turkeys affected: 9,024,632
- Counties impacted: 23
- Estimated economic impact: \$650 million
- Last case of avian influenza: June 5, 2015
- Quarantine ended: July 2015

However, a majority of emergency preparedness occurs during the times when we are not actively responding to diseases. We focus on how we can improve through exercises, like our participation in the Agricultural Response Management and Resources (ARMAR) exercise this past spring with the United States Department of Agriculture (USDA), state, local, and regional agencies from across the country. Minnesota was one of many states to take part in the four day simulated exercise to test our emergency response efforts addressing a fictitious case of foot and mouth disease (an economically devastating and highly contagious animal disease). This national exercise took several years to plan and coordinate. During the drill, FADD staff "detected" the disease and began the simulation for a multi-agency response in St. Paul. The Board's relatively small response team was quickly overwhelmed and was able to call upon its agreements with other state agencies and federal partners to respond together. Refreshing these relationships allowed us to identify needed improvements in our incident response.

It takes years of preparation and coordination to confidently and successfully respond to a foreign animal disease, which is why the Board participated in the ARMAR. New and existing relationships were tested and public/private partnerships were found to be extremely valuable as we worked through the exercise. Building relationships with these livestock organizations allowed the Board to develop "Secure Supply Plans." Secure Supply Plans are invaluable emergency response plans that answer the questions of how to keep the food supply and Minnesota's agricultural economy moving while simultaneously eliminating a disease from the affected species.

Minnesota was evaluated in this exercise and anecdotal results from the evaluators indicate we responded well. Evaluators also suggested the Board continue to strengthen relationships with the livestock industry while waiting

for the final results to be published in 2019. This is an ongoing goal as we focus on future emergency response efforts.

The following table represents additional efforts by the Board in FY18.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>

Board of Animal Health

FY 2020-21 Biennial Budget Change Item

Change Item Title: Improving Oversight of Deer and Elk Farms

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	208	529	529	529
Revenues	0	0	0	0

Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	208	529	529	529
FTEs	0	0	0	0

Recommendation:

The Governor recommends funding in FY20-21 from the General Fund to allow the Board of Animal Health (BAH) to implement changes and enforce laws related to the regulation of farmed deer and elk as described in the April 2018 Evaluation Report from the Office of the Legislative Auditor (OLA), *Board of Animal Health's Oversight of Deer and Elk Farms*. The funding will allow the BAH to continue to protect the health of Minnesota's domestic animals.

Rationale/Background:

Minnesota also has one of the nation's largest populations of farmed deer, elk, and similar species (cervidae). Minnesota law allows people to raise farmed deer and elk as long as they register both their herds and their individual animals with the BAH. People choose to keep deer and elk for a variety of reasons. Some of the smaller producers keep one or a few deer as pets or on a hobby farm. Other deer and elk producers operate businesses in which they sell animals for meat, breeding stock, or other deer and elk products such as velvet antler, dog chews, and nutritional supplements.

Minnesota ranks high among U.S. states with respect to volume of deer and elk production. According to agricultural census data compiled by the United States Department of Agriculture, in 2012, Minnesota (1) ranked sixth in terms of the number of farmed deer raised and fifth for the number of deer farms and (2) raised more farmed elk than any other state save Texas.

Deer and elk health is threatened by chronic wasting disease (CWD), an always-fatal, neurodegenerative disease found among wild and farmed cervids. CWD is difficult to manage because there is currently no live-animal diagnostic test approved for routine herd monitoring. Further, infected animals do not typically show clinical signs until the disease is quite advanced, therefore the only way to definitively diagnose CWD is to analyze specific tissues from a dead deer or elk.

In FY 2017, even though 44 percent of the BAH's 41 staff members spent at least some portion of their time working on deer and elk oversight, none were fully dedicated to the deer and elk program during this time. This included some time spent by the executive director, the assistant director who serves as program director for the deer and elk program, some office staff, and all 13 field staff. The BAH spends approximately \$549,000 on the deer and elk program. The amount of revenues generated through fees assessed to the cervidae farms in FY17 totaled \$32,000. Since fee revenue is not sufficient to cover program expenses, the remaining revenue is diverted from our General Fund appropriation.

Proposal

This proposal would appropriate \$737,000 in FY20-21 to the BAH in order to provide proper management and regulation of deer and elk farms as recommended by the OLA report. Funding would go towards implementation of five OLA recommendations (see below) as well as enhance current operations as related to the proper regulation of deer and elk farms. The development and implementation of the protocol and practices to meet these recommendations takes significant staff time and other program expenses.

Recommendation 1: The Board of Animal Health should update its inventory report form to collect statutorily required information regarding the origin of the deer and elk that make up the registered herds.

- The BAH is constantly working on methods to better communicate with and educate livestock producers of all species, including cervidae producers, about the necessity and importance of maintaining accurate records and will continue to do so.
- This proposal will allow the BAH to update and streamline its farmed cervidae forms as well as use this recommendation to guide future development of forms and documents.

Recommendation 2: The Board of Animal Health should clarify expectations of whether and how often producers must verify their herd inventory on an animal-by-animal basis.

- The responsibility for an accurate herd inventory belongs to the producer and their accredited veterinarian. BAH field staff are expected to view and verify that all animals are tagged with an official identification during annual inspections.
- Minnesota Rule gives the BAH the authority to require the producer to present the entire herd for physical animal-by-animal inventory if tags cannot be visualized by our field staff or the office staff cannot reconcile the herd inventory from the producer and accredited veterinarian with our records in our database. The Board will strengthen enforcement of this authority.
- The BAH will improve livestock data quality and tracking in its database and work to clarify our expectations with cervid producers regarding herd inventories.
- The only laws currently dictating the frequency of physical herd inventories are the USDA requirements for herds enrolled in the federal CWD Herd Certification Program. This program requires a complete physical inventory to be completed no more than three years after the last complete physical herd inventory and applies to moving animals interstate. The Board will fully enforce and require a physical animal-by-animal inventory every three years for each herd where the official identification in an animal's ear cannot be verified by other means.

Recommendation 3: The Board of Animal Health should track whether producers submit tissue samples from all deceased deer and elk to test for chronic wasting disease and, appropriately penalize those producers who fail to submit samples.

- The BAH gathers data on whether all deceased deer and elk are tested for CWD as producers are required to keep these records and these tests can only be conducted after the animal has died.
- The BAH will create a tracking report to match deceased animals with CWD testing submissions. This tracking report will allow us to compare the testing submissions to death reports of animals in the herd.

Recommendation 4: The Board of Animal Health should develop an approval program for deer and elk producers who wish to collect their own chronic wasting disease test samples.

- The BAH has an existing approval program in place with its poultry producers and this template has been tailored for use in other livestock species. The BAH will evaluate how to begin developing it for use with the cervidae program.
- A "CWD Sampling Guide" has been created and will be updated regularly with new information for producers that wish to successfully harvest their own CWD samples and submit them to the laboratory for testing without having to be assisted by trained BAH field staff. This practice increases correct sample collection.

Recommendation 5: The Board of Animal Health should fully enforce Minnesota law and strengthen consequences for failure to comply.

- Field staff work with herd producers to educate them on our requirements and gain their cooperation in complying with our regulations, striking a balance between education and enforcement actions. Program managers work with field staff regarding the proper use of their enforcement powers and the necessity of proper documentation during routine field work to increase communications regarding situations where producers are uncooperative.
- The BAH is currently working with field staff to use its “Notice of Violation” and “Notice of Civil Penalty” enforcement tools more effectively. A Notice of Violation (NOV) is issued when a producer is not in compliance with any of the Board farmed cervid regulations, including 1) failing to register a herd, 2) missing forms or incomplete information on forms, 3) fencing non-compliance, 4) animal identification, 5) timely payment of fees, 6) CWD testing, or 7) animals running at large. The NOV includes a timeline and plan to correct the non-compliance, which is usually 30 days. This requires follow up by our field staff with the producer to ensure the producer gets into compliance.
- If the timeline for compliance is not met, the producer is issued a Civil Penalty which is currently set at \$250 for each violation. The BAH will strengthen the enforcement of this penalty.
- The BAH is already using, in some instances, recommended enforcement actions such as the reduction in CWD herd status. For producers that have prolonged or chronic and/or egregious non-compliance with CWD testing requirements, the BAH will enforce the reduction of the CWD status level of their herd, impacting the animal movement allowed out of the herd (exporting animals from the herd either within Minnesota or across state lines). The producer must demonstrate compliance with CWD testing requirements to have their status upgraded on a yearly basis to regain the ability to move animals out of the herd.
- Lastly, the BAH will continue to use electronic documentation to better track corrective actions issued by field staff.

Equity and Inclusion:

The BAH believes this initiative equally protects all citizens of the state. We would not anticipate any issues from under-represented communities or negative impacts to the Board’s diversity goals.

Results:

The Board of Animal Health will use the recommendations to implement a number of changes including:

- Number of cervidae producers reached with information on maintaining accurate inventory records
- Tracking of animal-by-animal inventory every three years in producers whose herds could not be identified with official identification
- Number of CWD Sampling Guides sent out when requests for self-submitting of tissue samples come from producers
- Number of corrective actions issued per year

FY 2020-21 Biennial Budget Change Item

Change Item Title: Agricultural Emergency Preparedness and Response

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Department of Agriculture				
General Fund				
Expenditures	625	300	300	300
Revenues	0	0	0	0
Board of Animal Health				
General Fund				
Expenditures	250	250	250	250
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	875	550	550	550
FTEs	1.65	1.65	1.65	1.65

Recommendation:

The Governor recommends \$250,000 in annual funding from the General Fund to prepare for and respond to agricultural emergencies for the Board of Animal Health (BAH). Additionally, the Governor recommends \$300,000 in annual funding from the General Fund to support the operations of the Department of Agriculture's Incident Management Team (IMT) and a one-time appropriation of \$325,000 from the General Fund to increase the balance of the Agricultural Emergency Account in FY20, allowing the agency to prepare and respond to agricultural emergencies in a timely manner.

Rationale/Background:

Early detection of a highly contagious animal disease and prompt reporting are critical to a successful response. We work with private practice veterinarians so they can identify the symptoms of these diseases when they examine farm animals. The primary goal is to successfully eradicate the disease as quickly as possible. Minnesota has a network of producer groups, organizations, and agencies that have worked together to develop plans to respond to disease events. Our state has been successful in eliminating diseases, including bovine tuberculosis and low pathogenic avian influenza, in the past. However, each situation will have unique concerns such as:

- Timely depopulation, or euthanasia, of infected and exposed animals,
- Enhanced biosecurity for farms which have susceptible livestock and associated businesses and people,
- Environmentally-sound disposal of carcasses and other infected products,
- Use of environmentally-safe disinfectants,
- Timely dissemination of pertinent public information, and
- Economic impact to owners of infected or exposed herds and flocks.

The Board considers all of these factors when determining the best course of action in responding to a disease.

Dedicated funding to emergency preparedness will enable the Board to continue to collaborate and coordinate with state agencies such as the Department of Agriculture.

Proposal:

The Governor recommends funding added to the Board's base General Fund appropriation able to maintain up-to-date training for all of our FADDs, and provide the emergency planning and preparedness work as described above, in addition to being able to maintain the staff who support the work of foreign animal disease diagnosticians (FADD).

Minnesota has foreign animal disease diagnosticians (FADD) located throughout the state that are available 24 hours a day to investigate suspected cases of a foreign animal disease (FAD). The FADDs are state or federal regulatory veterinarians with specialized, hands-on training in diagnosing these diseases.

An investigation is triggered when the state veterinarian receives a report of animals with symptoms indicative of an FAD or when a diagnostic laboratory identifies a suspicious test result. The state veterinarian assigns an FADD to investigate the case immediately. Should an FAD be identified in Minnesota, the State would initiate its FAD response plan. This plan was drafted as a coordinated effort between the Board, Minnesota Department of Agriculture, and the U.S. Department of Agriculture.

As our world becomes more interconnected, we face growing threats of disease transfer and invasive species movement that could quickly threaten the health and vitality of the agricultural industry in our state. With this proposal, the MDA and BAH will be better prepared to respond to the next emergency.

Equity and Inclusion:

The BAH believes this initiative equally protects all citizens of the state. We would not anticipate any issues from under-represented communities or negative impacts to the Board's diversity goals.

Narrative

Funding received from United States Department of Agriculture – Animal and Plant Health Inspection Service-Veterinary Services will/has been used to:

- Maintain continuity of the Board’s surveillance, testing and education programs for our livestock disease programs. These programs include avian influenza, scrapie, as well as other sheep, swine, and cattle disease prevention, control, and preparedness programs.
- Maintain continuity of the Board’s animal disease traceability program. This funding will help support key elements of traceability, including breeding cattle identification and capturing both interstate and intrastate animal movement in a searchable database.

The Board of Animal Health manages the Managing National Surveillance and Response for Animal Health Activities program and the Animal Disease Traceability program funded by Federal money in accordance with Title 2 Code of Federal Regulations Part 200 and the associated Office of Management and Budget (OMB) Circular governing costs allowed, and all other applicable laws, regulations and guidelines.

AT A GLANCE

In FY 2017-18, the Board:

- Evaluated 4,826 applications for examination and licensure
- Issued 19,116 licenses
- Investigated 110 new complaints
- Issued 793 in-training certificates
- Gave 22 presentations

PURPOSE

The Minnesota Board of Architecture, Engineering, Land Surveying, Landscape Architecture, Geoscience and Interior Design regulates the professions and enforces the statutes and rules in order to protect the health, safety and welfare of the public. We ensure that individuals meet the education, examination and experience standards for licensure or certification, and maintain their records in good standing. We take disciplinary action against those who violate the statutes, rules and standards governing the practice of the professions.

The Board contributes to the statewide outcomes of:

- **People in Minnesota are safe**
- **Efficient and accountable government services**
- **A thriving economy that encourages business growth and employment opportunities**

BUDGET

**Spending by Category
FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

The Board collects application and licensure fees which are deposited in the State's General Fund. The Board's budget is funded through General Fund appropriations.

STRATEGIES

To accomplish its mission, the Board uses the following strategies:

1. **Regulatory** – Collaboration with the national councils on consistent standards for examination, licensure and enforcement. Evaluating applications to ensure that those entering professional practice have completed the required education, examination and experience.
2. **Enforcement** – Investigating complaints and taking action against licensees and unlicensed individuals who violate the Board's statutes and rules. Removing individuals from practice when necessary. Exchanging enforcement data across jurisdictions. Providing public access to license status, discipline history and the complaint process. Ensuring that the Board's statutes and rules are up-to-date and understandable.
3. **Outreach and Education** – Providing information to Minnesota citizens, legislators, building officials, fire marshals, other state agencies, schools and national councils about the value of licensure and the requirements of competent practice.

The Board of AELSLAGID contributes to the statewide outcome of keeping people in Minnesota safe by:

- Setting education, examination, and experience standards for licensure and certification;
- Reviewing applicant credentials to ensure that those entering professional practice have completed the required education, examination, and experience; and
- Investigating complaints and taking enforcement action against those who violate the Board's statutes and rules.

We contribute to creating a thriving economy in Minnesota that encourages business growth and employment opportunities by:

- Ensuring that statutes and rules reflect the minimum standards to protect the public; and
- Updating statutes and rules to remove unnecessary barriers to licensure and certification.

We contribute to providing efficient and accountable government services by:

- Responding quickly and professionally to applicants, licensees, certificate holders, and the public;
- Providing education and information to the public, students, licensees, and certificate holders; and
- Thoroughly and efficiently investigating complaints and taking enforcement action when appropriate.

The Board strives for equity in licensure and certification by:

- Ensuring that standards for Minnesota residents are not easier or harder to achieve than standards for those already licensed or certified in another state transferring to Minnesota;
- Consistently applying the statutes and rules to all applicants, licensees, and certificate holders; and
- Using plain language on application forms and in administrative rules.

RESULTS

Recommendation:

The Governor recommends additional funding of \$94 thousand in the FY 2020-2021 biennium and \$40 thousand in the FY 2022-2023 biennium to maintain the current level of service delivery at the Board of Architecture, Engineering, Land Surveying, Landscape Architecture, Geoscience, and Interior Design, and for one-time legal and rulemaking costs.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related cost increases. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year. Additionally, the Board anticipates retirement expenses of about \$5 thousand in the upcoming biennium.

Enforcement of statutes and rules (i.e. complaint resolution) is one of the major ways the Board fulfills its mission to protect the public health, safety, and welfare. The Board has several enforcement cases that are in the appeal process. In addition to its legal fees for the Attorney General's Office, the Board anticipates increases in non-AGO-related legal fees in FY 2020-2023, estimated at \$10 thousand annually.

Additionally, the Board is working on rule modifications for three separate rule packages. Additionally, based on changes to standards at a national level, certain rule changes must move forward quickly while other changes are still under Board consideration and language development and are not ready to move forward. Rulemaking expenses for the Board are estimated at \$20,000 in each FY 2020 and FY 2021, and include publication of notices in the *State Register*, mailing notifications to affected parties, and holding public hearings.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the Board, this funding will cover known employee compensation and retirement costs. It also includes one-time funding for rulemaking costs in FY 2020 and legal costs from FY 2020-2023.

	FY 2020	FY 2021	FY 2022	FY 2023
Compensation	\$14	\$15	\$15	\$15
Retirement	5			
Rulemaking	20	20		
Legal Fees	10	10	10	
Total	49	45	25	15

Board of Architecture, Engineering, Land Surveying, Landscape Architecture, Geoscience and Interior Design

FY 2020-21 Biennial Budget Change Item

Change Item Title: Online Permitting System

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	50	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	50	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends additional, one-time funding of \$50 thousand in FY 2020 for website and application system updates at the Board of Architecture, Engineering, Land Surveying, Landscape Architecture, Geoscience, and Interior Design.

Rationale/Background:

- The Board launched its online system for individuals to apply for engineering examinations, certifications and licensure in the fall of FY19. Applicants are able to check the status of their application 24/7 and print customized reference and experience forms that are required as a part of the application process. During FY20-21, the Board would like to enhance the system to allow online applications for the other professions, as well as implement a system for payment of the license fee following application approval.
- For each credit card transaction for online initial applications or renewals, the Board is charged a fee. The actual fee varies depending on the user's credit card (Visa, MasterCard, Discover, etc.) and the rewards the user gets from using that card, however the Board must charge a set fee for each transaction. The Board has been processing applications for renewal online for over a decade and each year goes through a lengthy process of analyzing the fees charged to the Board by the bank relative to the amount the Board collected from its applicants the previous year to set the fee for the upcoming year. The process is cumbersome and unreliable and results in the Board either over-recovering or under-recovering the fees. There is a new process available whereby US Bank processes the convenience fees on behalf of the Board. In order to take advantage of this new process, the Board must make changes to its website and interface with US Bank.
- The Board's database currently requires a social security number to be entered for each applicant for examination, licensure and certification. However, Minnesota Statutes 370C.72, subdivision 4, does not require collection of the social security number or Individual Tax Identification Number until the point at which the applicant is licensed. Therefore, the Board must make changes to its database to allow for processing of applications without a social security number and then requirement of the number at the point in which a license is issued. This will allow the Board to make changes to how the data is collected and reduce the number of staff that have access to this data thereby increasing data security and reducing the potential for a data breach.
- The Board reports disciplinary action it takes against individuals who have violated its statutes and rules. These actions are reported to national databases through which all states share information. The Board would like to make enhancements to its database to allow for more robust sharing of this information by

including other identifying data (such as the licensee's national council record number). Licensees often practice across borders and obtain licenses in multiple jurisdictions. Sharing disciplinary information nationally helps Boards remain aware of licensee transgressions and increases public protection.

Proposal:

The Governor recommends this one-time increase to the Board in order to complete the modernization of its application system, update its database to be more secure, and more efficiently process payment transactions.

IT Related Proposals:

The Board will use an external vendor to complete this project.

Results:

The additional funding will help the Board achieve the following results:

- The Board's goal is to have 80% of applications submitted online by the end of the biennium.
- The Board's goal is to have 80% of initial license fees paid online by the end of the biennium.
- Updating the interface with US Bank will result in more accurate fee collection, and reduce the amount of money the Board must contribute from its operating budget to cover the cost of under-recovery.
- Social Security Numbers will not be collected until the time in which the applicant's license or certificate is issued reducing the risk of data breach.
- Provide the funding for enhancements to the Board's database will allow for more robust data sharing in regard to disciplinary action taken against licensees and certificate holders.

AT A GLANCE

- The arts are a significant industry in Minnesota, generating more than \$2 billion in economic activity each year.
- Minnesota is home to more than 1,600 nonprofit arts organizations and 100,000 artists and creative workers
- Together, the Minnesota State Arts Board and the state's 11 regional arts councils serve residents and communities in all 87 Minnesota counties.
- Activities supported by the Arts Board and the regional arts councils during the FY 2016-2017 biennium served a combined audience of 24.6 million children and adults.

PURPOSE

The Minnesota State Arts Board stimulates and encourages the creation, performance, and appreciation of the arts. It serves as an adviser, resource, and policy maker by distributing grants and other forms of assistance for artistic activities; it also serves as the fiscal agent for legislative appropriations to eleven regional arts councils.

The purpose of the arts is to inspire, enlighten, connect, and challenge individuals. They give us new experiences, and help us understand and imagine the world from another person's point of view. However, the arts also produce tremendous secondary benefits that help Minnesota achieve many of its most important public goals.

Research shows that the arts increase academic achievement. Nontraditional learners or at-risk students often become high achievers in arts learning settings; this success becomes a bridge to learning in other areas. The arts stimulate 21st century work skills, including creativity, which will be an important characteristic of jobs and the workforce of the future. Arts bring people together. Residents of a community better understand their new immigrant neighbors after experiencing a traditional dance. A struggling downtown begins to "hum" with new energy on the evenings the community arts center offers a concert. Towns celebrate their identity and heritage through annual arts festivals. Artists and arts participation build social capital—the social bonds and civic engagement needed in a healthy, thriving society.

As it stimulates the arts and the many benefits they provide, the Arts Board helps achieve the following statewide outcomes:

- **A thriving economy that encourages business growth and employment opportunities**
- **Minnesotans have the education and skills needed to achieve their goals**
- **Strong and stable families and communities**

BUDGET

Source: Budget Planning & Analysis System (BPAS)

Source: Consolidated Fund Statement

The board receives an appropriation from the State's general fund, and from the State's arts and cultural heritage fund (ACHF). Appropriations from the ACHF may be spent only "for arts, arts education, and arts access and to preserve Minnesota's history and cultural heritage." The board also receives an annual state partnership grant from the National Endowment for the Arts.

STRATEGIES

The Arts Board provides financial support and other services to enable Minnesota and its residents and communities to reap the many benefits the arts provide. To accomplish its mission, the board is pursuing the following long-term goals and strategies:

- The arts are interwoven into every facet of community life
 - Develop strategic relationships and partnerships
- Minnesotans believe the arts are vital to who we are
 - Enhance public understanding of the value of the arts
- People of all ages, ethnicities, and abilities participate in the arts
 - Fully engage with nontraditional and underrepresented participants
 - Transform everyone's life by experiencing the arts
- People trust Minnesota's stewardship of public arts funding
 - Provide an accountable arts support system
 - Be responsible stewards of public funds
- The arts thrive in Minnesota
 - Foster visionary, skilled arts leaders and organizations statewide
 - Ensure sufficient resources to sustain the arts and artists
 - Serve as a clearinghouse of information on best practices and successful programs

Minnesota State Arts Board

FY 2020-21 Biennial Budget Change Item

Change Item Title: Office Relocation

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	700	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	700	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$700 thousand in FY 2020 for one-time relocation costs for the Minnesota State Arts Board.

Rationale/Background:

The Board has been in its current office location since 1995. On August 21, 2017, the Board was notified by its landlord that it would not be able to renew its current lease because the building is going to be repurposed. The Board's lease expires on October 31, 2019. Since receiving the notification, the Board has been working with the Department of Administration's Real Estate and Construction Services division to identify suitable office spaces and estimate the cost of relocating.

Proposal:

The Governor recommends one-time funding for the Board's relocation expenses, which includes building out the new space, modular workstations, IT and equipment installation, moving costs, and other administrative costs.

Equity and Inclusion:

The Board's primary function is grant making, and it also manages the state's Percent for Art in Public Place program (MS 16B.35). The Board reviews grant applications, artist qualifications, and project proposals in open, public meetings. The Board holds approximately 100 days of public meetings per year, and a space that is visible, safe, and accessible to all Minnesotans is vital. Proximity to public transportation and free or inexpensive parking will be key for low income constituents. A location that meets (or exceeds) ADA requirements will be necessary to allow persons with disabilities full access to the board.

IT Related Proposals:

N/A

Results:

This proposal is intended to allow the Board to continue to provide current levels of service and information to the public.

Statutory Change(s):

N/A

Minnesota State Arts Board

FY 2020-21 Biennial Budget Change Item

Change Item Title: Arts & Cultural Heritage Legacy Fund Appropriation

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	32,861	33,696	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	32,861	33,696	0	0
FTEs	13.0	13.0	0	0

Recommendation:

The Governor recommends an appropriation of \$66.557 million to the agency for the FY 2020-2021 biennium from the state's dedicated arts and cultural heritage fund. This is in keeping with current law which states "At least 47 percent of the money deposited in the arts and cultural heritage fund must be for grants and services awarded through the Minnesota State Art Board, or regional arts councils subject to appropriation." (Minnesota Statutes 129D.17, subd 4.)

Rationale/Background:

The Arts Board is a state agency; its statutory charge is to "stimulate and encourage the creation, performance and appreciation of the arts in the state." It also serves as the fiscal agent for a system of eleven regional arts councils. Together, the board and councils serve as an effective mechanism to assess the arts needs of the state, and provide funding and services to best meet those needs.

Funds appropriated from the arts and cultural heritage fund are used to help achieve the following outcomes:

- The arts are interwoven into every facet of community life.
- People of all ages, ethnicities, and abilities participate in the arts.
- People trust Minnesota's stewardship of public arts funding.
- The arts thrive in Minnesota.

The Arts Board has received an appropriation from the arts and cultural heritage fund each year since its creation in FY 2010. With those funds, there has been a positive trend in each of the goal areas, however significant work remains to be done to achieve them.

Proposal:

The Arts Board and regional arts councils' core business is grant making. Rather than investing funds in only a few communities or regions, or a small number of artists, arts organizations, or arts programs, the Arts Board and regional arts council system is designed to ensure that there is investment in every county of the state and in thousands of artists, arts organizations, and arts activities each year. This structure, and broad investment through it, is intentional. Because its long term goals are statewide, with the intent that all Minnesotans will be served, a broad strategy and mechanism will best help turn the curve.

At the moment, the Arts Board is able to measure the number of applicants that can be funded (i.e., how many investments can be made), and the number of persons who are served by the funded activities (i.e., impact). Each year, the number of requests, and dollars requested, far surpass the funds available.

	Federal Fund – Agency Total		773	783	783	783		1.5

Narrative

The Minnesota State Arts Board receives federal support in the form of an annual State Partnership grant from the National Endowment for the Arts (NEA). NEA dollars are restricted to the following three purposes:

- Arts in education – the Arts Board must use these funds to support arts activities in schools and/or developmental programs to make arts in education programs more accessible or successful. Minnesota school children, teachers, school districts, parents, and communities benefit directly from these grants. Teaching artists also benefit from developmental programs that enhance their skills and expand their professional capacity.
- Underserved – the Arts Board must use these funds to support arts experiences for individuals/groups/areas that traditionally have fewer opportunities to participate in the arts. In Minnesota, this includes individuals/communities in greater Minnesota, artists/arts organizations based in communities of color, and arts activities that involve persons with disabilities and/or older adults.
- State basic grant – the Arts Board is free to use these funds as it sees fit to help achieve its vision – that all Minnesotans should have the opportunity to participate in the arts.

The National Endowment for the Arts requires a one-to-one cash match. The Arts Board must receive state funding in order to qualify for NEA funding.

As long as Congress continues to fund the National Endowment for the Arts, support from the NEA to the Arts Board will be forthcoming each year. The NEA is required to pass at least 40 percent of its annual support from Congress on to states in the form of State Partnership (block) grants. The block grants are determined by a formula, predominantly based on population.

AT A GLANCE

The Council represents a diverse community estimated to be about 290,000 Asians and 7,500 Pacific Islanders.¹ This community is descended from more than 40 nations including India, Tibet, the Philippines, Laos, and Burma.

According to the U.S. Census Bureau, the Asian American community is the fastest growing minority population in Minnesota, and the nation. In Minnesota, the Asian population grew from 4.4 % in 2010 to 5.3% in 2016.^{1,2}

The following are the ten largest Asian ethnic populations in Minnesota¹:

- Hmong – 75,422
- Asian Indian – 45,716
- Chinese – 35,176
- Vietnamese – 31,602
- Korean – 24,751
- Filipino – 18,612
- Lao – 13,729
- Burmese – 10,518
- Japanese – 9,455
- Cambodian – 8,999

PURPOSE

Pursuant to Minn. Stat. § 15.0145, the Council on Asian Pacific Minnesotans is an executive branch agency tasked with the responsibility of working for the implementation of economic, social, legal, and political equality of Asian Pacific Minnesotans. Our primary customers are the Governor, the Legislature, state agencies, and Asian Pacific organizations and citizens.

The Council's priorities include:

- Advisory – Publish policy briefs and original research/reports, and provide comments and public testimony on issues.
- Advocacy – Direct engagement with policy-makers to influence public policy and resource allocation decisions.
- Facilitation– Facilitate opportunities for engagement, inclusion, and recognition of Asian Pacific Minnesotans.

In carrying out its statutory responsibilities, the Council's work contributes to the following statewide outcome(s):

- Minnesotans have the education and skills needed to achieve their goals.
- A thriving economy that encourages business growth and employment opportunities.
- Minnesotans are healthy.
- Minnesotans are safe.

BUDGET

Source: BPAS

¹ U.S. Census Bureau, 2012-2016 American Community Survey 5-Year Estimates.

² U.S. Census Bureau, 2006-2010 American Community Survey 5-Year Estimates.

The Council's main source of revenue in FY17 is the General Fund.

Source: Consolidated Fund Statement

The majority of the Council's budget is funded through an appropriation from the general fund. The Council also collects fees in a special revenue fund to help pay for events held by the Council.

STRATEGIES

The Council utilizes several strategies to deliver on its mission and support statewide outcomes:

- Research and Information Analysis – Develop and publish original research reports for use by decision makers and citizens.
- Policy Advisory and Advocacy – Provide quantitative and data-driven advice to policy makers.
- Citizen Outreach – Identify and/or create forums and advocacy trainings to inform and influence public policy.
- Facilitation and Coordination – Develop and deploy engagement, inclusion, and recognition activities.

RESULTS

The following measurements are used to track the Council's performance in implementing its strategies:

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous – Jan. 2017 to Dec. 2017</i>	<i>Current – Jan. 2018 to Dec. 2018</i>
Quantity	Publication of Original Research Reports	0	1
Quantity	Legislative Activities During the Session	90	100
Quantity	Attendance at Cultural Events and Community-led Meetings	58	70
Quantity	Facilitation and Coordination of Community Engagement and Inclusion Activities	30	40

Legal Authority: Minn. Stat. § 15.0145 (<https://www.revisor.mn.gov/statutes/?id=15.0145>) provides the legal authority for the Council on Asian Pacific Minnesotans.

Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	45	50	50	50
FTEs	0	0	0	0

Recommendation:

The Governor recommends additional funding of \$45 thousand in FY 2020 and \$50 thousand each year thereafter to maintain the current level of service delivery at the Council on Asian Pacific Minnesotans.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related cost increases. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

Equity and Inclusion:

N/A

IT Related Proposals:

N/A

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the Council, this funding will cover known employee compensation growth, professional/technical contracts, workers' compensation premiums, and other operating costs.

Results:

This proposal is intended to allow agencies to continue to provide current levels of service and information to the public.

Statutory Change(s):

Council on Asian Pacific Minnesotans

FY 2020-21 Biennial Budget Change Item

Change Item Title: Communications Specialist

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	99	101	101	101
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	99	101	101	101
FTEs	1	1	1	1

Recommendation:

The Governor recommends additional funding of \$99 thousand in FY 2020 and \$101 thousand each year thereafter to expand the capacity of the Council on Asian Pacific Minnesotans.

Rationale/Background:

Minnesota's fastest growing population is the Asian American community. Minnesota's Asian Pacific community is descended from more than sixty nationalities and is arguably the most diverse community in the state. Many of our East Asian and South Asian Minnesotan families came to Minnesota educated and economically stable, or have been here for several generations; whereas, the majority of our Southeast Asian Minnesotan families came here as recently as forty-five years ago as displaced refugees. The divergent historical experiences of these communities has led to a vastly different understanding of, and level of engagement with government. Consistent, frequent, and meaningful communication via a variety of modalities is necessary for the Council to be successful.

The Council cannot fully deliver on its communication strategy because it does not have a dedicated communications position. A dedicated position would enable the Council to maximize its statewide communication and information-sharing strategy, using both social and traditional media. While the Asian Pacific community is large in terms of population, the population is dispersed across the state. The Communications Specialist will further the Council's ability to help create and represent a pan-Asian Pacific Minnesota composed of unique ethnicities.

The Legislature restructured the ethnic councils in 2015. Under current statute (MS 15.0145), the Council is required to work with the legislative and executive branches of government to ensure equality for Minnesotans of Asian Pacific descent. In January 2018, after a two year long strategic planning process, the Council adopted its current 4-year strategic plan. Under this plan, the Council must have the ability and capacity to deliver on the following goals:

- Minnesota's Asian Pacific communities benefit from the Council's work
- Minnesota's Asian Pacific Communities trust the Council
- The Council is an agent of change in state government
- The Council leads dynamically and effectively

Proposal:

The Governor recommends additional funding for the Council to add a new Communications Specialist. This position will lead the Council's communication efforts and will greatly enhance the Council's capacity to communicate with Asian Pacific Minnesotans about key Council, state, and local government topics. This position will support the Executive Director to:

- Increase communication with diverse Asian Pacific communities in the 7 county metro area, as well as greater Minnesota; such as Warroad and Baudette, where there are Filipina and Lao communities; and in southern Minnesota, in Austin, where there are Hmong, Karen, and Karenni communities.
- Increase communication with legislators and the community at large about Asian Pacific Minnesotans, specifically the issues confronting the many ethnic groups that make up this community.
- Increase culturally-responsive engagement of community members in their efforts to influence legislative and administrative decisions.
- Expand and strengthen relationships within and among the legislative and executive branches, and form more strategic partnerships with Asian Pacific Minnesotans, community-based organizations, and businesses.

This recommendation includes funding for compensation, work space, IT costs, and in-state travel.

Equity and Inclusion:

The Asian Pacific Minnesotan community is descended from more than 40 nations. Some members of the community are highly educated, native born, and business owners, while others are struggling to meet the challenges that come with life in the United States as refugee-experienced communities. This recommendation would better equip the Council to shape policies that reflect the multiple realities of the Asian Pacific Minnesotan community.

AT A GLANCE

- Chief Legal Officer for the State of Minnesota
- Provides legal representation to State agencies, boards, and commissions
- Takes legal action on behalf of Minnesota residents

PURPOSE

The Attorney General is the State of Minnesota's Chief Legal Officer. The Attorney General helps to ensure that the laws the Legislature enacts are upheld. The Attorney General's Office provides legal representation to State agencies, boards, and commissions. The Attorney General's Office also protects the public by bringing lawsuits on behalf of the residents of Minnesota. Through its legal work, including the representation of State agencies, the Attorney General's Office helps to support the following statewide outcomes:

- Efficient and accountable government services
- People in Minnesota are safe
- Strong and stable families and communities
- A thriving economy that encourages business growth and employment opportunities
- All Minnesotans have optimal health
- Minnesotans have the education and skills needed to achieve their goals
- A clean, healthy environment with sustainable uses of natural resources

STRATEGIES

- Facilitate the enforcement of laws passed by the Minnesota Legislature.
- Defend laws enacted by the Minnesota Legislature against constitutional and other legal challenges.
- Deliver high-quality, efficient and effective legal representation to State agencies, boards and officials.
- Protect and save taxpayers' dollars by defending claims for monetary judgments against State agencies and employees.

- Provide legal representation to State agencies and boards in various civil and administrative proceedings and obtain monetary payments as directed by the Minnesota Legislature.
- Provide proactive legal advice to avoid lawsuits.
- Provide Minnesota counties and law enforcement agencies with assistance in serious criminal matters.
- Ensure that the public interest is protected in delivering legal services.
- Population primarily served is the residents of the State of Minnesota and the executive, legislative, and judicial branches of State government and State agencies, boards, and commissions.

Attorney General

FY 2020-21 Biennial Budget Change Item

Change Item Title: Maintain and Stabilize Experienced Attorney Staff

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	630	1,315	1,315	1,315
Revenues	0	0	0	0
Other Funds				
Expenditures	54	111	111	111
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	684	1,426	1,426	1,426
FTEs	0	0	0	0

Recommendation:

The Governor recommends an increase of \$630,000 in FY 2020 and \$1.315 million in FY 2021 and each year thereafter from the General Fund, and \$54,000 in FY 2020 and \$111,000 in FY 2021 and each year thereafter from the Health Related Boards Fund, for the Office of the Attorney General (AGO) to maintain and stabilize experienced attorney staff.

This recommendation is equal to a 4.4% increase to the Office's General Fund base budget and a 3.4% increase to the Office's Health Related Boards Fund base budget for the FY 2020-2021 biennium.

Rationale/Background:

The Attorney General's Office is the second largest public law office in Minnesota. Few public law offices in Minnesota handle the range, quantity, and complexity of civil litigation as the Minnesota Attorney General's Office. No other public law office serves as many clients as the Attorney General. The clients include over 100 state agencies, boards and commissions. Its lawyers handle more than 7,000 legal files per year covering a wide range of legal matters. It defends and implements laws enacted by the state legislature. This may require the Office to commence lawsuits to implement the laws enacted and to defend those laws against constitutional challenge. In many instances the litigation involves significant claims for monetary damages or compensation against the state and state officials.

Further, on the basis of size the Attorney General's Office would rank among the top ten private law offices in Minnesota. Matters litigated by attorneys of the Office bring them face to face across the table with attorneys employed by most of these law offices. The attorneys at these firms receive compensation equivalent to multiple times that of their Attorney General Office opponents. Often these firms are able to recruit staff attorneys away from the Attorney General's Office by offering them significant pay increases. Public law offices cannot compete with the salaries paid lawyers in private law offices of similar size, but the Attorney General's Office and other public law offices must be able to pay salaries that will enable them to recruit and retain attorneys capable of defending the interests of the state, its agencies and people in court.

Similarly, the Attorney General's Office must be able to compete with other public law offices for the best attorneys who are interested in public service. But an analysis of the salaries paid by the U. S. Attorney's Office, and Ramsey and Hennepin County Attorney Offices shows that the Attorney General salaries are a distant fourth. Comparisons with these federal and county law offices demonstrate that across the board Attorney General staff are paid less than their counterparts in those offices.

C. Y. 2018 Average Staff Attorney (non-manager attorneys)			
U. S. Atty	Hennepin Co.	Ramsey Co.	Atty Gen
\$146,733	\$120,094	\$110,399	\$96,102

A number of factors may explain this disparity in pay but certainly the freeze on the general fund appropriation to the Attorney General's Office is a significant one. For three successive biennia the general fund appropriation for the Attorney General's Office has been \$22,125,000. Every measure of inflation, including the Consumer Price Indicator (CPI) and the Implicit Price Deflator for State & Local Government Purchases (IPD) for FY 2014 to FY 2017, records growth over that period. Without positive action on this request pay to Attorney General staff will fall further behind.

Increases negotiated for Hennepin and Ramsey County Attorney Offices in calendar year 2019-21 will be 2.5% per year for all attorneys plus step increases and promotion amounts of 3% or more for some. Attorneys who separated from the Attorney General's Office for reasons other than retirement exceeded those at the Hennepin and Ramsey County Offices.

Proposal:

The Attorney General's Office requests an increase for competitive salary increases for attorney staff. The requested funds will not eliminate or reduce the gap between salaries paid in these three comparable law offices, but they will help keep the gap from growing greater.

Equity and Inclusion:

The Attorney General's Office is committed to broaden its recruitment of attorneys, legal assistants and support staff that better reflects the State's diverse population. This will enhance service to marginalized communities and protected classes.

IT Related Proposals:

This is not an information technology proposal.

Statutory Change(s):

This proposal will not require statutory changes.

Attorney General

FY 2020-21 Biennial Budget Change Item

Change Item Title: Enhanced Criminal Enforcement – Assistance to Rural Counties and Prosecution of Economic Crimes

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	994	1,311	1,311	1,311
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	994	1,311	1,311	1,311
FTEs	8.0	9.0	9.0	9.0

Recommendation:

The Governor recommends an increase of \$994,000 in FY 2020 and \$1.311 million in FY 2021 and each year thereafter from the General Fund for the Office of the Attorney General (AGO) to provide needed legal services to rural county attorneys and prosecute crimes that unfairly harm consumers and legitimate, law-abiding businesses. The outcome of additional resources would be to gradually rebuild the Office's capacity to aid counties to enforce the criminal laws in their jurisdiction that are beyond the scope of their resources and hold unscrupulous businesses accountable.

This recommendation is equal to a 5.2% increase to the Office's General Fund base budget for the FY 2020-2021 biennium.

Rationale/Background:

Pursuant to Minn. Stat. Sect. 8.01, upon request of the county attorney, the attorney general shall appear in court in such criminal cases as the attorney general deems proper.

Since 1999, the AGO has decreased its capacity to assist county attorneys with criminal prosecutions. At the present time, the Attorney General's Office has only one full-time criminal prosecutor whose assistance is limited to homicide cases. Requests from county attorneys for assistance with prosecution of other violent crimes, white collar crime, financial exploitation, multi-county prosecutions of drug or human trafficking, or other complex or unusual cases are routinely not accepted for prosecution due to lack of staff.

Many counties are served by small offices, in some cases, staffed by part-time county attorneys. These offices do an admirable job of handling local enforcement and prosecution of crimes more typical to their communities. It is the rare instance of an atypical serious crime, including attempted murder, violent domestic or sexual assault, murder for hire, large-scale drug manufacture and sales, sex and human trafficking, or identified pattern of crime that crosses county lines, that is often beyond the experience and resources of these small offices. As the statute states, when faced with such alleged crimes, the county attorney has the option to request assistance. It is their expectation that the Attorney General's Office will employ a small group of experienced prosecutors to handle these uncommon matters efficiently and effectively, as requested.

It is the intent of the Attorney General to begin the process of rebuilding this capacity to serve the counties that request assistance.

Pursuant to Minn. Stat. Sect 8.31, the attorney general shall investigate violations of the law of this state respecting unfair, discriminatory, or otherwise unlawful practices in business, commerce or trade. Although the

Attorney General's Office has initiated civil litigation, no white-collar crime prosecutions (outside of Medicaid fraud) have been brought by the Attorney General in several years. Some cases have been referred to the federal government for prosecution, but those have not been prosecuted at the state level because of lack of resources. Allowing such criminal activity to go unchecked exploits both the victims of the activity, and the businesses that act ethically and within the law. It is anticipated that one of the positions will be filled by a forensic accountant, and that the office will also work closely with investigators at the Bureau of Criminal Apprehension, Department of Commerce, and Department of Labor and Industry.

Current level of services: In addition to prosecuting homicide cases, the Attorney General's Office handles 90 - 110 criminal appeals each year for 80 of the 87 Minnesota counties, and provides some materials and sample pleadings to help county attorneys conduct grand juries and respond to habeas corpus petitions. It also conducts Medicaid Fraud investigations and prosecutions, but these efforts are supported by dedicated state and federal funds that, by law, may not be used for any other purpose.

Proposal:

The Attorney General requests \$994,000 in FY 2020 and \$1.311 million in FY 2021 and each year thereafter to rebuild the capacity of the office to meet its obligation to aid in the enforcement of the criminal laws of the state.

As soon as the funds are appropriated, the Attorney General will recruit and train staff, and develop formal lines of communication with the county attorneys and state investigators at the Bureau of Criminal Apprehension, Department of Commerce and Department of Labor and Industry. Since it will take some time to rebuild the capacity, two of the positions would be added in the second year of the biennium.

Equity and Inclusion:

The Attorney General's Office is committed to broaden its recruitment of attorneys, legal assistants and support staff that better reflects the State's diverse population.

This will enhance service to marginalized communities, including but not limited to persons of color, those with limited education or English-language skills, and those living on fixed incomes or at or near the poverty level, who are disproportionately represented among crime victims. However, crime victims cut across all groups and demographics.

IT Related Proposals:

This request contains no information technology changes.

Results:

With these resources, the Attorney General's Office will better respond to the unmet needs of the counties and begin to rebuild the capacity to provide necessary assistance with prosecution of serious offenses. It will also build the capacity to prosecute targeted cases against perpetrators of crimes that effect the economic security of Minnesotans.

It is expected that this initiative will become part of the Attorney General's Office base budget, and its efforts will be informed in the future by changing patterns of criminal activity. When unscrupulous actors, both individuals and businesses, recognize that illegal actions will be prosecuted, it should help deter future criminal activity, and increase the confidence of those businesses that follow the law that the unscrupulous will be held accountable.

The Attorney General will track the number of investigations and prosecutions commenced and completed, as well as the characteristics of crime victims and scope of economic loss.

Statutory Change(s):

No statutory changes are required.

Program: Attorney General**Activity: Government Legal Services Section****AT A GLANCE**

In 2018, the Government Legal Services Section:

- Enforced the laws and rules enacted to protect Minnesota residents.
- Defended State entities and laws in enforcement proceedings.
- Defended claims against State entities and employees saving millions of taxpayer dollars.

PURPOSE & CONTEXT

The Government Legal Services Section provides a broad range of legal representation to various Minnesota State entities including Minnesota Management and Budget, the Minnesota Departments of Corrections, Commerce, Health and Transportation and the State Board of Investment.

The section primarily provides legal representation in state agency's enforcement, disciplinary and regulatory actions to protect Minnesota residents. The section represents State entities in licensing, regulatory, rate making, disciplinary and enforcement actions. The section advises State agencies and boards in financial, investment, real estate, contract and bond issuance transactions.

SERVICES PROVIDED

- State agencies and boards are provided legal representation in enforcement and disciplinary proceedings.
- Claims and litigation are avoided by proactive legal advice.
- Millions of tax dollars are saved by defense of legal claims.
- Agencies and boards are represented in complex financial and contract transactions.

RESULTS

- Enforcement of Minnesota laws and regulations protects Minnesotans' rights, health and safety.
- Legal advice and representation facilitates the implementation and enforcement of laws enacted by the Minnesota Legislature.
- The implementation and enforcement of laws enacted by the Minnesota Legislature are facilitated by the provision of efficient and competent legal advice and representation.
- Litigation is conducted in a manner to advance the public interest.
- Defense of claims and recovery actions for State entities protects the State Treasury.

Program: Attorney General

Activity: Regulatory Law and Professions Section

AT A GLANCE

In 2018, the Regulatory Law and Professions Section:

- Provided legal counsel and representation to state agencies and boards to ensure that the laws enacted by the Minnesota Legislature were enforced and upheld.
- Defended the State in actions for money judgments and in tax appeals to preserve taxpayer dollars
- Protected the public by representing the health licensing boards in disciplinary actions against licensed health care professionals.
- Upheld the public interest by providing proactive legal advice and in resolving disputes.

PURPOSE & CONTEXT

The Regulatory Law and Professions Section of the Attorney General's Office provides legal advice and representation to the Department of Revenue, Pollution Control Agency, Department of Natural Resources, Department of Agriculture, Environmental Quality Board, Professional Educator Licensing and Standards Board and all of the Minnesota health licensing boards.

The section represents these state agencies and boards in disciplinary and enforcement proceedings in state, administrative, and federal courts to ensure that Minnesota law is enforced and upheld. The section provides consistent high quality legal advice and representation in a cost effective manner and works to ensure the public interest is represented in all matters. By representing the Department of Revenue, the section helps to enforce State tax laws and protects the public through its representation of the state agencies and boards. The section also regularly provides legal advice and representation in matters involving real estate to numerous state agencies and boards.

SERVICES PROVIDED

The Regulatory Law and Professions Section provides the following services:

- Represents the Department of Revenue, Department of Education, Pollution Control Agency, Department of Natural Resources, Department of Agriculture, Environmental Quality Board, Professional Educator Licensing, and Minnesota's health licensing boards.
- Provides proactive legal counsel and representation in an effort to avoid lawsuits or resolve disputes.
- Litigates matters on behalf of state agencies and boards to ensure that Minnesota laws are enforced and upheld and that the public interest is protected.
- Protects taxpayer dollars by defending the state agencies and boards in actions to recover money judgments and by representing the Department of Revenue in tax appeals.

RESULTS

- Recovers funds owed to the State and also defends monetary claims brought against the State to protect taxpayer dollars.
- Laws enacted by the Minnesota Legislature are enforced and upheld.
- Delivers proactive and effective legal representation to state agencies and boards in a cost effective and efficient manner.
- Protects the public interest in its representation of state agencies and boards.
- Resident's rights are protected by ensuring that laws are enforced and upheld.
- Represents the health licensing boards in disciplinary action so that Minnesota residents are provided with access to safer health care professionals.

Program: Attorney General
Activity: State Government Services Section

AT A GLANCE

In 2018, the State Government Services Section:

- Provided Minnesota counties and law enforcement agencies with prosecutorial assistance in serious criminal matters.
- Prosecuted healthcare providers that fraudulently obtained State Medicaid funds.
- Participated in False Claims Act cases.
- Protected and saved taxpayer dollars by defending claims for monetary judgments against the Department of Human Services.
- Represented the Department of Public Safety at implied consent hearings.
- Provided assistance to Minnesota residents.

PURPOSE & CONTEXT

The State Government Services Section provides a broad range of legal services with the goals of protecting public safety and taxpayer dollars. The section provides assistance to county attorneys and local law enforcement agencies in prosecuting serious crimes and in the civil commitment of sex offenders. The section further provides assistance to Minnesota counties with criminal appeals. The section prosecutes healthcare providers committing Medicaid fraud and assists county attorneys in prosecuting vulnerable adult abuse, neglect, and financial exploitation cases. The section also provides assistance to Minnesota residents.

Through its defense of the Minnesota Department of Human Services in litigation, the section defends the State's laws and the constitutionality of the State's actions and decisions. In addition, the section provides legal representation to the Commissioner of Public Safety, including at implied consent hearings.

SERVICES PROVIDED

The State Government Services Section provides the following services:

- Assists Minnesota counties and law enforcement in prosecuting serious crimes.
- Assists county attorneys in civil commitment hearings involving dangerous sexual predators.
- Provides assistance to county attorneys in felony appeals, including murder, sexual assault, child sexual abuse, felony assault, and drug distribution cases.
- Prosecutes healthcare provider fraud within the Medicaid program and recovers fraudulently obtained Medicaid funds.
- Provides legal counsel to the Minnesota Department of Human Services, including the defense of the constitutionality of the Minnesota Sex Offender Program.
- Appears in court on behalf of the Commissioner of Public Safety in implied consent cases.
- Delivers proactive legal advice to avoid lawsuits.
- Assists residents who contact the office.

RESULTS

- Legal work helps facilitate the implementation and enforcement of laws enacted by the Minnesota Legislature.
- High quality, effective and efficient legal representation delivered to state agencies, boards, and commissions.
- Providers are prosecuted for fraudulent use of Medicaid funds.
- Public interest is advanced by providing assistance in prosecutions and appeals.
- Public interest is advanced in civil litigation.
- Residents' rights and safety are protected.

Program: Attorney General**Activity: Civil Law Section****AT A GLANCE**

In 2018, the Civil Law Section:

- Upheld and implemented the laws enacted by the Minnesota Legislature.
- Ensured Minnesota nonprofits, charities, and trusts registered and complied with Minnesota law.
- Advocated for residential and small business ratepayers on utility matters.

PURPOSE & CONTEXT

The Civil Law Section of the Attorney General's Office regulates nonprofits, charities, and trusts that operate and fundraise in Minnesota. The section also advocates for the interest of residential and small business ratepayers in matters involving electric, natural gas, and telecommunications services and rates. The Civil Law Section also enforces Minnesota's antitrust laws and ensures that businesses operating in Minnesota comply with state consumer protection laws by investigating and taking enforcement actions against entities that violate state law.

SERVICES PROVIDED

The Civil Law Section provides the following services:

- Oversees and regulates Minnesota nonprofit organizations, charities and trusts.
- Advocates for residential and small business ratepayers in utility matters before the Minnesota Public Utilities Commission.
- Files enforcement actions to ensure businesses comply with the state consumer protection and antitrust laws.

RESULTS

- Ensure nonprofits, charities, and trusts manage, preserve, and use their charitable assets for the benefit of the public.
- Legal work facilitates the implementation and enforcement of laws enacted by the Minnesota Legislature.
- Recover funds for the State and obtain restitution to Minnesota consumers.
- Ensure the public interest is advanced in civil litigation.
- Residents' rights are protected by making sure Minnesota laws are enforced and upheld.
- Ensures nonprofits, charities and trusts register and comply with Minnesota laws.
- Residential and small business ratepayer interests are advanced in utility matters.
- Consumer protection and antitrust laws are fairly enforced.

Program: Attorney General
Activity: Civil Litigation Section

AT A GLANCE

In 2018, the Civil Litigation Section:

- Provided high-quality legal advice and representation to all three branches of Minnesota Government, including Constitutional officers, State agencies, boards, public officials, and employees.
- Successfully defended Minnesota laws from legal challenges brought before state and federal courts.
- Defended the State of Minnesota against employment and tort claims, protecting and saving taxpayer dollars in cases that often seek significant monetary payments.
- Provided legal advice to the Public Utilities Commission, and defended its decisions in court.

PURPOSE & CONTEXT

The Civil Litigation Section provides high-quality and effective legal advice and representation to all three branches of Minnesota Government in a wide variety of civil cases.

The section defends Minnesota laws against legal challenges, including challenges to the constitutionality of the laws. The section provides advice, representation, and defense to Constitutional officers, State agencies, boards, public officials, and employees across state government in tort, employment, and other civil legal claims. These cases often involve defending important legal principles and seek significant monetary damages.

The section also provides legal advice to the Minnesota Public Utilities Commission on matters pending before the Commission, and defends Commission decisions against legal challenges in both state and federal courts.

The population primarily served by the Civil Litigation Section includes the executive, legislative, and judicial branches of State government and the residents of Minnesota.

SERVICES PROVIDED

The Civil Litigation Section provides the following services:

- Represents the State of Minnesota in legal matters pending before state and federal courts, including at district court and appellate levels.
- Defends Minnesota laws enacted by the Legislature against constitutional and other legal challenges.
- Defends Constitutional officers, State agencies, boards, public officials and employees in challenges to their implementation of Minnesota laws.
- Defends Constitutional officers, State agencies, boards, public officials and employees in a variety of other civil matters, including in tort and employment claims.
- Advises Constitutional offices, State agencies, boards, public officials and employees in an effort to avoid meritorious adverse legal claims.
- Defends successfully against significant claims for monetary damages, saving and protecting taxpayer dollars.
- Provide legal representation to the Public Utilities Commission, both in matters pending before the Commission and in legal cases challenging their decisions.

RESULTS

As a result of the Civil Litigation Section:

- The laws enacted by the Minnesota Legislature are protected from constitutional and other legal challenges, and therefore can be enforced as intended by the Legislature.
- Constitutional officers, State agencies, boards, public officials, and employees are able to execute the authority and legal directives of the Legislature, because they receive effective and high-quality defense from civil claims challenging their actions.
- Significant taxpayer dollars are protected by the successful defense against civil legal claims seeking monetary damages, as well as through preventative legal advice which allows agencies to avoid potential civil legal claims.
- Public interest is advanced in litigation.

Program: Attorney General
Activity: Administrative Operations

AT A GLANCE

In 2018, Administrative Operations:

- Provided administrative, human resources, accounting services, and support services to the Attorney General's Office in order to provide efficient and effective legal representation.

PURPOSE & CONTEXT

- Ensure that budget, human resources, payroll, and accounting practices are in accordance with State law and procedures.
- Protect and save taxpayer dollars by ensuring an efficient use of resources and staff.
- Purchase goods and services pursuant to State guidelines and requirements.
- Interact with other State agencies and boards on personnel, administrative and accounting issues.

SERVICES PROVIDED

- Protect taxpayer dollars by ensuring accounting and payroll services are complete, accurate and in accordance with the law.
- Maintain budget and accounting systems to ensure that they are in compliance with State law and practice.
- Develop and implement administrative policies and procedures in accordance with State law and requirements.
- Provide the Attorney General's Office with necessary administrative support to provide high quality and efficient legal representation.
- Supply human resource, administrative and accounting services.
- Ensure that purchasing is cost effective and in accordance with all applicable laws and regulations.

RESULTS

- Administrative support is provided to efficiently carry out the delivery of high quality legal services.
- Legal resources are available to ensure timely and effective representation.
- Fiscal matters are handled to ensure that efficient and accountable government services are provided and that the systems are in accordance with the laws of the State.

Narrative

The AGO uses federal grant money for 75% of the funding of its Medicaid Fraud Control Unit (MFCU). The MFCU investigates and criminally prosecutes health care providers committing fraud against the Medicaid program in cases referred by the Minnesota Department of Human Services or other agencies. The MFCU provides investigative support to and jointly prosecutes providers with the U.S. Attorney's Office for the District of Minnesota. The Maintenance of Effort level for the MFCU is a 25% funding match by the State of Minnesota. The Minnesota legislature appropriates this match bi-annually as part of the state budget process.

Agency Change Summary	6

mn.gov/boards/barber-examiners/

AT A GLANCE

The Board is comprised of five members: four barbers and one public member, all of whom are appointed by the Governor. The Board also has three full time staff to carry out its responsibilities.

FY 2017 Credentialing Services

1,896	Registered Barbers
788	Barber Shops
117	Student Barbers
24	Barber Instructors
6	Barber Schools
2,831	Registrations issued and/ or renewed

FY 2017 Inspection and Investigation Services

The Board completed 1,007 Barber shop and barber school visits, inspections, re-inspections, and/or investigations

FY 2017 Discipline Services

The Board received 34 complaints and issued 9 disciplinary orders

PURPOSE

The Board of Barber Examiners was established in 1897 to regulate the practice of barbering. The mission of the Board of Barber Examiners is to promote public health and safety by ensuring that barbers are appropriately trained and demonstrate the skills necessary to conduct barber services in a safe, sanitary environment, while using appropriate disinfection procedures to avoid injury and the spread of disease.

The Board Contributes to the statewide outcome of **people in Minnesota are safe** by:

- Setting the minimum standards of safe practice for barber services.
- Conducting examination of new barbers to assure appropriate training and skill level.
- Conducting regular inspection of barber shops and schools to assure that barbers conduct barber services in a safe manner while using appropriate infection control methods.

The Board contributes to the statewide outcome of **efficient and accountable government services** by:

- Assessing credentials, issuing registrations, conducting examinations, inspecting barber establishments, and responding to inquiries in a timely and courteous manner.
- Investigating and resolving complaints and concerns regarding the practice of barbering. The Board conducts investigations within the jurisdiction granted in Minnesota Statute Chapters 154 and 214 and disciplines barbers as provided by law.

BUDGET

Source: Budget Planning & Analysis System (BPAS)

Source: Consolidated Fund Statement

The Board receives a direct appropriation from the general fund for all operating expenses. In fiscal year 2017 the Board's appropriation was \$325,000. All revenue received by the Board is deposited in the general fund as non-dedicated receipts.

STRATEGIES

The Board of Barber Examiners contributes to helping keep people in Minnesota safe by setting standards of practice and infection control procedures to reduce the potential of injury or the spread of disease. The Board is an active participant in the National Association of Barber Boards of America (NABBA). As a NABBA member the Board remains informed of emerging educational, examination, and infection control standards. The Board members conduct examination of new barbers to ensure minimum standards of safe practice and infection control are met. The Board inspector conducts regular, surprise inspections of barbering facilities to ensure compliance with infection control standards.

The Board contributes to providing efficient and accountable government services through courteous and responsive customer interaction. Board staff respond to applications as they are received and completed applications are promptly processed. It is an expectation that phone calls and e-mail inquiries be answered or promptly returned. Board staff are available to provide information and assistance in person, by phone, or email.

<i>Operating Adjustment</i>	7

mn.gov/boards/behavioral-health/

AT A GLANCE

Licensing Services-FY 2017

- 5,296 total number of licenses and temporary permits
- 929 new licenses and temporary permits issued
- 919 new license and temporary permit applications received
- 3,223 licenses and temporary permits renewed

Complaint Services-FY 2017

- 175 new complaints received
- 113 complaints closed
- 10 disciplinary actions taken

Staff

- 6.0 full time equivalent employees

PURPOSE

The Board of Behavioral Health and Therapy exists to regulate the practices of alcohol and drug counseling, professional counseling, and professional clinical counseling in the State of Minnesota. Regulation of these professions is necessary to protect the health, safety and welfare of the public when they receive mental health and chemical health/substance use disorder counseling services. The Board carries out its mission through effective licensure and enforcement of statutes and rules that ensure a standard of competent and ethical practice. The Board supports the following statewide outcomes:

- People in Minnesota are safe
- All Minnesotans have optimal health
- Efficient and accountable government services

BUDGET

Source: Budget Planning & Analysis System (BPAS)

Source: Consolidated Fund Statement

Licensure fees fund the Board and we receive no general fund dollars. Minnesota Statutes section 214.06, subdivision 1(a) compels the Board to collect fees in the amount sufficient to cover direct and indirect

expenditures. Funds are deposited as non-dedicated revenue into the state government special revenue fund. From this fund, the Board receives a direct appropriation to pay for agency expenses such as salaries, rent, costs associated with disciplinary/contested cases, and operating expenditures. It also pays statewide indirect costs through an open appropriation.

In addition to Board operations, licensure fees fund activities that support multiple boards and/or other agencies. Some of these are the Administrative Services Unit (inter-board), Health Professionals Services Program (inter-board), Office of the Attorney General for legal services, and the Criminal Background Check Program (inter-board).

STRATEGIES

The Board of Behavioral Health and Therapy promotes and protects the health and safety of the citizens of Minnesota, accomplishes its public protection mission, and contributes to statewide outcomes by:

- Setting educational, supervision, and examination requirements for initial licensure as a licensed professional counselor (LPC), licensed professional clinical counselor (LPCC), or licensed alcohol and drug counselor (LADC);
- Issuing the LADC license or permit, LPC license, or LPCC license to practice only to qualified individuals;
- Setting the requirements for renewal of a license or permit and administering the renewal process;
- Setting standards of ethical practice;
- Responding to inquiries, complaints and reports regarding applicants and licensees;
- Investigating complaints of alleged violations of statutes and rules, holding educational and disciplinary conferences with licensees and applicants, taking disciplinary or corrective action when appropriate against practitioners who fail to meet minimum standards of practice, and reporting public actions to national databanks;
- Maintaining a website that provides information to the public about complaints and discipline, including a list of disciplinary and corrective actions taken by the Board;
- Offering online services from the Board's website, including license verification and links to the full text of public disciplinary orders the Board has adopted against licensed professionals;
- Approving continuing education activities; and
- Providing information about licensure requirements and standards of practice to students, applicants, licensees, and other interested parties.

RESULTS

The information included below was generated using the Board's licensure and regulatory database. The information demonstrates a stable trend in the Board's activities and an increase in efficiency in processing license renewals through online services. The total number of licensees continues to rise. The number of disciplinary actions taken depends on complaints the Board receives and the level of severity of misconduct that is substantiated. The Board took a total of 36 disciplinary actions in FY 2014 and FY 2015. The Board took a total of 21 disciplinary actions in FY 2016 and FY 2017. The Board's public outreach efforts to students and other stakeholders may have impacted the trend in fewer disciplinary actions.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>

Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	281	202	177	177
FTEs	1	1	1	1

Recommendation:

The Governor recommends additional funding of \$483,000 in the FY 2020-2021 biennium to maintain the current level of service delivery at the Board of Behavioral Health and Therapy.

The proposal also funds the addition of one new senior investigator.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

The Board issues licenses to Licensed Alcohol and Drug Counselors (LADCs), Licensed Professional Counselors (LPCs), and Licensed Professional Clinical Counselors (LPCCs). The Board collects fees to be deposited in the State Government Special Revenue Fund. The Board receives no General Fund dollars. Current staffing levels are 6 FTEs: Executive Director, Office Manager, 2 licensing administrators, and 2 office and administrative specialists who provide clerical support.

Proposal:

The Governor recommends increasing the Board's operating budget to maintain the delivery of current services. For the Board of Behavioral Health and Therapy, this funding will cover known employee compensation growth, a new senior investigator, office space needs and rent, legal services, employee development opportunities, and IT. IT cost growth drivers may include dedicated MN.IT staff compensation-related increases, increased volume usage of enterprise IT services, increased software licensing costs, and/or application support and maintenance cost increases.

Small Agency Increase:	FY2020	FY2021	FY2022	FY2023
Salary Adjustments and Salary Reallocations (current staff increases)	\$36,000	\$44,000	\$44,000	\$44,000
Salary – New Position – Investigator Senior	\$104,000	\$106,000	\$106,000	\$106,000
Storage Space	\$3,000	\$3,000	\$3,000	\$3,000
Out of State Travel	\$2,000	\$4,000	\$4,000	\$4,000
Conference / Membership Fees	\$1,000	\$3,000	\$3,000	\$3,000

Professional / Technical Contracts – Expert Witness	\$5,000	\$5,000	\$5,000	\$5,000

Small Agency Increase:	FY2020	FY2021	FY2022	FY2023
Office of Administrative Hearings (Contested Cases)	\$5,000	\$5,000	\$5,000	\$5,000
Database Maintenance	\$5,000	\$5,000	\$5,000	\$5,000
Build out / remodel (1284 to 2100 sq. feet)	\$70,000			
Furniture	\$30,000			
Total	\$281,000	\$202,000	\$177,000	\$177,000

Equity and Inclusion:

The Board does not discriminate on the basis of race, ethnicity, gender, sexual orientation, or disability. The positive impact of this change will be to continue to provide services for all people of the State of Minnesota without discrimination.

IT Related Proposals:

A portion of this request includes an increase for database maintenance.

<i>Category</i>	<i>FY 2020</i>	<i>FY 2021</i>	<i>FY 2022</i>	<i>FY 2023</i>	<i>FY 2024</i>	<i>FY 2025</i>

AT A GLANCE

Campaign Finance Regulation and Disclosure

- Administers registration and reporting for about 700 candidates, 320 political party units, and 345 political committees and funds, and 60 independent expenditure committees and funds.
- Approximately 4,800 campaign financial reports will be filed with the Board in 2018.
- Between 2000 and 2016, independent expenditures reported to and regulated by the Board increased from \$3.7 million to \$21.3 million.
- Will distribute approximately \$2.2 million in public subsidy money to constitutional and house candidates in 2018.

Lobbyist Registration and Disclosure

- Administers registration and reporting for about 1,450 lobbyists.
- Approximately 4,500 lobbyist reports filed each year.
- In 2017, the 1,427 principals represented by lobbyists reported \$75.7 million in expenditures to influence the official actions of public officials. This is the highest amount ever reported to the Board.

Public Officials Financial Disclosure

- Currently maintain disclosure for 3,100 public official positions. Disclosure reported to the Board now includes county commissioners and judges.

PURPOSE

The Board's mission is to promote public confidence in state government decision-making through development, administration, and enforcement of disclosure and public financing programs that will ensure public access to, and understanding of, information filed with the Board. The Board contributes to the statewide goal of **providing efficient and accountable government services**:

- The Board uses technology to gather and publish data, and to facilitate candidates, lobbyists, and officials in providing financial information to citizens and complying with legal requirements.
- Through the Board's financial disclosure and public official integrity programs, citizen confidence in state government is maintained.
- The Board administers a public subsidy program that provides partial funding to candidates who agree to limit their campaign spending; this helps challengers compete with incumbents, and reduces the fundraising demands placed on candidates compared to elections in similar states.
- The Board provides support to candidates so that they can comply with Minnesota's various laws related to campaign finance, which makes running for office easier for ordinary citizens.

BUDGET

**Spending by Category
FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Other Funds represents public subsidy payments. Public subsidy funds are derived from a \$1,020,000 biennial general fund appropriation and transfers to the special revenue fund based on political party check-off by individuals on state income and property tax forms.

STRATEGIES

The Campaign Finance and Public Disclosure Board achieves its mission using these strategies:

- Facilitate easier and more universal compliance with Chapter 10A (Minnesota's campaign finance and public disclosure statutes) by providing strong support for treasurers, most of whom are volunteers, and for other filers so that they can understand and meet the obligations of their positions.
- Cultivate an environment of voluntary compliance by providing educational programs, publications, training, consultation, software, internet applications, and other aids to enable those governed by Chapter 10A to understand and comply with their statutory obligations.
- Provide consistent, non-partisan administration of the compliance and disclosure statutes so that regulated entities understand that when compliance is not voluntary, it will be required through agency action and to ensure that subjects of compliance procedures are treated fairly and impartially.
- Help citizens become better informed about public and private financing of election campaigns and about lobbying. With access to campaign finance and lobbying data, citizens will have a higher level of confidence that elected officials' decision-making is not unduly influenced by outside interests.
- Provide transparency concerning money in Minnesota politics by publishing campaign finance and other data filed with the Board in easily accessible and meaningful formats for citizen use through its worldwide website, printed materials, and electronic communications.
- Ensure the integrity of the state's program of partial public financing of political campaigns by determining eligibility, calculating amounts, and distributing public subsidy funding to qualified candidates and parties.

RESULTS

Measure: Quantity – Percentage of campaign finance filers reporting electronically

Outcome:

- Electronically filed reports are available for public inspection sooner than paper reports.
- The software used to generate electronic reports also performs a compliance check on data entry, helping treasurers identify contributions that should not be accepted, and expenditures that are prohibited.

Measure: Quantity – Percent of transactions where donor and recipient reports of contributions reconcile

Outcome:

- Accurate campaign finance data is published so that citizens are better informed about money used to influence elections.
- Increased compliance with campaign finance disclosure laws.

Note: Differences of \$100 or less excluded from this analysis.

Minnesota Statutes Chapter 10A provides the legal authority for the Campaign Finance and Public Disclosure Board. (revisor.mn.gov/statutes/?id=10A)

Campaign Finance and Public Disclosure Board

FY 2020-21 Biennial Budget Change Item

Change Item Title: Operating Adjustment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	75	75	75	75
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	75	75	75	75
FTEs	1	1	1	1

Recommendation:

The Governor recommends additional funding of \$150 thousand in the FY 2020-2021 biennium to maintain the current level of service delivery at the Campaign Finance Board.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related cost increases. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

The Board last asked for, and received, a change to its base budget for the fiscal year 2014 – 2015 biennium. At that time, the base budget was increased to \$1,000,000 to allow for a staff of nine and for IT related projects.

During the six budget years from 2014 to 2019, the percentage of the Board’s budget that is tied to salary and benefits has increased significantly, as shown in the chart below. The projected salary and benefits for fiscal years 2020 and 2021, shown in bold, increases the percentage to 89% and 91% respectively.

	Base Budget	Salary and Benefits	% of Budget*
FY 2014	\$ 1,000,000	\$ 635,000	64%
FY 2015	\$ 1,000,000	\$ 778,000	78%
FY 2016	\$ 1,014,000	\$ 771,000	76%
FY 2017	\$ 1,028,000	\$ 834,000	81%
FY 2018	\$ 1,036,000	\$ 846,000	82%
FY 2019	\$ 1,048,000	\$ 888,000	85%
FY 2020	\$ 1,048,000	\$ 930,000	89%
FY 2021	\$ 1,048,000	\$ 949,000	91%

**Note: the salary and benefits listed in the table is the budgeted amount for that fiscal year. Actual expenditures were lower than the budgeted amount in some years due to vacancies.*

The Board considered reducing other operating expenses as an alternative to requesting an increase to the operating base. However, other fixed operating expenses make that alternative impractical. At the July 2018,

monthly meeting the Board authorized the Executive Director to request an increase to the operating budget sufficient to maintain the agency's current operations and staffing level.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the Board, this funding will cover known employee compensation growth. The additional funding is not for a new initiative and does not represent a significant change to an existing program. The funding is necessary to: 1) offset increases in staff salary and benefit costs that have occurred in the past six years since the last increase to the Board's operating budget; and 2) offset projected increases in staff salary and benefits in the next four years.

Equity and Inclusion:

N/A

IT Related Proposals:

N/A

Results:

The Board's programs typically are not subject to simple performance measures. However, by all measures, the time it takes the Board to complete its work is directly related to the staff available to complete the work. As recently as FY 2012, the Board operated with only seven staff. A staff of seven resulted in the Board taking months to issue advisory opinions and complete even simple investigations. Additionally, the lack of staff resulted in the end of client training sessions in greater Minnesota, and a lack of progress in critical web-based public disclosure and reporting applications. Restoring staff levels to nine FTEs allowed the Board to restart training in greater Minnesota, develop online reporting for the lobbyist and economic interest programs, upgrade the disclosure provided on the Board's website, and resolve most citizen-initiated Board actions in less time.

The Board's mission is to foster citizen confidence in government by providing and administering programs of regulation and disclosure. This mission requires staff that is experienced in program administration, the conduct of investigations, client training, and producing meaningful data in a context relevant to citizens. This proposal will allow the Board to maintain the staff needed to complete this mission.

Campaign Finance and Public Disclosure Board

FY 2020-21 Biennial Budget Change Item

Change Item Title: Web-based Campaign Finance Reporter Application

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	50	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	50	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends additional, one-time funding of \$50 thousand in FY 2020 to update the Campaign Finance Board's Campaign Finance Reporter application.

Rationale/Background:

In 2011, the legislature enacted the Board's recommendation that campaign finance reports of receipts and expenditures must be filed electronically (MS 10A.20, subd 1(c)). The electronic filing may be completed by using the free Campaign Finance Reporter software provided by the Board, or by using third-party vendor software that complies with standards developed by the Board. Electronic filing eliminates the need for manual data entry of reports by Board staff, and makes the data in the Board's systems available to the public more quickly.

The Board currently provides, at no charge, the Campaign Finance Reporter software for use in filing required periodic reports of receipts and expenditures by candidate committees, political party units, political committees, and political funds. The current version of the software is PC based, and was first released in 1998. Board staff is in the process of developing a web-based reporting application that will replace Campaign Finance Reporter.

The Board does waive the requirement to file electronically for good cause. The Board considers good cause to include the use of a computer that is not compatible with Campaign Finance Reporter. Without a Windows emulation program, Campaign Finance Reporter will not work on an Apple computer, and to the Board's knowledge it is not possible to use the software on a Chrome computer. This limitation has forced a number of political committees to file by paper when they would prefer to file electronically.

Additionally, Campaign Finance Reporter provides a number of compliance checks on receipts, contributions, spending limits, and other reporting requirements. Each time there is a statutory change to the compliance requirements of Chapter 10A the code for Campaign Finance Reporter must be modified, and then the upgrade must be provided to each treasurer who uses the software. Although the software alerts users when an upgrade is available, the experience of the Board is that many treasurers ignore this message and continue using a version of Campaign Finance Reporter that is out of date. This problem would be resolved by moving to a web-based reporting system. If the web-based reporting application were modified to reflect a statutory change each treasurer would automatically have the most up-to-date reporting application when they next signed on to work on a report.

Proposal:

The Governor recommends a one-time increase of \$50 thousand for professional/technical services for the Board to complete the Campaign Finance Reporter application. This funding will ensure that the web-based application is completed during a non-election year, and available for use during the next election.

The Board is using existing IT staff who currently support Campaign Finance Reporter to develop the on-line reporting application. However, the web-based reporting application must be ready for initial release during calendar year 2019, which is a non-election year for state-level candidates. During a non-election year there is only one report due from registered committees for the year. Releasing the application during a state election year would be too risky because there are multiple reports due during the course of that year.

To insure that the application is ready for release during the non-election year the Board will contract for programming and other professional services related to the web-based reporting application that will supplement the work of staff. In effect, the contracted services will spread out the workload and buy time for staff to complete the project in time for release in 2019.

The Board also intends to use salary savings available in fiscal year 2019 to purchase professional/technical services through June of 2019. The requested funds will provide resources for the project in the second half of calendar year 2019.

Equity and Inclusion:

N/A

IT Related Proposals:

The Board is not a part of MN.IT consolidation. No additional agency staff will be required.

Results:

The Board has tracked the number of political committees that file electronically. The percentage of all campaign finance reports filed electronically has been in decline over the last two years. This trend is alarming because committees that file by paper are more likely to have compliance errors that would have been identified if the transactions had been entered into Campaign Finance Reporter. Further, reports filed on paper require staff data entry and therefore are not available for public disclosure as readily as electronic reports.

Percentage of campaign finance filers reporting electronically

The Board will consider the move to a web-based reporting application successful if the percentage of reports filed electronically increases during calendar year 2020.

Table of Contents
Capitol Area Architectural and Planning Board

<i>Agency Profile</i>	1
Agency Expenditure Overview	3
Agency Financing by Fund	4
Agency Change Summary	5

AT A GLANCE

- Zoning jurisdiction, design review, and planning authority in a 60-block area around the Capitol Building.
- Two full-time, two part-time staff, and three professional advisors serve the Board, which meets six times per year.
- The non-partisan Board consists of twelve members appointed by the Governor, Mayor of Saint Paul, and Legislature, and is chaired by the Lieutenant Governor.

PURPOSE

The Capitol Area Architectural and Planning Board (CAAPB) is a small state agency with responsibilities unique to the state. Our mission is:

- To preserve and enhance the architectural integrity of the Capitol Building and area.
- To improve and protect open areas for public enjoyment.
- To develop accessible approaches to the Capitol Area for pedestrians, roadways, and mass transit systems.
- To establish a framework for growth in keeping with the original Cass Gilbert design.

Our framework of operations is a comprehensive plan and codified zoning and design rules, developed with input from stakeholders and maintained by staff. We coordinate our responsibilities with other state agencies, the City of Saint Paul, neighborhood planning bodies, and private sector professionals. We contribute to the statewide outcome of: **Efficient and accountable government services.**

BUDGET

**Spending by Category
FY 17 Actual**

The CAAPB's operations are funded through a general fund appropriation.

Source: Budget Planning & Analysis system (BPAS)

Historical Spending

The FY08-09 appropriation was increased to fund the required 10-year updating of our comprehensive plan and re-write of our zoning and design guidelines. Budgets between FY10-11 and FY12-13 reflect one FTE retiring.

Source: Consolidated Fund Statement

STRATEGIES

Regulation:

- The CAAPB acts on requests for zoning permits or design review approvals for projects within the Capitol Area, acting on zoning requests within 60 days of filing being deemed complete.
- A Saint Paul building permit for projects in the Capitol Area is issued only after the CAAPB has approved a zoning permit. A Certificate of Design Compliance may be required, if changes occur during City review.

Development and Planning:

- Provide project-specific guidelines for Capitol Area work and encourage post construction analysis.
- We have a development framework and maintenance standards for the Capitol mall and its memorials.
- Conduct open, fair, and timely competitions for state buildings and memorials in the Capitol Area.
- Provide open consultation with other state agencies and the City of Saint Paul.
- Initiate funding requests and promote design integrity and restoration, of the Capitol Building and other State buildings in the Capitol Area, in cooperation with the Department of Administration and the Minnesota Historical Society.

Policy – the CAAPB’s work is guided by the following:

- The 1998 Comprehensive Plan for the MN State Capitol Area, amended in 2009. A more thorough rewrite than originally envisioned will be completed by early 2020 using in-house staff.
- The 2009 Rules Governing Zoning and Design for the MN State Capitol Area, scheduled for revision in 2020.
- The 1998 Policy for Works of Art in the MN State Capitol, revised in 2015.
- The Policy for Commemorative Works in the MN State Capitol Area, 2012.

RESULTS

We are proud of our performance of the following measurable outcomes and successes over the past two years:

- Helped secure legislative funding of comprehensive restoration for memorials on the Capitol Mall.
- Upgraded the CAAPB website in an effort to serve the public more efficiently.
- Revised zoning permit applications and posted them online to maximize accessibility.
- Coordinated, with the City of Saint Paul, a visioning for the Rice Street commercial district in support of 2040 Comprehensive Plan and to spur City investment of \$300,000 in improvements to properties.
- Initiated several measures toward Travel Demand Management to improve sustainability.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quality	Enforcing zoning regulations: Action within 60 days.	100% achieved.	100% achieved.	July, 2017-July, 2019

Chiropractic Examiners, Board of

Agency Profile 1

Agency Expenditure Overview 3

Agency Financing by Fund 4

Agency Change Summary 5

Change Item(s) 6

Operating Adjustment 6

AT A GLANCE

- The Minnesota Board of Chiropractic Examiners (MBCE) licenses and regulates over 3,000 active and 150 inactive Doctors of Chiropractic (DC)
- In addition to the DC license, the MBCE issues sub-registrations in Acupuncture, Animal Chiropractic, independent examination, professional firms, and a graduate preceptorship program
- The board is composed of 5 professional members (licensees of the board) and 2 public members
- Employs five full time staff

PURPOSE

The mission of the Minnesota Board of Chiropractic Examiners (MBCE) is to protect the public through effective licensure and enforcement of the statutes and rules governing the practice of chiropractic to ensure a standard of competent and ethical practice in the profession.

The Board of Chiropractic Examiners contributes to the following statewide outcomes:

- **People in Minnesota are safe**

BUDGET

**Spending by Category
FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

The Board is funded by licensure fees and receives no general fund dollars. Minnesota Statutes section 214.06, subdivision 1(a) compels the Board to collect fees in the amount sufficient to cover direct and indirect expenditures. Funds are deposited as non-dedicated revenue into the state government special revenue fund. From this fund, the Board receives a direct appropriation to pay for agency expenses such as salaries, rent, costs associated with disciplinary/contested cases, and operating expenditures. It also pays statewide indirect costs through an open appropriation.

In addition to Board operations, licensure fees fund activities that support multiple boards and/or other agencies. Some of these are: the Administrative Services Unit (interboard), Health Professionals Services Program

(interboard), Office of the Attorney General for legal services, and the Criminal Background Check Program (interboard).

STRATEGIES

The Board protects the public and ensures the competency of doctors of chiropractic by:

- Reviewing the education and credentials of applicants for licensure
- Allowing externships under a licensed doctor of chiropractic for recent graduates
- Collaborating with other states to assess legal, educational and professional trends
- Approving continuing education programs and auditing licensees for these requirements
- Receiving, reviewing and if necessary investigating complaints from the public
- Initiating educational meetings or disciplinary action with licensees where necessary
- Maintaining a website with relevant information for licensees and members of the public
- Promulgating rules where additional direction may be required
- Monitoring budget data to ensure efficient utilization of fiscal resources

The Board partners with the 1) National Board of Chiropractic Examiners, which provides the necessary professional testing for licensure in Minnesota; 2) the Minnesota Attorney General's office as the attorney for the Board; and 3) The Federation of Chiropractic Licensing Boards, an information repository for chiropractic regulation across the United States, as well as internationally. This organization also provides a national database of disciplinary actions, assisting the Board in licensing / regulatory decisions.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quality / Quantity	Number of complaints against new licensees within the first 65 months of practice	145 complaints	66 complaints	FY2006-FY2011 & FY2012-FY2016
Quality / Quantity	Number of violations by new licensees within the first 65 months of practice	55 violations	12 Violations	FY2006-2011 & FY2012-FY2016
Results	Continuing Education (CE) Audits Deficiencies / Failures*** License Terminations	(4 years)** 179 9	(2 years) 108 9	FY2007-2010 & FY2011-FY2012

Notes:

**The 2007-2010 CE audits did 4 years at once, where the 2011-2012 audit was only 2; therefore the numbers in the previous and current columns may be divided according to how many years were audited.

***Audit "failures" means a licensee had a CE deficiency that was not rectified and their license was terminated.

Recommendation:

The Governor recommends additional funding of \$98,000 in the FY 2020-2021 biennium to maintain the current level of service delivery at the Minnesota Board of Chiropractic Examiners.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

Legal Costs: Each year, costs for the Attorney General and Administrative Hearings rise. This increase will ensure the Board can meet these costs.

Salaries: Each year, the Board hires a temporary .25 employee to assist with the increased volume of work during the renewal season. In addition, the Board is moving from biannual to annual continuing education audits which also requires the above additional .25 temporary staff to assist in bringing all audits current in preparation for the change. Currently the Board has 4.88 FTE staff, this change would equal 5.25 FTE staff time.

IT: The costs of regular services from MN.IT has risen for the past two years. Also, the Board continues to develop the Automated Licensure Information Management System (ALIMS) database for licensing, complaint processing, and renewals. This database is capable of many online services to the public and licensees, as well as enabling the Board to continue to move toward paperless files. This increased spending authority will enable the Board to continue to maintain and improve the database and meet the rising costs of MN.IT.

Rent: The Board anticipates an increase of annual rental lease rates for the current commercial lease. The Board's current lease ends in FY 2021.

The Board is solely fee supported and will collect sufficient revenue to meet projected operational cost increases.

Proposal:

The Governor recommends increasing the Board's operating budgets to maintain the delivery of current services. For the Board of Chiropractic Examiners, this funding will cover known employee compensation growth, legal costs, IT Enterprise services, and rent rate increases. IT cost growth drivers may include dedicated MN.IT staff compensation-related increases, increased volume usage of enterprise IT services, increased software licensing costs, and/or application support and maintenance cost increases. Implementation will begin as soon as increased spending authority is granted.

Small Agency Increase:	FY2020	FY2021	FY2022	FY2023
Salary Increases (current staff increases)	\$22,000	\$33,000	\$33,000	\$33,000
Rent Increase	\$1,000	\$2,000	\$2,000	\$2,000
Centralized MN.IT costs for database maintenance	\$10,000	\$10,000	\$10,000	\$10,000
Administrative Hearing Costs	\$10,000	\$10,000	\$10,000	\$10,000
Total	\$43,000	\$55,000	\$55,000	\$55,000

Equity and Inclusion:

Groups impacted by this change item include all citizens of Minnesota who utilize chiropractic services without regard to race, ethnicity, sexual orientation, disability, or any other group identifier. The Board's mission is to ensure competent practitioners of Chiropractic, in order to ensure that all Minnesotans are safe.

IT Related Proposals:

A portion of this request includes an increase for database maintenance and to cover annual MN.IT service rates. This request is included in the proposal section.

AT A GLANCE

- The Commerce Department advocates for the public interest, ensures a competitive and fair marketplace, and serves as a resource for consumers and businesses, in a number of industries.
- **320,000**: Minnesotans served by the Low-Income Home Energy Assistance Program during FFY18.
- **\$57.8 billion**: Bank and credit union assets held by 308 state chartered banks and credit unions regulated by the Department.
- **\$349 billion**: Amount of assets held by 152 Minnesota domestic insurers regulated by the Insurance Division in 2017, an 11% increase from 2015.
- **227,360**: Total active licenses issued by the Commerce Department.
- **\$249.1 million**: Total dollar value of property returned to Minnesotans through the Unclaimed Property program since FY11.
- **14,782**: Consumer inquiries and complaints addressed by the Department in 2017.
- **18,475**: Gas pumps checked for credit card skimmers by the Weights and Measures Division in FY 2018.
- **1.9**: Megawatt-hours (MWh) of electricity saved in 2015 and 2016 – the equivalent 383,641 cars removed from the road for one year – through Conservation Improvement Plans.

PURPOSE

The agency's mission is to protect the public interest; advocate for Minnesota consumers; ensure a strong, competitive and fair marketplace; strengthen the state's economic future; and serve as a trusted public resource for consumers and businesses. Commerce supports a **thriving economy that encourages business growth and employment opportunities; strong and stable families and communities; a clean, healthy environment with sustainable uses of natural resources; and provides efficient and accountable government services.**

The Commerce Department is:

- Minnesota's Insurance Department.
- Minnesota's Financial Institutions Department, overseeing all state-chartered banks and credit unions.
- Minnesota's Energy Department.

The Commerce Department is also the home to the following consumer protection and regulatory programs:

- The Consumer Services Center, where Minnesotans can call for help to understand the products and services regulated by the Department;
- Licensing and Continuing Education;
- The Low Income Heating Assistance and Weatherization Programs;
- The Petrofund, which helps Minnesotans clean up pollution on their property due to leaky underground fuel tanks;
- Enforcement;
- The Commerce Fraud Bureau;
- The State's Securities Regulator overseeing investment advisors and broker-dealers not regulated by the federal government;
- Telecommunications Regulation;
- The State's Unclaimed Property Program; and
- Weights and Measures.

In all, the Department of Commerce regulates 22 industries and licenses approximately 227,000 individuals and entities that do business in Minnesota.

The Commerce Department provides the following statewide services:

- Ensures health, property and casualty, life, long-term care and workers compensation insurance in the state is fair and reasonable;
- Pursues civil and criminal enforcement activities to protect Minnesotans from fraudulent activities and ensure strong and stable families and communities;
- Advocates on behalf of the public interest in energy-related matters to ensure a clean, healthy environment with sustainable uses of natural resources;
- Licenses and regulates individuals and entities to ensure a thriving economy that encourages business growth and employment opportunities; and
- Responds to the needs of consumers, licensees and applicants to ensure delivery of efficient and accountable government services.

BUDGET

**Spending by Program
FY17 Actual**

Source: BPAS

Historical Spending

Source: Consolidated Fund Statement

The Commerce Department's budget is composed of General Fund appropriations, federal funds and Special Revenue funds. The largest component of the Commerce Department's budget is federal funding received as a pass-through for administering the Low-Income Home Energy Assistance and Weatherization Programs. Insurance, Telecommunications and Energy Resources assess and recover costs from regulated entities. Financial Institutions, Petrofund and Weights & Measures are funded exclusively from Special Revenue Funds. General Fund operating appropriations for the Commerce Department have remained relatively consistent over the last decade though the department has received funds for one-time purposes. The agency's FY 10-11 spending level largely reflects the impact of federal stimulus funding that passed through the Commerce Department during the economic downturn.

STRATEGIES

The Commerce Department uses targeted regulatory and consumer protection strategies to maintain a strong and competitive marketplace for Minnesota consumers and businesses. These strategies include:

Energy Resources

- Advocating on behalf of consumers and ratepayers in electric and gas utility rate proceedings.
- Promoting energy-efficient building, conservation, alternative transportation fuels and modern energy technologies.
- Overseeing conservation improvement programs operated by public, municipal and cooperative utilities.
- Administering low-income heating and weatherization assistance programs.

Enforcement

- Enforcing compliance and responsible business conduct across the agency's entire regulatory portfolio.
- Investigating civil and criminal insurance fraud.
- Serving as the agency's primary point of contact for Minnesota consumers.

Financial Institutions

- Licensing, examining and regulating state-chartered banks and credit unions, as well as non-depository institutions, to ensure that they remain safe and financially solvent.
- Registering securities sold in Minnesota as well as individuals and entities who provide investment services to Minnesotans.

Insurance

- Regulating insurance companies operating in Minnesota to ensure they remain safe and financially solvent.
- Reviewing insurance product filings to ensure that insurance products sold to Minnesotans meet state and federal requirements.

Petrofund

- Reimburses petroleum storage tank owners and operators for the cost of investigating and cleaning up petroleum tank releases.
- Contracting to remove abandoned underground petroleum storage tanks across Minnesota.

Regulatory and Administrative Services

- Licensing individuals and entities to do business in Minnesota.
- Providing unclaimed property services to Minnesotans.
- Integrating information management services and technical support for the agency.
- Agency administration including financial services, communications and human resources.

Telecommunications

- Advocating on behalf of consumers and ratepayers in proceedings relating to telecommunications and utilities.
- Promoting competition among telecommunications companies in Minnesota.

Weights & Measures

- Ensuring accuracy in all commercial transactions based on weight or measure and the consistent quality of petroleum products in Minnesota.
- Providing precision mass, temperature, density and volume measurement services to Minnesota businesses.

The primary legal authority for the Commerce Department is located in Minn. Stat. §45; the agency's authority, extends to numerous additional chapters including: 45A, 46, 47, 48, 48A, 49, 50, 51A, 52, 53, 53A, 53B, 53C, 54, 55, 56, 58, 58A, 59A, 59B, 59C, 60A, 60B, 60C, 60D, 60E, 60F, 60G, 60H, 60J, 60K, 60L, 61A, 61B, 62A, 62B, 62C, 62D, 62E, 62F, 62H, 62I, 62J, 62L, 62M, 62Q, 62R, 62S, 62U, 64B, 65A, 65B, 66A, 67A, 69, 70A, 71A, 72A, 72B, 72C, 79, 79A, 80A, 80B, 80C, 81A, 82, 82B, 82C, 83, 115C, 116J, 123B, 169, 174, 176, 214, 216A, 216B, 216C, 216E, 216F, 222, 237, 239, 272, 299F, 301, 318, 325D, 325E, 325F, 325N, 332, 332A, 332B, 334, 345, 359, 386, 462A, 465, 471, 475, 507, 510, 514, 550 and 609B.

Department of Commerce

FY 2020-21 Biennial Budget Change Item

Change Item Title: Litigation Expenses

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	1,485	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,485	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$1,485,000 in FY20 for litigation costs.

Rationale/Background:

In November 2011, the State of North Dakota and several private companies sued the Minnesota Public Utilities Commissioners (PUC) and the Commissioner of Commerce. The suit claimed that Minnesota's Next Generation Energy Act ("NGEA"), which was passed by the Legislature in 2007, unlawfully regulated North Dakota utilities, was preempted by federal law, and was constitutionally invalid. The United States District Court found against Minnesota. The District Court, as affirmed by the 8th Circuit on August 14, 2018, awarded \$1.4 million in attorney's fees and costs.

In August 2018, the PUC and Commerce entered into a payment agreement with North Dakota and the other private companies to pay the attorney's fees and costs judgement. The PUC and Commerce have made an initial payment of \$360,000 toward the judgement obligation. The outstanding balance of the judgement, \$1,050,000 must be paid by July 31, 2019 and is divided evenly between the two agencies.

Additionally, in 2015, SafeLite Group, Inc. sued the Department of Commerce arguing that the Department unconstitutionally executed a voluntary consent order with an independent insurance company in which it was agreed that the insurance company would no longer use SafeLite for its claims handling. The District Court's ruling found in favor of both Commerce and SafeLite, but ordered Commerce to pay a reduced amount of attorney's fees and costs. In January 2019, the Court of Appeals affirmed the District Court's decision awarding the Plaintiffs the reduced amount of attorney's fees plus interest, totaling \$960,000, which must be paid by July 1, 2019.

Proposal:

This proposal recommends \$1,485,000 in total to satisfy the remaining legal obligations of the State of Minnesota in these cases. The appropriation of these funds will be directly paid pursuant to the payment agreements.

Statutory Change(s):

This proposal does not require a statutory change.

Department of Commerce

FY 2020-21 Biennial Budget Change Item

Change Item Title: Agency Operating Budget Adjustment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	1,332	1,604	1,604	1,604
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,332	1,604	1,604	1,604
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$1,332,000 in FY2020 and \$1,604,000 in ongoing funding to support the core functions of the Department of Commerce. The funds will be used to address the increasing costs of doing business including increases in compensation and rent costs.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, pension contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent also grow. The Commerce Department did not receive an operating adjustment for the 2018-19 biennium. Because of this, essential functions of the Department have been severely impacted over the last several years due to budgetary constraints. This has required the Department to implement salary-savings strategies, including holding open unfilled, critical positions in order to fund immediate needs. Additional funding will offset increasing agency cost drivers and address salary deficiencies.

This request will help the Department fund agency central services including human resources, accounting services, and internal controls. Due to the budget pressures facing the agency, programs that directly serve Minnesotans have been prioritized, which has reduced funding for the agency's central service infrastructure. These core functions are critical and without ongoing stable funding, will further impact the agency and its mission.

Proposal:

An increase of \$1,332,000 in FY2020 and \$1,604,000 in ongoing funding will maintain the delivery of current services. For the Department of Commerce, this funding will cover employee compensation growth, including anticipated compensation increases and employer-paid pension costs and in turn will help stabilize the basic infrastructure of the Department allowing the agency to continue to serve Minnesotans to the fullest extent.

Estimated costs include:

- Rent increases of \$448,000 in FY20 and \$471,000 in FY21.
- Salary pressures of \$884,000 in FY20 and \$1,133,000 in FY21.

This change item is effective July 1, 2019.

Equity and Inclusion:

Stabilizing the operating budget will allow the Department to maintain the delivery of current services and address critical risk management concerns. This will ensure the Department will not have to divert resources away from protecting Minnesota consumers and ensures the agency can continue its work in maintaining a fair and equitable marketplace.

Statutory Change(s):

This proposal does not require a statutory change.

Department of Commerce

FY 2020-21 Biennial Budget Change Item

Change Item Title: IT System Modernization

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	416	416	416	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	416	416	416	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$416,000 in FY20, FY21, and FY22 to support the Commerce IT System Modernization project. The funds will be used to continue work on the priorities listed in the system modernization plan and roadmap created in 2015. The work is focused on data security, transparency and creating sustainable IT platforms

Rationale/Background:

Commerce has over 40 specialized IT applications used on a regular basis to carry out its mission to protect the public interest, advocate for Minnesota consumers, ensure a strong, competitive and fair marketplace, strengthen the state's economic future and serve as a trusted public resource for consumers and businesses. Many of these applications are in legacy languages, on obsolete hardware, do not meet current security requirements and are on unsupported operating systems/platforms.

The Commerce IT System Modernization project started in 2015 to modernize IT systems to:

- Meet business needs;
- Update systems to align with enterprise standards;
- Improve efficiencies, data quality, security and accessibility;
- Align with Commerce strategic goals.

Initial funding through an Odyssey Fund request in 2015 was used to assess Commerce's IT systems, create a modernization plan and begin work on six of the IT recommendations.

Proposal:

The Department of Commerce requests \$416,000 per year through FY22 for two contracted Java developers. Developers will begin to replace the following systems:

- Access 1997 and 2003 Databases used daily by the Insurance and Enforcement Divisions that support the public facing IT applications. Access 1997 and 2003 Databases are no longer supported putting business needs, functionality and service at risk.
- eDockets: Application used to review the official record of utility regulation.
 - 390,695 documents available in FY2018.
 - 12.5 million public views since January 1, 2018.

- eFiling: Application allows users to upload documents as a part of regulatory proceedings.
 - There are 3,711 active users.
 - 17,109 documents efiled in FY2018.
- eAssessment: Updated system will allow utilities to pay the Department assessments online instead of mailing a check.

With these updates, Commerce can better safeguard private and non-public data and serve the public in a timely and cost-effective manner.

This proposal will improve data quality and decrease time spent on manual processes or duplicative data entry. For example, periodically the eFiling system does not retain documents even though the user gets confirmation that all documents were uploaded. In addition, some documents are sent to our service lists manually via paper mailing because there is no method to import the lists and the discovery is managed outside of the current IT system.

This proposal is effective July 1, 2019.

Equity and Inclusion:

Many of Commerce's existing systems do not meet accessibility standards. A key component of the Commerce IT System Modernization is to update IT systems to meet accessibility standards and serve all Minnesotans. Many of these applications provide online no-cost public access to utility and stakeholder filings that increase consumer transparency.

Department of Commerce

FY 2020-21 Biennial Budget Change Item

Change Item Title: Unclaimed Property Operating System Modernization & Cybersecurity Upgrade

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	475	350	350	350
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	475	350	350	350
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$475,000 in FY 2020 and \$350,000 per year in ongoing funding to modernize the state's unclaimed property operating system, putting the Unclaimed Property Program on a sustainable path to serve Minnesota consumers and businesses with unclaimed property. This recommendation is to obtain, deploy and staff a new unclaimed property operating system in order to increase the number of claims processed and ability for Minnesotans to make online claims

Rationale/Background:

Minnesota's Unclaimed Property Program serves as a lost and found for financial assets belonging to current and former residents of Minnesota. In this capacity, the program safeguards, maintains and seeks to return to owners, millions of dollars in abandoned property held by the State.

The State's existing unclaimed property system used by the Commerce Department is antiquated. Designed in 2000, this 18-year-old system limits the agency's ability to serve the public and is vulnerable to cybersecurity threats. The system houses private data on more than five million properties and nonpublic data turned over to the State by companies related to the owners of those properties.

The program continues to grow in size and complexity. An aging program operating system, and the lack of dedicated claims processing staff, are impeding the Commerce Department's ability to sustain the program's successes over the long term and poses growing risk to the State.

In addition to IT-related security and operations concerns, this aging electronic system contributes to claims processing delays for consumers who make claims. Deploying a new system will increase the number of claims the agency can process resulting in the need for additional claims processing staff.

Proposal:

This change item will:

- **Increase** the amount of abandoned property returned to Minnesotans
- **Improve** the customer service experience and process for Minnesotans
- **Mitigate** cybersecurity and legal risks to the State resulting from Minnesota's out-of-date operating system

This recommendation will fund:

- \$125,000 in one-time costs in FY20 to install, configure and integrate a new unclaimed property operating system with the Commerce Department and MN.IT's existing operations and cybersecurity requirements. System integration includes costs related to training Commerce staff on the new operating system.
- \$35,000 per year for hosted document management, and \$15,000 annually for conversion of existing electronic documents onto the new platform. This will allow Commerce to migrate document storage and ultimately eliminate an existing legacy program, which the agency has maintained because the current unclaimed property operating system does not support this function.
- \$125,000 annually for identification and authentication services to efficiently verify the identity of individuals seeking to claim property.
- \$175,000 per year for annual maintenance fees, software upgrades and support.

Modernizing Commerce's Unclaimed Property Operating System will:

- Account for modern and specialized financial products that are increasingly turned over to the State and require advanced tracking and bookkeeping;
- Partner with businesses in order to improve the process for turning abandoned property over to the State.

Increasing the amount of property returned to consumers will result in a positive impact for the state by returning millions of dollars to Minnesotans while improving customer service. Failure to modernize the program's operating system, however, will inhibit Commerce's ability to maintain current performance levels.

Equity and Inclusion:

This recommendation will improve Commerce's ability to return property to its rightful owners wherever they live or work. Commerce will be able to better identify the geographic disbursement of property throughout the state, creating opportunities for strategic advertising and outreach to traditionally underserved communities.

For example, in FY17, Commerce made a modest investment in newspaper advertisements in diverse press outlets in Minnesota. While this advertising helped the State return property to consumers, and establish service connections with communities the agency had previously underserved, the current unclaimed property operating system did not allow agency staff to track data on whether claimants heard about the program via the advertising campaign.

A modern operating system would provide mapping and reporting data to facilitate targeted outreach to specific communities in the state. A modern operating system would also give Commerce the ability to track and utilize that data to improve future outreach campaigns using traditional and social media. Coupled with dedicated claims processing staff, Commerce can conduct proactive outreach to Minnesotans to return property rather than waiting for consumers to come forward with their claims.

IT Related Proposals:

This recommendation would allow Commerce to contract with a vendor to obtain, deploy and maintain a new unclaimed property operating system. Costs are included for professional/technical contracts. Commerce and MN.IT do not assume MN.IT would incur additional staff or agency costs.

Department of Commerce

FY 2020-21 Biennial Budget Change Item

Change Item Title: Unclaimed Property Policy Modernization and Operations

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	368	702	702	702
Revenues	0	13,780	13,780	13,780
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	368	(13,078)	(13,078)	(13,078)
FTEs	4	7	7	7

Recommendation:

The Governor recommends \$368,000 in FY20 and \$702,000 in FY 21, FY22, and FY23 to modernize the state's unclaimed property program and statutes to better serve Minnesota consumers and businesses. These statutory updates will increase both the amount of property turned over to the state in compliance with state law and the amount of property returned to Minnesotans.

Beginning in FY21, this proposal is expected to facilitate approximately \$30.2 million in property transferred to the state and \$16.5 million returned to Minnesotans annually. This will result in approximately \$13.8 million in state revenue.

Rationale/Background:

Minnesota's Unclaimed Property Program serves as a lost and found for financial assets belonging to current and former residents of Minnesota. In this capacity, the program safeguards, maintains, and seeks to return to owners, the millions in abandoned property held by the State.

The Unclaimed Property Program returns approximately \$33 million to Minnesotans each fiscal year. The program also receives an average of approximately \$70 million per fiscal year in property.

Minnesota's current unclaimed property law was first enacted in 1969 and has seen only modest revisions since - the last time it was modified was in 1989. Consequently, state law is out-of-date, does not reflect 21st Century business practices or financial instruments, and makes it harder for Minnesotans to claim their property and Minnesota businesses to comply with the law. This ambiguity makes it difficult for companies to prevent property abandonment in the first place, turn property over to the State, and for the State to effectively return property to consumers.

Updating Minnesota's unclaimed property law will require changes to how the Commerce Department administers the unclaimed property program. Additional staff will be required to process higher numbers of claims, account for modern and specialized financial products, and partner with businesses in fulfilling compliance and reporting requirements. This update will increase the number of properties returned to consumers and the amount of property turned over to the state so it can be returned to consumers.

Proposal:

This change item will:

- **Increase** the amount of abandoned property returned to Minnesotans

- **Improve** the customer service experience and process for Minnesotans
- **Mitigate** cybersecurity and legal risks to the State resulting from Minnesota's out-of-date operating system and unclaimed property law

This change item requests funds for:

- Administration of the unclaimed property program.
- Four FTEs, at an estimated \$368,000, dedicated to claims processing in order to initially reduce existing claims processing times by half and, in the long-term, increase the total number of claims the state returns to rightful owners.
- One FTE beginning in FY21, at an estimated \$123,000, dedicated to accounting for, and returning to claimants, securities-related and interest-bearing properties.
- Two FTE beginning in FY21, at an estimated \$211,000, dedicated to supporting Minnesota businesses on compliance and reporting activities including audit methodologies, property reporting and reconciliation and customer support functions. Based on previous proposals from the Legislature, Commerce estimates that every dollar spent on holder compliance efforts will net five dollars to the state.

Increasing the amount of property returned to consumers benefits Minnesota by returning millions of dollars to the rightful owners. Improving the operating system is also important to this proposal as it serves as the infrastructure of the program and will mitigate potential cybersecurity and legal risks for the state, protecting owners' nonpublic data.

Minnesota's unclaimed property laws are ambiguous, vague and unclear, restricting the ability of consumers to claim property and businesses to turn property over to the state. Over the long term, failure to modernize Minnesota's unclaimed property laws will inhibit Commerce's ability to maintain current performance levels because of these restrictions.

With this recommendation, Commerce expects the program to:

- Increase the amount of property turned over to the state by approximately \$30.2 million annually.
- Increase the number of claims paid to Minnesotans by 40 percent.
- Increase the dollar value of claims paid to Minnesotans by approximately \$16.5 million annually.

The difference will result in approximately \$13.1 million in state revenue factoring in administrative costs.

This recommendation also includes the following statutory changes:

- Update existing, and create new, statutory definitions used in the unclaimed property law to reflect modern financial products in use today;
- Modernize the due diligence relationship between companies and customers to prevent property from inappropriately being labeled as abandoned and sent to the state unnecessarily;
- Improve the process for how companies turn over property to the state when it is in the best interest of consumers and/or truly abandoned to increase the state's ability to successfully return it to rightful owners;
- Address the legal status of how the state handles interest-bearing accounts when claimed; and
- Create a clearly defined fraud restitution mechanism to protect owners from attempted unclaimed property fraud.

Equity and Inclusion:

This change item will improve Commerce's ability to return property to its rightful owners wherever they live or work. It will also improve the equitable treatment of Minnesota businesses by clarifying legal requirements for turning abandoned property over to the state so it can be returned to consumers. Additionally, Commerce will be

able to better identify the geographic disbursement of property throughout the state, creating opportunities for strategic advertising and outreach to traditionally underserved communities.

Results:

This request will increase the performance of the unclaimed property program – to the benefit of Minnesota consumers and businesses.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Claims returned to owners	86,771	130,657	FY03-FY10 and FY11-FY18
Quality	Value of claims returned to owners	\$126,725,949	\$213,190,262	FY05-10 and FY13-18

Statutory Change(s):

The proposal will require a statutory change to Minn. Stat. 345.

Department of Commerce

FY 2020-21 Biennial Budget Change Item

Change Item Title: Utility Grid Reliability Assessment Extension

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	\$0	\$0	\$0	\$0
Revenues	\$0	\$0	\$0	\$0
Special Revenue Fund				
Expenditures	\$500	\$500	\$500	\$500
Revenues	\$500	\$500	\$500	\$500
Net Fiscal Impact = (Expenditures – Revenues)	\$0	\$0	0	0
FTEs	3	3	3	3

Recommendation:

The Governor recommends reinstating the Energy Planning and Systems assessment, which sunset on June 20, 2018. This assessment provided annual funding for 3 FTE to participate in regional and federal electric and natural gas reliability oversight ensuring adequate and secure generation and transmission resources to serve Minnesota homes and businesses.

Rationale/Background:

The proposal is funded by an assessment on the electric utilities for the actual costs of providing regional and national grid reliability. This assessment expired June 30, 2018, however, the work is ongoing in order to maintain reliable energy service for Minnesotans.

Proposal:

Using this assessment authority, this initiative will utilize \$500,000 in annual funding for 3 FTE for ongoing regional and federal work on electricity and natural gas issues with:

- the Midcontinent Independent System Operator (MISO),
- the Midwest Reliability Organization (MRO, a transmission reliability organization),
- Federal Energy Regulatory Commission (FERC),
- the Midwest Renewable Energy Tracking System, and
- other regional and federal agencies.

This work includes:

- advocating on behalf of Minnesota interests (reliability, cost, use of various energy resources) in MISO's stakeholder meetings,
- ensuring adequate generation and other resources to serve Minnesota customers in integrated resource plans,
- using computer modeling for needed analyses in integrated resource plans,
- joining with FERC on MISO petitions, and
- representing Minnesota in ongoing consumer complaints about high rates of return on equity on transmission resources.

Without this assessment the Department has had to divert other agency resources to complete the technical analysis needed to ensure the reliability of the state's electric system.

Equity and Inclusion:

A reliable electric system provides a continuous energy source protecting vulnerable communities including the elderly and sick. This proposal supports the Department's work advocating on behalf of the public interest in energy-related matters to ensure a clean, healthy environment with sustainable uses of natural resources.

IT Related Proposals:

Not applicable

Results:

This proposal will allow the Department to continue to complete necessary technical analyses and advocate on behalf of Minnesotans to ensure a reliable electric system.

Statutory Change(s):

This proposal requires a statutory change to Minn. Stat. 216B.62, subd. 3b.

Department of Commerce

FY 2020-21 Biennial Budget Change Item

Change Item Title: Solar on Schools

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Special Revenue Fund				
Expenditures	10,000	10,000	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	10,000	10,000	0	0
FTEs	2	2	0	0

Recommendation:

The Governor recommends \$20 million from the Renewable Development Account in FY20-21 to fund grants for schools to install solar panels. These funds, would be expended in two ways: through a master lease program or through a purchase power prepay agreement. In each year, \$9.5 million would be available for grants and up to \$500,000 per year would be available for administration of the program, funding 2 FTE.

The FTE and administrative costs are broken down as follows:

- \$240,000 for two FTE to provide program development, fund administration, project assistance and technical assistance to schools and solar developers.
- \$260,000 for costs associated with outreach and promotion, stakeholder engagement and third party assistance for technical aspects of the program that require outside expertise.

Funds under this program will be available through fiscal year 2023.

Rationale/Background:

Nationally, energy costs are K-12 school districts' second highest operating budget expense, after personnel costs. A Solar on Schools program could reduce electric utility bill costs through increased efficiency of operations and access to less costly energy through on-site solar energy production. Further, on-site solar generation could create an educational opportunity for students, enhance the school's long-term resiliency from grid power outages, and enable the school to reallocate utility bill savings to more resources for student advancement.

According to the Minnesota Department of Education, Minnesota is home to 339 school districts with over 2403 schools that serve approximately 850,000 K-12 students and an additional 200,000 early childhood and adult learners.

Proposal:

Commerce recommends options for public-private partnerships be made available to schools using \$20 million in Renewable Development Account (RDA) funds to facilitate the implementation of solar photovoltaics (PV) on schools through rooftop, ground mount or other appropriate applications.

To achieve the goals of this program, there are two pathways available in the development of the public-private partnership: a master lease program and a power-purchase agreement prepay program. The pathways outlined in this Solar on Schools Program could potentially result in installation of 17-26 MW of solar capacity.

PATHWAY 1: SOLAR ON SCHOOLS MASTER LEASE PROGRAM

This pathway would build upon the success of the Energy Improvement Financing Program for Local Government. This pathway would adapt the existing program and add a solar energy implementation component specifically for schools. For this pathway, a combination of private investment and RDA funds could be utilized in the following manner:

\$50M	Private dollars as lease-purchase agreements
\$20M	RDA funds as grants for schools to buy-down project costs

Experience with the existing public-private partnership shows that when efficiency and renewable energy are combined in the project, there is an investor appetite for a 15-year term, whereas a solar-only project is limited to 7 years or less.

In this pathway, the RDA dollars would be used to buy-down the cost of the project. Commerce technical staff would work with schools and developers to ensure cost-effective energy efficiency measures are implemented prior to the solar energy project to ensure public and private funding is maximized.

Without a buy-down, the estimated cost of solar is \$3.50/watt, which results in a 20+ year payback. Utilizing a buy-down to \$2.50/watt, projects could cash flow in under 15 years.

Assumptions (If all funds were expended within Option1):

- 100 KW systems
- 200 systems installed
- 17 MWAC installed solar capacity

\$350,000	Total Cost of System (@ \$3.50/watt)
- <u>\$100,000</u>	System buy down (RDA Funds)
\$250,000	Lease-purchase agreement

PATHWAY 2: SOLAR ON SCHOOLS POWER PURCHASE PRE-PAY PROGRAM (SOSP⁵)

This pathway is a public-private partnership using a third-party ownership model that would use RDA funds to pre-pay a power purchase agreement's buy-out, increasing the financial value of the solar energy system for schools. Enabling language would be needed to establish the Solar on Schools Power Purchase Pre-Pay Program. Commerce would work within the school's existing procurement processes to establish power purchase agreements (PPAs) and would develop standard PPA language that would allow for pre-payment of the system using RDA funds. Commerce would set forth the requirements to access pre-payment funds which would be used to pre-pay the buy-out of the PPA from a third-party that provided the initial investment for installation of the system. This results in a lower PPA price that would increase the annual electric utility bill savings for the school. Commerce would develop standard contract language that would include criteria for the following, but not limited to:

- Terms of the PPA
- Formula for determining future fair market value of the system
- Future value of PPA payments
- Escalator for utility costs

\$107.5M
\$20M

Private funds in a 3rd party ownership model (\$350K x system)
RDA funds as a pre-payment of PPA buy-out

Assumptions: (If all funds were expended within Pathway 2):

- \$.035/kWh savings School utility savings using a Power Purchase Agreements
- 100 kW systems Average system Size
- \$65,000 Average pre-payment
- \$3.50/Watt Average cost/installed watt
- 307 Total number of systems installed
- 26 MW_{AC} Installed solar capacity

Commerce staff would provide technical assistance to develop and execute projects while also ensuring other programs that implement energy efficiency at Minnesota schools are leveraged. This program would have a variety of benefits, including the ability to reduce lifetime building operating costs, provide educational opportunities, and assist with energy related deferred maintenance, and enhance school resiliency. Commerce would also develop a technical advisory committee with the solar industry, investors, and school leadership to develop the program in a cooperative and informed way, ensuring its success.

A program using both pathways should be flexible and appropriately leverage existing programs/incentives, procurement methods/state technical assistance, or public/private funding for project implementation and remaining financing. The duration of this program needs to take into consideration changes with the federal Investment Tax Credit, electricity prices, cost of solar, and other impactful market changes.

It is recommended that Commerce provide program development, fund administration, project assistance and technical assistance to schools and solar developers. Schools need support in: assuring energy efficiency is incorporated to reduce overall solar project costs; conducting financial analysis on options; and developing the project parameters.

Equity and Inclusion:

Commerce staff would develop program and proposal criteria, which would focus on schools that disproportionately serve vulnerable or otherwise disadvantaged populations.

Statutory Change(s):

Minn. Stat. §216C.43

Department of Commerce

FY 2020-21 Biennial Budget Change Item

Change Item Title: Minnesota Premium Security Plan Transfer

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Commerce Department				
Special Revenue Fund				
Transfer Out	0	535,588	0	0
Transfer In	0	0	0	0
MMB Non-Operating				
General Fund				
Transfer Out	0	0	0	0
Transfer In	0	142,000		
Health Care Access Fund				
Transfer Out	0	0	0	0
Transfer In	0	393,588	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends transferring the unspent assets in the Premium Security Account to the Health Care Access Fund and General Fund in FY2021. Approximately \$393.5 million would be transferred to the Health Care Access Fund to support programs to increase access to affordable health insurance coverage and health care services. \$142 million would be transferred to the General Fund.

Rationale/Background:

In 2017, the Minnesota Premium Security Plan (MPSP) was created to provide reinsurance payments to health insurers to help cover the costs of high claims in the state's individual health insurance market.

\$543 million in state resources were appropriated for FY 2018-19 to cover plan years 2018 and 2019. The state resources are from \$142 million in transfers from the General Fund, \$401 million in transfers from the Health Care Access Fund, and \$42 million in remaining operating funds from MCHA. Minnesota received \$130.7 million in federal funds for the program for 2018.

Federal regulators project Minnesota will receive approximately \$84.7 million in federal funds for the program for plan year 2019. The final amount the State will receive will be finalized by April 2019.

Proposal:

This request utilizes assumptions from the February 2019 Forecast regarding total MPSP program size in both 2018 and 2019. This request assumes the MPSP will end after plan year 2019, with final payments to eligible health insurers for plan year 2019 occurring by August, 2020. This request assumes that the two transfers would occur after final payment obligations are fulfilled for the MPSP.

Statutory Change(s):

Transfer language within appropriations article.

Department of Commerce

FY 2020-21 Biennial Budget Change Item

Change Item Title: Net-Zero Energy Community

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	\$0	\$0	\$0	\$0
Revenues	\$0	\$0	\$0	\$0
Special Revenue Fund				
Expenditures	\$22,200	\$12,000	\$12,000	\$0
Revenues	\$0	\$0	\$0	\$0
Net Fiscal Impact = (Expenditures – Revenues)	\$22,200	\$12,000	\$12,000	0
FTEs	0	0	0	0

Request:

The Governor recommends \$46.2 million from the Renewable Development Account for a grant to the Prairie Island Indian Community for a Net-Zero Energy Community.

Rationale/Background:

The Prairie Island Indian Community (PIIC) is the host community to Xcel Energy's Prairie Island Nuclear Generating Plant (PINGP). Both the PINGP and the associated nuclear waste storage site are located immediately adjacent to the community. In 1994, Minnesota enacted legislation to allow Xcel Energy to store spent nuclear waste onsite at Prairie Island until a long-term Federal storage repository opened. Additionally, as a part of the 1994 legislation, the State of Minnesota required Xcel Energy to create the Renewable Development Fund (RDF), subsequently renamed the Renewable Development Account (RDA), to fund deployment, research and development of renewable energy projects and technologies that lessen the need for nuclear power. The RDA is funded through annual payments assessed on each cask of nuclear waste stored at Prairie Island.

Xcel Energy has paid millions of dollars into the RDA and has funded many renewable projects throughout the state. The RDA has also been legislatively directed to; fund a coal power plant in Northern Minnesota; provide resources for communities whose biomass power plants ceased operating; provide a financial incentive for solar panels manufactured in Minnesota; and incentivize small wind and other renewable projects through the Renewable Energy Production Incentive (REPI). Although the Prairie Island Indian Community lives closer to the power plant and nuclear waste storage associated with it than any other community in the state, they have never requested or been granted any money from the RDA or the previously existing Renewable Development Fund.

Proposal:

The Governor recommends a total of \$46.2 million from the Renewable Development Account for the Net-Zero Energy Community at the Prairie Island Indian Community. The funds will be appropriated to the Commerce Department from the RDA, with Commerce administering the grant to the Prairie Island Indian Community.

The Prairie Island Indian Community will be Minnesota's first net-zero community – meaning it will generate as much energy as it consumes -and one of the first Indian Nations in the United States to achieve the net-zero goal.

The proposal has two phases. The first phase will reduce the PIIC energy consumption by more than 1MW through onsite building efficiency upgrades, electrification and energy management projects.

Phase 1-Efficiency and Electrification Projects at Net-Zero Community

Project	Cost	Timeline
ISO-50001	\$75,000	3 months
Energy Audits & Modeling	\$285,000	2 months
Equipment Upgrades	\$4,850,000	6 months – 1 year
EV Vehicles/charging stations	\$3,500,000	7-year replacement plan
Energy Management	\$1,500,000	1 year
Conservation Total	\$10,210,000	

The second phase of the Net-Zero Community project will be to build renewable generation of approximately 6 megawatts of solar and geothermal energy.

Phase 2-Renewable Generation

Project	Cost	Timeline
5 MW Parking Solar Canopy	\$25,000,000	1-3 years
1 MW On-Location Solar Garden <ul style="list-style-type: none"> • Prairie Island • Upper Island • Mount Frontenac • 360/61 development 	\$2,500,000	1-3 years
Microgrid	\$6,000,000	1-3 years
Geothermal	\$2,500,000	1-3 years
Generation Total	\$36,000,000	

Equity and Inclusion:

This proposal benefits the Prairie Island Indian Community.

Department of Commerce

FY 2020-21 Biennial Budget Change Item

Change Item Title: Innovative Renewable and Energy Efficiency Projects Grant

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	\$0	\$0	\$0	\$0
Revenues	\$0	\$0	\$0	\$0
Special Revenue Fund				
Expenditures	\$13,000	\$13,000	\$0	\$0
Revenues	\$0	\$0	\$0	\$0
Net Fiscal Impact = (Expenditures – Revenues)	\$13,000	\$13,000	\$0	\$0
FTEs	2	2	0	0

Recommendation:

The Governor recommends \$13 million per year in FY20 and FY21 from the Renewable Development Account to fund an Innovative Renewable and Energy Efficiency Projects Grant program at the Division of Energy Resources in Department of Commerce.

Rationale/Background:

Minnesota's electric energy system is changing rapidly and there is a need for resources to assist in the funding of innovative renewable and energy efficiency pilot projects. Funding is critical for innovative projects that may have high upfront costs but show long-term promise in decarbonizing the power sector and creating new business models or projects that can be integrated into Minnesota's power sector.

Proposal:

The Governor recommends \$13 million per year in FY20 and FY21 from the Renewable Development Account to fund the Innovative Renewable and Energy Efficiency Projects Grant program. The proposal is intended to fund renewable and energy efficiency pilot projects either through being a model for future development or by the advancement and introduction of new clean energy technologies. Projects that Commerce would seek to select for grants could include net-zero energy urban developments, micro-grids, electric vehicle infrastructure and credits, on-site renewables and other innovative and clean energy optimization technologies.

Equity and Inclusion:

This policy is broadly beneficial to all Minnesotans. The policy will reduce pollution and increase opportunities to create jobs and employment throughout Minnesota.

Program: Financial Institutions Divisionmn.gov/commerce/industries/financial-institutions/**AT A GLANCE**

- The Financial Institutions Division regulates state-chartered banks, state-chartered credit unions, non-depository institutions and Minnesota registered securities professionals.
- **236:** State-chartered banks in Minnesota.
- **165:** Number of Minnesota's state-chartered banks located in Greater Minnesota.
- **72:** State-chartered credit unions in Minnesota.
- **6,154:** Licensed non-depository entities and individuals in Minnesota.

PURPOSE

The Commerce Department's Financial Institutions Division is responsible for licensing and regulating businesses that provide financial products and services to Minnesotans. These include banks, trust companies, credit unions, certificate investment companies, thrift companies, consumer credit companies, debt management companies, debt settlement companies, mortgage companies, currency exchanges, payday lenders and money transmitters.

The Division serves all Minnesota consumers and businesses that rely on these regulated businesses for financial products and services.

The Division conducts periodic on-site examinations, as well as ongoing monitoring, to ensure that financial institutions are safe and sound and comply with applicable state and federal laws. The Division's on-site examinations focus on various financial factors, including loan portfolios and overall asset quality.

The Financial Institutions Division is self-funded through assessments and hourly examination fees charged to the industries it examines. These charges are deposited into the Financial Institutions Special Revenue Account. The Division also receives a small appropriation from the General Fund and provides the General Fund non-dedicated revenue from license and renewal fees charged to all regulated financial institutions.

SERVICES PROVIDED

- Chartering and conducting on-site examinations at all state-chartered banks, trust companies, credit unions and the nation's only certificate investment company on a 12- to 24-month cycle.
- Licensing Minnesota's non-depository financial services, including the mortgage industry, consumer credit companies, currency exchanges, payday lenders, money transmitters and debt service providers through participation in the Nationwide Multistate Licensing System & Registry (NMLS).
- Conducting on-site mortgage company and money transmitter examinations.
- Minimizing the impact on Minnesotans in the event of a financial institution failure through timely and adequate intervention procedures.
- Collaborating with the Federal Deposit Insurance Corporation, the Federal Reserve Bank, and the National Credit Union Administration to conduct joint examinations of state-charted banks and credit unions and share findings.
- Participating in joint multi-state examinations of interstate investment advisers, mortgage and money transmission companies.
- Maintaining accreditation with the Conference of State Bank Supervisors and the National Association of State Credit Union Supervisors.

- Engaging in outreach activities to promote financial literacy among all Minnesotans and collaborating with state-chartered financial institutions to protect seniors and vulnerable adults from fraud.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Results	Complete financial examinations for state-chartered banks and credit unions within the 12-24 month time frame	100%	100%	CY2017 and CY2018
Quality	Act on company licensing applications and corporate amendment applications on a timely basis	60 days	60 days	CY2017 and CY2018
Quantity	Number of banks on the troubled bank monitoring list ⁽¹⁾	12	9	CY2017 and CY2018
Results	Increase number of licensed programs types utilizing NMLS ⁽²⁾	17	18	CY2017 and CY2018

Performance Measures Notes:

1. As of 6/30/2018, there are nine banks on the problem bank-monitoring list. This is down from a high of 111 in 2010.
2. This performance measure tracks the Division's progress towards achievement of a long-term goal to move all non-depository institutions to the same electronic licensing platform, the Nationwide Multistate Licensing System & Registry

Statutory Authority: The Department's authority is located in Chapters: 45A, 46, 47, 48, 48A, 49, 50, 51A, 52, 53, 53A, 53B, 53C, 54, 55, 56, 58, 59A, 216C, 332, 332A, 332B, 334, 80, 80A.

Program: Petroleum Tank Release Cleanup Fund (Petrofund)

mn.gov/commerce/industries/fuel/petrofund

AT A GLANCE

- **\$450 million:** Approximate amount of reimbursement paid out to eligible applicants since 1987.
- **13,000:** Approximate number of leak sites that have received funding for corrective actions since 1987.
- **490:** Underground petroleum storage tanks removed from approximately 325 properties since 2004.

PURPOSE

Created in 1987, the Petroleum Tank Release Cleanup Fund (Petrofund) contributes to a cleaner environment and helps to prevent the pollution of Minnesota's soil and water by providing eligible applicants with reimbursement for a portion of their costs to investigate and clean up contamination from leaking petroleum storage tanks.

SERVICES PROVIDED

- Helps applicants with the costs to investigate and clean up contaminated soil and water from leaking petroleum storage tanks in the most cost-effective manner possible;
- Contracts for the removal of abandoned underground petroleum storage tanks;
- Recovers costs from responsible persons for investigation and cleanup work performed by the Minnesota Pollution Control Agency (MPCA) when the responsible persons are unwilling or unable to complete statutorily-required corrective actions;
- Provides funding to the MPCA for administration of the Petroleum Remediation, Tank Compliance and Assistance, and Emergency Response programs, mainly to pay for state-financed investigation and cleanup projects where no viable responsible person is available; and
- Annually approves the use of funds by the Minnesota Department of Employment and Economic Development (DEED) for the administration of the Contamination Cleanup and Investigation Grant Program.

The Petrofund is primarily funded by the Petroleum Tank Release Cleanup Fee. The fee is charged on wholesale petroleum products and is paid at a rate of \$20 per 1,000 gallons (commonly referred to as \$.02 per gallon) by the first licensed distributor receiving the product in the state. The fee is imposed for a four-month time period whenever the Program's fund balance drops below \$4 million and authorization has been given by the five-member Petroleum Tank Release Compensation Board. Investment earnings on the Petrofund's cash balance generate additional revenue.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quality	Review of reimbursement applications within 60- and 120-day statutory deadlines in order to assure timely payment of investigation and cleanup costs incurred by applicants.	All initial applications reviewed within 51 days and all supplemental applications within 73 days	All initial and supplemental applications reviewed within 34 days	FY2017 and FY2018

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Removal of abandoned underground petroleum storage tanks in order to identify and prevent old tanks from leaking and contaminating soil and groundwater.	29 tanks removed at 24 sites	21 tanks removed at 20 sites	FY2017 and FY2018
Quantity	Protect human health and the environment by reimbursing eligible applicants for a portion of their costs to investigate and clean up contamination from leaking petroleum storage tanks across the state.	\$4.2 million reimbursed to approximately 300 applicants	\$4.7 million reimbursed to approximately 300 applicants	FY2017 and FY2018

Performance Measure Notes:

1. When a Petrofund applicant incurs costs, they can either submit all costs in one application or request reimbursement in multiple applications. Initial applications must be reviewed within 60 days. All subsequent applications must be reviewed within 120 days.
2. The application review data compares the application queue as of July 2017 (previous) and July 2018 (current). The application queue is mainly driven by the number of reimbursement applications received.
3. The abandoned tank removal data compares the number of tanks removed in Fiscal Year 2017 (previous) to the number removed in Fiscal Year 2018 (current). The number of tanks removed is contingent on the number of applications received and the staff resources available to manage the tank removal projects.

Statutory Authority: The Petrofund program's legal authority is found in Chapter 115C.

Program: Regulatory and Administrative Services Division

mn.gov/commerce/

AT A GLANCE

- 227,360: Number of active licenses issued by the Commerce Department's Licensing Unit to individual Minnesotans and businesses.
- 32,714: Total Unclaimed Property claims paid in FY17-18.
- \$249.1 million: Total dollar value of property returned to Unclaimed Property claimants since FY11.
- 98: Senior fraud prevention outreach and trainings held across Minnesota from November 2017 through July 2018.
- 27,944: Hang up On Fraud toolkits distributed to Minnesota seniors and caregivers from November 2017 through July 2018.
- 99.4: Percentage of invoices processed by Financial Services within 30 days.
- 9: Career and job fairs attended in FY17-18 by Human Resources staff.

PURPOSE

The Department of Commerce's Regulatory and Administrative Services Division includes two units. The Regulatory Services unit oversees the licensing and unclaimed property programs in the Department. Administrative Services unit includes core agency functions like Communications, Government Affairs, Financial Services and Human Resources.

The Regulatory and Administrative Services Division is funded through a General Fund appropriation.

SERVICES PROVIDED**Regulatory Services**

- Licensing
 - Administers application and renewal programs for 30 different professional license including of insurance agents and adjusters, real estate salespersons and brokers, appraisers, collection agencies and debt collectors and others seeking to do business across the state.
 - Provides licensing oversight for over 220,000 individuals and companies that do business in Minnesota.
 - Approves applications for pre-license and continuing education courses, maintains experience requirement standards and assists regulated entities in their ongoing efforts to better serve their clients.
 - Answers consumer inquiries regarding commerce-administered professional licenses.
- Unclaimed Property
 - Serves as a "lost and found" for financial assets belonging to current and former residents of Minnesota.
 - Safeguards, maintains, and seeks to return to owners, the approximately \$800 Million in abandoned property held by the state.
 - Takes in unclaimed property from companies (or "holders") with a statutory obligation to report property to the state once the property owner has not been located after a specific period of time.
 - Answers consumer inquiries regarding unclaimed property claims.

Administrative Services

- **Consumer Services Center**
 - Provides services to consumers who have inquires or complaints about Commerce regulated industries and licensees.
 - Responded to 13,220 consumer phone calls in 2017.
 - Mediates disputes between consumers and insurance companies.
 - Investigates complaints about improper claims practices.
 - Provides outreach and education to consumers about Commerce regulated industries.
- **Communications**
 - Provides information about consumer protection topics and Commerce services to the public and licensees through traditional media, online communications and outreach activities.
 - Maintains the Commerce website, which had 2,199,118 page views in FY18.
- **Government Affairs**
 - Leads policy development and advocacy for the agency.
 - Oversees constituent services responses for consumers who contact the agency via elected officials.
- **Financial Services**
 - Manages day-to-day office, financial and human resources operations.
 - Provides information management services and technical support including data processing, budget implementation, payroll and facilities management.
- **Human Resources**
 - Conducts policy administration, staffing, recruitment, workforce planning, labor relations, benefits administration and other functions for the agency and its staff.
 - Spearheads Departmental efforts to increase diversity and inclusion within the organization including developing pipelines and community partnerships, increased employee engagement, improved onboarding processes, new recruiting efforts at statewide career fairs and expanded advertisement of career opportunities in diverse mediums.

RESULTS

In FY18, \$31.1 million in unclaimed property was returned to consumers.

In FY18, 17,505 unclaimed property claims were paid.

In FY18, \$81.76 million in unclaimed property was remitted to the State.

In FY18, there were 227,360 active licenses issued by the Licensing Unit.

Statutory Authority: While many of the categories of licensure administered by the Division have their own statutory citations, the Department's authority is located in Chapter 45 and 345.

Program: Enforcement Divisionmn.gov/commerce/consumers/file-a-complaint/**AT A GLANCE**

In 2017, the Enforcement Division:

- **\$4.4 million:** Recovered for Minnesota consumers through administrative action.
- **\$8.3 million:** Civil penalties assessed by the Enforcement Division.
- **1,562:** Questions, concerns and complaints received by the Enforcement Division.
- **4,922:** Investigations opened.
- **443:** Number of enforcement actions taken.
- **2,476:** Reports of suspected insurance fraud.
- **\$3.98 million:** Amount of grants issued by the Commerce Fraud Bureau to local law enforcement agencies throughout Minnesota through the Auto Theft Prevention Program.
- **\$163.5 million:** Total economic impact of Commerce Fraud Bureau investigations that resulted in prosecutions.
- **2,117:** State-registered Investment Adviser and Broker Dealer firms in Minnesota.

PURPOSE

The mission of the Commerce Department's Enforcement Division is to protect consumers by monitoring conduct and investigating complaints related to unfair, deceptive, or fraudulent practices.

The Commerce Department regulates 22 industries in Minnesota, covering a large portion of the economic activity in the state. These industries include insurance, securities, financial institutions, real estate and collection agencies. The Enforcement Division works to ensure that businesses in these regulated industries operate in compliance with Minnesota law.

The Division performs audits and examinations of regulated businesses, responds to complaints and conducts investigations of suspected illegal activity. When the Division uncovers illegal activity, it can initiate administrative action or, where appropriate, collaborate with local law enforcement, county prosecutors, and the United States Attorney's Office to pursue criminal charges.

The Securities Unit registers securities agents, broker-dealers, franchises, timeshares, investment advisers and investment adviser representatives to do business in Minnesota. The Unit also performs examinations of businesses offering securities in Minnesota.

The Civil Investigations Unit and Securities Unit are funded through General Fund appropriations. The Commerce Fraud Bureau is funded through an assessment of insurance companies doing business in Minnesota and a special revenue fund appropriation from the Auto Theft Prevention Account.

SERVICES PROVIDED**Civil Investigations**

- Conduct civil investigations, audits, and market conduct examinations to determine if laws under Commerce's jurisdiction have been violated, while providing due process during the resolution of any alleged violations.

- Regulate business activity to ensure compliance, responsible business conduct, and a fair and consistent regulatory environment for businesses and consumers.
- Engage in outreach activities to inform, educate, and obtain feedback from Minnesota consumers and businesses.
- Work with industry to increase the transparency and efficiency of the insurance examination process.
- During 2017, Commerce's insurance market conduct examinations resulted in the imposition of \$5.08 million in civil penalties.

Commerce Fraud Bureau

- Undertake criminal investigations related to insurance fraud and other related criminal activities.
- Review notices and reports of insurance fraud submitted by insurers, their employees, and agents or producers, as well as notifications or complaints of suspected insurance fraud generated by other law enforcement agencies, state or federal government units or the public.
- During 2017, the Fraud Bureau initiated investigations into 2,476 cases, representing an 11% increase over the 2,227 investigations conducted in 2016.
 - These investigations resulted in prosecutions of individuals who were responsible for committing crimes with an economic impact of more than \$163.5 million to Minnesotans.
- Administer the Auto Theft Prevention Account and grant program which partners with local law enforcement to reduce the incidence of auto theft across Minnesota.

Securities

- Register broker dealer firms, state-based investment advisor firms and investment advisor representatives.
- Conduct on-site investment advisor examinations.
- Register franchise offerings to maintain the integrity of the franchise community in Minnesota.
- Advocate for and assist investors and consumers through consumer complaint resolution and public education and outreach.
- Work with federal and self-regulatory bodies that share regulatory authority over the securities area.
- Ensure compliant, responsible business conduct and practices to ensure a fair and consistent regulatory environment.
- Oversee crowdfunding exemption from securities registration known as MNvest.

Program: Telecommunicationsmn.gov/commerce/industries/telecom/**AT A GLANCE**

- **2.25 million:** Residential and business wireline telephones serving Minnesotans, including reliable and vital 911 services.
- **571:** Opened investigations and dockets in 2017.
- **439:** Number of new Telephone Equipment Distribution Program participants in 2017.

PURPOSE

The Telecommunications Unit serves the public as a state regulator of the telecommunications industry. The Unit provides the Public Utilities Commission (PUC) and the legislature with appropriate information and policy alternatives that are responsive to rapidly changing market conditions, including the transition to internet protocol technology.

The Telecommunications Unit reviews filings made with the PUC by telecommunications companies in compliance with state statutes, PUC orders, and state and federal regulations. It investigates complaints from the public, local governments and telecommunications companies about illegal, unfair, or anti-competitive practices and takes action to enforce state and federal statutes and regulations. The unit ensures that consumers are protected in the transition from legacy technologies to voice over internet protocol (VoIP) service.

The unit also administers the Telecommunications Access Minnesota (TAM) program, which delivers free services to persons with hearing, speech, or physical disabilities through the Minnesota Relay, and funds the Telephone Equipment Distribution (TED) Program, which provides specialized telecommunications equipment to Minnesotans.

Most of the functions of the unit are funded by an assessment on regulated telecommunications companies. The TAM program is funded by a fee imposed on consumers, collected by regulated telecommunications companies, wireless companies, and point of sale retail outlets selling prepaid wireless services.

SERVICES PROVIDED

- Advocate on behalf of the public interest for statewide telecommunications policies that promote high quality, affordable telecommunications network in Minnesota.
- Enforce Minnesota and Federal laws and rules of the PUC and the Federal Communications Commission.
- Investigate company filings and telecommunications matters for compliance with Minnesota requirements.
- Administrative review of licensing requests, service quality, pricing of services, and the competitive practices of telecommunications companies.
- Encourage deployment of infrastructure for improved voice, video, and data transmission, while protecting consumers from being left behind as new technologies are employed by the regulated industry, including VoIP service offerings.
- Provide Minnesotans a venue to resolve telecommunications complaints relating to service in rural areas, service outages, excessive fees and critical 911 service.

RESULTS

The Telecommunications Unit measures success by the extent to which all Minnesota citizens have access to high-quality, affordable telecommunications services, regardless of technology. The impact of the unit's activities is reflected in the availability of competitive alternatives and continued service to those areas in Minnesota with a single provider, including reliable and vital 911 services.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>

Program: Division of Energy Resources (DER)

mn.gov/commerce/industries/energy/

AT A GLANCE

- **320,000:** Number of Minnesotans served through the Low-Income Home Energy Assistance Program (LIHEAP) in Federal FY2018.
- **\$275 million:** Amount utility ratepayers saved due to Commerce's advocacy at the Public Utilities Commission in 2017.
- **500,000:** Number of Minnesotans who received energy-related information through phone, email, web visits, brochures and the Energy Home State Fair exhibit in 2017.
- **180:** Electric and natural gas utility Conservation Improvement Plans (CIP) reviewed and approved resulting in over 1.9 million megawatt-hours (MWh) and 6.6 million thousand cubic feet saved in 2015 and 2016 (the equivalent of removing 383,641 cars from the road for one year).
- **11:** Environmental reviews and technical support for large energy facility projects, including eight wind projects, two pipeline projects and one high-voltage transmission line in 2017.
- **860:** Megawatts of solar installed in Minnesota as of June 2018.
- **7:** Communities in Minnesota recognized at the 2018 Clean Energy Community Awards.

PURPOSE

The Division of Energy Resources (DER) represents the public interest while ensuring a clean, healthy environment with sustainable uses of natural resources. The Division of Energy Resources:

- Ensures Minnesota's energy system supports a strong economy, job creation, and healthy environment.
- Improves existing energy infrastructure while protecting ratepayers.
- Advances Minnesota's leadership in energy efficiency.
- Expands Minnesota's renewable energy potential and energy business activity.
- Assists low-income Minnesotans through financial assistance and energy conservation measures.
- Ensures sufficient, reliable energy at reasonable costs.

The Division of Energy Resources is funded primarily through federal grants. The Division also receives a general fund appropriation, which is recovered through an assessment on utilities. Additional funding is assessed to utilities and paid directly to the Department of Commerce.

SERVICES PROVIDED

The Division of Energy Resources provides the following services to support Minnesota's energy consumers:

State Energy Office

- Provides renewable energy financing and technical assistance and energy efficiency to the public sector.
 - Completed 109 Sustainable Building 2030 projects with a reduction of 216,000 tons of CO₂ (equivalent to removing over 46,000 passenger vehicles annually).
 - Administer the Guaranteed Energy Savings Program (GESP) allowing state agencies, colleges, and cities to implement major energy-saving projects. Current GESP projects are saving state and local governments and colleges \$800,000 annually.
- Oversees the State's Conservation Improvement Programs (CIP) to assure that utility consumers receive a comprehensive suite of energy efficiency and conservation assistance.
 - CIP helps support and grow over 49,361 energy efficiency jobs in Minnesota.

- Since 2006, CIP programs have reduced CO2 emissions by over 8 million tons, the equivalent of removing over 1.7 million passenger vehicles from the road for one year.
- Monitors energy supplies serving the state to assure Minnesota residences and businesses have reliable electricity service.
- Serves as an information resource to Minnesota consumers and businesses on clean energy programs and actions they can take to reduce energy use.
- Provides technical and financial resources to ensure energy efficiency and renewable energy projects are cost effective and soundly engineered for consumers, local units of government and state agencies.
 - Leverages nearly \$20 million in revolving loan programs for energy efficiency projects serving residential, business, nonprofit and other public sectors.
- Pursues public-private partnerships to deploy new clean energy technologies and bring new venture capital opportunities for Minnesota's businesses.
 - From 2013-2017, solar jobs in Minnesota increased from 814 to 4,256, a 523% increase.
 - Minnesota added 467 MW of solar capacity in 2017, up from 246 MW in 2016.

Low-Income Heating Assistance and Weatherization Assistance Program

- Administers \$117 million in the Low-Income Home Energy Assistance Program serving 320,000 Minnesotans in Federal FY2018.
- Serves on average 1,700 households annually in the Weatherization Assistance Program providing income-eligible homeowners and renters' energy savings and healthy and safe homes.

Regulatory Services:

- Advocates for the public interest in proceedings before the Public Utilities Commission (PUC), including rate cases, resource plans, and certificates of need, and advocates on behalf of Minnesota ratepayers in regional and federal matters.
- Conducts environmental review and provides technical expertise and assistance to the PUC for large energy projects in Minnesota.

Program: Weights & Measuresmn.gov/commerce/industries/fuel/**AT A GLANCE**

FY18 Weights & Measures performance by the numbers:

- 36,555: Fuel and diesel meters tested at gas stations, bulk plants and terminals.
- 6,082: Grocery, food and hardware scales tested.
- 8,472: Fuel tank inspections completed.
- 2,061: Gas Stations checked for advertising, signs, and labeling.
- 18,475: Credit card readers inspected for skimmers.
- 15,982: Objects calibrated in metrology laboratory.
- 2,408: Shipping, precious metal, and other commercial industrial scales tested.
- 4,199: Vehicle, track, hopper and other heavy capacity scales tested.

PURPOSE

The Weights & Measures Division protects Minnesota's commercial markets by promoting and ensuring equity, accuracy and quality of goods and fuels by:

- Providing Minnesota businesses with precision measurement services and certifying registered service agents for businesses and individuals.
- Supporting key Minnesota industries through testing lumber and agricultural scales, certifying the test chains used to calibrate taconite scales, and enforcing the biodiesel and biofuel content mandates.
- Protecting consumers to ensure they get what they pay for and weighing and measuring devices do not allow for fraud.
- Protecting the health and safety of Minnesota citizens and the environment by checking for leaks and working safety equipment on fuel dispensers.

Weights & Measures receives \$0.89 of the \$1.00 Petroleum Inspection Fee, which is collected from the first licensed distributor on every 1,000 gallons of petroleum products received and sold in Minnesota.

SERVICES PROVIDED

Weights & Measures provides five services to promote an equitable marketplace, free from fraud, which contributes to a healthy, safe environment for all citizens:

- The metrology laboratory maintains National Institute of Standards and Technology (NIST) recognition and National Voluntary Laboratory Accreditation Program (NVLAP) accreditation; and ensures accuracy in basic physical measurement by maintaining the state standards for mass, length, volume, temperature, and density; and by offering precision calibration services to businesses and individuals.
- Investigators enforce Minnesota statutes and rule to prevent fraud and ensure the accuracy and safety of fuel pumps; meters used at terminals, refineries and airports; grocery scales; prepackaged commodities; livestock, railway track, grain and fertilizer scales; precious metals scales; and other commercial weighing and measuring devices.
- The Petroleum lab and light duty investigators partner to ensure fuel quality, protect the environment, and enforce statutory biofuel mandates through records audits, routine sampling, complaint investigation, and fuel testing to ASTM quality standards and volatility and sulfur standards.

- Test and monitor the competency and performance of registered service technicians and private liquefied petroleum gas inspectors who install and repair commercial weighing and measuring devices in Minnesota.
- Engage in regional, national and international standard-setting organizations like the Central Weights and Measures Association (CWMA), the National Conference on Weights & Measures (NCWM), ASTM International and the National Conference of Standards Laboratories International (NCSLI) to ensure Minnesota stays current on the latest developments in fuel and metrology testing and regulation.

RESULTS

In FY 2017-18, the Weights & Measures Division saw inspection and audit activity rates rise 24% over the previous biennium. Fuel tax sticker inspections account for 6% of the additional inspections performed. The other 18% increase is due to increased efficiency on the part of inspectors. Inspection intervals at current productions levels are approximately 2 years.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of samples, devices, audits and package lots checked annually	68,761	85,341	FY2015-16 and FY2017-18
Results	Percent of samples, devices, audits and packages approved without need for corrections by Weights and Measures for sale in Minnesota	80.7%	77.9%	FY2015-16 and FY2017-18
Results	Percent of samples, devices, audits and packages removed from marketplace	3.2%	7.8%	FY2015-16 and FY2017-18
Results	Percent of devices, audits and packages corrected because of W&M inspections	19.0%	14.3%	FY2015-16 and FY2017-18

Program: Insurance Division

mn.gov/commerce/industries/insurance/

AT A GLANCE

- **\$349 billion:** Amount of assets held by Minnesota domestic insurers regulated by the Insurance Division in 2017, an 11% increase from 2015.
- **152:** Domestic insurance companies located in Minnesota.
- **\$314.6 million:** Projected amount of federal funding expected to support premium rate relief for the 2018 and 2019 Minnesota individual health insurance markets.
- **3,801:** Policy rate and form filings reviewed in 2017 in the life insurance, annuity, health insurance, property & casualty insurance, and workers compensation lines of business.
- **20:** Domestic insurance companies examined in 2017.
- **36:** Certificates granted, authorizing increased competition and providing additional capacity in the insurance marketplace.
- **2017:** The Division was reaccredited by the National Association of Insurance Commissioners for an additional five years. Accreditation allows other states to rely on the Department's review and examination of domestic insurers, reducing cost and administrative burden for Minnesota insurers.

PURPOSE

The mission of the Department of Commerce's Insurance Division is to ensure that insurance companies licensed to do business in Minnesota are financially sound, offer insurance products that are fair with actuarially-reasonable rates, and inform and respond to the insurance needs of the residents and businesses of Minnesota.

Minnesota has the tenth largest insurance industry in the United States with over 152 domestic insurance companies and 1,305 foreign (out-of-state) companies. Insurance companies in Minnesota have over \$42 million in written premium which ranks 16th in the nation.

The Insurance Division's work consists of actuarial review, financial analysis, examinations, licensing and insurance product form and rate filing for health, property and casualty, and life insurance. This work is completed for all insurance types including: health, automobile, homeowner, farm, flood, crop, life, long-term care, workers compensation and more.

This work of the Insurance Division is funded through a General Fund appropriation and the Special Revenue Fund for Insurance Examinations. Revenues generated from the division's work consist of examination fees, desk audit fees, registration and filing fees, and transaction fees.

SERVICES PROVIDED

- The Insurance Division evaluates insurance policies and rates, ensures fairness in rates and compliance with Minnesota statutes and licenses to protect Minnesotans.
- The Insurance Division examines and regulates insurance companies, including two with over \$100 billion in assets, to ensure they are safe and financially solvent now and in the future.
- The Insurance Division serves Minnesota consumers and businesses that rely on insurance companies for financial products and services, the Minnesota insurance industry, other state insurance regulators, the legislature, and other state agencies.

The work of the Insurance Division is divided into the following categories:

- **Actuarial** – applies asset-liability and principle-based reserving modeling to verify the adequacy of insurance company reserves and capital over a range of economic scenarios, and reviews pricing models to ensure rates are adequate, not excessive, fair, non-discriminatory, and equitable;
- **Financial Analysis** – evaluates information and develops a financial profile of domestic and foreign insurance companies doing business in Minnesota, based on statutorily required financial and regulatory reports;
- **Examinations** – conducts on-site examinations of each Minnesota-domiciled insurer at least once every five years. Examiners review insurance company books and records at the company headquarters, conduct a risk-focused examination per national requirements, make recommendations for insurer improvement, and prepare examination reports;
- **Licensing** – approves insurance company applications for insurers who want to operate in the state and/or want to write additional lines of business and approves or denies those applications based on standards of compliance and financial strength; and
- **Insurance Product Form and Rate Filings** – reviews insurance form and rate submissions for compliance with Minnesota statutes to ensure Minnesotans are protected from false and deceptive products, as well as review the financial condition of companies that self-insure.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Policy Form and Rate Review	4,093 filings reviewed	3,801 filings reviewed	FY2017 and FY2018
Quality	Turnaround time from filing to disposition, – Property & Casualty, including Workers Compensation forms and rates – target: 40 days	41.4 days	21.3 days	FY2017 and FY2018
Quality	Turnaround time from filing to disposition, Life, Annuity & Health forms and rates – target: 40 days	34.5 days	34.8 days	FY2017 and FY2018
Quantity	Financial Examinations of insurers completed within the required time frame	16	20	FY2017 and FY2018
Quantity	Financial Analysis of insurers completed within the required time frame	74	69	FY2017 and FY2018
Results	Percentage of Financial Examinations and Financial Analysis of insurers completed within the required time frame	100%	100%	FY2017 and FY2018

Performance Measure Notes:

1. Review of forms in a timely manner allows new, innovative products to be offered to Minnesotans commensurate with the rollout in other states.
2. Financial examinations are on a regular schedule and are completed on individual insurance companies. Examinations are completed every three years for Health Maintenance Organizations on behalf of the Department of Health and every five years for indemnity insurers. The National Association of Insurance Commissioners requires examinations to be completed within 18 months of the as-of date, with extensions granted in special circumstances. Financial Analysis is performed on a quarterly basis for 69 insurance entities.

Statutory Authority: The Department's authority is located in Chapters: 59A, 59B, 59C, 60A, 60B, 60C, 60D, 60E, 60F, 60G, 60H, 60J, 60K, 60L, 61A, 61B, 62A, 62B, 62C, 62D, 62E, 62F, 62H, 62I, 62J, 62L, 62M, 62Q, 62R, 62S, 62U, 64B, 65A, 65B, 66A, 67A, 69, 70A, 71A, 72A, 72B, 72C, 79, 79A.

Program: Minnesota Premium Security Planmn.gov/commerce/**AT A GLANCE**

- **\$271 Million:** The total annual size of the Minnesota Premium Security Plan program.
- **\$130.7 Million:** Amount of federal funding made available to the state for plan year 2018.
- **\$183.9 Million:** Estimated amount of federal funding federal regulators project Minnesota will receive for plan year 2019.
- **20 Percent:** The average reduction in health insurance rates from where they otherwise would be absent the existence of the Minnesota Premium Security Plan program.
- **June 30, 2021:** Date under current law by which unexpended state funds appropriated for the Minnesota Premium Security Plan program must be returned to the Health Care Access Fund.

PURPOSE

Administered by the Minnesota Comprehensive Health Association (MCHA), the Minnesota Premium Security Program (MPSP) was created by the legislature in 2017 to provide reinsurance payments to health insurers to help offset the costs of high claims in the state's individual health insurance market.

Approximately 160,000 Minnesotans receive their health insurance through the individual market. The purpose of the MPSP reinsurance program is to reduce premiums and promote affordable health insurance for Minnesotans in the individual market.

Expenditures for the MPSP are for grants to MCHA for administrative costs related to the start-up and operations of the program, and reinsurance payments to health insurers. State law limits these payments to \$271 million per year in 2018 and 2019. Payments for 2018 are expected to be made after July 1, 2019 and no later than August 15, 2019. Any state funds not used by the program by June 20, 2021 will be cancelled and returned to the Health Care Access Fund.

SERVICES PROVIDED

The Commerce Department serves as the fiscal agent for appropriations directed to the MPSP.

In October 2017, the Commerce Department obtained approval of a Federal 1332 Waiver that authorized the program's operation under the Affordable Care Act (ACA). Commerce is the state's reporting agent to the federal government on the federal funds provided to the program.

Commerce provides state oversight of the program and is responsible for approving the MPSP program parameters on an annual basis.

RESULTS

The MPSP has had a stabilizing effect on Minnesota's individual health insurance market rates, which are what people pay for their health insurance premiums. This effect can be measured by examining health insurer's 2018 final rates and 2019 proposed rates:

2018 Final Individual Market Rates	
Company	2018 Average Change in premium from previous year.
Blue Plus	+2.80%
Group Health	-7.50%
Medica Insurance Company	-0.40%
PreferredOne Insurance Company	-38.00%
UCare	-13.30%

2019 Proposed Individual Market Rates	
Company	2019 Average Change in premium from previous year (as calculated by each insurer)
Blue Plus	-11.80%
Group Health	-7.40%
Medica Insurance Company	-12.40%
PreferredOne Insurance Company	-3.00%
UCare	-7.00%

Statutory Authority: The authority for this program is located in Minnesota Session Law 2017, Chapter 13 and Special Session 1, Chapter 6, Article 5, Section 10.

Narrative

The Division of Energy Resources (DER) receives federal grants for three programs: Low Income Heating Assistance Program (EAP), Weatherization Assistance Program (WAP), and the State Energy Program (SEP).

- EAP provides energy assistance to low-income households.
- WAP enables income-qualified households to permanently reduce their energy bill by helping to make their homes more energy efficient while protecting the health and safety of family members.
- SEP promotes energy conservation, energy efficiency and renewable energy to all Minnesotans.

Historically, the federal funding in DER has accounted for 70-80% of the overall Department of Commerce budget with EAP being the single largest program. WAP is currently funded by a continuous formula grant at the federal level and current funding is has been approximately \$8-10M annually. Funding levels for SEP have remained relatively stable at the federal level however the program can be impacted by the US Department of Energy decisions on how much is allocated via formula and how much is set aside for competitive grants.

The Insurance Division manages a Health Insurance Enforcement and Consumer Protection grant to oversee and enforce three market reform and consumer protections provisions with respect to health insurance under the Public Health Services Act's title XXVII Part A. The strategies the Department will use include enhancing policy form review, auditing market conduct, and informing consumers of their rights and protections under these market reform and consumer protection provisions. Additionally, the Insurance Division manages a State Flexibility to Stabilize the Market grant program to enhance its internal and external checklists and standard operating procedures related to Sections 2702, 2703, and 2707 of the Affordable Care Act (Guaranteed Availability, Guaranteed Renewability, and Non-Discrimination in comprehensive health coverage). The Insurance Division will work with the Minnesota Department of Health to ensure best practices for the creation of internal and external checklists and standard operating procedures to ensure compliance with these provisions. In addition to the creation of new checklists and standard operating procedures, the Departments of Commerce and Health will consult externally with professionals (including pharmacists) to ensure compliance with non-discrimination of comprehensive health coverage, undertaking a review of health insurance carrier formularies.

The Minnesota Premium Security Plan is the state based reinsurance program which is designed to lower health insurance premiums for Minnesotans who purchase their own health insurance on the State's individual market. Minnesota received a Federal 1332 Waiver to operate the reinsurance program. Under state law, Federal funds must be expended prior to state funds for the operations of the Minnesota Premium Security Plan Program.

Agency Change Summary 8

<http://www.conservationcorps.org/>

AT A GLANCE

Young adult programs, ages 18-25: all participants are enrolled in AmeriCorps and receive education awards after completing service

- 242 young adults serve in field crews across the state, completing natural resource work restoring and protecting water quality, maintaining state parks, improving trails and restoring habitat
- 60 young adults serve in single placement positions with natural resource agencies and nonprofits and conservation apprenticeships at Soil and Water Conservation Districts
- 58 young adults serve as youth leaders for summer and afterschool programs

Youth programs, ages 15-18: all participants earn a stipend while restoring resources and gaining job and career-planning skills

- 148 youth—about 10 percent of whom are deaf or hard of hearing—unplug from modern intrusions to live, learn, and work outdoors as part of the rural residential Summer Youth Corps
- 120 youth take part in the afterschool Youth Outdoors program, which engages diverse urban high school students from low-income homes—about 90 percent of whom are people of color—in job training, science education, and outdoor service-learning

PURPOSE

Conservation Corps Minnesota's mission is to provide hands-on environmental stewardship and service-learning opportunities to youth and young adults while accomplishing conservation, natural-resource management and emergency response work.

Conservation Corps Minnesota's goals are to help young people from diverse backgrounds become more connected to the environment, engaged in conservation, involved in the community, and prepared for further education and future employment. Conservation Corps integrates young people from various socio-economic backgrounds and cultural communities, as well as deaf youth, into its programs and lives up to its motto: Resources Restored. Lives Changed.

Conservation Corps' mission and goals support these statewide priorities:

- Investing in Kids, Families, and Communities
- Building an Economy that Works for All Minnesotans
- Clean, Affordable Water for All Minnesotans

BUDGET

Source: Conservation Corps' Audited Financial Statements

Source: Conservation Corps' Audited Financial Statements

Conservation Corps Minnesota has a diverse funding base. Fee-for-service contracts fund more than 55 percent of program costs and are the primary revenue source in the young adult programs, along with government grants. Youth programs also derive revenue from fee-for-service contracts but rely more heavily on individual giving, private/corporate foundation grants, and government grants. Fee-for-service partners include federal, state, local and nonprofit partners and related service activities. Clean water, land, and legacy funds support nearly 20 percent of program costs through partnerships with different agencies.

STRATEGIES

Restoring resources

Throughout Conservation Corps' programs, young people are involved in hands-on, service-learning activities that protect and enhance natural resources.

1. **Restoring and Protecting Water Quality:** Corps members restore and protect waterways and shorelines that are vital to the region's water supply by stabilizing shorelines, installing buffers and rain gardens, and removing debris and other pollutants.
2. **Habitat Restoration:** Corps members restore habitat on public lands throughout Minnesota by removing non-native invasive species, conducting prescribed burns, and planting native trees and plants.
3. **Improving Access to Outdoor Recreation:** Corps members build and maintain motorized and non-motorized trails, boardwalks, campsites, park facilities, and other recreational structures.

Changing Lives

Conservation Corps Minnesota prepares nearly 594 young people for further education and future employment each year with personal development, technical and work-skills training, and education.

1. **Educational curriculum for youth (ages 15-18):** focuses on science and technology and job-search skills. More than 20 percent of program time is devoted to education and skills training. Eighty-five percent of youth participants report in post-program surveys that their work skills have improved.
 - **Summer Youth Corps** – Youth begin at St. Croix State Park base camp, then spike camp throughout the region, working in crews of eight youth and two AmeriCorps leaders each as they restore natural resources and lead volunteers during two four-week summer sessions.
 - **Youth Outdoors** – Diverse urban teens from low-income neighborhoods engage in out-of-school environmental science education, civic leadership, and outdoor service-learning as they complete

neighborhood improvement projects and lead volunteers during 11-week fall and spring school semesters and an eight-week summer session.

2. **Skills training for young adults (ages 18-25):** includes hands-on training in habitat restoration, trail building, prescribed burning, energy conservation, leadership, communication, and other skills. Field crew members receive professional certifications in wildfire suppression, chain-saw safety, and first aid.
 - **Non-residential Field Crews** – Young adults, working in five-member crews, conduct natural resource, conservation, and emergency response work from February to December.
 - **Seasonal crews** – Young adults from diverse ethnic communities, working in six-member crews, receive intensive job training in natural resource management and work in the Superior National Forest “Faces of Tomorrow” initiative from May through August.
 - **Single placements** – Individual corps members are based at the Minnesota Department of Natural Resources, Neighborhood Energy Connection in Saint Paul, government agencies, and nonprofits. During the summer, apprentices serve in soil and water conservation districts throughout Minnesota.

RESULTS

Type	Performance Measures	2016	2017
Output (quantity)	Number of youth and young adults engaged in job skills training, education and natural resource and conservation work	586	647
Output (quantity)	Hours of education/training provided to young people	63,771	63,264
Output (quantity)	Acres of habitat restored	48,700	38,880
Output (quantity)	Miles of trail restored	1,714	1,360
Outcome (result)	Percent of young people who gained workforce readiness skills including self-confidence, teamwork, and problem solving	92%	90%
Outcome (result)	Percent of young people who gained an appreciation for nature and protecting the environment	96%	96%

Performance measures follow the calendar year in alignment with Conservation Corps’ program schedule and fiscal year.

The legal authority for the Minnesota Conservation Corps is found in Minnesota Statutes Chapter 84, Section 991 (<https://www.revisor.mn.gov/statutes/?id=84.991>).

AT A GLANCE

- More than 4,300 employees
- 10 prisons statewide
- More than 10,000 adults and juveniles in state correctional facilities
- 20,000 offenders supervised in the community by the DOC
- 75% of released offenders do not return to prison for a new conviction

PURPOSE

The Department of Corrections (DOC) is responsible for the incarceration, care and community supervision of adult and juvenile offenders throughout the state. We help ensure **people in Minnesota are safe**. Our offender population is determined by sentencing laws and by the courts. Our mission is to reduce recidivism by promoting offender change through proven strategies during safe and secure incarceration and effective community supervision. We work to achieve the following goals in support of our mission:

- Provide effective correctional services;
- Hold offender accountable;
- Change offender behavior;
- Provide restorative services for victims; and
- Engage staff and promote workplace safety.

BUDGET

Spending by Program

FY 17 Actual

More than 60% of community services spending is grant/subsidy pass-through funds to county corrections agencies for offender supervision.

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Federal funds for FY10-11 include \$38 million of one-time stabilization funds legislatively appropriated to supplant the general fund budget.

Source: Consolidated Fund Statement

More than 96% of our operating budget comes from the general fund. Special revenue funds represent 3% of our budget and federal funds represent less than 1%.

STRATEGIES

We use the following strategic directions to accomplish our mission and ensure people in Minnesota are safe:

- Engage all stakeholders.
 - Cultivate staff excellence.
 - Align agency decisions with data.
 - Expand diversity and talent.
 - Develop population capacity and expand program availability.
-

M.S. 241.01 (<https://www.revisor.mn.gov/statutes/cite/241.01>) provides the legal authority for the DOC.

FY 2020-21 Biennial Budget Change Item

Change Item Title: Operating Adjustment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	10,558	17,778	17,778	17,778
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	10,558	17,778	17,778	17,778
Maintain FTEs	162	300	300	300

Recommendation:

The Governor recommends additional funding of \$10.558 million in FY2020 and \$17.778 million in FY2021 to maintain the current level of service delivery at the Department of Corrections (DOC). Funds are necessary to ensure safe and secure prisons and effective community supervision.

This request represents a 2.9% increase to the total agency budget, and a 4.7% increase to the relative base budget for employee compensation. The funding will maintain 162 existing FTEs in FY2020 and 300 existing FTEs in FY2021.

Rationale/Background:

Each year, the cost of doing business rises – employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

Compensation increases are not reflected in the agency's base budget. The increases have a significant impact on the agency's budget, and on overall operations if not funded. The DOC is a 24/7 operation and more than 96% of our operating budget comes from the state's general fund. The authority to control admissions or release offenders early is very limited, as is the availability of alternative funding sources such as fines, fees or federal funds. Current staffing levels are necessary to provide critical core services to the offender population and maintain current operations. Compensation costs are driven by labor negotiations, legislative changes, and the cost of health insurance premiums; and will continue to increase every year.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the DOC, this funding will cover known employee compensation growth:

- This is not a new initiative.
- This funding will pay for anticipated employee compensation growth, including compensation increases and employer-paid pension costs.
- Funding is critical to maintain current operations, and will avoid the potential layoff of up to 300 employees.
- DOC employees maintain operations that provide basic needs to incarcerated offenders, offender treatment and programming needs, supervision of offender in Minnesota communities, and other critical

public safety responsibilities in collaboration with multiple federal, state and local criminal justice agencies.

- This proposal will ensure the DOC can maintain current staffing levels and maintain or improve existing performance measures.

Equity and Inclusion:

The DOC provides basic needs and services to a very diverse offender population in terms of race, ethnicity, gender, sexual orientation, disability and veteran status. They also employ a diverse workforce and strive to foster effective diversity management practices that will improve the recruitment and retention of employees from diverse backgrounds.

Results:

This proposal is intended to ensure the DOC is able to effectively provide current levels of service and information to the public, to criminal justice partners, and to the offender population. It will also ensure they can maintain existing recidivism rates that have been relatively stable over the last several years.

The consequences to existing programs and activities will be significant if this proposal is not funded, and will result in layoffs. Research shows education, chemical dependency and sex offender treatment, and work and reentry programming significantly reduces the recidivism rate for offenders who participate in those programs. If this proposal is not funded the DOC will need to reduce or eliminate these critical activities because the security of prisons and safety of staff working in prisons and in the community need to be our first priorities. Consequently the risk of recidivism will increase and result in significant cost increases to incarcerate offenders in the future.

Statutory Change(s):

Not applicable.

FY 2020-21 Biennial Budget Change Item

Change Item Title: Prison Security and Safety

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	19,063	26,219	22,928	22,928
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	19,063	26,219	22,928	22,928
FTEs	89.5	167	167	167

Recommendation:

The Governor recommends funding of \$19.063 million in FY2020 and \$26.219 million in FY2021 to the Department of Corrections (DOC) to help ensure the security and safety of the State's prisons and DOC employees including the addition of security personnel and staff in other roles that directly contribute to overall security and safety, critical infrastructure and physical plant needs, continuation of the restrictive housing initiative, and investment in essential technology modernization projects.

The requested funds will be used to hire correctional officers, lieutenants and other critical staff; to replace or enhance infrastructure and information technology systems that are essential to prison security and safety; and to continue offender programming and operational changes that support the initiative for effective restrictive housing activities.

This request represents a 3.8% increase to the total agency budget, and a 5.2% increase to the relevant base budget for prison facility operations.

Rationale/Background:

The DOC maintains and operates ten correctional facilities across the state. They incarcerate nearly 10,000 offenders and employ approximately 4,200 employees (approximately three-fourths of our employees routinely work inside our prisons). It is essential to provide environments that are safe and secure for staff, offenders and the public.

Staffing: Adequate security coverage is paramount to operating a safe and secure prison. The DOC currently employs approximately 2,000 correctional officers including those in the correctional officer 1, correctional officer 2, correctional officer 3 and correctional canine officer classifications. The DOC conducted a comprehensive security staffing analysis based on a model promoted by the National Institute of Corrections (NIC). The NIC model provided a nationally-accepted, standardized, replicable and well-documented approach to calculating the necessary complement of security personnel for each of our unique facilities. The analysis was a year-long process that focused on the work and responsibilities of correctional officer positions. It resulted in recommendations to significantly increase the number of correctional officer FTEs in our prisons. Current staffing patterns also include approximately 125 lieutenants, who provide direct supervision to correctional officers.

Staff in non-security classifications also perform responsibilities that are critical to the security and safety of a prison. They may work in areas where offenders gather in large numbers (i.e. offender dining) or areas that

experience a lot of offender movement, or they may supervise offenders on work assignments, or they perform duties that are critical to security operations even if their interaction with offenders is minimal.

Security infrastructure and technology modernization: The DOC relies heavily on a number of systems (cameras, lighting, controlled access, radios and other communication devices, secure perimeters, scanning technology) to ensure correctional facilities remain safe and secure environments. They need the ability to refresh equipment as necessary. Certain systems run on a platform that will no longer be supported. Analog equipment needs to be replaced with current technology. Adequate infrastructure is essential to a secure and safe prison environment, and our aging facilities present unique challenges. Updates are needed at all correctional facilities.

Restrictive housing: The use of segregated housing of offenders in U.S. prisons has been highly criticized by mental health advocacy groups, civil rights organizations, corrections professional organizations, criminal justice researchers, media and the courts. The U.S. Department of Justice recently implemented guidelines related to restrictive housing practices, and the American Correctional Association has implemented accreditation standards related to restrictive housing. It is important to provide programming directed at preventing offenders from returning to segregation or reducing their risk of committing violent acts or engaging in serious misconduct that disrupts facility operations.

Office of Ombudsman: At any given time there are approximately 10,000 individuals subject to commitment to the DOC. As many as 10,000 additional people are incarcerated in county jails, regional detention facilities and licensed holding units. Minnesota previously had an Office of Ombudsman for corrections. With a growing need for accountability across the criminal justice system, including corrections, the reestablished Office of Ombudsman will provide an investment in prison safety and security as it will establish an independent entity with the authority to receive and investigate complaints from and on behalf of those subject to incarceration in state or locally operated facilities.

Juvenile Justice Reform: Minnesota has significant racial disparities in the juvenile justice system and a large number of juveniles in the system have suffered from childhood trauma. This proposal supports collaborative efforts between stakeholders of the juvenile system and community partners that work to create an effective, fair and efficient system that produces positive outcomes for youth, families and communities while protecting public safety. Finding strategies that eliminate inappropriate or unnecessary use of secure detention and preventing racial and ethnic disparities allows resources to be redirected to effective community-based and culturally appropriate services for youth and their families. Juveniles who are diverted from secure confinement are less likely to experience future incarceration and are less likely to recidivate.

Proposal:

The Governor recommends an increase in funding to the DOC for staff and activities aimed at ensuring secure and safe prison environments:

- The request provides \$2.7 million in FY2020 and \$7.020 in FY2021 to hire 120 correctional officer FTEs by the end of FY2021. Costs increase to \$8.64 million in FY2022. Costs are based on annual compensation of \$68,000 per FTE plus \$4,000 per FTE for ongoing supplies and equipment, and are phased in quarterly over two years.
- The request provides \$268,000 in FY2020 and \$625,000 in FY2021 to add 6 lieutenant FTEs by the end of FY2021. Costs increase to \$714,000 in FY2022. Costs are based on annual compensation of \$115,000 per FTE plus \$4,000 per FTE for ongoing supplies and equipment, and are phased in quarterly over four years.
- The request provides \$475,000 in FY2020 and \$752,000 in FY2021 to add FTEs for 2 support staff for security operations, 2 human resources staff for recruitment, and 6 physical plant staff. The positions are located at 6 locations.
- The request provides \$576,000 in FY2020 and \$834,000 in FY2021 to add 9 cook coordinator FTEs at \$66,000 per year and 3 chief cooks at \$80,000 per year. Positions are located at the correctional facilities in Oak Park Heights, Rush City, Shakopee, Stillwater, and Moose Lake/Willow River.

- The request provides \$844,000 in FY2020 and \$1.688 million in FY2021 to add 11 behavioral health FTEs, 7 caseworker FTEs, and 1 Corrections Program Director for the restrictive housing initiative.
- The request provides \$3.2 million in FY2020, \$2 million in FY2021 and \$600,000 in each subsequent year for infrastructure necessary to ensure safe and secure facility operations.
- The request provides \$900,000 in FY2020 and \$2.1 million in FY2021 for MN.IT to add 16 FTEs to address ongoing needs. Costs are phased in over two years.
- The request provides \$2.2 million each year for ongoing Corrections Offender Management System (COMS) updates needed for security, accessibility, technology and business process reasons.
- The request provides \$2.5 million in FY2020 and \$3.6 million in FY2021 for facility security modification to transform existing systems to next generation technologies that will improve facility safety and security. These are one-time costs that do not continue beyond FY2021.
- The request provides \$900,000 each year to establish and operate an Office of Ombudsman for corrections with 6 FTEs. Funds will be used for salaries and expenses for employees, and ongoing operating costs.
- The request provides \$500,000 each year for juvenile justice reform. \$280,000 each year will be used to add and maintain 2 FTEs to coordinate and provide services and resources including technical assistance, training and peer learning opportunities to counties across the state; and \$220,000 each year will be used as grant funds to local agencies to establish juvenile detention alternatives.

Equity and Inclusion:

The DOC incarcerates a very diverse offender population in terms of race, ethnicity, gender, sexual orientation, disability and veteran status. They employ a diverse workforce to foster effective diversity management practices that will improve the recruitment and retention of employees from diverse backgrounds. This proposal supports the safety and well-being of both the diverse staff and offender population.

Agency FTEs						

Results:

The following table represents some quantity measures related to security operations in adult facilities. With this proposal it's expected the DOC will maintain or improve on the current trends.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>FY2014</i>	<i>FY2015</i>	<i>FY2016</i>
Quantity	Assault of staff	84	81	63
Quantity	Assault of inmate	465	394	366
Quantity	Riot	23	10	8
Quantity	Escape from secure facility	0	0	0
Quantity	Suicide/Accidental death	0	0	2

Another factor of effective prison operations is the recidivism rate, which has remained relatively stable over the last several years. With funding we expect to maintain or improve that trend.

Corrections

FY 2020-21 Biennial Budget Change Item

Change Item Title: Offender Health Care

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	2,951	5,432	5,432	5,432
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,951	5,432	5,432	5,432
FTEs	8.75	16.5	16.5	16.5

Recommendation:

The Governor recommends funding of \$2.951 million in FY2020 and \$5.432 million in FY2021 to the Department of Corrections (DOC) to fund the medical needs for an offender population of nearly 10,000 that has varied and complex illnesses and is less healthy than the general population.

The requested funds will be used to fully fund anticipated contractual obligations for basic offender health care, expansion of 24/7 nursing to two additional prisons, implementation of an electronic health records (EHR) system, and more comprehensive medical services overall.

This request represents a 0.9% increase to the total agency budget, and a 6% increase to the relevant base budget for offender health care.

Rationale/Background:

The offender population has a constitutional right to adequate health care. Medical services must be provided to nearly 10,000 offenders incarcerated in the state's correctional facilities.

The continued rising cost of health care is an area of significant concern for individuals and organizations across the country, and particularly for jails and prisons. Primary drivers are the increase in pharmacy costs, the increasing number of offenders being treated for a wide range of serious and complex illness, and the increasing age of the offender population.

Contracted medical services: In response to the Governor's FY2018-2019 biennial budget recommendation for contracted medical services, the 2017 Legislature only provided for partial funding for FY2020 and each subsequent year. This proposal will fully fund those contractual obligations for the next four years.

24/7 nursing: The DOC currently operates 24/7 nursing operations in three correctional facilities (Faribault, Oak Park Heights and Shakopee). This proposal would expand 24/7 nursing to two additional correctional facilities with an offender population of more than 1,000 offenders in each of those prisons.

Electronic Health Records (EHR): The 2007 and 2008 Legislatures enacted laws mandating all hospitals and health care providers have an interoperable EHR system. The DOC is considered a health care provider. EHR systems improve continuity of care, decrease grievances and result in better overall client health care as offenders navigate throughout the prison system and eventually transition into the community.

Comprehensive medical services: A recent staffing analysis (recommended by the Office of the Legislative Auditor) indicated the current number of health services staff is inadequate to meet the growing complex medical needs of the offender population. The number of incarcerated offenders over the age of 50 years grew from 310 in 1998 to 1,349 in 2014 (an increase of 335%). Skilled nursing beds increased from 46 to 54 in the same timeframe, and 73 assisted nursing beds have been added. Approximately one-third of offenders in our prisons have been diagnosed with a chronic disease – a higher rate than the general population. As part of the public health system the DOC has an obligation to help offenders improve their health during incarceration.

Proposal:

The Governor recommends a budgetary increase to the DOC to maintain the provision of basic medical services for the offender population, to expand 24/7 nursing coverage, to implement an EHR system, and to provide staffing levels and services that are adequate to meet the needs of our offender population.

- The provisions of this proposal related to contracted medical services, 24/7 nursing, EHR, and comprehensive medical services are not new initiatives.
- The request provides \$2.072 million in FY2020 and \$3.272 in FY2021 and each subsequent year to fully fund contractual obligations that will maintain the current level of medical care provided to the offender population, who have a constitutional right to adequate health care.
- The request provides \$372,000 in FY2020 and \$744,000 in FY2021 to add 8 RN and LPN FTEs to provide 24/7 nursing coverage at two additional prisons.
- The request provides \$130,000 in FY2020 and \$663,000 in FY2021 and each subsequent year for the use and support of an EHR. Costs include 1 FTE for program management, ongoing support from MN.IT, and annual licensing.
- The request provides \$377,000 in FY2020 and \$753,000 in FY2021 add 6 RN FTEs, 1 LPN FTE and 0.5 support staff FTE to expand or increase services related to comprehensive chronic disease management and risk management activities including oversight, accountability and quality assurance.
- These initiatives would be implemented immediately.

Equity and Inclusion:

The DOC provides medical and chemical dependency services to a very diverse offender population in terms of race, ethnicity, gender, sexual orientation, disability and veteran status. Funding will help ensure they adequately meet the complex medical needs of this diverse population.

IT Related Proposals:

This proposal includes the following information technology costs for an EHR system:

<i>Category</i>	<i>FY 2020</i>	<i>FY 2021</i>	<i>FY 2022</i>	<i>FY 2023</i>	<i>FY 2024</i>	<i>FY 2025</i>

Professional/Technical Contracts						
Infrastructure						
Hardware						
Software (<i>annual licensing</i>)		408	408	408	408	408
Training						
Enterprise Services						

<i>Category</i>	<i>FY 2020</i>	<i>FY 2021</i>	<i>FY 2022</i>	<i>FY 2023</i>	<i>FY 2024</i>	<i>FY 2025</i>
Staff costs (MNIT or agency)	130	125 130	125 130	125 130	125 130	125 130
Total	130	663	663	663	663	663
MNIT FTEs	0.0	1.25	1.25	1.25	1.25	1.25
Agency FTEs	1.0	1.0	1.0	1.0	1.0	1.0

Results:

With this proposal it is expected the current level of contracted medical services provided to the offender population will be maintained.

The DOC will be able to increase the number of offender encounters and the percentage of offenders who receive necessary medical care. This data can be tracked and quantified.

The DOC will be in compliance with health care provider laws and offenders will receive better continuity of care when they are released to the community. Offender medical data will be managed with integrity in a secure manner. Accessibility from health care providers to accurate data in a timely manner, and a lack of data breaches will be two indicators of success.

The DOC will be able to improve tracking of chronic care activities and repeat clinic or hospitalization visits to ensure appropriate and timely follow-up. Offenders will be better prepared to transition into Minnesota communities. Overtime use is expected to decrease.

Statutory Change(s):

Corrections

FY 2020-21 Biennial Budget Change Item

Change Item Title: Pre-Trial Assessment and Supervision

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	1,725	3,450	3,450	3,450
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,725	3,450	3,450	3,450
FTEs	6.0	12	12	12

Recommendation:

The Governor recommends \$1.725 million in FY2020 and \$3.45 million in FY2021 to the Department of Corrections (DOC) to ensure effective pre-trial supervision of offenders.

The requested funds will be used to hire staff to provide pre-trial supervision and pre-trial services. It also includes equitable funding to Community Corrections Act (CCA) counties and to counties participating in the County Probation Officer (CPO) program for the provision of similar offender supervision and services.

This request represents an increase of less than 1% to the agency's overall budget. Currently the DOC is only funded to provide post-sentencing supervision services, so a current relevant base budget is not identified.

Rationale/Background:

In May 2015, the Minnesota State Court Administrator's Office conducted a study of pre-trial detention with the following findings:

- Wide variations across the state in pre-trial detention rates, including variations by race and gender.
- 36% of defendants were held in custody up to and including their first court appearance, ranging from 18% to 68% in jurisdictions across the state.
- 27% of defendants were held in custody from their first court appearance through at least 7 days following their first appearance, ranging from 8% to 49% across the state.
- 10% of defendants were detained for the entire pre-trial process.

According to the National Institute of Corrections, pre-trial assessments and services provide an equitable approach to release and reduce reliance on jail beds. Pre-trial services reduce failure to appear and help provide for adequate supervision in the community based on risk. Without pre-trial services, offenders without the means to pay required bail are more likely to be continued in custody pending determination of guilt.

The Minnesota Judicial Branch enacted Policy 524, *Pretrial Release Evaluation*, that requires all counties to use a validated pre-trial assessment tool on all defendants charged with certain crimes under M.S. 629.74, effective December 1, 2018. The assessment must be submitted prior to the defendant's first court appearance. The tool assesses level of risk for failing to appear and probability of committing a new offense.

Pre-trial assessments would have been required for 26,000 defendants statewide in FY2017, per M.S. 629.74. Approximately 14,000 of those defendants would have been assessed as high- to medium-level, with the potential

for pre-trial supervision. The DOC is not currently funded to provide pre-trial supervision - only post-sentencing supervision.

Proposal:

The Governor recommends an increase in funding to the DOC to provide pre-trial supervision and services.

- This is a new initiative for the DOC, providing activities to support Minnesota Judicial Policy 524.
- The request provides \$459,000 (salaries \$380,000 and supplies \$79,000) in FY2020 and \$918,000 (salaries \$760,000 and supplies \$158,000) in FY2021 to staff a pre-trial supervision unit that includes 10 FTEs for corrections supervision agents, 1 supervisor FTE and 1 support staff FTE.
- The request provides \$1.044 million in FY2020 and \$2.088 million in FY2021 for pass-through funding to CCA counties that are responsible for 65% of all pre-trial cases.
- The request provides \$64,000 in FY2020 and \$128,000 in FY2021 for pass-through funding to CPO counties that are responsible for 4% of all pre-trial cases.
- The request provides \$158,000 in FY2020 and \$316,000 in FY2021 for the DOC to contract for pre-trial services, including automatic reminders of pending court hearings and services for indigent offenders.
- After the first year, the requested funding will be sufficient to complete approximately 16,000 pre-trial assessments annually, and to provide pre-trial supervision to approximately 9,000 offenders annually.
- Funding will help maintain and enhance partnerships with the Minnesota Association of Community Corrections Act Counties (MACCAC), the Minnesota Association of County Probation Officers (MACPO) and the Association of Minnesota Counties (AMC).
- Implementation activities could begin immediately, and would ensure compliance with Minnesota Judicial Policy 524.

Equity and Inclusion:

This proposal seeks to promote equity and eliminate pre-trial disparities across the state with regard to race and socioeconomic status. It will create opportunities for defendants to be released while providing supervision services that address public safety concerns and appearances for future court hearings.

The overwhelming concern is that many that held in pre-trial detention are simply unable to post/pay even the lowest amounts of bail. This results in a system where the poor remain in custody and the wealthy are released. This socioeconomic factor disproportionately impacts minorities. Impact of pre-trial detention include but are not limited to: loss of employment, loss of housing, jail overcrowding, significant financial impacts to families or the defendant, and an increased probability of conviction as many choose to enter a guilty plea simply to be released from jail.

According to the 2016 American Community Survey, Minnesota's poverty rate is 10.8%. Minnesota's poverty rates are highest for African Americans (34%), American Indians (31.4%) and Hispanics (22.2%). The poverty rate for African Americans and American Indians is nearly four times that of Caucasians (8.2%).

The implementation of a standardized, evidence-based model for pre-trial supervision that is accessible in all 87 Minnesota counties will allow for equal access under the law. Judges may be more inclined to release defendants if supervision services exist to address public safety and ensure future court appearances. Such a model will also diminish the need for bail, thus creating a more equitable system with regard to race and socioeconomic status.

Results:

This proposal represents an evidence-based practice. Once implemented, the DOC will track outcomes and measure results. The following outcome and performance measures are considered to be best practice, and may be used to determine success:

- Appearance Rate – percentage of supervised defendants who make all scheduled court appearances.

- Safety Rate – percentage of supervised defendants who are not charged with a new offense during the pre-trial stage.
- Concurrence Rate – ratio of defendants whose supervision level or detention status corresponds with their assessed risk of pre-trial misconduct.
- Success Rate – percentage of released defendants who 1) are not revoked for technical violations of the conditions of release, 2) appear for all scheduled court appearances, and 3) are not charged with a new offense during pre-trial supervision.
- Pre-trial Detainee Length of Stay – average length of stay in jail for pre-trial detainees who are eligible for pre-trial release.
- Universal Screening – percentage of defendants eligible for release that the program assesses for release eligibility.
- Recommendation Rate – percentage of time the program follows its risk assessment criteria when recommending release or detention.
- Response to Defendant Conduct – frequency of responses to compliance and non-compliance with court-ordered release conditions.

Statutory Change(s):

Not applicable.

Corrections

FY 2020-21 Biennial Budget Change Item

Change Item Title: Intensive Supervised Release

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	2,500	5,000	5,000	5,000
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,500	5,000	5,000	5,000
FTEs	9	19	19	19

Recommendation:

The Governor recommends \$2.5 million in FY2020 and \$5.0 million in FY2021 to provide intensive supervised release (ISR) supervision to offenders in the community.

The requested funds will be used to hire staff to ensure supervision caseloads do not exceed statutory requirements of 30 offenders to 2 supervision agents, to allow for two-person transports and home visits to help ensure the safety of supervision agents, to provide emergency communication equipment for supervision agents, and to provide for equitable pass-through funding to Community Corrections Act (CCA) counties.

This request represents an increase of less than 1% to the agency's overall budget, and a 5.1% increase to the combined relevant base budgets for DOC ISR and the CCA subsidy.

Rationale/Background:

Current Minnesota statutes require that all Level 3 predatory offenders be placed on ISR supervision for their entire supervision period, and further mandates ISR supervision caseloads cannot exceed 30 offenders to 2 supervision agents. Per statute, many Level 3 predatory offenders are sentenced with an additional 5-year or 10-year conditional release supervision period, or in some cases lifetime ISR supervision.

An adequate complement of ISR supervision agents, equipped with the proper communication devices, is essential to ensure the safety of our agents and of the public.

ISR supervision agents provide 24/7 supervision that includes random, unannounced home visits that are conducted during the night, weekends, and holidays on the highest risk offenders released from prison. Offenders on ISR supervision are assessed as the highest risk for violence and sexual assault, including all Level 3 sex offenders. Home visits are often in high-crime neighborhoods or sparsely populated areas where law enforcement backup is not readily available. Every region across the state has areas that are void of cell phone communication and agent location tracking via GPS, thus preventing agents from requesting emergency assistance if needed. The use of 800 MHz radios will ensure emergency communication is available.

ISR agents transport high-risk offenders in a non-secure vehicle to a designated location. At times one agent may transport multiple offenders released from a facility. Transports can be unpredictable and dangerous. Agents must try to assess living situations, medical or mental health issues, any third parties in the home, the presence of weapons and/or drugs and any other safety concerns.

Research shows there is a significant reduction in death/harm when officers are doubled up vs. alone. Additionally, 66% of violent encounters happen in the evening/night hours. ISR agents must have 50% of their visits occur during non-traditional hours (5:00 pm – 8:00 am, weekends, or holidays).

Proposal:

The Governor recommends funding to the DOC to provide additional safety measures for ISR supervision.

- This is not a new initiative, but requires additional resources for agent safety.
- The request provides \$678 million in FY2020 and \$1.356 million in FY2021 and each subsequent year to add 17 supervision agent FTEs, 1 supervisor FTE and 1 support staff FTE.
- The request provides \$234,000 in FY2020 and \$468,000 in FY2021 and each subsequent year to purchase ongoing equipment and supplies including 800 MHz radios, vehicle leases, and vehicle enhancements (security partitions in vehicles, recognition interlock, laptops).
- The request includes \$1.588 million in FY2020 and \$3.176 million in FY2021 and each subsequent for pass-through funding to CCA counties that supervise 65% of all offenders under ISR supervision.
- The DOC will maintain and enhance partnerships with the Minnesota Association of Community Corrections Act Counties (MACCAC) and the Association of Minnesota Counties (AMC).
- Implementation can begin on July 1, 2019, phasing in the hire of agents over two years.

Results:

Based on FY2018 data, the cost for having an offender on ISR is approximately \$27 per day including electronic monitoring, versus a daily operating costs of \$100.78 for adult offenders in prison.

Safe and effective offender supervision contributes to the recidivism rate, and the goal of keeping people in Minnesota safe. The recidivism rate has been relatively stable for the last several years. Results may also be measured by tracking the number of field visits and transports, and the number of ISR staff incident reports for comparison purposes. The DOC can also track numbers of threats and/or injuries to staff.

Statutory Change(s):

Not applicable.

Corrections

FY 2020-21 Biennial Budget Change Item

Change Item Title: Integrated Case Management

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	321	831	1,024	1,024
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	321	831	1,024	1,024
FTEs	6	12	12	12

Recommendation:

The Governor recommends \$321,000 in FY2020 and \$831,000 in FY2021 to the Department of Corrections (DOC) to increase the provision of integrated case management (ICM) services that are effective in reducing recidivism for high- and very high-risk offenders, improving their chances for a successful transition from prison to the community.

The requested funds will be used to provide integrated case management services to the offender population.

This request represents an increase of less than 0.2% to the total agency budget, and an approximate 24% increase to the relevant base budget for reentry services.

Rationale/Background:

ICM serves as the model for providing corrections evidence-based practices and is an effective intervention. All caseworkers have been trained in ICM practices. ICM requires skills in assessment, motivational interviewing, case planning and the use of specific cognitive-based interventions. The equivalent of 12.5 FTEs are currently deployed to provide ICM services. The DOC currently provides ICM to 12% of our high-risk population (approximately 500 offenders). The generally accepted practice for ICM is caseloads of no more than 40 offenders.

In an effort to provide ICM to more offenders, the DOC implemented continuous improvement process changes and increased the use of automation. They are also applying group case management strategies, but still need additional resources to make a real difference and establish a trend of increasing the number of offenders who receive ICM.

Proposal:

The Governor recommends an increase in funding to the DOC to increase the provision of ICM to high-risk offenders:

- This is an expansion of an existing initiative that has been proven to reduce recidivism.
- This proposal will provide \$308,000 in FY2020 and \$828,000 million in FY2021 hire 12 staff including 10 caseworker FTEs and 2 support staff FTEs. Positions will be phased in quarterly over two years.
- This proposal will provide \$13,000 in FY2020 for equipment and information technology support, and \$3,000 in FY2021 and each subsequent year for information technology support costs.
- Total costs will increase to \$1.024 million in FY2022 and each subsequent year.

- Offenders learn new ways of thinking and behaving through the use of one-on-one cognitive restructuring and motivational interviewing. Appropriate case plans include interventions and support for the offender to change high-risk behaviors.
- With this proposal the DOC will provide ICM to 420 additional high-risk offenders, while also alleviating the caseloads of general population caseworkers. We anticipate we will be able to provide ICM to 31% of offenders with a high-risk of committing a new offense upon release from prison (approximately 1,200 offenders).
- Implementation of ICM strategies, in tandem with our Transition from Prison to Community (TPC) initiative, would result in significant recidivism reductions for the offenders served.
- Partners include the Department of Justice, Council of State Governments, Community Corrections Act counties, and other criminal justice agencies.
- Funding will support the DOC mission to reduce recidivism by promoting offender change through proven strategies, and will help ensure people in Minnesota are safe.

Equity and Inclusion:

The DOC incarcerates and provides services to a very diverse offender population in terms of race, ethnicity, gender, sexual orientation, disability and veteran status; and more than 90% of them are released to diverse communities across our state.

This proposal will ensure those offenders will benefit from comprehensive case plans that will improve their chances for success in the community upon their release from prison.

Results:

This proposal will advance ICM strategies that have been proven effective in reducing recidivism rates for high-risk offenders. The recidivism rates in Minnesota have been relatively stable for the last several years. Recidivism rates are expected to improve for offenders who participate in ICM.

Statutory Change(s):

Not applicable.

Corrections

FY 2020-21 Biennial Budget Change Item

Change Item Title: Victim Notification and Juvenile Correctional Management Systems

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	844	306	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	844	306	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends one-time funding of \$844,000 in FY2020 and \$306,000 in FY2021 to the Department of Corrections (DOC) to complete the replacement of the victim notification system, and to replace or re-write the current Juvenile Correctional Management System that is approaching obsolescence.

The requested funds will be used to complete the final phase of the project to replace the DOC's previous victim notification system, and for a project to replace the existing Juvenile Correctional Management System.

This request represents an approximate increase of less than 0.2% to the total agency budget. These are one-time projects that do not currently have a relevant base budget.

Rationale/Background:

The new victim notification system, created as MnHaven, is replacing the DOC's former Minnesota CHOICE system. Phase 1 is near completion and had a purpose to eliminate security risks associated with Minnesota CHOICE and turn it off, while providing basic victim services functionality for DOC users only. Phase 2 will expand MnHaven to provide access for victims to self-register and manage their own accounts and notifications. It will also provide access to non-DOC criminal justice professionals, enabling them to provide additional victim services.

The current Juvenile Correctional Management System uses obsolete technology, does not meet security or accessibility standards, and is having significant performance issues. It is causing some performance issues with the Department's Correctional Operation Management System (COMS). A new solution will provide business functionality, performance, security, accessibility, and data integrity; as well as alignment with the technology direction for improved longevity and long-term support.

Proposal:

The Governor recommends funding for the DOC to complete two system projects including one for victim notification and one to manage juvenile corrections data.

- Completion of the victim notification system is continuation of an existing project.
- Replacement of the current Juvenile Correctional Management System is a new project necessary to avoid technology obsolescence.
- The request provides \$300,000 in FY2020 and \$100,000 in FY2021 in MN.IT costs to complete the MnHaven project.

- The request provides \$544,000 in FY2020 and \$206,000 in FY2021 to replace the Juvenile Correctional Management System.
- Both projects include payroll costs and costs for professional/technical contracted services.
- Both projects replace existing systems and will result in significant improvements in terms of accessibility, functionality, performance, integrity and security.
- The DOC and MN.IT will work collaboratively to complete the projects.
- The MnHaven project will continue and be complete in December 2020.
- The replacement of the Juvenile Correctional Management System will begin in July 2019, with completion scheduled for December 2020.

Equity and Inclusion:

The DOC provides services and maintains data on a very diverse offender population in terms of race, ethnicity, gender, sexual orientation, disability and veteran status. It is assumed the victim community is similarly diverse. Funding will ensure the continuation of victim services and maintenance of data for juvenile offenders.

IT Related Proposals:

This proposal includes information technology costs as identified in the following table (costs in excess of this request will be paid with agency operating funds):

Category	FY 2020	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025
Payroll	150	50	0	0	0	0
	188	112	0	0	0	0
Professional/Technical Contracts	450	150	0	0	0	0
	900	300	0	0	0	0
Infrastructure						
Hardware						
Software						
Training						
Enterprise Services						
Staff costs (MNIT or agency)						
Total	1,688	612	0	0	0	0
MNIT FTEs	2.25	1.5				
Agency FTEs	1.5	1.5				

Results:

The MnHaven project will securely and accurately provide victim notifications as required by state statute. It will also be a source of information for victim and community safety, and empower victims to provide input and request information based on individual needs.

The Juvenile Correctional Management System project will avoid technology obsolescence, improve security and accessibility, and resolve performance issues.

Statutory Change(s):

Not applicable.

Corrections

FY 2020-21 Biennial Budget Change Item

Change Item Title: Electronic Monitoring and Transitional Housing for High-Risk Offenders

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	1,500	1,500	1,500	1,500
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,500	1,500	1,500	1,500
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$1.5 million in FY2020 and \$1.5 million in FY2021 to the Department of Corrections (DOC) for electronic monitoring and transitional housing for high-risk offenders under community supervision.

The requested funds will be used to pay contracted vendors that provide electronic surveillance and transitional beds to high-risk offenders.

This request represents an increase of less than 0.3% to the total agency budget, and an 81% increase to the combined relevant base budgets for electronic monitoring and transitional housing contracts.

Rationale/Background:

There has been recent significant increases in the number of offenders requiring electronic monitoring, largely due to more offenders being restructured instead of being returned to prison. Overall, the use of electronic monitoring increased by 78% in FY2017. The cost for the service for the monitoring devices has also increased.

The number of offenders requiring transitional housing has increased. Many are Level 3 sex offenders who meet the criteria to be placed in a transitional bed, and would otherwise be homeless, which could result in the supervision agent's inability to provide intensive supervised release (ISR) supervision.

Proposal:

The Governor recommends an increase in funding to the DOC sufficient to provide an adequate level of electronic surveillance and transitional housing for high-risk offenders.

- This is not a new initiative.
- This request will provide \$1 million each year for electronic monitoring.
- This request will provide \$500,000 each year for transitional housing.
- This request will enable the DOC to maintain the level of service necessary for high-risk offenders under community supervision.
- Lack of funding may result in high-risk offenders being homeless, and/or being placed on supervision without electronic monitoring devices.
- Services will be provided via professional/technical contracts.

Equity and Inclusion:

This proposal seeks to promote equity across the state with regard to race and socioeconomic status. It will eliminate barriers which disproportionately impact minority populations by providing stable housing. Funding will address public safety concerns by providing low-income, high-risk offenders with stable housing.

Results:

Based on FY2018 data, the cost for having an offender on ISR is approximately \$27 per day including electronic monitoring, versus a daily operating cost of \$100.78 for adult offenders in prison.

In FY2017 there was a total of 1,400 high-risk offenders on electronic surveillance, for a total of 84,316 days, representing a 67% increase over the previous year. The most common offense types were sex crimes (35%), driving while impaired (19%), drug offenses (8%), and assault (8%). Funding will ensure electronic monitoring for high-risk offenders will be continued.

There was a total of 1,048 transitional housing placements for high-risk offenders from 2014 to 2017. Of those, 577 left with an approved residence and 636 left with employment. Funding will ensure the trend continues or improves.

Statutory Change(s):

Not applicable.

Corrections

FY 2020-21 Biennial Budget Change Item

Change Item Title: Corrections Opioid Treatment Provisions

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Opioid Stewardship Fund				
Expenditures	965	965	965	965
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	965	965	965	965
FTEs	4	4	4	4

Recommendation:

The Governor recommends \$965,000 in FY2020 and \$965,000 in FY2021 to expand access to opioid treatment and services for offenders, including those who are being released to the community.

The requested funds will be used to provide comprehensive pre-release planning services for offenders with substance use disorders, and to establish a Medication Assisted Treatment (MAT) program within the department's existing substance abuse treatment programs.

This proposal is part of a package of proposals recommended by the Governor to address rising rates of opioid use. The package of proposals is funded by new fees on opioid manufacturers, wholesalers, and entities that handle controlled substances.

Rationale/Background:

An increasing number of offenders are coming to prison with an opiate use disorder. The trend is expected to continue and will impact all Department of Corrections (DOC) correctional facilities. Access to appropriate care and treatment in prison, continuity of care, and connections to community-based treatment upon release are all critical to an offender's success and relapse prevention.

After participating in the National Governors' Association's Summit on Opioids, the DOC created an action plan to expand access to opioid treatment for justice-involved people with goals to reduce recidivism, enhance treatment, provide continuity of care upon release, and reduce the risk of overdose deaths.

Proposal:

The Governor recommends funding from the Opioid Stewardship Fund for the DOC to enhance opioid treatment and recovery programs:

- This is a new initiative that will integrate with other statewide initiatives.
- This proposal will provide \$365,000 each year to fund three clinical program therapist FTEs and one clinical program director FTE to provide pre-release planning services, connect offenders with community-based services upon release, and to follow up with offenders to track success.
- The proposal will provide \$600,000 each year to fund an MAT program that will provide for medication for offenders with opiate use disorders, with a focus on those with the greatest need.
- Implementation can occur within six months.

Equity and Inclusion:

The DOC provides chemical dependency services to a very diverse offender population in terms of race, ethnicity, gender, sexual orientation, disability and veteran status. Funding will support the expansion of these services specific to offenders with opiate use disorders.

Results:

Evidence from other states and the Federal Bureau of Prisons shows the use of MAT programs is successful in helping people recover from their addiction to opioids. Evidence shows effective release planning services improve an offender's chances for success. Primary goals of this proposal are to reduce recidivism, improve recovery rates, reduce the risk of overdose deaths, provide for public safety and help ensure people in Minnesota are safe.

Corrections

FY 2020-21 Biennial Budget Change Item

Change Item Title: Reducing Recidivism through Connecting Families and Re-Entry Programs

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	1,000	1,000	1,000	1,000
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,000	1,000	1,000	1,000
FTEs	3	3	3	3

Recommendation:

The Governor recommends \$1 million in FY2020 and \$1 million in FY2021 to strengthen family connections for incarcerated parents and to support successful reentry for incarcerated American Indians.

The funds will be used to support three strategies:

1. Eliminate transportation barriers for children of incarcerated parents.
2. Provide culturally responsive programming for American Indian offenders returning to the community.
3. Establish a parenting program to improve parenting skills, and reduce recidivism and substance abuse for offenders who participate.

This request represents a minimal increase to the total agency budget. These are new initiatives for the Department of Corrections (DOC), so there is not a relevant funding base.

Rationale/Background:

DOC research shows that offenders who receive pro-social visits while incarcerated are less likely to return to prison. This proposal will increase the number of in-person visits for higher risk offenders by reducing or eliminating barriers associated with visiting for approved family members.

While American Indian people make up less than two percent of Minnesota's population, they are disproportionately represented in Minnesota's prisons. We seek to improve and expand culturally responsive services to American Indian people to provide support, deepen engagement, and assist with reentry and transition planning. Minnesota Statute 241.80 established the American Indian Counseling Program to, in part, provide culturally relevant counseling services that will aid in rehabilitation and aid community reentry.

The Parenting Inside Out Skills training program is an evidence-based, cognitive-behavioral program created for incarcerated parents. It has been reviewed by the Substance Abuse and Mental Health Services Administration (SAMHSA) and is now included on the National Registry of Evidence-based Programs and Practices (NERPP). The program has shown that parents who participate demonstrate increased parenting skills and decreased rates of recidivism and substance abuse. We proposed implementation of this program in three correctional facilities.

Proposal:

The Governor recommends an increase in funding to the DOC to strengthen family connections for incarcerated parents, and to expand culturally specific transition services for adult American Indian offenders:

- These are new initiatives for the DOC.

- This request will provide \$150,000 in grant funds each year to non-profit organizations to provide transportation services to children of incarcerated parents at up to three correctional facilities.
- This request will provide \$425,000 in grant funds each year to community-based providers to deliver culturally specific reintegration services for adult American Indian offenders. Programming will begin while offenders are incarcerated and continue into their terms of supervised release, creating bridges to community-based post-release programming.
- This request will provide \$425,000 to improve parenting skills at four correctional facilities. This includes three FTEs to implement *The Parenting Inside Out Skills* training program in three correctional facilities. The program will be replicated as prescribed by the SAMHSA.
- This proposal will enable the DOC to expand evidence-based programming that is proven to reduce recidivism. With funding, we can proceed with a July 1, 2019 implementation schedule.
- Funding will support the DOC mission to reduce recidivism by promoting offender change through proven strategies, and will help ensure people in Minnesota are safe.

Diversity and Inclusion:

The DOC incarcerates and provides services to a very diverse offender population in terms of race, ethnicity, gender, sexual orientation, disability and veteran status; and more than 90 percent of them are released to diverse communities across our state.

This proposal will ensure offenders who are parents will benefit from programming that will increase their parenting skills and improve their chances for success upon their release from prison. It will also provide additional services to the American Indian offender population through the delivery of culturally responsive and evidence-based programming, with a goal of reducing recidivism and ensuring success for those offenders.

Results:

It is expected this proposal will result in the facilitation of approximately 1,000 additional parent-child visits each year. The number of transports and distance travelled will be tracked and reported. Data regarding offender recidivism will also be tracked in accordance with protocols established in previous visiting studies.

Culturally responsive programs will be identified and measures will be established. Results will be tracked and reported.

Parenting programs will target offenders nearing release, with the final number of participants determined by caseload requirements for program staff. It may take several years to establish a baseline, but data regarding offender recidivism will be appropriately tracked.

Statutory Change(s):

Not applicable.

Program: Correctional Institutionsdoc.state.mn.us**AT A GLANCE**

- 10 correctional institutions across the state
- More than 3,600 employees
- 10,000 adults and juveniles in correctional institutions
- 75% of released offenders do not return to prison for a new convictions

PURPOSE & CONTEXT

The correctional institutions program protects the public through the safe and secure incarceration of adult and juvenile offenders. We promote offender change by providing treatment, educational programming and employment opportunities that are proven to help offenders successfully transition from prison to the community. We provide direct services to 10,000 offenders in the custody and care of the commissioner of corrections. More than 16,000 offenders are served through the cycle of intake and release each year. Our activities help ensure **people in Minnesota are safe**.

SERVICES PROVIDED

We accomplish our purpose through:

- The provision of food, clothing, secure housing and adequate living conditions;
- The provision of medical care and behavioral health services;
- The use of policy management, internal controls, incident command responses, security rounds, preventive maintenance, safety inspections and technology systems to help ensure a safe work/living environment;
- The use of a classification system and risk assessments that best determine offender placement and programming priorities;
- The provision of research-based treatment, education and work programming;
- The use of research-based transition services and comprehensive release planning; and
- The appropriate use of disciplinary sanctions and investigations of offender criminal activity.

Specific services provided by this program include health care, treatment, education and work programming, population management, classification, transportation, food services, offender property management, workplace safety, physical plant maintenance, asset preservation, criminal investigation, intelligence gathering and fugitive apprehension. We also manage MINNCOR as a self-sufficient prison industries operation that provides offenders with work and vocational programming.

RESULTS

Quality: Escapes from secure facilities

Program: Community Services

doc.state.mn.us

AT A GLANCE

- DOC supervises approximately 20,000 offenders in the community including
 - Adult felony supervision in 53 counties
 - Adult misdemeanor and juvenile probation in 28 counties
 - Intensive supervised release (ISR) supervision in 75 counties
 - Intensive supervision to Challenge Incarceration Program (CIP) offenders in 82 counties
- County correctional agencies supervise more than 90,000 offenders
- Risk assessment and community notification of more than 9,400 sex offenders
- Inspect and license 236 local and out-of-state facilities
- State and county offender work crews benefit local communities

PURPOSE & CONTEXT

The community services program protects the public through offender management and supervision throughout the state, working to ensure compliance with conditions of supervision. We promote offender change by providing comprehensive reentry programming that helps offenders successfully transition back into the community. Our customers include more than 111,000 offenders on community supervision statewide, their victims, the courts, and local law enforcement agencies. Our activities help ensure **people in Minnesota are safe**. The program is funded primarily by the general fund, with approximately 60% of the budget designated as pass-through to help fund county/community-based correctional services.

SERVICES PROVIDED

To accomplish our purpose, we:

- Provide investigative services, reports and recommendation to the courts and the Hearings and Release Unit;
- Assess the risk levels and need of offenders, and place them on proper supervision caseloads;
- Provide pre-release classes and assist released offenders with housing, employment and access to support services;
- Promote positive change in offender behavior by incorporating research-based strategies including cognitive-based programming and motivational interviewing;
- Collaborate with local agencies and providers to help released offenders with mental health, domestic violence prevention, chemical dependency treatment, housing and employment needs;
- Collect and distribute address and employment information for predatory offenders requiring community notification and participate in community notification meetings;
- Refer potential civil commitment cases to county attorneys;
- Use community-based programs (Sentencing to Service crews, Institution Community Work Crews, Challenge Incarceration Programs and work release programming) to manage lower-risk offenders, reduce the need for prison beds, respond to natural disasters and complete community work projects;
- Provide services that ensure the rights and needs of victims are met; and
- Inspect and license local correctional facilities and certify sex offender treatment programs.

Other specific services provided by this program include offender supervision contracts, electronic and GPS monitoring, sex offender treatment, curfew enforcement, compliance with mandatory work or school conditions, random drug testing, enforcement of financial restitution orders and due process offender hearings. We manage pass-through and other funds appropriated for subsidies, grants, contracts and reimbursements. We administer

offender interstate compacts that allow for the controlled movement of offenders between states. We also provide victim notification and referral services, community training, victim impact awareness, victim-offender dialogue coordination, apology letter assistance and representation on the end-of-confinement review committee responsible for assigning risk levels to predatory offenders.

RESULTS

Result: Three-year adult recidivism rates

Percentage of offenders convicted of a new felony following release from prison

Quality: Percentage of restitution paid by discharge

Quantity: Number of Sentence To Service (STS) offender hours worked (in millions)

Quality: Number of STS Jail Days Saved

[The DOC's most recent performance report is located at this link.](#)

Minnesota Statutes 241 to 244 (<https://www.revisor.mn.gov/statutes/part/CORRECTIONS>) provide the legal authority for the DOC.

Program: Operations Support

doc.state.mn.us

AT A GLANCE

- Provision of services to
 - More than 4,300 employees
 - More than 30,000 offenders
- Employees represented by nine bargaining units/plans
- Employees are located at central office and across the state at 10 correctional institutions and 44 field offices
- Centralized/regionalized services
- Shared management

PURPOSE & CONTEXT

The operations support program formulates the mission and major policies for the Department of Corrections (DOC). We provide leadership and support services that assist all programs in achieving the agency's mission. Our customers include all DOC employees, offenders, victims, state and local agencies, the Legislature and citizens. We partner with and provide limited support services to the Minnesota Sentencing Guidelines Commission and the Bureau of Medication Services. Our activities provide the necessary support to help ensure **people in Minnesota are safe**.

SERVICES PROVIDED

To accomplish our purpose, we:

- Promote the mission and values of the agency through executive leadership, policy development, strategic planning, implementing evidence-based practices, and internal and external communications;
- Provide statutorily required services in the areas of finance, human resources, legal services, offender records administration and employee development;
- Use best and current practices to manage information technology, planning and performance, compliance functions, and diversity and inclusion activities;
- Hire and maintain a high-quality and diverse workforce;
- Safeguard the state's assets and comply with federal and state regulations and agency policies through compliance with established procedures and internal controls; and
- Manage offender information through integrated systems in partnership with the courts, state agencies, and state and local law enforcement agencies.

Other specific services provided by this program include budget management, financial transactions, financial reporting and analysis, procurement and inventory functions, offender banking services, internal audit, asset and property management, recruitment and selection, job classification, salary and benefit administration, labor contract negotiation, pre-service and in-service training, mail processing, offender records management, legal representation, and responding to public data and media requests. We partner with MN.IT and other stakeholders to ensure continual operation and/or accessibility to internal and external technology systems and to provide help-desk support. Our planning and performance unit conducts research and evaluation projects, prepares legislative reports, coordinates implementation of evidence-based practices, coordinates strategic planning activities and projects prison population. We also develop and update business continuity and risk management plans, and work to maintain accreditation by the American Corrections Association at all locations.

RESULTS

Result: Three-year adult recidivism rates

Percentage of offenders convicted of a new felony following release from prison

Result: Workers' compensation claim incident rate per 100 full-time employees

Quality: Percentage of restitution paid by discharge

[The DOC's most recent performance report is located at this link.](#)

Minnesota Statutes 241 to 244 (<https://www.revisor.mn.gov/statutes/part/CORRECTIONS>) provide the legal authority for the DOC.

Narrative

Federal funding represents less than one percent of the DOC's total budget.

The DOC continuously works to identify and apply for competitive grants that align with our mission. Ongoing formula grants and competitive grants primarily support juvenile and adult education, the cost of incarcerating illegal aliens convicted of crimes in Minnesota, substance abuse treatment, offender reentry services and collaborative efforts to reduce recidivism.

We have continued several grant-funded activities beyond the expiration date of the grant, sometimes seeking funding through the legislative process (i.e. chemical dependency treatment, release planning for mentally ill offenders).

Current data indicates federal grant funding will remain relatively static within the DOC overall. In general estimates are based on current awards throughout the term of the grant, or as ongoing where applicable.

AT A GLANCE

- As of August 2018, there were 33,278 practitioners and 5,304 establishments licensed in Minnesota
- The Board issued 13,847 total licenses, including initial licenses and license renewals, in fiscal year 2018
- The Board performed 3,821 salon and 66 school inspections in fiscal year 2018
- 165 investigations completed in fiscal year 2018 with 141 investigations open at year close

PURPOSE

The Board of Cosmetology (“Board”) credentials, licenses, inspects, disciplines, and educates Minnesotans who provide cosmetic hair, nail, or skin care services and education. Businesses and consumers rely on the Board for essential functions related to the safe practice of cosmetology. The Board’s mission is to constantly strive to serve and care for our licensees, applicants, and the public by being committed to public protection, superior service, excellence, and continuous improvement.

As part of the Board’s contribution to statewide outcomes:

- The Board **promotes a thriving economy** through simplifying licensing processes to promote faster business growth and entry into the workforce.
- Through inspections, curriculum review, and education, the Board encourages licensees to **have the education and skills needed to achieve their goals**.
- By licensing practitioners to provide safe services to avoid injury and disease and inspecting businesses regularly to ensure compliance with safety standards, the Board aims to keep **all people in Minnesota safe**.
- The Board constantly evaluates and seeks improvement on internal processes to ensure **efficient and accountable government services**.

BUDGET

**Spending by Category
FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

The Board receives a direct appropriation from the general fund to cover operational expenses and does not receive funding from any other source. All receipts collected by the Board are deposited into the general fund.

STRATEGIES

The Board promotes a thriving economy and business growth by:

- Assisting salon and school owners and license applicants through in-person, email, and telephone correspondence in answering questions related to the licensing process and other general topics, which results in more successful licensees.
- Educating licensees on proper infection control practices, resulting in better and safer services.
- Implementing only reasonable, rational regulation with the aim of reducing barriers that are unnecessary for public protection. This promotes continued participation in the cosmetology industry and Minnesota economy.

The Board encourages Minnesotans to have the education and skills needed to achieve their goals by:

- Educating licensees through inspections and outreach to promote best practices.
- Requiring continuing education for license renewal.
- Continuously updating licensing exams to ensure minimum competency is tested for and met by all individuals receiving licenses.
- Initiating a school rules overhaul to evaluate each requirement of licensed cosmetology schools, their curricula, and their physical requirements to ensure only necessary requirements remain.
- Personally working with individuals and businesses facing non-compliance to improve their circumstances and provide safer, healthier, and more successful services.

The Board strives to protect Minnesotans' safety through:

- Only issuing licenses to qualified applicants.
- Routine inspections of salons and schools to ensure safety, infection control, and education standards are met.
- Public availability of salon and school inspection reports, license status, and formal disciplinary action to help consumers make informed decisions.
- Reaching voluntary resolution of violations and offering remedial education when necessary to ensure licensing and safety standards are met.
- Routinely updating cosmetology laws and rules to align with appropriate and effective national standards.

The Board promotes efficient and accountable government services by:

- Actively promoting participation in rulemaking, events, and work groups, which encourages individuals to remain active and engaged in Board activity and accountability.
- Credentialing and issuing licenses to qualified applicants within 15 business days or less.
- Utilizing an optional expedited process for qualified applicants to become licensed within 5 business days.
- Maintaining a standard that all general inquiries are responded to within 1 business day or less.
- Providing educational materials in conjunction with inspections to improve awareness and results.
- Using instant license account management and real-time online license lookup and renewal to provide transparency and efficiency to licensees and the public.

Recommendation:

The Governor recommends additional funding of \$111 thousand in FY 2020 and \$142 thousand each year thereafter to maintain the current level of service delivery at the Board of Cosmetologist Examiners.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related cost increases. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

The Board is responsible to license, inspect, and regulate approximately 38,000 licensees, 5,000 salons, and 30 schools. Over the past two years, staff have helped create positive trends including, but not limited to, the following:

- The average application processing time was reduced by 79%, from 14 to 3 business days (Q2, 2016; Q2, 2018).
- The average number of inspections per quarter increased by 181%, from 515 to 1445 inspections (Q2, 2016; Q2, 2018).
- The number of complaints investigated per year increased by 139%, from 69 (FY 2016) to 165 (FY 2018).

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the Board, this funding will cover known employee compensation growth, one-time retirement costs, and other administrative costs.

Equity and Inclusion:

This requested operational increase will support the Board's effort to create an equitable and inclusive environment for employees, licensees, and the public. The Board and its staff strive to reflect the licensees it serves in terms of race, gender, age, and other demographic data while complying with state standards and initiatives.

IT Related Proposals:

N/A

Results:

Appropriate funding will contribute to the Board's positive trends for licensees and the public. In the last two years, the agency has become demonstrably more efficient as is shown by the measures listed below.

AT A GLANCE

The 19 judges serving on the Court of Appeals hear cases in three judge panels in courthouses throughout the state. In 2017, 1,973 cases were filed with the Court of Appeals.

Court of Appeals decisions are the final ruling in about 95 percent of the appeals filed each year. Only about five percent of the Court's dispositions are accepted by the Minnesota Supreme Court for further review.

The Court of Appeals serves all Minnesota citizens.

PURPOSE

The Minnesota Court of Appeals provides the citizens of Minnesota with prompt and deliberate review of all final decisions of the trial courts, state agencies and local governments.

The Court of Appeals has jurisdiction over all final decisions of the district courts, except first degree murder convictions, which are appealed directly to the Supreme Court. The Court of Appeals also has jurisdiction to review certain decisions of administrative agencies and local governments.

The adjudicative function of the Court of Appeals supports the following statewide outcomes:

- **Strong and stable families and communities;**
- **People in Minnesota are safe; and**
- **Efficient and accountable government services.**

BUDGET

Source: Budget Planning & Analysis System (BPAS)

Source: Consolidated Fund Statement

The Court of Appeals FY17 expenditures were \$12,546,000. The budget is funded 100% through the state general fund.

STRATEGIES

The mission of the Judicial Branch is *“To provide justice through a system that assures equal access for the fair and timely resolution of cases and controversies.”* The Court of Appeals conducts its functions in support of three strategic goals to deliver its mission and to support the statewide outcomes of **promoting strong families and communities, insuring people in Minnesota are safe and providing efficient and accountable government services:**

1. Access to Justice – Ensuring the justice system is open, affordable, effective and accountable to the people it serves.
2. Administration of Justice for Effective Results – Working across branches of government and with other justice system stakeholders to improve outcomes for and the delivery of services for children, families, and alcohol and other addicted offenders who come to its courts.
3. Public Trust, Accountability, and Impartiality – Through education, outreach to diverse communities and a commitment to effective and efficient customer service and accountability, improving citizens’ understanding of and confidence in the Third Branch of government.

As part of the court’s effort to expedite justice and to make access to the appellate system less burdensome and expensive, the court’s 19 judges sit in three-judge panels and travel to locations throughout Minnesota to hear oral arguments.

By law, the Court must issue a decision within 90 days after oral arguments. This deadline is the shortest imposed on any appellate court in the nation. The Court expedites decisions on child protection cases, child custody cases, mental health commitments and other requested matters.

The Court of Appeals issues a published opinion, unpublished opinion, or order opinion on each case it considers on the merits.

RESULTS

It is the policy of the Minnesota Judicial Branch to establish core performance goals and to monitor key results that measure progress toward meeting these goals in order to ensure accountability of the Branch, improve overall operations of the court and enhance the public’s trust and confidence in the Judiciary. Throughout the year the Court of Appeals reviews performance measure results. This review is shared with the Judicial Council (the Branch’s governing body) twice a year.

The Court of Appeals has adopted the American Bar Association (ABA) standards for intermediate appellate courts, which measure cases from beginning (filing) to end (disposition). The goals are to have 75% of the cases disposed within 290 days of filing and 90% of cases disposed within 365 days of filing.

Court of Appeals Cases Disposed Within 290 Days of Filing, 2015 - 2017

In 2017, the Court of Appeals met its goal of disposing 75% of all cases within 290 days, up from 72% in FY2016.

Court of Appeals Percentage of Cases Disposed Within 290 Days of Filing**Goal = 75% of Cases**

	2017		2016		2015	
	# of cases	% of cases meeting objective	# of cases	% of cases meeting objective	# of cases	% of cases meeting objective
Civil	985	91%	999	89%	1,176	85%

Recommendation:

The Governor recommends funding for this request from the Court of Appeals, with the exception that the compensation increases are funded at 3% each year.

The Judicial Branch seeks \$1,226,000 in the FY2020-21 biennium to increase the compensation of Court of Appeals judges by 3.5% each year of the biennium, provide a 3.5% compensation pool each year for employees, and to fund unavoidable health insurance premium increases. The request represents a 4.9% increase in the Court of Appeals biennial base budget. The request maintains the current complement of employees.

Rationale/Background:

In order for the Judicial Branch to continue driving innovation in our court system and improve services to Minnesotans, the Judicial Branch needs to retain and attract skilled and knowledgeable employees and judges who can maintain and operate a modern, efficient, and technology-based court system. However, the Judicial Branch faces two significant challenges:

- Following a six year salary freeze, which made it possible to preserve essential court functions while managing difficult budget cuts and freezes between FY2008 and FY2013, the Judicial Branch has made concerted efforts to improve the competitiveness of the Judicial Branch salary structure. To ensure the salary structure supports a competent workforce, and to not fall below market in the future, the Branch must continue to keep pace with public-sector market competitors. Retaining a skilled and knowledgeable workforce is important to maintain a technology-based court. Judges in some counties make less than the county attorneys who appear before them, and, in some cases even less than the assistant county attorneys.
- The second workforce challenge is a significant retirement wave among both employees and judges. Nearly one-third of current Judicial Branch staff will be 65 years old or older in the next 10 years. In the last two years, 49 judge positions have been subject to the appointment/election process — 15% of all judges in the state. By 2020, at least 37% of all judges that were on the Bench in 2015 will have either retired, or will have turned 65 years old.

This incredible loss of experience and talent is especially concerning when paired with a salary structure that must remain competitive for the Judicial Branch to compete for workers with the necessary skills.

The Court of Appeals also requests funding for unavoidable health insurance increases. Health insurance premiums are estimated to increase by 5.63% in 2020 and 5.62% in 2021. The Judicial Branch does not negotiate its own insurance agreements – it participates in the general plan negotiated by Minnesota Management and

Budget. The Judicial Branch cannot absorb the increased employer insurance contribution costs and would need to divert funding from court functions to pay for the increases without additional funding.

Proposal:

This change level request is not a new initiative. The Judicial Branch's FY2020-21 biennial budget request seeks funding to increase employee and judge salaries, which will help ensure that the Judicial Branch will be ready to respond to this retirement wave, while maintaining the caliber of workforce needed to continue driving innovation within the court system.

In addition, the request for funding unavoidable health insurance increases will hold court services harmless from rising insurance costs for Judicial Branch judges and employees.

Equity and Inclusion:

- The change level request does not directly impact any Racial and Ethnic groups.
- The change level request is not aimed at reducing or eliminating any disparities for Racial and Ethnic groups.
- There are no potential positive or negative impacts on the identified groups.
- The change level request will enable the Judicial Branch to continue efforts to attract and retain skilled and knowledgeable employees and judges who can maintain and operate a modern, efficient, and technology-based court system. In FY17, the Branch implemented a formal pay-for-performance structure for unrepresented staff and prioritized pay-for-performance in collective bargaining, ensuring that all employee increases are based on performance. These pay-for-performance structures recognize exemplary performance and serve as performance accountability mechanisms.

Results:

This request is sought to support the core mission and services of the Court of Appeals and to allow the Court to continue to undertake initiatives designed to increase efficiency, reduce costs, and improve public services.

Minnesotans bring their most important and complex matters to the courts for resolution. Judges and staff work every day to help the people resolve these disputes. At the same time staff and judges are driving major innovation within the court system. Their innovations are improving service to the public and creating new efficiencies throughout the justice system. It is critically important that the Judicial Branch continue to retain and attract a workforce that builds on this innovation.

AT A GLANCE

- Regulates over 17,400 dentists, dental therapists, dental hygienists, and dental assistants
- Over 700 new licenses issued each year
- We investigate nearly 200 complaints each year
- Requirements for continuing education are set
- Conducts audits for compliance
- Maintains a registry of 150 dental laboratories
- Maintains a registry of dental professional firms
- Nationally and internationally recognized for innovation; including being the first state to license dental therapists and our licensing path for internationally trained dentists and specialists

PURPOSE

The mission of the Minnesota Board of Dentistry is to promote and protect public health and safety and ensure that every licensed dental professional practicing in the state meets the requirements for safe, competent, and ethical practice.

We accomplish our mission of public protection through:

- establishing initial licensure standards (education and examinations)
- continued competence (professional development) standards, and
- enforcing regulations and responding to complaints
- providing resources and education to students and licensees, and
- providing timely and relevant information to licensees via communication outlets

By establishing high standards for licensure and enforcing those standards, we contribute to the statewide outcomes to ensure:

- **All Minnesotans have optimal health**
- **All Minnesotans are receiving safe and quality dental care**
- **The agency provides efficient and accountable government services**

BUDGET

Source: Budget Planning & Analysis System (BPAS)

Source: Consolidated Fund Statement

The Board is funded by licensure fees and receives no general fund dollars. Minnesota Statutes section 214.06, subdivision 1(a) compels the Board to collect fees in the amount sufficient to cover direct and indirect expenditures. Funds are deposited as non-dedicated revenue into the state government special revenue fund. From this fund, the Board receives a direct appropriation to pay for agency expenses such as salaries, rent, equipment, professional technical experts, inspection processes, and other operating expenditures. It also pays statewide indirect costs through an open appropriation.

In addition to Board operations, licensure fees fund activities that support multiple boards and/or other agencies. Some of these are: the Administrative Services Unit (inter-board); Health Professionals Services Program (inter-board); the HIV, HBV, and HCV Prevention Program (Department of Health); Prescription Monitoring Program (Pharmacy Board); Office of the Attorney General for legal services; Criminal Background Check Program (inter-board); and the Voluntary Healthcare Provider Program (inter-board).

STRATEGIES

The Board accomplishes its mission through services that include: establishing the educational, examination and other qualification standards for initial licensure as dentists, dental hygienists, dental therapists, and dental assistants; determining requirements for license renewal, such as professional development (continuing education); accepting, investigating, and resolving complaints regarding licensed dental professionals and unlicensed practice; infection control and anesthesia inspections; tracking compliance of licensees who are under corrective or disciplinary action of the Board; registering professional firms; disseminating public information; and engaging in policy initiatives to ensure that statutes and rules regulating dental professions remain relevant.

The Board achieves its mission by continuous learning and engagement with dental professionals, dental students, and dental professional educational institutions. The Board strives to address complaints in a timely and efficient manner. The Board continues to look for new methods of communication to engage the public in what we do and how we work to ensure safe dental care is provided to the citizens of Minnesota. The Board has implemented an engagement plan to engage the public and professionals. The Board maintain consistency, integrity, and understanding of our licensing process by providing transparency in our requirements for education and consistency in the application and criminal background check processes. These support the process of candidate integrity during licensing and furthers our mission to protect the public by ensuring that Minnesota citizens receive quality dental health care from competent dental health care professionals. We are working with information technology to improve the quality and quantity measures for licensing and the complaint/ compliance

process. We are reducing the length of time spent for complaint resolution. We work with all our testing agencies to ensure the integrity of the dental and allied dental professional licensure process. We have been able to lower our costs per licensee by employing paperless renewal methods, electronic notifications and reduce postage costs. We continue to look for methods to streamline operations. We have primarily gone paperless to reduce costs and aid in efficiency.

RESULTS

The Board continues to stay current on expectations, opportunities and standards for regulating dental professionals. We have become more effective and efficient in the manner in which we process complaints. We have improved our licensing procedures while maintaining high standards and keeping operating costs low.

Dentistry, Board of

FY 2020-21 Biennial Budget Change Item

Change Item Title: New Licensing Management Database System

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	50	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	50	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$50,000 as a one-time increase in FY2020 in order to deploy a new licensing management database system for our agency.

Rationale/Background:

The current licensing management system does not meet ongoing needs for tracking, license management, complaint management, and professional development management. A new system would allow for ease of use, report capabilities, and certain query functions for which the current system does not allow. Currently we are not tracking the time from initial license receipt to the issue date in our database. This is an important measure and we would like to track these metrics going forward. The current system does not allow for efficiencies such as various accurate tracking measures that can drive operational decision-making.

Proposal:

The Board would use the additional appropriation toward a new database in FY2020. This is a new initiative and would not involve the current database, except for the conversion of data from the current product to another. An improved database supports our plan to increase our current level of service by processing applications more efficiently and providing more user-friendly, accurate aggregate data and reports to the public, including outside stakeholder entities. The increase in administrative and programmatic capacity will create increased efficiency in the processing response time for initial applications. A new database would support tracking of the various application stages, such as the criminal background check process, and other requirements for initial licensure. It will also allow us to better organize single source data such as testing results and academic information. The new database will also focus on more accurate and efficient tracking of the complaint and discipline process. This includes compliance tracking for licenses under corrective action or discipline. Database improvements will further reduce any manual process and align with our strategic goal of a paperless environment. A paperless environment helps us reduce costs per licensee by reducing administrative time and postage costs.

In general, the process from conversion to implementation is a minimum of 6 months. The plan would be to begin planning in July 2019 and proceed to begin conversion in January 2020. We have the funding to support ongoing maintenance and support for a new system, as we are currently supporting an annual contract for support for our database software.

Equity and Inclusion:

The Board does not discriminate on the basis of race, ethnicity, gender, sexual orientation, or disability. The positive impact of this change will be to continue to provide services for all people of the State of Minnesota without discrimination.

IT Related Proposals:

<i>Category</i>	<i>FY 2020</i>	<i>FY 2021</i>	<i>FY 2022</i>	<i>FY 2023</i>	<i>FY 2024</i>	<i>FY 2025</i>
Payroll						
Professional/Technical Contracts	\$50,000					
Infrastructure						
Hardware						
Software						
Training						
Enterprise Services						
Staff costs (MN.IT or agency)						
Total	\$50,000					
MN.IT FTEs						
Agency FTEs						

Results:

Time to initial license issue will be a good indicator of efficiency in the license management once we can deploy a new system. Another indicator is time to complaint resolution and timing of the various steps involved in the complaint process. The cost per licensee measure may decrease with the deployment of a new system, as the cost range that we are seeking is less than our current system. We will focus on continued improvement on our current performance measures:

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>

Recommendation:

The Governor recommends adding an Emeritus Inactive and Active License option for all licensed dental professionals. This includes dentists, dental therapists, dental hygienists, and dental assistants licensed in the state of Minnesota.

Rationale/Background:

Many other licensing agencies issue Emeritus (inactive) licensure. This license type is not a license to practice, rather it represents the ending of a licensee's clinical (licensed activities) career in good standing. This will allow many licensees that would otherwise voluntarily terminate their license to pay a one-time fee of \$50.00 and be considered for Emeritus licensure. The licensee cannot be under disciplinary action. There would not be an ongoing cost for this licensure.

The Emeritus active license would be a license to practice in a limited capacity and allow individuals that want to retire from dentistry the opportunity to consult with programs and educational institutions, provide pro-bono care and supervise other allied dental professionals, whether in collaborative settings or in limited practice settings. There would be an ongoing fee for this licensure but it is reduced by half compared to traditional license renewals.

Proposal:

This is a new program and the graph below represents revenue estimates for the new license types. The Board estimates an initial fee of \$5,000 to perform a database project for initial processing and renewals for the new license types. The Board estimates \$3,000 for printing the license certificates in FY20. The Board estimates \$5,000 each year thereafter for certificate printing in FY21 and FY22.

Description	Current Fee	Fee Amount	Number Paying	FY 2020 Revenue Estimate	FY 2021 Revenue Estimate
Emeritus Inactive License Fee (All licensees)	\$0	\$50 – lifetime – one time	70	\$3,500.00	\$3,500.00
Emeritus Active License Fee – Dentistry	\$0	\$212	25	\$5,300.00	\$5,300.00
Emeritus Active License Fee – Dental Hygiene	\$0	\$75	30	\$2,250.00	\$2,250.00

Description	Current Fee	Fee Amount	Number Paying	FY 2020 Revenue Estimate	FY 2021 Revenue Estimate
Emeritus Active License Fee – Dental Assisting	\$0	\$55	20	\$1,100.00	\$1,100.00
		Totals	145	\$12,150.00	\$12,150.00

Equity and Inclusion:

The Board does not discriminate on the basis of race, ethnicity, gender, sexual orientation, or disability. The positive impact of this change will be to provide services for all people of the State of Minnesota without discrimination. The nature of the impact would be in relation to keeping more individuals in the workforce, even in a limited capacity, to increase access to patients, specifically underserved individuals that receive pro-bono, volunteer dental services. This can reduce dental disease disparities for the patients served. The proposed changes will not create a large amount of income, but the license fees attached to each will support the sustainability and ongoing administration of processing and issuing the license certificates.

Results:

This is a new initiative and there are no current performance measures in this area. The current amount of voluntary license terminations per year is around 200-250. The goal of this new initiative is to encourage licensees to obtain an emeritus active or inactive license in lieu of voluntarily terminating their license. This could allow individuals to remain in a limited active capacity even after they retire from the primary practice or setting in which they practiced their profession. This could show a positive impact on access.

Statutory Change(s):

Proposing coding for new law in Minnesota Statutes, section 150A.06, subdivision 10 is created to read:

Subd.10 Emeritus Inactive License.

Any dental professional duly licensed to practice dentistry, dental therapy, dental hygiene or dental assisting, pursuant to Minnesota Statute 150A.05 and Minnesota Administrative Rules 3100.8500, who declares retirement from active practice in the state, may apply to the Board for emeritus licensure. Licensee may indicate their request on biennial licensing form or by petitioning the Board. Licensee cannot be the subject of current disciplinary action resulting in suspension, revocation, disqualification, condition or restriction of the licensee to practice dentistry, dental therapy, dental hygiene, or dental assisting. Emeritus license is not a license to practice, but a formal recognition of completion of an individual's dental career in good standing. A one- time fee will apply.

Section 3. Proposing coding for new law in Minnesota Statutes, section 150A.06, subdivision 11 is created to read:

Subd.11 Emeritus Active License.

Requirements

Effective July 1, 2018 you may apply for an emeritus active license if you are "retired" from dentistry, dental therapy, dental hygiene or dental assisting practice and are in compliance with

Board requirements. This license limits the type of practice in which you may engage, and is a two-year renewable license requiring renewal fee and required CE hours at time of renewal.

Limited Authorized Practice

The emeritus active license provides the opportunity for retired licensed dental professionals to engage in limited practice **including only:**

- Pro bono or volunteer dental practice; or

- Paid practice not to exceed 240 hours per calendar year for the exclusive purpose to provide licensing supervision to meet the Boards requirements; or
- Paid consulting services not to exceed 240 hours per calendar year.

While on emeritus active license, you must present yourself as only authorized to engage in practice as described above. The Board may take disciplinary or corrective action against your license based on violations of applicable law or regulations of the Board. The Board may grant a variance to the requirements if a licensee on emeritus active license provides emergency dental services. A variance is granted only if the Board grants the variance in writing to the licensee. The Board may impose conditions or restrictions on the variance.

Application Process and Fee

You may apply for an emeritus active license, as an alternative to applying for the renewal of a license or at any time, by completing the required application form.

Renewal

The emeritus active license must be renewed every two years on your regularly scheduled renewal date. If not renewed, the license will expire. To renew an emeritus active license, you must:

- Complete the application form required by the board
- Pay the required renewal fee
- Report 25 CE hours, including:
 - 2 Required CORE areas
 - Mandatory Infection Control
- Complete at least 15 Fundamental Credits for dentists and dental therapists, At least 7 fundamental credits for dental hygiene and dental assisting.
- No More than 10 Elective Credits for dentists and dental therapists. No more than 6 Elective credits for dental hygiene and dental assisting applicants.

Section 4. Proposing coding for new law in Minnesota Statutes, section 150A.091, subdivision 19 and 20 are created to read:

Subd.19. Emeritus inactive licensure for dentist, dental therapist, dental hygienist or dental assistant will require a one-time fee of \$50 to be submitted to the Board of Dentistry. There are no renewal fees associated with Emeritus inactive license.

Subd.20. Emeritus active licensure for dentist, dental therapist, dental hygienist or dental assistant will require a fee to be submitted to the Board of Dentistry every two years, upon renewal. Renewal fees under this subdivision are as follows: Dentist \$212, dental therapy \$100, dental hygiene \$75, and dental assisting \$55.

PURPOSE

The Minnesota Board of Dietetics and Nutrition Practice protects the public through licensure of dietitians and nutritionists, establishment of continuing education standards, and investigation and resolution of complaints against licensees and unlicensed persons engaging in the practice. The Board was established in 1995 under the authority of Minnesota Statutes, Chapter 148 and Rules 3250.

The mission of the Board is to:

- Ensure that all licensees meet the educational and practical requirements specified in law,
- Ensure that all licensees provide competent dietetic and nutrition care,
- Set standards for quality dietetic and nutrition services, and
- Promote the public's interest in receiving quality dietetic and nutrition services.

The Board of Dietetics and Nutrition Practice contributes to the statewide outcomes:

- **A thriving economy that encourages business growth and employment opportunities**
- **Minnesotans have the education and skills needed to achieve their goals**
- **All Minnesotans have optimal health**
- **Strong and stable families and communities**
- **People in Minnesota are safe**
- **Efficient and accountable government services**

BUDGET

**Spending by Category
FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

The Board is funded by licensure fees and receives no general fund dollars. Minnesota Statutes section 214.06, subdivision 1(a) compels the Board to collect fees in the amount sufficient to cover direct and indirect expenditures. Funds are deposited as non-dedicated revenue into the state government special revenue fund. From this fund, the Board receives a direct appropriation to pay for agency expenses such as salaries, rent, costs associated with disciplinary/contested cases and operating expenditures. It also pays statewide indirect costs through an open appropriation.

In addition to Board operations, licensure fees fund activities that support multiple boards and/or other agencies. Some of these are: the Administrative Services Unit (interboard), Health Professionals Services Program (interboard), Office of the Attorney General for legal services, and the Criminal Background Check Program (interboard).

STRATEGIES

The Board accomplishes its mission through implementation of the following strategies:

- Minnesota is similar to most other states, in that it requires licensing or certification of dietitians and nutritionists. Initial licensure applications are reviewed to ensure that licenses are granted only when education, pre-professional experience, and national examination requirements are met. A Criminal Background Check is conducted and reviewed on all applicants with follow up performed on any actions disclosed in the report. License renewals ensure that current licensees have completed the required hours of continuing education. The Board follows up on any licensee responding negatively to application renewal practice questions.
- The Board's Complaint Resolution Committee (CRC) receives, investigates, and resolves complaints regarding the conduct or standard of care provided by licensees. The CRC also receives complaints of unlicensed individuals engaging in the practice.
- The Board promotes awareness of best practices in the profession. An example of this was legislative passage of their prescription protocol initiative in FY13. This resulted in Minnesota having no statutory or regulatory impediments to the Centers for Medicare and Medicaid Services (CMS) new rule by allowing qualified dietitians and nutritionist's hospital privileges to order therapeutic diets without physician supervision or approval. This rule has been cited by CMS for improving quality of care and saving \$459 million per year nationally.
- The Board is committed to technology upgrades that promote public protection and provide responsible, efficient, and cost-effective services. There were 1,894 license renewals in FY17 with 96% completed online and 154 initial applicants with 81% completed online. Technology has allowed us to absorb the increased work load with the same amount of staff.
- The seven-member Board of Dietetics and Nutrition Practice is comprised of 2 licensed dietitians and 2 licensed nutritionists, whom are considered subject matter experts, and 3 public members, as appointed by the Governor. Members are volunteers that receive a per diem and mileage reimbursement for attendance at meetings.

RESULTS

Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	13	15	15	15
FTEs	0	0	0	0

Recommendation:

The Governor recommends additional funding and spending authority of \$28,000 in the FY 2020-2021 biennium to maintain the current level of service delivery at The Minnesota Board of Dietetics and Nutrition Practice.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the Board of Dietetics and Nutrition Practice, this funding will cover known employee compensation growth and centralized MN.IT costs for database maintenance and enterprise rates. IT cost growth drivers may include dedicated MN.IT staff compensation-related increases, increased volume usage of enterprise IT services, increased software licensing costs, and/or application support and maintenance cost increases. Implementation will begin as soon as increased spending authority is granted.

Small Agency Increase:	FY2020	FY2021	FY2022	FY2023
Salary Increases (current staff increases)	\$10,000	\$12,000	\$12,000	\$12,000
Centralized MN.IT costs	\$3,000	\$3,000	\$3,000	\$3,000
Total	\$13,000	\$15,000	\$15,000	\$15,000

Equity and Inclusion:

The Board does not discriminate on the basis of race, ethnicity, gender, sexual orientation, or disability. The positive impact of this change will be to continue to provide services for all people of the State of Minnesota without discrimination.

IT Related Proposals:

A portion of this request includes an increase for database maintenance and to cover annual MN.IT service rates.

AT A GLANCE

- MCD represents and advocates for over 1 million people or 20% of Minnesota's population who have a disability
- 51% of people over the age of 65 have a disability
- In its 45 years, MCD has responded to over a half of a million requests for technical assistance from businesses, employers, state agencies, legislators, people with disabilities, and the general public
- From 2015-present, MCD engaged 361,000 technical and policy related inquiries
- MCD operates with a staffing compliment of 7.5 FTE
- The agency is advised by a geographically diverse, statewide council comprised of 17 Minnesotans who are people with disabilities, their family members, and disability professionals appointed by the Governor

PURPOSE

The Minnesota Council on Disability (MCD) exists to ensure programmatic, physical, and digital access to government for all Minnesota taxpayers and to promote Americans with Disabilities Act (ADA) accessibility in the private sector to fuel a stronger Minnesota economy. The agency is a free policy, training, and technical resource for people with disabilities and their families, the private sector, and federal, state, and local governments to strengthen communities.

Minnesota recognizes the value of providing all people with the opportunity to engage in a safe and productive life. Because accessibility is typically not considered in the design of physical and digital spaces, there are many barriers that hinder the full and safe participation of people with disabilities. MCD holds government accountable to the ADA, Section 508 of the Rehabilitation Act, the Olmstead Act, the Minnesota Human Rights Act, Minnesota Building Code, and other rules and laws to ensure the right of every Minnesotan to live, work, and play in the community of their choice.

MCD contributes to the statewide outcomes:

- **A thriving economy that encourages business growth and employment opportunities**
- **Strong and stable families and communities**
- **People in Minnesota are safe**
- **Efficient and accountable government services**

BUDGET

Source: Budget Planning & Analysis System (BPAS)

Centers for Medicare/Medicaid Pathways to Employment infrastructure building grant. Federal funds have been categorized differently due to accounting requirements. Pathways to Employment funds received are represented in the graph as 'other' funds from SFY2006-2010. In SFY2011-2013 those funds were reclassified as 'federal funds'. In SFY2012-2013 MCD partnered with MN Dept. of Public Safety/Homeland Security and Emergency Management to further include people with disabilities in statewide emergency plans

STRATEGIES

MCD is statutorily obligated to advise the Minnesota Legislature, Office of the Governor, and every state agency on how to improve the accessibility, efficiency, and transparency of government services and to ensure accountability in compliance with civil rights laws. At the highest level of influence and leadership, MCD shapes policy by being the voice of the disability community. MCD utilizes a comprehensive communications strategy which includes providing training and technical resources in a wide variety of mediums to legislators, policymakers, agencies, and organizations to guide informed decisions. MCD provides professional assistance and training modules in digital access for employees and employers within the government. The Council also represents the disability community on various public advisory boards and commissions that serve both urban and rural Minnesota.

MCD is the epicenter of information flow: communicating the civil liberties of people with disabilities to policy makers, communicating information about rights and responsibilities to people with disabilities, and communicating rules from government to businesses. This communication is vital to protect the civil rights of people with disabilities and to prevent compliance-related lawsuits against businesses. MCD strengthens the Minnesota economy by working with businesses to find a financially-feasible path to ADA compliance, increasing access to services for customers with disabilities and employment opportunities for all Minnesotans.

The Council on Disability provides practical assistance, education and outreach to experts designing and building physical spaces and communication professionals in digital, audio and video environments. The Council on Disability leads public-private partnerships; providing access consultation on everything from government agencies to major sports facilities and transportation. MCD has a broad statutory scope; and the agency must apply expertise to matters where the balance of inequality is lacking.

Net Fiscal Impact = (Expenditures – Revenues)	128	138	138	138
FTEs	1.5	1.5	1.5	1.5

Recommendation:

The Governor recommends additional funding of \$266,000 in the FY 2020-2021 biennium to maintain the current level of service delivery at the Minnesota Council on Disability (MCD).

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the Council on Disability, this funding will cover known employee compensation growth and staffing costs for a permanent communications position which is currently a temporary position a sign language interpreter and CART services in addition to contract services. This position will provide digital access technical expertise, communication functions, and serve as the agency's MN.IT liaison and will develop and maintain the agency database.

Equity and Inclusion:

MCD works to eliminate institutional discrimination towards current and potential employees with disabilities and is an equal opportunity agency. This proposal, in its entirety, will lead Minnesota in ensuring a barrier-free Minnesota for people with disabilities.

Results:

This proposal is intended to allow MCD to continue to provide current levels of service and information to the public. This will be measured in the following ways:

- Quantity: Number of visitors viewing the agency's website and technical content published online. The Council's website, www.disability.state.mn is managed and maintained by the technical information officer and is a hub of technical information for the State of Minnesota, businesses, and members of the public on legal obligations and guidelines for disability access in Minnesota communities and services.
- Quality: Length of time website visitors stay online on the website. The technical information officer monitors data ensuring that published information provides technical information to bring institutions and agencies into compliance with various disability civil rights laws. Additionally, the technical

information office adjusts the agency's communications plan accordingly to be of the highest quality of service to the people of Minnesota.

- Results: Products created that allow Minnesotans with disabilities to be an active part in the state. The agency provides technical assistance in the matters of digital and electronic accessibility so that people with disabilities can access communication from all agencies of the State of Minnesota as well as non-state actors. MCD's technical information officer oversees the information and workflow processes in order for the agency to be as efficient and serving to Minnesota as possible.

Minnesota Council on Disability

FY 2020-21 Biennial Budget Change Item

Change Item Title: Database Revitalization Project

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	28	8	8	8
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	28	8	8	8
FTEs	0	0	0	0

Recommendation:

The Governor recommends funding of \$36,000 in the FY 2020-2021 biennium towards a database revitalization project at the Minnesota Council on Disability (MCD).

Rationale/Background:

Enhancements and upgrades to MCD's obsolete technology and systems will allow MCD more effectively serve Minnesotans with disabilities. Current technological processes hinder effective communication and accountability. Adequate technology will streamline, improve, and make efficient the workflow and delivery of programmatic goods.

Proposal:

This project would fund annual costs for software to run and store the database system. The new database system will allow for better data collection that will help MCD track and analyze the various requests which come from the community, helping with planning, priority setting, and resource management in organizing efforts. Additionally, this will fund annual subscription costs for Gov.Delivery, the enterprise approved communication tool, in order for MCD to effectively communicate and connect with its' constituency. Lastly, this funds a one-time investment to set up 2 conference rooms with dedicated network connection, phone lines, a conference phone system, and other conference materials.

Equity and Inclusion:

MCD is the epicenter of information flow: communicating the civil liberties of people with disabilities to policy makers, communicating information about rights and responsibilities to people with disabilities, and communicating rules from government to businesses. This communication is vital to protect the civil rights of people with disabilities and to prevent compliance-related lawsuits against businesses.

AT A GLANCE

- Each year about 1.3 million cases are filed in district court.
- District court proceedings are held in 106 locations throughout all 87 Minnesota counties.
- District courts are organized into ten judicial districts for administrative purposes.
- There are 294 judges at the District Court level.
- District courts serve all Minnesota citizens.

PURPOSE

District courts are the backbone of the state's court system. District courts provide access to the justice system across the state, with courthouses located in all 87 counties. For administrative purposes, district courts are divided between ten judicial districts. A chief judge serves as the administrative head in each judicial district. Judicial District Administrators assist the Chief Judge in carrying out his/her responsibilities. Court administration staff at the county level manage scheduling, case flow, finance, personnel and juries.

District Court judges hear everything from traffic tickets, to civil and family conflicts, to first degree murder trials. Some district courts may have separate divisions, such as criminal, civil, probate, family, and juvenile courts.

The work of the district courts promotes **strong and stable families and communities**, helps to insure **people in Minnesota are safe** and provides **efficient and accountable government services**.

BUDGET

Source: Budget Planning & Analysis System (BPAS)

Source: Consolidated Fund Statement

The District Courts spent \$306 million in FY 2017. Of this amount, \$291 million (95%) was from state general fund appropriations, with the remaining \$15 million (5%) funded from various sources such as federal and local government grants, and foundations.

STRATEGIES

The mission of the Judicial Branch is “To provide justice through a system that assures equal access for the fair and timely resolution of cases and controversies.” The District Court conducts its functions in support of three strategic goals to deliver its mission and to support the statewide outcomes of **promoting strong families and communities, insuring people in Minnesota are safe** and **providing efficient and accountable government services**:

1. Access to Justice – Ensuring the justice system is open, affordable, effective and accountable to the people it serves.
2. Administration of Justice for Effective Results – Working across branches of government and with other justice system stakeholders to improve outcomes for and the delivery of services for children, families, and alcohol and other addicted offenders who come to its courts.
3. Public Trust, Accountability, and Impartiality – Through education, outreach to diverse communities and a commitment to effective and efficient customer service and accountability, improving citizens’ understanding of and confidence in the Third Branch of government.

In recent years, the Judicial Branch has begun implementing an ambitious reform agenda involving the use of technology and the re-engineering of business practices in a system-wide effort to expand services and ensure equal access to justice. The centerpiece of this effort – the eCourtMN Initiative – transformed Minnesota’s courts from a paper-based environment to an electronic information environment that will ensure convenient, timely, and appropriate access to case information for all stakeholders, and result in more timely and efficient processing of cases. Electronic filing of cases, at both the trial and appellate levels, became mandatory on July 1, 2106. Current efforts focus on leveraging technology to provide high-quality, consistent, and convenient court administration services anywhere in the state.

RESULTS

It is the policy of the Minnesota Judicial Branch to establish core performance goals and to monitor key results that measure progress toward meeting these goals in order to ensure accountability of the Branch, improve overall operations of the court and enhance the public’s trust and confidence in the Judiciary. Throughout the year the district courts are directed to review performance measure results. This review is shared with the Judicial Council (the Branch’s governing body) twice a year. An important goal is whether courts handle cases in a timely manner.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Results	Statewide Clearance Rate – The Clearance Rate measures whether courts are disposing of as many cases as are filed in the same year.	96%	99%	FY2016 and FY2017
Results	Statewide Time to Disposition - Time to Disposition assesses the length of time it takes a court to process cases.	97% disposed of within Judicial Branch time limits.	94% disposed of within Judicial Branch time limits.	FY2016 and FY2017
Results	Statewide Pending Rate for Juvenile Delinquency Cases – Assesses the number of cases that have not been disposed of during the timing objective	8.4% of cases are pending after 6 months.	6.3% of cases are pending after 6 months.	FY2016 and FY2017

Recommendation:

The Governor recommends funding for this request from the District Courts, with the exception that compensation increases are funded at 3% each year.

The Judicial Branch seeks \$29,836,000 in the FY2020-21 biennium to increase the compensation of Trial Court judges by 3.5% each year of the biennium, provide a 3.5% compensation pool each year for employees, and to fund unavoidable health insurance premium increases. The request represents a 5.0% increase in the Trial Courts biennial base budget. The request maintains the current complement of employees.

Rationale/Background:

In order for the Judicial Branch to continue driving innovation in our court system and improve services to Minnesotans, the Judicial Branch needs to retain and attract skilled and knowledgeable employees and judges who can maintain and operate a modern, efficient, and technology-based court system. However, the Judicial Branch faces two significant challenges:

- Following a six year salary freeze, which made it possible to preserve essential court functions while managing difficult budget cuts and freezes between FY2008 and FY2013, the Judicial Branch has made concerted efforts to improve the competitiveness of the Judicial Branch salary structure. To ensure the salary structure supports a competent workforce, and to not fall below market in the future, the Branch must continue to keep pace with public-sector market competitors. Retaining a skilled and knowledgeable workforce is important to maintain a technology-based court. Judges in some counties make less than the county attorneys who appear before them, and, in some cases even less than the assistant county attorneys.
- The second workforce challenge is a significant retirement wave among both employees and judges. Nearly one-third of current Judicial Branch staff will be 65 years old or older in the next 10 years. In the last two years, 49 judge positions have been subject to the appointment/election process —15% of all judges in the state. By 2020, at least 40% of all judges that were on the Bench in 2015 will have either retired, or will have turned 65 years old.

This incredible loss of experience and talent is especially concerning when paired with a salary structure that must remain competitive for the Judicial Branch to compete for workers with the necessary skills.

The Trial Courts also request funding for unavoidable health insurance increases. Health insurance premiums are estimated to increase by 5.63% in 2020 and 5.62% in 2021. The Judicial Branch does not negotiate its own insurance agreements – it participates in the general plan negotiated by Minnesota Management and Budget.

The Judicial Branch cannot absorb the increased employer insurance contribution costs and would need to divert funding from court functions to pay for this increase without additional funding.

Proposal:

This change level request is not a new initiative. The Judicial Branch's FY2020-21 biennial budget request seeks funding to increase employee and judge salaries, which will help ensure that the Judicial Branch will be ready to respond to this retirement wave, while maintaining the caliber of workforce needed to continue driving innovation within the court system.

In addition, the request for funding unavoidable health insurance increases will hold court services harmless from rising insurance costs for Judicial Branch judges and employees.

Equity and Inclusion:

- The change level request does not directly impact any Racial and Ethnic groups.
- The change level request is not aimed at reducing or eliminating any disparities for Racial and Ethnic groups.
- There are no potential positive or negative impacts on the identified groups.
- The change level request will enable the Judicial Branch to continue efforts to attract and retain skilled and knowledgeable employees and judges who can maintain and operate a modern, efficient, and technology-based court system. In FY17, the Branch implemented a formal pay-for-performance structure for unrepresented staff and prioritized pay-for-performance in collective bargaining, ensuring that all employee increases are based on performance. These pay-for-performance structures recognize exemplary performance and serve as performance accountability mechanisms.

Results:

This request is sought to support the core mission and services of the Trial Courts and to allow the Courts to continue to undertake initiatives designed to increase efficiency, reduce costs, and improve public service.

Minnesotans bring their most important and complex matters to the courts for resolution. Judges and staff work every day to help the people resolve these disputes. At the same time staff and judges are driving major innovation within the court system. Their innovations are improving service to the public and creating new efficiencies throughout the justice system. It is critically important that the Judicial Branch continue to retain and attract a workforce that builds on this innovation.

District Courts

FY 2020-21 Biennial Budget Change Item

Change Item Title: New Judge Units

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	912	846	846	846
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	912	846	846	846
FTEs	6.0	6.0	6.0	6.0

Recommendation:

The Governor recommends funding this request from the District Courts.

The Judicial Branch seeks \$1,758,000 in the FY2020-21 biennium to add 2 new Trial Court judge units (judge, court reporter, law clerk). The request represents a .3% increase in the Trial Courts biennial base budget.

Rationale/Background:

Since FY14 the Judicial Branch has seen an increase in the number of complex cases brought to the Trial Courts. The most marked increases are in children in need of protection or services (CHIPS) cases with a 42% increase in filings and permanency cases with a 69% increase in filings from FY14-FY18. Over the last five years major criminal case filings (felonies and gross misdemeanors) rose 22%. The other major drivers in the criminal area include drug possession related case filings (a sub-category of the Major Criminal group) with a 36% increase, felony domestic assault filings with a 24% increase, and gross misdemeanor DWI filings with a 23% increase.

Since 1980, the Judicial Branch has used a weighted caseload analysis to estimate judicial resource needs. According to the most current weighted caseload analysis the Judicial Branch is in need of at least two additional judge units to process the trial court workload in an efficient and effective manner.

Proposal:

The change item is not a new initiative.

The addition of 2 judge units will enable the trial courts to address current caseload pressures, especially in the areas of dependency and neglect cases, permanency cases, and major criminal cases. It is imperative that the Trial Courts meet federal and state mandates in cases of child abuse and neglect. It is equally imperative that the Trial Courts carry out its constitutional and legal mandates to protect the rights and safety of all citizens. To do so the courts must be staffed sufficiently to ensure prompt service.

Equity and Inclusion:

- All Minnesotans are impacted by the proposed change item. The Minnesota Constitution provides that “every person is entitled to a certain remedy in law for all injuries or wrongs which he may receive...promptly and without delay.”

Results:

The Trial Courts conduct frequent assessments to ensure efficient court operations. It is the policy of the Minnesota Judicial Branch to establish core performance goals and to monitor key results that measure progress toward meeting these goals in order to ensure accountability of the Branch, improve overall operations of the court, and enhance the public's trust and confidence in the Judiciary. Throughout the year the Trial Courts are directed to review performance measure results. This review is shared with the Judicial Council (the Branch's governing body) twice a year. The annual Performance Measures Report is posted on the Judicial Branch public web site each September.

District Courts

FY 2020-21 Biennial Budget Change Item

Change Item Title: Mandated Psychological Services

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	1,070	1,070	1,070	1,070
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,070	1,070	1,070	1,070
FTEs	0	0	0	0

Recommendation:

The Governor recommends funding for this request from the District Courts.

The Judicial Branch seeks \$2,140,000 in the FY2020-21 biennium to fund the Mandated Psychological Examiner Services budget deficit. The request represents a .4% increase in the Trial Courts biennial base budget.

Rationale/Background:

Minnesota Statutes 2015, section 480.182 provides that the courts will pay the court-related costs of examinations under Rule 20 of the Criminal Rules of Procedure and civil commitments under Minnesota Statutes Chapter 253B, including commitments of persons who are mentally ill and dangerous, persons with sexual psychopathic personalities, and sexually dangerous persons. In 86 counties the state contracts with licensed psychologists, licensed psychiatrists, and licensed medical doctors for these services. Hennepin County relies primarily on staff licensed psychologists to provide these services. For the past several years the courts have seen substantial increased costs for psychological examination services, due primarily to an increase in the number of psychological examinations requested in criminal proceedings.

Expenditures for mandated psychological services have increased 48% from FY14 (\$4,230,825) to FY18 (\$6,271,595). Between FY17 and FY18:

- Criminal Rule 20 examinations increased by 11.5%
- Cost per case rose by approximately 12%

Proposal:

This change item is not a new initiative. It is aimed at addressing a budget deficit in the Mandated Psychological Examiner Services budget and at meeting the statutory and court rule mandates to provide psychological services to individuals who interact with the Judicial Branch on a daily basis.

Equity and Inclusion:

- The change level request does not directly impact any Racial and Ethnic groups.
- The change level request is not aimed at reducing or eliminating any disparities for Racial and Ethnic groups.
- There are no potential positive or negative impacts on the identified groups.

This proposal will benefit individuals who interact with the Trial Courts and are in need of mandated psychological examiner services.

Results:

This request is sought to comply with statutory and court rule mandates that the Judicial Branch fund court-related costs of examinations under Rule 20 of the Criminal Rules of Procedure and under Minnesota Statutes Chapter 253B, civil commitments, including commitments of persons who are mentally ill and dangerous, persons with sexual psychopathic personalities, and sexually dangerous persons.

Trial Courts

FY 2020-21 Biennial Budget Change Item

Change Item Title: Treatment Courts Sustainability

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	306	306	306	306
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	306	306	306	306
FTEs	0	0	0	0

Recommendation:

The Governor recommends funding this request from the District Courts.

The Judicial Branch seeks \$612,000 in the FY2020-21 biennium to fund Treatment Courts sustainability. The request represents a .1% increase in the Trial Courts biennial base budget.

Rationale/Background:

In 2017, with the support of the Legislature, the Judicial Branch secured funds to establish a stable funding source for existing treatment courts, through implementation of a funding formula. Under the funding formula a jurisdiction which seeks to establish a treatment court must seek approval by the Judicial Council and take advantage of the training provided by the federal government and start-up funding provided by state and federal grants and/or local or state (non-Judicial Branch) secured funding. When the funding expires, the treatment court may apply for Judicial Branch funding. The criteria for funding includes a minimum number of participants and a 30% justice partner cash or in-kind match.

Over the next biennium five treatment courts will apply for Judicial Branch funding, as the grant funding for these courts is set to expire. The funds sought will enable the five treatment courts to continue operation.

Proposal:

This change level request is not a new initiative. The request will provide funding for five treatment courts facing a discontinuation of grant funding.

Equity and Inclusion:

Sustainability funding will enable Minnesotans throughout the state to have access to treatment courts.

IT Related Proposals:

This request contains no information technology recommendation.

Results:

The Judicial Branch will continue to offer the services of treatment courts in counties throughout the state.

The Judicial Branch is in the process of developing and implementing a statewide treatment court management information system (MIS) to support performance management, program evaluation, and case management.

Statutory Change(s):

This proposal requires no statutory changes.

FTEs (District Courts)	2	2	2	2

Recommendation:

The Governor recommends general funds totaling \$350,000 in the FY20 and \$200,000 each year ongoing for measures to prevent gun violence. Of this amount, \$188,000 in FY20 and \$38,000 ongoing is for the Department of Public Safety to modify and maintain the Gun Permit Background Check system and \$162,000 each year is for two FTEs in the District Courts to process anticipated petitions for extreme risk protection orders.

Rationale/Background:

The increasing number of deaths and injuries to individuals from firearms can and must be reduced. Current law requires individuals to pass a background check before buying a firearm at licensed firearm dealer. However, criminal background checks are not required for private sales, including online and at gun shows. Expansion of the application of existing background checks for disqualifying offenses is one method to use to keep firearms away from individuals who are legally prohibited from having them.

As of January 2019, 13 states have passed laws that allow a court petition process as a tool to prevent firearm violence. This prevention method provides a means where concerned family members or law enforcement can petition a court to remove firearms from an individual's possession if there is evidence that the person presents a significant danger of bodily injury to themselves or others. These orders can prevent gun violence acts of suicide, domestic violence, and mass shootings by allowing informed and concerned individuals to present warning signs to a neutral arbitrator who then determines whether the risk is serious enough to warrant the individual's firearms be removed from their possession.

Proposal:

The funding included in the budget provides resources to implement two proposals currently introduced in the legislature. First, the governor recommends a proposal to create a new requirement for background checks when private parties transfer any firearm. With the exception of immediate family members, private parties must obtain a transferee permit and all transfers will be subject to a background check. Private parties who are unable to produce the record of the transfer may be subject to criminal charges.

Second, the funding is to support a proposal that creates an Extreme Risk Protection Order (ERPO) process in statute. The ERPO process allows a family member, household member, a guardian, a law enforcement agency, or city or county attorney to petition a court to have an individual's firearms withheld for a fixed period. To obtain the order, the court must agree that the individual poses a significant danger of bodily injury to themselves or other persons. A hearing is provided as well as an emergency petition process to be used when there is an

immediate and present danger of bodily injury. Under this proposal, new offenses are created for providing false information in a petition or with an intent to harass, abuse or threaten another or for violating an extreme risk protection order.

IT-Related Proposals:

Not applicable.

Results:

None.

Narrative

In FY20 and FY21 the Trial Courts will receive federal funding for Child Support, Domestic Violence, the State Justice Institute (SJI), and the Office of Justice Program (OJP) Department of Justice. In addition, the new Second Judicial District Treatment Court Unit Expansion and Enhancement grant expands substance abuse treatment capacity in adult treatment drug courts and adult tribal healing wellness courts. The Domestic Violence and OJP grants fund the treatment courts which include DWI, Drug, Family Dependency Treatment and Mental Health. The OJP grant also funds mentoring the Domestic Violence Courts. The Expedited Child Support Program receives federal reimbursement at a rate of 66% for eligible expenditures, so less spending with state appropriated dollars would result in a proportionate decrease in federal reimbursement. The OJP Domestic Violence Court Mentoring and Second Judicial District Treatment Court Unit Expansion and Enhancement grants do not require a match. The remaining grants require a state spending match of approximately 50%. Estimates were based on past funding. Grants that will be ending did not include revenue projected past the end date.

AT A GLANCE

MDE Customers and Stakeholders (2017)

- 861,540 students in prekindergarten through grade 12.
- Over 125,000 children participating in early learning programs.
- 331 school districts and 169 charter schools.
- 61,822 adult learners in fiscal year (FY) 2018.

PURPOSE

The mission of the Minnesota Department of Education (MDE) is: “Leading for educational excellence and equity. Every day for every one.” MDE is striving to create the World’s Best Workforce (WBWF) by focusing on five key student outcome goals: all students ready for kindergarten, all students reading in third grade, all achievement gaps closed, all students graduating from high school, and all students ready for career and college.

The department strives to improve educational achievement by establishing clear standards, measuring performance, assisting educators, and increasing opportunities for lifelong learning. The department strives to be an innovative education agency, assisting schools, families, and other education providers with exemplary services that result in high academic achievement for all students, prekindergarten to grade 12, and adult learners. Every learner will reach his or her full potential through an outstanding Minnesota education system that is a world leader in achievement and innovation.

BUDGET

**Spending by Category
FY 17 Actual**

Source: Budget Planning and Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

*\$2.7 billion in general fund aid to school districts was shifted beginning in FY 2010 in order to help balance the state budget, causing the FY 2010-11 spending to decrease. Repayment of the shifts began in FY 2012, causing the FY 2012-13 spending to increase.

In FY 2016-17, 95 percent of education funding was from the state general fund and 5 percent was from federal funds. In FY 2017, actual spending was \$9.7 billion; \$9.6 billion was passed through the agency as grants and aids,

and \$90 million was passed through the agency as testing/assessment/other contracts, salary/fringe and other operating costs.

STRATEGIES

To achieve its mission and reach the five goals of WBWF, MDE provides leadership and support to students, teachers and schools using the following strategies:

Direct Support

Department programs provide direct support in continuous improvement of teaching and learning to schools and districts. The Regional Centers of Excellence provide strategic instructional and leadership support and implementation of best practice strategies to improve teaching and learning in the classroom. While the most intensive support is aimed at those schools that need the most assistance, direct support is available to all districts, as needed, through the Regional Centers.

Prekindergarten through 12 Systems

MDE programs provide support for systems improvement through a comprehensive, collaborative approach. For example, works to improve teacher and leader quality by supporting and improving implementation of local teacher and principal professional development and evaluation support systems that will benefit all Minnesota students. The state accountability system under the federal Every Student Succeeds Act and WBWF legislation measures student performance from pre-K through postsecondary education and provides a comprehensive model of continuous system improvement for all districts.

Guidance, Technical Assistance and Funding

Department programs provide supportive leadership to all educational entities by providing guidance and technical assistance to meet the myriad of state and federally legislated requirements. For instance, the technical assistance to districts in the development of their World's Best Workforce plans results in a plan for continuous improvement of school districts through the systemic alignment of legislative requirements in a manner that is streamlined, equitable, and effective for all districts. The department also administers school funding programs, including the calculation and distribution of various funding sources.

FY 2020-21 Biennial Budget Change Item

Change Item Title: General Education Formula Increase of 3 Percent for FY2020 and 2 Percent for FY2021

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	185,441	335,095	350,622	351,343

Net Fiscal Impact = (Expenditures – Revenues)	185,441	335,095	350,622	351,343
FTEs	0	0	0	0

Recommendation:

The Governor recommends increasing the general education basic formula by 3 percent in fiscal year (FY) 2020 and an additional 2 percent in FY 2021. The per-pupil formula would increase by \$189, from \$6,312 to \$6,501 in FY 2020, and by an additional \$130 to \$6,631 in FY 2021.

Rationale/Background:

- Increases in the general education basic formula are needed to maintain our investment in educational programs for all prekindergarten through 12th grade students in schools throughout the state. The general education basic formula is the primary means by which the state funds its constitutional duty to provide a general and uniform, thorough and efficient system of public schools. Operating costs for school districts and charter schools increase annually due to inflation. School districts and charter schools need annual increases in general operating funds to maintain quality education programs for students and close the achievement gap. Over the past decade, increases in the general education basic formula have lagged behind the rate of inflation, causing school districts to rely more heavily on voter-approved referendum levies to maintain basic education programs.
- The general education formula is the largest component of Minnesota's school funding system, accounting for 63 percent of total state E-12 education aid for FY 2019.
- Several other school funding formulas (e.g., compensatory, sparsity, transportation sparsity, Early Childhood Family Education, nonpublic pupil, nonpublic transportation, shared time) are linked to the general education formula.
- General education formula increases for the past five years (2 percent for FY 2015, 2 percent in FY 2016, 2 percent in FY 2017, 2 percent in FY 2018 and 2 percent in FY 2019) have exceeded inflation during that five year period as measured by the Consumer Price Index (CPI), resulting in a net increase of 1.8 percent (\$125) in the basic formula over the five-year period after adjusting for inflation.
- However, the increase over the past four years has not been sufficient to offset the 10.7 percent (\$741) decrease in the basic formula, adjusted for inflation and pupil unit weighting changes, which occurred between FY 2003 and FY 2014.
- As a result, the general education formula for FY 2019 is \$617 per pupil (8.9 percent) less than it was in FY 2003 in inflation-adjusted (FY 2019) dollars.
- The inflation rate, as measured by the CPI, is projected to be 2.36 percent for FY 2020 and 2.36 percent for FY 2021.

Proposal:

This proposal will:

- Increase the general education formula allowance by 3 percent (\$189) for FY 2020, from \$6,312 to \$6,501, and an additional 2 percent (\$130) for FY 2021 and later, to \$6,631.
- Increase other school aid and levy programs that are linked to the general education formula, including:
 - Increase the Early Childhood Family Education Allowance, set at 0.23 percent of the general education formula allowance, from \$145.18 to \$148.07 for FY 2020 and to \$151.04 for FY 2021 and later.
 - Adjust state aid calculations for the nonpublic pupil transportation, nonpublic pupil, shared time, tribal contract, and Post-Secondary Enrollment Options programs to reflect the higher formula allowances for FY 2020 and later.

Equity and Inclusion:

Increasing the general education basic formula benefits all students statewide. Because compensatory revenue is linked to the basic formula, increasing the basic formula also increases resources targeted to closing the achievement gap for students who enroll under-prepared to learn and whose progress toward meeting state or local content or performance standards is below the level that is appropriate for learners of their age.

Results:

Quality Result: This chart shows the percentage change in general education revenue per student between FY 2003 and FY 2019, based on unadjusted current dollars and adjusted for inflation using the consumer price index and the implicit price deflator. Revenue per student in unadjusted current dollars increased by almost 49 percent during this period. However, when adjusted for inflation, revenue per student remained essentially constant.

*General Education revenue, including local referendum revenue

Quality Result: This chart shows the ratio of unrestricted general education funding per student in high-revenue districts versus low-revenue districts for FY 2003 through FY 2020. The funding gap between high-revenue and low-revenue districts increased from 19 percent in FY 2003 to 31 percent in FY 2013, then declined to 18 percent by FY 2016. Between FY 2017 and FY 2019 the gap has remained constant at 18 percent, but increased to 22 percent in FY 2020. The gap between high-revenue and low-revenue districts is primarily driven by property tax disparities.

FY 2020-21 Biennial Budget Change Item

Change Item Title: Voluntary Prekindergarten: Maintain Existing Slots

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	19,210	27,885	28,656	28,694
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	19,210	27,885	28,656	28,694
FTEs	1	1	1	1

Recommendation:

The Governor recommends restoring the level of voluntary prekindergarten (VPK) / school readiness plus (SRP) participants from 3,160 to the fiscal year (FY) 2019 level of 7,160 for FY 2020 and later.

The Governor also recommends changes that will encourage mixed delivery partnerships, enhance data collection and analysis and provide better technical assistance to school districts, charter schools and mixed delivery partners.

Rationale/Background:

For FY 2019, the statewide cap on participation in the voluntary prekindergarten and school readiness plus programs was 7,160, which enabled 12.5 percent of eligible 4-year olds to participate. The cap was reduced to 3,160 participants, about 5.9 percent of eligible 4-year-olds, for FY 2020 and later. With the reduction in the cap, funding will be reduced or eliminated for 141 sites located in 81 school districts and charter schools. Too many of Minnesota's most vulnerable learners are not getting the high-quality services they need to prepare them for success in kindergarten and in life. Intensive, high-quality prekindergarten programs can close much of the early achievement gap for children of low-income families. This substantially increases their school success and produces a host of life-long benefits, including increased school achievement and social and economic success as adults (Reynolds, 2000). These goals can be reached through the expansion of high-quality prekindergarten programs.

While expanding high-quality prekindergarten throughout the state is the ultimate goal, this proposal protects existing programs that will sunset at the end of the current biennium and protects the state from taking a step backward in its work to give early learners the start they need. It also gives school districts an intentional pathway to support their communities' youngest learners by partnering with community-based providers to align curriculum, assessments, instruction, and professional development not just in prekindergarten but along the pre-K through third grade learning continuum. This will also provide the opportunity to engage with and prepare families prior to school entry. This will enable districts to effectively adhere to the World's Best Workforce legislation, as well as be supported in implementing English learner legislation.

In order to provide school districts, charter schools and their mixed delivery partners more time to plan and develop partnerships, a change in the application timeline is needed.

Proposal:

- Beginning in FY 2020, restore the participant cap for the voluntary prekindergarten and school readiness plus programs to 7,160.
- Allow districts to apply for funding and be notified if they received the requested seats the school year before in order to allow to proper planning, facilities upgrades and development of partnerships.
- Encourage mixed delivery partnerships by allowing child care centers, family child care programs licensed under Minnesota Statutes § 245.03, or a community based organization to charge for 4-year-olds participating in a voluntary prekindergarten program as long as they did not receive funding for the child.
- Increase the Minnesota Department of Education's (MDE) capacity to provide technical assistance and support program and fiscal oversight.
- Funding to further develop the Early Childhood Data Warehouse System to collect and analyze VPK and SRP Impact Measure data.
- Separate Minneapolis and St. Paul school districts information.

Equity and Inclusion:

Restoring the participant cap for the voluntary prekindergarten and school readiness plus programs to 7,160 will enable the programs added in FY 2018 and FY 2019 to continue to operate. These programs were selected for funding based on program quality and having high concentration of poverty, and meet the needs of some of Minnesota's most disadvantaged 4-year-old children.

IT Related Proposals:

This proposal includes additional funds to further develop the Early Childhood Data Warehouse System. This system is currently being developed in order to receive the required VPK Impact Measure data program submitted each spring. Through this Data Warehouse, MDE staff are able to collect VPK data from programs and generate a comprehensive analysis of each site's impact measure data and provide each site with a report to support their continuous improvement efforts and include in their World's Best Workforce Report showing how they are working toward meeting Goal #1 regarding school readiness.

FY 2020-21 Biennial Budget Change Item

Change Item Title: Special Education Funding Increase & Reform: Hold Cross Subsidy Steady

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	25,440	65,251	69,956	72,235
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	25,440	65,251	69,956	72,235
FTEs	0	0	0	0

Recommendation:

The Governor recommends that special education aid be increased by an amount sufficient to hold the state total cross subsidy per student in average daily membership (ADM) steady at the fiscal year (FY) 2019 level of \$820 per ADM, and that the increase be allocated through an improved special education aid formula.

The Governor also recommends that the tuition payments made to the serving district for open enrolled students be reduced from 90 percent to 85 percent of unfunded costs for FY 2020 and to 80 percent for FY 2021 and later, with the state covering the reduction in tuition revenue for charter schools so they are held harmless.

Rationale/Background:

Despite steady increases in state special education aid over the past decade, the special education cross subsidy continues to grow. Between FY 2009 and FY 2019, state special education aid per student increased from \$1,149 to \$1,818, and the cross subsidy per student increased from \$648 to \$820, as shown in the chart below:

The cross subsidy is the unfunded cost of special education programs for students with a disability, which school districts and charter schools need to cover using unrestricted general fund resources. As the cross subsidy grows, school districts and charter schools have fewer resources available in their general fund to maintain quality education programs and improve achievement for all students. While the cross subsidy affects all school districts and most charter schools, the size of the cross subsidy varies widely among districts and charter schools, creating inequities in the resources available to support general education programs. The chart below shows the average special education cross subsidy per weighted pupil unit by district type for FY 2014 and FY 2017.

Between FY 2014 and FY 2017, the average cross subsidy per pupil unit increased for all district types. The Minneapolis and St Paul school districts have the largest cross subsidies, while charter schools have the lowest cross subsidies. In general, cross subsidies are larger in suburban metro districts and large non-metro districts than in smaller non-metro districts, but there is also wide variation among districts within each district type.

Major changes in the special education aid formula were enacted in 2013 and took effect in FY 2016. While these changes slowed the growth of the cross subsidy, they also created new problems, including added complexity and equity issues associated with the use of prior year (and older) data, and with the growth cap and hold harmless calculations.

The hold harmless and growth cap calculations under the new formula are based on FY 2016 data, adjusted for changes in average daily membership (ADM) and for inflation. Given the instability in special education programs and costs from year to year, tying these calculations to a single base year creates inequities going forward between districts where FY 2016 was an unusually low year for costs and funding versus districts where FY 2016 was an unusually high year. In addition, basing adjustments for later years on ADM change does not capture the variations among districts in the growth or decline of special education needs relative to total ADM. Eliminating the growth cap and adjusting the hold harmless using current year data would mitigate these inequities.

Special education cross subsidies for school districts continue to be much higher than for charter schools, and concerns continue to be expressed about the incentive effects and lack of cost containment when the serving district or charter school makes the decisions about programming and service levels while the resident district picks up most of the tab. A modest reduction in the portion of unfunded costs billed to the resident district would help to neutralize this issue.

Finally, there continues to be wide variations in the cross subsidy per student among districts. Targeting a portion of any increase in special education aid based on each district's cross subsidy will ensure that districts with the greatest need receive significant increases from any new investment in special education funding.

Proposal:

The Governor recommends that special education aid be increased by \$25.4 million in FY 2020 and by \$65.3 million in FY 2021 to hold the state total cross subsidy per ADM steady at the FY 2019 level of \$820. The increase would be allocated through an improved special education aid formula, which would be simplified and made more equitable by:

1. Adding a new cross subsidy reduction aid beginning in FY 2020 that would cover a percent of the prior year's cross subsidy for each school district. The percentage would increase from 2.6 percent in FY 2020 to 6.43 percent in FY 2021 and later.
2. Beginning in FY 2021, updating the pupil-driven portion of the initial aid calculation to reflect the results of the FY 2018 cost study.
3. Adjusting the growth cap / maximum aid calculation for FY 2020 by setting the maximum aid at the greater of the current calculation or the sum of 56 percent of current year special education program costs plus 100 percent of current year special transportation costs, plus the current year tuition adjustment, and eliminating the growth cap/maximum aid calculation for FY 2021 and later.
4. Adjusting the hold harmless / minimum aid calculation by: (i) reducing the annual inflation adjustment by 0.2 percent per year, from 4.6 percent in FY 2020 to 4.4 percent in FY 2021 to 4.2 percent in FY 2022 to 4.0 percent in FY 2023, until the inflation adjustment reaches 2.0 percent; and (ii) limiting the minimum aid guarantee to the sum of 90 percent in FY 2020, 85 percent in FY 2021, 80 percent in FY 2022 and 75 percent in FY 2023 and later of current year special education program costs plus 100 percent of current year special transportation costs, plus the current year tuition adjustment.
5. Reducing the tuition billing rate paid by the resident district for open enrolled students from 90 percent to 85 percent of the unfunded costs for FY 2020 and to 80 percent for FY 2021 and later. Charter schools would receive additional special education aid from the state to offset the impact of the tuition billing change.

Equity and Inclusion:

Increasing special education aid will benefit all students by reducing cross subsidies, freeing up resources for improved educational programs for all learners. Addressing inequities in the current formula and targeting the largest increases to districts with the highest cross subsidies will reduce disparities among districts and the students they serve.

IT Related Proposals:

N/A

Results:

Special education cross subsidies will be reduced, and funding will be more stable and more equitable.

Statutory Change(s):

M.S. 124E.21, 125A.76 and M. S. 127A.47

Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: Renewal of Voter-Approved Referendum Revenues

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends that locally-elected school boards be permitted to renew expiring operating referendum authority by school board action. This proposal would require that voters have an opportunity to revoke the board-renewed authority in a reverse referendum, and that the ballot language for the expiring referendum provided notice that the referendum may be renewed by school board resolution. Any increase to operating referendum would still require approval by voters.

This request has no effect on E-12 education appropriations for the biennium.

Rationale/Background:

School district operating referendum authorities are limited to a maximum of 10 years. School districts currently spend a great deal of time and effort in campaigns to renew their existing referendum authorities. Referendums to renew existing referendum authority are nearly always successful. Allowing school boards to renew expiring referendum authority would free up significant time and energy for school district leaders to better focus on key goals, such as improving student achievement for all learners. Voters opposing the renewal would have an opportunity to revoke the board-renewed referendum through a reverse referendum.

The authority for school board renewal of expiring referendum authority will apply only to referendum authority approved by the voters after July 1, 2019, in which the voters were notified of the board's authority to renew the referendum by board resolution at the time the referendum was approved.

Proposal:

A school board will be authorized to renew an expiring referendum that was approved by the voters after July 1, 2019, by board action if the referendum ballot provided notice of the board's authority to renew the referendum, the per-pupil amount of the referendum is the same as the amount expiring, and the term of the renewed referendum is no longer than the initial term approved by the voters. If the per-pupil amount of the expiring referendum was adjusted annually by the rate of inflation, the per-pupil amount of the renewed referendum could be adjusted annually by the rate of inflation in the same manner. Of the 327 type 1 school districts, 300 currently have a voter approved referendum authority. Of these, 89 districts have a referendum with an inflation-adjusted allowance and 211 do not have an inflation-adjusted allowance.

Before adopting a written resolution authorizing the renewal, the board would be required to hold a meeting and allow public testimony on the proposed renewal. The board would be required to adopt resolution by June 15 of

any calendar year; adopted resolutions would become effective 60 days after its adoption. A school board would be allowed to renew an expiring referendum not more than two fiscal years before the expiration.

Board-renewed authority would be subject to revocation through a reverse referendum. A petition to revoke board-renewed referendum authority would be effective if signed by a number of qualified voters in excess of 25 percent of the registered voters of the district on the day the petition is filed with the board; and filed with the board by June 1 of that year. The approval of 50 percent plus one of those voting on the question would be required to revoke board-renewed referendum authority.

Statutory Change(s):

M.S. 126C.17

Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: Full Service Community Schools Grant Program

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	2,000	2,000	2,000	2,000
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,000	2,000	2,000	2,000
FTEs	.25	.25	.25	.25

Recommendation:

The Governor recommends investing \$2 million per year to reestablish the Full Service Community Schools Grant Program that expired in fiscal year 2018 in order to broaden access to full service community school supports in primarily low-income or rural communities.

The funding will provide grants to districts or schools to provide in-school, wrap-around services that aim to improve student outcomes and strengthen family stability. Up to 5 percent of the appropriation will be used for Minnesota Department of Education (MDE) grant administration, to provide technical assistance to full service community schools, and to facilitate the full service community school review as outlined by Minnesota Statutes, section 124D.231.

Rationale/Background:

The Full Services Community School grant program was a new program established in 2015 that provided funding to eligible schools to plan, implement and improve full service community schools. Additional funds were appropriated in 2017 for expansion of the program. This grant program meets the state's accountability system's definition of an evidence-based practice as it is a program that had positive impact (increased academic achievement and improved student attendance) based on high-quality evidence.

Previous funding provided grants to 13 schools – four in round one, and nine additional schools in round two. If the grant were reestablished at \$2 million annually, MDE would be able to expand the numbers of schools who are awarded Full Service Community School grants. Previous grantees are interested in opportunities to have sustainable funding to maintain their full service community school coordinators and programming efforts.

Proposal:

This proposal funds grants for schools and districts to plan and implement full service community school models. Full service community school grant funds allow schools to partner with community agencies to provide onsite health and dental clinics, mental health services, family resource centers, college access information, out-of-school program information, or other family support services as outlined in Minnesota Statutes, section 124D.231.

In addition to grant funds, this proposal includes funding for MDE to administer the grant program including technical assistance to grantees and other full service community schools, coordination with school improvement initiatives, competitive grants process administration, review of progress reports submitted by participating schools, and reporting on program progress.

Equity and Inclusion:

The purpose of this program is to provide additional, comprehensive services to underserved student populations. As defined in Minnesota Statutes, the full service community schools are schools with school improvement plans and schools receiving Achievement and Integration funding. As part of the planning process, schools must base their plans on a needs assessment that includes the needs of underserved student populations. School populations including poverty, student mobility and homelessness may be considered as part of grant approval.

Results:

Grantees must conduct a program review and submit a report that meets requirements in Minnesota Statutes. The report must include an assessment of effectiveness, number and percentage of students served, number and percentage of community members served, retention data, student academic data, school readiness data, family engagement data, and satisfaction data. The following include examples from the reports.

Partnership/Initiative/Programming type	Number of partnerships or Initiatives
Mental and Physical Health - including mentoring and other youth development programs (peer mentoring, conflict mediation, social emotional learning, youth leadership, etc.), juvenile crime prevention and rehabilitation programs, home visitation services by teachers and other professionals, developmentally appropriate physical education, nutrition services and food security, primary health and dental care, and mental health screening and counseling	120
Enrichment and Out Of School Time (OOST) - including college and career preparation, academic tutoring, culturally relevant learning, parks and recreation, and science, technology, engineering, arts and mathematics programming	71
Family Engagement - including promoting parental involvement and family literacy, parent leadership development, and parenting education activities, and family/student resource rooms	52
Community Involvement - including adult education (instruction in English as a second language, computer classes, etc.) service and service learning, and homeless prevention, and other social services	24
Positive Discipline Practices - including teacher PD on strategies to increase student engagement and decrease behavior incidents	11
Early Childhood Education	4
Public transportation in support of consistent attendance	3

Each Full Service Community School has different partnerships to address the specific needs of the students and community. Below are some of the results from those schools:

Quality and Impact (selected)

Hamline Elementary - St. Paul Public Schools ISD #625

- **Increased number of parents participating in school activities** from 22 percent to 35 percent. This includes events such as NAAPID, Parent Academy, Street Dance, assemblies, volunteering, utilizing family resource room for needed resources.
- **Increased parents sense of connectedness to the school:** 70 percent of parents who responded to our survey reported feeling connected to school and pleased with the increase in communication and the addition of the family resource room.
- **Increased retention rate** of students from 78 percent to 82 percent.
- **Increased enrollment** by 12 percent.

Riverside Central Elementary - Rochester ISD #535

- Department of Natural Resources Forest School Designation: “Through student survey data, the site saw increased interest in arts and sciences. This will be the first school forest designation in Rochester. No behavioral referrals were written during forest programming.”
- Collaborative Recess Programming: “Student attendance in programming increased each quarter, behavioral referrals remained or decreased each quarter.”

Jefferson Elementary - Faribault ISD #656

- Over 420 hours of extended academic and enrichment programming were offered to mitigate achievement and opportunity gaps. 251 students participated in this programming regularly (ranging from 6-30 times each).
- Approximately 7,000 meals were served, through the Sodexo program, to participants at Family Success Series events where families participated in programs such as, diabetes education in English and Spanish, Zumba, Grand families mentoring (nontraditional parents), and nutrition/cooking classes over the course of the school year.

According to the Results First Clearinghouse Database, “Community schools” (also called full service community schools) are an evidence-based practice.

Statutory Change(s):

M.S. 124D.231

Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: National Board Certified Teachers

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	140	140	140	140
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	140	140	140	140
FTEs	1	1	1	1

Recommendation:

The Governor recommends funding a new position at the Minnesota Department of Education to conduct stakeholder engagement and draft a plan to double the number of National Board Certified Teachers (NBCT) in Minnesota by 2023. This new position would conduct outreach to determine which supports would be most meaningful to NBCT candidates in Minnesota and identify opportunities for collaboration for candidates.

Rationale/Background:

National Board Certified Teachers strengthen their teaching practice through the certification process, leading to higher achievement results for students, better retention for teachers and an elevation of the teaching profession. A meta-analysis of available research by Washington State Institute for Public Policy demonstrates that NBCTs have a positive effect on student attendance and performance.

Currently, there is inconsistent support for NBCTs across the state. Approximately 60 school districts support NBCT candidates at the local level.

Minnesota ranks 33 out of the 50 states with 483 NBCTs.

Proposal:

This proposal would fund a dedicated staff member to engage stakeholders across the state about what supports would be best suited to support NBCT candidates in Minnesota.

Minnesota currently has 483 NBC teachers. For comparison, Wisconsin has 1,359 NBCTs and 333 NBCT candidates. Supports offered to NBCT candidates in Wisconsin include:

- After the initial year of certification, NBCTs are eligible to receive annual grants of \$2,500 or \$5,000 for the remaining nine years of a National Board certificate.
- Universities frequently provide graduate credit to teachers pursuing National Board Certification.
- Comprehensive support for educators interested in pursuing National Board Certification, including reimbursement for up to \$2,000 for costs incurred as part of the National Certification process; candidate support through a collaborative partnership with the Wisconsin Education Association Council (WEAC) and the Wisconsin National Board Network (WNBK).
- A Jump Start program, including an online course and resources to connect with fellow candidates.

Stakeholder engagement will include discussions with teacher candidates, educators and their family members, principals and superintendents, as well as teacher preparatory programs.

Results:

Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: Recruit and Retain Quality Teachers

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	4,000	4,000	4,000	4,000
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	4,000	4,000	4,000	4,000
FTEs	.85	.85	.85	.85

Recommendation:

The Governor recommends increasing funding to programs dedicated to expanding and recruiting quality teachers, particularly teachers of color and American Indian teachers. This proposal funds:

- \$1,817,500 increase in student teacher grants.
- \$182,500 increase in expanded concurrent enrollment grants to provide “Introduction to Teaching” courses.
- \$2 million to create mentoring, induction and retention incentive program grants for teachers of color and American Indian teachers.

Rationale/Background:

Minnesota is facing a teacher shortage. According to the 2019 Teacher Supply and Demand report:

- Slightly more than half (52.5 percent) of teachers holding an active teaching license are not currently working as a teacher in a Minnesota public school.
- The percentage of teachers of color remain stagnant while the percentage of students of color continues to grow in Minnesota.
- Teacher shortages are a problem across Minnesota: 41.9 percent of districts reported that it is a major problem and 51.8 percent reported that it is a minor problem. Only 6.4 percent of districts indicated that it is not a problem for them. More than 1 in 10 school districts (12.7 percent) reported that they had to cancel classes or programs due to a shortage of teachers.
- Most teachers in Minnesota identify as white (95.7 percent), followed by Asian (1.5 percent), black (1.4 percent), Hispanic (1 percent), and American Indian (0.4 percent). Most school districts reported that it is difficult to recruit teachers that reflect their student body. 83.1 percent of schools have less than 10 percent teachers of color or American Indian teachers, while 64.3 percent of students are in schools with more than 10 percent students of color or American Indian students. Percent persons of color

Proposal:

To address the teacher shortage overall—and shortage of teachers of color and American Indian teachers in particular—the Governor recommends the following in order to support student teachers, attract new teacher candidates, and retain teachers.

- \$1,817,500 increase in student teacher grants under Minnesota Statutes 136A.1275.
 - The Office of Higher Education provides grants to student teachers from low-income families who intend to teach in a shortage area after receiving their teaching license or who belong to an underrepresented racial or ethnic group. Currently statute requires that at least 36.5 percent of

these grants go to teacher candidates of color or American Indian teacher candidates. These grants are up to \$7,500. This proposal will fund up 230 student teachers, including up to an additional 84 teacher candidates of color or American Indian teacher candidates.

- The Office of Higher Education may retain up to 3 percent of this funding for administration of the grant.
- \$182,500 increase in expanded concurrent enrollment grants to provide “Introduction to Teaching” courses.
 - Grants under Minnesota Session Laws - 2017, 1st Special Session, Chapter 5, Article 2, Sec. 57, Subd. 9 allow school districts and charter schools to develop innovation programming to encourage high school students to pursue teaching through concurrent enrollment courses in “Introduction to Teaching.” This allows a student to take a number of college courses in education in high school, and launch their career in education. Currently 33.5 percent of Minnesota public schools students identify as people of color or American Indian.
 - Minnesota Department of Education may retain up to 5 percent of this funding for administration of the grant.
- \$2 million to create mentoring, induction and retention incentive program grants for teachers of color.
 - Create grants to provide for teacher mentoring and retention for teachers of color and American Indian teachers. These funds can be used to retain teachers by paying stipends to mentor teachers, spreading best practices by creating professional learning communities focused on supporting diverse teachers, and supporting licensed and non-licensed educator participation in professional development including workshops and graduate courses.
 - Minnesota Department of Education may retain up to 5 percent of this funding for administration of the grant.
- Broaden non-traditional pathways to teacher licensure known as “Grow Your Own” grants to more school districts will requiring that grants focus on teacher candidates of color or American Indian teacher candidates.
 - “Grow Your Own” grants under Minnesota Session Laws - 2017, 1st Special Session, Chapter 5, Article 2, Sec. 57, Subd. 23 allow school districts with more than 30 percent students of color or American Indians students to apply for grants to fund a Professional Educator Licensing and Standards Board-approved nonconventional teacher residency pilot program. Many school districts with a higher concentration of white students have been launching innovative programs in the area of nonconventional teacher residency programs. The Governor recommends removing this limitation, while requiring that a majority of the teacher candidates in the nonconventional program identify as teacher candidates of color or American Indian. This allows more school districts to take part in these programs, while ensuring the goal of launching more people of color or American Indian people in the field of teaching.

Equity and Inclusion:

This proposal is focused on expanding supports to low income student teachers and teachers of color and American Indian teachers. This will benefit the teacher candidates or teachers, as well as the students they will encounter in the classroom. Students that have a teacher from their background are more likely to graduate and feel that the adults in their school care about them.

Having a review of students’ access to effective teachers that reflect the diversity of the student body is required to be built into school districts’ World’s Best Workforce plans.

Results:

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Percent licensed teachers of color/American Indian teachers working in their field	4.23%	4.3%	2015, 2018

Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: Operating Adjustment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	1,665	2,149	2,149	2,149
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,665	2,149	2,149	2,149
FTEs (Maintain)	3	5	5	5

Recommendation:

The Governor recommends additional funding of \$3.814 million in the fiscal year (FY) 2020-2021 biennium to maintain the current level of service delivery at the Minnesota Department of Education (MDE).

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the MDE, this funding will cover the following operating expenses:

- \$404,000 in FY20 and \$647,000 for each year thereafter for known compensation growth;
- \$223,000 in FY20 and \$256,000 for each year thereafter for cost increases related to leased space and loss of revenue for leased space when current tenant(s) move out; and
- \$300,000 each year for costs to support legal services provided by the Attorney General.

Also included in this recommendation is funding for the following IT-related expenses:

- \$214,000 each year to support workstation management activities. In the FY20-21 Biennium, MDE will transition from a local to an enterprise service delivery model for workstation management (laptop/desktop computer support and refresh) and service/help desk support. Regular replacement of workstations will be included as part of the service rate, in order to ensure the security and supportability of state agency computers. The agency will also transition to the enterprise service/help desk, which provides 24/7 support to agency staff.
- \$122,000 in FY20 and \$250,000 each year thereafter for increased technology support. For the FY20-21 biennium, MDE's portion of MNIT administrative overhead expenses is projected to increase. MNIT overhead expenses include HR, finance, procurement, enterprise project management, and security activities. These expenses are allocated to agencies based on their total IT spend and total number of dedicated MNIT staff as of fiscal year 2017.
- \$400,000 in FY20 and \$480,000 for each year thereafter for to maintenance, licensing, and enhancement activities related to the Mainframe Modernization project. The 2017 legislature appropriated \$3.25

million one-time to design and build a new mainframe system. The modernization project is now underway and anticipated for full system roll-out in February 2020.

Results:

This proposal is intended to allow agencies to continue to provide current levels of service and information to the public. MDE serves more than 2,000 schools across the state, 57,000 full-time equivalent teachers, 61,000 non-licensed staff and more than 860,000 K-12 students. The MDE provides support, technical assistance, funding, and much more to the thousands of educators and students in the state to provide an excellent and equitable education to all students in Minnesota.

Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: Second Chance Agency Director

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	171	174	174	174
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	171	174	174	174
FTEs	1	1	1	1

Recommendation:

The Governor recommends funding a Second Chance Agency Director at the Minnesota Department of Education. The director will coordinate services between Minnesota Department of Education, Office of Higher Education and Department of Corrections to design innovative solutions for at-risk students and incarcerated youth, with a focus on preventing incarceration or recidivism and developing pathways to success, including developing dual credit programs in the corrections system. Dual credit programs allow students to earn high school and college credits simultaneously.

Rationale/Background:

Minnesota has a strong educational system, yet struggles to meet the needs of at-risk students, including students in correctional facilities or children of incarcerated parents. In the 2016-2017 school year, many of these students dropped out of the educational system. These students over-represent students of color, American Indian students, migrant students, and students experiencing housing instability.

Students who do not graduate have a lower lifetime earning potential and a higher chance of encountering the criminal justice system. Breaking the “school-to-prison pipeline” and building supports for at-risk students needs to be a priority in order to give all students an equitable access to education and to create the World’s Best Workforce.

Proposal:

This proposal will focus on aligning, coordinating, and creating additional resources for at-risk students, students who are in or have been in the correctional system, and children of an incarcerated parent.

The director would be responsible for:

- Identifying at-risk students and working to provide career and college readiness resources.
- Supporting students who have an incarcerated parent.
- Providing transition services for our students in Adult Basic Education programs and over age 21.
- Working with students who have directly interacted with the criminal justice system.
- Developing literacy and dual credit programming for correctional facilities.

This proposal is intended to positively impact student achievement and well-being for at-risk students. For example, incarcerated students are less than half as likely to think they will go to a four-year institution for college. Building post-secondary supports and services into the programming available for incarcerated students can help break the cycle of recidivism.

This trend has been steady according to the 2013 and 2016 Minnesota Student Survey data.

This is a new initiative that would coordinate existing services available from Minnesota Department of Education, Office of Higher Education, and Department of Corrections, as well as identify areas of improvement to serve at-risk students.

The director's first year will be focused on building a comprehensive system among Minnesota Department of Education, Office of Higher Education and Department of Corrections, including building an inventory of resources, developing a guiding framework, creating connections between similar programs at the various agencies. This will be followed by a needs assessment of the target population (students with an incarcerated parent, juveniles who have interacted with the criminal justice system, Adult Basic Education students and students over age 21, incarcerated adults, at risk students) to develop the resources that would best support these students. This will be followed by developing programs and supports for this population. The director would also organize 5-7 listening sessions for the commissioners with parents, students, and educators in prevention programs as well as in the corrections system.

This complements work in Minnesota Department of Education's work with Adult Basic Education and supporting post-secondary programming in the division of Career and College Success.

This complements work in the Minnesota Department of Corrections education programs housed within each of the states ten correctional facilities, providing Adult Basic Education, postsecondary training for a variety of career technical (trades) areas, work readiness, and college courses.

This complements work underway at the Office of Higher Education in the areas of college readiness, access to and completion of postsecondary education and training, identification and closure of attainment gaps for underserved populations, and developing and embedding foundational service practices ensuring students who leave K-12 can enter alternative educational pathways with a strong probability of success.

Minnesota Department of Education, Office of Higher Education and Department of Corrections will coordinate with each other to align programming to the targeted population. Additionally they will work to create community buy-in and stakeholder engagement with partners like the colleges and universities, licensing boards such as the Boards of Barbers and Cosmetology, community and private partners, along with educational, correctional and higher education advocacy groups

The director would be hired in the summer of 2019 and immediately begin work to identify areas of improvement and collaboration between the three agencies, and begin the stakeholder engagement process to better identify holes in services.

Equity and Inclusion:

Incarcerated students are three times as likely to have had an incarcerated parent compared to the overall population. They are less than half as likely to think they will go to a four-year institution for college, and three to six times as likely to receive special education services. Students of color and American Indian students are over-represented in correctional facilities. LGBT women are also over-represented.

By providing better and more coordinated services to incarcerated students and at-risk students, these students will make strides in student achievement and student engagement.

Results:

In the 2017-2018 school year, students in juvenile corrections:

- Earned 43 high school equivalencies.
- Earned 92 high school diplomas.
- 71 students improved up to one full grade level in reading.
- 97 students improved more than one full grade level in reading.
- 50 students Improved up to one full grade level in math.
- 155 students improved more than one full grade level in math.

Statutory Change(s):

Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: American Indian Tribal Contract Aid

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	1,496	2,040	2,267	2,403
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,496	2,040	2,267	2,403
FTEs	0	0	0	0

Recommendation:

The Governor recommends that the maximum American Indian tribal contract aid per pupil unit continue at the fiscal year (FY) 2019 level of \$3,230, and not decrease to \$1,500 as provided in current law, and that the maximum be adjusted for inflation in FY 2020 and later based on the ratio of the formula allowance for the current fiscal year to the formula allowance for fiscal year 2019.

Rationale/Background:

This state aid program provides funding to promote equal education for American Indian students enrolled in Bureau of Indian Education (BIE) tribal contract schools. The program ensures tribal schools have sufficient funds to provide an adequate and uniform education to their students, as required by the Minnesota Constitution.

Participants include the four tribal contract schools in the state: Bug-O-Nay-Ge-Shig School, Leech Lake; Circle of Life Academy, White Earth; Nay ah Shing School, Mille Lacs; and Fond du Lac Ojibwe School, Fond du Lac.

The aid is calculated based on the difference between the amount of state aid per pupil unit that would have been generated if these students had been enrolled in public schools and the amount provided by the federal government, with a limit on the amount of aid per pupil unit.

The per pupil unit state aid limit was set at \$1,500 in 1989 when the program was enacted. Legislation enacted in 2015 and 2017 increased the aid limit to \$3,230 for FY 2016 through FY 2019 only.

Proposal:

The Governor recommends continuing the FY 2019 aid limit of \$3,230; and for FY 2020 and later, adjusting the aid limit for inflation based on the ratio of the formula allowance for the current fiscal year to the formula allowance for fiscal year 2019. Based on the 3 percent and 2 percent increases in the general education formula recommended by the governor for FY 2020 and FY 2021, the aid limit will increase to \$3,295 for FY 2020 and to

\$3,361 for FY 2023.

If the aid limit is not maintained at the FY 2019 level, the state total aid entitlement is projected to decrease by 43 percent between FY 2019 and FY 2020, from \$2.992 million to \$1.694 million.

Equity and Inclusion:

In FY 2016, 759 American Indian students attended the four Bureau of Indian Education (BIE) tribal contract schools in Minnesota. The proposal will prevent a 43 percent reduction in state funding to support educational opportunities for these students.

Results:

- This program mainly addresses two goal areas of the World's Best Workforce by ensuring that all racial and economic achievement gaps between students are closed and that all students graduate from high school.
- MDE does not track or report participant performance. Tribal contract schools are not public schools, so we cannot require tribal schools to submit assessment data related to this program.
- Tribal Consultation requirements under ESSA will be fulfilled in the Metro Area where schools/districts do not have a Tribal Council within 50 miles.

Statutory Change(s):

M.S. 124D.83, subdivision 2

Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: Levy Equalization for Achievement and Integration Revenue

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	165	180	184	189
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	165	180	184	189
FTEs	0	0	0	0

Recommendation:

The Governor recommends creating a minimal levy equalization to enable districts with very low tax base to cover the levy portion of their Achievement and Integration revenue.

The aid generated by this levy equalization will be used by districts with a limited ability to levy for the amount needed to cover the levy portion of their annual Achievement and Integration revenue. That revenue is 70 percent aid and 30 percent local levy.

Rationale/Background:

The purpose of the Achievement and Integration program is to increase racial and economic integration and to decrease achievement disparities. Districts use this funding to provide additional resources, support and opportunities beyond those the district is already funding, such as for strategies or initiatives that increase racial and economic integration and reduce achievement disparities for students. Students with the lowest achievement outcomes stand to benefit significantly when their school districts participate in the program.

Achievement and Integration revenue is comprised of 70 percent state aid and 30 percent local levy. Because the aid portion of the revenue requires districts in the program to provide 30 percent of any revenue they expend, districts with a low tax base may not be able to come up with a revenue source to provide the 30 percent match. Most districts in the Achievement and Integration program pass a local levy for their 30 percent match. However, for districts with a low tax base and limited or no ability to levy, this is not a viable option and creates a barrier to participating in the program and to accessing new resources for their students. This proposed levy equalization would make it possible for low levy districts to access the additional funding provided by participating in the Achievement and Integration program.

Historically, socioeconomic status and student achievement are highly correlated. School districts with a low tax base have some of the highest achievement disparities and lowest family income levels. The inability or limited ability to levy for additional funds can have a compounding effect. A low tax base is an outcome of the low economic status of residents. Students from families with a low economic status tend to have greater financial, socioemotional, and achievement needs. The school districts these students enroll into have less to expend on students because of their low tax base and limited ability to levy. The result is that students who need additional academic support may not receive it because of the district's inability to raise taxes to cover additional costs incurred to reduce achievement disparities.

Proposal:

The Achievement and Integration levy would be equalized at 30 percent of state average Adjusted Net Tax Capacity (ANTC)/pupil unit. The Minnesota Department of Education (MDE) would calculate the achievement and integration equalization aid for qualifying districts beginning in FY 2021, and adjust the integration aid and levy accordingly. This will have a low statewide cost and enable districts with very low tax base to participate in the Achievement and Integration program.

Three school districts will be affected by this change beginning in FY 2020:

- ISD 25 Pine Point School District would receive aid for 100 percent of its levy revenue;
- ISD 38 Red Lake Public Schools would receive aid for 99.6 percent of its levy revenue; and
- ISD 707 Nett Lake Public Schools would receive aid for 57.2 percent of its levy revenue.

If these three school districts participate in the program, they will be required to develop a plan consistent with the statutory requirements for this program.

Raising the equalizing factor above this level would add some other districts with relatively low tax base per pupil to the list of those receiving equalization aid. The effective implementation date would be for FY 2020.

Equity and Inclusion:

The three school districts that would be affected have a relatively high enrollment of students of color and American Indian students. Having a high percentage of enrolled students of color and American Indian students is also the basis for these districts' eligibility for the Achievement and Integration program.

Achievement disparities disproportionately affect students of color and American Indian students. If these districts were in the program, they would be required to use the revenue to address these disparities. They would also be required to implement strategies to increase racial and economic student integration with their adjoining districts. One of the outcomes of creating integrated learning environments is a reduction in achievement disparities for students of color and American Indian students. The potential impact on these students if these three districts were to participate in the Achievement and Integration program is significant and positive.

Results:

All districts in the Achievement and Integration program are evaluated every three years to determine whether they have made progress toward the goals in their plans. Districts report to the commissioner of education and to their communities whether they met their goals. If they do not meet the goals in their Achievement and Integration plans, districts must consult with the commissioner to create an improvement plan and must set aside up to twenty percent of their annual Achievement and Integration revenue to fund those plans.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>2015</i>	<i>2017</i>	<i>Number of Districts</i>
Quality	Progress toward goal for reducing reading achievement gap	23.9% on track	10.16% met goal	13
Quality	Progress toward goal for reducing math achievement gap	26.9% on track	4.69% met goal	6
Quality	Progress toward integration goal	66.8% on track	51.56% met goal	66

Racially isolated districts have a districtwide enrollment of protected students that exceeds that of one or more adjoining districts by more than 20 percentage points. Racially isolated districts are required to participate in the Achievement and Integration program. Districts that are isolated based only on the number of their American

Indian students may choose whether or not to participate based on criteria included in Minnesota's School Desegregation/Integration rules.

Racially identifiable schools have an enrollment of protected students more than 20 percentage points above that of the district average for schools serving the same grade levels. Districts are required to develop Achievement and Integration plans for these schools with the goal of reducing achievement disparities and increasing racial and economic integration of students at those sites.

For the purposes of the Achievement and Integration program, protected students are defined as African/Black Americans, Asian/Pacific Americans, Chicano/Latino Americans, American Indian/Alaskan Native; and multiracial.

<i>Type of Measure</i>	<i>Racially Isolated Districts and Racially Identifiable Schools</i>	<i>2014-2015 2015-2016</i>	<i>2016-2017</i>	<i>2017-2018</i>
Quantity	Number of participating racially isolated districts	40	40	39
Quantity	Number of participating racially identifiable schools	55	55	55

Statutory Change(s):

M.S. 124D.862 Achievement and Integration Revenue.

Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: Tribal Nations Education Committee

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	150	150	150	150
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	150	150	150	150
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$150,000 a year for a grant to the Tribal Nations Education Committee (TNEC) to fulfill their requirement of tribal consultation under the Every Student Succeeds Act of 2015.

Rationale/Background:

The Tribal Nations Education Committee (TNEC) is responsible for fulfilling the federal requirement of tribal consultation under the Every Student Succeeds Act of 2015 within their own tribal communities as well as in the metropolitan areas of Minnesota.

The Minnesota Indian Affairs Council (MIAC) has designated the TNEC as the consultative body to fulfill the federal requirements under the Every Student Succeeds Act of 2015 (ESSA) with regard to consulting with schools and districts that do not have a Tribal Nation within 50 miles of their proximity. TNEC provides consultation with 10 metro area school districts as well as guidance and education to their respective Tribal Councils regarding federal title and state funding, the available and proposed uses, and the results of programming for American Indian students in the 36 schools and/or districts that require tribal consultation under ESSA.

Individual members within TNEC are tribally appointed from each of the 11 Tribal Nations in the state, as well as the larger metro areas such as Duluth and the Twin Cities. These individual members travel from each of the Tribal Communities to consult with metro area schools. There is an enormous influx of title funding paperwork which includes plans, budgets, and comprehensive reform programs, and each document needs to be recorded, archived, and thoroughly reviewed.

Proposal:

This proposal recommends \$150,000 a year for a grant to TNEC to enable them to perform tribal consultation requirements under ESSA.

Equity and Inclusion:

The Every Student Succeeds Act reads, “to ensure timely and meaningful consultation on issues affecting American Indian and Alaska Native students, an affected local educational agency shall consult with appropriate officials from Indian Tribes or Tribal Organizations approved by the tribes located in the area served by the local educational agency’s submission of a required plan or application for a covered program under this Act or for a program under Title VI of this Act. Such consultation shall be done in a manner and in such time that provides the opportunity for such appropriate officials from Indian tribes or tribal organizations to meaningfully and substantively contribute to such a plan.”

This committee ensures that programming for American Indian students in MN is reviewed and drafted with the help of Tribes or Tribal Organizations, weather they are in close proximity to a specific tribe or not.

Results:

- This program mainly addresses two goal areas of the World's Best Workforce by ensuring that all racial and economic achievement gaps between students are closed and that all students graduate from high school.
- Tribal consultation requirements under ESSA will be fulfilled in the metro area where schools/districts do not have a Tribal Council within 50 miles.

Statutory Change(s):

124D.83, subd. 2

Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: Minnesota Indian Teacher Training Program Clarifications

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends clarifications to the Minnesota Indian Teacher Training Program (MITTP) to promote a more culturally responsive and effective program moving forward.

Rationale/Background:

MITTP provides grants to four tribal colleges to launch American Indian teacher candidates into education. Funding for the program increased in 2016. The increased funding has highlighted some clarifications need to be addressed in order to make sure funds are used for American Indian teacher candidates.

Currently, there is a lack of clarity regarding the ability of tribal colleges to partner with other institutions to provide programming, which students are eligible for the program, whether or not grantees can use funds to recruit candidates into their program, how they should prioritize various degrees sought, and what programming is eligible. Providing clearer direction to tribal college grantees may increase their ability to find and recruit American Indian students for their training program. In one instance, clarifying that grantees can partner with tribal, community and technical schools may attract teacher candidates who desire to stay closer to their home. In fact, many of American Indian students are not admitted to a four-year university directly out of high school.

Proposal:

This proposal would amend MITTP to promote a more culturally responsive and effective program moving forward. This change will provide clearer direction to the current tribal college grantees about the institutions they can partner with, what their budget allocation thresholds are, and who is eligible for scholarships. It will also eliminate the inoperative loan portion of the program, focusing all funding scholarships, recruitment, and administration, found in Minnesota statute 122A.63 Grants to prepare Indian Teachers. This proposal includes the following changes:

1. In the interest of recruiting and finding American Indian students for the program, the inclusion for the four grantees to collaborate with tribal, technical, and community colleges is necessary. Tribal, Technical, and Community College Collaboration:
 - Each of the four grantees is eligible to enter into agreements with tribal, technical, and community colleges to identify students interested in the profession of education.
 - Each of the four grantees is eligible to enter into agreements to provide grant monies to students interested in the profession of education as a sub-contracted institution.
 - Each of the four grantees is eligible to provide professional development to tribal, technical, and community colleges along with supplemental services to identify students and then to provide

instructional supplies and materials needed to inform students about the fields of licensure needed in local and state areas.

- Each of the four grantees is eligible to contract services to tribal, technical, and community colleges to engage with, coordinate, and provide mentorship services to students interested in the profession of education.
- Agreements with tribal, technical, and community colleges should be beneficial not only to students interested in education as a profession, but also to the tribal nations, the four grantees, and the school districts most in need of American Indian educators.

2. Eligible Students

- In order for this program to be successful and effective, and in order to follow state definitions for pre-K through grade 12 students eligible for Indian Education services in the state of Minnesota, the definition of American Indian Student eligible to be a recipient of this grant is as follows:
- American Indian or Alaskan Native: Persons having origins in any of the original peoples of North America and maintain cultural identification through tribal affiliation or community recognition.
- As per statute 122A.63, and with the addition of contracting with tribal, technical, and community colleges, the following Indian people are eligible for scholarships
- A student, including a teacher aide employed by a district receiving a joint grant, who intends to become a teacher and who is enrolled in a postsecondary institution receiving a joint grant;
- A licensed employee of a district receiving joint grant, who is enrolled in a master of education program; and
- A student who, after applying for federal and state financial aid and an Indian scholarship according to section 136A.126, has financial needs that remain unmet. Financial need shall be determined according to the congressional methodology for needs determination or as otherwise set in federal law.

3. Grantee institutions should follow the budget allocation amounts:

- No less than 80 percent of the awarded grant shall be promoted as scholarships. The loan portion of the program will be eliminated.
- No more than 20 percent of the awarded grant shall be used in the recruitment and or administration of the scholarships.

4. Tiered Language for priority students and degrees eligible:

- Tribally enrolled.
- First and second generation descendency.
- Tiered Language for priority students:
- Tribally enrolled, first and second generation descendency (documented CIB)
- To pursue a AA, BA/BS, MA, PhD or EdD.

5. Eligible Programming

- For recruitment purposes, the four grantees and/or the sub-contracted tribal, technical, or community colleges shall agree to work with their respective institutions to hire an American Indian work-study student or other American Indian staff to conduct initial information queries and contact persons working in schools that may be interested in education as a profession. In addition, programming regarding education professions should be included in high school recruitment and efforts to find students.

Schools and school districts have been limited in their outreach due to imposed restrictions that have not included new initiatives in Tribal, community, and technical colleges as well as new educational reforms in the state of Minnesota, especially the new tiered-teacher licensure program.

Equity and Inclusion:

These changes will allow the MITTP grants to be better utilized in preparing American Indian teacher candidates. The changes will provide clear information and promote MITTP to substantially more potential education

students. This will build capacity for potential American Indian education students and will result in more American Indian students as potential educators in the field and in Minnesota. Culturally relevant promotion and retention for potential educators will provide better outcomes for program clients.

Results:

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of American Indian licensed teachers	237	285	2010-2018

Statutory Change(s):

M.S. 122A.63

Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: Grants to Support Students Experiencing Homelessness

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	500	500	500	500
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	500	500	500	500
FTEs	.2	.2	.2	.2

Recommendation:

The Governor recommends appropriating \$500,000 each year to provide grants to eligible school districts order to address the needs of students experiencing homelessness. Up to 5 percent of the appropriation will be used for MDE grant administration including providing technical assistance.

Rationale/Background:

Over 15,000 students experienced homelessness in Minnesota’s public charter schools and school, based on student enrollment data for the 2017-18 school year. These students attend 1,239 different school sites located in 312 different public charter schools and school districts across 76 of Minnesota’s 87 counties. Homelessness and housing instability present significant challenges for these students and their academic success. Attendance rates are lower for students experiencing homelessness: 89 percent compared to 96 percent for students not experiencing homelessness. Nearly all students experiencing homelessness qualify for free or reduced-price lunch and are nearly twice as likely to receive special education services.

Homeless and highly mobile students are more likely to be chronically absent, missing more than 10 percent of school days. Chronic absenteeism jeopardizes educational success. Only one in four homeless third-graders demonstrate reading proficiency, a rate that is 37 percent lower than their low-income but housed peers. Low reading proficiency in third grade correlates with significantly lower academic success in the future. About 75 percent of students experiencing homelessness don’t meet proficiency standards on state math and reading tests.

The McKinney-Vento Homeless Assistance Act (McKinney-Vento Act) (42 U.S.C. § 11431-11435) passed in 1987 and re-authorized in 2015, is federal legislation that ensures the educational rights and protections of children and youth experiencing homelessness. It requires all local educational agencies (LEAs) to provide “equal access to the same free, appropriate public education, including a public preschool education, as provided to other children and youths.” The McKinney-Vento Act also authorizes the funding for the federal Education for Homeless Children and Youths Program. In Minnesota, the grant currently supports 9,255 homeless youth with services such as tutoring, professional development, referral services, transportation assistance and other activities.

However, the federal funding does not completely meet the needs of districts. Most districts do more than what is required by federal law, by providing backpacks, school supplies and hygiene items; keeping schools open late so students have a safe place to study; hiring social workers to help families find housing and navigate services; contracting with food banks and other nonprofits so families have access to the necessities and providing extra tutoring and academic counseling to homeless students. To do so, they have to dip into their general funds and

other sources. Additionally, federal funds to Minnesota have been decreasing as other states experience faster growth in their concentration of students experiencing homelessness.

Providing expanded funds for eligible districts to fill the growing need will ensure equity and access to education for students experiencing homelessness.

Proposal:

This proposal would provide an additional 4,250 homeless students with services that are not being covered by federal funding provided by the McKinney-Vento Homeless Assistance Act. This proposal funds grants for schools and districts to provide increased school stability and academic success for students experiencing homelessness. Grants would be awarded to school districts with the highest count or concentration of students experiencing homelessness. In addition to grant funds, this proposal includes funding for MDE to administer the grant program including technical assistance, coordination with school improvement initiatives, competitive grants process administration, review of progress reports submitted by participating schools, and reporting on program progress.

Equity and Inclusion:

Homeless students are a population of underserved students. Homelessness disproportionately impacts students of color and American Indian students. Seventy-two percent of students facing homelessness are students of color. American Indian students are over-represented among students experiencing homelessness by a factor of 6.1. Black students are over-represented by a factor of 4.5. Homelessness also disproportionately impacts students with disabilities and lesbian, gay, bisexual, transgender, or questioning (LGBTQ) youth.

Results:

Students experiencing housing instability supported with grants	Students experiencing housing instability not supported with grants	Time Period
9255	4250	2016-2017 School Year

This proposal would increase the number of students experiencing housing instability who receive grant-funded supports.

Statutory Change(s):

N/A

Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: Grant Administration Account

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Special Revenue				
Expenditures	64	64	64	64
Transfer in (from 1000)	64	64	64	64
General Fund				
Transfer out (to 2001)	64	64	64	64
Expenditures	(64)	(64)	(64)	(64)
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends that Minnesota Department of Education (MDE) cover their costs for grant administration through the transfer of up to 5 percent of each new grant appropriation in FY2020 and beyond to a special revenue account. This proposal also transfers \$64,000 per year that is currently authorized in law for grant administration, and gives MDE authority to transfer up to 5 percent of new grants to the new special revenue account.

Rationale/Background:

Grant programs assigned to MDE without funding for grant management costs have increased from \$13 million in 2012 to \$47.7 million in 2018. The trend in recent years has been to name specific grantees in law. While these types of grants do not have the same level of administrative responsibilities as competitive grants that require creating a request for proposal and evaluating applications, the fiduciary and other grant management responsibilities still remain including adherence to all state grant management policies.

Annual grant management activities include:

- Develop grant requirements.
- Conduct pre-award assessments.
- Work with grantees to collect and finalize work plans.
- Prepare and negotiate grant agreements.
- Set up grants in Statewide Integrated Financial Tools (SWIFT).
- Review budget revisions as appropriate.
- Review payment requests, process and pay invoices.
- At completion of grant, work with program staff to make sure all necessary reporting is completed – make final payment and close grant.
- Grant monitoring (site visits or desk reviews – one per grant if under \$50,000).

If the grant is for multiple years the following activities are added to the process:

- Work with program staff on continuation application.
- Review budget applications submitted by grantee.
- Amend contracts for the new fiscal year and set up budgets.

If the grant is over \$50,000, state grant management policy requires annual monitoring (either site visits or desk reviews).

Competitive grants or grant programs require more work up front including:

- Develop grant requirements.
- Prepare grant applications.
- Prepare and advertise the Request for Proposal (RFP). (The Minnesota Department of Administration has requirements around how and where to advertise RFPs.)
- Review grant applications. (The Minnesota Department of Administration has multiple requirements around what the review should entail including scoring, negotiating, and awarding.)

Proposal:

This proposal would allow MDE to transfer up to 5 percent of each new grant appropriation in FY2020 and beyond to an account in the special revenue fund. This proposal also transfers \$64,000 per year that is currently authorized in law for grant administration.

Results:

Goal: Minnesota will reach a **third grade reading** achievement rate of 90 percent, with no student group below 85 percent, by the year 2025.

2017 Baseline	Current Result (2018)	2025 Goal	Distance from Current Result to 2025 Goal
56.4%	55.6%	90%	34.4 percentage points

Goal: Minnesota will reach an **eighth grade math** achievement rate of 90 percent, with no student group below 85 percent, by the year 2025.

2017 Baseline	Current Result (2018)	2025 Goal	Distance from Current Result to 2025 Goal
57.5%	56.4%	90%	33.6 percentage points

Goal: Minnesota will reach a 95 percent **consistent attendance** rate, with no group below 90 percent, by the year 2020.

Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: Maltreatment Investigations Program

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund	406	288	288	288
Expenditures		0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	406	288	288	288
FTEs	2	2	2	2

Recommendation:

The Governor recommends increasing funding for the Minnesota Department of Education (MDE) Division of Compliance to investigate maltreatment allegations. The funds will be used to assess and respond to intake reports, conduct onsite investigations of alleged maltreatment, collaborate with the Minnesota Attorney General's Office, and train school administration, law enforcement, and state and local child welfare agencies to ensure compliance of relevant law.

The Governor also recommends amending the Maltreatment of Minors Act to allow MDE to investigate allegations of maltreatment of students ages 18-21.

Rationale/Background:

The state Reporting of Maltreatment of Minors Act gives MDE the authority to investigate reports of alleged maltreatment (physical abuse, sexual abuse, or neglect) of students under the age of 18, or refer cases to the Department of Human Services (DHS) in cases of abuse of a vulnerable adult. However, neither MDE nor DHS currently has the authority to investigate allegations of maltreatment of students ages 18-21 that do not meet the criteria of a vulnerable adult. As such, allegations of maltreatment involving general education students between the ages 18-21 that occur within a public school district or charter school are only being investigated by law enforcement, and only if it meets a criminal burden of proof standard. Recent news media coverage highlighted the current lack of jurisdiction for MDE to investigate allegations when a school employee sexually abused a student who was between the ages of 18-21. Giving MDE authority to investigate such matters will provide assistance in situations where there is an asymmetric power dynamic that does not fully reflect equitable interactions between adults.

MDE has experienced a steady increase in the number of intake reports received and allegations investigated over the past five years. This increase in reports is likely due to the media attention related to and societal expectations around investigating allegations of abuse, specifically sexual abuse matters. MDE currently receives and assesses more than 1,000 reports per year and conducts onsite investigations involving an average of 275 allegations of maltreatment of children in the public school system. The team at MDE assesses and screens all reports of alleged maltreatment; conducts onsite investigations, trainings, and technical assistance; responds to data requests; updates and maintains a program database. Each team member maintains an average caseload of 65 cases per year, and are also responsible for oversight of corresponding programs and initiatives such as the implementation of Minnesota's Olmstead Plan as it relates to abuse and neglect of students with disabilities, test security investigations, and assuring districts are in compliance with maintaining harassment and violence policies.

Proposal:

This proposal increases MDE's responsibilities to investigate reports of student maltreatment by extending the existing age of the alleged victim to include any student between the ages of 18-21, who is enrolled in a public school that does not fall under the criteria of a vulnerable adult. This proposal includes two new FTE at MDE to handle the increase in reports received and cases needing to be investigated as a result of this law change, which is estimated to be 40 to 50 new reports during the first year of enactment with the potential to expand to more than 100 reports each year thereafter. Additionally, the new FTEs are expected to conduct a minimum of 20 to 30 new onsite investigations during the first year of enactment, with the potential to expand to more than 50 investigations each year after.

To achieve this proposed amendment, MDE would need to work with the following external partners; MNIT, Department of Human Services (DHS), Data Practice Office (DPO), local law enforcement agencies, school district administration, and local welfare agencies. This proposal includes funding for MDE to provide training so agencies can be compliant with the proposed changes in law and to minimize duplicate agency efforts in conducting maltreatment investigations of vulnerable adults. This includes ensuring compliance with data practice standards, and educating state and local entities on MDE's jurisdiction, authority and procedures. Additionally, multiple training curricula will need to be developed via a web-based system to ensure mandated reporter requirements.

Equity and Inclusion:

- Students between the ages of 18-21 who are currently enrolled in the public school system will be afforded the same protection and rights in relation to investigations of alleged maltreatment within the public school district as is already established and provided to students 17 years of age or younger.
- Increased protection and rights for students between the ages of 18-21 from incidents of physical abuse, sexual abuse and neglect.

Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: School Safety Revenue

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	5,769	11,791	12,109	12,081
Revenues	0	(200)	(210)	(250)
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	5,769	11,991	12,319	12,331
FTEs	0	0	0	0

Recommendation:

The Governor recommends providing Minnesota school districts and charter schools with additional revenue to improve student and school security. Funds may be used for building security improvements or to hire more school resource officers, counselors, or other student support staff. This recommendation provides one-time state aid to districts and charter schools equal to \$5 per pupil in fiscal year (FY) 2020. In FY 2021 and beyond this proposal will: 1) increase the Safe Schools Levy allowance from \$36 per pupil to \$50 per pupil and create a minimum revenue amount of \$20,834 per school district; 2) equalize the levy to allow districts with low property tax capacity access to this revenue; and 3) provide charter schools with \$14 per pupil in Safe Schools Aid. The Governor also recommends amending the allowable uses under the school levy to include professional development such as restorative practices, social-emotional learning, and other evidence-based practices.

This proposal seeks an allocation of \$17.8 million for the FY 2020-21 biennium and \$24.7 million for the FY 2022-23 biennium, including the cost of interactions with the property tax refund program, state individual and corporate income taxes, and the continuation of the 4,000 expiring seats for the voluntary pre-kindergarten/school readiness plus program. In addition, the safe schools levy would increase by \$5.4 million for taxes payable in 2020 and \$5.6 million for taxes payable in 2021 and later.

Rationale/Background:

Under current law a district may levy up to \$36 per adjusted pupil unit to directly fund the following purposes or reimburse cities and counties who contract with the district for these purposes:

1. to pay the costs incurred for the salaries, benefits and transportation costs of peace officers and sheriffs for liaison in services in the district's schools;
2. to pay the costs for a drug abuse prevention program as defined in section 609.101, subdivision 3, paragraph (e), in the elementary schools;
3. to pay the costs for a gang resistance education training curriculum in the district's schools;
4. to pay the costs for security in the district's schools and on school property;
5. to pay the costs for other crime prevention, drug abuse, student and staff safety, voluntary opt-in suicide prevention tools, and violence prevention measures taken by the school district;
6. to pay costs for licensed school counselors, licensed school nurses, licensed school social workers, licensed school psychologists, and licensed alcohol and chemical dependency counselors to help provide early responses to problems;
7. to pay for facility security enhancements including laminated glass, public announcement systems, emergency communications devices, and equipment and facility modifications related to violence prevention and facility security;

8. to pay for costs associated with improving the school climate; or
9. to pay costs for co-locating and collaborating with mental health professionals who are not district employees or contractors.

A school district that is a member of an intermediate school district may levy an additional amount up to \$15 per adjusted pupil unit for intermediate school district programs.

The levy is not equalized by the state. Most districts levy the maximum amount, but a few districts, including those with the lowest tax base per pupil, do not levy or levy less than the maximum due to low tax capacity.

The levy formula has been increased periodically and the uses of the revenue have been broadened over time. Prior to 2001, the levy was called the crime levy, and a per capita formula was used (\$1.50 per capita from taxes payable in 1998 – 2001 and \$1 per capita before that). For taxes payable in 2001 and 2002, the rate was \$11 per pupil unit. Beginning with taxes payable in 2003, the rate was increased to \$30 per pupil unit, and beginning with taxes payable in 2014, the rate was increased to \$36 per pupil unit (\$4 of this increase was new revenue, and \$2 was to adjust for a pupil unit weighting change).

With the increase in the number of school shootings and other violence in schools in recent years, there is growing recognition of the need to significantly increase funding for student and staff safety, both for building security improvements and for more school resource officers, counselors, or other student support staff, and to extend the funding to schools that are currently excluded. To ensure that districts with little or no tax base are able to access safe schools revenue, and to provide greater equity in the tax burdens between districts with low tax base per student and districts with higher tax base per student, state aid should be provided to equalize the levy. Finally, the authority for cooperative units to access safe schools revenue should be extended from intermediate districts only to all cooperative units enrolling students.

Proposal:

For FY 2020:

- Increase the safe schools revenue allowance for school districts from \$36 to \$41, a \$5 increase, with a minimum revenue of \$17,083 per district, and provide \$5 per student for charter schools. Since the levy for FY 2020 has already been made, provide the increase all from state aid; and
- Increase the safe schools revenue allowance for intermediate districts from \$15 to \$17.08 per member district pupil unit, a \$2.08 increase, and provide \$2.08 per student for other cooperative units enrolling students. Since the levy for FY 2020 has already been made, provide the \$2.08 increase all from state aid.
- Amend the allowable uses under item (8) school climate in the school safety levy to include professional development such as restorative practices, social-emotional learning, and other evidence-based practices.

For FY 2021 and later:

- Increase the current safe schools revenue allowance for school districts from \$36 to \$50, a \$14 increase, with a minimum revenue of \$20,834 per district, and provide \$14 per student for charter schools;
- Increase the current safe schools revenue allowance for intermediate districts from \$15 to \$20.83 per member district pupil unit, a \$5.83 increase, and provide \$5.83 per student for other cooperative units enrolling students;
- Equalize the levy for school districts and the levy made by member districts of cooperatives, including intermediate districts, using an equalizing factor equal to 110 percent of the state average Adjusted Net Tax Capacity (ANTC) per pupil unit excluding 50 percent of Class 2a agricultural property valuation. This is the same measure currently used for Long Term Facilities Maintenance Revenue (LTFM), except that the equalizing factor for LTFM is 123 percent of the state average ag-modified ANTC per pupil.

For FY 2020 and later:

- Clarify that the equipment bonding under Minnesota Statute, section 123B.61 may be used for the purchase of equipment related to violence prevention and facility security, and increase the maximum amount of the annual debt service levy for facilities and equipment bonds by the amount of a district's safe schools revenue.

Because this proposal raises levy allowances, property taxes on all property will increase. Increased property taxes will result in higher homeowner property tax refunds, which are additional costs to the state general fund. The growth in property taxes will also increase income tax deductions, which reduces revenues to the state general fund.

Equity and Inclusion:

This proposal will support all students in Minnesota public schools, particularly students in charter schools, cooperatives other than intermediates, and students in low tax base school districts. Charter schools and cooperatives other than intermediates are currently excluded from eligibility for safe schools revenue; in this proposal they would be included in the program and would receive the same increase as school districts and intermediate districts, respectively. Districts with little or no tax base (e.g., Red Lake, Nett Lake), which have been effectively excluded from the program due to inability to make a tax levy, will be able to raise the same revenue per student as other districts with most of the revenue funded by the state. Districts with relatively low tax base per student will receive equalization aid to reduce disparities in the tax rate needed to raise the same safe schools revenue per student as other districts.

Results:

School districts and cooperatives will receive a much-needed boost in safe schools revenue, which can be used for building security improvements or to hire more school resource officers, counselors, or other student support staff.

Statutory Change(s):

M.S. 126C.44

Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: IT Program and Data Integration

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	822	822	822	822
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	822	822	822	822
FTEs	1	1	1	1

Recommendation:

The Governor recommends funding for program and data integration that will improve data systems and reports for stakeholders, including the Minnesota Department of Education (MDE) program areas, research, and data analysis.

Rationale/Background:

As a result of the 2016 Minnesota legislative session, MDE is required to report graduation rates, results of the Minnesota Comprehensive Assessments (MCAs), and more, by detailed ethnicity for students of color and American Indian students. This legislation is referred to as the “All Kids Count Act,” and the more detailed reporting is called data disaggregation. Read the full text of the legislation: Minnesota Statutes, sections [120B.31 subd. 3a](#) and [120B.35 subd. 3](#).

Shortly after this legislation was passed in 2016, MDE applied for and was awarded a five-year federal grant to fund the development of a data collection system to collect complete and accurate detailed demographic information. In 2017, MNIT @ Education conducted a feasibility study examining the options and necessary enhancements related to data submission in an effort to streamline the process. More information can be found in Appendix A of the February 2018 legislative report for [Data Disaggregation](#).

As a result of the feasibility study MDE and MNIT @ Education have determined the best long-term solution for the state and for the collection of detailed demographics is to utilize [Ed-Fi](#), a data standard that is used in other states and districts across the country. The Ed-Fi protocol allows for real time data transfers that are automated using a secure system and practices. This is an effort to not only provide information in real time but also to reduce the errors that may be introduced by human interaction during the current submission processes.

MDE and MNIT have been working with the Ed-Fi Alliance during the initial phase of implementation of [Ed-Fi](#). Though each state’s implementation of Ed-Fi is unique, the Ed-Fi Alliance provides some background and success stories from various perspectives at [Ed-fi.org-benefits](#).

Currently districts utilize a manual upload process to submit student enrollment information to MDE. MDE then uses the submitted information to provide payments to schools and districts. Utilizing Ed-Fi will allow for real time, automated data transfers that will reduce time and staff pressures on school districts. It will also allow data systems that do not currently interface with each other to do so. For example, if the Minnesota Common Course

Catalog and Minnesota Automated Reporting Student System (MARSS) could interface, the state would have better information about what demographic groups have access to a well-rounded education.

Proposal:

This proposal would create a new program to sustain the initial implementation of data disaggregation and Ed-Fi with five partner districts, which is funded via a federal grant. Initial implementation is currently ongoing with statewide implementation of data disaggregation and Ed-Fi in MARSS is expected to occur during the 2019-2020 school year. These funds will provide MDE and MN.IT resources to integrate data submissions and systems across more programs within MDE in effort to streamline collection efforts, to increase efficiency for districts, and to take advantage of the increased data reporting capabilities initially made possible through the federal grant.

Equity and Inclusion:

Additional programs implementing Ed-Fi will allow for more efficient disaggregation of data by student groups as well as new reports which would provide disaggregation of data by student groups. The particular groups and reports will vary somewhat by data type, but some examples include:

- The need for collecting more detailed groups, which lead to the adoption of Ed-Fi, was the result of legislation intended to better identify disparities in opportunities and results for various racial and ethnic groups. Disaggregation of test results for the seven major federal racial and ethnic groups (American Indian, Asian, black, Hispanic, Native Hawaiian and Pacific Islander, white, and two or more races) and for the additional ethnic groups required in state law (e.g. disaggregating Karen, Hmong, etc., within the larger Asian group). Those services and supports to districts must continue.
- Including other program areas in Ed-Fi will allow greater and improved data analysis – including rigorous course taking patterns or early learning enrollment for the various detailed demographic groups.
- The funding should be ongoing until all Minnesota program areas' data collection efforts are fully transitioned to Ed-Fi.

Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: Turnaround Arts Schools

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	140	140	140	140
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	140	140	140	140
FTEs	1	1	1	1

Recommendation:

The Governor recommends funding to support Turnaround Arts Schools. This is a new initiative for MDE, but was previously funded at the Perpich Center for the Arts who provided services to Turnaround Arts Schools since 2014. The position will support the six Turnaround Arts schools through professional development and school change technical assistance.

Rationale/Background:

The John F. Kennedy Center for the Performing Arts – Turnaround Arts Program was started by the President's Committee on the Arts and the Humanities in 2011. The national program office provides local Turnaround Arts programs with arts education in-kind materials, advisement and coaching, program methodologies, a national program evaluation and resulting data, training, peer-to-peer learning structures, and limited funding. The Perpich Center has been the regional partner for the Turnaround Arts sites but chose to not renew the program. MDE would need funding to hire a regional staff position, who engage directly in supporting schools as required by the Kennedy Center. Staff work exclusively in high-need schools. In Minnesota, these are schools in need of support as defined in our federal Every Student Succeeds Act (ESSA) plan. Eight schools were chosen for the original national pilot; the program has expanded to 84 schools in 17 states and the District of Columbia. There are six schools in Minnesota currently. Turnaround Arts schools have almost exclusively served students in grades K-8.

The six schools, their locations, and the year they began in the initiative are as follows:

1. Bethune Community School, Minneapolis (2014)
2. Cityview Elementary School, Minneapolis (2016)
3. Stonebridge World Charter School, Minneapolis (2016)
4. Northside Elementary, St. James in southwest MN (2014)
5. Red Lake Middle School, Red Lake Reservation in northwest MN (2014)
6. Riverside Central Elementary School, Rochester in southern MN (2016)

Serving nearly 3,000 students, these schools have diverse student populations in both urban and rural settings. For example, 100 percent of Red Lake Middle School's students are Native American; Northside Elementary in rural St. James is about half white and half Hispanic students; and Bethune and Cityview Schools in North Minneapolis have a majority of African American students. More than half of the students at all six schools are eligible for free or reduced-price meals and, in four of the schools, 90 percent or more of students are eligible. Letters from the schools are available.

Proposal:

This proposal provides funding to support Turnaround Arts Schools. This is a new initiative for MDE, but was previously funded by the legislature through the Perpich Center for the Arts. The position will support the schools through professional development and school change technical assistance.

Equity and Inclusion:

The goal of this work is to have increased student arts access and academic achievement through improving tools for teachers and administrators. This program builds capacity at low income schools to promote student success through arts integration and improved school culture, climate, and family engagement.

The importance of achieving these objectives cannot be overstated for Turnaround Arts schools' students, families, and communities. The targeted student group for this project are high-need students attending schools where 20 percent or more of students are eligible for free and reduced-price lunch (FRL).

Results:

Schools that serve this target group that have been involved in Turnaround Arts have demonstrated increased academic achievement, increased student and family engagement, and improved school climate. In the first eight Turnaround Arts schools in the nation, math proficiency increased an average of 22.5 percent and reading proficiency increased an average of 12.6 percent from 2011-2014. Compared to similar schools in need of support, these first Turnaround Arts schools improved 6.3 percent more in math and reading (Stoelinga, 2014).

Statutory Change(s):

N/A

Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: Data Analytics

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	222	226	226	226
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	222	226	226	226
FTEs	1.4	1.4	1.4	1.4

Recommendation:

The Governor recommends \$222,000 in FY 2020, and \$226,000 each year thereafter to fund data analytics activities at the Minnesota Department of Education (MDE), including program evaluation, research, and data analysis.

Rationale/Background:

There is a continued emphasis on data-driven decision-making to improve student learning. The MDE Data Analytics team was created in 2012 to support educators, state programs, legislators and stakeholders in their understanding, analyzing, and interpretation of education data. This team also provides a key role in program evaluation, research, data analysis, and training at a local level. Enhanced data analytics allows decision-makers to set better goals, make policy decisions, and improve teaching and learning in the classroom.

While the number of requests have increased over the years, this team has worked to improve the timeliness of responses and technical support to Minnesota districts and charter schools. However, some Data Analytics staff are currently funded through a federal grant, which will expire in September 2019. Without a new funding source, these staff would no longer be able to provide the current level of service, which will result in delays in fulfilling public data requests and support to local decision-makers who rely on MDE-provided reports.

Proposal:

The Governor recommends increased funding for MDE's Data Analytics team. The funds will support staff who conduct the following activities:

- Report Interpretation: This work includes training to school and district personnel in an effort to increase appropriate and effective use of the data provided; and outreach to families and other stakeholders. This includes collaboration with other state agencies.
- Data Requests: This work includes responding to public data requests, which come from a variety of stakeholders including the public, other state agencies, and the legislature.
- Administrative or programmatic capacity: This work includes coordinating the Minnesota Statewide Longitudinal Education Data System (SLEDs) and the Early Childhood Longitudinal Data System (ECLS) by providing programmatic capacity; and providing professional development and outreach to teachers and district staff. This is consistent with a recommendation from the 2017 OLA report. [Minnesota Office of the Legislative Auditor-Standardized Student Testing](#)

Results:

Without the assistance of existing staff with dedicated funding, the ability for schools/districts and stakeholders to effectively and correctly interpret the state's and local school's/district's progress in achieving our goals for all students.

Goal: Minnesota will reach a **third grade reading** achievement rate of 90 percent, with no student group below 85 percent, by the year 2025.

2017 Baseline	Current Result (2018)	2025 Goal	Distance from Current Result to 2025 Goal

FTEs	2.0	2.0	2.0	2.0

Recommendation:

The Governor recommends that Minnesota invest in supporting children in schools and districts identified under Minnesota's Every Student Succeeds Act (ESSA) plan and World's Best Workforce (WBWF) by expanding the capacity of Minnesota's Regional Centers of Excellence (RCEs). This investment of an additional \$1 million in FY20 and \$2.0 million each year after that, will allow the RCEs to provide on the ground coaching, training, consulting and other assistance to all identified district and school leadership teams so that they build a strong and sustainable infrastructure to implement strategic plans and research-based practices that lead to improved outcomes for children.

Rationale/Background:

Under ESSA, Minnesota is required to identify its chronically underperforming schools and to support their improvement. Schools are identified based on academic achievement in math and reading, student progress in increasing proficiency levels, English learners' progress toward English language proficiency, graduation rates, and consistent attendance. Individual student group performance in these indicators is also a focus of the accountability system.

Minnesota has already planned and implemented a coordinated regional approach to supporting schools with intensive onsite technical assistance through RCEs. However, current state funding of \$1 million a year does not support the staffing to provide the on-site intensive assistance needed in order to build the capacity at the school and district levels under new federal ESSA requirements and aligned with WBWF requirements. Under the new accountability requirements in ESSA, Minnesota has identified an increased number of schools for support. Under WBWF, districts not making progress towards WBWF goals will be identified for support, and Regional Center staff—already deployed to assist districts with underperforming schools—could be leveraged more in WBWF planning and supports. In order to sustain the needed levels of intensive support for an expanding number of schools and to add WBWF supports at the district level, the centers staffs need to expand accordingly.

Proposal:

This proposal seeks to expand the existing statewide system of support for schools offered by Minnesota's Regional Centers of Excellence (RCEs). RCEs are primarily funded with Title I federal funds (\$10.9 million), as well as \$1 million in state funding and about \$500,000 in Title II funding, to provide needed supports for schools identified under federal ESSA requirements and for districts identified under state WBWF requirements.

This funding provides more intensive supports for schools identified for “Comprehensive Support,” defined as 5 percent of Title I schools identified based on student achievement, or high schools with four-year graduation rates below 67 percent for any individual student group. This includes 47 schools and 147 high schools.

This proposal will allow Regional Centers to provide the same level of support to schools identified for “Targeted Support,” defined as any school (versus any Title I school) where any student group performs at or below Comprehensive Support schools for at least one indicator in each stage. This includes 157 schools that may need to focus on a single student group, or may need support on just some of the measures.

Funds would expand the services in the six Regional Centers in Marshall, Rochester, Sartell, Fergus Falls, Thief River Falls, and Mountain Iron. Center specialists work onsite to provide direct assistance to schools. Each staff member has a specialist area they support, and through this expansion, RCEs will be able to add additional specialists in school climate, early learning, and family and community engagement.

The proposal would also add 2 FTEs at MDE to direct and coordinate RCEs activities, and provide administrative support.

Equity and Inclusion:

Both the state WBWF goals and federal ESSA requirements are intentionally established to ensure *all* students are meaningfully included, and this proposal is aimed at supporting districts and schools in ensuring all students are given opportunities to succeed from prekindergarten through the workforce and postsecondary. The third WBWF goal is explicitly about eliminating disparities in achievement between student groups.

Under ESSA, Minnesota was a nationwide leader in ensuring that each student group (including racial groups, English learners, special education students, students receiving free or reduced-price lunch) is considered equally among the indicators. A school can be identified for support if one student group performs at or below Comprehensive Support schools.

As Minnesota conducted robust stakeholder engagement efforts around the design of Minnesota’s consolidated ESSA plan, we heard from a variety of communities (including communities of color, advocates for English learners and special education students), that schools need support to do this work and that a regional approach that empowers local districts and schools to lead school improvement works far better than a “top down” or “one size fits all” approach. In particular, we heard from representatives of our greater Minnesota or rural communities how much they value having support from experts that live and work their communities rather than those who live in the cities and may not fully understand the context of rural schools.

FY 2020-21 Biennial Budget Change Item

Change Item Title: Legal Costs

Fiscal Impact (\$000s)	FY 2019	FY 2020	FY 2021	FY 2022	FY 2023
General Fund					
Expenditures	(2,000)	4,700	0	0	0
Revenues	0	0	0	0	0
Other Funds					
Expenditures	0	0	0	0	0
Revenues	0	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	(2,000)	4,700	0	0	0
FTEs (Maintain)	0	0	0	0	0

Recommendation:

The Governor recommends \$4.7 million in FY 2020 to fund legal support costs associated with Attorney General activities and other direct court costs. It is anticipated the Minnesota Department of Education's legal support costs will increase during the next biennium due to two large lawsuits.

Rationale/Background:

MDE is a defendant in two cases that have the potential to establish landmark rulings in the State of Minnesota. During the 2017 legislative session, \$4 million of one-time funds were provided for fiscal years 2018-19 in anticipation of the two major lawsuits. Although MDE estimates \$2 million of this appropriation will cancel on June 30, 2019, these lawsuits remain in progress. These lawsuits will bring additional costs for discovery and experts, court fees, mediation services, and potential trial costs. The timeline of the lawsuits and the total amount of legal costs are uncertain and difficult to estimate.

Proposal:

This proposal would cancel \$2 million in FY 19, and appropriate \$4.7 million one-time in FY 20 to MDE for legal support costs associated with Attorney General activities and other costs related to defending and mediating lawsuits. Funds would be available for both years of the biennium, FY 2020 and FY 2021.

If this proposal is not funded, all legal costs would need to be paid from general fund operating funds, impacting the agency's ability to support schools, teachers, and students. This proposal would enable MDE to maintain approximately 16 FTEs and impacts the Attorney General's office ability to budget and plan to provide adequate legal services.

FY 2020-21 Biennial Budget Change Item

Change Item Title: Early Learning Scholarship Special Revenue Fund

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	(70,709)	(70,709)	(70,709)	(70,709)
Revenues (transfer out)	70,709	70,709	70,709	70,709
Special Revenue				
Expenditures	70,709	70,709	70,709	70,709
Revenues (transfer in)	70,709	70,709	70,709	70,709
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends that the Early Learning Scholarship appropriation be transferred to an account in the special revenue fund so that more early learning scholarships may be awarded to students and families.

Rationale/Background:

Early learning scholarships are awarded to 3- and 4-year-old children with the highest needs to improve school readiness. Scholarships are awarded in one of two ways: either directly to families or through Four-Star Parent Aware Rated programs. These awards follow statutory grant program funding, which allows a family 12 additional months after the close of a fiscal year to use their scholarship. If a family does not spend all of their award, the remaining balance is returned. Neither the regional administrator nor the Minnesota Department of Education (MDE) has the legal authority to reallocate those funds to another family on the waitlist after the fiscal year has closed. In 2017, \$8.5 million canceled from the Early Childhood Scholarships program. Despite improvements in forecasting, it is not possible to avoid all cancellations as families may gain or lose funding eligibility within the child's scholarship year.

By transferring scholarship money to the special revenue fund, funds would carryforward at the end of each fiscal year and be available until spent. This would give MDE the legal authority to reallocate returned funds, which would reduce this program's almost 1,700-student waitlist.

Proposal:

The Governor recommends that the Early Learning Scholarship funds be transferred to the special revenue fund. Maximize available. To ensure scholarships continue to be awarded and paid in a timely manner, MDE would make the following changes to the award timeline:

- Regional Administrators and Pathway II programs would have 12 months to award a scholarship to a child.
- The child would have 12 months to receive services and charge the scholarship from the award date.
- Regional administrators and Pathway II programs would have 105 days to invoice or make adjustments from the date of service.
- MDE would identify funds not awarded within 12 months and work with regional administrators on a plan for awarding the next twelve months or reallocating the money to another program that has a waiting list. This would give the new program time to award to children and meet the award and payment schedule outlined above.

Transferring the Early Learning Scholarship appropriation to an account in the special revenue fund would simplify the payment system for the scholarship program, improve MDE's program management and oversight

capabilities, and ensure MDE can meet the commitments of these children for the full 12-month period of their scholarship.

Equity and Inclusion:

Early Learning Scholarships increase access to high-quality early childhood programs for 3- and 4-year-old children with the highest needs to improve school readiness for all young children. Scholarships provide support for children to attend a high-quality early learning program as rated through Parent Aware, Minnesota's quality rating and improvement system. Priority for scholarships are given based on family income and child poverty, and to children birth to age 2 if they meet one or more of the following criteria: child of a teen parent; currently in foster care; in need of child protective services; or experienced homelessness in the last 24 months.

Results:

MDE tracks the distribution of scholarship across Minnesota to ensure an equitable geographic distribution. As the primary goal of early learning scholarships is to improve access to high-quality early learning programs for children at most risk of not being school ready by kindergarten, further tracking is done by child's age, child's race and ethnicity and child's language. MDE, along with their partners and grantees, review the data to develop improved outreach and collaborations to improve access to high-quality programs through scholarship awards. Early learning scholarships serve a diverse population.

In FY 2017, for those children reported, Pathway I scholarships were awarded to children speaking 33 languages other than English in their home, or 15.2 percent of awards. Pathway II scholarships reached even more children from diverse back grounds with 49 languages other than English, 22.7 percent of awards. While 14.9 percent of families chose not to provide race and ethnicity data, 46.6 percent of children were identified as children of color, compared to data from the 2013 American Community Survey, which identified a non-white child population under age 5 of 25 percent.

FY 2020-21 Biennial Budget Change Item

Change Item Title: Board of School Administrators Maintain Funding Structure in FY 2020

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	232	232	232	232
Revenues	260	260	260	260
Other Funds				
Expenditures	(232)	(232)	(232)	(232)
Revenues	(232)	(232)	(232)	(232)
Net Fiscal Impact = (Expenditures – Revenues)	28	28	28	28
FTEs	0	0	0	0

Recommendation:

The Governor recommends maintaining the current funding structure for the Board of School Administrators (BOSA) by appropriating their operating budget from the general fund and depositing all school administrator licensure fees to the general fund. This recommendation brings both the receipts and appropriation to support BOSA back to the general fund to simplify and ensure consistent funding for the agency.

Rationale/Background:

Beginning in FY 2020, BOSA's funding structure will change so that licensure fee revenue is deposited into and operating dollars are appropriated out of the Educator Licensure account in the special revenue fund. Currently, BOSA is general fund appropriated and all licensing fees for school administrators are paid to the general fund. Changing BOSA's funding stream poses many administrative challenges. Historically, the board has not consistently collected enough receipts in a fiscal year to fully fund their operating budget. In addition, the board does not receive the majority of their fee revenue until November of each year. This will result in the board relying on cash flow assistance at the start of every fiscal year so that they may continue to support their operations. This recommendation brings both the receipts and appropriation to support BOSA back to the general fund to simplify and ensure consistent funding for the board.

Proposal:

The Governor recommends striking statutory language, which appropriates BOSA's operating funds from the Educator Licensure account in the special revenue fund starting in FY 2020. BOSA would instead remain appropriated entirely out of the general fund, and would continue to deposit licensure fees into the general fund.

Results:

This proposal is intended to ensure consistent funding for the board so they are able to provide current levels of service more effectively.

Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: Board of School Administrators Operating and Revenue Increase

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	170	115	115	115
Revenues	115	115	115	115
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	55	0	0	0
FTEs	1	1	1	1

Recommendation:

The Governor recommends increasing the operating budget for the Board of School Administrators (BOSA) by \$170,000 in FY 2020, and by \$115,000 each year thereafter. This additional funding will go to support increased ethical inquiries; more rigorous review of continuing credit requests; data collection and analysis; the design, build and maintenance of a new automated licensure fee collection system, and miscellaneous operating expenses.

The Governor also recommends increasing the annual fee from \$75 to \$100 for active administrators, and from \$32.50 to \$50 for inactive members. This will generate an additional \$87,000 a year in fee revenue.

Rationale/Background:

The Board of School Administrators was created by the state legislature in 2001 to enforce standards, approve university preparation programs and alternative pathways for administrators, establish rules on continuing education and professional development, and adopt and implement a rigorous code of ethics. BOSA is staffed by two employees who must manage an increasing number of ethical inquiries; more rigorous review of continuing credit requests; and data collection and analysis.

With additional resources, BOSA could:

- Process additional ethical inquiries, which vary in complexity and administrative time to resolve. In FY 2018, the board processed 121 ethical inquiries, an increase of 29 percent since FY 2016.
- More thoroughly review clock hours, attendance, and program standards and goals for accuracy, quality and effectiveness. Currently, BOSA is required to review and approve continuing education clock hours. Administrators are required to obtain 125 clock hours over a five-year period. BOSA has limited capacity to review all clock hours.
- Gather and analyze data to give policymakers more accurate and timely data with meaningful measurements and assessments of licensure and preparation programs.
- expedite processing of 45 variance requests a year, the 566 new administrative licenses every year, the 2,000 license renewals, most of which must be accelerated to meet the emergency needs of the school districts.
- Cover unplanned, mandated costs such as legal expenses or other expenses involving when employees get sick or retire, and allow for additional operating expenditures related to conducting board meetings such as travel reimbursements and meals for board members.

Proposal:

The Governor recommends increasing BOSA's operating appropriation as follows:

- \$80,000 each year to hire one Office Administrative Assistant Intermediate.
- \$21,000 each year for mandatory, unplanned expenses such as contract settlements, employee retirements, and court costs associated with discipline cases before an administrative law judge.
- \$69,000 in FY 2020 to create a new automated fee collection system; and \$14,000 each year thereafter to maintain the system.

The Governor also recommends increasing the annual fee for active administrative license holders from \$75 a year to \$100. The annual fee for inactive license holders would increase from \$32.50 to \$50 a year. This fee was set by the legislature in 2002 and has not increased since. On February 12, 2018, the board unanimously voted to increase these fees. This recommendation would increase non-dedicated general fund receipts by an estimated \$87,000 a year.

Results:

Each year, the Board of School Administrators:

- Licenses 7,037 Minnesota school administrators, which is an increase of 2.3 percent since 2016; and
- Certifies 43 administrative preparation programs at Minnesota's 14 universities every five years; and
- Processes over 120 ethics inquiries; and
- Awards over 1,600 certificates of continuing education.

Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: Regional Library Telecommunications Aid

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends amending statutory language governing Regional Library Telecom Aid (RLTA) to increase access to the internet and technology in regional and public libraries by expanding the allowable uses of funds. This recommendation would not increase total aid.

Rationale/Background:

RLTA provides state funds to offset the cost of internet access in public libraries that participate in the federal e-rate program. This program provides discounted telecommunications aid to impoverished, rural libraries and schools. RLTA spending is also used for the state's maintenance of effort for federal Library Services and Technology Act (LSTA) funding.

RLTA has a surplus of funds after a statutory change in 2015 which fully aligned the state program with the federal e-rate program. Current allowable costs are for activities that establish basic connectivity and equipment such as routers, switches and wiring. Since this change, the amount of RLTA that is needed to fully fund connectivity has decreased substantially, largely due to lowered costs at some of the larger regional library systems. At the same time, requests for basic equipment have been modest. This has led to a surplus of funds in RLTA. Because of the interaction with federal funding, a decrease in spending for RLTA directly results in a decrease in federal funds. Additionally, while e-rate and RLTA combine to cover the full cost of connectivity, libraries have additional needs related to providing access to the internet and technology that do not fall under the e-rate umbrella.

Proposal:

This proposal would allow regional public libraries to use surplus funds for other costs related to providing internet and technology access. This includes but is not limited to the purchase of personal computers, laptops, e-readers, tablets, wireless access points (and associated software), printers, technology for remote locations, software to manage internet access, internet security and Children's Internet Protection Act (CIPA) compliance.

Expanding the allowable use of RLTA funds would permit libraries to keep pace with the variety of needs related to providing access to the internet and technology and is likely to be supported by the regional public library systems. Implementation would require MDE to determine the timing for distribution of funds, establish processes for application and award of funds, as well as requirements for documentation that would ensure the reasonableness of costs.

Equity and Inclusion:

RLTA funds the telecommunications infrastructure necessary for library-based programs and services that support World's Best Workforce goals and serve all Minnesotans. By allowing additional uses of funds, libraries will be better situated to respond to the needs of individuals in the community who lack internet access and access to technology.

Results:

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>

Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: Kindergarten Student Accounting Simplification

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	96	106	107	107
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	96	106	107	107
FTEs	0	0	0	0

Recommendation:

The Governor recommends changing the average daily membership (ADM) calculation for kindergarten students with a disability by making it the same as the ADM calculation for other kindergarten students. This will eliminate an unintended and inequitable disparity in funding between kindergarten students with a disability and other kindergarten students. Currently, kindergarten students with a disability generate slightly less general education revenue than their nondisabled peers who are served the same number of hours during the fiscal year.

Rationale/Background:

- ADM and pupil units for kindergarten students with a disability have long been calculated based on the ratio of the number of hours of assessment and education services required in the fiscal year by the student's individualized education plan (IEP) to 875 hours, with a limit of one pupil unit per student.
- Since the ADM calculations for kindergarten students with a disability are based on total hours served during the fiscal year and are limited to 1.0 ADM, kindergarten students with a disability do not generate extended time revenue when they are served in a targeted services program outside of the regular school day.
- Pupil units for nondisabled kindergarten students were historically limited to 0.50, and later to 0.612. When all-day, every day kindergarten funding was enacted in 2013, the ADM calculations for kindergarten students with a disability were inadvertently not updated to make them consistent with the calculations for kindergarten students without a disability. Kindergarten students without a disability generate one pupil unit if enrolled for 850 hours during the school year, and also qualify for extended time funding if enrolled in a targeted services program outside of regular school hours.
- As a result, kindergarten students with a disability generate less general education revenue per hour enrolled than non-disabled kindergarten students for two reasons: (1) The number of hours required to generate one ADM is 875 for students with a disability and 850 for students without a disability, and (2) students with a disability do not qualify for extended time revenue if they are served outside of regular school hours in a targeted serves program.
- For grades one through 12, ADM for students with a disability is calculated in the same manner as for students in the same grade level without a disability.
- Calculating ADM for kindergarten students with a disability in the same manner as for kindergarten students without a disability will also simplify the school finance system by eliminating a separate set of ADM calculations for these students.

Proposal:

Beginning in FY 2020, ADM and pupil units for kindergarten students with a disability would be calculated in the same manner as for kindergarten students without a disability. The impact on regular ADM for kindergarten students with a disability will be negligible because nearly all of these students are currently served in a program providing 875 or more hours of service per year.

- Kindergarten extended time ADM is projected to increase by 8 in FY 2020 and later, a 2.7 percent increase.
- The cost of the proposal would be \$96,000 in FY 2020, \$106,000 in FY 2021, and \$ 107,000 each year thereafter.

Equity and Inclusion:

The proposal would eliminate an unintended and inequitable disparity in funding between kindergarten students with a disability and kindergarten students without a disability. While there are no documented cases of kindergarten students with a disability being denied access to extended time programs, this proposal would ensure kindergarten students with a disability do not receive less funding than kindergarten students without a disability.

Results:

The calculation of general education revenue will be simpler and more equitable.

Statutory Change(s):

M.S. 126C.05, subdivision 1; M.S. 126C.10, subdivision 2d

Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: Achievement and Integration Administrative Set Aside Revenue

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends amending Minnesota Statutes, section 124D.862 in order for the 0.3 percent of achievement and integration revenue transferred to the Minnesota Department of Education (MDE) under Subdivision 1 (b) to administer the program be based on second prior year expenditures rather on estimated amounts. This will create more predictability in funding.

Rationale/Background:

Each year, 0.3 percent of each district's initial achievement and integration revenue is transferred to the department for the oversight and accountability activities required under section 124D.862 and section 124D.861. Because MDE can only estimate the amount of initial revenue districts will expend in a given year, the amount the agency budgets for oversight and support of the Achievement and Integration program must be adjusted. In other words, the agency adjusts its budget once districts' actual expenditures of achievement and integration revenue are known. Using an estimated revenue amount in this way has resulted in overspending and underspending the agency's administrative budget for this program.

To address this, the Governor recommends using prior year expenditures as the basis for calculating the 0.3 percent set aside for the agency. With second prior year data, the exact amount of the transfer would be known about six months before the start of the fiscal year rather than six months into the fiscal year, avoiding the need to do a mid-year budget adjustment.

Proposal:

This proposal recommends that the amount set aside for agency administration be calculated based on second prior year actual expenditures rather than on an estimated amount.

There will be no change in the amount of revenue generated. This change will only affect how the agency calculates and then budgets the amount of revenue to use as the basis for the .3 percent set-aside for the agency included in 124D.862 Subd. 1 (b). This set-aside is added to MDE's budget to fund the agency's accountability and oversight of the Achievement and Integration program.

This change will enable MDE to more accurately budget for staffing and resources to support the Achievement and Integration program. This change supports administrative capacity to provide technical assistance and oversight to districts in the Achievement and Integration program. Agency staff provide resources that help these districts to align their programs and use of revenue with requirements in statute and rule.

Equity and Inclusion:

Currently, 126 districts participate in the Achievement and Integration program working to reduce gaps in reading and math, while promoting strong and meaningful integration of students and ideas. The Achievement and Integration program is intended to increase racial and economic integration, eliminate student achievement disparities, and increase equitable access to effective and more diverse teachers. Providing funding stability for the oversight and support of this program will make it more likely that more support will be provided and increase the likelihood that the purpose of the program will be realized. Those impacted by this change may be the students, families, and staff of participating districts.

Results:

The table below lists the number of racially identifiable schools and racially isolated districts participating in the program for the years listed.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>2014-2015 2015-2016</i>	<i>2016-2017</i>	<i>2017-2018</i>
Quantity	Number of participating racially isolated districts	40	40	39
Quantity	Number of participating racially identifiable schools	55	55	55
Quantity	Number of participating districts with racially identifiable schools	15	15	15

Districts self-report on the extent to which they have realized the goals in their plans. The current achievement and integration plans were submitted in FY 2017 and will end in FY 2020. First year results for these three-year plans will be available in the fall of 2018.

Districts' progress toward the goals in their prior three-year plan are listed below.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>2015</i>	<i>2017</i>	<i>Number of Districts</i>

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clarifying Adult Basic Education Aid Calculation

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends clarifying the language regarding the adult basic education (ABE) growth calculation to prevent decreases in funding.

Rationale/Background:

Current statute directs the appropriation for ABE to grow at the lesser of the current growth rate in contact hours, or 3 percent. Due to a strong economy, the contact hours in ABE are declining, leading to a negative growth rate. The Minnesota Department of Education (MDE) has interpreted current statute to mean that ABE funding should not decline when there is a negative growth in contract hours (or a growth rate less than 1.0).

Proposal:

This proposal would put into law current practice by clarifying that the appropriation for ABE should be held steady when there is a decline in contact hours. During times of positive growth rates, the appropriation would continue to increase as indicated in statute.

Equity and Inclusion:

This proposal would protect ABE funding. Students in ABE are traditionally underrepresented and underserved groups, including a higher concentration of people experiencing poverty and people of color. This proposal will help maintain funding to meet their needs.

Results:

Type of Measure	Name of Measure	FY 2013	FY 2016
Quantity	Clients who obtained a high school diploma or GED	3,932	1,782
Quantity	Clients who entered postsecondary education	2,971	8,562
Quality	Clients who were unemployed at program entry who obtained employment	42%	49%
Quality	Clients who were employed at program entry who retained employment	72%	73%

Statutory Change(s):

M.S. 124D.531

Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: Head Start Background Studies

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	51	8	8	8
Revenues	(51)	(8)	(8)	(8)
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends that statutory authority be given to the Minnesota Department of Human Services (DHS) to add Head Start programs that are license-exempt and not receiving Child Care Assistance Program (CCAP) funds and Tribal Head Start programs to the list of programs that can use DHS's background study system, which currently serves DHS licensed Head Start and other individuals working licensed early childhood programs. This brings these Head Start Programs into compliance with federal requirements.

Rationale/Background:

- Head Start programs must fully implement a new federally required background check process no later than September 30, 2019.
- DHS amended legislation two years ago to meet new Child Care Development Block grant background study requirements that will also meet the Head Start performance standards but some Head Start programs are not currently eligible to have access to the system.
- This proposal is built on analysis and collaboration between MDE and DHS. DHS provided the amended language for their background check system services. DHS welcomes the change and recognizes the improvements to the system and improvement in implementation of background checks for all Head Start programs.
- The background studies would increase revenues to DHS, but because the fees only cover the cost of doing the studies, the proposal is revenue neutral.

Proposal:

This proposal would provide DHS the statutory authority to add Head Start programs that are license-exempt and not receiving CCAP funds and Tribal Head Start programs to the list of program that can use DHS's background study system. Head Start programs often have a mix of locations that are licensed and licensed exempt within one Head Start grantee agency. If accepted, this legislative proposal will allow a Head Start grantee agency to use one background study process for all of their staff and locations.

This proposal would streamline administration of the background check process for all Head Start grantee agencies though access to the DHS background study system that is compliant with Head Start federal requirements for background studies. This will result in a reduction of paperwork, lessen hiring delays and strengthen the ability to move staff across Head Start sites when needed.

It is critical for federal compliance of the Head Start performance standards that this proposal be adopted in 2019. MDE's Head Start Collaboration Office continues to hear from program that this proposal would be an essential fix.

Equity and Inclusion:

This proposal supports Head Start programs that are license-exempt or tribally licensed serve children and families who live in poverty and American Indian children. As Head Start programs provide services to low-income families, this proposal will support low-income families by removing administrative barriers on providers that can stymie staffing classrooms.

Results:

Currently about 60 percent of Head Start programs do have access to the DHS background study system. This change will allow all Head Start programs to use the DHS background study system and meet federal Head Start performance standards.

FY 2020-21 Biennial Budget Change Item

Change Item Title: Eliminate Off-Grade Testing Questions

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	(\$15)	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	(\$15)	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends adopting recommendations from the Office of the Legislative Auditor (OLA), and revising the requirements for grades 3-8 Math and Reading Minnesota Comprehensive Assessment (MCA) by:

- Eliminating off-grade questions, and
- Eliminating the reporting of a career and college readiness trajectory for grades 3-8.

This will shorten tests by eight to 15 questions for students. There would be a one-time savings of \$15,000 for decreased test construction and statistical analysis. Statewide Testing is allocated approximately \$10,800,000 annually from the state.

Rationale/Background:

- In 2013, legislation was passed requiring that beginning in school year 2015-2016 grades 3-8 Math and Reading MCA:
 - Be adaptive;
 - Include off-grade content, administered based on student performance; and
 - Report a career and college readiness score.
- In spring 2016, grades 3-8 Math and Reading MCA were adaptive and included off-grade content as required.
 - Adaptive tests are a type of assessment in which the tests are built for the student using a computer algorithm. Questions are selected for a student based on how the student answers the previous questions, in the case of the Math MCA, or the questions in a previous passage set, for the Reading MCA. The grades 3-8 Math and Reading adaptive test allows for the operational test to be reduced by approximately eight questions compared to previously fixed forms.
 - The grades 3-8 Math and Reading MCA ranged from eight to 15 off-grade questions. Off-grade questions are test questions that are given to students based on how they did on the operational MCA test. Based on the student's performance, they could be given MCA test questions from no more than two grade levels above or below the student's current grade (except in grade three where no items are available below grade three and grade eight where no items are available from grades immediately above eight).
 - The career and college ready score is based on MCA question responses and off-grade question responses.
- Due to the increased test length (8-15 questions) educators expressed a concern about the impact to students and the loss of additional instructional time due to the inclusion of these required off-grade

questions. These off-grade questions are included on the MCA only because of state legislation; this state requirement is beyond the minimum required by federal legislation. On average, the off-grade questions added approximately 10-15 additional minutes of testing time.

- In March 2017, the OLA published a report evaluating Minnesota’s testing program: [Minnesota Office of the Legislative Auditor-Standardized Student Testing](#).
 - One of their recommendations was to research the effectiveness of including the off-grade items.
 - MDE has conducted analyses to examine the effectiveness of off-grade items. The report was published in March 2018 [Analyses on the Effectiveness of the MCA-III Off-Grade Tests](#)
 - The analysis found minimal, if any, improved measurement precision as a result of including the off-grade questions to determine a student’s career and college readiness score.
 - Another OLA recommendation was for the legislature to eliminate the requirement of reporting an empirically-derived trajectory toward career and college readiness for students in grades 3-8.
 - The career and college readiness benchmarks are very close to the MCA “meets the standards” score.
 - Many stakeholders do not support the appropriateness and are concerned about the unintended consequences of further “labeling” young students. For example, telling a third grade student (and their family) they are not career and college ready may be detrimental.
- During 2017, MDE convened a Future Assessment Design Working Group.
 - The working group’s recommendations include removing the off-grade items from the MCA.
 - The working group also recommended eliminating the requirement to report the career and college readiness trajectory.
 - Recommendations are included in the [Future Assessment Design Working Group Report](#)
- In 2017, MDE also assembled an Assessment Advisory Committee.
 - This committee’s recommendations include removing the off-grade items from the MCA.
 - The committee also recommended eliminating the requirement to report the career and college readiness trajectory.
 - The Committee’s findings are in the [Assessment Advisory Committee Recommendations Report](#)

Proposal:

- By eliminating the off-grade requirement, the overall test length would be decreased by 8-15 questions, allowing for decreased time spent testing.
- Eliminating the requirement to report a career and college ready score for students in grades 3-8 will remove a possibly damaging score.
- If these requirements are eliminated during the 2019 legislative session the change will be reflected in the 2020 tests.
- These changes are supported and recommended by two groups of stakeholders. Their reports are linked above in the background section.
- These changes are also desired by educators and recommended by other stakeholders. This is primarily due to decreasing testing time.
- This proposal is recommended and supported by the OLA.

Equity and Inclusion:

This proposed change will have a greater impact on English learners. English learners already have additional tests that are required by federal and state law, which results in these students spending more time testing. English learners, on average, spent 10-20 minutes on the off-grade portion of the MCA. By eliminating these additional items, all students, but especially English learners, will have more time for instruction.

Results:

More details are available in the Off-Grade Effectiveness Evaluation [Off-Grade Effectiveness Evaluation](#).

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>

Statutory Change(s):

M.S. 120B.30, subd 1, 1a

Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: Referendum/Local Optional Revenue Simplification

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends making the calculation of general education revenue simpler and more transparent by converting \$300 per pupil of referendum revenue to local optional revenue (LOR), making all districts statewide eligible for \$724 per pupil of LOR, and severing the current interactions between referendum revenue and LOR. All remaining referendum revenue would be voter approved. Referendum and LOR equalization formulas would be adjusted to maintain the same mix of aid and levy as under current law, and the referendum cap would be reduced by \$300 to maintain the same effective cap on referendum revenue as under current law.

Rationale/Background:

Under legislation enacted in 2013 and 2014:

- All school districts statewide are eligible for \$424 per pupil of LOR. LOR is an equalized levy which does not require voter approval. LOR is equalized at the same level as Tier 2 referendum revenue (the portion of referendum revenue between \$300 and \$760 per pupil).
- LOR is subtracted off each district's referendum revenue approved by the voters before January 1, 2014. The size of the LOR subtraction is adjusted annually based on the portion of the maximum LOR levy certified by the district.
- School districts with referendum revenue remaining after the LOR subtraction may convert up to \$300 per pupil of the remaining voter approved referendum revenue to board-approved referendum revenue for up to five years. The board-approved referendum revenue can be renewed by school board resolution.
- School districts with less than \$300 per pupil of referendum revenue remaining after the LOR subtraction may approve an increase in referendum revenue by board action to raise the net referendum revenue after the LOR subtraction to \$300 per pupil.

The interactions among voter approved referendum revenue, board approved referendum revenue and LOR are complex and lack transparency. Considerable confusion has been created. In fact, one district needed to get special legislation approved in 2015 to avoid an unintended loss of referendum revenue.

Separating referendum and LOR calculations will make both sets of calculations much simpler and more transparent. Referendum revenue will be limited to amounts approved by the voters in a referendum election, and the full amount available to school districts by board resolution without voter approval will be included in LOR. The LOR subtraction to pre-2014 referendum allowances will be made permanent, and referendum allowances will no longer float up or down annually based on the amount of LOR accessed by the district.

Proposal:

Beginning in fiscal year (FY) 2021 (levies certified in 2019 for taxes payable in 2020), simplify referendum and LOR calculations by making the following changes:

- Set the maximum LOR allowance for all districts at \$724, an increase of \$300 from the current LOR allowance. The \$724 is the amount of equalized referendum and LOR levy available to all districts statewide by board action without voter approval.
- Offset the increase in the LOR allowance dollar for dollar with a reduction of \$300 per pupil in each district's referendum allowance. This is the portion of referendum revenue available to all districts statewide by board action without voter approval.
- Eliminate the reduction to equity revenue for districts with no referendum revenue to neutralize the impact on equity revenue of the \$300 transfer referendum to LOR.
- Permanently reduce all remaining referendum allowances authorized before 2014 by \$424, instead of recalculating these allowances each year based on how much each district certifies as its LOR levy that year.
- Retain the inflation adjustment as part of referendum revenue for the remaining years of voter-approved inflation for any inflation-adjusted referendum allowances shifted to LOR.
- Neutralize the property tax impact of these changes by establishing a two-tiered equalization formula for LOR, with the first \$300 per pupil equalized at \$880,000 and the remainder equalized at \$510,000. Tier 1 referendum equalization would be eliminated.
- The referendum cap would be reduced by \$300 to reflect the transfer of \$300 to LOR, retaining the same effective cap on referendum allowances.
- There would be no net change in revenue, aid or levy for any district. This assumes that the small number of districts that opted to levy less than the \$300 available in referendum revenue by board-action will elect to maintain their levies at the same level when they are converted to LOR or equity revenue.

Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: Eliminate Duplicative Growth Model in Statute

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends replacing a growth formula set in statute to align with a new model, consistent with stakeholder input and new federal requirements. This was also recommended by the Office of the Legislative Auditor.

This has no net impact on education funding.

Rationale/Background:

There continues to be interest in measuring and using individual student performance over time. This is typically referred to as “growth”, and growth measures compare a student’s current test score to the student’s previous test score. Growth tells us whether a student is meeting proficiency expectations and how well the student is improving or progressing over time.

Prior to 2012, growth was primarily used for public reporting and local district data analysis purposes. In 2009, Minnesota Statutes 120B.299 defined a specific formula for a low, medium and high student growth model with prescribed state growth targets. Minnesota Statutes 120B.36, subdivision 1, has required that the percentage of students showing low, medium and high growth must be publicly reported.

Since this model was put in state law in 2009, many Minnesota stakeholders have become more interested in finding the best way to measure growth in order to meet educator and student needs in the state. As a result, different growth models have been developed, providing an unclear and instable use of growth measures and leading to confusion among stakeholders.

Minnesota’s No Child Left Behind (NCLB) waiver passed in 2012 and was the first major emphasis on using growth in the state’s school accountability system. A particular model, referred to as the z-score growth model, was used in Minnesota’s NCLB Waiver accountability system from 2012 to 2016. Z-score measures any growth as growth, including within a category (from the low range of does not meet standards to the high range of does not meet standards, for example).

The federal Every Student Succeeds Act (ESSA) gave the state an opportunity to take a close look at its growth models in collaboration with stakeholders to determine how student growth should be measured. MDE spent months working with advocates and technical experts to build the best growth model for our state’s ESSA accountability system.

This new growth model, referred to as a transition matrix, was selected for inclusion in our state ESSA plan and this model was first used in 2018 for school accountability. A transition matrix measures growth that transitions across categories, i.e., from does not meet standards to partially meets standards. It is federally required that Minnesota publicly report this measure of growth at the school and district level on our State Report Card. In addition to this primary growth model measuring student progress in academic math and reading, a separate growth model is required in ESSA specific to English learner progress toward English language proficiency. This leaves the state with many growth models, leading to confusion among stakeholders.

Further, page 68-69 of the OLA report, provides a recommendation to remove the specific MDE growth formula in law and instead provide broad guidance to the department. This report goes on to say it is confusing to report different measures of the same concept (growth) and changing context and requirements over time make specific formulas obsolete or inaccurate.

Lastly, the proposal to change the literacy incentive aid language (124D.98) has no impact on district funding. It will maintain the existing formula but eliminate the reference to the growth model.

Proposal:

This eliminates a growth model that is used to calculate literacy incentive aid. This calculation will be maintained in order to not change funding levels, but will no longer be publicly reported.

Equity and Inclusion:

This proposal affects all students in Minnesota equally. It also respects the stakeholder engagement process that led to the development of this growth model. Minnesota Department of Education held over 300 public meetings developing the state's ESSA plan.

Statutory Change(s):

If the proposal will require statutory changes, include the statute number here.

Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: Early Learning Data Sharing Agreement

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends allowing the Minnesota Department of Education (MDE) and the Minnesota Department of Human Services (DHS) to share information about service providers who have been disqualified from receiving Early Learning Scholarships, Child Care Assistance Program (CCAP), and Child and Adult Care Food Program (CACFP) funds. This would ensure that service providers who have been disallowed from receiving funds from one program, would no longer be eligible to receiving funds from the others.

Rationale/Background:

- Currently, public programs cannot share data; therefore, a disqualified program may continue to receive funds from one source when disallowed by another. Currently, DHS has the authority to stop CCAP payments to a particular scholarship and CACFP-eligible program, but no similar process exists with Early Learning Scholarship or CACFP.
- Without the ability to share data, MDE and DHS cannot analyze the extent of the situation.
- In the best interest of both departments and the state, fraud has been raised in the media on a large scale.
- This prevents programs taking advantage of state systems that have not yet been able to coordinate data, and it saves administrative time recouping funds later in the programs not yet on hold for payment.

Proposal:

The Governor recommends making statutory changes, which would allow data to be shared across agencies specifically related to programs receiving funding from CCAP, CACFP, and Early Learning Scholarships in instances when a program has been determined disqualified from receiving funding from any of the three programs. This would allow consistency in disallowing a program to receive funding from any of these programs once disallowed by one of the three. This will build public trust of the use of funds and allows state agency partners to streamline administrative requirements and reach.

Program: Education Leadership

education.mn.gov/MDE/index.html

AT A GLANCE

Set policy and direct the annual spending of \$9.6 billion in fiscal year (FY) 2017.

Provide guidance and assistance to:

- 861,540 students in prekindergarten through grade 12.
- Over 125,000 children participating in early learning programs.
- 331 school districts and 169 charter schools.
- 61,822 adult learners (FY 2018).

PURPOSE & CONTEXT

The mission of the Minnesota Department of Education (MDE) is: “Leading for educational excellence and equity. Every day for every one.” MDE strives to create the World’s Best Workforce by focusing on five key student outcome goals: all students ready for school, all students reading at grade level in third grade, all achievement gaps closed, all students graduating from high school, and all students ready for career and college.

We provide the infrastructure for services and assistance to children, students, teachers, parents and schools. We exist to improve educational achievement by establishing clear standards, measuring performance, assisting educators, and increasing opportunities for lifelong learning.

SERVICES PROVIDED

Services provided by MDE support three overarching strategies:

1. **Direct support:** We directly support the continuous improvement of teaching and learning to schools, teachers, children, students and parents.
 - Provide training and resources to assist schools, parents, and the department in maintaining compliance with state and federal laws and policies.
 - Assist schools and childcare providers in providing nutritious meals and creating safe and healthy learning environments.
 - Develop and extend statewide library services.
 - Establish and administer a School Safety Technical Assistance Center to assist districts and schools to provide a safe and supportive learning environment.
2. **Prekindergarten through 12th-grade systems:** We provide systems support through program and policy development and assessment.
 - Administer Carl Perkins federal grant program.
 - Administer and collect data for the state’s assessment and accountability system.
 - Develop and implement assessment systems to measure student knowledge and skills on Minnesota K-12 Academic Standards and Minnesota English Language Proficiency Standards.
 - Develop academic standards.
 - Monitor school district and MDE compliance with state and federal education laws.
 - Administer the Minnesota Braille and Talking Book Library.
 - Implement the student maltreatment, charter schools, and early education policies and programs.

- 3. Guidance, technical assistance, and funding:** We provide supportive leadership to all educational entities by providing guidance and technical assistance to meet state and federally legislated requirements, and administering school funding programs.
- Provide leadership, policy direction, and information technology services for the agency.
 - Develop tools and provide guidance to assist schools in the implementation of programs and academic standards.
 - Provide policy guidance for school choice programs, including online learning.
 - Distribute formula and competitive grants, as well as aid programs.
 - Calculate state aid and distribute payments to school districts and charter schools.
 - Calculate school district local property tax levies.

RESULTS

Goal: Minnesota will reach a **third-grade reading** achievement rate of 90 percent, with no student group below 85 percent, by the year 2025.

<i>2017 Baseline</i>	<i>Current Result (2018)</i>	<i>2025 Goal</i>	<i>Distance from Current Result to 2025 Goal</i>
56.4%	55.6%	90%	34.4 percentage points

Goal: Minnesota will reach an **eighth-grade math** achievement rate of 90 percent, with no student group below 85 percent, by the year 2025.

<i>2017 Baseline</i>	<i>Current Result (2018)</i>	<i>2025 Goal</i>	<i>Distance from Current Result to 2025 Goal</i>
57.5%	56.4%	90%	33.6 percentage points

Goal: Minnesota will reach a 95 percent **consistent attendance** rate, with no group below 90 percent, by the year 2020.

<i>2016 Baseline</i>	<i>Current Result (2017)</i>	<i>2020 Goal</i>	<i>Distance from Current Result to 2020 Goal</i>
86.7%	85.6%	95%	9.4 percentage points

Goal: Minnesota will reach a **four-year graduation** rate of 90 percent, with no group below 85 percent, by the year 2020.

<i>2012 Baseline</i>	<i>Current Result (2017)</i>	<i>2020 Goal</i>	<i>Distance from Current Result to 2020 Goal</i>

Program: Educational Leadership and Support

Activity: Regional Centers of Excellence

education.mn.gov/MDE/dse/rc/

AT A GLANCE

- In fiscal year (FY) 2018, the Regional Centers provided support to:
 - 3 School Improvement Grant schools
 - 21 Priority schools
 - 54 Focus schools
 - 83 Continuous Improvement schools
- From July 2015 to May 2017, Center staff provided 64,956 hours of direct support to just priority and focus schools.

PURPOSE & CONTEXT

The Regional Centers of Excellence were established in partnership with Minnesota Service Cooperatives to provide supports to districts and schools to meet goals in Minnesota World's Best Workforce legislation and to support schools identified as needing support under Minnesota's plan for the federal Every Student Succeeds Act (ESSA). Comprehensive support and improvement (CSI) schools are the 5 percent most persistently low-performing Title I schools or any public high school with a graduation rate less than 67 percent for any student group. Targeted support and improvement schools include any public school that has one or more student groups performing at a similar level as (CSI) schools or the school's overall performance is similar to CSI schools but they were not selected due to higher attendance.

- The Centers provide onsite technical assistance and professional development to schools and districts identified as underperforming based on Minnesota's accountability system under ESSA.
- The Centers support the Minnesota Department of Education's commitments to equity by prioritizing equity, developing leadership teams across levels of the system, making data visible and actionable, working on the conditions for learning, and supporting budget decisions that more equitably distribute resources practices.
- The Centers use a stage-based framework with schools that incorporates three core support elements:
 1. Building and using implementation teams to actively lead implementation efforts.
 2. Using data and consistent, frequent feedback loops to drive decision-making and promote continuous improvement.
 3. Developing an implementation infrastructure that uses evidence-based practices, fosters change, and enables continuous improvement.

SERVICES PROVIDED

Identified schools and districts receive intensive on-site coaching and technical assistance in alignment with Minnesota's support and improvement timeline in the following areas:

- School leadership teams that work on continuous improvement.
- Continuous improvement processes including comprehensive needs assessment, root-cause analysis, improvement plan design and implementation.
- Selection and implementation of evidence-based practices.
- School, family and community engagement.
- Identification and implementation of quick wins for school improvement.

- District or charter level practices that support school improvement including resource equity studies and alignment of school improvement activities to local World's Best Workforce initiatives.

Schools and districts also participate in professional development activities.

The Centers also develop resources and tools for use by all schools and districts Minnesota to support data use, planning, teaching and learning, and community engagement.

The Minnesota Department of Education provides program evaluation, strategic leadership, coordination, and support for this program.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>FY 2014</i>	<i>FY 2018 or Most Current Data</i>
Quantity	Percentage of Students Proficient in Math in Priority and Focus Schools	36.6%	35.3%
Quantity	Percentage of Students Proficient in Reading in Priority and Focus Schools	35.5%	38.8%
Quantity	Multiple Measures Rating (Priority and Focus Schools)**	26.3%	31.4%
Quantity	Focus Rating (Priority and Focus Schools)***	25.8%	29.3%
Quantity	Achievement Gap Reduction Score (Priority and Focus Schools)****	0.3397	0.2161
Quantity	Growth Score (Priority and Focus Schools)	-0.2158	-0.1295

*Current schools were identified based on 2014 results.

** Multiple Measures Rating (MMR) was a measurement of school performance used for holding schools accountable under Minnesota's approved No Child Left Behind waiver. The MMR considered the proficiency, growth, achievement gap reduction and graduation rates of schools. The MMR was no longer a part of accountability starting in 2017.

*** The focus rating (FR) is a secondary measurement within the MMR that measures schools specifically on the performance of student groups that exhibit an achievement gap in Minnesota. The MMR was no longer a part of accountability starting in 2017.

**** The lower the achievement gap reduction scores, the more progress made toward closing the achievement gap. The MMR was no longer a part of accountability starting in 2017.

M.S. 120B.115

Program: Educational Leadership

Activity: Board of School Administrators

bosa.mn.gov/BOSA/index.htm

AT A GLANCE

- The Board of School Administrators is a ten-member board appointed by the governor and confirmed by the senate for their outstanding contributions in their respective fields and for their commitment to the highest ethical standards for Minnesota's administrators.
- There are 7,037 Minnesota licensed school administrators, up 2.3 % since 2016.
- The board reviews each of the 43 administrative preparation programs at Minnesota's fourteen universities every five years to insure quality and effectiveness.
- The board processes over 120 ethics inquiry's per year ensuring due process for all Minnesota administrators.
- The board awards over 1,600 certificates of continuing education every year.

PURPOSE & CONTEXT

The Board of School Administrators was created by the state legislature in 2001 to ensure a system of accountability that leads to the highest performing superintendents, principals, directors of special education and directors of community education for Minnesota's schools. Standards are enforced through licensing, approving university preparation programs and alternative pathways for administrators, establishing rules on continuing education and professional development, and adopting and implementing a rigorous code of ethics.

SERVICES PROVIDED

The Board of School Administrators (BOSA) is an autonomous body created by the Minnesota Legislature in 2001 with the support of the Minnesota educational administration organizations. Ten board members are appointed by the governor and confirmed by the senate to serve four-year terms. The Board members represent secondary and elementary principals, superintendents, directors of special education, community education directors, higher education institutions, teachers, school board members and the public. Two employees are hired by the Board; an executive director and an administrative assistant.

The duties of the board include:

- Licensing and re-licensing of superintendents, principals, directors of special education, and directors of community education who want to work in Minnesota
- Offering advice on best practices to administrators
- Reviewing variance requests from school boards to determine if they are in the public's interest
- Reviewing, approving and monitoring university administrative preparation programs
- Establishing and certifying continuing education activities that promote the highest standards of professional development
- Reviewing ethical complaints and determining appropriate discipline
- Collecting fees

M.S. 122A.14; MN Rule 3512

Program: General Education

Activity: General Education

education.state.mn.us/MDE/dse/schfin/GenEd/

AT A GLANCE

In fiscal year (FY) 2017:

- 861,540 prekindergarten through grade 12 students.
- 331 school districts and 169 charter schools.
- \$6.86 billion in state aid and \$1.1 billion in local property taxes.
- \$9,220 average general education funding per student.
- Largest single item of state general fund spending.
- Largest resource available to school districts and charter schools.
- Beginning in FY 2017, general education funding for prekindergarten was made available to 102 school sites.

PURPOSE & CONTEXT

General education revenue provides core funding to promote a general and uniform, thorough and efficient system of public schools throughout the state. Funding is provided for:

- All public school students in kindergarten through grade 12, voluntary prekindergarten, school readiness plus and prekindergarten students with disabilities.
- Students receiving dual college credit.
- Private contracted education services.
- Private school students enrolled part time in public school programs.

SERVICES PROVIDED

Core funding allowances for all districts and charter schools (in FY 2017):

- Basic Revenue (\$5.7 billion) provides districts and charter schools with uniform funding per pupil unit. In FY 2019, the basic education funding formula is \$6,312 per weighted student. Elementary students are weighted at 1.0; secondary students are weighted at 1.2.

Additional funding for students with unique needs:

- English Learner Revenue (\$56.1 million) is based on the number and concentration of English Learner students enrolled in a district or charter school.
- Compensatory Revenue (\$549.1 million) is additional funding based on the concentration of students who are income-eligible for the federal free and reduced-price lunch programs. This revenue is calculated on a site level instead of a district level. In 2018, Compensatory Pilot Grants were permanently added to this funding.
- Extended-Time Revenue (\$59.5 million) provides districts with additional revenue to fund educational programs for at-risk students outside the traditional school year schedule.
- Gifted and Talented Revenue (\$12.2 million) provides districts and charter schools with funding for gifted and talented educational programs. The gifted and talented funding formula is \$13 per weighted student.

Additional funding for cost differences among school districts:

- Sparsity Revenue (\$27.3 million) funds the added costs of operating small schools that are too isolated to reduce costs by cooperating or consolidating.
- Transportation Sparsity Revenue (\$65.9 million) funds the added cost of pupil transportation in areas with low population density and includes a pupil transportation adjustment for schools with transportation expenses that exceed allocations.
- Small Schools Revenue (\$16.5 million) provides additional funding to small districts with less than 960 weighted students.
- Declining Enrollment Revenue (\$9.2 million) provides districts and charter schools with funding to limit the impact of declining enrollment.
- Pension Adjustment Revenue (\$7.2 million) provides state aid for districts with below state average revenue increase from the elimination of an aid reduction for changes in pension contribution rates beginning in 2015. Beginning in 2019 additional pension adjustment revenue is made available for all districts based on a percentage of teacher salaries in the district.

Additional funding for Voluntary Prekindergarten (2017) and School Readiness Plus Programs (2018):

- Aid entitlement for FY 2017 voluntary prekindergarten was capped at \$27.1 million (\$25 million on 90-10 appropriations basis), of which \$21.4 million was for direct aid to school districts and charter schools with voluntary prekindergarten programs, \$5.7 million was to provide property tax relief to neutralize the statewide impact of the program on school levies, and \$0.6 million was for MDE administration, including one-time IT costs.
- In FY 2018 the funding cap changed from a dollar amount to a participant cap of 6,160 students enrolled in either voluntary prekindergarten or school readiness plus programs.
- In FY 2019 the participant cap for voluntary prekindergarten and school readiness plus is increased to 7,160.
- In FY 2020 and later the funding for School Readiness Plus programs sunsets and the cap for Voluntary Prekindergarten is set to 3,160 participants.
- School districts and charter schools with sites approved for funding receive funding on a per pupil basis, with pupil units limited to 0.6 per participant. All pupil-driven formulas apply (e.g., basic revenue, compensatory revenue, referendum revenue, long-term facilities maintenance revenue, safe schools levy, achievement and integration revenue).
- Requirements outlined in law include providing at least 350 hours of instruction for the school year, staff-to-child ratios not to exceed one-to-ten with class size not to exceed 20; instructional salaries comparable to local K-12 staff and for school readiness plus classrooms must have a licensed teacher, and several more program requirements.

Additional funding with property tax components (school districts must tax local property to receive state aid for these revenues):

- Operating Referendum Revenue (\$744.8 million) is optional revenue raised by either public vote or school board resolution to provide funding for their district.
- Operating Capital Revenue (\$211.5 million) is reserved for facilities and equipment purposes.
- Equity Revenue (\$112.1 million) provides additional funding targeted primarily to districts with low referendum revenue per weighted student.
- Transition Revenue (\$30.0 million) is funding to protect districts from loss of revenue due to law changes.
- Local Optional Revenue (\$363.0 million) provides up to \$424 per weighted student. Deducted from referendum revenue approved by voters in 2013 or earlier.

Miscellaneous Adjustments to General Education Revenue:

- Postsecondary Enrollment Options (PSEO) Aid is paid to Minnesota colleges and universities for courses taken by eligible 10th- through 12th-grade students, and 10th-grade students on a more limited basis, for high school credit.
- Contract Alternative Aid is paid to districts for students eligible to participate in the graduation incentives program who enroll in nonpublic, nonsectarian schools that have contracted with the serving school district to provide education services.
- Shared Time Aid is paid to districts for students who attend public schools on a part-time basis while also attending private schools.
- Online Learning (OLL) Aid is paid to state-approved OLL programs on behalf of students who have completed supplemental OLL courses while enrolled in another public school district or charter school.

MDE calculates and processes aid payments and provides technical support for these programs.

RESULTS

Quality Result: This chart shows the percentage change in general education revenue per student between FY 2003 and FY 2019, based on unadjusted current dollars and adjusted for inflation using the consumer price index and the implicit price deflator. Revenue per student in unadjusted current dollars increased by almost 49 percent during this period. However, when adjusted for inflation, revenue per student remained essentially constant.

*General Education revenue, including local referendum revenue

Quality Result: This chart shows the ratio of unrestricted general education funding per student in high revenue districts versus low revenue districts for FY 2006 through FY 2019. The funding gap between high revenue and low revenue districts increased from 20 percent in FY 2006 to 31 percent in FY 2013, then declined to 18 percent by FY 2016. Between FY 2017 and FY 2019 the gap has remained constant at 18 percent. The gap between high revenue and low revenue districts is primarily driven by property tax disparities.

Program: Other General Education
Activity: Enrollment Options Transport

AT A GLANCE

- 74 students served in fiscal year (FY) 2017.
- Of the 74 students, 21 were from the postsecondary enrollment options program, six were in the open enrollment program and 47 were in charter schools.

PURPOSE & CONTEXT

This state aid program helps low-income students participate in Postsecondary Enrollment Options (PSEO), school district enrollment options, and charter school programs by reimbursing transportation costs.

This aid program supports the World's Best Workforce goal of reducing the racial and economic achievement gaps for low-income students by reimbursing their transportation costs.

SERVICES PROVIDED

School districts and charter schools get state aid to reimburse transportation costs for qualifying low-income students who participate in PSEO or open enrollment. PSEO is a program that allows 10th-, 11th- and 12th-grade students to earn secondary and college credit (dual-credit) while still in high school, through enrollment in and successful completion of college-level courses at higher education institutions. Open enrollment programs allow voluntary prekindergarten through 12th-grade students and prekindergarten children with disabilities to apply to attend a public school outside of their resident district.

PSEO students apply for reimbursement through their resident district or charter school (or the postsecondary institution, if nonpublic). Open enrollment students apply to the enrolling district. Charter school students apply to the enrolling school. Students/families provide their own transportation in these programs.

School districts and charter schools providing out-of-district transportation for a fee are reimbursed for the transportation costs of qualifying low-income students. The reimbursement rate is set at \$0.15 per mile and no more than 250 miles per week. MDE processes reimbursement requests and provides technical support.

RESULTS

The table below provides the average amount of a claim for mileage reimbursement per student per year in postsecondary enrollment options, school district enrollment options, and charter school programs over the last four years. It also provides the number of students served by the program for the last four years. It is difficult to see any trend from the data. With a qualifying income level that is very low, the number of families that fall into that qualifying level vary from year to year. Because there are few participants in the program, a few students who travel long distances to the postsecondary institution can skew the data.

Program: Other General Education

Activity: Abatement Revenue

AT A GLANCE

- Abatement Aid totaled \$2.3M in fiscal year (FY) 2018.
- Abatement Levy totaled \$10.4M in FY 2019.

PURPOSE & CONTEXT

This state aid and local property tax levy program maintains equity for students and taxpayers by replacing revenue the district was entitled to but did not receive due to abatements. An “abatement” occurs when property taxes on a real estate parcel are decreased after the district certifies levy revenue.

For FY 2018, 258 school districts in Minnesota participated in this program.

SERVICES PROVIDED

Abatement aid and levy is calculated annually based on abatements reported by counties to the Minnesota Department of Education (MDE).

The aid and levy are designed to replace the revenue in the same proportion of aid and levy as the original entitlement. The aid reimbursement is received one year after the revenue loss and the levy reimbursement is received two years after the revenue loss.

MDE calculates and processes aid payments and levy limitations for this program.

Program: Other General Education

Activity: Consolidation Transition

education.mn.gov/MDE/dse/schfin/

AT A GLANCE

- There were four school district consolidations in fiscal year (FY) 2014.
- There have been no consolidations since FY 2014.

PURPOSE & CONTEXT

School districts consolidate to expand programs and services and to become more financially stable. The consolidation transition revenue program provides funds for reorganization to districts that have recently consolidated. Students and communities in the consolidating districts are served by this program.

SERVICES PROVIDED

Consolidation Transition revenue must be used to cover district costs for early retirement incentives granted by the district, to reduce operating debt, to enhance learning opportunities, and to cover reorganization expenses.

Aid is \$200 per resident pupil unit in the new district in the first year of consolidation and \$100 per resident pupil unit the year after consolidation. The number of pupil units used to calculate aid for a district in either year is limited to 1,500.

This program is mainly funded with state aid. Optional local property taxes may be used to cover additional costs.

MDE calculates state aid payments and property tax levy limits, and provides technical assistance to districts that choose to consolidate.

RESULTS

There were four consolidations in FY 2014, and there have been none since FY 2014. While the number of consolidations is easy to calculate, the true performance measure is in the satisfaction and achievement of the districts that consolidated, which we do not evaluate.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>FY 2014</i>	<i>FY 2015</i>	<i>FY 2016</i>	<i>FY 2017</i>	<i>FY 2018</i>	<i>FY 2019</i>

Program: Other General Education

Activity: Nonpublic Pupil

education.mn.gov/MDE/fam/nphs/

education.mn.gov/MDE/dse/schfin/Non/

AT A GLANCE

- Number of nonpublic students participating in Fiscal Year 2018:
 - Textbook/materials 66,154
 - Health services 62,014
 - Guidance and counseling 24,719
- Rates per nonpublic student in Fiscal Year 2018:
 - Textbook/materials \$91.60
 - Health services \$74.98
 - Guidance and counseling \$255.57

All nonpublic students requesting materials and/or services by the statutory deadline have been and are being accommodated.

PURPOSE & CONTEXT

This state aid program exists to ensure fair access to nonreligious study materials and student support services for those students who choose nonpublic education.

This aid program supports the World's Best Workforce goal of having all students graduate from high school.

SERVICES PROVIDED

Funding is allocated to public school districts for the benefit of nonpublic school students and not directly to the nonpublic schools. School districts are reimbursed for the costs of the educational materials loaned to nonpublic school students and for the costs of providing support services to nonpublic school students.

There are three basic categories of nonpublic pupil aid supporting the following services:

- Textbooks, individualized instructional materials, and standardized tests.
- Health services.
- Guidance and counseling services.

School districts receive additional funds to cover administrative costs. This amount is equal to 5 percent of their total aid reimbursement amount.

MDE calculates and processes aid payments and provides technical support to school districts and nonpublic schools for this program.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>FY2016</i>	<i>FY2018</i>

Program: Other General Education

Activity: Nonpublic Transportation

<https://education.mn.gov/MDE/dse/schfin/Trans/Type/>

AT A GLANCE

- 43,206 nonpublic students were transported to and from school in fiscal year (FY) 2017.
- 197 of 331 districts transported nonpublic students in FY 2017.

PURPOSE & CONTEXT

This program ensures that nonpublic school students receive the same level of transportation services as public school students, and that the school districts are able to provide this transportation without significant costs being paid from their general fund.

SERVICES PROVIDED

School districts must provide equal transportation services within the district for public and nonpublic school students living within the district. If the district transports nonpublic school students to a school in another district, the nonpublic school or the parents pay the cost of transportation outside of the district boundaries.

Public school districts must provide nonpublic school student transportation within the district boundaries for health and secondary guidance/counseling services that the school district provides to the nonpublic school students.

The public school district must transport nonpublic school students on late activity bus routes if it provides that service for public school students.

The Minnesota Department of Education (MDE) calculates and processes aid payments and provides technical support to school districts and nonpublic schools for this program.

RESULTS

Participation is measured by the percentage of nonpublic students transported to and from school.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>FY 2016</i>	<i>FY 2017</i>
Quality	Percentage of nonpublic students transported	66.3%	63.7%

Program: Other General Education

Activity: Career and Technical Aid

education.mn.gov/MDE/dse/cte/

AT A GLANCE

- 311 districts levied a total of \$22.5 million for Career and Technical Education programs for fiscal year (FY) 2017.
- 151 districts received Career and Technical Education aid for FY 2017, totaling \$4.5 million.

PURPOSE & CONTEXT

Career and Technical Education (CTE) revenue is a state aid and local property tax levy program that allows districts to receive revenue for Career and Technical program expenses.

All school districts with approved CTE programs are eligible for this revenue.

Federal Carl D. Perkins funds are available to help provide vocational-technical education programs and services.

CTE programs are a sequence of courses that integrates core academic knowledge with technical and occupational knowledge and skills to provide students a pathway to postsecondary education and careers. CTE teaches transferable workplace skills in applied learning contexts to provide opportunities to explore high-demand career options, and gives students the technology and skills needed for success in adult life.

These programs align with Minnesota's World's Best Workforce goals by helping students learn about, explore and prepare for a career.

SERVICES PROVIDED

Districts must submit annual budgets for their CTE programs to qualify for this revenue. A district with a CTE program approved by the Minnesota Department of Education (MDE) may levy for costs associated with the program.

- A district is eligible for revenue equal to 35 percent of approved expenditures in the fiscal year in which the levy is certified.

CTE property tax levy equals:

- CTE revenue, times
- The lesser of:
 - one; or,
 - the ratio of the adjusted net tax capacity per student in the fiscal year in which the levy is certified, to \$7,612.

CTE aid equals:

- CTE revenue minus CTE levy.

MDE reviews district programs for approval, calculates aid and property tax levies, and makes federal and state aid payments for these programs.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>FY 2016</i>	<i>FY 2017</i>
Quantity	Number of districts participating in CTE programs	311	311
Quantity	Amount of property tax levy for CTE program	\$19,503,105	\$22,504,108

Note: In FY 2014, state aid was added to the Career and Technical Education Revenue program. Prior to FY 2014, CTE was funded by property tax levies only.

Program: Other General Education

Activity: Special Provision For Select Districts

AT A GLANCE

- The One-Room Schoolhouse revenue program was implemented in fiscal year (FY) 1995.

PURPOSE & CONTEXT

The One-Room Schoolhouse program provides additional revenue to the Warroad school district to assist with expenses related to the Angle Inlet Elementary School.

SERVICES PROVIDED

This program provides \$65,000 each year to the isolated one-room schoolhouse.

The Minnesota Department of Education (MDE) processes the aid payment for this program.

RESULTS

MDE does not collect data regarding utilization of One-Room Schoolhouse aid.

Program: Other General Education

Activity: State Paid Property Tax Credits and Education Reserve

AT A GLANCE

- 9 credit programs in fiscal year (FY) 2017 (one program is for prior year adjustments).
- 1 new credit program beginning in FY 2019 (2017/pay 2018).
- General Fund Reserve transferred \$25.974 million between one excess and five deficient programs in FY 2017.
- Community Education funds had no deficiencies in FY 2017 and the Reserve was not utilized.

PURPOSE & CONTEXT

Property tax credits and aids calculated by the Department of Revenue provide a vehicle for property tax reform or relief for targeted real property classes. The effect of these state paid property tax credits and aids is to shift a portion of property tax burden for education from property owners to the state.

- All school districts in the state receive some form of state paid property tax credits.
- The number and the amount of state paid tax credits that districts and property tax owners in the district receive is dependent upon the local conditions, such as natural disasters, existence of agricultural property, economic depression, and others noted below.

The two "Education Reserves" allow the commissioner to transfer the excess from a direct general fund appropriation for any education aid or grant authorized in specified chapters that exceeds the amount required to be used to any education aid or grant appropriation that is insufficient.

- The general fund reserve pertains to chapters 127A, 122A, 123A, 123B, 124D, 124E, 125A, 126C, and 134, excluding appropriations under sections 124D.135, 124D.16, 124D.20, 124D.22, 124D.52, 124D.531, 124D.55, and 124D.56.
- The community education fund reserve pertains to sections 124D.135, 124D.16, 124D.20, 124D.22, 124D.52, 124D.531, 124D.55, and 124D.56.

SERVICES PROVIDED

There are several property tax credit and aid programs paid to school districts by the Minnesota Department of Education (MDE) that reduce property taxes paid by property owners:

1. Programs reducing the property tax rate applied to the property value to calculate property tax:
 - *Disparity Reduction Aid* provides relief to high tax rate areas. The Department of Revenue calculates a reduction to the initial tax rate to reduce the rate as much as 10 percent.
2. Programs providing a reduction to the calculated property tax:
 - *Local Option Disaster Abatement Credit* provides relief related to the damage or destruction of homestead and non-homestead property. The property need not be located within a disaster or emergency area.
 - Homestead and Disaster Credit provides relief related to the damage or destruction that occurred for each reassessed homestead property within the county that is located within a disaster or emergency area.
3. *Local Option Disaster Credit* provides relief related to the damage or destruction that occurred for: (1) homestead property that meets all the requirements under the Local Option Disaster Abatement, subdivision 1, paragraph (a), but that does not qualify for a credit under the Homestead and Disaster Credit; and, (2) non-homestead and utility property that meets all the requirements under the Local Option Disaster Abatement, subdivision 1, paragraph (b).

4. *Agricultural Preserves Credit* provides relief to owners of agricultural property in the seven-county metropolitan area.
5. *Disparity Reduction Credit* provides relief to apartments, commercial, industrial, and public utilities in economically depressed areas located at Minnesota borders designated as enterprise zones.
6. *Residential Homestead Market Value Credit* provides relief to residential homestead property, including the house, garage, one acre of land for farm homesteads, and certain resort homesteads. The credit is computed as 0.4 percent of the first \$76,000 market value of each homestead property. The maximum credit is \$304 and is phased out at a rate of .09 percent of the value over \$76,000.
7. *Agricultural Land Market Value Credit* provides relief to agricultural homestead property, excluding the house, garage, and one acre. The credit is computed as 0.3 percent of the first \$115,000 market value of each homestead property. The maximum credit is \$345 and is phased out at a rate of .05 percent of the value over \$115,000 with a maximum reduction of \$115.
8. *School Building Bond Agricultural Credit*, enacted in 2017, provides relief to agricultural homestead property, excluding the house, garage, and one acre. The credit is computed as 40 percent of the property's eligible net tax capacity, multiplied by the school debt tax rate.

In addition to the property tax relief aids and credits listed above, school districts may receive others paid by the county, including power line credit, county conservation credit, taconite homestead credit, and supplementary homestead credit. Taconite homestead credit and supplementary homestead credit targets Iron Range homeowners with a credit of either 66 percent or 57 percent, depending on characteristics of the mining industry within the school district. The 66 percent credit has a maximum of \$315.10 per property. The 57 percent credit has a maximum of \$289.80 per property.

The Education Reserves allows full funding or closer to full funding for programs that may be underfunded due to the difference between forecast estimates and actual costs of specified programs.

Program: Other General Education

Activity: Miscellaneous Levies (information only)

education.mn.gov/MDE/dse/datasub/LevyCertSys/

AT A GLANCE

- 13 levy programs have estimated levies for fiscal year (FY) 2019.

PURPOSE & CONTEXT

These programs provide additional local property tax levy revenue to school districts to fund specific obligations of the district's general fund.

SERVICES PROVIDED

The following levies are currently in effect. Most of these levies are available to any district with certain obligations that qualify for levy authority, but a few, as noted below, are for specific districts only.

- Reemployment Insurance Levy
 - A school district may levy for unemployment insurance and for job-placement services offered to eligible employees.
- Judgment Levy
 - A school district may levy for judgments against the district, including interest costs or for its proportionate share of the costs of a judgment against an intermediate district.
- Health Benefit Levy
 - A school district may levy for health insurance and unreimbursed medical expenses of employees who retired before July 1, 1992.
- Additional Retirement Levy
 - The Minneapolis and St. Paul school districts may levy for certain pension obligations.
- Minneapolis Health Insurance Subsidy Levy
 - The Minneapolis school district may levy to subsidize health insurance costs for eligible retired teachers.
- St. Paul Severance Levy
 - The St. Paul school district may levy to pay for severance costs.
- Safe Schools Levy
 - A school district may levy up to \$36 per pupil unit to provide a drug abuse prevention program in the elementary schools; to provide police liaison services in the schools; to provide a gang resistance education program in the schools; to pay the costs for security on school property and/or pay for other crime prevention, drug abuse, student and staff safety; to pay costs for licensed school counselors, licensed school nurses, licensed school social workers, licensed school psychologists, and licensed alcohol and chemical dependency counselors to help provide early responses to problems; to pay for facility security enhancements including laminated glass, announcement systems, communication devices and other modifications to violence prevention and facility security; pay for the costs associated with improving school climate; to pay costs associated with collaborating with mental health professionals who are not district employees or contractors.
- Ice Arena Levy
 - A school district may levy for the net operational costs of the ice arena for the previous fiscal year.

- **Severance Levies**
 - A school district that reorganizes under dissolution and attachment may levy the costs of severance pay or early retirement incentives for licensed and non-licensed employees who resign or retire early as a result of the reorganization. A school district with a secondary agreement with another district must pay severance to licensed employees placed on unrequested leave and may levy for the expenses. Districts with an agreement to allow pupils to attend school in an adjoining state may levy for severance costs resulting from the agreement.
- **Swimming Pool Levy**
 - Certain school districts on the Canadian border may levy for the net operational costs of a swimming pool, not to exceed the net actual costs of operation of the swimming pool for the previous year.
- **Economic Development Abatement Levy**
 - The governing body of a political subdivision may grant an abatement of the taxes imposed by the political subdivision on a parcel of property, or defer the payments of the taxes and abate the interest and penalty that otherwise would apply. The political subdivision must add to its levy amount for the current year the total estimated amount of all current year abatements granted. No abatement aid is generated for these abatements.
- **Tree Growth Replacement Levy**
 - Districts may levy an amount not to exceed its tree-growth revenue for taxes payable in 2001.
- **Reorganization Operating Debt Levy**
 - A school district that reorganizes under consolidation or dissolution and attachment may levy to retire the net negative undesignated fund balance in the operating funds.

Other Miscellaneous Severance Pay/Early Retirement Incentive Levies

- **Annual Other Postemployment Benefits Levy**
 - A school district may levy for other postemployment benefit expenses if the district: 1) has created an actuarial liability to pay postemployment benefits; and, 2) has a sunset clause in effect for the current collective bargaining agreement.
- **Consolidation Transition Revenue**
 - For a school district that consolidates under Minnesota Statutes, section 123A.485, subdivision 2, consolidation transition aid is equal to a maximum of \$200 per resident pupil unit for the first year of consolidation and \$100 per resident pupil unit for the second year of consolidation. If the cost of the early retirement incentives offered by the district under subdivision 2 exceeds the amount of consolidation transition aid, the district may levy for the difference for a period not to exceed three years.
- **Consolidation/Transition Levies**
 - The board(s) of districts combining or combined under Minnesota Statutes, section 123A.485, subdivision 3, may levy over three years or less for costs directly related to the transition from cooperation to combination.
- **Administrative Services Levy**
 - The school district may levy for costs of retirement incentives or severance pay or other costs related to the discontinuance of administrative positions, under certain circumstances.

The Minnesota Department of Education (MDE) collects data from the districts, calculates the levy authority and in some cases, reviews and approves levy requests.

Program: Choice Programs

Activity: Charter School Lease Aid

education.mn.gov/MDE/dse/chart

AT A GLANCE

- In fiscal year (FY) 2017, 160 of the 164 charter schools in Minnesota received lease aid.
- Maximum lease aid per pupil unit is \$1,314.

PURPOSE & CONTEXT

Unlike school districts, charter schools cannot generate property tax revenue to pay for school buildings. The Charter School Lease Aid program provides partial funding to charter schools to lease facilities and land.

SERVICES PROVIDED

This program provides funding to charter schools to lease facilities for instructional purposes. Charter schools submit applications for lease aid that are approved or denied based on:

- Reasonableness of the price per square foot.
- Appropriateness of the proposed lease in the context of the space needs, code compliance and financial circumstances of the charter school.
- Conformity of the leased space and lease agreement to the laws and rules of the state and federal governments.

State aid is the lesser of:

- Ninety percent of the actual net lease costs; or
- \$1,314 times the number: (pupil units served plus PSEO pupil units).

The Minnesota Department of Education (MDE) approves charter school lease aid applications.

Beginning FY 2017, lease aid is available for approved pre-K school programs.

Program: Choice Programs

Activity: Achievement and Integration Aid

education.mn.gov/MDE/dse/acint/

AT A GLANCE

- During the 2017-2018 schoolyear 55 racially identifiable schools* (in 15 different districts) and 38 racially isolated districts** participated in this program. Some of these racially isolated districts also have racially identifiable schools. There were 82 additional districts in the program to work with racially isolated districts on integration activities.
- Based on their 2017 fall enrollment, 24 additional racially isolated districts and 16 new racially identifiable schools will join the program and generate revenue starting in FY 2020. Up to 66 additional districts may be in the program to work with the new racially isolated districts on integration activities.
- Districts use this revenue to increase racial and economic integration, to reduce achievement disparities within their districts, and to partner with neighboring districts on integration activities for students.

**A school with enrollment of protected students more than 20 percentage points above that of the district average for schools serving the same grade levels.*

***A district with districtwide enrollment of protected students that exceeds that of any adjoining district by more than 20 percentage points.*

PURPOSE & CONTEXT

This program exists to increase racial and economic integration, reduce achievement disparities for specific student groups, and provide students equitable access to a qualified and racially diverse teaching staff.

Students served include prekindergarten through grade 12 students attending public school districts that are eligible under the Minnesota Desegregation and Integration Rule.

Achievement and Integration revenue is made up of two different funding streams: *initial revenue* which may be used to fund the strategies in a district's approved achievement and integration plan and *incentive revenue* which must be used for strategies to reduce racial and economic enrollment disparities. Both types of revenue are funded through local property tax levy (30 percent) and state aid (70 percent).

Districts are required to incorporate their achievement and integration plan into their World's Best Workforce plan. This program supports the World's Best Workforce goals of closing all racial and economic achievement gaps.

Districts that have not met their plan goals at the end of three years must develop an improvement plan and use up to twenty percent of their achievement and integration revenue to fund that plan.

SERVICES PROVIDED

Achievement and Integration revenue is used to implement strategies in a district's achievement and integration plan. These strategies must increase integration and reduce achievement disparities within the district or racially identifiable school. Most plans include student integration activities between neighboring districts.

Achievement and Integration plans may include the following types of strategies:

- Family involvement programs.
- Integrated prekindergarten to grade 12 programs with school enrollment choices designed to decrease racial and economic enrollment disparities within or between districts.
- Training for teachers and administrators to improve the achievement of all students.
- Rigorous coursework and career and college readiness programs for underserved students.
- Recruitment and retention of a racially and ethnically diverse staff.

The Minnesota Department of Education (MDE) reviews and approves district plans and budgets, calculates and processes aid payments, and provides ongoing assistance to districts on developing effective plans, monitoring their progress, improvement processes, and reporting results.

RESULTS

The table below lists the number of racially identifiable schools and racially isolated districts participating in the program for the years listed.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>2014-2015 2015-2016</i>	<i>2016- 2017</i>	<i>2017- 2018</i>
Quantity	Number of participating racially isolated districts	40	40	39
Quantity	Number of participating racially identifiable schools	55	55	55
Quantity	Number of participating districts with racially identifiable schools	15	15	15

Districts self-report on the extent to which they've realized the goals in their plans. The current achievement and integration plans were submitted in FY 2017 and will end in FY 2020. First year results for these three-year plans will be available in the fall of 2018.

Districts' progress toward the goals in their prior three-year plan are listed below.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>2015</i>	<i>2017</i>	<i>Number of Districts</i>
Quality	Progress toward goal for reducing reading achievement gap	23.9% on track	10.16% met goal	13
Quality	Progress toward goal for reducing math achievement gap	26.9% on track	4.69% met goal	6
Quality	Progress toward integration goal	66.8% on track	51.56% met goal	66

Program: Choice Programs

Activity: Inter-district Desegregation Transportation

education.mn.gov/MDE/dse/acint/

AT A GLANCE

- In fiscal year (FY) 2017, over 8,000 open enrolled students were transported to and from schools participating in achievement and integration programs at a total district cost of \$15.9 million. Districts received state aid in the amount of \$13.8 million, as districts already receive a portion of general education revenue to cover the cost.
- Other students were transported to achievement and integration programs and events at a total district cost of \$498,130 in FY 2017. Districts received \$498,130 in state aid as there is no general education deduction for this type of transportation.

PURPOSE & CONTEXT

This state aid program supports the achievement and integration program by funding unreimbursed transportation costs for students in an inter-district desegregation program.

This aid program supports the World's Best Workforce goal of reducing the racial and economic achievement gaps between students.

SERVICES PROVIDED

Transportation is provided between the student's home or school and the achievement and integration program or school.

The aid paid to school districts is the difference between the cost of transportation and the portion of general education revenue attributable to transportation that the students generate.

The Minnesota Department of Education (MDE) calculates aid payments and provides technical support for this program.

RESULTS

Both the number of districts and the number of students participating has remained steady with some minor fluctuations over time.

Program: Choice Programs
Activity: Recovery Program

AT A GLANCE

- For fiscal year (FY) 2017, there was \$500,000 in grant funds available. For FY 2018, the amount was increased to \$750,000.
- Recovery programs are eligible for grants of up to \$125,000 per year.

PURPOSE & CONTEXT

The Recovery Program Grant provides additional revenue to help with the cost of substance abuse recovery program support staff at approved recovery schools. Recovery programs must provide academic instruction designed to meet graduation requirements and assist students recovering from substance abuse or dependency.

This grant program supports the World's Best Workforce goal of all students graduating from high school.

SERVICES PROVIDED

Grants pay for a portion of the costs of recovery program support staff. In FY 2018, coverage for unreimbursed transportation expenses was added to the list of eligible costs.

Recovery program support staff are defined as:

- Licensed alcohol and chemical dependency counselors;
- Licensed school counselors;
- Licensed school psychologists;
- Licensed school nurses; and
- Licensed school social workers.

The Minnesota Department of Education provides the following services for the program:

- Approving recovery programs;
- Developing application process and reporting forms for applicants/recipients;
- Providing technical assistance to applicants/recipients;
- Creating grant contracts including work plans and budget information;
- Calculating, auditing and processing payments; and
- Providing guidance as it relates to Minnesota statutes and state policies.

Program: Indian Education

Activity: Indian Teacher Training Program

education.mn.gov/MDE/fam/indian/

AT A GLANCE

- Historically, grants were awarded to four project sites: Augsburg College, in collaboration with Minneapolis Public Schools and St. Paul Public Schools; Bemidji State University, in collaboration with Red Lake Public Schools; Minnesota State University Moorhead, in collaboration with Mahnomon Public Schools; and the University of Minnesota-Duluth, in collaboration with Duluth Public Schools.
- The grants will be opened up for competitive postsecondary institutions and area schools to reach a more extensive pool of applicants starting in 2019.

PURPOSE & CONTEXT

The Minnesota Indian Teacher Training Program (MITTP) provides scholarships to assist American Indian students to become teachers and to assist current American Indian teachers in gaining additional education, credentials or certifications. The program seeks to diversify the pool of Minnesota teachers in order to increase all students' cultural awareness, experiences, and exposure to a diverse population of teachers.

This program is designed to meet all goal areas of the World's Best Workforce, with a special focus on ensuring all racial and economic achievement gaps between students are closed.

SERVICES PROVIDED

This program provides scholarships to American Indian students and teachers who have the potential to complete a teacher-training program or certification needed to work in a specific school setting, and who have demonstrated a financial need.

RESULTS

A majority of students that receive scholarship/grant funds are supported for multiple years during their teacher training program. Eighty-one of the MITTP participants currently work in an educational capacity.

In the 2017-2018 school year, there were a total of six students participating at the four institutions in the Indian Teacher Training Program. The program receives \$460,000 per year.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>FY 2016</i>	<i>FY 2017</i>
Quantity	Program Participants	10	6

**The total number of graduates listed reflects only students who were receiving grants at the time of graduation. It does not reflect students who may have participated in the program at some point during their teacher training program. The total number of graduates also does not reflect students who returned to receive additional certifications or credentials.*

Program: Indian Education

Activity: Tribal Contract Schools

education.mn.gov/MDE/fam/indian/

AT A GLANCE

- In fiscal year (FY) 2017, 685 American Indian students attended the four federal Bureau of Indian Education (BIE) tribal contract schools in Minnesota.

PURPOSE & CONTEXT

The program seeks to provide tribal schools with sufficient funding so they can provide an adequate and uniform education to their students, as required by the Minnesota Constitution. Participants include the four tribal contract schools in the state: Bug-O-Nay-Ge-Shig School, Leech Lake; Circle of Life Academy, White Earth; Nay ah Shing School, Mille Lacs; and Fond du Lac Ojibwe School, Fond du Lac.

This program supports two goal areas of the World's Best Workforce by ensuring that all racial and economic achievement gaps between students are closed and that all students graduate from high school.

SERVICES PROVIDED

This state aid program provides funding to promote equal education for American Indian students enrolled in BIE tribal contract schools. The funds provide general education services and are not specifically set aside to meet any legislated goals. State aid is calculated based on the difference between the state per pupil adjusted aid amount minus the amount provided by the federal government.

The Minnesota Department of Education (MDE) calculates and processes aid payments to tribal contract schools for this program.

RESULTS

MDE does not track or report participant performance. Tribal contract schools are under federal jurisdiction and therefore are not state public schools under Minnesota statutes, so MDE cannot require tribal schools to submit assessment data related to this program.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>FY 2016</i>	<i>FY 2017</i>
Quantity	American Indian student graduation rate in BIE Tribal contract schools*	52.5%	44.7%

Program: Indian Education**Activity: Tribal Early Childhood Program**education.mn.gov/MDE/fam/indian/**AT A GLANCE**

- Provides support to four tribal early childhood family education (ECFE) programs.
- Serves 800 to 1,100 children, birth to age 5, every year.
- Program sites: Bug-O-Nay-Ge-Shig school in Leech Lake; Circle of Life in White Earth; Fond du Lac Ojibwe School in Cloquet; and, Wewinabi Early Education Center in Mille Lacs.

PURPOSE & CONTEXT

This program ensures Early Childhood and Family Education (ECFE) services are available for parents who live in tribal communities and who will send their children to tribally controlled schools.

This program supports two goal areas of the World's Best Workforce by ensuring that all children are ready for school and that all racial and economic achievement gaps between students are closed.

SERVICES PROVIDED

The program uses culturally appropriate materials and strategies to deliver the basic ECFE program, with an added emphasis on preserving American Indian history, language and culture.

The programs require the direct presence and substantial involvement of the children's parents, especially fathers, and may include any or all of the following education services:

- Programs to educate parents about the physical and mental development of the children.
- Programs to enhance parents' skills in providing for their children's learning and development.
- Participation in "Positive Indian Parenting" programs.
- Learning experiences for children and parents.
- Activities designed to detect children's physical, mental, emotional or behavioral problems that may cause learning problems.
- Activities and materials designed to encourage self-esteem, skills, and behaviors that prevent sexual and other interpersonal violence.
- Educational materials that may be borrowed for home use.
- Home visits or center-based activities.
- Other programs or activities to improve the health, development, and school-readiness of children.

The Minnesota Department of Education (MDE), through the Office of Indian Education, works with each of the four project sites annually to determine how allocations will be utilized and verifies how many children and families are served. MDE also calculates and processes aid payments for this program.

RESULTS

Tribally controlled schools are under federal jurisdiction and, therefore, are not state public schools under Minnesota statutes. They are not required to submit assessment data for this program. MDE does not track or report participant performance.

Program: Indian Education

Activity: American Indian Education Aid

education.mn.gov/MDE/fam/indian/

AT A GLANCE

- Provides formula funding to 143 eligible school districts, charter schools and tribal contract schools.
- Funding reaches nearly 97 percent of American Indian students statewide.
- 22,154 American Indian students served annually.
- 26.5 percent of American Indian students served are in the seven-county metro area.
- The Indian Education Aid program replaced the Success for the Future program in fiscal year (FY) 2016.

PURPOSE & CONTEXT

This program seeks to increase the academic achievement, decrease the dropout rate, and improve the school climate of American Indian students in culturally appropriate ways. The program serves American Indian students in school districts, federal Bureau of Indian Education tribal contract schools, and charter schools.

The Minnesota Department of Education's Office of Indian Education convened a stakeholder group to recommend how to improve educational outcomes for American Indian students. The working group decided that the Success for the Future program, a \$4.2 million competitive grant program, needed to be replaced to reach more American Indian students. The recommendation, and eventual statutory funding formula that was enacted by the legislature in 2015, expands funding to eligible districts and schools from 32 to 143, serving nearly 97 percent of American Indian students in Minnesota. Under the new formula, school districts, charter schools, and tribal schools that have 20 or more American Indian students enrolled are eligible to receive \$20,000 for the first 20 students, and an additional \$358 per student beyond the initial count of 20.

This program is designed to support all goal areas of the World's Best Workforce, with a special focus on ensuring that all children are ready for school, all racial and economic achievement gaps between students are closed, and that all students are ready for college and career.

SERVICES PROVIDED

American Indian education programs are designed to meet the unique educational and cultural needs of American Indian students. They focus on:

- Getting students ready for college;
- Increasing achievement, especially in math and reading;
- Making the curriculum more relevant to students' cultural heritage;
- Reinforcing students' positive self-image; and
- Developing intercultural awareness among students, parents, staff and community.

The following services are funded by the American Indian formula aid program with the goals of increasing student achievement, increasing graduation rates, reducing the achievement gap, and lowering dropout rates:

- Programs to improve daily attendance and keep students in school;
- Academic counseling;
- Advocates and liaisons between home and school;
- Innovative curriculum based on technology;
- Support for teaching American Indian history, culture, language and literature;

- Staff development support through training; and
- Best practices in teaching for American Indian students.

The Minnesota Department of Education administers the aid program and calculates payments to school districts, charter schools, and tribal contract schools.

RESULTS

The program serves nearly 97 percent of the state's American Indian students enrolled in public schools and enables participating students to take part in a variety of college- and career-readiness programs.

Program: Innovation and Accountability
Activity: Alternative Compensation (Q Comp)

education.mn.gov/MDE/dse/qc/

AT A GLANCE

- In fiscal year (FY) 2018, 186 districts and charter schools participated (36.54 percent):
 - 109 school districts participated (33.13 percent).
 - 75 charter schools participated (45.73 percent).
 - One intermediate district participated (25.00 percent).
 - One education district participated (8.33 percent).
- 491,028 students in the state were served (55.49 percent).
- 37,418.03 full-time equivalent (FTE) licensed staff in the state were served (56.75 percent).
- 23 districts and charter schools are on the waiting list with pending applications awaiting funding.

PURPOSE & CONTEXT

The alternative teacher professional pay system (commonly known as Q Comp) provides school districts and charter schools with up to \$260 per student and education districts and intermediate districts with \$3,000 per teacher in additional revenue for designing and implementing a program.

Q Comp programs approved by the Minnesota Department of Education (MDE) use various methods to improve classroom instruction and student learning while also recruiting and retaining highly qualified teachers.

Program revenue is available to all districts and sites that apply and have an approved plan. However, basic aid was limited to \$88,118,000 for FY 2017 and later. Program expenditures have reached this cap as of the start of FY 2017. Due to enrollment increases, all participating programs are seeing funding prorated to 98.8 percent in FY 2019 to ensure the basic aid cap is not exceeded. Applications are still accepted for the waiting list but no plans will be approved until revenue is available.

This program supports the World's Best Workforce goals of closing the racial and economic achievement gap, third-grade students reading at grade level, students graduating from high school, and students being career and college ready.

SERVICES PROVIDED

Interested education sites are required to submit an application that includes:

- A plan of how licensed staff members can provide leadership to help others improve their instructional skills.
- Student achievement goals and the professional development plan that will help meet the goals.
- A description of the teacher observation/evaluation process and training plans.
- An explanation of salary schedule reform linking movement to performance measures and an overview of the performance pay system.

Approved districts or schools use the program funding to provide:

- Compensation to teacher leaders and licensed staff members.
- Professional development, training, and resources related to the program.

MDE performs several functions in support of this program, including:

- Review and approve applications and subsequent program changes.
- Provide technical assistance on program development and implementation.
- Provide professional development, networking and coaching to support educators to effectively implement the program including but not limited to: observation and feedback, professional learning communities, teacher leadership development.
- Calculate and process Q Comp payments.

Basic alternative compensation aid was capped at \$88.1 million for FY 2017, and was available to districts on a first-come, first-served basis. State total basic aid is currently at the cap. The funding cap was reached in FY 2017. The cap would need to be increased in order to provide full funding for all current districts and to provide funding to all interested districts. However, districts have the authority to levy for an amount equal to the shortfall due to proration.

School districts receive 65 percent of the \$260 per pupil amount (\$169) in the form of state aid and the balance (\$91 per pupil) in the form of equalized levy revenue.

Charter schools (which do not have levy authority) receive a prorated aid amount based on the percentage of \$260 per pupil that all school districts receive.

Education districts and intermediate districts (which do not have levy authority) receive \$3,000 per teacher.

RESULTS

Since Q Comp was enacted two outside studies have been done to investigate its effectiveness:

- A 2014 study published in The Journal of Human Resources found a 3 percent standard deviation increase in student achievement on two different reading assessments and on one math assessment at districts receiving Q comp revenue ([Journal of Human Resources study](#)).
- A 2009 study identified a positive correlation between the implementation of Q Comp over a number of years and improved student achievement ([Hezel Associates Q Comp for Teachers Summative Evaluation](#)).

Program: Innovation and Accountability

Activity: Assessments

AT A GLANCE

- Serves approximately 65,000 students per grade, grades 3-12.
- Serves approximately 73,000 English learners (ELs), grades K-12.
- Serves approximately 6,000 students with severe cognitive disabilities.
- Supports all charter schools, districts, Minnesota Department of Education (MDE) divisions, and stakeholders with data requests and data analysis.

PURPOSE & CONTEXT

Statewide testing's mission is to design, develop, and implement a system of assessment so Minnesota students, parents, teachers, administrators, legislators, and taxpayers will have access to valid and reliable data to support and improve education in Minnesota. Our purpose is to build a comprehensive assessment system and provide analytics that adds value to Minnesota's education system.

This program supports all of the World's Best Workforce (WBWF) goals.

SERVICES PROVIDED

This program provides data and analysis to inform parents, teachers, and the public on the achievement of students against the Minnesota K-12 Academic Standards and Minnesota English Language Proficiency Standards. This includes special populations such as English learners, students receiving special education services and student receiving free/reduced priced meals.

MDE awards contracts to vendors, manages the contracts, supports districts' administration of the tests, and reports test results. Part of the district and agency support provided by the division comes from the Data Analytics Team, which conducts complex analysis of program-specific data, which often includes test results.

Program: Innovation and Accountability
Activity: College Entrance Exam Reimbursements

AT A GLANCE

- Testing reimbursement helps students' access college entrance exams.
- In the 2017-2018 school year, 283 districts requested reimbursement totaling nearly \$864,000.

PURPOSE & CONTEXT

This program provides reimbursement to high school students for one college entrance exam during grade 11 or 12. Beginning in school year 2017-2018, reimbursements are limited to high school students identified as receiving free or reduced-price lunch or unable to pay.

This program supports the World's Best Workforce goal of having students career and college ready.

SERVICES PROVIDED

This program reimburses districts for the cost of one nationally recognized college entrance exam per student who wishes to take the exam and is identified as receiving free or reduced-price lunch or unable to pay. The district must provide grade 11 and 12 students the opportunity to take the exam at the student's high school during the school day and at an ACT exam administration available to students in the district.

The Minnesota Department of Education processes reimbursement requests for this program.

Program: Innovation and Accountability
Activity: Minnesota Principal's Academy

AT A GLANCE

- The two-year program consists of 13 units of study held in two-day training sessions.
- In fiscal year (FY) 2016, the program served approximately 56 school leaders in two cohorts—Twin Cities and Northwest Minnesota.

PURPOSE & CONTEXT

The Minnesota Principal's Academy is an executive development program for school and system leaders focused on instructional leadership.

- Research underscores the importance of an effective school leader in school quality and student achievement.
- The overall goal of the program is to increase participants' capacities to lead effective schools and systems.

SERVICES PROVIDED

The Minnesota Principal's Academy is operated by the University of Minnesota College of Education and Human Development. In this program, school leaders:

- Participate in the research-based curriculum from the National Institute of School Leadership.
- Complete an action research project focused on an individual problem of practice.
- Receive more than 30 days of professional development over two years.

The Minnesota Department of Education (MDE) administers an annual grant to support the program. It was \$150,000 per year through FY 2017. Beginning in FY 2018, it is \$200,000 per year.

RESULTS

This program was new for FY 2016. A program evaluation was completed by the Center for Applied Research and Educational Improvement at the University of Minnesota in June 2017. Highlights of outcomes include:

Program completion: Twenty-four of the 26 participants in the Northwest cohort fully completed the program, and 31 participants in the Twin Cities cohort (representing 18 school districts, three charter schools and the State Academy of the Deaf), completed the program.

Engagement and completion of Action Learning Project: Twenty-one of the 24 participants in the Northwest cohort completed an Action Learning Project, and 26 of the 31 participants in the Twin Cities cohort completed the Action learning Project. The Action Learning Projects focused on a local problem of practice that the participant saw as important to address in striving to increase student outcomes. Participants presented projects to their cohorts of peers in June of 2017.

Leadership expertise: The number of *participants* who rated their perception of expertise (on an online survey) as good increased for the most part due to moving from moderate to good. On the pre-survey, the majority of respondents rated their individual level of expertise as good in four of the seven areas on the pre-survey; however, on the post-survey, the majority of respondents rated their expertise level as good in every area.

Leadership skills: Over 85 percent of the *principal supervisors* respondents agreed or strongly agreed (on an online survey) that their school leaders had enhanced their leadership skills, as a result of participating in the Minnesota Principals Academy. These areas included their ability to motivate and support teachers, especially related to new instructional practices; their thinking around how to improve instruction and build teams; their willingness and ability to ensure that they and their teachers use data and research to make curricular and instructional decisions; their commitment to high expectations for all students; and their willingness to listen to a variety of stakeholders.

Program: Innovation and Accountability
Activity: Other Innovation Opportunities

AT A GLANCE

- The Teacher-Governed School Grants, Singing-Based Pilot Program, and Vision-Therapy Pilot Project were all one-time appropriations.
- The Full-Service Community Schools program, first appropriated in fiscal year (FY) 2016, had a one-time appropriation for FY 2017.
- With the exception of the Vision-Therapy Pilot Project, which ends June 30, 2020, each of these grant programs ended June 30, 2018.

PURPOSE & CONTEXT

Grant funding provides additional resources to achieve specific programmatic objectives and services as described below. These grants or grant programs support the World's Best Workforce Goals.

SERVICES PROVIDED

Teacher-Governed School Grants were awarded on a first-come basis to support planning by local school boards and teacher unions. Awarded funds encourage licensed teachers to explore, develop, and share site-level leadership, curriculum, instruction, and assessment models for creating teacher-governed schools.

- \$500,000 for FY 2017.
- Up to \$50,000 for planning grants.
- Up to \$100,000 for implementation grants.
- The last of these grants ended on June 30, 2018, and are no longer active.

The Singing-Based Pilot Program was a grant to implement a singing-based reading intervention program designed to improve the reading performance of students in grades 3-5. The pilot was conducted by the Rock'n'Read Project. Pilot sites, in at least three schools, gave priority to schools in which a high proportion of students that: 1) did not read at grade level; and, 2) were eligible for free or reduced-price lunch. This program contributed to the World's Best Workforce goals of all third-graders reading at grade level and closing the economic achievement gap.

- \$100,000 for FY 2017.
- Final report detailing expenditures and outcomes was submitted to the Legislature in February of 2017.
- This grant ended on June 30, 2017, and is no longer active.

The Vision-Therapy Pilot Project is a grant to Independent School District No. 12, Centennial, to implement a neuro-optometric vision-therapy pilot project. This project is designed to determine the impact of vision therapy on learning-related vision problems. This project contributes to the World's Best Workforce goal of all students graduating from high school.

- \$200,000 for FY 2017, available until June 30, 2019.
- The Minnesota Department of Education (MDE) made a grant available to Centennial Schools to report specific measurable outcomes to MDE.
- Centennial Schools was to complete the pilot study on convergence insufficiency and report outcomes to MDE by September 2019.
- MDE was to provide a report to the Minnesota Legislature no later than January 2020.
- Centennial Schools declined the grant.

The Full-Service Community Schools appropriation was available to school sites for the purpose of planning, implementing and improving full-service community schools. Full-service community schools serve as community hubs, bringing educators, families, and community partners together to offer wrap-around services and supports, such as health and social supports, to children and their families. This resulted in integrating community school programming at each covered school site. The effect of the transition to a full-service community school on participating children and adults will be documented, tracked and reported to the public. MDE plans to issue a report on this program in FY 2022. This program supported all five of the World's Best Workforce goals.

- \$250,000 for FY 2016.
- \$1,250,000 for FY 2017.
- Up to \$50,000 each year is for administration of this program.
- These grants ended on June 30, 2018, and are no longer active.

MDE administers all aspects of the grant program. Services include:

- Developing application process and reporting forms for applicants/recipients.
- Providing technical assistance to applicants/recipients.
- Creating grant contracts including work plans and budget information.
- Calculating, auditing, and processing payments.
- Providing guidance as it relates to Minnesota Statutes and state policies.

Program: Special Student and Teacher

Activity: Advanced Placement-International Baccalaureate

education.state.mn.us/MDE/dse/ccs/ap/

education.state.mn.us/MDE/dse/ccs/ib/

AT A GLANCE

In fiscal year (FY) 2017:

- 79 International Baccalaureate (IB) programs were in place in 65 authorized IB schools.
- 45,348 Advanced Placement (AP) students took 73,559 exams.
- 3,995 IB students took 8,691 exams.
- Efforts focused on increasing the number of low-income students taking AP or IB exams.
- 934 AP teachers attended in-depth training.
- 1,163 IB teachers attended in-depth training.

PURPOSE & CONTEXT

This state-aid program gives high school students the opportunity to take college-level courses and earn college credit while in high school. The funding is used to pay all Advanced Placement (AP) and International Baccalaureate (IB) exam costs for low-income, fee-reduced students and a portion of exam costs for all non-low-income, non-fee-reduced students. The program also provides funding for AP/IB teachers to attend training programs.

This program supports the World's Best Workforce goal of having students be career and college ready.

SERVICES PROVIDED

Most of Minnesota's public and private colleges and universities have credit-awarding policies for AP and IB course credits for exams taken by students.

- Colleges and universities in Minnesota State must award college credit to high school students who receive a score of three or higher on an advanced placement examination or four or higher on the international baccalaureate program examination.
- The University of Minnesota and private postsecondary institutions are encouraged, but not required, to award college credit to high school students who receive a score of three or higher on an advanced placement examination or four or higher on the international baccalaureate program examination.

The AP and IB programs provide financial incentives to support:

- Teacher training and support.
- Student examination fees.

The Minnesota Department of Education (MDE) reviews and approves applications and calculates and processes aid payments for this program.

Program: Special Student and Teacher

Activity: Concurrent Enrollment

education.mn.gov/MDE/dse/ccs/pseo/index.htm

AT A GLANCE

- Of the 32,010 students that participated in fiscal year 2017 (FY17), 5,803 were low-income students and 187 were English learners.
- For FY 2017, the state aid amount was prorated to \$54.01 per student, per course.

PURPOSE & CONTEXT

The Concurrent Enrollment program provides funding to districts to defray the cost of delivering concurrent enrollment courses in high schools. This program is available to all 11th- and 12th-grade students, to 10th-grade students for career and technical education classes, and to 9th- and 10th-grade students on a limited basis, and provides dual high school and college credit.

This aid program supports the World's Best Workforce goals of having all students graduate from high school and all students be career and college ready.

SERVICES PROVIDED

This program provides funding to districts that offer an agreed-upon concurrent enrollment course for students who take the course at the high school.

- Concurrent enrollment courses are taught during the regular school day at the high school.
- These courses are offered in partnership with a college or university.
- State aid is set at \$150 per student per course. However, because funding is capped and enrollment is increasing, full course reimbursement exceeds the appropriation, and the program is prorated. For FY17, districts received roughly \$54 per student in state aid, with local funding making up an increasing portion of the cost.

Participating students are provided:

- Credit for both high school and college credits at no cost to the student;
- Qualified high school instructors or college faculty teaching the course;
- Exposure to college-level courses and coursework;
- Similar coursework and testing as is used in classes taught on a college campus; and
- Continued participation in the high school culture while earning college credits.

The Minnesota Department of Education:

- Helps districts interpret the laws regarding concurrent enrollment;
- Reviews and approves annual partnership agreements between school districts and colleges or universities; and
- Verifies student eligibility, calculates and processes aid payments to districts.

RESULTS

In 2016-17, 319 districts and charter schools offered 74,059 concurrent enrollment courses to 31,971 students through 38 Minnesota colleges and universities.

Program: Special Student and Teacher
Activity: Collaborative Urban Educator

AT A GLANCE

- In fiscal year (FY) 2018, the Legislature amended the title of the Collaborative Urban Educators program to include Greater Minnesota and titled the program Collaborative Urban and Greater Minnesota Educators of Color Program.
- Four colleges named in legislation are eligible for the Collaborative Urban and Greater Minnesota Educators of Color Program, and a competitive application is added for programs in greater Minnesota.

PURPOSE & CONTEXT

This program addresses the need to recruit and train teachers prepared to meet the educational needs of urban schools and schools in greater Minnesota, as well as a diverse student population. Its purpose is to increase educators of color and American Indian educators in the state of Minnesota.

This program serves four institutions of higher learning named in legislation in Minneapolis and St. Paul, plus postsecondary institutions selected through a competitive grant process.

This program supports the World's Best Workforce goal of reducing the racial and economic achievement gaps between students.

This program supports the Every Student Succeeds Act (ESSA) Minnesota State Plan for Educator Quality and Equity in Access.

SERVICES PROVIDED

Grant funds are \$195,000 for each named Collaborative Urban Educator grantee in law (St. Thomas, Concordia, Hamline, and Augsburg). Each institution has discretion to determine the best way to recruit candidates of color and American Indian candidates, and to use the appropriation in order to increase teacher diversity in the state of Minnesota.

- Concordia University focuses on providing a pathway to a bachelor's degree and teacher licensure for paraprofessionals, education assistants, and teaching assistants through the Southeast Asia Teacher (SEAT) Licensure Program.
- St. Thomas University currently focuses on preparing teachers at the graduate level leading to licensure in Special Education and English as a Second Language.
- Hamline University has established the Center for Excellence in Urban Teaching (CEUT), which focuses on preparing educators for urban settings and providing support for in-service teachers.
- Augsburg College focuses on preparing teachers of East African origin on multiple licensure areas (EAST Program).

Funding was increased in 2018 by \$220,000 for each year (FY18 and FY19) for a competitive grant process to recruit and retain teacher candidates of color and American Indian candidates throughout the state. Grantees who were awarded the funds are:

- College of St. Scholastica
- Metro State University
- Mankato State University

- St. Mary's University of Minnesota
- University of St. Thomas
- Winona State University

Each institution must prepare, by January 1 of each year, a detailed report regarding funds used.

The Minnesota Department of Education (MDE) administers all aspects of the grant program. Services include:

- Developing the application process and reporting forms for applicants and recipients;
- Providing technical assistance to applicants and recipients;
- Creating grant contracts including work plans and budget information;
- Calculating, auditing, and processing payments; and
- Providing guidance as it relates to Minnesota statutes and state policies.

Program: Special Student and Teacher

Activity: Literacy Incentive Aid

AT A GLANCE

- Fiscal year (FY) 2017, 56.5 percent of third-grade students were proficient statewide.
- FY 2017, 74 percent of fourth-grade students met their growth target statewide.

PURPOSE & CONTEXT

This program provides schools with additional aid based on student reading performance.

Literacy incentive aid is available to all public school districts and charter schools with students in grades three and four.

This program supports the World's Best Workforce goals by incentivizing districts and charter schools to have all third-graders reading at grade level and to have all fourth-graders showing medium to high growth in reading, as measured by the Minnesota Comprehensive Assessments (MCA) test scores.

SERVICES PROVIDED

Part of literacy incentive aid is based on the portion of students in a school that meet or exceed proficiency on the MCA grade three reading test (called "proficiency aid"). Part of literacy incentive aid is based on the portion of students that show medium or high growth in reading proficiency between grades three and four (called "growth aid").

Proficiency and growth are based on three-year averages.

Proficiency aid = \$530 x grade three reading proficiency portion x grade three enrollment from the prior year.

Growth aid = \$530 x grade four growth portion x grade four enrollment from the prior year.

The Minnesota Department of Education (MDE) calculates and processes aid payments for this program.

Program: Special Student and Teacher

Activity: Student Organizations

AT A GLANCE

- There are seven career and technical education student organizations supported by the Minnesota Foundation for Student Organizations (MSFO).
- MFSO is governed by a 23-member board of directors, half of which are appointed by the governor and half which serve as representatives to the student organizations.

PURPOSE & CONTEXT

The Minnesota Foundation for Student Organizations (MFSO) funds secondary and postsecondary career and technical student organizations that are operated as co-curricular activities. It also funds state-approved career and technical education programs.

This aid program addresses the World's Best Workforce goal of all students being ready for college and career.

SERVICES PROVIDED

The MFSO supports career and technical student organizations as they provide opportunities for:

- Leadership
- Personal development
- Community service
- Career preparation

The student organizations provide those opportunities in the following areas:

- Health Occupations (HOSA)
- Service Occupations (HERO)
- Trade and Industry Technology (SKILLSUSA)
- Business (BPA)
- Agriculture, Food and Natural Resources (FFA)
- Family and Consumer Science (FCCLA)
- Marketing (DECA)

The MFSO coordinates joint activities and outreach among its member student organizations. The MFSO requires member organizations to provide desired support and opportunities for students.

The Minnesota Department of Education (MDE) processes payments and provides technical support for this program.

Program: Special Student and Teacher

Activity: Early Childhood Literacy

minnesotareadingcorps.org/

AT A GLANCE

- This program is implemented by Reading Corps, an initiative of ServeMinnesota.
- In FY 2017 there was a 57.6 percent pass rate on the statewide third-grade MCA test of reading proficiency for participants who completed their Minnesota Reading Corps tutoring.
- In the 2016-17 school year, Reading Corp served 30,000 children in 77 Minnesota counties in 700 individual sites
- In 2017-2018 school year, Minnesota Reading Corps worked with 452 elementary schools and 153 pre-K sites.

PURPOSE & CONTEXT

This program's purpose is to reduce Minnesota's achievement gap, better prepare preschoolers for kindergarten, and increase the number of students meeting literacy standards by the end of third grade, which are three of the five World's Best Workforce goals.

The program is funded with a combination of state aid, federal funds, and private donations.

SERVICES PROVIDED

The Minnesota Reading Corps places AmeriCorps members in early childhood and elementary school settings. AmeriCorps members:

- Are trained in research-based tutoring techniques and work with children age 3 to grade three.
- Monitor each student's progress.

The Minnesota Reading Corps provides master literacy coaches to all sites. They:

- Train internal literacy coaches on early literacy curriculum and coaching techniques.
- Administer the early learning classroom observation tool in pre-K settings.
- Provide feedback/coaching to AmeriCorps members.

The Minnesota Department of Education awards and makes payments for the program grant, approves work plans and invoices, and reviews annual reports.

Program: Special Student and Teacher

Activity: Elementary and Secondary Education Act (ESEA) Programs

education.mn.gov/mde/index.html

AT A GLANCE

- Elementary and Secondary Education Act (ESEA) provides supplementary educational funds for disadvantaged learner programs, professional development of teachers and principals, and English language acquisition.
- ESEA was reauthorized December 2015 and is now more commonly referred to as the Every Student Succeeds Act (ESSA).

PURPOSE & CONTEXT

The Elementary and Secondary Education Act (ESEA) is federal legislation that promotes student achievement through school and district reform.

The law requires each state to develop and implement a system for holding all districts and schools accountable for the education of students.

Annual federal education grants are allocated to eligible districts using census and student enrollment information.

SERVICES PROVIDED

Funds are authorized for instructional programs and materials, professional development, and for promoting family engagement under:

- Title I Part A of ESEA, which provides technical and financial assistance to local education agencies (LEAs) and schools with high numbers or percentages of children from low-income families, in order to help schools make sure that all children meet challenging state academic standards.
- Migrant Education, Title I Part C, which ensures that migratory children receive appropriate educational services that address their special needs.
- Supporting Effective Instruction, Title II Part A, which improves the preparation of prospective teachers and enhances professional development activities for teachers and other school leaders.
- The Title III Program, which helps LEAs ensure that English learners, migrant students, and immigrant students attain English proficiency and meet the same standards required of all other students.
- The Rural and Low-Income Schools Grant, Title VI Part B, which helps small rural districts with high concentrations of poverty meet challenging state academic standards.

The Minnesota Department of Education administers federal education programs for learners under ESEA and provides school districts:

- Leadership to ensure that Title programs funded under ESEA achieve academic excellence are implemented according to legislation and demonstrate reasonable promise of success.
- Support for the design, development, implementation, administration and evaluation of ESEA Title programs.
- Programmatic accountability with ESEA Title programs.

RESULTS

With the reauthorization of ESEA, all states were required to submit a state plan to the federal government in 2017 to meet the new requirements in ESSA. Implementation of ESSA began in the 2018-2019 school year. Minnesota's plan establishes accountability indicators that will be used to prioritize support for schools identified as low-performing in areas such as academic achievement, English language proficiency, graduation rates, and attendance rates.

Program: Special Student and Teacher
Activity: Other Special Student Opportunities

starbasemn.org/, minnesotamathcorps.org/

AT A GLANCE

- The Museum and Education Centers program provides grants to four museums and education centers.
- The Civic Education Grants program was first implemented in fiscal year (FY) 2014. The Civic Education Coalition consists of Minnesota Civic Youth, Learning Law and Democracy Foundation, and YMCA Youth in Government.
- 10 AmeriCorps Innovation programs served rural and urban communities in FY 2015.
- More than 613 AmeriCorps Innovation members served approximately 42,000 Minnesotans in FY 2015.
- The Starbase Minnesota program was implemented in FY 2014 and serves 3,400 students and more than 200 educators each year.
- The Minnesota Math Corps program placed more than 200 tutors in more than 170 schools, and 4,726 students received services in FY 2015.
- Race 2 Reduce grants support expanded water conservation programming in Minnesota Schools.
- Grow Your Own funding supports a new teacher initiative involving non-licensed educational professionals, including paraprofessionals and cultural liaisons.
- Concurrent enrollment grants are focused on providing professional development opportunities for teachers

PURPOSE & CONTEXT

Grant funding provides additional resources to achieve specific programmatic objectives and services as described below. These grants or grant programs support the World's Best Workforce Goals (WBWF).

SERVICES PROVIDED

Museums and Education Centers:

- 2016 legislation adds the Headwaters Science Center (HSC) to the list of museums and education centers that receive funding. HSC must use the funding for "hands-on science, technology, engineering, and math (STEM) education."
- Other grantees include the Minnesota Children's Museum, the Duluth Children's Museum, and the Minnesota Academy of Science. There is no specific purpose identified for these three grantees.
- Programs provided by the museums and education centers may help students achieve the WBWF goals related to all children ready for school, and all students ready for career and college.
- \$460,000 for 2018.
- \$460,000 for 2019.
 - \$319,000 each year is for the Minnesota Children's Museum (\$50,000 each year to Minnesota Children's Museum, Rochester).
 - \$50,000 each year is for the Duluth Children's Museum.
 - \$41,000 each year is for the Minnesota Academy of Science.
 - \$50,000 each year is for the Headwaters Science Center.

The Civics Education Grants program is awarded to the Minnesota Civic Education Coalition for a civics education program serving youth age 18 and under. This program instructs students in:

- The constitutional principles and democratic foundation of our national, state, and local institutions.

- The political processes and structures of government, grounded in the understanding of constitutional government.
- This program supports the WBWF Goal of being career and college ready.
- \$125,000 for 2018
- \$125,000 for 2019

Starbase Minnesota is a grant program focusing on science, technology, engineering, and math. The grant is awarded to Starbase Minnesota for a program serving students in grades 4-6.

- This program supports the WBWF goal of being career and college ready.
- \$1,350,000 for 2018
- FY18 balance carries forward into FY19

Minnesota Math Corps provides ServeMinnesota AmeriCorps members with a model of mathematics instruction they can use to help elementary and middle school students and their teachers meet state academic standards in mathematics.

- Students in select elementary, middle and junior high schools in Minnesota are served by this program.
- This program supports the WBWF goals of closing the racial and economic achievement gaps between students, and all students graduating from high school.
- \$500,000 for 2018
- \$500,000 for 2019

Minnesota Reading Corps combines the people power of AmeriCorps and the science of how children learn to read. The program provides training for teaching early literacy skills and provides one-on-one and small group tutoring that is tailored to each learner's needs.

- Provides literary tutors to children from age 3 to grade three.
- This program supports the WBWF goals of closing the racial and economic achievement gaps between students, and all students graduating from high school.
- \$6,950,000 for 2018
- \$6,950,000 for 2019

Race 2 Reduce is a community collaboration of many stakeholders supported through a grant from the Minnesota Department of Education (MDE).

- This program educates students about water resources and engages youth to be leaders of change and environmental stewards of the future.
- Grantees include H2O for Life, ISD 624 (White Bear Lake), and ISD 832 (Mahtomedi).
- \$307,000 for 2018 (total appropriation available through FY19).
 - \$143,000 is for H2O for Life
 - \$98,000 is for ISD 624 (White Bear Lake)
 - \$66,000 is for ISD 832 (Mahtomedi)

The Grow Your Own new teacher program is a competitive grant program that provides grants to school districts with more than 30 percent minority students for a Professional Educator and Licensing Standards Board (PELSB) approved nonconventional teacher residency program.

- Programs provide tuition scholarships or stipends to enable school district employees or community members to seek an education license.
- Grants may also be used to develop innovative programs that encourage secondary students to pursue teaching.
- \$1,500,000 for 2018
- \$1,500,000 for 2019

Expanded concurrent enrollment and Statewide Concurrent enrollment grants focus on providing professional development opportunities for teachers to acquire the graduate credits they need to teach concurrent enrollment courses in the high school. These additional credits are being required by the Higher Learning Commission.

- Statewide - \$375,000 for 2018 and 2019, with up to 5% for grant administration
- Expanded – \$375,000 for 2018 and 2019

RESULTS

Program: Special Student and Teacher
Activity: Nonrecurring Grant Programs

AT A GLANCE

Nonrecurring grant programs are grants or grant programs where the funds have already been granted out and grantees are spending down the funds. No new funds have been appropriated for these grants or grant programs.

PURPOSE & CONTEXT

Grant funding provides additional resources to achieve specific programmatic objectives and services, as described below. These grants or grant programs support the World's Best Workforce Goals.

SERVICES PROVIDED

The *Support our Students Grant* program is designed to address shortages of student support services personnel within Minnesota schools. Student support services personnel included individuals licensed to serve as a school counselor, school psychologist, school social worker, school nurse, or chemical dependency counselors. Grant funds will be used to fund new positions for student support services personnel.

- \$12,133,000 in 2017, available until June 30, 2022

Seventy-seven school sites received awards in 37 school districts. Forty grants were awarded to non-metro sites and 37 to metro sites.

By position:

- Social Worker – 21 (17 full-time, four part-time)
- School Counselor – 40 (20 full-time, 20 part-time)
- School Psychologist – 6 (two full-time, four part-time)
- Chemical Dependency – 7 (two full-time, 5 part-time)
- School Nurse – 3 (two full-time, one part-time)

The *Student Teachers in Shortage Areas* grants will provide student teaching stipends to low-income students interested in teaching in a high-needs subject area or region after receiving their teaching license.

- \$2,800,000 in 2017 is a transfer to the Office of Higher Education

The *Western Minnesota Mobile Manufacturing Lab* grant is available to Pine to Prairie Cooperative Center, in collaboration with Northland Community and Technical College, Lakes Country Service Cooperative, and Minnesota State Community and Technical College, for the purpose of establishing a western Minnesota mobile labs program, including manufacturing and welding labs, to create interest in these careers for secondary students.

- \$900,000 in 2017
- Lakes Country Service Cooperative and Minnesota State Community & Technical College partnered to purchase, outfit, and train regional teachers on two trailers that contain welding simulators for the schools in the nine counties of EDR4.
- Minnesota State Northland Community & Technical College partnered to purchase, outfit and train educators on four trailers. Over 18 teachers received training and professional development on the equipment and how to best utilize the equipment impacting more than 800 students.

The *Student Success* grant is available to District 272, Eden Prairie, for the purpose of career and college readiness. It provides funding for coordination, counseling, academic support for middle and high school students, and summer activities and before- and after-school tutoring programs.

- \$500,000 in 2017

The Minnesota Council on Economic Education (MCEE) seeks to address the gap in teacher knowledge regarding economic education. Through teacher staff development, MCEE will provide opportunities for educators to improve their understanding of economics content and instructional strategies to help all students achieve the state economics standards.

- \$250,000 in 2017

Agricultural educator grants pay for licensed agricultural education teachers who are working in the summer with high school students on extended projects. In 2018, there were 48 programs and 73 instructors funded by this grant.

- \$250,000 in 2017

The certificate incentive program will enable the Minnesota Department of Education to establish a list of qualifying career and technical education certificates that will be posted on the agency website.

- In collaboration with the governor's Workforce Development Council and the P-20 education partnership, 109 industry recognized certificates were identified for reimbursement which spanned all six available career fields and included 11 career clusters.
- During the 2016-17 school year, students collectively earned 277 Industry recognized credentials as submitted through the Certificate Incentive Revenue legislation pilot project.
- \$1,000,000 in 2017

The *Education Innovation Partners Cooperative Center* grant is a matching grant to the Education Innovation Partners Cooperative Center to provide professional development and leadership coaching to teachers and other school staff members in northeastern Minnesota.

- \$500,000 in 2017

The Southwest Minnesota State University special education teacher program supports Minnesota resident special education paraprofessionals working toward licensure in an online program coordinated by Southwest Minnesota State University.

- \$385,000 in 2017

Girls in Action is available to support low-income girls of color in graduating from high school on time, completing a postsecondary preparation program, becoming community leaders, and participating in service-learning opportunities in the community.

- \$1,500,000 in 2017

The Sanneh Foundation grant provides funding to expand academic support and student success programs to combat disparities of academic achievement among low-income youth and students of color while also promoting pathways for teachers of color.

- The 2017 grant supports the Dreamline program that serves an estimated 975 students in St. Paul Public Schools, Bloomington Public Schools, Minneapolis Public Schools, Osseo Public Schools and St. Cloud Area Public Schools. Services will be delivered by approximately 40 Dreamline coaches, the majority of whom are from ethnically and racially diverse backgrounds.
- The 2018 grant will provide all-day, in-school and before- and after-school academic and behavioral interventions for low-performing and chronically absent students with a focus on low-income students and students of color throughout the school year and during the summer to decrease absenteeism, encourage school engagement and improve grades and graduation rates.

- \$1,500,000 in 2017; \$1,000,000 in 2018

Minnesota Center for the Book program funding provides grants to the entity designated by the Library of Congress to provide statewide programming related to the Minnesota Book Awards and for additional programming throughout the state related to the center for the book designation.

- \$50,000 in 2018; \$50,000 in 2019

Grants to the African American Registry will be used to establish partnerships with Metropolitan State University and the University of St. Thomas to improve the cultural competency of candidates seeking a first-time teaching license.

- \$100,000 in 2018; \$100,000 in 2019

Teacher Shortage Loan Forgiveness provides funds for loan forgiveness to teachers who are teaching in an identified teacher shortage area. The annual amount of teacher shortage loan forgiveness for an approved applicant shall not exceed \$1,000 or the cumulative balance of qualified education loans, whichever amount is less.

- \$500,000 in 2018 is a transfer to the Office of Higher Education

The *Alternative Teacher Preparation* grant program will be used to expand program approval to licensure areas identified in shortage areas; recruit, select and train teachers who reflect the racial or ethnic diversity of Minnesota; or establish professional development programs for teachers who have obtained licenses through alternative teacher preparation programs.

- \$750,000 in 2018 is a transfer to the Office of Higher Education

Statewide Concurrent Enrollment grants support the concurrent enrollment teacher training program developed under 2016 session laws (formerly the Northwest Regional Partnership).

- \$375,000 in 2018; \$375,000 in 2019

Expanded Concurrent Enrollment grants are for institutions offering "Introduction to Teaching" or "Introduction to Education" college-in-the-schools courses.

- \$375,000 in 2018; \$375,000 in 2019

Science, Technology, Engineering and Mathematics (STEM) grants will be awarded to schools to encourage low-income and other underserved students to participate in advance placement and international baccalaureate programs.

- \$250,000 in 2018; \$250,000 in 2019

The *Educational Stability for Students in Foster Care* is a pilot project established to provide incentives for school districts and county governments to develop partnership agreements and implement transportation plans to keep foster students enrolled in their school of origin.

- \$1,000,000 in 2018

The *Northwest Online College-in-the-High-School Program* grant provides online opportunities for high school students to get secondary and postsecondary credit.

- \$50,000 in 2016 and 2017

The Information Technology Certifications contract is to be used to implement Information technology (IT) certification training within Minnesota public schools. The purpose of the funding is to increase the opportunities for students to access training in the IT area while in the secondary system.

- \$500,000 in 2016

The Minnesota Department of Education audits payment requests for these reimbursement based grants and processes payments to reimburse grantees for their costs associated with the work above.

Program: Special Education

Activity: Special Education Regular

education.mn.gov/MDE/dse/sped/

AT A GLANCE

- In fiscal year (FY) 2018, 142,270 children and youth, ages birth-21, received special education services.
- In FY 2018, 123,822 K-12 students (14.3 percent of total K-12 students) received special education services.
- In FY 2018, 29,221 full-time equivalent special education teachers and paraprofessional staff were employed.

PURPOSE & CONTEXT

This state aid program funds specially designed instruction and related services for children and youth with disabilities ages birth-21.

Districts also receive federal funds through the Individuals with Disabilities Education Act (IDEA) for special education services. IDEA ensures that all children with disabilities receive a Free Appropriate Public Education (FAPE). FAPE emphasizes that special education and related services must meet students' unique needs and prepare them for postsecondary education, employment and independent living.

This program supports all five of the World's Best Workforce goals.

SERVICES PROVIDED

Goals of special education:

- Provide FAPE in the least restrictive environment.
- Improve performance on statewide assessments.
- Increase special education student graduation rates.
- Coordinate services for students receiving support from more than one agency.

Students receiving special education services must have an Individualized Education Program (IEP). The IEP helps students with disabilities with schoolwork and helps them make progress toward graduation according to their individualized goals. Students are eligible for IDEA Part B services if they meet specific state eligibility requirements under one or more of 13 disability categories as defined in Minnesota Rules.

To be eligible for special education IDEA Part B services, students ages 3-21 must be:

- Found to have a disability.
- In need of specialized instruction and related services.

To be eligible for special education IDEA Part C infant and toddler intervention services, infants and toddlers aged birth-2 must meet at least one of the three components:

- They meet the criteria for any one of Minnesota's recognized special education disability categories.
- They have a demonstrated developmental delay.
- They are diagnosed with a physical or mental condition that has a high probability of resulting in developmental delay.

The combination of these laws and rules require the provision of FAPE for all eligible children and youth with disabilities. FAPE is defined as instruction and services that are:

- Based on eligibility and need.

- Written into an Individualized Education Program (IEP) or an Individualized Family Service Plan (IFSP).
- Provided in the least restrictive environment possible and at no cost to parents.

The Minnesota Department of Education (MDE) calculates and processes aid payments and provides technical support for this program.

RESULTS

As part of implementing the Every Student Succeeds Act (ESSA) plan, MDE applied changes to graduation and dropout calculations retroactively back to the 2013 school year in order to provide a trend that uses consistent data. Therefore, the graduation and dropout data reported below reflects the changes in rate calculations and is different than what was reported in the FY 2018 biennial narrative.

Goal: To increase the graduation rate of students with disabilities.

Measure: Graduation rate of students with disabilities.

Goal: To decrease the dropout rate of students with disabilities.

Measure: Dropout rate of students with disabilities.

Goal: To support the inclusion of students with disabilities in the statewide assessment system.

Measure: Participation and performance rates on statewide assessments (Minnesota Comprehensive Assessment [MCA] and the Minnesota Test of Academic Skills [MTAS]).

Participation in Statewide Assessments by Minnesota Students with IEPs

Goal is 95% participation in both Math and Reading tests.

Proficiency Rates for Students with IEPs on the Minnesota Statewide

Math and Reading Assessments.

Only students with valid scores are included in the table below.

	Math		Reading	
	2015-16	2016-17	2015-16	2016-17
Grade 3	45.6%	43.8%	33.6%	32.9%
Grade 4	42.8%	41.9%	32.8%	32.2%
Grade 5	30.3%	29.8%	36.8%	36.7%
Grade 6	26.0%	26.6%	29.1%	30.4%
Grade 7	22.9%	21.6%	25.5%	24.7%
Grade 8	23.7%	24.1%	26.1%	26.2%
High School*	15.8%	15.5%	26.2%	27.2%

*Math is assessed in Grade 11; Reading is assessed in Grade 10

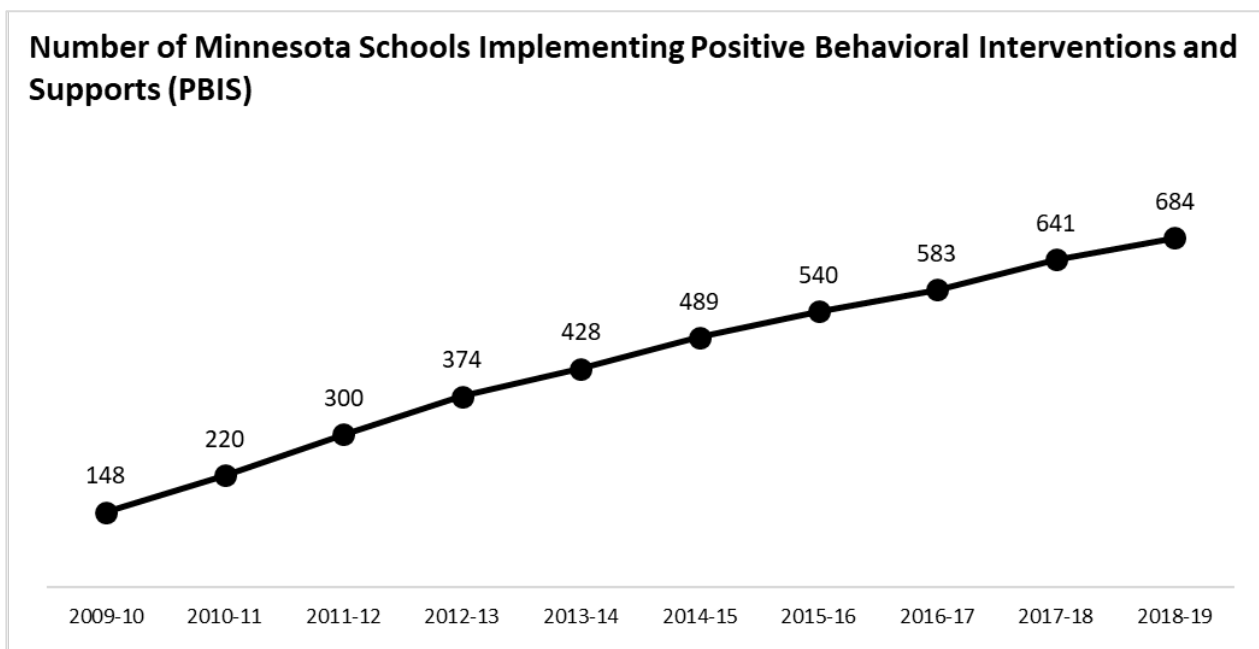

Goal: To increase postsecondary education and employment outcomes for students with disabilities.

Measure: The Post-School Outcome Survey results are based on a sample of special education students interviewed each year regarding their post-high-school education and employment experiences one year after exiting high school. The data reported below are a percent participation rate per category. Because not all students sampled respond to the survey the total of responses will not add to 100 percent.

Goal: To increase Positive Behavioral Interventions and Supports (PBIS), which is a comprehensive, data-driven and educational set of practices ensuring all students, staff and families are working from the same playbook when it comes to supporting positive behavior and academic achievement, in Minnesota schools.

Measure: Number of schools implementing PBIS.

AT A GLANCE

- Deaf-blindness is the categorical area of special education with the lowest percentage of students (0.07 percent).
- In 2017, census data from the Deaf-Blind Project indicated that 375 special education students had both vision and hearing loss reported as disabilities.
- 17,445 children ages 3-5 with disabilities were counted as being served through Individualized Education Programs on December 1, 2017, and more than half of these children participate in regular early childhood programs and receive special education services in those settings.
- In 2015, the U.S. Department of Education's Office of Special Education and Rehabilitative Services awarded the Minnesota Department of Education (MDE) a Five-Year State Personnel Development Grant (SPDG) to support State Systemic Improvement Plan (SSIP) implementation. Current SSIP partner districts include Duluth, Minneapolis, Osseo and St. Paul.
- In the 2017-18 school year, 20 local education agencies participated in the Employment Capacity Building Cohort (ECBC) with 179 students with developmental cognitive disabilities entering into competitive integrated employment.
- In the 2017-18 school year, eight Minnesota businesses participated as Project SEARCH sites hosting 58 student interns with developmental cognitive disabilities.

PURPOSE & CONTEXT

This budget activity currently consists of five programs: The Minnesota Deaf Blind Technical Assistance Project (DB Project), the Preschool Special Education Part B program, the State Systemic Improvement Plan (SSIP), the Employment Capacity Building Cohorts (ECBC), and Project SEARCH.

The DB Project is a federally funded formula grant received by the Minnesota Department of Education (MDE) to support services for students with both vision and hearing loss and their families.

The Preschool Special Education Part B program provides individualized education services to preschool children with disabilities.

The SSIP is a comprehensive, multi-year plan that focuses on improving results for children and youth with disabilities.

The ECBC is a training and technical assistance program provided for school districts to improve their employment practices for students with developmental cognitive disabilities.

Project SEARCH provides educational internships for students with intellectual/developmental cognitive disabilities through workplace immersion at participating business sites with the goal of obtaining competitive integrated employment within four to 11 months after completion of their internship experience.

Funding for services is a combination of federal funds, state special education aid and general education revenue.

SERVICES PROVIDED

The Minnesota Deaf Blind Technical Assistance Project (DB Project):

- Provides support to teams, including educators and parents, to enhance their ability to address the unique education and service needs of children with deaf blindness.
- Supports appropriate evaluation of students suspected of having dual sensory loss.
- Provides training to new cohorts of interveners, educational aides who help the student who is deafblind, each year.

The Preschool Special Education Part B program is federally mandated.

- Federal funds support statewide efforts to:
 - Seek out and identify potentially eligible children; and,
 - Provide professional development opportunities promoting evidence-based practices through the Regional Centers of Excellence.
- Services are provided to each eligible child through an Individualized Education Program.
- The goal is to increase each child's ability to actively and independently participate in current and future environments such as home, preschool and kindergarten.
- Services most often include special instruction, speech therapy, occupational or physical therapy, and transportation.
- The Minnesota Department of Education:
 - Processes payments/reimbursements;
 - Provides professional development;
 - Collects and reports data;
 - Interprets regulations, statutes and rules; and
 - Connects children and families to appropriate local programs and monitors local implementation.

State Systemic Improvement Plan (SSIP) goals and partnerships:

- Increase the six-year graduation rates for American Indian and black students with disabilities.
- Develop capacity of districts to select and implement effective and sustainable evidence-based practices that support improving graduation outcomes for students with disabilities.
- MDE was awarded a \$5.5 million, five-year State Personnel Development Grant to support SSIP implementation, among other grant initiatives. Initial SSIP partner districts include Duluth, Minneapolis, Osseo, and Saint Paul.

The Employment Capacity Building Cohorts (ECBC)

The Employment Capacity Building Cohorts (ECBC) provides training and technical assistance to school districts in their efforts to learn and change employment practices for students with developmental cognitive disabilities in their school districts and associated counties. Districts partner with their local vocational rehabilitation supervisors and counselors, as well as county level supervisors and case-managers from disability services.

Project SEARCH

Project SEARCH is an internationally recognized evidence-based, one-year internship program for students with intellectual/developmental cognitive disabilities, ages 18-21, in their last year of high school. The Project SEARCH Transition Program is a program that provides educational experiences for these students through workplace immersion at participating business sites. Students receive skill-based training in independent living and employability skills. The goal of Project SEARCH's is that student interns obtain competitive integrated employment within four to 11 months after completion of their internship experience.

RESULTS

Deaf Blind Project

Type of Measure	Name of Measure	2016	2017
Quantity	Unduplicated Child Count where deaf/blind is listed as the primary disability	96	103
Quantity	Number of deaf/blind interveners completing training cohort.	32	38
Quality	Percentage of the participants of intervener training for deaf-blind, who report enhancement of their understanding of deaf-blindness and best practices which affect their current practice.	90%	92%

Preschool Education Part B Program

The table below shows Minnesota's performance on the federally required child outcomes for federal fiscal years (FFY) 2014-16.

Child Outcomes	FFY 2014	FFY 2015	FFY 2016
Children will demonstrate positive relationships			
(A) Greater than expected progress	69.6%	69.8%	68.4%
(B) Exited Part C within age expectations	55.3%	55.5%	54.2%
Children will acquire and use knowledge and skills			
(A) Greater than expected progress	72.5%	72.0%	70.3%
(C) Exited Part C within age expectations	55.0%	54.7%	52.8%
Children will take action to meet needs			
(A) Greater than expected progress	71.0%	70.7%	69.1%
(B) Exited Part C within age expectations	64.3%	64.9%	63.5%

State Systematic Improvement Plan

As part of implementing the ESSA plan, MDE applied changes to graduation calculations retroactively back to the 2013 school year in order to provide a trend over time that uses consistent data. Therefore, the SIMR graduation data reported below reflects the changes in rate calculations and is different than what was reported in the FY 2018 biennial narrative.

To show the differences between the old and new graduation calculations, the State Identified Measurable Result (SIMR) data for the past three years are shown with both the old calculation and the new calculation. The current year SIMR data are also shown, using the new calculation.

MDE's SIMR is to increase six-year graduation rates for American Indian and Black students with disabilities by at least 1 percent per year over the next five years.

State Identified Measurable Result—Targets and Data

<i>Year</i>	<i>School Year</i>	<i>Target</i>	<i>Old Graduation Data</i>	<i>New Graduation Data</i>
FFY 2013— <i>Baseline</i>	2013-14	53.28%	53.28% (old baseline)	53.1% (new baseline)
FFY 2014	2014-15	53.30%	54.99%	53.8%
FFY 2015	2015-16	54.00%	56.65%	56.8%
FFY 2016	2016-17	55.00%	**	57.0%
FFY 2017	2017-18	56.00%	**	
FFY 2018	2018-19	57.00%	**	

**will no longer be used or reported

State Identified Measurable Result—Six-Year Cohort Statewide Cohort Totals and Graduation Rates 2016
NEW Calculation

<i>Race/Ethnicity Group</i>	<i>Total Special Education Students in Six-year Cohort</i>	<i>Total Special Education Students Graduating</i>	<i>Percent of Special Education Graduates</i>	<i>Total Special Education Students Not Graduating in 2016</i>
American Indian	321	165	51.4%	156
Black	1,291	750	58.1%	541
American Indian and Black	1,612	915	56.8%	697
All Race/Ethnic Groups Combined	9,534	6,769	71.0%	2,765

State Identified Measurable Result—Six-Year Cohort Statewide Cohort Totals and Graduation Rates 2017
NEW Calculation

<i>Race/Ethnicity Group</i>	<i>Total Special Education Students in Six-year Cohort</i>	<i>Total Special Education Students Graduating</i>	<i>Percent of Special Education Graduates</i>	<i>Total Special Education Students Not Graduating in 2017</i>
American Indian	330	168	50.9%	162
Black	1,315	769	58.5%	546
American Indian and Black	1,645	937	57.0%	708
All Race/Ethnic Groups Combined	9,781	7,042	72.0%	2,739

ECBC

In the fall of 2017, 20 local education agencies continued or were new to the ECBC. In the same year, 179 students with developmental cognitive disabilities entered into competitive, integrated employment.

Project SEARCH

In 2017-18, eight Minnesota businesses participated as Project SEARCH sites and hosted a total of 58 interns.

Program: Special Education

Activity: Other State Special Education Programs

education.mn.gov/MDE/dse/schfin/sped/

AT A GLANCE

- 254 students with disabilities were placed in care and treatment facilities in fiscal year (FY) 2017.
- 104 students without disabilities were placed in care and treatment programs in FY 2017.
- In FY 2017, the average length of stay in a foster facility for care and treatment for students both with and without disabilities was 58 school days, at an average cost of \$4,826.68 per stay.
- 15,088 early childhood special education (ECSE) (birth-4) children served in the Homebased Services program in FY 2017.
- In FY 2017, Minnesota courts placed zero non-Minnesota students with Individual Education Programs (IEP) into care and treatment facilities.
- In FY 2017, court action placed 120 Minnesota students out of state.
- The staff development grants for co-ops is a one-time grant appropriated for FY 2017, available until June 30, 2019.

PURPOSE & CONTEXT

There are currently five programs related to state-aid funded special education in the Other Special Education Programs budget activity. They are: Children with Disabilities, Homebased Services, Court-Placed Revenue, Out-of-State Tuition, and Staff Development Grants for Cooperative Units.

- The Children with Disabilities program provides funding for individuals who are placed for care and treatment in a licensed residential facility or foster facility, and for whom no district of residence can be determined. Children with disabilities are eligible for this program if no district of residence can be determined because:
 - Parental rights have been terminated by court order.
 - The parent or guardian is not living in the state.
 - No other district of residence can be established.
 - The parent or guardian with legal custody of the child is an inmate of a Minnesota correctional facility or is a resident of a halfway house under the supervision of the commissioner of Corrections.
- Children without disabilities are eligible for this program if no district of residence can be determined because:
 - Parental rights have been terminated by court order.
- Districts that serve these students receive full payment for the cost of their education from varying state sources, including children with disabilities aid.
- This program contributes to the World's Best Workforce (WBWF) goal of all students graduating from high school.

The Homebased Services aid program reimburses school districts for travel costs associated with early childhood special education (ECSE) services.

- This program contributes to the WBWF goal of all students ready for school.

Court-Placed Revenue pays for special education for non-Minnesota students with Individual Education Programs (IEP) when the school district is unable to collect tuition from the responsible state, school district, or other non-Minnesota agency.

- Without this aid, a school district would have to pay for special education costs out of their general fund.
- This program contributes to the WBWF goal of all students graduating from high school.

The Out-of-State Tuition program provides education funding for Minnesota resident students placed by court action in out-of-state care and treatment facilities, in a state that does not have a reciprocity agreement.

- Students are placed in specialized care and treatment services when those services are not available in Minnesota, either because the facilities are full, or Minnesota does not have the specialized treatment center available.
- This program contributes to the WBWF goal of all students graduating from high school.

The Staff Development Grants for Cooperative Units are staff development grants to intermediate school districts and other cooperative units providing instruction to students in a federal instruction setting of level four or higher. The grants must be used for enhanced services to students who may have challenging behaviors, mental health issues, or be suffering from trauma. Staff development activities include, but are not limited to, proactive behavior management, personal safety training, de-escalation techniques, and adaptation of curriculum and pedagogy for students with complex needs.

- This program contributes to all five of the WBWF goals.

SERVICES PROVIDED

The Children with Disabilities program ensures a free and appropriate education for eligible children.

- \$1,597,000 for FY 2017
- \$1,830,000 for FY 2018
- Districts are reimbursed for 100 percent of the additional costs of educating these children; they are reimbursed the year after they provide the services.
- The Minnesota Department of Education (MDE) processes reimbursement requests and provides technical support for this program.

With the Homebased Services program, the state reimburses districts half of the amount spent, based on mileage, by workers traveling to provide home- or community-based services to children under age 5 who have disabilities.

- \$508,000 for FY 2017
- \$532,000 for FY 2018
- For very young children, services may also include parent consultation and training.
- Federal funding may be used for this purpose.
- MDE calculates and processes aid payments and provides technical support for this program.

With the Court-Placed Revenue program, Minnesota school districts that provide special education and related services to court-placed non-Minnesota students with IEPs are reimbursed for those services if the out-of-state placing agencies do not pay tuition.

- \$46,000 for FY 2018
- \$47,000 for FY 2019
- Districts must document that they tried to collect tuition from the students' resident districts or states, and submit proof to MDE.
- Districts are reimbursed the fiscal year after they provide the services.
- MDE processes reimbursement requests and provides technical support for this program.

Out-of-State Tuition is provided when a Minnesota student is placed in an out-of-state care and treatment facility:

- The out-of-state care and treatment facilities submit tuition bills to the Minnesota resident district, based on the actual cost of providing education.
- The Minnesota resident district submits the tuition bills to MDE.
- MDE calculates state aid and processes aid payments to the district.
- The aid is paid as a reimbursement in the year after the services are provided.
- \$250,000 for FY 2018

- \$250,000 for FY 2019
- MDE also provides technical support for this program.

The Staff Development Grants for Cooperative Units is a nonrecurring grant program.

- \$4,500,000 for FY 2017
- \$1000 per full-time equivalent number of licensed instructional staff and non-licensed classroom aides.
- Funding available in FY 2017, FY 2018, and FY 2019.

RESULTS

The number of children under age 5 identified as having disabilities and receiving special education services increased from 11,411 in FY 2015 to 15,088 in FY 2017. Most of these services are provided in the child's home or in a center-based site in the community.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>FY 2014</i>	<i>FY 2015</i>	<i>FY 2016</i>	<i>FY 2017</i>
Quantity	Children with Disabilities - Number of eligible Average Daily Memberships (ADM) with disabilities in placement.	56.47	35.83	70.11	78.61
Quantity	Children with Disabilities - Number of eligible Average Daily Memberships (ADM) without disabilities in placement.	10.23	12.23	13.38	19.65
Quantity	Homebased Services - Number of children under age five receiving special education services.	13,725	14,111	14,580	15,088
Quantity	Partial-year students aggregated to determine average daily membership (ADM) placed out-of-state for care and treatment.	65.9	63.91	71.03	42.45

Over the past five years, the number of students eligible for court-placed revenue has declined and remains low. Many school districts are making sure that the resident state or district pays for the cost of special education services.

Program: Facilities and Technology
Activity: Debt Service Equalization

AT A GLANCE

- In fiscal year (FY) 2019, 231 districts have regular debt service equalization revenue.
- In FY 2019, 34 districts will receive regular debt service equalization aid.
- In FY 2019, 2.8 percent of eligible regular debt service revenue is state aid.
- In FY 2019, two districts will receive natural-disaster debt service equalization aid.

PURPOSE & CONTEXT

School districts must receive approval from a majority of those voting in a school bond referendum before issuing bonds to construct, acquire or improve school facilities. Debt Service Equalization is a state aid and local property tax levy program that helps to ensure that all school districts can provide adequate educational facilities for their students.

Natural Disaster Debt Service Equalization revenue is available beginning in FY 2017 to districts that suffered a natural disaster.

This program serves all public school students and communities in Minnesota. School districts with a relatively high debt service tax rate and low-to-moderate tax base per pupil unit may receive aid to reduce property owners' tax burdens.

SERVICES PROVIDED

The regular Debt Service Equalization program under Minnesota Statutes, section 123B.53, includes several components:

- **Required Debt Service Levy**
 - A school district must levy for the principal and interest payments on its general obligation bonds, plus an additional 5 percent to cover potential tax delinquencies, for the following fiscal year.
 - The required debt service levy for all years is established and approved by the local school board at the time that bonds are sold.
 - To be eligible for debt service equalization, the bonds must have been sold by July 1 of the calendar year the levy is certified. In addition, debt service for repayment of bonds issued after July 1, 1992 must be for construction projects that have received a positive review and comment according to section 123B.71, and have a bond schedule approved by the commissioner and, if necessary, adjusted to reflect a 20-year maturity schedule; and debt service for repayment of bonds issued after July 1, 1997, must be for facilities whose primary purpose is to serve students in kindergarten through grade 12.
 - Beginning in FY 2017, bonds related to the Long-Term Facilities Maintenance program are equalized through that program and are no longer eligible for debt service equalization.
- **Debt Service Equalization Revenue**
 - School districts qualify for state debt service equalization aid if the eligible debt service levy exceeds 15.74 percent of the district's tax base (as measured by Adjusted Net Tax Capacity (ANTC)) and the district's tax base per student is below the guaranteed tax base per student set in law.
 - There is no state aid on the portion of the levy falling below 15.74 percent of the district's ANTC.

- The state provides aid to pay a portion of the levy exceeding 15.74 percent of the district's ANTC using a two-tiered sliding scale that varies with district tax base per student. As the district tax base per student declines, the state share of equalized revenue increases.
- Debt Service Equalization Aid equals the difference between the revenue and the levy.

To be eligible for Natural Disaster Debt Service Equalization under Minnesota Statutes, section 123B.535, a district must:

- Have been impacted by a natural disaster occurring after January 1, 2005, in an area eligible for Federal Emergency Management Agency (FEMA) payments.
- Have damage of \$500,000 or more to school district buildings that is not covered by insurance or FEMA payments.
- Notify the commissioner of education of its intended natural disaster debt service revenue every year by July 1.
- A district receives aid under this program if its total debt service levy exceeds 10 percent of its tax base and the district's tax base per student is below a guaranteed tax base per student set in state law.
- The aid a district receives varies depending on the amount of the district's eligible debt service levy, the number of students it has, and its property tax capacity.
- The state guaranteed tax base for this program is significantly higher than under the regular state debt service equalization program.

MDE reviews and comments on proposed school construction projects and calculates state aid and property tax levies for this program.

RESULTS

MDE does not collect data regarding unmet facility needs.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>FY 2017</i>	<i>FY 2019</i>

Activity: Telecommunications Access

education.mn.gov/MDE/dse/schfin/fac/

AT A GLANCE

- In fiscal year (FY) 2018, school districts combined into 18 telecommunications clusters, and three individual school districts received telecommunications access aid.
- Demand from districts in FY 2018 totaled \$8.95 million.
- Aid is capped at \$3.75 million per year. As a result, the aid for FY 2018 was prorated at approximately 42 percent.

PURPOSE & CONTEXT

This program provides telecommunication and internet access funding for all public and nonpublic schools in Minnesota.

All public school districts, charter schools, intermediate school districts, and nonpublic schools in Minnesota are eligible to participate in this program. Home schools are not eligible.

SERVICES PROVIDED

Schools and districts can be reimbursed for the following costs:

- Specific ongoing or recurring telecommunications/internet access costs.
- Recurring costs of specified maintenance on the school district's wide area network.
- Recurring costs of cooperative arrangements for delivery of telecommunications/internet access between certain entities.
- Specific service provider installation fees.

Eligible costs for schools and school districts that are not members of a telecommunications cluster must exceed \$16 per student to qualify for aid. Telecommunications access clusters are school associations, which do not need to meet the \$16 per student threshold.

MDE calculates and processes aid payments for this program.

Program: Facilities and Technology

Activity: Long-Term Facilities Maintenance

education.mn.gov/MDE/dse/schfin/fac/ltfm/

AT A GLANCE

- This program began in fiscal year (FY) 2017.
- This program replaces the Alternative Facilities, Deferred Maintenance, and Health & Safety revenue programs that were funded through FY 2016.
- In taxes payable 2018, there were 335 district and secondary cooperative 10-year facility plans approved for FY 2019 revenue.

PURPOSE & CONTEXT

Students need a healthy, safe, accessible, and well-maintained place to learn; and likewise, for school and district employees to work. The long-term facilities maintenance program is a state aid and levy program to address facility and grounds issues that impact safety, health, deferred maintenance, and accessibility concerns. One of the primary purposes of the program was to reduce the disparity in funding between the largest 25 districts that were eligible for Alternative Facilities Revenue and all other districts.

School districts, intermediate school districts and other cooperatives (through member districts), and charter schools are eligible to participate in the program

This program supports the World's Best Workforce goals by providing funding for healthy, safe, accessible facilities.

SERVICES PROVIDED

Program revenue may be used for qualifying facility issues in any existing public school building or site. However, the district must own or have contractually agreed to purchase (lease-purchase) any building or facility where program-funded work is done. New construction and portable classrooms are not eligible for funding. The program has its own equalization formula. Projects may be funded on a pay-as-you-go basis or by issuing debt. Intermediate districts and cooperatives do not receive state aid. Charter school revenue is 100 percent state aid.

The program addresses a wide array of areas impacting facilities and school environments, including the following:

- Asbestos removal or encapsulation.
- Hazardous substance, including provisions for fuel storage repairs, cleanup, storage tank removal, and lead removal.
- Fire safety, including compliance with state fire marshal orders.
- Indoor air quality.
- Environmental health and safety management.
- Physical hazard control, including indoor air quality.
- Accessibility to accommodate persons with a disability.
- Deferred capital and maintenance projects.
- School districts with an approved voluntary prekindergarten program under Minnesota Statutes, section 124D.151, may include costs approved by the commissioner for remodeling existing instructional space to accommodate prekindergarten instruction.

The Minnesota Department of Education (MDE) reviews and approves 10-year facility plans that have been approved by the school board and submitted for commissioner approval. MDE calculates state aids and property tax levies for this program.

RESULTS

<i>Districts</i>	<i>FY 2016 (Previous Programs)</i>	<i>FY 2017 (Long-Term Facilities Maintenance)</i>

Program: Facilities and Technology

Activity: Special Facilities and Technology Opportunities

AT A GLANCE

- The Innovative Technology Cooperative Grant was appropriated for fiscal year (FY) 2016 and FY 2017.
- The Broadband Expansion Grant was a one-time grant appropriated for FY 2017.
- Early Repayment Incentive grants are paid annually for FY 2017 through FY 2021 to seven districts that retired their state capital loans in 2016. The total aid will be \$11,750,000.
- Maximum Effort Loan Aid is paid annually for FY 2018 through FY 2022 to 10 school districts that had state capital loans outstanding as of June 30, 2016. The total aid will be approximately \$16.3 million.

PURPOSE & CONTEXT

The Innovative Technology Cooperative Grant was a one-time grant to the Innovative Technology Cooperative for professional development related to technology.

The Broadband Expansion Grant was a one-time grant designed to support wireless off-campus learning for students.

The Early Repayment Incentive Grant provided an incentive for districts to retire their state capital loans by November 30, 2016. With the retirement of the capital loan, however, school districts lose the ability to issue a form of debt known as “one-day bonds” that fund various capital projects. Early Repayment Incentive Grants offset the loss of “one-day bond” funding with a dollar amount specified in law for each district.

The Maximum Effort Loan Aid provides property tax relief to offset the amount of interest paid on state maximum effort loans between December 1, 1990, and June 30, 2016, and capital loans between June 30, 2017, and June 30, 2021, by the 10 qualifying districts.

SERVICES PROVIDED

The Innovative Technology Cooperative Grant allowed districts to provide technology coaches in the schools and provide regional professional development in the schools in the cooperative in the Grand Rapids region.

- \$150,000 in FY 2016
- \$150,000 in FY 2017

The Broadband Expansion Grants provided funding for school districts to purchase student devices allowing them to remotely access school-based learning programs or purchase “hotspots” for their school buses so that students who have long bus routes could continue their learning during their bus rides home.

- \$500,000 in FY 2017

The Early Repayment Incentive Grant payments may be expended for any school-related purpose. The annual amounts by district are as follows:

- \$150,000 ISD 36, Kelliher
- \$180,000 ISD 95, Cromwell
- \$495,000 ISD 299, Caledonia
- \$220,000 ISD 306, Laporte
- \$150,000 ISD 362, Littlefork

- \$650,000 ISD 682, Roseau
- \$505,000 ISD 2580 East Central

MDE administers all aspects of the grant programs. Services include:

- Developing application process and reporting forms for applicants/recipients.
- Providing technical assistance to applicants/recipients.
- Creating grant contracts including work plans and budget information.
- Calculating, auditing, and processing payments.
- Providing guidance as it relates to Minnesota statutes and state policies.

Program: Facilities and Technology

Activity: Miscellaneous Facilities Levies (information only)

AT A GLANCE

For property taxes payable in calendar year 2018:

- Building/land lease levies were \$82.42 million.
- Capital projects levies were \$99.08 million.
- There were no cooperative building repair levies.
- There were no disabled access levies.
- Specific legislation levies were \$25,000.

PURPOSE & CONTEXT

Minnesota school districts generate additional revenue through local property tax levies for various capital expenditure obligations. This budget activity summarizes five facilities levy programs.

Eligible districts with levy authority may participate in these programs. All students in participating districts are served by these programs.

SERVICES PROVIDED

Building and Land Lease

- Districts may levy for expenditures to rent or lease a building and/or land for instructional purposes, school storage, administrative purposes, or furniture repair, if the district determines that the total operating capital revenue authorized is insufficient for this purpose.
- The levy may not exceed \$212 per pupil unit. Districts that are members of an intermediate district may levy an additional amount not to exceed \$65 per pupil unit for intermediate district leases.

Capital Project Referendum

- A school district may hold a referendum election to ask voters to increase property taxes for a capital project.
- All proceeds from the levy must be transferred to the capital project referendum account in the building construction fund or general fund.
- This program has been used primarily for deferred maintenance and technology improvements.

Cooperative Building Repair

- A school district that has a cooperative agreement may levy for the repair costs of a building located in another district that is a party to the agreement.
- There currently are no active cooperative building repair levies.

Disabled Access Levy

- The 1990 federal Americans with Disabilities Act (ADA) facilitates the removal of architectural barriers for persons with disabilities in public schools and helps school districts modify school buildings.
- A school district may levy up to \$300,000 over a time period not to exceed eight years to provide disabled accessibility for all facilities.
- Some newly consolidated districts have maximum levy authority of \$450,000 or \$600,000.
- The commissioner must approve the levy amount.

- For most districts, the eight-year time period has expired or the dollar maximum levy authority has been reached.
- There currently are no active disabled access levies.

Special Legislation

- Special legislation provides selected districts with additional capital levy for specific purposes.
- Currently provides additional capital levy for Independent School District 319, Nashwauk-Keewatin.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Pay 2016</i>	<i>Pay 2018</i>
Quantity	Number of districts levying for building leases	220	233
Quantity	Number of districts levying for capital projects	41	51

Program: Nutrition
Activity: School Lunch

education.mn.gov/MDE/dse/FNS/SNP/index.htm

AT A GLANCE

- More than 100 million lunches (including snacks) served in federal fiscal year (FY) 2017.
- Commodities equaling \$33,951,534 received by 680 schools in federal FY 2017.

PURPOSE & CONTEXT

This program provides nutritious lunches during the school day to help meet children's nutritional needs and foster lifelong healthy eating habits.

The United States Department of Agriculture (USDA) provides funding for the National School Lunch Program (NSLP). The afterschool snack component of the NSLP provides reimbursement for snacks served to children in afterschool educational and enrichment programs. The state of Minnesota provides additional funding to schools to keep lunch prices affordable.

These programs support the World's Best Workforce (WBWF) goal of helping to close the racial and economic achievement gaps between students.

SERVICES PROVIDED

Student health and learning are improved through daily access to a nutritious school lunch. Students in afterschool care programs receive access to a nutritious snack.

- School lunch menus are planned and served according to federal meal-pattern guidelines.
- Students from families with incomes under 185 percent of federal poverty guidelines receive meals at no cost to household.
- Commodities such as meat, cheese, poultry, fruits, and vegetables are donated by the USDA to contribute to the school lunch menu.
- Schools complete commodity preference surveys for more than 1,000 raw processed products, as well as for commercial products that have commodities in them.

School lunch programs are supported financially and administratively through:

- Federal and state reimbursements for lunches and afterschool snacks.
- Surveys of school preferences for USDA commodities.
- Notification to schools of students electronically certified for meal benefits.
- Cyber-Linked Interactive Child Nutrition System (CLICS), an interactive website which allows schools to meet their application, commodity, and claim requirements online.

Reimbursement Rates: FY 2017:

	<i>State:</i>	<i>Federal:</i>
free lunch	\$0.125	\$3.16
reduced price	\$0.525	\$2.76
fully paid	\$0.125	\$0.30 or .32*

*additional 2 cents for sites that serve more than 60 percent free/reduced-price lunches

The Minnesota Department of Education (MDE):

- Conducts administrative reviews of school lunch and afterschool snack programs.
- Provides technical assistance and resource materials to schools and residential child care settings.
- Processes reimbursement claims for meals served.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>FY 2015</i>	<i>FY 2016</i>	<i>FY 2017</i>
Quantity	Percent of lunches sold that are free or reduced price	47.7%	49%	49%
Quantity	Number of school food authorities receiving administrative reviews to assure program compliance	275	270	185

Program: Nutrition
Activity: School Breakfast

education.mn.gov/MDE/dse/fns/snp

AT A GLANCE

In federal fiscal year (FY) 2017:

- Over 37 million breakfasts were served.
- 680 public school districts, charter schools, private schools, and residential child care institutions participated.

PURPOSE & CONTEXT

This program provides nutritious breakfasts to school children to help meet their nutritional needs and foster lifelong healthy eating habits.

The United States Department of Agriculture (USDA) provides funding for the School Breakfast Program (SBP), which is augmented with state funding.

These programs support the World's Best Workforce (WBWF) goal of helping to close the racial and economic achievement gaps between student groups.

SERVICES PROVIDED

School breakfast menus are planned according to federal meal pattern guidelines. Students from families with incomes under 185 percent of federal poverty guidelines receive free or reduced-price meals. Student health and achievement are improved through daily access to a nutritious school breakfast.

School breakfast programs are supported through:

- Federal and state reimbursements for school breakfasts.
- USDA commodity food items.
- Cyber-Linked Interactive Child Nutrition System (CLiCS) is a website that allows schools to meet their application and claims requirements online.

Reimbursement rates: FY 2017

	<i>State:</i>	<i>Federal:</i>
Free breakfast	\$0	\$1.75 or \$2.09**
Reduced price	\$.30	\$1.45 or \$1.79**
Fully paid	\$.55 or \$1.30*	\$0.30

*All Kindergarten students receive free, fully paid breakfasts.

**Severe-need sites receive a higher reimbursement.

The Minnesota Department of Education (MDE):

- Conducts administrative reviews of school breakfast programs.
- Provides technical assistance and resource materials to schools and residential child care settings.
- Processes reimbursement claims for meals served.

Program: Nutrition

Activity: Summer Food Service Replacement

AT A GLANCE

- Approximately 3.1 million meals were served during the summer of 2017.
- \$9,669,116 was reimbursed to the 904 enrolled organizations that served meals.
- \$149,954 of the total reimbursement was state funding.

PURPOSE & CONTEXT

This Summer Food Service Program (SFSP) helps children who rely on the school breakfast and lunch programs to get the healthy food they need outside the school year.

The United State Department of Agriculture (USDA) funds the program.

State funds are available to supplement meals and snacks.

This program supports the World's Best Workforce (WBWF) goal of helping to close the racial and economic achievement gaps between students.

SERVICES PROVIDED

Menus for healthy meals and snacks are planned according to federal guidelines. Meals and snacks are provided at no charge at a variety of sites to children in low-income areas during the summer. Nutritional meals and snacks improve children's health.

Reimbursement rates: Federal FY 2017:

<i>Federal</i>	
breakfast	\$2.1875* or \$2.1450
lunch/supper	\$3.8325* or \$3.7700
snack	\$ 0.9075* or \$ 0.8875

*reimbursement for rural or self-prep sites

State funding is allocated in proportion to the total number of meals served by each sponsor, approximately \$0.02 per meal.

The Minnesota Department of Education (MDE):

- Reaches out to schools, anti-hunger and youth serving organizations to increase SFSP participation.
- Reviews summer sites and provides training and technical assistance to sponsors.
- Calculates and processes reimbursement claims from sponsors.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>FY 2015</i>	<i>FY 2016</i>	<i>FY 2017</i>
Quantity	Number of sponsors	189	195	204
Quantity	Number of sites	774	839	931

Note: Sponsors, such as a nonprofit, school, or other local government entity, are organizations that take on the administrative responsibility of managing the program at the local level. Program sites refer to the location of the meals being served.

Program: Nutrition
Activity: Commodities

AT A GLANCE

- Minnesota schools receive an estimated 23 million pounds of commodity foods each year.

PURPOSE & CONTEXT

The commodity program began in the early 1930s as an outgrowth of federal agriculture policies designed to shore up farm prices and help American farmers suffering from the Great Depression. When the National School Lunch Act was passed in 1946, its stated purpose was both to improve the health of children and to provide a market for agricultural production.

The United States Department of Agriculture (USDA) provides the entire funding for the program.

SERVICES PROVIDED

Schools participating in the National School Lunch Program (NSLP):

- Receive commodity foods, called “entitlement” foods, at a value of 23.25 cents (July 2017) for each lunch served.
- May also get “bonus” commodities such as meat, cheese, poultry, grains, rice, fruits and vegetables, as they are available through USDA. These foods are offered periodically, but only as they become available through agricultural surpluses.

A state revolving fund was established in 2001 for the cash received for commodity donated foods that have been lost, damaged, recalled or diverted for processing. Minnesota uses the fund to issue payments for the value of those foods.

The Minnesota Department of Education (MDE) assists schools with their entitlements through technical assistance, food ordering, deliveries, inventories, monitoring and other issues concerning the USDA Foods program.

Program: Nutrition

Activity: Child and Adult Care Food

AT A GLANCE

In federal fiscal year (FY) 2017:

- 7,282 family child care homes, 909 child care centers, 44 adult care centers, and 13 emergency shelters participated in the Child and Adult Care Food Program (CACFP).
- 47.7 million meals and snacks were served.

PURPOSE & CONTEXT

CACFP helps ensure that children and youth, those receiving emergency shelter services, chronically disabled adults, and senior citizens receiving licensed organized care, have access to nutritious meals.

Child care centers, family child care homes, school-age care sites, after-school programs, emergency shelters, and adult day care centers may participate in the CACFP.

The federal government provides all funding for the program. The United States Department of Agriculture (USDA) administers CACFP through the Minnesota Department of Education (MDE).

SERVICES PROVIDED

Health is improved through access to nutritional meals and snacks.

- Menus for healthy meals and snacks are planned according to federal guidelines.
- Most CACFP locations provide meals and snacks at no charge to all enrolled children.

CACFP is supported through:

- Federal reimbursement for meals and snacks. (Reimbursement rates are for federal FY 2017.)

	<i>Free</i>	<i>Reduced-Price</i>	<i>Paid</i>
Breakfast	\$1.71	\$1.41	\$0.29
Lunch/supper	\$3.16	\$2.76	\$0.30
Snack	\$0.86	\$.43	\$.07

- Federal administrative reimbursements to family child care homes is defined by poverty level in geographic area served. Tier 1 sites are reimbursed at a higher rate as a result of serving more families that qualify for free or reduced price meals.

	<i>Tier 1</i>	<i>Tier 2</i>
Breakfast	\$1.31	\$.48
Lunch/supper	\$2.46	\$1.49
Snack	\$0.73	\$.20

The Minnesota Department of Education (MDE):

- Assists in meeting program requirements.
- Conducts administrative reviews.
- Provides technical assistance, workshops on nutrition and program regulations, and provides resource materials.
- Processes meal reimbursement claims.

Program: Nutrition
Activity: Kindergarten Milk

AT A GLANCE

- 3,695,173 half pints of milk were subsidized in fiscal year (FY) 2017 by the Special Milk Program (SMP).
- 3,786,335 half pints were subsidized in FY 2016 through the Minnesota Kindergarten Milk Program (MKMP).

PURPOSE & CONTEXT

Providing milk during the school day helps meet children's nutritional needs and fosters lifelong healthy eating habits. The health and achievement of preschoolers and kindergarteners are improved through daily access to milk.

MKMP is funded by state aid at 20 cents per half pint.

SMP is funded by the U.S. Department of Agriculture at 20 cents per half pint.

Schools that participate in SMP may also participate in MKMP, allowing participating districts to be reimbursed up to 40 cents per half pint of milk served to children.

SERVICES PROVIDED

Both programs are supported financially and administratively through:

- Federal and state reimbursements for half pints of milk served.
- Cyber-Linked Interactive Child Nutrition System (CLiCS) – a website that allows participants to meet their application and claims requirements online.

The Minnesota Department of Education (MDE):

- Conducts administrative reviews of milk programs.
- Provides technical assistance and resource materials.
- Processes reimbursement claims for cartons of milk served.

Program: Libraries

Activity: Basic Support and Federal Grants

education.mn.gov/MDE/dse/Lib/sls/Reg/

AT A GLANCE

- Public library services are available in all 87 counties.
- 12 regional public library systems support 355 public libraries.
- Public libraries shared over 1.2 million items to other libraries through interlibrary loan, which expanded the reach of local collections.
- In 2017, over 3.8 million Minnesotans had a library card, and public libraries were visited 233 million times.

PURPOSE & CONTEXT

Minnesota's public libraries are designed to ensure all residents have access to information regardless of educational or economic status or location in the state. This program helps Minnesota's public libraries offer free and equitable access to a variety of educational, cultural and informational resources, programs and activities.

Libraries support all five of the World's Best Workforce goals through free, high-quality early learning opportunities and homework support, including extensive book and magazine collections available through interlibrary loan to students. Ninety-four percent offer summer learning programs for children and teens.

SERVICES PROVIDED

Public libraries collect and make information available in a number of different formats—print book, magazine, DVD, CD, and download-only formats. Trained staff help Minnesotans of all ages and abilities to access this information.

Regional library basic system support:

- Provides incentives such as access to regionally administered programs (i.e., interlibrary loans) for counties and cities to work together in regional public library systems, extending service across jurisdictions at the most reasonable cost.
- Distributes funding between cooperating jurisdictions and encourages sharing of library materials through library-to-library lending and borrowing.
- Maintains and improves library programs, materials, and outreach to diverse residents.

The Minnesota Department of Education (MDE) administers all aspects of the aid program. Services include:

- Developing application and report forms for aid recipients.
- Providing technical assistance to applicants/recipients.
- Calculating and processing aid payments.
- Providing guidance as it relates to Minnesota statutes.
- Managing the statutory library annual report program.
- Giving technical assistance and training to all public libraries and regional library systems.

Program: Libraries

Activity: Multi-county Multi-type

education.mn.gov/MDE/dse/Lib/sls/Mult/

AT A GLANCE

- Seven multi-county, multi-type library systems serve approximately 1,800 libraries.
- Multicounty multi-type libraries serve all 87 Minnesota counties.

PURPOSE & CONTEXT

Minnesota's multi-county, multi-type library systems promote excellence in library services and connections between public libraries and libraries in schools, colleges and universities so that library staff can better serve residents.

Multi-county, multi-type library systems support the World's Best Workforce goals through professional-development activities aimed at school library media specialists. They also work across libraries of all types to provide collections, events and other resources that support students and teachers.

State aid provides operating funds based on a formula that includes population and land square miles served. Multi-county, multi-type library systems may increase revenue through grants and/or cost-recovery fees for workshops and other continuing-education activities.

SERVICES PROVIDED

Multi-county, multi-type library systems activities include:

- Organizing and promoting professional development and continuing education activities for library staff.
- Identifying and responding to regional needs across types of libraries.
- Encouraging communication and increasing knowledge of best practices among libraries.
- Supporting resource sharing and collaborative projects among participating libraries.

The Minnesota Department of Education (MDE) administers all aspects of the aid program. Services include:

- Developing application and report forms for aid recipients.
- Providing technical assistance to applicants/recipients.
- Calculating and processing payments.
- Providing guidance as it relates to Minnesota statutes.

Program: Libraries

Activity: Electronic Library for Minnesota (ELM)

www.elm4you.org/

AT A GLANCE

- ELM provides access to millions of articles, books, images, test preparation and other information at no cost to users.
- ELM resources are accessible to Minnesotans through computers, smart phones and tablets from homes, schools, school library media centers, academic libraries, public libraries and government agencies.

PURPOSE & CONTEXT

The Electronic Library for Minnesota (ELM) provides all Minnesotans with access to online high-quality and vetted information resources from all Minnesota Internet Protocol (IP) addresses, including home computers, libraries and government agencies.

ELM supports all five of the World's Best Workforce goals.

SERVICES PROVIDED

This program:

- Offers free and equitable online access to millions of magazine, journal, newspaper, and encyclopedia articles, e-books, and other information resources to Minnesota residents.
- Provides tools for career exploration, resume and cover letter writing, test preparation, adult learning and college readiness through LearningExpress Library.
- Reduces costs by negotiating statewide database licenses.

ELM's selected resources:

- Support K-12 and postsecondary students and teachers.
- Provide information and research on a wide range of topics.
- Are available from all Minnesota IP addresses 24 hours a day, seven days a week.
- Support digital literacy and workforce development efforts.

The Minnesota Department of Education (MDE), through State Library Services, recommends and/or approves school and public library representatives on ELM's selection task force and makes final approval of the resources recommended. MDE sets up and processes payments and compiles report information annually.

Program: Libraries

Activity: Regional Library Telecom Aid (RLTA)

AT A GLANCE

- Statutory changes in 2015 fully align the state program with the federal e-rate program to maximize public investment in libraries' telecommunications infrastructure.
- 341 public library sites benefit from the aid program.
- Statewide, average available bandwidth purchased with program funds grew from 76.7 MB in 2015 to 203.7 MB in 2017.
- 99.6 percent of public libraries provide wireless access.

PURPOSE & CONTEXT

The Regional Library Telecommunications Aid program (RLTA) helps regional public library systems and their branch or member public libraries provide broadband access to residents statewide.

RLTA funds the telecommunications infrastructure necessary for library-based programs and services that support all five World's Best Workforce goals. Through public libraries, students have greater access to online learning resources such the state-provided Electronic Library for Minnesota and locally provided e-books and online homework help services.

SERVICES PROVIDED

This program:

- Allows libraries to leverage federal funds and state and local investments that improve technology infrastructure.
- Facilitates optimal and equitable access to online resources and information, such as the Electronic Library for Minnesota, and to the statewide web-based infrastructure for interlibrary loan.

Activities that rely on internet access and benefit from this program include:

- Equitable community access to high-speed internet, including weekends and evenings.
- Access to online resources, including the Electronic Library for Minnesota and Ebooks Minnesota.
- Connections to school districts, postsecondary education and other governmental agencies.
- Government-related activities and information, such as unemployment insurance filing.
- Automation systems that improve efficiency and cost-effectiveness in resource sharing.

The Minnesota Department of Education (MDE) administers all aspects of the aid program. Services include:

- Developing application and report forms for aid recipients.
- Providing technical assistance to applicants/recipients.
- Calculating and processing payments.
- Providing technical assistance on the federal e-rate program as it relates to regional library telecommunications aid.

RESULTS

Program: Early Childhood and Family Support
Activity: Early Childhood Family Education (ECFE)

education.mn.gov/MDE/fam/elsprog/ECFE/

AT A GLANCE

In fiscal year (FY) 2017:

- 96,593 children and 99,529 parents participated in ECFE, including classes and activities.
- 19,945 referrals were made to ECFE from other community programs.
- 14,215 home visits were conducted.

PURPOSE & CONTEXT

The purpose of the program is to provide parenting education to support children's learning and development. All families with children prenatal to kindergarten are eligible for services. School districts with pre-K through third grade initiatives may continue to serve families up to third grade.

This program helps meet the World's Best Workforce goals of all children being ready for school and all third-graders reading at grade level.

SERVICES PROVIDED

ECFE provides programming and services to educate parents and other relatives about the physical, cognitive, social, and emotional development of children, and to enhance the skills of parents and other relatives in providing for their children's learning and development. Each year, programs must: 1) conduct a community needs assessment that identifies new and underserved populations; 2) identifies child and family risk factors, particularly those that impact children's learning and development; and, 3) assesses family and parenting education needs in the community. Programs are required to provide programming and services that are tailored to the needs of families and parents prioritized in the community needs assessment.

ECFE programs usually include all of the following:

- Parenting education groups.
- Structured learning activities requiring interaction between children and their parents or relatives.
- Structured learning activities for children that promote children's development and positive interaction with peers.
- Home visits.
- In-person visits to parents of newborns.
- Outreach, including special events for the entire family.
- Information on community resources.

If there is not enough money to provide programs for all young children, ECFE providers should emphasize programming for children birth to age 3. They should encourage parents to involve 4- and 5-year-old children in school readiness programs and other public and nonpublic early learning programs.

ECFE programs must include learning experiences for children, parents, and other relatives that promote children's early literacy and, where practicable, their native language skills and activities for children that require substantial involvement of the children's parents or other relatives.

ECFE revenue is a combination of state aid and local property tax levy. It is 2.3 percent of the general education formula allowance times 150, or the number of children under age 5 who lived in the district as of October 1 of the previous school year, whichever is greater.

It is common for other state-funded programs to work collaboratively with ECFE. MDE calculates and processes payments and provides technical support for these programs as well:

- Adult Basic Education (ABE), which provides family literacy programs.
- The Educate Parents Partnership program provides parents of newborns with informational materials on a wide range of subjects before they are discharged from the hospital.
- Help Me Grow, an infant and toddler intervention and preschool special education program, disseminates information to families and professionals who have concerns about their child's development.
- The Parent-Child Home Program is a national model focusing on early literacy, parenting, and school readiness. Families are eligible for up to 60 home visits per year for two years.
- The Home Visiting program is a parent education component of ECFE programs that is designed to reach isolated or at-risk families. Starting in FY 2018, local Home Visiting levies are supplemented with state aid.
- School Readiness and Voluntary Prekindergarten provides family engagement and parenting education.

Program: Early Childhood and Family Support

Activity: School Readiness

education.mn.gov/MDE/dse/early/read/

AT A GLANCE

In fiscal year (FY) 2017:

- The estimated population of 3- and 4-year-olds in Minnesota was 147,932.
- 21,537 children and 23,938 parents participated in the program.

PURPOSE & CONTEXT

The purpose of the school readiness program is to prepare children to enter kindergarten by creating greater access to educational opportunities for children with high needs and to make progress on closing the achievement gap upon school entrance, which are two of the five World's Best Workforce goals.

The state-funded program is established through the school district and serves children age 3 years to kindergarten entrance with high needs.

SERVICES PROVIDED

School Readiness programs are designed by communities in order to meet their unique needs. Most school-based programs have classes that are half-day and meet one to five days per week.

Other program models include:

- Kindergarten transition classes for children and parents.
- One or two days of child-only activities added to Early Childhood Family Education (ECFE).
- Fully inclusive, integrated classrooms with early childhood special education.
- Coordination of referrals and follow-up to early childhood screening, which is required.
- Staff development and consultation for family child care providers.
- Head Start and family literacy/English learner programs.
- Partnering with other programs to provide full-day programming and wrap-around services.

Programs include the following requirements:

- Assess each child's cognitive skills at entrance to and exit from the program.
- Provide a program based on early childhood research and professional practice that prepares children to move into kindergarten.

School Readiness aid is calculated in two parts:

- Fifty percent of aid is based on the number of 4-year-old children living in the district as of October 1 of the previous school year.
- Fifty percent of aid is based on the number of students enrolled in the school district and eligible for free or reduced-price meals.

The Minnesota Department of Education calculates and processes aid payments and provides technical support to districts for this program.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>FY 2014</i>	<i>FY 2015*</i>	<i>FY 2016</i>	<i>FY 2017</i>
Quantity	Percentage of preschoolers served:				
	3-year-olds	9.6%	7%	7%	8%
	4-year-olds	26.3%	20%	22.4%	21.2%

* Note: Starting in 2015, data is now pulled from Early Education Student, a new student identification process for children registered in School Readiness. Early Education Student is a newer system with revised reporting thresholds. Comparisons to other systems reporting is not appropriate.

Program: Early Childhood and Family Support

Activity: Kindergarten Entry Profile (KEP) (*previously Kindergarten Readiness*)

education.mn.gov/MDE/dse/kind/KEP/index.htm

AT A GLANCE

- The Kindergarten Entry Profile (KEP) is a standards-based assessment system that offers districts a menu of comprehensive, developmentally appropriate assessment tools that help teachers and administrators understand what students know and are able to do at the start of kindergarten in order to support their success in kindergarten and beyond.
- Participation in the KEP is voluntary.
- In fiscal year (FY) 2017, just over 7 percent of all kindergartners participated in the KEP.

PURPOSE & CONTEXT

The 2013 Race to the Top-Early Learning Challenge grant (RTT-ELC) provided the state with an opportunity to improve on the state's pre-existing kindergarten entry assessment model (the School Readiness Study), resulting in a new model: the Kindergarten Entry Profile (KEP). Entering its third full implementation year (the first three years were pilot years), the KEP reflects advances in our understanding of child development, neuroscience, and the importance of early childhood assessment in systems reform.

The KEP is a standards-based assessment system; each of the approved assessment tools are aligned to Minnesota's early learning standards (the [Early Childhood Indicators of Progress](#), or ECIPs). The ECIPs are a shared set of developmentally appropriate expectations for children ages birth to kindergarten and define the foundational skills necessary to build toward the Minnesota K-12 Academic Standards and college and career readiness.

The Minnesota Department of Education (MDE) produces an annual KEP report that includes data for kindergartners from those districts volunteering to participate in the KEP, even though districts are able to choose from a menu of four different assessment tools. The report embraces a well-rounded view of education by presenting data by each of the domains of learning: approaches to learning; the arts; language, literacy, and communications; mathematics; physical and movement development; scientific thinking; social and emotional development; and social systems. Reporting data by ECIP domain also makes the data more actionable and valuable to teachers and administrators.

SERVICES PROVIDED

KEP approved assessment tools undergo a rigorous review to ensure that each assessment is valid and reliable to use with kindergartners, aligned to the ECIPs and Minnesota Academic Standards, represent a whole-child view of development and education, cover all eight domains of learning, provide real-time formative data that can be used to individualize instruction, and rely on authentic assessment.

No more than 10 percent of kindergartners in the state are able to participate due to budgetary constraints. MDE provides training to teachers and administrators in their chosen tool and reimburses participants for the costs of the assessment tool at the state-negotiated rate.

The KEP assessment tools produce data can be used to:

- 1) Provide teachers and other educators with a holistic view of a child's strengths and areas of growth based on their own unique identities, experiences, and development.
- 2) Inform, in real-time, practice and programming (e.g. instruction, lesson plans, curriculum, professional development, resources and supports).
- 3) Build coherence in pre-K to third grade teaching and learning (e.g. strengthening transitions to kindergarten and professional development).
- 4) Inform educators/administrators/policy makers how well incoming kindergarteners meet age expectations in the following eight domains of learning:
 - approaches to learning; the arts;
 - language, literacy, and communications;
 - mathematics;
 - physical and movement development;
 - scientific thinking;
 - social and emotional development; and
 - social systems
- 5) Guide local community and school district efforts to ensure their World's Best Workforce Goal #1: All Children are Ready for School is appropriately identified, measured and reported to stakeholders.

RESULTS

Teachers and administrators are building their capacity to implement standards-based assessment, which includes discussions centered on which students need more support based on their assessment data. KEP trainings have brought prekindergarten and kindergarten teachers together, enabling them to engage in conversations centered on shared expectations of student outcomes, aligning instruction and curriculum across grades/ages, and strengthening transitions to kindergarten.

Though efforts have been made to obtain a representative sample of kindergartners, the voluntary nature of the KEP does not produce a representative sample of kindergartners across the state. Because it is not representative of the general population, generalizations regarding the data should not be made (i.e., these numbers should not be taken as an accurate portrayal of the percentage of students meeting or exceeding age expectations statewide) and results should not be compared from year to year. Participants, however, may be able to compare their results from year to year and make generalizations about their district/charter school.

For detailed results of the KEP for FY 2017, please read the [Transforming the School Readiness Study into the KEP Initiative](#).

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>FY 2014</i>	<i>FY 2015</i>	<i>FY 2016</i>	<i>FY 2017</i>	<i>FY 2018</i>
Status	KEP Pilot or Regular	Pilot [†]	Pilot [†]	Pilot [†]	Full	Full
Quantity	Percentage of kindergarteners participating in the KEP	1.6%	1.2%	3.1%	5.8%	7.3%

M.S. 124D.162

†: During the three KEP pilot years (FY2014 – FY2016) participation in the KEP was relatively small, ranging from 0.7 percent to 1.1 percent of kindergartners statewide. This was not a concern, though, given the pilot status of the KEP.

Program: Early Childhood and Family Support

Activity: Access to Quality Early Learning

AT A GLANCE

- Approximately 18 percent of the eligible 3- and 4-year-olds in the state are served by the Early Learning Education Scholarship program, with a maximum award of \$7,500.
- While children ages 0-2 were eligible if the child of a teen parent or a sibling of a scholar, in fiscal year (FY) 2018, Early Learning Scholarships were expanded to serve children 0-2 years of age in foster care, in child protective services, or those who have experienced homelessness in the last 24 months.
- Early learning scholarships can be layered with other funding streams. Fifteen percent of scholarships in FY16 and FY17 were used with Child Care Assistance.

PURPOSE & CONTEXT

The Early Learning Scholarship program supports access to the state's early care and education system for young children. Since scholarships can only be used at early learning programs that participate in Parent Aware, Minnesota's Quality Rating and Improvement System (QRIS), they serve as an incentive to be rated. Early Learning Scholarships, as a funding source, are intended to support improvement in school readiness outcomes for Minnesota children with high needs, by increasing access to high-quality early care and education programs.

These two activities assist in the improvement of high-quality early care and education programs and providing financial assistance to families to attend programs identified as high quality. Early learning program quality is based on Parent Aware, Minnesota's tiered quality rating and improvement system.

SERVICES PROVIDED

Passed in a 2011 special session, \$4 million was authorized beginning in FY 2013. For FY 2014, the state expanded the state-funded Early Learning Scholarship program with a \$23 million appropriation. That program has grown to \$70.2 million in fiscal year's 2018 and 2019 with the base set to increase to \$70,709,000 in FY 2020. State-funded Early Learning Scholarships were available to eligible children statewide since FY 2016 with a maximum scholarship for children attending a Four-Star Parent Aware rated program of \$7,500. Children receive scholarships for a 12-month period and may renew their scholarship until they are eligible for kindergarten.

Early Learning Scholarship program has two pathways:

- Pathway I scholarships are awarded directly to eligible families.
 - Scholarship funds are paid directly to the early learning program.
- Pathway II scholarships are awarded to families through an eligible Four-Star Parent Aware-rated program.
 - Participating programs receive funding to provide scholarships to a specified number of eligible children to cover the cost of the program.

Efforts for Parent Aware and state-funded early learning scholarships ran parallel to the Race to the Top Early-Learning Challenge (RTT-ELC) federal grant. The RTT-ELC grant supported the expansion of the Parent Aware program statewide over four years and ended December 31, 2016. In order to support the continuation of Parent Aware beyond RTT-ELC, the Legislature allocated \$3.5 million dollars to MDE for the 2018-19 biennium to transfer to the Department of Human Services to support the implementation of Parent Aware.

The Minnesota Department of Education (MDE) administers all aspects of the grant program. Services include:

- Developing application process and reporting forms for applicants/recipients.
- Providing technical assistance to applicants/recipients.
- Creating grant contracts, including work plans and budget information.
- Calculating, auditing, and processing payments.
- Providing guidance as it relates to Minnesota Statutes and state policies.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>2015</i>	<i>2016</i>	<i>2017</i>	<i>2018</i>
Quantity	Number of early care and education programs participating in Parent Aware.	1,892	2,343	2,684	2,610
Quality	Percent of rated early care and education programs with a 3- or 4-Star Parent Aware rating.	74%	71%	77%	79%
Quantity	Number of high-needs children attending a 3- or 4-Star Parent Aware rated public education program.	24,818	26,748	28,851	28,851
Quantity	Number of children receiving a scholarship	8,225	11,219	15,079	17,091

Parent Aware data on quantity and quality for FY 2015 and FY 2016 comes from the Minnesota Race to the Top – Early Learning Challenge, Annual Performance Report 2015 and the final 2016 report.

Parent Aware data on quantity and quality for FY2017 and FY2018 was provided by the Fast Facts page of Develop, the [Minnesota Quality Improvement and Registry tool](#).

Quantity data for children with high needs attending a 3- or 4-star rated program comes from the Early Learning Scholarship Pathway II applications from school and Head Start programs.

Scholarship data comes from final data from each fiscal year.

Program: Early Childhood and Family Support
Activity: Health and Developmental Screening

education.mn.gov/MDE/dse/early/scr/index.htm

AT A GLANCE

- In fiscal year (FY) 2017, a total of 60,465 children were screened by school districts. Outcomes included:
 - 7,044 children referred to the school readiness program.
 - 3,752 families referred to early childhood family education.
 - 1,601 children referred to Head Start.
 - 395 parents referred to adult education/literacy.
 - 5,149 referred to special education.
 - 4,281 children received interpreter services during screening.

PURPOSE & CONTEXT

The purpose of this program is to detect factors that may impede children's learning, growth and development. Every school board must provide for a mandatory program of early childhood health and developmental screening for children at least once before they start school, targeting children between 3 and 4 years of age. Districts receive state aid for every child screened prior to starting kindergarten, or within 30 days after first entering kindergarten. Charter schools may elect to apply to provide a screening program.

This program supports the World's Best Workforce goal of helping to ensure that all children are ready for school and supports a reduction in the achievement gap, so that children receive the necessary health and educational interventions needed prior to kindergarten enrollment.

SERVICES PROVIDED

A screening program must include the following components:

- Outreach to inform each resident family about the availability of the program.
- Developmental screening.
- Hearing and vision screening.
- Immunization review.
- The child's height and weight.
- Identification of risk factors that may influence learning.
- Identification of health care coverage and referral to an appropriate provider.
- An interview with the parent about the child.
- Referral and follow up for assessment, diagnosis, and treatment when potential needs are identified.

A district may also offer additional health screening components such as nutritional, physical and dental assessments; review of family circumstances that might affect development; blood pressure; laboratory tests; and, health history.

Families may opt out by submitting a signed statement of conscientiously held beliefs.

Children may receive a comparable screening through Head Start, Child and Teen Checkups/EPSTD, or their health care provider.

A district must provide the parent or guardian of the child screened with a record indicating the month and year the child received screening and the results of the screening.

The Minnesota Department of Education (MDE) calculates and processes screening aid payments and provides technical support to districts for this program.

Program: Early Childhood and Family Support

Activity: Head Start

eclkc.ohs.acf.hhs.gov/hslc

AT A GLANCE

- 32 Head Start and Early Head Start grantees served 14,147 children and families in fiscal year (FY) 2018.
- 15 percent of Head Start and 11.6 percent of Early Head Start children had a diagnosed disability in FY 2017.¹
- 1,376 homeless children received services in FY 2017.¹

PURPOSE & CONTEXT

Head Start and Early Head Start are federal programs that support the comprehensive development and promote school readiness of children from birth to age 5 from low-income families. Head Start and Early Head Start services include early learning, health and family well-being.

Minnesota supplements federal Head Start funds with state funds. With the additional state funding, Head Start and Early Head Start programs are able to expand services and access to educational opportunities for additional children, thus preparing children and families experiencing multiple risk factors for kindergarten. Head Start and Early Head Start supports families and children with high needs to make progress on closing the achievement gap upon school entrance, which are two of the five World's Best Workforce goals.

SERVICES PROVIDED

Head Start and Early Head Start provide a comprehensive program to children and families including:

- Health/dental and nutrition.
- Education.
- Parent engagement.
- Social services and family supports-assistance with housing, medical insurance, heating and food.

Programs operate a center-based, home-based, and/or combination option.

- Head Start center-based programs must operate at least 3.5 hours per day, four days a week, for 128 days a year, and have at least two home visits.
- Early Head Start home-based programs must offer at least 46 home visits of 1.5 hours each, and at least 22 group socializations distributed over the course of the program year.
- Many programs offer full-day, full-year services, through partnerships with child care and school-based programs.

Minnesota Department of Education (MDE):

- Houses the state's Head Start Collaboration Office. The Head Start Collaboration Director facilitates partnerships among Head Start agencies and entities to carry out activities designed to benefit low-income children from birth to school entry, providing a structure and a process for the Office of Head Start (OHS) to work and partner with state agencies and local entities. The Head Start Collaboration Office works with state and community partners to leverage common interests around young children and their families to formulate, implement, and improve state and local policy and practices.

- Provides support to Head Start agencies across the state in the implementation of Parent Aware, Minnesota's Quality Rating and Improvement System, as well as other state agencies' early learning services initiatives.
- Calculates and processes aid payments and provides technical support to grantees for the implementation of this program.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>FY2015-2016²</i>	<i>FY 2016-2017²</i>

Program: Early Childhood and Family Support

Activity: Infants and Toddlers Part C

helpmegrowmn.org/HMG/index.htm

AT A GLANCE

- 5,524 Minnesota infants and toddlers with disabilities were counted as being served through Individual Family Service Plans (IFSP) on December 1, 2015.
- Part C services are funded with federal grant dollars, state special education aid and general education revenue.

PURPOSE & CONTEXT

The federally regulated Infants and Toddlers program provides individualized family-centered services to eligible children and their families in order to aid in the development of very young children showing delays in development.

This program supports the World's Best Workforce goal of all children being ready for school.

SERVICES PROVIDED

Federal funds support 12 Interagency Early Intervention Committees (IEICs) that conduct public awareness and outreach activities to seek out and identify potentially eligible infants and toddlers.

- Specific services are determined for each eligible child and family based on the child's needs and family priorities.
- Services most often include special instruction, speech therapy and occupational or physical therapy.
- Ninety-seven percent of eligible infants and toddlers receive early intervention services in their homes.

The Minnesota Department of Education (MDE) is responsible for:

- Individualized family service plans and service coordination.
- Personnel development to ensure that personnel are appropriately and adequately prepared and trained.
- Carrying out general administration and supervision.
- Policy for contracting or otherwise arranging for services, and procedure for securing timely reimbursement of funds.

RESULTS

Performance Measure 1:

<i>Child Outcomes</i>	<i>FFY 2012</i>	<i>FFY 2013</i>	<i>FFY 2014</i>

Program: Early Childhood and Family Support

Activity: Preschool Special Education

helpmegrowmn.org/HMG/index.htm

AT A GLANCE

- 17,445 children ages 3-5 with disabilities were counted as being served through Individual Education Programs on December 1, 2017.
- More than half of these children participate in regular early childhood programs and receive special education services in those settings.

PURPOSE & CONTEXT

The Preschool Special Education program provides individualized education services to preschool children with disabilities.

Funding for services is a combination of federal funds, state special education aid and general education revenue.

This program supports the World's Best Workforce goal of helping ensure that all children are ready for school.

SERVICES PROVIDED

The program is federally mandated. Federal funds support statewide efforts to:

- Seek out and identify potentially eligible children.
- Provide professional development opportunities promoting evidence-based practices through the Regional Centers of Excellence.

Services are provided to each eligible child through an Individualized Education Program. The goal is to increase each child's ability to actively and independently participate in current and future environments such as home, preschool and kindergarten.

Services most often include special instruction, speech therapy, occupational or physical therapy and transportation.

The Minnesota Department of Education:

- Processes payments/reimbursements.
- Provides professional development.
- Collects and reports data.
- Interprets regulations, statutes and rules.
- Connects children and families to appropriate local programs and monitors local implementation.

RESULTS

The table below shows Minnesota's performance on the federally required child outcomes for federal fiscal years (FFY) 2014-16. While data demonstrates mixed performance trends, some evidence shows positive impact of efforts to turn the curve or, at a minimum, to slow downward progress.

<i>Child Outcomes</i>	<i>FFY 2014</i>	<i>FFY 2015</i>	<i>FFY 2016</i>
Children will demonstrate positive relationships			
a. Greater than expected progress	69.6%	69.8%	68.4%
b. Exited Part C within age expectations	55.3%	55.5%	54.2%
Children will acquire and use knowledge and skills			
a. Greater than expected progress	72.5%	72.0%	70.3%
b. Exited Part C within age expectations	55.0%	54.7%	52.8%
Children will take action to meet needs			
a. Greater than expected progress	71.0%	70.7%	69.1%
b. Exited Part C within age expectations	64.3%	64.9%	63.5%

Program: Early Childhood and Family Support

Activity: Special Family Opportunities

northsideachievement.org/

wilder.org/community-leadership/saint-paul-promise-neighborhood/Pages/default.aspx

AT A GLANCE

- State funding for the Northside Achievement Zone and St. Paul Promise Neighborhood programs was made available in fiscal year (FY) 2015.
- The Northside Achievement Zone and St. Paul Promise Neighborhood are Promise Neighborhoods, a federal designation for eligible neighborhoods that seek to improve educational and developmental outcomes of children and youth in those communities.
- The St. Cloud Preschool Pilot Program is a one-time FY 2017 appropriation, available until June 30, 2019.
- The Education Partnership Pilot Program was implemented in FY 2016. Grantees include Northfield Health Community, Jones Family foundation, and United Way of Central Minnesota.
- The Legislature allocated funding to the Minnesota Department of Education for the 2018-19 biennium, for transfer to the Department of Human Services to support the implementation of Parent Aware Quality Rating and Improvement System.

PURPOSE & CONTEXT

Special family opportunities include the Northside Achievement Zone; St. Paul Promise Neighborhood; St. Cloud preschool pilot program; Education Pilot Programs in Northfield, Red Wing, and St. Cloud; and the Quality Rating and Improvement System.

The Northside Achievement Zone and St. Paul Promise Neighborhood programs receive annual grants that fund efforts designed to reduce multigenerational poverty, prepare children for kindergarten, support third-grade reading proficiency, and reduce the educational achievement gap, which are three of the five World's Best Workforce goals.

These programs are available to Minneapolis residents living within the geographic boundaries of the Northside Achievement Zone, and residents of the St. Paul Promise Neighborhood, a 250-square block area in the central neighborhoods of St. Paul.

The purpose of the St. Cloud preschool pilot program grant is to establish a preschool pilot program serving at least 90 students from families with low income, or from families where English is not the primary language spoken in the child's home environment. This program supports the World's Best Workforce goals of having students be ready for school and closing the racial and economic achievement gaps between students.

Each Education Partnership Pilot Program grantee is to support partnerships in the community focused on:

- Academic achievement and youth development.
- Use of a comprehensive and data-driven approach to increase student success.
- Measuring outcomes, such as kindergarten readiness, reading proficiency at third grade, high school graduation, and college and career readiness—all of which are goals of the World's Best Workforce.

The Quality Rating and Improvement System framework is designed to ensure that Minnesota's children have access to high-quality early learning and care programs in a range of settings so that they are fully ready for

kindergarten by 2020. The Quality Rating and Improvement System supports the World's Best Workforce goals of having all children ready for school and closing the racial and economic achievement gap.

SERVICES PROVIDED

The Northside Achievement Zone and St. Paul Promise Neighborhood programs provide the Northside Achievement Zone and the St. Paul Promise Neighborhood each with an annual grant of \$1.3 million for programming and services, consistent with federal Promise Neighborhood program requirements.

The Minnesota Department of Education (MDE) processes aid payments for these programs.

The \$430,000 FY 2017 appropriation for the St. Cloud Early Learning Pilot funds may be used to:

- Purchase developmentally appropriate furniture and materials, instructional materials, and curriculum materials.
- Hire and train teachers and staff.
- Offset transportation costs.

Independent School District (ISD) 742, St. Cloud, must submit an annual report by January 15 of 2017, 2018, and 2019, describing the activities undertaken and outcomes achieved with this grant. The 2019 report must contain recommendations for other districts interested in similar pre-kindergarten programs.

The Education Partnership Pilot program grants each receive \$160,000 in FY 2018 and FY 2019 to:

- Northfield Healthy Community Initiative for a pilot site in Northfield.
- Jones Family Foundation for a pilot site in Red Wing.
- ISD 742, St. Cloud, for a pilot site in St. Cloud—United Way of Central Minnesota.

By February 15 of every even-numbered year, each Education Partnership Pilot grant recipient shall submit to the Minnesota Legislature a report describing:

- Activities funded by the grant.
- Changes in outcome measures attributable to the grant-funded activities.
- Recipient's program plan for the following year.

The Quality Rating System, supported by an appropriation of \$3.5 million for FY 2018-19 transfer from MDE to the Department of Human Services, creates a standards-based voluntary quality rating and improvement system for early learning and care programs which includes:

- Quality opportunities to improve the educational outcomes of children so that they are ready for school.
- A tool to increase the number of publicly funded and regulated early learning and care services in both public and private market programs that are high quality.
- Tracking progress toward statewide access to high-quality early learning and care programs, low-income children with parents who can access quality programs, and increasing the number of children who are fully prepared to enter kindergarten.

Education Partnership Pilot Grants

United Way of Central Minnesota Highlights:

- Results not available at this time

Jones Family Foundation Highlights:

- 20 additional local early childhood preschool educators were trained by a certified Pyramid Model trainer.
- In the Fall of 2017, 83 percent of children were identified as ready for kindergarten, up from 82 percent in 2016.
- 62 community mentors were trained with mentoring skills to work with high school students.
- Prekindergarten through grade 12 teachers worked to align math curriculum.
- 15,000 meals were served to Red Wing youth during the summer of 2017.

Northfield Healthy Community Initiative Highlights:

- Please go to [Benchmarks Northfield Promise](#) to see progress made on their 10 benchmarks.

Program: Community Education

Activity: Community Education

AT A GLANCE

- Every Minnesota school district operates a community education program.
- For fiscal year (FY) 2017, school districts received \$29.5 million in general community education revenue, \$5.3 million in youth service program revenue, and \$5 million in after-school enrichment revenue.
- For FY 2017, the state share of community education revenue was \$500,000 and the local property tax share was \$39.3 million.

PURPOSE & CONTEXT

The community education program is a state aid and local property tax levy program, designed to maximize the community's use of public schools and to promote the use of school facilities beyond the regular school day.

Programs serve participants of all ages from preschool through senior citizens.

This program supports all five of the World's Best Workforce goals.

SERVICES PROVIDED

Community education provides services beyond the regular K-12 program. Programs may include:

- Programs for adults with disabilities.
- Adult basic education (ABE).
- Youth development and youth service.
- Early childhood family education (ECFE) and school readiness programs.
- School-age care.
- Summer programs for elementary and secondary pupils and youth after-school enrichment programs.
- Non-vocational, recreational and leisure activities.

School boards must establish a community education advisory council and, with some exceptions, must employ a licensed community education director.

An annual report is required from each district that provides a community education program.

Total community education revenue includes a district's general community education revenue, youth service program revenue, and youth after-school enrichment revenue. These revenues are calculated based on a school district's population and its property tax capacity.

The Minnesota Department of Education (MDE) calculates and processes aid payments for this program.

RESULTS

MDE does not collect data to show impact of the programming other than the number of individuals that received services.

Program: Community Education

Activity: Adults With Disabilities

AT A GLANCE

- This program funds local community education programs for adults with disabilities.
- Approved programs may receive revenue equal to the lesser of \$30,000 or 50 percent of actual expenditures.

PURPOSE & CONTEXT

This aid and property tax levy program has provided revenue to the same set of school districts to support community education programs and services for adults with disabilities for more than two decades. This aid program addresses the World's Best Workforce goal of all students being ready for a career.

SERVICES PROVIDED

- Revenue for most districts is 50 percent state aid and 50 percent local property tax levy.

Programs use the following service strategies:

- Help for adults to participate in community activities (including one-on-one assistance, braille, and interpreter services).
- Classes specifically for adults with disabilities.
- Outreach to identify adults needing services.
- Activities to increase public awareness of the roles of people with disabilities.

The Minnesota Department of Education (MDE) calculates and processes aid payments to districts and determines their property tax levy for this program.

RESULTS

Program performance data are not collected by MDE and school districts are not required to report on the details of their programs. District reporting of use of funds is limited to the reporting of expenditures in the Uniform Financial Accounting and Reporting System.

Program: Community Education

Activity: Hearing Impaired Adults

education.mn.gov/MDE/dse/sped/cat/dhh/index.htm

AT A GLANCE

- In 2017, eight sites submitted qualified requests for funds under this program.
- Demand exceeded the \$70,000 appropriation in three of the previous five years.

PURPOSE & CONTEXT

The hearing impaired adults program provides educational opportunities for adults who are deaf and hard-of-hearing. This program provides assistance with one-time costs for interpreter and note-taker services for adults participating in school district adult education classes, adult technical college programs, or private community agencies who are deaf and hard-of-hearing.

SERVICES PROVIDED

- This program provides assistance with the one-time costs of interpreter and note-taker services.
- The program is not meant to support all interpreter services for adult learners who are deaf and hard-of-hearing, but to help in unforeseen situations.

The Minnesota Department of Education (MDE) calculates and processes aid payments for this program.

RESULTS

The rate at which sites request funds in consecutive years provides a gauge whether providers are anticipating, and budgeting for, support for individuals with hearing impairments. It is difficult to draw assumptions regarding the true statewide demand for services, since most districts or non-profit providers also seek other resources to meet their needs.

Program: Community Education

Activity: School Age Care

AT A GLANCE

- School age care revenue was funded totally by local property tax levy in fiscal year (FY) 2017 (\$0 state aid).
- The total levy for FY 2017 was \$15.7 million.

PURPOSE & CONTEXT

School Age Care is a program that helps to ensure that all students within a district have equal access to after-school care and summer educational programming.

School districts with school age care programs are served by this program.

This program supports the World's Best Workforce goal of reducing the racial and economic achievement gaps between students.

SERVICES PROVIDED

School age care revenue reimburses districts for approved additional costs incurred to provide school age care to children with disabilities or children experiencing family or related problems of a temporary nature.

The school age care property tax levy equals:

- School age care revenue, times
- The lesser of:
 - One; or,
 - The ratio of (the adjusted net tax capacity of the district the year prior to levy certification, divided by the number of students living in the district for the levy year) to \$2,318.

School Age Care aid equals:

- School age care revenue minus school age care property tax levy.

Because of the low equalizing factor that offsets property taxes with state aid, all revenue has been in the form of local property tax.

The Minnesota Department of Education calculates aid and property tax levies and makes state aid payments for this program.

Program: Self Sufficient and Lifelong Learning

Activity: Adult Basic Education (ABE)

education.mn.gov/MDE/fam/abe/

AT A GLANCE

- 1,071 licensed teachers and 2,109 volunteers served over 61,822 students in fiscal year (FY) 2018.
- Of all enrollees, 53 percent were English learners, 8 percent had never attended school, 26 percent were unemployed and 17 percent were in correctional facilities.

PURPOSE & CONTEXT

Adult basic education (ABE) is a state and federally funded program that provides adults educational opportunities to acquire and improve the literacy skills they need to become self-sufficient.

This program supports the World's Best Workforce goals that all students graduate from high school, and are career and college ready.

SERVICES PROVIDED

ABE program options:

- GED (General Education Development diploma)
- Adult Diploma
- English as a Second Language
- Family Literacy
- Basic Skills Education
- Workforce Preparation
- U.S. Citizenship and Civics
- Transition to Postsecondary Education

ABE is provided at more than 300 sites in every Minnesota County. Sites include public schools, workforce centers, community/technical colleges, prisons/jails, libraries, learning centers, tribal centers, and nonprofit organizations. Programs have voluntarily formed ABE consortia (42 administrative units) to maximize efficiency and share resources.

The Minnesota Department of Education provides technical support, calculates aid entitlements, and pays aid to districts and consortia.

Program: Self Sufficient and Lifelong Learning

Activity: General Education Development (GED) Tests

education.mn.gov/MDE/dse/abe/ged/

AT A GLANCE

- 63 GED testing centers, including 10 at state correctional facilities.
- In fiscal year (FY) 2016, 5,397 examinees took at least one GED test; 3,452 examinees completed all the modules.
- In 2009, individuals with a GED earned about \$4,100 more per year than individuals who did not have a GED or diploma.
- Individuals earning a GED are eligible to receive federal financial aid, including Pell Grants, if they meet income requirements.

PURPOSE & CONTEXT

This state aid program provides increased access for eligible individuals to complete the General Education Development (GED) battery of tests. Six percent of Minnesotans aged 25-64 lack a high school diploma or its equivalent.

The GED examination consists of four tests that measure outcomes associated with a high school education:

- Successful completion of the GED tests results in the awarding of a state of Minnesota GED diploma.
- A high school diploma or GED is required by many employers, is accepted by almost all of Minnesota's postsecondary institutions, and serves as the evidence of "ability to benefit" required in order to receive a Pell Grant.

This program supports the World's Best Workforce goals of having all students graduate from high school and all students be career and college ready.

SERVICES PROVIDED

This program provides supplemental funds that are used to pay a portion of the GED testing fee for eligible Minnesotans.

- For FY 2017, the GED testing allocation was \$125,000.
- The GED testing allocation pays \$10 per sub-test (up to \$40 per test battery) of students' GED testing fees.

The Minnesota Department of Education (MDE) processes reimbursement payments to GED Testing Service so that tests are offered at discounted rates.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>FY 2012</i>	<i>FY 2017</i>
Quantity	Test subsidies provided	12,500	7,096
Quality	Percentage of GED candidates completing the full battery who passed*	81.1%	82.5%

* There were five GED tests in FY 2012 and four GED tests in FY 2017.

Federal Agency and CFDA #	Federal Award Name and Brief Purpose	New Grant	FY2018 Actuals	FY2019 Budget	FY2020 Base	FY2021 Base	Required State Match or MOE?	FTEs
Agriculture 10.536	Child & Adult Care Food Program Training The overall goal of this project is for the selected applicant to plan, develop, design, promote, and ultimately execute and evaluate a training program that uses a tiered approach to equip State agencies with the knowledge and skills necessary to train their CACFP program operators (including CACFP institutions such as sponsoring organizations and/or independent centers as well as CACFP facilities including child care centers and day care homes) to effectively operate the CACFP at the local-level.		0	49	50	0		0.04
Agriculture 10.541	Child Nutrition-Technology Innovation Grant To allow State agencies that administer the Child Nutrition Programs (CNPs) to apply for grant funding to implement innovative technology solutions that will improve program accountability, data accuracy, program performance measurement, and the capacity to identify and target error-prone areas (locations or program functions) within and across the CNPs at the State and Local Educational Agency (LEA) or Sponsor Organization (SO) levels.		216	941	969	33		0.70
Agriculture 10.547	Professional Standards for School Nutrition Employees The Healthy Hunger-Free Kids Act (HHFKA) of 2010, Section 306, directed the United States Department of Agriculture to establish minimum national professional standards for all school nutrition employees who manage and operate the National School Lunch and School Breakfast Programs. These new standards will ensure that school nutrition personnel have the training and tools they need to plan, purchase and prepare safe, nutritious and enjoyable school meals. The rule institutes minimum hiring standards for the selection of State and local school nutrition program directors; and requires all personnel in these programs to complete annual continuing education/training. The standards are effective July 1, 2015. The principal benefit of this rule is to ensure that key school nutrition personnel are meeting minimum professional standards in order to adequately perform the duties and responsibilities of their positions. The purpose of this Request for Applications (RFA) is to: Provide awards, on a competitive basis, to State agencies administering National School Lunch Program (NSLP) and School Breakfast Program (SBP), to develop and implement trainings to support the Professional Standards rule, Describe which entities are eligible to apply for grant funds, Describe the requirements for submitting a successful application, and Describe how applications will be reviewed and selected.		26	0	0	0

Education 84.365	Asian American and Pacific Islander Data Disaggregation Initiative Part D To collect student data on all populations reporting 1,000 or more residents in the most recent decennial census, beginning in the 2017-2018 school year. To ensure that schools and districts have access to disaggregated data that can strengthen academic programs and close the achievement gap.		394	489	500	503	MOE	0.94
Education 84.366	Math & Science Partnerships To improve the academic achievement of students in mathematics and science.		1,219	297	0	0		0.11
Education 84.367	Title II Supporting Effective Instruction State Grants (formerly Improving Teacher Quality State Grants) To provide grants to State Educational Agencies (SEAs), and, through the SEAs, to Local Educational Agencies (LEAs) in order to increase student academic achievement consistent with challenging State academic standards; improve the quality and effectiveness of teachers, principals, and other school leaders; increase the number of teachers, principals, and other school leaders who are effective in improving student academic achievement in schools; and provide low-income and minority students greater access to effective teachers, principals, and other school leaders. (Under the antecedent program, State agencies for higher education also were eligible grantees. State agencies for higher education are no longer eligible grantees.) NOTE: The program was reauthorized by P.L. 114-95. The provisions listed here reflect changes made to the program and are applicable for awards made with FY 2017 and subsequent year funds.		28,092	28,602	29,485	30,363		9.43
Education 84.368	Competitive Grants for State Assessments (DIAMOND), Part A Starting with federal fiscal year 2017, the purpose is to support efforts to: (1) improve the quality, validity, and reliability of State academic assessments; (2) measure student academic achievement through the use of multiple measures from multiple sources; (3) develop or improve models to measure and assess student progress or growth; (4) develop or improve assessments for English learners, including assessments of English language proficiency or assessments of academic content in languages other than English; (5) develop or improve assessments for children with disabilities, including alternate assessments aligned to alternate academic achievement standards; and (6) develop and use comprehensive assessment instruments, such as performance- and technology-based assessments, computer adaptive assessments, or extended performance task assessments that improve assessment ability to measure critical thinking, writing and problem solving skills.		1,155	463	0	0		0.01

Federal Agency and CFDA #	Federal Award Name and Brief Purpose	New Grant	FY2018 Actuals	FY2019 Budget	FY2020 Base	FY2021 Base	Required State Match or MOE?	FTEs
Education 84.369	State Assessments The purpose of this program is: to pay the costs of developing the standards and high-quality assessments required by Title I of the ESEA. Once a State has put in place those standards and assessments, it may use program funds to pay for the administration of the assessments and for other activities related to ensuring that the State's schools and LEAs are held accountable for results and helping students attain challenging academic standards linked to college- and career-readiness. Such activities may include, among other things, developing standards and assessments in subjects other than those required by Title I, refining State assessments to ensure continued alignment with standards, expanding the range of testing accommodations for students with disabilities and for English Learner students, developing multiple measures to ensure the validity and reliability of State assessments, and using academic assessment instruments such as performance and technology-based assessments or computer adaptive assessments to better reflect the kind of complex work students do in an effective classroom and the real world.		5,666	7,686	7,800	7,734		11.82
Education 84.371	Striving Readers Comprehensive Literacy (SRCL) Program The objective of the Striving Readers/Comprehensive Literacy Development program is to advance literacy skills, including pre-literacy skills, reading and writing for students from birth through grade 12, including English learner and students with disabilities.		83	10,152	10,204	1,010		2.22
Education 84.372	Statewide Longitudinal Data Systems To enable State educational agencies to design, develop, and implement statewide, longitudinal data systems to efficiently and accurately manage, analyze, disaggregate, and use individual student data, to facilitate analyses and research to improve student academic achievement and close achievement gaps.		2,123	3,201	1,000	0		3.19
Education 84.377	School Improvement Grants Competitive subgrants to local educational agencies that demonstrate the greatest need for the funds and the strongest commitment to use the funds to provide adequate resources in order to raise substantially the achievement of students in their lowest-performing schools.		15,205	5,497	5,401	0		1.36
Education 84.412	Race to the Top Early Learning To improve the quality of early childhood programs and to close the achievement gap for high-need children.		1	0	0	0

MDE Federal Funds Summary Narrative

Federal Funds make up 8% of Minnesota Department of Education's (MDE) budget and are projected to be \$833 and \$843 million for State fiscal years 2019 and 2020 respectively. Title and Special Education funding are showing slight increases that are insignificant when compared to the increased cost of providing services to eligible students. 95% of Federal Funds flow thru to LEAs.

Major programs with Maintenance of Effort (MOE) include Special Education, English Language Acquisition, and Food and Nutrition Services. Title I and ABE require LEAs to spend at least 90% of prior year funding from state and local efforts to avoid a prorated loss of federal funds. For Special Education, states are subject to MOE and are required to spend the same amount of funding as the previous year in order to receive IDEA Parts B and C funds. Adult Basic Education (ABE) and Carl Perkins also require a state match for the state to receive federal funds.

AT A GLANCE

- 10% of Minnesota's population receives emergency medical services annually
- 86,943 square miles of around-the-clock, 9-1-1 ambulance response coverage
- 270 licensed ambulance services operating 851 vehicles across the state
- 339 ambulance service licenses issued (some ambulance services possess multiple licenses)
- 166 approved emergency medical services education programs
- 29,026 certified and registered emergency medical services personnel
- Nearly 400 applicant disclosures reviewed annually
- 46 investigations completed in response to allegations of misconduct pertaining to individuals and entities subject to the agency's jurisdiction
- 65% of the 270 licensed ambulance services have either a volunteer or combination paid / volunteer staffing model.
- 71% of the EMS Regulatory Board's total budget is disbursed to the emergency medical services community

PURPOSE

The mission of the Minnesota Emergency Medical Services (EMS) Regulatory Board (Board) is to protect the public's health and safety through regulation and support of the EMS system. We are the lead agency in Minnesota responsible for certifying EMS personnel, licensing and inspecting ambulance services, registering medical response units, and approving and auditing education programs. We also investigate all complaints and allegations of misconduct involving those individuals and entities subject to our jurisdiction. Our services start prior to the 9-1-1 call requesting response to a medical emergency: we safeguard the quality of care delivered by EMS personnel by ensuring the delivery of nationally-recognized education and testing standards.

We make certain that ambulance services are safe, reliable, and available around-the-clock in metropolitan areas and in Greater Minnesota. Areas with small population bases often rely on volunteer EMS personnel to cover the cost of providing continuous ambulance service. Recruitment and retention of these volunteers continues to be stretched by an anticipated decrease in population in 74 counties through 2025. At the same time, the senior population, generally requiring more frequent and complex care, is increasing. We work with EMS agencies and communities to implement realistic solutions to these issues thereby improving the timely delivery of quality patient care.

We coordinate ambulance and EMS assets and communication as part of our responsibilities during a natural or human-caused disaster or emergency.

The Board has formed committees and workgroups to aid in the execution of its mission. One such committee is the Medical Direction Standing Advisory Committee, which is comprised of physicians experienced in emergency medicine and emergency medical services and is led by a Board member/emergency physician who serves as the State's EMS Medical Director. This committee discusses, evaluates, and recommends improvements in matters pertaining to the delivery of pre-hospital emergency care.

Our agency services include distributing state and federal grant funds that support the EMS community with retention and recruitment of EMS personnel, ambulance/hospital communications, education reimbursement, equipment acquisition, and improving the pediatric care infrastructure. Our service delivery continues with assessing and advising rural ambulance services and their managers, and it concludes with reinforcing quality care

through inspections and audits, complaint reviews and investigations, and intervention in both a disciplinary and non-disciplinary nature.

Our contribution to ensuring continuous, consistent and safe emergency medical services in Minnesota supports the statewide outcomes of: **All Minnesotans have optimal health and the people in Minnesota are safe.**

BUDGET

The board budget is from a variety of sources: general fund, federal funds, and other funding sources such as revenue from citations issued for seat belt violations. Because the EMS system in Minnesota is heavily dependent on a diminishing pool of volunteers, particularly in rural areas, there is no fee for EMS personnel certification or medical response unit registration. A majority of the agency's budget is dedicated to grant programs that support emergency medical services statewide.

STRATEGIES

To accomplish its mission of protecting the public's health and safety, the Emergency Medical Services (EMS) Regulatory Board uses the following strategies:

1. Regulation

- Establish and enforce standards and requirements for ambulance services, EMS personnel, and education programs.
- License ambulance services, registered medical response units, credential EMS personnel, and approve education programs.

2. Prevention

- Conduct educational compliance seminars.
- Communicate compliance requirements to medical and ambulance service directors to reduce non-compliance issues.
- Conduct rural ambulance assessments to help those services in Greater Minnesota obtain and maintain operational and organizational success.

3. Compliance and Discipline

- Conduct on-site inspections of ambulance services and vehicles and education programs.
- Investigate complaints, allegations of misconduct, and self-reported violations in a fair and timely manner, ensuring that the subjects of those investigations receive the necessary due process.

- c. Review evidence to determine appropriate action through the agency's Complaint Review Panel, which is a subset of our Board and supported by advice from the Attorney General's Office and agency staff.
 - d. Collaborate with the Health Professionals Services Program for matters involving EMS providers experiencing mental health or substance abuse issues.
- 4. Support of the EMS System**
- a. Educate the public, EMS personnel, ambulance services, and education programs about certification and licensing requirements and responsibilities, ethical standards, and the complaint resolution process.
 - b. Distribute state and federal grant funds that support the EMS community with retention and recruitment of personnel, ambulance/hospital communications, education reimbursement, equipment acquisition, and improving the pediatric care infrastructure.
 - c. Continue to reach out to our wider audience: the general public, employers, and ethnically-diverse populations.
- 5. Maximize Technology and Online Services**
- a. Use technology to maximize efficiencies, improve customer service, increase data security, and decrease costs.
 - b. Provide a 24/7 online application and renewal process, no-cost license and certification look-up, and no-cost access to public data on adverse license and certification actions.
- 6. Risk Assessment and Continuous Improvement**
- a. Evaluate performance through customer surveys, research, and data analysis.
 - b. Identify trends in the EMS industry that may need new or improved support, standards, or oversight to ensure the public is protected.
 - c. Conduct system reviews and audits of fees, expenditures, receipts, and disbursements; improve systems as appropriate.
 - d. Engage public and private expertise and input. Our board, committees, and work groups are comprised of volunteers representing EMS physicians and personnel, educators, and stakeholders from public, private, and non-profit organizations. This is important because EMS has touch points in every part of the health care system, and these subject matter experts help identify issues and craft solutions.

Recommendation:

The Governor recommends additional funding of \$145,000 in the FY 2020-2021 biennium to maintain the current level of service delivery at the Emergency Medical Services Regulatory Board (EMSRB).

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year. The EMSRB is a general revenue funded agency and is not supported by fees.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the EMSRB, this funding will cover known employee compensation growth, rent increases, fuel and utilities, vendor costs, and in-state and out-of-state travel.

Base Budget Funding Increase:	FY 2020	FY 2021	FY 2022	FY 2023
Salary and Benefits Increases	\$30,000	\$50,000	\$50,000	\$50,000
Retirement Payouts (one time request)		\$33,000		
Board Travel	\$3,000	\$4,000	\$4,000	\$4,000
Vehicle Cost Increases	\$5,000	\$6,000	\$6,000	\$6,000
Miscellaneous Operational Costs	\$6,000	\$8,000	\$8,000	\$8,000
Total	\$44,000	\$101,000	\$68,000	\$68,000

Equity and Inclusion:

There are no potential positive or negative impacts on the identified groups.

Results:

This proposal is intended to allow EMSRB to continue to provide current levels of service and information to the public.

Statutory Change(s):

This initiative will not require a statutory change.

Emergency Medical Services Regulatory Board

FY 2020-21 Biennial Budget Change Item

Change Item Title: New Staff Position – Education Specialist

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	100	105	105	105
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	100	105	105	105
FTEs	1	1	1	1

Recommendation:

The Governor recommends funding for an emergency medical services (EMS) education specialist at the Emergency Medical Services Regulatory Board (EMS RB).

Rationale/Background:

Since the EMSRB's inception in 1996 it has largely covered operational cost increases through staffing attrition: from 20 FTEs down to 12 FTEs. Throughout the years, operations have been streamlined and technology and procedural improvements have been utilized, however today there is a need to hire an Education Specialist that was lost through attrition.

The past 36 months have seen an evolution in the nature of EMS education in Minnesota and across the nation. This advancement has created developmental opportunities for education programs who often seek guidance from the EMSRB as to content and delivery. EMS education will continue to evolve, particularly in the area of community paramedicine. The new evidence-based paradigms require demonstration of practical skills competency integrated with critical-thinking skills. There is an ongoing trend in the complexity of the changing emergency medical services environment, particularly in the area of EMS education. Today, nearly 30% of Board disciplinary action is related to education deficiencies.

The EMSRB licenses and regulates over 300 ambulance service providers and over 160 EMS education programs responsible for providing initial and renewal EMS education to nearly 30,000 EMS personnel.

Proposal:

The Education Specialist will oversee the agency's requirements over EMS education programs by working with the 160+ EMSRB-approved education programs and ensuring alignment with state and national requirements and standards.

Positions:	FY 2020	FY 2021	FY 2022	FY 2023
Education Specialist	\$100,00	\$105,000	\$105,000	\$105,000
Total	\$100,000	\$105,000	\$105,000	\$105,000

Equity and Inclusion:

There are no potential positive or negative impacts on the identified groups.

Results:

Narrative

The Minnesota Emergency Medical Services Regulatory Board (EMSRB) receives \$130,000 per year in federal funding. The Emergency Medical Services for Children project is fully funded at the federal level and there have not been any matching state or local funds. There is no required State Match or Maintenance of Effort levels (MOE) for this grant project. The EMSRB receives no other federal grant funds.

Current federal appropriation levels and continuing resolutions as well as guidance from federal agencies were taken into consideration to determine the EMSRB's level of funding for the fiscal years 2020 and 2021. The level of funding has remained consistent and we anticipate the same base level of funding through the end of the current five-year grant cycle ending February 28, 2022. The basis for awarding the grant is a continuation of past grants and planned budgets of future grants.

The overall mission of this grant project is to reduce the prevalence of pediatric morbidity and mortality that may occur as a result of acute illness or severe injury. To accomplish this mission, the EMSRB partners with Children's Minnesota (a/k/a Children's Hospitals and Clinics) to integrate pediatric-centered health care training, access, and delivery into the emergency medical services (EMS) system. The goal is for the EMS system to respond to pediatric emergencies with well-trained personnel, to provide appropriate intervention with equipment and technology tailored to the unique needs of pediatrics, and to transport pediatric emergencies to the most appropriate healthcare facility in the safest manner possible. Simply put, through this funding the EMSRB seeks to solidify the integration of a pediatric focus within the EMS system.

AT A GLANCE

- DEED is the state's principal economic development and workforce development agency.
- We work to attract, retain, and expand businesses and create jobs for all Minnesotans.
- We work to connect workers to jobs, prepare individuals for jobs in high-demand industries, and help people to live independently.
- We stabilize and stimulate the economy through unemployment benefit payments.
- We work to ensure that no communities are left on the economic sidelines.
- We invest in programs and policies that ensure communities of color reach their professional and personal goals and aim to eliminate economic disparities throughout the state.

PURPOSE

Minnesota Department of Employment and Economic Development (DEED) programs provide employment and training for individuals; provide services that help individuals with disabilities achieve personal and vocational independence; promote business recruitment, expansion, and retention; promote career and business opportunities for individuals currently underrepresented in Minnesota's economy; promote international trade; promote broadband adoption; and support community development.

We support the following statewide outcomes:

- **A thriving economy that encourages business growth and employment opportunities**
- **Minnesotans have the education and skills needed to achieve their goals**
- **Efficient and accountable government services**
- **Strong and stable families and communities**

BUDGET

**Spending by Program
FY17 Actual**

BCD = Business and Community Development; MTO = Minnesota Trade Office; UI = Unemployment Insurance; ETP = Employment & Training Programs Division; DDS = Disability Determination Services; GSS = General Support Services; VRS = Vocational Rehabilitation Services; SSB = State Services for the Blind; BDO = Office of Broadband Development

STRATEGIES

DEED manages many federal and state programs that support Minnesota's people, businesses, and communities. Our focus is on providing superior service, secure systems, and sustainable and equitable investment in order to combat the state's primary economic challenges: a growing labor shortage and widening economic disparities that exist for individuals with disabilities and communities of color throughout the state.

Our *Employment and Training Program* division works to ensure that businesses have the talent they need to be locally and globally competitive and that workers have the skills and opportunities they need for meaningful and family-sustaining employment. DEED delivers many of these services to Minnesotans at nearly 50 CareerForce locations (formerly WorkForce Centers), through partnerships and with grants to service providers, non-profits, colleges and universities, and Adult Basic Education programs.

- *Employment and Training Program*: Provides unemployed and underemployed Minnesotans with services such as career counseling, assessment, job seeker and placement services, education and training, and job development activities through our employment and training programs.
- *Vocational Rehabilitation*: Assists Minnesotans with disabilities to secure and retain employment, live independently, and reduce their dependence on government supports.
- *State Services for the Blind*: Facilitates the achievement of personal and vocational independence by Minnesotans who are blind, visually impaired, or DeafBlind.
- *Unemployment Insurance*: Pays unemployment benefits to workers unemployed due to no fault of their own to ensure that they are able to support themselves and their families while they search for employment.
- *Disability Determination*: Determines if Minnesota applicants meet federal criteria for disability benefits through the Social Security Administration.

Our *Economic Development* division contributes to Minnesota's economic success by providing services that support the growth of businesses and communities.

- *Business and Community Development*: Provides new and expanding businesses with various business finance incentives, while communities can receive grants, loans, and technical assistance for redevelopment and public infrastructure.
- *Minnesota Trade Office*: Provides export assistance and training for businesses and helps foreign companies invest in Minnesota through new business startups or expansions.
- *Office of Broadband Development*: Coordinates public, private, and philanthropic efforts to increase availability, speed, connectivity and use of broadband.

Our General Support Services (GSS) provides the agency with the infrastructure and leadership necessary to operate programs, develop policies, and provide assistance to individuals, businesses and communities.

- *Commissioner's Office*: Provides executive leadership through appointment by Office of the Governor of Minnesota. In addition to supervising all DEED programs, the Commissioner's Office oversees two quasi-independent agencies:
 - The *Public Facilities Authority* (PFA) is a multi-agency authority that provides municipal financing expertise and infrastructure financing programs to enhance the environmental and economic vitality of the State. The Commissioner of DEED serves as the chair and chief executive officer of the authority while day-to-day operations are managed by an executive director and staff.
 - *Explore Minnesota Tourism* is the state's tourism marketing entity and is an office in the executive branch. The director of that agency reports directly to the Commissioner of DEED.
- *Policy Office*: Oversees legislative policy planning for the agency, evaluates program performance, conducts economic analysis, and represents DEED at the Legislature.
- *Labor Market Information*: Develops and refines data on Minnesota's labor market and communicates that data to customers.

- *Communications Office*: Publicizes DEED services for customers, partners, and other stakeholders while promoting Minnesota as a place to live, work, and do business.
- *Office of Economic Equity and Opportunity*: Helps workers and businesses of color find career paths and business opportunities in Minnesota by breaking down barriers that contribute to disparities for communities of color throughout the state.
- *Office of Diversity and Equal Opportunity*: Ensures DEED's compliance with federal and state laws concerning discrimination, harassment, reasonable accommodation, site and program access and retaliation, and handles complaints of discrimination for any DEED employee, applicant, contractor, intern or customer.
- *Administrative and Financial Services*: Oversees all financial activities (including budgeting, payroll, procurement, continuity of operations and other functions) as well as managing all DEED facilities.
- *Human Resources*: Manages agency personnel, labor relations, and employee development.

State Fiscal Year" or "SFY" is used throughout DEED's program narratives to clarify the time period being referenced, since Minnesota's state government and the Federal Government use different fiscal calendars. The "Federal Fiscal Year" is noted as "FFY."

FY 2020-21 Biennial Budget Change Item

Change Item Title: Community Prosperity Grants Program

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	\$2000	\$0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	\$2000	\$0	0	0
FTEs	.75	0	0	0

Recommendation:

The Governor recommends \$2 million in FY2020 for the Community Prosperity Grants program to provide grants to local and regional communities to engage in innovative economic development projects that will support economic growth and equitable prosperity. These grants will provide up to 85% in matching grants to local government units or 501(c)3 organizations that are partnering with one or more local government units.

Rationale/Background:

Minnesota is home to 853 cities, 87 counties, seven Ashinaabe reservations, four Dakota communities, dozens of special districts, political subdivisions, and hundreds of non-profit agencies that work, in whole or in part, to support the growth and prosperity of their communities. Despite Minnesota's state-wide economic recovery and growth since the Great Recession the benefits of that growth have not reached all communities equally.

Many communities still suffer from above average unemployment rates, lower wages, below average labor force participation, low availability and high cost of housing and child care, out-migration of prime-age workers, and difficulty attracting qualified workers to their region.

There are a wide range of existing federal, state, and local programs that assist communities in providing goods and services that, in some degree, help facilitate an economic environment to produce growth and prosperity. Community Prosperity grants will fill in where existing local and state funding sources are unavailable and will allow communities to better leverage those funding sources. Community Prosperity grants will support economic growth by providing innovative new or improved public goods and services that support the economic success of individuals, businesses, and communities by facilitating an economic environment that increases the participation and quality of their workforce and produces new jobs.

Proposal:

This program will provide grants to local and regional communities to provide innovative new or improved public goods and services that will support economic growth and equitable prosperity. Grants will be available to Tribal and community partnerships to implement new or improved innovative economic development strategies that will support economic growth and equitable prosperity. Grant funds would provide 85% of total project cost with 15% matching funds provided by private or local government sources.

Funds can be used to implement projects and programs that help (1) support private investment, business attraction, and business growth, (2) provide support for entrepreneurs and (3) provide resources to train, attract or retain workers.

Grantees will be encouraged to leverage existing local and state funding sources including but not limited to Historical and Cultural Heritage Legacy grants, Parks and Trails Legacy grants, Library Construction grants, Broadband grants, Department of Transportation grants, Small Cities Development grants, Redevelopment grants, Contamination Cleanup and Investigation Grant, Demolition Loan program, Child Care Economic Development Grants and other relevant sources.

Grants will be awarded on a competitive basis based on scoring criteria that emphasizes the potential economic development impact of the project, demonstration of the community need for the project, and the sustainability of the project beyond the initial one-time funding.

Key DEED Activities:

- Develop RFP, award, and accountability criteria related to Community Prosperity grants
- Review proposals and determine awards
- Provide outreach, technical assistance, and support to potential grantees
- Provide grant monitoring, data and outcome collection and reporting

Key Grantee Activities:

- Use data and best practices to inform program design and implementation
- Leverage additional funding sources and public and private partners to maximize impact of grant funds
- Design and implement the collection program performance data
- Support and participate in program reporting and monitoring

This proposal includes .75 FTEs over the project period to develop the RFP, review and award grants, provide accountability protocols, monitor grantee activities, provide oversight of funding, provide technical assistance to potential applicants and grantees, provide analysis of data and report on findings.

Equity and Inclusion:

Racial and Ethnic groups, Lesbian, Gay, Bisexual and Transgender groups, Persons with Disabilities and Veterans could be specifically targeted by and/or directly impacted by this proposal.

Projects that are awarded on a competitive basis will be evaluated based on scoring criteria that emphasizes demonstrating positive impact on specific targeted communities with identified needs as it relates to common measures of economic disparities such as unemployment rates, average wages, labor force participation, etc.

Results:

DEED will track performance metrics for the projects that were invested in to track how they are having a positive economic development impact on their communities. Measures might include but are not limited to: businesses assisted, jobs created/retained, average wage of jobs created/retained, number of workers trained, increase in wages of workers trained, and number of business starts.

Statutory Change(s):

TBD.

Employment and Economic Development

FY 2020-21 Biennial Budget Change Item

Change Item Title: Border-to-Border Broadband Development Grant Program

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	\$35,000	\$35,000	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	\$35,000	\$35,000	0	0
FTEs	3	3	0	0

Recommendation:

The Governor recommends \$35 million in FY2020 and \$35 million in FY2021 for the Border-to Border Broadband Grant Program in Minnesota. The recommendation also allows the Department of Employment and Economic Development (DEED) to reserve up to 3% of grant funds for program administration and broadband mapping.

Rationale/Background:

Access to robust broadband is now recognized as a critical factor in the economic and social sustainability of all Minnesota communities. The state has a broadband mapping program which annually gathers current information from all providers about where broadband internet is available and at what speeds. While great progress has been made over the last several years, with 91% of households and businesses having access to a moderate level of service that meets the state's 2022 goals; only 87% of rural homes and businesses have access at this minimum definition. In addition, the state as a whole has only 73.6% of homes and businesses meeting the 2026 broadband goal of access to 100Mbps/20Mbps service.

This recommendation would extend the funding of the Border-to-Border grant program, under Statute [116J.395](#), at the funding level recommended by the broadband task force. This funding level will facilitate meeting the MN statutory goal of border-to-border access of 25Mbps/3Mbps broadband service by the year 2022 ([§237.012](#)) and begin to pave the way for achieving the state's 2026 goal of reaching everyone with a service capable of delivering 100Mbps/20Mbps.

Funding for this program is comprised of a competitive matching-fund grant program designed to act as a catalyst to spur public and private investments in broadband infrastructure in unserved and underserved areas of the state.

Typical grantees include large and small telephone companies, rural cable operators, electric cooperatives, tribal entities, and local governments (in partnership with private providers). Funding at the recommended level, in partnership with private and federal investments, is anticipated to enable the state to effectively reach its 2022 goal of seeing all homes and businesses served at a level that meets the FCC's minimum definition of broadband.

Rural broadband has been a policy priority at both the national and state levels for the last several years. Minnesota is widely recognized as having one of the top broadband programs in the country. By achieving these goals set out in statute, the state puts in place critical infrastructure needed to maintain strong communities. This investment is the 21st century equivalent of extending the road network so that goods could be transported to market or bringing electricity to rural farms so they could modernize their operations and increase efficiencies. It is critical infrastructure needed so that our rural areas can continue to thrive. Ubiquitous high speed broadband

internet access provides the platform for full adoption of telehealth applications, smart farming and precision agriculture tools to boost productivity and competitiveness of our agriculture sector, and supports modern education technologies that allow rural schools to deliver education experiences on par with their urban peers.

Along with state broadband mapping information, the broadband task force and Office of Broadband Development use national studies and data from the federal government to track current and future broadband needs. These sources include the FCC's annual State of Broadband reports, Pew Research studies, the US Census - American Community Survey results and more.

Proposal:

This recommendation funds the Border-to-Border Broadband Development Grant Program \$70 million for the 2020 – 2021 biennium. This funding commitment will build on several years of public and private investments in broadband infrastructure in unserved and underserved areas of the state and will facilitate meeting the statutory goal of border-to-border access of 25Mbps/3Mbps broadband service by the year 2022 ([§237.012](#)) and begin to pave the way for achieving the state's 2026 goal of reaching everyone with a service capable of delivering 100Mbps/20Mbps.

Equity and Inclusion:

This program is largely targeted towards communities outside the metro area where broadband infrastructure is not as likely to be in place at a level that is needed to support economic equity in greater Minnesota. This program contains preference consideration for rural unserved communities and those that demonstrate low-income indicators such as poverty rate and free/reduced lunch program participation. Tribal areas are specifically called out as eligible to apply for the program and direct outreach to their representatives is conducted when funding becomes available.

Results:

This investment would expand broadband access to an estimated 25,221 households, businesses and community institutions. Less easily quantifiable is the positive impacts this program will contribute to extending and leveraging the benefits of ongoing federal Connect America Fund (CAF) II investments; in many areas, Minnesota's resources and tools will help those CAF investments go beyond the lower federal speed requirements to meet or exceed the Minnesota standards.

Type of Measure	Name of Measure	Year & Amount of Funding Appropriated			
		2014 \$20M	2015 \$10.5M	2016 \$35M	2017 \$20M

Department of Employment and Economic Development

FY 2020-21 Biennial Budget Change Item

Change Item Title: Minnesota Innovation Collaborative

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	2,500	2,500	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,500	2,500	0	0
FTEs (Temporary)	3	3	0	0

Recommendation:

The Governor recommends \$2.5 million in FY2020 and \$2.5 million in FY2021 to establish The Minnesota Innovation Collaborative (MIC). The MIC will contain a series of initiatives focused on growing Minnesota's innovation economy by accelerating the growth of our startup ecosystem and attracting top technology talent to the state. Comprised of a collection of new grant programs, a physical space for education and training, and a new apprenticeship program, the MIC will create a touch-stone for the state to support and enhance our visibility and interest in the innovation ecosystem. It will bring together all the key players: founders, venture capitalists, researchers, academia, businesses (including Fortune-500s), and educators in one space. This initiative will be established and created for the next biennium as a pilot program. The intention is to ultimately separate major pieces of the initiative from state government as they grow. Over the biennium, staff will engage businesses, higher education, investors and communities to provide resources to match state investments to sustain and grow the locations and educational services available to entrepreneurs and startups beyond the biennium.

Rationale/Background:

In the last decade, America's economy has continued its transition from manufacturing to technology and services. States and cities that create attractive environments for startups, entrepreneurs, and innovative talent are quickly distancing their economies from those who do not. The businesses of the future are the startups of today, and our established businesses need an innovation ecosystem to provide the ideas and talent to continue to be global leaders. The innovation ecosystem in Minnesota is not well defined nor is there a central organizing body or effort that coordinates or promotes the ecosystem. Our state government is behind other states in filling key market gaps necessary to accelerate growth. Because of this, Minnesota needs to significantly expand our efforts to make our state a top destination for homegrown and outside entrepreneurs to start, build, and grow businesses.

Proposal:

The MIC would support a series of new initiatives designed to accelerate the growth of startups. Each initiative is uniquely designed to lower the risk required to fund, start, or grow a venture-backed startup in Minnesota. The MIC will bring all of these initiatives together under a new office that acts as a touchstone for the state to support and enhance our visibility and interest in the innovation ecosystem. This initial office will be located in the Twin Cities within an existing startup co-working space, and will engage stakeholders throughout the state to build programming and eventually a footprint in Greater Minnesota markets.

MIC staff will partner with other organizations to execute programs designed for entrepreneurs and small businesses, work with Fortune 500s and Academia to co-locate their innovation labs in the space, and will run

outreach campaigns to ensure all key players in MN's startup ecosystem can take advantage of a series of new programs designed to accelerate their growth. The proposed program would provide leadership, grant funding and forward-thinking approaches to support the innovation ecosystem in Minnesota:

1. Minnesota Innovation Accelerator Space + Leadership (\$950 thousand, FY20-21 biennium)

The Minnesota Innovation Accelerator will lease space in a private co-working facility and include up to three new positions funded by DEED – a director, high-level professional staff and a staff person to manage administrative duties. These positions would be responsible for overall coordination and serve as a resource for entrepreneurs and businesses. The space would include both a front office for engaging the community, and a classroom for startup training. Key activities of the space will include:

- **Instruction.** Classes and informal sessions on how to start a high-tech innovation business in Minnesota, giving startups an easy pathway to incorporating in the state.
- **Promotion.** Activities directed toward entrepreneurs and investors about Minnesota's growing innovation economy.
- **Events and Meetings.** Regular events and one-time meetings that bring together key players in the ecosystem and amplify their work along with supporting other organizations events.
- **Outreach.** Outreach and education on all innovation activities and related financial programs available at DEED particularly for underserved communities.
- **Partnerships.** Interaction and collaboration with the University of Minnesota, Minnesota State schools, private universities, trade organizations and the Mayo Clinic on start-ups and commercialization of technology.
- **Advisory Board.** Staff would identify and administer an advisory board to assist with direction, grant programs, evaluations and other partnerships.
- **Future of Work Research Initiative.** In conjunction with the University of Minnesota and Minnesota State Colleges and Universities, MIC leadership will work to commission research on the impacts of the fast-evolving economy on Minnesota's labor market. (\$279,300, FY20-21 biennium)

2. Minnesota Innovation Grants (\$3.2 million, FY20-21 biennium)

DEED will award grants to eligible Minnesota startups involved in developing or producing products or services in Minnesota that will provide quality jobs for Minnesotans for the next generation. The grants will be targeted to the most promising technology businesses in the early stages of development that are generally not yet able to attract adequate private sources of capital, such as commercial bank loans and angel or venture investment funding. Third party evaluations will assist in determining funding levels and recipients. Some of these funds will require matching from non-DEED sources of funding and may be used for the following activities:

- **Research and Development Grants.** New innovative ideas require research & development (R&D) to increase their commercial feasibility including proof of concept, IP protection, and prototype design. The most commercially viable projects from eligible businesses could receive a one-time award of up to \$50,000 for these activities. (\$417,600 in FY 20, \$417,600 in FY 21)
- **Business Liquidity Grants.** Whether it is space, equipment, staffing contracts or supplier costs there are a variety of business-related non-R&D expenses faced by start-ups. The most commercially viable projects from eligible businesses could receive a one-time award of up to \$25,000 for these expenses (\$275,200 in FY 20, \$275,200 in FY 21)
- **Entrepreneur Benefits Packages.** One of the biggest impediments for leaving existing jobs to start a company is the prospect of not having health insurance. Entrepreneurs often need financial assistance to cover costs associated with healthcare, or housing and child-care costs. Eligible

entrepreneurs could receive a one-time award of up to \$7,500 to help cover these costs. (\$550,400 in FY20, \$550,400 in FY21)

- **Small Business Innovation Research (SBIR) Match Funding.** This financial support is a match for businesses who are new recipients of SBIR/Small Business Technology Transfer (STTR) phase I and phase II federal awards. The business may use funds to support commercialization activities and related costs associated with the project not covered under the federal grant. Eligible entrepreneurs could receive funding of up to \$50,000. (\$275,200 in FY 20, \$275,200 in FY 21).
- **Innovation Vouchers.** This program would provide \$5,000 to \$25,000 awards to assist small businesses purchase technical assistance and services from qualified public universities, colleges, technical schools and non-profits in Minnesota to advance their technology. This initiative would build on the successful program operated by DEED since 2014. (\$81,600 in FY 20 and \$81,600 in FY 21).

Eligible innovative start-ups must work with third-party technology counseling services in Minnesota such as the MIC to develop applications that will be accepted by DEED on a rolling basis. Applications that reflect past or potential investment by outside investors including Fortune 500-type businesses will be encouraged. Grantees will be required to show proof of investment from the private sector to unlock the assistance and will be provided with ongoing mentoring support from the MIC and other private sector organizations throughout the grant period. DEED staff outside of MIC would provide administrative support and a 3% administrative fee would cover administrative expenses. Entrepreneurs seeking assistance must demonstrate income in the previous year of less than \$150,000.

3. Entrepreneurship Education Grants (\$850 thousand, FY20-21 biennium)

DEED will issue a Request for Proposals to award competitive grants to organizations throughout the state that can deliver best-in-class educational programming to entrepreneurs and provide outreach on the state's innovation ecosystem. Local match and involvement with the MIC would be required. DEED staff outside of MIC would provide administrative support and a 3% administrative fee would cover administrative expenses. Organizations would be required to provide the following types of services to support and enhance Minnesota's innovation ecosystem.

- **Outreach.** Outreach and education on programs available including the Angel Tax Credit program, to support technology business creation particularly in underserved communities.
- **Mentorship** for individual technology based businesses and assistance for entrepreneurs seeking federal grant funding.
- **Creation** of consistent programs for technology based entrepreneurs and businesses outside of the 7-county metro area, in partnership with MNSCU or other local educational partners.
- **Promotion.** Activities directed toward entrepreneurs and investors about Minnesota's growing innovation economy.
- **Event and Meetings.** Regular events and one-time meetings that bring together key players in their area ecosystem and amplify their work along with supporting other organizations events.

Equity and Inclusion:

This proposal seeks to grow Minnesota's innovation economy and provides the kinds of wrap around programming and supports necessary for communities who are less able to become entrepreneurs to grow their businesses. The groups most likely to benefit from this intense programming are low-wealth communities. The MIC is expected to grow Minnesota's economy and will spur increased technological innovation and long-term, high-wage job growth. Outcome measurement strategies are described below. This program would be re-evaluated after the upcoming biennium to determine whether any changes are needed.

Results:

In evaluating the results of the MIC, DEED will track the following measures:

- Classes offered and attendees
- Events
- New partnership development
- Grantees served with the new grant programs
- Job creation
- New businesses established or grown
- Research projects undertaken for the Future of Work Research initiative

This program would be re-evaluated after the upcoming biennium to determine whether any changes are needed.

Statutory Change(s):

TBD.

Employment and Economic Development

FY 2020-21 Biennial Budget Change Item

Change Item Title: Angel Tax Credit

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Tax Aids, Credits and Refunds				
General Fund				
Expenditures	0	0	0	0
Revenues	(10,000)	(10,000)	0	0
Employment and Economic Development				
Other Funds				
Expenditures	285	285	47	47
Revenues	368	368	127	127
Net Fiscal Impact = (Expenditures – Revenues)	9,917	9,917	(80)	(80)
FTEs	1	1	0.25	0.25

Recommendation:

The Governor recommends \$10 million in FY 2020 and \$10 million in FY 2021 for the Angel Tax Credit Program.

These funds provide a tax credit to investors or investment funds that put money into early stage companies focused on high technology, a new proprietary technology, or a new proprietary product, process, or service in specified fields. The program was funded at \$15 million in calendar years 2015 and 2016, \$10 million in calendar year 2017, and was not funded in 2018.

Other funds in this program include fees collected for applications and report filing as well as expenditures for Department of Employment and Economic Development (DEED) program staff to certify participating businesses.

Rationale/Background:

The Angel Tax Credit program is Minnesota's primary economic development tool for assisting early stage businesses and is part of DEED's commitment to fostering innovation in the state. Minnesota has earned its reputation as one of the best states for business by encouraging the growth and economic competitiveness of businesses of all sizes. As high-tech startups look outside the confines of traditional hubs like Silicon Valley, Minnesota has the opportunity to provide incentives that will encourage job growth and technical expertise here in the state. The Angel Tax Credit program has resulted in over \$421 million in private investment in Minnesota startups, leveraged by the state's issuance of \$101 million in tax credits to angel investors. The program spurs economic growth and builds on Minnesota's existing ecosystem of high tech, high innovation companies, including the state's clean energy technology companies.

The program is also an important tool for wealth creation in communities across the state. Since its inception, DEED has sought to broaden the base of individuals, communities, and businesses that benefit from the program. DEED believes it is critical that all qualifying businesses in Minnesota have access to the benefits of the program. The policy changes included in this proposal will increase utilization of the program among targeted group businesses, including those owned by people of color, women-owned businesses, veteran-owned businesses, businesses owned by people with disabilities, and/or businesses in Greater Minnesota.

Proposal:

The Governor recommends \$10 million in FY 2020 and \$10 million in FY 2021 for the Angel Tax Credit Program.

The Governor recommends that the Angel Tax Credit program be modified to better serve targeted group businesses. These modifications include:

- *Adjust the minimum employee compensation requirement to better serve Greater Minnesota:* This proposal revises the minimum employee compensation so rather than applying to every employee of the business, it applies to at least 51% of a business's employees. This requirement has been especially problematic in Greater Minnesota, where wage levels are lower than the metro area. The 2017 requirement was \$20.70 per hour or \$43,050 per year.
- *Lower minimum investment thresholds for investors of targeted business:* This proposal reduces the minimum investment for individuals from \$10,000 to \$7,500 to increase the pool of potential investors in targeted businesses. Targeted businesses typically raise smaller amounts from each investor than non-targeted businesses.
- *Reduce disincentives to annual report filing:* Modify the late filing penalty to \$100 from \$500, an amount that has proven to be a substantial disincentive to filing and providing the program with needed information. This proposal also adds authority for the Commissioner of DEED to revoke any credit allocated and certified for investors, funds, and businesses who fail to file.

Equity and Inclusion:

This proposal specifically targets businesses owned and managed by minorities, women and businesses located in Greater Minnesota, reserving credits for investments in these business and modifying certain program requirements to better enable them to benefit from the program.

Results:

	CY 2014	CY 2015	CY 2016	CY 2017
Number of businesses receiving investments	183	182	187	163
Number of businesses in which investments were made	110	114	105	101
Investment made in businesses qualifying for credit	\$59,783,632	\$70,411,833	\$58,894,095	\$44,474,766
Credit issued for these investments	\$13,841,673	\$15,542,608	\$14,723,711	\$10,723,963

Statutory Change(s):

Minnesota Statutes, Section 116J.8737

Employment and Economic Development

FY 2020-21 Biennial Budget Change Item

Change Item Title: Family and Medical Leave Insurance Placeholder

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	54,250	13,750	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	54,250	13,750	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$68 million to establish a Paid Family and Medical Leave Insurance program.

This proposal is a placeholder. It is intended to fund the development of an IT system for collecting premiums and paying benefits, staffing and administrative resources at DEED and other state agencies, and an actuarial study to support program development.

Rationale/Background:

According to the “Paid Family & Medical Leave Insurance: Options for Designing and Implementing a Minnesota Program” released in February 2016, Minnesota workers take an estimated 459,259 leaves (some workers take more than one leave annually). Around 10% of Minnesota workers take a family or medical leave in any given year. Fifty-nine percent (59%) of current leaves in Minnesota are for own-health reasons (other than pregnancy), 17 percent are for bonding/parental leave (including pregnancy disability), and 24 percent of leaves are for caretaking a seriously ill family member.

Currently 26 to 28 percent of all family and medical leaves are without any wage replacement. However, low-wage employees, certain minority groups, younger workers, and less educated populations are much more likely to experience leaves without any pay. Minnesota workers are less likely to receive compensation during leave for their own serious health condition or family care than for pregnancy or parental (bonding/maternity/paternity) leave. For many low income Minnesotans, taking leave with little or no pay can create significant economic instability for their families, often during some of the most challenging times they can experience.

Similar programs in other states have shown improvements in economic stability for families and employers alike. Societal benefits include more women in the labor force, reductions in the need and associated costs for nursing home and other institutional care, reductions in the need for public assistance when a new baby arrives, and less infant care shortages.

Proposal:

The Governor recommends a total of \$68 million to support the creation of a new Minnesota Family and Medical Leave Program administered by DEED. Funding in FY 2020 and FY 2021 will support the creation of a premium collection system, benefits payment system, and user interface development for the program. This program will provide wage replacement for family and medical leaves and will provide job protections for recipients so they are assured of continued employment with their employer upon their return.

The placeholder also includes funding for other agencies, such as the Department of Labor and Industry or the Department of Human Services, which is dependent upon ultimate program design.

Equity and Inclusion:

According to the 2016 report, while almost three-quarters of Minnesota workers receive at least some pay when they were out of work for family or medical reasons, low-wage (46%); black (42%); or Hispanic (39%); younger (39%); part-time (38%) or less educated (38%) workers are much more likely to experience leaves without any pay. This proposal is intended to help address that inequality and the economic impacts that that inequality has on these workers.

Results:

DEED will track the following:

- Amount of leave taken
- Amount of benefit payments made to recipients
- Employer opt-outs
- Employee opt-ins
- Program tax collections and balance
- Customer satisfaction

Statutory Change(s):

TBD.

Department of Employment and Economic Development

FY 2020-21 Biennial Budget Change Item

Change Item Title: Closing the Opportunity Gap

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	12,647	12,150	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	12,647	12,150	0	0
FTEs	2	2	0	0

Recommendation:

The Governor recommends \$24.797 million over the 2020 – 2021 biennium to make workforce training and entrepreneurship investments intended to help close the state's opportunity gaps between Minnesotans of color and white Minnesotans. To that end, the Governor proposes continuing the direct appropriations made in the 2018 – 2019 biennial budget that were set to expire in the 2020 – 2021 biennium. The Governor further proposes additional funding for youth employment competitive grants targeting at-risk youth, grants to organizations serving Somali youth and increased grantee support from the department to ensure successful program delivery and improved program outcome analysis.

Rationale/Background:

The legislature appropriated funding in SFY 2017 to reduce economic disparities and prepare Minnesotans to meet the future labor market needs. For DEED, those amounted to investments into employment and training programs, minority business enterprises, capacity building for nonprofits and support services for program participants. The state's business community, state and local governments and the nonprofit community have taken further steps in recent years to begin addressing economic inequalities and expanding economic opportunity. In many ways there has been a recognition that Minnesota's future labor market will need all its workers to be skilled participants in the workforce.

Recent U.S. Census figures show income gains and lower unemployment rates for Minnesotans of color. However, there is still drastic inequality - median incomes of white Minnesotans remain almost twice that of American Indian/Alaskan Native Minnesotans and Black/African American Minnesotans and about \$18,000 more than Latino Minnesotans. The same holds true for the unemployment rate, which remains more than twice as high for Black/African American Minnesotans compared to white Minnesotans.

Proposal:

In recognition of Minnesota's deep and persistent disparities and the momentum that has been created around addressing those disparities, the Governor recommends \$12.647 million in FY 2020 and \$12.150 in FY 2021 to continue the direct appropriations made in the 2018 – 2019 biennial budget that were set to expire through the 2020 – 2021 biennium as well as additional strategic investments. The Governor proposes funding \$24.797 million from the workforce development fund over the biennium. The Governor proposes funding the following direct appropriations at their 2018 - 2019 biennial appropriation levels:

- Neighborhood Development Center
- YWCA St. Paul

- YWCA Minneapolis
- EMERGE Community Development
- Metropolitan Economic Development Association (MEDA)
- Minneapolis Foundation
- Twin Cities RISE
- Latino Communities United in Service (CLUES)
- American Indian Opportunities and Industrialization Center
- White Earth Nation Integrated Business Development System
- Grants for community-based organizations serving Somali youth (FY 2017 appropriation)
- Ujamaa Place
- Enterprise Minnesota, Inc.
- Construction Careers Foundation

The Governor further proposes an increase of \$3 million over the biennium to the Youth-at-work competitive grant program and \$500,000 over the biennium for additional grantee support from the department to ensure successful program delivery and improved program outcome analysis.

Equity and Inclusion:

This proposal invests in employment training programs targeting communities of color and people with disabilities, the development of minority business enterprises, capacity building for nonprofits serving communities of color and people with disabilities, and support services for program participants to better prepare Minnesota's talent pool.

Results:

Minnesotans of color and Minnesotans with disabilities access the education, training and support services needed to participate in the labor force and obtain in-demand and high-paying jobs.

- Number of clients with positive employment outcomes (employment in 6 months, credential attained, change in income)
- Increase in the labor force participation rate for targeted populations
- Decrease in the unemployment rate for targeted populations
- Increase in the median income for targeted populations
- Decrease in the poverty rate for targeted populations
- Increased capacity of the nonprofit sector to deliver high-quality culturally-specific services to Minnesotans of color

Ensure that disadvantaged businesses can obtain the capital, management skills and market opportunities necessary for success.

- Increased number of disadvantaged business enterprises in Minnesota
- Increased number of people employed by disadvantaged business enterprises in Minnesota
- Increased average sales by disadvantaged business enterprises in Minnesota

Statutory Change(s):

None.

Employment and Economic Development

FY 2020-21 Biennial Budget Change Item

Change Item Title: Childcare Economic Development Grants Program

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	\$500	\$500	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	\$500	\$500	0	0
FTEs	0.25	0.25	0	0

Recommendation:

The Governor recommends \$500,000 in FY20 and \$500,000 in FY21 for the Childcare Economic Development Grants program to provide grants to communities to increase the supply of quality child care in order to reduce regional child care shortages, support increased workforce participation, business expansion and retention and new business development.

Rationale/Background:

There is a large and growing shortage in access to child care across the state. The large gap between the supply of licensed child care capacity and the demand for services is creating a crisis in access and affordability. Based on research by the Center for Rural Policy and Development there is a shortfall of 82,000 licensed child care spaces needed to accommodate the estimated number of children under 6 with both parents working.

Lack of affordable, quality child care is a significant barrier to the participation of women, single parents, low income parents, and rural parents in the workforce. That barrier then creates further spillover barriers to job creation, wealth creation, business expansion and retention, and new business location. Lack of child care is also a major factor in employee absenteeism resulting in adverse effects for both employers and employees.

Proposal:

This program will provide grant funds to communities to implement innovative solutions to reduce regional child care shortages, including, but not limited to, funding for child care business start-up or expansion, training, facility modifications or improvements required for licensing, and assistance with licensing and other regulatory requirements. These investments will lower the barriers for child care providers to start new operations or expand the capacity of existing operations resulting in more families being able to access child care which in turn allows more parents to pursue job opportunities in their communities.

Priority will be given to communities that have a documented shortage of child care providers in their area, are experiencing above average workforce shortages and experiencing lower than average prime-age workforce participation rates.

Communities throughout Minnesota have expressed strong demand for these funds and have demonstrated that there are a large number of projects ready to go in order to expand child care capacity should additional funding be made available. Based on the past two appropriations it is estimated that an additional \$1 million would leverage over \$2 million in local matching funds, result in 14-20 new projects as well as the ability serve an additional 1,600-2,400 children and their families throughout Minnesota.

This program alone cannot solve the child care crisis but it can be used to make targeted investments to help solve acute shortages in specific communities with the highest need.

Equity and Inclusion:

Racial and Ethnic groups, Lesbian, Gay, Bisexual and Transgender groups, Persons with Disabilities and, Veterans are not specifically targeted by or directly impacted by this proposal. Access to affordable, quality child care affects all Minnesotans but especially low-income people and people in rural communities.

Results:

Over the course of the two previous appropriations funding in FY 2017 and FY 2018, DEED received 39 proposals totaling \$3 million in requests for \$1 million in available funds. A total of 15 awards were made, leveraging a total local match of \$2.6 million. Awards ranged from \$1,500 to \$150,000 with \$75,000 as the average sized award. These projects are projected to provide child care services to an additional 2,131 children when facilities reach their full licensed capacity.

<i>Type of Measure</i>	<i>FY2017</i>	<i>FY2018</i>
Projects Funded	8	7
Funding Leveraged	\$2,341,221	\$ 2,337,591

Statutory Change(s):

Employment and Economic Development

FY 2020-21 Biennial Budget Change Item

Change Item Title: Nonprofit Assistance Grant Program

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Workforce Development				
Expenditures	500	500	500	500
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	500	500	500	500
FTEs	.75	.75	.75	.75

Recommendation:

The Governor recommends \$500,000 each year in 2020 – 2021 for Propel Nonprofits' Nonprofit Assistance Grant Program from the Workforce Development fund. This program is intended to support the infrastructure of small nonprofit organizations that serve historically underserved cultural communities. The Governor recommends including this funding in the base budget.

Rationale/Background:

The Nonprofit Assistance Grant Program was a direct appropriation made to the Nonprofit Assistance Fund (now Propel Nonprofits) in the 2018-2019 biennial budget. This recommendation continues funding for this program.

To be eligible for a grant, a nonprofit organization must be led by a member of an indigenous community or community of color, and at least 51 percent of the organization's staff or board must be a member of such a group.

75 percent of the organizations that have received grants are led by women of color, and all of the organizations are dedicated to serving people of color and/or indigenous communities. Additionally, 75 percent of previous grantees used their investment to establish financial and administrative systems for managing internal operations that make them ready to apply for other grants and contracts with government and other funders. This includes using accounting software, developing financial procedures, and creating databases to track program work. Other grantees have focused on technology infrastructure purchases to bring efficiencies to their work, through the purchase of electronic records systems, cloud-based software solutions, or other technologies.

Nonprofit organizations play an important role in Minnesota's economy and workforce – they provide essential services, employ local residents, and improve the quality of life. Culturally specific nonprofits play a key role in building strong and vibrant communities. They connect ethnic minorities, who are often isolated and marginalized, to culturally and linguistically needed services and help them to prepare for the workforce.

Proposal:

The Governor proposes continuing this direct appropriation to Propel Nonprofits for the Nonprofit Assistance Fund at \$1 million in the 2020-21 biennium and recommends including this funding appropriation in the base.

Equity and Inclusion:

The primary focus of this grant program is to improve the capacity of nonprofits lead by a member of an indigenous community or community of color with at least 51 percent of the organization's staff or board who are a member of such a group.

Results:

The following were the program's results from the 2018-19 biennium

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of Grantees Funded	N/A	21	FY 2018-19
Quality	Percent of grantees headed by women of color	N/A	75%	FY 2018-19
Results	Percent of grantees who established financial and administrative systems	N/A	75%	FY 2018-19

Employment and Economic Development

FY 2020-21 Biennial Budget Change Item

Change Item Title: Vocational Rehabilitation Services

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	4,000	4,000	4,000	4,000
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	4,000	4,000	4,000	4,000
FTEs	0	0	0	0

Recommendation:

The Governor recommends adding \$4 million each year for the Vocational Rehabilitation (VR) program. Absent this proposal, the Vocational Rehabilitation program will be required to establish a wait list for Minnesotans with the most significant disabilities to receive services, and those individuals will be unable to access timely competitive, integrated employment opportunities. This is ongoing funding.

Rationale/Background:

People with disabilities in Minnesota are about 43% less likely than their non-disabled counterparts to have a job. The Vocational Rehabilitation program helps remedy this disparity by helping people with disabilities get and keep a job in a competitive, integrated setting. The Vocational Rehabilitation program provides specialized, one-on-one employment services for individuals with disabilities such as job counseling, job search assistance, training, and job placement services. We know that Minnesota businesses need talented workers to fill jobs in demand given the labor shortage. We also know engaging in productive employment is important for Minnesotans to have the opportunity to live close to their families and friends, to live more independently, and to participate in community life. The Vocational Rehabilitation program is Minnesota's most effective strategy to increase competitive, integrated employment for individuals living with disabilities.

In recent years, major systems changes dramatically transformed and disrupted the nationwide network of disability employment services, including those in Minnesota. These changes are driven by a national commitment to achieving the primary objective of the Americans with Disabilities Act: full inclusion of people with disabilities. The Vocational Rehabilitation program is accountable to Congress and federal agencies to implement requirements stemming from the reauthorization of Title I of the Rehabilitation Act under the Workforce Innovation and Opportunity Act (WIOA).

Two unfunded mandates imposed by WIOA – pre-employment transition services to youth with disabilities (starting in 2014) and services related to the subminimum wage required under Section 511 (starting in 2016) – placed significant financial pressure on the Vocational Rehabilitation program. Even before the WIOA mandates took effect, the Vocational Rehabilitation program was operating with waiting lists for three of its four service categories. In response to this situation, the 2017 Legislature made a one-time increase to the base appropriation of \$7 million (\$3.5 million for each year of the 2018-2019 biennium).

Category 1: The Vocational Rehabilitation program is required by federal law to allocate resources to customers based on the severity of their disability and the number of barriers related to employment experienced by that

individual because of their disability. This process establishes “Priority for Service” categories based on the number of functional areas in which a person has significant limitations to employment.

Priority for Service Category 1 is for individuals with the most significant limitations to employment. This category is currently open. Categories 2-4 have had waiting lists since October 2014. By early 2019, more than 2,000 people in categories 2-4 had been placed on an indefinite waiting list for services, and that waiting list will continue to grow as long as those categories remain closed.

Unless the one-time state appropriation for the next biennium is made a permanent part of the state funding base and increased by an additional \$500,000 in each year, it is likely that Category 1 will have to be closed as early as July 1, 2019, the start of the 2020-2021 biennium, but certainly no later than October 1, 2019, the start of the new federal fiscal year. When that happens, the Vocational Rehabilitation program will only be able accept new participants when other participants exit service, and hundreds of people who are eligible for Vocational Rehabilitation services will be placed on indefinite waiting lists.

If Category 1 is closed, only those individuals who are currently enrolled in the Vocational Rehabilitation program will continue to receive services and the program will be forced to place all eligible new applicants, about 6,500 individuals, on indefinite waiting lists until Category 1 can be reopened.

Maintenance of Effort Penalty: Under federal law, any reduction in state funding from one year to the next would trigger a so-called “maintenance of effort” penalty, resulting in the loss of millions of dollars in federal funding. The Rehabilitation Act requires state Vocational Rehabilitation programs to maintain at least the same level of funding from year to year – to maintain the effort in a long-term and consistent manner. If non-federal funding for the program drops, the law requires that a maintenance of effort penalty be imposed. If the 2017 one-time state biennial appropriation of \$3.5 million per year is not made a part of the permanent base, Minnesota would be out of compliance with the maintenance of effort requirement and the federal maintenance of effort penalty, approximately \$1.7 million, would be imposed at the start of the federal fiscal year on October 1, 2020. The penalty would rise to approximately \$2.5 million on October 1, 2021.

Potential Impact on the Vocational Rehabilitation program: The closure of all priority for service categories (1-4) would have an immediate impact on individuals who apply for and are found eligible to receive services. All new eligible participants would be placed on a waiting list and denied services for an indefinite period of time. Similarly, if all categories are closed the Vocational Rehabilitation program would be compelled to implement a series of cost-saving measures, including likely eliminating nearly 50 Vocational Rehabilitation program staff positions.

Proposal:

The Governor recommends \$4,000,000 per year in FY20 and FY21, and in the base, for the Vocational Rehabilitation program to provide services for individuals with the most significant disabilities to obtain or advance in competitive, integrated employment.

Equity and Inclusion:

There is a strong correlation between disability and poverty. Historically, people with the most significant disabilities have a much higher unemployment rate than people without disabilities. The proposal is designed to increase the access to competitive, integrated employment. The Vocational Rehabilitation program seeks to provide services and supports to individuals with disabilities to obtain, maintain, and advance in competitive, integrated employment – thereby reducing the historic employment disparities for people with disabilities.

Results:

- The overall success of this proposal would be measured by keeping Service Category 1 open indefinitely. Previous years' outcome metrics are below:

	SFY 2015	SFY 2016	SFY 2017	SFY 2018
New participants accepted for service	6,650	6,638	7,176	6,584
New employment plans	5,336	5,522	6,219	5,656
Participants completing an employment plan and attaining employment	2,945	2,947	2,807	2,701
Participating employers	2,041	2,025	1,951	1,945

Statutory Change(s):

None.

Employment and Economic Development

FY 2020-21 Biennial Budget Change Item

Change Item Title: Job Creation Fund

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends a technical change to the Job Creation Fund to ensure consistency with statutory changes made during the 2017 legislative session.

Rationale/Background:

In 2017, the legislature made several changes to the Job Creation Fund program to enhance the ability of targeted businesses to utilize the program. Changes were made throughout the statute but one change that was consistent with the other revisions was not captured in the final version of the legislation. This change would make the statute internally consistent.

Proposal:

Modify Minn. Stat. 116J.8748, Subd. 4(d) to reference the capital investment requirements provided in subdivision 3, paragraph 3 clause (i). These requirements were revised in 2017 to better promote greater economic development and job growth in Greater Minnesota and for businesses owned by minorities and women, and this revision will ensure that this section of the statute is consistent with those changes.

Equity and Inclusion:

Business in the targeted groups benefit from the initial changes by providing a lower threshold to participate in the program and a higher job creation award. Lower eligibility thresholds and higher award levels will increase investment and expansion by the affected groups.

Results:

Job Creation Fund	FY 2017	FY 2018
State Dollars Awarded*	\$4.1M	\$9.8M
Projected Private Sector Investments Leveraged	\$288.1M	\$228M
Projected Job Creation	720	1,381
Number of Projects Enrolled	13	27
Enrolled Projects in Greater MN	7	19

*No funding is disbursed until a business submits evidence of qualifying capital investment and job creation

Statutory Change(s):

Minn. Stat. 116J.8748

Department of Employment and Economic Development

FY 2020-21 Biennial Budget Change Item

Change Item Title: Minnesota Investment Fund

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends modifying the Minnesota Investment Fund (MIF) to enable existing local funds the expanded ability to use those funds for other community and economic development purposes. The Governor further recommends continuing DEED's limited authority to transfer funding from the MIF program to the Redevelopment Grant program and to allow for an increase in the grant limit for a paper mill in Duluth.

Rationale/Background:

The MIF is a loan program used to encourage business investment and job creation in Minnesota. Current law allows local communities and Indian tribal governments to retain up to \$100,000 of a MIF grant when it is repaid to the local community or tribal government. Current law limits the use of those funds use to the allowed uses for the state MIF program uses (with one exception for dairy modernization). With more than \$20 million held in local funds that is often unused, there is significant local interest to allow communities to use the revolving loan funds for other community and economic development purposes, including retail development and economic development planning.

The 2017 legislature granted DEED the ability to transfer funds from the Minnesota Investment Fund to the redevelopment grant program. Under this authority, the agency was able to transfer \$2 million over the 2018 – 2019 biennium to the redevelopment grant program when the program would otherwise be out of funding. DEED received requests-for-proposals of almost twice the available balance in the redevelopment grant program, indicating strong demand for this program and warranting a policy change to support ongoing funding. Funding awards will be issued yet this winter.

Proposal:

This proposal would allow local governments to use MIF repayments for community and economic development purposes as evidenced by a resolution to this effect from the local community.

Continuing DEED's transfer authority from the MIF to the redevelopment grant program will better enable the agency to respond to the changing needs of communities in the state while not negatively impacting the state's economic development tools.

Of the amount appropriated in fiscal year 2020, \$2 million is for a loan to a paper mill in Duluth for a retrofit project that will support the operation and manufacture of packaging paper grades. The company that owns the mill must spend \$20 million on project activities by Dec. 31, 2020. Loan funds may be used for purchases of materials, supplies, and equipment for the project and are available from July 1, 2019 to June 30, 2021. The

commissioner of employment and economic development shall forgive 25 percent of the loan each year after the second year during a 5-year period if the mill has retained at least 200 full-time equivalent employees and satisfied other performance goals and contractual obligations under Minnesota Statutes section 116J.8731.

Equity and Inclusion:

This proposal promotes greater economic development and job growth, benefiting all groups throughout Minnesota.

Results:

DEED will report on which local governments used MIF repayments and for what purposes the funding was used. Further, DEED will continue to report results for MIF and the redevelopment grant programs.

Statutory Change(s):

Minn. Stat. 116J.8731

Program: Business and Community Development

mn.gov/deed/business/

AT A GLANCE

- Administers financing programs to help businesses retain existing jobs and create new high-quality jobs.
- Administers financing programs and special appropriations to support community development.
- Provides information and access to resources to help entrepreneurs and small businesses.
- Funds cooperative training projects involving partnerships between businesses and educational institutions that build the skills of new employees and/or retrain existing employees.
- In SFY 2018, across all programs both federal and state, DEED awarded \$178 million for 530 projects resulting in a minimum of \$2.1 billion in leveraged investment, the creation of 6,250 new jobs and the retention of 12,100 jobs.

PURPOSE & CONTEXT

DEED's Business and Community Development (BCD) division contributes to Minnesota's economic success by providing services that support the growth of businesses and communities.

We provide financial and technical services to businesses and communities to support the creation, expansion, attraction, and retention of businesses in and to Minnesota. We also work to help communities become affordable, quality places for people and businesses to locate, grow, and prosper.

SERVICES PROVIDED

We accomplish our mission via the following activities:

- *Business Finance:* We administer financing programs that provide capital to growing businesses in Minnesota. Some key programs include the Minnesota Job Creation Fund, which provides performance-based awards to new and expanding businesses after they meet job creation and capital investment targets; the Minnesota Investment Fund, which provides upfront financing that targets job creation in industrial, manufacturing and high-tech industries; and the Emerging Entrepreneur Program, which provides loans targeted toward Minnesota small businesses owned by women, veterans, people with disabilities, people from communities of color and/or low-income individuals.
- *Brownfields and Redevelopment:* We manage grant and loan programs that assist local units of government with the investigation and cleanup of contamination and the redevelopment of underutilized properties. The Contamination Cleanup and Investigation Grant Program helps pay for assessing and cleaning contaminated sites for private or public redevelopment. The Redevelopment Grant Program helps communities with the costs of redeveloping blighted industrial, residential, or commercial sites and putting land back into productive use. The Demolition Loan Program helps with the costs of demolishing blighted buildings on sites that have future development potential but no current plans.
- *Business Development:* Our regional business development representatives assist businesses and communities to access DEED services and other available resources to support the growth, retention and attraction of workforce and businesses. The office also promotes specific industry sectors where Minnesota has strength and/or potential for growth.
- *Community Finance:* We administer programs that assist local governments in attracting and keeping businesses and jobs in their communities. Key programs include the Small Cities Development Program, Business Development Public Infrastructure Program, Innovative Business Development Public Infrastructure Program, and the Transportation Economic Development Infrastructure Program. Through financial assistance for housing, the development of commercial and industrial property, and

improvements to public infrastructure, we help communities prosper and position themselves for future economic growth.

- *Minnesota Job Skills Partnership (MJSP)*: Our Minnesota Job Skills Partnership program provides funding for cooperative training projects that build the skills of new employees and/or retrain a company's existing employees. These grants are awarded to educational institutions with businesses as partners. This program can also provide training to low-income individuals to help them advance their career, achieving higher paying jobs and economic self-sufficiency.
- *Small Business Assistance Office (SBAO)*: Our Small Business Assistance Office works to reduce costs for small businesses by providing timely, accurate, and comprehensive information and technical assistance on all aspects of the start-up, operation, or expansion of a small business. The SBAO complements the work of the Small Business Development Center network (SBDCs), which aids in the development of new and existing businesses through a statewide network of offices offering entrepreneurs business consulting, training services and assistance in locating and securing capital.

RESULTS

Type of Measure	Name of Measure	Previous	Current	Dates
Quality	Leveraged private investment through all programs	\$3.8B	\$3.3B	SFY 2017 & SFY 2018
Results	# of jobs to be created/retained through all programs	47,700	31,850	SFY 2017 & SFY 2018
Results	# of jobs to be created through the Minnesota Job Creation Fund	3,555	2,415	SFY 2017 & SFY 2018
Quantity	Number of loans to underserved Minnesotans through Emerging Entrepreneur Loan program	44	87	SFY 2017 & SFY2018
Quantity	# of workers trained through the Minnesota Job Skills Partnership Program	17,959	18,177*	SFY 2017 & SFY 2018
Quantity	# of small business clients assisted by the SBDC and SBAO	64,038	63,162	SFY 2017 & SFY 2018
Quality	Leveraged private investment through the Contamination Investigation and Cleanup Grant Program	\$685M	\$838M	SFY 2017 & SFY 2018
Quality	Leveraged private investment through the Redevelopment Grant Program	\$80M	\$133M	SFY 2017 & SFY 2018
Quality	Leveraged non state investment through the Business Development Public Infrastructure program & Innovative Business Development Public Infrastructure program	\$18M	\$157.5M	SFY 2017 & SFY 2018
Quality	Leveraged non state investment through the Transportation Economic Development Infrastructure Program	\$11M	\$42M	SFY 2017 & SFY 2018

* SFY17 and SFY18 MJSP grants are currently open, so total number of workers is the “planned number of trainees” the employer indicated they would serve in their grant application.

Minn. Stat. § 116J (<https://www.revisor.mn.gov/statutes/?id=116J>) provides the legal authority for DEED's Business and Community Development program.

Program: Unemployment Insuranceuimn.org/uimn/**AT A GLANCE**

- Pays eligible workers up to 50 percent of their average weekly wage (subject to a state maximum) for up to 26 weeks.
- Collaborates with CareerForce locations to ensure workers have the assistance they need to quickly return to employment.
- Paid \$810 million in unemployment benefits to 150,829 Minnesotans in 2017.
- Minnesota UI regularly ranks among the top 5 states in the country in achieving federal performance standards.

PURPOSE & CONTEXT

The Unemployment Insurance (UI) program's mission is to enhance workforce development and the economic strength of Minnesota by providing unemployment insurance for individuals and employers. The program provides a temporary, partial wage replacement to workers who become unemployed through no fault of their own.

Unemployment insurance benefits provide stability to local economies by helping to maintain spending during prolonged economic downturns; support dislocated workers while they obtain training so they may re-enter the labor market; and ensure that skilled workers do not leave an area in search of other work during periods of short-term unemployment.

SERVICES PROVIDED

We accomplish our mission through a variety of advanced technological and management approaches, including:

- Ensuring the prompt and accurate payment of benefits to eligible unemployed workers.
- Reducing administrative burdens as much as possible for employers who pay unemployment insurance taxes.
- Using human resources as cost-effectively as possible.
- Collaborating with CareerForce partners (formerly WorkForce Centers) to ensure workers obtain the assistance needed to quickly return to employment that makes the best possible use of the worker's skills and abilities (a state and federal requirement of UI).

We achieve these goals through several different activities:

- *Appeals Operations and Legal Affairs:* We conduct appeal hearings and Workers' Compensation interventions to ensure that all legal standards are properly applied.
- *Audits and Special Accounts:* We ensure compliance through field audits and manage special programs such as Disaster Unemployment Insurance; Interstate, Federal and Military Claims; the Shared Work Program; and Trade Readjustment Allowances.
- *Customer Service Center:* We work to make the program easy to understand by providing fast, responsive applicant and employer unemployment insurance account support.
- *Program Performance and Outreach:* We focus on operational improvement through informational/outreach programming, benefit accuracy measurements, profiling, program budget evaluation, reemployment assistance, and training.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>

Program: Employment and Training Programs Division

mn.gov/deed/job-seekers

AT A GLANCE

- Provides skill development and training programs for Minnesotans including career seekers with barriers to employment or who are unemployed.
- Helps career seekers develop and improve job readiness for in-demand occupations that pay family sustaining wages.
- Partners, collaborates, and engages with employers to find and train workers.
- Provides innovative online resume and job-matching system for employers and career seekers through MinnesotaWorks.net.

PURPOSE & CONTEXT

The Employment and Training (ETP) Division supports Minnesotans seeking new employment through policy guidance, program administration and direct services. ETP supports local and statewide partnerships designed to develop and improve career skills and obtain employment at family sustaining wages. Division activities also support the needs of businesses in recruiting and training their current and future workforces to ensure that no Minnesotan is left on the economic sidelines.

SERVICES PROVIDED

DEED is committed to providing high quality workforce development services, solutions, and expertise for diverse populations through the ETP Division to advance Minnesota's economy. From laid-off workers to at-risk youth, ETP programs are designed to intentionally reach diverse communities across the state to ensure that all Minnesotans have access to DEED's services. Many of these programs include partnerships with Local Workforce Development Boards, nonprofit service providers, educational institutions, businesses and other stakeholders; a full list of services can be found on the DEED website (<https://mn.gov/deed/job-seekers>).

- **Career Force:** The state's unified public workforce system; combining state and federal funding to support the work of the 16 local Workforce Development Boards, the Governor's Workforce Development Board and various non-profit partners into one system. CareerForce seeks to unify an inclusive service delivery system for workforce development in the state of Minnesota that includes services in-person at our almost 50 CareerForce locations (formerly Workforce Centers) and online.
 - **Career seekers** can access job-seeking services, free of charge, to search for career opportunities in any industry, discover diverse apprenticeship programs, create practical search steps for successful career paths, access support programs, tap into services and training resources, respond to and manage career referrals as well as build career dashboards.
 - **Employers** can use CareerForce to promote career opportunities, pathways and apprenticeship programs, access talent programs, access services and training resources, find valuable labor market information, find information relative to recruitment needs, and collaborate in community forums. Employers can also access tools and resources created by DEED's Regional Workforce Strategy Consultants, who provide innovative workforce solutions by aligning resources, facilitating collaboration, and leveraging expertise in targeted industry sectors to drive economic equity and growth.
- **Laid-Off Workers:** Workers who lost their jobs through no fault of their own – that is, neither quit nor were fired – can receive assistance to find a new career. The Dislocated Worker Program, funded jointly by the federal government and the State, assists laid-off workers in returning to work with comparable

wages and benefits. Participants enrolled in the program can access career planning and counseling; job search and placement services; short-term training upon counselor approval; and support services for expenses such as family care and transportation upon counselor approval. The related Trade Adjustment Assistance Program (TAA) assists workers who lose their jobs, hours, or income specifically as a result of increased foreign trade activity. Available benefits may include special extensions to unemployment insurance, assistance with training costs, job search allowances, relocation allowances, and similar costs for finding a new job.

- **Adults:** Adults who face any number of barriers to employment can access services to help them succeed in well-paying careers. The state-funded Career Pathway programs integrate basic skills education, career-specific training, support services, and employment placement and retention to meet the needs of our customers. DEED administers federal and state fund grants along with direct legislative appropriations, such as: Pathways to Prosperity, Southeast Asian Economic relief, Capacity Building, Support Services, Women in High-wage, High-demand, Nontraditional Jobs, and several other adult competitive grant programs focused on meeting the needs of different communities across the state.
- **Veterans:** DEED administers the federally funded Jobs for Veterans State Grant (JVSG) program that provides employment and training services for eligible current and former military members. All DEED employees on the Veterans Employment Services team are veterans themselves. Services include job-readiness assessment, job preparation, and job placement assistance.
- **At-Risk Youth:** The youth and young adults who are eligible for DEED services come from low-income families, have severe barriers to employment, and are under-represented in the workforce.
 - The state funded **Youthbuild** program offers a construction career pathway for at-risk youth and young adults who have dropped out of school or experienced repeated failure in school. It provides youth with industry-recognized credentials and pre-apprenticeship training in residential construction; and contextual basic skills and soft skills in work readiness, career counseling, and leadership skills.
 - The state funded **Minnesota Youth at Work Competitive Grants** provides funding to organizations offering workforce development and training opportunities to economically disadvantaged or at-risk youth, ages 14-24, with special consideration to youth from communities of color and youth with disabilities. Services include connecting classroom skills to work-based settings, exposing youth to work settings that offer direct employer/supervisor feedback, and youth engagement while exploring interests and abilities.
 - The state funded **Minnesota Youth Program (MYP)** provides summer and year-round employment and training services to low-income and at-risk youth, ages 14 to 24, through a partnership with the Local Workforce Development Boards (LWDBs) and Youth Committees. This program reaches every single county in Minnesota. At-risk youth can earn academic credit for their participation; and worksite supervisors evaluate (pre and post) work readiness skill attainment on the worksite.

RESULTS

Type of Measure	Name of Measure	Previous	Current	Dates
Quantity	# of job seekers registered and receiving a reportable service	161,309	154,233	SFY 2016 & SFY 2017
Quantity	# of employers who list their job vacancies on http://www.minnesotaworks.net	93,083	94,684	SFY 2016 & SFY 2017
Quality	Job seeker customer satisfaction using the Net Promoter Score (-100 to 100; a score of 50 is excellent)	43	40	CY 2016 & CY 2017

Type of Measure	Name of Measure	Previous	Current	Dates
Results	Percentage of Dislocated Worker program participants entering employment after exit	85.9%	86.8%	SFY 2016 & SFY 2017
Results	Percentage of Pathways to Prosperity program participants retaining employment for three quarters after exit	N/A*	69%	SFY 2016 & SFY 2017
Results	Percentage of Minnesota Youth Program, Youthbuild and Youth at Work participants who attained work readiness or education goals	86.1%	91.3%	SFY 2016 & SFY 2017
Results	Percentage of Veterans Program participants receiving intensive services who completed all program goals or exited the program into employment	67.0%	77.0%	SFY 2016 & SFY 2017

*The Pathways to Prosperity program folded the former Fast TRAC program into a more comprehensive workforce development and training program in SFY 2016.

Program: Disability Determination Services

mn.gov/deed/programs-services/dds/

AT A GLANCE

- Serves Minnesota residents who file applications for disability benefits and Minnesotans who are reviewed for continuing eligibility.
- Refers disability applications for individuals who may benefit from rehabilitation services to other state agencies.
- Reviewed 50,055 new claims in 2017.
- Program is funded 100% by federal dollars.

PURPOSE & CONTEXT

Disability Determination Services (DDS) evaluates claims for disability benefits using Social Security Administration (SSA) guidelines and Federal Regulations. The Social Security program provides benefits to persons with disabilities who are not able to work. When Social Security added protection for individuals with disabilities in 1954, the Congress wrote into the law that the disability decision for an individual had to be made by a state agency and not by a federal office. Social Security pays Minnesota to run the office and make the disability decisions.

SERVICES PROVIDED

We accomplish our mission by making eligibility decisions regarding disability and blindness applications on behalf of the federal SSA. Our activities include:

- Reviewing disability applications and requesting medical records from claimants' medical sources.
- Corresponding by phone or letter with claimants, family members, legal representatives, and others to obtain additional information necessary for claims.
- Reviewing and analyzing evidence, applying SSA regulations and policy, and writing comprehensive assessments (including medical evidence, vocational factors, educational background, and other collateral information) to reach an eligibility determination.

In addition to providing eligibility determinations for disability payments, we also refer disability applicants who may benefit from rehabilitation services to Vocational Rehabilitation Services, State Services for the Blind, and the Department of Health's section of Children with Special Health Needs.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	# of new determinations reviewed	50,441	50,055	FFY 2016 & FFY 2017

Program: General Support Services

mn.gov/deed

AT A GLANCE

- Provides leadership and infrastructure for the agency.
- Includes the Commissioner's Office and other offices which support DEED's core program work.
- Produces economic analysis and labor market information.
- Serves 404,729 subscribers to DEED's email communications.

PURPOSE & CONTEXT

General Support Services (GSS) directly supports the agency with infrastructure and leadership necessary to operate programs, develop policies, and provide assistance to individuals, businesses, and communities. These divisions provide operational and resource support and provide the technical expertise to ensure our programs are effective and efficient.

SERVICES PROVIDED

General Support Services (GSS) includes the following core functions:

- *Commissioner's Office*: provides executive leadership through appointment by Office of the Governor of Minnesota. In addition to supervising all DEED programs, the Commissioner's Office oversees two quasi-independent agencies:
 - The *Public Facilities Authority* (PFA) is a multi-agency authority that provides municipal financing expertise and infrastructure financing programs to enhance the environmental and economic vitality of the State. The Commissioner of DEED serves as the chair and chief executive officer of the authority while day-to-day operations are managed by an executive director and staff.
 - *Explore Minnesota Tourism* is the state's tourism marketing entity and is an office in the executive branch. The director of that agency reports directly to the Commissioner of DEED.
- *Policy Office*: Oversees legislative policy planning for the agency, evaluates program performance, conducts economic analysis, and represents DEED at the Legislature.
- *Labor Market Information*: Develops and refines data on Minnesota's labor market and communicates that data to customers via funding from the federal Bureau of Labor Statistics and the General Fund.
- *Communications Office*: Publicizes DEED services for customers, partners, and other stakeholders while promoting Minnesota as a place to live, work, and do business.
- *Office of Economic Equity and Opportunity*: Helps workers and businesses of color find career paths and business opportunities in Minnesota by breaking down barriers that contribute to disparities for communities of color throughout the state.
- *Office of Diversity and Equal Opportunity*: Ensures DEED's compliance with federal and state laws concerning discrimination, harassment, reasonable accommodation, site and program access and retaliation, and handles complaints of discrimination for any DEED employee, applicant, contractor, intern or customer.
- *Administrative and Financial Services*: Oversees all financial activities (including budgeting, payroll, procurement, continuity of operations and other functions) as well as managing all DEED facilities.
- *Human Resources*: Manages agency personnel, labor relations, and employee development.

Program: Minnesota Trade Office

mn.gov/deed/business/exporting/

AT A GLANCE

- Works to increase the number of Minnesota companies exporting into foreign markets.
- Helps foreign companies explore the advantages of expanding or relocating in Minnesota and operates trade offices located in Canada, Mexico, EU, UK/Ireland, Japan, ASEAN and Australia/New Zealand.
- Provides technical assistance and financial resources for companies seeking to expand exporting.
- Recruits new and additional foreign direct investment from foreign-owned enterprises.

PURPOSE & CONTEXT

The Minnesota Trade Office (MTO) seeks to increase the number of exports and the amount of foreign direct investment that contribute to the growth of the Minnesota economy.

MTO provides export assistance to Minnesota's manufacturers and service providers. Programs and services focus primarily on assisting small and medium-sized companies. We also have offices and staff in key foreign markets to help overseas companies explore business startup, expansion and relocation opportunities in Minnesota.

SERVICES PROVIDED

The Minnesota Trade Office (MTO) provides:

- *Export counseling and assistance:* Our International Trade Representatives guide Minnesota companies through the challenges of conducting international business. Services include exporting guidance, market research, reviewing regulatory requirements, providing advice on international logistics, and evaluating market entry strategies.
- *Export financing programs:* We provide grants and guide companies on obtaining private financial assistance like loans, working capital, credit, and insurance to help new and current exporters. For instance, the STEP Grant Program provides financial and technical assistance to Minnesota small businesses with an active interest in exporting products or services to foreign markets. Small businesses may also apply for reimbursements of between \$500 and \$5,000 for export-training and export-development related activities.
- *Foreign direct investment assistance:* We work with foreign companies exploring the advantages of expanding or relocating in Minnesota. To facilitate this work, we operate trade offices in Canada, Mexico, EU, UK/Ireland, Japan, the ASEAN region (Indonesia, Thailand, Vietnam, Singapore, Malaysia, Philippines, Myanmar, Cambodia, Laos, and Brunei) and Australia/New Zealand.
- *Protocol Office for the State:* We provide leadership and expertise on international relations and international affairs for the State of Minnesota. We ensure the state's interactions with foreign delegations and dignitaries are conducted with appropriate diplomatic etiquette and cultural practices. We are also the state's liaison to the local diplomatic community – the Minnesota Consular Corp.

We sponsor and coordinate trade missions to foreign countries with delegations of business, education, and government officials, to showcase Minnesota as a superior place to do business, raise the profile of Minnesota companies, and provide important networking opportunities to the delegates.

We also organize reverse missions from foreign countries with delegation of business, education, and government officials to showcase the state and create business opportunities for Minnesota companies.

Program: Vocational Rehabilitation Services

mn.gov/deed/job-seekers/disabilities/

AT A GLANCE

- Provides employment-related services to approximately 20,000 Minnesotans with disabilities each year who seek competitive, integrated employment.
- Provides career counseling, information and referral services regarding competitive, integrated employment to individuals with disabilities who currently earn less than minimum wage.
- Provides pre-employment transition services to high school students with disabilities.
- Assists Minnesotans with disabilities to live independently and secure their basic rights in areas such as housing, transportation, education and employment.

PURPOSE & CONTEXT

Our purpose is to assist Minnesotans with disabilities to find and keep jobs and live independently in their communities. Vocational Rehabilitation Services helps remedy the disparity between the percentage of working-age Minnesotans with disabilities who have jobs - 48.0 percent - and those with no disability - 83.8 percent (2016)¹.

The programs in Vocational Rehabilitation Services serve:

- Minnesotans with disabilities who face significant barriers to achieving competitive, integrated employment and independence in their communities.
- Students and young adults with significant disabilities who are making the transition from school to work.
- Employers who seek qualified candidates for job openings

SERVICES PROVIDED

We accomplish our mission via three distinct programs; Vocational Rehabilitation Services, Independent Living programs and the Extended Employment program. Vocational Rehabilitation Services and Independent Living programs are operated and funded as federal/state partnerships. The Extended Employment program is funded solely by the state.

- *Vocational Rehabilitation Services (VRS):* We assist people with disabilities to find jobs through employment services such as job counseling, job search assistance, training, and job placement services.
- *Extended Employment:* We work with people with disabilities to keep their jobs and advance in their careers by providing long-term employment support services. Those services typically include assistance in training or retraining job tasks, scheduling changes, adjusting to new supervisors, advancement to new job tasks or positions, and managing changes in non-work environments or life activities that affect work performance.
- *Independent Living:* We provide resources to Minnesotans with disabilities to live and function independently at home, at work, in their communities, and/or relocate out of nursing homes, by collaborating with the state's eight regional centers for independent living to provide services and training.

Our staff provide individualized assessments, evaluations, counseling, training, assistive technologies, job placement, and retention services. Through coordinated partnerships, we work closely with nonprofit community

¹ Data Source: Employment Status by Disability Status and Type, American Community Survey 2016.

rehabilitation providers, county service agencies, regional centers for independent living, secondary and post-secondary educational institutions, businesses, and other public and private organizations.

Program: State Services for the Blind

mn.gov/deed/job-seekers/blind-visual-impaired/

AT A GLANCE

- The State Services for the Blind (SSB) Workforce Development Unit supports blind, visually impaired, and DeafBlind Minnesotans in becoming independent, self-sufficient, and employed by providing career counseling, career-driven training, technology, and employment services.
- The SSB Communication Center Unit provides Minnesotans with braille, audio, large print, and e-text to learn and excel in school, get jobs, increase job skills, and be vital neighbors and community members.
- The SSB Senior Services Unit provides direct services and uses local partnerships across Minnesota to enable seniors to continue living independently in their homes and actively engaging in their communities.

PURPOSE & CONTEXT

The achievement-focused programs of State Services for the Blind (SSB) assist customers with the tools they need to succeed in work, school, and life. Designed to address needs not met by other programs, SSB builds value by investing in young adults, leveling the employment playing field, keeping seniors engaged, safe, and at home, and by transforming print into accessible media.

SERVICES PROVIDED

Workforce Development:

State Services for the Blind receives 78.7 percent of its funding through a grant from the U.S. Department of Education. For Federal fiscal year 2017, the total amount of grant funds awarded were \$9,005,850. The remaining 21.3 percent of the costs \$2,502,083 were funded by a state appropriation to SSB.

Vocational Rehabilitation: A Workforce Innovation and Opportunity Act Core Partner

We assist students in preparing for life after high school by ensuring they have the skills, training, and technology necessary to be a part of a highly skilled, highly trained workforce. We help individuals choose careers that align with today's economic trends and provide them with the necessary training and technology so they have a competitive edge in the labor market.

We help individuals avoid or leave sheltered workshops that pay subminimum wage and instead assist them in finding high quality, good paying jobs in the community. We partner with businesses by assisting them with recruitment, employee retention, disability training, and job accommodations.

Business Enterprises: Providing Entrepreneurial Opportunities

We provide vending business job opportunities for blind, visually impaired, and DeafBlind entrepreneurs within state and federal buildings at 160 locations, 29 entrepreneurs in this program generate \$6.4 million in annual sales, pay \$420,000 in state sales taxes, pay over \$643,000 in employee wages, and pay \$250,000 in funds to support the program.

Senior Services: Many of the people we work with have age-related macular degeneration, diabetic retinopathy, glaucoma, or other vision-related conditions that are often a part of aging. Our goal is to help customers meet the challenges of vision loss based on their own particular needs and circumstances. Services range from teaching simple techniques for managing household activities to comprehensive training that can include learning to use a white cane, how to continue to use technology, and more complex personal independence skills.

The Senior Services Aging Eyes Initiative is an additional program within senior services that leverages community partnerships throughout Minnesota to reach additional seniors in need.

Communication Center: We keep Minnesotans reading so that all can learn and excel in school, get jobs, increase job skills, and be vital neighbors and members of our communities. We provide equal access to information (newspapers, books, magazines, community, religious, and family materials) through braille, audio books, podcasts, large print, and e-text. We partner with the Minnesota Braille and Talking Book Library and are part of the National Library Service program. We provide braille school materials for Minnesota's K-12 children and we produce braille and audio textbooks for Minnesota's higher educational students. Our radio reading service, the Radio Talking Book, broadcasts new books, magazines, and daily newspapers. Dial-In News and NFB-NEWSLINE present audio newspapers and magazines from around the world, as well as job postings. We also produce life-skill podcasts for youth in partnership with Blind Abilities. Government agencies, businesses, and schools rely on us and our 615 volunteers for their braille, audio, large print, and e-text needs.

Program: Broadband Developmentmn.gov/deed/programs-services/broadband/**AT A GLANCE**

- Works to ensure that the state's Internet service is among the nation's best and can keep pace with the growing demands of businesses and individual Minnesotans.
- Coordinates public, private, and philanthropic efforts to increase availability, speed, and use of broadband.
- Administers the state competitive grant fund for broadband infrastructure.
- Conducts research, data collection, and mapping to inform policy and improve access to underserved and unserved communities.

PURPOSE & CONTEXT

The Office of Broadband Development (OBD), created in 2013, is charged with improving broadband access and use. OBD is housed in the Business and Community Development Division. Our purpose is to drive job creation, promote innovation and expand markets for Minnesota businesses by increasing the deployment and use of broadband technologies. We also encourage investment in broadband infrastructure to achieve equal access to opportunities in economic development, education, healthcare, public safety and social well-being throughout the state. Our work ensures that unserved and underserved communities gain access to the broadband infrastructure they need to remain economically competitive and to have digitally literate Minnesotans.

SERVICES PROVIDED

The Office of Broadband Development (OBD) accomplishes its mission through the following activities:

- *Community Planning:* We work with communities, broadband providers, and local units of government to provide technical assistance and consultation services for broadband development and related planning. We also work to ensure these stakeholders are aware of both federal and state policies and programs, including financial resources.
- *Broadband Infrastructure:* We manage the competitive Border-to-Border Broadband Development Grant program to build broadband infrastructure in areas of the state where conventional business models have been unable to meet connectivity needs. Applicants are typically one partner among several in a community initiative, such as an existing broadband provider, a cooperative, township, city, or tribe.
- *Research and Data Collection:* Through the coordination of data collection, mapping, and analysis, we measure progress toward state broadband goals.
- *Adoption and Use:* We study and work to improve low broadband adoption and use rates among identified population groups.
- *Collaboration and Engagement:* We provide support and input to the Governor's Task Force on Broadband to develop, implement and promote state broadband policy, planning and initiatives to achieve State broadband needs and goals.

Narrative

DEED receives funding from a variety of federal agencies including the Departments of Labor, Education, Health and Human Services, Housing and Urban Development, Social Security Administration, Environmental Protection Agency, and Small Business Administration. Federal funds represent a significant portion of DEED's budget, consisting of over 47% of expenditures in SFY17 and 49% of expenditures in SFY18.

For planning purposes, it is assumed that federal award amounts for ongoing programs will remain fairly constant over the biennium. FTE counts are based on the estimated time charged against federal programs for SFY19.

While the Workforce Innovation and Opportunity Act took effect on July 1, 2015, the first full program year after enactment. WIOA created streamlined workforce development system eliminating several programs but maintaining the 15 percent funding reservation at the state level to allow states the flexibility to address specific needs. Initially resources to the Local Areas were reduced by approximately 5% and remained level, due to the national allocation methodology during the subsequent federal award years of 2016 and 2017. However, with the 2018 federal funding Minnesota will experience a 15% increase in the WIOA funding from last federal year 2017 and approximately what would be an 8% overall above the federal award received for federal year of 2015.

The Small Business Development Center program requires a 1 to 1 match which is shared between the state and the grantees. The Small Cities Community Development Block Grant program requires a 1 to 1 match for administrative funds, after the first \$100,000 is paid. The Brownfields program requires a 22% match, which is provided by the loan recipients. The Minnesota Trade Office STEP program requires a .333% match.

The Basic Supported Employment program requires a 10% match; Basic Employment requires 21.3% match; Independent Living programs require a 10% match; Older Blind Support requires \$1 for every \$9 of Federal grant funding received. The MOE level on Basic Employment is based on the amount of the State's non-Federal expenditures under the program for the Federal fiscal year two years earlier.

Explore Minnesota Tourism

<i>Agency Profile</i>	1
Agency Expenditure Overview (REVISED)	5
Agency Financing by Fund (REVISED)	6
Agency Change Summary (REVISED)	7

AT A GLANCE

Explore Minnesota is the state's official tourism promotion agency. Through advertising, marketing, education and other programs, we support the thousands of businesses and organizations that make up Minnesota's tourism industry. The tourism industry in Minnesota generates:

- **Sales:** \$15.0 billion in gross sales in 2016.
- **Jobs:** More than 265,000 full- and part-time jobs in 2016, or 11% of total private sector employment.¹
- **Wages:** \$5.4 billion in wages.¹
- **Revenue:** \$969 million in state sales tax revenue in 2016, or 18% of state sales tax revenues.
- **Return on Investment:** Every \$1 in state tourism advertising results in \$9 in state and local taxes and \$92 in spending by travelers.²

PURPOSE

The mission of Explore Minnesota Tourism is to inspire consumers and facilitate their travel to and within Minnesota. We do this by marketing Minnesota tourism, including destinations, lodging, museums, attractions, restaurants, events and outdoor recreation, to consumers. Through consumer advertising, public relations, publications, websites, social media, international marketing and other efforts, we reach millions of potential travelers each year.

Our work to promote tourism in Minnesota contributes to **a thriving economy that encourages business growth and employment opportunities.**

BUDGET

Explore Minnesota's Operating Expenses include advertising, marketing, public relations and other tourism promotion efforts

Source: Budget Planning & Analysis System (BPAS)

Historical Spending is inclusive of pass-through appropriations

Source: Consolidated Fund Statement

Explore Minnesota Tourism has a total biennial budget in FY18-19 of \$28.4 million in general fund appropriations, and \$2 million in revenue through advertising sales and marketing programs. We also partner with public and private organizations to maximize resources and reach more consumers.

STRATEGIES

Explore Minnesota Tourism:

- Drives economic vitality by influencing visitation from new and existing domestic and global markets, and takes an entrepreneurial approach to invest in public/private partnerships.
- Creates innovative advertising and promotions that market Minnesota as a travel destination, reaching new audiences through highly-targeted marketing tactics.
- Increases consumer reach and engagement through creation of unique content and innovative campaigns for digital, social media and public relations platforms and channels.
- Provides personalized customer service through diverse touchpoints and mediums, continually improving traveler experiences and satisfaction.

RESULTS

Minnesota's leisure and hospitality industry is a major provider of tourism services. The increase of gross sales in this sector illustrates the effect of successfully advertising to inspire travel to and throughout Minnesota.

Minnesota’s leisure and hospitality industry is crucial to the state’s vitality, accounting for 18% of total state sales tax revenue. This chart represents substantial 39% growth since 2008 compared with 23% growth over the same period for all other industries.

Minnesota’s 265,000 leisure and hospitality jobs accounted for 11% of the state’s total private sector employment in 2016. The increase to 265,000 jobs in 2016 brought leisure and hospitality employment well above the pre-recession high for the industry.

Explore Minnesota Tourism’s spring/summer advertising campaigns generate millions of Minnesota trips that would not otherwise take place. The impact of Explore Minnesota’s last major budget increase in FY 2014 correlates with the 63% increase in incremental trips in 2014.

Incremental traveler spending also increased in tandem with Explore Minnesota Tourism’s budget increase in 2014, with well over \$300 million in incremental spending due to spring/summer advertising every year since.

MS 116U.30 (<https://www.revisor.mn.gov/statutes/?id=116U>) provides the legal authority for Explore Minnesota Tourism.

Gambling Control Board

Agency Profile 1

Agency Expenditure Overview 3

Agency Financing by Fund 4

Agency Change Summary 5

AT A GLANCE

- Minnesota ranks #1 in the U.S. for charitable gambling
- Lawful gambling gross receipts = \$2 billion for FY 2018
- Licensed organizations deposited over \$81 million to support their missions in FY 18
- Minnesota collected \$74 million in charitable gambling taxes in FY 18
- 6,335 new games tested and approved in FY 2018
- 1,150 licensed charitable organizations (conduct gambling year round) operating at 2,800 sites
- Issued 4,000 tax-exempt permits (small raffle permits) generating \$52 million in tax-exempt receipts for FY 2018
- Conducted 944 site inspections and 483 compliance reviews
- For every dollar wagered on charitable gambling in Minnesota 2/10th of one cent (\$.002) goes to fund the board for lawful gambling regulation

PURPOSE

The Gambling Control Board regulates the lawful (charitable) gambling industry to ensure the integrity of operations and provide for the lawful use of net profits. Lawful gambling in Minnesota includes bingo, raffles, pull-tabs, tipboards, and paddlewheels. Required accountability and reporting by registered nonprofit organizations ensures proceeds are used for appropriate charitable needs to provide:

- Support for Minnesota veterans and their families
- Reduced costs for youth activities
- Fire and safety equipment for local communities
- Educational and training opportunities for religious and community programs
- Support for local units of government and community projects
- Support for wildlife and natural resources programs
- Support for fraternal groups (Eagles, Moose, Elks, Knights of Columbus)
- Support for clubs including Lions, Jaycees, rod and gun, sports and snowmobile

BUDGET

**Spending by Category
FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

The Gambling Control Board is entirely funded by the industry regulated. All fees collected go into the dedicated lawful gambling regulatory account. License fees are collected from manufacturers, distributors, distributor salespersons, and linked bingo providers. Manufacturers also pay for game approval and testing. Nonprofit organizations conducting gambling pay license and permit fees along with a regulatory fee based on gross sales. In FY 2018 a total of \$4,319,828 was collected by the state.

STRATEGIES

The board consists of seven citizens and 32 full-time equivalent staff. Regulation, education and guidance are provided to the lawful gambling industry through:

- Monthly board meetings to consider games and licenses and to approve special use of gambling funds
- Issuing licenses and permits for nonprofit organizations, distributors, manufacturers and linked bingo providers
- Compliance reviews and audits of nonprofit organizations' gambling activities
- Analyzing expenditures and charitable donations reported monthly by licensed organizations
- An individualized mentoring program for nonprofit organizations to ensure compliance with statute
- Investigations for theft and fraud by inspecting gambling products and sites, investigating irregularities found during compliance reviews and responding to allegations made by players
- Sanctions or fines on licensees that are out of compliance with law and rules
- Monthly gambling manager seminars, continuing education classes, and presentations at state-level conventions
- Publication of Lawful Gambling Manual, quarterly industry newsletter, and other materials
- A comprehensive website including all required forms, records, and reports

AT A GLANCE

- Serve more than 5.5 million Minnesota residents
- Deliver services with a balanced state budget of more than \$69 billion every two years
- Respond to more than 100,000 citizen calls and contacts in 2017
- Appoint department heads, members of boards and commissions and judges
- Appoint 1,300 citizens to approximately 140 boards and commissions

PURPOSE

The Office of the Governor represents all Minnesotans. The office focuses on advancing the Governor's commitment to building a better Minnesota and increasing diversity and equity across the State. Goals include creating jobs and improving Minnesota's economic competitiveness, delivering better government services, and creating a state budget and tax system that are fair, balanced, and contribute to Minnesota's competitiveness. The office supports these statewide outcomes:

- A thriving economy that encourages business growth and employment opportunities
- All Minnesotans have equal opportunities
- Minnesotans have the education and skills needed to achieve their goals
- All Minnesotans have optimal health
- Strong and stable families and communities
- People in Minnesota are safe

BUDGET

**Spending by Category
FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

The office is funded through a general fund appropriation and receipts in the special revenue fund from agency contributions. The majority of our budget is focused on personnel and associated costs. Our operating expenses include general overhead such as rent, centralized IT services, and supplies, as well as dues to the National Governor's Association, Lieutenant Governor's Association and Midwestern Governor's Association.

STRATEGIES

The Office is organized to advance the goals and priorities of the Governor and Lt. Governor and to administer the duties of the chief executive. Major duties of the governor include:

- Appoint state department heads, members of state boards and commissions, and judges to the state's ten judicial districts, the Court of Appeals, and the Supreme Court when vacancies occur. The governor appoints 1,300 citizens to approximately 140 state boards and commissions;
- Chair the State Executive Council, the State Board of Investment, the Land Exchange Board, and the Board of Pardons;
- Serve as Commander-in-Chief of the Minnesota National Guard, and oversee emergency responses;
- Issue extradition papers, proclamations, and writs of special elections;
- Inform the legislature of the state's general condition; review, veto, or sign into law legislation and rules; call special sessions of the legislature when needed; and consult with 201 state legislators during annual legislative sessions; and
- Perform all other duties as specified by the laws of the state.

The lieutenant governor's chief duty is to assist the governor in carrying out the functions of the executive branch and is prepared to act in the governor's place in the event of the governor's absence or disability. The lieutenant governor's official duties also include:

- Chairing the Capitol Area Architectural Planning Board (CAAPB); and
 - Serving as a member of the State Executive Council.
-

mn.gov/guardian-ad-litem/

AT A GLANCE

- 17,206 children served by the program in FY17
- 8085 active cases on July 1, 2017
- Two year budget of \$32,960,000
- 255 total employee/213.17 FTE's and 263 volunteers

PURPOSE

The State Guardian ad Litem Board (GALB) administers the Minnesota Guardian ad Litem Program which exists so that all children with a court-appointed Guardian ad Litem have their primary needs met and that each judicial officer is equipped to make informed decisions for each child within the confines of available resources. The GALB contributes to the statewide outcome of strong and stable families and communities by giving abused and neglected children a strong and consistent voice in which to be heard throughout child protection and family court proceedings.

- Children are safe
- Permanency planning begins on Day 1
- Children spend the least amount of time under court jurisdiction
- Children receive appropriate services including trauma informed care
- Parents participate in services that reflect the best interests of children
- Physical and mental health, educational and cultural needs of children are met
- Children are reunited with parents if it is in the best interests of the child
- Children do not re-enter the child protection system

BUDGET

**Spending by Category
FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

In 2010, the Legislature created the State Guardian ad Litem Board to move and transition the Guardian ad Litem Program out of the state court system and establish an independent guardian ad litem program. Historical spending begins in FY11. The State Guardian ad Litem Board has a total biennial budget of \$32,906,000 with

payroll consisting of 83% and operating expenses 17%. The budget is funded primarily by general fund appropriations.

STRATEGIES

In order to achieve the mission, the following strategies are utilized:

- The Board complies with mandated appointments for every child alleged to be abused or neglected.
- The Board accommodates as resources permit the unmet and critical need to assist the court with custody and parenting time cases.
- The guardian ad litem provides information to the court through investigation, report writing and testimony about the child's current situation and what has happened to the child.
- The guardian ad litem makes recommendations to the court about what the child needs to be safe, what permanent plans are in the best interest of the child and how the child's well-being should be addressed.
- The guardian ad litem advocates for the child so the child obtains a safe, nurturing and permanent home as quickly as possible.
- The Board and program staff utilize the case management system to measure outcomes for children and program performance.
- Program staff work as part of the Children's Justice Initiative Team in each of the judicial districts.

Maintain FTEs	3.1	7.2	7.2	7.2

Recommendation:

The Governor recommends funding for this request from the Guardian ad Litem Board.

The Guardian ad Litem Board seeks \$1,718,000 in the FY2020-2021 biennium to increase compensation for employees by 3.5% each year of the biennium and to fund unavoidable health insurance premium increases. The request represents a 5.12% increase in the Guardian ad Litem Boards biennial base budget. The request maintains the current complement of employees.

Rationale/Background:

The Guardian ad Litem Board needs to attract and retain skilled and knowledgeable employees who can ensure competent and effective advocacy will be provided for the children that we serve. The Guardian ad Litem Board is currently facing significant workforce challenges in accomplishing that goal.

The Guardian ad Litem Board is facing a significant retirement wave in the near future. Nearly 37% of current staff will be 65 years old or older in the next 10 years. The Guardian ad Litem Board will be losing a highly skilled workforce with an incredible knowledge base and we will need to increase the compensation structure to be competitive in today's market.

To ensure the salary structure supports a competent workforce, the Guardian ad Litem Board must strive to keep pace with county and public-sector market competitors. Retaining a skilled and knowledgeable workforce is important to ensure competent advocacy. Exit interviews report that staff are leaving our agency for better paying positions often in county or nonprofit agencies. Minimizing employee turnover will add consistency and reliability for the children we serve. When an employee resigns, all of the children on their case load must be reassigned to a new Guardian ad Litem and often times the transition can be difficult for those children.

The Guardian ad Litem Board is also requesting funding for unavoidable health insurance increases. Health insurance premiums are estimated to increase by 5.63% in 2020 and 5.62% in 2021. The Guardian ad Litem Board does not negotiate its own insurance agreements – it participates in the general plan negotiated by Minnesota Management and Budget. The Guardian ad Litem Board does not have the funds available to absorb this increase.

Proposal:

This change level request is not a new initiative. The Guardian ad Litem Boards FY2020-2021 biennial budget request seeks funding to increase employee salaries, which will help to ensure that the Guardian ad Litem Board is

able to retain a solid workforce. It will also allow the Guardian ad Litem Board to be in a position to respond to the upcoming retirement wave by improving the competitiveness of the current salary structure.

In addition, the request for funding unavoidable health insurance increases will minimize the impact of rising insurance costs for Guardian ad Litem employees on the program.

Equity and Inclusion:

- The change level request assists in ensuring a competent, and diverse workforce.
- It is imperative salaries remain competitive to ensure that the Guardian ad Litem Board can recruit and retain employees from minority, ethnic and racial groups.

Results:

This request is sought to support the Guardian ad Litem Board's core mission of providing effective advocacy for the children that we serve.

The children that our staff serve are the most vulnerable population served by the state. Guardians ad Litem are assigned when a finding has been made by the Court that a child has been abused or neglected. Guardians ad Litem work every day to ensure that these children have their primary needs met and that the Court has the information necessary to rule confidently. It is critically important to the Guardian ad Litem Board to be able to retain and attract a competent workforce.

Guardian ad Litem Board (GALB)

FY 2020-21 Biennial Budget Change Item

Change Item Title: Compliance with Federal and State Mandates

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	4,205	4,443	4,443	4,443
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	4,205	4,443	4,443	4,443
Maintain FTEs	46	46	46	46

Recommendation:

The Governor recommends funding for this request from the Guardian ad Litem Board.

The Guardian ad Litem seeks funding to hire 46 staff positions to ensure compliance with federal and state mandates.

The Guardian ad Litem Board seeks \$4.205 million in FY20 and \$4.443 million in FY21 and ongoing to ensure staffing levels can meet the state and federal requirement of a Guardian ad Litem assigned to all mandatory cases. In addition, the request will allow for equalization of caseload sizes, appropriate supervision levels of staff and cases and the assignment of mandatory family court cases. The Guardian ad Litem Board currently has 255 employees and 263 volunteers. The request represents a 25.76% increase in the Guardian ad Litem biennial starting base budget.

Rationale/Background:

The Guardian ad Litem Board's compliance with federal and state mandate request is a direct response to the Office of the Legislative Auditor report in 2018 that recommended the Guardian ad Litem Board develop a plan for complying with laws regarding Guardian ad Litem appointments and determine the level of funding needed by the program.

Per federal and state statutes, a judge must appoint a guardian ad litem on every juvenile court case alleging that a child has been abused or neglected; M.S. 260C.163. Minnesota state statute mandates the appointment of a guardian ad litem on a family case alleging a child is abused or neglected; M.S. 518.165. A guardian ad litem performs duties outlined in statute and court rule in their role of advocating for the best interests of children.

Child protection case filings have increased 55 percent from FY13-FY17. This rise has directly impacted the program resources and ability to comply with court ordered appointments. This increase has caused the guardian ad litem program to have to deny a court order to appoint a guardian ad litem on mandatory cases due to lack of resources available to appoint, and place cases on a waiting list. Additionally, some guardians ad litem have increased their caseload size beyond acceptable limits and are not able to perform statutorily mandated duties. Acceptable case sizes are needed to ensure adequate child contacts, thorough investigations and timely reports.

The Guardian ad Litem Boards operating expenses are 17% of the total base budget. Efforts to minimize operating expenditures to ensure compliance with the mandates have included; closing offices, streamlining services, and combining district management.

The impact of not funding this request is that vulnerable children will continue to not receive a mandated guardian ad litem to advocate for their best interests in certain cases. The appointment of a guardian ad litem provides abused and neglected children with a strong voice in the court system and generates better outcomes for children.

Proposal:

The change request is to add staff to our existing program.

- The proposed request will fund all costs associated with establishing 31 new guardian ad litem positions throughout the state. This will ensure assignment of all mandated cases and the result will be that no cases/children will be put on a waiting list. Additionally, the program will be able to lower current case load sizes so all mandated duties are performed for every child.
- The additional 15 positions will be established to provide appropriate supervision levels for supervisory staff as well as staff positions to ensure additional performance monitoring as a response to the legislative audit recommendations.
- Funds are requested for July 1, 2019 with recruitment to begin immediately.

Equity and Inclusion:

- Funding for the additional positions could significantly increase the number of children of color who are promptly assigned a guardian ad litem and allow the program to expand its diversity recruitment.
- Employee guardians ad litem must receive 15 continuing education credits each year and volunteers must receive 12 continuing education credits. The guardian ad litem board mandated that of the required credits 3 must be related to cultural awareness topics so guardians can best serve the needs of diverse clients. Additionally, the revised guardian ad litem report has a specific section on the cultural needs of the child. More training and tools are continually being developed and implemented to provide guardian's ad litem additional guidance regarding what should be addressed in that section of the reports so the judge may factor those recommendations in court orders.
- Recruitment and selection of the new positions will reflect the diverse nature of the children served by the program.

Results:

- Filings have increased drastically over the past six years resulting in lower percentages of guardians ad litem assigned within 3 days of petition filing and less than 100% compliance with state and federal mandates. The Guardian ad Litem Board is currently 92% in compliance with the federal and state mandates. This number is likely lower as many Judicial Officers have reported not requesting the assignment of a guardian ad item on mandatory family files due to the known limited ability to assign on family cases due to the lack of resources.

<i>Type of Measure</i>	<i>Appointment of a Guardian ad Litem</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Cases Assigned Per Fiscal Year	6,486	7,738	FY 14-18
Quality	Percentage of GAL assigned < 3 days of petition filing	83.4%	39.05%	FY14-18
Results	Compliance with federal and state mandates	99.99%	92%	FY14-18

*Data provided by Guardian ad Litem Case Management System

<i>Type of Measure</i>	<i>Reunification of Child with Parents</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quality	Percentage of Children reunified within 12 months	83.9%	47.5%	FY15-17

*Minnesota Department of Human Services Dashboard at Tableau Public

<i>Type of Measure</i>	<i>Time to Permanency</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Length of Time to Permanency at 18 mos.	4,617	2,528	FY16-18
Results	Length of Time to Permanency at 18 Mos.	87%	81%	FY16-18

*Minnesota Judicial Analytical Database Report

The number of children with a CHIPS or Permanency case filed in the past five fiscal years has increased 52%. The results for FY18 are likely impacted by the increasing number of children who have had CHIPS or Permanency cases filed in the past five years.

Guardian ad Litem Board (GALB)

FY 2020-21 Biennial Budget Change Item

Change Item Title: Board Development and Training

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	135	135	135	135
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	135	135	135	135
Maintain FTEs	0	0	0	0

Recommendation:

The Governor recommends funding for this request from the Guardian ad Litem Board.

The Guardian ad Litem Board seeks \$135,000 per year in the FY2020-2021 biennium to permanently fund GAL Board development and training, employee development and learning management system. The request represents a .8% increase in the Guardian ad Litem Board biennial base budget.

Rationale/Background:

The Guardian ad Litem Board development and training change request is a direct response to the Office of the Legislative Auditor's report, completed in 2018, which recommended that the Guardian ad Litem Board should provide greater financial oversight to the program, review the Program Administrator's performance, establish measurable goals, and monitor performance of those goals.

In response to the recommendations provided by the Office of the Legislative Auditor, the Guardian ad Litem Board has been engaged in a board policy and governance realignment process and has implemented Policy Governance. Policy Governance integrates a number of unique principles designed to enable accountable board leadership. The board policies have been revised to ensure enhanced accountability, transparency and oversight of the program. The Guardian ad Litem Board has created a detailed monitoring calendar to ensure data is provided on a consistent basis to monitor organizational performance. The board also recognizes that to ensure continuity of the changes the board would need to invest in its governance capacity. The board is requesting funding for board training and development, an auditing budget for monitoring organizational performance and an information gathering budget for surveys, focus groups and analyses.

The Office of the Legislative Auditor's report specifically noted the Guardian ad Litem Board should ensure all Guardians ad Litem comply with the board's training policies. In response to this recommendation the Guardian ad Litem Board has purchased and implemented a learning management system which allows for the centralized tracking of continuing education requirements for all staff and volunteers. As a result of updated program standards and policies, there is an increased demand for training and employee development and the learning management system will allow for online training modules to assist in meeting this need. The learning management system will provide for a more efficient utilization of resources and ensure compliance with training requirements and timelines.

If the funding is not provided, the Guardian ad Litem Board will not be able to fully implement necessary changes to address the recommendations provided by the Office of the Legislative Auditor.

Proposal:

This is a new initiative.

Board Development:

1. Training: \$5,000 annually for training to include Policy Governance
2. Auditing: \$20,000 annually for auditing and third party monitoring of organizational performance
3. Informational/Data collection - \$10,000 annually for surveys, focus groups and analyses

Training:

1. Education: \$85,000 annually for employee education and development
2. Learning Management System: \$15,000 annually for maintenance costs for the learning management system

The Guardian ad Litem Board has been engaged in the realignment process since March 2018, and has been improving the board's effectiveness and is prepared to implement the board development and educational changes upon receipt of funds.

Equity and Inclusion:

- All Minnesotans that are served by our program are impacted by the proposed change item as the change items will allow for additional monitoring, performance accountability and transparency.
- The learning management system will allow for increased access for staff to complete online learning modules in the area of diversity, inclusion and implicit bias.
- Employee guardians ad litem must receive 15 continuing education credits each year and volunteers must receive 12 continuing education credits. The Guardian ad Litem Board mandated that of the required credits three must be related to cultural awareness topics so guardians can best serve the needs of diverse clients. Additionally, the revised guardian ad litem report has a specific section on the cultural needs of the child. More training and tools are continually being developed and implemented to provide guardians ad litem additional guidance regarding what should be addressed in that section of the reports so the judge may factor those recommendations in court orders.

Results:

The Guardian ad Litem Board has established a monitoring calendar in which the board's policies and performance measures will be tracked and data regarding compliance with the policies will be provided for review and interpretation by the board. The learning management system will track compliance with education and training requirements.

Guardian ad Litem Board (GALB)

FY 2020-21 Biennial Budget Change Item

Change Item Title: Technology Upgrades and Enhancements

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	200	50	50	50
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	200	50	50	50
Maintain FTEs	0	0	0	0

Recommendation:

The Governor recommends funding for this request from the Guardian ad Litem Board.

The Guardian ad Litem Board seeks \$200,000 in FY2020 and \$50,000 in FY2021 and ongoing to fund technology upgrades and enhancements to our current case management system. The Guardian ad Litem Board seeks funds to purchase tablets or similar devices for all Guardian ad Litem staff. The request represents a .74% increase in the Guardian ad Litem Board biennial base budget.

Rationale/Background:

The Guardian ad Litem Board technology change request is a direct response to the Office of the Legislative Auditor report in 2018 that recommended the Guardian ad Litem Board establish measurable goals and monitor the performance of those goals. The report specifically noted that Guardian ad Litem managers should evaluate the collection of evidence in Guardian ad Litem investigations and provide greater oversight of court reports, including the timeliness of court reports.

The Guardian ad Litem Board recognizes that to comply with the recommendations regarding the gathering of evidence, the program must deploy field-friendly devices that will allow GAL to document their work within the Case Management System while in the field. Guardian's ad litem gather much of their statutorily required information directly from interviews in the field. This work includes meetings with parents and children and observations of children. Tablets or small notebook devices will allow Guardians ad Litem to document information through a variety of methods, including handwriting, but ensure that such documentation is retained and stored either directly within the case management system or other secure server locations accessed by the case management system. The devices will thus help to eliminate redundant data entry and time spent searching paper documents for relevant information. The devices and integration will also enhance document security, confidentiality and accountability. Supervisory staff will have real time insight and access into the Guardian ad Litem investigation and evidence, enabling them to provide guidance or direction to staff prior to the completion of court reports.

If the funding is not provided, the Guardian ad Litem Board will not be able to fully implement necessary changes to address the recommendations provided by the Office of the Legislative Auditor.

Proposal:

The Guardian ad Litem Board transitioned from the utilization of an Access database to our current web-based case management system in 2015. The case management system is in need of additional development to allow for providing the reporting features and data collection to establish an improved data monitoring structure.

1. System Enhancements
 - a. The enhancement queue currently has over 30 items, most of which are enhancements to allow for increased productivity and accountability for the program.
2. Dashboard Research and Visualizations
 - a. The addition of a comprehensive dashboard with real-time visualizations of data to ensure that performance against key metrics are always visible to staff and available to ensure accountability and enhance performance. This would build on the programs efforts to dashboard child contracts, court hearings and other performance measurements.
3. Tablets or similar device
 - a. Provide for a tool to assist in prompt entry of case information and assist in ensuring that non-public data remains secure.
4. Training
 - a. Technical training for supervisory staff on utilization of data and enhancements to ensure quality and integrity of data.

Equity and Inclusion:

- All Minnesotans that are served by our program are impacted by the proposed change item as data security and document/data loss have a direct impact on our customers.
- All Minnesotans are impacted as the public's trust and confidence in our program is essential and of utmost importance to the Guardian ad Litem Board. The proposed change items will allow for additional monitoring, performance accountability and transparency.

Category	FY 2020	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025
Payroll						
Professional/Technical Contracts						
Infrastructure						
Hardware	\$200,000	\$50,000	\$50,000	\$50,000	\$50,000	\$50,000
Software						
Training						
Enterprise Services						
Staff costs (MNIT or agency)						
Total						
MNIT FTEs						
Agency FTEs						

Results:

The Guardian ad Litem Board continues to develop specific performance measures and monitoring reports on data security and the treatment of children served. The enhancements will allow for monitoring the program performance measures.

In addition to the measurements above, the data collection due to the case management system enhancements will be leveraged and provided to the public in an annual report. The report will provide data on the treatment of children served and the program's ability to meet key program metrics.

AT A GLANCE

The Minnesota Department of Health (MDH) is the state's lead public health agency using the best scientific data and methods available to prevent illness, disease incidence, and injury, implement strategies to improve the availability and quality of health care, and help ensure the every community has an opportunity to be healthy.

- Manage an annual budget of over \$500 million
- Provide oversight for over \$325 million in outgoing grants to 500 unique grantees across the state
- Maintain a highly skilled workforce of over 1,500 employees including doctors, nurses, health educators, biologists, chemists, epidemiologists, and engineers
- Work collaboratively with nearly 50 local public health agencies in every county, multiple cities as well as 11 sovereign tribal governments
- Successfully meet rigorous standards set by the Public Health Accreditation Board
- Operate regional offices in Bemidji, Fergus Falls, Mankato, Marshall, Rochester, and St. Cloud

PURPOSE

The Minnesota Department of Health's (MDH) mission is to protect, maintain, and improve the health of all Minnesotans. MDH is responsible for operating programs that prevent infectious and chronic diseases, while promoting and ensuring clean water and air, safe food, quality health care, and healthy living. The department works to improve the health of all communities in the state by incorporating the best evidence and health equity considerations into our decisions or activities.

MDH carries out its mission in close partnership with nearly 50 city and county public health departments, 11 Anashinaabe and Dakota tribal governments, the federal government, and many health-related organizations. The department recognizes the strong connection between overall population health and a wide range of government policies from economic development to education to transportation. MDH's work impacts several of the state's strategic goals:

- **All Minnesotans have optimal health**— we work with public health organizations and health care providers to reduce the incidence of chronic disease and to identify, investigate, and stop infectious disease outbreaks from spreading.
- **Strong and stable families and communities**—we provide funding, technical assistance and guidance to local governments and community-based organizations to create healthier families and communities.
- **People in Minnesota are safe**—we work to reduce the incidence of deaths due to suicide and drug or alcohol addiction.
- **Older and vulnerable Minnesotans are protected from harm**—we provide a timely response and investigation into every allegation of abuse and maltreatment against vulnerable Minnesotans receiving care in a health care facility subject to state or federal regulations.
- **A clean, healthy environment with sustainable uses of natural resources**—we monitor and ensure that indoor air and drinking water quality meet Minnesota's high standards.
- **Minnesotans have the education and skills needed to achieve their goals**—we partner with the departments of education and human services to ensure our youngest Minnesotans get a healthy start through family home visiting, healthy nutrition and opportunity for physical activity.
- **Efficient and accountable government services**—we strive for transparency, effectiveness and efficiency in our service delivery and administration of the public's funds.

BUDGET

STRATEGIES

The MDH vision is one of health equity, meaning a state in which all communities are thriving and all people have what they need to be healthy. While Minnesota ranks as one of the healthiest states in the nation, a 2014 MDH report found significant and persistent disparities in health outcomes. The report found these disparate outcomes exist because the opportunity to be healthy is not equally available everywhere for everyone in the state. Furthermore, these disparities have a negative impact on the health of all Minnesotans, preventing all Minnesotans from achieving their full health potential. This is why MDH has made advancing health equity a major priority. Improving the health of those experiencing the greatest inequities will result in improved health outcomes for all.

In addition, our key strategies for protecting, maintaining, and improving Minnesotans' health include:

- Maintaining a nation-leading position in disease investigation and response, environmental health protection, and laboratory science;
- Reinforcing our partnerships with the state's local public health organizations to ensure a strong public health infrastructure in all corners of the state; and
- Working with cross-sector partners to change policies and practices at the community level to support greater opportunities for promoting health and reducing risks, both to improve the health of the population and to reduce future health care costs.

The Department of Health is governed by a number of statutes. Most sections governing department activities are M.S. Chapters 144 (<https://www.revisor.mn.gov/statutes/?id=144>)
M.S. Chapters 145 (<https://www.revisor.mn.gov/statutes/?id=145>)
M.S. Chapter 145A (<https://www.revisor.mn.gov/statutes/?id=145A>)
M.S. Chapters 62J. (<https://www.revisor.mn.gov/statutes/?id=62j>)
Each activity narrative lists additional relevant statutes.

Recommendation:

The Governor recommends funding from the General Fund and State Government Special Revenue fund (SGSR) for the Minnesota Department of Health (MDH) and the Department of Human Services (DHS) to continue necessary current operations improvements to the regulatory activities, systems, analysis, reporting, and communications that contribute to the health, safety, care quality, and abuse prevention for vulnerable adults in Minnesota.

Rationale/Background:

Two sets of recommendations were released in early 2018, one from the Office of the Legislative Auditor and one from Governor Dayton's Elder Abuse Prevention workgroup, on how specific programs within the Health Regulation Division (HRD) should implement new systems, staffing, processes and reporting practices that would contribute to the health, safety, and quality assurance of care at healthcare facilities for vulnerable adults.

The recommendations identified and addressed concerns over the rise in maltreatment allegations in Minnesota; the inability of certain programs at MDH to meet statutory requirements; outdated processes and IT systems; and inadequate staffing and funding to ensure timely notifications in addition to the analysis, reporting, and communications activities that support stronger public transparency, accountability, and engagement.

Proposal:

This proposal takes a comprehensive, division-wide approach to vulnerable adult health, safety, care quality, and abuse prevention and focuses on four components: regulatory capacity, case management, data analysis and reporting, and communications and engagement.

The proposal drives more efficient management of existing financial resources and increases the capacity of subject matter experts within MDH and partner agencies to implement needed changes. It identifies opportunities for cross-agency systems partnership and builds on existing IT systems and data reporting to inform enhancements. This proposal stabilizes necessary funding for program activities and IT systems that respond to stakeholder service expectations and regulatory requirements. It also creates a new business intelligence capacity that supports robust cross-agency data analysis, reporting, and stakeholder communications that vulnerable

adults and their families request and the Office of Legislative Auditor recommended. Additional request details are described below:

1. **Regulatory capacity** – Funding increases and program improvements are needed to better meet state and federal statutory requirements. This component includes needed funding for licensing, certification, investigations, and inspections.
 - a. **State and federal regulatory work requirements**, including increased complaints activity. Federal cost participation in MDH regulatory work varies according to the type of work and the type of facility and is based on standards and guidance set by the Centers for Medicare and Medicaid Services (CMS). CMS reimbursement requires a financial match from state funds to equitably share costs. This proposal will increase available General Fund resources for the required state match for Health Care Facility Licensing and Certification work by \$3 million each year, beginning in FY 2020. Of the \$3 million annual request, \$2.4 million per year is for state licensing activities and \$0.6 million per year is for the required state match for Medicaid-funded work.

Current funding for the state share is inadequate to meet the demands of our regulatory work. The number of federal complaints, especially from nursing homes, has been increasing in recent years along with the increasing number of residents in such facilities. This growth has increased the workload and the need for state matching funds. Over the past year, revisions to current cost sharing agreements with CMS were made to correctly account for state work and state financial share requirements. As a result, both the proportion of state costs and the volume of work for the state have increased, but the allocations used to pay the state financial match have not kept pace. In order for Minnesota to fully meet state and federal requirements for health care facility licensing and certification work at the required workload, a corresponding increase in allocations is needed.

- b. **Home Care and Assisted Living Program survey activities**. This proposal increases the SGSR appropriation by \$1.1 million each year in the FY 2020-21 biennium for the Home Care and Assisted Living Program (HCALP) to add one additional survey team to improve the frequency of home care provider inspections. Current law requires that each provider be inspected once every three years. MDH is only able to meet this requirement with 30 percent of the providers at this time. An additional survey team, along with Continuous Improvement efforts, will significantly improve our inspection schedule. HCALP recently completed a preliminary assessment and is poised to implement recommendations that will impact performance and capacity within the program, including 40%-50% increased productivity by redesigning the work processes, eliminating duplication, and reallocating resources. This funding increase can be accommodated within existing fee revenues; no fee increase would be necessary. This funding increase is only for the FY2020-21 biennium, based on the impact that the Governor's Vulnerable Adult Regulatory Reforms proposal would have on the number of home care providers.
2. **Case Management** – HRD currently relies on a 15-year-old electronic system to manage our work around inspections, investigations, enforcement, time-reporting, and federal reimbursement creating a significant operational and financial risk for the agency. Continued use of this legacy system perpetuates an inefficient, expensive, and paper-based process and restricts the ability to innovate and gain critical efficiencies. The current system cannot store documents or manage workflow and is extremely limited in the ability to extract stored data. These limitations severely impact the ability of HRD to provide information to the public, analyze operations, coordinate state and federal activities, and forecast future needs.

Creating a modern, centralized framework for case management that integrates existing systems and technology would mitigate the risks posed by the legacy system and further support the continuous improvement activities underway to protect vulnerable adults. The framework will be based on DHS's Social Services Information System (SSIS) for case management. It will integrate existing IT systems for electronic licensing and document management and incorporate a common entry point with the Minnesota Adult Abuse and Reporting Center (MAARC), the state's abuse allegation reporting system. The case management system

will be aligned with a public reporting website where visitors can search, sort, and compare information about providers.

- a. The new, integrated **MDH case management system** would be built in two phases over four years for a total estimated cost of \$ 5.0 million. The first biennium request (\$3.3 million for FY 2020-21) for the new case management system will include:
 - i. **Connection to DHS through SSIS for maltreatment investigation** case management
 - ii. **Implementation and integration of in-house IT systems** across the division for electronic licensing and document management, with the goal to leverage existing systems and minimize unnecessary redundancy
 - iii. **Development of a time-reporting module** to support federal reporting across multiple HRD programs
 - iv. **Access to data and new business intelligence** gathered through the adoption of SSIS and optimized workflows of programs responsible for prevention of abuse, neglect, and maltreatment
 - v. **Evaluation of the functionality of the integrated systems**, including additional needed requirements and develop a plan for optimization in Phase 2 (\$2.8 million in FY 2022-23)
 - b. Creation of a **common entry point and functional enhancements for MAARC and nursing home self-reports** (\$250,000 for 2020-21 biennium, \$60,000 for the 2022-23 biennium). All reporters will start their required online reports through an updated drop-down menu on the MAARC landing page. The revised drop-down menu on the MAARC page will direct nursing home self-reports to the existing NHR login page. This user-friendly approach will create a unified user experience with updated policy guidance, yet still ensure that required data elements and timelines are met. Improvements include more robust data collection and reporting through additional data elements and enhanced data transfer capabilities. This work will be done in collaboration with DHS.
 - c. Building a **public reporting website** where visitors can search, sort, and compare information about providers. (\$1.6 million for 2020-21 biennium, \$0.5 million annual support and maintenance thereafter)
3. **Data analysis and reporting** – Enhanced capacity to support timely notification of maltreatment complaints, respond to the growing number of complex data practices requests, and generate robust analysis and reports to drive continued improvement and public engagement. (\$1.2 million for the FY2020-21 biennium)
 4. **Communications and engagement** – Dedicated resources to support work groups and committees, stakeholder engagement, and develop more effective online content and other materials for key audiences. (\$0.4 million biennial request)

\$ in thousands	FY 2020	FY 2021	FY 2022	FY 2023

Total GF (DHS)	1,093		218	218
Grand Total	9,634	5,405	6,018	5,587

Equity and Inclusion:

This proposal addresses substantial needs within HRD for modernization and capacity building that directly affect the quality and safety of services and facilities for vulnerable adults across Minnesota. To the extent that facility quality and safety affect health disparities and access to care for underserved persons and communities, including racial and ethnic groups, LGBTQ persons and populations, veterans, persons with disabilities and chronic health concerns, or other underserved communities, this proposal supports access and quality health care for all Minnesotans. Additionally, MDH, as part of its regulatory responsibilities, enforces federal and state law to ensure that facility residents are protected from discriminatory policies and practices that affect the ability of Minnesotans to receive health care.

IT Related Proposals:

This proposal makes \$5.9 million in information technology improvements and upgrades over the 2020-21 biennia. The projects relate to creating the case management framework and establishing a MAARC common entry point and other website improvements.

Net Fiscal Impact = (Expenditures – Revenues)	803	6,485	(507)	(137)
FTEs	8.5	53	94	94

Recommendation:

The Governor recommends funding for regulatory reforms and enhanced protections for vulnerable adults, including:

- Creating an assisted living licensure requirement that combines the licensing of home care services and housing with physical plant standards into a single license
- Adding regulatory requirements for services provided to persons with dementia through an additional certification that supplements the assisted living licensure
- Authorizing the Commissioner to immediately impose fines against providers when violations are detected during inspections and/or investigations instead of having to wait for an opportunity to correct the violation before imposing a fine
- Prohibiting deceptive marketing and false advertising

Rationale/Background:

Currently, 41,000 people live in 1,345 assisted living settings across Minnesota. The concern and the risk is that these assisted living residents have increasing care needs and live in facilities not originally designed to meet those needs. In 2014, 58% of residents in assisted living were over age 85 and 39% had dementia. Data show that residents are living and staying longer in care than ever before.

Despite this increasing need in Minnesota, regulatory protections for vulnerable adults vary based on the type of facility setting a person lives in, not their individual vulnerabilities. Specifically, current laws for Housing with Services Establishments (HWS) do not regulate the HWS physical plant of the building, the supportive services provided within, nor the people employed by the HWSs. Further, residents and families are confused by existing laws and how to enforce their rights. Residents and families need a regulatory system that is understandable, responsive, and holds providers accountable.

Home care services include assisting with: activities of daily living; managing and taking medications; providing complex skilled health care and treatments for persons who use ventilators to breathe, have feeding tubes, or require wound care; and overseeing people who need constant care and assistance because of cognitive loss from brain injuries or dementia. While many home care residents may be capable of directing their own care, a special responsibility exists to protect residents who cannot.

Proposal:

Assisted Living Licensure

This proposal establishes a new, three-tier licensing system comprised of Basic, Comprehensive, and Comprehensive-Plus licenses.

- A Basic license includes assisted livings that provide or arrange services in conjunction with the Basic Home Care license. Services include assistance with dressing, self-feeding, oral hygiene, hair care, grooming, toileting, bathing, standby assistance, medication and treatment reminders, preparing modified diets, and helping with housekeeping and laundry.
- A Comprehensive license includes assisted livings that provide or arrange services in conjunction with the Comprehensive Home Care license. Services include the services of professional nurses, occupational therapists, speech-language therapists, respiratory therapists, nutritionists, or social workers; tasks delegated to unlicensed personnel by a registered nurse (RN); medication management; hands-on assistance with transfers; assisting clients with complicated eating problems; and providing other complex and specialty care such as ventilators.
- A Comprehensive PLUS license includes all elements of the Comprehensive license, plus taking care of residents with dementia, including having a separate dementia care unit.

All three tiers of licenses include:

- License application and fees
- An annual survey
- Staffing standards
- Residency contracts, clear management agreements that identify responsible parties
- Provider disclosure requirements
- Services and housing termination appeal rights for residents
- Resident councils
- Sanctions against providers who retaliate against residents and family who complain about services provided or not provided
- Immediate fine authority
- Provisional licenses
- A complaint system to address physical plant and home care services issues

The proposal assumes a four-year implementation period.

- Year 1 (July 1, 2019 to June 30, 2020) will include expedited rulemaking to finalize and implement the standards for physical plant, environment, staffing and training, healthcare practices, and discharge rights for the new licensing system and planning. During this year MDH will begin hiring staff.
- Year 2 (July 1, 2020, to June 30, 2021) will be a transition period to prepare for the new licensing requirements. MDH will continue hiring staff, build infrastructure, conduct outreach, and prepare forms.
- Year 3 (July 1, 2021 to June 30, 2022) all existing home care licensees who provide services as an assisted living will convert to the new licensure and new applicants for licensure are required to apply under new assisted living licensure laws.
- Year 4 (July 1, 2022 to June 30, 2023) will be the first full year of licensure. The new licensure will be fully in effect for providers by July 1, 2022.

The proposal authorizes the Commissioner to impose immediate fines when a violation is noted during an onsite survey of the provider. Current law requires that the provider be given time to correct the violation before a fine is imposed. This proposal would still require the provider to correct the violation; however, the fine may be imposed on the first onsite survey. The goal is to reduce violations occurring in the first place because providers would know that with the first onsite survey, an immediate fine could be imposed. This proposal also deposits immediate fine revenue and previously collected home care assessment fines into a dedicated, special revenue

account that is appropriated to the Commissioner once an advisory council's recommendations are approved by the Commissioner.

Finally, to assist and support MDH's regulatory activities, this proposal includes resources for a continuous improvement process, a data/communications staff, IT development, and maintenance and provider training resources to help organizations "get ready" for the changes.

Dementia Care Services

This proposal requires any assisted living facility that provides care to residents with dementia in a dementia care unit to obtain a Comprehensive PLUS license, the highest tier of assisted licensure.

A Comprehensive PLUS license requires that an assisted living licensee:

- Demonstrate the ability to care for residents with dementia prior to receiving a Comprehensive PLUS license
- Train direct care staff on how to provide person-centered care to dementia residents
- Establish person-centered policies and procedures for dementia care residents
- Meet minimum physical plant standards
- Provide enhanced physical design, living environment, and safety standards for dementia care units
- Provide consumers with transparent advertising of dementia-care services
- Document that the administrator receives continuing education on caring for dementia residents
- Have dementia-trained staff conduct Comprehensive license requirements

Deceptive Marketing Practices

This proposal prohibits providers from engaging in deceptive marketing and business practices. Providers cannot make any false, fraudulent, deceptive, or misleading statements in marketing and advertising orally or in writing. This includes facilities that are licensed as HWSs, home care, boarding care homes, and nursing homes.

Equity and Inclusion:

These regulatory requirements will be consistent for all groups and will protect all groups equally.

IT Related Proposals:

This proposal makes \$1.15 million in information technology improvements and upgrades over the 2020-21 and 2022-23 biennia. The projects relate to electronic corrective action plans, licensing system enhancements, and electronic workflow management.

Statutory Change(s):

- New Statute Chapter needed
- Minn. Stat. sec. 144A.43 through 144A.484 (home care services licensing)
- Minn. Stat. sec. 144.051 (home care data practices)

- Minn. Stat. sec 144D (housing with services settings)

Health

FY 2020-21 Biennial Budget Change Item

Change Item Title: Public Health Laboratory Equipment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	840	655	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	840	655	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends one-time funding from the General Fund in the FY 2020-2021 biennium to purchase laboratory equipment critical to the work performed at the Minnesota Department of Health (MDH) Public Health Laboratory. Funding will support essential equipment purchasing needs that cannot be funded through any other source.

Rationale/Background:

The Minnesota Department of Health Public Health Laboratory (MDH-PHL) performs critical laboratory testing to detect public health threats, including foodborne illnesses such as Salmonella, emerging infectious disease threats, rare but treatable disorders in newborns, and hazardous chemicals in the environment and in humans. Much of the testing performed at MDH-PHL is not available in other laboratories and requires the use of sophisticated facilities and instruments.

State-of-the art equipment enables the laboratory to detect extremely small amounts of chemical contaminants and more rapidly detect infectious diseases. Without advanced testing methods, we will be missing key pieces of data needed to respond to ever-changing chemical and biological threats. MDH must continuously update laboratory capital equipment to maintain the ability to detect harmful chemical compounds and radioactive substances, or novel biological threats, such as avian influenza or Ebola.

While MDH-PHL has existing capital equipment valued at approximately \$10 million, there is no current budget mechanism to substantially replace obsolete instruments or to expand laboratory capability. Failure to replace aging equipment poses a risk to lab capability and readiness to respond to outbreaks and emergencies that require laboratory services. MDH-PHL currently has only a limited budget (approximately \$385,000 per year) to replace existing laboratory equipment. MDH supplements this limited budget by using one-time federal or state funds, when available. On occasion, partners have provided equipment for special projects; however, this is not a reliable mechanism for obtaining critical instrumentation. Most often, federal agencies and other funders only pay for testing to be performed, not for building the capacity to do testing.

The physical laboratory facility shared by the Departments of Health and Agriculture was completed in 2005. Analytical and support equipment purchased at the time of construction is nearing the end of its projected service life. Because of advances in technology, analytical instruments currently in use by the laboratory have become outdated and have been either replaced by newer technologies or are no longer supported by vendors.

Proposal:

This proposal provides capital equipment necessary to:

- Support faster and more accurate detection of health threats to ensure MDH and state agency partners have the best scientific data and methods available to protect the health of Minnesotans.
- Replace outdated equipment that is no longer supported by the vendor and undermines the security of the state's information technology infrastructure.
- Meet increased demand from MDH programs and state agency partners for specialized laboratory testing, which has grown significantly in recent years.

Investment in newer, more sensitive and reliable technologies is needed to maintain or build capacity for critical testing in the areas of:

- **Emerging infectious diseases.** MDH-PHL uses state-of-the-art technologies to find outbreaks and detect emerging threats to our communities such as avian flu, Zika virus, and Ebola virus. We would use funding to replace our aging equipment used to perform this work allowing us to keep pace with new technologies and newly identified infectious diseases.
- **Rare but treatable disorders in newborns.** MDH-PHL screens newborns for 61 treatable disorders. Improvements to analytical methods have resulted in increased sensitivity and specificity of these tests, resulting in fewer false-negative and false-positive test results. Early identification and treatment of a newborn's rare or hidden disorder can prevent a child's illness, physical disability, developmental delay, or death. Funding would allow us to purchase capital equipment capable of performing supplemental tests that reduce the number of false-positive results and decrease the need for follow-up.
- **Chemicals in the environment.** MDH-PHL tests for chemicals of emerging concern, such as pharmaceutical compounds, hazardous chemicals, and radioactive substances, which are increasingly found in the environment. MDH-PHL in collaboration with the Environmental Health Division of MDH and the Minnesota Pollution Control Agency (MPCA) conduct studies to look at chemicals in blood and urine to detect potentially harmful contaminants, for example perfluorochemicals (PFCs), in Minnesota residents. Data from this testing helped MDH and MPCA assess the extent of residents' exposure to PFCs and design interventions to remove PFCs from drinking water. Testing for these compounds requires the use of extremely sophisticated and expensive analytical instruments, many of which are reaching the end of their service life.

Failing to replace old instruments whose software cannot be upgraded poses an IT security risk. Currently, MDH must maintain a separate IT network for older instruments so their security risks do not threaten other state activities. Maintaining a separate network is inefficient and costly.

Funding will be available over four years to purchase approximately 10 instruments, ranging from a \$43,000 alpha spectrometer that detects radiation from a nuclear power plant accident or deliberate act of terrorism, to a \$350,000 tandem mass spectrometer for improved detection of rare disorders in newborns. A small portion of the funding will be used to replace parts of the water and air purification systems to maintain a stable environment for laboratory testing.

Results:

As laboratory equipment ages, the companies who built and serviced them are no longer able to repair the equipment. Most of our laboratory equipment has a projected service life of 10-15 years. With this budget request, we will replace equipment that is between 10-25 years old. Instruments that are more than 15 years old are considered a critical risk of failure (indicated by bars in the red area of the graph) and those between 10-15 years old are at high risk of failure (indicated by bars in the yellow area of the graph). If equipment fails and is no longer supported by the vendor, that instrument may not be able to be repaired, and we will be unable to conduct testing that utilized that instrument. For example, all of our instruments needed for radiation testing are at a critical risk of failure (the first three black bars in the top shaded area of the graph). MDH-PHL is the only

laboratory in the state that tests for radiation in drinking water; loss of this capacity would represent a serious risk to the public.

Lab Equipment Currently at or Beyond Service Life

In addition to the risk of instrument failure, old instruments are unable to detect the lower levels of chemicals that are now recognized as hazardous to health. Although MDH-PHL developed the detection and testing methods for PFCs that were used to assess health hazards in the East Metro, we are currently unable to achieve the sensitivity needed to detect these compounds at the recently revised (lowered) health-based values because of instrument limitations. Updated instruments will enable the laboratory to detect lower levels of these compounds, as well as enable detection of additional types of PFCs that may pose a hazard to health and other emerging contaminants. Likewise, because of instrument limitations, the laboratory is currently unable to analyze drinking water samples for potentially hazardous disinfectant byproducts. The laboratory has been asked to add pesticides of concern to our analytical panel, however, we are unable to comply with this request without additional instrumentation. Upgrading instrumentation will enable the laboratory to enhance our capability and capacity to address these known chemical threats, as well as be prepared to respond to emerging threats.

Investing in new equipment enables MDH-PHL to leverage additional federal funds that further enhance our ability to protect public health. For example, the laboratory's ability to detect low levels of chemical contaminants in blood and urine have enabled us to obtain federal funding to conduct additional studies. Most recently, MDH-PHL, in collaboration with the University of Minnesota, was awarded funding to act as an assessment hub for the Children's Health Exposure Assessment Resource (CHEAR) project. The project looks at chemical and non-chemical factors that may impact children's health and development.

FY 2020-21 Biennial Budget Change Item

Change Item Title: Opioid and Other Drug Overdose Prevention

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Department of Health				
Opioid Stewardship Fund				
Expenditures	6,000	9,251	9,251	9,251
Revenues	0	0	0	0
MMB Non-Operating				
Health Care Access Fund				
Transfer Out	13,000	0	0	0
Opioid Stewardship Fund				
Transfer In	13,000	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	6,000	9,251	9,251	9,251
FTEs	8	8	8	8

Recommendation:

The Governor recommends funding from the Opioid Stewardship Fund for opioid and other drug overdose prevention at the Minnesota Department of Health (MDH). This proposal includes a comprehensive array of evidence-based approaches to the growing crisis of drug overdoses and drug-related deaths in Minnesota. It doubles the current number of community opioid pilot prevention projects, strengthens Tribal Prevention Programs, provides Naloxone and training for first responders across Minnesota (including State Patrol, Tribal Law Enforcement, probation and parole officers, and others), and improves local data collection and analysis.

This proposal is part of a package of proposals recommended by the Governor to address rising rates of opioid use. The package of proposals is funded by new fees on opioid manufacturers, wholesalers, and entities that handle controlled substances.

The Governor also recommends a one-time transfer of \$13 million from the Health Care Access Fund to the Opioid Stewardship Fund. The primary source of revenue into the Health Care Access Fund is a tax on health care providers, hospitals, surgical centers, and wholesale drug distributors. The fund supports initiatives that improve access to health care, contain health care costs, and promote public health. This transfer will provide resources to fund opioid-related programming prior to the receipt of new fee revenue.

Rationale/Background:

Preliminary drug overdose data for 2017 indicates that drug overdose fatalities increased by 3% from 2016 to 2017 (rising to 733 deaths; of these, 422 were opioid-involved deaths). Overdose deaths are not equal across age groups, genders, geography, and cultures in Minnesota. The highest drug overdose rates have moved to younger age groups. Other differences persist by gender and geography (urban, rural). American Indians in Minnesota have the highest rate of drug overdose deaths (primarily opioid overdose) in the nation. In 2016, American Indians were six times more likely to die of a drug overdose than were white Minnesotans. This was the worst disparity rate in the nation. African Americans in Minnesota were 2.4 times more likely to die of a drug overdose than white Minnesotans. This was the fifth highest disparity rate ratio amongst blacks relative to whites in the nation.

Although death is the most visible outcome, increasing substance use and abuse have great impact on families, school systems, employers, law enforcement, and communities. The associated injury and violence also results in millions of dollars in hospital visits and rehabilitative drug treatment in Minnesota, according to analyses performed by MDH. Opioid-related hospital treatment (includes emergency department treatment and in-patient hospitalization) has been increasing since 2001 and has doubled since 2005. Opioid-related hospital treatment surpassed that of heart attack and stroke in 2009.

Notes: The dashed lines on the right hand side of the two graphs indicate a change in coding manuals – the trends are the same, but how cases are identified differ enough that we present them distinctly.

There is no state funding dedicated to overdose prevention. MDH has successfully competed for short-term federal funding which is being used to improve data collection and analysis in order to define the magnitude of the problem, to develop the opioid prevention dashboard (www.health.state.mn.us/opioiddashboard), and to test interventions like the employer toolkit (www.health.state.mn.us/opioidtoolkit). Projected department expenditures from all opioid-related federal awards are \$1.325 million in FY 2020 and \$935,000 in FY 2021.

Proposal:

This proposal includes four components:

1. Continue and expand the community-based pilot prevention projects
2. Invest in culturally-specific prevention efforts to address overdose disparities among American Indians and African Americans
3. Provide Naloxone (antidote to opioid overdose) training and medication supplies to first responders and state troopers statewide
4. Conduct community-based, drug overdose fatality review data collection and analysis

Opioid pilot projects - In 2017, MDH received a one-time General Fund appropriation of \$1 million to replicate the overdose prevention efforts of St. Gabriel's Hospital in Little Falls, MN. MDH awarded funding to eight communities and tribal nations. This proposal would expand the work occurring in the first eight communities for an additional year to allow them to assess the effectiveness and sustainability of their work. The funds will also support similar drug overdose prevention grants to eight new communities for two years. Each year, the program would allow eight communities to "graduate" and eight new intervention communities would initiate prevention work. (\$1.3 million in FY 20 and \$2.3 million each year thereafter and 2 FTEs: one planner principal and one management analyst)

Each community implements six major activities to reduce opioid use or abuse and reduce rates of opioid addiction:

- 1) Establishing multidisciplinary controlled substance care teams that may consist of physicians, pharmacists, social workers, nurse care coordinators, and mental health professionals;
