- The Client Security Board (CSB) reviews claims from clients who have experienced monetary loss because of attorney dishonesty (in the form of theft or embezzlement) and, where the claim meets criteria established by the Board, reimburses the client for the loss up to \$150,000 per claim.
- The Lawyer Registration Office (LRO) collects attorneys' annual registration statements and fees, and demographic and other data from Minnesota lawyers, and administratively suspends lawyers who fail to comply with the Rules.

The Supreme Court Boards support the following statewide outcomes: Strong and stable families and communities; People in Minnesota are safe; and Efficient and accountable government services.

BUDGET

Source: Budget Planning & Analysis System (BPAS)

Source: Consolidated Fund Statement

Dedicated revenue, not General Fund monies, fully fund the operations of these boards. The Supreme Court assesses each Minnesota-licensed lawyer an annual registration fee that funds these activities. The registration fee is authorized by statute and court rule, and is held in trust for the regulation of the bar. The registration fee revenue is divided among each of the boards (with the exception of the Legal Certification Board, which is funded entirely by user fees) as determined after public hearing by Court's Rules for Registration of Lawyers. The Board of Law Examiners assesses a bar application fee to each applicant for admission to the bar. The Board of Continuing Legal Education assesses course application fees and various administrative fees. Disciplined attorneys are also assessed costs for public discipline. The fees for those boards are included in the Department Earnings Report.

STRATEGIES

The Boards have extensive written rules, policies, and procedures that ensure fair and accurate processing of applications, course approval applications, the prompt investigation and disposition of lawyers' alleged disability or unprofessional conduct, as well as a well-trained and carefully managed staff who conscientiously carry out their obligations. In addition, volunteer Board members comprised of lawyers and non-lawyer members of the public volunteer their time to oversee the policies and procedures through which each of the Boards carry out its responsibilities, and in some cases assist in the work of the Boards.

The Boards contribute to the statewide outcomes by ensuring that only those who are competent and have good character are licensed to practice law; that only those who continue their legal education are able to continue to hold a law license; that ethics complaints against Minnesota lawyers warranting professional discipline are investigated and prosecuted; and that clients who suffer loss of money or other property from the dishonest conduct of their attorney are reimbursed. These activities contribute to the administration of justice and ensure that members of the Minnesota Bar provide legal service to those in need of legal counsel and to communities in need of civic members who will uphold the rule of law.

Key partners in the work of the Boards are the Minnesota State Bar Association and its committees and sections, Lawyers Concerned for Lawyers, deans and associate deans of law schools, particularly the deans of the three law schools located in Minnesota; bar regulation administrators in other states, district ethics committees (DEC), colleagues in the Judicial Branch, and the public who are consumers of legal services.

RESULTS

The Board of Law Examiners, Board of Continuing Legal Education, and Board of Legal Certification know their strategies are working when the following results are manifest:

- Some applicants to the bar are denied admission for failure to comply with Board of Law Examiners' requirements. New certifying agencies continue to apply for accreditation to certify lawyers as specialists. In response to routine surveys, the Boards' customers' responses affirm that services are provided in a timely and professional manner.
- Some attorneys are removed from the roles of active Minnesota lawyers due to failure to comply with their continuing legal education requirements or attorney registration obligations.
- The Minnesota Bar is well-educated and prepared to carry out the obligations of licensure. As a result of the accreditation of reputable agencies, only those members of the bar who have met high standards of demonstrated expertise, may hold themselves out as specialists in a field of law.

The factors driving their stable or improving performance trend include the development and implementation of computer technology that permits timely and accurate completion of investigations and valid administration of professional examinations. While the performance trend is stable, the Boards look for and find new ways to improve performance and increase efficiencies in operation.

The OLPR knows its strategies are working when attorneys are disciplined for misconduct. The OLPR also responded to more than 2,000 calls from lawyers asking for assistance on how to meet their ethical obligations in 2017. The OLPR proactively speaks on issues of ethics education, increasing its outreach by approximately 21% in FY18.

The legal professions is also the only profession that has a dedicated fund created by members of the profession to make restitution to individuals who have been victims of lawyer dishonesty. The Client Security Fund, administered by the CSB, goes a long way to maintain the integrity of the profession and to protect the public from the few attorneys who grievously misuse their position of trust.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of applicants for admission to the Bar	1,245	1,199	2015/ 2017

AT A GLANCE

- The constitution provides that the Legislature may meet up to 120 days during a two-year period.
- For the 17-18 biennial legislative session and 2017 special session 4,550 bills were introduced in the House, 4,120 bills were introduced in the Senate. Of those, 222 bills were presented to the governor for signing and were fully enacted.
- The biennial budget for the legislature is approximately \$164 million, which is 0.36% of the state general fund budget.

PURPOSE

The legislature is one of three branches of state government (the others being the executive and judicial branches) created by the constitution of the State of Minnesota. The legislative branch is responsible for the enactment and revision of state laws, establishing a state budget and tax policy, electing regents of the University of Minnesota, overseeing the work of state government, as well as proposing amendments to the state constitution. The Minnesota legislature consists of two bodies: the House of Representatives and the Senate. In addition, the House and Senate have created joint legislative offices and commissions under the fiscal and administrative oversight of the Legislative Coordinating Commission.

FY 2020-21 Biennial Budget Change Item

Change Item Title: Legislative Coordinating Commission Legacy Fund Website

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Clean Water				
Expenditures	9	0	0	0
Revenues	0	0	0	0
Parks and Trails				
Expenditures	7	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	16	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$9,000 from the Clean Water Fund and \$7,000 from the Parks and Trails Fund in FY 2020 for the Legislative Coordinating Commission to maintain the Clean Water Fund and the Parks and Trails Fund portions of the Legacy Fund website as required under Minnesota Statutes, section 3.303, subdivision 10. This is a one-time appropriation.

Rationale/Background:

Minnesota Statutes, section 3.303, subdivision 10 requires the Legislative Coordinating Commission to develop and maintain a user-friendly, public-oriented website that informs, educates, and demonstrates to the public how the constitutionally dedicated funds are being expended to meet the requirements established for each fund in the state constitution.

These appropriations provide funding for the Legislative Coordinating Commission's costs to maintain the Clean Water Fund and the Parks and Trails Fund portions of the Legacy Fund website.

Proposal:

The Governor recommends \$9,000 from the Clean Water Fund and \$7,000 from the Parks and Trails Fund in FY 2020 for the Legislative Coordinating Commission to maintain the Clean Water Fund and the Parks and Trails Fund portions of the Legacy Fund website.

Equity and Inclusion:

Not applicable.

Results:

Not applicable.

Statutory Change(s):

None.

Program: House of Representativeswww.house.leg.state.mn.us**AT A GLANCE**

- 134 representatives compose the Minnesota House of Representatives.
- Representatives serve 2-year terms.

PURPOSE & CONTEXT

There are 134 members of the House of Representatives (<https://www.house.leg.state.mn.us>). Each member represents a geographically area of the state and is elected by the voters of the district every two years.

The DFL Caucus (<https://www.house.leg.state.mn.us/caucuses.asp>) and the Republican Caucus (<http://www.house.leg.state.mn.us/caucuses.asp>) departments each provide legislative services to their respective members. Services provided include legislative management, member administrative support, committee administration and support services, constituent and communication/media services, and caucus research services.

The Chief Clerk's Office (<https://www.house.leg.state.mn.us/cco/cco.asp>) provides assistance and advice to the speaker and members of the House of Representatives in meeting the legal and parliamentary requirements of the lawmaking process and to record the history of that process in a clear, unbiased, and accurate manner. The chief clerk, first and second assistant clerks, index clerk, and chaplain are elected officers of the house. The Chief Clerk's Office is responsible for all computer technology functions in the House, such as managing a secure local area network, managing numerous application programs and coordinating computer support to all house staff.

The House Research Department (<https://www.house.leg.state.mn.us/hrd/hrd.aspx>) provides research and legal services to the house and its members and committees. The work of House Research focuses on legislative decision-making: helping house members and committees develop and evaluate government policies and laws. The department is an agency of the House of Representatives as a whole, rather than a committee or caucus. House Research provides nonpartisan, confidential services to all members of the house without regard to partisan affiliation or legislative position. The department strives to be politically neutral and impartial on the issues. Its staff does not advocate, endorse, promote, or oppose legislation or legislative decision.

The Fiscal Analysis Department (<https://www.house.leg.state.mn.us/fiscal/fahome.asp>) provides professional, nonpartisan, and confidential services for all members of the House of Representatives, and provides assistance to the house finance and tax committees on state budgetary and fiscal legislation. Department staff analyzes spending requests, aid committees in developing and analyzing budgetary options, draft legislation to implement budget decisions, track legislative decisions, and provide analysis for legislative oversight of enacted budgets. Fiscal analysts respond to requests from individual members needing analyses or information on state budgetary issues or government finances. The Fiscal Analysis Department researches, prepares, and distributes publications providing information on state budget issues and government finances.

The House Public Information Services Department (<https://www.house.leg.state.mn.us/hinfo/hinfo.asp>) is a contact point to help the public connect to the Legislature. The mission of the department is to provide credible and timely nonpartisan services that inform the general public of legislative actions, educate the public about the legislative process and encourage public participation in the Minnesota Legislature. The department produces and distributes Session Weekly newsmagazine, Session Daily, committee schedules, committee rosters, members and

staff lists, legislative directories, and various publications that explain the state's symbols, governmental structure and lawmaking process. It provides photography services for members, staff and the public, and distributes audio CD copies of all House meetings, and DVD copies of all House television coverage. The department creates and distributes unedited, gavel-to-gavel television coverage of all House floor sessions, select committee hearings, press conferences, and informational and educational programming. Beginning with the start of each legislative session, programming is broadcast, in conjunction with the Senate, weekdays from 8 a.m. to 6 p.m. on the digital Minnesota Channel, which is available statewide on Minnesota's public television stations. Live webcasting and video archives of all House television programming is available on the Internet.

The House Budget & Accounting Department and Human Resources Department performs the financial and human resources functions for the house. Financial functions include: accounting, budgeting, staff and member payroll, accounts payable, and expense reimbursements. Human resources function includes compensation and benefit administration, personnel policy development and communication and house staffing management.

The Sergeant-At-Arms Office (<https://www.house.leg.state.mn.us/sergeant/sergeant.asp>) provides temporary support staff (pages), parking, facility management, telephone system management, supply and equipment purchases, security, post office, duplication and printing, and educational program services for members, staff, and the public. The speaker appoints the chief sergeant. The assistant sergeants, postmaster, and assistant postmaster are elected by house members to serve with the chief sergeant as officers of the house. Pages serve as support staff for all house and conference committee hearings and aid all departments in accomplishing their duties.

The Minnesota House of Representatives is established under Article 4, Section 1 (<https://www.revisor.mn.gov/constitution>) of the Minnesota Constitution. Primary statutory citations regarding House operations can be found in M.S. 3 (<https://www.revisor.mn.gov/statutes>)

Program: Minnesota Senatewww.senate.mn**AT A GLANCE**

- 67 senators compose the Minnesota State Senate.
- Senators serve 4-year terms.

PURPOSE & CONTEXT

There are 67 members of the Minnesota State Senate (<http://www.senate.mn>). Each member represents a geographical area of the state and is elected by the voters of their district every four years. In addition to the functions listed under agency purpose for the Minnesota Legislature, the Senate also has the responsibility to advise and consent to the governor's appointments.

The Minnesota State Senate include the Majority and Minority caucuses, the office of the Secretary of the Senate and Senate Council and Fiscal Analysis

The Republican Caucus (<http://www.senate.mn/caucus/index.php?ls=#header>) and the DFL Caucus (<http://www.senate.mn/caucus/index.php?ls=#header>) support their members for committee assignments and structural organization, via administrative support, committee administration, constituent communication and research services.

The office of the Secretary of the Senate

(http://www.senate.mn/departments/office_bio.php?office_id=1005&ls=) includes:

- Engrossing is responsible for producing all committee reports for the Senate during the legislative session.
- The Front Desk ensures that the Senate functions smoothly and conforms to Senate Rules and the constitutional and statutory provisions that relate to the mechanics of enacting legislation.
- Human Resources provides services to Senate members and staff with recruiting, hiring, and employee relations.
- Senate Index provides information via the Internet concerning the content, status and progress of bills before the Senate.
- Journal Production publishes the daily and permanent Journal of the Senate.
- Media Services produces television programs, web-based media and photographs to provide transparency of Senate and legislative activities.
- Printing and Purchasing maintains multi-functional printers and copiers throughout the Capitol and Senate buildings.
- Senate Information staff handle the production and distribution of Senate publications, as well as public inquiries.
- Senate Sergeant at Arms provides a wide variety of security and administrative services to the Minnesota Senate members and staff.
- Fiscal Services operates the financial infrastructure of the Minnesota Senate.
- Senate Information Systems is responsible for the operation, installation and coordination of the Senate's information technology infrastructure.

The office of Senate Counsel, Research and Fiscal Analysis

(http://www.senate.mn/departments/office_bio.php?office_id=1007&ls=) provides nonpartisan professional staff services to each Senator, including bill drafting, committee and floor amendment drafting, budget tracking and fiscal note development

The Minnesota Senate is established under Article 4, Section 1 (<https://www.revisor.mn.gov/constitution>) of the Minnesota Constitution. Primary statutory citations regarding Senate operations can be found in M.S. 3 (<https://www.revisor.mn.gov/statutes>)

Program: Legislative Coordinating Commissionwww.commissions.leg.state.mn.us**AT A GLANCE**

- The LCC is composed of joint legislative commissions and offices of the Minnesota Legislature.
- Joint offices provide services to the Minnesota House of Representatives and the Minnesota Senate.

PURPOSE & CONTEXT

The House and Senate have created joint legislative offices and commissions under the fiscal and administrative oversight of the Legislative Coordinating Commission.

The Legislative Coordinating Commission (<https://www.lcc.leg.mn>) (LCC) serves as the umbrella organization for legislative commissions, joint agencies, and other boards. LCC staff provide staff support to numerous commissions and task forces, as well as providing administrative and fiscal support services to joint legislative offices. The Geographic Information Services Office (<https://www.gis.leg.mn>) of the LCC is the repository for statewide boundary information for legislative use and provides mapping and data services for the legislature, state agencies and the public. The LCC maintains the Minnesota's Legacy (<https://www.legacy.mn.gov>) website which displays how funds from the Legacy Amendment and the Environment and Natural Resources Trust Fund are being utilized throughout the state. The LCC facilitates arrangements for visiting international and state delegations to the legislature.

The LCC provides staff and fiscal support for the Compensation Council, the Joint House/Senate Subcommittee on Claims, the Office of the Economic Status of Women, the Regent Candidate Advisory Council, the Trustee Candidate Advisory Council, the Mississippi River Parkway Commission, the Legislative Water Commission, and the Subcommittee on Employee Relations and a number of other commissions and task forces. All joint legislative offices and commissions (<https://www.commissions.leg.state.mn.us/depts.htm>) are nonpartisan.

The Legislative Reference Library (<https://www.leg.state.mn.us/lrl/lrl>) was established by the legislature in 1969 as a nonpartisan, joint office. The Library supports the legislative process by providing unbiased research services and information resources to legislators and legislative staff. The Library's collection is focused on public policy materials relevant to the work of state governments. As the state government document depository, the Library's collection includes state documents and consultants' reports, with particular attention paid to collecting reports mandated by the legislature. The Library's collection also includes primary legislative materials, including House and Senate committee minutes and audio and video recordings, and over 350 current periodicals and newspapers. To preserve the history of the legislature, the Library creates unique print and online collections of articles, documents, and data about sessions, members, and lawmaking in Minnesota. The Library also maintains a biographical database of all legislators who have served in Minnesota, from territorial times to the present.

The Office of the Revisor of Statutes (<https://www.revisor.mn.gov>) provides drafting, editing, publication, and computer services to members of both houses of the legislature as well as constitutional offices, state agencies and departments. Drafting services are provided on a confidential, nonpartisan basis, and include bills, engrossments, and enrollments presented to the governor, plus administrative rules. The office is the official publisher of Laws of Minnesota, Minnesota Statutes, and Minnesota Rules, both in books and on the internet, and has provided national leadership in accessibility, authentication, and preservation of online legal material. The Revisor's computer unit provides a system used for drafting by offices across the legislature, core infrastructure

services for legislative telephone and WiFi, and the systems used for book and internet publication of Minnesota law.

The Legislative Budget Office provides the house of representatives and senate with nonpartisan, accurate, and timely information on the fiscal impact of proposed legislation, without regard to political factors.

The Legislative Commission on Pensions and Retirement (<https://www.lcpr.leg.mn>) considers, hears testimony and makes recommendations regarding proposed legislation relating to pension and retirement benefits for public employees and the State's pension and retirement plans. The Commission receives and reviews the annual actuarial valuations and periodic experience studies of the State's public pension plans, monitors the sufficiency of plan funding and recommends adjustments to assumptions and contributions. The Commission also studies and hears testimony on other retirement-related topics, including national trends, pension reform and federal law changes.

The Legislative Energy Commission (<https://www.lec.leg.mn/>) (LEC) evaluates the energy policies of the state, assessing the impact on the future of the environment and the economy of the State. The LEC monitors the State of Minnesota's progress in achieving goals to develop renewable sources of electric energy, evaluates progress in reducing greenhouse gas emissions, reviews and recommends proposed energy legislation and takes public testimony on energy issues.

The Legislative-Citizen Commission on Minnesota Resources (<https://www.lccmr.leg.mn>) advises the legislature and provides oversight on the allocation of certain dedicated environment and natural resources funding sources, primarily the constitutionally dedicated Environment and Natural Resources Trust Fund from State Lottery proceeds, for projects for the public purpose of protection, conservation, preservation and enhancement of the state's air, water, land, fish, wildlife, and other natural resources.

The Lessard-Sams Outdoor Heritage Council (<https://www.lsohc.leg.mn>) (LSOHC) recommends funding from the Outdoor Heritage Fund to the legislature. The LSOHC ensures that recommendations are consistent with the Constitution and state law and that they will achieve the outcomes of natural resource plans including the Minnesota Conservation and Preservation Plan directly related to the restoration, protection, and enhancement of wetlands, prairies, forests, and habitat for fish, game, and wildlife. Recommendations preventing forest fragmentation, encouraging forest consolidation, and expanding restored native prairie receive emphasis.

Legal authority for the LCC: M.S. 3 (<https://www.revisor.mn.gov/statutes>)

Program: Legislative Audit Commissionwww.auditor.leg.state.mn.us**AT A GLANCE**

- OLA is the auditor of Minnesota state government. It conducts audits, evaluations, and investigations.
- OLA is comparable to a federal Office of Inspector General and the Congressional Government Accountability Office (GAO).

PURPOSE & CONTEXT

The Office of the Legislative Auditor (<https://www.auditor.leg.state.mn.us>) (OLA) is a professional, nonpartisan, audit and evaluation office established in 1973 to strengthen accountability and legislative oversight.

OLA has authority to audit all organizations in the executive and judicial branches of state government, as well as various metropolitan organizations. When state government grants money to or contracts with private organizations, OLA has authority to audit the use of that money as well. In addition, OLA's Program Evaluation Division annually conducts six to eight evaluations of state-funded programs in response to requests from legislators. OLA investigates alleged misuse of public resources and conducts special reviews of issues of legislative concern. OLA has access to all documents and data regardless of classification but may not disclose documents or data classified as not public. OLA is directed by the Legislative Auditor, who is appointed by the Legislative Audit Commission (composed of 12 legislators with equal representation from the House and Senate majority and minority caucuses).

Legal authority for the Minnesota Office of the Legislative Auditor: M.S. 3

Fiscal Report (REVISED) 4

mnlottery.com/

AT A GLANCE

- Minnesota voters approved a Constitutional amendment to authorize a lottery in 1988.
- Sales began in April of 1990.
- Since then, the Lottery has raised more than 2.9 billion dollars for the State, including:
 - \$1.7 Billion for the General Fund,
 - \$796 Million for the Environment and Natural Resources Trust Fund,
 - \$209 Million for the Game and Fish Fund and
 - \$209 Million for the Natural Resources Fund.
- During the past year, 42% of Minnesota adults chose to purchase a Lottery ticket, making it one of the most popular forms of gambling in the state.

PURPOSE

The Minnesota Lottery exists to provide revenue for state programs as identified by the Minnesota Constitution and the legislature. We do this by offering fun, innovative and secure games of chance to adults living in and visiting Minnesota.

We contribute to a **thriving economy that encourages business growth and employment opportunities** by designing and marketing a mix of lottery games each year. We partner with approximately 3,000 grocery stores, convenience stores and other retail locations to sell these games to the public. Last year our retail partners earned approximately \$36 million in commissions and incentives.

We contribute to a **clean, healthy environment with sustainable uses of natural resources** by fulfilling our constitutional mandate as a funding mechanism for the Environmental and Natural Resources Trust Fund as well as the Game and Fish Fund and the Natural Resources Fund.

We provide **efficient and accountable government services** by keeping our expenses below the limit set by the legislature and answering directly to our customers' preferences for game design and product mix. Since we are an entirely self-funded agency – we do not receive an annual funding appropriation – sales of lottery tickets provide our operating expenses.

BUDGET

FY 2018 Lottery Revenue Distribution

Source: Minnesota State Lottery

FY 2018 Lottery Beneficiaries

(Percentages rounded)
Source: Minnesota State Lottery

In accordance with the Minnesota Constitution, 40 percent of net lottery proceeds are dedicated to the Environment and Natural Resources Trust Fund. The remaining 60 percent is dedicated to the General Fund by statute. In addition, revenue from a 6.5% in-lieu-of-sales tax on lottery tickets is divided by statute between the General Fund, the Game and Fish Fund, and the Natural Resources Fund.

In FY 2018, the Lottery generated \$596 million in total sales and other revenue. Of that amount, \$371 million (62%) was paid to players winning prizes; retailers earned \$36 million (6%); the cost of producing and distributing tickets was \$16 million (3%); administrative expenses totaled \$29 million (5%) and lottery beneficiaries received \$145 million (24%). Of that \$145 million, the General Fund received \$79 million (54%), including \$1.8 million designated for compulsive gambling treatment programs; the Environment and Natural Resources Trust Fund received \$38 million (26%), and the Natural Resources Fund and the Game & Fish Fund each received \$14 million (10% apiece).

STRATEGIES

As a self-funded enterprise, we work to:

- Understand our customers by investing in market research, monitoring sales results of our products, talking with our business partners and listening to players and others who have questions, suggestions or concerns.
- Design lottery games that appeal to adults living in or visiting Minnesota who choose to play.
- Distribute those games by working with our retail business partners to sell our product.
- Support those products with appropriate advertising, promotions and incentives.

RESULTS

Sales have increased from about \$480 million a year in FY 09 to almost \$600 million over the past nine years, including a record \$596 million in FY 18.

Retailer compensation has also been growing. In FY 18, they earned \$36 million or, on average, \$12,000.

Revenue Raised for Minnesota

Our most important measure of success is contributions to the state. Revenue to the state has exceeded \$118 million every year since FY 09. FY 18 saw the highest contributions to state programs in the Lottery's history.

Administrative Expense as a Percent of Total Income

We have been able to increase sales and revenue while keeping our administrative expense close to five percent of total income.

Past Year Lottery Play by Age

The greatest challenge facing the Minnesota Lottery is the declining interest in lottery games by young adults.

Statutes governing the Minnesota Lottery are found in M.S. 349A <https://www.revisor.mn.gov/statutes/?id=349A>.

AT A GLANCE

- Provides all information technology (IT) services to 64 executive branch entities and offers a sub-set of services to cities, counties and other non-executive branch entities
- Responsible for 2,271 IT employees in FY 18
- Hosting and support of more than 2,800 agency applications in FY 18
- Manages security for systems and applications at 135 locations
- Oversight of executive branch IT application and project portfolio

PURPOSE

We partner with Minnesota state agencies to deliver technology solutions that transform how government connects to provide services for the people of Minnesota. As the State's provider of efficient and cost-effective IT services for agencies and citizens, MN.IT Services directly contributes to the State's results-based outcome of: **Efficient and accountable government services**. In addition, we support all of the results-based outcomes, including health, public safety, employment and economic development, education and natural resources, by providing IT computing and telecommunications resources to support agency business goals, and by managing the applications that run agency programs.

BUDGET

Spending by Category
FY 17 Actual

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Note: This chart excludes enterprise chargebacks to agencies and includes other agency funds dedicated to Information and Telecommunications Account projects.

Source: Consolidated Fund Statement

MN.IT spending is primarily funded by chargebacks to agencies for IT services through the enterprise technology fund (excluded from Spending Chart above), which, in budget fiscal year 2017, totaled \$472.8 million. General fund appropriations provide funding for the Chief Information Officer (CIO) office, enterprise security, and geospatial (MNGeo) functions and some projects. General fund spending increased in FY 2008-09 primarily for enterprise security, which was reduced in subsequent biennia. The remaining spending occurs in the special revenue fund, which consists of agency contributions to enterprise IT projects.

Since the 2011 Legislature enacted IT consolidation, MN.IT consolidated finances, purchasing, and data centers to produce cost avoidance for the state. Current enterprise service projects focus on those IT functions that can be more efficiently delivered through a centralized service. These projects are managed in stages to avoid disruption to state business and for efficiency.

STRATEGIES

Securing the State – As part of MN.IT’s efforts to protect Minnesotans from cyber threats and protect the State’s sensitive data assets, MN.IT is currently implementing an Information Security Strategic Plan. The plan prioritizes initiatives for the management, control, and protection of assets, including:

- Proactively managing risk
- Improving situational awareness
- Having a robust crisis and incident response
- Partnering with public and private entities to ensure success

Optimizing Enterprise Services – As part of a multi-year effort to fully realize the benefits of IT consolidation, MN.IT is transitioning agencies from a diverse, decentralized IT delivery model to a common, centralized IT service model for a subset of IT services that can be more efficiently and effectively consumed as a commodity service. Maximizing shared technologies gives the state the opportunity to provide high value services to customers. This approach improves the security of agency systems and allows our agency partners to focus on serving citizens and building value-added business applications.

Strengthening IT Modernization Program Management – With Minnesota’s executive branch state agencies in the midst of several concurrent IT system modernization efforts, MN.IT is strengthening IT program management and oversight practices through its Enterprise Program Management Office (ePMO) to maximize the potential for project success, apply lessons learned across agency silos, bring consistency to project reporting and tracking, and ensure project risks are appropriately mitigated.

MN.IT Services legal authority comes from M.S. 16E
(<https://www.revisor.leg.state.mn.us/statutes/?id=16E&view=chapter>).

Recommendation:

The Governor recommends a \$2.050 million General Fund increase for the Minnesota IT Services (MNIT) Enterprise Program Management Office in FY 2020 and in FY 2021, and a \$1.2 million increase each fiscal year thereafter to boost oversight of the State IT project portfolio. Funding from this request will provide resources to yield a more robust and consistent approach to MNIT portfolio and project oversight across the Executive Branch.

This recommendation is equal to a 77% increase to MNIT's General Fund base budget for the FY 2020-2021 biennium and a 45% increase in the FY 2022-2023 biennium.

Rationale/Background:

IT project management oversight is a significant challenge for large and widely-distributed IT project portfolios. To help mitigate risk and ensure portfolio and project governance, organizations spend tens of millions of dollars to govern their IT portfolios through enterprise project management offices, specialized project-audit departments, risk-mitigation strategists and carefully developed policies and automated processes to make IT project governance more effective. Mature organizations (Google, Facebook, and Microsoft, for example) are successful in their project delivery because of the vast amounts of time and money they devote to critical governance oversight.

Minnesota IT Services faces many of the same IT governance challenges. MNIT is a large and complex organization that serves the IT needs for 34,000 state employees and the 5.6 million residents of Minnesota. MNIT has 350+ complex IT projects in process at any given time, ranging from multi-month to multi-year, multi-million dollar projects. This is in addition to myriad IT maintenance, hardware modernization and troubleshooting activities taking place at any given time across Minnesota. MNIT project teams and technical service staff are distributed across 70+ agencies, boards and commissions, employing 2,300+ staff in 90 physical locations, connecting all 87 counties, 300 cities and 200 higher-education campuses.

MNIT has been making progress in portfolio and project management oversight. Over the past three years MNIT has implemented portfolio management programs that have:

1. Increased the transparency of MNIT's IT portfolio through improved real-data reports to the Legislature.
2. Implemented online project management software as an enterprise-wide common repository for managing project data and project development activity in a software tool that all project managers can easily access.
3. Adapted the Information Telecommunications Account funding program to include a process for the review and approval of project/funding through the Legislative Advisory Council.

4. Implemented a comprehensive outreach program to connect MNIT Chief Business Technology Officers (CBTOs) and their project management leaders with information on Minnesota State project-management statutes and MNIT project management policies, standards, and best practices.

While project oversight has improved, wide gaps still exist between what MNIT is able to do with its limited number of current staff and the critical operations it still needs to put in place.

Proposal:

MNIT proposes to leverage this increased General Fund to support project oversight through investments and activities that will:

1) Deliver measurably improved project tracking and executive reporting of leading indicators for managing MNIT's project portfolio, by:

- a. Allowing for proactive course-corrections and demonstrable improvements in portfolio and project monitoring and control,
- b. Providing MNIT executives with improved decision-making abilities, based on accurate and robust portfolio and project data,
- c. More fully controlling the Information Telecommunications Account funding program—based on Legislative Auditor findings, and,
- d. Engaging a dedicated outside contractor to 1) uncover and address systemic barriers to delivering successful projects, 2) develop and implement an action plan to improve the mitigation of project risks, and 3) ensure that IT project proposals include quantifiable performance and success criteria against a set of tangible, measurable business outcomes.

2) Strengthen enforcement of enterprise-wide project management standards, compliance to ensure that:

- a. Project-risk assessments and audits are more uniformly conducted and findings are addressed according to Minnesota statutory and other oversight body requirements,
- b. Project managers are working in an environment with clear project-management policies and standards, common project-management tools, and best practices consistent across agencies. (An added benefit of this environment will be a more robust portfolio and project reporting structure.),
- c. Project managers are properly trained and informed of MNIT's project management policies and standards,
- d. Needed processes are in place to monitor and measure enterprise-wide compliance to State statutes, and MNIT project management policies and standards.

3) Assess and verify delivered project benefits to:

- a. Ensure that projects are not started without clear benefits and success criteria as part of the overall project plan,
- b. Measure and monitor project progress against specified success criteria to ensure that projects are on target to deliver the promised benefits to stakeholders.

This proposal includes one-time funding for a two-year professional service contract to investigate and analyze gaps in MNIT's project management oversight process, create an improvement roadmap plan, set goals, and implement this plan, which will address existing oversight gaps, improve project oversight, and conduct periodic reviews of the program's success and make adjustments, as needed.

This proposal's ongoing funding will cover costs for eight staff to strengthen and better administer IT portfolio and project management oversight and control. Currently there are three staff funded by the MNIT Internal Service Fund, who have large portfolios to manage.

Equity and Inclusion:

Individuals who utilize government services of any kind rely on IT projects to improve and simplify their interactions with government offices.

IT Related Proposals:

This request is for ongoing information technology staff support, as well as professional services for analysis, training, and follow up. There are no associated IT system operations or maintenance costs.

Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	12,650	7,847	7,347	7,347
FTEs	14	14	14	14

Recommendation:

The Governor recommends a \$12.650 million General Fund increase in FY 2020, a \$7.847 million increase in FY 2021, and a \$7.347 million increase each fiscal year thereafter to support a robust cybersecurity program at Minnesota IT Services (MNIT) to defend state systems and information. FY 2020 funding will reduce the state's cyber risk by shrinking the number of datacenters and improving MNIT's cybersecurity program. The recommended ongoing funding allows MNIT to maintain a baseline security posture and capability through a combination of internal staff, licensed tools, and outsourced consultation and services. These investments will prevent more low-sophistication attacks and expedite detection and response to moderate- and higher-sophistication attacks.

This recommendation is equal to a 383% increase to MNIT's General Fund base budget for the FY 2020-2021 biennium and a 274% increase in the FY 2022-2023 biennium.

Rationale/Background:

Entities in both the public and private sector face unprecedented and continuously advancing cybersecurity challenges. Low-to-moderate sophistication attacks are more effective and profitable than ever, giving rise to significant increase in their frequency. Investments in offensive cyber operations by both criminal organizations and nation states has also led to an increase in the most sophisticated attacks. Further, the pervasiveness of information systems in everything government does increases the effectiveness, impact, and disruption resulting from such attacks. Studies by lead researchers in the field suggest this trend is unlikely to reverse any time soon.

Government faces the particular challenge of not only attracting the attention of profit-motivated attackers but also politically motivated activists. Minnesota experiences an average of 83 security incidents every month, a quarter of which are email phishing attacks. Some incidents become data breaches which cost the state time, money, and the confidence of citizens. On average, comparably-sized private sector organizations spend greater than 6% of their overall IT budget on cybersecurity, a value that increases year over year. Despite facing the same or, in many cases, greater challenges, Minnesota spends less than 2%.

While some agencies have historically invested in security, most have not, and before certain efficiencies can be realized, those agencies must be brought up to a minimum supportable standard. A first-year investment sets up the state to more effectively leverage longer-term security spend. In recent years, all agencies have benefited by sharing resources that result in broader availability of deeper expertise. Bringing under-investing agencies up to a minimum baseline will free more resources to improve services for all agencies, regardless of historical spend.

Proposal:

MNIT's "Securing the State" proposal will decrease the frequency and impact of security and data breaches by executing two separate but related initiatives:

Reduce the Attack Surface

Bring agency IT into enterprise-grade, physically secure, and robust datacenters.

- Consolidate the physical aspect of information systems, improving the resilience of many IT systems against weather or power interruption
- Simplify the technology by reducing the number of systems and distance over which state systems must communicate to perform basic functions
- Integrate physical security, monitoring tools, and vulnerability management solutions into the enterprise environment

Reinforce and Equip the State's Cybersecurity Team

Staff the security program and equip that staff with tools and consultants that make them more effective.

- Mature agency application security capabilities
- Jumpstart statewide PCI compliance initiative
- Improve detection and blocking of attacks on State employees
- Develop System Security Plans for new systems under development
- Conduct ongoing security risk assessments of existing agency business systems
- Expand security awareness training for the state workforce
- Improve access management capabilities, including expanded oversight of people with powerful system administrator accounts
- Use independent assessors to confirm the adequacy of security controls
- Secure appropriate cyber insurance coverage for the State of Minnesota
- Invest in and deploy advanced cybersecurity tools to detect security anomalies faster and mitigate the risk of distributed denial of service attacks
- Improve situational awareness and response times through around the clock monitoring
- Develop and perform ongoing tests of disaster recovery strategies

This recommendation upgrades the state's existing cybersecurity toolset and adds 14 security professionals to the state's enterprise cybersecurity team. The funding would also allow for the procurement of commercial professional/technical services in the areas of monitoring, vulnerability management, incident response/forensics, risk and compliance, and state employee security training. This funding would also enable the acceleration of existing data center consolidation efforts which improve IT system economy, resiliency, and facilitate security.

This proposal includes what can reasonably be implemented in FY 2020 and FY 2021, after which further assessment against the evolving threat landscape will be required to determine residual risk and what further investment is warranted. Funding for ongoing performance assessments is part of this recommendation.

Equity and Inclusion:

Individuals who utilize government services of any type are disproportionately at risk of their private data being breached in the event of a cyber-attack on Minnesota state government. In addition, individuals who rely on government services would be disproportionately impacted if a cyber-attack were to render government technology systems inoperable. This proposal includes one-time funding to bolster the state's cyber defenses to combat such an attack and includes ongoing funding to help ensure the security of state systems and citizen data held by executive branch state agencies.

IT Related Proposals:

This proposal is for ongoing information technology staff support, as well as tools and services including infrastructure, hardware, software and training.

Change Item Title: Cash Flow Assistance

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends authorization of cash flow assistance of up to \$50 million for the FY 2020-2021 biennium and repayment with interest by the end of the fiscal year 2021 closing period.

Rationale/Background:

Minnesota Management and Budget (MMB) is authorized by Minnesota Statute 16A.129 to provide cash flow assistance to agencies within a budget period. In 2013, MMB was first specifically authorized to provide cash flow assistance to Minnesota IT Services (MNIT) of up to \$110 million within the FY 2014-2015 biennium. (See Laws of 2013, Chapter 142, Article 1, Section 10.)

The assistance was authorized to address working capital needs due to a lengthy cash conversion cycle: the time between MNIT incurring expenses on behalf of agencies, such as procurement and payroll expenses, and receipt of agency payments for those expenses. MNIT has learned over the past several years that the volume of purchases processed on behalf of larger agencies places significant pressure on the cash flow conversion cycle. The current cash conversion cycle ranges between 30-90 days.

MNIT is requesting a reduced amount of cash flow assistance for the FY 2020-2021 biennium. Previously, MNIT has requested \$110 million. The reason for the reduction is that the Agency IT Services budgets have moved to the Special Revenue Fund.

There is no net cost impact to the General Fund since this is a cash assistance that will be repaid with interest.

Proposal:

This proposal provides cash flow assistance of up to \$50 million for the FY 2020-2021 biennium and provides the General Fund repayment with interest by the end of the fiscal year 2021 closing period. The proposed cash assistance is needed to manage MNIT's cash flow effectively.

Program: IT for Minnesota Government

Activity: IT Services

mn.gov/mnit/

AT A GLANCE

- Internal service fund consisting of enterprise and shared IT services provided to agencies through rates
- Data center management for 2 enterprise data centers
- Service desk and desktop support for 40,000 customers
- Enterprise communication/collaboration tools for 38,700 users
- MNET (Minnesota's Network for Enterprise Telecommunications)- the State network for education, local governments and agencies with 1,300 locations and 36 regional network hubs
- Local and long distance telephone service delivered by 70 different vendors to 100 customers

PURPOSE & CONTEXT

This activity meets the need for an effective, secure and reliable IT infrastructure capable of providing the wide range of IT services and business functionality required by agencies to meet program goals and objectives. The activity is comprised of both enterprise standard services and those that are provided at the agency-based office level. The primary customers are state government entities and, by extension, the citizens of Minnesota.

SERVICES PROVIDED

IT Services include all of the computing, telecommunications, and Wide Area Network (WAN) services that underlie and support the program applications upon which state agencies rely:

- Mainframe and server infrastructure required to run agency applications, as well as data center management
- Client Computing (worker support): Service Desk, Mobile Device Management, Workstation Management
- Contracted Telecom Services: local and long distance voice services contracted through third party telephone vendors
- Internet protocol (IP): the state's voice over internet phone system
- Contact Center Minnesota: call center providing customer solutions
- Wide Area Network Services (WAN): services that enable the use of the state's communications network for voice, data, and video
- Local Area Network (LAN): communications network connecting devices within a building or campus
- Enterprise Unified Communication and Collaboration (EUCC): email, instant messaging, SharePoint, video and voice conferencing

Priorities are aimed at making the IT infrastructure more efficient so we can focus MN.IT's staff, budget and creativity on the application-layer services that most directly make a difference for customers and citizens.

Priorities for the coming biennium include:

- Combine all agency user active directory (AD) systems and resources into a single executive branch active directory system. An active directory (AD) authenticates and authorizes all users and computers in a Windows domain type network.
- Increase resiliency and versatility in the State network core in order to improve performance and to facilitate the movement to cloud-based services.

- Design and create an enterprise server environment and a managed hosting service that is delivered by a dedicated enterprise team, allowing the state to decrease the number of data centers it operates and to improve the security of the State's data assets.
- Initiate and operate a common mobile device management service to manage state and personally owned mobile devices that are permitted to have access to state resources and data.
- Create a centrally managed service desk and work management function for all executive branch agencies.
- Combine individual agency SharePoint and other collaboration tools in order to leverage our investment in the cloud-based EUCC infrastructure.
- Embed security functionality and monitoring into enterprise infrastructure services such as hosting and storage.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of data centers	27	16	FY 2016, FY 2018
Quality	Digital State Survey by the Center for Digital Government, a review of all 50 states' electronic government capabilities	B+	A-	Sept 2016, Sept 2018
Quality	% of MN.IT services rated as 'Reasonable' to 'Best Value' vis a vis other states as determined by independent rates analysis study	77%	93%	FY 2016 FY 2017
Results	Customer Survey Results. Percent of respondents reporting they are generally satisfied with the technology and support received from MNIT.	N.A.	66%	August 2017
Results	State network core. On an annual basis, the percent of time the network is available to users.	99.99%	99.99%	FY 2016, FY 2018
Quantity	Disk capacity in PetaBytes (PB). Increase in capacity meets growth in demand for storage.	2.5 PB	8.4PB	Jul 2016, Jul 2018
Quantity	Email mailboxes. Expanded capacity accommodates a greater number of users.	45,362	46,617	Jul 2016, Aug 2018

Program: IT for Minnesota Government
Activity: Applications, Projects and Initiatives

mn.gov/mnit/

AT A GLANCE

- Responsible for management and oversight of 2,800 agency applications
- MNIT's FY18 project portfolio included:
 - Approximately 375 actively managed projects at any point in time.
 - Projects associated with biennial IT (BIT) appropriations to agencies.
 - 92 agency-funded Information Technology Account (ITA) project budgets addressing specific agency needs—\$28.6 M budgeted in FY18.
- Special revenue initiatives set aside for a specific purpose

PURPOSE & CONTEXT

MNIT is responsible for the development and management of IT applications that meet the business requirements of executive branch agencies. The Enterprise Program Management Office (ePMO) and Project Management Office (PMO) provide oversight of approved IT projects, both enterprise and agency-specific. This activity focuses on development of citizen-facing systems as well as smaller, internal systems development, upgrades, and operational improvements. An example of a citizen-facing system is the Department of Employment and Economic Development's Unemployment Insurance system, which enables citizens to apply for and obtain unemployment insurance benefits through an online, self-service system.

SERVICES PROVIDED

Applications and Projects include all of the activities related to the development, implementation, and support of the IT application and project portfolio of the executive branch. This includes:

- Oversight and monitoring of agency applications by MNIT executive management in partnership with agency customers
- Enterprise project and portfolio management, including creation of standards for project management, business analysis, and quality assurance
- FY 2020-21 biennial IT (BIT) business application projects for agencies and agency-contributed funds to the Information Technology Account (ITA) also known as Odyssey projects
- Special revenue initiatives set aside for a specific purpose
 - BUY.IT group that negotiates software license agreements on behalf of the enterprise
 - Special appropriation that addresses enterprise accessibility requirements-Telecommunications Access MN (TAM)
 - MMIS Service Contract (DHS)
 - Enterprise e-licensing surcharge account
 - Homeland Security grant

Program: IT for Minnesota Government

Activity: Leadership

mn.gov/mnit/

AT A GLANCE

Leadership includes general funded functions that support the enterprise:

- State Chief Information Officer (CIO) office (strategy, direction, planning)
- Enterprise Security Services
- MN Geospatial Information Office

PURPOSE & CONTEXT

IT leadership covers the administrative and oversight functions of an agency with more than 30 locations. It provides the management strategy and high-level tactics that help MN.IT Services fulfill its mission and provides organizational management based on the agency's key priorities. In addition, IT leadership develops and guides IT consolidation priorities and projects. Key partners include the Governor's Office, the legislature, agency business leadership, and MN.IT services management and staff.

SERVICES PROVIDED

The CIO Office, Enterprise Security, and MN Geospatial Office listed provide the leadership, planning, and support that allow IT services to be delivered to customers in a high-value, cost-effective and safe manner. IT leadership funded by general appropriations for the FY 2020-21 biennium are:

- The State CIO Office provides the overall strategy, direction and planning over executive branch information technology. This responsibility includes management of the migration of infrastructure from agency-based offices to enterprise services.
- The Enterprise Security Office (ESO) provides the vision and strategy necessary to secure the state.
 - Implement the security foundation for the executive branch that includes a comprehensive Service Delivery Model, Policy and Standard Framework and an Information Security Strategic Plan
 - Promote collaboration and partnership Provide with other levels, units, and branches of government, in order to more effectively address the increasing barrage of advanced and persistent threats.
 - Improve Minnesota's cybersecurity workforce through partnerships with academia, promotion of cybersecurity careers, and innovative programs like Scholarship for Service.
- MnGeo's primary role is to provide geospatial coordination and collaboration and to act as a service bureau to the state agencies on geospatial matters. This involves outreach and communication between state agencies, with local and national government agencies, as well as with non-government organizations and citizens. It also involves data coordination efforts, especially stewardship of important statewide datasets, fostering use of data standards, and identification and prioritization of data gaps. These coordination efforts have led to MnGeo and several partners creating the Minnesota Geospatial Commons, <https://gisdata.mn.gov>, a collaborative place for users and publishers of geospatial resources about Minnesota.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	<p>IT Spend percent of total state expenditures. By comparison, Gartner, a marketing research firm, reported IT Spend (as a % of expenditures) for state/local government entities (greater than \$10B in expenditures) as follows: FY14, 2.25%; FY15, 2.1%.</p> <p>Note: IT Spend ratio to expense is a key measure of the amount of IT resources relative to the size of an organization. Therefore, it can be seen as a measure of IT efficiency and relative IT funding.</p>	1.56%	1.28%	FY17, FY18
Quantity	Number of agencies contributing data to the Geospatial Commons	24	29	FY17, FY18

MNIT Services

Enterprise Technology Fund (5500)

Brief Narrative

Background:

MN.IT Services (Fund 5500) operates as an internal service fund and provides enterprise IT services mainly to the executive branch and some enterprise services to other Minnesota government customers.

Detail of any loans from the general fund, including dollar amounts:

As per Legislation of 2017 (Special Session), Chapter 4, Article 1, Section 10, Subd. 2 authorizes MMB to provide cash flow authority up to 110 million to MNIT Services. MNIT has borrowed 110 million and this will be repaid with interest by the end of FY19 hard close.

Proposed investments in technology or equipment of \$100,000 or more:

The FY20-21 budget includes Master Lease expenditures for replacement of Local Area Network (LAN), server, and storage equipment (end-of-life) and maintenance contracts associated with new and existing equipment.

Explanation of changes in net assets (formerly retained earnings increases, operating losses):

Net Asset change from FY16 to FY18 is primarily due to GAAP accounting principle change for Other Post Employment Benefits (OPEB) liability as well as increase in compensated absence liability. No change to net asset is projected for FY19 and later years.

Explain any reasons for rate changes:

For the FY20-21 rate package, MNIT continued to establish rates based upon forecasted volume and expenses. Volumes are based upon agency demand estimates and expenses take into account contractual salary and vendor cost increases. 84% of FY20 rates were lower or unchanged compared to FY18 rates due to increased volume and/or a shift of certain overhead activities into administrative charges that are direct billed to agencies. Product line margins are monitored on a quarterly basis to assess the potential over or under recovery that may require a rate adjustment or rebate/bill. As a result of the quarterly review process, six (6) enterprise service rates were adjusted in FY19 resulting in \$3.4 million savings to agencies. MNIT will continue to monitor product line net margins for the remainder of FY19 and into FY20 which may result in further rate or billing adjustments.

Impact of rate changes on affected agencies:

The overall impact of FY20 enterprise rates to agencies (excluding volume changes) is favorable. Beginning in FY18/19 MNIT changed the method of overhead allocation to be fairer to small agencies and boards. Some overhead, e.g. HR, procurement, for instance, is direct billed to agencies while other overhead is allocated to services. As a result, some larger agencies may experience an increase in their overhead costs. However an agencies' total IT costs depends upon: (1)the type of services consumed, (2)the consumption level (volume) of those services, (3)overhead shifts due to allocation methodology change, and (4)agency pass-through expenses, which consists primarily of applications and projects. An agency impact analysis of proposed FY20-21 enterprise service rates and underlying assumptions was submitted to MMB on September 14, 2018 followed by a complete rate package on October 31, 2018. MNIT communicated with individual agencies about the impact of proposed FY20-21 rates in order to accommodate their need to submit biennial change item requests or make adjustments to service levels if necessary.

AT A GLANCE

- MNsure is Minnesota's health insurance marketplace. Through the MNsure website, Minnesotans can access public health care programs and shop, compare and choose private health insurance coverage.
- The Minnesota Eligibility Technology System (METS) determines eligibility for Medical Assistance, Minnesota Care, and Advanced Premium Tax Credits (APTC).
- MNsure provides customer assistance through its call center and network of assisters.
- MNsure employs between 175 and 200 people throughout the year, increasing staff levels during open enrollment.

PURPOSE

The purpose of MNsure is to ensure that every Minnesota resident and small business, regardless of health status, can easily find, choose, and purchase a health insurance product that they value and does not consume a disproportionate share of their income. MNsure is a one-stop health insurance marketplace where consumers can compare, shop, and find affordable, comprehensive health insurance coverage.

Plans and programs available to enroll in through MNsure:

- **Private:** Health and dental plans are offered by partnering insurance companies through the MNsure marketplace. These are known as qualified health plans (QHPs) or qualified dental plans (QDPs). All private plans offer the same core set of benefits called "essential health benefits" which include preventive services, mental health and substance abuse services, emergency services, prescription drugs and hospitalization, and follow established limits on cost-sharing (deductibles, co-payments and out-of-pocket maximum amounts). Each private health and dental plan has been reviewed by state regulators and are approved to be sold through MNsure. Most Minnesotans purchasing a QHP qualify for APTC (tax credits).
- **Public:** Medical Assistance (MA or Medicaid), and MinnesotaCare (Basic Health Plan). MA is the largest of Minnesota's publicly funded health care programs, providing health care coverage to a monthly average of 1.1 million low-income Minnesotans. Like MA, MinnesotaCare provides health care coverage for people with low incomes, but has higher income limits.

MNsurre's work contributes to the goals of optimal health for Minnesotans, a thriving economy that encourages business growth and employment opportunities, and Minnesota families and communities that are strong and stable.

BUDGET

Spending by Category FY 18 Actual

Total FY 18 Spending = \$50.5 million

Source: Budget Planning & Analysis System (BPAS) FY 18 Spending as of September, 2018.

MNsure is a self-sustainable agency utilizing QHP premium withhold revenue and reimbursements from the Department of Human Services (DHS) for costs incurred which benefit public programs. Expenditures that benefit both public and private program enrollees are allocated between MNsure and DHS based on the Public Assistance Cost Allocation Plan (PACAP). The plan allocates these expenditures using a number of metrics, such as public program enrollment and call center utilization. For Fiscal Year 2018, it is estimated that 12 percent of the budget will have been funded with federal grants, 53 percent funded with QHP premium withhold revenue, and 36 percent funded with DHS resources. Federal grants for establishment of the exchange were fully expended by December 31, 2017. For Fiscal Year 2019, the budget will be funded with QHP premium withhold revenue and DHS reimbursements.

STRATEGIES

MNsure utilizes three primary strategies to promote enrollment in health insurance: financial assistance, customer service and application assistance, and outreach campaigns.

MNsure is the only place where consumers can access financial help to make the cost of insurance more affordable. Consumers may be eligible for tax credits to reduce private insurance premiums, a low-cost plan through MinnesotaCare, or a no-cost plan through Medical Assistance. Consumers access MNsure at www.mnsure.org where they can apply for and receive financial assistance based on income and family size.

MNsure employs a number of customer service channels that consumers can access for help with the application and enrollment process. MNsure operates a toll-free call center that supports consumers Mondays through Fridays with extended hours during open enrollment, including Saturdays and some Sundays. Within the call center, MNsure has dedicated staff working closely with insurance agents, brokers, navigators, and insurance carriers. MNsure also supports a network of insurance agents, brokers, and navigators who provide consumers with in-person help.

MNsure executes an outreach and marketing campaign before and during the annual open enrollment period to drive enrollment and awareness. This campaign includes traditional, digital, and social media, as well as grassroots activation and outreach.

MNsure depends on information technology to support the organization and deliver value to both MNsure and its consumers.

- MNsure relies on the Minnesota Eligibility Technology System (METS) to determine whether customers are eligible to purchase a QHP and receive federal tax benefits, or whether they qualify for assistance in a public health program. MNsure agents and DHS/county caseworkers also use METS on a daily basis for case maintenance tasks. The software uses the Modified Adjusted Gross Income (MAGI) methodology to determine public program and tax credit eligibility, as required by the federal Affordable Care Act (ACA). The METS system was first introduced in 2013 and is a shared platform between MNsure, DHS, and Minnesota counties. METS IT development and maintenance is overseen by MNIT.
- MNsure uses commercial off-the-shelf software for the website's plan comparison and shopping tools. The provider of these tools made the decision to exit the marketplace. In response, MNsure issued an RFP for decision support, shopping, enrollment and system of record software. MNsure awarded a contract in December 2018 and the vendor has delivered Phase 1 of the project. Phase 2 will be delivered in 2019, in time for 2020 open enrollment.

Recommendation:

The Governor recommends establishing a 20 percent health insurance premium subsidy available to Minnesotans purchasing qualified health plans (QHPs) through MNSure who have been determined ineligible for Advanced Premium Tax Credits (APTC). The proposal includes an \$8.052 million appropriation to MNSure from the health care access fund in FY 2020. Ongoing program management expenses would be paid using MNSure premium withhold revenue.

Rationale/Background:

Approximately 150,000 people are expected to purchase insurance on the individual health insurance market in 2020. Approximately 80,000 Minnesotans are purchasing in the individual market and are not receiving federal tax credits.

In Plan Year 2016, average premiums for plans purchased through MNSure averaged \$377/month. In Plan Year 2017, these premiums swelled to \$571/month. Minnesota has attempted several measures to make premiums more affordable for individual market consumers, including a premium subsidy program in 2017 and a reinsurance program in 2018 and 2019. Unlike a reinsurance program, a premium subsidy program will target those consumers who do not already benefit from federal assistance.

Anyone purchasing health insurance through MNSure in 2020 and beyond, who is not receiving federal APTC or enrolled in a state public program, would be eligible to receive the 20 percent premium subsidy. Up to 80,000 people could participate in the program.

Proposal:

A 20 percent premium subsidy will be available to Minnesotans purchasing qualified health plans (QHPs) in the individual market through MNSure and were determined ineligible to receive APTC. The premium subsidy will be applied as a 20 percent discount off monthly premiums.

MNSure's shopping tool will be enabled to implement this premium subsidy so that at the point of purchase Minnesotans will see the true premium price they will pay. Consumers who wish to see estimated costs using "anonymous shopping" prior to setting up an account with MNSure will also be able to do so. This functionality will be applied to eligible consumers renewed into plan year 2020 coverage and for new consumers submitting applications starting on November 1, 2019. This premium subsidy will continue into future years unless or until a change in law occurs.

- The subsidy will be available toward Bronze, Silver, Gold, or Platinum plans offered through MNsure.
- MNsure will administer the premium subsidy through payments to carriers, reimbursing them for premium subsidy discounts applied to premium bills sent to enrollees.
- Eligibility for a given month during the coverage year is tied to whether or not a consumer is found eligible to receive APTC for that particular month.
- MNsure will provide an online end-of-year statement to each premium subsidy recipient by January 31, 2021 and each January thereafter.

Equity and Inclusion:

MNsure's mission is to ensure all Minnesotans have the security of health insurance.

We serve Minnesota individuals and families who are:

- Uninsured and underinsured
- Buying health coverage on their own
- Seeking a better option
- Qualifying for Medical Assistance (MA) or MinnesotaCare applicants and recipients

Since October 1, 2013, MNsure has processed over 2.8 million enrollments in health and dental insurance coverage. Over 75% of these enrollments resulted in a Minnesotan receiving subsidized insurance coverage, whether via a public program or federal tax credits and cost sharing reductions.

This proposal will enhance Minnesotans ability to purchase affordable health care coverage. The proposal provides relief for consumers who do not qualify for other state-based health coverage programs or do not receive affordable employer-provided insurance, such as self-employed and small business owners.

Results:

Providing this subsidy would mean approximately 80,000 Minnesotans currently in the individual market could be eligible for a reduction in their health insurance premium costs. Analysts at the Departments of Commerce and Health estimate take-up at 70,640 Minnesotans, including 1,040 uninsured Minnesotans. Approximately 40,000 of these individuals are already purchasing through MNsure. We have estimated the remaining 30,640 new recipients will purchase through MNsure to obtain the subsidy.

Statutory Change(s):

Requires new section of MS 62V.

FTEs	1.5	40.5	40	34

Recommendation:

The Governor recommends providing a state-based premium tax credit for Minnesotans who earn too much to qualify for federal assistance to increase affordability of individual market health coverage. The tax credit would be available to reduce the cost of qualified health plan (QHP) coverage starting in plan year 2021.

Rationale/Background:

The Affordable Care Act (ACA) established health insurance exchanges to assist people without health care insurance to find information about health insurance options and purchase health care insurance. Minnesota established a state-based exchange known as MNSure. Qualified Health Plans (QHP) purchased through MNSure may be eligible for a federal premium tax credit to either reduce the cost of the monthly premium or to be claimed after the end of the plan year on the tax return.

In Minnesota, the federal premium tax credit is available for individuals and households with an income above the threshold of public program health coverage, such as Medical Assistance or MinnesotaCare programs, and at or below 400% of the federal poverty level (FPL). Under the Federal Poverty Guidelines for 2019, 400% of FPL for an individual is \$49,960 and for a family of four is \$103,000.

Minnesotans who exceed the 400% FPL threshold do not qualify for federal premium tax credits. Even for many Minnesotans above 400% of FPL, premiums now exceed 10 percent of household budgets.

Proposal:

The proposal establishes a state-based tax credit (SBTC) for Minnesotans who purchase a QHP in the individual market through MNSure. SBTC will be available to any customer who applies for financial assistance through MNSure, projects their household's annual income to be above 400% FPL, meets other program eligibility requirements, and enrolls in QHP coverage.

The amount of the SBTC will be the dollar amount necessary to reduce the premium of the second lowest cost silver plan available to the household to the affordability threshold established under the ACA (9.86% of annual income in tax year 2019, but varying by federal formula each year) after application of the 20% premium subsidy, if any.

Minnesotans will be able to qualify for the credit during the enrollment period, which starts on November 1, 2020, for plan year 2021 coverage. Similar to the federal premium tax credit, the SBTC can be applied to their monthly bill from their insurance provider, during the tax year to which it relates. This allows customers to receive a monthly reduction in premiums with the SBTC amount being paid directly to the insurance company.

Customers will also have an option to decline to claim the SBTC in advance and instead claim the credit upon filing a state tax return for the applicable tax year, generally filed during the following year.

MNsure will:

- Collect pertinent information needed to determine eligibility and facilitate the application of the SBTC, when appropriate, toward the cost of QHPs offered on the exchange.
- Enable the MNsure shopping tool to calculate the proper SBTC amount so that at the point of purchase, customers will see the actual premium price they will pay.
- Provide notice to consumers confirming amount of SBTC applied toward their selected health plan, as well as other program requirements.
- Assist consumers with change to income or other eligibility criteria throughout the coverage year.
- Administer SBTC through payments to carriers reimbursing them for SBTC discounts applied to monthly premium bills sent to enrollees and conduct regular data reconciliation with health insurance carriers.
- Provide an end-of-year file to the Department of Revenue reporting SBTC payments made to customers.
- Provide an end-of-year statement to each taxpayer by January 31 reporting the amount of advance tax credit, beginning in January 2022 and each January thereafter. This statement will include the amount of SBTC received and the premium amount of the second lowest cost silver plan available to the individual or family, less any state premium subsidy received, for each coverage month.

NOTE: The administrative costs for MNsure in this proposal reflect shared investments made in the Governor's 20 percent premium subsidy proposal. The administrative impact and staffing requirements of this program are higher than reflected in this change page and premium withhold revenue is insufficient to cover expenses if considered apart from the premium subsidy proposal.

The Minnesota Department of Revenue will reconcile advanced credits paid and credits due as a part of the individual income tax filing process. The department will review income and SBTC information to determine the appropriate amount of credit. The department will issue refunds for unclaimed or underpaid credits and assess additional tax as necessary to reconcile the credit. The Minnesota Department of Revenue will provide information to MMB annually to reconcile the appropriation.

Equity and Inclusion:

MNsure's mission is to ensure all Minnesotans have the security of health insurance.

MNsure serves Minnesota individuals and families who are:

- Uninsured and underinsured
- Buying health coverage on their own
- Seeking a better option
- Qualifying for Medical Assistance (MA) or MinnesotaCare applicants and recipients

Since October 1, 2013, MNsure has processed over 2.8 million enrollments in health and dental insurance coverage. Over 75% of these enrollments resulted in a Minnesotan receiving subsidized insurance coverage, whether via a public program or federal tax credits and cost sharing reductions.

This proposal will enhance Minnesotans ability to purchase affordable health care coverage. The proposal provides relief for consumers who do not qualify for other state-based health coverage programs or do not receive employer-provided insurance, such as self-employed and small business owners.

Results:

Analysts at the Departments of Commerce and Health estimate providing this state based tax credit would mean approximately 34,880 Minnesotans currently in the individual market would receive this tax credit by 2023 and see a reduction in their health insurance premium costs. Additionally, 13,080 uninsured Minnesotans are expected to enroll in coverage and receive this insurance premium reduction.

Minnesota Statutes, Chapter 290

Table of Contents
Marriage and Family Therapy, Board of

Agency Profile 1

Agency Expenditure Overview 4

Agency Financing by Fund 5

Agency Change Summary 6

Change Item(s) 7

Operating Adjustment 7

AT A GLANCE

- Regulates 2,725 licensees: 2,387 licensed marriage and family therapists (LMFT); 338 licensed associate marriage and family therapists (LAMFT) (as of 08/01/2018)
- Issues an average of 365 new licensees annually (approximately 200 LMFT and 165 LAMFT)
- Processes over 625 license-related applications annually (initial/exam, LAMFT, LMFT final, reciprocity)
- Annually receives and investigates 60-70 complaints
- 100% fee-supported

PURPOSE

The Board of Marriage and Family Therapy's mission is to protect the public and ensure a standard of competent and ethical care through effective licensure and enforcement of the statutes and rules governing the practice of marriage and family therapy. Minnesotans are well-served by our efficient licensing process, monitoring of each licensee's continuing competency through education, thorough and effective investigation of complaints, educational outreach, and publication of disciplinary and corrective actions. The Board's work helps keep Minnesotans **safe** while providing **efficient and accountable government services**.

BUDGET

**Spending by Category
FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

The Board is funded by licensure fees collected from applicants, licensees and continuing education sponsors and receives no general fund dollars. Minnesota Statutes section 214.06, subdivision 1(a) compels the Board to collect fees in the amount sufficient to cover direct and indirect expenditures. Funds are deposited as non-dedicated revenue into the state government special revenue fund. From this fund, the Board receives a direct appropriation to pay for agency expenses. It also pays statewide indirect costs through an open appropriation.

In addition to Board operations, fees collected also fund joint/multiple board entities, such as the Administrative Services Unit, the Health Professionals Services Program and the Criminal Background Check Office, as well as funding legal services provided by the MN Office of the Attorney General.

Initial license and license renewal fees are over 80% of collected revenue with application filings (14%) and continuing education program applications (5%) accounting for the majority of other revenue received.

STRATEGIES

To accomplish the Board's mission, we:

- Set standards for initial licensure, including a review of each applicant's education and training;
- Conduct an in-person examination of each applicant's knowledge of the laws and rules governing the practice of marriage and family therapy in Minnesota prior to issuing marriage and family therapy license;
- Annually review qualifications and renew licenses of current, qualified licensees;
- Investigate complaints made against licensees and applicants, and allegations of unlicensed practice of marriage and family therapy;
- Take disciplinary or corrective action against a licensee or applicant when warranted by conduct and necessary to protect the public;
- Review and approve all continuing education programs used by licensees to meet continuing education requirements for license renewal;
- Monitor and enforce continuing education requirements for license renewal;
- Maintain mandated and educational information on a public website;
- Work collaboratively with academic institutions and national and state marriage and family therapy professional associations to identify, discuss and address issues involving the education, licensure and practice of marriage and family therapists;
- Provide information about licensure and standards of practice to citizens and other business entities;
- Regularly collaborate with other government entities including Minnesota Department of Human Services, Minnesota Department of Health, Health Professional Services Program, and Minnesota Department of Revenue.

Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	18	22	17	17
FTEs	0	0	0	0

Recommendation:

The Governor recommends additional funding and spending authority of \$40,000 in the FY 2020-2021 biennium to maintain the current level of service delivery at The Board of Marriage and Family Therapy. The Board is solely fee supported and will collect sufficient revenue to meet projected operational cost increases.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the Board of Marriage and Family Therapy, this funding will cover known employee compensation growth, rulemaking, and IT costs. IT cost growth drivers may include dedicated MN.IT staff compensation-related increases, increased volume usage of enterprise IT services, increased software licensing costs, and/or application support and maintenance cost increases.

Small Agency Increase:	FY 2020	FY 2021	FY 2022	FY 2023
Increased salary & benefit cost of Board staff (3.0 FTE)	\$6,000	\$9,000	\$9,000	\$9,000
Rulemaking	\$5,000	\$5,000	\$0	\$0
MN.IT / Technology Costs (See detail below)	\$7,000	\$8,000	\$8,000	\$8,000
Total	\$18,000	\$22,000	\$17,000	\$17,000

Equity and Inclusion:

The Board does not discriminate on the basis of race, ethnicity, gender, sexual orientation, or disability. The positive impact of this change will be to continue to provide services for all people of the State of Minnesota without discrimination. There are no potential positive or negative impacts on identified groups.

IT Related Proposal:

Category	FY 2020	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025

Mayo Clinic: School of Medicine and Family Medicine Residency

Agency Profile 1

Agency Expenditure Overview 3

Agency Financing by Fund 4

Agency Change Summary 5

AT A GLANCE

- Mayo Clinic operates hospitals and clinics throughout Minnesota with the main facility located in Rochester, Minnesota. In addition, Mayo Clinic has facilities in Wisconsin, Iowa, Arizona, and Florida.
- Total expenditure toward the educational mission of Mayo Clinic was \$318.2 million in calendar year 2017.
- Capitation funds are used for tuition grants for Minnesota residents attending Mayo Clinic School of Medicine and salaries for Family Medicine residents in Mayo Clinic School of Graduate Medical Education.
- Minnesota residents have comprised 39% of all Mayo Clinic School of Medicine students.
- On average, Mayo Clinic School of Medicine graduates have 36% of debt compared to the typical U.S. medical school graduate.
- Beginning in 1978, 269 trainees have graduated from the Mayo Clinic's Family Medicine Residency program and all training slots have been filled for over 30 years.
- In 2018, 45% of the graduates of the Family Medicine Residency program chose to stay in Minnesota.

PURPOSE

The mission of Mayo Clinic School of Medicine is to train physicians and physician scientist leaders who will practice and teach patient-centered, science-driven, team-based, high-value health care, and contribute to a resilient, diverse and culturally competent physician workforce.

The Mayo Clinic School of Graduate Medical Education Family Medicine Residency Program educates and inspires medical school graduates to pursue careers as family physicians. The program emphasizes training in rural primary care, augmented by subspecialty training.

These two Mayo Clinic programs work to assure that:

- Minnesotans have the education and skills needed to achieve their goals
- All Minnesotans have optimal health
- Minnesota will have strong and stable families and communities

BUDGET

Total Expenditure in FY 2017-18: \$19,621,200
Source: Mayo Clinic Education Finance Department

Source: Mayo Clinic Education Finance Department

The overall operating expenses in the 2017-2018 fiscal year for the School of Medicine and the Family Medicine Residency Program was \$19,621,200. State Capitation of \$1,351,000 represents 6.9% of the overall operating expenses of the two programs.

STRATEGIES

The State Capitation funds are used in direct support for the Minnesota residents attending Mayo Clinic School of Medicine. As of July 2018, 39% of the matriculants to Mayo Clinic School of Medicine were Minnesota residents. In the past five years, 40% of Mayo Clinic School of Medicine graduates have chosen a career in primary care. Primary care includes: Family Practice, Internal Medicine, Obstetrics and Gynecology, Pediatrics and Psychiatry. To accomplish this, Mayo Clinic School of Medicine recruits and matriculates high achieving Minnesota undergraduate students who aspire to serve society as physicians by assuming leadership roles in medical practice, education and research. Mayo Clinic School of Medicine offers students opportunities to experience clinical rotations in regional and rural practices. Mayo Clinic School of Medicine remains committed to and focused on containing educational costs for students below the median for private medical schools and mitigating educational debt, which allows students to choose a career in primary care.

The Mayo Clinic School of Graduate Medical Education Family Medicine Residency training program prepares the prospective family physician for primary care medicine in all settings, with special emphasis on population health, team-based care and a practice orientation towards rural and smaller communities. The residents-in-training spend a major portion of their training providing ambulatory, primary and continuity care to patients. The residents participate fully in the department's population management initiatives to improve quality and decrease costs of employee/dependent healthcare. The three-year Family Medicine training program was established in 1978, beginning with four residents. It currently has a maximum of 27 resident training positions. Over time it has grown in size and success, with all training positions filled for the past 37 years. The program has graduated 269 family physicians. The Minnesota capitation appropriation has supported residents' training stipends since 1978.

mn.gov/bms/

AT A GLANCE

- The Bureau of Mediation Services (BMS) oversees the collective bargaining relationship between all public sector employers, charitable hospitals, some private sector employers and their unionized employees.
- Of the 260,000 MN Public Employees; 72% work under 3,548 union contracts.
- In FY18 the BMS received 1,032 requests for service and during the same period there were zero strikes.
- BMS grant funding helped nonprofit mediation centers to provide conflict resolution services in approximately 2,007 neighbor, family, school, housing and other similar types of cases in 2017.

PURPOSE

The BMS mission is to promote orderly and constructive labor-management relations and to advance the use of alternative dispute resolution and collaborative processes.

Labor-Management Relations

1. The BMS monitors collective bargaining disputes and works to prevent strikes and arbitration by directly mediating labor negotiations and grievances and by providing labor-management training.
2. Representation rights (employee's right to unionize or refrain from such) are regulated through a quasi-judicial administrative process including administrative investigations, hearings and elections.
3. BMS clients are: employers, labor organizations, employees, elected officials, labor attorneys and other labor relations professionals.
4. BMS assists the Public Employment Labor Relations Board while the independent board prepares to resolve unfair labor practice claims beginning July 1, 2020.

Alternative Dispute Resolution and Collaborative Processes

Through the Office of Collaboration and Dispute Resolution (OCDR), BMS provides: 1) public policy collaborative problem solving services; 2) funds and promotes the broad use of community-based dispute resolution across Minnesota; and, 3) assistance to other state and local agencies in effectively implementing collaborative and dispute resolution initiatives. The OCDR works with elected officials, state and local government employees, and citizen stakeholders to develop sustainable solutions to contentious public policy issues.

The BMS contributes to the statewide outcomes of: **A thriving economy that encourages business growth and employment opportunities; strong and stable families and communities; and efficient and accountable government services.**

BUDGET

Source: Budget Planning & Analysis System (BPAS)

Source: Consolidated Fund Statement

STRATEGIES

The BMS contributes to statewide outcomes by:

- Mediating collective bargaining and grievance disputes and promoting voluntary resolution of representation questions.
- Promoting cooperation among labor and management through worksite labor management committees.
- Administering a statewide labor-management grant program.
- Maintaining a roster of qualified neutral arbitrators to hear and decide contract and grievance disputes that cannot be resolved through mediation.
- Training labor and management representatives in the skills of negotiation, mediation, conflict resolution, relationship management and interest focused bargaining.
- Ensuring the sustainable resolution of matters of disputes by providing collaborative problem solving services to state and local government.
- Administering a \$160,000 annual grant program to community dispute resolution centers which provide free and low cost mediation services across the state.
- Building capacity of state and local government officials and staff to meaningfully engage the public.

RESULTS

In FY18 BMS resolved a total of 439 grievance and contract cases improving the efficiency and effectiveness of the public and private sector due to stable labor management relations. This resulted in dollars and work hours saved by the prevention of strikes, arbitration, and litigation, and contributed to improved productivity and higher employee morale. The collaborative resolution of public policy disputes improves the efficiency and effectiveness of government by preventing gridlock, generating higher quality solutions, and speeding up implementation of more sustainable solutions.

Measures of BMS work are successful case settlement rates, timely resolution of representation petitions and the quantity of successful community mediations.

Type of Measure	Name of Measure	Previous	Current	Dates
Quality	Percentage of collective bargaining contract and grievance disputes successfully settled through mediation	90%	92%	FY17, FY18
Quality	Percentage of representation elections successfully completed within 90 days	97%	92%	FY17, FY18
Quality	Percentage of OCDR cases successfully settled through collaborative problem solving.	67%	100%	FY17, FY18
Quantity	Number of mediations provided by BMS funded nonprofit dispute resolution centers	1,973	2,007	CY16, CY17
Quality	Percentage of conflict resolution services provided by BMS funded centers which successfully reached resolution	69%	72%	CY16, CY17

Recommendation:

The Governor recommends \$112,000 in FY20 and \$112,000 in FY21 for the creation of an extensive and comprehensive mediator training program within the Bureau of Mediation Services (BMS). This program is meant to hire, train and educate one individual to the unique profession of mediation. In addition to salary costs, this proposal includes state travel, per diem, educational expenses, and supplies.

Rationale/Background:

For more than 78 years, the BMS has provided mediation services to employer and employee groups within the State of Minnesota. In 1971 these services were extended to public employers with the passage of the Public Employment Labor Relations Act, increasing the agency's caseload to over 1,500 cases per year. The success of the BMS is due in large part to the highly qualified and experienced mediation staff, who have served in the labor relations field for a number of years. The experience needed to become a successful mediator often makes hiring a diverse and well qualified staff challenging. Often applicants are educated in employee relations or human resources and have access to many other career options, or applicants are highly experienced making the hiring process very competitive. Additionally, as the BMS seeks experts in the mediation field, many do not look to public employment due in part to sub industry wages. Because of this the agency is seeking a program to hire and train individuals who are new to field of mediation.

By reinstituting the mediator training program, the Bureau can seek individuals coming out of school and train them in the unique aspects of labor management relations. This two year training program covers all the areas mediators are customarily presented; contract negotiations, interest based bargaining, negotiation impasse, arbitration, certifying issues, strikes, employee representation, certification and officer elections, unfair election charges, grievances, arbitration, independent review, determining appropriate units, unit clarifications, determining public employee status, identifying public employers, labor-management committee training, issue facilitation, and unfair labor practices.

Proposal:

The Governor recommends the creation of a mediator training program within the Bureau of Mediation Services. This program will train one new professional mediator, increasing the supply of quality and diverse mediators. This program will fund one mediator salary, travel costs, and education costs, as well as work materials including MN.IT services.

Equity and Inclusion:

The creation of a mediator training program allows the BMS to consider a larger pool of applicants when hiring and creates more opportunities for employment in the field of mediation for those who may not have previously had the qualifications or are underrepresented in the field. Upon completion of this program the trainee will have gained the skills and experience for a profession in mediation.

Results:

The BMS has a case load of over 1,500 cases per year. By increasing mediation staff, it is expected that the wait time for public employees and employers to access mediation services will be decreased.

Statutory Change(s):

Mediation Services, Bureau of

FY 2020-21 Biennial Budget Change Item

Change Item Title: Public Employment Relations Board Operations

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	435	435	435	435
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	435	435	435	435
FTEs	4.7	4.7	4.7	4.7

Recommendation:

The Governor recommends \$435,000 per year for operational funding for the Public Employment Relations Board (PERB). This recommendation increases the PERB's base of \$125,000 per year to \$560,000 per year in order to ensure the board is fully operational by the statutory effective date of July 1, 2020.

Rationale/Background:

Since the 1971 adoption of the Public Employment Labor Relations Act (PELRA), unfair labor practices (ULPs) have been adjudicated by Minnesota's District Courts. This process is slow and costly. In Session Laws of Minnesota 2014, Chapter 211, the Minnesota Legislature amended PELRA to create PERB, a citizen board appointed by the Governor to hear and resolve ULPs. Chapter 211 did not allocate funds directly to the PERB but instructed the Bureau of Mediation Services (BMS) to assist the Board and appropriated \$125,000 annually for this purpose. The Bureau is the fiscal agent with respect to PERB funding. Presently, the Board has been appointed but has not hired permanent staff. The appropriation sought here represents an estimate of the resources needed to carry out the operations of the PERB Board when it is fully functional.

According to Minnesota Statutes 179A.041 the Public Employment Relations board shall consist of three members and will have the powers assigned to the board under M.S. 179A.13 as it relates to resolving unfair labor practices. Under this law whenever it is charged that any party has engaged in an ULP, an investigator designated by the board shall conduct an investigation of the charge. The board must then issue a complaint and cause and give notice of a hearing.

The statute sets forth requirements that "Hearing officers must be licensed to practice law in the State of Minnesota and must conduct the hearings and issue recommended decisions and orders" and also sets forth the board shall appoint a general counsel. Therefore, this will require the hiring of additional staff or contracting for services. BMS mediation staff will continue to mediate ULP claims where they are already working with the parties in other disputes, investigate and decide unfair election practices. This recommendation includes a request for the hiring of up to four staff to perform the duties of the PERB. Any additional funding will be used to provide support of the office that cannot be absorbed by the BMS.

Proposal:

Additional funding is necessary for the Public Employee Relations Board to carry out their functions set in statute. Current statute sets the PERB effective date as July,1,2020. In order to conduct investigations and carry out hearings set forth in statute and to carry out the operations of such an office the Governor recommends adding \$435,000 per year to the PERB's base.

Equity and Inclusion:

This recommendation supports all claims of unfair labor practices filed by individual public employees, exclusive representatives or employers in the state and does not directly impact racial and ethnic groups, lesbian, gay, bisexual and transgender groups, persons with disabilities or veterans.

IT Related Proposals:

None.

Results:

This is a new statutory function and performance measures will need to be adopted by the PERB.

AT A GLANCE

- 2,901 New credentials issued
- 31,359 Active credentials
- 899 New complaints received
- 774 Complaints resolved
- 85 Disciplinary and Corrective actions against credentialed professionals
- 187 Credentialed professionals monitored under disciplinary or corrective actions
- The Board is comprised of 11 physicians and 5 public members appointed by the Governor
- 20 FTE Staff

FY 2017 data (transactions in one year)

PURPOSE

The Board of Medical Practice (Board) established on July 1, 1887, is mandated by M.S. 214 & M.S. 147.01 to protect the public from the improper and unlawful practice of medicine. The Board carries out its mission by granting qualified applicants the privilege to practice in Minnesota and by investigating complaints relating to the competency or behavior of credentialed individuals.

The Board contributes to the statewide outcomes of:

- **All Minnesotans have optimal health**
- **People in Minnesota are safe**
- **Efficient and accountable government services**

BUDGET

**Spending by Category
FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

The Board is funded by licensure fees and receives no general fund dollars. Minnesota Statutes section 214.06, subdivision 1(a) compels the Board to collect fees in the amount sufficient to cover direct and indirect expenditures. Funds are deposited as non-dedicated revenue into the state government special revenue fund. From this fund, the Board receives a direct appropriation to pay for agency expenses such as salaries, rent, costs

associated with disciplinary/contested cases, and operating expenditures. It also pays statewide indirect costs through an open appropriation.

In addition to Board operations, licensure fees fund activities that support multiple boards and/or other agencies. Some of these are: the Administrative Services Unit (interboard), Health Professionals Services Program (interboard), HIV, HBV and HCV Prevention Program (Department of Health), Prescription Monitoring Program (Pharmacy Board), Office of the Attorney General for legal services, Criminal Background Check Program (interboard), and the Voluntary Healthcare Provider Program (interboard).

STRATEGIES

- The Board regulates professional practice and enforces applicable laws and rules by issuing credentials, monitoring continuing professional education requirements, engaging in quality review and investigating complaints.
- The Board ensures minimum standards of care through education and corrective or disciplinary actions against impaired or incompetent practitioners.
- The Board provides information and education about licensing and registration requirements, as well as professional profile and enforcement actions to the public, the professions and other interested audiences.
- The Board provides administrative management of the Health Professionals Services Program, ensures that the program is operating in accordance with its statutory authority, sets the budget for the program, enters into contracts on behalf of the program and provides guidance on general operations of the program.

Recommendation:

The Governor recommends additional funding of \$268,000 in the FY 2020-2021 biennium to maintain the current level of service delivery at the Board of Medical Practice.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

The Board currently employs 20 full time staff. The Board is entirely fee supported and receives no General Fund dollars to carry out all services. Fees must be collected to cover all direct and indirect expenditures and are deposited as non-dedicated revenue into the State Government Special Revenue Fund (SGSRF). The Minnesota Legislature makes appropriations from the fund to pay for expenses incurred by the Board.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the Board of Medical Practice, this funding will cover known employee compensation growth, staff development and conference traveling, rent, and other operating costs.

The Board has experienced staff turnover following retirements and internal promotions. The Board will seek opportunities for staff development and enhance capacity through participation in educational activities and networking opportunities both in-state and out-of-state, including but not limited to educational conferences, national meetings, regulatory work groups, and health-related events.

Small Agency Increase:	FY2020	FY2021	FY2022	FY2023
Salary Increases (current staff increases)	\$54,000	\$54,000	\$54,000	\$54,000
In-State Travel Increases	\$25,000	\$25,000	\$25,000	\$25,000
Out-of-State Travel Increases	\$25,000	\$25,000	\$25,000	\$25,000
Staff Development	\$5,000	\$5,000	\$5,000	\$5,000
Equipment and Supplies	\$25,000	\$25,000	\$25,000	\$25,000
Total	\$134,000	\$134,000	\$134,000	\$134,000

Equity and Inclusion:

The Board does not discriminate on the basis of race, ethnicity, gender, sexual orientation, or disability. The positive impact of this change will be to continue to provide services for all people of the State of Minnesota without discrimination.

Results:

The ability to adequately staff the Board will assure more efficient delivery of services to clients, assure that the Board's work and mission are carried out competently, and assure the capacity to recruit and retain a skilled and dedicated workforce.

The ability to train and develop Board staff will assure effective and efficient delivery of Board services to the public and other stakeholders, assure that the Board's work and mission are carried out competently, and assure the capacity to recruit and retain a skilled and dedicated workforce.

The ability to participate in educational and networking opportunities will optimize Board members' Board staff and Board representatives' performance.

The ability to maintain a fully-functioning office with optimal supplies and equipment will allow the Board to carry out its mission to protect the public.

Medical Practice, Board of

FY 2020-21 Biennial Budget Change Item

Change Item Title: Health Professionals Services Program Operating Adjustment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
State Government Special Revenue Fund				
Expenditures	59	78	78	78
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	59	78	78	78
FTEs	0	0	0	0

Recommendation:

The Governor recommends additional funding of \$137,000 in the FY 2020-2021 biennium to maintain the current level of service delivery at The Board of Medical Practice for the Health Professionals Services Program (HPSP).

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

The Health Professional Service Program is a small program of the Minnesota health related licensing boards. HPSP is funded by the health related licensing boards (95.94%), the Emergency Medical Services Regulatory Board (3.75%) and the Department of Health (0.31%). The health related licensing boards' funding comes from licensing fees, which are placed in the State Government Special Revenue Fund (not a part of the General Fund).

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the Health Professionals Services Program within the Board of Medical Practice, this funding will cover known employee compensation growth and IT database maintenance. IT cost growth drivers may include dedicated MN.IT staff compensation-related increases, increased volume usage of enterprise IT services, increased software licensing costs, and/or application support and maintenance cost increases. This initiative will be implemented when the funds are allocated.

Small Agency Increase:	FY2020	FY2021	FY2022	FY2023
Salary Increases (current staffing)	\$49,000	\$68,000	\$68,000	\$68,000
MN.IT Services - Data Base Maintenance	\$10,000	\$10,000	\$10,000	\$10,000
Total	\$59,000	\$78,000	\$78,000	\$78,000

Equity and Inclusion:

The Board does not discriminate on the basis of race, ethnicity, gender, sexual orientation, or disability. The positive impact of this change will be to continue to provide services for all people of the State of Minnesota without discrimination.

IT Related Proposals:

A portion of this proposal includes a request for database maintenance through MN.IT Services.

Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	150	150	152	154
FTEs	2	2	2	2

Recommendation:

The Governor recommends funding for two staff positions at the Minnesota Board of Medical Practice.

Rationale/Background:

The Complaint Review Unit has experienced significant increases in the number of complaints received annually. The Board anticipates the need for additional staff to timely process complaints to assure public protection. Additionally, the Board has been legislatively authorized to regulate additional professions, join a medical licensure compact, and implement criminal background checks for new applicants. The Board currently regulates physicians and seven allied health professions. In the last ten years, the number of providers regulated by the Board has increased by 10,000. Efficiencies gained through enhanced technology no longer adequately address the increased work load.

The Board currently employs 20 full-time staff for all of its operations.

The Board is entirely fee supported and receives no General Fund dollars to provide all services. Fees must be collected to cover all direct and indirect expenditures and are deposited as non-dedicated revenue into the State Government Special Revenue Fund (SGSRF). The Minnesota Legislature makes appropriations from the fund to pay for expenses incurred by the Board. The Board collects sufficient revenue to cover all expense and this change item increase.

Proposal:

The Investigator will respond to inquiries from the public, licensees and stakeholders; will assure timely processing of complaints; will manage investigative processes; and will facilitate licensing actions necessary to protect the public. The Office and Administrative Specialist Intermediate will respond to inquiries from the public, licensees and stakeholders, will support the administrative operations of the Board, and will work with all staff to efficiently and accurately process the work of the Board.

Additional Staff:	FY2020	FY2021	FY2022	FY2023
Investigator Salary Increases (current staff increases)	\$77,000	\$78,000	\$79,000	\$80,000
Office & Administrative Specialist Intermediate	\$70,000	\$72,000	\$73,000	\$74,000
One-time purchase of equipment (for each new position)	\$3,000	\$0	\$0	\$0
Total	\$150,000	\$150,000	\$152,000	\$154,000

Equity and Inclusion:

The positive impact of this change will be for all people of the State of Minnesota, without discrimination.

Results:

Hiring new staff will enable the Board to meet the increased demands of the agency. The addition of these three positions will assure that:

- The increased volume of applications and complaints will be processed in a more timely and efficient manner.
- Applications and complaints will be processed by staff with the necessary expertise to analyze, summarize and present such information for consideration by the Boards' Committees, Advisory Councils and the Board.
- Greater responsiveness and efficiency in licensing and regulatory processes will reduce overall costs while providing a higher level of service.
- With appropriate staffing levels, overtime will be reduced and employee retention will improve.
- The Administrative Unit will gain the necessary support to carry out operational functions.
- Employee recruitment, training and retention will assure a strong and dedicated workforce to carry out the Board's mission of public protection.

Statutory Change(s):

No statutory change is required.

Medical Practice, Board of

FY 2020-21 Biennial Budget Change Item

Change Item Title: HPSP Database Document Management Enhancement

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
State Government Special Revenue Fund				
Expenditures	50	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	50	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends a one-time appropriation to make enhancements to the Health Professionals Services Program's (HPSP) CMS database's reporting capabilities and document management at the Board of Medical Practice.

Rationale/Background:

HPSP is a program of the Minnesota Health Licensing Boards. Enhancements to the current database and document management system (DMS) are necessary to adequately capture intake and compliance data, improve effective and efficient processing of data, timely identify and respond to noncompliance with monitoring, and create queries and reports. Upgrading the database and DMS will directly and positively impact the program's effectiveness and efficiency, as well as positively impact stakeholder engagement with the program.

The HPSP is funded by the health related licensing boards (95.94%), the Emergency Medical Services Regulatory Board (3.75%) and the Department of Health (0.31%). The health related licensing boards' funding comes from licensing fees, which are nondedicated revenue to the State Government Special Revenue Fund (not part of the General Fund).

Proposal:

This is a new project that will improve the efficiency and effectiveness of HPSP's DMS by enhancing its ability to collect, enter, and analyze data in two primary ways:

- The case management intake template will be further developed to:
 - Increase the number of fields that may be queried for data management, reporting and quality assurance and improvement purposes
 - Enhance data input mechanisms to increase the accuracy and consistency of intake data, and streamline the data entry process
 - Remove barriers for inputting and saving data
- Enable creation of queries/reports/documents to:
 - Enable staff to effectively use the DMS for tracking and reporting purposes
 - Increase efficiency in monitoring and reporting processes
 - Enable staff to establish and modify data field formats for compiling and querying data on specific populations (i.e. nurses, physicians) or conditions;

- Add additional document management fields, as deemed necessary to carry out program processes

It will also improve data management operations. HPSP plans to start the project in fiscal year 2020 after funds are allocated and a contract is secured. A contract will start in fiscal year 2021 for ongoing database and DMS maintenance.

Equity and Inclusion:

This proposal will not affect a specific protected class. It will impact health care practitioners with potentially impairing illnesses that are licensed or regulated in Minnesota.

IT Related Proposals:

This funding proposal supports enhancements of IT infrastructure.

Medical Practice, Board of

FY 2020-21 Biennial Budget Change Item

Change Item Title: Attorney General Increases

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
State Government Special Revenue Fund				
Expenditures	69	83	97	111
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	69	83	97	111
FTEs				

Recommendation:

The Governor recommends funding for a base budget increase to support anticipated increases in legal services provided by the Attorney General's Office for the Board of Medical Practice.

Rationale/Background:

The Attorney General's Office anticipates hourly rate increases for attorney and legal assistant services. The Board has seen an approximate 50% increase in the volume of complaints filed. The Attorney General's Office reviews all complaints filed with the Board, provides legal counsel to Board Committees and litigates cases on behalf of the Board. Costs for all legal services are expected to increase. Each category of services are based on service rate increases of \$2.00 per hour and an increased volume of complaints.

The Board is entirely fee supported and receives no General Fund dollars to carry out all services. Fees must be collected to cover all direct and indirect expenditures and are deposited as non-dedicated revenue into the State Government Special Revenue Fund (SGSRF). The Minnesota Legislature makes appropriations from the fund to pay for expenses incurred by the Board. The Board collects sufficient revenue to cover all expenses.

Proposal:

This proposal reflects increased rates and volume of service. This change will not require an increase in license fees for any of the Board's regulated professionals and will enhance the ability to carry out the Board's mandate of public protection.

Attorney General Increase:	FY2020	FY2021	FY2022	FY2023
Attorney fees	\$266,000	\$270,000	\$274,000	\$278,000
Legal assistant fees	\$425,000	\$435,000	\$445,000	\$455,000
Total	\$691,000	\$705,000	\$719,000	\$733,000
Less Current Base Budget	-\$622,000	-\$622,000	-\$622,000	-\$622,000
Total Increase	\$69,000	\$83,000	\$97,000	\$111,000

Equity and Inclusion:

The Board does not discriminate on the basis of race, ethnicity, gender, sexual orientation, or disability. The positive impact of this change will be to continue to provide services for all people of State of Minnesota without discrimination.

Results:

This will assure all necessary legal services will be in place.

Statutory Change(s):

No statutory change is required.

Medical Practice, Board of

FY 2020-21 Biennial Budget Change Item

Change Item Title: Automated Licensure Information Management System (ALIMS) Database and Document Management System

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
State Government Special Revenue Fund				
Expenditures	200	200	100	40
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	200	200	100	40
FTEs				

Recommendation:

The Governor recommends funding to support completion of the upgrade and ongoing maintenance of the new Automated Licensure Information Management System (ALIMS) database and document management system for the Board of Medical Practice.

Rationale/Background:

The Board's legacy database is currently being upgraded to the new ALIMS platform which is being implemented across multiple health licensing boards. The base budget increase will cover vendor contract to complete and maintain database upgrades.

The Board is entirely fee supported and receives no General Fund dollars to carry out all services. Fees must be collected to cover all direct and indirect expenditures and are deposited as non-dedicated revenue into the State Government Special Revenue Fund (SGSRF). The Minnesota Legislature makes appropriations from the fund to pay for expenses incurred by the Board. The Board collects sufficient revenue to cover all expenses. The board collects sufficient revenue to cover all expense and this change item increase.

Proposal:

This change will not require an increase in license fees for any of the Board's regulated professionals and will enhance the ability to carry out the Board's mandate of public protection.

Centralized IT Increase:	FY2020	FY2021	FY2022	FY2023
Professional/Technical IT vendor contracts	\$200,000	\$200,000	\$100,000	\$40,000
Total	\$200,000	\$200,000	\$100,000	\$40,000

Equity and Inclusion:

The positive impact of this change will be for all people of the State of Minnesota, without discrimination.

IT Related Proposals:

<i>Category</i>	<i>FY 2020</i>	<i>FY 2021</i>	<i>FY 2022</i>	<i>FY 2023</i>	<i>FY 2024</i>	<i>FY 2025</i>

MNIT FTEs						
Agency FTEs						

Results:

Assure completion of the upgrade and maintenance of the new ALIMS database which will create efficiencies, implement enhanced technology and access to information and services, streamline processes and increase data security.

Statutory Change(s):

No statutory change is required.

Medical Practice, Board of

FY 2020-21 Biennial Budget Change Item

Change Item Title: Move Fees from Rule to Statute

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
State Government Special Revenue Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs				

Recommendation:

The Governor recommends making technical corrections to codify fee authority under the practice acts for each profession regulated by the Board of Medical Practice. This would be a technical correction to capture fees in the individual practice acts.

Rationale/Background:

In 2017, legislation was passed that moved current fees from rule to statute, as shown in the table below, and repealed Minn. Rules section 5600.2500, however not all fees were captured under the individual practice acts. This proposal will recapture current fees and codify them in the practice acts for professions it regulates, including Minn. Stat. 147, 147A, 147B, 147C, 147D, 147E, 147F, and 148.7801 – 148.7815.

Proposal:

This change will not require an increase in license fees for any of the Board's regulated professionals.

Current Fees – Move from MN Rule 5600.2500 to MN Statute.

Fee Name	Rule # / Statute	Current Fee Amount	Proposed Fee Amount
Physician Assistant Application Fee	MN Rule 5600.2500 G	\$120	\$120
Physician Assistant Annual Registration (prescribing)	MN Rule 5600.2500 H	\$135	\$135
Physician Assistant Annual Registration (no prescribing)	MN Rule 5600.2500 I	\$115	\$115

Physician Assistant Temporary Permit	MN Rule 5600.2500 K	\$60	\$60
Physician Assistant Locum Tenens Permit	MN Rule 5600.2500 L	\$25	\$25
Physician Assistant Late Fee	MN Rule 5600.2500 M	\$50	\$50
Acupuncture Temporary Permit	MN Rule 5600.2500 N	\$60	\$60
Acupuncture Inactive Status Fee	MN Rule 5600.2500 O	\$50	\$50
Respiratory Care Annual Registration	MN Rule 5600.2500 P	\$90	\$90
Respiratory Care Application Fee	MN Rule 5600.2500 Q	\$100	\$100
Respiratory Care Late Fee	MN Rule 5600.2500 R	\$50	\$50

Fee Name	Rule # / Statute	Current Fee Amount	Proposed Fee Amount
Respiratory Care Inactive Status	MN Rule 5600.2500 S	\$50	\$50
Respiratory Care Temporary Permit	MN Rule 5600.2500 T	\$60	\$60
Respiratory Care Temporary Registration	MN Rule 5600.2500 U	\$90	\$90
Duplicate License or Registration Fee (all regulated professions)	MN Rule 5600.2500 V	\$20	\$20
Certification Letter (all regulated professions)	MN Rule 5600.2500 W	\$25	\$25
Education or Training Program Approval Fee	MN Rule 5600.2500 Y	\$100	\$100
Report Creation and Generation (all regulated professions)	MN Rule 5600.2500 Z	\$60	\$60
Examination Administrative Fee (1) Half Day (all regulated professions)	MN Rule 5600.2500 AA (1)	\$50	\$50
Examination Administrative Fee (2) Full Day (all regulated professions)	MN Rule 5600.2500 AA (2)	\$80	\$80

Equity and Inclusion:

The positive impact of this change will be for all professionals regulated by the Board, without discrimination.

Results:

The ability to capture all current fees for professions regulated by the Board in appropriate sections of statute.

Statutory Change(s):

Minnesota Rules 5600.2500 and Minnesota Statutes 147D.27.

- a. traditional midwifery annual registration, \$100;
- b. traditional midwifery application fee, \$100;
- c. traditional midwifery late fee, \$75;
- d. traditional midwifery inactive status, \$50;
- e. traditional midwifery temporary permit, \$75;
- f. traditional midwifery certification fee, \$25;
- g. duplicate license or registration fee, \$20;
- h. certification letter, \$25;
- i. education or training program approval fee, \$100;
- j. report creation and generation, \$60 per hour billed in quarter-hour increments with a quarter-hour minimum; and
- k. examination administrative fee:
 - (1) half day, \$50; and
 - (2) full day, \$80.

The revenue generated from the fees must be deposited in an account in the state government special revenue fund.

Statutory Change(s):

Minnesota Rules 5600.2500 and Minnesota Statutes 147E.27.

- a. naturopathic doctor certification fee, \$25;
- b. naturopathic doctor duplicate license fee, \$20;
- c. naturopathic doctor emeritus registration fee, \$50;

- d. naturopathic doctor certification fee, \$25;
- e. duplicate license or registration fee, \$20;
- f. education or training program approval fee, \$100;
- g. report creation and generation, \$60 per hour billed in quarter-hour increments with a quarter-hour minimum; and
- h. examination administrative fee:
 - (1) half day, \$50; and
 - (2) full day, \$80.

The revenue generated from the fees must be deposited in an account in the state government special revenue fund.

Statutory Change(s):

Minnesota Rules 5600.2500 and Minnesota Statutes 147F.17.

- a. genetic counselor certification fee, \$25;
- b. duplicate license fee, \$20;
- c. education or training program approval fee, \$100;
- d. report creation and generation, \$60 per hour billed in quarter-hour increments with a quarter-hour minimum; and
- e. examination administrative fee:
 - (1) half day, \$50; and
 - (2) full day, \$80.

The revenue generated from the fees must be deposited in an account in the state government special revenue fund.

Statutory Change(s):

Minnesota Rules 5600.2500 and Minnesota Statutes 148.7815

- a. athletic trainer certification fee, \$25;
- b. athletic trainer duplicate license fee, \$20;
- c. naturopathic doctor certification fee, \$25;
- d. duplicate license or registration fee, \$20;
- e. education or training program approval fee, \$100;
- f. report creation and generation, \$60 per hour billed in quarter-hour increments with a quarter-hour minimum; and
- g. examination administrative fee:
 - (1) half day, \$50; and
 - (2) full day, \$80.

The revenue generated from the fees must be deposited in an account in the state government special revenue fund.

Program: Board of Medical Practice

Activity: Board of Medical Practice

mn.gov/boards/medical-practice/

AT A GLANCE

BOARD OF MEDICAL PRACTICE

- 31,359 active credentials
- 2,901 New credentials issued
- 85 Actions against credentialed professionals (74 disciplinary actions and 11 corrective actions)
- 187 credentialed professionals currently subject to monitoring pursuant to an action (removal of resigned, cancelled, surrendered, revoked, and deceased individuals)
- The Board is comprised of 11 physicians and 5 public members appointed by the Governor
- 20 Full Time Employees (FTE) Board of Medical Practice; 8 FTE Health Professionals Services Program

FY 2017 data (transactions in one year)

PURPOSE & CONTEXT

The Board of Medical Practice (Board) established on July 1, 1887, is mandated by M.S. 214 & M.S. 147.01 to protect the public from the improper and unlawful practice of medicine. Laws and regulations provide authority to grant and govern the subsequent use of credentials to practice medicine and seven allied health professions; Acupuncturists, Athletic Trainers, Genetic Counselors, Naturopathic Doctors, Physician Assistants, Respiratory Therapists, and Traditional Midwives.

The Board also serves as the designated administering board for the Health Professionals Services Program, a confidential monitoring program that serves the health-related licensing boards pursuant to M.S. 214.31.

The Board carries out its mission of public protection by granting qualified applicants the privilege to practice in Minnesota and by investigating complaints relating to the competency or behavior of credentialed individuals.

SERVICES PROVIDED

The Board uses the licensure and registration fees of the professions it regulates to fund the operations and services provided by the Board. The Board also manages HPSP's funds for the operations and services provided under the program's authority utilizing the following strategies:

- The Board regulates professional practice and enforces applicable laws and rules by issuing credentials, monitoring continuing professional education requirements, and engaging in quality review and investigating complaints.
- The Board ensures minimum standards of care through education and corrective or disciplinary actions against impaired or incompetent practitioners.
- The Board provides information and education about licensing and registration requirements, as well as professional profile and enforcement actions to the public, the professions, and other interested audiences.
- The Board provides administrative management of the Health Professionals Services Program, ensures that the program is operating in accordance with its statutory authority, sets the budget for the program, enters into contracts on behalf of the program and provides guidance on general operations of the program.

Primary services for the Board include:

1. **Licensure:** The Board assures that applicants have met minimum licensure and registration standards established by the Board. These standards include primary source verification that the applicant has successfully completed accredited education and training, and has successfully passed a qualifying national examination. The Board also establishes that the applicant is competent to practice in the credentialed profession by reviewing the applicant's background and fitness to practice. As of January 1, 2018, all applicant's for initial licensure are required to complete a fingerprint based criminal background check, providing additional information for the Board to consider when making licensure decisions.
2. **Continued Competence:** The Board requires continuing education for all credentialed professionals under its regulatory authority. The Board conduct CE audits to assure compliance with educational requirements.
3. **Complaint Investigation and Resolution:** The Board investigates and resolves all jurisdictional complaints against health care professionals under its regulatory authority. Deviations from minimum practice standards are identified and conduct that places patients at risk is addressed through appropriate disciplinary, corrective and educational remedies. Appropriate and timely resolution of complaints assures public protection.

Program: Board of Medical Practice

Activity: Health Professionals Services Program

mn.gov/boards/hpsp/

AT A GLANCE

- Serves the 16 health regulatory boards, the Emergency Services Regulatory Board, the Department of Health, and the practitioners they regulate
- Over 400 health practitioners referred annually
- Over 400 health practitioners discharged annually
- An average of 550 health practitioners are active in HPSP at any given time

NOTE: HPSP is a program providing services on behalf of the State agencies that regulate healthcare professionals. HPSP's structure requires that its budget and oversight be assigned to one of the Health Regulatory Boards. In FY2015, the Board of Physical Therapy acted as the administering board for HPSP and remained the fiscal agent through FY2016-2017. The Board of Medical Practice became the administering board for HPSP in FY2017 and the fiscal agent for HPSP beginning FY2018 and moving forward.

PURPOSE & CONTEXT

People in Minnesota Are Safe

The Health Professionals Services Program's (HPSP) mission is to protect the public by monitoring regulated health professionals whose illnesses may impair their ability to practice safely. HPSP achieves its mission by promoting early intervention, diagnosis, and treatment as an alternative to board discipline. Early intervention improves the chances for successful treatment before clinical skills are compromised and patients may be harmed.

Efficient and Accountable Government Services

HPSP provides services to all of the health related licensing boards in Minnesota. This enables all boards to access the same service while eliminating the need for duplicative services. It also enables health practitioners, their employers, and treatment providers easy access to program services and expertise.

SERVICES PROVIDED

Health practitioners self-refer or are referred to HPSP for the monitoring of their substance, psychiatric, and/or other medical disorders which may impair their ability to practice safely. HPSP protects the public by immediately intervening with health practitioners who are unsafe to practice, which directly contributes to the statewide outcome that **people in Minnesota are safe**. Additionally, HPSP's enabling legislation allows some practitioners to report to HPSP without board involvement, allowing them to benefit from HPSP monitoring outside of board disciplinary processes.

To accomplish its mission, HPSP provides the following services to regulated health practitioners in Minnesota:

- Determine whether health practitioners have potentially impairing illnesses that warrant monitoring and implement immediate practice restrictions if appropriate (HPSP interventions start even before monitoring contracts are signed)
- Create and implement monitoring contracts for health practitioners with potentially impairing illnesses

- Monitor health practitioners' professional practice, continuing care, and compliance with monitoring contracts
- Report practitioners who are unsafe to practice or who violate the conditions of their monitoring contracts to their regulatory board
- Provide outreach and education to professional schools, health care employers, treatment programs, and other stakeholders about HPSP services

RESULTS

HPSP protects the public by implementing monitoring contracts that require accountability and provide structure for practitioners to manage their illnesses, while also monitoring their work performance. HPSP protects the public by identifying and addressing non-compliance with treatment and monitoring or performance issues. This includes reporting or discharging practitioners to their regulatory boards where they may face disciplinary action. The measurements below do not show factors that contribute to practitioner non-compliance with monitoring (i.e. financial resources, insurance, stable support system).

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of practitioners referred	501	423	FY14 & FY18
Quantity	Number of practitioners discharged to their board due to non-compliance with monitoring.	321	255	FY14 & FY18
Quality	Percent of monitoring contracts signed within 60 days	90%	93%	FY14 & FY18

M.S. 214.31 to M.S. 214.37 (<https://www.revisor.mn.gov/statutes/?id=214.31>) provides the legal authority for HPSP.

AT A GLANCE

- 3.1 million residents in the seven-county area in 2017 (55 percent of total state population)
- 888,000 more people from 2010 to 2040 (31% increase) per Council forecasts
- 419,000 more households from 2010 to 2040 (38% increase) per Council forecasts
- 495,000 more jobs from 2010 to 2040 (32% increase) per Council forecasts
- 95.4 million transit rides in 2017
- 2.3 million rides on Metro Mobility in 2017
- 250 million gallons of wastewater treated daily
- 109 communities provided with wastewater treatment in 2017
- Eight treatment plants and 600 miles of regional sewers
- 58 million regional park visits in 2017
- 63 regional parks and park reserves totaling 55,000 acres in the seven-county metropolitan area
- 51 regional trails totaling 389 miles in the seven-county metropolitan area
- 7,200 low-income households provided affordable housing by the Council's Metro HRA in 2017

PURPOSE

The Metropolitan Council is the regional policy-making body, planning agency, and provider of essential services for the Twin Cities metropolitan region. The Council's mission is to foster efficient and economic growth for a prosperous region in partnership with more than 180 communities and seven counties.

We provide cost-effective transit and wastewater services, assist households with low and moderate incomes to find affordable housing, and support communities as they plan for anticipated growth.

As our region grows and its demographics change, the Council is working in partnership with communities to ensure we are prepared to support the continued growth of our region. As the economic engine of the state, the metro region's health and vitality has a statewide impact. Through our planning activities and the provision of regional services, we contribute to the following statewide outcomes:

- A thriving economy that encourages business growth and employment opportunities
- A clean, healthy environment with sustainable uses of natural resources
- Sustainable options to safely move people, goods, services, and information
- A livable and attractive place for people of all races, ethnicities, incomes, and abilities to call home and be prosperous

The charts on the next page show appropriations to the Metropolitan Council recorded in SWIFT. The Council's unified operating budget for calendar year 2018 is \$1.1 billion. State appropriations for transit and parks operations and water supply planning provided approximately 38 percent of agency funding in CY18. The majority of our operating funding comes from charges for services (wastewater fees and passenger fares), federal funds, property taxes and local funds.

BUDGET

STRATEGIES

Our governing body – the 17-member Metropolitan Council – plays a key convening role, bringing together communities to develop policies and a shared vision for the region. To achieve our mission, we carry out planning initiatives and provide essential services to the region.

Planning Initiatives

- Our regional plan, Thrive MSP 2040, is the overarching policy and planning document that defines the regional vision, guides the development of the region through its land use policy, and defines the high level approach outlined in each related policy plans. Development of the document included several years of engagement with residents, local governments, and other partners to create a framework for a shared vision for a prosperous, equitable, and livable region.
- Regional planning initiatives include transportation, parks, water resources, community planning, and housing.

Transportation

- We continue to look for adequate financial resources to support the transit system. As the demand for service grows and service costs increase, revenue is not keeping up. We anticipate that transit demand will increase 80 percent by 2040. At the same time, forecasted growth in motor vehicle sales tax revenues, a major source of transit funding, has flattened and is volatile.
- Our Metro Transit bus and rail systems provide more than 80 million rides every year, getting people to work, school, and services. This contributes to managing road congestion by taking single-occupancy vehicles off metropolitan highways so businesses can move their goods efficiently.
- Our Metro Mobility and Transit Link services transport people unable to use regular-route transit service.
- Our transportation planners play a key role in collaborating with local communities to create our vision for roads, airports, and transit to ensure effective and cost-efficient investments.

Parks

- We partner with 10 parks implementing agencies to plan, acquire land, and develop facilities for regional parks and trails. Our goal is to preserve natural resources and provide recreational opportunities throughout the region.

Clean water and wastewater treatment

- We foster a safe and healthy environment through our award-winning and cost-effective wastewater treatment services, water supply planning, and water quality monitoring initiatives.

Planning and development

- Our Livable Communities grants help fund affordable housing; clean polluted land for redevelopment; and create new models for livable, walkable, connected neighborhoods and transit-oriented developments, stimulating and leveraging private investment and increasing communities' tax base.
- We coordinate local communities' comprehensive plans, providing technical assistance and resources, to ensure coordinated, orderly, and efficient development in the region.

Housing

- Our Housing Policy Plan identifies regional housing needs and priorities, connects housing to other Council system plans, and provides guidance for local housing planning.
- Our Metro HRA provides rent assistance for more than 7,200 low-income residents in nearly 100 communities.

Minnesota Statutes, Chapter 473 (<https://www.revisor.mn.gov/statutes/?id=473>) provides the legal authority for Metropolitan Council.

Metropolitan Council

FY 2020-21 Biennial Budget Change Item

Change Item Title: Parks and Trails Legacy Appropriation

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Parks and Trails Fund				
Expenditures	19,750	20,230	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	19,750	20,230	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends 40 percent of the Parks and Trails Legacy Fund each year be appropriated to the Metropolitan Council to finance grants to ten regional park implementing agencies to advance goals from the 25-year Parks and Trails Legacy Plan. The focus of the work includes:

- Connecting people to the outdoors through environmental education, recreation programming, volunteer coordination, and outreach efforts to inform the public about outdoor recreation opportunities.
- Acquiring land for regional parks and trails.
- Creating opportunities by constructing new park and trail facilities.
- Taking care of resources by replacing worn-out facilities and restoring degraded natural resources areas.
- Coordinating with partners through shared planning and research work.

Rationale/Background:

The Clean Water, Land and Legacy Amendment created the Parks and Trails Fund to supplement traditional funding sources in support of park and trails of regional and statewide significance. Based on the current state revenue forecast, the Metropolitan Council's share of the funding would be \$19.75 million in FY20 and \$20.23 million in FY21. The Metropolitan Council disburses the appropriations to ten regional park implementing agencies under an allocation formula in Minnesota Statute 85.53, Subdivision 3.

Table 1: Fiscal Years 2020-21 Parks and Trails Legacy Fund Grant Allocations (\$000s)			
Metro Regional Parks Implementing Agency	FY 2020	FY 2021	FY 2020-21 Total
Anoka County Parks	\$1,617	\$1,656	\$3,273
City of Bloomington Parks	\$328	\$336	\$664
Carver County Parks	\$386	\$395	\$781
Dakota County Parks	\$1,385	\$1,418	\$2,803
Minneapolis Park and Recreation Board	\$4,189	\$4,291	\$8,480
Ramsey County Parks	\$1,458	\$1,493	\$2,951
City of St Paul Parks	\$2,591	\$2,654	\$5,246
Scott County Parks	\$453	\$464	\$917
Three Rivers Park District / Scott County	\$209	\$214	\$424
Three Rivers Park District	\$4,238	\$4,342	\$8,580
Washington County Parks	\$920	\$942	\$1,862
Park Agency Allocation Total	\$17,775	\$18,207	\$35,982
10 % for Park Acquisition Opportunity Grants	\$1,975	\$2,023	\$3,998
Total	\$19,750	\$20,230	\$39,980

Proposal:

The Metropolitan Council serves as the fiscal agent for this funding sources and does not receive any of the funds. Grants are made to the ten regional park implementing agencies and will continue to advance the four strategic directions associated with the 25-year Parks and Trails Legacy Plan. The four strategic directions are:

- **Connect People to the Outdoors.** This work helps park agencies attract new park users and retain existing ones. Through recreational programs, environmental education programs, increased use of volunteers, and enhanced access and information about parks and the natural environment, people are connected to regional parks and trails.
- **Acquire Land, Create Opportunities.** Ten percent of the appropriation will be spent to acquire land for regional parks and trails as required by Minnesota Statute 85.53, Subdivision 3. Additionally, this appropriation will be spent to develop new recreation facilities and trails and redevelop aging facilities and infrastructure.
- **Take Care of What We Have.** Significant public investments have been made to establish and develop the Metropolitan Regional Parks System. These funds will go to reinvest in the system to ensure that there are safe, high-quality experiences for current and future users, including restoration of high-quality natural resources.
- **Coordinate with Partners.** The Metropolitan Council helps coordinate work across park agencies, including shared planning and research services.

Equity and Inclusion:

This change item will benefit residents across the Twin Cities metropolitan region by improving recreational options through strengthening the metropolitan regional parks and trails system. The metropolitan region is growing and changing; by 2040, approximately 39 percent of residents will be people of color/indigenous peoples. However, our region has among the largest racial/ethnic disparities among peer metro areas. Recognizing that our region cannot compete economically if we are leaving a growing share of our population behind, the Metropolitan Council incorporated an “equity” outcome into Thrive MSP 2040, the comprehensive development guide required by state statute. The Thrive MSP 2040 equity outcome commits the Metropolitan Council to creating real choices in where we live, how we travel, and where we recreate for all residents across race, ethnicity, economic means, and ability. This outcome also commits the Metropolitan Council to fully engaging communities in decision-making in accordance with the Metropolitan Council’s Public Engagement Plan when setting regional parks policy.

IT Related Proposals:

Not applicable

Results:

From 2014 to 2016, annual visits to regional parks and trails increased 49 percent, or 4 percent annually. The 2017 annual use estimate was 58.3 million visits, an increase of 22 percent from the 2016 estimate. The increase is due in part to new, more accurate attendance estimates that demonstrate that more visits are happening in off-peak times of the year (winter) than previously thought.

Park surveys done in 2016 showed that respondents have very positive impressions of regional parks and trails facilities in terms of the quality of facilities, services and recreational opportunities. Ninety five percent of respondents rated the quality of facilities, services and recreational opportunities very good (64 percent) or good (31 percent). Less than one percent rated quality as poor or very poor. There are no longitudinal surveys on regional park quality or visitor satisfaction.

Regional Parks and Trails Annual Visits: 2004-2017

Statutory Change(s):

None

Metropolitan Council

FY 2020-21 Biennial Budget Change Item

Change Item Title: Water Demand Reduction Grant Program

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Clean Water Fund				
Expenditures	500	500	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	500	500	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$1.0 million in the FY20-21 biennium be appropriated from the Clean Water Fund to the Metropolitan Council's Water Demand Reduction Grant Program for grants to local governments.

Rationale/Background:

- Although the seven-county region is relatively water-rich, the region's steady population growth, increased groundwater pumping, changing land use, and variable weather and climate is challenging some communities' ability to meet current and future demand. Our rising dependence on groundwater for drinking water, particularly since 1980, has become a significant issue. In parts of the region, groundwater levels are declining.
- One important factor to improve water supply management practices is to reduce water use in communities through implementation of demand reduction measures. There is a need to provide financial assistance to incentivize communities to implement water demand reduction measures to reduce reliance on groundwater which will help prevent groundwater degradation in locations around the region.
- State regulators require water suppliers to reduce water use and increase water conservation and efficiency. Funding for this requirement has not been provided through other means. This grant program uses matching funds from local water suppliers to incentivize reduced use of our water resources.

Proposal:

Met Council will continue passing through this funding as grants to encourage implementation of water demand reduction measures by municipalities in metro area. Some of these measures include but are not limited to:

- Municipal, commercial and residential water use audits
- Replacing inefficient appliances and fixtures
- Summer peak use reduction, mainly targeting irrigation water use

The Council will collaborate with local units of government, state agencies and other stakeholder groups to collaboratively use this fund to address local, and regional water use issues.

Equity and Inclusion:

The program goal is to ensure that all residents of the Metropolitan Area have access to reliable, clean and affordable water supply now and in the future. Since the program's inception in FY16, Clean Water Fund has been the only source of funding for this program to Grants to LGUs to reduce water use. Metropolitan Council's Master

Water Supply Plan (2015) identified goals and strategies to ensure drinking water supply sustainability for 2040 in the metro area, one of these goals is to reduce residential water use from 95 gallons per person per day to 75 gallons per person per day. To achieve these goals, water demand reduction grants supported by this program are essential to ensure the reliability and protection of drinking water supplies.

IT Related Proposals:

Not applicable.

Results:

- The activity outcomes implemented measures to reduce water use by communities resulting in reducing reliance on groundwater, reducing impacts on aquifers, groundwater quality and surface water features.
- A total of 19 metropolitan communities are participating in the current Water Demand Reduction Grant Program. The first and second quarters of 2016 have resulted in the following activities:

	Clothes Washers	Toilets	Irrigation Controllers	Annual Gallons Saved	Total Rebate (includes municipal contribution)
Q1	230	218	7	3,980,608	\$34,502.77
Q2	162	200	91	5,022,643	\$45,125.79
Sum	392	418	98	9,003,251	\$79,628.56

Statutory Change(s):

None.

Metropolitan Council

FY 2020-21 Biennial Budget Change Item

Change Item Title: Water Supply Sustainability Support

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Clean Water Fund				
Expenditures	1,000	1,000	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,000	1,000	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$2.0 million of state funding from the Clean Water Fund be appropriated to the Metropolitan Council's Water Supply Sustainability Program. \$1.9 million was appropriated to the Council in the prior biennium so this request would be a 5 percent change from the last biennium.

Rationale/Background:

- The Twin Cities metropolitan area is home to three million people, more than half of Minnesota's population. 74 percent of the region's population relies on groundwater resources for their source of water supply. Securing their safe and plentiful drinking water, while protecting the region's diverse water resources, requires coordinated and ongoing effort.
- Although the seven-county region is relatively water-rich, the region's steady population growth, increased groundwater pumping, changing land use, and variable weather and climate is challenging some communities' ability to meet current and future demand.
- Our rising dependence on groundwater for drinking water, particularly since 1980, has become a significant issue. In parts of the region, groundwater levels are declining.

Proposal:

- The Council will continue to support communities implementing projects that address emerging drinking water supply threats, provide cost-effective regional solutions, leverage inter-jurisdictional coordination, support local implementation of wellhead protection plans, and prevent degradation of groundwater resources.
- These activities will provide communities with:
 - Potential solutions to balance regional water use through utilization of surface water, storm water, wastewater, and groundwater
 - Analysis of infrastructure requirements for different alternatives
 - Development of planning level cost estimates, including capital cost and operation cost
 - Identify funding mechanisms and equitable cost-sharing structure for regionally-beneficial water supply development projects

Through established and proposed workgroups, the Council will collaborate with local units of government, state agencies, and other stakeholders' groups to collaboratively address local and regional water supply issues.

Equity and Inclusion:

The program goal is to ensure that all residents of the metropolitan area have access to reliable, clean, and affordable water supply now and in the future. Since the program's inception in FY10, the Clean Water Fund has

been the only source of funding for this program to support studies, tools, and projects. Metropolitan Council's Master Water Supply Plan (2015) identified goals and strategies to ensure drinking water supply sustainability for 2040 in the metro area. To achieve these goals water supply sustainability studies, tools, and projects supported by this program are essential to ensure the reliability and protection of water supplies.

IT Related Proposals:

Not applicable.

Results:

- This proposal will support efforts to ensure supplies of drinking water are adequate for the region's current and projected population; avoid competition and conflict over water supply; and foster regional collaboration to address water supply challenges and limitations in a manner that takes advantages of regional and sub-regional economies of scale.
- The activity outcomes will recommend measures to improve groundwater use, to reduce impacts on aquifers, groundwater quality, and surface water features, highlight groundwater-surface water interaction risk factors for all communities in the Metro area, and provide recommendations to prevent and address these risks and achieve the drinking water security through improved water use, conservation, and reuse which collectively lead to:
 - protect groundwater from degradation- quantity and quality
 - protect drinking water source
- Success Indicators:
 - From 2005 to 2016, number of communities received technical support from the council through facilitated sub-regional workgroups increased 65 percent.
 - Improve groundwater use: currently 74 percent of the metropolitan area population relies on groundwater; the intended long-term outcome is to sustainably use groundwater in the metro area in addition to other available resources.

Statutory Change(s):

None.

Program: Parks

Activity: Water Sustainability

metro council.org/Wastewater-Water.aspx

AT A GLANCE

- Serve 186 communities, 105 water supply providers
- 74% of residents use groundwater as their source of water
- Municipal Water Use:
 - Current: 350 Million Gallons per day
 - 250 Million from Groundwater
 - 100 Million from Mississippi River
 - Projected (2030): 450 Million Gallons per day
 - 330 Million from Groundwater
 - 120 Million from Mississippi River
 - Average per capita water use per day: 100 gallons

PURPOSE & CONTEXT

The purpose of the Metropolitan Water Supply Planning is to ensure that supplies of potable water are sustainable and adequate for the region's current population and projected growth.

SERVICES PROVIDED

The data and tools generated and the projects implemented by the Council's Water Supply Planning Program benefit communities by enhancing communities' planning processes, and ensuring a more coordinated and regionally sustainable approach to water supply. Cities in the region are the suppliers of water to residents, but the Council plays a coordinating and technical assistance role.

Council Role In Water Supply

<i>Council Role</i>	<i>Outcome/Goal</i>
Provide technical assistance: information and tools	Better understanding of water supply issues and trends
Develop and update Regional Master Water Supply Plan	Guidance for local water supply systems and regional investments
Provide assistance in plan development and review services to local and state entities	Consistency of local water supply plans with the regional master plan (MS 103G.291, Subd.3(b))
Analyze regional and local water supply emerging issues and providing solutions	Local government units make informed and effective water supply decisions
Facilitate cooperation between communities and support local effort	Regional, cost effective, long-term, reliable and sustainable solutions to current and potential problems

RESULTS

From 2005 to 2017 the number of communities that received technical support from the council through facilitated sub-regional workgroups increased from 20 to 72.

Minnesota Statute 473.1565 (<https://www.revisor.mn.gov/statutes/cite/473.1565>) directs the Council to carry out water supply planning activities including development of a Master water Supply Plan.

Minnesota Statute 103G.291 (<https://www.revisor.mn.gov/statutes/cite/103G.291>) require that all local water supply plans in the metropolitan area, must be consistent with the Master Water Supply Plan (<http://www.metrocouncil.org/Wastewater-Water/Planning/Water-Supply-Planning/Master-Water-Supply-Plan.aspx>).

Program: Parks

Activity: Parks and Trails

metro council.org/Parks.aspx

AT A GLANCE

- 58 million regional park and trail visits in 2017 in the seven-county metropolitan area
- 63 regional parks, special recreation features and park reserves totaling almost 55,000 acres in the seven-county metropolitan area
- 51 regional trails total 389 miles in the seven-county metropolitan area
- Ten regional park implementing agencies own and manage regional parks and trails

PURPOSE & CONTEXT

The purpose of the Metropolitan Regional Parks System is to meet the outdoor recreation needs of residents and visitors and to preserve natural resources, including green space and wildlife habitat. Regional parks and trails complement state parks and trails in the Metropolitan Area. Parks are critical to the Metropolitan Area's current and future livability, sustainability, stewardship, and prosperity.

SERVICES PROVIDED

Under state law, Metropolitan Council is charged with overseeing the acquisition and development of regional parks and trails. The agency partners that own and operate the parks are called regional park implementing agencies. Together, Metropolitan Council and the ten regional park implementing agencies plan and finance the Metropolitan Regional Parks System. The ten agencies are:

- | | |
|-----------------------|---|
| • Anoka County Parks | • Washington County Parks |
| • Carver County Parks | • Three Rivers Park District |
| • Dakota County Parks | • Minneapolis Park & Recreation Board |
| • Ramsey County Parks | • City of Bloomington Parks (portion of one park reserve) |
| • Scott County Parks | • City of St. Paul Parks |

Metropolitan Council's responsibilities include:

- Choose locations for new regional parks and trails to serve the region's growing population and to protect natural resources
- Review and approve park and trail master plans and plan amendments that define a park's or trail's location and costs for recreation facilities.
- Survey park and trail visitors to measure what activities they prefer, how far they travel, and how often they visit a park or trail.
- Disburse state and regional funds to park agencies to finance operations and maintenance, land acquisition, recreation facility construction and recreation programs and staff in accordance with state law and Council allocation plans.

In the last three biennia, the Legislature has appropriated 40 percent of the Parks and Trails Legacy funding to the Metropolitan Council, 40 percent to the Department of Natural Resources for state parks, and 20 percent to Greater Minnesota, with 1 percent "off the top" for Coordinating with Partners activities.

RESULTS

From 2004 to 2016, annual visits to regional parks and trails increased 57%, or 4% annually. The 2017 annual use estimate was 58.3 million visits, which represents an increase of 22% from 2016. This increase is due in some part to new, more accurate attendance estimates, which demonstrate that more visits are happening in off-peak times of the year (winter) than previously thought.

Park surveys done in 2016 showed that respondents have very positive impressions of regional parks and trails facilities in terms of quality of facilities and services and recreation opportunities. Ninety five percent of respondents rated the quality of facilities, services, and recreation opportunities very good (64%) or good (31%). Less than 1% rated quality as poor or very poor.

Minnesota Statutes 473.351 (<https://www.revisor.mn.gov/statutes/cite/473.351>) and Minnesota Statutes 297A.94 (e) (3) (<https://www.revisor.mn.gov/statutes/cite/297A.94>) authorize funds for operating and maintaining regional parks and trails.

Minnesota Statutes 85.53, Subdivision 3 (<https://www.revisor.mn.gov/statutes/cite/85.53>) authorize allocations of Parks and Trails Legacy Fund appropriations among 10 regional park agencies.

AT A GLANCE

- 3.1 million residents in the seven-county area in 2017 (55 percent of total state population)
- 888,000 more people from 2010 to 2040 (31% increase) per Council forecasts
- 419,000 more households from 2010 to 2040 (38% increase) per Council forecasts
- 495,000 more jobs from 2010 to 2040 (32% increase) per Council forecasts
- 95.4 million transit rides in 2017
- 2.3 million rides on Metro Mobility in 2017
- 250 million gallons of wastewater treated daily
- 109 communities provided with wastewater treatment in 2017
- Eight treatment plants and 600 miles of regional sewers
- 58 million regional park visits in 2017
- 63 regional parks and park reserves totaling 55,000 acres in the seven-county metropolitan area
- 51 regional trails totaling 389 miles in the seven-county metropolitan area
- 7,200 low-income households provided affordable housing by the Council's Metro HRA in 2017

PURPOSE

The Metropolitan Council is the regional policy-making body, planning agency, and provider of essential services for the Twin Cities metropolitan region. The Council's mission is to foster efficient and economic growth for a prosperous region in partnership with more than 180 communities and seven counties.

We provide cost-effective transit and wastewater services, assist households with low and moderate incomes to find affordable housing, and support communities as they plan for anticipated growth.

As our region grows and its demographics change, the Council is working in partnership with communities to ensure we are prepared to support the continued growth of our region. As the economic engine of the state, the metro region's health and vitality has a statewide impact. Through our planning activities and the provision of regional services, we contribute to the following statewide outcomes:

- A thriving economy that encourages business growth and employment opportunities
- A clean, healthy environment with sustainable uses of natural resources
- Sustainable options to safely move people, goods, services, and information
- A livable and attractive place for people of all races, ethnicities, incomes, and abilities to call home and be prosperous

The charts on the next page show appropriations to the Metropolitan Council recorded in SWIFT. The Council's unified operating budget for calendar year 2018 is \$1.1 billion. State appropriations for transit and parks operations and water supply planning provided approximately 38 percent of agency funding in CY18. The majority of our operating funding comes from charges for services (wastewater fees and passenger fares), federal funds, property taxes and local funds.

BUDGET

STRATEGIES

Our governing body – the 17-member Metropolitan Council – plays a key convening role, bringing together communities to develop policies and a shared vision for the region. To achieve our mission, we carry out planning initiatives and provide essential services to the region.

Planning Initiatives

- Our regional plan, Thrive MSP 2040, is the overarching policy and planning document that defines the regional vision, guides the development of the region through its land use policy, and defines the high level approach outlined in each related policy plans. Development of the document included several years of engagement with residents, local governments, and other partners to create a framework for a shared vision for a prosperous, equitable, and livable region.
- Regional planning initiatives include transportation, parks, water resources, community planning, and housing.

Transportation

- We continue to look for adequate financial resources to support the transit system. As the demand for service grows and service costs increase, revenue is not keeping up. We anticipate that transit demand will increase 80 percent by 2040. At the same time, forecasted growth in motor vehicle sales tax revenues, a major source of transit funding, has flattened and is volatile.
- Our Metro Transit bus and rail systems provide more than 80 million rides every year, getting people to work, school, and services. This contributes to managing road congestion by taking single-occupancy vehicles off metropolitan highways so businesses can move their goods efficiently.
- Our Metro Mobility and Transit Link services transport people unable to use regular-route transit service.
- Our transportation planners play a key role in collaborating with local communities to create our vision for roads, airports, and transit to ensure effective and cost-efficient investments.

Parks

- We partner with 10 parks implementing agencies to plan, acquire land, and develop facilities for regional parks and trails. Our goal is to preserve natural resources and provide recreational opportunities throughout the region.

Clean water and wastewater treatment

- We foster a safe and healthy environment through our award-winning and cost-effective wastewater treatment services, water supply planning, and water quality monitoring initiatives.

Planning and development

- Our Livable Communities grants help fund affordable housing; clean polluted land for redevelopment; and create new models for livable, walkable, connected neighborhoods and transit-oriented developments, stimulating and leveraging private investment and increasing communities' tax base.
- We coordinate local communities' comprehensive plans, providing technical assistance and resources, to ensure coordinated, orderly, and efficient development in the region.

Housing

- Our Housing Policy Plan identifies regional housing needs and priorities, connects housing to other Council system plans, and provides guidance for local housing planning.
- Our Metro HRA provides rent assistance for more than 7,200 low-income residents in nearly 100 communities.

Minnesota Statutes, Chapter 473 (<https://www.revisor.mn.gov/statutes/?id=473>) provides the legal authority for Metropolitan Council.

Metropolitan Council

FY 2020-21 Biennial Budget Change Item

Change Item Title: Transit Services for Persons with Disabilities

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	10,569	25,621	25,621	25,621
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	10,569	25,621	25,621	25,621
FTEs	0	0	0	0

Recommendation:

The Governor recommends a general fund base increase of \$10.569 million in FY20 and \$25.621 million each year ongoing for the Metropolitan Council to continue to provide transit services for persons with disabilities. This will increase the biennial appropriation by 20%. The Governor also recommends changes to statute that would allow the Council and the Department of Human Services (DHS) to share client data, allowing the Council to receive additional federal funds for the Metro Mobility program.

Rationale/Background:

Metropolitan Council operates Metro Mobility which provides rides to certified riders who are unable to use regular-route buses due to a disability or health condition. In addition to general inflationary pressures, Metro Mobility is experiencing growing ridership demand. The mandated service necessary to meet federal and state requirements, and to meet the service needs of the clients, is substantially more expensive to provide than regular transit service. Each year Metro Mobility takes up a larger portion of Metropolitan Council revenues. By 2022, the Metro Mobility budget is anticipated to grow from 14.25% to more than 16.25% of the Council's Total Transit Operating Budget.

The Council receives an annual base general fund appropriation of \$89.82 million for transit services. This funding is first used to meet the state's commitment to rail, then Metro Mobility. To establish a base appropriation for Metro Mobility of \$57.166 million, the FY19 commitment to rail was subtracted from the total base appropriation. The Council built operating reserves in 2017-2018 that help mitigate the need for additional state funding in FY20. The new base for Metro Mobility will be \$82.787 million.

The Council's state general fund appropriation request for the FY22-23 biennium reflects the implementation of a data-sharing program between the Council and the DHS that would enable the Council to receive federal funds for Medical Assistance and DHS Waivered service clients transported by Metro Mobility. This change item assumes that the Council receives \$8 million per year starting in FY22, reducing its state general fund appropriation request by a comparable amount. If the federal revenues end up being lower than this estimate, the future state general fund appropriation request would increase.

Proposal:

This proposal would provide additional general funds to maintain Council services for persons with disabilities. Although the existing program does not change, the number of persons with disabilities relying on these mandatory services continues to grow.

Key assumptions that impact the cost of the proposal:

- Base funding level is the Council’s Proposed State Fiscal Year 2019 Budget
- CY 2019 Beginning Fund Balances projected in the Council’s 2018 3rd Quarter Financial Report
- Current law and current program structure, with data sharing legislation enacted during the 2019 Legislative Session
- Current fare structure
- Metro Mobility fares grow 6.2% annually to reflect increasing ridership
- Metro Mobility Service Provider contract costs grow 8.324% annually due to 2% growth in contract costs compounded by 6.2% ridership
- All other expenses grow by an annual inflation rate of 3.15%

Equity and Inclusion:

This change item will benefit residents who are unable to use fixed-route buses due to a disability or health condition. Recognizing that our region cannot compete economically if we are leaving a growing share of our population behind, the Metropolitan Council incorporated an “equity” outcome into *Thrive MSP 2040*, the comprehensive development guide required by state statute. The *Thrive MSP 2040* equity outcome commits the Metropolitan Council to creating real choices in where we live, how we travel, and where we recreate for all residents, across race, ethnicity, economic means, and ability. This outcome also commits the Metropolitan Council to fully engaging communities in decision-making in accordance with the Metropolitan Council’s *Public Engagement Plan*. This includes engaging Metro Mobility customers to ensure the service meets their needs.

IT Related Proposals:

Not applicable.

Results:

Metro Mobility ridership has increased 57 percent between 2009 and 2017, or an annual average of 6 percent.

Statutory Change(s):

Minnesota Statutes 13.461, 13.72, and 473.386

Metropolitan Council

FY 2020-21 Biennial Budget Change Item

Change Item Title: Transit Sales Tax Increase

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Special Revenue Fund (DOR)				
Expenditures	261	636	659	682
Revenues	261	636	659	682
Other Funds (Met Council)				
Expenditures	28,739	70,064	72,541	75,118
Revenues	28,739	70,064	72,541	75,118
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs (DOR)	3.1	7.1	7.3	7.6

Recommendation:

The Governor recommends enactment of a 1/8 cent sales tax in the seven-county metropolitan area to maintain and expand the regional bus and transitway system. Revenues from the sales tax, along with the Minnesota Department of Transportation proposal to increase the motor vehicle sales tax rate from 6.5 percent to 6.875 percent and state general obligation bonds would:

- Eliminate a structural deficit in the regional bus system
- Build out 10 Bus Rapid Transit (BRT) lines
- Increase service in the region's busiest transit corridors by 40 percent
- Increase regional transit ridership by 30-40 percent
- Begin the electrification of the regional fleet by adding at least 150 electric buses
- Improve the transit customer experience through investments in safety, shelters and technology

The Minnesota Department of Revenue will administer this tax for the Metropolitan Council, including working with retailers in the jurisdiction, updating tax collection systems, and compliance. The department will recover administrative costs from the revenue raised by the tax in its local sales tax administration account in the state special revenue fund.

Rationale/Background:

Today, more than three million people call the metropolitan region their home – 55 percent of the entire state. By 2040 the region is expected to add an additional 700,000 people and 500,000 jobs. As the region's population grows and changes, demand for reliable transit options will increase. That growing population will include more people of color, millennials, and seniors – all these cohorts use transit at higher rates than their peers.

Since 2011, the Metropolitan Council has provided 600 million transit rides, many of them connecting people to work or school. A reliable, safe and comprehensive transit system is a key part of our region's economic competitiveness, and our ability to attract and retain businesses, workers, and people. Ridership has steadily increased over the past decade; however, that trend has stagnated in the past several years. When looking more closely at ridership trends, while bus ridership is declining, ridership on rail and arterial BRT has been increasing. Put simply, when we invest in transit, ridership follows.

Over the past several years, investment in transit has failed to keep up with the growing demand for services. Further, existing revenues will not be sufficient to maintain existing service levels. In the next biennium alone, the regional bus system is facing a deficit over \$53 million and more than \$250 million over the next 10 years.

While the Council has managed some of the deficit with one-time savings, smart fiscal management, and \$70 million in onetime general funds, without new investment, our region will continue to fall behind peer regions.

Proposal:

The Metropolitan Council is proposing that the state enact an 1/8 cent sales tax in the seven-county metropolitan area and invest the revenues - \$770 Million over 10 years - to fund the structural deficit in the regional bus system, and build and operate an expanded, integrated regional transit system. An aggressive investment in BRT would mean nearly 40 percent more bus service in our region's busiest transit corridors. This would significantly increase transit access to nearly 500,000 jobs along 10 corridors.

This investment in BRT complements the expansion planned for the next 10 years in the long-term regional transportation plan including Green Line extension (SWLRT), Blue Line extension (Bottineau LRT), Orange Line BRT, Gold Line BRT, and Rush Line BRT. It would also support an additional 3-5 percent investment in regular route bus.

In total, these investments would lead to a 30-40 percent increase in regional transit ridership in the greater Minneapolis-Saint Paul region over the next 10 years.

Accomplishing this plan is dependent on:

- MnDOT's proposal to increase the motor vehicle sales tax from 6.5 percent to 6.875 percent;
- State GO Bonds;
- Continued financial support from the county transit sales tax collections in the region.

The Minnesota Department of Revenue will administer this tax for the Metropolitan Council. The administrative costs contained in this proposal are shown in the Expenditure Overview, Financing by Fund, and Change Summary fiscal reports contained in the Minnesota Department of Revenue's operating budget book.

Equity and Inclusion:

More than 30 percent of transit riders are transit dependent, meaning they can't afford a car. In addition to serving low-income populations, people of color also use transit at higher rates than white people. Investments in these transit corridors helps people who rely on public transit, giving them the ability to live and work throughout the region, and access opportunities. If everyone is going to have a seat at the table in One Minnesota, we need to properly fund transit, so everyone can get to the table.

Results:

- 10 new Bus Rapid Transit (BRT) lines
- 40 percent service increase in the region's busiest transit corridors
- 30-40 percent increase in regional transit ridership
- 150 electric buses
- Improved transit customer experience

Statutory Change(s):

*HUTD Transfers out include transportation funds only.				

Recommendation:

The Governor recommends the state commit to a major transportation investment plan to fund the estimated \$6 billion dollar gap that exists between funding needs and available revenues over the next 10 years. The Governor proposes filling the \$6 billion gap in road and bridge funding by:

- Initiating a 20 cent gas tax increase, including fuel in distributor storage at the start time of each increase (phased-in over two years in October and April in FY20 and FY21)
- Indexing the gas tax to inflation (beginning in FY23)
- Increasing the registration tax, effective January 1, 2020 (increase tax rate from 1.25 percent to 1.5 percent and base tax fee from \$10 to \$45; change the depreciation schedule; amend base value calculation by removing destination charge and hold harmless provision of statute)
- Increasing the motor vehicle sales tax from 6.5 percent to 6.875 percent, effective December 1, 2019
- Authorizing \$2 billion in trunk highway bonds over 8 years starting in 2022

The gas tax, registration tax, and motor vehicle sales tax increases will fund roads and bridges for the state trunk highways, county state aid highways, and municipal state aid streets. In the FY22-23 biennium, when revenue changes are completely phased in, the increased revenue from the gas tax, motor vehicle sales tax, and registration fees are forecast to increase available resources for each transportation fund by 30 percent.

To help lower- and middle-income Minnesotans pay for transportation investments, the governor proposes an increase to the Working Family Credit of \$100 for each single or head of household recipient and \$200 for each married filing jointly recipient. This proposal is described in the Tax Aids, Credits and Refunds section. In addition, while the gas tax increase would impact how our rate compares to neighboring states, the existing qualifying service station tax credit would ensure Minnesota service stations within 7.5 miles of the state border receive refunds that effectively reduce the rate to not more than three cents per gallon above the rate of the neighboring state.

Other Components:

In addition to the new funding above, the Governor recommends:

- Returning the auto parts sales tax, 9.2 percent motor vehicle rental tax, and 6.5 percent sales tax on motor vehicle rentals currently deposited into the Highway User Tax Distribution (HUTD) Fund as of FY2018 back to the General Fund beginning in FY2020. This results in an increase to the General Fund of \$395 million in FY20-21 and \$404 million in FY22-23.
- Restoring the motor vehicle lease sales tax to the pre-2018 distribution levels. This results in \$32 million returned to the General Fund, annually.
- In total, the General Fund would receive \$459 million in FY20-21 and \$468 million in FY22-23.

General fund revenues are reduced by \$8 million in the FY20-21 biennium due to increased petroleum refunds and income tax interactions with the registration tax. General fund expenditures decrease by \$170,000 for the biennium for increased aid to counties with casinos under [M.S. 270C.19](https://www.revisor.mn.gov/statutes/cite/270C.19) (<https://www.revisor.mn.gov/statutes/cite/270C.19>) due to the increase in gas tax.

Authorization for the sale of \$2 billion in trunk highway bonds over 8 years starting in 2022 (\$250 million per year). Debt service for these bonds is estimated to be \$22.2 million for the FY22-23 biennium.

Several components in this proposal require changes to the Minnesota Licensing and Registration System (MNLARS). Costs associated with changes to MNLARS will be funded through the Department of Public Safety's MNLARS budget recommendation.

Rationale/Background:

Minnesota cannot preserve and improve quality and performance of the state's transportation systems under the combined limitations of current investment levels and current lifecycle replacement practices. The consequences of underinvesting in the state's transportation system will include deterioration in service, increases in congestion, failing infrastructure and diminished ability to remain economically competitive. This is because transportation systems facilitate the efficient movement of people and goods and create the opportunity for economic development, enhanced productivity, job formation and sustainable growth. Without additional investment, the transportation system will not be able to expand to accommodate expected population and job growth. In addition, alternatives to driving alone must play a larger role in satisfying growing transportation demand - roads, transit and other transportation modes must work together as one system.

Road and Bridge Funding

The 2018 Minnesota Statewide Highway Investment Plan (MnSHIP) determined additional funding was needed for transportation, due largely to aging infrastructure and construction costs exceeding the growth of existing revenues. Overall, the department faces a \$6 billion gap in revenue over the next ten years above current fund

balance projections to fund needed investments in state road construction. Of this total gap, roughly \$4 billion is needed for preservation and modernization, and \$2 billion is needed for strategic expansion.

Without additional revenue, there will be:

- Increasing deterioration of pavement and bridges on state system. The percent of highway pavement considered in poor condition (rough driving surface) and the percent of bridge deck pavement considered in poor condition it is estimated to increase significantly in the next 20 years.
- Very little expansion to address population and economic growth
- Reductions in high priority products and service delivery

In addition, more operations and maintenance dollars are recommended, calculated at 5 percent of new Trunk Highway Fund revenues. This additional funding will be spent on snow plowing, fixing pot holes and guard rails, etc. Investing in operations and maintenance is needed due to declining asset conditions, increased snow and ice requirements, and the need for more timely maintenance.

Proposal:

Road and Bridge funding components

New revenues and bonding would be identified to help close the funding gap over the next ten years. The goal is an integrated transportation system that optimizes the movement of people and goods across the state. With new funding, we can:

- Improve asset management - preserve and modernize the existing system
- Invest in strategic mobility enhancements, including MnPASS and other intelligent transportation tools
- Complete strategic expansion on key corridors throughout the state
- Complete Main Street improvements

The benefits for Minnesotans will include:

- Reduced wear and tear on their cars
- Fewer stops at the fuel pump due to smoother roads and reduced congestion
- Fewer accidents
- More time doing what they need to do
- Reduced impacts on our environment

MnDOT has identified pavement and bridge needs as well as mobility projects that are not currently being addressed through its 10-year work plan. These unmet needs and projects will be given priority. These funds will provide for capital costs of construction as well as project development and engineering activities with contractor support, allowing the department to utilize this funding in the most efficient manner.

MnDOT proposes to utilize the increased operating appropriations for our highest-priority products and services. Some of these include:

- Snow and Ice - keeping the roads clear of snow and ice
- System Roadway Structures Maintenance – repair potholes (pavement repair)
- Bridges and Structures Inspection and Maintenance
- Intelligent transportation systems for improved safety and mobility

The Governor's proposal provides constitutionally dedicated funding increases that can be relied on over the long term and can only be used for transportation purposes. Returning auto parts and other taxes to the general fund results in the availability of funding for other state priorities.

Department of Natural Resources Funding Components

The Governor's proposal provides constitutionally dedicated funding increases that can be relied on over the long term and can only be used for transportation purposes. Returning auto parts and other taxes to the general fund results in the availability of funding for other state priorities.

The Department of Natural Resources (DNR) receives a portion of the unrefunded gasoline tax, which has supported the state's recreational motorized vehicle activities and forest roads since 1961. This funding is dedicated to the DNR with the broader goal that the unrefunded gasoline proceeds should support programs related to non-highway gasoline use.

This revenue enables additional investment in Minnesota's water recreation facilities and services. The proposal funds \$3.35 million annually for increased operations and maintenance of public water access sites and state trails (\$1.35 million) and increasing boating access site rehabilitation (\$2 million). Additionally, this proposal increases grants to local sheriff offices by \$300,000 annually to reimburse for search and rescue efforts.

This proposal also increases revenues to DNR's forest road account by \$170,000 in FY20, \$506,000 in FY21, \$670,000 in FY22, and \$705,000 in FY23. The state and counties (with a land commissioner) split this revenue 52% and 48% respectively. This increase funds additional graveling, grading, and drainage projects to maintain the state's 2,340-mile forest road network used by the forest industry, emergency responders and outdoor enthusiasts.

Transit Funding Components

Revenue from the motor vehicle sales tax is split between the HUTD (60 percent) and the Transit Assistance Fund (40 percent). The Metropolitan Council receives 90 percent of the motor vehicle sales tax revenue in the Transit Assistance Fund and MnDOT receives the remaining 10 percent for greater Minnesota transit.

Over the long-term, greater Minnesota transit revenues will increase from the proposed increased MVST rate. However, restoring the motor vehicle lease sales tax to the pre-2018 distribution levels results in a short-term reduction in revenue. To offset the decrease in revenue between FY20-23, MnDOT is amending internal accounting practices to allow additional spending of the motor vehicle lease tax revenue in the current year (current accounting practices involve carrying forward all of this revenue each year, and planning spending in the subsequent year).

Equity and Inclusion:

A safe, reliable and multimodal system of transportation is vital to ensuring equity and inclusion by connecting communities statewide. This needed funding will also provide additional contracting opportunities to certified small businesses and opportunities to work towards enterprise-wide goals of equity and inclusion.

IT Related Proposals:

N/A

Results:

Currently, Minnesota's total state gasoline taxes are 28th highest in the country, including District of Columbia. Since 2013, Minnesota has dropped from 19th highest state gasoline taxes, as a result of other states increasing their gasoline tax rate. Over a 10-year period, the inflation-adjusted tax on gasoline is projected to add an additional 28 cents to the price of a gallon of gasoline.

These investments would provide additional long-term sustainable and dedicated funding. MnDOT would plan to rehabilitate the system for the 21st century by:

- Improving an additional 1,800 miles of pavement and repair or replace an additional 300 bridges on state highways
- Accelerate progress toward the state goal of zero highway deaths with targeted installation of rumble strips, median barriers, lighting and other safety improvements. The Minnesota Toward Zero Death program has helped decrease injuries and deaths on the highway
- Keep roadside infrastructure in a state of good repair

In addition, MnDOT has operating performance measures that will be impacted by this proposal. All are anticipated to decline without additional funding; and this would reduce the decline. They include:

- Snow Plowing Performance – meet clearance targets
- Smooth Roads – percent of pavement patching addressed
- Percent of projects let in the year scheduled

Statutory Change(s):

Gasoline Tax: M.S. 296A.07 and M.S. 296A.08

Vehicle Registration Taxes: M.S. 168.013

Motor Vehicle Sales Tax: M.S. 297B.02

Motor Vehicle Lease Sales Tax: 297A.815

General Fund Transfers: M.S. 297A.94 and 297A.64

Metropolitan Council

FY 2020-21 Biennial Budget Change Item

Change Item Title: Regional Transit Bonding Authority

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	50	520	820
Revenues	0	(40)	(400)	(640)
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	90	920	1,460
FTEs	0	0	0	0

Recommendation:

The Governor recommends the Metropolitan Council's authority to issue bonds under M.S. 473.39 be increased by \$92,300,000 to implement the Council's transit capital improvement program.

Rationale/Background:

The Metropolitan Council is given authority to issue general obligation bonds to implement the Council's transit capital improvement program in M.S. 473.39. Council bonding authority is used primarily for bus and paratransit vehicle replacement as a local match for Federal Appropriations. This one-time authority is subject to the volume limitations in this section and when exhausted, the Council requests additional authority. The Council is requesting \$92,300,000 in additional authority.

Proposal:

In addition to the authority previously granted in M.S. 473.446, the proposal allows the Council to issue certificates of indebtedness, bonds, or other obligations under this section in an amount not exceeding \$92,300,000 for capital expenditures as prescribed in the council's transit capital improvement program and for related costs, including the costs of issuance and sale of the obligations. Of this authorization, after July 1, 2019, the council may issue certificates of indebtedness, bonds, or other obligations in an amount not exceeding \$45,400,000 and after July 1, 2020, the council may issue certificates of indebtedness, bonds, or other obligations in an additional amount not exceeding \$46,900,000.

Council transit bonds are repaid through a property tax authorized in M.S. 473.446. Higher levies will increase property taxes on all property. They result in higher homeowner property tax refunds, increasing costs to the state general fund. Higher levies also increase income tax deductions, reducing revenues to the state general fund. The net impact on the general fund is \$90,000 in FY 2021, and \$2.38 million in FY 2022-23. The fiscal impact is represented in the Tax Aids, Credits and Refunds budget pages.

Results:

The Council will implement its transit capital improvement program.

Statutory Change(s):

Minnesota Statutes, Section 473.446

Metropolitan Council

FY 2020-21 Biennial Budget Change Item

Change Item Title: Rail Services Base Reduction

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	(4,385)	(4,385)	(4,385)	(4,385)
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	(4,385)	(4,385)	(4,385)	(4,385)
FTEs	0	0	0	0

Recommendation:

The Governor recommends a general fund base decrease of \$4.385 million in FY20 and \$4.385 million each year ongoing for the Metropolitan Council to continue to provide rail transit services. The base reduction for rail will decrease the biennial appropriation for rail by 13%.

Rationale/Background:

The Council receives an annual base general fund appropriation of \$89.82 million for transit services. This funding is first used to meet the state's commitment to rail, then Metro Mobility. To establish a base appropriation for rail (\$32.654 million) and Metro Mobility (\$57.166 million), the FY19 commitment to rail was subtracted from the total base appropriation. The new general fund base for rail will be \$28.269 million.

MS 473.4051 subd. 2 provides that, after operating revenue and federal money have been used to pay for light rail transit operations, 50 percent of the remaining operating costs must be paid by the state. The Counties in which the light rail line resides have proportionally shared the remaining 50 percent of operating costs. The proposed base general fund reduction will shift a portion of the state's funding share for light rail transit to the Motor Vehicle Sales Tax where it will compete with bus funding pressures.

Proposal:

This proposal reduces the proportion of general funds available to meet the state's funding commitment to rail.

IT Related Proposals:

Not applicable.

Results:

The METRO Green Line LRT, METRO Blue Line LRT, and Northstar Commuter Rail all broke ridership records in 2017. Ridership on METRO Green Line has 13.1 million rides for an increase of 3.5% over 2016. Metro Blue line ridership increased nearly 4% for 2016 to 2017 and Northstar Commuter rail increased nearly 12%.

Statutory Change(s):

None.

Program: Transitmetro council.org/**AT A GLANCE**

- In calendar year 2017
 - 95.4 million total regional transit rides
 - 81.9 million Metro Transit rides
 - 2.3 million Metro Mobility rides
- Metro Green Line (Central Corridor)
 - Service initiated June 2014
 - Attracted \$2.7 billion in development within one-half mile of the line
 - Created more than 5,400 jobs
- Metro Blue Line (Hiawatha)
 - 15,000 housing units developed within one-half mile of the line

PURPOSE & CONTEXT

Transportation is the engine of our regional – and state – prosperity. A reliable, affordable, and efficient transportation system promotes a competitive economy, safety and security, a healthy environment, and a livable region.

As our region continues to grow and adds more vehicles to our transportation system, transit is an ever-more critical component to our transportation system. Transit provides a sustainable, efficient, and effective option to address increasing roadway congestion and improve air quality. It is one of the most important assets to businesses looking to attract and retain employees. Our transportation planners continuously look for new and innovative ways to provide more efficient service that meets customer needs and to leverage the opportunities of emerging technologies to enhance the customer experience and improve service performance.

Transit functions are funded by passenger fares, advertising revenues, state appropriations, Motor Vehicle Sales Tax (MVST), local (county) sales taxes, federal revenue, and other local sources.

SERVICES PROVIDED

The Metropolitan Council is responsible for the state's largest public transit system, which provides nearly 100 million rides each year on bus and rail in the region. Metro Transit, which operates Northstar Commuter Rail, light rail, and bus services, provides the bulk of those regional rides. Metro Transit has been at the forefront of improvements in our regional transit system, creating communities that are more equitable, economically competitive and sustainable. The American Public Transportation Association (APTA) named Metro Transit the 2016 System of the Year, recognizing the service for its safety, vehicle and facilities maintenance and operations, and record ridership.

Metropolitan Council also operates several services for people unable to access or use regular bus or rail route service. Metro Mobility provides rides to certified riders who are unable to use regular-route buses due to a disability or health condition. Transit Link is the Twin Cities dial-a-ride bus service for the general public, where regular-route transit service is not available. The Council also offers a regional commuter vanpool program, Metro Vanpool, which provides financial assistance for vanpools of five to 15 people, including a volunteer driver. This program is targeted to commuters going to and from work destinations throughout the region in areas not well served by the regular-route transit network.

In 2017, the region provided 95.4 million rides, through Metro Transit, the Council's additional transit options, and the suburban transit providers. Metro Transit provided 81.9 million of those rides, and Metro Mobility provided 2.3 million rides. The Council:

- operates and maintains bus, light rail, and commuter rail services;
- adds new and expands existing bus routes to meet growing demand, and adjusts existing routes when necessary to meet market needs;
- develops a network of rail and bus "transitways" with service mode and alignment selected and implemented based on an extensive alternatives analysis and local input. Transitways include bus and rail transit that enable efficient, reliable travel times and an improved passenger experience on high-demand corridors in the region; and
- work with MnDOT, counties, and cities to increase the travel speed of transit through initiatives including bus-only shoulders, ramp meter bypasses, and signal priority.

The Metropolitan Council transit program financing by fund presented in the state's budget system is further categorized in the Council's financial system as follows:

Metropolitan Council - Transportation

	Actual FY16	Actual FY17	Actual FY18	Estimate FY19	Forecast Base		Governor's Recommendation

Regional Administration provides administrative support services (e.g. Human Resources, Information Technology, Contracts and Procurement, etc.) to all Metropolitan Council divisions. Costs associated with these support services are allocated to divisions using basis approved in the Council's Federal Cost Allocation Plan to assure equitable distribution. Amounts shown for Regional Administration in the table above are estimated based on the proportional general fund share of total revenues for each program using the Council's calendar year actual results and budget.

RESULTS

Transit Ridership

Ridership measures transit system accessibility, quality, and system growth. Growth in ridership is an indication that more people are able to meet their mobility needs using transit. Existing transit ridership shown below includes all transit providers in the region. The second chart shows Metro Mobility ridership that is growing at faster rates than other transit.

Source: Metropolitan Council

Transit ridership continues to break records on a monthly and yearly basis. In 2017, the METRO Green Line LRT, METRO Blue Line LRT, and Northstar Commuter Rail line all broke ridership records. Among those highlights:

- 2017 ridership includes a record 13.1 million rides on the METRO Green Line, which has seen ridership grow every year since its 2014 opening. Ridership increased 3.5% from 2016 to 2017.
- METRO Green Line broke a record for the highest single-day ridership ever on Aug. 31, 2017, providing more than 68,000 rides.
- METRO Blue Line ridership increased nearly 4% from 2016 to 2017.
- Northstar Commuter Rail Line ridership increased nearly 12% from 2016 to 2017.

Rapid bus introduces a faster trip and an improved experience

Metro Transit opened the region's first arterial rapid bus line in June 2016. The A Line operates along Snelling Avenue, Ford Parkway and 46th Street, connecting the METRO Blue and Green lines and several other destinations. The corridor includes the A Line and Route 84 from Rosedale on the north end, to the A Line southern terminus at the 46th Street LRT station and the Route 84 southern terminus at Shepard Rd and Davern Street. Rapid bus is a package of transit enhancements that adds up to a faster trip and an improved experience. A Line's ridership success has been driven by strong connections to the light rail system, shopping destinations, and colleges and universities on the corridor. Among those highlights:

- Corridor ridership for the A Line and Route 84 grew 32% in the first year of A Line operations, compared to the year prior to June 11, 2016 when A Line service was launched.
- A Line provided more than 1.5 million rides in 2017.
- A Line averages 20-25% faster travel times than the previous Route 84 bus route.

The A Line is the first of several planned arterial rapid bus lines that will bring faster, more frequent service to the region's busiest transit corridors.

- In 2017, Metropolitan Council broke ground on the C Line which will substantially replace Route 19, running primarily on Penn Avenue and Olson Memorial Highway.
- Metropolitan Council is currently planning for the D Line, which will replace Route 5, the region's single busiest bus route. During rush hour, Route 5 buses make up less than 2% of vehicle traffic but carry more than 20% of people traveling through the Route 5 corridor by automobile or bus.

Hours of Delay Caused by Congestion

Transit is one of several system-wide options to help ease congestion and enhance ease of movement throughout the region for our residents and businesses. Transit benefits all road users, not just transit riders. Metro congestion affects metro-area residents, workers from outside the metro area, businesses shipping or receiving goods, and travelers moving through the metropolitan area.

The number of hours spent in congestion is an indicator of roadway performance and of transportation-related impacts to air quality. Traffic congestion causes problems for travelers and shippers including extra travel time, unreliable travel time, and increased fuel costs. Congestion also impacts air quality through increased carbon dioxide (CO₂) emissions.

The table shows the percent of directional freeway miles considered to be congested and shows that this measure of congestion had increased over time. Congestion is defined as vehicle speeds less than 45 miles per hour. If vehicle speeds are less than 45 miles per hour northbound on 35W in south Minneapolis from 7:30am to 9:30am, that section of freeway is considered to be congested.

Source: MnDOT Regional Transportation Management Center

Minnesota Statutes 473.371 through 473.449 (<https://www.revisor.mn.gov/statutes/cite/473.371>) prescribe the Metropolitan Council's roles and responsibilities in transit.

AT A GLANCE

- Serve the 13,140 members of the Minnesota Army (10,856) and Air (2,284) National Guard
- Since 9/11, the Minnesota National Guard has deployed more than 29,768 Army and Air Guard members to more than 37 countries worldwide
- Responsible for approximately \$370 - \$490 million per year from the federal government
- 361.9 full-time equivalents (FTEs) across the state - only 37.27 are 100% state-funded
- Provided assistance to over 50 state active duty missions in response to floods, fire, blizzards and other natural disasters or other emergencies since 2005
- Provided more than 33,164 state active duty work days by service members since 2005

PURPOSE

Federal: As a federal entity, military members of the Minnesota National Guard serve as a reserve force for the United States Army and Air Force. They are subject to be called to federal active duty for extended periods of time by the President.

State: As a state entity, the Minnesota National Guard provides support to local law enforcement agencies during natural disasters and other emergencies at the direction of the Governor.

Community: The Minnesota National Guard is also involved in community support projects throughout the state. These projects give our soldiers a chance to “give back to the community.”

We are comprised of and include the military forces of the state, the Office of the Adjutant General, all military reservations, military installations, armories, air bases, facilities owned or controlled by the state for military purposes, and civilians employed by the state for the administration of the military department.

We support the following statewide outcome: **People in Minnesota are safe.**

BUDGET

Source: Budget Planning & Analysis System (BPAS)

Does not include federal direct spending
Source: Consolidated Fund Statement

Source: Minnesota National Guard Annual Reports

Ninety-five percent of our total budget comes from the federal government through direct federal funding, cooperative agreements for facilities construction and maintenance, telecommunications, security, firefighting, and the STARBASE educational program serving inner city school students. The state general fund accounts for 4.63% of our budget, and approximately 0.37% comes from other sources (local government, facility sales, housing operations, etc.). Additionally, we are responsible for approximately \$370 - \$490 million per year from the federal government. These funds are paid to individuals and vendors for federal-related activities and do not pass through the state treasury. The department's staff includes 361.9 FTEs and only 37.27 FTEs are 100% state-funded. The remainder are predominantly federally funded -- some at 100% and most others at 75% or 80%.

STRATEGIES

We integrate federal and state resources to pursue strategies in two lines of effort. The first is Provide Ready Units which includes actions that provide a competent ready force, sustain optimal force structure and provide support response to any cyber events. The second is Relationship Integration which includes actions that maintain and enhance suitable infrastructure and facilities, sustain the "Beyond the Yellow Ribbon" activities, and diversify the force.

We have four core programs that support the Minnesota National Guard and implement these two lines of effort:

- The **Maintenance of Military Training Facilities Program** maintains the state's facilities used to train and house the members of the Minnesota National Guard and to protect the state's investment in facilities including the MN State Armory Building Commission (MSABC) facilities. Each Air National Guard base has a civil engineering function responsible for the maintenance of the federal facilities that are supported with state and federal dollars.
- The **Enlistment Incentives Program** supports and manages the department's enlistment and retention incentives and tuition reimbursement programs. These programs provide incentives to the men and women who enlist and maintain their memberships in the Army and Air National Guard.
- **Emergency Services** funds emergency response activities at the order of the Governor when the National Guard is activated in response to state emergencies.
- **General Support** provides the general administrative, financial, accounting, budgeting, project management, strategic planning, and human resource support necessary for the operation of the department.

MDMA's legal authority is provided from M.S. 190 – 195 (<https://www.revisor.mn.gov/statutes/?id=190>).

Net Fiscal Impact = (Expenditures – Revenues)	1,000	1,000	1,000	1,000
FTEs	0	0	0	0

Recommendation:

The Governor recommends additional funding of \$2 million in FY 2020-2021 to sustain the State Enlistment and Retention programs for military service members at the Minnesota Department of Military Affairs (MDMA). This budget recommendation reflects a 4.4% increase to the agency's total annual operating budget in FY 2020-2021.

Rationale/Background:

The MDMA offers the following incentives programs to recruit and retain service members:

1. State Tuition Reimbursement Program - Reimburse up to 100 percent of the tuition charged for eligible coursework (undergraduate and graduate) at accredited post-secondary institutions.
2. State Reenlistment Bonus Program – Offered to service members that have completed six years of service creditable for retirement and must have less than 13 years of service creditable for retirement on their current Expiration Term of Service date. This program was suspended on September 1, 2017.
3. State Medic Bonus Program - Authorized for current service members that are servicing in an authorized duty position that requires the Emergency Medical Technician – B certification and have a current National Registry of Emergency Medical Technician card.
4. State Enlistment Bonus Program - Authorized for non-prior service or prior service Army skill-level 10 (E-4 and below) and Air E-3 and below (training level 1 or 3) enlisting into hard slot or over-strength vacancies within the Career Management Fields and Air Force Specialty Codes. This program was suspended on September 1, 2017.
5. State Reclassification Bonus Program - Authorized for E-5 through E-7 vacancies in Military Occupational Specialties and Air Force Specialty Codes identified by The Adjutant General.

Proposal:

The Governor recommends additional funding to allow the agency to meet their on-going financial obligations of the enlistment incentives programs, which help to recruit and retain service members. This funding is necessary due to increasing tuition costs and unanticipated increases in service member participation. Program utilization has grown faster than anticipated in recent years and without additional funding, the program's base budget will be insufficient to meet current, contractually obligated incentive payments. The implementation date for this proposal is July 1, 2019.

Equity and Inclusion:

When the Minnesota National Guard established its diversity goals in 2011, the organization set its sights on shaping a force with a commensurate percentage of diverse individuals relative to the state of Minnesota's population. In 2018, nearly 24% of new Minnesota National Guard recruits were from diverse populations.

Year	Minority % - MN National Guard	Female % - MN National Guard
2011	7.80%	16.20%

Department of Military Affairs

FY 2020-21 Biennial Budget Change Item

Change Item Title: Sustain Reintegration Programs for Deployed Service Members and Families

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	258	258	258	258
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	258	258	258	258
FTEs	0	0	0	0

Recommendation:

The Governor recommends an annual general fund increase of \$258 thousand starting in FY 2020 to sustain current reintegration programs that support military service members and their families throughout the entire deployment cycle at the Minnesota Department of Military Affairs (MDMA). This budget recommendation reflects a 1.1% increase to the agency's total annual operating budget in FY 2020-2021.

Rationale/Background:

MDMA received a one-time reintegration appropriation of \$1.5 million in FY 2008 that was available until spent. The agency anticipates the remaining balance of this appropriation will be spent in FY 2019. This new funding would allow the agency to continue to support reintegration activities, provide more transparency of the program's annual expenditures, and simplify the financial management compared to the one-time funding.

"Reintegration" is defined as the process of transitioning from the deployment experience as a Warrior, back to a citizen in our community. Successful reintegration involves training and support activities for service members from all components, their families, employers, and key leaders in our communities. Minnesota's "Beyond the Yellow Ribbon" reintegration program is a "three-phased" deployment cycle support process that begins before a unit deploys, continues during the deployment, and continues after deployment. The "Beyond the Yellow Ribbon" program trains and empowers our service members, families, community leaders, and various agencies/organizations/associations for support throughout the entire deployment cycle.

The agency provides funding for the following reintegration activities to support our service members and their families throughout the deployment cycle:

1. Marriage, stress, and suicide prevention seminars for service members and their spouses.
2. Community mental health and family services when the service members return to their communities.
3. Facility and equipment rental for training events.
4. Contracted training for service members and families directly related to reintegration.
5. Stipends and reimbursement of expenses for instructors and support personnel contracted by the state of Minnesota for training events.
6. Spouse lunches, mileage, and centralized day care services so the spouses can attend valuable reintegration training.
7. Research and curriculum development to support training strategy and program assessments.
8. Food/light refreshments for service members and families attending training events to the extent that they are not otherwise provided and are integral to the conduct of the event.
9. Public informational materials and communications.

Proposal:

The Governor recommends additional, ongoing funding that will allow MDMA to meet their on-going financial needs to provide current and projected reintegration activities to support service members and their families throughout the entire deployment cycle. The implementation date for this proposal is July 1, 2019.

Equity and Inclusion:

When the Minnesota National Guard established its diversity goals in 2011, the organization set its sights on shaping a force with a commensurate percentage of diverse individuals relative to the state of Minnesota's population. In 2018, nearly 24% of new Minnesota National Guard recruits were from diverse populations.

Program: Maintenance of Military Training Facilities

minnesotanationalguard.org/

AT A GLANCE

In state fiscal year 2018, we:

- Maintained 63 Training and Community Centers (TACCs) – commonly known as armories, two airbases, two Army Aviation Support Facilities, and nine maintenance facilities in 61 communities
- Provided construction and professional service contracting services for the agency
- Provided procurement services for goods, fixed assets, and services for the agency

PURPOSE & CONTEXT

This program is responsible for maintaining the state's facilities used to train and house the members of the Minnesota National Guard, and to protect the state's investment in these facilities. We maintain and develop sustainable infrastructure at the Camp Ripley Training Center, two airbases, two army aviation support facilities, and the Training & Community Centers (TACCs) in 61 communities across the State.

SERVICES PROVIDED

Military Affairs has a series of cooperative agreements in place for operations and maintenance of state owned and licensed facilities, for providing security at the Air Bases, Camp Ripley, and the Army Aviation Support Facilities, and for firefighting services at the Duluth Air Base and Camp Ripley.

We support state facilities that federal forces use to accomplish their mission of preparing soldiers and airmen for federal and state missions. Each Air National Guard Base in Minneapolis and Duluth has a civil engineering function that is responsible for the maintenance of the federal facilities that are supported with state and federal dollars.

RESULTS

Specific aspects of these results including objectives, performance measures and results can be found in the Annual Report and Campaign Plan at

http://www.minnesotanationalguard.org/aboutus/assets/MNNG_CAMPLAN_OPERATION_POLARIS.pdf.

Program: General Support

minnesotanationalguard.org/

AT A GLANCE

In state fiscal year 2018, we:

- Provided accounting and administrative services to support cooperative agreement projects totaling over \$93.2 million
- Provided human resources, payroll, and administrative services to 361.9 Full-Time Equivalents (FTEs)
- Supported 315 Yellow Ribbon Entities (227 cities, 26 counties, and 62 companies)
- Provided grants to service members, family support groups, and other veteran organizations from the proceeds of the Support Our Troops (SOT) license plates

PURPOSE & CONTEXT

General Support Funding provides the general administrative, financial, accounting, budgeting, project management, strategic planning, and human resource support necessary for the operation of the department. It also provides the support for members of the National Guard called to state active duty by the Governor.

SERVICES PROVIDED

Under the General Support activity, we provide support to the Adjutant General's staff, the department directors responsible for the cooperative agreements with the federal government, the state employees of the department, and, in times of state declared emergencies, the members of the Minnesota Army and Air National Guard called to state active duty. We administer programs that support military members of the Minnesota National Guard and we provide the leadership, planning, technical, and administrative support for the state agency and conduct training and exercises to enhance readiness to perform support to civil authorities. Additionally, we provide the support for the separate grants and programs authorized by the legislature, such as the Beyond the Yellow Ribbon Program and Support Our Troops funding.

RESULTS

Specific aspects of these results including objectives, performance measures, and results can be found in the Annual Report and Campaign Plan at

Program: Enlistment Incentives

minnesotanationalguard.org/education/

AT A GLANCE

In state fiscal year 2018, we disbursed:

- \$8.975 million for the State Tuition Reimbursement (STR) program
- \$1.693 million for the State Reenlistment (SRB) program
- \$0.056 million for the State Medic Bonus (SMB) program
- \$1.126 million for the State Enlistment Bonus (SEB) program
- \$0.170 million for the State Reclassification Bonus (SRCB) program

PURPOSE & CONTEXT

The Enlistment Incentives program provides selective incentives to the men and women who enlist and maintain their memberships in the Army and Air National Guard to meet the needs of our military force. These incentives allow the Minnesota National Guard to compete with neighboring states and other services in recruitment.

SERVICES PROVIDED

Manage programs and provide funding for the state's enlistment incentives program to recruit and retain service members in shortage job skills and grades to maintain a competent and ready force. We execute and update Minnesota National Guard Circular 621-5-1, which describes the eligibility criteria and procedures for administering the Minnesota State Incentive Programs. We review and update the incentive programs annually based on both the state and federal financial environment.

RESULTS

Specific aspects of these results including objectives, performance measures and results can be found in the Annual Report and Campaign Plan at

http://www.minnesotanationalguard.org/aboutus/assets/MNNG_CAMPLAN_OPERATION_POLARIS.pdf.

Program: Emergency Servicesminnesotanationalguard.org/currentops/**AT A GLANCE**

In state fiscal years 2017-2018, we:

- Supported winter storm rescue missions, a special event mission in Minnesota, and provided assistance to the states of Texas, Florida, and Washington, and the territory of Puerto Rico.
- Provided 4,935 state active duty work days and equipment to assist local authorities during state active duty missions

PURPOSE & CONTEXT

On order of the Governor of Minnesota, the Minnesota National Guard provides support to state and local police and fire departments to save lives, prevent human suffering, and mitigate property damage for the citizens of Minnesota and partner states.

Under the Governor's Executive Order supporting emergency operations, the Adjutant General submits a funding request to Minnesota Management and Budget (MMB). This emergency open appropriation is used to pay for emergency operations performed by the Army and Air National Guard. The state may be eligible for reimbursement by FEMA, other federal entities, and other supported states for some missions.

SERVICES PROVIDED

The Minnesota National Guard conducts **Support to Civil Authorities** operations in support of the Governor of Minnesota, federal agencies, or the Department of Defense as stipulated under federal and state laws and statutes. Some of the supported emergency events in FY2017-18 included Emergency Management Assistance Compact wildfire support to the state of Washington, Emergency Management Assistance Compact assistance to the states of Texas and Florida and the territory of Puerto Rico, providing public safety support during Super Bowl LII, and opening armories for winter storm shelter.

The Minnesota National Guard develops and maintains an **All Hazard Contingency Plan** considering potential emergency situations which contain provisions for actions to be taken before, during, and after disasters.

The Minnesota National Guard maintains **dual-status commander capability** in the case that active federal military support is required during a response. This is an important legal distinction for Command and Control authority of federal assets and personnel that are involved in support of state emergencies.

RESULTS

Specific aspects of these results including objectives, performance measures, and results can be found in the Annual Report and Campaign Plan at

http://www.minnesotanationalguard.org/aboutus/assets/MNNG_CAMPLAN_OPERATION_POLARIS.pdf.

Type of Measure	Name of Measure	Previous	Current	Dates
Result	<i>Competent Ready Force (LOA 1).</i> The Minnesota National Guard's enduring mission is to protect the nation by providing forces and capabilities in support of the Governor, Combatant Commanders, and domestic operations. We will accomplish this by achieving and maintaining the required personnel, equipment, training and resourcing levels that ensure our success.	3 of 4 objectives meeting targets	4 of 5 objectives meeting targets	2016 & 2018
Quality	<i>Optimal Force Structure (LOA 2).</i> The Minnesota National Guard will plan to achieve an optimal force structure that provides the capabilities to support federal and state missions effectively. We will continually assess and evaluate the right mix of personnel and equipment to leverage our capabilities while balancing the ideal composition for current and anticipated missions.	2 of 3 objectives meeting targets	2 of 3 objectives meeting targets	2016 & 2018
Result	<i>Achieve and Maintain Required Equipment Readiness Levels (LOA 1-2).</i> We will continue to train and maintain our equipment readiness to achieve and maintain capability for our federal, state, and local missions.	1 of 3 objectives meeting targets	3 of 4 objectives meeting targets	2016 & 2018

Performance Measures Notes:

LOA = Line of Action

M.S. 192.52 provides the legal authority for MDMA's Emergency Services.

Narrative

The Department of Military Affairs has a Master Cooperative Agreement with the Federal Government through the National Guard Bureau that has a series of funding appendices that provide federal funding for the operation, maintenance and repair of facilities used by the MN National Guard for training service members. The recurring, general operational portion of this funding is approximately \$57M per year. The one-time, construction funding varies from year to year but is generally in the \$30M to \$80M range.

The state is required to hire employees to provide direct services such as base security, airfield firefighting, facilities operation, maintenance and repair, and construction and design services. The state also needs a complement of employees to provide the indirect services such as accounting, budgeting, human resources, planning, safety, and administrative services required to support those activities.

State matches are required in several areas. These vary from 50% to 75% or 80% depending on what type of activities and facilities are supported. Army National Guard facility construction for facilities not on federally supported land usually require a 25% state contribution. Facilities on supported land are usually 100% federally funded. These construction projects each require a separate cooperative agreement.

Remodeling/renovation projects generally require a 50%-50% match. State funds for those projects are provided through capital bonding appropriations.

Estimates are based on the best federal funding information currently available at the time this document is prepared. Most federal awards that impact state fiscal years 2020-2021 are not yet confirmed. Therefore, we use historical trend information from recent years for ongoing programs along with funding estimates from federal program managers. We anticipate a slowdown in the rate of growth in federal funding over the next several years.

AT A GLANCE

- Approximately 260 employees manage the financial and employee relations responsibilities of the state
- Coordinate biennial budget process for more than 100 agencies, boards, commissions, and the legislative and judicial branches
- Oversee and maintain human resource policy for more than 100 state agencies, boards, and councils, including recruitment, retention, talent management, classification, compensation, and training
- Manage more than \$8 billion in state public debt
- Process an average of 48,000 vendor payments per week
- Process approximately 55,000 employee paychecks twice a month
- The State Employee Group Insurance Program manages health benefits for over 129,000 employees, dependents, and retirees
- Responsible for producing twice a year budget and economic forecasts
- Negotiate contracts with 13 state employee bargaining units

PURPOSE

Minnesota Management & Budget (MMB) is responsible for managing state finances, payroll, and human resources and provides systems for daily business operations and information access and analysis.

Our mission is to manage state government's financial, workforce, and information resources to support effective and efficient services for Minnesotans. MMB is a central service agency, serving the governor, the legislature, more than 100 state government entities, 55,000 state employees, and the public. MMB priorities include:

- Supporting the governor in establishing policies, and proposing and implementing budgets that benefit the people of Minnesota.
- Providing information that is accessible, consistent, objective, timely, and accurate to state agencies, the legislature, and citizens.
- Providing financial, human resources, and management expertise to help state government meet its goals and responsibilities in an effective and efficient manner.
- Creating a culture in state government that is supportive, constructive, and healthy for our employees.

MMB directly contributes to the statewide outcome of **efficient and accountable government services**.

BUDGET

Source: Budget Planning & Analysis System (BPAS)

Source: Consolidated Fund Statement

The dramatic increase in FY16-17 spending is the result of \$327 million in one-time funds appropriated to MMB to administer the Health Insurance Premium Subsidy Program. In fiscal year 2017, we expended \$56.4 million of these funds. Note that the costs associated with the operation of the State Employees Group Insurance Plan (SEGIP) and the Public Employees Insurance Plan (PEIP) are not reflected in these charts and graphs. Due to the size of the budget of the insurance programs, their costs are only reflected in their respective budget narratives.

The majority of MMB's operating budget is funded through general fund appropriations. For fiscal years 2018 and 2019, \$51.6 million is provided for core agency activities in accounting, budgeting, economic analysis, debt management, enterprise human resources, labor relations, and management services. Other funds comprise the balance of \$45.5 million (in special revenue and internal service funds), support a portion of the costs of operating the statewide business systems, and management analysis and training services that are available through MMB. An additional \$18 million has been appropriated from the general fund to pay the debt service costs associated with the building of the state's accounting and procurement system. While not reflected in this document, the estimated costs of the operations of SEGIP for the current biennium are \$2 billion, and \$349 million for PEIP. The costs for SEGIP are borne by state agency and employee contributions, and by participant contributions for PEIP.

STRATEGIES

MMB employs several strategies across two program areas to deliver its mission and support the statewide outcome of efficient and accountable government services. These include:

- **Statewide systems** for accounting and human resources necessary to support daily activities of the state
- **Information access**, forecasts and analysis to provide information on state activities and anticipate issues
- **Oversight, controls, and compliance outreach** needed to ensure overall integrity of state operations
- **Decision support activities** for budget development and collective bargaining processes
- **Operations management activities** such as cash management transactions, employee health insurance, management consulting for all agencies, and strategic workforce planning and management

M.S. 16A (<https://www.revisor.mn.gov/statutes/?id=16A>) provides the legal authority for MMB.

Minnesota Management and Budget

FY 2020-21 Biennial Budget Change Item

Change Item Title: Statewide Workforce Investment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	1,168	868	868	868
Revenues	0	0	0	0
Other Funds				
Expenditures	(478)	(478)	(478)	(478)
Revenues	(132)	(132)	(132)	(132)
Transfers in	(346)	(346)	(346)	(346)
Net Fiscal Impact = (Expenditures – Revenues)	1,168	868	868	868
FTEs	2	2	2	2

Recommendation:

The Governor recommends \$1.168 million in FY 2020 and \$868,000 in FY 2021 and each year thereafter from the General Fund to support the Enterprise Human Capital Division's efforts to attract, hire, retain, and support the best workforce, which is responsible delivering critical services to all Minnesotans. The recommendation supports an office of Inclusion and Equity; state workforce recruitment activities; and a statewide compensation study.

This recommendation is equal to a 4.8% increase to Minnesota Management and Budget's General Fund base budget for the FY 2020-2021 biennium.

Rationale/Background:

State of Minnesota agencies, boards, and commissions compete for top talent in a tightening labor market and an aging demographic. We need to be innovative in our employment practices, and create a culture that is inclusive, engaging, and reflective of the communities we serve.

A diverse and inclusive workforce allows us to provide more effective and efficient services for all Minnesotans. With the Office of Inclusion and Equity and Chief Inclusion Officer housed at MMB, we can realize greater synergies among all stakeholders as we work to achieve our diversity and inclusion strategies.

With unemployment below 3 percent, the job market is extremely competitive and it is increasingly difficult to attract and retain the workforce needed to maintain the services that Minnesotans depend upon, especially in certain job classifications. The Executive Branch has been losing about 1,000 employees to retirement annually since FY 2013 and this trend will continue. Turnover is disruptive and expensive; it can cost 100% of an annual salary to replace an employee.

Proposal:

\$1.168 million in FY 2020 and \$868,000 in FY 2021 and each year thereafter to attract, hire, retain, and develop the best workforce that, in turn, delivers critical services to all Minnesotans. Funding will support efforts to provide an inclusive work environment for all state employees; improve the State's capacity to compete for top talent in the tight labor market; and be fully prepared in planning for the future compensation needs of the statewide workforce.

- \$390,000 to create an Office of Inclusion and Equity to lead the development and implementation of proactive diversity, equity, and inclusion programs which will support the State's diversity and inclusion strategic plan. This will add 2 FTEs including a State Chief Inclusion Officer to provide strategic guidance and direction across the enterprise and to support the Governor's Diversity, Inclusion, and Equity Council.
- \$478,000 to the Statewide Executive Recruiter to replace the agency billing funding structure in the Special Revenue Fund. This provides reliable funding to deliver expertise and efficient services to agencies, boards, and commissions across state government to help ensure that we attract and retain qualified talent to serve all Minnesotans.
- \$300,000 one-time funding to implement a statewide compensation study to evaluate the State of Minnesota's position for certain hard-to-fill positions within the relevant labor markets.

Equity and Inclusion:

These proposed changes will impact all protected status groups under the MN Human Rights Act, federal Title VII of the Civil Rights Act of 1964, and related laws. It will expand efforts to recruit a diverse workforce and educate employees. It will also provide resources to study the compensation of workers across the public and private sector to provide fair and competitive salaries to workers across state government.

Results:

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Target</i>
Quantity	Racial/ethnic minority hiring rate	11.8% 2011	20.3% 2018	20%

Minnesota Management and Budget

FY 2020-21 Biennial Budget Change Item

Change Item Title: Enterprise Systems

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	5,700	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	5,700	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$5.7 million in one-time funding in FY 2020 from the General Fund to Minnesota Management and Budget for its enterprise systems. Of this amount, \$2 million is for the cost to apply maintenance upgrades to MMB-operated enterprise systems. These upgrades are the new baseline required for us to continue to receive support from the vendor. \$3.2 million will replace out-of-support hardware and purchase disaster recovery hardware, and \$500,000 will be used to conduct a study of our enterprise systems, the results of which will be used to develop a sustainable long-term funding plan as recommended by the Office of the Legislative Auditor.

This recommendation is equal to an 11% increase to Minnesota Management and Budget's General Fund base budget for the FY 2020-2021 biennium.

Rationale/Background:

Minnesota Management and Budget's (MMB) enterprise systems are used by all state agencies to manage day-to-day business activities such as accounting, enterprise learning management, budgeting, procurement, reporting, payroll, and human resources. With the exception of the budgeting system, all enterprise systems are Oracle PeopleSoft software. Oracle PeopleSoft has changed how it delivers updates (which include bug fixes and security enhancements) in the last few years by delivering smaller, incremental maintenance upgrades on a frequent (often quarterly) basis. With MMB's current staffing level, it is not possible to keep up with the release of these maintenance upgrades—even on a limited basis. Staff can only implement upgrades and updates one at a time and system by system. Taking longer to make updates often results in systems and applications going out of support, meaning they are more at risk of breaking and would be more costly to fix. This proposes a great risk to the State of Minnesota and its business operations.

The hardware that supports the enterprise systems must also be regularly reviewed, managed, maintained, and replaced to ensure it meets ongoing operational needs. Properly maintained hardware is critical to avoid or manage cybersecurity attacks, which occur with alarming regularity. In addition, if an attack compromises a system, we have limited ability to recover our systems to quickly resume critical operations. It is essential we have disaster recovery plans and capabilities for our shared business systems. Many of MMB's services (such as payroll, personnel, and financial) are priority services and must be maintained or quickly resumed after an incident.

Enterprise systems are critical for all large organizations. Our enterprise system needs have changed over time – due to new technology and new delivery models by software vendors – but we have not had the resources to keep up.

MMB uses various funding sources to pay for its statewide systems. The primary funding sources are legislative appropriations from the general fund and a Statewide Systems Account which gives MMB the authority to bill up to \$10 million to state agencies. As the Office of the Legislative Auditor recognized in its [October 2018 report](#) MMB lacks sufficient funding to pay both its ongoing operational costs and periodic one-time costs. For anything beyond basic operations of current systems, such as implementing security-related upgrades, adding new functionality, and improving disaster recovery protections, MMB relies extensively on unpredictable and one-time funding sources. This funding model presents ongoing challenges of ensuring the security and stability of our statewide systems.

Proposal:

This is a request for one-time funding for MMB to apply upgrades to enterprise systems, replace out-of-service hardware, and create a disaster recovery option for enterprise systems. These funds will also be used to engage a third party to perform an independent study of MMB IT operations and make recommendations to guide the strategic direction of IT service delivery and a long-term support model. The results of the study will inform a future funding proposal to address the long-term needs of our enterprise systems.

IT Related Proposals:

This request allows MNIT to advance the support of these critical enterprise systems with resources that will implement software updates to increase the level of security needed for the highly sensitive data that these enterprise systems contain. It also provides a study and recommendations to guide the strategic direction of IT service delivery for these enterprise systems. Hardware costs are included to address end-of-life equipment for existing systems and enable a more timely recovery of our systems in the event of a disruption in service.

<i>Category</i>	<i>FY 2020</i>	<i>FY 2021</i>	<i>FY 2022</i>	<i>FY 2023</i>	<i>FY 2024</i>	<i>FY 2025</i>
Professional/Technical Contracts	\$2,500					
Hardware	\$3,200					
Total	\$5,700					

Equity and Inclusion:

All employees, applicants, vendors, and administrative users will benefit from updated enterprise systems. Accessibility updates will greatly enhance the usability of our systems for both internal and external users, making it easier for people with disabilities to interact with our systems. In addition, MMB's ability to manage and provide services during an emergency affects all employees, as well as businesses and organizations that depend on us for payments and other services.

Results:

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Target</i>
Quantity	# of security incidents per quarter	5	3	FYQ3, Q4
Quality	# of versions behind	-8	-7	-2
Quality	*System Risk Assessment score - overall average	58	67	90

*Risk assessment score is based on a review of the performance, risk and consequences of failure, and technological condition of the ERP systems. Perfect score is 100.

Statutory Change(s):

None.

Minnesota Management and Budget

FY 2020-21 Biennial Budget Change Item

Change Item Title: Operating Adjustment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	404	525	525	525
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	404	525	525	525
FTEs	2	3	3	3

Recommendation:

The Governor recommends additional funding of \$929,000 in the FY 2020-2021 biennium to maintain the current level of service delivery at Minnesota Management and Budget (MMB).

This recommendation is equal to a 1.8% increase to Minnesota Management and Budget's General Fund base budget for the FY 2020-2021 biennium.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

Proposal:

The Governor recommends increasing MMB's operating budget to maintain the delivery of current services. This funding will cover known employee compensation growth, lease cost increases, and severance costs as a result of an influx of employee retirements.

Results:

This proposal is intended to allow agencies to continue to provide current levels of service and information to the public.

Minnesota Management and Budget

FY 2020-21 Biennial Budget Change Item

Change Item Title: Impact Evaluation of Opioid Stewardship Investments

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	498	498	498
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	498	498	498
FTEs	0	4.6	5	5

Recommendation:

The Governor recommends \$498,000 in FY 2021 and each year thereafter from the Opioid Stewardship Fund to rigorously evaluate the impact of publicly funded interventions to prevent and treat opioid addiction. These evaluations will produce findings that indicate the extent to which there is causal evidence that the studied interventions prevent opioid abuse and emergency room visits and influence other important outcomes such as employment and earnings, housing stability, and involvement in the criminal justice system. Policymakers and practitioners can use the findings from these evaluations to better understand which interventions are most effective for a given individual or community.

Rationale/Background:

In Minnesota (for the most recent year for which data are available):

- 4 percent of 12-17 year olds reported prescription opioid misuse (2013-2014)
- 8 percent of 18-25 year olds reported prescription opioid misuse (2013-2014)
- 3 percent of individuals 26 years or older reported prescription opioid misuse (2013-2014)
- There were 2,036 emergency room visits for opioid-involved overdoses (2017)
- 395 people died from opioid overdoses, which represents the leading cause of overdose deaths (2016)
- African Americans were two times more likely to die of a drug overdose than whites (2016)
- American Indians were almost six times more likely to die of a drug overdose than whites (2016)
- Drug overdose death rates increased for all groups, and disparities by race increased (2015-2016)

A relatively small number of interventions have been rigorously proven effective at preventing and treating misuse of opioids. Federal, state, and local governments are investing heavily in these interventions. Given the severity of the challenge, they also continue to develop and implement innovative methods intended to prevent and treat misuse of opioids. By rigorously evaluating the impact of these innovations, policymakers and practitioners will be able to better understand which interventions are most effective for a given individual or community.

Proposal:

The funding included in this proposal will enable trained social scientists to conduct an average of 2-4 experimental or quasi-experimental design program evaluations per year. The work associated with each evaluation will include: (a) coordinating with policymakers and community representatives to select projects that will be evaluated; (b) consulting with key stakeholders to gather input and establish common expectations regarding the evaluation process and potential results; (c) designing an evaluation that can be implemented

ethically and will provide causal evidence of program impact; (d) identifying indicators that capture key program features and outcomes that will be used in the evaluation; (e) collecting, or otherwise gaining access to, data for these indicators; (f) cleaning the data in preparation for statistical analysis; (g) conducting statistical analysis; (h) producing a short report that describes key findings and a full report containing detailed findings and a description of the methods used; (i) briefing key stakeholders on the key findings and facilitating informed use of these findings for policymaking and/or practice.

Planned expenditures (in thousands) are:

	2020	2021	2022	2023
2 senior evaluators @ \$106K each annually	0	\$195	\$213	\$213
1 data scientist @ \$92K annually	0	84	92	92
2 research analysts @ \$80K each annually	0	146	160	160
PCs and statistical software @ 3K per person annually	0	15	15	15
Data protection, sharing, and management	0	55	15	15
Ground transportation to/from projects	0	3	3	3
Total	0	498	498	498

We will use the most rigorous methods that are appropriate to our evaluation questions and feasible within budget and other constraints. Rigor requires ensuring that inferences about cause and effect are well founded (internal validity); requires clarity about the populations, settings, or circumstances to which results can be generalized (external validity); and requires the use of measures that accurately capture the intended information (measurement reliability and validity). In order to assess the effects of programs or services in a rigorous way, our evaluations will use methods that isolate to the greatest extent possible the impacts of the programs or services from other influences such as trends over time, geographic variation, or pre-existing differences between participants and non-participants. For such causal questions, experimental approaches are preferred. When experimental approaches are not feasible, high-quality quasi-experiments will be used.

We will conduct these evaluations in an ethical manner and safeguard the dignity, rights, safety, and privacy of participants and their data. We will comply with the spirit and the letter of relevant requirements (such as regulations governing research involving human subjects) and professional guidelines (such as the American Evaluation Association's [Ethical Guiding Principles](#)).

We will make information about planned and ongoing evaluations easily accessible by publishing study plans in advance. We will release evaluation results regardless of the findings. Our evaluation reports will describe the methods used, including strengths and weaknesses, and discuss the generalizability of the findings. Evaluation reports will present comprehensive results, including favorable, unfavorable, and null findings. We will release evaluation results timely, usually within two months of a report's completion. When permitted by data privacy laws, we will archive evaluation data for secondary use by interested researchers.

The accompanying legislative language specifies that:

- Grants awarded to proposals that are selected for an evaluation shall be administered to support the experimental or quasi-experimental evaluation and shall require the grantee to collect and report information that is needed to complete the evaluation.
- The commissioner of management and budget, under section 15.08, may obtain additional relevant data to support the experimental or quasi-experimental evaluation studies.

Equity and Inclusion:

Opioid addiction and overdose affects Minnesotans of all ages, all income categories, and all races, in urban, suburban, and rural communities. As described above, African Americans and American Indians disproportionately die of drug overdoses. We will work with community members, program staff, policy-makers, service providers to ensure that the design, implementation, and publication of the evaluations that we conduct represent the diverse populations that public programs serve.

Results:

We anticipate using the following performance measures to monitor results of this work. We will consult with legislators, executive branch officials, and local leaders to identify additional measures that they would like to monitor.

Type of Measure	Proposed Measures	Planned data source
Quantity: How much did we do?	Number of impact evaluations conducted Number of community partners consulted during the design and implementation of the impact evaluations	Administrative tracking tool Administrative tracking tool
Quality: How well did we do it?	Number of policymakers (legislators, executive branch officials, local leaders) who report: <ul style="list-style-type: none"> a. trusting the findings b. understanding the findings c. using the findings to inform decisions 	Annual survey of policymakers
Result: Is anyone better off?	Number of opioid-related overdose deaths Number of opioid-related emergency room visits	Minnesota death certificates Minnesota Hospital Discharge Database

Statutory Change(s):

M.S. 151 and M.S. 256

Minnesota Management and Budget

FY 2020-21 Biennial Budget Change Item

Change Item Title: Enhanced Results Analysis for Decision-Making

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	205	252	252	252
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	205	252	252	252
FTEs	2.1	2.5	2.5	2.5

Recommendation:

The Governor recommends \$205,000 in FY 2020 and \$252,000 in FY 2021 and each year thereafter from the General Fund to enhance the capacity of a small existing team that will use new and existing data to give legislators, executive branch officials, local governments, and other Minnesota stakeholders access to concise but comprehensive information about:

- The current status of key outcomes desired by Minnesotans (e.g., increased employment, greater access to high speed internet, reductions in violent crime) and variations experienced by different communities
- The various existing policies and investments that seek to improve each outcome
- Existing research that can inform policy and practice changes that would achieve better outcomes
- Opportunities for new and enhanced collaboration across agencies and sectors

For each of priority areas identified by policymakers, this team will:

- Collect, analyze, and summarize new and existing data that facilitates shared understanding
- Share this information in formats and settings that are most useful to policymakers and administrators
- Convene events that lead to shared data-driven understanding and shared action

This recommendation is equal to a 0.9% increase to Minnesota Management and Budget's General Fund base budget for the FY 2020-2021 biennium.

Rationale/Background:

Legislators, executive branch officials, local governments, and other Minnesota stakeholders have access to many useful information sources and tools, including agency budget narratives, the Minnesota Dashboard, Results First reports and tools, Office of the Legislative Auditor reports, legislative staff reports and briefs, legislatively required reports produced by state agencies, and materials prepared by community groups and other organized voices.

Despite the wealth of information provided by these individual sources, for any given policy goal it can be difficult to obtain a comprehensive understanding of what communities across the state are experiencing, which existing policies and investments seek to address their concerns, what performance measures tell us about these policies and investments, what research indicates could help the state achieve better outcomes, and how community members would like to see their governments proceed.

The staff funded by this proposal will collect and analyze new data and collaborate with the producers of the useful resources described above to give policymakers access to concise but comprehensive information on the challenges that they are interested in solving, what is currently being done to address them, and research-based options available to them.

Legislators, executive branch officials, local governments, and other Minnesota stakeholders frequently express interest in being able to participate in well-facilitated, data-driven, solution-oriented meetings. In 2015 the legislature took an initial step toward filling this need by establishing the state's Results First initiative. State and local respondents to Minnesota's annual survey of policymakers regularly report that they value the information produced by this initiative and many also report using it to inform decision-making. Members of the Results First Advisory Committee have expressed interest in seeing the Results First information used in the context of holistic discussion of desired population outcomes. This proposal would be responsive to this interest.

Proposal:

When fully implemented, this proposal will fund the compensation for 2.5 employees. The salary and benefits for these individuals are outlined in the following table (in thousands).

	2020	2021	2022	2023
State Program Coordinator (1 FTE)	\$82	\$101	\$101	\$101
State Program Coordinator (0.5 FTE)	41	50	50	50
Research Scientist 3 (1 FTE)	82	101	101	101
Total	205	252	252	252

As described above, for each of priority areas identified by policymakers, this team will:

- Collect, analyze, and summarize new and existing data that facilitates shared understanding
- Share this information in formats and settings that are most useful to policymakers and administrators
- Convene events that lead to shared data-driven understanding and shared action

Equity and Inclusion:

The staff funded by this proposal will produce analytic materials that help policymakers understand the outcomes being experienced by different communities in our state and the extent to which existing policies and investments are addressing them. This information, combined with input received from communities, will enable policymakers to design and implement policy and practice changes that achieve better outcomes for all Minnesotans.

Results:

We anticipate using the following performance measures to monitor the results of this work. We will consult with legislators, executive branch officials, and local leaders to identify additional measures that they would like to monitor.

Type of Measure	Proposed Measures	Planned data source
Quantity: How much did we do?	Number of website hits Number of briefs produced Number of policymakers briefed	Web analytics tool Administrative tracking tool Administrative tracking tool
Quality: How well did we do it?	Number of policymakers (legislators, executive branch officials, local leaders) who report: a. trusting the information produced b. understanding the information produced c. using the information produced	Annual survey of policymakers
Result: Is anyone better off?	# of policy and resource allocation decisions informed by this work that are found to achieve their stated goals	Rigorous impact evaluations and/or systematic collection of data on community satisfaction

Statutory Change(s):

None.

Program: Statewide Services

Activity: Accounting Services

mn.gov/mmb/

AT A GLANCE

- Supports state operations in the areas of accounting, payroll, and financial reporting
- Provides functional support of two financial management systems: Statewide Integrated Financial Tools (SWIFT) and the Statewide Employee Management System (SEMA4)
- 67,370 employees paid during CY 2017
- 2.5 million payments made to vendors during FY 2018
- As of August 2018, there are over 7,000 users of the SWIFT and SEMA4 systems

PURPOSE & CONTEXT

Accounting Services is the foundation that supports the state's financial management operations. It provides the required infrastructure for efficient and effective accounting and payroll services that are conducted throughout the state. Our primary customers are state agencies, state employees, and the individuals and organizations that do business with the state.

SERVICES PROVIDED

We provide the following services:

- Establish statewide policies and procedures for financial management to safeguard assets and comply with legal requirements.
- Maintain and direct the operation and use of the statewide accounting and payroll systems.
- Process bi-weekly payroll for state employees and issue payments to individuals, businesses, nonprofit organizations, and other governmental units.
- Prepare statewide financial reports including the Comprehensive Annual Financial Report (CAFR), Single Audit Report, and Statewide Indirect Cost Allocation Plan.

RESULTS

Program: Statewide Services

Activity: Budget Services

mn.gov/mmb/

AT A GLANCE

- Provide budget assistance, guidance, instructions, monitoring, implementation, and oversight to more than 100 agencies for the state's \$84 billion biennial budget
- Develop and present to the Legislature the Governor's operating and capital budget recommendations
- Annually release February and November budget and economic forecasts
- Release Results First findings regarding the effectiveness of programs in 2-3 new policy areas each year

PURPOSE & CONTEXT

Budget Services works to promote sound fiscal policy in decision-making and helps to ensure the appropriate use of state resources through the provision of accurate and timely information. We support the efficient and effective use of state resources by establishing statewide oversight for the budget process and work to build the capacity of state agencies to use performance information in the management of state government services. This activity is comprised of three sections: Budget Planning and Operations, Budget Policy and Analysis, and Results Management. Our primary customers are the Governor's Office, state agencies, the legislature, and Minnesotans.

SERVICES PROVIDED

Budget Services meets customer needs by:

- Creating objective, relevant, and accessible information for decision-makers such as the budget and economic forecasts, the Governor's operating and capital budget recommendations, the general fund balance analysis, and the consolidated fund statement.
- Articulating fiscal policy issues of statewide importance through services and products such as rating agency presentations, budget decision-support, and statewide cash flow analysis.
- Increasing access to budget and fiscal policy information through the provision of statewide guidance and the development and maintenance of the Budget Planning and Analysis, Fiscal Note Tracking, and Capital Budget systems.
- Providing leadership and support for informed policy-making statewide results management through Results First, the publication of a statewide dashboard (<https://mn.gov/mmb/mn-dashboard/>), and by convening cross-agency meetings such as Results for Children and Youth.

Program: Statewide Services

Activity: Economic Analysis

mn.gov/mmb/

AT A GLANCE

Provides revenue forecasts and reports changes in the national and state economic outlook to state leaders and the public at regular intervals and through speaking engagements and press interviews. Outputs (# per year)

- Budget and Economic Forecast (2)
- Revenue and Economic Update (4)
- Monthly Revenue Memo (8)
- Budget Reserve Report (1)
- Revenue Forecast Uncertainty Report (2)
- Rating Agency Presentation (3)
- Data for bond sale Official Statement (2-3)
- Public Speaking Engagements (20+ events, reaching 1000+ individuals)
- Media Contacts (30+)

Resources

- Three FTEs (2 economists / 1 model programmer)
- Minnesota State Economist (under contract with University of Minnesota)

PURPOSE and CONTEXT

Economic Analysis forecasts state tax revenues in November and February each year as required by state law (M.S. 16A.103). The *November Budget and Economic Forecast* is the starting point for the state budget and the basis for the governor's budget recommendations. In February, we update the forecast with new information. The legislature and the governor use the *February Budget and Economic Forecast* to set the budget and to ensure, through short-term budget adjustments, that enacted budgets remain on track and in balance. Bond rating agencies and other analysts use forecast information to assess the state's economic and financial condition. The media use it to inform the public.

In addition to the twice-yearly forecasts, we prepare a quarterly *Revenue and Economic Update* in January, April, July and October of each year. The *Revenue and Economic Update* compares actual revenue collections for the current year to the most recent revenue forecast and reports changes in the national and state economic outlook.

Economic Analysis produces objective research and analysis related to Minnesota's economy and revenues. This research improves the reliability of existing economic and revenue forecasting models and informs state and local government policymakers, the academic and business communities, the media, and the general public about Minnesota's economic and financial condition.

SERVICES PROVIDED

- Credible and timely forecasts of major state general fund revenue sources. This includes taxes on personal income, general sales, corporate income, deed transfers and mortgage registries, insurance gross receipts, and other sources.
- Quarterly and monthly comparisons of forecast revenue with actual collections for major state general fund sources.

- Clear and timely information about the state economy, including forecasts of employment, income, and other measures of economic activity.
- Analysis of the volatility of major state revenue sources and their components. Through this analysis, we estimate the appropriate size for a state rainy day fund as required by state law (M.S. 16A.152).
- Analysis of uncertainty in Minnesota's revenue projections as required by state law (M.S. 16A.103).

RESULTS

Accurate forecasts reduce disruption from short-term budget adjustments and contribute to the state's financial stability. A forecast error—the percentage difference between the level of revenues forecast and the amount actually collected—can be a gauge of forecast accuracy. Actual collections never precisely match the forecast, in part because we cannot fully anticipate how unforeseen changes in the national economy or in federal tax laws will affect state revenues. Moreover, uncertainty about the revenue impacts of changes in state tax laws can add to forecast errors. Nonetheless, revenue forecast errors provide a base performance measure for the primary activities of Economic Analysis.

A biennium is part of the February forecast three times: 29, 17, and 5 months from the time the biennium closes. We focus our error calculations on the first February forecast (29 months before closing), because that is the forecast on which the original budget for the biennium is based. To determine whether our accuracy is generally improving over time, we compare the average percentage errors from the most recent three biennia to the errors over the longer term. We find that the more recent forecast error (3.6 percent) is lower than the long-term average error (5.1 percent). This means that the accuracy of the first February revenue forecast has **improved** compared to the long-term average.

	<i>Long-term average forecast error (FY90-91 to FY16-17)</i>	<i>Recent average forecast error (FY12-13 to FY16-17)</i>	<i>Trend in accuracy</i>
1st February forecast (+29 months from actual)	5.1%	3.6%	Improved

Program: Statewide Services**Activity: Debt Management**mn.gov/mmb/**AT A GLANCE**

- Current bond ratings: AAA/Aa1/AAA with Standard & Poor's, Moody's and Fitch
- \$6.5 billion of general obligation bonds currently outstanding, including \$858 million issued in CY 2017 and \$620 million issued in CY 2018
- \$1.5 billion of other tax-supported debt currently outstanding, including \$20.3 million issued in CY 2017 and anticipated \$30 million issued in CY 2018
- \$64.0 million of revenue bonds currently outstanding
- \$37 million outstanding balance in Master Lease Programs that finance technology and fleet services
- Debt managed to established Capital Investment Guidelines and to meet federal tax and securities law requirements

PURPOSE & CONTEXT

The Debt Management Division is responsible for both debt management and capital budget implementation and the compliance associated with each. Both of these functions seek to increase state government's capacity to manage our resources to ensure exceptional service and value for Minnesotans. We serve state agencies, local government grantees, bondholders, the Governor, the legislature and their staff, and citizens.

The bonds and other debt we sell finance and refinance authorized capital projects and programs. When selling bonds, the division seeks to minimize cost and risk to the state. Obtaining high credit ratings is important for achieving low interest rates, and we maintain active relationships with the national credit rating agencies. The current debt portfolio continues to be in compliance with the established Capital Investment Guidelines.

The Debt Management Division oversees compliance with all applicable Internal Revenue Service and Securities and Exchange Commission rules and regulations, and all applicable state laws relating to municipal bonds and the capital projects they finance. We maintain policies and procedures regarding regulatory compliance, for example a statewide operating policy on the prohibition of the purchase of state bonds by state entities as investments.

SERVICES PROVIDED

Debt management process: We work with financial advisors, legal counsel, rating agencies, state agencies, and underwriters and investors to bring bonds or other debt instruments to market and obtain the most favorable interest rates to the state. We work to remain in compliance with the Minnesota Constitution, state statutes and laws, federal rules and regulations, and policies and procedures, including the capital investment guidelines.

Capital budget process: We assist agencies and local governments in implementing capital budget appropriations and required grant agreements through bonding and cash appropriations. We complete this work in accordance with the Minnesota Constitution, state statutes and laws, federal rules and regulations, and MMB's policies and procedures.

RESULTS

While no single entity or circumstance can claim to be responsible for Minnesota's excellent debt position, having timely, relevant, accurate, and objective information available from Debt Management helps decision-makers effectively influence the state's debt position.

Program: Statewide Services

Activity: Enterprise Human Capital

mn.gov/mmb/

AT A GLANCE

- Enhanced the reputation of the state as an employer of choice and worked to attract and retain more people to state service with improved recruiting and retention strategies including pipeline programs, recruiting events, employee and community engagement, and a unified brand
- Supported a diverse workforce and inclusive culture through enhanced training, new programs (Connect700), and internal communication and events
- Created a safer workplace through our pioneering work on the prevention of sexual harassment, including greater emphasis on policy and training for leaders and staff
- Supported employee development with targeted programs: supervisor/manager core (1,111 participants), emerging leaders institute/senior leaders institute 201 participants)
- Managed three enterprise systems that process employee information, benefits, training, and over 19,000 job applications per month on average
- Updated several enterprise policies and procedures, and continuous improve work processes to capture efficiencies

PURPOSE & CONTEXT

Enterprise Human Capital (EHC) develops and maintains tools and infrastructure used by state agency human resources partners to recruit and retain the workforce needed to meet business goals. EHC applies a statewide view of human resources management to develop and promote sound policies, practices, and shared outcomes.

SERVICES PROVIDED

- Deliver innovative and strategic human resources (HR) solutions that align with business needs and contribute to the delivery of exceptional public services.
- Monitor changes in laws that affect human resource operations in state agencies. Research, develop, and deploy the EHC policy infrastructure, and provide training and guidance to ensure agencies are in compliance with law and other authorities.
- Provide consultation and auditing assistance to ensure agencies' HR offices are using best practices, and eliminating inefficient or ineffective practices.
- Develop and maintain systems to record, manage, and retrieve HR data and resources. These systems include application processing, learning management, and employee record management, and payroll.
- Develop and deploy the state's compensation, classification, selection, pay equity, and talent strategy programs. Provide consultation and services to support agency HR operations.
- Research, plan, and manage projects to develop or update HR programs, services, and systems.
- Deliver training and development courses to sharpen employee skills in current roles, develop potential for advancement, and elevate leadership effectiveness.
- Provide diversity and inclusion training to foster a respectful productive workplace serving all Minnesotans.

Program: Statewide Services

Activity: Labor Relations

mn.gov/mmb/

AT A GLANCE

- The State of Minnesota is the state's largest employer with approximately 52,000 employees in 2018.
- Negotiated 9 labor agreements covering 38,000 employees in 2017-2018.
- Directed review and resolution of 354 grievances from July 1, 2016 through June 30, 2018.
- Conducted 56 training modules in the areas of labor relations and investigations for state managers, supervisors and human resources professionals.

PURPOSE & CONTEXT

The mission of the Labor Relations Unit is to promote harmonious and productive relationships with labor organizations representing specific groups of state employees while balancing the needs of management to provide efficient and accountable government services.

Our service population and clientele include the state's 38,000 employees covered by collective bargaining agreements and the Commissioner's and Managerial Plans. We also served human resources, supervisory, and managerial staff in the state's approximately 100 agencies and boards.

SERVICES PROVIDED

Collective Bargaining

- Develop labor relations policies, objectives, and strategies
- Represent the State in negotiations for collective bargaining agreements and the State Employee Group Insurance Program (SEGIP)
- Represent the State in contract mediation and interest arbitration to reach agreements
- Ensure that negotiated labor agreements maintain the maximum degree of flexibility for management and contain economic settlements that are within the desires of the Governor and the state's ability to pay

Administration of Collective Bargaining Agreements

- Provide advice and counsel to State agencies on contract administration, including contract interpretation, employee misconduct investigations, employee discipline, and employee performance management
- Ensure there are consistent policies and practices across the enterprise and that management rights are not compromised
- Assist State agencies in review of grievances alleging violations of labor agreements, including evaluation of settlement options and potential impacts to the operations or work environment
- Provide employee training on such topics as labor relations concepts, grievance processing, discipline and discharge, investigations and managing employee leaves

Representation and Advocacy

- Investigate grievances and prepare for and represent the State in grievance mediation, arbitrations, and settlement negotiations
- Represent the State on Labor/Management Committees and meetings with the unions regarding agency policies and practices
- Represent the State in all bargaining unit determinations and unit clarification proceedings
- Propose or respond to legislation affecting the State as an employer

RESULTS

We believe strategies are working if:

- A voluntary labor agreement is negotiated with the exclusive representative within the negotiations timeframe
- Labor agreements receive approval from the Legislative Subcommittee on Employee Relations and the full legislature
- Interest arbitration awards affirm the State's bargaining decisions and strategies
- Agencies provide positive feedback on assistance in the day-to-day administration of labor contracts
- Grievances are avoided or resolved at the agency level
- Grievance arbitration awards uphold agency actions and decision-making in the areas of contract interpretation and employee misconduct
- State labor management committees, including the Joint Labor Management Committee on Health Insurance, contribute to positive and productive working relationships between the state and labor unions
- Training curriculum and delivery receives positive course evaluations

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Results	Percentage of contract negotiations that result in voluntary negotiated settlements consistent with State's ability to pay	90%	90%	July 1, 2016, June 30, 2018
Results	Ratified labor agreements receive approval by full legislature	100%	100%	July 1, 2016, June 30, 2018
Results	Grievance arbitration awards upholding the state's position (denial of the grievance)	9 (of 13)	5 (of 12)	July 1, 2016, June 30, 2018

Program: Statewide Services

Activity: Agency Administration

mn.gov/mmb/

AT A GLANCE

- Designed, developed legislation, and managed the premium subsidy program for calendar year 2017 that provided a 25% subsidy to 118,000 Minnesotans, saving them \$137 million in health insurance premium costs
- Provided oversight and managed processes and transactions related to annual \$1 billion budget
- Completed all major financial publications on time—governor’s budget recommendations, February and November economic forecasts, federally mandated financial reports in FY17 and FY18
- Agency human resources staff worked with managers and supervisors to fill 66 vacant positions in FY18
- Compiled over 70 statutorily or legislatively mandated reports

PURPOSE & CONTEXT

Agency Administration is a compilation of functions within the scope of the work of MMB, managed by the deputy commissioner. Several of these functions are internal to MMB—such as administrative and fiscal services, human resources, and strategic planning. These areas serve all employees at MMB.

SERVICES PROVIDED

- Manage the department’s financial operations to maintain compliance with established policies and procedures
- Support and manage about 260 employees by ensuring compliance with statewide and departmental human resources, policies, and procedures
- Coordinate legislative initiatives for Minnesota Management and Budget including legislative outreach, providing agency committee testimony, monitoring of relevant proposed changes to the law, and act as a point of contact for legislative inquiries
- Provide advice on legal compliance and litigation management to MMB and the Governor’s office, and provide employment law advice to human resources staff and management across the executive branch
- Produce several key documents including the governor’s budgets, economic forecasts, and the state’s Comprehensive Annual Financial Report (CAFR)

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Proportion of staff who self-report as minority race or ethnicity	11%	19%	6/30/17 and 6/30/18
Quantity	Proportion of staff who self-report as having a disability	7%	6%	6/30/17 and 6/30/18

M.S. chapter 16A (<https://www.revisor.mn.gov/statutes/?id=16A>) provides the legal authority for MMB’s Agency Administration budget activity.

Program: Statewide Services**Activity: Enterprise Communications and Planning**mn.gov/mmb**AT A GLANCE**

- Supported internal and external stakeholders in effectively and efficiently executing financial, human resources, and other key enterprise activities, through the use of coordinated communications, strategic planning, consistent branding, plain language, accessibility, and improved digital formats
- Tracked 182 interactions with agencies in the Internal Control and Accountability unit in FY 2017
- Provided over 16,000 hours of consulting services on 117 projects for 32 client agencies in FY 2018
- Manage and ensure the consistent operation of five enterprise systems annually
- Ensure state agencies have and communicate procedures that allow state government to continue its essential operations in case of a catastrophic event

PURPOSE & CONTEXT

The Enterprise Communications and Planning Division provides critical services to the enterprise to ensure employees, agencies, and agency leaders have the tools and information they need to effectively do their work. Members of the team focus their work on proactive and inclusive strategies to create a culture of collaboration, communication, and information-sharing throughout our agency and the enterprise. These functions are also integral in achieving the department's mission and vision as described in the agency profile.

This division is made up of five groups, all of which play key roles in ensuring strategic planning and communications to and on behalf of the entire enterprise: Management Analysis and Development (MAD), Enterprise Resource Planning, Business Continuity, Communications, and Internal Controls and Accountability.

SERVICES PROVIDED

- Communicate key initiatives and information to MMB, the enterprise, and to the public using all communication channels.
- Provide internal control and accountability consultation across state government to improve internal controls.
- Provide consultation in Continuity of Operations (COOP) planning or in response to all hazards, including violent events and catastrophic disasters. Act as the statewide lead in events that disrupt services within state government.
- Provide leadership, coordination, strategic direction, and management oversight of current and proposed enterprise technology systems and applications (for example, the state payroll system).
- Provide problem-solving assistance and information to help leaders and managers make decisions that improve efficiency and effectively use state resources.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quality	Percent of agency heads that submitted the annual internal control certification	98.7%	98.7%	FY2016, FY2017

Program: Statewide Insurancemn.gov/mmb/**AT A GLANCE**

- Provides insurance benefits to over 129,000 state employees, dependents, and retirees annually in all three branches of state government, Minnesota State Colleges and Universities, and certain quasi-state agencies
- Through innovative benefit design, encourages members to use the most efficient health care providers. In 2018, 91.9% of SEGIP members were enrolled in primary care clinics assigned to the lowest cost levels
- Through 2017, 6,400 state employees lost more than 48,400 pounds through an innovative diabetes prevention program launched in 2015
- In calendar year 2017, SEGIP collected \$945.6 million in insurance premiums and administrative fees from state agencies, employees/retirees, and other participating groups
- Health insurance accounted for approximately 90% of premiums and fees in 2017, while all other benefits combined accounted for the remaining 10%
- Public Employees Insurance Program (PEIP) provides insurance benefits to 35,000 active employees, their dependents, and retirees in 247 **public sector employer groups** (113 school districts, 76 cities and townships, 20 counties, and 38 other units of government)

PURPOSE & CONTEXT

The State Employee Group Insurance Program (SEGIP) offers comprehensive insurance benefits to ensure employees and their families have access to high-quality services at an affordable cost. These benefits include health, dental, life, as well as long and short-term disability. In addition, SEGIP administers pre-tax accounts for medical and dental care, dependent care, and transit expenses. Insurance benefits are a valuable component of compensation that helps the state attract and retain a talented workforce.

As Minnesota's largest employer purchaser of health care, SEGIP has significant influence in the marketplace and uses purchasing strategies designed to contain cost and provide access to high quality care. SEGIP also has a comprehensive set of initiatives that promote employee health and well-being, which result in a healthier and more productive state workforce and which also lower health care costs.

The Public Employees Insurance Program (PEIP), is a health, dental, and life insurance pool offered to local units of government to help public sector employers obtain competitive health insurance rates.

SERVICES PROVIDED

- SEGIP's health insurance plan, the Minnesota Advantage Health Plan, is a self-insured plan. The plan has a tiered network design that encourages members to choose primary care clinics that are most cost-efficient while still allowing access to higher-cost clinics. Because the state is such a large purchaser of health care, this benefit design also enables the state to obtain better prices from providers that wish to be placed in the most favorable cost tiers which attract the most members. In this way, SEGIP is able to maintain a broad choice of providers while also containing cost growth.
- SEGIP promotes employee health and wellness, which supports greater workplace productivity and helps to contain health care cost growth. For example, SEGIP offers financial incentives for employees to complete an annual health risk assessment survey, with opportunities for follow-up coaching or online programs to reduce health risks. Other prevention initiatives include a successful diabetes prevention

program and annual flu shot clinics. SEGIP's health plan administrators also identify and engage members with conditions like diabetes, asthma, back pain, and depression in order to better manage their conditions and improve health.

- SEGIP's contracts with medical, dental, and pharmacy administrators include incentives related to cost management, health outcomes, and provider network management and operational performance. In addition, SEGIP has some incentive arrangements directly with provider groups that include accountability for total cost of care and quality metrics.
- SEGIP supports expanded use of value-based payment arrangements between health care providers and our health plan administrators. Compared to traditional fee for service payments, value-based payment arrangements include stronger incentives related to cost containment and quality.
- Health Plan adult members diagnosed with diabetes have access to Advantage Value for Diabetes (AVD) benefit which reduces out-of-pocket costs for certain high-value medical services, prescription drugs, and testing supplies which reduces the progression of diabetes and the risk of costly complications. AVD pilot began January 1, 2018.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Result	Percent of medical expenditures made through value-based payment methods	60.1%	54.1%	2016, 2017
Result	Percent of plan participants enrolled in primary care clinics at the two lowest cost levels	93.3%	91.9%	2017, 2018
Result	Number of prediabetes program participants who have reduced their risk by 50% or more	1,678	1,966	2016, 2017
Results	PEIP medical claims costs (per member per month). PEIP's goal is for these costs to increase at or below the current industry standard of 2 – 9 % for national programs.	1.5%	-5.9%	6/30/15-6/30/16, 6/30/16-6/30/17

M.S. 42A.22-315, 318-319 provides authority for state employee benefits managed by MMB. Specifically see M.S. 43A.22 (<https://www.revisor.mn.gov/statutes/?id=43A.22>).

Minnesota Management and Budget

State Employees Group Insurance Program (SEGIP)

State Employees Insurance - Fund 5600

Brief Narrative

Background:

SEGIP administers insurance benefits to over 129,000 employees, retirees, and their dependents.

Medical and Dental insurance are self insured, with the remaining insurance benefits provided on a fully insured basis.

Insurance plans are administered on a Calendar Year basis.

During FY 18, medical insurance premiums represented approximately 90% of the premiums collected by SEGIP.

Detail of any loans from the general fund, including dollar amounts:

None

Proposed investments in technology or equipment of \$100,000 or more:

None

Explanation of changes in net assets (formerly retained earnings increases, operating losses):

Increase in FY 18 primarily reflects income needed to meet the medical plan reserve target of 16.7% by the end of the 2020 Calendar Year.

Explain any reasons for rate changes:

Increases in premiums reflect a composite change in the cost of insurance benefits. Changes are implemented on a Plan Year basis.

The increase in medical premiums is based on a projected 6.75% increase in medical claim costs paid by SEGIP during the 2017 to 2019 Plan Years.

Impact of rate changes on affected agencies:

Insurance benefits paid by agencies are projected to increase by 4.3 % during FY 20, and 5.63 % during FY 21.

AT A GLANCE

- Maintain more than 125 accounts outside of MMB's regular statutory operations
- Act as fiscal agent for \$7 million in federal funds annually
- Collected \$11 million in miscellaneous fines, fees, and penalties annually
- Provided \$55.7 million in direct aid to various local and state pension funds annually
- Manage a \$11.8 million master lease for vehicles and technology annually

PURPOSE

By statute, Minnesota Management & Budget (MMB) manages a number of statewide accounts that are outside of its day-to-day operations. As a group, these accounts are referred to as non-operating activities. These accounts deal with a broad range of subject matters, including debt management, tort claims, contingency accounts, and miscellaneous pension and trust fund items. These responsibilities also include the statutory requirement to receive the state's share of various monies collected by the counties and judicial districts as fees, fines, assessments and surcharges. Finally, the non-operating accounts also serve as a pass-through for federal funding for payments in lieu of taxes to local units of government where national forests are located.

The mission of MMB Non-Operating is to manage state government's financial, workforce, and information resources to support effective and efficient services for Minnesotans.

MMB Non-Operating directly contributes to the statewide outcome of efficient and accountable government services.

BUDGET

Source: Budget Planning & Analysis System (BPAS)

Source: Consolidated Fund Statement

* This chart represents the fiscal agent activities under MMB non-operating and does not include the debt service payments administered by this agency.

STRATEGIES

Tort Claims: This account pays tort claim judgments against a state agency that cannot be paid from that agency's appropriated accounts. As specified in M.S. 3.736, Subd. 7, a state agency may seek approval from MMB to use money in the MMB non-operating account for tort claims if MMB determines that there is not enough money in the agency's appropriations to cover the tort claim payment.

Contingent Accounts: Contingent accounts are appropriations made from several state funds to provide supplemental funding for emergencies and other legally authorized purposes. The release and expenditure of this funding requires the approval of the Governor after consultation with the Legislative Advisory Commission (LAC). The LAC provides legislative review of the use of these funds during interim periods when the legislature is not in session. With the approval of the Governor, supplemental funding for specific purposes is transferred to individual agency budgets; thus, expenditure history appears in the affected agency's budget.

Administrative Accounts: The state administers various trusts and funds on behalf of Minnesotans (including the Children's Trust, the Environmental Trust, and the Permanent School Fund). MMB non-operating houses the accounts used to support the administration of these trusts and funds.

Cash Flow Accounts: On an ongoing or one-time basis, some agencies or programs receive specific legislative authority to use general fund money to cash flow programs or activities during a biennium. These accounts are housed within the MMB non-operating accounts. In FY 2014-15, these accounts included the following:

- Lease-Purchase Cash Flow Account
- Education Aids Cash Flow Account
- Office of Higher Education Cash Flow Account
- MNsure Cash Flow Account
- MN.IT Cash Flow Account

Federal Funds Accounts: The state receives some pass-through federal funding for payments in lieu of taxes to local units of government where national forests are located, like the Chippewa National Forest and Superior National Forest. MMB non-operating accounts house the accounts for these pass-through funds.

Miscellaneous Fines, Fees, and Penalties Accounts: The state charges fees for various activities (including obtaining marriage licenses, using seatbelts, and engaging in adoptions) and assesses fines and penalties when the citizens of Minnesota are out of compliance with state law. These receipts are often dedicated to more than one activity across multiple agencies, therefore MMB is tasked with acting as an intermediary between the collecting entity and the receiving entity. The accounts used for this purpose are housed within the MMB non-operating accounts.

Pension Aid Accounts: The state provides direct aid to the Teachers Retirement Association (TRA) and the Public Employees Retirement Association (PERA) to help offset the additional liability those systems incurred when they merged with the Duluth Teachers Retirement fund (TRA), the Minneapolis Teachers Retirement fund (TRA), and the Minneapolis Employees Retirement fund (PERA). The state also provides direct aid to the St. Paul Teachers Retirement fund to help offset unfunded liabilities. These funds are appropriated to the commissioner of Minnesota Management and Budget and reside in accounts at MMB Non-Operating.

M.S. 16A (<https://www.revisor.mn.gov/statutes/?id=16A>) provides the legal authority for MMB.

FY 2020-21 Biennial Budget Change Item

Change Item Title: MERF State Aid

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	10,000	10,000	10,000	10,000
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	10,000	10,000	10,000	10,000
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$10 million annually from the general fund to restore cuts made in 2017 legislation to state aid to the Minneapolis Employees Retirement Fund (MERF). This recommendation reinstates the full state aid amount first provided in 2015 legislation. With this proposal, Minneapolis local governments no longer face a \$10 million increase in their required MERF contributions set to go into effect beginning FY 2020.

Rationale/Background:

MERF was the pension fund providing retirement benefits to Minneapolis-based local government employees and was merged into the Public Employees Retirement Association (PERA) General Employees Fund in 2015. Currently, 3,100 MERF members receive benefits and 23 either remain active employees or do not yet receive benefits. 2015 legislation set direct aid amounts at \$37 million annually: \$6 million from the state and \$31 million from Minneapolis local governments. The state's direct aid amounts were set to increase to \$16 million annually beginning FY 2018, thereby lowering local government payments to \$21 million. This long-term allocation agreement was based upon the portion of the total cost being paid by the state and Minneapolis-based employers before the merger in 2015: 43 and 57 percent respectively. 2017 legislation lowered the state's contribution back down to \$6 million annually beginning FY 2020 and increased local government contributions back to \$31 million. These payments assist in paying off MERF's remaining unfunded liabilities. The payments end in 2031.

Proposal:

The Governor recommends restoring the cuts to MERF state aid enacted in 2017. By providing this state aid, Minneapolis-based local governments will no longer need to pay \$10 million more each year toward their required MERF contributions beginning FY 2020. The Governor's recommendation provides the original state and local contribution allocations agreed to in 2015 when MERF was officially merged into the PERA General Employees Fund.

Results:

This recommendation maintains the annual \$37 million contribution from state and local governments toward MERF's unfunded liabilities. The PERA General Employees Fund, which absorbed MERF in 2015, is 79.5% funded on a market value of assets basis as of FY 2018. The PERA General Employees Fund is projected to reach full funding in FY 2037.

Statutory Change(s):

Minnesota Statutes 353.27, subd. 3c, para. (d), and Minnesota Statutes 353.505, clause (a).

Minnesota Management & Budget Non-Operating

FY 2020-21 Biennial Budget Change Item

Change Item Title: Capital Investment Bill Debt Service

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
<i>Debt Service – GO Bonds</i>	15,954	58,199	65,064	61,677
<i>Debt Service – Appropriation Bonds</i>	0	0	0	4,800
<i>Cash-Financed Projects</i>	1,920	0	0	0
Expenditures	17,784	58,199	65,064	66,477

Expenditures	1,272	5,119	7,944	8,504
Net Fiscal Impact = (Expenditures – Revenues)	19,146	63,318	73,008	74,981
FTEs	0	0	0	0

Request:

The Governor recommends \$82.464 million in FY 2020-2021 to support his 2019 capital budget recommendations. Of this total:

- \$76.073 million is from the general fund to pay for cash-financed projects and debt service on \$1.018 billion in general obligation bonds and \$120 million in appropriation bonds.
- \$6.391 million is from the trunk highway fund for debt service on \$92 million in trunk highway bonds.

Rationale/Background:

The Governor recommended a total of \$1.27 billion in capital projects. Both general fund cash and debt service are needed to finance these projects.

Proposal:

More information about the Governor's 2019 capital budget recommendations can be found in the "Current Capital Budget" section of MMB's website.

Equity and Inclusion:

The Governor's 2019 capital budget includes 73 individual projects. Of those, 37 are statutory programs that impact projects across the state, 20 projects are located in the metro-area, and 16 projects are located in greater Minnesota.

Results:

This recommendation will allow the state to meet its financial obligations with respect to debt service and the financing of capital projects.

Minnesota Management and Budget Non-Operating

FY 2020-21 Biennial Budget Change Item

Change Item Title: Expand Operating Budget Carry-Forward Authority

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	\$7,500	0	\$7,500
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	\$7,500	0	\$7,500
FTEs	0	0	0	0

Request:

The Governor recommends modifying Minnesota Statutes 16A.28 to allow agencies to uniformly carry-forward unexpended non-grant operating appropriations for the second year of a biennium into the next beginning in FY 2021. This is being proposed as an improvement to current financial management practices – to increase state agencies budget management flexibility to deal with planned and unplanned cost increases and cost pressures.

The budget impact of this proposal will reduce forecast general fund cancellations in the second year of each biennium by an estimated \$7.5 million.

Rationale/Background:

State agencies are generally authorized in M.S. 16A.28 to balance forward unexpended and unencumbered non-grant operating balance from the first to the second year of the biennium, while unspent operating appropriations for the second year (the end of a biennium) generally cancel back to the originating fund.

This requirement, however, is not uniform. Appropriations to the legislature, higher education systems, and selective appropriations to various state agencies are exempt, or are provided specific carry-forward authority in law. The current requirement to cancel unspent operating funds is generally perceived as a “use it or lose it” disincentive for agencies that increases year-end spending and reduces the ability to manage year-end and following year costs in the most effective, strategic way.

In 2003 and 2005, the legislature provided one-time authorities to balance forward funds from one biennium to the next. These authorities were granted to provide agencies flexibility in managing budget reductions. In 2007, one-time authority was provided to carry-forward up to \$5.8 million of unspent operating funds, but with the use limited to technology investments.

Uniformly extending carry-forward authority of operating balances at the end of the biennium to all agencies will increase agencies’ flexibility to better utilize resources to manage costs such as increases related to general operating expenses or operating projects. It will provide an effective incentive for agencies to identify efficiencies and cost savings as they would be able to redirect resources to both identified and unanticipated future costs – removing the constraint that the money be spent by year-end. This proposal is strongly supported by executive branch agencies’ chief financial officers.

Proposal:

Extend carry-forward authority at the end of the biennium to all agencies, constitutional officers, and the court systems for all direct appropriated funds. But, require that funds be used to manage one-time costs related to general operating costs or operating projects. It will provide an effective incentive for agencies to identify efficiencies and cost savings as they would be able to redirect resources to both identified and unanticipated future costs – removing the constraint that the money be spent by year-end. In addition, agencies would be able to use this authority for long-term budget planning allowing carry-forward dollars to be used to defray operating cost increases.

Minnesota Management & Budget Non-Operating

FY 2020-21 Biennial Budget Change Item

Change Item Title: Repeal Sunset of the Provider Tax

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Tax Policy				
Health Care Access Fund				
Expenditures	0	0	0	0
Revenues	236,627	733,099	770,434	808,927
Department of Human Services				
Health Care Access Fund				
Expenditures	11,564	27,551	45,973	39,259
Revenues	0	0	0	0
MMB Non-Operating				
Health Care Access Fund				
Transfers Out			122,000	122,000
General Fund				
Transfers In			122,000	122,000
Net Fiscal Impact = (Expenditures – Revenues)	(236,071)	(715,985)	(736,916)	(783,167)
FTEs	0	0	0	0

Recommendation:

To support essential health care services and expand access to health insurance, the Governor recommends repealing the sunset on the two percent taxes on hospitals, surgical centers, health care providers, wholesale drug distributors, and those subject to the legend drug use tax contained in Minnesota Statutes, section 295.52. This proposal increases revenues to the Health Care Access Fund by \$970 million in the FY 2020-21 biennium.

The repeal of the tax sunset restores a provider rate increase that was established in 2003 to offset the cost of paying the provider tax on Medical Assistance and MinnesotaCare covered services.

The additional revenue creates a positive projected balance in the Health Care Access Fund. This balance triggers a statutory transfer to the General Fund of \$122 million per year.

Rationale/Background:

The Provider Tax is an essential source of funding for the Health Care Access Fund which provides health care coverage through the MinnesotaCare and Medical Assistance (MA) programs and supports public health activities through the Minnesota Department of Health. The reinstatement of the Provider Tax would also enable the Health Care Access Fund to support the Health Insurance Premium Subsidy and Health Insurance Tax Credit to stabilize and make the individual health insurance market more affordable.

Minnesota levies a two percent tax on revenue from patient services at hospitals, surgical centers and health care providers. This two percent tax also applies to the gross revenue of wholesale drug distributors as well as on amounts paid for prescription drugs by entities subject to the legend drug use tax.

Under current law, the provider taxes sunset on December 31, 2019. Repealing the sunset of the provider tax provides greater funding stability for the state's initiatives to promote access to health care, improve the quality of care, and contain health care costs. This proposal raises about \$237 million and \$733 million of revenue in fiscal years 2020 and 2021 respectively.

In 2003, the state legislature removed an exemption on taxing health care provider revenue for services provided to recipients of MA and MinnesotaCare and increased provider payment rates by two percent for these services subject to this tax. The November 2016 MA and MinnesotaCare forecast accounted for the provider tax sunset by removing the value of the two percent rate increase effective January 1, 2020. Repealing the provider tax sunset reinstates the two percent rate increase in MA and MinnesotaCare, resulting in a net cost to the state of just over \$39 million in FY 2020-21.

The current tax rate is 2%, although each year the rate must be reduced if the Commissioner of Management and Budget determines that projected revenue to the Health Care Access Fund is greater than 125% of expenditures and transfers, and the cash balance in the fund is adequate.

This proposal also amends existing nexus language and treats interest on overpayments for provider taxes consistent with other taxes. While current statutory language establishes nexus under the United States Constitution, this proposal addresses the impact of the United States Supreme Court decision in *Wayfair v. South Dakota* by providing for minimum economic nexus thresholds. Regarding interest, this proposal provides 90 days from the due date of the return or the date on which the original return is filed, whichever is later, before the amount refunded begins to bear interest.

Proposal:

This proposal repeals the sunset of the two percent provider taxes contained in Minnesota Statutes, section 295.52, to ensure funding for MinnesotaCare, Medical Assistance (MA), and public health activities through the Minnesota Department of Health. The repeal also supports proposals recommended in the Governor's budget to stabilize the individual health insurance market and make insurance more affordable. The individual market stabilization and affordability proposals include the Health Insurance Premium Subsidy and a Health Insurance Premium Tax Credit.

Equity and Inclusion:

Medical assistance is the largest expenditure from the Health Care Access Fund and currently provides health insurance coverage to over 1 million Minnesotans, who meet income limits. MinnesotaCare assists those most in need that are not already covered by existing programs. To be eligible for MinnesotaCare, individuals must meet income limits, not be eligible for Medical Assistance, and satisfy other requirements related to residency and lack of access to other health insurance. MinnesotaCare coverage is available to persons with incomes greater than 133 percent of federal poverty guidelines but not exceeding 200 percent, if other program eligibility requirements are met.

Minnesota Management & Budget Non-Operating

FY 2020-21 Biennial Budget Change Item

Change Item Title: Opioid and Other Drug Overdose Prevention

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Department of Health				
Opioid Stewardship Fund				
Expenditures	6,000	9,251	9,251	9,251
Revenues	0	0	0	0
MMB Non-Operating				
Health Care Access Fund				
Transfer Out	13,000	0	0	0
Opioid Stewardship Fund				
Transfer In	13,000	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	6,000	9,251	9,251	9,251
FTEs	8	8	8	8

Recommendation:

The Governor recommends funding from the Opioid Stewardship Fund for opioid and other drug overdose prevention at the Minnesota Department of Health (MDH). This proposal includes a comprehensive array of evidence-based approaches to the growing crisis of drug overdoses and drug-related deaths in Minnesota. It doubles the current number of community opioid pilot prevention projects, strengthens Tribal Prevention Programs, provides Naloxone and training for first responders across Minnesota (including State Patrol, Tribal Law Enforcement, probation and parole officers, and others), and improves local data collection and analysis.

This proposal is part of a package of proposals recommended by the Governor to address rising rates of opioid use. The package of proposals is funded by new fees on opioid manufacturers, wholesalers, and entities that handle controlled substances.

The Governor also recommends a one-time transfer of \$13 million from the Health Care Access Fund to the Opioid Stewardship Fund. The primary source of revenue into the Health Care Access Fund is a tax on health care providers, hospitals, surgical centers, and wholesale drug distributors. The fund supports initiatives that improve access to health care, contain health care costs, and promote public health. This transfer will provide resources to fund opioid-related programming prior to the receipt of new fee revenue.

Rationale/Background:

Preliminary drug overdose data for 2017 indicates that drug overdose fatalities increased by 3% from 2016 to 2017 (rising to 733 deaths; of these, 422 were opioid-involved deaths). Overdose deaths are not equal across age groups, genders, geography, and cultures in Minnesota. The highest drug overdose rates have moved to younger age groups. Other differences persist by gender and geography (urban, rural). American Indians in Minnesota have the highest rate of drug overdose deaths (primarily opioid overdose) in the nation. In 2016, American Indians were six times more likely to die of a drug overdose than were white Minnesotans. This was the worst disparity rate in the nation. African Americans in Minnesota were 2.4 times more likely to die of a drug overdose than white Minnesotans. This was the fifth highest disparity rate ratio amongst blacks relative to whites in the nation.

Although death is the most visible outcome, increasing substance use and abuse have great impact on families, school systems, employers, law enforcement, and communities. The associated injury and violence also results in millions of dollars in hospital visits and rehabilitative drug treatment in Minnesota, according to analyses performed by MDH. Opioid-related hospital treatment (includes emergency department treatment and in-patient hospitalization) has been increasing since 2001 and has doubled since 2005. Opioid-related hospital treatment surpassed that of heart attack and stroke in 2009.

Notes: The dashed lines on the right hand side of the two graphs indicate a change in coding manuals – the trends are the same, but how cases are identified differ enough that we present them distinctly.

There is no state funding dedicated to overdose prevention. MDH has successfully competed for short-term federal funding which is being used to improve data collection and analysis in order to define the magnitude of the problem, to develop the opioid prevention dashboard (www.health.state.mn.us/opioiddashboard), and to test interventions like the employer toolkit (www.health.state.mn.us/opioidtoolkit). Projected department expenditures from all opioid-related federal awards are \$1.325 million in FY 2020 and \$935,000 in FY 2021.

Proposal:

This proposal includes four components:

1. Continue and expand the community-based pilot prevention projects
2. Invest in culturally-specific prevention efforts to address overdose disparities among American Indians and African Americans
3. Provide Naloxone (antidote to opioid overdose) training and medication supplies to first responders and state troopers statewide
4. Conduct community-based, drug overdose fatality review data collection and analysis

Opioid pilot projects - In 2017, MDH received a one-time General Fund appropriation of \$1 million to replicate the overdose prevention efforts of St. Gabriel's Hospital in Little Falls, MN. MDH awarded funding to eight communities and tribal nations. This proposal would expand the work occurring in the first eight communities for an additional year to allow them to assess the effectiveness and sustainability of their work. The funds will also support similar drug overdose prevention grants to eight new communities for two years. Each year, the program would allow eight communities to "graduate" and eight new intervention communities would initiate prevention work. (\$1.3 million in FY 20 and \$2.3 million each year thereafter and 2 FTEs: one planner principal and one management analyst)

Each community implements six major activities to reduce opioid use or abuse and reduce rates of opioid addiction:

- 1) Establishing multidisciplinary controlled substance care teams that may consist of physicians, pharmacists, social workers, nurse care coordinators, and mental health professionals;
- 2) Delivering health care services and care coordination, through controlled substance care teams, to reduce the inappropriate use of opioids by patients and rates of opioid addiction;
- 3) Addressing any unmet social service needs that create barriers to managing pain effectively and obtaining optimal health outcomes;
- 4) Providing prescriber and dispenser education and assistance to reduce the inappropriate prescribing and dispensing of opioids;
- 5) Promoting the adoption of best practices related to opioid disposal and reducing opportunities for illegal access to opioids; and
- 6) Engaging partners outside of the health care system, including schools, law enforcement, and social services to address root causes of opioid abuse and addiction at the community level.

Culturally specific prevention grants – This component specifically addresses the overdose disparities in Minnesota and strives to identify and interrupt the root causes of the overdose epidemic. MDH will distribute grants to organizations working directly with urban American Indians (including the homeless), African Americans, and Minnesota's 11 tribal nations. The community organizations and tribal nations will implement components of the Menomonie Project, a whole health initiative designed by the Menomonie Nation (Wisconsin) that has resulted in clear reductions in overdose death and hospitalizations. The Menomonie Project emphasizes high school graduation rates, employment, reclaiming language, prescribing practices, social services, and family supports. (\$2.4 million in FY20 and \$4.5 million each year thereafter and 3 FTEs—two planner principal positions and one management analyst)

Naloxone – This evidence-based strategy provides funding for training and provides Naloxone medications to first responders, including state troopers, across all of Minnesota. Often, our first responders (state troopers, sheriffs,

local law enforcement, Tribal police, fire, and EMS) have opportunities to save lives and can do so when equipped with training (so ensure proper administration of either the injectable or inhalation Naloxone) and are provided with at least two doses of Naloxone per first responder (\$1 million each year).

Fatality Review Data and Analysis – This component provides funding for overdose fatality reviews, a systematic process that enables the state and local communities to understand the circumstances of these preventable deaths and identify strategies to prevent future overdoses. Nine states have recently authorized the fatality review process to examine and understand drug overdose fatalities.

Overdose fatalities are not unpredictable and random. An in-depth, multi-disciplinary review of each fatality can identify failures or oversights in medical care, gaps in community services (e.g. access to mental health or medical treatment, coordination between service providers, including emergency medical services), the need for changes to state laws or government practices, or emerging causes of death (i.e. new synthetic opioids or drugs in the community).

MDH staff will support and develop overdose fatality reviews across Minnesota. We will partner with tribal governments, counties, local public health, law enforcement, health care providers, other state agencies, and other community groups. Some reviews will be led by MDH staff; however, part of their responsibility will be to train partners across the state to lead fatality reviews at the local level. Most of the requested funding will support the work of the fatality reviews through grants awarded at the community level. (\$1.3 million in FY 20 and \$1.4 million each year thereafter and 3 FTEs—an epidemiologist, a planner principal, and a research analyst)

Equity and Inclusion:

Minnesota's overall overdose death rate is among the lowest ten states in the nation. However, Minnesota's white overdose rate compared to American Indians and African Americans reveals that Minnesota has the greatest racial disparity in the nation. In 2016, African Americans were two times more likely to die of a drug overdose than were whites. In 2016, American Indians were almost six times more likely to die of a drug overdose than were whites. MDH is using in-person meetings, focus groups, surveys, advisory meetings, and professional forums to understand how best to prevent substance use disorder and overdose death.

Results:

The proposal will reduce the number of drug overdose deaths for all Minnesotans and particularly for American Indian and African American Minnesotans. Potential performance measures could include: number of community prevention programs funded; number of doses of Naloxone purchased; number of drug reversals (proxy for lives saved); number of grants to Tribal Nations; number of policies changed at the local level; and number of opioid prescriptions each year compared with the preceding year.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Results	Drug Overdose Fatality Rate for American Indian	47.3 per 100,000	70.0 per 100,000	2015 / 2017
Results	Drug Overdose Fatality Rate for African American	20.8 per 100,000	27.4 per 100,000	2015 / 2017

Minnesota Management & Budget Non-Operating

FY 2020-21 Biennial Budget Change Item

Change Item Title: Minnesota Premium Security Plan Transfer

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Commerce Department				
Special Revenue Fund				
Transfer Out	0	535,588	0	0
Transfer In	0	0	0	0
MMB Non-Operating				
General Fund				
Transfer Out	0	0	0	0
Transfer In	0	142,000		
Health Care Access Fund				
Transfer Out	0	0	0	0
Transfer In	0	393,588	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends transferring the unspent assets in the Premium Security Account to the Health Care Access Fund and General Fund in FY2021. Approximately \$393.5 million would be transferred to the Health Care Access Fund to support programs to increase access to affordable health insurance coverage and health care services. \$142 million would be transferred to the General Fund.

Rationale/Background:

In 2017, the Minnesota Premium Security Plan (MPSP) was created to provide reinsurance payments to health insurers to help cover the costs of high claims in the state's individual health insurance market.

\$543 million in state resources were appropriated for FY 2018-19 to cover plan years 2018 and 2019. The state resources are from \$142 million in transfers from the General Fund, \$401 million in transfers from the Health Care Access Fund, and \$42 million in remaining operating funds from MCHA. Minnesota received \$130.7 million in federal funds for the program for 2018.

Federal regulators project Minnesota will receive approximately \$84.7 million in federal funds for the program for plan year 2019. The final amount the State will receive will be finalized by April 2019.

Proposal:

This request utilizes assumptions from the February 2019 Forecast regarding total MPSP program size in both 2018 and 2019. This request assumes the MPSP will end after plan year 2019, with final payments to eligible health insurers for plan year 2019 occurring by August, 2020. This request assumes that the two transfers would occur after final payment obligations are fulfilled for the MPSP.

Statutory Change(s):

Transfer language within appropriations article.

Agency Financing by Fund (REVISED)	5
Agency Change Summary (REVISED)	8
<u>Change Item(s)</u>	11
<i>Campus Investments (REVISED)</i>	11

AT A GLANCE

- 250,000 students served annually in credit courses
- 30 separately accredited two-year colleges and 7 four-year universities located on 54 campuses
- Programs offered are technical, pre-baccalaureate, baccalaureate, graduate, and applied doctoral degrees
- Approximately 40,000 degrees, diplomas, and certificates awarded each year

PURPOSE

Minnesota State plays a critical role in ensuring the economic prosperity of Minnesota, its communities, and its citizens by offering high quality, affordable higher education opportunities that are aligned with employer needs throughout the state. Almost two-thirds of Minnesotans enrolled in undergraduate programs are attending Minnesota State colleges and universities to create a better future for themselves, for their families, and for their communities.

Consistent with our strategic framework, we strive to:

- Ensure access to an extraordinary education
- Be the partner of choice to meet Minnesota's workforce and community needs
- Deliver the highest value and most affordable higher education option

We are strong contributors to the following statewide outcomes:

- Minnesotans have the education and skills needed to achieve their goals
- A thriving economy that encourages business growth and employment opportunities

BUDGET

Source: Minnesota State FY 2017 Audited Financial Statements

Source: Minnesota State Audited Financial Statements

- Our largest expenditure category is salary and benefits which account for over two-thirds of expenditures
- Our primary revenue sources are tuition and state appropriation

STRATEGIES

The world is rapidly changing--from advances in what we know, to new technologies and the ways we communicate, and the ease with which information is accessed and disseminated. Future employers will require our graduates to have different types of expertise and competencies to be successful, and they will need to be ready for jobs that have not yet emerged. Additionally, our colleges and universities are facing change in three specific areas:

1. How our students learn
2. Who our students are
3. What our campuses need to do to face new budget realities

To respond to these three changes, the collective work of Minnesota State is aligned in four areas related to the changes above:

- *Alignment with the changing needs of learners.* Ensure the success of our students, particularly those who learn differently from students in previous generations by:
 - Examining the interface of technology and its use by our students
 - Implementing changes in our classroom and modes of delivery to reflect the way today's students access, process, aggregate, and connect information
 - Preparing for the next wave of change that will impact our work
- *Alignment with the new demographics of an increasingly diverse student body.* Increase our efforts around diversity, equity, and inclusion as we respond to a demographic shift and welcome an increasing number of students from populations traditionally underserved by higher education by:
 - Engaging and embedding ourselves in traditionally underrepresented communities
 - Expanding the landscape of learning beyond the classroom
 - Learning with and from diverse communities
 - Providing the student support services required to ensure student success
- *Alignment with current and emergent talent needs of employers.* Operationalize our Strategic Framework priority to ensure that Minnesota's businesses and industries have the talented workforce they need by:
 - Partnering with employers on curriculum advisory councils, student scholarships, and internship opportunities
 - Reorganizing our incumbent worker training offerings to ensure employers can access what they need easily and efficiently, no matter where in the state the expertise they need is offered
- *Alignment with challenging budget realities on our campuses.* Ensure the programmatic and financial sustainability of our campuses by:
 - Reprioritizing and reallocating our resources
 - Alleviating budget pressures through technology and better alignment and more efficient delivery of our curriculum

RESULTS

Minnesota State has developed performance measures that monitor and assess performance over time. They measure graduate outcomes, student success, affordability, diversity, efficient use of resources, enrollment, and stewardship of financial and physical resources, and are used by leadership to determine if our strategies are working.

Type of Measure	Name of Measure	Previous	Current	Dates
Result	Student Persistence and Completion	77.1	76.8	Fall 2014 in Fall 2015/ Fall 2016 in Fall 2017

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Result	Completion Rate (college/university)	50.9/52.0	53.6/53.7	Spring 2015 / Spring 2017
Result	Related Employment of Graduates	85.5	87.2	FY14 grads employed in FY15/FY16 grads in FY17
Quantity	System Share of Minnesota Resident Enrollment	65.5	65.0	Fall 2014 / Fall 2016
Quality	Percent Students of Color	24.4%	25.9%	FY 2015 / FY 2017

Definitions of the five measures are provided below.

Student Persistence and Completion, a higher education standard metric, is the percent of a fall entering cohort of full time degree and certificate seeking students that have been retained, graduated, or transferred by the second fall term following original fall enrollment. Current: Fall 2016 in Fall 2017 / Previous: Fall 2014 in Fall 2015.

Completion Rate, a higher education standard metric, is the percent of an entering cohort that has completed by 150 percent of normal time. Completion is measured as graduation by the sixth spring after entry at the universities and as graduation or transfer by the third spring after entry at the colleges. Because the measures are different for colleges and universities, the measurements are given separately for each institution type. Current: Measured in Spring 2017 / Previous: Spring 2015.

Related Employment of Graduates is the percent of system graduates in a fiscal year that reported they were employed or seeking employment during the year after graduation and reported a job that was related to their program or major. Current: FY 2016 graduates employed in FY 2017 / Previous: FY 2014 graduates employed in FY 2015.

System Share of Minnesota Resident Undergraduate Enrollment is the percentage of Minnesota residents enrolled as undergraduate students at a Minnesota higher education institution that are attending a Minnesota State college or university. Current: Fall 2016 / Previous: Fall 2014.

Percent Students of Color is the percent of system credit students in a fiscal year that reported being African American, American Indian, Asian, Hispanic, Pacific Islander, or two or more races. Current: FY 2017 / Previous: FY 2015.

[Minnesota Statutes Chapter 136F](#) provides the legal authority for Minnesota State.

Recommendation:

The Governor recommends an increase of \$64.798 million in FY2020-2021 and \$84.056 million in FY2022-23 for operating increases at Minnesota State. Included in that total, the Governor recommends \$8.0 million over the biennium to fund system-wide technology updates. The Campus Investments proposal provides campuses with the operating funds needed to continue offering higher education programs throughout the state and supports the replacement of an outdated, 20 year-old enterprise data system.

Rationale/Background:

The colleges and universities of Minnesota State provide the highest value, most affordable higher education options in the state. This proposal is intended to provide the necessary operating support colleges and universities need to continue providing all Minnesotans with access to affordable, high quality higher education.

With 30 colleges and 7 universities located in 47 communities across Minnesota, Minnesota State serves the entire state. Minnesota State believes that the opportunity to go to college should be available to everyone. Minnesota State provides higher education to the most Minnesotans (376,000 students) at the lowest cost possible – roughly half the average cost of other large public universities and roughly one-fifth the cost of private colleges and universities in the state. Minnesota State is a key part of the state's higher educational infrastructure, providing Minnesotans throughout the state with the education and skills needed to achieve their goals. Minnesota State has a college option for all, from certificates to doctorates.

Minnesota State colleges and universities play a central role in addressing Minnesota's two most difficult challenges: developing the talent businesses need to drive the state's continued economic prosperity, and eliminating the racial and economic disparities that keep too many Minnesotans from having the opportunity to become that talent.

Minnesota State serves more racially and economically diverse students than all other higher education providers in the state combined. These students are the future workforce, and so their success is critical to Minnesota's success. (See Equity and Inclusion section)

Minnesota State plays a lead role in preparing and maintaining the quality of our workforce – the workforce that allows our communities as well as our state's economy to thrive. Minnesota State works with business and industry to develop programs that provide students with the necessary skills to be employable in the workforce.

Minnesota State colleges and universities rely on two primary sources of revenue: tuition and state appropriation. The state's support is fundamental to the financial health of their campuses and the success of their students. To keep tuition affordable for students and their families and to reduce student debt, Minnesota State is asking the state to cover inflationary costs and other high priority initiatives.

ISRS is *the* data system for colleges and universities and their students, faculty, and staff. It plays a critical role in the success of their students, from applicant to graduate and nearly every process in between. It is the system's finance, accounting and human resource software as well as student system. It touches everyone and has a role in nearly every activity including application, registration, course scheduling, housing, financial aid, transcripts and more.

ISRS is an internally developed assembly of multiple modules that is now reaching its technological end of life. It is 20 years old and cannot meet the needs of 21st century students, colleges, and universities. Replacement is the only option; Minnesota State does not have the staff or resources that would be required to make the upgrades necessary to meet current demands. This is a *must-do* and not a nice-to-do technology infrastructure investment.

Replacement of ISRS is a once-in-a-generation event that will take several years to complete, beginning in fiscal year 2018. An extensive consultation and planning process is underway and will continue throughout the ISRS Next Generation project. Two cycles of campus listening sessions have already been held. There is strong support from students, faculty and staff that an examination of options regarding ISRS is long overdue.

Proposal:

This proposal would fund inflationary cost increases to Minnesota State's appropriation at 2.6% each year of the biennium. This percent increase is the five-year average of the Higher Education Price Index (HEPI).

Increased state support will allow Minnesota State to continue providing high quality educational programs at the lowest possible cost to students – an affordable option for the students who need it most. Minnesota State appreciates that state support per full-year equivalent students has begun to improve in constant dollars, but it remains 23 percent below 2002 levels in inflation-adjusted dollars.

ISRS Next Generation is a new initiative that will impact everyone and nearly every activity in the organization. It will take several years to complete at a cost of approximately \$150 million. Ongoing costs of the new system are estimated at \$10 million per year. Minnesota State is proposing the state fully fund this critical need. Without the upgrade, the current system is at risk of failing which would affect every student, faculty and staff who rely on its various services and functions.

Minnesota State's proposal was developed in consultation with key constituency groups. All statewide bargaining units, both student associations, and Minnesota State's Leadership Council provided initial input. Some key themes that emerged from those conversations were strong support for ensuring affordability, meeting the state's need for talent, helping address Minnesota's economic and racial disparities, and funding campus investment requirements to protect students, programs, and campuses.

Equity and Inclusion:

Education is the most effective strategy known to lift people out of poverty and eliminate economic and racial disparities. An education that prepares graduates for high-demand jobs without saddling them with enormous student debt will have a bigger impact than anything else the state can do to reduce disparities. That is why this proposal is critical.

The campus investment proposal will provide core funding to sustain the educational programs and services the campuses offer, including key services that help all students succeed regardless of their backgrounds --services such as tutoring, targeted advising, bridge programs, support groups, and individualized instruction.

Minnesota State serves more racially and economically diverse students than all other higher education providers in Minnesota combined. By keeping tuition affordable, protecting the quality of programs and services and investing in core technology infrastructure, this will directly benefit Minnesota State's diverse student population, which includes:

- 65,800 students of color (27% of students)
- 43,800 first generation college students (18% of students)
- 75,800 low-income (Pell eligible) students (31% of students)
- 9,700 veterans and service members (4% of students)

Half of Minnesota State's students are included in one or more of these underrepresented groups.

Minnesota State's students, faculty and staff will all be impacted by the ISRS Next Generation project. While the project will not directly reduce or eliminate disparities, it will support Minnesota State's mission to provide quality, affordable higher education options throughout the state—and increasing the educational attainment and skill level of their diverse student body will help reduce racial and economic disparities. In addition, improved reporting and data analytics will increase their ability to measure and support equity and inclusion efforts in the areas of student success, employee hiring, and procurement.

In addition, the current ISRS system does not work on hand held devices; the new system will. First generation students, students of color, and those coming from families of modest financial means have much less access to desktop and laptop computing devices needed to interact with current student systems. Minnesota State want to eliminate this disparity.

IT Related Proposals:

The ISRS Next Gen portion of this proposal is estimated to require eight years of effort. The detailed eight year budget is shown below. Dollars shown in thousands (\$000s).

Category	FY18/ FY19	FY20	FY21	FY22	FY23	FY24/ FY25	Total
FTE (cost based on rate) (Doesn't include ITS existing staff)	\$325	\$885	\$2,525	\$4,525	\$5,275	\$9,275	\$22,810
Professional/ Technical	\$3,170	\$6,200	\$11,900	\$18,900	\$16,600	\$11,250	\$68,020
Enterprise Services							\$0
Local Services							\$0
New (Software or Hardware)	\$2,047	\$8,754	\$9,854	\$9,854	\$9,854	\$9,637	\$50,000
Training	\$387	\$883	\$1,900	\$1,900	\$1,900	\$2,200	\$9,170
Miscellaneous							\$0
Total	\$5,929	\$16,722	\$26,179	\$35,179	\$33,629	\$32,362	\$150,000

Results:

The success of the campus investment proposal will be measured by ability to maintain quality programming, keep tuition affordable, attract and retain quality faculty, and support the financial health of colleges and universities. The success of the ISRS Next Generation project will be measured by the timely completion of the project within budget and with the increased functionality outlined in this proposal.

Statutory Change(s):

No statutory changes will be required as part of this change item.

Minnesota State Retirement System

<i>Agency Profile</i>	1
Agency Expenditure Overview (REVISED)	5
Agency Financing by Fund (REVISED)	6
Agency Change Summary (REVISED)	8

AT A GLANCE

- The Minnesota State Retirement System (MSRS) was established in 1929.
- MSRS manages five defined benefit retirement funds and four defined contribution retirement funds.
- MSRS has \$14.39 billion in defined benefit fund net assets held in trust and \$7.91 billion in defined contribution fund net assets held in trust.
- MSRS has 130,688 defined benefit fund members and 215,832 defined contribution fund participants.
- MSRS has 906 total participating employers.
- MSRS manages a fiscal year 2019 administrative and recordkeeping budget of \$23.53 million.
- MSRS is governed by an 11-member board of directors.
- MSRS employs 144 people.

Source: MSRS 2018 Comprehensive Annual Financial Report

PURPOSE

The Minnesota State Retirement System's (MSRS) mission is to empower Minnesota public employees to build a strong foundation for retirement.

MSRS supports the following statewide outcomes:

- A thriving economy that encourages business growth and employment opportunities by allowing retirees to remain self-supportive and purchase goods and services in the local community.
- Minnesotans have optimal health by allowing public employees access to a Health Care Savings Plan.
- Strong and stable families and communities, with over 90% of MSRS retirees living in Minnesota.
- Efficient and accountable government services.

BUDGET

1. Spending includes retirement benefit payments, distributions to participants, and administrative expenses.

Source: MSRS 2018 Comprehensive Annual Financial Report

1. Other Funds include MSRS' defined benefit pension trust funds.
2. Although undetectable on the chart, General Fund appropriations finance a small portion of the benefits and administrative expenses for the State Patrol and Judges Retirement Plans and the majority of the expenses for the Legislators Retirement Plan.

Source: MSRS Comprehensive Annual Financial Reports

MSRS administers multiple retirement plans that provide retirement, survivor, and disability benefit coverage for Minnesota state employees as well as employees of the Metropolitan Council and many non-faculty employees at the University of Minnesota and Minnesota State university system. MSRS covers over 57,000 active employees and currently pays monthly benefits to almost 46,000 retirees and survivors. We also administer the Minnesota Deferred Compensation Plan and the Health Care Savings Plan.

MSRS administers five defined benefits funds internally: the State Employees, State Patrol, Correctional Employees, Judges, and Legislators Retirement Plans. All of these plans, except the Legislators Retirement Plan, are funded primarily with investment earnings comprising approximately 76 percent of revenues for the period ending June 30, 2018. Plan member and employer contributions each comprised about 23 percent of revenues in the same period. MSRS contribution rates continue to remain relatively stable and were 5.5% for the State Employees Retirement fund for the period ending June 30, 2018. The defined benefit funds have realized an annualized investment rate of return of 10.3% for the period ending June 30, 2018, and 7.8% for the ten-year period ending June 30, 2018. MSRS' administrative expenses for these funds continue to be less than 1/10 of 1% of plan net assets.

MSRS receives an annual \$6 million General Fund contribution to the Judges Retirement Fund until the fund is fully funded. For the State Patrol Retirement Fund, MSRS receives supplemental General Fund aid of \$1 million annually until the Public Employees Retirement Association Police and Fire Retirement Fund and the State Patrol Retirement Fund become 90 percent funded on a market value of assets basis. For the Legislators Retirement Plan, MSRS receives state General Fund appropriations to finance monthly regular retirement and survivor benefit payments, and the plan's proportionate share of MSRS' administrative expenses on a pay-as-you-go basis.

MSRS also administers four defined contribution funds: the Unclassified Employees Retirement Plan, the Minnesota Deferred Compensation Plan, the Health Care Savings Plan, and the Supplemental Retirement Plan for Hennepin County. For these plans, participants' tax-deferred contributions are invested daily and held in trust until retirement or termination of employment. Participant administrative fees include recordkeeping, custodial, and other MSRS administrative expenses. These plans require no state appropriation for funding purposes.

STRATEGIES

The MSRS vision is to be a nationally recognized leader in public retirement plans by leveraging our engaged workforce, customer-focused culture, and innovative technologies to promote sustainable retirement options for Minnesota public employees.

MSRS utilizes the following strategies to accomplish its stated mission and vision:

- **Talent Management:** Our goal is to attract, hire, develop, empower, and retain an engaged workforce by encouraging collaboration and performance, promoting trust and accountability, coordinating learning and development opportunities, and routinely identifying staffing needs and filling gaps.
- **Service Delivery:** Our goal is to enhance customer service by fostering a customer service culture, modernizing organizational processes, enhancing our security posture, and preparing for disruptive events.
- **Participant Success:** Our goal is to increase retirement readiness of Minnesota public employees by offering a comprehensive customer experience, improving participant-facing technology, and enhancing retirement income with the Minnesota Deferred Compensation Plan.
- **Financial Sustainability:** Our goal is to ensure the long-term financial viability of MSRS pension plans by increasing pension sustainability and achieving further generational equity.

MSRS operates from its main office in St. Paul and branch offices located in St. Cloud, Mankato, Detroit Lakes, and Duluth. MSRS is organized around two functional areas: retirement services and administrative support. Retirement Services staff provide records management, education, benefit determinations, and retirement

counseling to members of all MSRS retirement plans by phone, through onsite visits, and through the MSRS web site. Administrative divisions support accounting, contract administration, information technology and systems, and financial reporting.

For MSRS' defined benefit plans, MSRS collects member and employer contributions through payroll deductions and transfers these assets to the Minnesota State Board of Investment where they are pooled with the assets of other statewide retirement associations and invested in various securities. MSRS disburses monthly benefit payments to retired members, survivors, and disabled employees, and processes lump-sum withdrawals and rollovers to members who have terminated employment.

For MSRS' defined contribution plans, participants' tax deferred contributions flow from the employer to the recordkeeper and custodian for daily investment. Individual participants select their own investments from the various options offered. At MSRS' direction, the recordkeeper will make distributions to participants and vendors, and reimburse MSRS for each plan's proportionate share of administrative expenses. Financial transactions of these funds are not captured in the state's accounting system. Thus, the fiscal pages of this budget document omit the financial activities for these plans.

RESULTS

The 2018 Legislature enacted significant pension reforms for the State Employees, State Patrol, and Correctional Retirement Plans by increasing member and employer contributions and trimming plan features, including the lowering of the annual post-retirement benefit increases. The bill also modified MSRS's investment earnings assumption from 8.0% annually to 7.5% annually. Incorporating all these reforms, MSRS's 30-year projected funding ratio for the State Employees Retirement Fund is over 100 percent by 2048.

Three measures of a defined benefit plan's financial health are:

- **Contribution Sufficiency/Deficiency Rate** – This rate is the difference between the actuary's computation of required employer and employee contributions rates and the statutory contribution rates, expressed as a percent of payroll. A sufficiency indicates that the plan is on target to reach a 100% funded ratio before its full funding date; conversely, a deficiency means the retirement system is not collecting enough contributions to meet its full funding target date.
- **Unfunded Actuarial Accrued Liability** – This is the difference between the actuary's valuation of assets and the present value of members' future benefits.
- **Funded Ratio** – This ratio is the percent of a retirement fund's net assets, calculated for actuarial purposes, that is available to pay the present value of benefits that employees already earned. The higher the ratio, the better positioned the retirement plan is to pay future benefits when they become due.

The table below presents actual and estimated performance measurement data for MSRS' defined benefit funds as of June 30 2017, and June 30, 2018, based on computations using the market value of assets.

<i>Type of Measure</i>	<i>Performance Measure by MSRS Fund</i>	<i>June 30, 2017 - Actual</i>	<i>June 30, 2018 - Actual</i>	<i>Status</i>
	MSRS State Employees Retirement Fund			
Quality	Contribution Sufficiency/(Deficiency)	(2.0)%	0.6%	Improving
Quality	Unfunded Actuarial Accrued Liability	\$2.0 billion	\$1.4 billion	Improving
Quality	Funded Ratio	86.1%	90.6%	Improving
	State Patrol Retirement Fund			
Quality	Contribution Sufficiency/(Deficiency)	(4.7)%	0.1%	Improving

<i>Type of Measure</i>	<i>Performance Measure by MSRS Fund</i>	<i>June 30, 2017 - Actual</i>	<i>June 30, 2018 - Actual</i>	<i>Status</i>
Quality	Unfunded Actuarial Accrued Liability	\$189 million	\$201 million	Worsening
Quality	Funded Ratio	78.5%	78.4%	Worsening
	Correctional Employees Retirement Fund			
Quality	Contribution Sufficiency/(Deficiency)	(6.2)%	(1.3)%	Improving
Quality	Unfunded Actuarial Accrued Liability	\$391 million	\$376 million	Improving
Quality	Funded Ratio	72.4%	74.8%	Improving
	Judges Retirement Fund			
Quality	Contribution Sufficiency/(Deficiency)	(1.7)%	0.1%	Improving
Quality	Unfunded Actuarial Accrued Liability	\$164 million	\$176 million	Worsening
Quality	Funded Ratio	53.1%	53.4%	Improving
	Legislators Retirement Fund is funded by the General Fund on a pay-as-you-go basis and therefore performance trends are not measurable.

AT A GLANCE**Conserve and manage natural resources**

- Manage 1.3 million acres of wildlife management areas, 192,000 acres of scientific and natural areas, and 4.2 million acres of state forest
- Protect, monitor, enhance, and restore habitat on 4,500 fishing lakes and 16,000 miles of streams and rivers
- Manage 2,800 surface-water monitoring sites

Get people outdoors

- Operate 75 state parks and recreation areas, 43 state forest campgrounds and nine state waysides
- Manage 2.4 million license sales and 1.4 million boat or vehicle registrations
- Manage more than 29,400 miles of trails for hiking, biking, snowmobiles, off-highway vehicles, horseback riding, and cross-county skiing
- Manage 1,700 public water accesses, 368 fishing piers, and 35 water trails

Build the economy

- Manage fishing, hunting, and wildlife-watching activities supporting 48,000 jobs and \$3.8 billion in economic activity
- Manage 12 million acres of state mineral rights contributing directly to the mining economy, including 3.5 million acres of school trust lands
- Meet certification requirements on 5 million acres of state forest lands, including 2.5 million acres of school trust lands, that provide timber, habitat, clean water, and recreational opportunities

Serve the public

- Manage 2,900 facilities statewide
- Direct an annual budget of roughly \$565 million
- Employ more than 4,300 employees, who worked 5.5 million hours, which equates into 2,700 full time equivalents

PURPOSE

The mission of the Department of Natural Resources (DNR) is to work with citizens to 1) conserve and manage natural resources, 2) provide outdoor recreation opportunities; and 3) provide for commercial uses of natural resources in a way that creates a sustainable quality of life.

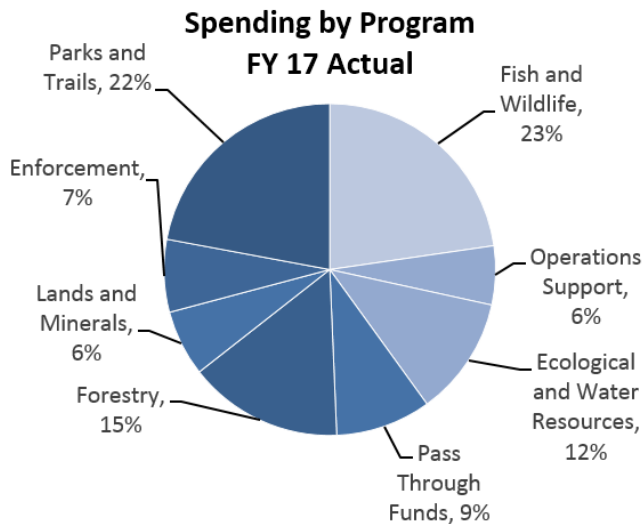

DNR fulfills this mission by:

- Conserving the diversity of land, waters, and wildlife so citizens can enjoy the outdoors and benefit from natural resources and related industries.
- Encouraging citizens to get outdoors to enjoy the state's natural wonders.
- Promoting responsible use of resources for collective economic benefit.
- Managing an outdoor recreation system that provides hunting, fishing, wildlife-watching, camping, skiing, hiking, biking, motorized recreation, and conservation education.
- Protecting and promoting healthy waterways and groundwater.
- Managing state forests, mineral rights, and school-trust lands for maximum long-term economic return.

DNR contributes to the statewide outcomes of:

- A clean, healthy environment with sustainable uses of natural resources
- A thriving economy that encourages business growth and employment opportunities
- Strong and stable family and communities
- People in Minnesota are safe

BUDGET

Source: StateWide Integrated Financial Tools System

Source: StateWide Integrated Financial Tools System

The FY 2018-19 biennial budget is approximately \$1.1 billion. The majority of DNR's funding comes from recreational fees and tax revenues. About 26 percent of DNR's funding is one-time, which is dedicated for specific purposes, and 22 percent is pass-through grants. DNR operates out of 50 funds, but approximately 39 percent of its financial activity occurs in the game and fish fund and the natural resources fund. This spending focuses on conserving and managing natural resources so Minnesotans can enjoy the outdoors today and tomorrow. About 26 percent of DNR's funding comes from the general fund. DNR's major general fund expenditures relate to operating the state parks and trails and forest systems and responding to forest fires. Additionally, DNR makes payments on behalf of the state to counties and Native American tribes as required by statute and agreements, which constitutes 31 percent of its general fund budget.

STRATEGIES

To accomplish its mission, DNR uses the following long-term strategic framework:

1. **Conserve, enhance waters, natural lands, and fish and wildlife habitats.** DNR works closely with partners to conserve critical lakes, wildlife, and waters by:
 - Accelerating groundwater management—monitoring, permitting, education and compliance—to ensure sustainable use and quality.
 - Working with farmers, landowners, local officials, and citizens to promote conservation of prairies, grasslands, and wetlands.
 - Implementing programs to prevent and curb spread of invasive species.
 - Accelerating programs to inventory and monitor the status of natural lands, waters, and species.
2. **Provide outdoor recreational opportunities.** DNR supports a robust tourism economy and a high quality of life that attracts people and business to the state by:
 - Implementing programs such as the "I Can" series and "Learn to Hunt" that provide affordable outdoor learning experiences to beginners.
 - Increasing the use of user friendly, digital recreation information, such as new websites and mobile apps.
 - Creating and implementing a new parks and trails system plan to improve existing systems and attract future users.

3. **Manage natural resources for sustainable economies and communities.** Through recreation tourism, forest products, and mineral and water resources, DNR helps generate billions of dollars a year for the state by:
 - Maintaining diverse, healthy, sustainable and productive forests that meet certification standards.
 - Researching and developing mining technologies that protect the environment.
 - Improving data management systems to provide better access and analysis of groundwater and surface water data for sustainable communities.
 - Leasing mineral rights and real estate and selling land and timber from the school trust lands.
4. **Achieve operational excellence in service to citizens.** DNR strives to continually improve services offered to citizens by:
 - Increasing the use of plain language and presenting information in easy-to-understand formats.
 - Protecting public safety by following Americans with Disabilities Act (ADA) standards at DNR facilities, parks, trails, and other facilities.
 - Maintaining work standards that reinforce positive and professional conduct, promote diversity, and support staff training and development.
 - Working to increase department energy efficiency and renewable energy use that reduces costs and helps the environment.
 - Developing “continuous improvement” projects to improve public service and customer satisfaction.

While pursuing these long-term strategies, DNR recognizes its current operating environment and the broader challenges and opportunities the agency and all Minnesotans face:

- **The agency has a three-part mission that requires careful balance in order to achieve the results elected leaders expect.** Conservation, outdoor recreation, and economic development can often intersect in creative and fruitful ways, and it requires dedicated vision, strategic management, and operational excellence to ensure all of DNR’s programs work together toward the common good. The application of rigorous science, high quality data, and fully engaged stakeholders from across a well-informed public can help DNR achieve that balance and fulfill its mission.
- **Climate change continues to impact Minnesota’s natural resources and DNR’s ability to respond to it.** The state’s climate already is changing rapidly and will continue to do so for the foreseeable future. Temperatures are increasing--especially in winter—and larger, more frequent extreme precipitation events are occurring. These changes are impacting Minnesota's wildlife, plants, waters, historic resources, infrastructure, and available outdoor recreation activities. For example, milder winters are allowing a population boom in Eastern larch beetles, which in turn has had a strong impact (300,000 acre loss) on tamarack forests.
- **The state’s demographics are also changing, which has implications for natural resource management.** According to the state demographer and U.S. Census Bureau, Minnesota is becoming a more diverse state with rapidly growing Asian, Black, and Hispanic populations. Not all cultures and ethnicities think about or want to use natural resources in the same way. In addition, different generations think about resources differently. For example, baby boomers brought up on hunting are aging out of the sport in greater numbers, and millennials are not replenishing their ranks in equal numbers.
- **The state’s workforce is undergoing a similar change, with additional implications for the agency.** The composition of DNR’s workforce has been changing, and must continue to change, if the agency is to reflect the state and its many perspectives on natural resources. The percentage of women, minorities, and persons with disabilities have all edged up over the past 10 years, with substantial change likely to come. The continued trend of retiring baby boomers has also had an impact (“brain drain”) on the agency’s collective expertise and ability to fulfill its mission in a timely, cost-effective manner.
- **As with many government efforts, demand for services can overwhelm the resources available.** Last year’s bonding issue was a comparative success in meeting the substantial, long-standing need to

repair and restore many buildings and other state assets (e.g., paths and bridges) that Minnesotans use, but the list of aging assets continues to grow.

- **There are promising strategies DNR has been implementing for the past several years, to increase the agency's cost-effectiveness and fulfillment of its mission.** The Strategic Land Asset Management (SLAM) initiative has added a useful analytic framework to the lands the agency acquires, manages, and improves. In FY18, 88 percent of proposed acquisitions met three or more SLAM goals, and 71 percent of parcels offered for sale were sold. DNR's success at improving facility energy use, reducing energy use by 14 percent compared to 2010, demonstrates the agency's ongoing efforts at conserving energy while saving taxpayers money.
- **Invasive species and animal and plant diseases and pests continue to threaten natural resources.** In spite of increased inspection and education efforts, new lakes and rivers are infested by aquatic invasive species each year. Chronic wasting disease has been identified in wild deer in southeastern Minnesota and continues to be detected in captive deer and elk farms in several areas across the state. Invasive pests such as the emerald ash borer present threats to forests and other plant communities. These stressors increasingly demand the attention of DNR programs and resource managers.
- **Water quality and quantity are critical to citizens, the state's economy, and to fish, wildlife, and other natural resources.** Each year, more is known about surface water and groundwater supplies and quality. At the same time, improved assessment and monitoring, modeling, and watershed-based planning processes allow DNR and other agencies to better understand water resources and management approaches to address both supply issues and impairments.

Expenditures	3,905	7,147	7,368	7,368
Net Fiscal Impact = (Expenditures – Revenues)	5,759	10,112	10,369	10,369
FTEs	48	95	95	95

Recommendation:

The Governor recommends additional funding of \$5.759 million in FY 2020, \$10.112 million in FY 2021, and \$10.369 million thereafter to maintain the current level of service delivery at the Department of Natural Resources (DNR). This accounts for known increases of 2 percent in current projected compensation for DNR and anticipated MNIT increased rates of \$1.1 million annually. Please note that the compensation calculations for FY22-23 account for known growth on increases from the pension reform enacted in the 2018 legislative session.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that typically remain flat from year to year.

For the DNR, known cost increases include current contract compensation that are projected to add an additional 2 percent per year to our compensation needs for the 2020-21 biennium. This is a \$4.659 million increase in FY 2020, a \$9.012 million increase in FY 2021, and a \$9.269 million increase in FY22 and thereafter in the direct appropriated funds. The \$257,000 increase in FY22 is due to pension reform passed in the 2018 legislative session, which increases employer contributions through FY23 for the DNR's Enforcement division. (This proposal reflects 2 percent known growth of that obligation.)

In addition, MNIT projections for information technology services for the DNR show an estimated increase of \$1.1 million per year. In the FY20-21 Biennium, DNR will transition from a local to an enterprise service delivery model for workstation management (laptop/desktop computer support and refresh) and service/help desk support. Regular replacement of workstations will be included as part of the service rate, in order to ensure the security and supportability of state agency computers. The agency will also transition to the enterprise service/help desk, which provides 24/7 support to agency staff. In addition, for the FY20-21 biennium, DNR's portion of MNIT administrative overhead expenses is projected to increase. MNIT overhead expenses include HR, finance, procurement, enterprise project management, and security activities. These expenses are allocated to agencies based on their total IT spend and total number of dedicated MNIT staff as of fiscal year 2017.

Agencies face challenging decisions to manage these costs within existing budgets, while maintaining the services Minnesotans expect. From year to year, agencies find ways to become more efficient with existing resources. However, cost growth typically outstrips efficiencies, and without additional resources added to agency budgets, service delivery erodes. For the DNR, an erosion of services includes lower fish and wildlife monitoring, fewer conservation officers, fewer AIS inspections, slower permit reviews, reduced trail maintenance, additional

deferred maintenance on the DNR infrastructure, reduced field work on DNR lands, shorter parks seasons and reduced customer service at state parks.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the DNR, this funding will cover known employee compensation growth of 2 percent. This proposal impacts all of our direct appropriated funds in the following amounts. These funds either have sufficient resources to fund this proposal or the Governor recommended a fee increase adequate to support this proposal.

The annual increase of \$1.1 million in projected MN.IT costs is driven by three primary factors: 1) the transition from DNR's desktop support program to MN.IT Enterprises Workstation Support services and rates; 2) the transition to Enterprise rates for software (Microsoft Suite and Security oversight services); and 3) estimated increases for MN.IT central administration.

Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,857	3,208	0	0
FTEs	1.0	1.0	0	0

Recommendation:

The Governor recommends that the Department of Natural Resources (DNR) and the Minnesota Pollution Control Agency (MPCA) be appropriated \$5.565 million in FY20-21 from the General Fund (\$2.357 million in FY20 and \$3.208 million in FY21) for the legal support costs they will incur to defend the agencies' decisions in contested proceedings. Supplemental funding gives the agencies the ability to defend their environmental and natural resources decisions whether in federal or state court, contested case hearings, mediation and other venues without imposing undue hardship on existing division budgets. This proposal also extends the availability of \$500,000 in funds provided for this purpose in the 2016 session.

Rationale/Background:

DNR's mission is to work with citizens to conserve and manage the state's natural resources, to provide outdoor recreation opportunities, and to provide for commercial uses of natural resources in a way that creates a sustainable quality of life. This mission brings together diverse constituencies who may disagree with DNR's decisions. The MPCA's mission is to protect and improve the environment and enhance human health. DNR and MPCA's natural resources and environmental regulatory, permit, leasing, or other types of decisions can be, and often are, challenged through either contested case or judicial proceedings. The cost of defending these decisions can be significant.

DNR and the MPCA will have difficulty adequately defending the legal challenges to the state's decisions without sufficient resources. Costs associated with the NorthMet project include outside legal counsel, staff and in-house counsel, records management, and related expenses. DNR is involved in several other large pieces of litigation, and anticipates being challenged on a number of complex water and mining decisions over the biennium. Costs associated with defending these agency decisions include in-house counsel costs, Attorney General's Office fees, Office of Administrative Hearings costs, and other defense preparation. In these cases, the DNR anticipates its decisions will be challenged regardless of the decision.

DNR and the MPCA are increasingly dependent on dedicated funding sources from the state – the agencies' share of General Fund as a part of the budget continues to diminish. DNR and MPCA do not have the ability to seek reimbursement of attorney's fees or other litigation costs from project proponents, plaintiffs or defendants except in very rare cases. Not defending the agency decision is not an option. This means that the DNR and MPCA

must seek additional resources from the Legislature or reduce/eliminate program funding in order to cover these costs.

Providing special appropriations for these large and unexpected legal costs has precedent. An example is an appropriation that the Legislature provided to defend the 1837 Treaty Rights lawsuit that was eventually heard by the U.S. Supreme Court in the 1990s. More recently, the Legislature appropriated \$750,000 to the DNR in ML 2015, 1st Special Session (\$300,000 in FY16 and \$450,000 in FY17) for legal costs related to water management that is available until June 30, 2018.

Laws of Minnesota 2016 appropriated \$4.4 million to the DNR that was split between both agencies (DNR - \$3.233 million and MPCA - \$1.167 million) related to NorthMet mining legal costs with funds available until June 30, 2019. DNR and MPCA are seeking a two-year extension to this appropriation, through June 30, 2021. Laws of Minnesota 2017 appropriated \$1.965 million to DNR and MPCA for legal costs (DNR - \$1.483 million and MPCA - \$0.482 million). The 2016 appropriation extension and 2017 appropriation amount are both factored into this FY20-21 request.

Proposal:

This request is for \$5.565 million (\$2.357 million in FY20 and \$3.208 million in FY21) for anticipated legal support costs in the next biennium above and beyond the current appropriations. This recommendation is based on the agencies' recent cost experience. Of this amount, \$720,000 in FY20 and \$918,000 in FY21 would transfer from DNR to MPCA for their legal support needs.

The majority of the funding would go toward the attorney general's office, contracted legal support, and other litigation related costs over the next two years. It also funds one position at DNR in FY20-21 to provide in-house legal counsel and related legal services to support the agency on the anticipated legal proceedings.

In addition to the requested amount, DNR and MPCA seek a two-year extension (through FY21) of a 2016 appropriation for legal costs related to the NorthMet mining project. This appropriation is in Laws of Minnesota 2016, Chapter 189, Article 3, Section 3, Subdivision 8 and currently expires at the end of FY19. This proposal anticipates up to \$500,000 to carryforward from FY19 to FY20.

Equity and Inclusion:

This proposal is not submitted in order to reduce or eliminate social disparities or inequities.

Invasive Species Account (2112)				
Expenditures	100	100	100	100
Revenues	652	652	652	652
Net Fiscal Impact = (Expenditures – Revenues)	(1,123)	(1,123)	(1,123)	(1,123)
FTEs	9.5	9.5	9.5	9.5

Recommendation:

The Governor recommends increasing boat license fees to generate \$2.963 million in revenue to fund critical investments of \$2.392 million annually in Minnesota's water recreation facilities and services. These investments include operations and maintenance of public water access sites and state water trails (\$542,000), increasing boating access site rehabilitation (\$800,000), boating and water safety enforcement (\$550,000), and water protection and land use activities (\$500,000). This revenue also funds the Governor's proposed operating adjustment, which is reflected on a different change page.

The Governor also recommends increasing the Aquatic Invasive Species (AIS) Surcharge from \$5 to \$7.25, adding approximately \$652,000 annually to the Invasive Species Account. This increase funds a partial restoration of aquatic plant management grants (\$350,000 per year) and provides new funding for responding to new invasive species such as starry stonewort (\$100,000 per year).

Rationale/Background:

Minnesota is renowned for its abundant water recreation opportunities. Recreational boating is a \$5.5 billion economic engine in Minnesota that relies on public water access infrastructure to serve boaters, paddlers, anglers, and industries. There are 826,000 boats registered in Minnesota, and this number has held steady in recent years. Minnesota leads the nation in the number of boats per capita with one boat for every six people. Boat license fees have not increased since 2006. Prior to 2006, registration fees for boats less than 17 feet in length and all canoes and kayaks had not increased since 1981. Fees for other watercraft increased in 2000.

The Water Recreation Account is a dedicated account in the Natural Resources Fund that directly supports boaters, paddlers, anglers, riparian residents and businesses with facilities, services, and programs across multiple DNR divisions.

- Parks and Trails manages approximately 1,500 public water access sites on Minnesota's lakes and rivers. Boaters want enhanced facilities, including longer, wider launch ramps; boarding and tie-up docks; restrooms; accessibility improvements; AIS boat cleaning areas; and storm water management. The division also maintains a 4,500-mile water trail system on 34 designated rivers and Lake Superior. Paddlers want waterways free of obstructions with well-maintained rest areas, campsites, and portages.
- Enforcement provides boat and water safety enforcement, outreach and training as well as financial grants to 72 sheriff's offices for boating patrol hours and emergency response efforts. That amount has been consistent at \$1.082 million since 1980. Enforcement conservation officers and sheriff's offices work both collaboratively and independently to patrol waterways, enforce boating laws and provide education aimed at reducing boating-related accidents and injuries and increasing safety and enjoyment.

- Ecological and Water Resources manages public water protection activities through public water work permits. They also collect and monitor stream-flow data for flood warnings and paddling conditions.
- Fish and Wildlife manages the aquatic plant management program through permitting and develops fish management plans that include winter aeration systems.

The Invasive Species Account is a dedicated account used to prevent the introduction of new invasive species to Minnesota, prevent the spread of invasive species within Minnesota and to reduce the impacts caused by invasive species to Minnesota's ecology, society and economy. The funds currently come from a \$5 surcharge on each 3-year boat license, a \$5 fee on each non-resident fishing license and \$750,000 transfer from the water recreation account.

The AIS watercraft surcharge started in Minnesota in 1990 when the legislature authorized a \$2 surcharge on a three-year watercraft registration for purple loosestrife and Eurasian watermilfoil programs. The scope of the surcharge expanded in its early days and the \$5 surcharge on a three-year watercraft registration has been in place since 1993.

AIS cause serious economic, recreational and environmental harm. Minnesota leads Midwestern states in preventing the spread of AIS, largely due to the effectiveness of the DNR's Invasive Species Program.

- Ecological and Water Resources provide watercraft inspectors, local unit of government assistance and inspector training, invasive carp monitoring, aquatic invasive species prevention and management, and assistance to local units of governments and lake associations in the control of invasive aquatic plants;
- Enforcement detects and responds to AIS violations.

Proposal:

This proposal increases watercraft registration fees and the AIS surcharge starting January 1, 2020, and would annually generate an estimated \$2.963 million for the water recreation account and \$652,000 for the Aquatic Invasive Species Account.

The new revenue from this proposal 1) addresses the structural deficit in the fund balance of both accounts, 2) funds the Governor's proposed operating adjustment, and 3) makes critical annual investments of \$2.392 million in the Water Recreation Account and \$200,000 in the Aquatic Invasive Species Account.

Water Recreation Account

- Supporting the continued operation and maintenance of the boat access and water trail systems for user safety and enjoyment (\$542,000).
- Increasing boating access site rehabilitation in collaboration with local government unit partners (\$800,000), by:
 - Upgrading facilities to American with Disabilities Act (ADA) design standards;
 - Helping to prevent the spread of aquatic invasive species by adding clean in, clean out areas;
 - Incorporating resilient infrastructure and native vegetation with best management practices for storm water runoff, erosion control, and shoreline buffer areas;
- Increasing capacity for DNR enforcement to conduct boating and water safety education, enforcement, outreach and training, with the goal of reducing accidents and injuries (\$450,000);
- Increase grants to local sheriff offices annually to reimburse for search and rescue efforts (\$100,000); and
- Partially supporting public water protection and land use programs (\$500,000).

Aquatic Invasive Species Account

- Restoring grants for management of invasive aquatic plants (\$350,000 reflects ability to spend at current appropriated level); and
- Supporting emergency efforts to restore habitat and native species to waterbodies degraded by Starry Stonewort and Zebra Mussels (\$100,000).

*Total includes \$4.50 issuing fee (issuing fees vary by transaction)

Equity and Inclusion:

This proposal supports inclusiveness and welcomes all people to enjoy Minnesota's abundant water recreation opportunities. All users benefit from better-designed boat access facilities and increased boating and water safety services. The resulting revenue increase will help reduce disparities for boaters and paddlers with disabilities by making improvements to boat access facilities, including pathways, boarding docks and restrooms, and will create the largest positive impact for aging users and those with mobility challenges.

IT Related Proposals:

This proposal does not have an IT-related component.

Results:

- Continue to improve boating access facilities so they are safe, efficient and resilient with a target of 15-30 sites/year rehabilitated and best management practices applied.
- Continue to maintain boat access sites and state water trail system for user safety and satisfaction.
- Increase grants by 25% to county sheriff boating patrols for enforcement and education of boating laws, increase available reimbursement for search and rescue efforts, and provide boating safety training to more people with a goal to decrease the number of boating accidents and deaths to zero.
- Reinstate Invasive Aquatic Plant management grants.
- Support emergency response efforts for new invasive species.

Statutory Change(s):

M.S. 86B.415 Watercraft License Fees (AIS Surcharge is authorized in subdivision 7).

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Sustaining Minnesota's White-Tailed Deer

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	2,410	2,160	1,100	1,100
Revenues	0	0	0	0
Game and Fish				
Expenditures	908	908	908	908
Revenues	681	681	681	681
Net Fiscal Impact = (Expenditures – Revenues)	2,637	2,387	1,327	1,327
FTEs	18.7	14.7	11.1	11.1

Recommendation:

The Governor recommends \$2.637 million in FY20 and \$2.387 million in FY21 (\$1.327 million thereafter) to benefit deer health and deer management in Minnesota by addressing 1) funding needs related to chronic wasting disease (CWD) surveillance and response and 2) recommendations made by the Office of the Legislative Auditor (OLA) in a recent evaluation of the Department of Natural Resources' (DNR) deer management program. This proposal provides \$2.41 million in FY20, \$2.16 million in FY21, and \$1.1 million annually thereafter from the General Fund for an urgent disease response. Additionally, it invests \$908,000 annually from the Game and Fish Fund for new deer research, which generates a 75 percent federal match of \$681,000 each year. This request is equivalent to a 3.8 percent increase to the FY2020 Fish and Wildlife budget, reduced to 3.4 percent increase in FY2021.

Rationale/Background:

Since the discovery of CWD-positive wild deer in Fillmore County during the 2016 deer season, DNR has been implementing its CWD response plan. Activities conducted under the plan include an aerial survey of the area to assess deer numbers, establishment of a management zone with mandatory collection of additional samples, special hunts and landowner shooting permits, deer feeding bans, and carcass movement restrictions. Additionally, CWD was confirmed in three private captive cervid farms in the past two years. Although cervid farms are regulated by the Board of Animal Health, when a disease is detected in farmed deer, DNR samples hunter-harvested deer around the positive farms for three consecutive years to determine if CWD is present in wild deer. The three-year time frame is reset if additional captive deer test positive for CWD. Providing General Fund support to these activities addresses a policy concern of placing the sole responsibility for funding these activities on hunting and angling license buyers.

The OLA and deer stakeholders alike have recommended DNR work to refine its deer population model and improve transparency of deer management decisions. To facilitate these enhancements, DNR has identified critical research needs related to fawn survival, habitat use, deer movement, and genetic relatedness.

Proposal:

Activity 1. Chronic Wasting Disease (CWD) Response and Enforcement. This request provides \$2.41 million in FY20 and \$2.16 million FY21 for known and anticipated needs for surveillance and response related to disease outbreak detections in wild and captive deer. As of February 2, 2019, testing in Fillmore County has confirmed CWD in 34 wild deer: 11 during the 2016-17 surveillance and response, six in 2017-18, and 17 so far in 2018-19. Two additional wild deer have tested or are suspect positive for CWD, one each in Houston (fall 2018) and Winona (February 2019) counties. The best opportunity to eradicate CWD from wild deer (e.g., Pine Island, 2011) requires

an aggressive response to reduce deer densities and test as many deer as possible for the disease. “Passive” management by other states (e.g., Wisconsin) has resulted in CWD infection rates exceeding 40 percent in some areas. Where there is a known risk such as a positive Cervidae farm, testing wild deer is imperative to 1) confirm the disease is not present in wild deer and 2) reduce deer densities and minimize the risk of spread, if it is. Currently, Minnesota has three captive cervid farms where surveillance is necessary (Crow Wing, Meeker, and Winona counties).

Testing is required for three consecutive years with no positive tests because of the prolonged period between infection and disease. Based on current information about the prevalence of CWD in Minnesota, hunter-harvested deer will be tested for CWD in Meeker County in FY 2020 since no positives were found in FY 2018 or FY2019. Hunter harvested deer will be sampled in Deer Permit Area 603 and around the Winona County farm in FY 2019-2021. DNR has sampled more than 5,400 deer in 2018-19 across the five locations with more samples expected.

This request includes two Conservation Officer positions (2 FTE, \$350,000 in FY20 and \$700,000 in FY21) over three years to work with DNR wildlife staff and the Board of Animal Health when there is reasonable suspicion that laws protecting native wild animals have been violated. This work includes inspecting fences and documenting violations of fencing requirements, carcass importation enforcement, responding to escaped cervids, and other CWD related enforcement activities. The request also includes increased landowner outreach related to CWD (1 FTE, \$120,000 in FY20 and \$240,000 in FY21) also over the three years. USDA Wildlife contracted services total \$500,000 (\$380,000 in FY20 and \$120,000 in FY21).

Currently, disease responses are paid for with Game and Fish funds, either appropriated to the agency or from the Emergency Deer Feeding and Wild Cervid Health Account (M.S. 97A.075, subd. 1d). Fifty cents of every deer license is deposited into the cervid health/deer feeding account, which is approximately \$300,000 per year. With increased CWD prevalence in captive and wild deer, available funds are insufficient to support the anticipated response. Without this initiative, resources will be diverted from other work, resulting in reduced services related to public land and water management, public-use facilities, habitat improvement projects, and assisting landowners with wildlife damage problems. Costs associated with this activity in FY 20 include 13.7 FTE; 10.7 FTE at a cost of \$118,000/FTE. The lab analysis and associated fleet costs are \$297,000 per year. Current anticipated costs in the out years are \$1.1million.

Activity 2. Deer research projects that address and implement OLA recommendations and deer plan objectives-novel research to refine deer management. As part of the 2016 deer program evaluation, the OLA recommended that DNR “improve its resources for estimating deer populations; specifically, DNR should conduct field research to collect and utilize more information about Minnesota’s deer, and to validate DNR deer population estimates.” To address this recommendation, DNR will use GPS collars on fawns and adult deer to:

- Assess seasonal fawn survival and seasonal movement of deer to ensure appropriate scales are used for population estimates from harvest and observational (i.e., aerial and roadside survey) models.
- Obtain deer location data to improve understanding of fine-scale habitat use and inform habitat management in northern Minnesota.
- Document deer dispersal patterns in southeast Minnesota and estimate movements of yearlings and adults to inform CWD surveillance and management.

Additionally, DNR will undertake research to analyze the genetic relatedness of all deer harvested (positive and non-positive) from the areas where CWD positive deer have been confirmed. This will enable DNR to better understand from where infection is originating and how it may be spread.

Finally, DNR needs an FTE to coordinate and manage datasets and online applications related to white-tailed deer research and management to address the need to improve data management practices, along with the public’s expectation that data be more accessible. Software applications designed through this activity will address internal and public information needs.

Costs associated with GPS and genetic activities include a combination of 4 temporary employees (.5 FTE) estimated at \$59,000 each, 2 graduate students (.5 FTE) estimated at \$45,000 each, and 1 FTE at a rate of \$125,000 to coordinate and manage datasets and online applications related to white-tailed deer research and management. Additional supplies and services include: radio collars for \$181,000 per year, contracted helicopter services for \$120,000 per year, and employee travel and fleet related costs of \$130,000 per year. Costs associated with anticipated MNIT service needs are \$26,000 per year.

Equity and Inclusion:

This proposed budget initiative will not impact and is not submitted to reduce or eliminate any disparities for racial and ethnic groups, lesbian, gay, bisexual and transgender groups, persons with disabilities and veterans. We anticipate no impacts (positive or negative) on these groups.

IT Related Proposals:

This proposal requires business analysis and database design services. This also incorporates associated maintenance costs.

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Minnesota Forest Management

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures				
Revenues				
Other Funds				
Expenditures	1,000	1,000	1,000	1,000
Revenues				
Net Fiscal Impact = (Expenditures – Revenues)	1,000	1,000	1,000	1,000
FTEs	9	9	9	9

Recommendation:

The Governor recommends \$1 million annually from the Forest Management Investment Account to implement the sustainable timber harvest target to increase the economic, social, and environmental benefits gained from healthy and resilient forests. This proposal increases the Division of Forestry's appropriation from Forest Management Investment Account (FMIA) by seven percent.

Rationale/Background:

In March 2018, the Department of Natural Resources (DNR) set a new 10-year sustainable timber target to offer 870,000 cords for sale each year from DNR-managed forest lands (including acquired, consolidated conservation, and school trust lands). Previously, the timber target was 800,000 cords offered for sale each year. The decision came after more than a year of rigorous scientific analysis, public input, and discussions with key partners in conservation organizations and forest industry. Beyond the 870,000 cords, DNR also launched a special five-year initiative to offer up to 30,000 additional cords of ash and tamarack each year in response to threats posed by emerald ash borer and eastern larch beetle, two invasive species that kill ash and tamarack trees. The combined increase of 100,000 cords offered for sale will require at least nine additional foresters to appraise and sell timber, monitor harvests, and oversee site reforestation. The DNR will reach the new higher sustainable timber target beginning in FY19 and continuing beyond. DNR is temporarily shifting resources away from other work priorities to meet the new target in FY19. However, this approach cannot be maintained without new dedicated funding for additional staff.

Proposal:

This proposal provides initial critical investments needed to reach the DNR's new sustainable timber target to offer 870,000 cords and an additional 30,000 cords of ash and tamarack for sale annually. Current staffing levels support offering 800,000 cords of timber annually. The new timber target requires at least nine additional foresters to appraise and sell timber, monitor harvests, and oversee site reforestation, including work on school trust lands. New foresters are needed to manage school trusts lands as described by state statute and constitution. School trust lands will provide approximately half of the additional 100,000 cords offered for sale each year.

DNR forest management carefully balances multiple objectives to support wildlife, maintain clean water and air, provide recreation opportunities, sustain biodiversity, and provide a reliable source wood for Minnesota's forest products industry.

Equity and Inclusion:

This proposal will not impact and is not submitted to reduce or eliminate any disparities for racial and ethnic groups, lesbian, gay, bisexual, and transgender people, persons with disabilities, or veterans. We anticipate no impacts (positive or negative) on these groups.

IT Related Proposals:

There is no additional IT component to this proposal.

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Protecting DNR applications

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	1,411	1,391	871	871
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,411	1,391	871	871
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$2.802 million in FY20-21 and \$871,000 annually thereafter to improve security for business systems serving customers by establishing a continuous improvement program to keep the Department of Natural Resources (DNR) business systems and associated computing infrastructure up to date and protected from cyberattack. This funding augments existing information technology (IT) infrastructure staff with a team dedicated to keeping the agency computing systems up to date.

Rationale/Background:

MNIT and DNR are working together to improve the protection of sensitive DNR information assets against unauthorized access and cyber-attacks. It is the agency's responsibility to protect our applications and our customers' information. DNR delivers services using information systems including the Minnesota Permitting and Reporting System, Timber Sales, the Electronic License System and many other systems that store non-public data on individuals. In recent years, cyberattacks on organizations such as the DNR have been relentless, with new attack strategies being uncovered every day.

DNR has made progress in improving security in some areas, but have been challenged to provide needed ongoing business system protections. The DNR currently has 170 business applications rated for Business and Technical Health using MNIT's application portfolio guidelines. Of these, 13 percent are in poor technical health (technical health score <25/50), and 45 percent are rated in moderate health (technical health score <30/50). Twenty seven percent of these applications are more than 10 years old.

DNR is vulnerable to criminal and activist organizations because we cannot keep pace with changes in the software used to build business systems. Keeping pace with the "fixes" required to keep current with security improvements takes more resources than we possess. DNR also recognizes that successful cybersecurity strategies of the future will rely increasingly on the transfer of systems to cloud vendor hosting, such as Amazon Web Services (AWS).

This initiative allows staff to hold their ground on system maintenance and information security while providing the ability to be tactical and responsive in protecting our data, files, systems, and customer/citizen web-cloud services. Deferment of this request increases the DNR's risk for compromised systems.

Proposal:

This proposal invests \$2.802 million next biennium to establish a continuous improvement program to keep DNR business systems secure and protected from cyberattack by keeping software infrastructure up to date (OS, development, database etc.), developing and maintaining business application security plans, and migrating applications to a cloud-based infrastructure. Currently, DNR business systems are not consistently maintained and protected following development. Unless these technologies are continuously maintained, the systems

become vulnerable to new and emerging cyber threats. This initiative establishes an on-going program to refresh these business systems so that they are protected from attack, have longer business life, operate more efficiently, and are easier to deploy and maintain.

This annual funding provides for IT technical staffing (\$731,000), Software (\$120,000), Cloud Hosting fees (\$510,000) and consulting (\$50,000). Ongoing costs go down as less consulting is needed and technical staffing is adjusted. The ongoing annual need starting in FY22 is \$871 million.

This proposal augments existing IT infrastructure staff with a team of five FTE dedicated to keeping the agency computing and web-cloud systems up to date. Team members include an additional Server Administrator, an Application Middleware Services expert, a Programmer, a Security Analyst, and a Senior Technical Architect to plan and direct an on-going series of projects to keep DNR business systems up to date and protected. As technology evolves, we anticipate accelerating migration of services, within the proposed budget, into commercial cloud computing environments that will form the basis for DNR's next generation technology and security strategy.

Equity and Inclusion:

Everyone wants their data and personal information to be protected. DNR wants to make sure that its business security program ensures no real or perceived barriers to equity and inclusion due to cybercrime.

IT Related Proposals:

The funding provides staffing resources as well as modern IT technology, including design, integration, hardware and software resources and security controls.

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Pineland Sands EIS/Study

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	1,854	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,854	0	0	0
FTEs	1.0	0	0	0

Recommendation:

The Governor recommends \$1.854 million in onetime appropriations from the General Fund to produce an environmental impact statement (EIS) or a special study on the effects of large-scale land use conversion within the Pineland Sands Area. This investment helps ensure that we have better information about the environmental effects of groundwater withdrawals in this area so that we can make more effective permit decisions and ultimately better protect Minnesota's natural resources.

Rationale/Background:

The Department of Natural Resources (DNR) has received a number of new groundwater appropriation permit applications within the Pineland Sands Area, with more requests expected as tracts of land that were formerly managed for timber are sold. Irrigation will be necessary in most if not all years to grow crops in these sandy, well-drained soils. The DNR needs better information about the environmental effects of groundwater withdrawals in the Pineland Sands Area to make more effective permit decisions.

The land overlying the Pineland Sands Aquifer is quickly being converted from jack pine forest to irrigated agriculture. This land use conversion is occurring in several counties. Natural resources affected by this land conversion include ground water for individual domestic and public drinking water supplies, lakes, streams and wetlands, soils, and important native plant and animal species and communities.

Nitrate levels are known to be locally high in shallow ground water in the area and past experience would predict that nitrate levels are likely to increase where nitrogen is used on irrigated sandy soils. The DNR is responsible for knowing how increased use of groundwater where nitrate levels are high will affect the movement and levels of nitrates and other potential contaminants in groundwater.

Citizens have expressed interest and concern about increasing groundwater use and increasing contamination in this area. The DNR has received two citizen petitions for preparation of Environmental Assessment Worksheets to assess the effects of conversion of previously forested land to irrigated agriculture. Also, nitrate contamination in the Pineland Sands Area has received extensive media coverage.

Proposal:

This proposal provides one-time funding to produce an generic environmental impact statement (GEIS) or a special study during FY20-FY22. The intended results of this study are to quantify the effects of land use conversion within the Pineland Sands Area and to predict the cumulative effects of large-scale conversion to irrigated agriculture.

The study will be carried out by consultant(s) and managed by DNR. We assume one staff will manage the project, including study design, contracting, data governance and fiscal monitoring. We estimate the full cost of this staff member at \$118,000, which includes but is not limited to salary, fringe, computer, and phone. This employee will work solely on this project for three years for a total cost of \$354,000. Based on our experience with similar large-scale environmental reviews, we assume the external contract will cost \$1.5 million. This proposal appropriates the full costs of the project in the first year and provides carry forward authority through FY23. Although we anticipate that the project will last three years, the ability to use the funding for four years provides additional flexibility that may be needed to ensure we accomplish the intended outcomes.

Equity and Inclusion:

This proposed change is not submitted to reduce or eliminate any disparities for racial and ethnic groups, lesbian, gay, bisexual and transgender people, persons with disabilities, or veterans. All persons residing, working, or vacationing in the Pineland Sands area will benefit from clean drinking water maintained through effective permitting.

Results:

The results of a special study would provide an understanding of anticipated changes in groundwater flow and groundwater levels that should be anticipated given different amounts of groundwater pumping and types of groundwater use.

Statutory Change(s):

No statutory changes are needed.

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Protecting Our Public Waters

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	800	800	800	800
Revenues	0	0	0	0
Other Funds				
Expenditures	358	358	358	358
Revenues	358	358	358	358
Net Fiscal Impact = (Expenditures – Revenues)	800	800	800	800
FTEs	10	10	10	10

Recommendation:

The Governor recommends investing \$800,000 from the General Fund and \$358,000 from the Water Management Account annually for public water protection work. Additionally, this proposal increases public water permit application fees, because the current fee structure falls far short of the cost of processing these permit applications. The fee increase generates \$358,000 annually and offsets the increased spending in the water management account. This investment adequately funds ten staff that are essential to timely action on permit applications and technical assistance and begins to rebalance the funding mix for a vital public good—surface water.

Rationale/Background:

Protecting Minnesota's public waters is critical to maintaining our quality of life. Surface waters are affected by development of transportation infrastructure, expansion of residential and commercial properties, and redevelopment of urban riverfronts, and a range of other activities. The Department of Natural Resources' (DNR) public waters protection program ensures that these kinds of activities can take place while protecting Minnesota's public waters. The more successful the economy, the more public water protection work DNR does.

The Water Management Account has become Minnesota's main funding source for DNR's work to protect Minnesota's public waters. The account supports two programs—both of which are fee-based. This includes the water appropriations program and public waters program. Each year, the DNR receives an appropriation of \$5 million total for both programs from the Water Management Account. The public waters program spends approximately \$2.9 million, (\$2 million from the Water Management Account, augmented by \$900,000 from the General Fund) yet its fees generate less than \$200,000.

There are two primary reasons why the current fee structure does not support public waters protection. First, public water is a public resource and laws allow for reasonable use and access to public waters without the need for a permit. For example, DNR staff regularly assist local governments, individual shoreline owners and others in developing their projects in a way that minimizes impacts to public waters. Often this work helps a project proposer avoid the need for a permit and consequently no fees are received by DNR for this work. Second, for those proposing projects that will have greater impacts and thus require a permit, the public water fees do not effectively balance what should be publicly funded and what should be paid by a permit applicant—especially for larger projects. Current fees range from \$150 to \$1,000, covering only three to 15 hours of work. By contrast, the value of DNR's time spent on a permit can, and usually does, far exceed that.

Because the public waters fees only cover 7 percent of the program's costs and because the DNR prioritizes protecting public waters while assisting project proposers and permit applicants, it has prioritized spending on public waters over other programs for the past few biennia. The implication of this is that many of the state's water programs are operating at a reduced capacity and Minnesota's waters are not as well protected as they should be.

Although this funding imbalance has existed for many years, there is increased urgency to address it. This urgency is driven by underfunding for the public waters program, the particularly low fees, and the crippling effect this underfunding is having on the other water programs from which resources are diverted.

This program faces workforce reductions in the next biennium without increased resources, including dedicated funding from the General Fund. This reduction will result in negative impacts to public waters, reduced technical assistance for landowners and local governments, reduced customer service to project proposers, and failure to meet the 150-day permit decision deadline for public water permits.

Proposal:

Because public waters are a vital public resource, this proposal invests \$800,000 annually from the General Fund to ensure adequate protection of Minnesota's public waters. This provides for costs not associated with a permit application, such as responding to floods and lake level concerns and assisting local governments with water-related land-use decisions.

Additionally, this proposal increases funding from the Water Management Account by \$358,000. This produces a total investment of \$1.158 million annually combined from the General Fund and Water Management Account in protecting our public waters. This provides for 10 staff dedicated to the public waters program. The estimated staff costs covers the full costs of an employee, including but not limited to salary, health insurance, retirement, a computer and phone.

The increased spending in the Water Management Account is offset by increased public water fees.

The General Fund investment prevents this proposal from overburdening public water permit applicants with a significant fee increase. The new fee structure ranges from \$300 to \$3,000, compared to the current range of \$150 to \$1,000. Please note that the proposal keeps notifications under a general permit at \$100. The revenue estimate of \$358,000 per year assumes about 500 permit applications/notifications, based on the DNR's historical experience.

Because other water programs have been subsidizing the public waters program, this investment allows for increased activity in the DNR's other water programs including:

- Responding to floods and lake level concerns;
- Assisting local governments with water-related land-use decisions;
- Providing technical assistance to lake shore owners, landowners, communities, and other state and federal agencies; and
- Reviewing work proposals as required by drainage law.

Equity and Inclusion:

This proposal benefits all water permit applicants' by providing a more efficient and effective evaluation of their project. DNR's public water protection work ensures these natural resources are sustainable for the benefit of all of Minnesota's citizens.

FTEs	0.2	0.2	0.2	0.2

Recommendation:

The Governor recommends increasing the daily, annual, and three-year cross-country ski pass fees, which will bring in about \$70,000 in new revenue for ski trails in Minnesota. This proposal increases funding for state parks grooming and the cross-country ski grant-in-aid (GIA) program by \$35,000 each. The Department of Natural Resources (DNR) has existing statutory authority to increase the GIA allocation, but needs a legislatively-increased appropriation for state park grooming.

Rationale/Background:

The cross-country ski pass is required to ski on groomed ski trails in state parks, state forests, state trails, and GIA-system ski trails. The ski pass allows skiers to access more than 700 miles of locally initiated GIA trails as well as ski trail systems in 22 state parks and trails.

Revenue from the ski pass is deposited into the dedicated cross-country ski pass account. In good snow years, there are up to about 19,000 ski passes sold statewide. Revenue varies due to the snow season, ranging from \$400,000 in a good year to \$100,000 in a poor year. The ski account supports both GIA and DNR-groomed trails. The ski pass fees were last increased in 2010, and with rising costs of grooming and inflationary increases, the account is projected to go into deficit in FY21 if current service levels are maintained.

Currently about \$280,000 per year is awarded to local GIA trails across the state, and about \$75,000 is used to offset some of the costs of ski trail grooming in state parks. The current ski account funding for state park grooming only pays for a portion of the actual expenses. State park ski trails are subsidized by other funding sources.

Proposal:

This proposal is to increase the ski pass fees as identified in the table below. When comparing user fees for other ski trails in Minnesota, the state ski pass is currently priced much lower than other similar passes. For example, current ski pass rates for Three Rivers Park District are \$9 for a daily pass and \$75 for an all park annual pass, almost 4 times the current annual price of the state ski pass. Minneapolis ski trail passes on natural snow trails are priced at \$8 for a daily pass and \$50 for an annual pass.

Ski Pass Rates	Current	Proposed
Daily	\$5	\$9
Annual	\$19	\$24
Three-Year	\$54	\$69

The increased funding will support grooming operations at Minnesota state parks and trails as well as more GIA funding to local communities for local ski trails. This proposal increases the appropriation from the ski account to the DNR for grooming by \$35,000, and the agency would correspondingly increase GIA funding by \$35,000 through existing statutory authority. DNR will work with MNSA for input in how to allocate additional GIA funding.

Equity and Inclusion:

This proposal provides funding for outstanding outdoor recreation opportunities at modest prices. Minnesota has a rich tradition of creating open or low-cost access to public lands and recreation opportunities, and DNR wants to ensure that this tradition continues. Reasonable increases to user fees are needed on a periodic basis to keep pace with inflation and rising costs. It is possible that some people experiencing economic disparities would be impacted by raising ski pass fees; however, we believe that these prices are reasonable given the high-quality services of groomed trails in many communities across the state.

IT Related Proposals:

This proposal does not have an IT component.

Results:

This proposal to increase the ski pass appropriation to DNR is needed to support state parks and trails grooming operations. While this increase would only be a small portion of the greater costs of state park and trail grooming supported by the General Fund, it will have a positive on-the-ground impact to cross-country skiers and will help ensure that the DNR is able to continue to provide grooming at 22 locations across Minnesota.

This proposal will also increase funding available for the GIA ski program, increasing funds for grooming trips on existing trails as well as the potential to add trails into the GIA system. DNR will work with MNSA on how to best allocate additional funding for GIA.

Type of Measure	Name of Measure	Previous	Current	Dates
Quantity	Number of state parks and trails that DNR is providing ski trail grooming.	22	22	FY17-18
Quantity	Number of GIA grants to local communities.	40	40	FY17-18

Statutory Change(s):

Minnesota Statutes, section 85.42

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Appropriation Increase for ATV and ORV Accounts

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Other Funds				
Expenditures (ATV)	925	925	925	925
Expenditures (ORV)	525	525	525	525
Net Fiscal Impact = (Expenditures – Revenues)	1,450	1,450	1,450	1,450
FTEs	4.4	4.4	4.4	4.4

Recommendation:

The Governor recommends an increased investment of \$1.45 million annually to advance high-quality and well-maintained all-terrain vehicle (ATV) trails and off-road vehicles (ORV) trails and touring routes, provide needed enforcement, and enhance opportunities for grant-in-aid (GIA) trails. This funding comes from the ATV and ORV accounts in the Natural Resources Fund and provides increased resources to the Department of Natural Resources (DNR) and local governments' management of trails used by owners of ATVs and ORVs in Minnesota.

Rationale/Background:

ATV Account: The 2017 Legislature approved an ATV registration fee increase, but did not include a base appropriation increase. Now, with a stable ATV fund, DNR and the All-terrain Vehicle Association of Minnesota (ATVAM) have discussed an appropriation increase in the FY20-21 biennium that addresses critical priorities for Minnesota's ATV trail system. This proposal funds grants-in-aid, needed DNR ATV trail work, and ATV enforcement.

Local governments and volunteer clubs have created significant new demand on the ATV GIA program for new trails and existing trail improvements. This proposal helps provide needed funding to the GIA program for high-priority trail projects. In addition, there are critical needs for operating and maintaining the high-quality ATV trail system provided by the DNR, and this proposal provides important funding for existing and new ATV trails in state forests, on state trails, and in state recreation areas. DNR also provides important GIA trail support through its roving crew and heavy equipment operations. New trail opportunities also require increased enforcement funding. The DNR will continue to work with ATVAM and other stakeholders on trail priorities to use funds strategically and thoughtfully statewide. The ATV account is healthy and can sustain this added spending.

ORV Account: In past legislative sessions, the Minnesota 4-Wheel Drive Association (Mn4WDA) received appropriations to develop adventure-touring routes in Minnesota. DNR and Mn4WDA have discussed the need for an appropriation increase to ensure effective implementation of its signature touring route (the "Border to Border"); existing and new state forest trails; and a statewide ORV System Plan. This proposal advances these ORV trails and touring routes, and includes a \$200,000 maintenance fund for the Border to Border touring route. DNR will continue to work with Mn4WDA and stakeholders on using funds strategically and thoughtfully statewide. The ORV account has a positive fund balance and can sustain this additional spending.

Proposal:

This proposal provides critically needed funding to the ATV and ORV programs in Minnesota, advancing high-quality and well-maintained ATV trails and ORV trails and touring routes, provide needed enforcement, and enhance opportunities for GIA trails. The proposal includes increases to ATV GIA by \$300,000 each year; increases to DNR ATV and ORV trail management funding by \$500,000 and \$400,000, respectively; and increases to ATV and ORV enforcement funding by \$125,000 and \$125,000, respectively.

- **Grants** – The Parks and Trails (PAT) Division provides GIA funding to local government sponsors for about 70 trail projects across the state each year. These grants support local clubs for maintenance, development, and acquisition of public, locally managed ATV trails. Local communities have indicated that more funding is needed (and expected since the registration fees were increased).
- **Trail management** – The PAT Division provides more than 1,050 miles of trails in state forests, on DNR trails, and at the Iron Range OHV State Recreation Area. Trail work is critical to ensure high-quality, sustainable trail riding and protection of adjacent surface water quality. This work will provide greater opportunity, flexibility, range of difficulty levels, and longer trip lengths for ATV riders. Adding State Forest trails is progressing, but current funding levels make adding new trail while also supporting GIA work problematic due to significant existing trail maintenance needs and limits on crew staff time. DNR is also expanding the Iron Range OHV State Recreation Area, which requires a significant investment. This proposal funds 3 FTEs each year for trail management.
- **Enforcement** – The Enforcement (ENF) Division provides about 23,000 hours of enforcement, education, and safety training activities around the state, including recruiting and training volunteers for the ATV safety and trail ambassador programs. The ENF Division also provides about 50 grants to local law enforcement agencies for ATV law enforcement and educational activities relating to ATV use. This proposal funds 1.4 FTEs each year for enforcement.

Equity and Inclusion:

This proposal funds programs that provide outstanding outdoor recreation opportunities at modest prices – either comparable or better than many neighboring states. This proposal allows DNR to continue to provide programs, upgrade facilities to Americans with Disabilities Act (ADA) design standards, and reach out to diverse and underserved communities. Without this funding, our ability to maintain these important recreation resources will impact trail users. This proposal allows us to continue to provide safe and enjoyable motorized trail recreation experiences for all Minnesotans and visitors to our state.

IT Related Proposals:

This proposal does not include an IT component.

Results:

The ATV and ORV accounts support diverse programs around the state for high-quality riding opportunities and well-maintained trails. Results include:

- Miles of high-quality state forest trails open to the public for ATV riding and ORV driving.
- Grants-in-aid (GIA) to assist local governments to develop and maintain locally managed trails.
- Maps to help people be aware of OHV riding opportunities.
- Trail ambassador program that help steward these activities and the lands on which they occur.
- Enforcement activities and hours; education and safety training activities.

Statutory Change(s):

This proposal does not include any statute changes.

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Angler Surveys to Inform Fisheries Management

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Game and Fish				
Expenditures	278	532	532	532
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	278	532	532	532
FTEs	2.7	5.3	5.3	5.3

Recommendation:

The Governor recommends \$278,000 in FY20 and \$532,000 thereafter to increase angler survey capacity beyond the state's 10 large lakes (e.g., Mille Lacs, Lake of the Woods) to collect angler data from other major recreational fishing lakes and special regulation lakes. Increased angler survey capacity was an important factor in constituent support for the 2017 license fee initiatives. This initiative proposes eight new angler surveys per year funded by the Game and Fish Fund.

The change represents less than a 1 percent increase to the annual budget of the Division of Fish and Wildlife.

Rationale/Background:

Angler survey information is critical for tracking trends in fishing pressure, angler catch, harvest, and angler attitudes and preferences. The data are also critical for monitoring the effectiveness of special and statewide angling regulations, including the new northern pike zones. Recent examples where angler survey data were used to propose changes in fishing regulations include Lake of the Woods (expanding winter angling pressure resulted in sauger harvest above management objectives) and Leech Lake (angler harvest is low enough to allow additional harvest opportunities).

Proposal:

The DNR completes six to eight angler surveys each year, primarily on our large lakes where harvest data are paramount to managing fisheries sustainably. This proposal will add eight additional surveys per year to the existing schedule. Lakes will be selected across the state based on management need of new angler information (e.g., Pelican Lake, Otter Tail County; Chisago Lake, Chisago County). Angler surveys typically start in April or May, and continue through September (when fishing effort declines), and can include a winter angler survey as well (December-February). Angler surveys funded in this proposal would start in the spring of 2020 and continue annually.

This work will require 2.7 FTE in FY20 and 5.3 FTE thereafter. We estimate an FTE rate of \$90,000 per year for salary and benefits plus an additional \$55,000 for other expenditures such as fleet services, data entry tablets, and MNIT service costs. These same costs are slightly less in the first year (\$35,000) because we will not be fully implemented until the second year.

Equity and Inclusion:

This proposal will not impact and is not submitted to reduce or eliminate any disparities for racial and ethnic groups, lesbian, gay, bisexual and transgender people, persons with disabilities, or veterans. We anticipate no impacts (positive or negative) on these groups.

IT Related Proposals:

This proposal includes the purchase and maintenance of 8 tablets at a monthly enterprise service rate of \$100, totaling \$10,000 per year and ongoing IT costs of \$5,000 per year for software/database management and maintenance services.

<i>Category</i>	<i>FY 2020</i>	<i>FY 2021</i>	<i>FY 2022</i>	<i>FY 2023</i>	<i>FY 2024</i>	<i>FY 2025</i>
Payroll						
Professional/Technical Contracts						
Infrastructure						
Hardware						
Software

Enterprise Services	15	15	15	15	15	15
Staff costs (MNIT or agency)						
Total	15	15	15	15	15	15
MNIT FTEs						
Agency FTEs						

Results:

This initiative will restore angler survey capacity, doubling the current number of surveys completed. The new survey information will guide management decisions, ultimately maintaining the state's excellent fisheries. Information will be shared with anglers and stakeholders, including resort owners and local officials.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Creel surveys completed	16	8	2010-2018

Statutory Change(s):

NA

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Authorize Strategic Land Sales

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	(8)	(8)	(8)	(8)
Revenues	174	0	0	232
Net Fiscal Impact = (Expenditures – Revenues)	166	(8)	(8)	224
FTEs	0	0	0	0

Recommendation:

The Governor recommends undertaking specific land sales that require legal authorization. Proceeds from the land sales will be deposited in the Land Acquisition Account in the Natural Resources Fund to be reinvested in other lands that meet the Department of Natural Resources' (DNR) natural resource management goals. The proposal also provides for an amendment to Minnesota Statutes, section 94.10, subdivision 2 that will eliminate the newspaper publication requirement for public land sales.

The Division of Lands and Minerals' annual budget is approximately \$13 million. The land sales provisions and proposed statute amendment will impact the DNR's Land Acquisition Account in the Natural Resources Fund, which is used by all DNR divisions.

Rationale/Background:

When the DNR decides to sell land it no longer needs for natural resource management purposes and the land is riparian or the DNR wishes to sell the land to a specific individual or entity, the proposal must first be reviewed and approved by the legislature. Specific sales authorized by this proposal are:

- A private sale of riparian land, Carlton County
- A public sale of riparian land, Lot 7, Block 1, Dells Sleepy Hollow, Cass County
- A public sale of riparian land, Kanabec County
- A public sale of riparian land, Big Pine Lake Public Water Access, Otter Tail County
- A public sale of riparian land, Wabasha County

Minnesota Statutes, section 94.10, subdivision 2 requires publication, at least 30 days before a public land sale, in a newspaper of general distribution in the county in which the parcel for sale is located. The DNR already advertises its land sales on its website and in other publications and also has a GovDelivery list with over 34,000 recipients who receive notices of proposed land sales. Accordingly, newspaper publication is not needed. Elimination of the newspaper publication requirement will reduce staff time and costs for land sales.

Proposal:

The land sale provisions in the proposal are part of the DNR's ongoing Sales and Reinvestment Initiative under the umbrella of Strategic Land Asset Management (SLAM), which seeks to improve the DNR's lands portfolio. Enactment of the proposal will enable the DNR to complete certain land sale transactions, for which it would otherwise lack authority. Elimination of the newspaper publication requirement for public land sales will streamline the sale process and reduce costs.

Land sales authorized by the legislature are expected to generate revenue to the land acquisition account. The total revenue estimate from sales of the five parcels is \$406,000. It is expected that sales of the Carlton, Otter Tail, Kanabec and Wabasha County parcels, which have a total estimated value of \$174,000, will occur in FY2020. The Cass County parcel is not expected to be put up for public sale earlier than FY2023, as federal deed restrictions will first need to be removed from the parcel. It is not known whether DNR's efforts to sell the parcels after receiving legislative authority to do so will be successful.

Equity and Inclusion:

This proposal is neutral as to economic and inclusion disparities, with no positive or negative impacts on the identified groups. It will not reduce or eliminate any disparities.

IT Related Proposals:

Not applicable.

Results:

This is not a program.

Statutory Change(s):

Minnesota Statutes, section 94.10, subdivision 2

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Fish and Wildlife Dedicated Deer License Revenue

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Other Funds (Game and Fish (GFF) Accounts)				
Expenditures (GFF Operations)	(7,146)	(7,146)	(7,146)	(7,146)
Expenditures (GFF Deer Habitat)	7,146	7,146	7,146	7,146
Revenues (GFF Operations)	(7,146)	(7,146)	(7,146)	(7,146)
Revenues (GFF Deer Habitat)	7,146	7,146	7,146	7,146
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends dedicating \$16 from deer hunting licenses to deer management activities including deer research, monitoring, and hunting. Although Department of Natural Resources (DNR) spends more on deer management activities, currently only \$2 from these licenses is dedicated to specific deer management accounts. This proposal reduces the revenues in the Game and Fish Operations Account and moves the revenue and corresponding spending to the Deer Habitat Account—both estimated at \$7.146 million annually.

Rationale/Background:

Current law distributes revenue from deer hunting licenses across a variety of accounts—each of which has a designated purpose outlined in law. As an example, law instructs the DNR to deposit \$30 from a \$34 adult resident deer license to the Game and Fish Operations account. The legislature appropriates money from this account for a variety of natural resources purposes most notably fish and wildlife management. The DNR also uses this account to fund the electronic licensing system that supports online and vendor-based license purchases.

Current law dedicates the remaining \$4 to four different purposes including managing deer habitat (\$2), managing deer and bear (\$1), emergency deer feeding and wild cervid health (50 cents) and wolf management (50 cents). See table below.

Where Revenue is Deposited	How much	How Dollars are Spent/How We get spending Authority
Game and Fish Operations Account	\$30.00	Direct-Appropriated for fish and wildlife, natural resources law enforcement, ecological/waters, and recreation activities
Deer Habitat Account	\$2.00	Statutorily-dedicated to Deer-focused activities
Deer/Bear Management Account	\$1.00	Statutorily-dedicated to Deer and Bear Activities
Emergency Deer Feeding and Wild Cervid Health Account	\$0.50	Statutorily-dedicated to Deer Activities
Wolf Management Account	\$0.50	Statutorily-dedicated to Wolf Management
Total Revenue	\$34.00	

The DNR spends a significant portion of the appropriation in the Game and Fish Operations Account on deer-focused activities including deer research, monitoring, hunting, and management activities. During recent conversations with stakeholders regarding DNR's Deer Management Plan, stakeholders articulated a strong preference for increased transparency regarding how much of the budget is specifically dedicated to deer

activities. Because DNR is committed to deer and deer management, the agency agreed to dedicate a higher portion of certain deer licenses to an already-existing account dedicated to spending on deer.

Proposal:

Consistent with the Deer Management Plan recommendations, this proposal dedicates \$16 from deer hunting license to deer management activities. This reflects a \$14 increase in dedicated revenue to the Deer Habitat Account, which equates to \$7.146 million annually. License types impacted by this proposal include adult resident, non-resident, and sports deer licenses.

The table below shows how the proposal impacts a \$34 adult resident deer license.

Where Revenue is Deposited	How much	How Dollars are Spent/How We get spending Authority
Game and Fish Operations Account	\$16.00	Direct-Appropriated for fish and wildlife, natural resources law enforcement, ecological/waters, and recreation activities
Deer Habitat Account	\$16.00	<i>Statutorily-dedicated to Deer-focused activities</i>
Deer/Bear Management Account	\$1.00	Statutorily-dedicated to Deer and Bear Activities
Emergency Deer Feeding and Wild Cervid Health Account	\$0.50	Statutorily-dedicated to Deer Activities
Wolf Management Account	\$0.50	Statutorily-dedicated to Wolf Management
Total Revenue	\$34.00	

Implementing this change requires reducing DNR's direct appropriation in the GFF Operations Account. The table at the top of this first page shows reduced revenues and expenditures in the GFF Operations Accounts of \$7.146 million each year and increased dedicated revenues and expenditures in the Deer Habitat Account of the same amount. Spending the in Deer Habitat Account focuses on deer research, monitoring, hunting, and management activities. This proposal also makes supporting the electronic license system an eligible use of the Deer Habitat Account.

Because this proposal shifts revenue and spending between funds, it is budget neutral. Although the DNR already uses these dollars on deer-focused activities, this change increases fiscal transparency outside of the agency.

Equity and Inclusion:

This proposed policy change will not impact and is not submitted to reduce or eliminate any disparities for racial and ethnic groups, lesbian, gay, bisexual and transgender people, persons with disabilities, or veterans. We anticipate no impacts (positive or negative) on these groups.

IT Related Proposals:

This proposal does not have an IT related component.

Results:

By adjusting the deer license revenue distribution, this change will improve transparency regarding the use of deer license dollars, providing assurance that DNR will continue to spend at least \$16 of revenue from each deer license on deer-related management expenditures.

Type of Measure	Name of Measure	Previous	Proposed	Dates
Results	Dollars spent out of accounts dedicated to deer activities	\$1.3M	\$8.6M	FY18

Statutory Change(s):

M.S. 97A.075(b) Use of License Revenues

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Protecting Special Forest Products

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	2	2	2	2
Revenues	2	2	2	2
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends expanding the current commercial dealer's license requirements for purchasing harvested balsam boughs to include other high demand forest products, such as spruce tops and birch poles. This will result in a small revenue increase to an existing dedicated Department of Natural Resources Forestry Account to support education on sustainable harvest of special forest products for harvesters and dealers. This proposal has less than one percent impact on DNR Forestry's budget.

Rationale/Background:

Public interest in decorative forest materials has increased. Many Minnesotans purchase balsam boughs, spruce tops, and birch poles for winter decorations from craft and landscape retailers statewide. Birch poles are also a popular wedding decoration. There has been an increase of illegal birch pole and spruce top harvesting and recent news reports have highlighted illegal birch pole harvesting, and its connection to other illegal activity.

The proposal expands the existing commercial dealer's license requirement for balsam boughs by creating a general decorative materials dealer's license to be required by product by the DNR Commissioner when there is concern about sustainability, illegal harvest, or if there is need to track the origin of harvested special forest products. Current examples include spruce top and birch pole harvesting. The dealer's license will require dealers to track from whom they buy products, the amount harvested, and where it was harvested. These changes are designed to eliminate outlets for illegally harvested materials and support enforcement efforts.

Special forest products include most items found growing in our state forests other than firewood, pulpwood, and sawtimber. Examples of commonly harvested special forest products are birch bark, spruce tops, birch poles, and balsam boughs.

The dealer's license is already in place for balsam boughs. This expansion addresses known harvest concerns with spruce tops and birch poles, as well as future harvest concerns that may develop for other special forest products.

Proposal:

Minnesota Statute 88.6435 requires persons (dealers) buying harvested balsam boughs to obtain a permit (\$25) to buy more than 100 pounds of cut boughs. Additionally, the existing law requires these dealers to record the name and address of the person who harvested the boughs and the location where they were harvested. This record aids law enforcement in tracking the movement of illegally harvested balsam boughs and serves as a deterrent to illegal harvesters. License proceeds go into a dedicated DNR Forestry account to support education on sustainable harvest of special forest products for harvesters and dealers.

This proposal expands the same concepts from existing balsam bough laws to address current harvest concerns with spruce tops and birch poles, as well as future harvest concerns that may develop for other special forest products as markets change.

This proposal provides an additional \$1,700 annually through expanded dealer's license sales to the dedicated education account for special forest products. At this time, we estimate an additional 70 dealer's licenses will be sold annually (\$25 per license) for spruce tops and birch poles. If additional special forest products warrant a dealer's license in the future, revenue will increase accordingly.

Equity and Inclusion:

This proposal will not impact and is not submitted to reduce or eliminate any disparities for racial and ethnic groups, lesbian, gay, bisexual and transgender people, persons with disabilities, or veterans. We anticipate no impacts (positive or negative) on these groups.

Results:

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>FY18</i>	<i>FY2020</i>
Results	Decrease illegal harvest of special forest products through monitoring dealer's licenses.	40 – 60 dealer's licenses annually for balsam bough only.	50 dealer's licenses for balsam bough only.	120 licenses for balsam boughs, spruce tops, and birch poles.

Statutory Change(s):

Minnesota Statutes, section 88.641-648 and section 90.195

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: State Trail Special Event Account

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	5	5	5	5
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	5	5	5	5
FTEs	0	0	0	0

Recommendation:

The Governor recommends establishing statutory spending authority for the State Trail Special Event Account (Fund 2117). This account was set up to collect revenue from trail-associated special use permit fees. On average, this account generates about \$5,000 per year from events such as the John Beargrease Sled Dog Marathon event.

Rationale/Background:

During the 2017 legislative session, the Department of Natural Resources (DNR) received authority to deposit funds from trail-related special use permits into this fund instead of depositing them into the General Fund. However, the authority to spend from that account was mistakenly not included in that authority. As a result, the DNR has been forced to use other funds to repair and maintain the trails used for special events. The authority to spend these dollars will ensure repairs are made timely following such events.

Proposal:

This proposal adds statutory spending authority to the existing state trail special event account. The DNR will use the funds to pay for staff salaries, supplies, repair, and maintenance of the trails used by the special events. For example, a winter fat bike race on a state trail would need to have snow packed prior to the event and smoothed over afterwards. This proposal is intended to be effective beginning in FY20.

Equity and Inclusion:

This change will only affect those individuals that work with the DNR on special events. It has no specific implications, positive or negative, for under-represented communities.

IT Related Proposals:

This proposal does not include an IT component.

Results:

This proposal will allow DNR to use special event revenue to support the maintenance of the state trails, primarily to remediate any impact from these special events.

Statutory Change(s):

Minnesota Statutes, section 85.47

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Ice Safety Program

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	176	176	176	176
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	176	176	176	176
FTEs	1.2	1.2	1.2	1.2

Recommendation:

The Governor recommends \$176,000 annually from the Game and Fish Fund to create a comprehensive outreach and education program focused on ice safety. The program will target traditional users of frozen waters – such as ice anglers, snowmobile riders, and cross-country skiers – and, as importantly, educate people who aren't familiar with frozen water but live in communities where it may be a risk.

Rationale/Background:

This program will focus on two equally important segments of people: traditional users of frozen waters, and people who live in communities where frozen waters are a risk to adults and children who are uneducated about the potential dangers.

People in Minnesota recreate out-of-doors throughout the year, and in many areas winter recreation is an important economic driver. As the department's focus on outdoor recreation safety moves closer to a statewide culture of safety, this initiative will create an Ice Safety Program in the Enforcement Division that encompasses the variety of ways people recreate on the ice – ice camping, ice fishing, skating, skiing and snowmobiling, among others – and the variety of places they do it.

During the past five ice seasons, there have been an average of three ice-related fatalities each year. While that is below the 25-year average of about five ice-related fatalities per season (and well below the number in the 1970s and early 1980s – the early years of ice safety education – when it was common to see as many as 20 or more ice-related fatalities in a single season), it still is too high. The program also will focus on the dangers that go along with recreating on the ice, such as the risk of carbon monoxide poisoning in heated shelters and the increase in litter and waste streams associated with the growing number of people who set their "wheel houses" atop the ice and use them as de facto campsites.

While Minnesota is home to 10,000 lakes that attract people and their fish houses by the hundreds of thousands each winter, there also are large numbers of creeks, ponds, retention ponds and rivers that pose a risk to people who are uneducated about ice and ice safety. This program can build and strengthen relationships with non-users of Minnesota's frozen waters who live in communities or neighborhoods where creeks, wetlands, or retention ponds pose a risk to curious children and adults who may be tempted to venture onto these waters when they appear to be frozen.

Thanks to Minnesota's location and reputation for embracing the "Bold North," other states and national media (i.e. The Weather Channel) look to the Department of Natural Resources (DNR) as ice safety experts. Each year, the DNR receives multiple requests for ice safety information, laws, and search and rescue best practices.

Proposal:

The Ice Safety Program will revive a targeted department program that has not been funded in recent years. The program will incorporate the historical outreach of the old program, be updated to build in the continuing evolution of frozen-water recreation, and add important new outreach and education efforts aimed at non-users of frozen water. The program also will include education and outreach aimed at reducing the risks associated with carbon monoxide poisoning, which has resulted in fatalities in fish houses in each of the past two ice seasons. Currently, there is minimal education around the dangers of carbon monoxide poisoning in fish houses.

This proposal pays for one FTE to run the Ice Safety Program (\$118,000), a portion of that FTE's supervision (\$35,000), and a small operating budget (\$23,000) for the purchase of media and related education and outreach materials. Among the materials likely to be created for the Ice Safety Program are public service announcements, brochures and safety cards. As an example, creating and printing 20,000 brochures costs about \$2,500. Media buys for communications such as TV and radio ads are likely as well. Ongoing radio ads cost about \$4,000 for two months, while online and TV public service announcements cost about \$9,000 for the same time period.

Equity and Inclusion:

Minnesota's population has become as diverse as its natural resources. Some of the new and immigrating citizens – which include first- and second-generation families – come from parts of the world where frozen waters are not as common. These people may not have the same affinity for frozen-water recreation as people who have grown up around the ice, but they may live in areas where creeks, water retention ponds or wetlands exist. These types of waters pose a risk to people who are not educated in the dangers of frozen water and who do not have the experience to assess whether frozen waters are safe for recreation.

While the primary goal of the program is to educate people about ice safety, it also may help reduce a barrier to recruiting new users to engage with our natural resources and serve as a pathway by which people learn to safely enjoy frozen-water recreational opportunities such as ice fishing, skiing and skating.

IT Related Proposals:

This proposal does not include an IT component.

Results:

Building outreach, educational resources and relationships with traditional users and non-users of frozen waters. Working proactively to prevent a tragedy that involves someone who does not fully understand the risks associated with being on frozen water. Removing a barrier to participation by providing a better understanding of ice safety to those who are unfamiliar with frozen water and the recreational opportunities it provides.

Statutory Change(s):

This proposal does not require any statutory changes.

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund – Aquifer Monitoring for Water Supply Planning

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	2,325	2,325	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,325	2,325	0	0
FTEs	16.9	16.9	0	0

Recommendation:

The Governor recommends \$4.65 million from the Clean Water Fund for collecting and analyzing aquifer level data and groundwater flow dynamics, developing groundwater models, and working with stakeholders to address sustainability management and planning through groundwater management areas and other forums.

This funding will support 16.9 FTEs (plus contracts with outside vendors) to contribute to a long-term partnership of Minnesota's executive branch water agencies, which include the Department of Agriculture, Department of Health, Minnesota Pollution Control Agency, Board of Water and Soil Resources, Department of Natural Resources (DNR), and local governments to fix and prevent water pollution problems and prevent groundwater overuse.

Rationale/Background:

The Clean Water Fund is treated as a new initiative each biennium. The Clean Water Council and the executive branch agencies agree that we need to fund long-term programs to address water quality and quantity issues. The Clean Water Fund supports about 78 FTEs at the DNR working on data gathering and analysis, technical support for project implementation, and tools to help local partners target water sustainability, restoration and improvement efforts. The DNR partners with Minnesota's water agencies and local governments to fix and prevent water pollution problems and prevent groundwater overuse.

Agencies and local governments use the resulting information to prevent waters from becoming impaired, restore impaired waters, and protect long-term water supplies from overuse and contamination. The ultimate goal is that Minnesotans have water of sufficient quality and quantity to meet their needs. The Clean Water Fund performance report describes the efforts that state agencies are using to improve and protect water quality and supply using identified performance measures.

In Minnesota, growth in demand for water resources is outpacing population growth. As water use increases, planning for adequate water supply is crucial to preventing water shortages and protecting lakes, streams, and wetlands - especially sensitive groundwater dependent trout streams and calcareous fens.

Because groundwater is below the ground surface, we need long-term data collection from groundwater observation wells to understand trends in groundwater levels. We then relate the trend data to precipitation, land use changes, groundwater use, to evaluate if that use is sustainable over time. Long-term data sets are essential to understanding and properly managing this valuable resource. The DNR leads statewide efforts with water level monitoring, groundwater modeling, education, and data analysis for water supply planning and permitting.

Proposal:

This proposal provides funding for the DNR to continue 1) developing and maintaining a statewide network of groundwater level observation wells, 2) automating data collection and long term data management with enhanced technology, 3) completing analyses and modeling to inform economic development, infrastructure investment, efficiency efforts and permit decisions, and 4) working with stakeholders to ensure groundwater is managed sustainably, including helping small communities to develop water supply plans and educational workshops.

Equity and Inclusion:

Implementation of this change item will help ensure water of sufficient quality and quantity for all Minnesotans and enhance the ability of all Minnesotans to safely fish, swim, and participate in other water recreation activities.

Results:

This proposal will provide funding to add and manage monitoring wells, to develop groundwater models, and to engage stakeholders in long-term water supply planning and protection.

The DNR's aquifer monitoring efforts include partnerships with other state agencies, Soil and Water Conservation Districts, and municipal water suppliers. We have 1,070 active monitoring wells and we are adding about 25-50 new monitoring sites per year, with a long-term goal of about 7,000 wells throughout the state. We analyze water level trends in aquifers where there are at least 20 years of data, as of 2016, 341 sites have now reached the minimum 20 years of record for trend analysis (Figure 1).

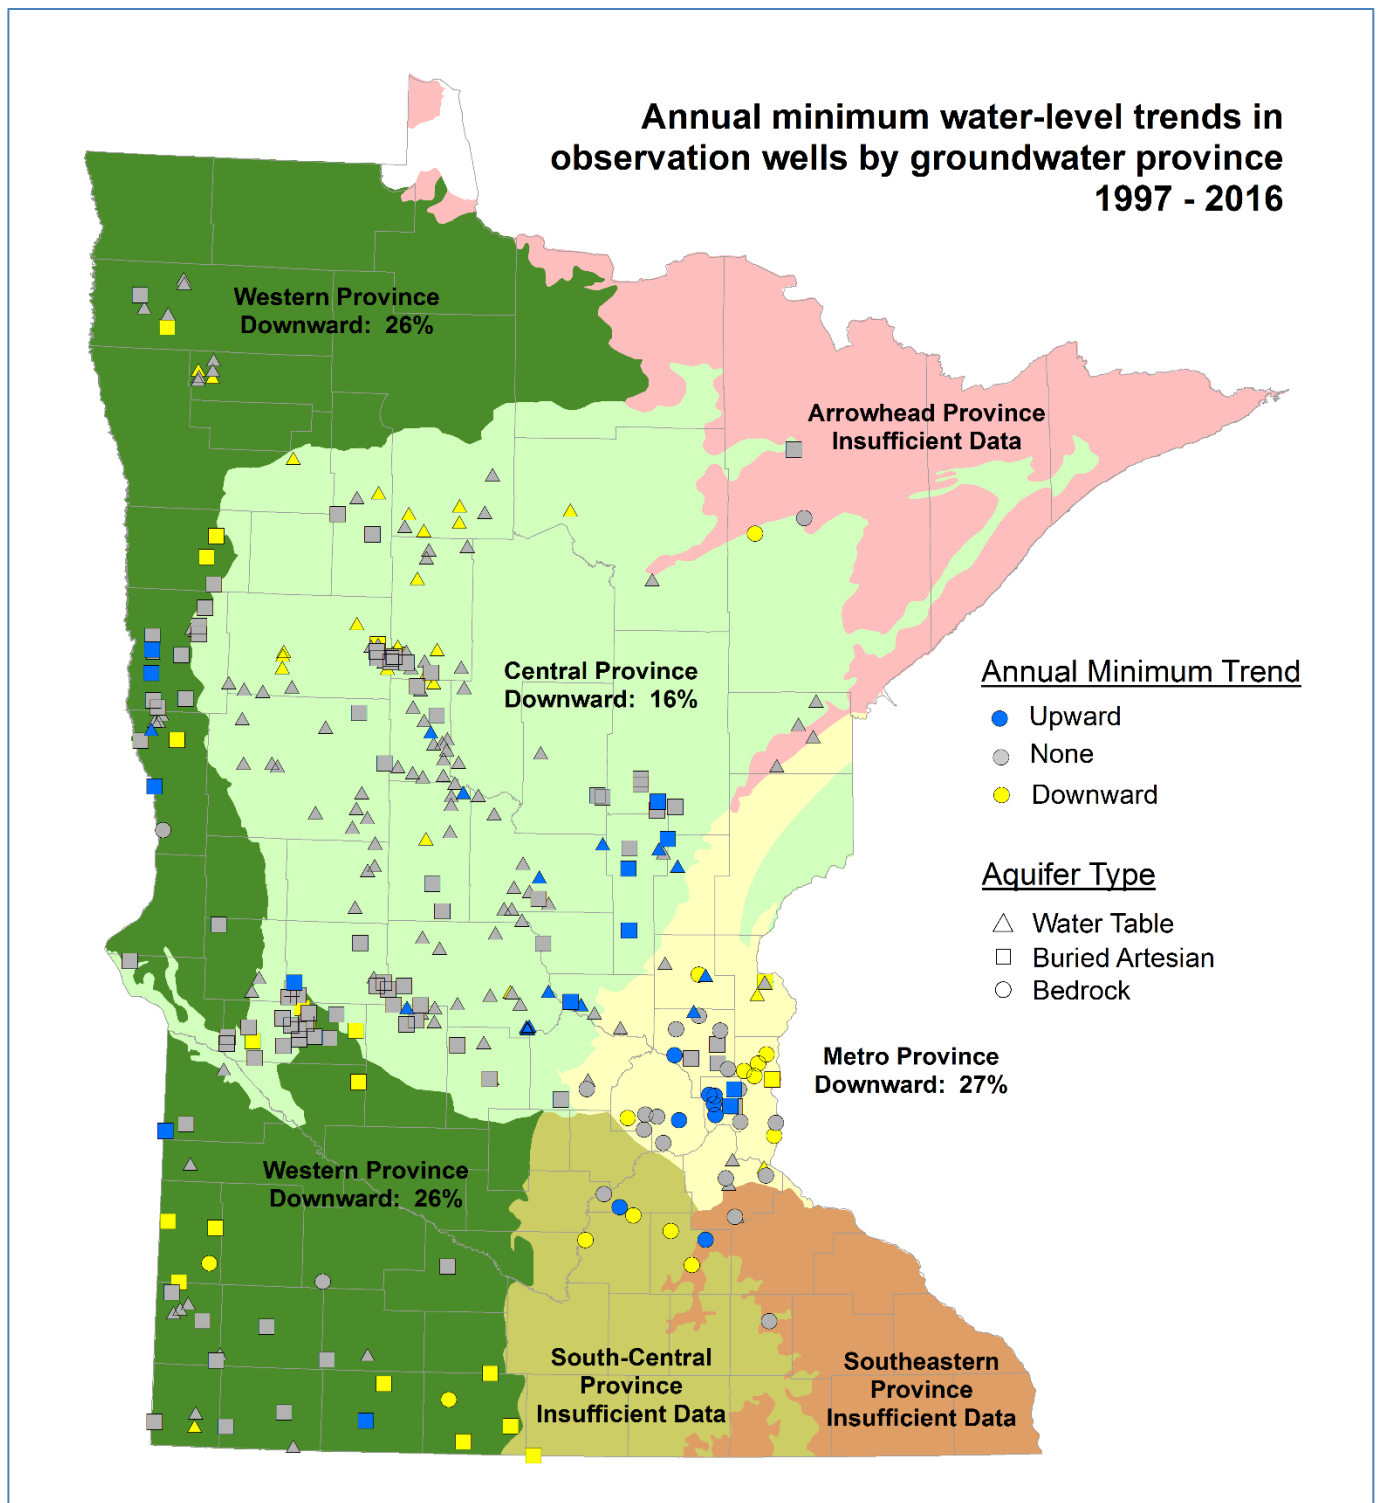

Figure 1 Statewide map showing water level trends for aquifers with monitoring data with at least 20 years of data. Percentage downward is aggregated by groundwater province.

Statutory Change(s):

No statutory changes will be needed.

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund – Buffer Map Maintenance

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	100	100	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	100	100	0	0
FTEs	0.5	0.5	0	0

Recommendation:

The Governor recommends \$200,000 from the Clean Water Fund for updating and maintaining maps of public waters and ditch systems that require permanent vegetation buffers.

This funding supports 0.5 staff plus contracts and other activity costs to contribute to a long-term partnership of Minnesota's executive branch water agencies and local governments to fix and prevent water pollution problems.

Rationale/Background:

The Clean Water Fund is treated as a new initiative each biennium. The Clean Water Council and the executive branch agencies agree that we need to fund long-term programs to address water quality and quantity issues. The Clean Water Fund supports about 78 FTEs at the Department of Natural Resources (DNR) working on data gathering and analysis, technical support for project implementation, and tools to help local partners target water sustainability, restoration and improvement efforts. The DNR partners with Minnesota's water agencies and local governments to fix and prevent water pollution problems and prevent groundwater overuse.

Agencies and local governments use the resulting information to prevent waters from becoming impaired, restore impaired waters, and protect long-term water supplies from overuse and contamination. The ultimate goal is that Minnesotans have water of sufficient quality and quantity to meet their needs. The Clean Water Fund performance report describes the efforts that state agencies are using to improve and protect water quality and supply using identified performance measures.

Proposal:

The DNR will update, maintain and periodically publish updated maps of public waters and public ditches that require permanent vegetation buffers. This proposal is part of a long term, collaborative effort that will lead to cleaner water through establishment and maintenance of buffers. The Minnesota Board of Water and Soil Resources and local Soil and Water Conservation Districts lead the buffer implementation efforts.

Equity and Inclusion:

Implementation of this change item will help ensure water of sufficient quality and quantity for all Minnesotans and enhance the ability of all Minnesotans to safely fish, swim, and participate in other water recreation activities.

Results:

Minnesota will have updated and publicly accessible maps identifying where buffers are required.

Statutory Change(s):

No statutory changes will be needed.

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund – Color Infrared Imagery Analysis

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	325	325	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	325	325	0	0
FTEs	0.5	0.5	0	0

Recommendation:

The Governor recommends \$650,000 from the Clean Water Fund for collecting color infrared imagery for determining perennial cover statewide. This effort would collect approximately one-fifth of the state each year, resulting in an updated data set every five years.

This funding will support 0.5 staff (plus contracts with outside vendors) to contribute to a long-term partnership of Minnesota's executive branch water agencies and local governments to fix and prevent water pollution problems and prevent groundwater over-use.

Rationale/Background:

The Clean Water Fund is treated as a new initiative each biennium. The Clean Water Council and the executive branch agencies agree that we need to fund long-term programs to address water quality and quantity issues. The Clean Water Fund supports about 78 FTEs at the Department of Natural Resources (DNR) working on data gathering and analysis, technical support for project implementation, and tools to help local partners target water sustainability, restoration and improvement efforts. The DNR partners with Minnesota's water agencies and local governments to fix and prevent water pollution problems and prevent groundwater overuse.

Agencies and local governments use the resulting information to prevent waters from becoming impaired, restore impaired waters, and protect long-term water supplies from overuse and contamination. The ultimate goal is that Minnesotans have water of sufficient quality and quantity to meet their needs. The Clean Water Fund performance report describes the efforts that state agencies are using to improve and protect water quality and supply using identified performance measures.

Proposal:

This proposal is part of a long-term, collaborative effort that will lead to cleaner water through targeted implementation projects and programs. The objective of this program is to provide information to local units of government (LGUs) regarding the coverage of perennial vegetation within riparian buffer zones on an ongoing five-year cycle. This information will support LGUs in their assessment of compliance with the requirements of the state's buffer program. Remote sensing imagery is one of the most in demand spatial data sources. A systematic statewide effort is the most cost-effective way to gather and manage this information.

Imagery would be acquired through a competitive bid process. We propose to acquire 0.5-meter resolution, map-ready aerial imagery over a four year period with one additional year for potential mop-up acquisition for imagery that can't be acquired due to weather issues. This imagery would then be processed to compute a vegetation

index and the resulting product would be provided for both viewing and download through a web-based map application. Many public and private organizations are seeking this data for a wide array of natural resource and water management applications.

Equity and Inclusion:

Implementation of this change item will help ensure water of sufficient quality and quantity for all Minnesotans and enhance the ability of all Minnesotans to safely fish, swim, and participate in other water recreation activities.

Results:

A complete statewide assessment of perennial vegetation cover and the ability for local governments to efficiently determine compliance with state buffer laws. This program would provide a repeated, complete statewide assessment of perennial vegetation cover every five years.

Statutory Change(s):

No statutory changes will be needed.

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund – County Geologic Atlases

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	150	150	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	150	150	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$300,000 from the Clean Water Fund for working with Minnesota Geological Survey to accelerate and complete County Geologic Atlases that provide critical groundwater and geology information to local governments. This funding is used for contracts with outside vendors.

Rationale/Background:

The Clean Water Fund is treated as a new initiative each biennium. The Clean Water Council and the executive branch agencies agree that we need to fund long-term programs to address water quality and quantity issues. The Clean Water Fund supports about 78 FTEs at the Department of Natural Resources (DNR) working on data gathering and analysis, technical support for project implementation, and tools to help local partners target water sustainability, restoration and improvement efforts. The DNR partners with Minnesota's water agencies and local governments to fix and prevent water pollution problems and prevent groundwater overuse.

Agencies and local governments use the resulting information to prevent waters from becoming impaired, restore impaired waters, and protect long-term water supplies from overuse and contamination. The ultimate goal is that Minnesotans have water of sufficient quality and quantity to meet their needs. The Clean Water Fund performance report describes the efforts that state agencies are using to improve and protect water quality and supply using identified performance measures.

Proposal:

County Geologic Atlases provide information about the region's geology and groundwater: location and depth of aquifers, direction of water flow, pollution sensitivity, connections to surface waters, and other characteristics like natural quality and age of groundwater. This information is essential for local planning and environmental protection efforts. Water supply planning, source water protection and well sealing programs are examples of local programs that need this geologic and groundwater information. Other typical uses include providing information for permit applications, resource management, monitoring needs, and emergency response to contaminant releases.

The DNR works with the Minnesota Geological Survey (MGS) to develop County Geologic Atlases that convey geology and groundwater information and interpretations to government units at all levels, but particularly to local governments. The MGS focuses on geology (Part A reports) and DNR focuses on groundwater (Part B reports). Atlases are developed in response to requests by counties, who contribute money and data to the development of Part A reports.

MGS and DNR use this to improve the quality of County Geologic Atlases by collecting additional subsurface geologic samples, expanding the number of sites sampled for water chemistry, starting the process of installing a research well to collect stratified groundwater data from multiple aquifers, and purchasing and repairing equipment.

Equity and Inclusion:

Implementation of this change item will help ensure water of sufficient quality and quantity for all Minnesotans and enhance the ability of all Minnesotans to safely fish, swim, and participate in other water recreation activities.

Results:

The DNR in partnership with the Minnesota Geological Survey is annually completing about four geologic atlases throughout the state (Figure 1).

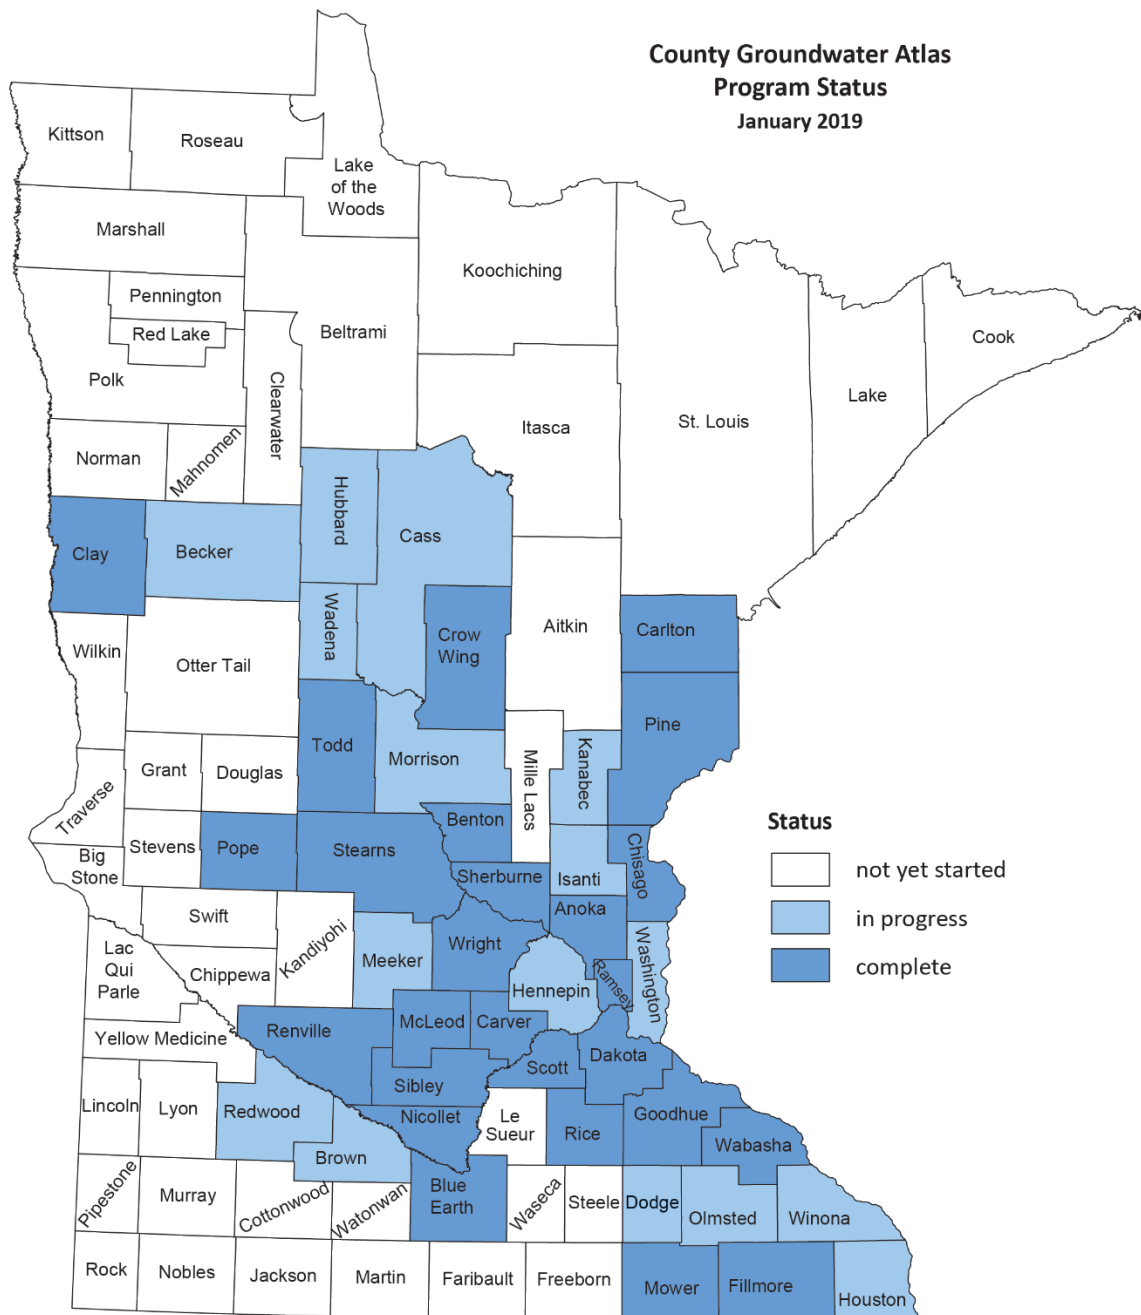

Figure 1 Statewide progress completing County Geologic Atlases.

Statutory Change(s):

No statutory changes will be needed.

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund – Fish Contamination Assessment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	135	135	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	135	135	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$270,000 from the Clean Water Fund for sampling mercury and other contaminants in fish to determine fish consumption advisories, impairment status, and monitor trends across the state.

Rationale/Background:

The Clean Water Fund is treated as a new initiative each biennium. The Clean Water Council and the executive branch agencies agree that we need to fund long-term programs to address water quality and quantity issues. The Clean Water Fund supports about 78 FTEs at the Department of Natural Resources (DNR) working on data gathering and analysis, technical support for project implementation, and tools to help local partners target water sustainability, restoration and improvement efforts. The DNR partners with Minnesota's water agencies and local governments to fix and prevent water pollution problems and prevent groundwater overuse.

Agencies and local governments use the resulting information to prevent waters from becoming impaired, restore impaired waters, and protect long-term water supplies from overuse and contamination. The ultimate goal is that Minnesotans have water of sufficient quality and quantity to meet their needs. The Clean Water Fund performance report describes the efforts that state agencies are using to improve and protect water quality and supply using identified performance measures.

Proposal:

This proposal is part of a long term, collaborative effort that will lead to cleaner water through targeted implementation projects and programs. The foundation of the effort is comprehensive assessments of water pollution problems within the state's 80 major surface watersheds. The fish contamination assessment funding is used to pay for the laboratory analysis of fish tissue under contract with the Minnesota Department of Agriculture. The data are shared with the Minnesota Pollution Control Agency and the Minnesota Department of Health. The DNR collects fish as part of its regular lake survey work that is paid for through the Game and Fish Fund.

Equity and Inclusion:

Implementation of this change item will help ensure water of sufficient quality and quantity for all Minnesotans and enhance the ability of all Minnesotans to safely fish, swim, and participate in other water recreation activities. Some racial and ethnic minority groups rely disproportionately on subsistence fishing and thus benefit in particular from consumption advisory information.

Results:

Long-term trends are shown below (Figure 1) and summarized in the [Clean Water Fund Performance Report](#). The DNR supports these efforts by collecting fish for analysis on about 150 waterbodies each year. Since the inception of the clean water fund, the DNR has sampled an additional 720 waterbodies. This information is made available electronically and provides [site specific advice](#) where available.

Figure 1 The plot shows the average trend for walleye and northern pike in the state; the points represent the mean annual mercury concentration at the mean latitude and a smoother line through the annual means shows the nonlinear changes between 1990 and 2016. For reference, the plot shows the Minnesota state water quality criterion for mercury in edible fish tissue (200 parts per billion or 0.2 mg/kg).

Statutory Change(s):

No statutory changes will be needed.

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund—Forests for the Future

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	750	750	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	750	750	0	0
FTEs	.2	.2	0	0

Recommendation:

The Governor recommends \$750,000 in FY 2020 and FY 2021 from the Clean Water Fund to protect forests and shorelands that supply clean water to lakes, rivers and streams, preventing water degradation while also maintaining recreational opportunities, wood products production, fish and wildlife habitat, and many other forest amenities. This funding will support the strategic protection of up to 1,500 acres of priority private forest parcels using permanent working forest conservation easements and key fee-title acquisitions.

Rationale/Background:

Over 40 percent of forests in Minnesota, or nearly 7.5 million acres, are privately owned and at risk of fragmentation or conversion. Since 2008, Minnesota has experienced some of the highest deforestation rates in the United States, particularly in North Central Minnesota—including the Pineland Sands and other portions of the Mississippi Headwaters Basin. In these vulnerable forested areas, conversion to agricultural land or other non-forest land uses can contribute to groundwater and surface water contamination. Maintaining working forests in healthy watersheds reduces the risk of water pollution, recharges aquifers, and reduces nutrients and sediments in lakes, rivers and streams while ensuring clean water for recreation, fish and wildlife habitat, drinking, and economic vitality.

The Department of Natural Resources (DNR) administers two conservation easement programs to protect and conserve private forests lands that are candidates for conversion to non-forest uses. The Minnesota Forests for the Future Program (MFF) was established by the Minnesota Legislature in 2008 (*Minnesota Statutes*, Chapter 84.66). The DNR also administers the Federal Forest Legacy Program (FLP), the national complement to MFF. FLP was created by Congress in 1990 and is an important partner and funding source for Minnesota's forest conservation efforts.

The FLP and MFF use targeted working forest conservation easements and key fee-title acquisitions to protect, maintain, and enhance important public values on privately owned forest land including:

- Forest ecosystems and their biological resources that sustain a full array of biodiversity and ecological functions;
- Water quality and quantity;
- Fish, game, and nongame wildlife and plant populations;
- Habitats for at-risk species;
- Wood and non-timber products;
- Quality outdoor recreational experiences, including hunting, fishing, and trapping;

- Soil stability and productivity; and
- Biological diversity and aesthetic qualities of the landscape.

The MFF program includes partnerships with other state agencies, federal agencies, counties, Soil and Water Conservation Districts, and non-governmental organizations. Protected land remains in private ownership and prevents conversion of forest to other uses. For example, MFF recently worked with the DNR Aquatic Management Area Program to provide easement incentives to private landowners to protect water quality to sustain critical habitat for tullibee in several key North Central Minnesota lakes.

Proposal:

This proposal extends a long-term partnership working with landowners, conservation partners, communities, and outdoor enthusiasts to protect and maintain private forests for multiple public benefits including fish and wildlife habitat, recreation, clean water, timber, and jobs. This proposal will:

- Focus on purchasing permanent MFF Working Forest Conservation Easements in the Upper Mississippi River Watershed for water quality protection;
- Acquire up to 1,500 acres of new conservation easements;
- Coordinate with partners working in the watershed;
- Determine payments based on fair-market appraisal;
- Require forest management plans; and
- Monitor every year to ensure compliance with easement terms.

In exceptional cases, DNR will acquire full-fee title ownership for key parcels to consolidate public land, gain access to landlocked public lands for management or public use, or conserve unique natural resources.

Equity and Inclusion:

All citizens will be impacted by this request, this proposal does not specifically focus on disparate groups. All people and groups benefit from clean water, healthy watersheds, and improved outdoor recreation.

IT Related Proposals:

There are no additional IT related components to this proposal.

Results:

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>FY 2008</i>	<i>FY 2018</i>	<i>FY 2021</i>
Quantity	Number of acres with a conservation easement.*	50,000	360,000	361,500

*MFF goal is 530,000 acres of permanently protected private forests by 2034.

Statutory Change(s):

NA.

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund – Lake Index of Biological Integrity (IBI) Assessment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	1,250	1,250	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,250	1,250	0	0
FTEs	16.6	16.6	0	0

Recommendation:

The Governor recommends \$2.5 million from the Clean Water Fund for supporting Minnesota Pollution Control Agency's (MPCA) lake water quality assessment by providing data and interpretation about fish and plant populations.

This funding supports 16.6 staff and other activity costs to contribute to a long-term partnership of Minnesota's executive branch water agencies and local governments to fix and prevent water pollution problems and prevent groundwater over-use.

Rationale/Background:

The Clean Water Fund is treated as a new initiative each biennium. The Clean Water Council and the executive branch agencies agree that we need to fund long-term programs to address water quality and quantity issues. The Clean Water Fund supports about 78 FTEs at the Department of Natural Resources (DNR) working on data gathering and analysis, technical support for project implementation, and tools to help local partners target water sustainability, restoration and improvement efforts. The DNR partners with Minnesota's water agencies and local governments to fix and prevent water pollution problems and prevent groundwater overuse.

Agencies and local governments use the resulting information to prevent waters from becoming impaired, restore impaired waters, and protect long-term water supplies from overuse and contamination. The ultimate goal is that Minnesotans have water of sufficient quality and quantity to meet their needs. The Clean Water Fund performance report describes the efforts that state agencies are using to improve and protect water quality and supply using identified performance measures.

Proposal:

This proposal is part of a long term, collaborative effort that will lead to cleaner water through targeted implementation projects and programs. The foundation of the effort is comprehensive assessments of water pollution within the state's 80 major surface watersheds and prioritized strategies to address these problems.

Minnesota's water agencies are working with local partners to develop and implement strategies to protect and restore watersheds and groundwater. This proposal supports DNR's efforts related to lake assessment.

By systematically sampling fish and plants in lakes across the state, we can calculate an Index of Biological Integrity (IBI), which is an analysis that can identify water pollution problems based on the type and abundance of certain species in a biological community. The IBI gives a holistic picture of lake condition over time,

complementing other traditional water quality measurements (e. g. phosphorus, water clarity, toxic contaminants).

A key element of this effort is collecting information about the entire fish community, including non-game fish that are often more sensitive to watershed and shoreline disturbance. DNR's fishery managers traditionally have not sampled non-game fish communities. With the support of Clean Water Fund, biologists are now able to include these expanded survey efforts in lakes that have been selected for biological assessment by the DNR and MPCA. The DNR participates in the MPCA watershed assessment process, providing the Fish IBI and plant IBI data and interpretation to identify impaired lakes, those meeting standards, and lakes of exceptional biological quality. In addition, the DNR is providing an analysis of the stressors contributing to impairment on lakes listed as impaired for fish IBI.

Using a plan developed jointly with MPCA, the DNR annually completes about 135 fish IBI surveys, aquatic plant surveys on 50 lakes, and detailed shoreline habitat surveys on 75 lakes.

Equity and Inclusion:

Implementation of this change item will help ensure water of sufficient quality and quantity for all Minnesotans and enhance the ability of all Minnesotans to safely fish, swim, and participate in other water recreation activities.

Results:

Since the passage of the Clean Water Fund, DNR has completed biological assessments in 366 lakes (Figure 1). DNR has used the data to determine that 191 of those lakes are impaired (i.e. not meeting standards). Another 53 lakes were identified as impaired or vulnerable to future impairment based on their fish IBI score. DNR is also maintaining a list of lakes with exceptional biological quality that is used to identify protection priorities in local planning efforts. This is critical to informing restoration and protection efforts under the Clean Water Fund.

Lakes with Fish IBI Data

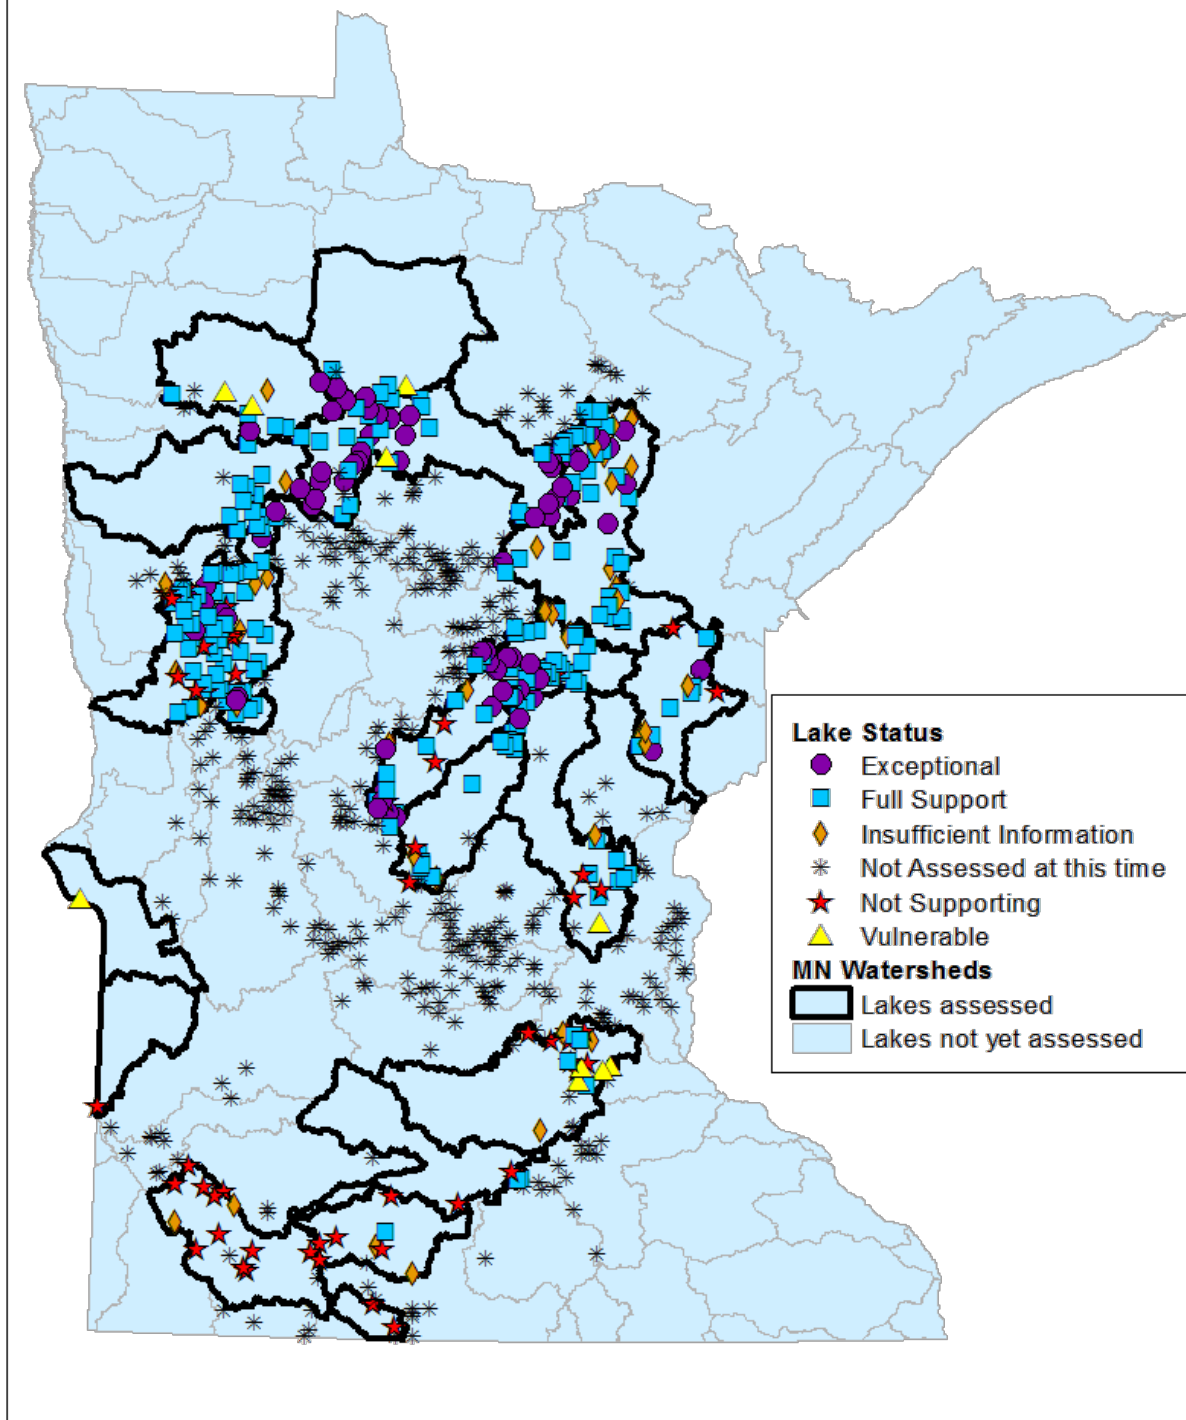

Figure 1 Statewide map showing progress collecting and analyzing fish and aquatic plant data as part of the statewide watershed assessment. Assessment has been completed for 366 lakes in 17 watersheds.

Statutory Change(s):

No statutory changes will be needed.

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund – Nonpoint Source Restoration and Protection Activities

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	1,200	1,200	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,200	1,200	0	0
FTEs	7.4	7.4	0	0

Recommendation:

The Governor recommends \$2.4 million from the Clean Water Fund to support local planning and implementation efforts, including One Watershed, One Plan, technical assistance with clean water implementation projects, and targeted forest stewardship for water quality.

This funding will support 7.4 staff (plus contracts with outside vendors) in contributing to a long-term partnership of Minnesota's executive branch water agencies and local governments to fix and prevent water pollution problems.

Rationale/Background:

The Clean Water Fund is treated as a new initiative each biennium. The Clean Water Council and the executive branch agencies agree that we need to fund long-term programs to address water quality and quantity issues. The Clean Water Fund supports about 78 FTEs at the Department of Natural Resources (DNR) working on data gathering and analysis, technical support for project implementation, and tools to help local partners target water sustainability, restoration and improvement efforts. The DNR partners with Minnesota's water agencies and local governments to fix and prevent water pollution problems and prevent groundwater overuse.

Agencies and local governments use the resulting information to prevent waters from becoming impaired, restore impaired waters, and protect long-term water supplies from overuse and contamination. The ultimate goal is that Minnesotans have water of sufficient quality and quantity to meet their needs. The Clean Water Fund performance report describes the efforts that state agencies are using to improve and protect water quality and supply using identified performance measures.

Proposal:

This proposal is part of a long term, collaborative effort that will lead to cleaner water through targeted implementation projects and programs. The DNR directly supports local planning and implementation work for clean water. This includes extensive support in local One Watershed, One Plan efforts, technical assistance with implementation projects, helping permit applicants design and implement environmentally beneficial floodplain culverts that also reduce floodstage, working with local communities to implement new model shoreland ordinances with higher standards for water quality, and targeted forest stewardship for water quality.

DNR staff are providing technical assistance ranging from siting to design to construction on about 80 implementation projects each year. In addition, DNR foresters work with landowners to write and implement forest stewardship plans, covering over 28,000 acres so far in targeted watersheds. With a stewardship plan,

landowners qualify for cost share dollars and incentive programs that prevent development on the property. This program was developed in partnership with the Minnesota Forest Resources Council.

Equity and Inclusion:

Implementation of this change item will help ensure water of sufficient quality and quantity for all Minnesotans and enhance the ability of all Minnesotans to safely fish, swim, and participate in other water recreation activities.

Results:

DNR staff annually support the completion of six to eight One Watershed, One Plans, provide technical assistance on about 80 implementation projects each year, and write forest stewardship plans covering several thousand acres. Six Minnesota counties have adopted higher shoreland standards following their work with DNR technical experts.

Statutory Change(s):

No statutory changes will be needed.

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund – Applied Research and Tools

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	700	700	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	700	700	0	0
FTEs	3.2	3.2	0	0

Recommendation:

The Governor recommends \$1.4 million from the Clean Water Fund for maintaining and updating light detection and ranging (LiDAR)-derived elevation data; developing fine-scale watershed models; and assessing relationships among disturbance patterns, best management practice applications (BMPs), and water quality in forested watersheds.

This funding will support 3.2 FTEs (plus contracts with outside vendors) to contribute to a long-term partnership of Minnesota's executive branch water agencies and local governments to fix and prevent water pollution problems and prevent groundwater over-use.

Rationale/Background:

The Clean Water Fund is treated as a new initiative each biennium. The Clean Water Council and the executive branch agencies agree that we need to fund long-term programs to address water quality and quantity issues. The Clean Water Fund supports about 78 FTEs at the Department of Natural Resources (DNR) working on data gathering and analysis, technical support for project implementation, and tools to help local partners target water sustainability, restoration and improvement efforts. The DNR partners with Minnesota's water agencies and local governments to fix and prevent water pollution problems and prevent groundwater overuse.

Agencies and local governments use the resulting information to prevent waters from becoming impaired, restore impaired waters, and protect long-term water supplies from overuse and contamination. The ultimate goal is that Minnesotans have water of sufficient quality and quantity to meet their needs. The Clean Water Fund performance report describes the efforts that state agencies are using to improve and protect water quality and supply using identified performance measures.

Proposal:

This proposal is part of a long term, collaborative effort that will lead to cleaner water through targeted implementation projects and programs. The DNR maintains and provides access to LiDAR-derived elevation data that is widely used for targeting and designing implementation projects and for watershed modeling. We develop fine-scale watershed models that enhance our understanding of the effects of drainage, soil health, and different BMPs on water flow and water quality. We also assess relationships among disturbance patterns, BMP applications, and water quality in forested watersheds.

Equity and Inclusion:

Implementation of this change item will help ensure water of sufficient quality and quantity for all Minnesotans and enhance the ability of all Minnesotans to safely fish, swim, and participate in other water recreation activities.

Results:

LiDAR (Light Detection and Ranging) elevation data provides a fine-scale, detailed digital representation of the landscape. This extremely valuable dataset is used to identify and design implementation projects, reducing the need for field assessments and enhancing accuracy of the predicted effectiveness of those projects.

We annually monitor the implementation of forest management guidelines and BMPs at about 90 selected logging sites in Minnesota's forested watersheds, with a focus on potential impacts to water resources. We analyze data on BMP implementation along with watershed characteristics (slope, soils, etc.) and disturbance patterns (logging, blowdown, fire, etc.) to identify risks to water quality and strategies to reduce these risks. The final step is outreach to forest landowners, managers and loggers aimed at mitigating these risks and ensuring full implementation of water quality BMPs.

Statutory Change(s):

No statutory changes will be needed.

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Fund – Stream Flow Monitoring

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	2,200	2,200	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,200	2,200	0	0
FTEs	15.7	15.7	0	0

Recommendation:

The Governor recommends \$4.4 million from the Clean Water Fund for collecting stream flow data, which is used to calculate pollutant loads for Minnesota Pollution Control Agency's (MPCA) water quality assessments and sampling sediment at select stations to analyze sediment transport in streams. These data also have broad utility for state and local water management efforts.

This funding will support 15.7 FTEs (plus contracts with outside vendors) to contribute to a long-term partnership of Minnesota's executive branch water agencies, which include the Department of Agriculture, Department of Health, Minnesota Pollution Control Agency, Board of Water and Soil Resources, Department of Natural Resources (DNR), and local governments to fix and prevent water pollution problems and prevent groundwater overuse.

Rationale/Background:

The Clean Water Fund is treated as a new initiative each biennium. The Clean Water Council and the executive branch agencies agree that we need to fund long-term programs to address water quality and quantity issues. The Clean Water Fund supports about 78 FTEs at the DNR working on data gathering and analysis, technical support for project implementation, and tools to help local partners target water sustainability, restoration and improvement efforts. The DNR partners with Minnesota's water agencies and local governments to fix and prevent water pollution problems and prevent groundwater overuse.

Agencies and local governments use the resulting information to prevent waters from becoming impaired, restore impaired waters, and protect long-term water supplies from overuse and contamination. The ultimate goal is that Minnesotans have water of sufficient quality and quantity to meet their needs. The Clean Water Fund performance report describes the efforts that state agencies are using to improve and protect water quality and supply using identified performance measures.

Proposal:

This proposal is part of a long term, collaborative effort that will lead to cleaner water through targeted implementation projects and programs. The foundation of the effort is comprehensive assessments of water pollution within the state's 80 major surface watersheds and prioritized strategies to address these problems.

Minnesota's water agencies are working with local partners to check water quality and aquifer levels, and develop and implement strategies to protect and restore watersheds and groundwater.

The Clean Water Fund has allowed the DNR to expand a network of stream gages that are critical for MPCA's water quality assessments. Funds are used to install, upgrade and calibrate stream gages and to collect, compile, analyze and distribute data collected at gage stations. The Cooperative [Stream Gaging Website](#) provides a portal for agencies and the public to see stream flow data, site photos, water quality information and links to other information. In addition, a Monthly Hydrologic Conditions Report provides general trend information on water resources using climatic data, lake and river gages, and groundwater monitoring information.

Equity and Inclusion:

Implementation of this change item will help ensure water of sufficient quality and quantity for all Minnesotans and enhance the ability of all Minnesotans to safely fish, swim, and participate in other water recreation activities.

Results:

The DNR will annually collect about 1,300 stream flow measurements and compile records at continuous gage locations. The stream flow and sediment information collected from these gage stations will be used by MPCA to calculate pollution loads for Total Maximum Daily Loads. These data will also be used to evaluate trends in base flow conditions, determine the frequency and magnitude of floods and low flows, assist in assessing changes in land use and watershed conditions and the potential effects of climate change.

Statutory Change(s):

No statutory changes will be needed.

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Legacy – Watershed Restoration and Protection Strategies

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	2,016	2,016	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,016	2,016	0	0
FTEs	17	17	0	0

Recommendation:

The Governor recommends \$4.032 million from the Clean Water Fund to provide state and local partners with expertise, data, and analysis that supports watershed studies and helps identify lasting watershed restoration and protection strategies.

This funding will support 17 FTEs (plus contracts with outside vendors) to contribute to a long-term partnership of Minnesota's executive branch water agencies and local governments to fix and prevent water pollution problems.

Rationale/Background:

The Clean Water Fund is treated as a new initiative each biennium. The Clean Water Council and the executive branch agencies agree that we need to fund long-term programs to address water quality and quantity issues. The Clean Water Fund supports about 78 FTEs at the Department of Natural Resources (DNR) working on data gathering and analysis, technical support for project implementation, and tools to help local partners target water sustainability, restoration and improvement efforts. The DNR partners with Minnesota's water agencies and local governments to fix and prevent water pollution problems and prevent groundwater overuse.

Agencies and local governments use the resulting information to prevent waters from becoming impaired, restore impaired waters, and protect long-term water supplies from overuse and contamination. The ultimate goal is that Minnesotans have water of sufficient quality and quantity to meet their needs. The Clean Water Fund performance report describes the efforts that state agencies are using to improve and protect water quality and supply using identified performance measures.

Proposal:

This proposal is part of a long term, collaborative effort that will lead to cleaner water through targeted implementation projects and programs. The foundation of the effort is comprehensive assessments of water pollution and supply problems within the state's 80 major surface and prioritized strategies to address these problems.

The DNR contributes specialized expertise in watershed science that helps the Minnesota Pollution Control Agency (MPCA) and local partners build watershed models, identify stressors, prioritize waters for protection, and develop watershed restoration and protection strategies. We do this through local participation in WRAPS (Watershed Restoration and Protection Strategies) teams and with a statewide Watershed Health Assessment Framework, which is a web-based tool for accessing watershed data and exploring watershed health concepts.

The Watershed Health Assessment Framework is a [web-based tool](#) for resource managers and others interested in the ecological health of Minnesota's watersheds. The framework is based on the five components of watershed health described below. A suite of 18 health scores has been calculated to describe watershed characteristics at multiple scales. This web-based tool give user's easy access to extensive data without the need for GIS technology.

Equity and Inclusion:

Implementation of this change item will help ensure water of sufficient quality and quantity for all Minnesotans and enhance the ability of all Minnesotans to safely fish, swim, and participate in other water recreation activities.

Results:

This proposal will provide funding to continue watershed assessments and developing strategies to meet water quality goals. Specifically, the MPCA collects and analyzes data on water quality (nutrients, sediment, toxic contaminants, dissolved oxygen, etc.) and biology (fish and aquatic invertebrates in streams). The DNR adds information and expertise in hydrology (water flow and water levels), geomorphology (stream stability and erosion), and connectivity (dams and other barriers that prevent natural movement of water, sediment, and fish). These five components of watershed health interact to determine whether streams and rivers can support swimming, fishing, and aquatic life. The DNR's expertise in hydrology, geomorphology, and connectivity helps the MPCA determine the cause of water quality impairments and, more importantly, it directly informs local governments' efforts to implement projects.

Collectively, the agencies and partners completed the initial statewide assessment of all 80 major watersheds. The second cycle of watershed monitoring has begun, circling back to watersheds first monitored in 2008. All major watersheds in the state will be monitored every 10 years to see if conditions are improving or declining. This second round of monitoring will focus on detecting changes and filling in data gaps to further inform on-the-ground practices.

Each year, the DNR indirectly supports local implementation of projects with watershed and site specific information that helps partners address the root causes of pollution problems. In FY18, DNR gathered and analyzed data and information for 35 watersheds, including 133 stream studies.

Statutory Change(s):

No statutory changes will be needed.

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Parks and Trails Legacy – DNR Parks and Trails

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Parks and Trails Legacy Fund				
Expenditures	19,750	20,230	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	19,750	20,230	0	0
FTEs	42	42	0	0

Recommendation:

The Governor recommends \$19.750 million in FY20 and \$20.230 million in FY21 from the Parks and Trails Legacy Fund for the Department of Natural Resources (DNR) to advance goals from the 25-year Parks and Trails Legacy Plan within Minnesota state parks and trails. The core goals include connecting people to the outdoors, acquiring land and creating opportunities, taking care of what we have, and coordinating with partners.

Rationale/Background:

The Clean Water, Land, and Legacy Amendment created the Parks and Trails Fund, which is an important source of funding for improving parks and trails statewide. The DNR uses the Legacy Fund to help establish a 21st century state park and trail system that attracts future generations to experience the outdoors, while supporting the economic vitality of surrounding communities and ensuring the protection of the state's unique resources.

DNR, Greater Minnesota Regional Parks and Trails Commission (GMRPTC) and Metropolitan Council are working together to advance a more coordinated approach to achieve outcomes for the Parks and Trails Legacy Fund. For the 2020-21 biennium, the implementing agencies continue to support a percentage distribution of "40-40-20," where 40 percent is allocated to the DNR, 40 percent to Metropolitan Council, and 20 percent for GMRPTC, as well as approximately 1 percent allocated "off the top" for coordination. This percentage distribution was agreed to by a 2011 Parks and Trails Legacy Funding Work Group, and was recommended for three biennia (through FY18-19). With the addition of the funding diversification for GM (see separate GM change item), it is supported for FY20-21 by the three implementing agencies and Minnesota's Legacy Advisory Committee, and remains the best approach for allocating the Parks and Trails Legacy Fund.

Proposal:

With these funds, DNR will continue to advance the four main goals associated with the 25-year Parks and Trails Legacy Plan:

- **Connect People to the Outdoors.** DNR continues to promote and provide innovative programs and special events that educate, interpret and build outdoor stewardship skills. For example, the "*I Can!*" series reaches out to young families and new park and trail users to teach skills such as camping, climbing, paddling, archery and more. In 2017, DNR reached more than 250,000 participants through interpretive programs, with skill-building programs reaching about 49,000 of those participants.
- **Acquire Land, Create Opportunities.** DNR will pursue high-priority acquisitions that provide important connections and/or preserve important natural and cultural resources. These include state park inholdings and critical segments for state trail corridors. New development and rehabilitation projects create recreation opportunities with potential to increase state park and trail use.
- **Take Care of What We Have.** DNR will ensure high-quality outdoor recreational experiences through infrastructure renewal and increased accessibility. This will include, for example, new and enhanced campgrounds, trail bridges, and energy efficiency projects. DNR also manages and restores natural

landscapes within the state park and trail system.

- **Coordinate with Partners.** While agencies and organizations can do a great deal of Legacy work on their own, ultimately DNR is striving to provide a seamless system of parks and trails in Minnesota. Coordination and cooperation ensure work is cost effective and meaningful to all Minnesotans.

Equity and Inclusion:

Legacy funding seeks to make the outdoors accessible to all Minnesotans, including communities of color in urban and rural Minnesota. To continue to serve current customers, and diversify those numbers to include new and underserved groups, the agencies are guided by the target markets specifically identified in the 25-year plan including youth and young adults, families with children, racial and ethnic minorities, new immigrants, and older adults. For example, low-cost skill building programs are marketed to diverse audiences through a variety of media and languages. Participants of the popular “I Can Camp” program, in particular, have been more ethnically diverse than state park visitors, or the population of Minnesota as whole.

IT Related Proposals:

This proposal does not include an IT component.

Results:

In keeping with the strategic directions set forth in the Parks and Trails Legacy Plan, the DNR has expanded and improved outdoor recreation opportunities across the state. Key indicators of success include:

- **More people are getting outdoors.** State park permit sales, overnight stays and program participation have all increased since 2009. Overall attendance at interpretive programs increased by almost 20 percent from 2009 to 2017.
- **New opportunities and acquisitions exist at Minnesota state parks and trails.** Over the past nine years, Legacy-funded acquisitions have increased the total acres of parkland and the total miles of state trails. Legacy funding has also made a number of important development projects possible. For example, since 2009 the DNR has completed the following for:
 - **Camping:** Started or completed major new campgrounds at Whitewater and Split Rock Lighthouse state parks; created a new group camp at Lake Bemidji State Park; constructed 2 RV sanitation stations; and constructed 7 yurts at 3 state parks.
 - **Visitor Centers:** Constructed trail centers at Bear Head Lake State Park and Tettegouche State Park (leveraged with bonding) and a new day use area at LaSalle State Recreation Area (SRA).
 - **Biking:** Built a new 5.5 mile bike trail in Glendalough State Park and a connecting trail in partnership with the City of Battle Lake and Otter Tail County; repaved and widened the Glacial Lakes State Trail from Spicer to Wilmar; built the new 6-mile paved Browns Creek State Trail; paved 23 miles of the Luce Line State Trail, connecting the cities of Hutchinson, Silver Lake, and Winsted; and at Cuyuna Country SRA, created four progressively more difficult mountain bike trail loops and a new trail connection to City of Crosby.
 - **Accessibility:** Made accessibility improvements at 75 state parks and trails and state forest recreation areas, including replacing picnic tables and adding accessible fire rings.
 - **Clean Energy:** Installed 14 renewable energy systems across state parks and trails.
 - **Unique experiences:** Reintroduced bison at Minneopa State Park.
- **Native landscapes and aging structures have been restored.** Since the start of Legacy funding, the pace of native plant restoration at state parks and trails has increased 24 percent, prescribed burning has increased 27 percent, and control of invasive plants has increased by nearly 150 percent. In addition, Legacy funds have been used to make improvements to our aging infrastructure and to reinvigorate visitor services. More than a third of the 300 bridges on state trails are over 100 years old, and we’ve used Legacy funding to repair or replace over 60 of them since 2009.

Statutory Change(s):

This proposal does not require any statute changes.

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Parks and Trails Legacy – Greater Minnesota Regional Parks and Trails

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Parks and Trails Legacy Fund				
Expenditures	9,875	10,115	0	0
Net Fiscal Impact = (Expenditures – Revenues)	9,875	10,115	0	0
FTEs	1	1	0	0

Recommendation:

The Governor recommends \$9.875 million in FY20 and \$10.115 million in FY21, or 20 percent, of the Parks and Trails Legacy Fund to support the Parks and Trails Legacy Grant Program for Greater Minnesota Regional Parks and Trails Commission (GMRPTC). This funding provides grants to local governments to connect people to the outdoors, help create new parks and trails, and maintain existing ones.

Rationale/Background:

GMRPTC provides the leadership and strategic direction for this grant program, while the Department of Natural Resources (DNR) acts as the fiscal agent and administers the grants according to the Office of Grants Management. Up to 4.5 percent of the total appropriation may be used for the Greater Minnesota Regional Park and Trail Commission to maintain an Executive Director and necessary support functions, and up to 2.5 percent of the total appropriation may be used for DNR to manage the grants, according to standards consistent with the Minnesota Office of Grants Management. This continues the partnership approach of FY16-19, with GMRPTC providing leadership for the grant program, while DNR provides contract management services.

The Clean Water, Land, and Legacy Amendment created the Parks and Trails Fund, which is an important source of funding for parks and trails statewide. The DNR, GMRPTC, and the Metropolitan Council are working together to advance a more coordinated approach to achieve outcomes for the Parks and Trails Legacy Fund. For the 2020-21 biennium, the implementing agencies continue to support a percentage distribution of “40-40-20,” where 40 percent is allocated to the DNR, 40 percent to Metropolitan Council, and 20 percent for GMRPTC, as well as approximately 1 percent allocated “off the top” for coordination.

The 2013 Legislature established the GMRPTC to advance system planning in greater Minnesota and to provide recommendations to the legislature for grants funded by the Parks and Trails Legacy Fund. The scope of this work is for parks and trails of regional significance in counties and cities outside the seven-county metropolitan area (Minnesota Statutes, 85.536).

Proposal:

This proposal provides for a competitive grant program that will help create a seamless system of outdoor recreation across the state and achieve the goals of the 25-year Parks and Trails Legacy Plan. It plays a critical role for enhancing outdoor recreation participation in greater Minnesota, conserving important natural features, connecting people to the outdoors, and contributing to local economic benefits around the state. The GMRPTC will continue to lead the regional parks and trails competitive grant program by guiding the planning and grant selection for Greater Minnesota. The DNR will continue to work closely with the commission and provide contract management for funded projects, as well as technical assistance to grant applicants and recipients.

Equity and Inclusion:

Legacy funding seeks to make the outdoors accessible to all Minnesotans, including communities of color in urban and rural Minnesota. To continue to serve current customers, and diversify those numbers to include new and underserved groups, the Legacy programs are guided by the target markets in the 25-year plan including youth and young adults, families with children, racial and ethnic minorities, new immigrants, and older adults.

IT Related Proposals:

This proposal does not include an IT component.

Results:

This program provides grants to local governments to create and maintain outdoor recreation opportunities of regional or statewide significance in Greater Minnesota. Performance measures include:

- The number and type of grants and dollars awarded;
- Results achieved (e.g., acres acquired, parks and trails developed, and satisfaction of park and trail users); and
- Economic trends and benefits resulting from local parks and trails.

Since 2010, Greater Minnesota Legacy funds have been used to acquire more than 1,900 acres of land for regional parks and build or rehabilitate over 400 miles of regional trails. These important projects, most in rapidly growing areas, provided the land and infrastructure for new recreational opportunities. The amount of acres acquired or trail miles built vary from year to year due to a number of factors, including land prices, construction costs, and specific project differences.

Type of Measure	Name of Measure	FY10/11	FY12/13	FY14/15	FY16/17	FY18/19	Estimated FY20/21
Quantity	Number of grants	38	41	12	25	25	20-40
Results	Regional Park Acres Acquired	202	608	314	472	306	300-500
Results	Trails Miles Developed and/or Rehabilitated	117	171	54	40	51	50-100

Currently grant outcomes are measured on the DNR's website at:

[Grant Outcomes \(http://www.dnr.state.mn.us/grants/outcomes/index.html\)](http://www.dnr.state.mn.us/grants/outcomes/index.html).

The commission will continue to report grant outcomes through the DNR website and/or the Legislative Coordinating Committee (LCC) Legacy website.

Statutory Change(s):

This proposal does not include any statute changes.

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Parks and Trails Legacy – Coordination Among Partners

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Parks and Trails Legacy Fund				
Expenditures	499	511	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	499	511	0	0
FTEs	1	1	0	0

Recommendation:

The Governor recommends \$499,000 in FY20 and \$511,000 in FY21 from the Parks and Trails Legacy Fund to advance a coordinated approach for a seamless system of parks and trails in Minnesota. This proposal advances integrated research and planning; development, management, and marketing of web-based systems; support for the Parks and Trails Legacy Advisory Committee; restoration evaluation; and other priority coordination needs such as youth involvement, promoting public health, and connecting underrepresented audiences. These amounts represent about 1 percent “off the top” of the Parks and Trails Legacy Fund.

This proposal is supported by the three implementing agencies – Department of Natural Resources (DNR), Greater Minnesota Regional Parks and Trails Commission (GMRPTC), and the Metropolitan Council – and Minnesota’s Legacy Advisory Committee (LAC). The products and benefits of this change item are shared among these three implementing agencies. The responsibility for coordinating, planning and communicating are also shared to ensure that these benefits meet the needs of the three entities and all residents of Minnesota.

Rationale/Background:

The DNR, GMRPTC, and the Metropolitan Council are working together to advance a more coordinated approach to achieve outcomes for the Parks and Trails Legacy Fund. The state and regional parks and trails system is made up of different providers across the state funded by numerous sources. This complex network poses a challenge to state and regional providers interested in meaningful coordination, as well as end users who seek quality, connected and accessible opportunities. Coordination is essential to achieve the vision laid out in the *Parks and Trails Legacy Plan* and to ensure that the principles the public developed for the use of Legacy Funds are achieved. Effective coordination results in wise use of funds and may result in cost savings.

A major goal for all outdoor recreation providers is to increase the per capita participation in nature-based outdoor recreation. The primary driving factor behind this trend is a decline in involvement among young adults and their children, for older adults, urban individuals and communities of color. Coordinated research information and evaluation should help in our joint efforts to increase outdoor recreation participation.

Proposal:

This request builds on previous appropriations from the Park and Trail Legacy Fund related to coordination and research.

- *Research and system planning* – coordinated action continues to be needed across the three systems to understand who is using the state and regional park and trail system, where they are coming from, their satisfaction with facilities and programs, and how to better connect our target markets to the outdoors.

Coordinated research and planning is critical to ensuring Minnesotans' expectations for use of the Park and Trail Legacy Fund are being met.

- *Web-based systems* – One of the goals in the *Parks and Trails Legacy Plan* is enhanced, integrated and accessible information for park and trail users. An integrated web discovery tool was launched in FY18 (mn.gov/greatoutdoors), which has been well received and offers users a truly seamless system to explore. This proposal will build on that effort by providing maintenance and marketing resources, and developing enhanced features.
- *Support for the Legacy Advisory Committee (LAC)* - The mission of the LAC is to “champion the 25-year Parks and Trails Legacy Plan by providing recommendations to enhance promotion, coordination, and accountability throughout implementation of the plan.” (www.legacy.mn.gov/ptlac).
- The LAC was created as a part of the implementation of the 25-year *Parks and Trails Legacy Plan*. Committee members advise the convening sponsors (GMRPTC, Metropolitan Council, and DNR) on the implementation of the Legacy Plan. The committee is comprised of volunteers who travel from around the state. Reimbursement for travel expenses and support for their work makes participation possible for a diversity of Minnesotans.
- *Restoration evaluation* – Evaluation of natural resource restoration projects across all four Legacy Funds will determine progress toward achievement of restoration goals. A significant amount of Legacy Funds has been invested in restoration projects and an assessment of progress will guide future investments. This proposal will help achieve legislative mandates for restoration evaluation.
- *Other priority coordination needs such as joint marketing and youth involvement, and equity* - Other priority coordination needs such as joint marketing and youth involvement, promoting the health benefits of outdoor recreation, and connecting racially and ethnically diverse audiences need a coordinated effort.

Equity and Inclusion:

Legacy seeks to make the outdoors accessible to all Minnesotans, including communities of color in urban and rural Minnesota. To continue to serve current customers, and diversify those numbers to include new and underserved groups, the agencies are guided by the target markets specifically identified in the 25-year plan including youth and young adults, families with children, racial and ethnic minorities, new immigrants, and older adults. Investments to rehabilitate aging infrastructure also incorporate current accessibility standards.

IT Related Proposals:

This proposal does not include an IT component.

Results:

Improve performance for achieving the goals of the 25-year *Parks and Trails Legacy Plan*, and increase effectiveness and efficiency of Parks and Trails Legacy Funds. Specific results include:

- Maintain and enhance the recently launched integrated, user-friendly website (Minnesota's Great Outdoors) and market it to the benefit of our target markets.
- Implement commonly agreed research priorities across the three systems for standardized visitor information.
- Hold six LAC meetings per year with the completion of an annual work plan designed to monitor and evaluate and recommend how to implement the *Parks and Trails Legacy Plan*.
- Complete restoration evaluations and an assessment of the acres of natural resource sites improved.
- Increase engagement among youth and diverse audiences, and promote the public health benefits of outdoor recreation.

Statutory Change(s):

This proposal does not include any statute changes.

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Office of School Trust Lands Funding

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures (ADM)	(187)	(187)	(187)	(187)
Expenditures (DNR)	187	187	187	187
Other Funds (Perm School)				
Expenditures (ADM)	(300)	(300)	(300)	(300)
Expenditures (DNR)	300	300	300	300
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends moving the responsibilities of fiscal agent for the Office of School Trust Lands (OSTL) from the Department of Administration (ADM) to the Department of Natural Resources (DNR). This proposal does not alter the mission or work of the OSTL. It moves funding for the Office of School Trust Lands to the DNR at the same level that it currently exists at ADM. This proposal is therefore budget neutral.

Rationale/Background:

Since 2014, current law appropriates funding for OSTL to the ADM. Additionally, DNR, Department of Education and OSTL entered into a Memorandum of Understanding (MOU) that facilitates the OSTL working relationship with DNR. The multi-agency MOU establishes that ADM will be the primary fiscal agent for OSTL (consistent with current law) and that DNR will provide office space and operations support (fleet, IT, contract review, etc.). Although this operating structure works, it creates administrative inefficiencies as it requires DNR to bill ADM quarterly for the services provided to OSTL. This proposal seeks promote administrative efficiency by discontinuing the dual accounting and quarterly billing between OSTL, ADM and DNR.

Proposal:

This proposal moves the appropriations for OSTL from ADM to DNR. It does not change the purpose or function of the OSTL or request additional appropriations. It merely seeks to gain operational efficiencies by reducing the number of fiscal agents for OSTL.

Equity and Inclusion:

OSTL has not identified any protected class or group that this proposal would negatively impact.

IT Related Proposals:

Not applicable.

Results:

This proposal will increase administrative efficiencies to the OSTL, ADM and DNR.

Statutory Change(s):

None

Department of Natural Resources

FY 2020-21 Biennial Budget Change Item

Change Item Title: Transportation Funding Package

*HUDT Transfers out include transportation funds only.				

Recommendation:

The Governor recommends the state commit to a major transportation investment plan to fund the estimated \$6 billion dollar gap that exists between funding needs and available revenues over the next 10 years. The Governor proposes filling the \$6 billion gap in road and bridge funding by:

- Initiating a 20 cent gas tax increase, including fuel in distributor storage at the start time of each increase (phased-in over two years in October and April in FY20 and FY21)
- Indexing the gas tax to inflation (beginning in FY23)
- Increasing the registration tax, effective January 1, 2020 (increase tax rate from 1.25 percent to 1.5 percent and base tax fee from \$10 to \$45; change the depreciation schedule; amend base value calculation by removing destination charge and hold harmless provision of statute)
- Increasing the motor vehicle sales tax from 6.5 percent to 6.875 percent, effective December 1, 2019
- Authorizing \$2 billion in trunk highway bonds over 8 years starting in 2022

The gas tax, registration tax, and motor vehicle sales tax increases will fund roads and bridges for the state trunk highways, county state aid highways, and municipal state aid streets. In the FY22-23 biennium, when revenue changes are completely phased in, the increased revenue from the gas tax, motor vehicle sales tax, and registration fees are forecast to increase available resources for each transportation fund by 30 percent.

To help lower- and middle-income Minnesotans pay for transportation investments, the governor proposes an increase to the Working Family Credit of \$100 for each single or head of household recipient and \$200 for each married filing jointly recipient. This proposal is described in the Tax Aids, Credits and Refunds section. In addition, while the gas tax increase would impact how our rate compares to neighboring states, the existing qualifying service station tax credit would ensure Minnesota service stations within 7.5 miles of the state border receive refunds that effectively reduce the rate to not more than three cents per gallon above the rate of the neighboring state.

Other Components:

In addition to the new funding above, the Governor recommends:

- Returning the auto parts sales tax, 9.2 percent motor vehicle rental tax, and 6.5 percent sales tax on motor vehicle rentals currently deposited into the Highway User Tax Distribution (HUTD) Fund as of FY2018 back to the General Fund beginning in FY2020. This results in an increase to the General Fund of \$395 million in FY20-21 and \$404 million in FY22-23.
- Restoring the motor vehicle lease sales tax to the pre-2018 distribution levels. This results in \$32 million returned to the General Fund, annually.
- In total, the General Fund would receive \$459 million in FY20-21 and \$468 million in FY22-23.

General fund revenues are reduced by \$8 million in the FY20-21 biennium due to increased petroleum refunds and income tax interactions with the registration tax. General fund expenditures decrease by \$170,000 for the biennium for increased aid to counties with casinos under [M.S. 270C.19](https://www.revisor.mn.gov/statutes/cite/270C.19) (<https://www.revisor.mn.gov/statutes/cite/270C.19>) due to the increase in gas tax.

Authorization for the sale of \$2 billion in trunk highway bonds over 8 years starting in 2022 (\$250 million per year). Debt service for these bonds is estimated to be \$22.2 million for the FY22-23 biennium.

Several components in this proposal require changes to the Minnesota Licensing and Registration System (MNLARS). Costs associated with changes to MNLARS will be funded through the Department of Public Safety's MNLARS budget recommendation.

Rationale/Background:

Minnesota cannot preserve and improve quality and performance of the state's transportation systems under the combined limitations of current investment levels and current lifecycle replacement practices. The consequences of underinvesting in the state's transportation system will include deterioration in service, increases in congestion, failing infrastructure and diminished ability to remain economically competitive. This is because transportation systems facilitate the efficient movement of people and goods and create the opportunity for economic development, enhanced productivity, job formation and sustainable growth. Without additional investment, the transportation system will not be able to expand to accommodate expected population and job growth. In addition, alternatives to driving alone must play a larger role in satisfying growing transportation demand - roads, transit and other transportation modes must work together as one system.

Road and Bridge Funding

The 2018 Minnesota Statewide Highway Investment Plan (MnSHIP) determined additional funding was needed for transportation, due largely to aging infrastructure and construction costs exceeding the growth of existing revenues. Overall, the department faces a \$6 billion gap in revenue over the next ten years above current fund

balance projections to fund needed investments in state road construction. Of this total gap, roughly \$4 billion is needed for preservation and modernization, and \$2 billion is needed for strategic expansion.

Without additional revenue, there will be:

- Increasing deterioration of pavement and bridges on state system. The percent of highway pavement considered in poor condition (rough driving surface) and the percent of bridge deck pavement considered in poor condition it is estimated to increase significantly in the next 20 years.
- Very little expansion to address population and economic growth
- Reductions in high priority products and service delivery

In addition, more operations and maintenance dollars are recommended, calculated at 5 percent of new Trunk Highway Fund revenues. This additional funding will be spent on snow plowing, fixing pot holes and guard rails, etc. Investing in operations and maintenance is needed due to declining asset conditions, increased snow and ice requirements, and the need for more timely maintenance.

Proposal:

Road and Bridge funding components

New revenues and bonding would be identified to help close the funding gap over the next ten years. The goal is an integrated transportation system that optimizes the movement of people and goods across the state. With new funding, we can:

- Improve asset management - preserve and modernize the existing system
- Invest in strategic mobility enhancements, including MnPASS and other intelligent transportation tools
- Complete strategic expansion on key corridors throughout the state
- Complete Main Street improvements

The benefits for Minnesotans will include:

- Reduced wear and tear on their cars
- Fewer stops at the fuel pump due to smoother roads and reduced congestion
- Fewer accidents
- More time doing what they need to do
- Reduced impacts on our environment

MnDOT has identified pavement and bridge needs as well as mobility projects that are not currently being addressed through its 10-year work plan. These unmet needs and projects will be given priority. These funds will provide for capital costs of construction as well as project development and engineering activities with contractor support, allowing the department to utilize this funding in the most efficient manner.

MnDOT proposes to utilize the increased operating appropriations for our highest-priority products and services. Some of these include:

- Snow and Ice - keeping the roads clear of snow and ice
- System Roadway Structures Maintenance – repair potholes (pavement repair)
- Bridges and Structures Inspection and Maintenance
- Intelligent transportation systems for improved safety and mobility

The Governor's proposal provides constitutionally dedicated funding increases that can be relied on over the long term and can only be used for transportation purposes. Returning auto parts and other taxes to the general fund results in the availability of funding for other state priorities.

Department of Natural Resources Funding Components

The Governor's proposal provides constitutionally dedicated funding increases that can be relied on over the long term and can only be used for transportation purposes. Returning auto parts and other taxes to the general fund results in the availability of funding for other state priorities.

The Department of Natural Resources (DNR) receives a portion of the unrefunded gasoline tax, which has supported the state's recreational motorized vehicle activities and forest roads since 1961. This funding is dedicated to the DNR with the broader goal that the unrefunded gasoline proceeds should support programs related to non-highway gasoline use.

This revenue enables additional investment in Minnesota's water recreation facilities and services. The proposal funds \$3.35 million annually for increased operations and maintenance of public water access sites and state trails (\$1.35 million) and increasing boating access site rehabilitation (\$2 million). Additionally, this proposal increases grants to local sheriff offices by \$300,000 annually to reimburse for search and rescue efforts.

This proposal also increases revenues to DNR's forest road account by \$170,000 in FY20, \$506,000 in FY21, \$670,000 in FY22, and \$705,000 in FY23. The state and counties (with a land commissioner) split this revenue 52% and 48% respectively. This increase funds additional graveling, grading, and drainage projects to maintain the state's 2,340-mile forest road network used by the forest industry, emergency responders and outdoor enthusiasts.

Transit Funding Components

Revenue from the motor vehicle sales tax is split between the HUTD (60 percent) and the Transit Assistance Fund (40 percent). The Metropolitan Council receives 90 percent of the motor vehicle sales tax revenue in the Transit Assistance Fund and MnDOT receives the remaining 10 percent for greater Minnesota transit.

Over the long-term, greater Minnesota transit revenues will increase from the proposed increased MVST rate. However, restoring the motor vehicle lease sales tax to the pre-2018 distribution levels results in a short-term reduction in revenue. To offset the decrease in revenue between FY20-23, MnDOT is amending internal accounting practices to allow additional spending of the motor vehicle lease tax revenue in the current year (current accounting practices involve carrying forward all of this revenue each year, and planning spending in the subsequent year).

Equity and Inclusion:

A safe, reliable and multimodal system of transportation is vital to ensuring equity and inclusion by connecting communities statewide. This needed funding will also provide additional contracting opportunities to certified small businesses and opportunities to work towards enterprise-wide goals of equity and inclusion.

IT Related Proposals:

N/A

Results:

Currently, Minnesota's total state gasoline taxes are 28th highest in the country, including District of Columbia. Since 2013, Minnesota has dropped from 19th highest state gasoline taxes, as a result of other states increasing their gasoline tax rate. Over a 10-year period, the inflation-adjusted tax on gasoline is projected to add an additional 28 cents to the price of a gallon of gasoline.

These investments would provide additional long-term sustainable and dedicated funding. MnDOT would plan to rehabilitate the system for the 21st century by:

- Improving an additional 1,800 miles of pavement and repair or replace an additional 300 bridges on state highways
- Accelerate progress toward the state goal of zero highway deaths with targeted installation of rumble strips, median barriers, lighting and other safety improvements. The Minnesota Toward Zero Death program has helped decrease injuries and deaths on the highway
- Keep roadside infrastructure in a state of good repair

In addition, MnDOT has operating performance measures that will be impacted by this proposal. All are anticipated to decline without additional funding; and this would reduce the decline. They include:

- Snow Plowing Performance – meet clearance targets
- Smooth Roads – percent of pavement patching addressed
- Percent of projects let in the year scheduled

Statutory Change(s):

Gasoline Tax: M.S. 296A.07 and M.S. 296A.08

Vehicle Registration Taxes: M.S. 168.013

Motor Vehicle Sales Tax: M.S. 297B.02

Motor Vehicle Lease Sales Tax: 297A.815

General Fund Transfers: M.S. 297A.94 and 297A.64

Program: Lands and Minerals Resource Management**Activity: Lands and Minerals Resource Management**dnr.state.mn.us/lands_minerals/index.html**AT A GLANCE**

- Collected \$17 million in revenue from state-owned mineral resources in FY17
- Minnesota ranked first in the nation for iron ore production
- Completed 91 acquisitions of land and interests in land in FY17
- Calculated in lieu of tax payment of approximately \$35.8 million for distribution to local government annually
- Managed 12 million acres of state-owned mineral rights including 3.5 million acres of school trust mineral assets
- Managed real estate activities for 5.6 million acres of state-owned land, including 2.5 million acres of school trust lands

PURPOSE & CONTEXT

The Division of Lands and Minerals manages all state-owned mineral rights and provides real estate services for Department of Natural Resources (DNR) managed lands.

Lands and Minerals ensures that mining is designed to protect natural resources and that sites are properly reclaimed for future use once mining is complete. The mineland reclamation activity promotes a healthy environment with sustainable use of natural resources.

The Division's land management activity includes oversight of the school trust lands, which generate revenue by leasing state surface lands and mineral rights. These funds go to school districts throughout the state and the University of Minnesota and its students, as well as local towns, cities, and counties.

SERVICES PROVIDED

The Division of Lands and Minerals meets its goals through three bodies of work:

Minerals Management

- The Division gathers mineral resource information to encourage further exploration and investment. It maintains a drill core library of past exploration and drillings that provides geological insight into future sites. The Division maps the location of sand and gravel to identify future resources and aid in local planning.
- The Division issues state mineral leases through public sales and negotiations. This includes leases at the earliest stage of exploration to leases at active mines.
- It reviews all exploration plans to ensure environmental protection criteria are met and conduct field inspections of the exploration activity on state and private lands. Exploration companies are searching for valuable deposits of copper, nickel, platinum, palladium, and other precious metals.
- The Division monitors the terms and conditions of the state mineral leases, including performance requirements.
- The Division closely monitors iron ore being removed from state lands. It verifies volumes, collect the revenues due, and distribute them to school trust land, the university trust, and local communities.

Mine Permitting and Reclamation

- The Division administers permits to mine that are required before metallic mineral mining operations may start on any land. It ensures permits include conditions to protect the environment, preserve natural resources, provide for financial assurance, govern mine reclamation, and plan for future use of the land.
- The Division administers water appropriation permits and work in public water permits needed for metallic minerals mining and peat mining. It ensures permits include conditions to allow reasonable use and protect the state's water resources.
- The Division inspects mining operations to ensure permit compliance. This includes monitoring ongoing operations, reclamation, water use, and environmental protection activities.
- It conducts environmental research to better understand potential water quality and other mining impacts and to evaluate new ways to reduce impacts.

Real Estate Management

- The Division acquires land through purchase and donation for outdoor recreation and natural-resource protection. It sells some lands to raise revenue for school trust land or to dispose of land that does not meet DNR's strategic priorities. The Division trades some land with other units of government or private parties to consolidate landholdings or to obtain land better suited for DNR's land management objectives.
- The Division issues licenses for utilities to cross state lands and waters. It issues road easements for crossing state land and water. The Division issues leases for hunting cabins, boathouses, towers, agriculture, access to private property and other uses.
- It conducts surveys to address boundary issues prior to an acquisition, and to accurately post the boundaries for existing outdoor recreation units and before extensive development such as a water access site or campground.
- The Division provides direction on monitoring of conservation easements and enforcement of terms and conditions. We review and decide whether to approve the proposed sale or of certain tax forfeited land, subject to final approval by the Land Exchange Board.
- It works with counties to develop land record data and calculate annual payments in lieu of taxes.

RESULTS

Quantity Performance Measure: Minerals Management—Annual Mineral Leasing Revenue

The following chart shows that mineral lease revenue has fluctuated in recent years and reflects a multi-year downturn in taconite mining activity. The line showing the tons of state ore mined, and the lack of direct correlation to mineral revenue, indicates that the tonnage mined is not the sole factor for the change in revenue. Other factors include fluctuating commodity values for iron ore and steel, DNR's success in negotiating higher royalty rates, and the 2015 decision to provide a short term reduction in royalty rates to aid the then struggling taconite industry. It is expected that mineral revenues will trend upward in the next year, as both the level of mining activity and commodity prices are rebounding.

Results Performance Measure: Mineland Reclamation

Currently there are 23 permits to mine covering almost 150,000 acres. In the last two years (2016-2017), approximately 830 acres of previously mined lands have been fully reclaimed. These lands are now ready to support future, non-mining uses.

Quantity Performance Measure: Real Estate Management

The Division of Lands and Minerals is responsible for negotiating land acquisition for the DNR. The graph shows the number of easement acquisitions increased in FY17 after a significant decrease the two previous fiscal years. Fee acquisitions are a more stable component, showing more modest variation through the years, although there has also been a decline in direct appropriations to DNR for acquisitions.

Program: Ecological and Water Resources**Activity: Ecological and Water Resources**dnr.state.mn.us/eco/index.htmldnr.state.mn.us/waters/index.html

AT A GLANCE

- Conduct approximately 80,000 watercraft inspections for aquatic invasive species each year
- Issued 975 water appropriation permit decisions and 806 permit decisions for activities affecting public waters in FY18
- Managed 192,000 acres of Scientific and Natural Areas (SNAs) in 168 SNAs in FY18
- Managed 12,848 acres in prairie easements in FY18
- Measure and maintain stream flow monitoring at 282 streams in FY18
- Measure and maintain groundwater level monitoring in 1,070 wells in FY18
- Part B County Geologic Atlases completed for 30 counties statewide through FY18
- Remove 100-200 buildings from flood plains to prevent flood damage each year
- Minnesota Biological Survey has been completed in 84 of our 87 counties through FY18

PURPOSE & CONTEXT

The Ecological and Water Resources Division promotes and delivers integrated land and water conservation to ensure healthy lands and waters throughout Minnesota.

The Division provides critical information and regulatory oversight to state and local governments and landowners to foster natural resources stewardship and enhance recreational and economic uses.

The Division's customers include local governments, conservation organizations, businesses, landowners and Minnesota citizens, who all benefit from healthy natural resources.

SERVICES PROVIDED

The Ecological and Water Resources Division's work is divided into three categories:

1. Inventory, Monitoring, and Analysis

- The Division collects and deliver information on ground and surface water, lake and stream habitat, and rare plants and animals, and maintain flood-warning gages.
- It ensures that high quality environmental information is available for current and future generations to use and maintain Minnesota's quality of life.
- The Division works to make sure state and local governments have access to this information about Minnesota's biological and water resources, so they can make informed decisions regarding growth, development and natural resource protection.

2. Conservation Assistance and Regulation

- The Division ensures recreation, habitat and water quality are maintained by regulating proposed alterations to lakes, wetlands, rivers and streams.
- It provides regulatory and technical oversight to local governments for shoreland, floodplains, and Wild and Scenic Rivers.
- The Division regulates water use to provide for sustainable surface water and ground water supplies as our population grows.

- It provides oversight of the state's dams so they operate safely and protect the public and natural resources.
- The Division engages in environmental review to identify potential impacts of proposed projects and help ensure permitting addresses those impacts.

3. Ecosystem Management and Protection

- The Division manages and prevent the spread of aquatic and terrestrial invasive species that threaten the state's lakes, rivers, wetlands, forests, and prairies, and the economies that depend on them.
- It manages Scientific and Natural Area and native prairie bank programs and nongame wildlife, and help protect habitat to improve conditions for native species. This work supports both the state's ecosystems and recreational enjoyment of the outdoors.
- The Division protects threatened and endangered species to prevent state extinctions. It protects and conserve thousands of nongame species such as bees, butterflies, songbirds, eagles, loons, frogs, turtles, and bats through habitat restorations, surveys and monitoring, technical guidance, and outreach and education.

RESULTS

Quantity Performance Measure: Number of new groundwater monitoring well installations (50 per year goal)

On average, the Division has met its goal to install 50 new groundwater monitoring wells annually since 2009. The number of new wells it can drill in a year depends on available funding, the depth of well that is required and the complexity of the installation. Information gathered from these wells is critical for making timely and informed permit decisions to maintain sustainability of groundwater systems.

Quality Performance Measure: Number of water related permit actions (including both appropriation and work in beds) and percent acted on within 90 days or 150 days

In the last two years, the number of permit applications received has been lower than the peak year of 2014. General Permit Authorizations, which are simpler permitting situations, have a 90 day goal to reach a permitting decision. Individual Permits, which are more complex, have a 150 day goal to reach a permitting decision. Most permits are issued well before the time goal.

Results Performance Measure: Number of aquatic invasive species (AIS) inspectors trained and number of AIS inspections completed

The DNR has been partnering with local government units (LGU) to provide watercraft inspection for AIS around the state since receiving the authority to do so in 2011. The number of LGUs partnering with DNR for authorized inspectors has grown annually, with a large increase in 2015 after Minnesota counties started receiving AIS prevention aid from the Minnesota Department of Revenue. These important partnerships have increased watercraft inspections around the state more than threefold between 2012 and 2017.

The legal authority for the Ecological and Water Resources Program comes from Minnesota Statutes:

Program: Forestry

Activity: Forest Management

dnr.state.mn.us/forestry/index.html**AT A GLANCE**

- Manage 59 state forests covering 4.2 million acres for clean water, wildlife habitat, quality timber, outdoor recreation, and biological diversity
- Provide 30 percent of the state's wood fiber that keeps Minnesota's forest products industry strong, supporting more than 64,000 jobs statewide
- Maintain 2,360 miles of forest roads that provide access for recreation, general public use, fire protection, forest management, and timber production
- Reforest 9,000 acres annually by aerial seeding and hand-planting seedlings
- Maintain forest management certification on 5 million acres of DNR-administered lands by meeting criteria set and enforced by the Forest Stewardship Council and Sustainable Forestry Initiative
- Prepare forest management plans for private landowners on 70,000 acres annually through a network of DNR, county, and private consulting foresters
- Engage 55,000 students annually in outdoor education activities statewide at 132 school forest sites

PURPOSE & CONTEXT

The goal of the Division of Forestry at the Department of Natural Resources (DNR) is to help sustain a quality of life by improving the productivity, health, diversity, accessibility, and use of forests. Healthy forests provide clean water, wildlife habitat, biodiversity, and forest-related products.

Healthy forests ensure the state's natural areas remain productive, ecologically healthy, and beautiful in the face of wildfires, land-use pressures, climate change, and invasive plants, insect pests, and diseases. They play a key role in protecting water quality and provide low-cost, accessible recreation for all Minnesotans.

The forest products industry relies on a sustainable state timber supply. The industry provides 64,000 jobs and economic benefits worth \$17.6 billion. Well-managed forests also provide economic benefits from tourism and outdoor recreation activities like hunting, hiking, riding, and birdwatching.

Forest management is important to forest landowners, conservation groups, hunters, anglers, and other outdoor enthusiasts; school teachers and students; loggers and other forest operators; forest industry employees; and forestry professionals.

SERVICES PROVIDED

To achieve the Division's goals, Forestry:

- **Manages DNR-administered forest lands** to improve their health and productivity so they provide clean water, abundant wildlife habitat, a sustainable supply of timber, and outdoor recreation opportunities. The Division supports the commercial use and public enjoyment of forests by maintaining public forest roads and recreational trails.
- **Leads** forest management and policy development aimed at ensuring Minnesota forest lands (public and private) are sustained and enhanced.
- **Provides technical assistance to communities and private landowners** through training sessions, printed and online materials, one-on-one visits, cost-share opportunities, and stewardship plans to encourage communities and private landowners to keep their forests, lands, and water healthy and intact in the face of development pressure, a changing climate, and growing populations of invasive species.

- **Develops and distributes forest information** to help Minnesotans prepare for and prevent insect and disease infestations and understand how forest resources benefit people, the environment, and the economy.
- **Implements the Sustainable Forest Resources Act** (Minnesota Statutes, Chapter 89A) to gather and incorporate diverse perspectives on forest management, use, and protection.
- **Manages timber on school trust lands** to maximize long-term economic returns to the Trust using sound natural resource management practices.
- **Works collaboratively, based on sound management principles, with the forest products industry, forest landowners, and other partners** to support a diverse and healthy forest industry critical to successful forest management.

RESULTS

Quantity Performance Measure: Cords of wood offered for sale on state lands

The state owns 24 percent of Minnesota's forest land, which is a significant source of raw materials for forest product industries and energy production. As of July 2018, the Division's goal is to offer 870,000 cords of timber per year for sale at public auction. The Division's previous goal was 800,000 cords annually. An additional 30,000 cords of ash and tamarack will be offered annually through fiscal year 2023. This special initiative is an effort to make productive use of these two species, which face significant insect threats, and promote reforestation of ash and tamarack sites. State timber harvests are a management tool that have a similar effect as the natural disturbances of the past (e.g., wildfires), helping DNR efficiently and economically provide sustainable timber, wildlife habitat, clean water, and recreational opportunities.

Results Performance Measure: Acres of state land reforested

The DNR must reforest the same number of acres it harvests (Minnesota Statutes, section 89.002, subdivision 2). This is done by planting seedlings, spreading seed by air, and where possible, allowing the forest to grow back on its own (natural regeneration). The approach to reforesting after harvest depends on what tree species are best for the site. If pine should reforest a site, then the Division plants seedlings for best results. If the Division wants a lowland conifer species like black spruce, it seeds aerially from helicopters. For aspen growth, the Division allows natural regeneration or sprouting to occur. Under DNR's new sustainable timber target, the Division aims to plant and seed 10,000 acres per year. Additionally, the Division protects on average 5,800 acres of young trees annually from deer and other animals.

Quantity Performance Measure: Acres of state forest land inventoried

The DNR must maintain an up-to-date inventory of state forest lands, including tree species, age, size, and potential productivity to determine timber supply, management targets, and research needs. In keeping with good forest management practices, the Division's goal is to inventory 200,000 acres per year. DNR foresters and hired consultants perform the on-the-ground inventory work.

The legal authority for the forest management activity comes from Minnesota Statutes 88, 89, 89A, and 90.

Program: Forestry
Activity: Firefighting

dnr.state.mn.us/forestry/index.html

AT A GLANCE

- Responded to 822 wildfires in FY2018
- Issue approximately 65,000 burning permits annually
- Respond in 20 minutes or less to wildfires where DNR is the first responder
- Protect at least 95 percent of structures threatened by wildfires
- Hold the nation's largest fire prevention outreach event at the State Fair where 700 firefighters and volunteers present fire prevention activities
- Maintain six community wildfire protection plans through the Firewise Program to help 318 communities reduce burnable materials around homes and communities
- Coordinate emergency response activities and equipment and maintain cooperative agreements with national and local partners
- Provide reimbursable out-of-state firefighting assistance through the Minnesota Interagency Fire Center and mutual aid agreements

PURPOSE & CONTEXT

The Division of Forestry provides wildfire protection for 45.5 million acres of public and private land. This includes:

- Protecting against loss of life by wildfire.
- Reducing loss of property and natural resources.
- Responding to fire and natural disaster emergencies in Minnesota and cooperating with federal and regional firefighting organizations by staffing national fire incidents.
- Preventing wildfires through education, regulation, and an open-burning permit system.
- Using prescribed fires as a tool to reduce burnable materials in natural areas.

Wildfire is a natural part of the environment; however, it can cause damage. With more people living in suburban and rural areas, wildfire protection is critical to protecting people, property, and natural resources. Our protection efforts serve landowners, homeowners, businesses, rural fire departments, other emergency response partners, and natural resource managers.

State authority over wildfire management began in the early 1900s after devastating wildfires destroyed Hinckley, Baudette, Chisholm, and Cloquet. In 1976, the Legislature created an open appropriation account to fund fire suppression efforts. The Department of Natural Resources (DNR) is mandated to use these funds to suppress wildfire throughout the state.

SERVICES PROVIDED

The Division protects against the loss of life, property, and natural resources from wildfire and enhances natural resource management through:

- **Prevention**—providing educational information and activities; regulating open burning; enforcing state wildfire and open-burning laws; investigating wildfire arson; and helping homeowners, developers, and cities identify and reduce the risk of wildfires around their homes and communities through the Firewise program.

- **Presuppression**—training firefighters and support personnel, operating the Minnesota Interagency Fire Center, maintaining partnerships and aid agreements with other fire protection agencies, tracking statewide availability of specialized ground and aerial suppression equipment, and maintaining an emergency communications network.
- **Suppression**—locating wildfires with aerial patrols, public reports, and lookout towers; seasonally relocating firefighting resources to shorten response times; and controlling the spread of wildfires to minimize their damage. Suppression efforts require trained firefighters, support personnel, and aerial and ground-based equipment.
- **Prescribed burning**—using fire intentionally to prepare sites for reforestation; improve wildlife habitat; maintain natural plant communities; reduce the risk and severity of wildfires; provide valuable fire suppression training; and control insects, diseases, and invasive plants.

RESULTS

Quantity Performance Measure: Fires and acres burned

Wildfire danger levels relate to the weather. A long-term drought from 2011 to 2013 resulted in high wildfire danger and longer wildfire seasons. Shortened and wet spring seasons in 2014 and 2017 meant fewer fires and acres burned than other years. Through agreements, Minnesota exchanges, and is reimbursed for, firefighters and equipment to support fire suppression efforts with state, federal, and provincial partners. These reciprocal working relationships provide outstanding training to maintain a highly skilled firefighter workforce and are a critical resource for reducing wildfire costs. In FY18, the State of Minnesota filled 139 requests to assist other states with wildfire response. The need for wildfire protection is unpredictable from year to year, but can be a significant workload when weather patterns are dry.

Quality Performance Measure: Wildfire size and response times

The success of the Division's wildfire suppression strategy is due to aggressive initial attack. The Division's goal is to keep wildfires small—fewer than 10 acres—and respond to them within 20 minutes. Once a wildfire escapes initial attack, suppression costs and damages increase rapidly.

The legal authority for the firefighting activity comes from Minnesota Statutes: 88.01-88.46 (<https://www.revisor.mn.gov/statutes/?id=88>).

Program: Parks and Trails

Activity: Parks and Trails Management

dnr.state.mn.us/parks_trails/index.html

AT A GLANCE

- Operate 66 state parks, nine state recreation areas, nine state waysides and nearly 5,000 campsites
- Maintain more than 1,500 miles of state trails, 4,100 miles of hiking/biking/motorized trails in state parks, state recreation areas, and state forest lands, and manage 22,000 miles of snowmobile trails
- Maintain 43 state forest campgrounds, including 29 day-use areas and 12 state forest horse campgrounds
- Maintain 1,700 public water accesses, 360 fishing piers, 35 state water trails
- Contribute to the state's \$13.6 billion tourism industry with 11 of the top 35 Minnesota tourist attractions, and 31 out of 40 of the top tourist attractions in Greater Minnesota
- Restore and maintain 256,000 acres of natural lands and help preserve 285 rare species
- Steward 47 historic districts, nearly 600 historic structures and more than 900 archaeological sites
- Deliver 8,000 outdoor educational programs to 250,000 participants

PURPOSE & CONTEXT

The vision of the Department of Natural Resources (DNR) Parks and Trails Division is to create unforgettable park, trail, and water recreation experiences that inspire people to pass along the love of the outdoors to current and future generations.

State parks and trails make citizens' lives better by connecting them to nature, helping them to stay healthy and fit, strengthening local communities and economies and conserving the state's special places and resources.

Parks and Trails serves out-of-state visitors and residents alike. We offer outdoor recreational opportunities within 30 miles of most people in the state. The Division serves:

- 10 million state park visitors (18 percent are out-of-state).
- Owners of 492,000 registered snowmobiles and off highway vehicles; and 826,000 registered watercraft.
- Local communities, which receive about \$230 million each year from park visitor spending.

SERVICES PROVIDED

The Division of Parks and Trails' work is divided into four categories.

Parks and Trails connects people to the outdoors through our state parks, trails, forest recreation areas and water recreation. The Division's naturalist and outreach programs are aimed at experienced and beginner outdoor enthusiasts. The Division offers skill-building programs so first-timers can explore the outdoors in a safe, engaging way. The Division appeals to outdoor enthusiasts with an eye toward innovative facilities, services and amenities (such as 100 percent reservable campsites, self-directed visitor orientation, and the Park Finder web tool), and popular recreational opportunities like mountain biking and paddle boarding. The Division has received four Governor's Innovation Awards for its services.

Parks and Trails acquires land and create new recreational and conservation opportunities. The Division focuses its acquisition and development on conserving the state's rich natural and cultural history, and meeting future recreation demand. The Division plans ahead to meet the emerging needs of outdoor enthusiasts and use technology to attract and retain outdoor recreation users.

Parks and Trails takes care of what it has and the people it serves. Visitors want high quality customer service, facilities and amenities. With this in mind, the Division invests legacy funds to make improvements to aging infrastructure and reinvigorate visitor services. It also manages unique natural resources for public enjoyment and long-term conservation.

Parks and Trails works with partners. The Division connects with outdoor recreation partners to provide a seamless outdoor recreation system at the local, regional, state and federal level. About 25 percent of the Division’s budget is devoted to grant programs that pass funding through to local governments to meet near-home outdoor recreation opportunities (see Parks and Trails Community Partnerships narrative).

RESULTS

Quantity Performance Measure: Number of State Park Permit Sales

The popularity of state outdoor recreation assets is on the rise, as illustrated by the increase in one-day and year-round permit sales (below). State parks and trails help support healthy communities.

Quantity Performance Measure: Number of Public Water Access Sites Acquired and Developed

The Division maintains public water accesses, state water trails, fishing piers and shore fishing sites. In recent years, its focus has shifted to improving existing water accesses for public safety, storm-water runoff, and aquatic invasive species (AIS) boat-cleaning areas.

Quantity Performance Measure: Miles of Paved State Trails

Miles of paved trails for bicycling have more than doubled since 2000, increasing from 271 in 2000 to 622 in 2017. DNR's expanding trails system provides social and economic benefits to local communities.

Results Performance Measure: Acres of Remnant and Restored Prairie in State Parks and Trails

The Division protects, restores, and maintains native plant communities and wildlife through active management. It restores native plant communities, conducts prescribed burns, and manages AIS on about 13,000 acres every year. The Division currently manages approximately 17,500 acres of remnant/restored prairie and its goal is to restore an additional 11,000 acres of prairie by 2038.

These measures illustrate just a handful of the outcomes DNR achieves through its Parks and Trails Management and Operations. More measures and trends can be found at: State Parks and Trails Studies (<http://www.dnr.state.mn.us/aboutdnr/reports/pat/index.html>)

The legal authority for the Parks and Trails Management and Operations Program comes from Minnesota Statutes: 86A.05 (<https://www.revisor.mn.gov/statutes/?id=86A.05>).

Program: Parks and Trails**Activity: Community Partnerships**dnr.state.mn.us/grants/recreation/index.html

AT A GLANCE

Deliver 370 grants totaling more than \$25 million annually to local governments and organizations for parks and trails. These include approximately:

- 70 grants for acquisition and development of local parks and trails.
- 180 grants for snowmobile trail maintenance and grooming.
- 80 grants for off-highway vehicle trail development and maintenance.
- 40 grants for ski trail maintenance and grooming.

Aid in the development of local trail systems throughout the state by administering grants to volunteer organizations. This “grant-in-aid” (GIA) system includes:

- 21,300 miles of GIA snowmobile trails.
- 1,800 miles of off-highway vehicle trails.
- 700 miles of cross-country ski trails.

PURPOSE & CONTEXT

The Parks and Trails Community Partnership program within the Division of Parks and Trails works to provide grants to organizations and local governments to help create new parks and trails and maintain existing parks and trails.

By creating a seamless system of outdoor recreation, local and regional parks and trails complement the state system and contribute to Minnesota’s overall outdoor recreation goals.

Community partnerships benefit:

- Local communities that receive grants and whose economies benefit from trail associated spending.
- Trails users, including 191,000 snowmobile riders and 318,000 off-highway vehicle riders, and over 19,000 cross-country skiers.

Community parks and trails partnerships help provide for thriving local economies. In Minnesota, outdoor recreation generates \$11.6 billion in annual consumer spending, \$815 million in state and local taxes, and 118,000 jobs (Outdoor Industry Association surveys, 2012). Local and regional parks and trails are an important part of the state’s outdoor recreation industry.

SERVICES PROVIDED

The Division provides grants to local governments and organizations for parks and trail acquisition, development, rehabilitation, grooming, maintenance and operations. It administers a variety of grant programs focusing on outdoor recreation, regional parks and trails, local trail connections, as well as Grant-in-Aid (GIA) programs for snowmobile, off-highway vehicle, and cross-country ski trail users. The Division manages federal programs such as the Federal Recreational Trail Program and the Land and Water Conservation Fund.

The Division’s grant administration services include managing the grant programs, providing information and customer service to grant recipients, ensuring a fair and efficient process for grant selection, ensuring financial accountability, and building partnerships with local, regional, state and federal programs.

RESULTS

Quality Performance Measure: Miles of New Local Trail Connections Developed

The Division aims to achieve high satisfaction among grant recipients while meeting state and federal grant management standards. The goal is for grants to contribute to a comprehensive outdoor recreation system in Minnesota.

The Local Trail Connections Program is one example where the Division facilitates new trail connections. These trail segments may be relatively short in length, but are often necessary to create a seamless trail system that meets local needs. These trail segments may create connections to where people live (such as residential areas within cities or entire communities) and to significant public resources (such as historical areas, parks and/or other trails).

During the last ten years, over 60 miles of new local trail connections have been developed.

Quantity Performance Measure: GIA Trail Miles Cooperatively Developed and Maintained

The Division manages the Grant-in-Aid (GIA) program, a cost-sharing system of snowmobile, off-highway vehicle, and cross-country ski trails. The GIA trail system has grown by about 2,700 miles in recent years from 21,300 miles in FY09 to 24,000 miles in FY18. This program relies on groups or clubs with the support and participation of local governments. The Division provides financial and technical assistance and overall GIA program management. Together, they develop and maintain a much larger trail system than any one group could deliver.

Additional measures are available on DNR's grant outcomes website at [DNR Grant Outcomes Reporting](http://www.dnr.state.mn.us/grants/outcomes/index.html)
(<http://www.dnr.state.mn.us/grants/outcomes/index.html>)

Program: Fish and Wildlife**Activity: Fish and Wildlife**dnr.state.mn.us/fishwildlife/index.htmldnr.state.mn.us/rfp/index.html

AT A GLANCE

- Manage nearly 1.3 million acres of state-owned wildlife management areas and 46,000 acres of aquatic management areas
- Protect, monitor, enhance, and restore aquatic habitat for 4,500 fishing lakes and 15,000 miles of fishable streams and rivers in Minnesota
- Manage 61 wildlife and 28 sport fish game species
- Provide quality outdoor opportunities to 1.5 million licensed anglers, 557,000 licensed hunters and trappers, and 1.6 million wildlife watchers
- Build local conservation capacity by providing \$11 million of outdoor heritage funds in competitive matching grants to nonprofit organizations or local governments in metropolitan and greater Minnesota
- Manage 2.4 million license sales for hunting, fishing, and other activities, and 1.4 million registrations for recreational boats and vehicles
- Engage 1,500 Minnesota businesses as point-of-sale agents for hunting and fishing licenses and 170 registration and titling agents
- Deliver programs to support angler and hunter recruitment, retention and reactivation, reaching more than 274,000 participants annually and awarding \$479,000 in grants to external partners

PURPOSE & CONTEXT

The goal of the Fish and Wildlife Division is to sustain healthy populations of fish and wildlife, high quality recreational opportunities, and vibrant local economies. It manages fish and wildlife populations, their habitats, and use of these public resources, including fishing, hunting, and trapping. The Division serves citizens seeking hunting and fishing licenses and recreational vehicle registration and titling. To fulfill this work, it also serves licensing agents and deputy registrars.

The Division provides information on hunting and fishing seasons and harvest regulations to the public through webpages, printed regulations booklets, and press releases. It introduces hunting and angling to new participants through programs ranging from Learn-to-Hunt and Learn-to-Fish to capacity-building grants for partner groups delivering programs. In partnership with citizens, the Division protects and restores natural lands, lakes, and streams, monitors harvested species, and promotes the state's hunting, fishing and trapping heritage. Hunters, anglers, and wildlife viewers and photographers benefit from diverse, abundant species, accessible public lands, and high quality recreational experiences.

The Division provides licensing and recreational vehicle services through use of the Electronic Licensing System (ELS) in an efficient and cost effective manner, including web, telephone, and mobile-device options.

Access to natural lands and participation in outdoor recreation benefits personal health and helps sustain Minnesota's hunting and fishing heritage. This boosts Minnesota's economy, especially in rural communities, by supporting more than 48,000 jobs and generating \$3.8 billion in statewide economic activity.

SERVICES PROVIDED

The Division's work is divided into four categories:

1. **Fish and Wildlife monitors and manages fish and wildlife populations:** To ensure high quality fishing, hunting, trapping and wildlife watching, the Division monitors and manages fish and wildlife populations for the benefit of citizens. The Division:
 - Conducts surveys to 1) monitor fish and wildlife population trends, 2) inform management decisions, including harvest regulations, and 3) assess values and attitudes of anglers, hunters, and landowners and to evaluate changes in participation and resource use.
 - Uses research to understand and predict changes in fish and wildlife populations and to inform management decisions.
 - Raises and stocks walleye, muskellunge, northern pike, trout, salmon, and other game fish species to enhance or restore fish populations in lakes and streams or to establish new fishing opportunities.
 - Monitors and manages diseases to reduce risk of outbreaks and high fish and wildlife losses.
 - Reduces human-wildlife conflicts by monitoring wildlife damage and providing assistance to property owners and growers to prevent or reduce damage.
2. **Fish and Wildlife protects, restores, and enhances key fish and wildlife lands:** To help sustain healthy, productive fish and wildlife populations, the Division:
 - Manages more than 1.3 million acres of wildlife and aquatic habitat.
 - Contributes to improved habitat management on other public and private lands through technical and financial assistance.
 - Acquires lands through purchase or donation to add high priority parcels to the system's land base which are then enhanced or restored.
 - Enhances and restores grasslands and prairie, conducts prescribed burns and remove woody vegetation to enhance prairies, restores and enhances wetlands, manages forest stands, conducts wildlife lake assessments, improves fish spawning areas, protects and enhances aquatic habitats, and removes dams and restores functions to aquatic systems.
 - Provides public awareness and access to state lands through posting boundaries, providing parking lots and walking trails, and providing maps (digital and paper) and other user information.
3. **Fish and Wildlife connects people to the outdoors through hunting, fishing, and citizen engagement:** Citizen understanding and support is critical to healthy environments. The Division improves citizen engagement through roundtables, workshops, public input, county and state fairs, customer surveys, web surveys, and other tools. It works with partners to provide information and educational opportunities that encourage outdoor recreation and sustain or increase participation in fishing and hunting. This work includes: mentored hunts, the National Archery in the Schools program, skills-based training, youth and women's programs, direct engagement of Southeast Asian and other under-represented communities, MinnAqua, Becoming An Outdoors Woman/Family program, and Fishing In the Neighborhood. The Division shares with citizens large volumes of information about fish and wildlife populations, habitats, and recreational opportunities. It communicates this information through print media, a website, social media, mobile devices, and video.
4. **Fish and Wildlife provisions hunting and fishing licenses and recreational vehicle titles and registrations:** The Division is responsible for the development, implementation, and maintenance of the statewide electronic licensing system (ELS). We provide easy access for outdoors enthusiasts to purchase hunting and fishing licenses at any of the 1,500 ELS agent locations. Customers can also purchase by phone, mobile-device, and online. The Division has a walk-in service counter in Saint Paul that provides service to customers for all types of license, registration and titling transactions. Commercial licenses are issued for businesses such minnow dealers, game farms, and shooting preserves, and the Division manages the lottery system for turkey, antlerless deer, bear, and elk seasons.

The Division issues all watercraft registration and titles and the registration of all-terrain vehicles (ATVs), snowmobiles, off road vehicles (ORVs), and off-highway motorcycles (OHMs) through the web-based ELS.

RESULTS

Results Performance Measure: Acres Protected in Wildlife Management Areas

The Wildlife Management Area (WMA) system is the backbone of DNR's wildlife program. WMAs provide for public recreation and wildlife production. A stable to moderate increasing base of WMA acres has been achieved in recent years.

Results Performance Measure: Cisco catch per net since 1970

Cisco (or tullibee) are an important forage fish for walleye, northern pike, and muskellunge. Cisco are an early indicator of environmental changes impacting cool water lakes due to their sensitivity to water temperatures and oxygen levels.

Quality Performance Measure: New License Purchases

Although fishing and hunting participation rates are higher in Minnesota than nationwide, overall rates are declining. Angling and hunting activities directly fund state fish and wildlife management through license purchases and federal equipment excise taxes. Outreach efforts focus on recruiting and retaining citizens interested in healthy fish and wildlife populations, habitat, and recreation.

Quantity Performance Measure: Number of Licenses Sold

The Division adjusts license availability annually based on multiple factors, including species population estimates. The Division has sold fewer licenses for sale during recent years. However sales are expected to trend upward during the coming years because of forecasted population growth.

The legal authority for the Fish and Wildlife program comes from the following Minnesota Statutes:

17 (<https://www.revisor.mn.gov/statutes/?id=17>)
84 (<https://www.revisor.mn.gov/statutes/?id=84>)

AT A GLANCE

- 189 conservation officers providing outreach, safety education training, and law enforcement of our state's natural resources for citizens and visitors
- Engage in over 1,400 outreach opportunities annually
- Certified over 43,000 students in safety education programs by working with 6,000 volunteer instructors in all counties in the state
- Administered over 340 state and federal grants to user groups and local law enforcement partners for outreach, safety education, and enforcement of motorized recreational vehicle laws and regulations
- Worked with over 100 nonprofit shooting sports organizations to increase capacity for high-school shooting sports and recreational shooting through infrastructure improvements and expansions
- Provide 4,200 hours of flight operations to support resource management and public safety

PURPOSE & CONTEXT

As the primary conservation law enforcement agency in Minnesota, the Enforcement Division fulfills the Department of Natural Resources' (DNR) mission by protecting natural resources and public safety. Protecting public safety is the Division's highest priority. Its role in protecting natural resources has grown from traditional game and fish enforcement to broader natural resource protection responsibilities that affect quality of life and economic sustainability. It achieves compliance with laws and regulations through outreach, safety education, and law enforcement.

Enforcement's 10-year strategic plan addresses how it will accomplish its work in the face of new, broad trends. A decline in outdoor recreation participation means a decline in licenses and permit revenue, which impacts the funding for traditional enforcement activities. At the same time, there are increasing demands for enforcement of invasive species, water appropriation, disaster response, and other natural resource protection laws.

SERVICES PROVIDED

The Division's work includes outreach, safety education, and law enforcement in four main areas:

1. Fish and Game Education and Protection

- Work with recreational and commercial users to protect fish and game populations.
- Manage youth and adult hunting safety education programs.
- Recruit new users through outreach opportunities and shooting range development.

2. Recreational Safety and Enforcement

- Work with motorized and non-motorized recreational users to enforce recreational laws and regulations.
- Deliver recreational motorized safety education.

3. Natural Resource Protection

- Enforce regulations related to invasive species, wetland protection, water appropriation, water quality, solid waste, timber theft, and air quality.
- Work with partner regulatory agencies to educate user groups on the state's natural resource laws and regulations.

4. Public Safety

- The licensed peace officers of the Division work within the emergency management system to provide mutual-aid assistance in response to disasters, search and rescue, and law enforcement.

RESULTS

Quantity Performance Measure: Number of Minnesotans Certified in Firearms Safety and Hunter Education Programs. Outreach efforts continue to increase the number of women certified in firearms safety and hunter education programs.

The legal authority for the Enforcement Program comes from Minnesota Statutes:

84.028 (<https://www.revisor.mn.gov/statutes/?id=84.028>)

Program: Operations Support

Activity: Operations Support

dnr.state.mn.us/aboutdnr/commissioner/index.html

AT A GLANCE

- Direct budget and accounting for effective use of approximately \$565 million per year
- Provide human resource services to 4,300 employees
- Maintain more than 3.8 million square feet of space at more than 2,900 owned or leased buildings of various age, construction, use, and lifecycle statewide
- Manage more than 5,000 pieces of fleet equipment made up of approximately 3,400 fleet land operated items, 1,800 watercraft, and 12 aircraft
- Coordinate with MN.IT Services @DNR to host 190 business-enhancing information technology (IT) applications for the Department of Natural Resources (DNR)
- Provide support for the DNR website, which had more than 80 million webpages viewed in FY18
- Managed more than 106,384 calls and emails by the DNR Information Center

PURPOSE & CONTEXT

The Operations Support program provides leadership direction and support for the Department of Natural Resources (DNR). Operations Support ensures that its mission is carried out in an integrated and efficient manner through its services in partnership with DNR divisions. Operations Support's professionals in communications, human resources, budget, internal audit, fleet and building services work together to make sure DNR's workforce is supported and have the resources to complete their work. Operations Support works within Minnesota's regulatory framework to accomplish the agency's goals. Its work is focused on operational excellence and continuous improvement to provide better conservation service delivery.

SERVICES PROVIDED

Operations Support supports the agency's operations in the following ways:

- Provides administrative leadership and direction for the department, government relations management, capital investment, and management of regulatory activities, including business services as set forth in Minnesota statute.
- Supports staff through human resources services including labor relations, ethics, employee development, payroll, and hiring services.
- Manages safety, emergency preparedness, and disaster response (non-fire emergency).
- Maintains fleet, buildings, and infrastructure that support its conservation mission.
- Administers financial operations and biennial budget processes for the department's critical functions including revenues, expenditures, internal audit and procurement services.
- Utilizes policy and planning services to ensure operations are coordinated to achieve priorities.
- Engages the public through communication services that build staff and public awareness, trust, and support through clear and transparent plain language.
- Provides leadership and management for IT services that support daily activities.
- Administers engineering and architectural services for the department.
- Provides legal support for DNR programs.
- Provides leadership and assistance for regional offices for interdisciplinary delivery of DNR services at the local level, with headquarters in Bemidji, Grand Rapids, Saint Paul, and New Ulm.

RESULTS

Results Performance Measure: Light vehicle fuel consumption and renewable energy generation. This chart shows an increase in the amount of renewable energy generated by Operations Support's renewable energy systems and an overall decrease in light vehicle fuel consumption. Cutting overall energy use and increasing the use of renewables is a key agency priority.

*A new fleet data system was implemented part way through FY12, so data is incomplete or not available for that year.

Quantity Performance Measure: DNR Customer Service. Extended service hours in Operations Support's One Call Information Center demonstrates its commitment to meeting the needs of its customers. This chart shows evening and weekend calls increased by 75 percent from FY17 to FY18, providing better service to the public.

*Evening and weekend hours began in November FY17

The legal authority for Operations Support comes from the following Minnesota Statutes and Minnesota Constitution:

Chapter 84 (<https://www.revisor.mn.gov/statutes/cite/84>)

Chapter 16A (<https://www.revisor.mn.gov/statutes/cite/16A>)

Article 11 (https://www.revisor.mn.gov/constitution/#article_11)

Program: Pass Through Funds

Activity: Pass Through Funds

AT A GLANCE

- Provide approximately \$37 million each year to counties for payment in lieu of taxes
- Arrange for \$8.7 million in Native American tribe payments in FY17
- Manage roughly 210 grant contracts totaling more than \$310 million of environmental trust and outdoor heritage legacy funds in FY18
- Provide \$4.3 million to local governments from the parks and trails legacy fund in FY17
- Provide \$320,000 to the Duluth and Como Zoos each year

PURPOSE & CONTEXT

Pass-through funds administered by the Department of Natural Resources (DNR) include funds directed to non-state entities by statute, law, or agreement. Since the DNR does not determine who receives the funds and cannot use them for its own operations, these funds are commonly referred to as “pass through.”

The DNR is responsible for being a fiscal steward of these funds. To this end, it establishes sound business management practices that are consistent with state law, statewide grant management policies, and internal policies.

The financial activity in this budget activity reflects the dollars that DNR sends directly to non-state entities and reimbursements for statewide services, such as the statewide accounting and human resources systems, that are paid for from the general fund. Administrative costs associated with the management of pass through dollars is recorded by the division that serves as the steward for assigning and monitoring the funds.

Recipients of these funds are partners in promoting and advancing the broader goals of protecting and preserving the state’s natural resources. Pass-through funds include:

- Payment in lieu of taxes (PILT).
- Tribal agreements.
- Environmental and natural resource trust fund grants to third parties.
- Outdoor heritage fund grants to third parties.
- Parks and trail legacy fund grants to local units of government.
- Lottery-in-lieu grants to the Duluth and Como Zoos.
- Other grants as specified by law.

SERVICES PROVIDED

DNR calculates approximately \$37 million annually for PILT. PILT is a local government aid payment made by the state to counties for tax-exempt natural resource lands according to Minnesota statutes 477A.10-14 and 17. Most of the payments are for state-owned land and school trust land that is administered by the DNR and for county-administered tax forfeited land.

DNR makes payments of roughly \$8.7 million each year to Native American tribes as a result of agreements where the tribes have agreed to forgo certain treaty rights. According to MS 97A.151 subd. 4 and 97A.155 subd. 1, the Leech Lake Band receives 5 percent of specific game and fish proceeds. Per MS 97A.157 subd. 2 and the area agreement, the Grand Portage Band and Bois Forte Band receive \$1.6 million annually plus additional funds if the

payment to the Leech Lake Band exceeded \$1.5 million in the previous fiscal year. The additional payment is equal to the amount in excess of \$1.5 million.

DNR manages approximately 210 grants a year totaling over \$310 million dollars to third party recipients identified by the legislature from the environmental and natural resources trust fund and the outdoor heritage fund (OHF). The purpose of the trust fund is to maintain and enhance Minnesota's environmental and natural resources. The purpose of the OHF is to restore, protect, and enhance wetlands, prairies, forests, and habitat for fish, game, and wildlife that prevent forest fragmentation, encourage forest consolidation, and expand restored native prairie.

DNR provides about \$4.3 million to local units of government from the parks and trails legacy fund for acquisition, development, restoration, and maintenance of park and trail facilities of regional or statewide significance.

RESULTS

Quantity Measure: Total pass through dollars each year

DNR provides responsible management for all dollars that it is legally accountable to provide to non-state entities. The table below demonstrates the amount that has been expended in the recent past.

TOTAL AMOUNT OF PASS THROUGH FUNDS BY YEAR
Data source: StateWide Integrated Financial Tools System

2013	2014	2015	2016	2017
84,537,043	96,455,370	102,392,810	90,760,207	82,664,842

The legal authority for the grants management process comes from [Minnesota Statutes 16B.98](https://www.revisor.mn.gov/statutes/?id=16B.98) (https://www.revisor.mn.gov/statutes/?id=16B.98).

Narrative

Federal funds are accepted at the DNR when they support the mission, strategies, goals and objectives found in the DNR's Strategic Conservation Agenda. The Federal Funds Summary Table lists anticipated revenues for incoming federal funds, their use, number of FTE positions needed to implement, and whether funds are new and require a state match and/or maintenance of effort. Federal funds include discretionary continuing programs, funds based on funding formulas, competitive grants, non-competitive grants, and project grants.

Federal Fund accounts include:

1. Incoming federal grant or federal cooperative agreement revenue deposited directly to a federal (3000 fund) account.
2. Federal grant funds awarded to the DNR that are then passed-through to another entity.

Outgoing grants funded from federal dollars are estimated throughout the spending period of the grant, rather than estimated in the first year of the grant award. Estimates are based on the best federal funding information available at the time this report is prepared. Most new federal awards that impact state fiscal years 2020-2021 have not yet been confirmed. Therefore, we used historical trend information from recent years to estimate future revenues, as well as any knowledge of changing funding levels or trends that may impact future awards.

Specific funding level changes or trends by division include:

- Enforcement Division: Assumed responsibility for the Boating Safety Financial Assistance Program (CFDA 97.012) previously administered by the Parks and Trails Division.

Major state funding is required related to the federal awards listed in this summary as many grants are implemented on a reimbursement basis and may require a state match or a maintenance of effort.

(Dollars in Thousands)

Program Name Federal or State or Both (citation)	Purpose	Recipient Type(s) Eligibility Criteria	FY 2018	FY 2019
AIS Control Projects (State, Natural Resources) 84D.10	For the control of curly-leaf pondweed, Eurasian watermilfoil, and flowering rush using herbicides, mechanical control, or a combination of both to support projects that have received an Invasive Aquatic Plant Management Permit.	Lake associations, watershed districts, cities, and counties	\$95	\$18
AIS Public Awareness Projects (State, Natural Resources) 84D.10	To help prevent the spread of aquatic invasive species (AIS), especially zebra mussels and spiny waterfleas, into Minnesota waters.	Lake associations, tribal organizations, coalitions of lake associations, local citizen groups, local units of government		
Angler and Hunter Recruitment and Retention Grant Program (State, Game and Fish) ML 2015 1st SS, Chapter 4, Art 3, Sec. 3 sub 6 and Sec 11	Help local groups support MN's angling and hunting heritage.	Must have a mission or educational purpose that supports hunter and angler recruitment and retention	\$97	\$150
Archery in the Schools (State, Game and Fish) Coop Funds Account Heritage Funds	Introduces Minnesota students to archery by providing schools with the best equipment, training, and curriculum available at the lowest possible price. It is part of the National Archery in the Schools Program (NASP).	Minnesota Schools	\$35	\$35
Boating Infrastructure Grants Program (Federal, Department of the Interior, Fish and Wildlife Service) CFDA 15.622	Provide grants to State and Territories to construct, renovate, or maintain tie-up facilities for up to 15 days for transient recreational vessels 26 feet or more in length	Private individuals, organizations, state and local agencies.		
Clean Vessel Act Grants (Federal, Department of the Interior, Fish and Wildlife Service) CFDA 15.616	Encourage the development or improvement of marina sanitation facilities for boaters in order to maintain and improve water quality in public waters.	Private individuals, organizations, state and local agencies.		
Community Assistance Program - State Support Service Element (CAP-SSSE) (Federal, Department of Homeland Security) CFDA 97.023	Support costs of MnAFPM annual conference that is held to educate local officials and other professionals on floodplain mapping, management, mitigation, etc.	MN Association of Floodplain Managers (MnAFPM) to support costs of annual conference providing training and updates to local officials and professionals involved in floodplain management	\$2	
Community Assistance Program - State Support Service Element (CAP-SSSE) (Federal, Department of Homeland Security) CFDA 97.023	Construct enhanced reality floodplain simulator, and produce educational videos to use with simulator	St. Cloud State University - constructing enhanced reality floodplain simulator and educational videos using simulator	\$5	

Program Name Federal or State or Both (citation)	Purpose	Recipient Type(s) Eligibility Criteria	FY 2018	FY 2019
Community Assistance Program - State Support Service Element (CAP-SSSE) (Federal, Department of Homeland Security) CFDA 97.023	Produce MN Floodplain management Quick Guide in accessible pdf format	Producing MN Floodplain Management Quick Guide		\$10
Conservation Partners Legacy (State, Legacy, Outdoor Heritage Fund) M.L. 2018, Chapter 208, Article 1, Section 2, Subd. 5 c	Funds conservation projects that restore, enhance, or protect forests, wetlands, prairies, and habitat for fish, game, and wildlife in Minnesota.	Nonprofit organizations and government entities	\$8,660	\$11,053
Cross Country Ski Trail Grant in Aid (State, Natural Resources) M.S. 85.44	Encourage the maintenance and development of cross country ski trails.	Counties, cities, townships, and private trail organizations sponsored by a local unit of government	\$286	\$286
CTP Grant to Twin City HUC8 Watershed Organizations (Federal) CFDA: 97.045	Development of FEMA Flood Risk Database	sole source, identified in grant from FEMA	\$40	\$420
CTP Grant to Wild Rice Watershed District (Federal) CFDA: 97.045	Development for FEMA Flood Risk Products	sole source, identified in grant from FEMA	\$5	
Dam Safety (State General Fund, Bonding) M.S. 103G.511	Improve the safety and condition of publicly owned dams and water level control structures.	Cities, counties, townships, watershed districts	\$900	\$2,000
Division of Forestry Cost Share program (State General Fund) 89.018	Forest stewardship management planning assistance and cost share for forestry practices/projects. Primary purpose is to encourage landowner management of forest land and potential timber sale harvests as a management tool.	Nonindustrial private landowners who have 20-1,000 acres of land with 10 acres of woody vegetation after the plan has been implemented. The cost share is available statewide.	\$500	\$600
Federal Recreational Trail (Federal, Department of Transportation, Federal Highway Administration) CFDA 20.219	Encourage the maintenance and development of motorized, non-motorized, and diversified trails by providing funding assistance.	Sponsored by a unit of government, preferably in cooperation with a local trail organization	\$1,800	\$2,500
Firewise Community Mitigation (Federal, Department of Agriculture, Forest Service) CFDA 10.664	Through Firewise, we partner with agencies, municipalities, organizations, and homeowners to identify, plan for and reduce wildfire risk. Grant funding supports local groups and require a 50/50 cash or in-kind match.	Fire department district, organized township, city, or county	\$346	\$350
Flood Hazard Mitigation (State General Fund, Bonding) M.S. 103G.161	Provide financial and technical assistance to local governmental units for conducting flood damage reduction studies and for planning and implementing flood damage reduction measures.	Cities, counties, townships, watershed districts, watershed management organizations and lake improvement districts	\$8,156	\$17,000

Program Name Federal or State or Both (citation)	Purpose	Recipient Type(s) Eligibility Criteria	FY 2018	FY 2019
Grant to Koronis Lake Association (State, Natural Resources) ML 2017 Chapter 93 Art 1 Sec 3 Subd 3(j)	For the purpose of removing and preventing aquatic invasive species	Legislatively named to the Koronis Lake Association	\$33	\$167
Improving Community Forests Through Citizen Engagement (State, Environment and Natural Resources Trust Fund) ML 2015, Chapter 76, Sec 2, Sub 8h	A grant program supplying approximately \$400,000 to an estimated 8 to 12 Minnesota cities and towns to support urban and community forestry (planting new trees, creating and maintaining gravel tree beds, watering new trees, recruiting and training citizen volunteers, developing a citywide urban forestry plan, updating tree inventories, pruning trees, and conducting early detection of pests and disease presence in priority areas).	All political subdivisions of Minnesota as well as non-governmental organizations	\$135	\$172
Local Trail Connections Program (State, Natural Resources) MS. 85.019	Promote relatively short trail connections between where people live and desirable locations. Not to develop significant new trails.	Counties, cities, and townships	\$600	\$1,300
Long Term Resource Monitoring (Federal, Department of the Interior, U.S. Geological Survey) CFDA 15.978	Monitor long-term trends of water quality, aquatic vegetation, & fish on Pool 4 of the Mississippi River; analyze & summarize the data and provide that information to decision makers.	Six LTRM Program field stations in the five Upper Mississippi River states	\$535	\$628
Minnesota Snowmobile Trails Assistance (Grant in Aid) (State, Natural Resources) M.S. 84.83	Creation and maintenance of locally initiated trails that were financially assisted by the state.	Counties, cities, townships, and private trail organizations sponsored by a local unit of government	\$7,382	\$8,449
Minnesota's Lake Superior Coastal Program (Federal, Department of Commerce, National Oceanic and Atmospheric Administration) CFDA 11.419	Support costs of MnAFPM annual conference that is held to educate local officials and other professionals on floodplain mapping, management, mitigation, etc.	Regional planning agencies; state agencies; non-profit agencies; colleges and universities; public school districts in the coastal area; conservation districts; port authorities; tribal governments; joint powers boards; sanitary sewer boards; cities, townships, and counties within the coastal area; area-wide agencies. Projects must be located within Minnesota's coastal area, which includes portions of Carlton, St. Louis, Lake and Cook Counties (maps available at www.mndnr.gov/mlscp)	\$520	\$525
Monitoring Starry Stonewort Control Projects (Federal GLRI / State, Natural Resources) CFDA 15.662	These grant funds must be used to help pay for DNR approved monitoring of starry stonewort control projects.	local entities such as lake associations, watershed districts, cities, and counties who have received a permit to control starry stonewort.	\$11	\$12

Program Name Federal or State or Both (citation)	Purpose	Recipient Type(s) Eligibility Criteria	FY 2018	FY 2019
National Outdoor Recreation Legacy Partnership Program (Federal, Department of Agriculture, Forest Service) CFDA 10.676	Create or reinvigorate parks and other outdoor recreation spaces located in jurisdictions delineated by the Census Bureau for the 2010 Census as comprising densely settled territory that contains 50,000 or more people.	State agencies, political subdivisions such as cities, counties, and special purpose districts such as park districts, and federally-recognized Indian tribes that are organized to govern themselves and perform the functions of a general purpose unit of government.		\$750
Natural and Scenic Area (ENRTF, Federal LAWCON) CDFA 15.916 MS. 85.019	Increase, protect and enhance natural and scenic areas.	Cities, counties, and townships		\$690

AT A GLANCE

- 109,250 Registered Nurses
- 21,525 Licensed Practical Nurses
- 8,525 Advanced Practice Registered Nurses
- 18,750 Public Health Nurse Registrations
- 1,110 jurisdictional complaints
- 89 nursing education programs

PURPOSE

The Board of Nursing's purpose is to protect the health, safety and welfare of the public in their receipt of nursing services. The Board carries out its mission by regulating nursing education, licensure and practice. These functions contribute to the statewide outcomes that **all Minnesotans have optimal health and people in Minnesota are safe**. The agency strives for **efficient and accountable government services** through innovation, technology, and internal controls.

BUDGET

**Spending by Category
FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

The Board is funded by licensure fees and receives no general fund dollars. Minnesota Statutes section 214.06, subdivision 1(a) compels the Board to collect fees in the amount sufficient to cover direct and indirect expenditures. Funds are deposited as non-dedicated revenue into the state government special revenue fund. From this fund, the Board receives a direct appropriation to pay for agency expenses such as salaries, rent, costs associated with disciplinary/contested cases and operating expenditures. It also pays statewide indirect costs through an open appropriation. Fees have not been raised since 2001.

In addition to Board operations, licensure fees fund activities that support multiple boards and/or other agencies. Some of these are: the Administrative Services Unit (inter-board), Health Professionals Services Program (inter-board), HIV, HBV and HCV Prevention Program (Department of Health), Prescription Monitoring Program

(Pharmacy Board), Office of the Attorney General for legal services, Criminal Background Check Program (inter-board), and the Voluntary Healthcare Provider Program (inter-board).

STRATEGIES

The Board of Nursing holds nurses accountable to legal, ethical, and professional standards. The Board achieves its mission of public protection by defining these standards and issuing licenses to practice nursing. Once a license is issued, the Board monitors licensees' compliance to state laws and takes action against the licenses of those nurses who have exhibited unsafe nursing practice and who present a risk of harm to the public.

The Board contributes to the statewide outcome that **people in Minnesota are safe** by:

1. Ensuring an ethical and competent nursing workforce by reviewing credentials and providing a legally defensible nurse license examination. The Board of Nursing licenses registered nurses, licensed practical nurses, and advanced practice registered nurses, and registers public health nurses to ensure that the individuals who practice nursing in Minnesota have the requisite education, competence, and ethical character to practice nursing safely and effectively.
2. Establishing and conducting a complaint investigation process that is expedient, just, and commensurate with the perceived risk to public safety. The Board investigates complaints and takes action against nurses who violate the Nurse Practice Act. This action includes removing nurses from practice who are a risk to patient safety and monitoring nurses whose practice requires remediation and oversight to ensure public safety.
3. Upholding nursing education standards through consultation and survey. The Board monitors program graduation pass/fail rates on the national nurse licensure examination; facilitates innovative approaches to address nursing workforce and nursing faculty shortages; provides consultation to nursing education programs regarding national nurse licensure examination (NCLEX®) pass rates; conducts research to promote a safe, competent and sufficient nursing workforce; and advises prospective nursing students regarding educational tracks and scholarships.
4. Analyzing and disseminating data for use in regulatory decisions. The Board provides employers and the public with verification of a nurse's authority to practice. Additionally, data is submitted to required national and federal databases and other county and state government agencies. The Board also participates in the collection of nursing workforce data to inform decision making related to educational planning, workforce development and emergency preparedness.
5. Collaborating in statewide initiatives on nursing practice, education and patient safety. The Board promotes standards of safe nursing practice by interpreting relevant laws and rules. The Board participates in nursing practice forums with nursing organizations and other state agencies to establish nursing performance guidelines for safe nursing practice so that employers and consumers can make informed decisions regarding the performance of nursing services.

Minnesota Statutes sections 148.171-148.285 (<https://www.revisor.mn.gov/statutes/?id=148.171>) provides the Board of Nursing with legal authority to regulate nursing practice for the purpose of public protection. Chapter 214 prescribes further authority related to investigations and discipline procedures of the Board and other health-related licensing boards. Chapters 13 (Government Data Practices), 14 (Administrative Procedures) and 15 (State Agencies in General) all provide guidance to the Board's operations.

Net Fiscal Impact = (Expenditures – Revenues)	112	112	112	112
FTEs	0	0	0	0

Recommendation:

The Governor recommends additional funding of \$224,000 in the FY 2020-2021 biennium to maintain the current level of service delivery at the Board of Nursing.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year. The proposed increase anticipates 2% per square foot rent increase, an outsourcing scanning project to convert paper discipline records to a scanned document system, and increases in salaries and benefits.

The Board is entirely fee supported and receives no General Fund dollars to provide all services. Fees must be collected to cover direct and indirect expenditures, deposited as non-dedicated revenue into the State Government Special Revenue Fund (SGSRF). The Board is granted authority to use these fees by the Minnesota Legislature to pay for all expenses incurred by the Board. The Board collects sufficient revenue to cover all expenses.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the Board of Nursing, this funding will cover known employee compensation growth, rent, and an IT project.

Small Agency Increase:	FY2020	FY2021	FY2022	FY2023
Salary Increases (current staff increases)	96,000	96,000	96,000	96,000
Rent Increases	6,000	6,000	6,000	6,000
Outsource Scanning Project	10,000	10,000	10,000	10,000
Total	\$112,000	\$112,000	\$112,000	\$112,000

Equity and Inclusion:

The Board does not discriminate on the basis of race, ethnicity, gender, sexual orientation, or disability. The positive impact of this change will be to provide services for all people of the State of Minnesota without discrimination.

Results:

This proposal will provide the Board with sufficient staff resources and space to meet its mandate to protect the public and provide efficient government services through providing current levels of service and information to the public.

AT A GLANCE

- The Board's main function is licensing Nursing Home Administrators
- Serves as the fiscal agent for the Administrative Services Unit (ASU)

PURPOSE

The Minnesota Board of Examiners for Nursing Home Administrators (BENHA) was established in 1970. The board is responsible to act as the official licensure agency for nursing home administrators. BENHA works to promote safe living and thriving environments for Minnesota elders and to promote strong families and communities. This is completed by having strong academic and preparatory requirements for nursing home administrators.

BENHA has an additional budgetary responsibility as the fiscal agent for the Administrative Services Unit (ASU):

BUDGET

FY 17 includes spending for both Board of Nursing Home Administrators and the Administrative Services Unit

Source: Budget Planning & Analysis System (BPAS)

FY 06-17 includes spending for both Board of Nursing Home Administrators and the Administrative Services Unit and the Criminal Background Check Program

Source: Consolidated Fund Statement

BENHA: The Board is funded by licensure fees and receives no general fund dollars. Minnesota Statutes section 214.06, subdivision 1(a) compels the Board to collect fees in the amount sufficient to cover direct and indirect expenditures. Fees have not been increased since 1995.

ASU: All 18 health related and non-health-related licensing boards fund the operations of Administrative Services Unit and the Criminal Background Checks Program.

STRATEGIES

BENHA: The eleven governor-appointed citizens serving on the Minnesota Board of Examiners for Nursing Home Administrators (BENHA) ensure that sufficiently trained leaders are accountable for their actions without imposing unintended barriers or restrictions of elder care campuses. The licensure of Nursing Home Administrators is a federal requirement affecting Medicare and Medicaid funding.

ASU: The Administrative Services Unit (ASU) is the centralized business office and provides subject matter experts on financial, human resource, contracting, and other common office services. This allows each board to focus their staff resources on public safety and board specific practices.

The authorizing Minnesota statute for BENHA is M.S. 144A.19-144A.28:

<https://www.revisor.mn.gov/statutes/?id=144A&view=chapter#stat.144A.19>

The Minnesota Rules for BENHA are located at: <https://www.revisor.leg.state.mn.us/rules?id=6400.5000>

Recommendation:

The Governor recommends additional funding of \$137,000 in the FY 2020-2021 biennium to maintain the current level of service delivery at the Board of Examiners for Nursing Home Administrators (BENHA).

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the Board of Examiners for Nursing Home Administrators, this funding will cover a shared staff individual serving three boards, rent, and MN.IT services. IT cost growth drivers may include dedicated MN.IT staff compensation-related increases, increased volume usage of enterprise IT services, increased software licensing costs, and/or application support and maintenance cost increases.

Nursing Home Administrators, Board of Examiners for

FY 2020-21 Biennial Budget Change Item

Change Item Title: Fee Increase

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	41	41	75	75
Net Fiscal Impact = (Expenditures – Revenues)	(41)	(41)	(75)	(75)
FTEs	0	0	0	0

Recommendation:

The Governor recommends funding a ‘not to exceed’ fee increase for the Minnesota Board of Examiners for Nursing Home Administrators. This proposal will also cover expenses to move fees as required from Rules to Statutes.

Rationale/Background:

The last fee increase occurred in 1995. Fees have not increased for 23 years and the board requires both a fee increase and spending authority to maintain its essential core functions. Currently, the Board does not collect fees sufficient to fund budgeted expenses.

The Board requires a fee adjustment to eliminate a gap between board-generated revenues and appropriations, as well as to support additional spending for IT expenses, Criminal Background checks, the Automated Licensure Information Maintenance System (ALIMS) contracts, rent, and return to the previous staffing level of 2.0 full time equivalents. Board members carefully monitor both fees and expenses.

The Board of Examiners for Nursing Home Administrators, like the other health-related license boards, is a fee-supported agency that receives no General Fund dollars. While the legislature appropriates the Board’s biennial budget, fees must be sufficient to fund all expenditures, which this board is currently not in compliance. Each year the board will approve their fee schedule so as not to build up a large surplus, but to operate within state guidelines of minimum balances. Discretionary spending has been eliminated.

Proposal:

The Governor recommends a ‘not to exceed’ amount with the fees listed above and transferred to Minnesota Statutes. Once the current deficit budget and staffing levels are sufficient, the Board will be able to rebuild the statutorily required surplus of six months.

The Board currently and will continue to share their Executive Director between two agencies in creating operational efficiency. This proposal funds partnerships with other state agencies, which focus on specific administrative tasks. The Criminal Background Check Unit, the Health Professional Services Program and the Administrative Services Unit are all partners in working with the Board of Examiners to maximize public safety with efficient and focused services, not achievable by an independent board. The effective implementation date would be July 1, 2019.

Fees	Current Fee	Units per year	Not to exceed Proposed Fee	Actual Anticipated 2020 Fees	Total New Revenue FY 2020

Statutory Change(s):

Fees are currently listed in Minnesota Rules: 6400.6970 and a new Statutory Fees section must be created by the Revisor's office.

Nursing Home Administrators, Board of Examiners for

FY 2020-21 Biennial Budget Change Item

Change Item Title: Administrative Services Unit Operating Adjustment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	232	255	255	255
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	232	255	255	255
FTEs	1	1	1	1

Recommendation:

The Governor recommends additional funding of \$487,000 in the FY 2020-2021 biennium to maintain the current level of service delivery in the Administrative Services Unit at the Board of Examiners for Nursing Home Administrators. The proposal also provides funding for one new staff member within the unit.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

Current staffing levels are as such: The Administrative Services Unit (ASU) employs 6.5 FTEs, The Criminal Background Unit (CBC) employs 5.5 FTEs, and The Administrative Services Unit Currently 5.0 FTEs.

- This request is to cover anticipated state car lease rental for ASU state car that is shared by the Health Related Licensing Boards. The current state car lease has ended and is no longer eligible for an extension. A new lease will be required.
- This request is to cover anticipated MN.IT data center cost increases
- This request is to cover anticipated MN.IT costs related to the services of Chief Business Technology Officer (CBTO) that we currently do not pay for.

This request would be funded by fees collected by the health related licensing boards and deposited within the state government special revenue fund; the State's General Fund will not be impacted. Currently there are sufficient funds in the state government special revenue to cover the costs. The Board's is entirely fee supported and receives no General Fund dollars to provide all services.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the ASU, this funding will cover known employee compensation growth, a specialist position, rent increases, equipment replacement, state car lease, and IT costs. IT cost growth drivers may include dedicated MN.IT staff compensation-related increases, increased volume usage of enterprise IT services, increased software licensing costs, and/or application support and maintenance cost increases.

Small Agency Increase:	FY 2020	FY 2021	FY 2021	FY 2022
Salary Increases (ASU - current staff increases)	\$8,000	\$16,000	\$16,000	\$16,000
Salary Increases (CBC - current staff increases)	\$30,000	\$37,000	\$37,000	\$37,000

MNIT FTEs						
Agency FTEs						

Results:

The increase will provide ASU with sufficient staff resources to provide current levels of service and information to the eighteen boards in served by the unit.

Statutory Change(s):

N/A

Nursing Home Administrators, Board of Examiners for

FY 2020-21 Biennial Budget Change Item

Change Item Title: HLB – Retirement Costs

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	558	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	558	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends a one-time appropriation increase from the state government special revenue fund in FY 2020 in the amount of \$558,000 to cover the projected retirement payout costs of twenty-four long-term employees of the various Health Related Licensing Boards. This funding shall be appropriated to the Administrative Services Unit and may be transferred to the health related licensing board incurring retirement costs. These funds are available either year of the biennium.

Rationale/Background:

The Health Related Licensing Boards anticipate the retirement of twenty-four long-term state employees. Salaries account for approximately 83% of the Board's operating costs. The Health Related Licensing boards estimate that 26.7% of the total staff are age 62 or older or meet the rule of 90 and are eligible for retirement. The requested increase in spending authority will allow each Board to continue its critical program functions of licensing, approving education programs, and disciplining licensees whose behavior is a violation of the Minnesota Statutes and Administrative Rules and is thereby a risk to patient safety.

The Health Related Licensing Boards are fee-supported agencies. The Boards are required by Minnesota Statutes to collect sufficient revenue to cover all direct-appropriated costs and indirect costs. The Health Related Licensing Boards collect revenue from licensing fees that are deposited into the State Government Special Revenue fund to cover this one-time appropriation increase. This change will not affect the current licensing fees.

Below is a list of anticipated retirement costs by board:

Board Name	Classification Retiring	FY 2020-21 Estimate Payout	Total Payout by Board
Behavioral Health and Therapy	Executive Director	\$19,000	
	Office & Admin Specialist	\$10,000	\$29,000
Dentistry	Investigator Senior	\$21,000	\$21,000
Dietetics & Nutrition Practice	Executive Director	\$15,000	\$15,000
Medical Practice	Investigator	\$15,000	\$15,000
Medical Practice – Health Professional Services Program	State Program Administrative Prin.	\$33,000	
	State Program Administrative Prin.	\$23,000	\$56,000

Board Name	Classification Retiring	FY 2020-21 Estimate Payout	Total Payout by Board
Nursing	Executive Director	\$70,000	
	Office & Admin Specialist	\$14,000	
	Registered Nursing Senior	\$22,000	
	Paralegal	\$13,000	
	Nursing Education Spec	\$12,000	
	Office & Admin Specialist	\$6,000	
	Customer Service Spec Int	\$14,000	
	Nursing Education Spec	\$19,000	
	Reg Nurse Advance Pract	\$32,000	\$202,000
Nursing Home Administrators	Executive Director	\$43,000	\$43,000
Nursing Home Admin – Administrative Services Unit	Admin Management Director 2	\$44,000	\$44,000
Pharmacy	Office & Admin Specialist	\$7,000	
	Pharmacy Surveyor	\$38,000	\$45,000
Podiatric Medicine	Executive Director	\$15,000	\$15,000
Psychology	Investigator Senior	\$13,000	\$13,000
Social Work	Executive Director	\$39,000	
	St Program Admin Supervisor Prin.	\$21,000	\$60,000
		Grand Total	\$558,000

Proposal:

ASU seeks a one-time increase in FY 2020 of \$558,000 to cover the costs of anticipated health related licensing board retirement costs. When an employee retires, ASU will transfer funds from the ASU appropriation to the individual board's retirement account. This will allow each board to pay for the retirement costs and maintain their operation budget.

Equity and Inclusion:

The Board does not discriminate on the basis of race, ethnicity, gender, sexual orientation, or disability. The positive impact of this change will be to provide services for all people of the State of Minnesota, without discrimination.

Results:

Retirement costs will be covered and will not affect the Board's current operation budgets.

Statutory Change(s):

No statutory change is required for this initiative.

Credentialing

- 895 Licensed Nursing Home Administrators (LNHA)
- 91,000 Minnesotans receive long term supports and services across the continuum
- 65 New licensees
- 29 acting permits issued
- 11 Minnesota Accredited Centers of LTC Education
- 108 state jurisprudence exams
- 169 continuing education reviews and approvals
- 689 complaints received

Source: Annual Quality Improvement Report for June 30, 2018

PURPOSE & CONTEXT

The Minnesota Board of Examiners for Nursing Home Administrators (BENHA) was established in 1970 within Minnesota Statutes 144A.19 – 144A.28 and Minnesota Rules 6400. The board, which was originally created by federal mandate, ensures that nursing home administrators have the education and skills necessary to provide strong, safe communities for Minnesota's elders; while assuring accountability and support for all individuals receiving supports and services. We carry out this mission through regulation of the practice, education and licensure of practitioners, and investigation of complaints in an attempt for neutral and timely resolution.

The BENHA has an additional budgetary responsibility as the fiscal agent for the Administrative Services Unit (ASU). The main purpose of the ASU is to provide centralized administrative services to 16 health-related licensing boards and two boards funded from the general fund with detail work provided in the ASU Agency Profile.

SERVICES PROVIDED

The BENHA is required to set the standards for Nursing Home Administrator licensure in order for the state to receive Center of Medicare and Medicaid Service funds per federal guidelines. We accomplish this by:

- Maintaining educational standards for prospective and existing licensees
- Licensing qualified individuals so that Minnesotans seeking nursing home care will be able to identify those working in the field with skills necessary to provide services in compliance with Minnesota Statutes and Rules.
- Implementing disciplinary and compliance actions when licensees do not perform at a contemporary standard of practice while serving as a neutral intermediary to resolve various interpersonal complaints.
- Educating the public on health-related professions, practitioners, and standards.
- Working with eleven approved colleges with Long Term Care Administration programs.

Currently, Minnesota has 915 licensed administrators that oversee the care provided to nearly 35,000 Minnesotans, residing in skilled nursing facilities and other ancillary roles. Resident safety is the primary focus working with all stakeholders. Research is very active at this time as it relates to leadership of long term care supports and services and its relationship to customer satisfaction. The board remains active with the National

Association of Boards for Long Term Care Administrators (NAB) to ensure contemporary practice standards for Minnesotans.

BENHA revisited their latest four year strategic plan in 2016. New goals and strategies identified for 2018-20 include the review of the long-term care supports and services credentialing, revising practicum and field experience guidelines, and coordination with other state agencies. The Board receives an annual statistical review in October of each year. This data is used to identify new initiatives or areas of concern. The board intends to update their statute this year. The board engages with many stakeholder groups to ensure administrative involvement in problem resolution.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Percent of license renewals completed online	99.5%	98.8%	FY 2016 & FY 2017
Quantity	Percent of initial license applications submitted online	65%	82%	FY 2016 & FY 2017
Quality	Number of complaints received/closed without action.	49/18	67/17	FY 2016 & FY 2017

The authorizing Minnesota statute for BENHA is found at:

<https://www.revisor.mn.gov/statutes/?id=144A&view=chapter#stat.144A.19>.

The Minnesota Rules for BENHA are located at: <https://www.revisor.leg.state.mn.us/rules?id=6400.5000>.

The Board operates under other Minnesota Statutes including Chapter 214, 13, and 16.

Program: Board of Examiners for Nursing Home Administrators (BENHA)

Activity: Administrative Services Unit (ASU)

mn.gov/boards/asu/

AT A GLANCE

- Serves 18 health and non-health related licensing boards
- Serves 192 state employees
- Serves 183 appointed board members
- Registered 28 Volunteer Health Care Provider facilities
- Registered 127 Volunteer Health Care Provider volunteers
- Processed over 728 purchase orders
- Processed over 8,126 vendor payments
- Processed over 7,215 revenue deposits
- Processed 15,822 criminal background checks

PURPOSE & CONTEXT

The mission of the Administrative Services Unit (ASU) is to:

Provide centralized administrative services to 16 health-related licensing boards and two non-health related licensing boards – the Board of Barber Examiners and Board of Cosmetologist Examiners. The services provided include budgeting, fiscal analysis, human resources, payment transaction processing, purchasing and printing services, operations analysis, contracts, information technology, and research and policy analysis.

- Provide high quality services by having individually trained staff focused on specific administrative tasks.
- Assist in the establishment of a consortium of boards to cooperate on matters of common interest.
- Register individuals and organizations for the Volunteer Health Care Provider Program (VHCPP).
- Process criminal background checks on new applicants for the health-related licensing boards through the Criminal Background Checks Program (CBC).

SERVICES PROVIDED

In 1995 the Health Licensing Boards (HLB) voluntarily and informally created the ASU to increase efficiencies among the Boards in performing their duties. The ASU was formalized in statute in 2011 (Minnesota Statutes Chapter 214.107).

The ASU is required to perform administrative, financial, and management functions common to all the boards using procedures that streamline services, reduce expenditures, target the use of state resources, and meet the mission of public protection. Specifically, the ASU processes payroll; pays invoices; records receipts; performs purchasing, contracting and grant functions; maintains fixed assets; prepares annual and biennial budgets, annual spending plans and fiscal notes; compiles financial reports; administers building leases; and performs human resource functions and labor relations.

ASU was recognized nationally for occupational governance by the PEW Commission.

The ASU is funded by all the independent boards and consists of 7 full time staff members who perform shared administrative and business services for all the boards. ASU also coordinates the Voluntary Health Care Provider Program (which provides malpractice coverage for physicians, physician assistants, dentists, dental hygienists, dental therapists, dental assistants, and nurses serving in a voluntary capacity at a charitable organization). The ASU also operates the Criminal Background Checks Program which was created in FY 2015 to process criminal background checks for all new health-related licensing board applicants. ASU's annual budget is determined by

the Executive Directors Forum. Oversight of ASU is assigned on a rotating basis to one of the health-related boards. The current ASU oversight board is the Minnesota Board of Examiners for Nursing Home Administrators. ASU is managed by the Executive Directors Forum's Management Committee.

The Executive Directors' Forum holds monthly meets. The HLB's governance structure consists of an elected Chair, Vice-Chair who serves as chair of the Management Committee. An Office Manager also serves on the Management Committee. Standing committees include the Policy Committee, MNIT HLB Governance Committee, Criminal Background Checks Program (CBC) and Health Professional Services Program (HPSP) Committees with representatives invited from all boards.

Responsibilities of the Management Committee include:

- Administering shared conference rooms and shared equipment, such as copiers;
- Coordinating the boards' computer collaboration efforts;
- Developing recommended policies and procedures for all boards and reviewing best practices; and
- Oversight of the Administrative Services Unit.

Responsibilities of the Policy Committee include:

- Making recommendations to the Executive Directors Forum on issues relating to public policy,
- Reviewing legislative proposals,
- Making recommendations on legislative initiatives affecting all the boards, and
- Undertaking efforts to make investigative data more readily available to share among health boards.

Responsibilities of the MN.IT HLB Governance Committee include:

- Expanding the use of electronic communications in the provision of HLB services, this Committee is responsible for collaboration and coordination of MN.IT projects and implementation of technological improvements for occupational licenses.

Responsibilities of the Criminal Background Checks Program (CBC) Committee include:

- Implementation of the statutory CBC requirements in 2016 with limited participating pilot boards to full implementation of all board applicants in 2018.
- Coordination of an efficient and effective CBC system for health related professionals.

*Occupational Therapy Licensing transitioned from MN Department of Health to MN Board of Occupational Therapy Practice (Board) fully 4/19/2018

**This includes active complaint files transitioned from MN Department of Health January 2018.

PURPOSE

The Minnesota Board of Occupational Therapy Practice exists to protect the public through effective licensure and enforcement of the statutes and rules governing the practice of occupational therapy to reasonably ensure a standard of competent and ethical practice. Licensing of occupational therapy practitioners began in 1996 under the umbrella of the Minnesota Department of Health. The Board was established in 2018 under the authority of Minnesota Statutes, Chapter 148 transitioning all licensing activities from the Minnesota Department of Health to the newly formed Board. The Board carries out its mission by granting qualified applicants the privilege to practice in Minnesota and by investigating complaints related to the statutory obligation of licensed individuals to provide competent, ethical care.

The Board contributes to the statewide outcomes:

- **People in Minnesota are safe**
- **All Minnesotans have optimal health**
- **Government services are efficient and accountable**

BUDGET

The Board of Occupational Therapy was established January 1, 2018. Prior to January 1, 2018 this program was under the Department of Health.

The Board is funded by licensure fees and receives no general fund dollars. Minnesota Statutes section 214.06, subdivision 1(a) compels the Board to collect fees in the amount sufficient to cover direct and indirect expenditures. Funds are deposited as non-dedicated revenue into the state government special revenue fund. From this fund, the Board receives a direct appropriation to pay for agency expenses such as salaries, rent, costs associated with disciplinary/contested cases and operating expenditures. It also pays statewide indirect costs through an open appropriation.

In addition to Board operations, licensure fees fund activities that support multiple boards and/or other agencies. Some of these are: the Administrative Services Unit (inter-board), Health Professionals Services Program (inter-board), Office of the Attorney General for legal services, and the Criminal Background Check Program (inter-board).

STRATEGIES

The Board of Occupational Therapy Practice promotes and protects the health and safety of the citizens of Minnesota, accomplishes its public protection mission, and contributes to statewide outcomes by:

- Issuing licenses to practice only to qualified individuals;
- Administering the license renewal process;
- Responding to inquiries, complaints, and reports regarding applicants and licensees;
- Investigating and resolving complaints;
- Maintaining a comprehensive website that provides information to licensees, applicants, the public, and any other interested parties;
- Ensuring inquiries are managed in a timely and efficient manner;
- Educating stakeholders, licensees, potential licensees, educational programs, and the public;
- Conducting ongoing analysis of regulatory body best practice to ensure effective decision making

RESULTS

The information included below was generated using the Board's licensure and regulatory database. The information demonstrates data collected and extrapolated from licensing at the Minnesota Department of Health along with the Board's licensing activities. The total number of licensees continues to increase annually. Complaint data will be more reflective of current metrics at the end of FY19.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity*	Number of new licenses issued: Occupational Therapist Occupational Therapy Assistants	244 111	262 93	FY 2017 & FY 2018
Quantity*	Number of licensees renewing: Occupational Therapist Occupational Therapy Assistants	2031 713	2665 564	FY 2017 & FY 2018

*Includes Minnesota Department of Health Data. Licensing responsibility did not begin with the Board until April 17, 2018.

The Board's activities are governed by Minnesota Statutes sections 148.6401 to 148.6449 (<https://www.revisor.mn.gov/statutes/cite/148>) and Minnesota Statutes chapter 214 (<https://www.revisor.mn.gov/statutes/?id=214>).

Net Fiscal Impact = (Expenditures – Revenues)	120	126	126	126
FTEs	.50	.50	.50	.50

Recommendation:

The Governor recommends additional funding of \$246,000 in the FY 2020-2021 biennium to maintain the current level of service delivery at the Board of Occupational Therapy Practice and continue the work of Board establishment.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

The Board was created on January 1, 2018 to assume Occupational Therapist (OT) and Occupational Therapy Assistant (OTA) licensing and regulatory responsibility from the Department of Health. The Board is entirely fee supported and receives no General Funds to provide all services. Fees must be collected to cover all direct and indirect expenditures and are deposited as non-dedicated revenue into the State Government Special Revenue Fund (SGSRF). The Minnesota Legislature makes appropriations from the fund to pay for expenses incurred by the Board.

Based upon historical Department of Health data, the number of licensees managed by the board is steadily increasing. As such, operating costs have increased. As of October 1, 2018 there are 4,000 actively licensed occupational therapists and 1,260 occupational therapy assistants in Minnesota.

	OT New Licenses	OT Renewals	OTA New Licenses	OTA Renewals
2013 and 2014	420 issued	3039 completed	190 issued	886 completed
2016 and 2017	485 issued	3494 completed	229 issued	967 completed

Proposal:

The Governor recommends increasing the Board's operating budget to maintain the delivery of current services. For the Board of Occupational Therapy, this funding will cover known employee compensation growth, day-to-day operational needs, rent, centralized IT costs, and licensing database system maintenance. This proposal requests an increase in the spending authority of the Board to ensure it will have sufficient authority to carry out its mission of public protection. IT cost growth drivers may include dedicated MN.IT staff compensation-related increases, increased volume usage of enterprise IT services, increased software licensing costs, and/or application support and maintenance cost increases.

Small Agency Increase:	FY2020	FY2021	FY2022	FY2023

Total	\$120,000	\$126,000	\$126,000	\$126,000

Equity and Inclusion:

The Board does not discriminate on the basis of race, ethnicity, gender, sexual orientation, or disability. The positive impact of this change will be to continue to provide services for all people of the State of Minnesota without discrimination.

IT Related Proposals:

A portion of this request includes an increase for database maintenance (included in the proposal section).

Category	FY 2020	FY 2021	FY 2022	FY 2023

Agency FTEs				

Results:

This proposal is intended to allow the Board to continue to provide current levels of service and information to the public. With increased spending authority, the Board will be able to continue to develop the organization and to provide efficient and timely license processing and complaint management to serve and protect the citizens of Minnesota.

Statutory Change(s):

No statutory change is required.

Occupational Therapy Practice, Board of

FY 2020-21 Biennial Budget Change Item

Change Item Title: Fee Adjustment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	103	114	103	113
Net Fiscal Impact = (Expenditures – Revenues)	(103)	(114)	(103)	(113)
FTEs				

Recommendation:

The Governor recommends adjusting fees charged by the Board of Occupational Therapy Practice as shown in the table below.

This proposal will provide revenues to right size the Board's operational budget and expenditure requirements to ensure effective operation. The fee increase will be used to fund appropriations to meet day-to-day operational needs and to continue the work of board establishment. License fees were last changed by the Department of Health in 2008. This proposal would give the Board authority set fees at an amount 'not to exceed' a specified cap, which would allow the Board to manage future biennial budgets and to potentially lower fees as revenue and expenditures stabilize.

Rationale/Background:

The Minnesota Board of Occupational Therapy Practice was created January 1, 2018 transferring Occupational Therapists (OT) and Occupational Therapy Assistants (OTA) licensing and regulatory responsibility from the Minnesota Department of Health.

As of October 1, 2018 there are 4,000 actively licensed occupational therapists and 1,260 occupational therapy assistants in Minnesota.

The Board is entirely fee supported and receives no General Fund funds to provide all services. Fees must be collected to cover all direct and indirect expenditures, deposited as non-dedicated revenue into the State Government Special Revenue Fund (SGSRF). The Board is granted authority by the Minnesota Legislature to use these fees to pay for all expenses incurred by the Board. Currently, fees collected are not sufficient to fund anticipated or unanticipated expenses.

Proposal:

The Board requires a fee increase in order to sufficiently collect fees to support the transition from the Department of Health, the further establishment of the newly formed Board, and its ongoing operations.

Fee	Current Fee Rate	Proposed Fee Rate	Difference in Fee Rate	# Paying FY 2020	Additional Revenue Estimate	# Paying FY 2021	Additional Revenue Estimate

H7Y OT Late Fee	\$25	\$50	\$25	310	\$7,750	304	\$7,600
H7Y OT Assist Initial License Fee	\$80	\$105	\$25	103	\$2,575	100	\$2,500
H7Y Miscellaneous Fee	New Fee	\$various	\$various	various	\$1,000	various	\$1,000
Total New Revenue					\$103,480		\$114,230

Equity and Inclusion:

The Board does not discriminate on the basis of race, ethnicity, gender, sexual orientation, or disability. The positive impact of this change will be to continue to provide services for all people of the State of Minnesota without discrimination.

IT Related Proposals:

Not an IT related proposal.

Results:

The results of this proposal would be indicated through the successful establishment and fiscal solvency of the newly formed Board. The current fee structure does not collect sufficient fees to support the actual expenditure required for board operations. Performance data will be documented on an annual basis and through routine reporting.

Statutory Change(s):

Ombudsman for Mental Health and Developmental Disabilities

<i>Agency Profile</i>	1
Agency Expenditure Overview	3
Agency Financing by Fund	4
Agency Change Summary	5

mn.gov/omhdd

AT A GLANCE

- The Ombudsman for Mental Health and Developmental Disabilities (OMHDD) operates eight offices statewide with fewer than 20 staff
- We oversee more than 16,000 agencies, facilities, programs, and licensees providing services to over 300,000 Minnesotans with mental, developmental, chemical, and emotional disabilities
- OMHDD staff respond to more than 4,500 requests for assistance, reviews more than 1,500 serious injury reports, and over 850 death reports annually
- Monitors quality of care related to Department of Human Services and Department of Health Licensing, the Department of Education, Special Review Board, Nursing Home closures, Behavior Intervention Report Forms, and the U of M Clinical Trials on psychiatric medications

PURPOSE

The OMHDD promotes the highest attainable standards for treatment, competence, efficiency, and justice for persons receiving state provided or state funded care and treatment for mental illness (MI), developmental disabilities (DD), chemical dependency (CD), substance use disorder (SUD), and emotional disturbance (ED).

OMHDD works to resolve client complaints and concerns regarding treatment and rights-related issues. The OMHDD reviews serious injury and death reports of clients, monitors Clinical Drug Trials at the U of M, and provides civil commitment and other training statewide.

OMHDD contributes to statewide outcomes **that all Minnesotans have optimal health and efficient and effective government services.**

BUDGET

Source: Budget Planning & Analysis System (BPAS)

Source: Consolidated Fund Statement

STRATEGIES

The OMHDD regional and medical review staff monitor client cases for individual client needs and also for systemic issues in all areas of the MI, DD, CD/SUD and ED service systems. When staff see issues occurring in multiple areas of the state they can quickly share information to providers on what has been seen and how OMHDD staff have helped others deal with those issues. Medical Review staff produce timely and topical medical alerts which focus on education and prevention of issues that negatively impact client safety. The alerts are shared electronically with licensed providers and interested persons statewide. OMHDD staff provide civil commitment education to stakeholders in an effort to reduce the number of inappropriate commitments, save valuable resources, and get clients to the level of service they require in the least restrictive environment needed.

The OMHDD acts as the intermediary between Minnesota residents and state government provided or funded service delivery systems. When practices, policies, and procedures do not make sense to clients, are unfair, or errors have been made, OMHDD staff can help bring the two sides together to obtain the best result for the client. OMHDD provides training to providers, families, law enforcement, legal, medical, local, county, and state staff in order to improve services and increase understanding of service delivery systems and laws. OMHDD staff are involved in local and statewide work groups and committees covering a wide variety of topics related to client care provision. OMHDD staff also monitor the quality of care via report review from multiple agencies, facilities and programs.

AT A GLANCE

- In 2017, Minnesota's child population was 1,298,657. Of the total child population, 39,606 children were alleged victims of child maltreatment.
- Minnesota ranked #4 in the nation in overall child well-being (2017 KIDS COUNT Data Book). However, Minnesota continues to have some of the nation's largest racial disparities. Compared to White children, based on child population estimates, American Indian children were over 17 times more likely to experience care, children identified as two or more races were over 4 times more likely to experience care and African American children were over 3 times more likely to experience care.
- For FY 2017, approximately 84% of the Agency's spending is budgeted from the General Fund and 16% from the Special Revenue Fund.
- Four full-time Ombudspersons operate independently, but in collaboration with the Minnesota Indian Affairs Council, Council for Minnesotans of African Heritage, Council on Asian-Pacific Minnesotans, and the Minnesota Council on Latino Affairs. Each Council appoints a volunteer community-specific board that is advisory to the Ombudspersons.

PURPOSE

The Office of Ombudsperson for Families (OBFF) is an independent state agency whose goals are: (1) to reduce racial and ethnic disparities and disproportionality in Minnesota's child welfare system; (2) to improve outcomes for children and their families involved in child protection cases; (3) to ensure that all laws governing the protection of children and their families are implemented in a culturally and linguistically competent manner; and (4) to ensure that laws protecting children and families are adhered to in decision-making processes. We work to resolve complaints from families who have been negatively impacted by child welfare social service agencies.

Our mission is to ensure that children and families are protected by law in all child placement proceedings conducted by public and private agencies and organizations.

OBFF contributes to the following statewide outcomes:

- **Strong and stable families and communities**
- **People in Minnesota are safe**
- **Efficient and accountable government services**

STRATEGIES

To accomplish its mission, OBFF uses the following strategies:

- **Investigation** - Through case investigations, the Ombudspersons make recommendations on cases regarding non-compliance with state or federal laws and policies. These cases include, but are not limited to: possible bias, discrimination, lack of culturally appropriate services, and inadequate linguistic and cultural sensitivity.
- **Taking Complaints** - Complaints include a person making a specific claim against a county child welfare agency, or its agent; a public or private child placing agency, or its agent; the courts; the Guardian Ad Litem Program; and others. A person may call to complain about current laws, policies, and practices.

Specific examples of types of complaints include, but are not limited to the following: Violations of the Indian Child Welfare Act; children are not placed with their families or relatives; relatives and families are not being considered for permanency placement; no transportation to visitations; cannot get into treatment in a timely manner; inadequate housing; lack of understanding of the court process/system; the public defender (parents' attorney) not being helpful; and the child protection workers' lack of cultural sensitivity. [Note: OBFF does not provide direct services or programs, nor do the Ombudspersons have enforcement over their recommendations.]

- **Monitoring** – (a) Monitor agency compliance with all laws governing child protection and placement that impact children of color and American Indian children; (b) document and monitor court activities in order to heighten awareness of diverse belief systems and family relationships; (c) ensure experts from the appropriate community of color, including tribal advocates, are used as court advocates and are consulted in placement decisions that involve children of color and American Indian children; (d) ensure Guardians ad Litem and other individuals from communities of color and American Indian are used in court proceedings to advocate on behalf of children of color and American Indian children; and (e) provide training programs for bilingual workers.

- **Public Policy Development** - Through public policy development, the Ombudspersons work to effect policy changes when current policies do not reflect best practices. Examples of some of the initiatives on which the Ombudspersons have worked include: Minnesota Supreme Court Children's Justice Initiative (CJI); Minnesota Department of Human Services Children's Justice Act (CJA) Task Force; Minnesota Child Welfare Training System (MNCWTS); Ramsey County Citizen Advisory Panel; and Hennepin County Child Protection Task Force. These initiatives and task forces have had an ongoing and positive impact on reducing racial disparities and disproportionality in child welfare; and improving outcomes for children and their families involved in child protection cases.

RESULTS

<i>Name of Measure</i>	<i>2015 Report</i>	<i>2016 Report</i>	<i>2017 Report</i>
Complaints and Inquiries received*	1,972	2,221	2,290
Consultations/resolutions	861	809	918
Investigations	58	86	111

*This measure tracks the number of calls/complaints to OBFF to make inquiries, to lodge a complaint, or request information about the child protection system and how to navigate it.

Governor Mark Dayton's Task Force on the Protection of Children met from September 2014 through March 2015 and developed 93 recommendations for improvements to the State of Minnesota's Child Protection System. The Minnesota Legislature quickly acted on several of the Task Force's recommendations, which resulted in an increased number of cases being screened in at the county level. According to the 2016 Department of Human Services Out-of-home Care and Permanency Report Summary, there has been an increase of over 15,000 reports received annually.

Additional statistics calculated that screened-out reports decreased from 70.3% in 2014 to 67.5% in 2015. This means that an additional 3% of reports were screened-in for assessment or investigation.

All of the changes put forth by the Minnesota Legislature and the Task Force affected greatly the number of telephone calls and complaints to the OBFF, which is illustrated in the above graph. Due to the increase, the OBFF provided more consultations and case resolutions to complainants, as well as the number of Child in Need of Protection or Services (CHIPS) cases that were investigated. The statewide ripple effect of the increases in calls have affected the social services agencies, the courts, the state Guardian ad Litem Program, other major stakeholders, and OBFF itself. For instance, the number one reason for the call volume increase is parental drug abuse followed by alleged neglect, respectively, 2,091 (27.1%) and 1,894 (24.5%). (Minnesota's Out-of-home Care and Permanency Report, 2016).

In addition, on January 1, 2015, the Northstar Care for Children law took effect. This new law consolidated and simplified three child welfare programs: Family Foster Care, Kinship Assistance (which replaced Relative Custody Assistance), and Adoption Assistance to support families caring for children who must be removed from the home for reasons of child protection, delinquency or disability. This also resulted in an increased number of telephone calls to OBFF.

Recommendation:

The Governor recommends additional funding for three staff positions at the Office of Ombudsperson for Families (OBFF).

Rationale/Background:

On January 1, 2015, the Northstar Care for Children law took effect. This new law consolidated and simplified three child welfare programs: family foster care, kinship assistance (which replaced relative custody assistance) and adoption assistance to support family caring for children who must be removed from the home for reasons of child protection, delinquency or disability. These also resulted in an increased number of telephone calls to the OBFF.

Additionally, in 2017, the Office received 2,290 calls for assistance; consulted and resolved 40% of the case circumstances; and conducted 111 investigations.

The 2018 Minnesota legislative session established a Foster Care Sibling Bill of Rights for children who enter foster care. Effective August 1, 2018, child welfare agency staff are required to provide a copy of the Sibling Bill of Rights Commissioner's Form to children at the time they enter foster care and to adult siblings of a child entering foster care, when known, and to their foster care provider. The law also provided that if there are questions or complaints, the Office of Ombudsperson for Families (OBFF) should be contacted. The implementation of this new law will increase the number of calls, inquiries, complaints and requests for investigations.

Proposal:

Presently, there are four full-time community-specific ombudspersons and one full-time office administrative specialist. The intake worker will assist the office administrative specialist in the increased number of telephone and email traffic to the OBFF and streamline the intake process so that the calls can be directed to the community-specific ombudsperson in a timely manner. The addition of the two full-time investigators will allow the office to conduct more investigations in a timely manner and ensure that children and their families are guaranteed fair treatment, especially on racial grounds, by all agencies that provide child welfare services.

The addition of these positions will allow OBFF to: (1) Create a referral center in the office to assist families in finding the resources that they need to maintain safety and stability when they are dealing with child abuse issues; (2) Follow-up with county agencies when child abuse complaints are not screened in for further county investigation; (3) Assist families in navigating inter-systems and across systems (achievement gap/education, juvenile justice, housing, substance/chemical abuse services, etc.) when families are represented in more than

one system; (4) Develop an external citizen satisfaction survey of Minnesota's counties, child welfare services and child placing agencies; and (5) identify trends and/or systemic problems and issues.

Equity and Inclusion:

In 2017 Minnesota's child population was 1,298,657. Of the total child population, 39,606 children were alleged victims of child maltreatment. Minnesota ranked #4 in the nation in overall child well-being according to the 2017 Annual National Annie E. Casey Kids Count Profile. According to the 2016 Out-of-Home Care and Permanency Report from the Department of Human Services, there were 15,004 children who experienced 15,654 placement episodes during 2016. From 2015 to 2016, there was a 10.2 percent increase in the overall number of children who experienced out-of-home care. White children remain the largest group, both entering care and continuing in care, however, disproportionality remains a significant concern for children in out-of-home placement. Compared to White children, based on child population estimates, American Indian children were 17.6 times more likely to experience care, children identified as two or more faces were 4.8 times more likely to experience care and African-American children were over 3.1 times more likely to experience care.

Results:

The intended result is that all children in Minnesota's child welfare system are equitably supported and that the agencies who have children in foster care are in compliance with the new Foster Care Sibling Bill of Rights and that the complaints from the children and other interested persons are handled in a timely manner.

The intended result is that all families in Minnesota's child welfare system are equitably supported to ensure that children have safety and permanency in their own homes. We will work with state partners to achieve our desired results including the Minnesota Department of Human Services, Minnesota State Guardian ad Litem Program, Minnesota Courts, and Minnesota Legislature.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>2015</i>	<i>2016</i>	<i>2017</i>
Quantity	Complaints and Inquiries received*	1,975	2,221	2,290
Quality	Consultations/resolutions	861	809	918
Results	Investigations	58	86	111

The implementation of this new law will substantially increase the number of calls, inquiries, complaints and requests for investigations on an already overburdened and strained staff of the OBFF. Presently, there are four full-time community-specific ombudspersons and one full-time office administrative specialist. The intake worker will assist the office administrative specialist in the increased number of telephone and email traffic to the OBFF and streamline the intake process so that the calls can be directed to the community-specific ombudsperson in a timely manner.

Statutory Change:

M.S. 257.0755 provides the legal authority for the Office of Ombudsperson for Families.

PURPOSE

The Minnesota Board of Optometry is responsible for protection of the public through the regulation of optometrists (OD) in the state of Minnesota. The Board was established in 1915 under the authority of Minnesota Statutes, Chapter 148. Regulation is accomplished through licensure examination, annual license renewal, continuing education requirements, as well as providing neutral and timely investigations and resolution of complaints against licensees. Approximately 75% of Minnesotans use some type of vision correction.

The Board's mission is to:

- Protect the public through effective licensure and enforcement of the statutes and rules governing the practice of optometry
- Ensure a standard of competent and ethical care
- Provides timely and neutral resolution of complaints

The Board contributes to the statewide outcomes of:

- **People in Minnesota are safe**
- **Efficient and accountable government services**

BUDGET

Spending by Category

FY 17 Actual

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

The Board is funded by licensure fees and receives no general fund dollars. Minnesota Statutes section 214.06, subdivision 1(a) requires the Board to collect fees in the amount sufficient to cover direct and indirect expenditures. Funds are deposited as non-dedicated revenue into the state government special revenue fund. From this fund, the Board receives a direct appropriation to pay for agency expenses such as salaries, rent, costs associated with disciplinary/contested cases, and operating expenditures. It also pays statewide indirect costs through an open appropriation.

In addition to Board operations, licensure fees fund activities that support multiple boards and/or other agencies. Some of these are: the Administrative Services Unit (inter-board), Health Professionals Services Program (inter-board), Prescription Monitoring Program (Pharmacy Board), Office of the Attorney General for legal services, and the Criminal Background Check Program (inter-board).

Board members communicate openly with licensees to ensure fees are used prudently. (ARBO). The national optometry board, the Association of Regulatory Boards for Optometry (ARBO) completes an annual survey of all fees charged to the nation's OD's for licensing activities. The Minnesota Board of Optometry renewal of license fees are in the lowest 25% percentile in the nation.

STRATEGIES

The Board of Optometry regulates the profession by:

- Setting educational standards for initial licensure.
- Reviewing applicant's education and training to determine compliance with the board's licensure requirements.
- Reasonably ensuring that only applicants who meet licensure requirements are granted a license.
- Issuing initial and renew licensure for qualified professionals.
- Setting continuing education requirements for maintenance of licensure.
- Setting standards of practice and taking disciplinary or corrective action against misconduct for licensees.
- Responding to public and agency inquiries, complaints, and reports regarding licensure and conduct of applicants and licensees and completing those reviews in a timely and neutral manner.
- Providing information about licensure requirements and standards of practice to citizens and other interested persons or agencies.

The board provides services to 1,130 licensed optometrists in Minnesota and collaborates with continuing education and provider associations. The current board chair and one other Minnesota board member serve on the national board, the Association of Regulatory Boards of Optometry.

Quarterly board meetings are driven by seven governor-appointed board members with other stakeholders in attendance. Complaints are actively reviewed by an OD and one public member to assure the blending of both perspectives in seeking a timely and neutral review of the concerns presented. The board agenda reflects quality improvement activities with key statistics tracked and shared with the attendees. Board discussion leads to action steps and directives to staff which is listed in the minutes of each board meeting. Those minutes are posted on the website.

RESULTS

Optometry, Board of

FY 2020-21 Biennial Budget Change Item

Change Item Title: Operating Adjustment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
State Government Special Revenue Fund				
Expenditures	24	25	25	25
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	24	25	25	25
FTEs	.25	.25	.25	.25

Recommendation:

The Governor recommends \$49,000 from the State Government Special Revenue Fund in the FY 2020-2021 biennium to maintain the current level of service delivery at the Board of Optometry.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the Minnesota Board of Optometry, this funding will cover known employee compensation growth and support for an additional shared staff member shared among three boards and assure contemporary national practice standards. Current staffing is .83 FTE's and with this increase, three people would total 1.08 FTE's assigned to various specialty work assignments.

Small Agency Increase:	FY 2020	FY 2021	FY 2022	FY 2023
Salary Increases (Assistant ED)	\$24,000	\$25,000	\$25,000	\$25,000
Total	\$24,000	\$25,000	\$25,000	\$25,000

Equity and Inclusion:

The Board does not discriminate on the basis of race, ethnicity, gender, sexual orientation, or disability. The positive impact of this change will be to continue to provide services for all people of the State of Minnesota without discrimination.

Results:

This proposal is intended to allow the Board to continue to provide current levels of service and information to the public.

Optometry, Board of

FY 2020-21 Biennial Budget Change Item

Change Item Title: Fee Increase

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Special Revenue Fund				
Expenditures	0	0	0	0
Revenues	75	75	75	75
Net Fiscal Impact = (Expenditures – Revenues)	(75)	(75)	(75)	(75)
FTEs	0	0	0	0

Recommendation:

The Governor recommends a fee increase for the Minnesota Board of Optometry. The Board requires both a fee increase to maintain its core functions. The most recent fee increase occurred in 2014. Currently, the Board does not collect fees sufficient to fund budgeted expenses. The Board received an appropriation increase in 2017. However, due to an end of session oversight fee increase language was not included in the bill

This proposal would give the Board authority set fees at an amount ‘not to exceed’ a specified cap, which would allow the Board to manage future budgets.

Rationale/Background:

The Board requires a fee adjustment to eliminate a gap between board-generated revenues and appropriations, as well as to support additional spending for IT expenses, Criminal Background Check operations, and increased expenses related to the Health Professional Services Program and the Administrative Services Unit. Board members carefully monitor both fees and expenses. Statutorily, the Board currently does not meet the required six month reserve.

The proposed fee increase will be a ‘not to exceed’ amount. Each year the Board will approve their fee schedule so as not to build up a large surplus, but to operate within state guidelines of minimum balances. Currently, the board-staffing pattern is with two part time individuals totaling less than one full time equivalent. Rent is the next largest budget item. Most discretionary spending has been eliminated.

Proposal:

The Board shares two staff members with two other agencies to generate operational efficiency. This proposal funds partnerships with other state agencies, which focus on specific administrative tasks. The Criminal Background Check Unit, the Health Professional Services Program, and the Administrative Services Unit are all partners in working with the Board to maximize public safety with efficient and focused services, not achievable by an independent board. The effective implementation date would be July 1, 2019.

The Board:

- Requests to increase the license renewal fee by \$65.00
- Requests to establish a fee for the state jurisprudence examination of \$75.00
- Requests to create a new budget line item for preparing data for public data requests. The fee is currently embedded within the miscellaneous account and the board requests to separate this item and to track it for accounting purposes.

Fees	Units per year	Current Fee	Not to exceed Proposed Fee	Total Revenue FY 2020
Annual License Renewal (increase)	1,100	\$135.00	\$200.00	\$71,500
State Jurisprudence Examination (new)	48	\$0	\$75.00	\$3,600
Miscellaneous to Labels/Data Retrieval	48	\$50.00	\$50.00	-0-
Total				\$75,100

Equity and Inclusion:

The proposal affects all 1,100 licensed optometrists and 48 applicants per year. The Board does not discriminate on the basis of race, ethnicity, gender, sexual orientation, or disability. The positive impact of this change will be to continue to provide services for all people of the State of Minnesota without discrimination.

Optometry, Board of

FY 2020-21 Biennial Budget Change Item

Change Item Title: Optometry Education (OE) Tracker

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	22	22	22	22
Revenues	22	22	22	22
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends that the Minnesota Board of Optometry purchase a subscription to the national optometric board's continuing education database for all Minnesota Optometrists. Currently, 74% of all Minnesota Optometrists self-enroll in the national continuing education database and pay an individual fee of \$25.00 per year. With this request, the Minnesota Board of Optometry would collect and pay the annual subscription, at a discounted payment of \$20.00 for Optometric Doctors (ODs). This fees associated with this proposal will match the registration expense. This will not result in any change in the board's overall operational budget.

Rationale/Background:

Similar to the current North Dakota model, the Minnesota Board of Optometry would collect a fee for the online continuing education database, which automates continuing education for license renewal. The fee would be collected by the board as part of the annual license renewal and paid to the national clearinghouse; Continuing Optometric Practitioner Education (COPE). With approval, 72% of all Optometrists could save \$5.00 per year. Currently, OE Tracker tracks continuing education for all Minnesota Optometrists. Bill language would allow the Board flexibility to increase the fee at a not to exceed amount as aligned with the cost of the subscription.

COPE collects all approved continuing education attended by ODs throughout the nation and provides an electronic distribution of that data to the Minnesota Board of Optometry. In the past year, ODs using OE Tracker completed the electronic renewal of license averaging less than five minutes.

Proposal:

	Units per year	Current Fee	Proposed Fee to Charge FY 2020	Total Revenue FY 2020	Total Revenue FY 2021
Fees/Revenue					
Annual OE Tracker Subscription	1,100	\$0.00	\$20.00	\$22,000	22,000

Small Agency Increase:	FY2020	FY2021	FY2022	FY2023
OE Tracker: Subscription Expense	\$22,000	\$22,000	\$22,000	\$22,000
Total	\$22,000	\$22,000	\$22,000	\$22,000

Equity and Inclusion:

The Board does not discriminate on the basis of race, ethnicity, gender, sexual orientation, or disability. The positive impact of this change will be to continue to provide services for all people of the State of Minnesota without discrimination.

Results:

Board members would achieve 100% of auditing all ODs for continuing education requirements.

AT A GLANCE

- License more than 12,000 peace officers and part-time peace officers.
- Certify the Professional Peace Officer Education programs at 29 colleges and universities.
- Conduct law enforcement agency compliance reviews.
- Process complaints of peace officer misconduct.
- The POST Board serves more than 430 law enforcement agencies, 29 colleges and universities, legislators and Governor's office, local elected officials, other state agencies, as well as special interest groups, individual citizens and the media.

PURPOSE

The mission of the Minnesota Board of Peace Officer Standards and Training (POST Board) is to advance the professionalism of Minnesota's peace officers by adopting and regulating education, selection, licensing and training standards. Established in 1978 by M.S. 626.84 (<https://www.revisor.mn.gov/statutes/?id=626.84>), the purpose of the POST Board is to regulate and enhance the profession of law enforcement throughout the state of Minnesota.

The POST Board supports the following statewide outcomes.

- **Minnesotans have the education and skills needed to achieve their goals**
- **People in Minnesota are safe**
- **Efficient and accountable government services**

BUDGET

Source: Budget Planning & Analysis System (BPAS)

Source: Consolidated Fund Statement

The POST Board is funded through a special revenue account from a surcharge on certain criminal and traffic offences. Although the law directs the state treasurer to credit 39% of the proceeds of the first \$25 of that surcharge to the Peace Officer Training Account, POST's budget cannot exceed the legislated base appropriation. Minnesota Statutes 171.20 Subdivision 4 (d) (<https://www.revisor.mn.gov/statutes/cite/171.20>) requires that certain non-DUI (Driving Under the Influence) reinstatement fees be deposited in a special revenue account and

appropriates those proceeds to POST for training reimbursements to local government. The POST Board also received a General Fund appropriation in FY 18-19. The budget for FY 18-19 from all these sources is \$20,480,000 and it is allocated as follows:

- Training reimbursements to local governments (includes \$12,000,000 from the General Fund):
..... \$17,718,000
- General operating costs:..... \$2,382,000
Training reimbursements to local governments from non-DUI
Related Driver's License Reinstatements \$180,000
- Special Revenue for Training (one time appropriation) \$200,000
- The POST Board has 10 full-time employees.

STRATEGIES

The POST Board's mission is implemented through the following functions:

Education

- establish and maintain pre-service education learning objectives
- manage a training reimbursement fund for law enforcement agencies

Licensing and Compliance

- administer license exams (peace officer, interstate reciprocity and military reciprocity)
- license peace officers
- renew and restore peace officer licenses
- ensure compliance with standards of conduct
- ensure compliance with in-service continuing education requirements
- conduct annual on-site compliance reviews of the state's 431 law enforcement agencies every 4-5 years
- process allegations of misconduct and impartial policing complaints

Efficiency

- administer new on-line examination process and administer current computer system enhancements to data collection, processing and data storage
- manage the in-house e-licensing system
- manage the in-house continuing education tracking system for licensees
- perform other duties and services as mandated by the legislature

RESULTS

While Board and staff members are comfortable and experienced in their role as the State's regulatory agency for law enforcement, POST also serves a parallel role as a resource to law enforcement officers, chiefs, sheriffs and state agency directors.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>

Quantity	Administered peace officer exams	1,013	899	FY 17/FY18
Quantity	Conducted on-site law enforcement agency compliance reviews	76	47	FY 17/FY18

POST's enabling legislation was created in 1977 session law and later codified under M.S. 626.84 (<https://www.revisor.mn.gov/statutes/?id=626.84>), which provides the legal authority for the POST Board.

Minnesota Board of Peace Officer Standards and Training (POST Board)

FY 20-21 Biennial Budget Change Item

Change Item Title: Deficiency Funding Request

Fiscal Impact (\$000s)	FY 2019			
General Fund				
Transfer Out	500			
Revenues	0			
Net Fiscal Impact = (Expenditures – Revenues)	500			
FTEs	0			

Recommendation:

The Governor recommends a general fund appropriation of \$500,000 in FY 2019 for the Minnesota Board of Peace Officer Standards and Training (POST Board). This funding would be transferred to the peace officer training account in the special revenue fund to ensure adequate revenues in the account to cover the agency's total direct appropriation of \$4,156,000 in FY 2019.

Rationale/Background:

The POST Board's operating budget as well as the base budget for peace officer training reimbursement of local law enforcement is appropriated directly from the special revenue account fund. This account is funded from a surcharge on criminal and traffic convictions. Currently, Minnesota Statute § 357.021, subdivision 7 (2) directs 39% of the first \$25 of the surcharge to be credited to the peace officer training account in the special revenue fund. The percentage directed to the POST Board is based on the original \$25 surcharge. Proceeds from that portion of the surcharge breakdown as follows: 39% to the peace officer training account, 60% to the general fund and the remaining 1% to the DNR to fund game warden training. The surcharge portion directed to the POST Board has declined over time and now no longer covers the appropriated amount.

Proposal:

This proposal to transfer \$500,000 from the general fund to the peace officer training account will ensure that there are sufficient revenues in that account to cover the existing appropriation to the POST Board for its operating expenses and a portion of the training reimbursement funding for peace officers.

The deficiency in the account is projected to increase significantly in the FY 2020-21 biennium. The Governor's proposal addressing the deficiency after FY 2019 is included in a separate recommendation.

Board of Peace Officer Standards and Training

FY 20-21 Biennial Budget Change Item

Change Item Title: Increase Dedicated Funding Source to Maintain Appropriations

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	(1,897)	(2,097)	(2,003)	(1,915)
Transfers In	1,390	1,496	1,244	1,007
Net Fiscal Impact GF	507	601	759	908
Special Revenue Fund				
Expenditures	0	0	0	0
Revenues	1,897	2,097	2,003	1,915
Transfer Out	1,390	1,496	1,244	1,007
Net Fiscal Impact SF	(507)	(601)	(759)	(908)
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends a significant increase to the percentage credited to the peace officer training account from the criminal and traffic surcharge which is used to fund expenditures of the Board of Peace Officers Standards and Training (POST Board). This recommendation would increase the percentage of funds going into the account from 39 percent to 62 percent of the first \$25 collected under Minnesota Statute § 357.021, subdivision 7(2). It would likewise reduce the portion of the proceeds deposited into the general fund by the same amount. The amount of funding deposited into this account under current law has decreased substantially since the surcharge was enacted and no longer covers the agency's appropriations out of it.

Rationale/Background:

The POST Board's operating budget as well as the base budget for peace officer training reimbursement to local law enforcement is appropriated directly from the special revenue account. This account receives funding from a surcharge on certain criminal and traffic convictions. Under current law, Minnesota Statute § 357.021, subdivision 7(2) directs 39% of the first \$25 of the surcharge to be credited to the peace officer training account in the special revenue fund. Proceeds from that \$25 portion of the surcharge are now deposited as follows: 39% to the peace officer training account, 60% to the general fund and the remaining 1% to the DNR to fund game warden training.

The surcharge portion dedicated to the peace officer training account no longer covers the POST Board appropriation, creating a deficiency in the account. The amount of proceeds has generally declined each year since the surcharge was enacted and has become more volatile in the last couple years. As an example, the amount available for POST Board spending declined from \$5.258 million in FY 2009 to \$3.984 million in FY 2018. Base level funding for expenditures out of this account are \$4.156 million each year in the FY 2020-21 biennium, while current forecast revenues available are estimated at \$3.891 million in FY 2020 and \$3.719 million in FY 2021. Without the additional funding, POST Bd. expenditures would have to be reduced so as not to exceed the actual revenues collected, regardless of the appropriated amount.

Proposal:

This proposal would allow the POST Board to continue with the dedicated funding source it has used since the creation of the criminal and traffic surcharge. The proposal to increase the funding percentage from 39% to 62% is calculated to allow for potential modest increases in appropriations made from the peace officer training account and for further fluctuations in the revenues.

Surcharges in excess of the appropriation are transferred back to the general fund, so the impact to the general fund also accounts for the estimated transfer.

Statutory Change(s):

Minnesota Statute § 357.021, subd. 7(2).

Board of Peace Officer Standards and Training (POST Board)

FY 20-21 Biennial Budget Change Item

Change Item Title: Rulemaking Initiative

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Transfers In	(155)	(155)	(155)	(155)
Special Revenue Fund				
Expenditures	155	155	155	155
Transfers Out	(155)	(155)	(155)	(155)
Net Fiscal Impact = (Expenditures – Revenues)	155	155	155	155
FTEs	1	1	1	1

Recommendation:

The Governor recommends increasing the appropriation to the Board of Peace Officer Standards and Training (POST Board) by \$155,000 each year from the peace officer training account in the special revenue fund to cover the costs of administrative rulemaking. The agency has requested this investment to more effectively carry out its statutory authority to promulgate and update rules pertaining to the selection, training, licensing and standards of conduct of peace officers and part-time peace officers to ensure the most effective and professional peace officers serve our communities. This funding will allow the POST Board to re-establish the internal capacity and expertise to develop, write and update administrative rules relating to the law enforcement profession.

Rationale/Background:

The role of the POST Board is to advance the professionalism of Minnesota's licensed peace officers through education, selection, licensing, and on-going training standards.

The POST Board is requesting to re-establish a rules coordinator position to build long term approaches and outcomes on behalf of the state by positioning itself to efficiently and effectively promulgate rules pursuant to its statutory authority. The lack of a rules coordinator on staff with the experience and technical expertise for such rulemaking has been challenging for the agency. To achieve this goal, the POST Board must restore its internal capacity and capability to effectively and comprehensively update its administrative rules to reflect current best practices and appropriate law enforcement standards. The POST Board has been without a rules coordinator since 2010 and has done little rulemaking since that time. This is an important strategic initiative for the Board given the ongoing focus in Minnesota on police practices, training and standards.

Proposal:

The primary objectives of this initiative is to:

- Restore POST's internal capacity to promulgate rules
- Interpret, analyze and report on bills, statutes or rules that impact the POST Board and that may require amending board rules

The POST Board is proactively seeking increased staffing to handle current board rulemaking initiatives and future executive and legislative initiatives and requirements concerning the law enforcement profession that require administrative rulemaking. This position would also conduct research to address issues raised by the legislature, the POST Board, or POST Board committees. The staffing costs for this position are estimated at \$100,000 each year.

Internal staff work for the board's rulemaking initiative has begun. The board will also incur non-staffing costs associated with this initiative. Those costs are estimated by using the MN Administrative Rulemaking Manual and are relative to legal fees to the Office of Attorney General, Office of Administrative Hearings, and fees for state register publication, transcripts and other miscellaneous fees.

This increase in the POST Boards appropriation results in an equivalent decrease in revenues to the general fund.

Results:

Re-establishing this permanent position will enable POST to build long term approaches and outcomes on behalf of the state by positioning POST to efficiently and effectively promulgate rules and respond to legislative initiatives and inquiries concerning the law enforcement profession.

AT A GLANCE

- Authorized by the Legislature in 1985
- Provides unique and challenging learning environment to highly talented Minnesota students
- Provides high-quality professional development opportunities for arts teachers in 480 Minnesota public and charter school districts
- Provided leadership for the development of new Minnesota K-12 Academic Standards in the Arts.
- Employs 63 full and part-time teachers and staff
- Facilitates a Master Teacher network that connects experienced art teachers across the entire state.
- Designates and supports “demonstration” (magnet) school sites in each region.
- Provides a comprehensive arts planning program (CAPP) for up to 30 districts or sites statewide each year.
- Center is governed by a statewide board

PURPOSE

The mission of the Perpich Center for Arts Education is to provide all Minnesota students the opportunity to develop, enhance, and integrate their artistic and academic abilities to their highest potential. As a public education institution, the Perpich Center is uniquely positioned to fuse artistic passion and academic excellence to produce creative critical thinkers. We do this by teaching in and through the arts. The agency operates two distinct divisions, the Arts High School and the Professional Development and Resource Support to accomplish the following:

1. Provide a challenging and supportive learning environment for highly talented Minnesota arts students in grades 11 & 12.
2. Assist all Minnesota students in developing the education and skills needed to achieve their personal goals. Perpich Center programs in arts education address many of the systemic issues affecting student achievement, including social and personal development, equity, and engagement in learning.
3. Prepare Minnesota’s future workforce with 21st Century skills including creativity, communication, collaboration and critical thinking. These skills result in a better prepared workforce, thus contributing to a thriving economy that encourages business growth and employment opportunities.
4. Support Minnesota public and charter school arts education teachers through high quality professional development programming.
5. Maintain a traditional lending library for Perpich students, public patrons, and art educators across the State of Minnesota. The professional collection of more than 15,000 items serves as the preeminent arts education resource for the State of Minnesota. This collection includes print, multimedia and electronic resources on arts education, arts-integrated education, arts in cultural context and professional development. Special collections of multimedia and electronic resources on arts education, arts-integrated education, arts in cultural context and professional development are also available. The Perpich Center for Arts Education Library was fully remodeled in 2018.

BUDGET

Source: Budget Planning & Analysis System (BPAS)

Source: Consolidated Fund Statement

The Perpich Center had a total biennial budget of \$17 million. Funds are primarily from general fund appropriations. The Center also receives revenues from student fees and federal reimbursements through the MN Department of Education.

STRATEGIES

To accomplish its mission, the Perpich Center for Arts Education programs incorporate the following strategies:

- Through rigorous work in both artistic and academic disciplines, the Perpich Arts High School student develops competencies that prepare them for a creative life.**
- Statewide Arts Leadership:** The Perpich Center has been fostering development of arts education throughout Minnesota school districts since 1985. We do this through departments that include the Perpich Arts High School and Professional Development and Resource Support (PD&R) formerly referred to as "Outreach".

A survey commissioned by Perpich Center with funds from the Cultural Arts and Heritage Fund, indicated the following benchmarks.

- 87% of schools have aligned their curriculum with state arts standards
- Nearly one-half of all high schools include the arts in School Improvement Plans
- 92% of all schools use licensed arts teachers (full or part-time) as the primary provider of music and visual arts instruction
- 93% of all schools reported providing student field trips to museums, theaters, musical performances and exhibitions to engage in artistic experiences

Building upon this solid foundation of arts in Minnesota schools, the Perpich Center has developed a plan to meet the needs of arts teachers and public school arts programs statewide. Outreach programs were assessed, modified, and in some cases eliminated in FY18 based upon statutory language, mission, impact, cost, and duplication of services. A partnership with eight regional Service Coops provide a location to meet, technology and connectivity, and member communication services bringing many services to them, rather than traveling to the metropolitan area.

- Supporting effective schools.** Perpich Arts High School – Perpich Arts High School opened its doors in 1989 and graduated its first class in 1991. It is a statewide, public, residential high school for students in

11th and 12th grades. Students who wish to attend Perpich Arts High School must go through a competitive application and review process. Those accepted have shown artistic promise and a strong commitment to rigorous study in the arts and academics. Students from 61 school districts attended the most recent academic year at the Arts High School. Those students represented the eight (8) congressional districts in our state.

The school is entering its second year of intensive teacher professional development to improve student engagement, has established defined student outcomes, and provides for effective teacher support and evaluation. Additionally, the staff and administration are committed to ongoing implicit bias and equity training. Goals of the school include 100% graduation and 100% college placement.

4. **Equity and Diversity.** The Perpich Center seeks to foster equity and diversity both in its school and through professional development opportunities provided to Minnesota arts teachers. Closing the achievement gap has been the state's #1 educational goal for the past years. The agency seeks to create student-centered educational organizations through training its own staff in student engagement and culturally responsive teaching techniques as well as providing opportunities for educator growth via professional development across the state.
5. **Operational Excellence, Financial Stability, and Accountability.** As a state agency, Perpich Center operates under a plan of continuous improvement in order to balance financial and human resources as dictated by revenues approved by the legislature. The agency is governed by a 15-member board, appointed by the Governor and chosen for their expertise and experience in serving statewide initiatives. A sixteenth ex-officio member representing the Minnesota Department of Education was added in the 2017 legislative session. The agency has vigorously pursued and completed its corrective actions plans to mitigate the findings of the 2016 Legislative Auditor reports.
6. **Positive Public Image:** A Communications and Marketing Plan was developed during FY 18 setting the stage for a multi-faceted approach to shifting the public perception of the agency, increasing enrollment, and making connections with arts educators and organizations across the state. Strategies include: Targeted Audience Identification; Updated Marketing Materials (both digital and print); Promotions using social media, market data, press releases, online advertising and event marketing; Joint ventures and partnerships with other arts organizations; and involving our own students in the creation and dissemination of student recruitment information.

Perpich Center for Arts Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: Operating Adjustment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	210	275	275	275
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	210	275	275	275
FTEs	3.3	3.3	3.3	3.3

Recommendation:

The Governor recommends additional funding of \$485,000 in the FY 2020-2021 biennium to maintain the current level of service delivery at the Perpich Center for Arts Education.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the Perpich Center, this funding will cover known employee compensation growth and expected increases for legal services and other operating expenses such as fuel and utilities.

Results:

This proposal is intended to allow agencies to continue to provide current levels of service and information to the public.

Perpich Center for Arts Education

FY 2020-21 Biennial Budget Change Item

Change Item Title: Technology Initiative

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	960	380	340	285
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	960	380	340	285
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$1.34 million in the FY 2020-2021 biennium to fund campus-wide technology upgrades at the Perpich Center for Arts Education. These technology improvements are needed to protect, enhance and support the Center's operations, infrastructure and school safety systems as well as improve the delivery of instructional education.

Rationale/Background:

As the state's agency for arts education, technology is essential for the Center's ability to support a statewide mission of providing all students and art educators the opportunity to develop and integrate their artistic and academic abilities to their highest potential. Unlike school districts, the Center cannot levy for technology.

Investment in technology is needed for the following reasons:

- The wireless network system is unreliable and unavailable in some areas of the campus, most notably in the dormitory where inconsistent access impedes contact with home, accessibility for homework, and communication with student medical facilities.
- Limited access and antiquated equipment hinder the ability of teachers to teach and students to learn. Each art area supported by the Center for school and outreach services has unique hardware and software applications that need ongoing support and enhancements to stay current in the industry.
- Campus security systems are antiquated and dysfunctional. In the past few years, most Minnesota schools have used technology to improve school safety. Improved safety systems will ensure the safety of students, staff and the thousands of guests who visit the campus each year.

Technology is the backbone in effective curricular programs in arts education. Improvements will bring the Center up-to-date with Minnesota schools, colleges, and the global marketplace. Limited financial and personnel resources can be better utilized with reliable technology that can be used for distance learning, accessing library materials, holding off-campus classes, and publishing online curricular materials. Used as a learning tool in arts education, technology can advance achievement for students and teachers. Innovation, creativity, and problem-solving skills are challenged and advanced when technology is incorporated into such learning activities as design engineering, technical writing, film production, photography, choreography, and music composition.

Proposal:

The Governor recommends funding Perpich Center's campus-wide IT project plan, which was created in consultation with MN.IT and other stakeholders, on how best to leverage limited IT capabilities. High level details of the technology plan are as follows:

- Expand and implement a campus-wide wireless network system by rewiring the entire campus (including the dormitory, classrooms, and conference center), and upgrading switches and servers as needed to support increase connectivity.
- Update hardware and software applications that support students' curricular needs, online learning, and video conferencing, and the digitization of the Center's library.
- Upgrade the campus security system by installing new hardware and software, which includes installing a new controlled entry system and security cameras.

Equity and Inclusion:

- Use of technology will help ensure statewide access to arts education for Minnesota students. The Center will increase capacity to identify and bring resources to more rural schools and more poverty school districts whose students lack access to the arts.
- Bringing technology up-to-date will enable Minnesota students seeking post-secondary education in the arts to be competitive with graduates from other high schools who are applying at the same institutions.

IT Related Proposals:

The costs associated with this proposal are based upon upgrading of infrastructure (such as wiring, servers, switches, WIFI), establishing replacement cycles for devices (hardware), upgrading security systems (hardware), the purchase and maintenance of related software and the current staff needed to train on the new technology that is being integrated.

<i>Category</i>	<i>FY 2020</i>	<i>FY 2021</i>	<i>FY 2022</i>	<i>FY 2023</i>	<i>FY 2024</i>	<i>FY 2025</i>

Total	960	380	340	285	285	285
MNIT FTEs						
Agency FTEs						

Results:

The Center is committed to tracking benchmarks on student engagement, communication and ability to grasp educational standards. This proposal allows access to communication, increased production and presentation capabilities and offers students more educational opportunities. Classrooms whose students have ubiquitous access to technology demonstrate increased understanding and mastery of their academic and art-area tasks.

Program: Arts Education
Activity: Agency Operation

perpich.mn.gov/

AT A GLANCE

- Provide for overall operation and planning for agency divisions.
- Oversee 33-acre campus in Golden Valley.
- 4,000 annual visitors attend concerts, exhibitions, and trainings?
- Plan for financial viability and sustainability.
- Manage school food service operations for breakfast, lunch, and dinner.
- Support a residence hall for X students.
- Manage stakeholder communications and web site developments.

PURPOSE & CONTEXT

Operations includes the structural divisions necessary for the agency to conduct business: human resources, facilities, administrative management, finance, communications, technology, program, security, and administration.

The center operates an Arts high school, student dormitory and a Professional Development and Resource Program (PD&R) formerly known as “outreach”. The arts high school accounts for about 28 FTE, the dormitory for about 4.2 FTE and PD&R about 8 FTE. The general fund appropriation to Perpich funds the majority of operations, the arts high school, the student dormitory and professional development & resources.

The Center provides a safe, healthy, and sustainable environment; empowers employees through resources, mentorship, training, and accountability; serves as good stewards of public dollars and public facilities; fosters an agency-wide culture that welcomes diversity, employee engagement, and informed decision-making.

Perpich is a key part of the arts education landscape in Minnesota*:

1. Minnesota is recognized as having all nationally accepted policies and standards in place for delivering effective K-12 programs for arts education.
2. Minnesota is one of 20 states having a State Arts Education Grant Program or School for the Arts.
3. Minnesota is one of 26 states mandating that high school students obtain course credit in the arts as a requirement for graduation.
4. Minnesota is one of 17 states that have policies that pertain to assessment of student learning in the arts.
5. Minnesota, New Hampshire and New Jersey are the only states that define the arts as core subject and have an aligned system of policies for the arts that is consistent with other core curricular areas.

*Source: Arts Education Partnership/Council of Chief State School Officers report: State of the States. Arts Education State Policy Summary 2016

SERVICES PROVIDED

- Provide internal and external decision-makers with research-based information supporting the impact of teaching and learning in and through the arts
- Assess state laws and policies and communicate results to decision-makers to assure Minnesota’s compliance with federal laws associated with arts education

- Conduct research and analytical services for internal agency divisions and school district leaders seeking to expand, enhance, or change the delivery of arts education to meet emerging needs
- Monitor school district shifts regarding arts education including: per-pupil spending for arts education, best practices, use of licensed arts teachers, student access to arts instruction, and inclusion of arts education in district strategic plans
- Provide information to managers so they are able to perform their responsibilities, including daily security reports, monthly financial statements, communication updates, and biweekly human resource reports
- Conduct quarterly reviews of internal controls, risk management procedures, and facilities
- Ensure employees within their departments have the expertise, training, resources, and authority to achieve their goals. Members of the leadership team are directors of: human resources, administrative management, finance, program, communications, and administration.

Advocacy for Minnesota Arts Education: Research continues to come forward demonstrating the impact of arts education in schools. Many organizations conduct national studies to determine accessibility to arts education and examine policy actions taken by individual states. In December 2015, passage of ESSA by congress includes language for implementation of arts education as meeting a “well-rounded education”. The Center works with the Minnesota Department of Education, the Governor, and the Minnesota Legislature to maintain appropriate laws and policies as a means to support arts education in Minnesota schools.

- Feedback from teachers and school district leaders, statewide
- Legislative position papers of local education associations
- Actions by Minnesota Board of Teaching
- State priorities in education
- Best practices emerging in arts education

RESULTS

Benchmark #1 – Improve system for collection of revenues

The Center has made steady improvement in policies and practices for internal controls and stewardship of public funds, including facility lease, staff and student food accounts, library fines, and residence hall fees. Process improvements have been made to improve the collection of revenues associated with the arts high school without increasing student fees.

Indicators:

- Communication to parents
- Options for payment
- Review committee for assistance and/or fee reduction

Program: Arts Education**Activity: Perpich Arts High School**perpich.mn.gov/index.php?section=high-school_overview

AT A GLANCE

- Statewide, residential public high school for 11th and 12th grade students
- Rigorous academic programs with offerings in six art areas: dance, literary, media, music, theater and visual
- 25% of families receive financial assistance to support attendance
- 27% students of color

PURPOSE & CONTEXT

The Perpich Arts High School is a statewide, public school with a residential component that serves 11th and 12th grade students. The purpose is to empower students who have a passion for the arts to participate creatively, critically, and confidently in the global community. Students who wish to attend the school go through a competitive application and review process.

Those accepted have shown artistic promise and a strong commitment to learning in an environment that supports rigorous academic programs.

This innovative, statewide school attracts students from all over the state who represent all aspects of Minnesota's demographics, including ethnic diversity, at-risk-youth, and families suffering economic hardship. We support a learning environment that is free of bullying and sharply focused on student artistic growth, personal leadership, and academic achievement.

The arts high school sponsors an internal college fair each fall where students are able to meet with college representatives from around the country, presenting their portfolio and transcript information. Many are granted immediate acceptance and scholarships from these visits, benchmarking our success in preparing students for college and for careers. Feedback from college admissions counselors show that arts high alums do well because they participate in their education, accept responsibility, and thrive on learning.

SERVICES PROVIDED

The Perpich Arts High School provides:

- Opportunity for Minnesota junior and senior students to attend a school focused on teaching and learning in and through the arts.
- A model community where students thrive in an innovative, challenging, and safe learning environment

As a result, Perpich graduates 98-100% of students annually and places 80-90% directly into 2-4 year colleges.

Perpich also engages in teacher evaluation and continuous improvement:

- Perpich teachers engage in continuous improvement planning and implementation in partnership with AdvancEd. The school is re-accredited every five years with ongoing benchmark goals and curriculum evaluation in between accreditation years.
- Perpich teachers develop competencies that all Perpich students are expected to demonstrate prior to graduation:
 - Maker of art
 - Innovator
 - Resource savvy

- Keen observer
- Empathetic collaborator
- Articulate communicator
- Engaged citizen
- Culturally competent
- Fluent critical and creative thinker
- Disciplinary thinker
- Problem framer and solver
- Decision maker and forward planner
- Self-knowledgeable
- Productive and accountable
- Devoted to improving

The Perpich Arts High School is committed to developing capacity of teachers, staff and students with regards to racial equity and inclusion. The school is engaging in this work through professional development series, partnership with racial equity and educational organizations, school-wide forums and strategic planning.

RESULTS

Benchmark – Student Achievement

Preparing students for post-secondary education and careers commensurate with their abilities and desires has long been a tradition at the Arts High. A two-year program today makes it imperative for us to support rigorous academic program with standards related to those in colleges seeking our students.

Indicators:

- Graduation rates
- AP Scores
- State and national achievement awards
- ACT Scores

Performance Measure: Improvement in student achievement.

Program: Arts Education

Activity: Perpich Center Outreach

http://perpich.mn.gov/index.php?section=outreach_overview

AT A GLANCE

- Perpich Arts Specialists provided professional development for arts educators in Dance, Media Arts, Music, Theater and Visual Arts statewide.
- Provided technical assistance and professional development for 1392 arts educators across the state.
- Provided professional development for 603 non-arts educators who learned to integrate the arts into their classrooms.
- Collaborated with Minnesota Department of Education to review and revise the Minnesota Academic Standards in the Arts.
- Regional Centers were reconfigured with a new Master Teacher network of representing all nine Service Cooperative Regions.
- Delivered professional development for 55 teachers in the Perpich Arts Integration Network of Teachers in the Southwest/South Central regions. This program ended December 30, 2017.
- • Managed Turnaround Arts, a whole school transformation initiative, for 7 schools, serving 184 educators across the state. This program ended June 30, 2018.

PURPOSE & CONTEXT

The primary goal of Professional Development & Resource Programs is to *build teacher and administrator capacity statewide so that they can provide innovative, inclusive, standards-based, measurable, and student centered learning in and through the arts.*

Four Arts Education Specialists (two part-time and two full-time) were in place as of February 2018. PDR staff provide innovative, inclusive, standard-based, student-centered professional development for individual teachers, school districts, schools, teachers and administrators. A Director of the Comprehensive Arts Planning Program (CAPP) will be hired in FY19. The CAPP program is being reinstated after being on hiatus about three years ago, to focus on assisting school districts with multi-year strategic planning by establishing district planning committees that work with district educators as well as community members and artists to develop a vision, mission and plan for the District arts education programs. A new Regional Center Director, expected to be on board by October 2018, will coordinate the Master Teachers network of 63 teachers as well as a pilot program of Demonstration Schools to increase the capacity of teachers and administrators to deliver high quality arts education.

The PDR goal of building educator capacity helps support the agency mission of providing all Minnesota students the opportunity to develop, enhance, and integrate their artistic and academic abilities to their highest potential because when teachers are supported to use effective practices in their classrooms, the quality of their teaching increases and consequently students have more prepared and effective teachers to help them reach their potential.

As schools and communities address education gaps, opportunity gaps and issues of access and equity, PDR assists with providing culturally diverse learning opportunities and resources to meet student and teacher needs to fulfill the arts standards and build strong arts programs.

SERVICES PROVIDED

- Collaboration with Minnesota Department of Education to support teacher development and academic standards.
- Professional development for arts educators and school administrators to strengthen the delivery of arts education throughout the state and better serve students.
- Curriculum, instruction and assessment development for all five arts areas, which builds educator capacity for student-centered, innovative, relevant learning opportunities.
- Support for arts teacher evaluation and professional learning through the Perpich Center “What to Look For in Teacher Evaluation in the Arts” documents.
- Access to relevant research on effective instructional practices.

RESULTS

Benchmark #1

Provide professional development and technical services for arts educators across the state. A commitment was made to hire Arts Education Specialists in each arts discipline to provide professional development and technical services for arts teachers statewide

Indicators:

- Specialists in Dance, Music and Theater provide discipline specific services to arts educators across the state

Performance Measures for FY17 and FY18, although not all programs and services were the same each year for exact comparison.

<i>Type of Measure</i>	<i>FY 2017</i>	<i>FY 2018</i>
Teachers served in school districts	330	184
Educators served in schools	508	269
Arts educators served	921	1,392
Non-arts educators served	513	603

Performance Measures indicate the reach of PDR as well as the level of depth of programming by listing the Tier of Service. Data can be accessed at; https://docs.google.com/spreadsheets/d/1E-gPKvRwaP8SLUt1jihFKmxV_jb0nERMYN3_b9-fl0g/edit?usp=sharing

Program: Arts Education

Activity: Crosswinds Arts and Science School

AT A GLANCE

- School was conveyed to the Center in July, 2014 and operates as a wholly-owned subsidiary/independent school district
- Year-round middle school focused on integration and diversity
- 60% students of color
- 63% of students receive free/reduced meals
- Curricular focus on art and science to engage all learners
- Serves as an incubator for teacher/administrator training in culturally relevant pedagogy and teaching strategies.
- Crosswinds Arts and Science School was closed June 30, 2017.

PURPOSE & CONTEXT

Crosswinds Arts and Science School served students from the east metro region. The school's mission was to create a culturally-diverse education community where each student's special talents and needs are recognized as he/she becomes a responsible citizen and an environmental steward. In response to Minnesota's achievement gap and the continued demographic growth among families of ethnic diversity, Crosswinds utilized the Center's expertise in art and cultural context to develop a curriculum that brings each student's culture or frame of reference into the classroom to make learning more meaningful and applicable.

To further address Minnesota's student achievement gap and to better prepare teachers for emerging demographic shifts, Crosswinds Arts and Science School operated a Teacher Training Institute for student teachers and student administrators from Minnesota college and university teacher/educator preparation programs. Research continues to suggest that student achievement improves in classrooms where students and teachers share similar social and cultural backgrounds.

SERVICES PROVIDED

- Culturally relevant teaching and mentoring of teachers and administrators
- Year-round programming with service learning and enrichment opportunities for all students
- Holistic approach to teaching and learning that addresses the systemic issues affecting achievement
- Training by Center staff on culturally relevant teaching and pedagogy
- Access by all interested Minnesota teachers to professional development conferences and/or counsel by Perpich Center professional development staff
- Services for families and area community leaders that help address changing demographics and/or special health, social or other humanistic needs.

Effective July 1, 2017, Crosswinds Arts and Science School was closed by enabling legislation from the 90th Legislature, 1st Special Session. With the closing of the school, approximately 36 staff members lost employment. Layoff payments for the affected staff were driven by their corresponding bargaining unit and money was appropriated to cover those costs.

Until the Department of Administration was able to sell the building, the Perpich Center was still responsible for the maintaining the building. The costs to maintain the building were offset by Perpich leasing the building to the Woodbury Leadership Academy for the 2017-18 school year.

The Department of Administration sold the Crosswinds building to the Saint Paul School District in February 2018.

Program: Arts Education

Activity: Turnaround Arts: Minnesota

perpich.mn.gov/index.php?section=outreach_turnaround17

AT A GLANCE

- Turnaround Arts a national program that is part of the President’s Committee on the Arts and the Humanities
- Minnesota was selected to participate in 2014, along with schools in Boston, California, Chicago, Des Moines, and Louisiana
- 3,700 total students were served in MN; 300 teachers and specialists
- Funds were approved during the 2014 and 2015 legislative sessions, with additional support from the Perpich Center for Arts Education and the Minnesota State Arts Board

PURPOSE & CONTEXT

The Turnaround Arts initiative was designed to improve student achievement and engagement by using the arts as an improvement tool in high-poverty, underperforming schools (as designated by the Minnesota Department of Education). Each school in the national program started out in the lowest performing 5% in the state, but are working hard to close the achievement gap and turnaround their school. With guidance and direction from professionals of the Perpich Center for Arts Education, these schools developed programs to strategically use arts education and arts integration to address persistent, pervasive problems commonly found in high-poverty, chronically underperforming schools, such as student achievement and engagement, school culture and climate, and family and community involvement.

The Turnaround Arts program has ended as of June 30, 2018 due to no additional funding provided to operate the program.

Eight schools were accepted into the program. They are:

- Bethune Community School (Minneapolis)
- Northport Elementary School (Brooklyn Center)
- Red Lake Middle School (Red Lake)
- Northside Elementary School (St James)
- I.J. Holton Intermediate School (Austin)
- Stonebridge World School (Minneapolis)
- Riverside Elementary School (Rochester)
- Cityview Community School (Minneapolis)

This project addresses the agency mission, to provide “all Minnesota students the opportunity to develop and integrate their artistic and academic abilities to their highest potential,” by building whole school capacity to help improve some of our lowest performing schools through the arts.

SERVICES PROVIDED

The program provides both uniform and customized resources to respond to the particular arts education-related needs of the individual schools selected to participate, including:

- Strategic planning support
- Principal and teacher coaching and support

- In-school professional development for the entire teaching staff
- Tools, approaches, and resources designed to reach students and improve achievement

RESULTS

This program began with the 2014-15 school year. External evaluators have collected data at all Turnaround Arts sites in the country. Measurements include:

- Increased MCA scores in all Minnesota schools and that increase ranged from 15.3% to 65.7% in FY16
- Increased student attendance by decreasing tardiness and school suspensions in all MN schools ranging from 57% to 96% in FY 16
- Administration of the “5 Essentials Survey” for tracking growth in ambitious instruction, effective leaders, collaborative teachers, supportive environment, and involved families

Laws of 2014, Chapter 312, Article 4, Section 2, Subd.6

Narrative

Perpich Center receives federal reimbursement through the Minnesota Department of Education for the following programs:

- Free/Reduced Breakfast (Only FY18, as of FY19 Perpich no longer participates in the school nutrition program)
- Free/Reduced Lunch (Only FY18, as of FY19 Perpich no longer participates in the school nutrition program)
- Special Education

It is anticipated that the reimbursement for special education through MDE will remain steady through the biennium.

In addition, the Perpich Center was awarded a grant from the National Endowment for the Arts. The grant was awarded to organizations and individuals for the promotion of the arts. The Perpich Center will be using the grant to support a professional development program for arts educators and administrators across the entire State of Minnesota. The program, called Perpich Regional Centers Master Teachers Network and Demonstration Schools, is being instituted to focus on serving more arts educators in all parts of the state, most especially rural Minnesota

AT A GLANCE

In FY 2016,

Board Members and Staff

- 9 board members (six pharmacists and three public members) appointed by the Governor
- 21 Full-time employees

Licenses & Registrations Issued

- 21,271 individuals
- 4,143 businesses

Inspections

- 336 inspections of licensed facilities, including pharmacies, drug manufacturers and wholesalers, and medical gas distributors

Complaint & Discipline

- Receipt of 221 new jurisdictional complaints
- Resolution of 176 jurisdictional complaints
- 39 disciplinary actions taken

In calendar year 2017,

Prescription Monitoring Program (PMP)

- 7.42 million controlled substance prescriptions reported to PMP
- 26,157 enrolled PMP Users
- 1.24 million database queries

PURPOSE

The Board's mission is to preserve and protect the public health, safety, and welfare of Minnesotans by promoting the safe distribution of pharmaceuticals and the provision of quality pharmacy care.

The Board fulfills this mission through examination and licensure of pharmacists, regulation of the practice of pharmacy, inspection of licensed facilities, investigation of complaints, and the issuance of disciplinary orders and agreements for corrective action. Board staff also help educate pharmacists and others about laws, rules and best standards of practice.

The Minnesota Prescription Monitoring Program (PMP), a tool that prescribers and pharmacists can use to help prevent prescription drug abuse, is also administered by the Board.

The Board contributes to the following state wide outcomes:

- All Minnesotans have optimal health
- People in Minnesota are safe
- Efficient and accountable government services

BUDGET

Source: Budget Planning & Analysis System (BPAS)

Source: Consolidated Fund Statement

The activities of the board are largely funded by license fees collected from licensees of the Board. The Board has also received federal and private grants that have been used to make enhancements to the Prescription Monitoring Program.

The Board is funded by licensure fees and receives no general fund dollars. Minnesota Statutes section 214.06, subdivision 1(a) compels the Board to collect fees in the amount sufficient to cover direct and indirect expenditures. Funds are deposited as non-dedicated revenue into the state government special revenue fund. From this fund, the Board receives a direct appropriation to pay for agency expenses such as salaries, rent, costs associated with disciplinary/contested cases and operating expenditures. It also pays statewide indirect costs through an open appropriation.

In addition to Board operations, licensure fees fund activities that support other boards and agencies. Some of these are: the Administrative Services Unit (inter-board), Health Professionals Services Program (inter-board), Prescription Monitoring Program (Pharmacy Board), Office of the Attorney General for legal services, and the Criminal Background Check Program (inter-board).

STRATEGIES

The Board's primary strategy is to promote adherence to state and federal laws and rules relating to the practice of pharmacy and the manufacture and distribution of drugs. Another, equally important strategy is to promote the adoption of cutting edge standards of practice that go beyond the minimum requirements specified in the statutes and rules. The Board's activities can be divided into several areas of focus:

Licensing. Licensing is the Board's "foundation," on which most activities ultimately rest. The ability to issue licenses and registrations empowers the Board to inspect facilities, investigate complaints, and take disciplinary action when necessary. In addition, the Board is primarily funded by the licensing and registration fees that it collects. Most of the Board's staff members are involved in some aspect of the licensing process. Administrative staff members process applications and work with the National Association of Boards of Pharmacy to make sure that applicants for a pharmacist license have passed the required examinations. Compliance staff members conduct initial inspections of facilities before they are allowed to be licensed.

Compliance. Activities in this area can be further divided as follows:

- **Inspections.** The Board licenses or registers 2,125 in-state pharmacies, drug wholesalers, drug manufacturers, medical gas distributors and controlled substance researchers. Each facility is inspected by a Board Surveyor before it can open. Subsequent, unannounced inspections are also periodically conducted.
- **Complaint Investigations.** The Board investigates every jurisdictional complaint it receives. Most often, a Board Surveyor visits the pharmacy in question, meets with pharmacy staff, reviews the policies and procedures of the pharmacy, and directs pharmacy staff to make necessary changes to policies and procedures. For cases involving certain issues, such as alleged physical or mental impairment of a licensee, the Board refers the matter to the Attorney General's Office (AGO) for investigation. The Surveyor of the AGO Investigator issues a report which is reviewed by the Board's Complaint Review Panel (CRP). CRP may dismiss the complaint if the allegations aren't proven or may refer the matter on for discipline.
- **Discipline.** If either the CRP or the Board's Executive Director (ED) determines that the evidence substantiates a serious violation of statutes or rules, the matter is turned into a disciplinary case. The ED works with the AGO to initiate the due process procedures that the Board must follow. The licensee or registrant is directed to appear before a Committee on Professional Standards, which weighs the available evidence. In most cases, if the Committee determines that discipline is warranted, it reaches a settlement agreement with the licensee or registrant. Such agreements, which must be approved by the full Board, usually involve the issuance of a disciplinary order which places limitations and conditions on the license or registration of the person or business that was investigated.
- **Consultations.** The Executive Director, Deputy Director, and Board Surveyors are licensed pharmacists with, collectively, nearly 200 years of experience working in a variety of pharmacy settings. As such, their advice is sought on a daily basis by pharmacists and other licensees and registrants. The ED, DD and Surveyors provide consultations on issues that are often extremely technical and complex. The goal of all consultations is to promote both adherence to laws and rules and the adoption of cutting edge standards of practice and technology that help protect the health, welfare, and safety of citizens.

Policy, Regulatory and Legislative Activities. As new standards of practice emerge and new technologies are developed, the Board and its staff work to update guidances, rules, and statutes. Guidances help licensees and registrants use new technologies and procedures in a way that best promotes the health, welfare, and safety of citizens. As new technologies and standards of practice become more broadly accepted, the Board will promulgate rules, as necessary, to replace the guidances or propose statutory changes. In addition, Board staff very frequently provide technical assistance to legislators and their staff on a variety of issues concerning pharmacy and drugs. The Board also works on policy issues with other local, state, and federal agencies, including local law enforcement agencies, county attorneys, the state Departments of Human Services and Health, the Minnesota Pollution Control Agency, the Bureau of Criminal Apprehension, the U.S. Drug Enforcement Administration, and the U.S. Food and Drug Administration.

Services for the General Public. Board staff provides direct services to the public. Staff provide information to the public in response to inquiries concerning the legal requirements and standards for pharmacy practice. The public can use the Board's online license verification system to verify that individuals and businesses are licensed by the Board and to determine if any disciplinary action has been taken against a licensee or registrant. The Board provides free copies of disciplinary orders to the public upon request.

Prescription Monitoring Program. The purpose of the Prescription Monitoring Program (PMP) is to promote public health, safety, and welfare by detecting abuse or misuse of controlled substances— drugs that have a high potential for abuse and addiction, such as narcotics and stimulants. The PMP collects information concerning controlled substance prescriptions dispensed for people residing in Minnesota. Prescribers, pharmacists, and certain Medicaid staff can access this data through a secure online system. The PMP is a tool that these authorized users can employ in order to detect if a patient is obtaining prescriptions from multiple prescribers and

having them filled by multiple pharmacies. The Board encourages prescribers and pharmacists who identify individuals who appear to be engaged in such an activity to refer them for appropriate care – either chemical dependency treatment or pain management. Law enforcement officials can obtain data from the system as well, but only after obtaining a court-issued search warrant and serving it on the Board.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Percentage of in-state facility inspections completed annually	17.1%	19.3%	FY 2015 FY 2016
Quality	Percentage of complaints investigated and resolved within 12 months	71.7%	77.4%	FY 2015 FY 2016
Results	Number of individuals who receive prescriptions from five or more prescribers and have them filled at five or more pharmacies within a three month period of time	908	452	7/1/2016 – 12/31/2016 7/1/2017 – 12/31/2017

Sections of MN Statutes Chapters 151 (<https://www.revisor.mn.gov/statutes/?id=151>), 152 (<https://www.revisor.mn.gov/statutes/?id=152>) and 214 (<https://www.revisor.mn.gov/statutes/?id=214>) provide the Board of Pharmacy with legal authority to carry out its duties.

Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	124	126	126	126
FTEs	0	0	0	0

Recommendation:

The Governor recommends additional funding of \$250,000 in the FY 2020-2021 biennium to maintain the current level of service delivery at The Board of Pharmacy.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

The Board is entirely fee supported and receives no General Fund dollars to provide all services. Fees must be collected to cover all direct and indirect expenditures and are deposited as non-dedicated revenue into the State Government Special Revenue Fund (SGSRF). The Minnesota Legislature makes appropriations from the fund to pay for expenses incurred by the Board.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the Board of Pharmacy, this funding will cover known employee compensation growth, rent, legal services, and MN.IT costs. IT cost growth drivers may include dedicated MN.IT staff compensation-related increases, increased volume usage of enterprise IT services, increased software licensing costs, and/or application support and maintenance cost increases.

Small Agency Increase:	FY 2020	FY 2021	FY 2022	FY 2023
Salary Increases	\$44,000	\$61,000	\$61,000	\$61,000
Other Benefits – Board Member Per Diems	\$2,000	\$0	\$0	\$0
Rent Increases	\$12,000	\$12,000	\$12,000	\$12,000
Professional/Technical Contracts – Expert witness	\$5,000	\$5,000	\$5,000	\$5,000
Communications	\$3,000	\$3,000	\$3,000	\$3,000
In-State Travel	\$3,000	\$0	\$0	\$0
Out-State Travel	\$10,000	\$2,000	\$2,000	\$2,000
Employee Development	\$10,000	\$8,000	\$8,000	\$8,000
Administrative Hearings	\$5,000	\$5,000	\$5,000	\$5,000
Repairs	\$2,000	\$2,000	\$2,000	\$2,000

Small Agency Increase:	FY 2020	FY 2021	FY 2022	FY 2023
MN.IT Enterprise Services	\$28,000	\$28,000	\$28,000	\$28,000
Total	\$124,000	\$126,000	\$126,000	\$126,000

Equity and Inclusion:

The Board does not discriminate on the basis of race, ethnicity, gender, sexual orientation, or disability. The positive impact of this change will be to continue to provide services for all people of the State of Minnesota without discrimination. The proposal has no impact, either positive or negative on equity and inclusion.

IT Related Proposals:

A portion of this request includes an increase for database maintenance and to cover annual MN.IT service rates.

Pharmacy, Board of

FY 2020-21 Biennial Budget Change Item

Change Item Title: Prescription Monitoring Program Operating Adjustment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Opioid Stewardship Fund				
Expenditures	696	699	699	699
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	696	699	699	699
FTEs	2	2	2	2

Recommendation:

The Governor recommends additional funding of \$1.395 million from the Opioid Stewardship Fund in the FY 2020-2021 biennium to maintain the current level of service delivery at The Board of Pharmacy for the Prescription Monitoring Program (PMP).

This proposal is part of a package of proposals recommended by the Governor to address rising rates of opioid use. The package of proposals is funded by new fees on opioid manufacturers, wholesalers, and entities that handle controlled substances.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

The workload for the Board's PMP staff has increased since the program's inception in 2010. Part of the increased workload involves the processing of an increased number of search warrants, the need to do more analysis of data to assess the program, and the need to do additional work involving the accuracy and integrity of prescription data submitted to the program.

The Board previously held a contract with Health Information Designs, LLC (HID) for the PMP platform and service and support necessary to collect and store data, and to make it available to permissible users. The Board will be migrating to a new platform developed by APPRISS, which is called AWARe. The AWARe platform is far more robust than the existing platform.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the Board of Pharmacy, this funding will cover known employee compensation growth, rent increases, IT costs including enterprise rates and PMP system migration. IT cost growth drivers may include dedicated MN.IT staff compensation-related increases, increased volume usage of enterprise IT services, increased software licensing costs, and/or application support and maintenance cost increases.

Equity and Inclusion:

The Board does not discriminate on the basis of race, ethnicity, gender, sexual orientation, or disability. The positive impact of this change will be to continue to provide services for all people of the State of Minnesota without discrimination. There will be no direct impact on equity and inclusion.

IT Related Proposals:

This proposal contains costs related to the migration of the PMP system.

Results:

This proposal is intended to allow agencies to continue to provide current levels of service and information to the public.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>

Pharmacy, Board of

FY 2020-21 Biennial Budget Change Item

Change Item Title: Pharmacy Surveyor for Compliance Activities

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	199	190	190	190
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	199	190	190	190
FTEs	1	1	1	1

Recommendation:

The Governor recommends funding for a pharmacy surveyor at the Board of Pharmacy. The Board will hire another Pharmacy Surveyor in order to increase the number of in-state facility inspections that are completed and to better handle the increased number of complaints it has been receiving.

Rationale/Background:

The Board's workload has increased over the past decade due to an increase in the facilities licensed by the Board by 1,296 between 2008 and 2018 (a 43% increase). The number of individuals licensed by the Board increased by 5,609 during the same period of time (a 34% increase). Due to several factors, the number of complaints that the Board needs to process has tripled since FY 2008, totaling between 200 and 250 complaints per year (about one complaint per business day). The complexity of the complaints has also increased, with many complaints involving out-of-state compounding pharmacies, which have to be reviewed by the Board's Pharmacy Surveyors.

The Board currently employs seven Pharmacy Surveyors. However, two of those Surveyors are assigned to duties not related to facility inspections, complaint investigations, or review of out-of-state facility inspection reports. One of the Surveyors shares time as the Complaint Coordinator, ensuring that complaints are properly entered into our system, assigned to a Surveyor for investigation, and brought before the Board's Complaint Review Panel for resolution. The second Surveyor shares time as the Variance and Policy Review Coordinator, making sure that variance requests are properly entered into the system and reviewed by the Surveyors and acting as chair of the Board's Variance and Policy Review Committee. All of the Surveyors spend time responding to requests for technical assistance from licensees.

Proposal:

This proposal would allow the Board to hire an additional Pharmacy Surveyor so that the in-state facilities that the Board licenses can be inspected more frequently and complaints can be investigated and resolved more quickly. This proposal would allow the Board to hire an eighth Surveyor. As seen in the Results table below, the number of in-state facilities inspected decreased between FY 2016 and FY 2018 for three reasons: 1) several Pharmacy Surveyors retired and time to train new Surveyors to the point that they can complete inspections on their own; 2) Surveyors have had to spend a lot of time reviewing the inspection reports submitted by out-of-state facilities that are seeking Minnesota licenses; and 3) Surveyors have had to focus on complaint investigations. The percentage of complaints that are investigated and resolved has increased over the past several years.

The cost for the salaries and benefits of the current seven Pharmacy Surveyors is approximately \$1.25 million. The cost for the salary and benefits of an eighth Surveyor is projected to be \$187,000. An additional \$12,000 will be

used in FY2020 to pay for equipment and fixtures. An additional \$3,000 will be needed in FY 2021 to pay for IT services such as desktop and mobile device support and office software. The figure of \$187,000 is based on the salaries and benefits paid to current Pharmacy Surveyors and assumes a 2.8% increase in salaries and benefits for the next biennium. The \$3,000 cost for IT services was based on information provided by MN.IT.

The hiring process will be implemented and completed by the beginning of fiscal year 2020.

Small Agency Increase:	FY 2020	FY 2021	FY 2022	FY 2023
Salary Increases (Pharmacy Surveyor)	\$187,000	\$187,000	\$187,000	\$187,000
Equipment and Fixtures	\$9,000			
IT central services	\$3,000	\$3,000	\$3,000	\$3,000
Total	\$199,000	\$190,000	\$190,000	\$190,000

Equity and Inclusion:

The Board does not discriminate on the basis of race, ethnicity, gender, sexual orientation, or disability. The positive impact of this change will be to continue to provide services for all people of State of Minnesota without discrimination.

IT Related Proposals:

Some funds will be expended for routine IT services, such as a computers and office software.

Results:

By hiring an additional Pharmacy Surveyor, the Board should see improvements in the number of in-state facilities inspected annually. The goal is to inspect every in-state facility at least once every 24 months. Currently, the Board is unable to inspect at this rate. The completion of the training of the newer Surveyors, plus the addition of an eighth Surveyor, should help the Board meet this goal. Additionally, an increase in the percentage of complaints that are investigated and resolved within 12 months is expected with an additional Pharmacy Surveyor. Improvements have already been made in this area and will continue.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of in-state facility inspections completed annually	467	351	FY 2016 FY 2018
Quantity	Percentage of complaints investigated and resolved within 12 months	77%	85%	FY 2014 FY 2016

Statutory Change(s):

No changes in statutes are required.

Pharmacy, Board of

FY 2020-21 Biennial Budget Change Item

Change Item Title: Controlled Substances Registration System

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Opioid Stewardship Fund				
Expenditures	663	460	460	460
Revenues	7,918	7,918	7,918	7,918
Net Fiscal Impact = (Expenditures – Revenues)	(7,255)	(7,458)	(7,458)	(7,458)
FTEs	4.25	4.25	4.25	4.25

Recommendation:

The Governor recommends the establishment of a controlled substances registration system by the Board of Pharmacy. This proposal is part of a package of proposals recommended by the Governor to address rising rates of opioid use. This proposal represents one revenue source to support expenditures across many state agencies, including the Board of Pharmacy.

Rationale/Background:

At least 26 other states have established a controlled substances registration system that is equivalent to the federal controlled substance registration system administered by the United States Drug Enforcement Administration (DEA).

Through investigations, the Board of Pharmacy would have the authority to administratively remove a pharmacy's controlled substance registration if it is found to be in violation of state and federal laws. For example, if the Board received a complaint alleging that a pharmacy had begun purchasing a large number of opioids and if, after an investigation, the Board determined that the pharmacy was operating knowingly filling inappropriate prescriptions, the Board could administratively remove the pharmacy's controlled substance registration. This could be done more quickly than taking action against the license of the pharmacy, which requires lengthy due-process procedures. Establishing a controlled substance registration system would also help to identify prescribers of controlled substances who, under current law, are supposed to register for and maintain a Prescription Monitoring Program account.

Drug wholesalers, pharmacies, and prescribers all bear some of the responsibility for the opioid epidemic. Drug wholesalers have been fined by the Drug Enforcement Administration for not reporting suspiciously large sales of opioids to pharmacies and other purchasers who were inappropriately dispensing opioids. Similarly, the DEA has levied civil penalties against some of the large, national pharmacy chains – based on allegations that the pharmacists working for those chains did not appropriately verify the validity of controlled substance prescriptions. Prescribers, acting in accordance with pain treatment guidelines that are now considered flawed, inappropriately prescribed opioids.

Proposal:

The Board would establish a controlled substance registration system. The following businesses or entities would be required to obtain a controlled substance registration if they were involved in the manufacture, sale, prescribing, or handling of any controlled substances: drug manufacturers, drug wholesalers, pharmacies, prescribers, and controlled substance researchers. The registration would have to be renewed annually. All fee

revenue would be deposited in the Opioid Stewardship Fund. The funds would be used to administer the registration system, upgrade the PMP, and to fund several activities across state government.

Fiscal Impact:

Controlled Substances Registration Fee Expenditures				
	FY20	FY21	FY22	FY23
Salary	387	387	387	387
IT	125	25	25	25
Other Operating Costs	151	48	48	48
Total	663	460	460	460

This proposal would require an additional 4.25 staff, including 0.25 manager, a pharmacy surveyor, a program lead, and two processing agents. The program would require modifications to the Board's current registration system. There are a number of other operating costs, including costs for space, communications with impacted providers, and other supplies.

Controlled Substances Registration Fee Revenue Calculation			
Registration Type	Number	Proposed Fee (annual)	Revenue
Pharmacy - Chain	882	\$2,500	\$2,205,000
Pharmacy - Independent	307	\$500	\$153,500
Pharmacy - Hospital (> 50 beds)	85	\$2,500	\$212,500
Pharmacy - Hospital (< 50 beds)	59	\$500	\$29,500
Researcher	214	\$125	\$26,750
Manufacturer - large	10	\$75,000	\$750,000
Manufacturer - medium	28	\$5,000	\$140,000
Manufacturer - small	49	\$500	\$24,500
Wholesaler - large	3	\$75,000	\$225,000
Wholesaler- smaller	13	\$2,500	\$32,500
Practitioners	32,946	\$125	\$4,118,250
Total	34,596	TOTAL	\$7,917,500

IT Related Proposals:

There will be costs to pay for additional services from our licensing software vendor; purchase of computers, monitors, phones, etc. for new staff; one-time MN.IT costs related to reviewing the work done by the vendor; and costs associated with obtaining more server space.

Results:

The primary purpose of this proposal is to create a permanent and stable source of revenue to fund various state programs that are part of the effort to combat opioid abuse, including the Prescription Monitoring Program. The ultimate goal is to reduce opioid abuse and to reduce the number of deaths that are being caused by opioid overdoses.

Statutory Change(s):

Statutory changes will be required to sections 152.01, 152.10, 152.11, 152.12, 151.125 and 151.126.

Pharmacy, Board of

FY 2020-21 Biennial Budget Change Item

Change Item Title: Fee Increase

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	651	651	651	651
Net Fiscal Impact = (Expenditures – Revenues)	(651)	(651)	(651)	(651)
FTEs	0	0	0	0

Recommendation:

The Governor recommends a fee increase for the Board of Pharmacy to maintain its core functions.

Rationale/Background:

The Board's workload has dramatically increased over the past decade. The number of facilities licensed by the Board increased by 1,296 between 2008 and 2018 (a 43% increase). The number of individuals licensed by the Board increased by 5,609 during the same period of time (a 34% increase). Due to several factors, the number of complaints that the Board needs to process has tripled since FY2008. The Board's last fee increases occurred in FY 2015.

Proposal:

This proposal to increase fees is intended to ensure that the Board will have funds to carry out its mission to protect the public by covering personnel costs and other operating expenses. This increase would allow the Board to continue its services of completing facility inspections, responding to complaints, imposing disciplinary actions, and issuing licenses and registrations.

Previous Projected Fee Revenue			\$3,013,037.50		\$3,013,037.50
Extra Revenue with fee increase			\$650,817.50		\$650,817.50

Results:

By retaining current staff, the Board should see improvements in the percentage of in-state facilities inspected annually. The Board also anticipates that license applications will be processed more quickly. The percentage of complaints that have been investigated and resolved within 12 months increased from 77% to 85% between FY 2014 and 2016.

Type of Measure	Name of Measure	Previous	Current	Dates
Quantity	Number of in-state facility inspections completed annually	467	351	FY 2016 FY 2018
Quality	Percentage of complaints investigated and resolved within 12 months	77%	85%	FY 2014 FY 2016

Equity and Inclusion:

The Board does not discriminate on the basis of race, ethnicity, gender, sexual orientation, or disability. The positive impact of this change will be to continue to provide services for all people of State of Minnesota without discrimination.

Statutory Change(s):

The Board's fee are listed in Minn. Stats. §151.065, which will need to be amended.

Pharmacy, Board of

FY 2020-21 Biennial Budget Change Item

Change Item Title: Opioid Wholesaler and Manufacturer Registration Fees

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	284	126	126	126
Revenues	18,000	18,000	18,000	18,000
Net Fiscal Impact = (Expenditures – Revenues)	(17,716)	(17,784)	(17,784)	(17,784)
FTEs	2	2	2	2

Recommendation:

The Governor recommends the establishment of fees on opioid wholesalers and manufacturers. This proposal is part of a package proposals recommended by the Governor to address rising rates of opioid use. This proposal represents one revenue source to support expenditures across many state agencies, including the Board of Pharmacy.

Rationale/Background:

The opioid crisis has had a devastating impact on communities across Minnesota and opioid overdose deaths continue to rise in Minnesota. In 2016, there were:

- 395 total opioid overdose deaths—an 18% increase since 2015
- 194 overdose deaths that involved prescription opioids
- 150 overdose deaths that involved heroin

In 2017, the number of overdose deaths rose to 773 and this crisis has not been limited to any one area of the state.

The Governor and legislature have taken steps to address the issue. Key initiatives include, the Minnesota State Substance Abuse Strategy, the Opioid Prescribing Improvement and Monitoring Work Group, the Integrated Care for High Risk Pregnant Women Initiative grant funds to expand care for pregnant women and substance exposed infants, funding to increase access to Naloxone, and efforts to make disposing of unused prescription opioids easier. Minnesota has also received a number of federal grants to support Minnesota's response to the opioid epidemic. While these efforts are an important start, the scope and impact of this crisis requires even more robust, urgent, and sustained action. This proposal seeks to build upon and expand these existing efforts and ensure there are on-going and sustainable resources available to address opioid abuse.

Proposal:

This proposal would establish an annual registration fee for both opioid manufacturers and wholesale drug distributors who distribute opioids in the state of Minnesota. The total of all manufacturer fees would be \$11 million. This amount would be prorated across manufacturers based on the number of units sold, delivered, or distributed across the state. The total of all wholesaler fees would be \$7 million, which would be prorated in the same manner. This proposal would also fund two FTEs and \$150,000 in IT database development costs.

Fiscal Impact:

Manufacturer and Wholesales Registration Fee Expenditures				
	FY20	FY21	FY22	FY23
Salary	120	120	120	120
IT	150	3	3	3
Other Operating Costs	14	3	3	3
Total	284	126	126	126

Results:

This funding stream will support state efforts to impact the following indicators:

- Reduce opioid overdose related deaths;
- Increase the number of people who receive opioid use disorder treatment and recovery services
- Reduce percentage of people reporting past 12-month pain reliever misuse
- Increased the number of buprenorphine waived physicians

Statutory Change(s):

New statute for fees and fund.

	Budget Activity Total		\$131	\$836	\$584	\$434		1.29
	Program Total		\$131	\$836	\$584	\$434		1.29
	Federal Fund – Agency Total		\$131	\$836	\$584	\$434		1.29

Narrative

The Board of Pharmacy receives an annual allocation from the MN Legislature to conduct the day-to-day operations of the MN Prescription Monitoring Program (PMP). The federal funds are primarily used to enhance system features to ensure health care professionals have the most robust tool to assist them in providing quality patient care while ensuring patient safety.

2016 Harold Rogers Prescription Drug Monitoring Program:

Funds were awarded to enhance the functioning of the data collection and analysis system, enhance educational and training programs, facilitate information sharing among states, enhance the capacity to provide unsolicited reports to health care professionals regarding their patients and travel as required by the grant conditions.

2018 Harold Rogers Prescription Drug Monitoring Program:

Funds were awarded to educate end users about the database and the updated functionalities; to ensure continued and accurate use of the system; create and distribute an educational tool; deploy analytics, visualization, and clinical intervention tools for system end users; expand the system's report generation

capabilities; travel to mandatory meetings as required by the grant conditions; and fund .38 FTE for grant management.

The creation and distribution of educational tools and resources is expected to cease within 12 months of the implementation of the updated system functionalities. There is a long-term commitment to continue to provide the enhanced version of the system including the analytics, visualization and additional clinical tools, and to expand the report generation capabilities of the system. With the additional report generation capabilities, it is anticipated that at minimum the .38 FTE position will need to be retained.

Injury Prevention and Control Research and State and County Based Programs:

Funds were provided by the MN Department of Health specifically to support the development of a solution to integrate the PMP registration process into the health licensing board's initial licensee application process and to measure the effectiveness of their solutions. It is anticipated that this funding once expended will not have an impact on the day-to-day operations of the program.

Substance Abuse and Mental Health Service Project of Regular and National Significance:

The MN Department of Human Services provided funds to plan and carryout the delivery of four regional information/education sessions. To continue to provide educational opportunities related to opioid abuse, misuse, and overdose as well as the use of the PMP system, it is anticipated that the .86 FTE position will need to be retained.

Agency Financing by Fund 4

Agency Change Summary 5

AT A GLANCE

- The Board's main function is to protect the public through the regulation of nearly 7,000 physical therapy professionals, including physical therapists (PTs) and physical therapist assistants (PTAs).
- 7,481 total licensees (5,601 PTs and 1,880 PTAs)
- 568 new licenses issued (425 PTs and 143 PTAs)
- 42 total complaints
- 34 resolved complaints
- 13 discipline orders
- 49 total open complaints on 6/30/17; 1 open longer than one year
- 1,133 Continuing Education courses reviewed

FY2017 data

PURPOSE

The Board works to ensure that people in Minnesota are safe. We license qualified applicants, and make sure that physical therapists (PTs) and physical therapist assistants (PTAs) maintain competence. We thoroughly investigate complaints against licensees, provide timely and impartial resolution, and when necessary, discipline licensees.

Our mission is to ensure that Minnesotans receive appropriate physical therapy from competent PTs and PTAs.

- **All Minnesotans have optimal health**
- **People in Minnesota are safe**
- **Efficient and accountable government services**

BUDGET

Source: Budget Planning & Analysis System (BPAS)

FY 04-15 includes spending for Physical Therapy. FY 16-17 includes Health Professionals Services Program (HPSP) and Physical Therapy spending.

Source: Consolidated Fund Statement

The Board is funded by licensure fees and receives no general fund dollars. Minnesota Statutes section 214.06, subdivision 1(a) compels the Board to collect fees in the amount sufficient to cover direct and indirect expenditures. Funds are deposited as non-dedicated revenue into the state government special revenue fund. From this fund, the Board receives a direct appropriation to pay for agency expenses such as salaries, rent, costs associated with disciplinary/contested cases and operating expenditures. It also pays statewide indirect costs through an open appropriation. Fees have not been raised since 1995.

In addition to Board operations, licensure fees fund activities that support multiple boards and/or other agencies. Some of these are: the Administrative Services Unit (inter-board), Health Professionals Services Program (inter-board), Office of the Attorney General for legal services, and Criminal Background Check Program (inter-board).

STRATEGIES

Our agency is funded by fees paid for licensing and continuing education program approvals.

The three primary services that the Board engages in to regulate providers of physical therapy are:

1. **Licensure:** assurance that those approved for Minnesota licensure have met minimum standards established by the Board. These standards primarily include successful completion of education from an accredited program and passing a national examination, both of which help establish that the candidate is competent to practice. The Board also reviews the candidates' backgrounds to evaluate their fitness to practice. Beginning in May 2015, the Board has required that candidates for initial licensure complete a fingerprint background check, providing additional information for the Board to consider when making licensure decisions.
2. **Continued Competence:** the Minnesota Board of Physical Therapy uses continuing education (CE) requirements as a measure of the licensees' involvement and commitment to staying engaged in the profession. The Board has established a two-year CE cycle, during which each licensed professional must complete a minimum of 20 hours of CE activities that have significant intellectual or practical content dealing primarily with matters directly related to the practice of physical therapy or professional responsibility.
3. **Complaint Resolution:** when there is concern raised that a licensee may have violated the Practice Act, the Board initiates an investigation of the complaint and works to bring the matter to resolution. Physical therapy professionals are held to a high expectation of practice and ethical behavior as outlined in the statutes and rules governing them and enforced by the Board. Appropriate and timely resolution of complaint matters ensures that questionable behaviors are addressed and prevented from continuing.

RESULTS

AT A GLANCE

FY17,

Credentialing Services

- 19 temporary permits issued
- 90 license renewals

Professional Development/Continuing Education

- 4,050 Continuing Medical Education (CME) hours reviewed
- Approved 7 CME Sponsorships
- Conducted 15 DPM Interviews
- Administered 15 Jurisprudence Exams

Complaint Review

- 2 Formal Actions

PURPOSE

The Minnesota Board of Podiatric Medicine was established in 1916. The Board mission is to protect the public by extending the privilege to practice to qualified doctors of podiatric medicine (DPM) and investigating complaints relating to their competency or behavior. In FY17 the Board received administrative responsibilities from the legislature for the same oversight of the following new licensee types - prosthetists, orthotists, pedorthists, prosthetist orthotists, assistants, and fitters. It required the Board to create an Orthotics, Pedorthics, and Prosthetics Advisory Council that met by November 1, 2016 with full licensure completed by January 1, 2018.

The Board accomplishes its mission by:

- Responding to public and agency inquiries, complaints and reports regarding licensure and conduct of applicants, permit holders, licensees and unlicensed practitioners;
- Reviewing allegations of statute and rule violations, holding disciplinary conferences with licensees, and taking formal action to suspend or revoke the licenses of DPM who fail to meet standards;
- Setting and administering educational requirements and examination standards for DPM licensure; and providing information and education about licensure requirements and standards of practice to the public and other interested audiences.

The Board of Podiatric Medicine contributes to the following statewide outcomes:

- A thriving economy that encourages business growth and employment opportunities
- Minnesotans have the education and skills needed to achieve their goals
- All Minnesotans have optimal health
- Strong and stable families and communities
- People in Minnesota are safe
- Efficient and accountable government services

BUDGET

Source: Budget Planning & Analysis System (BPAS)

Source: Consolidated Fund Statement

The Board is funded by licensure fees and receives no general fund dollars. Minnesota Statutes section 214.06, subdivision 1(a) compels the Board to collect fees in the amount sufficient to cover direct and indirect expenditures. Funds are deposited as non-dedicated revenue into the state government special revenue fund. From this fund, the Board receives a direct appropriation to pay for agency expenses such as salaries, rent, costs associated with disciplinary/contested cases and operating expenditures. It also pays statewide indirect costs through an open appropriation.

In addition to Board operations, licensure fees fund activities that support multiple boards and/or other agencies. Some of these are: the Administrative Services Unit (interboard), Health Professionals Services Program (interboard), Prescription Monitoring Program (Pharmacy Board), Office of the Attorney General for legal services, and the Criminal Background Check Program (interboard).

STRATEGIES

The Board of Podiatric Medicine is guided by these principles:

- Responsibility for public protection will be fulfilled with respect for due process and adherence to laws and rules;
- Customer services will be delivered in a respectful, responsive, timely, communicative, and nondiscriminatory manner;
- Government services will be accessible, purposeful, responsible, and secure; and
- Business functions will be delivered with efficiency, accountability, and a willingness to collaborate.

The Board's licensure strategies are accomplished through licensure of applicants who meet set standards of education, examination, supervised practice, continuing education, and ethical practice. The number of licensed DPMs in Minnesota has increased 9% over the past four years. This reflects the growing need for their services and the demand is expected to continue with an aging population.

The Board's Complaint Resolution Committee (CRC) is authorized by Minnesota Statutes, Chapter 214 to receive, investigate and resolve complaints regarding conduct or standard of care.

The Board's administrative strategies are advanced through responsive, efficient, and cost-effective services that include a commitment to technology upgrades, helping to achieve this goal. The new Automated Licensing

Information Management System (ALIMS), now offers online applications for the first time. Online renewals and verifications are now received in real time, creating significant efficiencies.

The Board is comprised of seven volunteer members appointed by the Governor - five DPM and two public members who receive a per diem and mileage reimbursement for meetings. The full Board meets quarterly and the Complaint Review Committee (CRC) more frequently.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quality	Number of licensees	227	247	2014 2017

AT A GLANCE

- 875 employees in FY18: 635 in Saint Paul and 240 in seven regional offices; 29 are student workers or seasonal employees
- Protect human health by issuing more than 16,700 permits that include environmental standards to limit pollution
- Monitor the condition of air, ground and surface water, and land at more than 2,320 sites
- Inspect and license more than 40,000 sites that involve hazardous waste, feedlots, and storage tanks
- 2013 Eco Experience exhibit received “People’s Choice Award for Best Attraction” at the Minnesota State Fair
- Offer 20 online services with more launching soon

PURPOSE

The Minnesota Pollution Control Agency (MPCA) monitors environmental quality, offers technical and financial assistance, and enforces environmental regulations. MPCA finds and cleans up spills or leaks that can affect health and environment. MPCA develops statewide policy, supports environmental education, and helps ensure pollution does not have a disproportionate impact on any group of citizens. MPCA’s mission is to protect and improve the environment and human health. The agency plays a key role in contributing to the following statewide outcome: **A clean, healthy environment with sustainable uses of natural resources.**

BUDGET

Budget structure changed in FY18 from Programs to Divisions

Source: Budget Planning and Analysis System (BPAS)

Source: Consolidated Fund Statement

MPCA’s budget is funded from multiple state government funds and federal grants. The funding MPCA has received from the general fund has decreased over this 12-year timeframe from 9 percent in FY12-13 to 4 percent in FY16-FY17.

In the last biennium, MPCA expenses by fund included environmental (38 percent), remediation (15 percent), clean water (14 percent), and federal (11 percent). All other state funds make up the remaining 18 percent. The clean water fund is one of the legacy funds created when voters passed a constitutional amendment in November 2008.

STRATEGIES

Limiting pollution caused by businesses, organizations, and individuals is fundamental to MPCA's mission. The MPCA develops and enforces regulations and provides education and technical assistance to help meet these regulations. Increasingly, MPCA's focus is on preventing pollution rather than just controlling or cleaning it up.

MPCA works with many partners—citizens, communities, businesses, government, environmental groups, and educators—to prevent pollution and conserve resources. These partnerships allow MPCA to:

- Foster greater commitment and personal responsibility for the environment.
- Work to minimize the use and generation of toxic chemicals in products and materials.
- Protect, restore, and preserve the quality of our waters.
- Develop solutions to Minnesota's climate change challenges.

As a result, Minnesota is a national model for environmental protection. The state's air, land, and water are cleaner now than 40 years ago, even with a growing population and rising industrialization.

MPCA's range of activities includes:

- Testing and researching to identify environmental problems.
- Setting priorities and operating strategies.
- Setting standards and developing rules that protect people and the environment.
- Writing permits to regulate activities that affect the environment (air emissions, toxic, or hazardous materials, water discharges, landfills, etc.).
- Ensuring compliance with and enforcing regulatory requirements to ensure equitable treatment and a level playing field for Minnesota businesses.
- Integrating environmental justice principles into the agency's processes to ensure pollution does not disproportionately impact the health of low income populations or people of color.
- Providing technical assistance, training, outreach, and education to schools, facility operators, permit holders, and the general public.
- Providing access to environmental data and regulatory services through data requests and online systems.
- Publicizing and demonstrating pollution prevention techniques.
- Responding to environmental spills, releases, and other environmental emergencies.

Minnesota Statutes, Chapter, 114D (<https://www.revisor.mn.gov/statutes/?id=114D>), Chapter 115 (<https://www.revisor.mn.gov/statutes/?id=115>), Chapter 115A (<https://www.revisor.mn.gov/statutes/?id=115A>), and Chapter 116 (<https://www.revisor.mn.gov/statutes/?id=116>) provide the agency with its main authorities to provide regulatory, monitoring, and assistance services.

Net Fiscal Impact = (Expenditures – Revenues)	800	800	800	800
FTEs	4	4	4	4

Recommendation

The Governor recommends appropriation of \$800,000 in FY 2020 and \$800,000 in FY 2021 from the Environmental Fund to the Minnesota Pollution Control Agency (MPCA) Operations Division. This appropriation continues development and maintenance of systems to support permitting and regulatory business processes and agency data.

The recommended appropriation represents a \$400,000 per year increase to one-time appropriation funding levels from Laws 2017. This appropriation represents less than a 1 percent increase to MPCA's Environmental Fund FY 2020-2021 base budget.

Rationale/Background

The MPCA is committed to updating its data services and improving the number of online services that allow timely reporting, improve data quality, and result in more effective interactions for permits, licenses, and certifications. Investing in information and data management systems will result in more efficient methods to manage work, obtain data, and report data to the public.

The MPCA offers 20 online services with another 55 expected by the end of the current biennium. However, more than 400 service activities are needed to meet customer expectations. Current online services support annual licensing of over 6,000 hazardous waste generators, issuance of more than 3,000 construction stormwater permits, and provide online monthly reporting for over 1,400 wastewater operators. Over 10,000 individuals have signed into the current online services with more than 50,000 transactions completed. Funding for FY 2018-19 provided MPCA analysts opportunity to identify innovative improvements including one service that fulfilled 53 separate activities.

Improved online and reporting services would allow the efficient issue of licenses, certifications, and enable users to obtain information for property redevelopment and environmentally-protective permits in a timelier manner. These improvements would result in more timely development decisions, helping maintain the state's strong economy. Good customer service requires modern technology and data systems that allow for easily-entered data and ready access.

Proposal

The Governor proposes to maintain levels of funding and expand work started with the previous one-time appropriations to continue development of online application services and reports in order to meet customer expectations for additional online services and electronic business functionality. This investment will further expand services to meet constituent needs. This funding will maintain two full-time employees (2 FTE @ \$121,000/FTE) and add an additional two new full-time employees (2 FTE @ \$121,000/FTE) dedicated to expanding the types and number of online services. The balance of funding is for contracted services (\$316,000/year) to address costs for maintenance and expansion of electronic services.

This proposal is intended to enable the following system capabilities and improvements into future years:

- Better and faster customer service by creating more online services for regulated parties and partners to submit applications, notifications, data and reports;
- Quicker property redevelopment because of faster responses to applications for assistance and improved response times to record requests;
- Expanded assistance time available to work directly with municipalities, businesses, feedlot owners and the many other constituents needing our services;
- Improved and expanded online access to environmental data and information for all Minnesotans;
- Improved data access for staff to complete daily work effectively and efficiently; and
- Enhanced partnerships with government partners by allowing them to use the data systems.

The MPCA will proactively engage regulated entities and county partners in testing the new online services and system capabilities. Customers helped define design and performance improvements and areas for new services. Involvement by users improves design, improves our understanding of their needs, and strengthens their support. Minnesota businesses have expressed interest in the agency pursuing data management improvements resulting in faster transactions, improved data, and better service that is transparent and reliable.

The following represent existing business needs that will be addressed by expansion of online services:

- 16,000 feedlot owners need the ability to report online, at their convenience, rather than mail requests with limited timeframes. Online services does not require ridged reporting times.
- 80 county feedlot officers and MPCA staff need to assist feedlot owners at their home.
- Low risk permit applications (wastewater general, solid waste permit by rule/recycling, feedlot interim and construction short-form permits) should be processed automatically, if possible.
- 700 certified designers, installers and inspectors for septic systems need credentials from all parts of the state to support the upgrading of individual wastewater treatment systems.

Equity and Inclusion

All Minnesotans deserve to live with clean air, clean water and unpolluted land. Electronic data systems allow MPCA staff to work more closely with project proposers and engage communities. The MPCA provides data to all citizens for decision processes; results must be accessible, usable, and available timely. This proposal ensures every citizen has equal opportunities to participate in the protecting their quality of life.

Results

Online services are promoted through program newsletters, social media, meeting with stakeholders, and unique training opportunities for service users. See complete list is available at: <https://www.pca.state.mn.us/data/e-services>

Minnesota Pollution Control Agency

FY 2020-21 Biennial Budget Change Item

Change Item Title: St. Louis River Area of Concern Remediation Project

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Environmental Fund				
Expenditures	0	484	363	363
Net Fiscal Impact = (Expenditures – Revenues)	0	484	363	363
FTEs	0	4	3	3

Recommendation

The Governor recommends appropriation of \$484,000 in FY2021 and \$363,000 in FY2022 and 2023 from the Environmental Fund to the Minnesota Pollution Control Agency's (MPCA) Remediation Division. This initiative maintains management oversight for contaminated sediment projects at multiple sites identified in the St. Louis River Remedial Action Plan to restore water quality in the St. Louis River Area of Concern.

The recommended appropriation of \$484,000 for FY 2020-21 represents a \$12,000 increase in annual amounts from those appropriated in Laws 2017 for FY 2018 – FY 2020 for the same purpose. This proposal would increase the agency's FY 2020 – FY 2021 Environmental Fund base budget by less than 1 percent.

Rationale/Background

The St. Louis River Area of Concern program is implementing 68 EPA-approved management actions over the course of almost a decade to restore degraded aquatic habitat and clean-up contaminated sediments at dozens of Minnesota and Wisconsin sites in the St Louis River estuary. The primary, active partners working on this program include about a dozen local, state, tribal, and federal organizations. A combination of state and federal funding sources have been used to complete the studies, administrative tasks, restoration projects, and remediation projects that have been progressing since the 2013 Remedial Action Plan (RAP) was initially prepared.

MPCA requested funding in 2016 for \$25.4M in bond funds to leverage approximately \$47.2M in federal funds for work on Minnesota's ten remediation site projects, with work projected to begin in FY2017. Hiring of staff was delayed for one year because the legislature approved the bond funds in 2017, postponing the start of project work until FY 2018. Because bond funding was for construction and remediation costs only, the Legislature approved annual appropriations to accomplish the following remediation project tasks:

- Coordinator (1.0 FTE). Develop and direct the remediation activities set forth in the MPCA-US Army Corps of Engineers Partnership Agreement; negotiate MPCA-US EPA construction Project Agreements; coordinating with state and federal project managers, consultants, attorneys and other staff; establish goals, objectives, and timelines for implementation; develop and manage financial reporting systems; develop and conduct training sessions; monitor compliance; provide information for legislative committees and public forums; assist with delisting; and, report the status of work.
- Project Manager (2.0 FTE). Provide project management and program leadership for contaminated sediment remediation project sites listed in the RAP; manage contracts and grants; facilitate project team planning and implementation meetings; manage federal and consultant contracts; and coordinate with resource managers at all levels of government and other stakeholders.
- Technical Analyst (1.0 FTE). Provide technical assistance to project managers and coordination with partner agencies for all contaminated sediment remediation project sites listed in the RAP.

When the 2013 Remedial Action Plan was prepared, an optimistic implementation schedule was envisioned, with a goal of implementing all 68 management actions by 2020 so that the site could be delisted by 2025. At that

time, there was an incomplete understanding of how long it would take to implement the management actions and remediation and restoration projects, which involve remedial investigations, feasibility studies, project design efforts, environmental reviews, archaeological studies, tribal consultation, state and federal Section 401 and 404 permitting, coordination with adjacent landowners, and execution of project agreements with EPA. The St. Louis River AOC remedial efforts have unfortunately experienced significant schedule delays.

Proposal

The Governor recommends appropriation of \$484,000 in FY2021 to maintain four FTEs (\$121,000/FTE) and \$363,000 in FY2022 and 2023 from the Environmental Fund for maintaining a reduced number of three FTE's (\$121,000/FTE) to staff the implementation tasks associated with the remediation project sites in the St. Louis River Area of Concern. As described above, this proposal is associated with bond funds for these sites.

Equity and Inclusion

Work is accomplished through communication and collaboration with a variety of community groups in the Duluth area, such as the St. Louis River Alliance, and interests from the greater watershed, including the Fond du Lac Band of Lake Superior Chippewa. The work being performed accomplishes equity inclusion goals as follows:

- Decreasing exposure to harmful legacy pollutants in the St. Louis River Area of Concern sediment and fish and wildlife populations.
- Improved access to recreational uses within the St. Louis River Area of Concern.
- Economic benefit and enhance/restored outdoor recreational opportunities from remediation and restoration projects. See link: <https://www.glc.org/work/blue-economy/GLRI-economic-impact>
- Coordination with the Fond du Lac Band of Lake Superior Chippewa to restore 275 acres of wild rice within the St. Louis River Area of Concern.

Results

To date, more than \$36 million of non-state funds to develop and begin to implement the St. Louis River Area of Concern Remedial Action Plan. Implementation of priority actions to fulfill Minnesota obligations under the Great Lakes Water Quality Agreement and the Great Lakes Restoration Initiative Action Plan Priority 1 have included the following activities:

- Identification and completion of studies needed to support the removal of beneficial use impairments,
- Sediment assessment and characterization,
- Identification of contaminated sediment cleanup sites requiring action and priority habitat restoration sites,
- Feasibility studies,
- Development of engineering designs and plans and specifications for bidding,
- Site construction, and
- Development of a St. Louis River Area of Concern data system.

Minnesota Pollution Control Agency

FY 2020-21 Biennial Budget Change Item

Change Item Title: Climate Outreach and Engagement

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	250	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	250	0	0	0
FTEs	0.5	0	0	0

Request

The Governor recommends appropriation of \$250,000 in FY 2020 from the General Fund to the Minnesota Pollution Control Agency's (MPCA) Resource Management and Assistance Division for public engagement and outreach that supports development and implementation of policies to holistically address climate change.

The recommended one-time appropriation of \$250,000 is a new effort for the agency. This proposal would increase the agency's FY 2020 – FY 2021 General Fund base budget by 2 percent.

Rationale/Background

Climate change impacts all of us. Minnesota's farmers are facing challenges associated with increasing numbers of extreme weather events and our warming summers may lead to increased negative health impacts for individuals living in urban areas. The 2007 Next Generation Energy Act (NGEA) laid out a series of greenhouse gas emissions reductions targets. The NGEA's 2015 target was to reduce greenhouse gas emissions across all sectors by 15 percent of 2005 levels, but through 2016 Minnesota only reduced greenhouse gas emissions by 12 percent across all sectors. By 2025, the NGEA calls for the state reduce emissions by 30 percent of 2005 levels and then 80% by 2050.

The electricity generation sector has made great strides toward reductions and its emissions will continue to decrease as the sector increases its use of renewable energy. The transportation sector is now the largest source of greenhouse gas emissions in Minnesota. Agriculture, forestry and the land use sector also remain a large source of emissions. Without additional, economy-wide efforts and robust public-private collaboration we are not likely to achieve the goals of the NGEA.

Proposal

The Governor proposes appropriating \$250,000 for a new statewide engagement and outreach initiative to support the development and implementation of climate change policies. The initiative will include statewide public meetings, development of environmental justice-sensitive materials and communication, and participation by businesses and non-governmental entities. This effort will be coordinated by the MPCA (0.5 FTE at \$121,000/FTE) and involve cross-agency collaboration to ensure this effort addresses all of the drivers of climate change. This proposal will provide all Minnesotans with a chance to participate in the policymaking process and help position Minnesota as a leader on climate change.

The appropriation will be used to pay for statewide activities that engage the public and stakeholders from industry, non-profits, and academia to better understand their views as they relate to both the opportunities and challenges inherent in climate policy. Costs for public meetings, including facilitation, materials, translation services and meeting costs are estimated at \$190,000. These activities will help build support for climate change policies and initiatives that will help Minnesota achieve its statutorily obligated greenhouse gas emissions reduction targets.

A steering committee made up of state agency leaders will be tasked with developing the scope of work for this effort (facilitation needs, number of meetings, meeting locations, etc.). In addition to engagement activities, this proposal will also yield a summary report/climate change roadmap outlining potential climate change policies that cut across all sectors and how those policies are viewed by the public and stakeholders. The roadmap will be informed by public meetings, current work of Minnesota's state agencies, and initiatives being pursued by private and non-profit sectors.

Equity and Inclusion

Climate change is affecting our health, well-being, way of life, and natural resources. While all Minnesotans feel these impacts, not everyone is affected equally. Often communities of color, indigenous communities, and low-income communities are disproportionately affected by climate change and other environmental issues.

The MPCA defines environmental justice as "the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies." This proposal would hold engagement meetings in identified environmental justice communities across Minnesota and would also work with the MPCA's Environmental Justice Advisory Committee to inform the content of all the outreach and engagement activities conducted under this proposal.

Results

This proposal will help inform the climate policies of the state and ensure that all people have access to the decision-making processes that impact their lives. Additionally, this process will help Minnesotan's better understand the implications of climate policy and the state's governing process.

Metrics regarding public meeting attendance will be tracked and surveys will be given out to individuals who participate in engagement activities to understand how the agency can improve its engagement efforts.

Statutory Change(s)

Minnesota Pollution Control Agency

FY 2020-21 Biennial Budget Change Item

Change Item Title: Environmental Impact Statement for Nitrates in Karst

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	643	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	643	0	0	0
FTEs	.75	0	0	0

Recommendation

The Governor recommends a onetime appropriation of \$643,000 in FY 2020 from the General Fund to the Minnesota Pollution Control Agency's (MPCA) Resource Management and Assistance Division. This proposal will provide scoping to an interagency Generic Environmental Impact Statement (GEIS) at the direction of the Environmental Quality Board (EQB) to study and address nitrate pollution of groundwater in the sensitive karst region of southeastern Minnesota. The GEIS Scoping process will work with the community, technical experts and State and local agency experts to identify what additional information, beyond the information required by Minnesota rules, will be included in a GEIS Report. This appropriation represents a 5 percent increase to MPCA's General Fund FY 2020-2021 base budget.

Rationale/Background

Per Minnesota Rules chapter 4410.3800, a GEIS may be ordered by the EQB to study types of actions that are not adequately reviewed on a case-by-case basis. A GEIS benefits the public by helping ensure complete information is available for government decision making. The GEIS process is not a substitute for project specific environmental review. Rather, it is a means of providing a more comprehensive analysis of a given region, issue or type of activity. The rules that direct the GEIS scoping process require that members of the public be offered the opportunity to provide input, before final decisions are made. This revised budget envisions a broader community engagement process using public engagement expertise and resources to help design and implement activities that will meet the needs of the karst region communities. .

Proposal

The Governor proposes completion of scoping for a GEIS for nitrates in the karst region of southeastern Minnesota. Scoping and design will include development of a plan to efficiently gather the needed data and effectively organize the expertise for assessing related issues. The scoping effort will consider existing studies such as the work done by the Minnesota Department of Agriculture (MDA). MDA recently compiled extensive data on nitrate contamination of drinking water wells via the MDA Township Testing Program. These data indicate that numerous townships in the karst region with private wells are at or above the 10 milligrams per liter health risk limit for nitrate.

During the GEIS scoping process, other existing studies will also be considered, as well as the identification of the types of sources that contribute to increases in nitrate pollution. The following are sources of nitrogen that most likely contribute to the current nitrate levels in groundwater, surface water and drinking water:

- Commercial fertilizer and manure application applied to row crops
- Aging septic systems
- Biosolids from wastewater treatment
- Animal agriculture and feedlots

- Natural background and atmospheric deposition

The scoping process will also identify any additional information that may be gathered as part of the scoping initiative to better understand the environmental effects of cross-jurisdictional regulatory decision-making:

- Improved understanding of how nitrates reach groundwater and contribute to contamination of wells, and improved understanding of alternatives to prevent, mitigate, and remediate such contamination.
- a complete inventory of all sources of nitrogen, including natural, and the level of contribution of each source to the existing problem

Finally, the scoping process may result in a recommendation for an evaluation of existing state policies, programs and regulatory requirements may also be evaluated to determine if refinements are needed to better prevent and reduce nitrate contamination of drinking water in the sensitive karst region.

The proposal includes one year of technical effort from state agency staff (3.5 FTE at \$121,000/FTE = \$423,000/year): MPCA (0.75 FTE) and collaborating agencies of Minnesota Department of Health (0.5 FTE), Minnesota Department of Natural Resources (0.5 FTE), MDA (0.5 FTE), the Board of Water and Soil Resources (0.25 FTE) and EQB (1.0 FTE). Additional costs include \$20,000 in public meetings, \$180,000 for planning and design of community assessment and GEIS development by a contractor and \$20,000 in technical expert panel review.

The scoping phase will more specifically identify the issues and geographic areas to be addressed in a GEIS.

Equity and Inclusion

The GEIS process is outlined in Minnesota Rules 4410.3800, and is designed to be transparent and inclusive. It may be augmented with civic engagement best practices that promote the principles of equity and inclusion.

Results

The GEIS scoping process will identify and bring together technical experts, interested parties and members of the affected community to design a thorough and effective scope of work that will be evaluated during the GEIS preparation process. An effective scoping process will bring the community and technical experts together to ensure that a GEIS Report will provide the best information for making effective environmental decisions in the karst region of southeastern Minnesota. Scoping will more specifically identify the issues and geographic areas to be addressed in the generic EIS, including which programs, policies and regulatory requirements may need to be refined to better protect the karst region of southeastern Minnesota from nitrate contamination of groundwater.

Scoping is the first step in the process of completing a GEIS and supporting documents. The completed GEIS would eventually provide a ready source of information for decision-making and allow the public to participate in related approval decisions and processes in a more knowledgeable and meaningful way. This information would be valuable for state and local decision makers on the past, present and future effects (environmental, public health and economic impacts) of nitrate contamination in the region.

Statutory Change(s)

Minnesota Pollution Control Agency

FY 2020-21 Biennial Budget Change Item

Change Item Title: Closed Contaminated Sites: Vapor Intrusion and Contaminants of Emerging Concern

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Remediation Fund				
Expenditures	605	605	605	605
Net Fiscal Impact = (Expenditures – Revenues)	605	605	605	605
FTEs	5	5	5	5

Recommendation

The Governor recommends an appropriation of \$605,000 in FY 2020 and FY 2021 from the Remediation Fund to the Minnesota Pollution Control Agency's (MPCA) Remediation Division. The initiative will address needed investigation and cleanup of known contaminated sites in order to reduce potential health risks to humans and negative impacts to the environment.

The recommended appropriation of \$605,000 in FY 2020 and FY 2021 represents an increase in MPCA's Superfund administration costs by \$363,000 each year from similar efforts in FY 2018-2019, and increase MPCA's closed landfill administration costs by \$242,000 each year from similar efforts in FY 2018-2019. This represents a 1 percent increase to the agency's FY 2020 – FY 2021 Remediation Fund base budget.

Rationale/Background

Minnesota's Superfund (SF) programs includes management of more than 4,300 closed sites. Of those, 1,429 sites have the potential for vapor intrusion – the migration of vapor-forming chemicals from a subsurface source into an overlying building – and 200 of those sites are located near sensitive populations (schools and day care facilities). These sites were closed prior to knowledge of health risks posed by vapor intrusion. Additionally, 626 groundwater sites used for drinking water have the potential to be contaminated by trichloroethylene (TCE), which is a toxic chemical used as an industrial cleaning/degreaser solvent. Since these sites' closure the health values have become more stringent and the sites reviewed again.

The estimated non-staff cost to investigate contamination at the 2,055 closed SF sites is estimated at approximately \$10.6 million. Without additional funding, reviews to determine whether the sites are contaminated will not be completed until sometime after 2061. Based on historic closed site reviews, at least 25% of the reviewed sites will require systems to be installed for management of the contaminants. Mitigation is estimated to cost at least \$18 million and will not address cleanup of the underlying contamination source.

The Closed Landfill Program's (CLP) 110 closed landfills (and another four eligible) have a similar need for additional analyses and sampling for pollutants. When the sites were initially investigated, the health risks posed by vapor intrusion and contaminants of emerging concern (CECs) such as PFAS, and 1,4 dioxane to drinking water were unknown.

Proposal

The Governor proposes \$605,000/year for five new staff (\$121,000/FTE), three for Superfund and two for Closed Landfill to expedite MPCA's investigation at the contaminated Superfund sites and closed landfills. Additional Superfund staff will accelerate the review completion timeline for the remaining 1,980 sites from FY 2061 to FY 2028. The staff will also be able to assist with human health risk mitigation necessary to address discovered vapor intrusion and drinking water contamination. Closed Landfill Program staff will work on sites impacted by CEC and

vapor intrusion, which include quantifying risks and assisting with mitigation efforts. In both cases, the necessary project resources are supported through the statutory appropriation process for the Remediation Fund.

Equity and Inclusion

Several metro and Greater Minnesota communities in the State that are characterized by a legacy of industrial use will see additional investigations and cleanups occur to address public health and environmental risks. As many closed landfills were located at time of construction either in densely populated areas or in rural areas where there is a higher economic disparity, those communities will receive risk identification and mitigation.

Results

- Number of closed landfill sites investigated and reviewed for vapor intrusion and/or CEC
- Changes in the risk scores for each of our closed landfills sites. Risk scores increase once a risk is found and then decrease once actions are taken to address them, so they are a barometer of how our working is progress once the investigation and review.

Statutory Change(s)

Minnesota Pollution Control Agency

FY 2020-21 Biennial Budget Change Item

Change Item Title: Understanding and Reducing Community Health Risks from TCE

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Environmental Fund				
Expenditures (MPCA)	272	272	0	0
Expenditures (MDH)	121	121	0	0
Net Fiscal Impact = (Expenditures – Revenues)	393	393	0	0
FTEs	3	3	0	0

Recommendation

The Governor recommends an appropriation of \$272,000 in FY 2020 and \$272,000 in FY 2021 from the Environmental Fund to the Minnesota Pollution Control Agency's (MPCA) Industrial Division and an appropriation of \$121,000 in FY 2020 and \$121,000 in FY 2021 from the Environmental Fund to the Minnesota Department of Health's (MDH) Environmental Health Division to develop a statewide program to further evaluate the use of Trichloroethylene (TCE) and related industrial chemicals in industrial applications as well as address concerns about the potential health impacts of TCE air emissions on communities.

Rationale/Background

Trichloroethylene (TCE) is a solvent most commonly used to degrease metal parts during various manufacturing processes. Industries that may use TCE include platers, machine shops and manufacturing facilities. Breathing TCE, especially at high levels or over long periods, can cause negative health effects.

Based on environmental and health concerns from the recent release of TCE from a manufacturing facility in White Bear Township, the MPCA and MDH propose initiating a statewide program to further evaluate the use of TCE (and related industrial chemicals) in industrial applications as well as address concerns about potential health impacts of TCE air emissions on communities.

Proposal

The Governor recommends development of a program to address the risks associated with use of chemicals that are harmful to the environment and human health during industrial processes. The recommendation includes \$363,000/year for two new staff at MPCA and one new staff at MDH (\$121,000/FTE x 3 FTE = \$363,000), and \$30,000/year for sampling costs.

MPCA/MDH staff will complete a statewide evaluation of facilities with air permits that use and emit TCE. This evaluation will include:

- Reviewing MPCA data to determine facilities with TCE, or potential TCE, emissions
- Assessing potential health risks based on location, quantity of TCE emissions, environmental factors, type of pollution control equipment and permit conditions
- Prioritizing facilities based on the determined risks

MPCA/MDH will work with the regulated facilities and other partners to reduce/eliminate TCE from processes and, if appropriate, increase regulatory oversight at the regulated facilities, including:

- Conducting environmental audits and inspections at the regulated facilities
- Working with existing pollution prevention organizations such as Minnesota Technical Assistance Program (MNTAP) to assist with the phase out of TCE (or related industrial chemicals) at the regulated facilities.
- Updating and reissuing air permits, if appropriate

- Issuing compliance agreements or enforcement documents, as necessary
- Requiring additional facility monitoring and site assessments, as necessary

In communities where it is determined that there are significant potential impacts, the MPCA/MDH will work with local units of government and community members to develop outreach and communication plans and to implement health screening tools, including:

- Creating health registries where community members (current or past) can register their names to receive communications on regulated facility information, emissions data, and health information
- Using existing screening tools such as the MDH's Birth Defect Registry and the Cancer Surveillance System to determine if there are existing community health conditions.
- Conduct additional community health assessments, as appropriate, including drinking water supply assessments and private well testing

The Governor's recommended goal is to reduce or eliminate the use of TCE at regulated facilities in the state. In those communities where we have determined that there might be potential significant health risks from TCE emissions, the state will take action to evaluate impacts and share information with community members.

Equity and Inclusion

Several metro and Greater Minnesota communities in the State that are characterized by a legacy of industrial use will see additional investigations and cleanups occur to address environmental and public health risks. As many industries and businesses were located at time of construction either in densely populated areas or in rural areas where there is a higher economic disparity, those communities will receive greater risk identification, education, partnership and regulatory attention efforts.

Results

- Number of completed statewide evaluation of facilities with air permits that use and emit TCE
- Number of environmental audits, inspections, updated permits and enforcement actions at regulated facilities
- Number of developed outreach and communication plans and to implement health screening tools,
- Number of developed community health registries
- Number of community health assessments completed

Statutory Change(s)

Minnesota Pollution Control Agency

FY 2020-21 Biennial Budget Change Item

Change Item Title: Electric Vehicle Infrastructure

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures (MPCA)	1,500	0	0	0
Highway Users Tax Distribution				
Revenues (DPS)	50	50	50	50
Transfer Out (DPS)	50	50	50	50
Special Revenue Fund				
Transfer In (MPCA)	50	50	50	50
Expenditures (MPCA)	50	50	50	50
Net Fiscal Impact = (Expenditures – Revenues)	1,500	0	0	0
FTEs	0	0	0	0

Request

The Governor recommends appropriating \$1.5 million from the General Fund in FY2020 to the Minnesota Pollution Control Agency (MPCA) and dedicating an ongoing \$25 electric vehicle (EV) registration fee increase to grants from MPCA for EV charging infrastructure. The annual registration fee for EVs will increase from \$75 to \$100, and the Department of Public Safety (DPS) will transfer the additional revenue from the Highway Users Tax Distribution Fund to the Other Miscellaneous Special Revenue Fund at the MPCA. MPCA's Resource Management and Assistance Division will distribute the grants. The one-time \$1.5 million increase in spending represents an 11 percent increase to MPCA's General Fund FY 2020-2021 base budget. The ongoing transfer of \$50,000 from the fee increase is new to the MPCA.

Rationale/Background

The transportation sector has eclipsed the electricity generation sector as the largest emitter of greenhouse gases (GHG) in Minnesota. Light-duty vehicles account for nearly 70 percent of the total GHG emissions for the transportation sector, representing a significant opportunity to realize the climate benefits of electrification in the transportation sector. Additionally, the EV market is at a tipping point where consumers other than early adopters are considering making the switch to an EV. However, a barrier to further EV adoption for many consumers is the current state of the charging network. While Minnesota's EV infrastructure is growing, demand for increased charging options remains high among EV owners and potential EV owners. Potential EV owners want to know they can travel to and from their favorite places in Minnesota without having to worry about range.

As part of its Volkswagen Settlement agreement the MPCA engaged in a robust stakeholder process, conducting nine public meetings and four stakeholder meetings to discuss use of the settlement funds. During these meetings one of the most common comments the agency heard was the desire for increased EV charging infrastructure. However, the MPCA is only allowed to spend 15 percent of Volkswagen Settlement funds on EV charging infrastructure.

In 2018 the MPCA issued Requests for Proposals (RFP) for both Direct Current Fast Chargers (DCFC) and Level 2 chargers. Under the RFPs, MPCA will provide grants to entities that will install charging infrastructure. Proposals seeking DCFCs were required to provide a 20 percent cash match and proposals seeking Level 2 chargers were required to provide a 20 percent or 40 percent cash match depending on the location of the Level 2 charger. The MPCA received requests for approximately \$3.2 million for DCFCs, greatly exceeding the available \$1.4 million.

Additionally, the agency received approximately \$500,000 in requests for Level 2 chargers while only \$158,000 was available.

Proposal

This proposal will increase financial support needed to accelerate deployment of EV charging infrastructure. The proposal will leverage funding from grant recipients through grant match requirements. This approach ensures that more funds are available for EV infrastructure buildout and users also contribute.

The \$1.5 million one-time appropriation of General Funds and \$50,000 annually from the fee increase will be distributed via the agency's existing EV charging infrastructure grant program. Use of MPCA's existing programs will ensure use of the funds is solely for infrastructure development and that monies are distributed in a timely manner to the public. The DCFC grants will be distributed along highway corridors previously identified for infrastructure buildout by the MPCA and Minnesota Department of Transportation. Alignment with these corridors will ensure EV infrastructure is deployed to Greater Minnesota and the Metro.

Using the \$1.4 million distributed by the MPCA's Phase 1 Volkswagen EV Infrastructure Grants as a benchmark, the \$1.55 million in appropriations will provide grants for approximately 45 Level 2 chargers and 20 DCFCs in FY 2020 and approximately one Level 2 charger and one DCFC in FY 2021.

The fee increase requires changes to the Minnesota Licensing and Registration System (MNLARS). Costs associated with MNLARS changes are accommodated in the Department of Public Safety's MNLARS budget recommendation.

Equity and Inclusion

All Minnesotans would benefit from cleaner air under this proposal, including communities of color, low-income communities, and indigenous communities. Low-income communities, communities of color and indigenous communities are more likely to be near higher levels of air pollution. In these communities, high levels of traffic often contribute to the air pollution and any reduction in air pollution along high-traffic corridors will be an important step.

Additionally, points are awarded during the grant evaluation process for small businesses that are certified as veteran-owned, economically disadvantaged, or targeted group businesses in Minnesota based on ownership by a woman, a minority, or a person with a substantial physical disability.

Results

This proposal will accelerate the deployment of EV charging infrastructure and hopefully help spur the adoption of EVs. Even when charged on the electric power grid EVs are much cleaner than gasoline-powered vehicles. On average a gasoline-fueled car will emit (based on a well-to-wheel analysis) 11,000 pounds of carbon dioxide equivalent, 6.5 pounds of nitrogen oxides, and 0.4 pounds of particulate matter 2.5 annually. An EV charged on the grid will emit 4,000 pounds of CO₂ equivalent, 2.3 pounds of NO_x, and 0.4 pounds of PM_{2.5}.

Minnesota Pollution Control Agency

FY 2020-21 Biennial Budget Change Item

Change Item Title: Food Waste Reduction

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	750	750	750	750
Net Fiscal Impact = (Expenditures – Revenues)	750	750	750	750
FTEs	0.5	0.5	0.5	0.5

Recommendation

The Governor recommends appropriation of \$750,000 in FY 2020 and \$750,000 in FY 2021 from the General Fund to the Minnesota Pollution Control Agency's (MPCA) Resource Management and Assistance Division to reduce the amount of food waste going to landfills, divert food waste away from the waste stream by redirecting edible food to feed people and food scraps to feed animals, and to remove barriers to building a large-scale collection and recovery of organics waste.

This \$1.5 million request is new effort to the agency in FY 2020-2021, and would increase the agency's General Fund base budget by 11 percent.

Rationale/Background

Food waste and other organic materials, including yard waste, wood and additional items, compose 31 percent of the waste stream in Minnesota; the biggest single source of trash flowing into our landfills. Organics programs in the state also have capacity to handle soiled paper and compostable plastics which would allow for nearly 40 percent of what we throw away to be composted.

In addition, less organics in landfills reduces the release of methane, a high potency greenhouse gas. In general, food waste is a significant contributor to climate change, responsible for at least 2.6 percent of all U.S. greenhouse gas emissions. That's equivalent to more than that of 37 million cars, or 1 in 7 cars on the road. When food is wasted, so are the resources that go into producing it.

Unmet food needs across the country would be met if we could redirect just one-third of the food from the trash, and give it to people in need¹. As donations to food shelves and donations of prepared food increase, less Minnesotans would be food insecure. Additionally, building infrastructure for food rescue and for composting will encourage the creation of new markets and new jobs.

Proposal

The Governor proposes support Minnesota's efforts to address food waste. Funding will be used to expand efforts to reduce the quantity of food wasted, improve the effectiveness of food rescue programs, and to remove barriers to expanding organics recycling programs. It includes a number of policy changes designed to support increased food rescue and organics recycling programs.

The proposal offers Minnesotans new resources for keeping as much food/organic waste as possible out of our landfills. This reduction in volume to the waste stream would help "bend the curve" on the need for future landfills and make new environmental, economic, public health and social benefits possible. Reducing the

¹ Natural Resources Defense Council's second release of Wasted 2017, <https://www.nrdc.org/sites/default/files/wasted-2017-report.pdf>

necessity for overall numbers of landfills translates to less spending for their operation and maintenance in the decades after they close. And the state through the MPCA's Closed Landfill Program is currently responsible in perpetuity for maintaining the 110 and growing number of closed landfills in Minnesota.

The initiative includes:

- \$500,000 per year for grants supporting increased retail and prepared food rescue and to expand adoption of proven methods for business and residential food waste prevention
- \$189,000 per year for analysis of emerging technologies (e.g. anaerobic digestion, pyrolysis, etc.), address issues regarding contaminants of emerging concern (e.g. PFAS) and other barriers
- \$61,000 per year for one-half FTE (\$121,000/FTE) for grant administration and policy support associated with the food rescue and food waste reduction efforts

Grant funding will be made available to local units of government, nonprofit organizations and private businesses. The policy and budget items will work in tandem to ensure the project is successful.

Policy items supported by the initiative include:

- Education on Good Samaritan law and food safety regulations for handling prepared and perishable foods
- Designation of a state food waste hierarchy
- Revising the compostable product labeling requirements to ensure compostable plastics meet industry standards and improve quality of the compost from professional composters
- Require waste composition studies from solid waste facilities to measure progress

Equity and Inclusion

More food donations to food shelves and shelters would assist lower-income families that need access to more and a greater diversity of healthy food. The increase in donated food addresses food insecurity across Minnesota. Lower-income families would benefit to the extent they can reduce the amount of food wasted, given that the average St. Paul household spends \$1,200 per year on food they never eat. Extra effort will be made to ensure that traditionally-underserved communities have knowledge of and access to grant applications. Technical and financial assistance would be provided to a diverse set of entities and organizations that represent underserved communities, so this proposal would seek to address inequities in that regard as well.

Results

The chart on the following page illustrates the current amount of organics being captured and how they are managed. The MPCA will monitor progress using this and other existing metrics noted below.

Food waste makes up about 18 percent of waste disposed. The MPCA has a goal of reducing the amount of food that ends up in the waste stream by 50 percent (down to 9 percent) by 2030. According to the last waste composition estimate we received from the Hennepin Energy Recovery Center facility food waste was at 17.1 percent.

Currently an estimated 17 percent of Minnesota’s residents have access to curbside organics recycling. The MPCA tracks the percentage of the population with access to curbside organics recycling under its strategic plan standard operating procedure.

Statutory Change(s)

The new policy initiatives would be introduced under chapter 115A the Waste Management Act. The compostable product labeling standard would amend M.S. 325E.046.

Minnesota Pollution Control Agency

FY 2020-21 Biennial Budget Change Item

Change Item Title: Recycling Market Development

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Environmental Fund				
Expenditures	400	400	400	400
Net Fiscal Impact = (Expenditures – Revenues)	400	400	400	400
FTEs	0	0	0	0

Recommendation

The Governor recommends appropriation of \$400,000 in each FY 2021 and FY 2022 from the Environmental Fund to the Minnesota Pollution Control Agency's (MPCA) Resource Management and Assistance Division. This initiative supports development and expansion of recycling markets for Minnesota businesses.

The recommended appropriation of \$800,000 for FY 2020-2021 represents development of a new MPCA program area. This proposal would increase the agency's FY 2020-2021 Environmental Fund base budget by less than 1 percent.

Rationale/Background

In July 2017, China announced its intent to stop accepting many types of recyclable material since much of it contained contamination above greater than 0.5 percent. An example of contamination is broken glass pieces littered through a bale of recycled paper. Recycled materials are difficult for businesses to use in the manufacturing process without having to spend more on attempts to remove contamination of non-homogenous materials. Recyclable materials from the United States are generally unable to meet this standard.

As a result, domestic markets are flooded with minimally contaminated recyclable materials, resulting in record-low prices for items such as plastic, glass and paper. Recycling processors and brokers are increasingly concerned about their ability to find enough manufacturers to use the supply of recycled material that is available domestically, including in Minnesota. They have expressed concern about how they are going to sell their material and for what price. Market prices are at all-time lows, with some materials having little or no value at all on the open market. There is a growing concern that material collected for recycling may have to be stored long-term and ultimately disposed of if there are not markets for the materials.

Proposal

The Governor proposes providing \$400,000 per fiscal year in grants to develop additional recycling markets that will help prices bounce back and keep a robust recycling economy in Minnesota. This is an opportunity for Minnesota to again be a leader in developing new markets for recycled material. The proposal will seek to increase the number of businesses that use recycled materials in their manufacturing processes.

Grant dollars will be used to fund a portion of costs on recycling projects that banks or financial lenders generally do not finance. Example include: leasehold improvements and other physical improvements to building that enable efficient operation of businesses, engineering studies and installation of equipment. Allowable grant costs will also include development of project applications for private and public funding, such as for support from DEED's business assistance programs.

The proposal's goal is to increase the price of recycled material and create jobs that provide upward economic mobility and an entry point into manufacturing jobs. It is estimated that this proposal could create 100+ good

paying jobs. The recycling community will have more stable markets and therefore jobs will be saved. These jobs are located throughout Minnesota as the companies that use recycled materials are located in every part of the state.

Recycling is important to Minnesota's economy. More than 260 Minnesota companies use recycled materials to manufacture their products. Minnesota's value-added recycling manufacturers employ about 18,000 people, and these companies generate approximately \$3.2 billion in wages and \$665 million in federal and local tax revenue. Recycling adds nearly \$8.5 billion to Minnesota's economy overall.

Equity and Inclusion

All Minnesotans are indirectly impacted by the development of recycling markets in the state. By increasing the demand for recyclables, living wage jobs will be created that will be accessible locally to Minnesotans of all backgrounds. All Minnesotans have access to recycling opportunities as well and can participate in these programs. Representatives of these groups have been engaged on some specific projects and are likely to be involved as projects progress. In addition, these funds will be disbursed via our grant/contracting process and will incorporate our policies and procedures to ensure equity and inclusion.

Results

Minnesota's value-added recycling manufacturers' employs about 18,000 people, and these companies generate approximately \$3.2 billion in wages and \$665 million in federal and local tax revenue. Recycling adds nearly \$8.5 billion to Minnesota's economy overall.

We will be able to track the amount of capacity created for the recycled material for each facility that receives assistance. In addition, we will use the annual the Governor's Select Committee on Recycling and the Environment (SCORE) report process to measure the overall amount of material recycled in Minnesota.

Also, we will measure jobs created with each new facility and new expansion of current facilities. The MPCA uses the Regional Economic Models, Inc. economic model to measure the economic activity. The model has been used since 1996.

Minnesota Pollution Control Agency

FY 2020-21 Biennial Budget Change Item

Change Item Title: Air Appropriation Increase

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Environmental Fund				
Expenditures	258	516	516	516
Net Fiscal Impact = (Expenditures – Revenues)	258	516	516	516
FTEs	0	0	0	0

Recommendation

The Governor recommends appropriation of \$258,000 in FY 2020 and \$516,000 in FY 2021 from the Environmental Fund to the Minnesota Pollution Control Agency's (MPCA) Air Program. The increase will be distributed to the following Divisions: Resources Management and Assistance \$24,000/\$48,000; Environmental Analysis and Outcomes \$90,000/\$180,000; Operations \$11,000/\$22,000; and, Industrial \$133,000/\$266,000. The appropriation increase will maintain service levels provided by the Air Program.

The recommendation would increase the agency's similar funding in FY 2018-2019 of \$15,148,000 by 5% and the MPCA's Environmental Fund base budget by less than 1 percent.

Rationale/Background

The federal Clean Air Act (CAA) includes a requirement for states to charge air emission fees to cover the cost of issuing permits to facilities that emit air pollutants. The CAA also requires air permit fee increases to cover inflation and ensure that adequate resources are available to meet the requirements of the Act. Salaries, benefits, and program support costs are all projected to increase modestly in FY 2020-21.

Minnesota Statute 116.07, subd. 4d (b) directs the MPCA to increase air permit fees to cover the costs of delivering the air quality program, including permitting, regulatory and monitoring activities. However, the agency must request an increase in spending authority equal to the incremental increase in fees. If program costs increased by the consumer price index rate while appropriations remained at FY 2018-19 levels, it would force the MPCA to reduce program service levels in FY 2020-21 by the amount of that increase.

Proposal

The Governor's proposal accounts for program cost increases in FY 2020-21. The MPCA is directed by state and federal law to increase annual air emission fees to cover the increased costs of delivering program services to our regulated parties. Air emission fees, including this incremental increase, are deposited to the Environmental Fund. This proposal would increase the agency's authorized appropriation to the Air Program from the Environmental Fund equal to the increase in emission fees that will be generated in FY 2020 and FY 2021 under the cost provisions in statute. As established in statute, calculation of the increase includes identifying the total cost of the Air Program (\$15,148,000), identifying the consumer price index increase for the last biennium (1.7 percent) and distributing that calculated increase – \$258,000 in FY 2020 and \$516,000 in FY 2021 – across agency Air Program appropriations.

This requested funding increase allows sustained provision of Air Program services at the FY 2018-19 delivery levels. Several measures within Air Program operations will demonstrate the success of this proposal. These include whether the agency is able to maintain: the same level of program staffing; the pace of processing permit applications; site inspections and enforcement routines; and, prompt responses to requests for technical

assistance; and, review of complex operational plans and applications, particularly from companies in mining, energy and manufacturing sectors.

Equity and Inclusion

The initiative will ensure the agency is able to maintain service levels for the Air Program. This program provides services that positively impact heavily-populated areas and/or areas where high concentrations of many air pollutants are typically found by completing permitting and related air monitoring to ensure that regulated entities are conforming to established limits. Populations that benefit from this request include those located in communities experiencing economic disparities, the larger urban centers with higher population densities, historic inequitable pollution burdens and persons who tend to be more vulnerable to the health effects of air pollution.

This initiative will allow impacted communities to be engaged and meaningfully involved in decisions much earlier in permitting processes; when the completed permit applications are received by the MPCA, or earlier if possible. We will improve and enhance communication and engagement around permitting activities through use of plain language, translating services where appropriate, and more diverse sources of communication such as local newspapers and newsletters, and hold public meetings in places and at times that are more accessible. Further, we will encourage facilities to improve and increase their own engagement with their surrounding communities.

Results

The primary outcome is the maintenance of service levels from biennium to biennium. The increased costs addressed by this request cover all aspects of the Air Program related to permitting activity, including regulatory work and air quality monitoring.

Minnesota Pollution Control Agency

FY 2020-21 Biennial Budget Change Item

Change Item Title: Extension of Freeway Landfill and Dump Appropriation

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Closed Landfill Investment Fund				
Expenditures	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation

The Governor recommends extending availability of the 2017 Freeway Landfill and Dump appropriation through June 30, 2021 to allow for the completion of initial investigation and engineering design work.

Rationale/Background

Freeway Landfill (150 acres) and Freeway Dump (28 acres) in Burnsville are next to the Minnesota River, just upstream from its confluence with the Mississippi River. Groundwater under the landfill and dump naturally flows towards the river. Kraemer Quarry, to the south of the landfill, has been pumping water out of the quarry to be able to mine. It has altered the flow of groundwater and kept groundwater levels under the landfill and dump artificially low.

When Kraemer Quarry stops production and pumping out water, groundwater will return to its regular level and flow towards the Minnesota River. The quarry site will fill with water and become a lake. The buried garbage at Freeway Landfill and Dump will come in contact with the groundwater and the groundwater will become contaminated with chemicals, metals and other pollutants. The contamination will flow to the river and new lake.

Burnsville and Savage residents get their drinking water from the quarry/new lake and groundwater in this area. Failing to clean up these sites now will pose risks to public health and the environment in the future.

The MPCA received a one-time appropriation in 2017 for settling obligations with the federal government, remedial investigations, feasibility studies, engineering, and cleanup-related activities for purposes of environmental response actions at the Freeway Landfill and Dump. However, due to delays in ability to complete investigation and design work, all intended and essential activities will not be completed by the appropriation's present expiration date.

Proposal

The Governor recommends extension of the 2017 appropriation to allow for successful completion of initial investigation and engineering design work at Freeway Landfill and Dump in Burnsville. This appropriation is from Laws of Minnesota 2017, Chapter 93, Article 1, Section 2, Subdivision 6 (e) and currently expires at the end of FY2019.

Statutory Change(s)

Minnesota Pollution Control Agency

FY 2020-21 Biennial Budget Change Item

Change Item Title: Extension of PFA Assistance Appropriation

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Environmental Funds				
Expenditures	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation

The Governor recommends extending availability of the 2016 appropriation for technical assistance and review of Public Facilities Authority capital assistance projects through June 30, 2021 to enable continued review of municipal water infrastructure projects.

Rationale/Background

The Public Facilities Authority's (PFA) municipal water infrastructure projects require technical assistance review of design documents by wastewater treatment staff prior to plans being approved and projects moving forward toward implementation. This review is accomplished through continuing interagency effort by MPCA staff.

In anticipation of a capital budget bill in the 2016 session that included a greater than normal amount of bonding monies for water infrastructure projects, the MPCA received an appropriation sufficient to cover the costs for review of the increased number of projects. However, a bonding bill did not pass in the 2016 session. Instead, a capital budget bill was passed in 2017 that included the increase in municipal water infrastructure projects bonds; one year after monies had been appropriated to the MPCA. Due to the delay in PFA receiving bonding monies, engineering review of the increased number of municipal water infrastructure projects will not be completed prior to expiration of the appropriation for that purpose.

Proposal

The Governor proposes extension of the 2016 Environmental Fund appropriation to meet the increased demand for technical assistance and review of municipal water infrastructure projects that were generated by increased grant funding through the Public Facilities Authority. This appropriation is from Laws of Minnesota 2016, Chapter 189, Article 3, Section 2, Subdivision 2 that currently expires at the end of FY 2019.

Minnesota Pollution Control Agency

FY 2020-21 Biennial Budget Change Item

Change Item Title: CWF River and Lake Monitoring and Assessment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Clean Water Fund				
Expenditures	8,000	8,000	0	0
Net Fiscal Impact = (Expenditures – Revenues)	8,000	8,000	0	0
FTEs	43.8	43.8	0	0

Recommendation

The Governor recommends appropriation of \$8 million in FY 2020 and \$8 million in FY 2021 from the Clean Water Fund (CWF) to the Minnesota Pollution Control Agency's (MPCA) Environmental Analysis and Outcomes Division. This recommendation continues the systematic progress of monitoring and assessing lakes, rivers and streams to detect long-term changes over time in water quality; and to identify waters to restore, those requiring protection from future degradation, and those that have been restored due to recent efforts. The monitoring data generated are foundational to other CWF-funded activities, such as targeting watershed restoration and protection plans to ensure greatest effectiveness, and supporting One Watershed-One Plan and local implementation.

The recommended appropriation of \$16 million for FY 2020-21 is a 2 percent reduction from the FY 2018-19 appropriation. The amount requested for FY 2020-21 reflects a lower level of monitoring effort and will cover higher costs of compensation for staff and many local partners who conduct monitoring through this appropriation. Full-time staffing funded by this request will continue at current levels, although slightly fewer seasonal staff will be needed.

Rationale/Background

To be successful preventing and fixing problems, Minnesota requires good information about the condition of the state's water resources, including problems and threats, options for addressing the problems and threats, and data on how effective management actions have been. The surface water monitoring and assessment program is focused on providing that critical information.

To fulfill the requirements of the state Clean Water Legacy Act (CWLA) and the federal Clean Water Act (CWA), Minnesota has a strategy to assess the condition of Minnesota's waters on a 10-year cycle via a combination of MPCA monitoring; monitoring by other local, state and federal agencies; citizen monitoring; and remote sensing. An outcome of this monitoring is the identification of waters that are impaired (i.e., do not fully support uses such as swimming and fishing and therefore need restoration) and those in need of protection to avoid impairment. As actions are taken, re-sampling of impaired waters is needed determine if impaired waters have been restored. Over time, this monitoring also identifies trends in water quality. This helps determine whether water quality is improving or worsening, and identifies the overall effectiveness of management actions.

This proposal for surface water monitoring funding will enable the MPCA to continue its work toward the goals of the CWLA. In 2015-2017, the MPCA worked with partner agencies and local governments to refine the monitoring approach to meet the needs of the next 10 years of CWLA implementation. The refinements, which were fully implemented in 2018, shift the emphasis from establishing the baseline condition of Minnesota's lakes and streams to:

- Revisiting a subset of sites to track changes over time and collect data for delisting purposes, and
- Targeted monitoring to fill in data gaps identified by local and state resource managers as critical to effective local implementation.

Fewer monitoring sites are necessary to meet the goals for the second round of monitoring, and therefore the recommended funding for this activity has been reduced.

Proposal

The Governor proposes continuation of funding for FY2020-21. Appropriations from the Clean Water Fund may only be authorized as one-time funding.

Monitoring includes biological, chemical, and habitat monitoring at lakes, streams and rivers. Data are evaluated to determine if waters are impaired and if previously impaired waters have been restored, and to inform solutions to watershed problems. Chemical monitoring is also conducted at watershed outlets to further inform implementation efforts and track changes over time. Additionally, the MPCA monitors a representative subset of surface waters for contaminants of new and emerging concern and develop risk-based screening values to evaluate the risks to fish, and other aquatic life important to the food chain, associated with these contaminants. Monitoring data are used to help prioritize the development of tools to evaluate the potential risk to human health and aquatic life posed by the presence of these contaminants in the environment.

This proposal would fund monitoring in at least 17 major watersheds. Funding would support both a continuation of MPCA monitoring and assessment staff (\$121,000/FTE x 43.8 FTE = \$5.3 million), monitoring equipment and supplies of approximately \$700,000 and \$2.0 million to local partners that conduct monitoring. If this request is not funded, we will be less effective at targeting restoration efforts, have no way to evaluate whether or not restoration efforts are successful, and we will not be able to delist restored waters.

Equity and Inclusion

This proposal would ensure that data on water quality is collected and analyzed statewide. These data are critical to meeting the goals of the CWLA and CWF, and ensuring that Minnesotans are able to enjoy the benefits of clean and healthy lakes and streams. The MPCA employs a number of student workers and interns each summer to help conduct this monitoring effort, and has been actively recruiting seasonal and permanent employees among under-represented groups. Eligible applicants for the lake and stream monitoring solicitation process include local units of government, tribes, non-profits, and educational institutions.

Results

Since the advent of the CWF, the MPCA and its partners have monitored and assessed the baseline water quality of Minnesota's major watersheds. Monitoring progress is routinely communicated via MPCA publications and web sites and through the biennial Clean Water Fund Performance Report. The 2018 Clean Water Fund Performance Report is available on the Legacy website at <https://www.pca.state.mn.us/water/report-clean-water-fund-spending>. Watershed-specific monitoring and assessment reports are available at: <https://www.pca.state.mn.us/water/watersheds>. Watershed Pollutant Load Monitoring Network results can be found at: <https://www.pca.state.mn.us/water/watershed-pollutant-load-monitoring-network>.

More than 220 grants have been awarded to local units of government, colleges and universities, nonprofits, and tribal governments for local monitoring activities that contribute to the watershed monitoring approach.

Minnesota Pollution Control Agency

FY 2020-21 Biennial Budget Change Item

Change Item Title: CWF Watershed Restoration and Protection Strategies

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Clean Water Fund				
Expenditures	8,050	8,050	0	0
Net Fiscal Impact = (Expenditures – Revenues)	8,050	8,050	0	0
FTEs	36.9	36.9	0	0

Recommendation

The Governor recommends an appropriation of \$8.050 million in each FY 2020 and FY 2021 from the Clean Water Fund (CWF) to the Minnesota Pollution Control Agency's (MPCA) Watershed Division to continue the systematic progress in developing protection and restoration strategies for the state's watersheds. The funding will enable the development of strategies to address point and nonpoint sources of pollution. This recommendation supports the agency's work with local partners to guide restoration of impaired watersheds and protect unimpaired watersheds.

The recommended appropriation of \$16.1 million for FY2020-2021 is a 15 percent decrease from the amount appropriated in FY 2018-19 due to program operational maturity and efficiencies. Staffing funded by this request will continue at current levels.

Rationale/Background

The state Clean Water Legacy Act (CWLA) and the federal Clean Water Act (CWA) require the state to make reasonable progress in assessing waters of the state for impairments and in developing plans for restoring waters to their intended uses. In 2002, the Office of the Legislative Auditor (OLA) noted the requirement to identify, evaluate, and restore waters was significantly underfunded. In 2003, the Legislature directed us to engage stakeholders in developing an efficient and accountable path to clean water. In 2005, court rulings cited the impaired waters section of the federal CWA in blocking the issuance of a wastewater permit to the cities of Annandale and Maple Lake. This action added momentum for passage of the state's CWLA in 2006. In 2008, Minnesotans approved the Clean Water, Land and Legacy Amendment that provides 25 years of constitutionally dedicated funding—an increase in the state sales tax—for clean water, habitat, parks and trails, and the arts.

This proposal enables the MPCA to continue work toward the goals of the CWLA. That law directs the agency to identify impaired waters in 10 years and to complete 10% of total maximum daily load (TMDLs) studies and watershed restoration and protection strategies (WRAPS) each year. The MPCA works with other state agencies on an inter-agency team to coordinate programs related to this Clean Water effort, and with local partners to ensure local conditions are understood and local water implementation plans are properly targeted.

Collectively, state agencies use a watershed approach by first identifying the health of Minnesota's water resources, then identifying impaired waters and those in need of protection, developing watershed-specific restoration and protection strategies based on this information, and incorporating them into their local water plans. The watershed approach is holistic, addressing the chemical, physical, and biological needs of the watershed. Working at a watershed scale is more efficient and effective.

Proposal

The Governor proposes continuation of funding for FY2020-21 for WRAPS, including TMDLs, to be developed with local partners to set strategies for restoring impaired waters and protecting unimpaired waters by setting

reduction and protection goals, milestones, and measures to guide state and local government implementation efforts. WRAPS and TMDLs are foundational to the development of science-based, efficiently targeted local water plans. The proposal includes maintaining 36.9 FTE (\$4.465 million) and other operating costs and contracts of \$3.585 million. Clean Water Fund may only be one-time appropriations.

Equity and Inclusion

WRAPS are developed with robust public participation opportunities, inclusive of all watershed citizens that choose to participate.

Results

This funding will enable the MPCA to continue its progress on the development of WRAPS and TMDL studies. EPA has approved 2,346 TMDLs and all Minnesota watersheds have WRAPS development projects underway. Thirty-six (45 percent) of the state's 80 watersheds have completed WRAPS. With this funding, at least 85 percent of the state's WRAPS will be completed by the end of the FY20-21 biennium, with the rest scheduled to be completed by the end of the FY2022-23 biennium. Thirty-seven lakes and streams have been restored to date.

The MPCA reports projects and funding on the Legislative Coordinating Commission's website, <http://www.legacy.leg.mn/funds/clean-water-fund/clean-water-fund-performance-reports>, which includes all recipients of the funds. The 2018 Clean Water Fund Performance Report is available on the MPCA website at <https://www.pca.state.mn.us/sites/default/files/lrp-f-3sy18.pdf>. This performance report uses Outcome, Action, and Financial Measures to gauge progress on protecting and restoring the state's water resources. The MPCA has also developed an on-line reporting tool to share progress on what is being done in Minnesota's watershed to protect and improve water quality; see <https://www.pca.state.mn.us/healthier-watersheds>.

Statutory Change(s)

Not applicable

Minnesota Pollution Control Agency

FY 2020-21 Biennial Budget Change Item

Change Item Title: CWF Groundwater Assessment

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Clean Water Fund				
Expenditures	1,182	1,182	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,182	1,182	0	0
FTEs	4.8	4.8	0	0

Recommendation

The Governor recommends appropriation of \$1.182 million in each FY 2020 and FY 2021 from the Clean Water Fund to the Minnesota Pollution Control Agency's (MPCA) Environmental Analysis and Outcomes Division. This appropriation maintains the operation of Minnesota's groundwater monitoring network, ensuring continued assessment, monitoring and protection of the state's groundwater.

The recommended appropriation of \$2.364 million for FY 2020-2021 represents no increase from the amount appropriated in FY 2018-19. Staffing funded by this request will continue at current levels.

Rationale/Background

Clean Water Fund (CWF) monies are dedicated to protect, enhance, and restore water quality in lakes, rivers, streams, and groundwater; with at least five percent targeted to protecting drinking water sources. The majority of Minnesota's citizens receive their drinking water from groundwater. To be successful in protecting and restoring groundwater quality requires clear data concerning about the status of Minnesota's groundwater resources. Groundwater monitoring and assessment helps the MPCA and local and state partners understand groundwater quality and investigate potential sources of contamination.

The CWF provides support to the MPCA's groundwater assessment program, which includes: monitoring of non-agricultural pollutants in groundwater, including contaminants of emerging concern; modeling the interaction between groundwater and surface water; and, evaluating MPCA's progress protecting groundwater from contamination by non-agricultural chemicals. The MPCA's ambient groundwater monitoring network serves as an early-warning system of contaminants reaching groundwater. The program provides data and information to understand the quality of Minnesota's groundwater, including trends over time, and evaluate progress in protecting groundwater quality. Groundwater quality data, modeling, and information about surface water and groundwater interactions also inform restoration and protection strategies developed by the MPCA and its partners. The groundwater data generated through this appropriation provides essential information for decisions on other CWF-funded activities involving groundwater and drinking water protection.

Proposal

The Governor proposes continuation of funding for FY 2020-2021 for continued operation of the monitor network of about 270 wells across the state. The network targets aquifers that are most vulnerable to pollution by non-agricultural chemicals, typically shallow aquifers that underlie urban areas of the state. Monitoring data are analyzed to evaluate groundwater conditions and trends. This information is shared with state and local partners and the public to inform drinking water protection activities.

MPCA staff also work with the US Geological Survey and others to better understand the relationships among groundwater recharge, precipitation, streamflow, and lake levels and water quality. This work informs protection efforts for both groundwater and surface water.

The funding will also continue to support the evaluation of potential sources of concern for groundwater contamination to ensure requirements and best management practices (BMPs) are protective of groundwater resources. Costs include maintaining 4.8 FTE (\$121,000 x 4.8 FTE = \$580,000) and \$602,000 of other operating costs. Appropriations from the Clean Water Fund may only be authorized as one-time funding.

Equity and Inclusion

This proposal will ensure that data on groundwater quality is collected and analyzed statewide. This data can be used by Minnesotans to plan for their communities' future, particularly in terms of what is needed to ensure clean and safe drinking water for all. The MPCA is currently evaluating our network design for its ability to detect any disproportionate impacts to groundwater quality. The requested funding will not adversely impact racial or ethnic groups in any way.

Results

Since the advent of the CWF, MPCA has established the groundwater quality monitoring network and is beginning to have sufficient data to calculate trends in groundwater quality for vulnerable aquifers. Monitoring results are routinely communicated via MPCA reports and web materials and through the biennial Clean Water Fund Performance Report available online at <https://www.pca.state.mn.us/water/report-clean-water-fund-spending>. Additional information about groundwater monitoring efforts and the data collected can be found in the "2015 Groundwater Monitoring Status Report" at <https://www.eqb.state.mn.us/2015-groundwater-monitoring-status-report>.

Statutory Change(s)

Minnesota Pollution Control Agency

FY 2020-21 Biennial Budget Change Item

Change Item Title: CWF Enhanced County Inspections/SSTS Corrective Actions

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Clean Water Fund				
Expenditures	3,938	3,938	0	0
Net Fiscal Impact = (Expenditures – Revenues)	3,938	3,938	0	0
FTEs	3.3	3.3	0	0

Recommendation

The Governor recommends appropriation of \$3.938 million in each FY2020 and FY 2021 from the Clean Water Fund to the Minnesota Pollution Control Agency's (MPCA) Municipal Division. This appropriation continues technical assistance efforts and funds county implementation of subsurface sewage treatment system (SSTS) program requirements (M.S. 115.55) including issuing permits, conducting inspections, identifying and resolving non-compliant SSTS, and revising and maintaining SSTS ordinances.

The recommended appropriation of \$7.876 million for FY2020-2021 is a 19 percent increase from the amount appropriated in FY 2018-19. This will allow an increase in grants available to low-income homeowners to upgrade SSTS's. Staffing funded by this request will continue at historic levels.

Rationale/Background

This proposal enables the MPCA to continue its work toward Clean Water Legacy Act (CWLA) goals. That law directs the agency to achieve compliance with federal Clean Water Act requirements in Minnesota, to support effective measures that prevent the degradation of groundwater according to the groundwater degradation prevention goal under M.S. 103H.001; and to support effective measures to restore degraded groundwater. The Subsurface Sewage Treatment Systems (SSTS) program works with the Implementation and Enforcement Task Force (M.S. 115.55), the Advisory Committee, Local Governmental Units and the industry to ensure that the approximately 537,000 SSTS's in the state protect human health and Minnesota's waters.

Prior to the Legacy Amendment, funding was insufficient to ensure new and existing SSTS's throughout the state did not result in illegal discharges to surface waters or to groundwater. Through this initiative, counties receive \$1.6 million per year by formula for local level implementation and enforcement of the SSTS program. This approach has proven effective in systematically addressing compliance across the state. An additional \$1,000,000 of this funding is given to and granted out from counties as assistance for low-income households to upgrade or replace their SSTS's when they are failing. The requests from counties for these low-income targeted funds is always much greater than the amount of money available. In 2018 the MPCA received requests totaling \$1,833,650 but only \$1,144,000 was available. The recommended appropriation for FY20-21 will more fully address the needs expressed by counties for low-income households.

Proposal

The Governor proposes continuation of funding for FY 2020-21 to support technical assistance and county implementation of SSTS program requirements (under M.S. 115.55), including issuing permits, conducting inspections, identifying and resolving non-compliant SSTS, and revising and maintaining SSTS ordinances. Incentive grant funding is based on several program aspects, including inspection requirements for point of sale, inspection requirements for any county permit, specific plans to improve compliance and specific plans to address unsewered areas. As noted above, the proposed increase in this appropriation from that provided in FY18-19 will allow an increase in the grants available to low-income homeowners to upgrade SSTS's. This proposal includes

maintaining 3.3 FTE (\$121,000 x 3.3 FTE = \$399,000), operating costs (\$439,000) and grants to counties (\$3.1 million). Appropriations from the Clean Water Fund may only be authorized as one-time funding.

Equity and Inclusion

All counties that manage an SSTS program are eligible for base funding through this initiative. In addition, any county can apply for low-income grants to fix non-compliant septic systems and incentive grants. All funding is distributed equally to all qualified counties that apply. Counties that receive funding are required to report on activities conducted in the program, allowing review of the performance of each county. The data from the report are used to determine if changes to the program are warranted and where those changes are appropriate.

Results

Over the past ten years, counties have estimated the following:

- The percent of systems in compliance to have increased from 65 percent to 82 percent
- The percent of systems failing to protect groundwater to have decreased from 25 percent to 12 percent
- Septic systems that pose an imminent threat to public health to have decreased from 11 percent to 4 percent
- Over 15,000 compliance inspections of existing systems were done in 2017

In 2017:

- 158 SSTS were connected to a centralized sewer
- 497 SSTS were abandoned or removed
- 10,906 SSTS systems were new or replaced

Approximately 700 septic systems have been fixed using low-income fix-up funds since FY13.

The MPCA provides annual reports of the local governmental efforts and funding on the Legislative Coordinating Commission's website, Clean Water Fund Performance Reports webpage <http://www.legacy.leg.mn/funds/clean-water-fund/clean-water-fund-performance-reports>. The 2018 Clean Water Fund Performance Report is available on the Legacy website at <https://www.pca.state.mn.us/sites/default/files/lrp-f-3sy18.pdf>. This report uses a number of factors to gauge progress on protecting and restoring the state's water resources. The 2017 SSTS Annual Report is available at <https://www.pca.state.mn.us/sites/default/files/wq-wwists1-58.pdf>.

Statutory Change(s)

Not applicable

Minnesota Pollution Control Agency

FY 2020-21 Biennial Budget Change Item

Change Item Title: CWF Great Lakes Restoration Project

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Clean Water Fund				
Expenditures	750	750	0	0
Net Fiscal Impact = (Expenditures – Revenues)	750	750	0	0
FTEs	2.3	2.3	0	0

Recommendation

The Governor recommends appropriation of \$750,000 in each FY2020 and FY2021 from the Clean Water Fund to the Minnesota Pollution Control Agency's (MPCA) Remediation Division for implementation of the Great Lakes Water Quality Agreement priority actions identified in the St. Louis River Area of Concern Remedial Action Plan. This work will leverage federal money to restore the St. Louis River Area of Concern located in the lower reaches of the St. Louis River Watershed in the Lake Superior Basin to improve water quality in the River and Lake Superior. The St. Louis River Area of Concern is a source of drinking water and economic development for the City of Duluth and other communities in the region, in addition to being an important ecological resource for the state.

The recommended appropriation of \$1.5 million for FY 2020-21 is equal to the amount appropriated in FY2018-FY2019. The amount will be utilized to continue implementation of the federal Environmental Protection Agency (EPA) approved management actions listed in the Remedial Action Plan, including those tasks outlined in the US Army Corps of Engineers (USACE)-MPCA partnership agreement. Staff funded by this request will continue at current levels.

Rationale/Background

The St. Louis River Area of Concern Remedial Action Plan describes the State of Minnesota's commitment to meet the goal of restoring this Area of Concern as called for by the 2012 Great Lakes Water Quality Agreement and the current federal Great Lakes Restoration Initiative Action Plan. Major actions in Minnesota address reducing risk from contaminated sediments at 12 sites and restoring approximately 1,700 acres of aquatic habitat to support the recovery of fish and wildlife populations. Importantly, these actions are needed to ensure drinking water resources remain available for surrounding communities.

Continued implementation of the St. Louis River Area of Concern Remedial Action Plan will ultimately result in the removal of the eight remaining beneficial use impairments. Once the management actions are completed, an application for formal delisting can occur, with a target of 2025 for delisting.

Proposal

The Governor proposes continuation of funding for FY 2020-21, including 2.3 FTE (\$121,000/FTE x 2.3 = \$278,000), operating costs and contracts (\$472,000). Appropriations from the Clean Water Fund may only be authorized as one-time funding.

This funding supports continued work to implement the Remedial Action Plan for the St. Louis River Area of Concern, completed with the assistance of several local and federal partners. This includes the activities completed under the USACE-MPCA Partnership Agreement that require at least a 35 percent state match to leverage the federal 65 percent share. In addition to the CWF, the St Louis River Area of Concern management actions have had funding support from various accounts in the federal Great Lakes Restoration Initiative fund, EPA's Office of Research and Development funding, the USACE's technical assistance funding, the Duluth-Superior

Harbor Maintenance Trust Fund, the Lessard-Sams Outdoor Heritage Fund, and the Environment and Natural Resources Trust Fund. Continued financial support from the CWF and the other funding sources will be needed to complete the management actions listed in the Remedial Action Plan and move forward with an application for formal delisting. Any permitting or construction delays will necessitate a schedule extension.

Equity and Inclusion

Work is accomplished through communication and collaboration with a variety of community groups in the Duluth area, such as the St. Louis River Alliance, and interests from the greater watershed, including the Fond du Lac Band of Lake Superior Chippewa. The work being performed accomplishes equity inclusion goals as follows:

- Decreasing exposure to harmful legacy pollutants in the St. Louis River Area of Concern sediment and fish and wildlife populations.
- Improved access to recreational uses within the St. Louis River Area of Concern.
- Economic benefit and enhance/restored outdoor recreational opportunities from remediation and restoration projects. See link: <https://www.glc.org/work/blue-economy/GLRI-economic-impact>
- Coordination with the Fond du Lac Band of Lake Superior Chippewa to restore 275 acres of wild rice within the St. Louis River Area of Concern.

Results

Clean Water Fund appropriations to date have helped leverage more than \$36 million of non-state funds to develop and begin to implement the St. Louis River Area of Concern Remedial Action Plan. Implementation of priority actions to fulfill Minnesota obligations under the Great Lakes Water Quality Agreement and the Great Lakes Restoration Initiative Action Plan Priority 1 have included the following activities:

- Identification and completion of studies needed to support the removal of beneficial use impairments,
- Sediment assessment and characterization,
- Identification of contaminated sediment cleanup sites requiring action and priority habitat restoration sites,
- Feasibility studies,
- Development of engineering designs and plans and specifications for bidding,
- Site construction, and
- Development of a St. Louis River Area of Concern data system.

The MPCA tracks its projects and funding on the Legislative Coordinating Commission's website, Clean Water Fund Performance Reports webpage <http://www.legacy.leg.mn/funds/clean-water-fund/clean-water-fund-performance-reports>, which includes all recipients of the funds.

Statutory Change(s)

Not applicable

Minnesota Pollution Control Agency

FY 2020-21 Biennial Budget Change Item

Change Item Title: CWF Accelerated Implementation of MS4 Permit Requirements

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Clean Water Fund				
Expenditures	225	225	0	0
Net Fiscal Impact = (Expenditures – Revenues)	225	225	0	0
FTEs	1	1	0	0

Recommendation

The Governor recommends appropriation of \$225,000 in each FY 2020 and FY 2021 from the Clean Water Fund to the Minnesota Pollution Control Agency's (MPCA) Municipal Division. Funds will provide assistance to local units of government and other permittees for accelerated implementation of Municipal Separate Storm Sewer System permit requirements.

The recommended appropriation of \$450,000 for FY 2020-21 is the same amount appropriated in FY 2018-19.

Rationale/Background

Stormwater runoff is a major source of water pollution for many of Minnesota's 11,000 plus lakes and 92,000 miles of rivers and streams. Minnesota's population density and amount of impervious surface have increased dramatically over the past century. Consequently, many of Minnesota's waters have been affected by pollutants in runoff from urban and agricultural sources, resulting in many of our lakes, rivers, and streams being listed as "impaired;" not fully supporting uses such as swimming and healthy fish and insect communities.

It is the goal of the MPCA Stormwater Program to prevent or reduce pollutants associated with stormwater runoff from being flushed into our lakes, rivers, streams, and wetlands. This is done by implementing the National Pollutant Discharge Elimination System (NPDES) program under Minnesota Rules 7001, 7050, 7060, 7090, as enabled by the federal Clean Water Act, for regulated industrial, municipal, and construction stormwater sources. The Stormwater Program is implemented primarily through general permits, including the Municipal Separate Storm Sewer System (MS4) General Permit, which expired on July 31, 2018 and is currently being reissued.

The MPCA has received comments from MS4 permittees, industry groups and environmental advocates stating that there is a significant need for assistance in implementing permit requirements. Requests of included need for assistance in the form of templates, check-lists, guidance documents and assistance visits. MPCA staff experience in data analyses reinforce the importance of additional tactical assistance as after two permit cycles and traditional inspection and assistance activities, regulated MS4s permittees are not meeting some of the basic permit requirements.

Proposal

The Governor proposes funding for extensive technical assistance, guidance development, and direct outreach to MS4s to accelerate MS4 permit implementation. The proposal is intended to bring all regulated MS4s up to a standard baseline of operating compliance with Minnesota NPDES rules, recognizing that some permittees may have more advanced programs than others. The one FTE of maintained MPCA staff (\$121,000/FTE) will collaborate with the regulated MS4s to determine the needed assistance, as MS4s vary in size, available resources and status of stormwater program development. Proposed costs of technical assistance and guidance materials remain consistent with FY 2018-2019 costs (approximately \$104,000/year). In addition, depending on what is learned from the MS4 permittees, new assistance and program needs may be discovered.

Equity and Inclusion

This proposal will benefit all Minnesota citizens, as regulated MS4s are distributed around the state. Improvements in local MS4 programs will result in implementation of additional Best Management Practices, which not only improve water quality, but also can be an aesthetic benefit to the community. All citizens can gain from the educational and public involvement aspects of the regulated MS4 programs and can contribute as citizen stakeholders, if they so choose.

Results

Beginning with the FY 2018-2019 appropriation, the following outcomes have been accomplished to date and will be continuously updated through this proposal to accelerate MS4 implementation and assist local regulated entities:

- Establishment of a digital document library (DDL) within the on-line MN Stormwater Manual. The DDL is a compilation of permittee-developed documents, standard operating procedures, checklists and processes, reviewed and endorsed by the MPCA that permittees can share and use to assist in compliance with the MS4 permit. The Minnesota Stormwater Manual has exceeded 5 million page views and is regularly cited by permittees and industry representatives as an extremely useful resource to aid their environmental protection efforts, including permit compliance. See <https://www.pca.state.mn.us/water/minnesotas-stormwater-manual>.
- Initiated an enhancement to the “MS4 Toolkit”, which is a package of best practices that facilitate establishing effective stormwater programs at the local level. Practices in the toolkit include public education and outreach, public participation, illicit discharge detection and elimination, construction site stormwater runoff control, post-construction stormwater runoff management and MS4-owned infrastructure management.
- Initiated development of model ordinances, which can be used by regulated MS4s as the backbone of an effective local stormwater program.
- Created a modeling package to assist MS4 permittees in demonstrating progress toward achieving TMDL waste load allocations (WLAs), and monitoring guidance as an alternative method of demonstrating progress toward achieving TMDL waste load allocations (WLAs),
- Developed guidance to assist permittees in developing appropriate procedures for the purpose of determining the TSS and TP treatment effectiveness of all permittee owned/operated ponds constructed and used for the collection and treatment of stormwater, and
- Developed and disseminate information on case studies of successful water quality projects implemented by regulated or unregulated MS4s.

Statutory Change(s)

Not applicable

Minnesota Pollution Control Agency

FY 2020-21 Biennial Budget Change Item

Change Item Title: CWF NPDES Wastewater Stormwater TMDL Implementation

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Clean Water Fund				
Expenditures	900	900	0	0
Net Fiscal Impact = (Expenditures – Revenues)	900	900	0	0
FTEs	6	6	0	0

Recommendation

The Governor recommends appropriation of \$900,000 in each FY2020 and FY2021 from the Clean Water Fund to the Minnesota Pollution Control Agency's (MPCA) Municipal Division for Total Maximum Daily Load implementation in its Wastewater and Stormwater Programs.

The recommended appropriation of \$1.8 million for FY2020-2021 is the same amount appropriated in FY2018-FY2019. MPCA staffing and effort levels will be maintained for these activities.

Rationale/Background

Stormwater and wastewater can be significant contributors of pollutants to impaired waters. Proper permitting and management of stormwater and wastewater is crucial to the successful implementation of Total Maximum Daily Load (TMDL) requirements under the federal Clean Water Act (CWA). The accelerated completion of TMDLs and Watershed Restoration and Protection Strategies (WRAPS) under the state Clean Water Legacy Act has increased the information available to inform the issuance and reissuance of wastewater and stormwater permits under the National Pollutant Discharge Elimination System (NPDES) program of the federal CWA. The MPCA is the Agency responsible for issuing such permits in Minnesota. This proposal ensures the MPCA is able to provide a wide range of outreach and guidance materials to help ensure the most effective stormwater best management practices are implemented, that TMDL and WRAPS information is effectively incorporated into NPDES permits, and assistance is provided to permittees to help ensure achievement of clean water goals.

The wastewater NPDES program work includes permitting, engineer review, compliance and enforcement, training and certification, assistance with the funding programs, effluent limit determination, Environmental Assessment Worksheets (EAW) review and data review. There are currently approximately 1,400 NPDES permits – all but 100 of which must be reissued every five years. Each permit has effluent limits and specific requirements with which they must comply. The MPCA's NPDES wastewater program must assure that permits issued meet the appropriate water quality uses and that permittees are complying with their permits.

Proposal

The Governor proposes continuing funding a stormwater program that provides a wide range of outreach and guidance materials to help ensure the most effective stormwater best management practices are implemented. NPDES staff will enhance coordination between other MPCA staff who are developing TMDLs/WRAPS and the permitting program. This will ensure stormwater discharges are appropriately addressed in projects, provide outreach and guidance to stormwater permittees to assist in complying with permit requirements related to TMDLs, and develop state-of-the-art stormwater guidelines and tools.

Staff funded by this proposal include the following functions: permit writing, coordinating TMDL/WRAPS, analyzing GIS data, engineer review of effluent limits based on TMDL and WRAPS information, coordination of efforts to address unsewered areas, coordination of permits that help to address TMDL/WRAPS, and the

development of guidance. Additionally, wastewater staff will assure that during the development of the WRAPS and TMDLs that wastewater influences are measured and understood, following the plan for integration of the watershed approach in agency permitting programs. Additionally, after the WRAPS and TMDLs are developed, results will be interpreted and incorporated into the wastewater program through permitting, effluent limit determination, and working with local governmental units (LGU). Staff will provide technical assistance to MPCA permit writers and to LGUs with unsewered community discharges.

This proposal includes funding for six FTE (\$121,000/FTE) and \$174,000 for program operations, and maintenance and upgrading the Stormwater Wiki Manual. Appropriations from the Clean Water Fund may only be authorized as one-time funding.

Equity and Inclusion

The current TMDL, WRAPS, and permitting implementation processes follows the procedures that have been developed under the Agency's Environmental Justice priorities. This proposal ensures that consistent implementation occurs statewide, resulting in improved water quality for all citizens.

Results

The Program currently has three primary measures:

1. The number of new WQBEL limits in NPDES wastewater permits informed by monitoring, TMDLs, and WRAPS
2. An annual increase in NPDES wastewater permits with WQBEL's informed by intensive watershed monitoring, assessment, and WRAPS as well as the corresponding pollutant loading for TSS, phosphorus, mercury, chloride, nitrogen, dissolved oxygen, and biological oxygen demand.
3. Number of permits with new monitoring parameters that enhance the data available to inform TMDL developments.

Statutory Change(s)

Not Applicable.

Minnesota Pollution Control Agency

FY 2020-21 Biennial Budget Change Item

Change Item Title: CWF Chloride Reduction Program

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Clean Water Fund				
Expenditures	300	300	0	0
Net Fiscal Impact = (Expenditures – Revenues)	300	300	0	0
FTEs	1	1	0	0

Recommendation

The Governor recommends appropriation of \$300,000 in each FY 2020 and FY 2021 from the Clean Water Fund to the Minnesota Pollution Control Agency's (MPCA) Resource Management and Assistance Division for creation and operation of the Chloride Reduction Program, administering the Smart Salting Training program, conducting statewide trainings and establishing a targeted grant program to address water softening.

The recommended appropriation of \$600,000 for FY2020-2021 is new, state funds have not been used previously for this activity.

Rationale/Background

Chloride is a permanent pollutant that is toxic to aquatic life and does not break down or change over time. The chloride water quality standard designed to protect aquatic life is 230 mg/liter (equivalent to one teaspoon in five gallons of water). Once chloride enters our lakes, streams, wetlands and groundwater, it is extremely expensive to remove it. Chloride levels are continuing to increase in Minnesota's water resources and the only way to address this pollutant is to reduce it at the source. The primary sources of chloride causing water quality problems are de-icing salt used in winter and salt used for water softening systems. In the metro area alone, winter maintenance activities apply 365,000 tons of road salt per year.

The Smart Salting Training has been identified in the MPCA's Chloride Management Plan and the 2015 Environmental Quality Board Water Policy Report as the priority strategy to reduce de-icing salt at the source without compromising public safety. Since 2006, a Smart Salting Training pilot had been offered by the Minnesota company Fortin Consulting due to one-time federal funding for non-point source water pollution protection. This pilot training is highly successful, and has significant support from local partners and the industry. However, due to the requirements and the one-time nature of the federal funds, these trainings have been primarily focused in the seven-county Twin Cities Metropolitan Area and have only been offered on a temporary basis. The current grant expires in 2020 and is the last federal grant available for the training. Unless sustainable funding can be identified, the Smart Salting Training will no longer be available in Minnesota.

More than 100 communities in Minnesota have been identified to have elevated chloride in their wastewater discharge, in large part due to water softening. Since most wastewater treatment plants are not designed to remove chloride, and retrofitting such plants with currently available chloride treatment would be prohibitively expensive, creative approaches are needed to reduce the chloride that enters wastewater treatment plants, which is ultimately discharged to lakes and streams.

Proposal

The Governor recommends establishing a new, statewide chloride reduction program in the MPCA's Resource Management and Assistance Division to assist communities in reducing salt at the source. These funds will enable the MPCA to administer a Smart Salting Training & Certification program for businesses that provide snow removal and deicing services. The funds will also be used to reduce the chloride entering our waters through

wastewater treatment plants, by offering targeted grants to communities that would like assistance working with their residents and businesses to upgrade home water softeners to low-salt use systems, and to interested communities that centrally soften their water to assist with removal of unnecessary water softening units. This new program proposal is consistent with the Clean Water Council's recent [de-icing chloride reduction policy](https://www.pca.state.mn.us/sites/default/files/wq-cwc1-20.pdf) (<https://www.pca.state.mn.us/sites/default/files/wq-cwc1-20.pdf>). The program would also make significant progress towards the MPCA's strategic plan goal of reducing chloride entering surface waters and groundwater (see <https://www.pca.state.mn.us/about-mpca/mpca-strategic-plan>). The program under this proposal would include:

1. Funding a state-wide Smart Salting training program for private and public winter maintenance professionals. This training has significant support by local partners and the industry, and is the top implementation strategy identified to reduce de-icing salt use. Past participants have successfully reduced their salt use by 30 percent - 70 percent. This training was proven successful in a federally funded pilot, but those funds have run out. This voluntary program would be operated similar to other MPCA certification programs, requiring 1 FTE (\$121,000/FTE) and monies for program development, informational materials and operations (approximately \$79,000/year).
2. Establishing a targeted water softener rebate program. To address the significant chloride contribution of water softeners, a grant program will be created and administered to assist communities interested in working with their residents and local businesses to upgrade or remove water softeners through rebates. These grants will be targeted to those communities determined to have high chloride in their wastewater effluent and where source reduction is a viable option. This funding would allow grants (\$100,000 /year) to be offered to interested communities to help implement a community-based rebate program to residents and small businesses to upgrade or remove their water softening units. These funds would allow for up to two communities a year to receive grant funds to cover a portion of the cost to upgrade or remove water softening units.

Equity and Inclusion

The MPCA will provide Smart Salting training classes and certification program to communities across greater Minnesota that have had limited opportunities to participate in the past due to the Metro focus of the federal funds used to offer the trainings. The MPCA will also provide financial assistance to underserved communities in need of reducing chloride from water softening. The water softening rebate program will target communities with high levels of chloride in their wastewater treatment discharge and rural and low socioeconomic communities. We will actively communicate and coordinate with these communities to participate in the programs.

Results

Improved water quality for the protection of aquatic life and drinking water through reductions in the amount of chloride entering our lakes, streams, wetlands and groundwater will be the outcome of the Chloride Reduction program. In addition to tracking the water quality trends of chloride in our surface waters and groundwater, progress in successfully implementing the chloride reduction program will be measured by the following:

- Number of applicators trained and certified by the MPCA Smart Salting Training program
- Number of users and progress on implementation of chloride reduction BMPs through the Smart Salting Assessment tool
- Estimated salt reduction from organizations willing to share their information
- Report number of communities receiving water-softening rebate grant funds every two years
- Number of permitted entities making progress towards complying with chloride water quality-based effluent limit

The Smart Salting Training pilot program has already shown promise for successful statewide implementation. By teaching proper use of equipment, and providing materials and awareness about environmental impacts, applicators can be more efficient with their services, which allows for significant reduction in salt use and also creates a cost savings as shown in table below:

<i>Entity</i>	<i>Time period</i>	<i>Main actions implemented</i>	<i>Salt reduction</i>	<i>Cost savings</i>
City of Waconia	2010	Staff Training; Switch from 1:1 sand:salt to straight salt & liquid anti-icing; calibration; equipment changes; use of air and pavement temperatures.	70%	\$8,600 yearly cost savings(\$1.80 per lane-mile)
City of Richfield	2010	All-staff Training; yearly sander calibration; use of low-pavement-temp deicers; road crown-only application; minor-arterial-road policy adjustments.	>50%	\$30,000: 2010-2011 \$70,000: 2011-2012
Joe's Lawn & Snow	2013-2014	Owner & staff Training; purchase of new spreader, temperature sensors; equipment calibration; use of temperature data; on-going experimentation.	50%	\$770 estimated cost savings in 2014

Minnesota Pollution Control Agency

FY 2020-21 Biennial Budget Change Item

Change Item Title: Clean Water Council

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Clean Water Fund				
Expenditures	110	110	0	0
Net Fiscal Impact = (Expenditures – Revenues)	110	110	0	0
FTEs	0	0	0	0

Recommendation

The Governor recommends appropriation of \$110,000 in each FY 2020 and FY 2021 from the Clean Water Fund to the Minnesota Pollution Control Agency's (MPCA) Operations Division for Clean Water Council operations.

The recommended appropriation will cover costs of meetings, necessary travel for members and the production of the Council's biennial report. The 120 percent increase from FY 2018-2019 is needed to cover the costs of additional meetings of the Council's two committees, oversight and coordination of additional Council outreach efforts, and costs for travel of more Council members from rural Minnesota.

Rationale/Background

The Council was established in 2006 to advise the Legislature and Governor on the administration and implementation of the Clean Water Legacy Act (CWLA), M.S. Ch. 114D. The CWLA requires the Council to submit a report to the Legislature and Governor that includes recommendations for Clean Water Fund (CWF) appropriations for the purposes stated in Article XI, Section 15 of the Minnesota Constitution and M.S. 114D.50. The CWLA also requires this report include an evaluation of progress related to the CWF and future funding needs.

The 28-member Council represents organizations with a major role in achieving clean water, enabling consensus building and coordination on a wide array of issues critical to the people of Minnesota. The Council, and its Policy Committee and Budget and Outcomes Committee, hold public meetings monthly to discuss a variety of water topics and conduct Council business.

Proposal

The Governor proposes continuation of funding for Clean Water Council operations in FY 2020-2021. Appropriations from the Clean Water Fund may only be authorized as one-time funding.

Equity and Inclusion

The Council holds public meetings monthly to achieve clean water goals in Minnesota through enabling consensus building and coordination on a wide array of water-related issues critical to the people of Minnesota.

Results

In accordance with M.S. 114D.30, the Clean Water Council is required to submit a biennial report to the Legislature by December 1 of each even-numbered year on:

- the activities for which money has been or will be spent for the current biennium;
- the activities for which money is recommended to be spent in the next biennium;
- the impact on economic development of the implementation of efforts to protect and restore groundwater and the impaired waters program;

- an evaluation of the progress made in implementing the CWLA and the provisions of Article XI, Section 15, of the Minnesota Constitution relating to clean water;
- the need for funding of future implementation; and
- recommendations for the sources of funding.

The report also fulfills the CWLA requirement for the Council to recommend to the Governor and the Legislature the manner in which money from the Clean Water Fund should be appropriated for the purposes stated in Article XI, Section 15, of the Minnesota Constitution and M.S. 114D.50.

Minnesota Pollution Control Agency

FY 2020-21 Biennial Budget Change Item

Change Item Title: CWF Public Information Campaign

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Clean Water Fund				
Expenditures	500	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	500	0	0	0
FTEs	0	0	0	0

Recommendation

The Governor recommends appropriation of \$500,000 in FY 2020 from the Clean Water Fund to the Minnesota Pollution Control Agency's (MPCA) Operations Division for Clean Water Council (CWC) development of a public information campaign to engage and educate citizens regarding clean water fund investments to improve water quality and quantity in Minnesota.

This is a new effort for the Clean Water Council, and will represent 1 percent of the MPCA's Clean Water Fund FY 2020-21 budget if funded.

Rationale/Background

The Clean Water, Land and Legacy Amendment (Legacy Amendment) to the Minnesota Constitution provided funds for Clean Water Fund, Outdoor Heritage Fund, Parks & Trails Fund and Arts & Cultural Heritage Fund. The Council was established in 2006 to advise the Legislature and Governor on the administration and implementation of the Clean Water Legacy Act (CWLA), M.S. Ch. 114D. Additionally, the Clean Water Council is charged by statute to develop strategies for informing, educating and encouraging the participation of citizens, stakeholders, and others regarding the identification of impaired waters, development of TMDL 's, development of TMDL implementation plans, implementation of restoration for impaired waters, identification of degraded groundwater, and protection and restoration of groundwater resources.

The outcomes of Clean Water Fund, while impressive, are difficult to describe. This is mainly because improvements usually are not readily visible as a protected habitat or a new or improved parkland or trails. In 2020, the Clean Water Fund would have been in effect for ten years. The Clean Water Council believes that it is an opportune time to share with the Citizens of Minnesota progress made towards improving water quality and quantity, and what they can do to ensure that the investment of our funds continue to provide positive dividends over time.

Proposal

The Governor proposes a public outreach and education campaign designed to complement and enhance the activities of the State Agencies with respect to public engagement, which will:

- meet CWC's statutory requirements
- gauge the Public's knowledge of Clean Water Council, Clean Water Fund and local projects funded by CWF
- engage the Public and encourage their participation in local water planning, and
- provide necessary education and outreach to inform Minnesotan's water choices

The Clean Water Council, through Minnesota Pollution Control Agency, will hire a State approved contractor to provide this multi-year, statewide public information campaign. The CWC Coordinator will administer the contract as part of their routine job duties.

Equity and Inclusion

The Council holds public meetings monthly to achieve clean water goals in Minnesota through enabling consensus building and coordination on a wide array of water-related issues critical to the people of Minnesota.

Results

The Clean Water Council will demonstrate the following through this initiative:

- The level of public knowledge of Clean Water Council, Clean Water Fund and local projects funded by CWF
- Number of persons engaged and participating in local water planning
- Catalog the types of education and outreach training required to inform Minnesotan's water choices
- Number of persons participating in training on water choices

Statutory Change(s)

Not applicable.

Minnesota Pollution Control Agency

FY 2020-21 Biennial Budget Change Item

Change Item Title: CWF Voyageurs National Park Sanitary Sewer Projects

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
Clean Water Fund				
Expenditures	1,550	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,550	0	0	0
FTEs	0	0	0	0

Recommendation

The Governor recommends appropriation of \$1,550,000 in FY 2020 from the Clean Water Fund to the Minnesota Pollution Control Agency's (MPCA) Operations Division for restoration of water quality in Voyageurs National Park through sanitary sewer projects.

In FY 2020-21, this appropriation will represent 3 percent of the MPCA's Clean Water Fund biennial budget if funded.

Rationale/Background

Protection of water quality in the State's only National Park is dependent in part upon the functionality of wastewater and SSTS systems in surrounding communities. The Voyageurs National Park Clean Water Joint Powers Board (Board) was set up to create and implement a Comprehensive Plan for the area of the National Park and to help the project partners develop a comprehensive wastewater collection and treatment system (including centralized and decentralized treatment) for housing, recreational (including state and national park areas), and resort developments in the Park's Namakan Basin area.

To address this need, related projects began in FY 2014, supported by the Board's Comprehensive Plan to ensure the National Park area was in compliance with state standards. The comprehensive study found that there is a 64 percent non-complying/failing septic system rate in the planning area, which includes thousands of septic systems in the planning area.

Proposal

The Governor proposes continuation of funding for activities overseen and coordinated by the Voyageurs National Park Clean Water Joint Powers Board. The initiative of \$1,550,000 is for purposes of planning, design, permitting, and construction of the Ash River, Crane Lake, and Kabetogama projects.

Grants will be awarded to local government units for projects approved by the Voyageurs National Park Clean Water Joint Powers Board and must be matched by at least 25 percent from sources other than the Clean Water Fund.

Equity and Inclusion

The Voyageurs National Park Clean Water Joint Powers Board will ensure that community meetings and processes for selecting projects under this initiative is open and fair, and that selected projects address the Comprehensive Plan for the National Park area objectives.

Results

Initiative results will include:

- Names and types of projects within grant-funded communities
- Number of septic systems certified as passing County inspections
- Anticipated changes in water quality through installation of systems supported by grants

Minnesota Pollution Control Agency

FY 20-21 Biennial Budget Change Item

Change Item Title: Legal Costs

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures (DNR)	2,137	2,290	0	0
Transfer Out (DNR)	720	918	0	0
Transfer In (MPCA)	720	918	0	0
Expenditures (MPCA)	720	918	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,857	3,208	0	0
FTEs	1.0	1.0	0	0

Recommendation:

The Governor recommends that the Department of Natural Resources (DNR) and the Minnesota Pollution Control Agency (MPCA) be appropriated \$5.565 million in FY20-21 from the General Fund (\$2.357 million in FY20 and \$3.208 million in FY21) for the legal support costs they will incur to defend the agencies' decisions in contested proceedings. Supplemental funding gives the agencies the ability to defend their environmental and natural resources decisions whether in federal or state court, contested case hearings, mediation and other venues without imposing undue hardship on existing division budgets. This proposal also extends the availability of \$500,000 in funds provided for this purpose in the 2016 session.

Rationale/Background:

DNR's mission is to work with citizens to conserve and manage the state's natural resources, to provide outdoor recreation opportunities, and to provide for commercial uses of natural resources in a way that creates a sustainable quality of life. This mission brings together diverse constituencies who may disagree with DNR's decisions. The MPCA's mission is to protect and improve the environment and enhance human health. DNR and MPCA's natural resources and environmental regulatory, permit, leasing, or other types of decisions can be, and often are, challenged through either contested case or judicial proceedings. The cost of defending these decisions can be significant.

DNR and the MPCA will have difficulty adequately defending the legal challenges to the state's decisions without sufficient resources. Costs associated with the NorthMet project include outside legal counsel, staff and in-house counsel, records management, and related expenses. DNR is involved in several other large pieces of litigation, and anticipates being challenged on a number of complex water and mining decisions over the biennium. Costs associated with defending these agency decisions include in-house counsel costs, Attorney General's Office fees, Office of Administrative Hearings costs, and other defense preparation. In these cases, the DNR anticipates its decisions will be challenged regardless of the decision.

DNR and the MPCA are increasingly dependent on dedicated funding sources from the state – the agencies' share of General Fund as a part of the budget continues to diminish. DNR and MPCA do not have the ability to seek reimbursement of attorney's fees or other litigation costs from project proponents, plaintiffs or defendants except in very rare cases. Not defending the agency decision is not an option. This means that the DNR and MPCA

must seek additional resources from the Legislature or reduce/eliminate program funding in order to cover these costs.

Providing special appropriations for these large and unexpected legal costs has precedent. An example is an appropriation that the Legislature provided to defend the 1837 Treaty Rights lawsuit that was eventually heard by the U.S. Supreme Court in the 1990s. More recently, the Legislature appropriated \$750,000 to the DNR in ML 2015, 1st Special Session (\$300,000 in FY16 and \$450,000 in FY17) for legal costs related to water management that is available until June 30, 2018.

Laws of Minnesota 2016 appropriated \$4.4 million to the DNR that was split between both agencies (DNR - \$3.233 million and MPCA - \$1.167 million) related to NorthMet mining legal costs with funds available until June 30, 2019. DNR and MPCA are seeking a two-year extension to this appropriation, through June 30, 2021. Laws of Minnesota 2017 appropriated \$1.965 million to DNR and MPCA for legal costs (DNR - \$1.483 million and MPCA - \$0.482 million). The 2016 appropriation extension and 2017 appropriation amount are both factored into this FY20-21 request.

Proposal:

This request is for \$5.565 million (\$2.357 million in FY20 and \$3.208 million in FY21) for anticipated legal support costs in the next biennium above and beyond the current appropriations. This recommendation is based on the agencies' recent cost experience. Of this amount, \$720,000 in FY20 and \$918,000 in FY21 would transfer from DNR to MPCA for their legal support needs.

The majority of the funding would go toward the attorney general's office, contracted legal support, and other litigation related costs over the next two years. It also funds one position at DNR in FY20-21 to provide in-house legal counsel and related legal services to support the agency on the anticipated legal proceedings.

In addition to the requested amount, DNR and MPCA seek a two-year extension (through FY21) of a 2016 appropriation for legal costs related to the NorthMet mining project. This appropriation is in Laws of Minnesota 2016, Chapter 189, Article 3, Section 3, Subdivision 8 and currently expires at the end of FY19. This proposal anticipates up to \$500,000 to carryforward from FY19 to FY20.

Equity and Inclusion:

This proposal is not submitted in order to reduce or eliminate social disparities or inequities.

FTEs (DPS)	1.5	1.5	1.5	1.5
FTEs (MPCA)	2	2	2	2

Recommendation:

The Governor recommends reinstating the railroad and pipeline safety assessment in the amount of \$2,500,000 per year to continue to ensure local preparedness and state support of hazardous materials incidents in communities along Minnesota's railroads and pipelines.

Rationale/Background:

Minnesota maintains a state-sponsored capability to support local first responders during hazardous material (hazmat) incidents along railways and pipelines, as well as highways and fixed facilities. Most local fire departments throughout Minnesota do not have the equipment, training, or expertise to handle a hazmat event without assistance. The primary methods for providing that support are state-contracted hazmat response teams and on-call staff to provide advice and support for preparedness and response activities.

Currently, Minnesota has 11 hazmat response teams composed of chemical assessment teams (CAT) and emergency response teams (ERT), depending on the size of the team. Minnesota's hazmat response teams are used regularly, deploying about once a week over the past several years. The teams responded to 62 calls in 2018.

These teams are hosted by local fire departments under contract with the Department of Public Safety (DPS) to respond to hazmat incidents outside their jurisdiction. A key part of this arrangement is that the state provides specialized equipment, training and funding to enhance and maintain the capabilities of each team. One of the primary sources of funding for that capability, the railroad/pipeline safety assessment authority, expired on July 1, 2017 and those accumulated funds will be depleted by the end of FY19.

DPS purchased much of the required equipment with federal homeland security grants after September 11, 2001. Many items have reached the end of their service life and federal monies are no longer available for equipment replacement. In addition, training and conducting exercises are critical components of hazmat incident readiness. Those activities are necessary to maintain team proficiency, ensure local departments and state teams can work together at a scene, and to stay abreast of changing threats. The 2017 Minnesota's Preparedness for Ethanol and Oil Transportation Incidents Report, conducted by the Management Analysis and Development Division of Minnesota Management and Budget, documented the funding needs for exercises and drills, local planning efforts, community-focused communications and warnings, local department training, response equipment replacement/modernization, and maintaining technical advisory support to incident commanders.

Proposal:

The Governor recommends reinstating the annual \$2,500,000 assessment of railroad and pipeline companies. The program to spend the funds each year is:

- \$250,000 for current DPS-HSEM hazardous materials response staff
- \$250,000 transfer to the MPCA for environmental protection activities relating to railroad discharge preparedness under chapter 115E, (2 FTEs)
- \$100,000 for DPS-HSEM railroad and pipeline incident training/exercise staff (1 FTE)
- \$50,000 for GIS mapping support of community risk areas and facilities (.5 FTE)
- \$250,000 to local jurisdictions for exercise/training support and/or facilitation
- \$200,000 to local jurisdictions for planning support
- \$550,000 for operational support of state contracted hazardous materials response teams
- \$100,000 for emergency response team
- \$750,000 to replace equipment and support state regional hazardous materials program

Equity and Inclusion:

The state hazardous materials incident response support is provided equally to all communities and groups, including tribal nations.

Minnesota Statutes 299A.55 Subd. 2b

Minnesota Statutes 299A.55 Subd. 4

Program: Environmental Analysis and Outcomes Division<https://www.pca.state.mn.us/>**AT A GLANCE**

- Develop water quality standards and evaluate 80 major watersheds for whether water quality meets those standards
- Monitor and track air quality, surface water quality, and ambient groundwater conditions
- Provide resources to local water management organizations for lake and streams monitoring
- Provide air quality forecasts for the state and five tribes, to inform public of unhealthy air quality days
- Estimate and track pollutant emissions to air and discharges to water

PURPOSE & CONTEXT

The Minnesota Pollution Control Agency's (MPCA) Environmental Analysis and Outcomes (EAO) Division monitors and evaluates the physical, chemical, and biological conditions of Minnesota's environment; identifies environmental threats and impacts to human and ecosystem health; establishes environmental goals and measure progress in achieving them; supports regulatory programs (such as permitting); and makes environmental data broadly accessible. EAO's efforts support human health, aquatic life, and a strong economy.

EAO provides leadership to implement the federal Clean Air Act, monitor and evaluate air quality conditions, support air quality permitting and environmental review, and assist sister agencies with energy and transportation projects.

EAO helps to implement the Clean Water Act and portions of Minnesota's Clean Water Legacy Act by monitoring surface water and groundwater resources; evaluating water quality data; communicating lake, stream, wetland, and groundwater conditions; and, developing water quality standards that protect the health of water resources. Water data and assessment results support the development of permit limits to protect water quality and inform local planning, restoration, and protection activities.

SERVICES PROVIDED**Air Assessment**

- Monitors the air and collect information about pollution releases from large and small sources
- Monitors for the air quality index and compliance with air quality standards and health benchmarks using 162 monitors located at 53 sites statewide
- Provides technical assistance and quality assurance for 30 monitors at seven industrial locations, and six monitors at five locations operated by tribal governments
- Collects and analyzes annual emission inventories for more than 2200 companies
- Develops greenhouse gas emission estimates for comparison to Next Generation Energy Act goals
- Analyzes for public health risks from air pollution, with a focus on the most vulnerable Minnesotans

Water Assessment

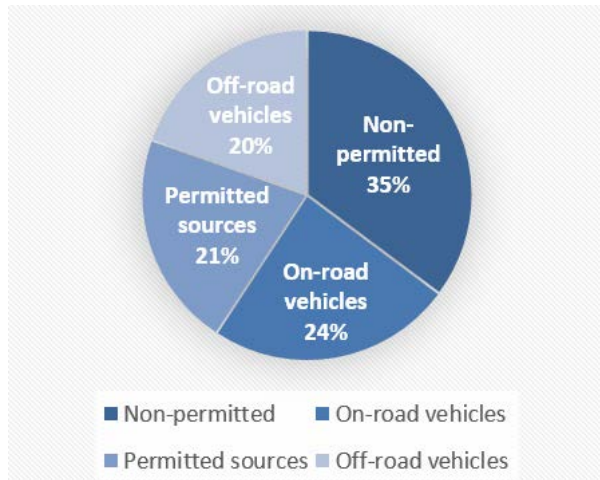

- Develops water quality standards and uses other tools to protect human health and aquatic life
- Monitors lakes, streams and rivers, and groundwater to identify water quality trends
- Gathers and reviews data to understand water condition and identify causes of stress on a water body
- Tracks the effectiveness of protection and restoration activities
- Provides information and assistance to regulated facilities, communities, local governments, and citizens
- Conducts monitoring and studies of contaminants in Minnesota's water and fish—including well-known accumulative contaminants like mercury and newer issues like pharmaceuticals and consumer products

RESULTS PERFORMANCE MEASURE

AIR EMISSIONS FROM DIFFERENT TYPES OF SOURCES

Air emissions are the quantity of air pollutants that are released from an air pollution source.

- On-road vehicles (cars, trucks) 24 percent
- Non-permitted sources (small businesses, heating, wood smoke) 35 percent
- Off-road vehicles (construction and agriculture) 20 percent
- Permitted sources (power plants, factories) 21 percent

Aggregate emissions: Nitrogen oxides (NOx), sulfur dioxide (SO₂), Volatile organic compounds (VOC), Particulate matter (PM_{2.5})

SURFACE WATER PROTECTION AND RESTORATION

During the last 10 years, MPCA has increased water monitoring efforts. To date, 86 percent of Minnesota's major watersheds have been assessed. The information is used to determine if watersheds are meeting water quality standards to protect public health, recreational use, and aquatic life.

In general, 60 percent of state lakes and streams meet statewide standards. By 2019, MPCA expects to meet the statutory requirement to monitor all watersheds within 10 years. In 2019, the monitoring cycle begins again to determine improvements in water quality.

GREENHOUSE EMISSIONS IN MINNESOTA

The EAO Division estimates the greenhouse gas emissions from all sources in Minnesota to track progress against the Next Generation Energy Act reduction targets. The analysis allows the EAO Division to work effectively with sister agencies and external stakeholders to identify effective and cost efficient emission reduction strategies.

PERCENT OF LAKES GETTING CLEARER

Clarity is improving or holding steady in over 80 percent of lakes. Hundreds of volunteers help the MPCA measure water clarity to detect signs of degradation to a lake.

Clarity changes in Minnesota lakes through 2016

Minnesota Statutes, Chapters, 115 (<https://www.revisor.mn.gov/statutes/?id=115>), 115A (<https://www.revisor.mn.gov/statutes/?id=115A>), and 116 (<https://www.revisor.mn.gov/statutes/?id=116>) provide the agency with its main authorities to provide regulatory, monitoring, and assistance services.

Program: Industrial<https://www.pca.state.mn.us/>**AT A GLANCE**

Provide regulatory services (permitting, technical assistance, training, compliance determination, enforcement, licensing and certification) for:

- 2,000 industrial wastewater and stormwater sources
- 2,000 air emission sources
- 4,500 underground fuel storage tank facilities
- 21,960 hazardous waste generators

PURPOSE & CONTEXT

The primary goal of the Industrial Division at the Minnesota Pollution Control Agency (MPCA) is to ensure industrial emissions, discharges, and wastes are managed to minimize impacts to human health and the environment. This goal is accomplished through implementation of core regulatory programs that ensure Minnesota's outdoor air is healthy for all to breathe, and waters are swimmable, fishable and safe to drink. The Industrial Division enforces state and federal environmental regulations so that Minnesota reduces its contribution to regional, national, and global pollution. Compliance assistance is provided to pollution sources and citizen complaints are followed up and responded to. Our efforts support human health and contribute to strong economies in Minnesota communities.

The Division's work to regulate air pollution from facilities that need an air quality permit has resulted in a significant reduction in emissions from these sources. Its activities to regulate and reduce pollution ensure that the state's lakes, rivers, streams, and groundwater are clean, healthy and sustainable.

MPCA is authorized by the Environmental Protection Agency to administer the wastewater regulatory program under the federal Clean Water Act. Over 800 industrial wastewater dischargers are managed in the program in addition to approximately 1,500 businesses that are addressed by the industrial stormwater program. These programs use best management practices, technology, and site-based standards to protect water resources.

The Division works with a large and diverse group of private businesses, industry consultants, local, state and federal partners, environmental groups, and citizens.

SERVICES PROVIDED

The services the Division provides fall into three categories:

Permitting

- Issue air and water permits to operate or expand existing facilities and to build new industrial facilities
- Better connect the public, industry, and local governments by providing input opportunities on permits through public notices and local meetings
- Reduce the regulatory burden on industry by providing assistance, flexibility, and permitting options

Compliance determination, assistance and enforcement

- Conduct inspections and determine compliance with air quality, water quality, hazardous waste, stormwater, and underground fuel storage tank rules, regulations, and permits
- Provide technical assistance and training to regulated facilities

- Take enforcement action when warranted

Licensing and certification

- Issue licenses for hazardous waste treatment, storage, and disposal facilities
- License hazardous waste haulers and monitor the movement of hazardous waste
- Certify over 15,000 underground fuel tanks

RESULTS

Minnesota Statutes, Chapters, 115 (<https://www.revisor.mn.gov/statutes/?id=115>), 115A (<https://www.revisor.mn.gov/statutes/?id=115A>), and 116 (<https://www.revisor.mn.gov/statutes/?id=116>) provide the agency with its main authorities to provide regulatory, monitoring, and assistance services.

Program: Municipal Division<https://www.pca.state.mn.us/>**AT A GLANCE**

- 132 wastewater permits issued in FY18
- 2,014 construction stormwater permits issued during FY18
- 252 municipalities operated under municipal stormwater permit coverage in FY18
- 143 sub-surface sewage treatment systems compliance and enforcement actions taken in FY18
- 185 construction stormwater compliance and enforcement actions taken in FY18
- 25 municipal stormwater compliance and enforcement actions taken in FY18
- 151 municipal wastewater compliance and enforcement actions taken in 2017 and 2018
- 23 grants and contracts totaling \$6.9 million awarded to local partners in FY17-18

PURPOSE & CONTEXT

The Minnesota Pollution Control Agency's Municipal Division works to ensure that Minnesota has clean water to support aquatic life, clean drinking water, healthy communities, and a strong economy. Components of the program include:

- Reducing and preventing water pollution from wastewater, stormwater, and sub-surface sewage treatment systems (SSTS).
- Working cooperatively with stakeholders to implement activities that protect Minnesota waters.
- Providing financial assistance to local government and other partners to achieve and accelerate water quality improvements.

SERVICES PROVIDED

The Municipal Division conducts activities to ensure that the state's lakes, rivers, streams, and groundwater are clean, healthy, and sustainable.

- Issue construction and operation permits to Minnesota businesses and municipalities
- Implement the biosolids land application program
- Assist in flood and spill response
- Inspect, assist, and enforce wastewater, stormwater, and SSTS
- Educate, license, and certify wastewater and SSTS professionals
- Address imminent health threats from septic systems, particularly for low-income households
- Provide grants and contracts for water quality improvement projects
- Conduct technical reviews for the Public Facilities Authority funding program

RESULTS**Municipal Wastewater**

Since 2000, pollutant load discharges from municipal wastewater plants have decreased. This decrease is due to MPCA developing permit limits that achieve water quality goals.

Summary for CBOD, dissolved oxygen, phosphorus, and TSS

Municipal Stormwater

Since 2015, cities have used best management practices (BMP) to help to achieve reductions in pollutants.

Sub-surface Sewage Treatment System (SSTS)

Compliance rates have gone up over the last 10 years and have remained steady for the past four years.

Minnesota Statutes, Chapters, [115](https://www.revisor.mn.gov/statutes/?id=115) (<https://www.revisor.mn.gov/statutes/?id=115>), [115A](https://www.revisor.mn.gov/statutes/?id=115A) (<https://www.revisor.mn.gov/statutes/?id=115A>), and [116](https://www.revisor.mn.gov/statutes/?id=116) (<https://www.revisor.mn.gov/statutes/?id=116>) provide the agency with its main authorities to provide regulatory, monitoring and assistance services.

Program: Operations Division<https://www.pca.state.mn.us/>**AT A GLANCE**

- Provide access to environmental data through “What’s in My Neighborhood” web application
- 1.1 million visits to Minnesota Pollution Control Agency (MPCA) website with 3.4 million page views in 2017
- 6,309 information or data practices requests processed in FY18
- 20 online e-services currently and projected to have 70 by end of FY19
- Nearly 11,000 online users have submitted over 69,000 permit applications
- Achieved performance excellence through the Baldrige Performance Excellence framework
- 2017 Governor’s Better Government Award for the “Minnesota’s Watershed Approach to Clean Water” project
- MPCA offices in Brainerd, Detroit Lakes, Duluth, Mankato, Marshall, Rochester, and Saint Paul

PURPOSE & CONTEXT

The Operations Division manages the agency’s business services that align with the MPCA’s mission and values. The Operations Division:

- Supports performance excellence by seeking new ways to provide data, information, and transactional assistance.
- Manages of fiscal services, internal controls and risk assessment, human resources, communications, organizational improvement, facilities, fleet, safety, data systems and online services, data analysis, document and records management, continuity planning, and legal services.
- Follows cost effective, diverse, inclusive, and sustainable business practices by leasing electric or hybrid vehicles, purchasing recycled and environmentally preferred products, supporting agency-wide recycling efforts, and using web conferencing technology to reduce travel.
- Is inclusive and diverse in its staffing needs, vendor solicitation, and methods.

SERVICES PROVIDED

- Provides leadership and guidance on financial matters and performs accounting, budgeting, contracting, internal controls, and procurement business functions
- Manages agency data and records (paper and electronic), and ensures effective, secure, and efficient data and document management systems and tools
- Ensures public access to environmental information and decision-making processes through its website, social media channels, public meetings, outreach, rule hearings, video conferencing, and training events
- Provides location-specific environmental information and data is available via the “What’s in My Neighborhood” feature at <https://www.pca.state.mn.us/data/whats-my-neighborhood>
- Manages human resources through workforce planning, job design and analysis, recruitment and selection, employee relations, compliance with employment law and collective bargaining agreements, employee benefits, training and development
- Supports performance excellence with the use of the Malcolm Baldrige National Performance Excellence System framework and by providing learning and development, continuous improvement, and organization development activities

- Manages agency-wide services including safety, continuity of operations planning, lease administration, space planning, copy and print services, facilities management, security access system, non-litigation legal support, and fleet management
- Improves management of user-friendly electronic web-based services to create process efficiencies, data accessibility, and usability across agency programs, better response times, reduced paper transactions, improved data quality, and easier public and regulated party access

RESULTS

Data practices and information requests allow for timely redevelopment or construction. From July 2016 to June 2018, the Operations Division processed 12,536 requests.

E-services: MPCA's number of online services have doubled since FY14-15 and are expected to grow by the end of FY19. MPCA's e-Services feature allows users to apply for permits, submit regulatory data and information for compliance requirements, and pay fees and invoices.

	FY14/15	FY16/17	FY18/19
Number of online services	10	20	70

Communication: On average, the MPCA website receives about 95,000 visits each month; about two-thirds are visitors who have not been to the site in the previous 30 days.

The MPCA has eight main newsletters: Watershed Connections, SSTS Bulletin, Waterfront Bulletin, Air Mail, Feedlot Update, Industrial Stormwater News, OnPoint Bulletin, and LivingGreen 365.

The number of MPCA's Twitter and Facebook followers is increasing, with marked peaks during times of public concern such as air quality alerts or emergency response management issues. In July 2018, MPCA had 6909 Twitter followers and 3995 Facebook followers.

M.S. Chapters 114D (<https://www.revisor.mn.gov/statutes/?id=114D>), 115 (<https://www.revisor.mn.gov/statutes/?id=115>), 115A (<https://www.revisor.mn.gov/statutes/?id=115A>) and 116 (<https://www.revisor.mn.gov/statutes/?id=116>).

Program: Remediation Division<https://www.pca.state.mn.us/>**AT A GLANCE**

- Assesses 2,800 potentially contaminated sites for risk to public health and the environment annually
- Cleaned up and returned to productive use approximately 86,154 acres of contaminated land since 2003
- Responds to an average of 3,000 environmental emergencies every year
- Maintains safe operations at 110 closed landfills and 240 superfund sites

PURPOSE & CONTEXT

The Remediation Division protects the environment and public health by managing risks at contaminated sites through site assessment, site cleanup, ongoing operation and maintenance of protection systems, responding to environmental emergencies and restoring contaminated land to productive use.

The Division works with a large and diverse group of public and private entities, including developers, counties and cities, industry consultants, state and federal partners, and citizens.

SERVICES PROVIDED

The Remediation Division works with public and private partners to protect Minnesota's environment, public health, and quality of life through the proper management of contaminated sites, which includes underground and above ground petroleum storage tanks, superfund sites and closed landfills. Cleaning up contaminated land and groundwater, while costly and time consuming, is the core activity of this division.

The services the Division provides fall into three categories: assessment of risk, cleanup of contaminated land and/or groundwater and long-term maintenance of implemented remedies and/or installed protection systems.

Assessment of risk

- Identify and investigate environmental releases of hazardous substances to determine extent, magnitude and risk to public health and the environment
- Provide technical support to hazardous waste enforcement, permitting and corrective action efforts
- Work with railroads, industry, and local fire and police to develop plans to prevent and respond to spills
- Assist other agencies with assessment of natural resource damages

Cleanup

- Oversee land cleanup at contaminated sites and recover costs from responsible parties
- Conduct cleanups, design and install protection systems at state funded Superfund sites
- Help developers return contaminated sites to productive use
- In the event of a spill, assist local responders and oversee cleanup

Long-term maintenance

- Monitor and manage operation and maintenance activities at 110 closed landfills and 240 federally designated Superfund toxic waste sites
- Work with local units of government on land use restrictions near Superfund sites

RESULTS

How much polluted land is being returned to productive use?

Putting abandoned, idled, or underused industrial and commercial properties back into productive use can be complicated by actual or suspected environmental contamination. The MPCA helps make this land available for redevelopment by investigating and cleaning up these sites.

Land cleaned up through **Petroleum Brownfields and Voluntary Investigation & Cleanup** programs

Superfund sites and closed landfills

Minnesota Statutes, Chapters, 114D (<https://www.revisor.mn.gov/statutes/?id=114D>), 115 (<https://www.revisor.mn.gov/statutes/?id=115>), 115A (<https://www.revisor.mn.gov/statutes/?id=115A>), and 116 (<https://www.revisor.mn.gov/statutes/?id=116>) provide the agency with its main authorities to provide regulatory, monitoring, and assistance services

Program: Resource Management and Assistance Division

<https://www.pca.state.mn.us/>

AT A GLANCE

- Provides over \$2 million in grants and loans each biennium to promote environmentally innovative projects that reduce, reuse, and recycle waste and prevent pollution
- Enables Minnesota companies to save money, prevent pollution, prevent waste, recover resources, and conserve water through its small business assistance program, funding the Minnesota Technical Assistance Program (MnTAP), and providing other business technical assistance
- Every \$1 granted to MnTAP results in \$3 of annual savings to businesses
- More than 250,000 people annually visit MPCA's EcoExperience exhibit at the Minnesota State Fair

PURPOSE & CONTEXT

The Division provides support for agency land, water and air regulatory and assistance programs. The land program protects the environment and public health by permitting solid and hazardous waste facilities and large tank sites. The water activities include work with a diverse group of public and private entities and citizens to reduce the impacts from wastewater and stormwater, and the impacts products or production activities have on water. Because nearly 75 percent of air pollution is released from sources not traditionally regulated by the MPCA, such as cars, trucks, construction equipment, and some commercial operations. The MPCA works with many partners to reduce pollution to improve air quality.

SERVICES PROVIDED

In order to accomplish its purpose, the Resource Management and Assistance Division:

- Conducts environmental review to reduce potentially negative impacts from proposed projects.
- Writes administrative and technical rules with engagement from stakeholders.
- Works collaboratively with communities in Environmental Justice areas to reduce environmental impacts.
- Trains and certifies businesses and individuals engaged in wastewater, solid waste, and septic systems.
- Works with local government to develop effective solid waste management plans and provides financial assistance to counties for waste management efforts.
- Conducts solid and hazardous waste and large tanks permitting, inspections, and enforcement.
- Oversees disposal of debris from natural disasters and other incidents.
- Provides communities and businesses with technical and financial assistance with regulatory compliance, pollution and waste prevention, air quality improvements, and sustainability efforts.
- Provides grants and loans to reduce diesel emissions from trucks and boats and other engines.
- Partners with other organizations to host the EcoExperience at the Minnesota State Fair.
- Provides assistance to communities through GreenStep Cities and Minnesota GreenCorps programs.
- Works with businesses to develop alternative products that are free of toxic chemicals, particularly children's products.
- Collaborates with other state agencies to increase procurement of environmentally preferable products and services.

RESULTS

MPCA annually collects data on waste management that includes organics management, recycling, waste-to-energy, and landfilling. What appears to be a substantial drop in recycling from 2014 to 2015 is actually a change in the reporting for recycling; estimates for commercial recycling were eliminated and only measured or documented values were accepted. Estimates resulted in inflated recycling rates prior to 2014.

Minnesota GreenStep Cities is a voluntary challenge, assistance, and recognition program to help cities achieve their sustainability and quality-of-life goals. To date, 123 Minnesota cities (encompassing 45 percent of the state's population) are implementing best practice actions at a good, better, or best level.

Program: Watershed Division<https://www.pca.state.mn.us/>**AT A GLANCE**

- Develops watershed restoration and protection strategies for 80 Minnesota major watersheds with local water resource managers to ensure most efficient implementation action
- In partnership with counties, registers or permits, assists, and inspects the state's 18,500 feedlot operations
- The Clean Water Partnership Loan Program provided \$7.9 million in loans to 13 counties and watershed districts for local improvement projects in FY17/FY18
- Clean Water Act Section 319 federal funding provides \$2.5 million per year to local partners to implement waterbody restoration and protection actions

PURPOSE & CONTEXT

The Watershed Division at the Minnesota Pollution Control Agency (MPCA) works with local partners to ensure that Minnesota has clean water to support aquatic life, healthy communities, and a strong economy.

- Watershed Restoration and Protection Strategy (WRAPS) reports use watershed science to identify water pollution problems and sources, and strategies. WRAPS help local water planning and state permitting activity and ensure the most efficient use of funding to reduce and prevent water pollution.
- Minnesota's vibrant animal agriculture industry provides significant economic benefits to the state, and properly managed manure contributes to soil health. The Division permits 1,300 larger operations to ensure their feedlots and manure application do not harm the state's waters. The 50 delegated county feedlot programs register and work with 17,000 smaller livestock operations to meet the same goals.
- The Clean Water Partnership Loan Program provides about \$4 million per year for projects focused on restoring and protecting waters, with most funding used for addressing septic systems. Federal Clean Water Act Section 319 grants provide \$2.5 million per year for this purpose.

SERVICES PROVIDED

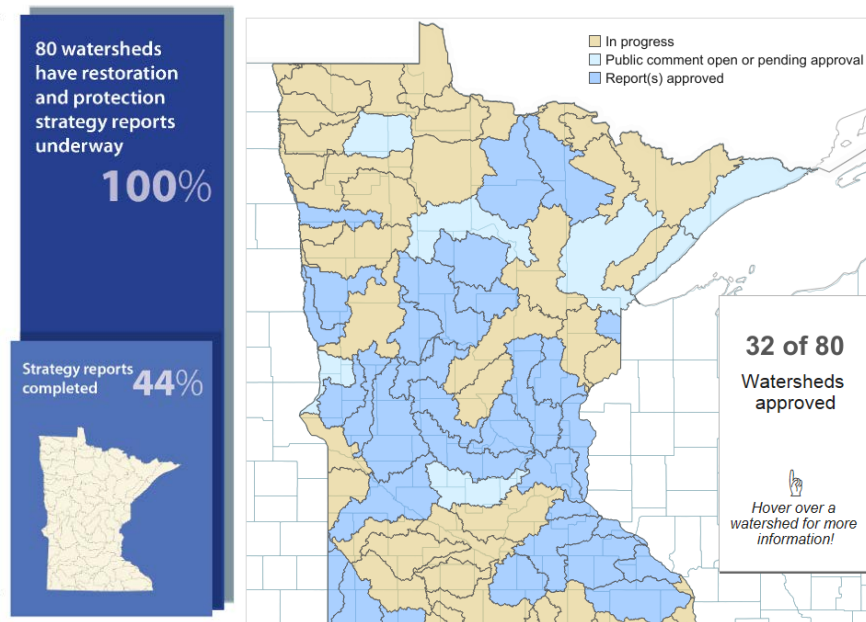

The Watershed Division conducts activities to ensure that the state's lakes, rivers, streams, and groundwater are clean, healthy, and sustainable. These activities include:

- Investigating the causes and sources of water pollution problems, including stream sampling and providing training on monitoring for local partners.
- Developing and using comprehensive watershed computer models to fill in data gaps and to run scenarios of options for addressing pollution issues. Providing a user-friendly interface to allow local partners to run modeling scenarios.
- Working with local partners, and providing them funding, to develop Watershed Restoration and Protection Strategies reports for all 80 major watersheds. These reports are a blueprint for local water resource managers to use in their local water plans, half of which are complete across the state
- Tracking progress of watershed activities in achieving water quality goals.
- Coordinating the use of and updating the statewide Nutrient Reduction Strategy to address the effects of excess nutrients in our waters and as far away as the "dead zone" in the Gulf of Mexico.
- Facilitating and overseeing grant, contract, and loan awards of state and federal funds to local partners for water quality projects, including clean water fund WRAPS development, Clean Water Partnership Loans, and federal Clean Water Act Section 319 implementation projects.

- Issuing feedlot permits, overseeing delegated county programs, providing compliance assistance, conducting inspections, and when necessary taking enforcement action. The program has moved to a more risk-based inspection approach in coordination with the U.S. Environmental Protection Agency over the last few years.

RESULTS

WATER RESTORATION AND PROTECTION STRATEGY REPORTS COMPLETED OR PUBLICLY NOTICED

MPCA AND COUNTY FEEDLOT PROGRAMS' ACTIVITIES

Approximately 18,500 feedlots are required to be registered statewide.

Program: Environmental Quality Boardeqb.state.mn.us/**AT A GLANCE**

- Board made up of citizens appointed by the Governor from each of Minnesota's eight Congressional Districts and the heads of nine state agencies
- Oversight of the Environmental Review Program as outlined in the Minnesota Environmental Policy Act (1973)
- Convenes monthly public meetings on the third Wednesday of every month to provide a forum for citizens and state leaders to collaborate on environmental policy
- Leads interagency coordination on emerging environmental issues
- Convenes Environmental Congresses, advisory panels, and other public events to provide avenues for meaningful citizen engagement
- Provides support to Local Governments on environmental review and the implementation of other environmental policies and programs
- Staff and monthly Board meetings located in the Minnesota Pollution Control Agency Building

PURPOSE & CONTEXT

Problems related to the environment often encompass the responsibilities of several state agencies. Developing innovative solutions that meet the diverse needs of Minnesota citizens requires the close interaction of these agencies as well as opportunities for public participation. The Environmental Quality Board facilitates strategic interaction of multiple state agencies, stewards environmental review processes that cross domains and jurisdictions, and provides forums for the public to engage in policy making processes.

The Environmental Quality Board is made up of eight citizens from each Congressional District in the state and the heads of nine state agencies organized under a broad mandate to strategically:

- Ensure adequate review and public understanding of proposed projects that would significantly influence Minnesota's environment and development.
- Provide a public forum for discussion of state environmental policies and programs.
- Develop and lead an integrated response to environmental issues that are complex and have broad cross-sector impacts.
- Support local partners with guidance and technical resources.
- Foster connections between the environment, economy, health, transportation, and agriculture.
- Enrich the understanding of the ecological systems and natural resources important to the state and nation.

SERVICES PROVIDED**Environmental Review**

- Customer Service: Provide technical assistance to project proposers, governmental units and citizens through guidance documents, online resources, technical presentations, and one-on-one assistance as requested.
- Measurement and accountability: Monitor statewide environmental review activities, measure the effectiveness of the program, report on results and trends, and identify areas for future improvement, assistance, and educational opportunities.

- Continuous Improvement: Improve effectiveness and create efficiencies for citizens, governmental units, and project proposers through administrative rule revisions, training, and updated program guidance and tools.

Interagency Coordination and Strategic Planning

- Educate and Advise: Provide written reports to the governor, legislature, and state and local agencies on priority environmental issues, including policy considerations and economic analyses.
- Coordinate: Lead and facilitate interagency working groups to establish an integrated response to environmental issues that are complex and have broad cross-sector impacts.
- Outreach: Convene advisory panels to ensure citizen and stakeholder input informs state policies.
- Intergovernmental Partnerships: Provide technical assistance to local governments and facilitate state-local partnerships to advance environmental goals.

Public Engagement

- Engage: Convene public meetings, stakeholder discussions, and congresses to provide a forum for public dialogue with agency leaders to build mutual understanding, foster cross-sector connections, and collaborate on solutions. Plan monthly board meetings to foster citizen participation in decision making processes.
- Inform: Produce public reports on key environmental issues of interest to Minnesota citizens. Distribute via board meeting packets relevant scientific, economic, and policy documents that help citizens be informed on policy making processes.

RESULTS

- Processed 13 citizen petitions, 157 Environmental Assessment Worksheets (EAWs), 19 Alternative Urban Areawide Reviews (AUARs), and five Environmental Impact Statements (EISs).
- Proposed administrative rule revisions to streamline Environmental Review.
- Developed an Enterprise Environmental Review and Technical Services Master Contract Program to improve document quality and achieve efficiency in contracting process.
- Led and facilitated vast interagency efforts on climate planning, pollinator health, water policy development, statewide environmental metric development, and silica sand regulation to better coordinate state efforts.
- As directed by Executive Order 16-07, facilitated the development and publication of a citizen advisory board's Pollinator Policy Recommendations and the interagency technical team's Framework for Pollinator Action.
- As directed by Executive Order 18-09, convened a Wild Rice Task Force to develop recommendations to protect the health of wild rice.
- In support of the Governor's 25 by 2025 initiative, hosted 10 Town Hall meetings across the state, generating over 3,500 suggestions for improving water quality from over 2,000 meeting attendees.
- Assisted 121 cities and through Tribal Nations through the GreenStep Cities program.

M.S. [116C](#) & [116D](#) provide the legal authority for Environmental Quality Board operations and initiatives.

Narrative

Federal funding enables the Minnesota Pollution Control Agency (MPCA) to carry out activities that are essential to our mission to protect and improve the environment and human health. The majority of federal funding received by the MPCA is directly from the U.S. Environmental Protection Agency (EPA). In the FY 2018-2019 biennium, the MPCA received \$41 million in the form of grants or cooperative agreements. Federal revenues accounted for approximately 7.3% of the MPCA's budget in the FY 2018-2019 biennium and are projected at 6.8% in the FY 2020-2021 biennium.

Most federal funds are noncompetitive and received for program activities where the MPCA is delegated by EPA to perform work at the state level. Individual awards are received under divisions including Environmental Analysis and Outcomes, Industrial, Remediation, Resource Management and Assistance, and Watershed. Additional federal funding resources that are in alignment with goals and objectives in the Strategic Plan will continue to be pursued.

The MPCA's largest federal award is the Performance Partnership Grant (PPG). The PPG functionally combines under one "umbrella" award continuing environmental program grants determined by federal formula and some competitive awards. The funds support activities in seven agency divisions, but the monies are still considered one grant by the EPA. By receiving the PPG as one award, the agency is able to reduce federal administrative and reporting burdens and gain flexibility in managing resources to meet goals and objectives across the entire agency.

dps.mn.gov/entity/pdb/Pages/default.aspx

AT A GLANCE

- The Minnesota Board of Private Detective and Protective Agents (MNPDB) currently regulates 359 Private Detective and Protective Agent License individual and corporate license holders
- There are approximately 11,600 security personnel in the State of Minnesota
- The agency's current budget is \$192,000 annually. This allows for 2 FTE's – The Executive Director and an Administrative Assistant.
- MNPDB certifies more than 1,373 training courses and 201 instructors.
- MNPDB's stakeholders include legislators, law enforcement, other state agencies, associations, media, license holders, and the general public.

PURPOSE

The mission of the Private Detective and Protective Agent Board (MNPDB) is to ensure investigative and security service license holders meet and maintain statutory qualifications and standards. This includes, but is not limited to, **meeting criteria in criminal background checks, educational requirements, proof of financial responsibility, and ensuring license holders are acting responsibly** and in the best interest of their clients.

With **public safety and consumer protection** as our main goals the agency: investigates complaints against license holders and violations of statutes, provides support to law enforcement and the courts in regard to unlicensed activity and police impersonation, and works towards increasing the quality of the industry.

MNPDB supports the following statewide outcomes.

- Minnesotans have the education and skills needed to achieve their goals
- People in Minnesota are safe
- Efficient and accountable government services

BUDGET

Source: Consolidated Fund Statement

STRATEGIES

Our strategies include:

Streamlining Procedures: In order to process applications, renewals, officer changes, and training certifications more quickly our agency has implemented a number of initiatives. These include the use of a consent agenda for timely approval by the Board, revising forms, revising the license renewal process, using email verses U.S. mail, and working with license holders to resolve issues before going to the board. Our agency will continue to review and revise processes in order to increase efficiency.

Website Revision: A large percentage of the agency's time is spent dealing with inquiries and providing various forms. The current website is unable to provide this information. Our agency will be revising the website to add downloadable forms and other information of interest to applicants, license holders, law enforcement, and the general public.

Auditing and Inspections: License holders and Certified Training Courses are currently audited at their renewal time which is every two years. Recently the agency began conducting audits between these renewal dates and have found concerning results related to public safety and consumer protection. As we deal with security and investigative personnel it is imperative that these individuals are properly background checked and trained. Our agency will conduct onsite visits and more random audits in order to be more proactive in regulating the industry.

FTEs	1	1	1	1

Recommendation:

The Governor recommends a general fund base increase of \$85,000 per year for the Private Detectives and Protective Agents Board (MNPDB) to hire one additional full time employee (FTE) to provide critical oversight activity for private detective licensing. This is a 44% increase in the board's base budget.

Rationale/Background:

- The agency employs two FTEs – the Executive Director and the Administrative Assistant.
- The agency is responsible for regulating 351 license holders that include both security and protective agent services as well as private detective services. The board licenses both private security companies and their employees who provide security services to private businesses around the state. These include over 11,000 security and investigative personnel statewide.
- Over the past 6 years, the number of license holders has increased 27%.
- Recent audits of license holders found serious violations requiring additional oversight by the board and its staff.
- The agency identified 159 monthly administrative procedures and 91 continuous internal control items that are required by state policy and laws.
- The private investigative and security industry provides services that include armed personnel as well as entities that obtain information that can have a significant effect not only on businesses, but personal lives as well. These services have a substantial impact on public safety and consumer protection. As such, this industry needs increased critical oversight and heightened regulation.

License Renewals

To achieve critical oversight, the Board audits more than 150 license renewals per year. Some license holders are individuals, some are security companies with more than 1,500 employees. The Board does not have an online system for license applications and renewals. All documentation is reviewed for violations and completeness and stored hard copy, which is time intensive.

The Board requests a full audit of the license holder when serious violations are discovered. This includes gathering data from employees that worked for the license holder within a two-year period.

When the Board votes to revoke or not renew a license, it is crucial that our agency does its due diligence. This involves verifying facts, conducting background investigations, preparing legal documents and discovery, and testifying at the Office of Administrative Hearings and the Legislature.

The Board recently conducted an analysis of all renewal issues during a 25-month period. These ranged from security agents lacking insurance to non-compliance of background check compliance and training. Of the licenses analyzed, the Board found that 87% (295 out of 338) were submitted with significant concerns that our agency had to audit and work with the license holder to correct.

Audits

Within the past 2 years the Board began directing staff to conduct audits of license holders in which serious violations were discovered. The process involves gathering data on each employee, whether current or terminated within the two-year renewal period, employed by the license holder.

The key components of the audit are to ensure that each employee has a qualifying background check, has received the required training, and has been issued a proper identification card. Results from six recent audits displayed below show some concerning data as it relates to public safety and consumer protection.

Total Employees Reported	No Background Checks	Background Check After Active Starting Date	Did not Take Pre-assignment in Timely Manner	Total Background Violations	All Training Violations
3,730	262	544	947	806	1,180
	7%	15%	24%	22%	32%

Data Requests

The Board has seen an increase in data requests and takes all requests seriously. Some requests are very labor intensive and take hundreds of hours. The Board is one of the only licensing agencies that does not have an online licensing system. Subsequently, all documentation dates back to 1974 and is stored in hard copy. This results in excessive labor hours.

Unlicensed Activity/Police Impersonators

The Board has found more than 300 potential instances of unlicensed activity. In some instances, this involved police impersonators. These entities/individuals are often not qualified, do not have insurance, are not trained, and some are found to have criminal records. In some situations, they provide armed protective services. This is a serious issue in regard to public safety and consumer protection.

License Applications and Officer Changes

The Board processes license applications and officer change applications to ensure candidates meet statutory qualifications. This includes an extensive background check process to ensure all required information and documentation has been provided.

Projects

With the additional staff person, the projects listed below will be addressed.

Website

The Board's current website lacks basic information, resources, and tools. Revision of the website is a labor-intensive project. All data must be accessible, understandable, and accurate. A revised website that contains the information and forms needed by applicants, license holders, law enforcement personnel, and the general public will drastically reduce the time necessary to respond to inquiries and requests.

Certified Training Auditing

Currently the Board manages more than 1,400 certified training courses and 800 instructors. These courses are reviewed, but extensive analysis and class inspections/audits are needed to ensure security and investigative attendees are receiving adequate training that meets statutory compliance.

Proposal:

An additional position is needed to increase efficiency with regulating the private security and investigative industry. This includes processing applications, renewals, officer changes, data requests, reviewing certified training and instructors, complying with internal controls, and completing stalled projects. Labor resources are stretched thin when our agency is involved with conducting audits, investigating violations, and dealing with the legal aspects of those activities. Lacking labor resources creates delays in investigations and audits, increased probability of error, and lack of due diligence. This adversely effects public safety and consumer protection.

<i>Maintain Funding Structure in FY20 (REVISED)</i>	7

AT A GLANCE

Oversight of teacher standards, licensure renewals, and ethics for more than 143,000 licensed educators in the State, over 62,000 of whom are actively teaching in Minnesota classrooms.

- Oversight and daily support for 31 teacher preparation program providers
- 6-8 Onsite reviews of Minnesota institutions of higher education conducted annually
- Ongoing Program Review of over 400 programs annually
- Over 200 teacher conduct investigations reviewed annually
- Issuance and renewal of over 30,000 educator licenses annually

PURPOSE

The Professional Educator Licensing and Standards Board's (PELSB) primary mission is to assure that Minnesota students are served by licensed teachers who are equipped to deliver effective instruction and meet the instructional needs of all learners. PELSB is a new independent board, created to replace the Board of Teaching and absorb the Educator Licensing Division from the MN Department of Education. The new agency will carry on the work of the Board of Teaching and Educator Licensing by providing leadership in teacher education, establishing and maintaining licensure standards and requirements, approving institutions and licensure programs to prepare Minnesota teachers, and by establishing and enforcing the Code of Ethics for Minnesota teachers.

PELSB supports statewide outcomes, assuring that **Minnesotans have the education and skills needed to achieve their goals** contributing to **a thriving economy that encourages business growth and employment opportunities.**

BUDGET

**Spending by Category
FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

The majority of the board's funding is spent to retain 21 FTE positions to conduct the oversight of teacher preparation, teacher assessments, teacher conduct investigation and action, and to issue and renew educator licenses and permissions, including a licensure via portfolio process. PELSB receives an annual appropriation from the legislature, and a special appropriation for licensure via portfolio expenses. All licensing fees for teachers other than those pursuing licensure by portfolio are paid to the general fund. Operating expenses include

reimbursement of mileage and per diem for Board members as well as support for staff administrative and travel fees.

STRATEGIES

PELSB has provided leadership in teacher education by establishing and maintaining licensure rules, policies and standards for the profession, as well as oversight for the approval of institutions and their licensure programs to prepare Minnesota teachers. The Board conducts investigations into teacher conduct, enforcing the established Code of Ethics for Minnesota teachers.

RESULTS

PELSB inherited multiple tasks by the combination of the Board of Teaching and Educator Licensing. PELSB became a new independent board on January 1, 2018. This new board will need to review all rules under the Board of Teaching and continue to work with the legislature to align rule with statute. A summary of work accomplished in the previous fiscal year includes:

<i>School Year</i>	<i>2018</i>	<i>Total</i>
Preparation Providers Reviewed	8	31 providers
Preparation Programs Reviewed	400	826 licensure programs, 113 nonconventional
Permissions Granted**	5,582	Steadily increasing each year
Licenses Issued	10,710	Traditionally around 11,000 initial and additional licenses each year
Licenses Renewed	6584*	Traditionally around 21,000 renewals each year
Ethics Cases Reviewed	566	Traditionally between 200-300 cases open each year

*Due to changes in teacher licensure, the majority of licenses were automatically extended and not able to be renewed.

**Permissions include any path for an individual who does not have a MN teaching license, or is not licensed in the area of the assignment, to be teacher of record.

The current authority and responsibilities of the Professional Educator Licensing and Standards Board are delineated primarily in Minnesota Statutes §122A.05 – §122A.09, §122A.18, §214, and Minnesota Rules, Chapters 8700, 8705 and 8710.

Recommendation:

The Governor recommends maintaining the current funding structure for the Professional Educator Licensing and Standards Board (PELSB) by appropriating their operating budget from the general fund and depositing all educator licensure fees to the general fund. This recommendation brings both the receipts and appropriation to support PELSB back to the general fund to simplify and ensure consistent funding for the agency.

Rationale/Background:

The 2017 legislature made a number of changes to Minnesota's teacher licensure system. These changes included the creation of multiple tiers of teacher licenses and the consolidation of the Board of Teaching and the Minnesota Department of Education's Educator Licensing division into a single state entity, PELSB. Historically, these agencies have been general fund appropriated and all licensing fees for teachers other than those pursuing licensure by portfolio were paid to the general fund.

Beginning in FY 2020, PELSB's funding structure will change so that licensure fee revenue is deposited into and operating dollars are appropriated out of the Educator Licensure account in the special revenue fund. However under the current fee structure, PELSB does not collect enough receipts in a fiscal year to fully fund their operating budget, so an additional open general fund appropriation was included in law to ensure the agency is fully funded. PELSB does not have enough data to produce reliable revenue estimates under the new fee structure. This combination of funding streams poses many administrative challenges and will be time consuming and difficult for the agency to implement. This recommendation brings both the receipts and appropriation to support PELSB back to the general fund to simplify and ensure consistent funding for the agency.

Proposal:

The Governor recommends striking statutory language, which appropriates part of the PELSB's operating funds from the Educator Licensure account in the special revenue fund starting in FY 2020. PELSB would instead remain appropriated entirely out of the general fund, and would continue to deposit licensure fees into the general fund.

Results:

This proposal is intended to simplify and ensure consistent funding for the agency so they are able to provide current levels of service more effectively.

AT A GLANCE

In FY 2017, the Board of Psychology:

- Maintained an active registry of 3,775 psychologists
- Received 186 number of applications for licensure.
- Licensed 141 psychologists.
- Screened education, administered the Professional Responsibility Examination, and admitted 130 applicants to the national licensure examination.
- Received 133 complaints alleging violations of the Psychology Practice Act, or laws and statutes the Board is authorized to enforce.

PURPOSE

The mission of the Minnesota Board of Psychology is to protect the public through licensure, regulation and education to promote access to safe, competent, and ethical psychological services. The Board ensures psychologists have the minimum training, education, and experience to practice psychology. The Board receives, investigates, and resolves complaints on psychologists. The Board offers educational conferences, seminars, and trainings to educate psychologists on the rules and laws governing their practice.

The Board contributes to the statewide outcomes of: **All Minnesotans have optimal health and people in Minnesota are safe.**

BUDGET

**Spending by Category
FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

The Board is funded by licensure fees and receives no general fund dollars. Minnesota Statutes section 214.06, subdivision 1(a) compels the Board to collect fees in the amount sufficient to cover direct and indirect expenditures. Funds are deposited as non-dedicated revenue into the state government special revenue fund. From this fund, the Board receives a direct appropriation to pay for agency expenses such as salaries, rent, costs associated with disciplinary/contested cases and operating expenditures. It also pays statewide indirect costs through an open appropriation.

In addition to Board operations, licensure fees fund activities that support multiple boards and/or other agencies, including the Administrative Services Unit, Health Professionals Services Program, Office of the Attorney General for legal services, and the Criminal Background Check Program.

STRATEGIES

To accomplish its mission, the Board of Psychology uses the following strategies:

Administrative Strategies

- Research best practices for regulatory bodies to support agency decision-making.
- Analyze the organization and allocate resources according to mission and vision on an ongoing basis.
- Use communication tools to improve and maintain communication internally and externally.
- Ensure continuous professional development for staff and Board members.
- Use technology effectively to support licensure, complaint resolution, and educational responsibilities.
- Build connections with stakeholders through educational offerings, direct stakeholder meetings, and a social media communication plan.
- Educate stakeholders by sponsoring continuing education seminars, workshops, and developing and distributing educational materials on the minimum standard of acceptable and prevailing practice in psychology.

Licensure Strategies

- Review applications for licensure to ensure proper educational, training, and experience requirements are met prior to issuing a license.
- Review applicants' background information and histories to determine moral fitness for the practice of psychology.

Regulatory Strategies

- Investigate and resolve complaints regarding the conduct of applicants or licensees in the field of psychology.
- Issue discipline or corrective action to deter future misconduct, to rehabilitate and educate, to recoup costs, or to put the public on notice of a licensee's problematic conduct.
- Educate applicants and licensees on the most frequently occurring ethical pitfalls within the practice of psychology and the Board's complaint resolution process.

Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	89	127	87	87
FTEs	0	0	0	0

Recommendation:

The Governor recommends additional funding of \$216,000 in the FY 2020-2021 biennium to maintain the current level of service delivery at the Minnesota Board of Psychology.

Rationale/Background:

Each year, the cost of doing business rises—employer-paid health care contributions, FICA and Medicare, along with other salary and compensation-related costs increase. Other operating costs, like rent and lease, fuel and utilities, and IT and legal services also grow. This cost growth puts pressure on agency operating budgets that remain flat from year to year.

The Board is entirely fee supported and receives no General Fund dollars to provide all services. Fees must be collected to cover all direct and indirect expenditures and are deposited as non-dedicated revenue into the State Government Special Revenue Fund (SGSRF). The Minnesota Legislature makes appropriations from the fund to pay for expenses incurred by the Board. The Board collects sufficient revenue to cover all expenses.

Proposal:

The Governor recommends increasing agency operating budgets to maintain the delivery of current services. For the Board of Psychology, this funding will cover known employee compensation growth, rent increases, an IT database update, and rule making costs.

- Salary increases: The Board anticipates salary increases for current staff per year.
- Annual rent increases: The Board's needs to meet the costs of the rent increase based on additional space and lease amount.
- Rule Making: The Board is currently undertaking a comprehensive update of its rules in addition to meeting statutory changes passed in FY2017 and FY2018 with the expectation of conducting a hearing on the rules.
- Database update: This update would support the changes in the Board's database system that are required under the updated rules.

The Board currently collects sufficient revenue to support this increase, therefore no fee increases will be needed during this biennium to support this proposal.

Small Agency Increase:	FY2020	FY2021	FY2022	FY2023
Salary Increases (current staff increases)	\$68,000	\$85,000	\$85,000	\$85,000
Rent	\$1,000	\$2,000	\$2,000	\$2,000
Rule Making	\$20,000	\$25,000	\$0	\$0
Centralized MN.IT Costs – Database changes based on rule changes		\$15,000	\$0	\$0
Total	\$89,000	\$127,000	\$87,000	\$87,000

Equity and Inclusion:

The Board does not discriminate on the basis of race, ethnicity, gender, sexual orientation, or disability. The positive impact of this change will be to continue to provide services for all people of the State of Minnesota without discrimination.

IT Related Proposals:

A portion of this request includes an increase for database maintenance. This request is include in the proposal section.

Category	FY 2020	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025
Payroll						
Professional/Technical Contracts		\$15,000				
Infrastructure						
Hardware						
Software						
Training						
Enterprise Services						
Staff costs (MNIT or agency)						
Total	\$0	\$15,000	\$0	\$0	\$0	\$0
MNIT FTEs						
Agency FTEs						

Results:

This proposal is intended to allow the Board to continue to provide current levels of service and information to the public. These funds will also support continuous improvement and provide foundational training for Board members to meet their statutory obligations.

Statutory Change(s):

No statutory change is required.

Psychology, Board of

FY 2020-21 Biennial Budget Change Item

Change Item Title: New Pre-approval Fee and Move Fees from Rule to Statute

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	13	13	13	13
Net Fiscal Impact = (Expenditures – Revenues)	(13)	(13)	(13)	(13)
FTEs				

Recommendation:

The Governor recommends moving current fees from Rule to Statute and establishing a new post-doctoral supervised experience pre-approval fee for the Board of Psychology. Current fees are in Minn. Rules, Section 7200.6100.

Rationale/Background:

All fees collected by the Board are under MN Rule 7200.6100 and would be moved to Minnesota Statute 148.79-148.99 under the psychology practice act where fees are implemented and codified.

Currently, Board staff review an applicant's supervised experience after the applicant submits for licensure. The new fee would support a pre-review and approval of proposed supervision by Board staff, increasing public protection through greater compliance with Board statutes and rules, faster application processing for applicants seeking licensure via this method, and more certainty of the outcome of the supervised experience for both the applicant and the supervisor.

Proposal:

The Board would implement a new fee for pre-approval of post-doctoral supervised experience contract prior to an applicant starting an experience counting toward licensure. This change reflects the need to establish all current fees in statute. This change is an optional increase to applicants who choose to have their post-doctoral supervised psychological experience pre-approved. This change will not increase fees for any licensee who chooses not to use the pre-approval service offered by the Board.

Current Fees – Move from MN Rule 7200.6100 to MN Statute.

AT A GLANCE

- Largest user of Minnesota Courts- provides mandated criminal defense services at the trial and appellate court level.
- 155,000 trial court cases and 4,000 appellate cases opened annually.
- 4,000 appellate cases opened annually.

PURPOSE

The Board of Public Defense (BOPD) is a judicial branch agency whose purpose is to provide legal services mandated by the Constitution and statute. The Board's mission is to provide excellent criminal and juvenile legal defense services to indigent clients through an independent, responsible and efficient public defender system.

We are committed to five major goals: client centered representation, creative advocacy, continual training for all staff, recruitment and retention of excellent staff, and being a full partner in the justice system. A well-funded and functioning public defender system insures that the constitutional rights of the indigent are protected. This helps to protect the rights of all of our citizens. It also helps to make sure that the work of the court system continues uninterrupted which helps ensure that people in Minnesota are safe. Public defender services are almost exclusively financed by the general fund. In Hennepin County (the 4th Judicial District) there is a cost sharing between the State of Minnesota and Hennepin County.

BUDGET

**Spending by Category
FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Compensation includes funding of county employees in the 2nd and 4th Judicial Districts; however, this is included in the grants, aids, and subsidies funding category on the fiscal pages.

Historical Spending

STRATEGIES

We have developed various tools to further our mission and goals and to provide effective and efficient service delivery. These include:

- Implementation of quality representation guidelines on the trial and appellate levels
- Development of an electronic content management system
- Commitment to vertical representation
- Commitment to team defense
- Commitment to continual training of all staff
- Using a cost-effective model of representation that combines full and part time defenders
- Development of an internal resource allocation policy to better target attorney resources

M.S. 611 (<https://www.revisor.mn.gov/statutes/cite/611>) provides the legal authority for the Board of Public Defense

Recommendation:

The Governor recommends funding this request from the Board of Public Defense.

The budget request can be summed up in two words: maintenance, and stability. The budget request provides the staffing necessary to keep up with the caseload growth in the area of child protection cases; provides for a stable workforce by being able to offer salaries that are comparable to other public agencies and maintains the board's commitment to its public defender partners.

Rationale/Background:

Between 2015 and 2018 child protection case have increased nearly 50%. This is a direct result of statutory changes and changes in enforcement. Based on fiscal year 2018 caseloads and current staffing the board is now at 68.5% of the attorney staffing recommended by state and national standards. If the growth in child protection cases continues and there is no additional staffing provided it is estimated that this percentage will drop to approximately 63% by fiscal year 2021. This will seriously impair the board's ability to provide services. The board is also operating with approximately 57% of the support staff recommended by state and national standards.

The starting salary for Assistant Public Defenders is 11% below that of comparable public agencies. The top of the salary range is 12% below comparable public agencies. It also takes longer for public defenders to progress through the salary range. Budget constraints are hampering the board's ability to recruit and retain staff and is losing experienced defenders often to other public agencies. Excluding retirements, the turnover rate among Assistant Public Defenders in 2015 was approximately 4%. The 2018 rate will be to be closer to 7%. The average level of experience for the defenders who leave is approximately 6 years. The board spends a significant amount of time and money in training staff only to have them leave after they gain experience. In addition, the employer share of employee insurance costs is expected to increase over the next two years.

Over twenty years ago, the legislature enacted state assumption of public defender costs from the counties. This included a cost sharing arrangement with Hennepin County and grandfathering employees in the Hennepin County office as county employees. As county employees in Hennepin County have separated from service, the board has replaced these employees with state employees, and has continued the cost sharing arrangement with Hennepin County. At the time this law was enacted, there was an understanding among legislators, that at some point the legislation would result in a financial situation that would not be sustainable. That time has come.

Proposal:

The proposal seeks to maintain and stabilize the public defender system by providing the staffing necessary to keep up with increased caseloads and to maintain and stabilize its work force in the face of competition from other public agencies.

By law public defenders represent children 10 years of age and older in child protection cases. With the increased emphasis on child protection cases at the state and local level, these cases are now the fastest growing area of cases on the trial court level, and is responsible for much of the overall growth in caseloads. If the current trend continues we could see a doubling of the cases between 2015 and 2021. A consequence of uncontrollable public defender caseloads for the entire criminal justice system is that frequently courtrooms--each with a presiding judge, court staff, prosecutors, probation officers, victim/witness assistants, victims, witnesses, family members and the public--are unable to conduct business in a timely manner because the public defenders needed for the resolution of cases are tied up elsewhere.

Public defenders cannot refuse cases (*Dzubiak v Mott*), and the only funding source the Board has is legislative appropriation. Since 90% of the board's budget is personnel and another five percent (5%) is contractually obligated, failure to fund salary and benefit increases for existing staff would require a reduction in staffing and would result in a reduction in services. This will lead to; the inability to handle certain case types in anything like a timely manner; aggravation of jail overcrowding; postponement of trial settings, which are already far enough out to impinge on the right to a speedy trial; deterioration in the quality of fact-finding, as witnesses become unavailable; increased strain on all the other participants in the justice system.

On the appellate level, between 2015 and 2017 the number of cases appealed increased by 15%, and parole revocation filings increased by 18%. A lack of funding on the appellate level has meant significant delays in the state's appellate courts. Delays have also occurred at the trial and appellate court levels in post-conviction matters. These matters include all appeals in cases that were not litigated (guilty plea withdrawal, sentencing, conditional release, parole revocation, and cases where new evidence may be found). Staff shortages have caused delays in sentencing appeal cases and appeals of plea withdrawal and conditional release.

The request would address the increase in child protection and appellate cases over the last few years by adding thirty-one (31) FTE attorneys in fiscal year 2020 and an additional nineteen (19) FTE attorney positions in fiscal year 2021, as well as the professional staff to support these positions. It also includes professional staff to bring these ratios in line with attorney staffing. The requested increase in attorney staffing only addresses the growth in caseloads since the start of the last biennium.

In order to continue to recruit and retain staff, the request includes funding to provide for salaries that are in line with other public agencies including the Attorney General's Office, and to fund the estimated insurance cost increases during the biennium.

Average of: Attorney General's Office, State Court Administration, Anoka, Scott, Dakota, Stearns, St. Louis, Washington, Hennepin, and Ramsey Counties.

Hennepin County continues to provide a significant contribution (\$6-7 million annually) to the operation of the public defender office in the county including rent, IT services and other services. Funding would be provided to maintain the state's contribution to the cost sharing arrangement.

The request also includes a modest increase in grant funding to the four public defense corporations that provide legal defense services primarily to the state's minority communities. The cases handled (3,300 annually) by the corporations would otherwise be public defender cases.

Equity and Inclusion:

In child protection cases public defenders represent the most vulnerable of our community its children. The public defenders represent children who have been abused or neglected, and where chemical and mental health issues are pervasive.

Public defender's represent the poorest segment of society. Clients by definition are living in poverty, many are homeless, and a high percentage suffer from mental health issues, and chemical dependency issues, as well as traumatic brain injuries. Estimates of the number of individuals in county jails who suffer from mental illness range anywhere from 30-50%. It is estimated that 90% of Minnesota's criminal cases in involve alcohol or other chemical dependency issues.

People of People of color make up a significant portion of public defender clients. African Americans make up nearly 28% of the felony offenders in the state, and 35% of the state's prisoners. Native Americans make up about 10% of the state's prison population and about 7% of the felony offenders.

mnpera.org/

AT A GLANCE

- The Public Employees Retirement Association (PERA) was established in 1931.
- PERA administers four defined benefit retirement plans, one defined contribution retirement plan, and one agency fund in accordance with Minnesota Statutes Chapters 353, 353A, 353D, 353E, 353G and 356.
- PERA issued over \$2.0 billion in annuity payments during fiscal year 2018.
- PERA issued over \$50 million in lump-sum refund payments to terminated members in fiscal year 2018.
- PERA had 172,000 defined benefit fund members, 209,000 inactive members, and 114,000 annuitants receiving benefits at the end of fiscal year 2018.
- PERA has over 2,000 total participating employers including townships, cities, counties, schools and other miscellaneous local governments as defined in M.S. 353.01, subdivision 6.
- PERA manages a fiscal year 2019 administrative budget of \$19.4 million

Source: PERA 2018 Comprehensive Annual Financial Report

PURPOSE

PERA's overarching goal is to ensure that contributions collected from members and employers and the investment earnings on those contributions will be sufficient to provide promised benefits to benefit recipients, allowing public employees the opportunity to achieve a successful and secure retirement without relying on the State for financial support. Investment income accounts for about 64 percent of PERA's revenues. Member contributions account for another 16 percent and employer contributions from local governments make up the difference of 20 percent.

BUDGET

Source: PERA 2018 Comprehensive Annual Financial Report

Source: PERA 2018 Comprehensive Annual Financial Report

The State of Minnesota contributed \$16 million annually in fiscal years 2018 and 2019. Annually thereafter, the State will contribute \$6 million per year until the year 2031 to help pay off the unfunded liability that existed when MERF was consolidated into PERA in 2010. PERA also receives \$9 million each year for the Minneapolis

Police and Minneapolis Fire funds that consolidated with the PERA Police & Fire plan in 2012. The Police & Fire plan receives an additional \$4.5 million annually in FY 2018 and FY 2019 and \$9 million annually thereafter, continuing through the earlier of FY 2048 or when the fund reaches a 100% funded ratio on an actuarial value of assets basis.

STRATEGIES

PERA's core functions include collecting, recording and maintaining the accounting of retirement contributions; collecting and managing member information; issuing benefit and refund payments; and delivering education and training through counseling, workshops and publications. Benefit payments have a financial impact on the state's economy and provide benefit recipients and their families the opportunity to lead healthy, productive lives during their retirement years. Over the past 30 years, the State Board of Investment has reported an annualized rate of return of 9.1 percent, allowing contribution rates to remain relatively stable. PERA's administrative costs are also less than five hundredths of one percent of assets.

RESULTS

PERA pays over \$170 million each month in annuity benefits to 110,000 benefit recipients, of which more than 90 percent live in the State of Minnesota. This results in an annual economic benefit of nearly \$3 billion to the State of Minnesota in the biennium.

The most important measures of the health of a defined benefit retirement system are: (1) the level of funding and (2) is the legislatively established contribution rate sufficient (or deficient) to amortize the unfunded liability by the full-funding date. While all three plans are on track to be fully funded at some point in the future, Minnesota Statutes require that the unfunded liability be amortized over a closed period. The full funding amortization date for the General Plan, the Police & Fire Plan, and the Correctional Plan is 2048.

Three measures of a defined benefit plan's financial health are:

- **Funded Ratio** – This ratio is the percent of a retirement fund's net assets, calculated for actuarial purposes, that is available to pay the present value of benefits that employees already earned. The higher the ratio, the better positioned the retirement plan is to pay future benefits when they become due.
- **Contribution Sufficiency/(Deficiency) Rate** – This rate is the difference between the actuary's computation of required employer and employee contributions rates and the statutory contribution rates, expressed as a percent of payroll. A sufficiency indicates that the plan is on target to reach a 100% funded ratio before its full funding date; conversely, a deficiency means the retirement system is not collecting enough contributions to meet its full funding target date.
- **Unfunded Actuarial Accrued Liability** – This is the difference between the actuary's valuation of assets and the present value of member's future benefits.

<i>Type of Measure</i>	<i>Performance Measure - Market Value of Assets</i>	<i>06/30/17</i>	<i>06/30/18</i>
Quality	PERA General Plan Funding Ratio	78.5%	79.5%
Quality	PERA General Plan Contribution Sufficiency/(Deficiency)	(1.3)%	1.5%
Quality	PERA General Plan Unfunded Actuarial Accrued Liability	\$5.5 Billion	\$5.5 Billion
Quality	PERA Police & Fire Plan Funding Ratio	86.1%	88.8%
Quality	PERA Police & Fire Plan Contribution Sufficiency/(Deficiency)	(0.7)%	3.3%
Quality	PERA Police & Fire Plan Unfunded Actuarial Accrued Liability	\$1.3 Billion	\$1.1 Billion

Type of Measure	Performance Measure - Market Value of Assets	06/30/17	06/30/18
Quality	PERA Correctional Plan Funding Ratio	95.7%	97.6%
Quality	PERA Correctional Plan Contribution Sufficiency/(Deficiency)	(0.3)%	0.1%
Quality	PERA Correctional Plan Unfunded Actuarial Accrued Liability	\$27 Million	\$16 Million

New retirees who apply for benefits and employees that terminate employment expect to receive payments promptly. PERA's goal is to pay initial benefit applications within two weeks of the applicant's first benefit eligible date and to pay terminated employees within 60 days of the receipt of the application.

Type of Measure	Performance Measure	06/30/17	06/30/18
Quality	Receipt of First Annuity Check within two weeks	96%	96%
Quality	Receipt of Lump-Sum Payment within 60 days	99%	99%

PERA is governed by Minnesota Statutes Chapters 353 (<https://www.revisor.mn.gov/statutes/?id=353>), 353D (<https://www.revisor.mn.gov/statutes/?id=353D>), and 353E (<https://www.revisor.mn.gov/statutes/?id=353E>).

AT A GLANCE

- PFA manages revolving loan funds and grant programs to help local governments statewide build wastewater, storm water, drinking water and transportation infrastructure.
- Since 1990, PFA has made 1,030 loans to local governments totaling \$4.1 billion. These below-market-rate loans have provided an estimated \$911 million in interest savings to local governments and their residents.
- Over the past ten years PFA has awarded \$464 million in grants to local governments based on affordability criteria and to address specific water quality goals and objectives.
- PFA has allocated \$90.8 million within its clean water revolving fund to nonpoint source loan programs administered by other agencies. The Minnesota Department of Agriculture's Best Management Practices program and the Pollution Control Agency's Clean Water Partnership program have used these funds and revolving loan repayments to provide \$268 million in low and no-interest loans to help landowners reduce nonpoint source pollution.

PURPOSE

The Minnesota Public Facilities Authority (PFA) is a multi-agency authority that provides financing and technical assistance to local governments for infrastructure projects that support a thriving economy and a clean, healthy environment.

PFA priorities are to 1) manage capital assets (currently \$2.3 billion) to ensure a stable source of infrastructure financing in perpetuity; 2) provide financing programs to support water quality, public health, and other priorities identified by PFA member agencies; and 3) help local governments maintain and improve the condition of their water infrastructure assets while keeping costs affordable for their residents.

BUDGET

**Spending by Category
FY 17 Actual**

Note: Debt Service on PFA revenue bonds comes solely from PFA bond fund revenues (loan repayments and investment earnings).

Source: SWIFT

Historical Spending

Note: FY 2010-2011 expended high due to two factors: 1) Federal ARRA stimulus funding, and 2) early bond redemptions due to low market rates.

Source: Consolidated Fund Statement

PFA receives no general fund appropriations for its programs or for administrative costs. Revolving loan fund resources include federal grants and state matching appropriations from bond proceeds. These resources are leveraged by selling PFA AAA-rated revenue bonds. Other programs are funded with state appropriations from bond proceeds and from the Clean Water Legacy Fund. Administrative costs are paid from loan servicing and grant application fees.

Sources and Uses to-date for PFA’s Clean Water, Drinking Water, and Transportation revolving loan funds

Notes: Revenues (loan repayments and investment earnings) are net of debt service on bonds.

Source: PFA Internal records

STRATEGIES

The PFA Board is composed of commissioners of the Departments of Employment and Economic Development, Minnesota Management and Budget, Health, Agriculture, Transportation, and the Pollution Control Agency. PFA manages its infrastructure financing programs to maximize economic, environmental, and public health outcomes. PFA partner agencies are responsible for determining project priorities, conducting technical and environmental reviews, and certifying approved projects to the PFA for funding.

PFA staff is responsible for determining that full project financing is in place and that the applicant has established dedicated revenues to pay debt service and operation and maintenance costs. When an application is approved and construction bids are accepted by the applicant, PFA executes a project financing agreement, disburses funds as eligible project costs are incurred, and collects loan repayments. During project planning and design stages, PFA coordinates funding activities with other state and federal partners to leverage resources and minimize duplication, administrative costs, and confusion for the applicants.

RESULTS

The PFA’s revolving loan funds are an efficient tool to provide low cost financing to help local governments replace and improve water infrastructure systems to meet permit requirements, improve water quality, and protect public health. To date, each \$1 of state funds has generated \$16 in construction funding and \$3 in interest savings to the communities and their residents. In addition, PFA’s upfront credit review and analysis of

loan applications and systematic post loan award surveillance monitoring has helped borrowers achieve a record of no defaults on PFA loans.

Annual project funding is a function of fund availability and demand from local governments. Local government demand for funding varies significantly from year to year, driven by economic factors, the need to replace aging infrastructure, growth and development pressures, and more stringent treatment requirements. The PFA's authority to issue revenue bonds allows it to leverage additional loan funds based on demand. PFA tax-exempt revenue bonds are rated AAA by all three major national rating agencies and are well received in the bond market.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Loan Awards (count / \$ millions)	272/\$1,018	188/\$662	2009-2013; 2014-2018
Quantity	Interest Savings on Loans (\$ millions)	\$204	\$99	2009-2013; 2014-2018
Quantity	Grant Awards (count / \$ millions)	222/\$210	169/\$254	2009-2013; 2014-2018

Note 1: Measures compare the five year periods of state fiscal years 2009-2013 to 2014-2018.

Note 2: Sustained historically low market rates in the current 5 year period have resulted in lower interest savings on loans.

M.S. 446A (<https://www.revisor.mn.gov/statutes/?id=446A>) provides the legal authority for PFA.

Request:

The Governor recommends \$9,125,000 in FY 2020 and \$9,125,000 in FY 2021 from the Clean Water Fund to the Public Facilities Authority for municipal clean water infrastructure. The recommendation includes \$9.0 million per year for the Point Source Implementation Grants (PSIG) program and \$125,000 per year for the Small Community Wastewater Treatment program. This recommendation reflects the collaborative recommendation of the executive branch water agencies, which includes the Pollution Control Agency (PCA), Department of Natural Resources, Department of Agriculture, Department of Health, Board of Water and Soil Resources, Metropolitan Council, and the Public Facilities Authority (PFA).

Rationale/Background:

The PSIG program provides grants to help cities upgrade water infrastructure treatment facilities to reduce the discharge of specific pollutants to comply with wasteload requirements and more stringent water-quality based effluent limits for phosphorus, chlorides, and other pollutants. The PFA administers the program in partnership with the PCA which determines eligible projects and priorities. Through Minnesota's interagency water management framework, specific water bodies are identified by the PCA where pollutant reductions are needed to meet water quality standards. Watershed restoration and protection strategies are then developed to guide implementation activities, including permit requirements for more stringent effluent limits.

The PSIG program has received Clean Water Fund appropriations each year since 2010. In 2017, in response to growing project needs and requests from cities for more state assistance, the Legislature appropriated \$33.7 million from state general obligation bonds to supplement Clean Water Funds. In 2018, the Legislature appropriated an additional \$33.3 million for the program from Environmental Trust Fund appropriation bonds. The constitutionality of that appropriation has been challenged and the funds are not available at this time.

The Small Community Wastewater Treatment program provides grants and loans to assist small unsewered communities with technical assistance and construction funding to replace non-complying septic systems with community subsurface sewage treatment systems (SSTS). The PFA administers the program in partnership with the PCA which determines eligible projects and priorities. Minnesota has many very small unsewered communities with serious environmental and public health problems from failing septic systems. In many of these communities, individual private systems are not feasible or affordable due to small lots, poor soils, and limited financial capacity.

The Small Community Wastewater Treatment program has received Clean Water Fund appropriations each year since 2010.

Proposal:

The Point Source Implementation Grants (PSIG) program provides grants of up to \$7 million to municipalities for 80% of eligible project costs for infrastructure construction necessary to meet more stringent permit requirements to achieve specific water quality goals. Proposed projects must be ranked on the PCA's project priority list and the PCA reviews and approves projects prior to grant award. PFA does not award a grant until full project funding is in place and the project is ready to start construction. In many cases PSIG grants are awarded in conjunction with loans from PFA's low interest revolving loan funds. Through its monitoring and enforcement activities, the PCA verifies that completed projects meet the required permit limits and conditions, and monitors progress toward overall water quality goals through its watershed monitoring program.

In FY 2018 the PFA awarded PSIG grants totaling \$39.3 million for nine projects, an average of \$4.375 million per project. The PFA currently has 31 unfunded PSIG applications with estimated grant needs totaling \$110 million. Of these, seven projects for \$22 million have already been approved and are ready for construction. The requested \$18 million will fund the first five of these projects in priority order.

The Small Community Wastewater Treatment program provides technical assistance grants of up to \$60,000 for site evaluations and feasibility studies, and construction financing of up to \$2 million through low interest loans and grants based on affordability criteria. All proposed projects must be ranked on the PCA's project priority list. The outcome of a technical assistance grant is a community assessment report that evaluates potential wastewater treatment alternatives with a focus on decentralized soil-based treatment alternatives. The PCA reviews the community assessment reports and construction plans and specifications to ensure that new community systems are designed in accordance with state statutes and rules. The PFA reviews construction applications to ensure the borrower has the necessary technical, managerial, and financial capacity to build, operate, and maintain their system. PFA does not award construction loans and grants until full project funding is in place and the project is ready to start construction.

The PCA's project priority list includes 13 unsewered areas that are potential Small Community construction projects and additional projects may be identified. Six projects have received technical assistance grants and are currently evaluating possible treatment alternatives. The requested \$250,000 will provide funding for an additional 5-6 technical assistance grants.

Equity and Inclusion:

All residents in eligible cities and other local government jurisdictions will benefit from the requested funds which will reduce the financial cost of providing appropriate wastewater treatment.

Results:

The results and trends of these two programs in terms of projects funded and dollars awarded are shown below. In addition, the PCA measures permit compliance, pollutant load reductions, and progress toward meeting water quality protection and restoration goals through its monitoring and enforcement activities.

Point Source Implementation Grant Program:

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>

Quantity	Construction loans and grants to build community soil-based treatment systems (count / \$ millions)	5 / \$4.3	2 / \$1.9	FY15-16 FY17-18

The executive branch water agencies prepare a Clean Water Fund Performance Report every two years that describe their joint clean water programs, activities and outcomes. The reports are available here:

<http://www.legacy.leg.mn/funds/clean-water-fund/clean-water-fund-performance-reports>

	Federal Fund – Agency Total		\$20,726	\$67,774	\$45,310	\$45,310		9.0

Narrative

The federal capitalization grants are deposited into the revolving loan funds and are used, together with state match, fund revenues, and net proceeds of Authority revenue bond issuances, to provide financial assistance to local units of government to fund wastewater and drinking water infrastructure. The primary form of assistance is low interest rate loans. Loan repayments and all fund assets and revenues are pledged to Authority bondholders for payment of the revenue bond debt service. Annually, the excess revenues over the debt service requirements are used for making additional loans or debt service reserves.

The state must provide a minimum 20% match to the capitalization grants. Historically this has been appropriated thru the capital budget process.

Estimated awards for 2020-2021 are based on historical trends and information available at the time biennial budgets are prepared; actual awards may be more or less than estimated. Amounts shown for 2018-2019 reflect actual and budgeted federal draws. Timing of federal grant awards can significantly impact state fiscal year to year receipts totals because awards in any year may be before or after June 30th, and receipts will generally begin immediately.

FTEs related to these programs are paid from the fee portion of loan repayments. Approximately 9 of PFA's 10 FTE support these programs.

AT A GLANCE

- Workforce: Department of Public Safety (DPS) has 2,042 employees
- DPS has nine operational divisions that include:
 - Alcohol and Gambling Enforcement Division (AGED)
 - Bureau of Criminal Apprehension (BCA)
 - Driver and Vehicle Servicers (DVS)
 - Emergency Communications Networks (ECN)
 - Homeland Security and Emergency Management (HSEM)
 - Minnesota State Patrol (MSP)
 - Office of Justice Programs (OJP)
 - Office of Traffic Safety (OTS)
 - State Fire Marshal Division (SFM), which also includes the Office of Pipeline Safety (OPS) and the Minnesota Board of Firefighter Training and Education (MBFTE)
- DPS serves the majority of the state's population as well as numerous public safety, governmental, and non-profit organizations in the state.

PURPOSE

DPS is committed to protecting citizens and communities through activities that promote and support prevention, preparedness, response, recovery, education, and enforcement in order to ensure that **people in Minnesota are safe**. These objectives are achieved through:

- A focus on saving lives
- Providing efficient and effective services
- Maintaining public trust
- Developing strong partnerships

DPS provides the administrative structure for nine diverse divisions focused on improving safety for all people in Minnesota. The agency also has four divisions that provide human resource, fiscal, internal affairs, and communication support. Through its divisions, DPS works in partnership with city, county, state, federal, and not-for-profit agencies to improve safety. We are funded through federal, state general fund, special revenue, trunk highway, and highway user tax distribution funds.

BUDGET

**Spending by Category
FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

For the FY 16-17 biennium, the Department of Public Safety was primarily financed through legislative appropriations from the general fund (\$217 million), funding from the federal government (\$210 million), and other funds, which includes user fees (\$531 million in the special revenue fund).

STRATEGIES

We ensure that all people in Minnesota are safe by:

- Providing full-service laboratory support to all law enforcement agencies; and providing training and criminal justice integration services to prevent and solve crimes.
- Providing services to prevent, prepare for, respond to, and recover from natural and other types of disasters.
- Providing training, funding, and technical assistance to improve community safety and to assist crime victims.
- Provide training, investigation, inspection, regulation, data collection, and emergency response services to protect lives and property from fire and pipeline incidents.
- Enforcing the state's liquor and gambling laws to protect the public from illegal alcohol sales, illegal consumption, and illegal gambling.
- Providing funding, technical assistance, and research to prevent traffic deaths and serious injuries.
- Providing law enforcement services, education, and assistance to ensure the safe and efficient movement of traffic on Minnesota roads, the protection of the driving public, and the security of the Capitol Complex.
- Regulating motor vehicles, vehicle dealers, and licensed drivers to ensure that state and federal law are implemented and followed.
- Providing funding and technical assistance to operate a state-of-the-art 911 system and the implementation of a state-wide interoperable communication system for emergency responders.
- Providing overall leadership, policy, and direction to ensure the agency successfully meets its goals.

The Department of Public Safety's legal authority comes from Minn. Stat. 299A (<https://www.revisor.mn.gov/statutes/?id=299A>).

Department of Public Safety

FY 2020-21 Biennial Budget Change Item

Change Item Title: Automated Fingerprint Identification System (AFIS) Replacement

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	1,500	1,500	1,500	1,500
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,500	1,500	1,500	1,500
FTEs	0	0	0	0

Recommendation:

The Governor recommends a general fund base increase of \$1.5 million per year to replace the current Automated Fingerprint Identification System (AFIS). The current AFIS is 12 years old, outdated, and no longer supported. To help promote efficiency and keeping the system current in the future, the Department of Public Safety Bureau of Criminal Apprehension (BCA) would lease the technology for AFIS and pay an annual lease and maintenance fee instead of purchasing a new system for \$10 million.

Rationale/Background:

Minnesota statute requires the BCA to provide systems for recording and indexing fingerprints and photographs and capturing palm prints for submission to the FBI. The BCA's AFIS system is also used by South Dakota and North Dakota.

The AFIS is used to compare prints collected at a crime scene (latent prints) to those on file. A new system would provide a more sophisticated algorithm that would yield more relevant results based on the prints submitted. The list of potential matches for BCA forensic scientists to review would contain those more likely to have a fingerprint match and prevent the implication of the wrong person. As a result, more cases would be solved in a shorter period of time.

The current AFIS was implemented in 2006. Over time, various components of the system have become outdated and the server hardware and operating systems are no longer supported by their vendors. The AFIS software is also nearing its end of support for compatibility with our file storage system. At the same time, the volume of fingerprints processed by the AFIS is significantly increasing as the result of legislative changes, including increased requirements for background checks. In 2017, the number of fingerprint-based background checks was 129 percent of the number processed in 2015.

Proposal:

The Governor recommends funding to lease an AFIS because it is a more sustainable cost model and would ensure that upgrades, bug fixes, and enhancement to the AFIS system would be done by the vendor as part of the lease agreement. This proposal also includes one full time employee to assist with ongoing maintenance.

Equity and Inclusion:

This change item has an impact on all Minnesotans as this system is used to verify identity and hold offenders accountable, improve public safety, and promote due process within our justice system. It also impacts all who need background checks for housing, employment and licensing purposes.

Department of Public Safety

FY 2020-21 Biennial Budget Change Item

Change Item Title: Reducing Violent Crime: Tracking, Training and Investigating

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	651	591	546	546
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	651	591	546	546
FTEs	4	4	4	4

Recommendation:

The Governor recommends an ongoing general fund appropriation of \$546,000 per year for two Special Agents, one Training Coordinator, and one Criminal Intelligence Analyst (including training and equipment) to provide statewide leadership, case assistance, and training in the area of predatory crimes. The additional personnel will assist the Department of Public Safety (DPS) Bureau of Criminal Apprehension (BCA) in its efforts to investigate predatory offenders, online sexual exploitation, multi-jurisdictional criminal sexual conduct and human trafficking.

The Governor recommends an appropriation of \$105,000 in FY20 and \$45,000 in FY21 to convene a task force, in consultation with the Minnesota Indian Affairs Council, to advise the commissioner and report to the Legislature on the causes and extent of victimization of indigenous women and girls in Minnesota and the strategies to reduce and end violence against indigenous women and girls. A report to the Legislature on policies and recommendations to reduce and end violence against indigenous women and girls would be due by December 15, 2020 at which point the task force would expire. The Office of Justice Programs (OJP) will oversee the task force.

Rationale/Background:

The BCA provides assistance to local and federal partners in all 87 counties in complex proactive and reactive criminal investigations. Within the Investigative Division, the BCA operates the Predatory Crimes Section. These agents conduct investigations related to online sexual exploitation of children, child pornography, human trafficking and non-compliant predatory offenders.

There has been an increased level of scrutiny on criminal sexual conduct investigations across Minnesota. The BCA recently received part of a Sexual Assault Examination Kit grant to test untested rape kits across Minnesota. The bulk of the BCA's involvement will be to test these kits in our laboratory. However, we have learned through talking with law enforcement agencies in other states that a key component to making these projects successful is having agents work with our local partners to work through the submission process. In addition, we anticipate greater requests for assistance to review past cases of criminal sexual conduct across the state to determine if viable prosecutions of individuals are possible. Agencies may also ask for assistance in reviewing crimes that may have been covered up by organizations to protect criminal actors.

The BCA has been involved in several workgroups identifying needs for training and technical assistance in the investigation of sexual assaults across our state. These agents and the training coordinator would develop training and provide technical assistance to investigators across Minnesota. The criminal intelligence analyst would assist with these investigations and provide analytical assistance which can be key in these investigations as

investigators work investigate these cases. The training coordinators would be utilized to develop, maintain and implement the online training.

The pervasive issue of women and girls going missing or being murdered has devastated indigenous communities in Minnesota for decades. The National Institute of Justice has found that, while representing only 2% of the population, 84% of Alaskan Native and American Indian women will experience some form of violence in their lifetimes, ranging from sexual to physical violence.

Accurate data to determine the extent of the issue has been difficult to obtain. The National Crime Information Center reported more than 5,700 cases of Native missing women in 2017 while the National Missing and Unidentified Person System (NamUs) recorded 118. Grassroots efforts by the Missing and Murdered Women Database Project estimate between 250-300 cases in 2015.

Proposal:

The Governor Recommends two Special Agents, one Training Coordinator, and one Criminal Intelligence Analyst to provide statewide leadership, case assistance, and training in the area of predatory crimes and sexual assault investigation. The additional personnel will assist the BCA in providing critical investigative services to our law enforcement partners as we work to keep Minnesota safe.

The BCA Predatory Crimes Section provides critical support to our law enforcement partners conducting some of the most serious crimes committed in our communities. This proposal will ensure the BCA is meeting the needs of our law enforcement partners and the communities across Minnesota as we work to keep our state safe from those who choose to prey on our children.

The Department requests funding to support a task force to study the issue of missing and murdered indigenous women and girls in Minnesota, overseen by OJP. A report to the Legislature on policies and recommendations to reduce and end violence against indigenous women and girls would be due by December 15, 2020 at which point the task force would expire.

Equity and Inclusion:

This proposal affects the safety of all Minnesotans. Funding for the task force is specifically targeted at determining policies to increase the wellbeing of indigenous women and girls.

Department of Public Safety

FY 2020-21 Biennial Budget Change Item

Change Item Title: Technology Cost Increases

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	767	767	767	767
Revenues	0	0	0	0
Other Funds				
Expenditures	585	585	585	585
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,352	1,352	1,352	1,352
FTEs	0	0	0	0

Recommendation:

The Governor recommends ongoing base appropriation increases of \$1.352 million from the general fund, special revenue fund, and 911 emergency fund to support existing hardware, software, and MNIT staffing costs for the Department of Public Safety (DPS) public safety divisions. This request includes \$767,000 from the General Fund, \$395,000 from the ECN/911 Fund, and \$190,000 from the Fire Safety Account for the State Fire Marshal. This funding is to address identified hardware and software services and staffing costs that are not currently accounted for in the department's base technology budget, in addition to increased workstation replacement, support, and 24/7 help desk support costs attributable to the consolidation of core IT services into an enterprise services model.

Rationale/Background:

For the FY20-21 biennium, DPS' portion of MNIT administrative overhead expenses is projected to increase. MNIT's overhead expenses include human resources, finance, procurement, enterprise project management, and security activities. These expenses are allocated to agencies based on their total IT spend and total number of dedicated MNIT staff as of fiscal year 2017.

In 2020, MNIT forecasts an increase in enterprise charges of \$329,616 for the public safety budgeted divisions, including the Bureau of Criminal Apprehension (BCA), Homeland Security and Emergency Management (HSEM), Emergency Communications Network (ECN), State Fire Marshal (SFM), Office of Justice Programs (OJP), and Alcohol and Gambling Enforcement (AGE), in DPS that were not included in the existing budget. And the remaining \$1.022 million will cover DPS specific software, hardware, and professional services for these divisions to support existing applications. These actual charges include professional services, telecommunications, printing maintenance, software licensing and support for hosting necessary production environments.

Proposal:

The Governor recommends an ongoing appropriation of \$1.352 million to fund DPS core technology services for software, hardware and professional services for the public safety budgeted divisions. This proposal includes monthly software licensing costs, enterprise utilization costs and personnel costs to support the technology infrastructure. Without this funding, DPS and MNIT cannot host or maintain these core DPS applications. A stable funding source will enable the departments to continue to operate these applications.

Equity and Inclusion:

DPS services are provided equally to all Minnesotans.

Department of Public Safety

FY 2020-21 Biennial Budget Change Item

Change Item Title: FBI Cybersecurity Compliance

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	1,501	1,325	1,175	1,175
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,501	1,325	1,175	1,175
FTEs	4	6	6	6

Recommendation:

The Governor recommends additional general funds of \$1.5 million in FY20 and \$1.325 million in FY21 to address cyber security vulnerabilities and other Federal Bureau of Investigation (FBI) compliance issues to meet FBI security requirements. The ongoing general fund base increase totals \$1.175 million per year.

Rationale/Background:

The Department of Public Safety Bureau of Criminal Apprehension (BCA) is the state's FBI Criminal Justice Information Systems Agency (CJA) and is responsible for appropriate maintenance and dissemination of sensitive criminal justice information from the state, local and federal levels. The BCA is responsible for state and local agency compliance with FBI security requirements and has a management control agreement (MCA) to manage these security requirements independent of the MNIT Services.

With the exponential increase in hacking, use of malware to lock and encrypt servers and data, and overall network security vulnerabilities, by both domestic and foreign adversaries, the BCA needs to enhance its cyber security efforts through multiple ways. These include increased local agency physical security audits, audits of non-criminal justice agencies, network and infrastructure monitoring, identity and access management, and availability and redundancy in the event of an incident or disaster. These efforts will also ensure compliance with the FBI's security requirements.

Proposal:

The Governor recommends funding to meet FBI cybersecurity requirements and protect Minnesota's criminal justice data by implementing the following initiatives to effectively address security threats and vulnerabilities:

- **Information Security Officer (ISOs) FTEs/Local Security Audits** – The BCA is responsible for local agency compliance with FBI security requirements and needs to conduct more physical security audits. Per the FBI Criminal Justice Information Services Security Policy, more than 500 agencies need to be audited every three years. The BCA has completed 25 physical security audits in the past year. These are time-intensive and complex audits that have revealed significant security issues that must be resolved. Many local agencies do not have sufficient technical resources and have to rely on city or county technical support that does not understand the security protocols required. These security threats have the potential to negatively impact the state and other agencies that access data through the BCA's network by exposing agencies to hacking and other malware issues. This initiative would add two full-time employees (FTEs).
- **Network/Infrastructure Security** – In addition to the state's overall effort to ensure data security through the MNIT Services, the BCA needs to continually monitor and evaluate security threats to sensitive data through the BCA's criminal justice data network. The BCA's security effort is tailored to the BCA's unique

environment and specific requirements of the FBI. This proposal includes funding needed to implement security tools for identity and access management, scanning, auditing, intrusion prevention, and other infrastructure upgrades to decrease security threats and to better control access to BCA systems and data. This includes four network security/identity access management FTEs to implement and maintain these security tools and processes for better overall security oversight.

- **Business Continuity/Disaster Recovery** – Each state agency is primarily responsible for its own business continuity and disaster recovery plan. The BCA needs to conduct more analysis on business continuity/disaster recovery needs and implement more immediate solutions that target the BCA’s unique environment and FBI security requirements such as network availability and redundancy (as well as phone/internet) and further data center consolidation.
- **Criminal Justice Data Communications Network (CJDN) Encryption** – The BCA’s secure criminal justice data network sits on top of the overall state network (Mnet) managed by MNIT Services. The state network is considered a “public” network. Because of the sensitive criminal justice information accessed through the CJDN, the data must be encrypted using an FBI-certified encryption standard. MNIT Services does not meet these encryption standards for end-to-end CJDN connections, which poses a significant security risk and a vulnerability that must be addressed.
- **New FBI Audit Requirements** – The FBI has introduced new audit requirements the BCA must perform as the state criminal justice agency. They include an audit of all non-criminal justice agencies (approximately 500) to ensure appropriate use and dissemination of secure criminal justice information. This request includes four auditor FTEs to ensure we meet FBI requirements and proper use of these systems.

Equity and Inclusion:

This change item has an impact on all Minnesotans, because BCA systems are used to provide accurate, timely and complete critical criminal justice information for increased public safety.

Revenues (DPS)	2,500	2,500	2,500	2,500
Transfer Out (DPS)	250	250	250	250
Expenditures (MPCA)	250	250	250	250
Transfer In (MPCA)	250	250	250	250
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs (DPS)	1.5	1.5	1.5	1.5
FTEs (MPCA)	2	2	2	2

Recommendation:

The Governor recommends reinstating the railroad and pipeline safety assessment in the amount of \$2,500,000 per year to continue to ensure local preparedness and state support of hazardous materials incidents in communities along Minnesota's railroads and pipelines.

Rationale/Background:

Minnesota maintains a state-sponsored capability to support local first responders during hazardous material (hazmat) incidents along railways and pipelines, as well as highways and fixed facilities. Most local fire departments throughout Minnesota do not have the equipment, training, or expertise to handle a hazmat event without assistance. The primary methods for providing that support are state-contracted hazmat response teams and on-call staff to provide advice and support for preparedness and response activities.

Currently, Minnesota has 11 hazmat response teams composed of chemical assessment teams (CAT) and emergency response teams (ERT), depending on the size of the team. Minnesota's hazmat response teams are used regularly, deploying about once a week over the past several years. The teams responded to 62 calls in 2018.

These teams are hosted by local fire departments under contract with the Department of Public Safety (DPS) to respond to hazmat incidents outside their jurisdiction. A key part of this arrangement is that the state provides specialized equipment, training and funding to enhance and maintain the capabilities of each team. One of the primary sources of funding for that capability, the railroad/pipeline safety assessment authority, expired on July 1, 2017 and those accumulated funds will be depleted by the end of FY19.

DPS purchased much of the required equipment with federal homeland security grants after September 11, 2001. Many items have reached the end of their service life and federal monies are no longer available for equipment replacement. In addition, training and conducting exercises are critical components of hazmat incident readiness. Those activities are necessary to maintain team proficiency, ensure local departments and state teams can work together at a scene, and to stay abreast of changing threats. The 2017 Minnesota's Preparedness for Ethanol and Oil Transportation Incidents Report, conducted by the Management Analysis and Development Division of Minnesota Management and Budget, documented the funding needs for exercises and drills, local planning efforts, community-focused communications and warnings, local department training, response equipment replacement/modernization, and maintaining technical advisory support to incident commanders.

Proposal:

The Governor recommends reinstating the annual \$2,500,000 assessment of railroad and pipeline companies. The program to spend the funds each year is:

- \$250,000 for current DPS-HSEM hazardous materials response staff
- \$250,000 transfer to the MPCA for environmental protection activities relating to railroad discharge preparedness under chapter 115E, (2 FTEs)
- \$100,000 for DPS-HSEM railroad and pipeline incident training/exercise staff (1 FTE)
- \$50,000 for GIS mapping support of community risk areas and facilities (.5 FTE)
- \$250,000 to local jurisdictions for exercise/training support and/or facilitation
- \$200,000 to local jurisdictions for planning support
- \$550,000 for operational support of state contracted hazardous materials response teams
- \$100,000 for emergency response team
- \$750,000 to replace equipment and support state regional hazardous materials program

Equity and Inclusion:

The state hazardous materials incident response support is provided equally to all communities and groups, including tribal nations.

Minnesota Statutes 299A.55 Subd. 4

Department of Public Safety

FY 2020-21 Biennial Budget Change Item

Change Item Title: School Safety Center

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	250	250	250	250
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	250	250	250	250
FTEs	2	2	2	2

Recommendation:

The Governor recommends a general fund base increase of \$250,000 per year to fund two additional school safety specialists to meet the increased demands of Minnesota schools for information, advice, and assistance.

Rationale/Background:

The Minnesota School Safety Center (SSC), originally a federal grant-funded program, was reestablished by the legislature in 2012. The initial proposal intended to provide staffing of four people; however, the current budget only supports three full-time employees.

The SSC provides facility security assessments, emergency plan reviews, active shooter/violent intruder response procedures, school resource officer (SRO) training, threat assessments, de-escalation, exercise support, and program information briefings to teachers, staff, principals, superintendents, school boards, and local law enforcement. The effectiveness of these offerings is enhanced by the fact that SSC staff are consultants and advisors, not regulators.

Early in the center's operation, staff made fewer than one presentation/contact per week with local schools. In 2012, they worked with approximately 35 K-12 public schools. As the program matured and demand grew in response to an increase in school shootings across the country, the SSC expanded and extended its offerings to private, charter, and tribal schools, including some pre-K facilities. Currently, staff make four to five presentations/contacts each week, approaching 200 annually.

The SSC cannot meet the demand of current stakeholders and does not have the capacity to make program improvements. In addition, the SSC does not have the resources to create new initiatives identified by stakeholders, create formal school safety certificate programs/learning paths, develop POST-certified SRO training and continuing education programs, expand exercise design and support services, update and improve the resource library on the SSC website, or create better products to help schools plan post-incident procedures such as family reunification.

School safety preparedness is important for violent intrusions, natural disasters, hazardous material incidences, fires, or technology failure. This investment will help meet the increased demand for the SSC services throughout the state to assist in making Minnesota schools safer.

Proposal:

The Governor recommends a general fund appropriation of \$250,000 per year to support two additional FTEs to meet increasing demand for technical assistance to keep Minnesota children safe at school.

Equity and Inclusion:

School Safety Center programs are available to all K-12 schools, including public, private, charter, and tribal.

Expenditures	10,000	10,000	0	0
Transfer In	10,000	10,000	0	0
Net Fiscal Impact = (Expenditures – Revenues)	10,000	10,000	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$10 million from the general fund in FY20 and FY21 to replenish the Disaster Assistance Contingency Account (DACA) to meet projected needs for the non-federal share of federal-declared disasters and the state share of state-declared disasters.

Rationale/Background:

In 2014, the legislature created the Disaster Assistance Contingency Account in the special revenue fund. (Minnesota Statutes Chapter 12.221, Subd.6). Money in the disaster assistance contingency account is appropriated to the commissioner of public safety to provide the (1) cost-share for federal assistance following a presidential disaster declaration and (2) state public disaster assistance when the governor authorizes state disaster assistance under Chapter 12B.

The account provides financial relief to local governments and state agencies by reimbursing them for their eligible costs of responding to and recovering from disasters. Under Minnesota Statutes Chapter 12, the state is committed to provide the 25 percent non-federal share for FEMA disasters and the 75 percent state share for state disasters. Without adequate funds to reimburse communities, the applicants will bear the full costs until money is appropriated.

Since the DACA was established in 2014, the Governor has authorized state disaster assistance to local communities for 32 incidents, providing nearly \$25 million in state disaster relief to 72 counties and six tribal nations. Additionally, the DACA has provided more than \$26 million of the state's share (also referred to as the state match) of federal disaster assistance from FEMA, including the four most recent federally-declared disasters to help 76 counties and six tribal nations during the same time. Total transfers from the DACA for disaster assistance to Minnesota communities since its inception are approximately \$51.5 million.

Minnesota experienced 10 state-declared disasters during FY18. There are three more pending in FY19. Minnesota averages one major federal disaster declaration each year.

With adequate funding in the disaster contingency account, the Department of Public Safety is able to quickly reimburse communities for the eligible expenses without need for the legislature to appropriate the relief dollars for each specific disaster. It also avoids the need for, and costs of, special legislative sessions to appropriate money for disaster assistance.

Proposal:

The Governor recommends transferring \$10 million in FY20 and in FY21 to the disaster assistance contingency account in the special revenue fund. This appropriation is needed for the Department of Public Safety to meet its statutory requirement to provide disaster assistance in combination with or absent federal aid.

Equity and Inclusion:

The DACA is administered equally to all communities and groups, including tribal nations. This item can be sustained with consistent state general funding to meet the federal match requirement.

IT-Related Proposals:

Not applicable.

Results:

Type of Measure	Name of Measure	Previous	Current	Dates
Results	DACA funds transferred to disaster appropriations to reimburse local applicants.	\$13,558,831	\$6,188,957	2017/2018

Year to date FY19 transfers are \$12,039,751 with another \$2,887,390 pending for the most recent major federal disaster, FEMA-4414-DR, declared on February 1, 2019 for damages sustained in St. Louis County during the severe windstorm and storm surge flooding in October.

Statutory Change(s):

Department of Public Safety

FY 2020-21 Biennial Budget Change Item

Change Item Title: Vulnerable Adult Investigation Staffing

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	258	246	246	246
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	258	246	246	246
FTEs	2	2	2	2

Recommendation:

The Governor recommends a general fund base increase of \$246,000 per year to support two additional special agents in the Department of Public Safety Bureau of Criminal Apprehension (BCA) to provide statewide leadership, case assistance and training in the area of vulnerable adult investigations. The additional special agents will assist the BCA in protecting adults who, because of physical or mental disability or dependency on institutional services, are particularly vulnerable to maltreatment and will therefore create safer environments for these individuals. The FY20 appropriation includes \$12,000 for onetime equipment and training costs.

Rationale/Background:

By 2040, 21% of the Minnesota population will be 65 or older, compared with 12% in 2000. The 85 and older population will be three times larger than it was in 2000, and the trend will continue to grow. As our population ages, more individuals become dependent on caregivers and other programs to sustain their standard of living, take care of their needs, and ensure their financial stability. However, with this dependence comes the risk of fraud and other crimes committed against this population for criminal gain. These cases can be complex and multi-jurisdictional, and often create investigative challenges unique to working with a vulnerable population. Expertise in assisting local jurisdictions with investigating these cases and educating partners is critical.

The BCA currently heads the Minnesota Financial Crimes Task Force (MNFCTF), which investigates identity theft and related financial crimes across the state in conjunction with local law enforcement agencies. The BCA has assigned a special agent as the task force commander, one assistant special agent, three special agents and two criminal intelligence analysts. The proposed agents would be assigned to this section within the BCA.

The MNFCTF also includes local participants from the St. Paul Police Department, Edina Police Department, Dakota County Sheriff's Office, Stearns County Sheriff's Office, Duluth Police Department, Beltrami County Sheriff's Office, Chisago County Sheriff's Office, Washington County Sheriff's Office, Bloomington Police Department and Forest Lake Police Department, as well as multiple federal participants.

The MNFCTF also holds and sponsors three annual financial crimes investigation trainings throughout Minnesota. BCA agents provide routine training and presentations to banking institutions and crime prevention associations throughout the state. On average, the MNFCTF provides training to approximately 250-350 law enforcement and civilian personnel in a fiscal year.

The MNFCTF Agents and Task Force Officers assist local, state, and federal agencies with some of the most complex financial crimes occurring in Minnesota. Throughout investigations the BCA has noticed an upward trend in crimes against vulnerable adults. This proposal would allow dedicated agents to work on these crimes with other state agencies and local jurisdictions to combat the exploitation of vulnerable adults in Minnesota.

Proposal:

The Governor recommends funding two additional special agents to provide statewide leadership, case assistance, and training focusing in the area of vulnerable adult investigations. The additional special agents will assist the BCA in protecting adults who, because of physical or mental disability or dependency on institutional services, are particularly vulnerable to maltreatment and will therefore create safer environments for these individuals.

This investment would ensure that the BCA and the MNFCTF are providing our law enforcement partners with the proper investigative support and training necessary to conduct successful prosecutable cases, therefore preventing crimes of fraud against our vulnerable adult population.

Equity and Inclusion:

This proposal affects the safety of all Minnesotans.

Department of Public Safety

FY 2020-21 Biennial Budget Change Item

Change Item Title: Drug Support Capacity Enhancement

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	1,648	1,242	1,242	1,242
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,648	1,242	1,242	1,242
FTEs	10	10	10	10

Recommendation:

The Governor recommends appropriating from the opioid stewardship fund \$1.242 million per year and \$406,070 of onetime costs in FY20 to the Department of Public Safety. The funding will support three additional Special Agents and one Criminal Intelligence Analyst to investigate heroin and other drug crimes and six forensic scientists to reduce the current drug evidence turnaround time. The onetime costs in FY20 support training, equipment, and laboratory renovation expenses to accommodate additional scientists. This proposal is part of a package of proposals recommended by the Governor to address rising rates of opioid use. The package of proposals is funded by new fees on opioid manufacturers, wholesalers, and entities that handle controlled substances.

The agents and analyst will also be responsible for providing statewide training to local law enforcement on heroin and other opioid investigations including how to investigate fatal overdoses. The three agents would be strategically located across the state near reservations to provide the additional resources to tribal nations needed to combat the opioid crisis and other drug trends. The Criminal Intelligence Analyst would be responsible for supporting investigative efforts in these cases as well as proactively identifying drug trends within the state.

Rationale/Background:

The Department of Public Safety Bureau of Criminal Apprehension (BCA) Investigations Division provides investigative assistance to criminal justice agencies statewide. BCA agents and analysts are located in two regional offices located in St. Paul and Bemidji and ten field offices strategically located throughout the state. Services provided include the investigation of complex narcotics investigations. These investigations are both challenging and time-intensive. The BCA provides critical services that many agencies cannot support locally due to the time and expertise needed, in addition to jurisdictional considerations.

Over the past two years, the BCA has dramatically shifted resources in the narcotics division to investigate heroin and other opioid abuse. The threat posed by heroin and opioids in Minnesota has reached epidemic proportions with devastating impacts on public health and safety. Opioids not only impact those abusing drugs but also their children, family members, and friends.

In 2015, 330 deaths in Minnesota were linked to heroin and prescription opioids, rising to 395 in 2016. According to the Minnesota Department of Human Services (DHS), treatment admissions for heroin use disorders have risen 105% from 2011-2016. Admissions for other opioids, such as prescription pain medication decreased 29.3% during that same timeframe. While the decrease with other opioids such as prescription pain admissions is encouraging, it is clear that heroin, fentanyl, and fentanyl analogs are replacing prescription drugs.

The North Central High Intensity Drug Trafficking Area's (NC HIDTA) 2018 threat assessment indicates that prescription opioid abuse remains the second greatest threat for the fourth consecutive year in Minnesota after heroin. Opioid pharmaceuticals in the region include oxycodone, hydrocodone, methadone, morphine, tramadol, fentanyl, and various fentanyl analogues. This high-availability is corroborated by large increases in pharmaceutical seizures by NC HIDTA and Minnesota Violent Offender Enforcement teams (MN VCETs). Various enforcement initiatives within Minnesota report over a 500-600% increase between 2015 and 2016. The NC HIDTA 2019 threat assessment says that heroin and opioid substances such as fentanyl and various fentanyl analogues along with pharmaceuticals remain a significant threat in Minnesota.

The BCA's Forensic Science Service (FSS) records show the number of cases requiring analysis for opioids has grown by 87% in the last five years. Submission of evidence for this type of testing has increased 48% in the past two years. From 2015 to 2017 the FSS has seen an increase in heroin, fentanyl and carfentanyl submissions. In 2016, the FSS had its first submissions for carfentanyl with a total of 12 cases; in 2017, there were 77 submissions. Fentanyl submissions have risen from 12 in 2015 to 140 in 2017 and heroin has increased from 753 in 2015 to 1,083 in 2017.

This increase in the number of submissions for analysis, along with various other challenges including speedy trial demands and evolving drug trends, have resulted in an average turnaround time of 120 days at the end of 2017, four times the time deemed acceptable by prosecutors and judges. The increase in capacity requested in this change proposal will allow the FSS to reduce the turnaround time for controlled substance evidence submissions.

Proposal:

The Governor recommends funding for three new Special Agents to investigate heroin and other opioid cases and one Criminal Intelligence Analyst to support those efforts. These additional employees will also be responsible for providing statewide training to local law enforcement on heroin and other opioid investigations including how to investigate fatal overdoses. The proposal also supports six new forensic scientists to reduce the backlog of evidence to be tested as well as reduce the turnaround time for evidence submitted. The proposal includes onetime costs for supplies, equipment, and workspace preparation necessary to increase the program capacity.

Equity and Inclusion:

This proposal affects the safety of all Minnesotans. The investment in reducing turnaround times in drug cases increases public safety by moving these cases more quickly through the process, while ensuring civil liberties. In addressing the rising opioid epidemic, particular concern arises when considering that Minnesota ranks highest among all states in the ratio of mortality rates due to drug poisoning by heroin and other opioids among American Indians/Alaska Natives in comparison to Whites and African Americans/Blacks to Whites. This proposal recognizes this disparity and will locate investigative staff in strategic locations to work closely with tribes.

IT Related Proposals:

Results:

The following metrics can be used to assess the quality and impact of services provided by the BCA FSS Drug Chemistry Section. Data for the past six years is included below. The Quantity metric demonstrates the increase in demand observed between 2013 and 2018 (113% overall increase – see table for annual trend). The Quality metric demonstrates the amount of time elapsed between submission of the evidence to the laboratory and reporting of results for these cases. Additional staffing and implementation of a new case processing approach have contributed to a general increase in quality of the services provided by decreasing the turnaround time in 2018. However, it is still 118% higher than it was in 2013 (see table for annual trend). The Results metric shows the backlog of cases (delayed more than 30 days).

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Case submissions for controlled substances analysis	4830	10,266	2013/2018
Quality	Time lapse (days) between submission and reporting	39	85	2013/2018
Results	Cases waiting over 30 days for testing	208	987	2013/2018

Department of Public Safety

FY 2020-21 Biennial Budget Change Item

Change Item Title: Disaster Assistance Contingency Account Deficiency

Fiscal Impact (\$000s)	FY 2019	FY 2020	FY 2021	FY 2022
General Fund				
Transfer Out	10,000	0	0	0
Other Funds				
Expenditures	10,000	0	0	0
Transfer In	10,000	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	10,000	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends appropriating \$10 million from the general fund in FY19 to replenish the Disaster Assistance Contingency Account (DACA) to meet projected needs for the non-federal share of federal-declared disasters and the state share of state-declared disasters for the remainder of FY 2019.

Rationale/Background:

In 2014, the legislature created the DACA in the special revenue fund (Minnesota Statutes Chapter 12.221, Subd. 6). Money in the DACA is appropriated to the commissioner of public safety to provide (1) cost-share for federal assistance following a presidential disaster declaration and (2) state public disaster assistance when the governor authorizes state disaster assistance under Chapter 12B.

The account provides financial relief to local governments and state agencies by reimbursing them for their eligible costs of responding to and recovering from disasters. Under Minnesota Statutes Chapter 12, the state is committed to providing the 25 percent non-federal share for FEMA disasters and the 75 percent state share for state disasters. Without adequate funds to reimburse communities, the applicants will bear the full costs until money is appropriated.

Since the DACA was established in 2014, the Governor has authorized state disaster assistance to local communities for 32 incidents, providing nearly \$25 million in state disaster relief to 72 counties and six tribal nations. Additionally, the DACA has provided more than \$26 million of the state's share (also referred to as the state match) of federal disaster assistance from FEMA, including the four most recent federally-declared disasters to help 76 counties and six tribal nations during the same time. Total transfers from the DACA for disaster assistance to Minnesota communities since its inception are approximately \$51.5 million.

So far in FY19, the Governor has authorized state disaster assistance four more times to provide an estimated \$5.7 million in relief. Additionally, the DACA funded more than \$5.4 million for the non-federal share of the federal disaster, FEMA-4390-DR, to provide relief from severe storms and flooding in June and July 2018. Another \$2.887 million transfer is pending for the most recent major federal disaster, FEMA-4414-DR, declared on February 1, 2019 for damages sustained in St. Louis County during the severe windstorm and storm surge flooding in October.

Springtime weather is usually fraught with snowmelt flooding, ice storms, and early-season thunderstorms and tornadoes. Between the known storms and the upcoming storm season, additional resources in the amount of \$10 million are needed to meet our obligations. Without additional funding for the DACA, DPS will be unable to reimburse communities for the eligible expenses of their recovery from disaster damage for the remainder of FY19.

As of February 8, 2019 the balance in the DACA is approximately \$220,500. The pending obligation for FEMA-4414-DR of \$2.887 million creates a deficiency of \$2.7 million, which doesn't include costs of disasters that may occur in the remainder of FY19.

Proposal:

The Governor recommends transferring \$10 million in FY19 to the disaster assistance contingency account in the special revenue fund so DPS can meet its statutory requirement to provide disaster assistance in combination with or absent federal aid for the remainder of FY19. If funding is not available by March 1, 2019, DPS will have to delay assistance payments for the latest federally declared disaster in Duluth.

Equity and Inclusion:

The DACA is administered equally to all communities and groups, including tribal nations.

Department of Public Safety

FY 2020-21 Biennial Budget Change Item

Change Item Title: Gun Violence Prevention

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures (Public Safety)	188	38	38	38
Expenditures (District Courts)	162	162	162	162
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	350	200	200	200
FTEs (District Courts)	2	2	2	2

Recommendation:

The Governor recommends general funds totaling \$350,000 in the FY20 and \$200,000 each year ongoing for measures to prevent gun violence. Of this amount, \$188,000 in FY20 and \$38,000 ongoing is for the Department of Public Safety to modify and maintain the Gun Permit Background Check system and \$162,000 each year is for two FTEs in the District Courts to process anticipated petitions for extreme risk protection orders.

Rationale/Background:

The increasing number of deaths and injuries to individuals from firearms can and must be reduced. Current law requires individuals to pass a background check before buying a firearm at licensed firearm dealer. However, criminal background checks are not required for private sales, including online and at gun shows. Expansion of the application of existing background checks for disqualifying offenses is one method to use to keep firearms away from individuals who are legally prohibited from having them.

As of January 2019, 13 states have passed laws that allow a court petition process as a tool to prevent firearm violence. This prevention method provides a means where concerned family members or law enforcement can petition a court to remove firearms from an individual's possession if there is evidence that the person presents a significant danger of bodily injury to themselves or others. These orders can prevent gun violence acts of suicide, domestic violence, and mass shootings by allowing informed and concerned individuals to present warning signs to a neutral arbitrator who then determines whether the risk is serious enough to warrant the individual's firearms be removed from their possession.

Proposal:

The funding included in the budget provides resources to implement two proposals currently introduced in the legislature. First, the governor recommends a proposal to create a new requirement for background checks when private parties transfer any firearm. With the exception of immediate family members, private parties must obtain a transferee permit and all transfers will be subject to a background check. Private parties who are unable to produce the record of the transfer may be subject to criminal charges.

Second, the funding is to support a proposal that creates an Extreme Risk Protection Order (ERPO) process in statute. The ERPO process allows a family member, household member, a guardian, a law enforcement agency, or city or county attorney to petition a court to have an individual's firearms withheld for a fixed period. To obtain the order, the court must agree that the individual poses a significant danger of bodily injury to themselves or other persons. A hearing is provided as well as an emergency petition process to be used when there is an

immediate and present danger of bodily injury. Under this proposal, new offenses are created for providing false information in a petition or with an intent to harass, abuse or threaten another or for violating an extreme risk protection order.

IT-Related Proposals:

Results:

None.

Statutory Change(s):

Minnesota Statutes 624.7131, 624.713

Department of Public Safety

FY 2020-21 Biennial Budget Change Item

Change Item Title: Background Check for Contractors at Noncriminal Justice Agencies

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends a change to statutes that would require federal fingerprint-based background checks for contractors working with criminal justice information in noncriminal justice agencies. Background checks have an associated fee that covers both the amount charged by the Federal Bureau of Investigation (FBI) as well as the costs incurred by the Bureau of Criminal Apprehension (BCA) to conduct the checks. The money collected will be deposited in the existing special revenue fund currently operated by the BCA. Estimating the number of checks that will be conducted cannot be accurately done at this time.

Rationale/Background:

Criminal justice information includes state and federal criminal history maintained by the FBI and at the state level. Criminal justice information details an individual's interactions with various parts of the criminal justice system. As prescribed by statute, criminal justice information is also used to determine whether an individual should have a particular license, employment, housing, or other legal rights.

The FBI imposes a number of requirements on individuals who have access to its criminal justice information. A 2018 FBI audit in Minnesota discovered a gap in the authority to conduct background checks.

In addition, the National Crime Prevention and Privacy Compact and Minnesota Statutes sections 299C.58 and 299C.582, requires Minnesota to ensure compliance with compact provisions, rules, procedures and standards. The National Crime Prevention and Privacy Compact Council requires a background check when noncriminal justice agency functions associated with criminal justice information are outsourced.

This proposal amends Minnesota Statutes section 299C.46, subdivision 3(g) to authorize federal and state fingerprint-based background checks for contractors working with criminal justice information in certain noncriminal justice agencies. Currently, statute authorizes background checks for contractors in all criminal justice agencies with access to criminal justice information. This proposal would impose the requirement on the remaining group of contractors who work with noncriminal justice agencies who receive criminal justice information but do not have a secure connection.

Proposal:

The proposal would amend statutes to authorize additional federal, fingerprint-based background checks for contractors working with criminal justice information in noncriminal justice agencies. These checks are needed to meet FBI requirements and to secure criminal justice information used in noncriminal justice agencies to make decisions about licensing, housing, employment or other benefits.

The fee charged for the background check will add capacity to meet the increase in volume of background checks provided. Fees collected for background checks are deposited in a special revenue fund authorized by Minnesota Statutes section 299C.10, subdivision 4. Historically, fees deposited in this fund have been used to pay the salaries of the employees who perform the background checks and for hardware, software upgrades, software licenses, infrastructure, server space, and other expenses associated with maintaining the criminal history system and its component parts. The background check fee of \$15 was instituted in 2000. It does not, however, cover all of the costs of operating the criminal history system. In 2016, that amount was \$5.8 million and it will increase with the implementation of a new criminal history system that was deployed in March of this year.

Background check fees bring in a revenue of \$2.8 million per year, resulting in a shortfall that is covered by general fund dollars to keep the system operational. The BCA expects that the requested background check will not alter this outcome.

Implementation will occur when the U.S. Attorney General has approved the policy language as required by Public Law 92-544.

Equity and Inclusion:

The impacts on these groups is the same as for any other group required to be the subject of a background check prior to receiving a license, employment, housing or another benefit.

IT Related Proposals:

Not applicable.

Results:

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Federal fingerprint-based background checks	64,772	72,435	FY17/FY18

Statutory Change(s):

Minnesota Statutes 299C.46, subd. 3(g).

Department of Public Safety

FY 2020-21 Biennial Budget Change Item

Change Item Title: Reduced Cigarette Ignition Propensity Account

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0

Recommendation:

The Governor recommends funding from the Reduced Cigarette Ignition Propensity (RCIP) account be used for research, development, distribution and presentation of fire and life safety education programs throughout the state of Minnesota. There would be no impact to the current operating (base) budget of the State Fire Marshal Division (SFMD) of the Department of Public Safety (DPS).

Rationale/Background:

Every three years, all cigarette manufacturers who sell cigarettes in the state of Minnesota must certify their brand(s) of cigarettes to the standards of Minnesota Statute 299F.851. Along with documentation of testing and performance standards, cigarette manufacturers must pay a fee of \$250 per cigarette brand to the State Fire Marshal. Currently, statute allows the funds in this account be used by the State Fire Marshal to implement the statute. Each testing cycle generates revenues of approximately \$250,000. The State Fire Marshal would like to use up to \$75,000 annually of existing funds for fire and life safety education programs throughout Minnesota.

From 2005 through 2017, there have been 3,778 smoking-related fires (wildland and structural) throughout Minnesota causing more than \$5.3 million in damages to property. Of those, 2,113 were classified as “structure fires.” On an average, the state of Minnesota sees 421 fires per year caused by smoking and smoking materials. During that period, there were 227 deaths caused by smoking-related fires, which is approximately 16 fatalities a year. Smoking-related fires comprise 27% of all fire deaths and 21% of all property loss.

The State Fire Marshal provides training and educational material to fire departments across the state to provide fire safety programming in their communities. Studies have shown the number of fire deaths directly associated with cigarette smoking has remained relatively consistent over the past 40 years.

A growing concern is the number of youth-set fires. From 2005 to 2017 a total of 735 fires were linked to juveniles 17 years old and younger. In the mid-1990’s, the Youth Firesetter Prevention and Intervention program (YFPI) was created through legislation to address this problem. Plans to develop new, updated, and relevant material have been delayed until sufficient funding is available. DPS remains concerned over the number of fires and fire deaths and believes that increased education and training is critical. The SFMD is committed to developing materials that make a life-changing impact for Minnesotans to reduce the number of fires and fire deaths.

Proposal:

The Governor recommends using existing RCIP funds to continue current Fire and Life Safety Education (FLSE) initiatives and expand the delivery of those messages through previously unused mediums and develop material designed for young (post-high school) and older adults. This proposal is in the spirit of the original intent of the

RCIP fund by using funds to attain a measurable decrease in the number of fires and fire deaths caused by smoking, smoking materials, and smoking paraphernalia.

Equity and Inclusion:

This proposal applies equally throughout Minnesota. The SFMD will ensure that cultural aspects of tobacco use is respected in targeted materials.

Statutory Change(s):

Minn. Stat. 299F.857

Program: Homeland Security and Emergency Management (HSEM)dps.mn.gov/divisions/hsem/**AT A GLANCE**

- Workforce: 68 employees
- HSEM oversees the statutory requirement that every county and city has an emergency management program.
- During the last seven years:
 - Nine federally declared disasters.
 - Thirty-two state-declared disasters.
 - \$232 million of state and federal disaster aid distributed.
- Services strengthen emergency readiness and homeland security across the state, including school safety and railway accident response preparedness.
- Supported security operations for major public events like the 2014 All-Star Game, 2016 Ryder Cup, and 2018 Super Bowl.

PURPOSE & CONTEXT

HSEM helps Minnesota communities prevent, prepare for, respond to, and recover from natural and human-caused disasters.

We build communities that can effectively respond to emergencies and have the ability to recover quickly from the effects of disaster.

We also strengthen homeland security by sharing information, providing resources, and planning to deal with the after-effects of a terrorist attack.

Our primary customers are county emergency management directors.

SERVICES PROVIDED

The program consists of three primary activities:

- Emergency Management Performance Grant (EMPG)
- Radiological Emergency Preparedness (REP)
- Emergency Planning and Community Right-to-Know Act (EPCRA)

EMPG ensures that state and counties have active and effective emergency management programs. The federal government provides 50 percent of the funding and requires a 50 percent nonfederal cost-share match. Key focus areas include:

- Preparing for all types of emergencies, such as flooding or train derailments.
- Helping communities recover from disasters.
- Providing safe and secure schools.
- Responding to railway accidents involving oil and other hazardous materials.

REP assures the state is capable of protecting Minnesotans in the event of an incident or accident at our two nuclear power plants. Assessments from the utility company cover the costs for this work.

EPCRA regulates facilities that use, store or release hazardous materials. It informs communities of the hazardous materials in their jurisdiction so they can develop effective emergency response plans. EPCRA is funded with a combination of General Fund and Environmental Fund appropriations. It generates revenue from fees assessed on regulated facilities.

To make sure the people in Minnesota are safe, we:

- Educate individuals and families on how to be ready for an emergency.
- Support local emergency management programs.
- Keep the state emergency operations center ready for immediate use.
- Prepare state agencies to provide emergency support to local government.
- Conduct training, exercise, and professional certification programs.
- Work with Federal Emergency Management Agency (FEMA) to bring federal disaster assistance to the state.
- Support statewide emergency response teams.

We work closely with local emergency managers, first responder organizations (law enforcement, fire and emergency medical services, etc.), professional associations, voluntary service organizations, functional needs specialists, private industry, citizen groups, state agencies, U.S. Department of Homeland Security (DHS), FEMA, tribal governments, and elected officials.

Minn. Stat. Chapter 12 (<http://www.revisor.mn.gov/statutes/cite/12>) creates the division and establishes its duties, including nuclear emergency response, disaster assistance, mutual aid agreements, and specialized response teams.

Minn. Stat. Chapter 299K (<https://www.revisor.mn.gov/statutes/cite/299K>) regulates planning for and responding to hazardous chemical emergencies, and authorizes enforcement of the federal Emergency Planning and Community Right to Know Act, United States Code, title 42, sections 11001 to 11046.

Minn. Stat. Chapter 115E.08 subd. 3b, (<https://www.revisor.mn.gov/statutes/cite/115E.08>) defines duties related to railroad and pipeline safety.

Program: Bureau of Criminal Apprehension (BCA)dps.mn.gov/divisions/bca/**AT A GLANCE**

- Workforce: 436 employees
- Approximately 1,700 criminal justice agency partners
- More than 140,000 agent hours conducting criminal investigations annually
- More than 90 crime scenes processed annually
- More than 17,000 cases where evidence was examined annually
- More than 478,000 civil background checks annually
- More than 1 million criminal justice agency computer queries per day
- More than 8,000 criminal justice professionals received training annually
- More than 9,100 Minnesota Duty Officer calls resulting in more than 29,000 notifications to state agencies to respond annually

PURPOSE & CONTEXT

The BCA prevents, investigates, and solves crimes by working with our criminal justice partners. We contribute to our agency's mission by providing specialized services and expertise to assist Minnesota criminal justice agencies in finding, identifying and arresting criminals. The BCA provides this support through statewide deployment of special agents, two crime laboratories, more than 30 criminal justice information systems, and law enforcement training courses.

SERVICES PROVIDED

The BCA has three divisions that work with criminal justice agencies to make Minnesota safe:

- **Investigations:** Special agents provide specialized skills to assist local law enforcement agencies with death, narcotics and missing person cases. These agents help with cases across city or county boundaries or during long-term criminal investigations. The BCA manages predatory offender registrations, leads the Internet Crimes Against Children Task Force, leads the Minnesota Human Trafficking Investigators Task Force, and provides law enforcement information sharing through the Minnesota Fusion Center.
- **Forensic Science Laboratories:** The state's only full-service, accredited laboratories are operated by the BCA. The scientists perform analysis of physical evidence collected by law enforcement across the state. The Crime Scene Response Team is a joint effort between the laboratories and investigators that gathers evidence at serious crime scenes throughout Minnesota. The test results help solve crimes, convict the guilty and exonerate the innocent.
- **Minnesota Justice Information Services (MNJIS):** This division collects, manages and provides access to criminal justice information with a focus on sharing data electronically. This includes connectivity to the Federal Bureau of Investigation and other states to ensure that complete, timely and accurate information is available to make critical decisions during the criminal justice process.

To make sure people in Minnesota are safe, we:

- Assist local law enforcement with criminal cases that require skills and resources they do not have in their agency
- Help local law enforcement collect evidence at crime scenes by sending special agents and scientists with specialized tools

- Perform forensic analysis on crime-scene evidence for all law enforcement agencies in the state and provide expert testimony when needed
- Provide instrumentation and certification for breath alcohol testing throughout the state of Minnesota
- Provide access to multiple data sources that provide information to criminal justice professionals to use in evaluating cases
- Provide training for criminal justice professionals in advanced skills, leadership, business practices, and use of BCA technology
- Provide information sharing and analysis through the Minnesota Fusion Center

We work closely with law enforcement, prosecutors, courts, probation agencies, corrections, and professional associations to provide exceptional leadership while building and implementing cutting-edge programs and services for the protection and safety of all in Minnesota.

RESULTS

Program: State Fire Marshal (SFM)

dps.mn.gov/divisions/sfm/

AT A GLANCE

- Workforce: 58 employees
- Fire arson investigators investigated 510 fire scenes and provided 69 consultations in 2017. Of those, 90 were determined to be arson.
- Inspection teams conducted 3,112 initial and 1,353 follow-up inspections in 2017
- There were 68 fire deaths in 2017, 57 (84 percent) of which were in residential/multi-family structures
- Fire code specialists received 2,290 requests for code interpretations annually
- Allocated Shared Services Grants totaling \$119,000 to assist five fire departments in 2017

PURPOSE & CONTEXT

The SFM protects lives and property by fostering a fire-safe environment through fire prevention education, regulation, enforcement, investigation, data collection, and emergency response.

The program's primary customers include the fire service, law enforcement, general public, public schools, health care facilities, business and industry, construction contractors, hotels and motels, and day care and foster care facilities.

SERVICES PROVIDED

The SFM addresses key fire-safety issues with the goal of preventing incidents that result in fire deaths, injuries and loss of property, and have a negative impact on the general public and economy of the state. The SFM works closely with local fire service officials to increase fire prevention awareness by:

- Adopting and enforcing the State Fire Code.
- Conducting fire and life safety inspections in regulated facilities.
- Providing fire prevention training programs and materials.
- Providing Youth Firesetter Prevention and Intervention programs (YFPI).
- Conducting fire/arson investigations.
- Regulating the fire protection industry.
- Analyzing Minnesota fire incident data.
- Licensing explosive manufacturers.
- Certifying public fireworks display operators.
- Certifying cigarette manufacturers' compliance with fire safety standards.
- Responding to major fire emergencies and disasters.
- Providing grants to study local shared fire services.
- Providing technical assistance to local fire authorities.

RESULTS

Program: Alcohol and Gambling Enforcement (AGE)

dps.mn.gov/divisions/age/

AT A GLANCE

- Workforce: 19 employees
- 35,590 current alcohol licenses in Minnesota
- 22,000 slot machines and 300 blackjack tables in Minnesota
- AGE collects \$3 million in alcohol and gambling license fees annually

PURPOSE & CONTEXT

AGE protects and serves the public through regulation and enforcement of the state's liquor and gambling laws, providing stability and integrity in the alcoholic beverage and gaming industries.

SERVICES PROVIDED

AGE provides oversight of two industries: alcohol and gambling.

- Alcohol licensing staff and field agents:
 - Issue, approve and monitor 35,590 liquor licenses.
 - Register and maintain 52,000 alcohol beverage product labels.
 - Perform routine and pre-license inspections and investigations.
 - Provide industry training and educational outreach to new liquor licensees.
- Gambling agents:
 - Investigate criminal violations of the state's gambling laws.
 - Monitor compliance of the state-tribal compacts.
 - Inspect blackjack and slot machines at 20 tribal casinos.
 - License and regulate gambling manufacturers and distributors.
 - Provide support services and investigative services to other state gaming agencies.

AGE provides training, education, and assistance to both industries, law enforcement, and the public.

Program: Office of Justice Programs (OJP)dps.mn.gov/divisions/ojp/**AT A GLANCE**

- Workforce: 38 employees
- Grants provided to programs statewide: 422 annually
- More than 1,600 Crime Victim Justice Unit contacts annually
- More than 1,500 reparations claims processed annually
- Training provided to over 1,200 professionals annually

PURPOSE & CONTEXT

OJP improves community safety and assists crime victims. OJP provides leadership and resources to 1) reduce crime in Minnesota, 2) improve the functioning of the criminal justice system, and 3) assist crime victims by providing resources at the local level using simplified processes, user-friendly systems, and improved technology. OJP provides constituents quality training, technical assistance, and best practices information.

SERVICES PROVIDED

OJP provides assistance to crime victims, youth, and families in three distinct program areas: grants to local programs, crime victim reparations, and crime victim justice. In addition, as part of those programs, OJP collects and analyzes data, directs program evaluation, provides training, and develops reports on a variety of criminal justice topics.

- **Grants Management:** OJP provides grants and grant management services to programs to improve personal and community safety and improve the criminal justice system, including:
 - Assisting in funding youth and community crime prevention and intervention; juvenile delinquency prevention; violent crime enforcement teams; sex trafficking investigations; and safety and support services for victims of domestic violence, sexual assault, child abuse, and general crime.
 - Providing programmatic and administrative monitoring services and technical assistance to grantees to ensure appropriate expenditure of funds and optimal program outcomes.
 - Training crime victim service providers and juvenile and criminal justice practitioners to improve program services.
- **Crime Victim Reparations:** The Crime Victim Reparations Act, passed in 1974, created the victim compensation program to help victims of crime cope with their financial losses. These services are provided through the Reparations Unit within OJP by reimbursing costs incurred as a result of a violent crime to help victims recover their health and economic stability.
- **Crime Victim Justice Unit (CVJU):** CVJU is a victim rights compliance office that works to ensure that crime victims in Minnesota are treated appropriately and their statutory rights are upheld. The CVJU:
 - Investigates violations of crime victim rights to ensure the fair and respectful treatment of victims and improve victim satisfaction.
 - Trains criminal justice professionals on their statutory crime victim rights obligations.
 - Provides victims with information about their rights and navigating the criminal justice system to ensure victim participation in the process.
 - Oversees the Victim Information and Notification Everyday (VINE), the statewide automated victim notification service.

OJP also coordinates two major training events —the OJP Conference on Crime and Victimization and the Minnesota Victim Assistance Academy— to provide criminal justice and crime victim professionals with the opportunity for training in emerging and best practices.

OJP supports Minnesota’s policy-makers and leaders by providing thorough and accurate data analysis and research through the Minnesota Statistical Analysis Center (MNSAC) on all aspects of the criminal justice system. This information assists policy makers at all levels to identify emerging critical issues and to improve the effectiveness of Minnesota’s justice system. MNSAC provides criminal justice information to the public and practitioners and conducts and disseminates relevant juvenile and criminal justice research to improve safety outcomes. MNSAC also assists criminal justice stakeholders in program evaluation to ensure effective public safety outcomes.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Youth engaged in prevention/ intervention programming statewide	15,830	14,590	CY 2016/ 2017
Quantity	Youth-serving programs funded by OJP	85	79	CY 2016/ 2017
Quality	Percentage of trainees rating annual crime and victimization conference as meeting their expectations	94%	84%	CY 2016/ 2017
Quantity	Counties where crime victims received some level of service	87	87	FFY16/ FFY17
Results	Domestic violence victims provided emergency shelter & created a safety plan	7,813	7,463*	FFY16/ FFY17
Quantity	Reparations claims received	1,280	1,539	FY2016/17
Results	Percentage of reparations claimants who rated services good to very good	87%	94%	FY2016 FY2017
Quantity	Grants open and active, monitored monthly with technical assistance provided as needed	385	422	FY2016 FY2017

*The number of people in emergency shelter decreased due to longer lengths of shelter stay. Lengths of shelter stay have decreased due to a shortage in affordable supportive housing as well as a change in federal reporting requirements (omitting hotel/motel stays).

Grants to local programs to aid youth intervention operate under the authority provided to the Commissioner of the Minnesota Department of Public Safety under Minn. Stat. 299A.73 (<https://www.revisor.mn.gov/statutes/cite/299A.73>).

The Crime Victim Grants Unit operates under the authority provided to the Commissioner of the Minnesota Department of Public Safety under Minn. Stat. 611A.32 (<https://www.revisor.mn.gov/statutes/cite/611A.32>) governing grants to battered women’s programs.

The Crime Victims Reparations Board is governed by the Minnesota Crime Victims Reparations Act, Minn. Stat. §§611A.51-611A.67 (<https://www.revisor.mn.gov/statutes/cite/611A.51>).

The Crime Victim Justice Unit operates under the authority provided to the Commissioner of the Minnesota Department of Public Safety by the Crime Victim Oversight Act, Minn. Stat. §§611A.72-74 (<https://www.revisor.mn.gov/statutes/cite/611A.72>).

Program: Emergency Communication Networks (ECN)

dps.mn.gov/divisions/ecn/

AT A GLANCE

- Workforce: 12 employees
- 911 Public safety answering points (PSAPs): 102
- Nineteen federal partners
- \$13.6 million granted annually to help support 911 dispatch centers
- \$1.5 million in grant dollars provided to local units of government for equipment, training and exercises
- \$23.3 million annual bond payment for build-out of allied radio matrix for emergency response (ARMER)
- \$9.6 million annual maintenance on ARMER
- Almost 97,000 ARMER radios used by emergency personnel

PURPOSE & CONTEXT

ECN funds and supports interoperable public safety-grade, mission-critical communication solutions. This allows public safety 911 dispatchers, emergency services personnel, state, local, and federal agencies to easily communicate and provide immediate responses to all Minnesota citizens and visitors requesting emergency assistance.

SERVICES PROVIDED

- Provide a state-of-the-art voice and data communications system to 100 percent of Minnesota citizens and visitors requesting emergency assistance.
- Achieve 95 percent mobile radio coverage across all rural and metro counties, permitting emergency responders to communicate with every 911 Call Center PSAP and with one another seamlessly when responding to requests for emergency assistance.
- Provide grant dollars to local units of government to purchase necessary equipment to respond to requests for emergency assistance.
- Develop training applications to support regular comprehensive region-wide training and exercise drills for public safety 911 dispatchers and responders.
- Support the Statewide and Regional Emergency Communications Governance structure to ensure all users have a voice in how Minnesota's interoperable public safety systems function through collaboratively developed and implemented standards.

Program: Minnesota Board of Firefighter Training and Education (MBFTE)mbfte.org**AT A GLANCE**

- Currently 21,000 firefighters in Minnesota
- The MBFTE issues licensure to full-time firefighters (required) and volunteer/paid on-call firefighters (voluntary) in Minnesota. There are currently 3,822 licensed firefighters.
- A firefighter license is valid for three years from the date of issuance for a fee of \$75.
- \$2 million available for initial firefighter training reimbursement for FY 19
- \$4.4 million available for fire training reimbursement for FY 19

PURPOSE & CONTEXT

The mission of the MBFTE is to standardize fire training by providing funding and licensing to firefighters in Minnesota. Board members are appointed by the governor as specified by law. Funding for the activities of the MBFTE is allocated by the legislature through the Fire Safety Account. In addition, the firefighter license fee supports the licensing function of MBFTE.

The MBFTE contributes to the statewide outcome of keeping people in Minnesota safe by promoting a higher level of fire training for all firefighters through funding and oversight on the quality of instructors and training curriculum. The MBFTE issues licensure to full-time firefighters (required) and volunteer/paid on-call firefighters (voluntary) in Minnesota. The MBFTE has the authority to issue and revoke licenses in accordance with Minnesota Statute 299N.

The primary customers of the MBFTE are the fire chiefs and the more than 21,000 firefighters of Minnesota, as well as local government officials. Citizens and visitors to Minnesota are stakeholders in how well the firefighters perform their jobs based on their training.

SERVICES PROVIDED

The MBFTE was established by the Minnesota Legislature to:

- Review fire service training needs and make recommendations on training to Minnesota fire service organizations.
- Establish standards for educational programs and qualifications for instruction.
- Establish standards for which reimbursement will be provided for firefighter training and education.
- License firefighters.

MBFTE reimburses fire departments for firefighter training programs provided the training meets national or state standards and the instructor is approved. Funding is also provided for training programs to fire service associations/groups to hold seminars, workshops, and conferences, which allow firefighters to take advantage of specialized training.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of fire departments requesting reimbursement for training expenditures	644	683	FY 2016/ FY 2017

Narrative

The Department of Public Safety receives federal funds for a wide variety of operations and projects impacting the Safety of Minnesota citizens. These grants come from a variety of federal agencies, each with their own application, award, expenditure, reporting and reimbursement processes and procedures. Most of the federal funds are ongoing grants that serve specific operations and projects implemented by the Department of Public Safety. The Department relies on these funds in managing their budget.

Larger grants include funds for Highway Traffic Safety (NHTSA), Disaster Assistance, Homeland Security, Motor Carrier Safety (MCSAP), Impaired Driving, and Victims of Crime (VOCA). Other grants the Department receives include funds for Law Enforcement, Internet Crimes Against Children, Distracted Driver, and Violence Against Women (VAWA).

Several of the federal grants require matching funds, or maintenance of effort commitments. These vary by federal agency and specific grant. The Department agrees to these commitments when accepting the federal grant award. Matches are covered with existing Department budgets and in some cases by local governments. Maintenance of effort commitments are managed within the budget and require tracking of certain expenditures and a related reporting process. Department federal awards that require a match or maintenance of effort commitment are identified in the table above.

Award estimates are based on past experience and current communication with the Department division staff and federal contacts. We do not estimate federal disaster funds for future years since it is impossible to accurately predict future disasters and their financial impact. We do not anticipate any major trends that impact funding at this time.

AT A GLANCE

- Workforce: Department of Public Safety (DPS) has 2,042 employees
- DPS has nine operational divisions that include:
 - Alcohol and Gambling Enforcement Division (AGED)
 - Bureau of Criminal Apprehension (BCA)
 - Driver and Vehicle Servicers (DVS)
 - Emergency Communications Networks (ECN)
 - Homeland Security and Emergency Management (HSEM)
 - Minnesota State Patrol (MSP)
 - Office of Justice Programs (OJP)
 - Office of Traffic Safety (OTS)
 - State Fire Marshal Division (SFM), which also includes the Office of Pipeline Safety (OPS) and the Minnesota Board of Firefighter Training and Education (MBFTE)
- DPS serves the majority of the state's population as well as numerous public safety, governmental, and non-profit organizations in the state.

PURPOSE

DPS is committed to protecting citizens and communities through activities that promote and support prevention, preparedness, response, recovery, education, and enforcement in order to ensure that **people in Minnesota are safe**. These objectives are achieved through:

- A focus on saving lives
- Providing efficient and effective services
- Maintaining public trust
- Developing strong partnerships

DPS provides the administrative structure for nine diverse divisions focused on improving safety for all people in Minnesota. The agency also has four divisions that provide human resource, fiscal, internal affairs, and communication support. Through its divisions, DPS works in partnership with city, county, state, federal, and not-for-profit agencies to improve safety. We are funded through federal, state general fund, special revenue, trunk highway, and highway user tax distribution funds.

BUDGET

Spending by Category

FY 17 Actual

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

For the FY 16-17 biennium, the Department of Public Safety was primarily financed through legislative appropriations from the general fund (\$217 million), funding from the federal government (\$210 million), and other funds, which includes user fees (\$531 million in the special revenue fund).

STRATEGIES

We ensure that all people in Minnesota are safe by:

- Providing full-service laboratory support to all law enforcement agencies; and providing training and criminal justice integration services to prevent and solve crimes.
- Providing services to prevent, prepare for, respond to, and recover from natural and other types of disasters.
- Providing training, funding, and technical assistance to improve community safety and to assist crime victims.
- Provide training, investigation, inspection, regulation, data collection, and emergency response services to protect lives and property from fire and pipeline incidents.
- Enforcing the state's liquor and gambling laws to protect the public from illegal alcohol sales, illegal consumption, and illegal gambling.
- Providing funding, technical assistance, and research to prevent traffic deaths and serious injuries.
- Providing law enforcement services, education, and assistance to ensure the safe and efficient movement of traffic on Minnesota roads, the protection of the driving public, and the security of the Capitol Complex.
- Regulating motor vehicles, vehicle dealers, and licensed drivers to ensure that state and federal law are implemented and followed.
- Providing funding and technical assistance to operate a state-of-the-art 911 system and the implementation of a state-wide interoperable communication system for emergency responders.
- Providing overall leadership, policy, and direction to ensure the agency successfully meets its goals.

The Department of Public Safety's legal authority comes from Minn. Stat. 299A (<https://www.revisor.mn.gov/statutes/?id=299A>).

Recommendation:

The Governor recommends a special revenue fund base increase of \$6.358 million per year for positions to increase the capability and capacity of the Department of Public Safety (DPS) Driver and Vehicle Services division (DVS) to respond to the demand from stakeholders, business partners and the public to provide services more efficiently and effectively. The proposal includes onetime funds in FY20 and FY21 for short term staff to respond to immediate needs in turnaround times and for equipment costs. The Governor recommends increasing vehicle services and driver's license fees to support this investment in customer service responsiveness. The proposal also includes a base increase from the Highway User Tax Distribution fund (HUTD) for new fuel tax audit staff.

Rationale/Background:

DVS serves 11 million customers each year with motor vehicle titling, registration, and plates; driver education, testing, and licensing; identification cards; disability license plates and parking certificates; commercial truck registration and fuel tax collection; vehicle dealer licensing; salvage and reconstructed vehicle inspections; collection and dissemination of data, and auditing data usage by all users. DVS maintains the integrity of these processes to ensure the accuracy and security of data, prevent fraud, and protect public safety.

DVS collects fees and taxes that support the state's transportation system and other state programs designed to protect public safety. In addition, the DVS Contact Center includes 24 phone lines and multiple email channels which allow the public, deputy registrars, driver's license agents, and law enforcement to contact DVS with questions and concerns regarding vehicle and driver license records.

DPS has heard from Minnesotans, partners, stakeholders, and the Legislature that more investment is needed to increase responsiveness, reduce the turnaround time for licenses and titles, improve scheduling for testing and inspection, and ensure that fiscal and data audit processes are robust.

Resources to Meet Office of Legislative Auditor Recommendations:

The Office of the Legislative Auditor (OLA) released the MNLARS Transaction Accuracy Special Review on September 25, 2018. This review provided recommendations to DVS related to improving the accuracy of MNLARS transactions. The following proposals will support the recommendations to evaluate and improve policies, procedures, communications, and training for all system users.

- **Financial Oversight and Auditing**

DVS has an annual budget of approximately \$50 million and collects more than \$1 billion in state revenues annually. DVS currently does not have sufficient staffing to complete necessary financial audits to ensure accurate collection and distribution of funds. The MNLARS Transaction Accuracy Special Review

recommended DVS develop procedures to monitor the accuracy of various taxes collected, implement fee and tax changes on a timely basis, and initiate corrections and system enhancements as necessary for MNLARS. This proposal aligns with the recommendations in the Special Review and will result in better revenue tracking and reporting, auditing, and funding source reconciliation by adding three positions to assist with billing reconciliation, purchasing, contract and grant administration, assisting business partners, and making required finance related adjustments in the MNLARS Vehicle and Driver systems.

The proposal includes an appropriation of \$141,000 in FY20 and \$147,000 in FY21 to support three additional positions to increase oversight and auditing functions.

- **Data Practices Compliance**

DVS must adhere to a complex array of federal and state laws, rules, and regulations. Due to the large volume of legislative activity at both state and federal levels, the need to ensure compliance with these requirements is paramount. In addition, ensuring the security and appropriate use of the data collected by DVS is critical to protecting Minnesotans and individuals whose data is available in our systems. Minnesota law requires DVS to track and address any inappropriate data access by users.

The proposal includes an appropriation of \$107,000 in FY20 and \$102,000 in FY21 to support two additional positions to mitigate risks, enhance oversight of user access, ensure compliance with state and federal requirements, and provide ongoing reporting and auditing for data use compliance.

- **Refund Issuing**

DVS collects more than \$1.4 billion annually on behalf of the state of Minnesota. The majority of funds are deposited into the HUTD account, however, DVS collects funds for counties, other state agencies, special interest groups, veteran groups, and other legislative mandated funds. The DVS Cashiers Unit reconciles accounts and processes refunds. DVS was unable to process customer refunds after the MNLARS roll out in July 2017. This resulted in a significant backlog of work when the functionality became available.

The proposal includes an appropriation of \$76,000 in FY20 and \$82,000 in FY21 to support two staff to fully meet and maintain account reconciliation and refund processing turnaround times. With this investment, DVS will be able to meet and maintain a 30 day turnaround time.

IRP IFTA Fuel Tax Audit Staff Increase and Appropriation from HUTD

Minnesota has authorized reciprocity of registration and fuel taxes for vehicles engaged in interstate commerce under the International Registration Plan (IRP) and the International Fuel Tax Agreement (IFTA) which is administered through DVS.

Under both agreements, member jurisdictions are obligated to audit 3 percent of the fleets based in the jurisdiction for both IRP and IFTA. Additionally, member jurisdictions may be required to conduct special audits and appeals in addition to scheduled audits. There are approximately 6,000 Minnesota based carriers with approximately 40,000 vehicles licensed and registered in the state which equate to 400 scheduled audits and special audits per year. The audits for both agreements require jurisdictions to conduct detailed audits of carrier mileage and fuel tax reporting as well as a carrier's overall compliance with both agreements. Each audit can take 24 staff hours depending on its complexity, requiring an annual capacity of 9,600 staff hours. There are currently four full-time equivalent (FTE) auditors providing 8,300 staff hours annually. The staff shortage resulted in DVS paying about \$54,000 in overtime in FY18.

Under both agreements, member jurisdictions are obligated to equitably administer the agreements within each state which can be achieved through providing Minnesota based carriers with a dedicated staff member who can provide carriers with training and guidance in complying with both agreements, and assistance in interpreting and applying requirements of the agreements into the carrier's operation. The addition of a Fuel Tax Audit Liaison would provide this assistance to motor carriers operating in Minnesota.

The proposal includes an appropriation of \$471,000 in FY20 and \$456,000 ongoing from the HUTD to fund the existing four positions and two new positions. These positions are currently funded through a special revenue account. The purpose of this unit is solely to audit the fuel tax returns of vehicles engaged in interstate commerce. Funding these positions appropriately from the HUTD would allow DVS to hire three dealer and vehicle inspector positions using current special revenue appropriations.

Realignment of Vehicle Services Resources

- **Dealer and Vehicle Inspections**

Minnesota law requires an inspection for each temporary dealer license before a permanent dealer license is granted. Subsequent, unannounced inspections are also required. The purpose of the inspections is to ensure compliance with state laws regarding the collection and submission of motor vehicle taxes and the timely transfer of ownership documents. There are approximately 3,900 licensed dealers in Minnesota and DVS conducts 2,300 dealer inspections annually.

Minnesota law requires an inspection of vehicles that are branded as “SALVAGE” before being registered. Approximately 16,700 vehicle inspections are conducted throughout Minnesota annually at two dedicated inspection sites, and 15 part-time leased inspection sites located at local dealer or auto repair shops. An inspection fee of \$35 is collected which is split between the general fund (\$20) and the vehicle services special revenue account (\$15).

Currently, the responsibility of conducting these inspections is divided between the Vehicle Services and Driver Services program areas. Vehicle Services has four full-time equivalent (FTE) inspectors located in St. Paul and St. Cloud who perform about 783 dealer inspections and 13,400 vehicle inspections annually. Approximately 1,500 dealer inspections and 3,200 vehicle inspections are conducted by driver licensing examiners located in the ten regions throughout the state who assume this role as an extra duty.

Because the roles of dealer and vehicle inspector are extra duties for the regionally based driver licensing examiners, these tasks take them from their primary duties of administering written and road tests. These dual responsibilities hinder the ability of DVS to provide road tests and re-tests in a timely manner.

The proposal includes an appropriation of \$46,000 in FY20 and \$47,000 in FY21 to support one additional staff to administer dealer and vehicle inspections. DVS seeks to add a total of four dealer and vehicle inspectors. The other three will be supported by existing special revenue appropriations if the costs for the current IRP IFTA fuel tax auditors are supported with HUTD funds. The additional staff will be located in northern and southern Minnesota. These additional staff will allow the driver licensing examiners to focus exclusively on conducting driver examinations which will increase the ability to provide road tests and re-tests more quickly.

- **Regionally Based Deputy Liaisons**

There are 174 deputy registrar offices located throughout Minnesota who provide front-line customer service to Minnesotans in the titling and registration of motor vehicles, ranging from passenger vehicles to motorcycles, trailers to farm trucks, and all motor vehicle title transfers. Annually there are 6 million vehicle registrations and 1.7 million title transfers of which 75 percent occur at a deputy registrar office.

DVS deputy liaisons work closely with deputy registrars on procedural questions, training, interpretation, and implementation of changes in Minnesota law or administrative procedures, and auditing for internal controls and compliance with motor vehicle laws. The deputy liaison team also functions as a contact center for deputy registrars, taking 200 telephone calls and 100 email contacts per day. The volume of work for liaisons has increased since the launch of MNLARS in July 2017 and has significantly hindered the ability of liaisons to travel to deputy registrar offices to provide business process information, conduct training, and complete legally required compliance audits.

Due to the large volume of work for the deputy liaisons, driver examination regional supervisors also respond to deputy registrar questions within their region and conduct liaison tasks such as office visits

and interpretation of laws and rules. This hinders the driver examination regional supervisors from providing driver license examinations and road tests, as well as liaising with licensing agents on driver license issues. This reduces the number of driving examinations and tests administered annually and assistance available to address driver license issues.

The proposal includes an appropriation of \$448,000 in FY20 and \$487,000 in FY21 to support 12 deputy liaison staff to provide procedural information and training close to the deputy registrar offices by locating staff at additional locations across the state. This regional presence will provide a more adequate response to local offices and allow staff to meet with these offices routinely and better align staffing with our business partner and customer needs. Continuing to support these positions will allow the driver examination regional supervisors to focus on driver examination and services to provide road tests, retests and address driver services issues more quickly.

Reducing Vehicle Services Backlogs

- **Title and Registration Issuing Staff**

DVS staff process an average of 1.7 million vehicle title applications annually. Since the roll out of MNLARS in July 2017, DVS has not been able to maintain the 30-day title turnaround time expectation. Since the end of 2017, to augment staff, DVS has relied on a contract vendor to assist as well as contracting with the Minnesota Department of Revenue who have staff available during their off-season. However, these staff must return to their regular duties at the same time when title production increases.

The proposal includes an appropriation of \$1.392 million in FY20 and \$1.511 million in FY21 for 39 title processing positions. With this investment, DVS will review and process title applications within 30 days.

- **Disability Parking Certificate Processing**

DVS reviews and processes disability parking certificates. DVS staffing has not kept pace with the demand for these parking certificates. In 2004, DVS processed 65,000 certificates annually with five staff. Today, DVS has four staff and processes approximately 140,000 certificates annually. This insufficient staffing level has resulted in a 60-day processing time. The need for disability parking certificates will continue to increase as our population of aging Minnesotans continues to increase.

The proposal includes an appropriation of \$143,000 in FY20 and \$154,000 in FY21 to support four processing staff. With this investment, disability parking certificate applications can be reviewed and processed within 30 days.

Driver Services Staffing

- **Data Verification Unit**

With the implementation of Real ID, the number of Minnesota residents required to have verification of identity data increased. These verifications include Social Security Online Verifications (SSOLV) for the social security number of an applicant, Problem Driver Pointer System (PDPS) which verifies if an applicant has valid driving privileges in all states, Commercial Driver Licensing Information System (CDLIS) which verifies the driving privileges of commercial drivers and maintains the state the driver holds a commercial license, Systematic Alien Verification for Entitlements (SAVE) which verifies immigration status or naturalized/derived citizenship for Real ID and Enhanced credentials, and State-to-State (S2S) Verification Service which verifies electronically with other participating states if an applicant holds a non-commercial driver license or identification card in another state, ensuring a person only holds one credential in one state at a time.

Previously the legacy system used “Triple Check” to determine whether the application could proceed. The FAST driver system has more robust verification interfaces and programming to ensure the verification systems are applied uniformly across all license and identification card classes. The increase in credentials requiring verification and the improved programming has resulted in an increased number of transactions that must be reviewed before the credential can be issued. The volume is expected to

increase once S2S is implemented in 2019. The REAL ID statute requires a photo of the applicant be taken before taking any other actions with the application. Photos are compared to the previous photo on record and other photos in the DVS photo database. These verifications reduce duplicate records, fraudulent applications, and identity theft.

FAST Enterprises advised DVS that additional dedicated staff are required to complete this work. Minnesota also contacted other states that have implemented REAL ID and the required verification systems to determine best practices. All jurisdictions Minnesota communicated with to date added three to 10 staff to complete this work. These reviews and any resulting work must be accomplished before a credential can be issued. DVS currently has one dedicated staff to perform this work.

The proposal includes an appropriation of \$125,000 in FY20 and \$121,000 in FY21 to support three new staff to complete the review of photo and other verification system results. Failure to hire new staff for these reviews will result in a delay to the issuance of driver's licenses and identification cards.

- **Driver's License Issuing Staff**

DVS anticipates a higher volume of driver's license and identification card applications due to the availability of REAL ID compliant credentials, the statewide expansion of enhanced driver licenses and identification cards, and the federal enforcement deadline for REAL ID compliant credentials for domestic air travel and access to federal facilities in 2020. As the October 2020 date draws near, DVS estimates applications for REAL ID compliant credentials will increase and standard applications will decline.

DVS must review applications for REAL ID compliant credentials, enhanced driver licenses and identification cards, commercial driver licenses, new licenses and applications involving name changes. The number of documents required to review for a REAL ID compliant driver license or identification card, or an enhanced driver license or identification card, increases the time to review the application. The processing time for Real ID applications has doubled due to the additional documentation required, and the data capture of the relevant information. As of February 1, 2019, the following applications are waiting for processing:

- Standard applications: 23,522
- Real ID applications: 27,138
- Enhanced applications: 19,946

DVS currently has eight temporary positions funded to assist with processing this work. The funding for these positions will expire on June 30, 2019, and DVS anticipates a delay to the driver's license and identification card issuing process by about 2,800 credentials each day once this staffing ends.

The proposal includes an appropriation of \$1.111 million in FY20 and \$1.199 million in FY21 to support 29 driver services issuing positions and allow DVS to dedicate more resources to the issuance of applications for driver's license and identification cards to ensure faster and more efficient services to Minnesotans. With this investment, DVS will review and process driver license applications within 21 days.

- **Driver Compliance Support**

The driver evaluation unit provides guidance on reinstating driving privileges. Staff work with customers to address offenses such as habitual violations (moving violations), driving after withdrawal conviction, implied consent and DWI convictions, criminal vehicle operations, no proof of insurance or failure to provide insurance, no fault convictions, CDL disqualifications, child support, unpaid fines, and civil judgments.

Evaluators conduct administrative reviews, assess at risk drivers and their ability to safely operate a motor vehicle, enroll customers in the Ignition Interlock Device Program (IIDP), write limited licenses, handle all license withdrawals (suspensions, revocations, and inimical to public safety), disqualifications, and cancellations based on medical conditions, and process all medical correspondence to determine the

eligibility to maintain driving privileges. These services are provided to residents and out-of-state drivers who have records from Minnesota or violations in Minnesota.

Due to the complexity of customer issues, evaluators are required to understand Minnesota statutes, rules and regulations, and procedural and technical related processes. It takes six months to one year to develop a foundation of knowledge to provide proper information to customers.

Currently, driver evaluation staff based in the metro area travel over a four day period every week to a different region of Minnesota to conduct 30-40 hearings with customers. Removal of these staff from the Saint Paul office negatively impacts the availability of metro area hearings, slows down the processing of documents submitted for medical reviews and reinstatement requirements, and reduces the level of services that can be provided in the higher demand metro area. A minimum of 25-50 people are able to meet with an evaluator each day at metro locations.

The proposal includes an appropriation of \$291,000 in FY20 and \$314,000 in FY21 for seven positions to supplement both the metro staff and be regionally based in Duluth, Mankato, and St. Cloud to provide greater service to residents throughout Minnesota and process Ignition Interlock applications within two weeks.

- **New Exam Station**

The demand for knowledge tests and road tests continues to increase. On average, one examiner can administer 20 class D road tests per day or four CDL tests at a metro exam station. The exam stations are unable to keep up with the current demand for these services. As a result, continued lack of sufficient staff to complete these driver examinations results in delays to scheduling and completing exams for customers.

To address this demand, DVS would lease one additional exam station and staff it with seven examiners, three customer service staff and one supervisor. Depending on demand for the type of road tests, this location could administer Class D road tests and CDL skill tests, the same as other metro stations. By adding seven new examiners to administer Class D tests, it would increase road test appointment availability by 140 appointments per day. For each examiner assigned to administer CDL skill testing, an additional 20 CDL road tests would be available per week. This would increase CDL road test availability in the metro by 38 percent and Class D by 33 percent.

The proposal includes an appropriation of \$505,000 in FY20 and \$503,000 in FY21 for 11 additional staff and facility and equipment costs. The new site will increase the location, date, and time options available for Minnesotans seeking to take written tests, road tests, and complete applications for instruction permits, driver licenses, and identification cards.

Contact Center Staffing Increase

The DVS Contact Center includes the Public Information Center (PIC) which involves all public-facing contact channels (phone and email), and the Deputy Support Center which provides assistance to DVS business partners including deputy registrars, driver license agents, and law enforcement. The PIC receives more than 4 million incoming phone/email contacts annually with a staff of 43 agents. Due to chronic understaffing, the PIC is not able to process all the calls coming into DVS or respond to emails in a timely manner. Prior to the launch of MNLARS the agents could respond to only 32 percent of daily contacts, while 68 percent received a busy signal. Similarly, the deputy support agents often had wait times averaging 5 minutes with daily peaks reaching 40 minutes.

In 2018, DVS used HUTD funds to hire temporary agents to supplement existing staff, increasing PIC to a size of 83 agents. In October 2018, PIC received an average of 10,010 contacts per day. Capacity of public information agents to answer daily calls averages 50 percent, but many callers continue to receive a busy message and email response times exceeds 8 days.

The volume of calls to the Deputy Support Center has also increased. These business partners experience wait times averaging 20 minutes with daily peaks reaching 75 minutes. The deputy registrars and driver license agents continue to raise concerns about how long they wait on hold, often while assisting a customer.

The proposal includes an appropriation of \$2.577 million in FY20 and \$2.781 million in FY21 to support 63 PIC staff and 2 IT staff necessary to support and enhance the call center. With this investment, DVS will be able to reduce the average customer wait time to five minutes or less.

Proposal:

The proposal increases fees to support DVS staffing to respond to the demand from stakeholders, business partners, and the public to provide services more efficiently and effectively. It also appropriates HUTD funds for fuel tax audit staff, totaling \$471,000 in FY20 and \$456,000 ongoing. The proposal amends the following fees:

- Single plate: from \$4.50 to \$6.50
- Double plate: from \$6.00 to \$8.40
- Duplicate stickers: from \$1.00 to \$1.50
- Special plates: from \$10.00 to \$14.00
- Driver license/Identification: adds \$4.50 to every driver license/ID fee

Equity and Inclusion:

Driver and vehicle services are provided equally to all Minnesotans.

Statutory Change(s):

Minnesota Statutes 168.12 through 168.1299.

Department of Public Safety

FY 2020-21 Biennial Budget Change Item

Change Item Title: Public Safety Operational Support

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	131	131	131
Revenues	0	0	0	0
Other Funds				
Expenditures	0	405	405	405
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	0	536	536	536
FTEs	0	0	0	0

Recommendation:

The Governor recommends base increases in the general fund and trunk highway fund totaling \$536,000 per year starting in FY21 to maintain the services of the Public Safety Support division through payroll and lease costs. These services support the Department of Public Safety through the Commissioner's Office, Human Resources, Internal Affairs/Affirmative Action, and Fiscal and Administrative Services. Costs associated with the management of the department have continually increased due to inflation, payroll costs, and the increasing size and complexity of the department.

Rationale/Background:

This funding is needed for the Public Safety Support division because of a decrease in availability of federal funds, which have been used to cover costs normally associated with the general fund and trunk highway fund. Indirect costs approved annually by the federal government for the Department of Public Safety is based on complex calculations from the previous year expenditures and is formulated into a percentage that is applied against current year agency payroll expenditures that are paid with federal funds. Each year, this percentage changes and has fluctuated between 7 percent and 9 percent for the past several years. The funds collected are used primarily for the Fiscal and Administrative Services Division. It is now anticipated that this balance will be reduced by the end of FY20. The receipts in this account have been reduced in the past several years due to the percentage changes and the federal funds being used for agency payroll.

Proposal:

The Governor recommends additional operating funds to maintain the agency's current level of service. The costs include payroll for 2.5 FTEs in the Human Resources and Internal Affairs divisions and space rental. The positions are essential for the support and services these divisions provide for the entire agency and total \$298,000 annually. Space rental costs total \$238,000 per year. Moving these expenditures back to the division budgets will bring the indirect cost account in line with the anticipated annual receipts.

Equity and Inclusion:

This proposal impacts all aspects of the agency.

IT Related Proposals:

Department of Public Safety

FY 2020-21 Biennial Budget Change Item

Change Item Title: Technology Cost Increases

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	2,485	2,485	2,485	2,485
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,485	2,485	2,485	2,485
FTEs	0	0	0	0

Recommendation:

The Governor recommends a trunk highway fund base increase of \$2.485 million per year to support existing hardware, software, and MNIT staffing costs for the Department of Public Safety (DPS) Driver and Vehicle Services (DVS) division and public safety support division. This funding is to address identified hardware and software services and staffing costs that are not currently accounted for in the department's base technology budget, in addition to increased workstation replacement, support, and 24/7 help desk support costs attributable to the consolidation of core IT services into an enterprise services model.

Rationale/Background:

For the FY20-21 biennium, DPS' portion of MNIT administrative overhead expenses is projected to increase. MNIT overhead expenses include human resources, finance, procurement, enterprise project management, and security activities. These expenses are allocated to agencies based on their total IT spend and total number of dedicated MNIT staff as of fiscal year 2017.

In 2020, MNIT forecasts an increase in enterprise charges of \$462,022 for the transportation budgeted divisions in DPS that were not included in the existing budget. Existing enterprise usage fees will exceed the current technology budget by \$775,624 for infrastructure system hosting. DPS specific software and hardware for these divisions to support existing applications totals \$1,247,354 which is not covered by the existing technology budget. These actual charges include hardware for exam stations, telecommunications, printing maintenance, software licensing and support for hosting production environments.

Proposal:

The Governor recommends an ongoing trunk highway fund appropriation of \$2.485 million to fully fund DPS core technology services for software, hardware, and professional services for the transportation budgeted divisions. This proposal includes monthly software licensing costs, enterprise utilization costs, and personnel costs to support the technology infrastructure. Without this funding, DPS and MNIT cannot host or maintain these core DPS applications. A stable funding source will enable the departments to continue to operate these applications.

Equity and Inclusion:

DPS services are provided equally to all Minnesotans.

Department of Public Safety

FY 2020-21 Biennial Budget Change Item

Change Item Title: Soft Body Armor (Vest) Reimbursement Increase

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	45	45	45	45
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	45	45	45	45
FTEs	0	0	0	0

Recommendation:

The Governor recommends a general fund base increase of \$45,000 to cover the annual costs of peace officer vest reimbursements to local governments. This is a 7.5% increase to the general fund base for vest reimbursements.

Rationale/Background:

Minnesota Statute 299A.38 requires the Department of Public Safety (DPS) to reimburse peace officers and local governments for up to one-half, not to exceed an annually adjusted maximum, for soft-body armor purchases. The current general fund appropriation of \$600,000 per year does not cover the cost of the requests and DPS continues to receive reimbursement requests that cannot be filled. This base increase will help to fulfill all projected annual reimbursement requests.

The current average cost of a vest reimbursement is \$509, which has increased 12 percent since 2014. DPS projects the average reimbursement cost of a vest in FY20 will increase to \$524 and the agency will receive 1,231 reimbursement requests.

Proposal:

The proposal would increase the general fund base that DPS uses to reimburse local governments for the costs of soft body armor for peace officers.

Equity and Inclusion:

This request would affect all Minnesotans equally.

IT-Related Proposals:

Not applicable.

Results:

Type of Measure	Name of Measure	Previous	Current	Dates
Quantity	Number of soft body armor reimbursement requests	1,258	1,204	FY 2017 / FY 2018

Statutory Change(s):

Not applicable.

Department of Public Safety

FY 2020-21 Biennial Budget Change Item

Change Item Title: Highway User Tax Distribution (HUTD) Allocation Increase

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	5,226	5,226	5,226	5,226
Revenues				
Net Fiscal Impact = (Expenditures – Revenues)	5,226	5,226	5,226	5,226
FTEs	0	0	0	0

Recommendation:

The Governor recommends a base increase of \$5.226 million from the Highway User Tax Distribution (HUTD) fund to cover the full costs associated with license plate administration.

Rationale/Background:

Approximately \$1.3 billion is deposited annually into the HUTD from registration taxes on license plates, stickers, and registration notices. Minnesota Statute 168.381, subd. 4, appropriates funds from the HUTD to DPS for costs associated with the statute on manufacturing vehicle plates. The statute also appropriates funds from the vehicle services operating account in the special revenue fund for purchasing, delivering, and mailing plates, registration stickers, and registration notices. Increasing the HUTD funds for the full costs of license plate administration would allow DPS to use existing Vehicle Services operating funds for additional staffing for improved customer service responsiveness.

In FY18, the costs associated with manufacturing and distributing license plates, registration renewal notices, and registration stickers totaled \$13.462 million and DPS received \$8.236 million from the HUTD. Vehicle Services operating funds covered the difference of \$5.226 million. As a result, Driver and Vehicle Services (DVS) was unable to fill much needed positions and make critical investments in customer service technologies such as customer email management, additional web services, and self-service kiosks. The use of operating funds to cover the shortage negatively impacted customer service and is unsustainable in the long term.

If license plate and registration administration is fully funded by the HUTD, DVS would utilize existing operating funds to hire critical staff to improve customer service including telephone call agents and deputy registrar and driver license agent liaisons. Additionally, DVS could make critical investments in customer service technologies.

Proposal:

The Governor recommends a base increase of HUTD funds to fully fund the costs associated with the manufacture and distribution of license plates, registration stickers, and registration notices. This would allow DVS to use existing special revenue funding to hire critical staff and invest in customer service technology enhancements.

Equity and Inclusion:

Motor vehicle services are provided equally to all Minnesotans.

Department of Public Safety

FY 2020-21 Biennial Budget Change Item

Change Item Title: Application Server Migration

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	258	174	174	174
Revenues	0	0	0	0
Other Funds				
Expenditures	774	522	522	522
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,032	696	696	696
FTEs	0	0	0	0

Recommendation:

The Governor recommends additional funding of \$1.032 million in FY20 to migrate the Department of Public Safety (DPS) application servers from the Town Square Data Center to a new location. The general fund appropriation is \$258,000 in FY20 and \$174,000 ongoing, and the proposal includes ongoing appropriations from the trunk highway and highway user tax distribution funds (HUTD).

Rationale/Background:

There are currently 185 servers located in the Town Square location. Knowing that IT consolidation would be occurring, the decision was made to maintain the current Town Square Data Center for an additional eight to ten years after the passage of IT consolidation legislation in 2011. The current hardware is aging and reaching end-of-life. In addition, the current location is prone to flooding and continues to experience climate control issues. Because of these significant concerns, DPS and MNIT request funding to migrate these servers to a MNIT-approved hosting solution.

Proposal:

The Governor recommends ongoing funding from the general fund, trunk highway fund, and HUTD to migrate DPS applications from the Town Square location for ongoing hosting in a new location. This proposal includes monthly hardware expenses and software licensing costs and the costs for the existing staff to perform the migration. Without this funding, DPS and MNIT cannot continue to host these DPS applications, including the DPS public website. A stable funding source will enable the departments to obtain an effective hosting solution that is in line with MNIT security recommendations, running on supported operating system versions and without the risks and issues currently experienced in the Town Square location. The applications hosted in this environment are used by every DPS division and are critical in fulfilling the DPS mission.

Equity and Inclusion:

DPS services are provided equally to all Minnesotans.

Department of Public Safety

FY 2020-21 Biennial Budget Change Item

Change Item Title: MNLARS Vehicle and Driver Systems Development

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	21,403	17,335	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	21,403	17,335	0	0
FTEs	18	18	0	0

Recommendation:

The Governor recommends onetime general fund appropriations of \$21.403 million in FY20 and \$17.335 million in FY21. Of this amount, \$3 million in FY20 is to optimize development on the driver system developed by FAST Enterprises (FAST), \$1.637 million per year is for DPS Driver and Vehicle Services (DVS) business staff to support the development and testing of the MNLARS vehicle system, and the remaining funds support contractor costs to complete the MNLARS vehicle system.

Rationale/Background:

The project to replace and modernize DVS 1980-era information systems was initially funded in 2008 by the addition of a \$1.75 technology surcharge on transactions. This fee was modified in 2012 and reduced to \$1.00, and expired on June 30, 2016. In the 2018 legislative session, DPS and MNIT requested \$10 million in emergency funding to support continued development and stabilization efforts on MNLARS for the remainder of FY18 and an additional \$33 million dollars to complete the project. DPS received \$9.65 million in emergency funding.

The Governor's recommended funding will allow MNIT to finish the optimization of the MNLARS vehicle system, build in the functionality DVS and their business partners (e.g. deputy registrars, auto dealers) need, and finally migrate the remaining systems from the costly mainframe legacy environment. DPS is the last user of the SUPRA mainframe system at the State of Minnesota and costs for that platform continue to rise by a minimum of \$375,000 every two years. Not only are the remaining 1980's era mainframe applications costly, but they run technology that is obsolete. Support for the SUPRA mainframe is limited and only available at a premium cost to the agency. This request also funds \$3 million for the optimization of Rollout 2 of the FAST driver system.

Improvements made on MNLARS over the last year have provided more stability and increased functionality and resolved over 350 defects and gaps since the system was launched in July 2017. With the \$9.65 million appropriation in the 2018 legislative session, MNIT successfully launched seven stable, reliable releases for MNLARS. These releases continue to deliver on the priorities developed by DVS and their business partners. DPS and MNIT have engaged their business partners in a myriad of ways including membership on the executive steering committee, increased training demonstrations, hands-on user acceptance testing, and participation in release launch testing. Fully funding MNLARS would allow MNIT to complete the system by June of 2021 and provide an application that meets stakeholder's needs as well as technology maintenance requirements for modern systems.

Proposal:

The Governor recommends onetime general funds of \$21.403 million in FY20 and \$17.335 million in FY21 to complete the software development and system optimization efforts to finalize both the MNLARS vehicle system and FAST driver system.

Equity and Inclusion:

Driver and motor vehicle services are provided equally to all Minnesotans.

IT Related Proposals:

Replace end of life mainframe systems and complete the final phases of the MNLARS system development for stakeholders and deliver the final phases of the FAST driver system.

Department of Public Safety

FY 2020-21 Biennial Budget Change Item

Change Item Title: MNLARS Vehicle and Driver Systems Ongoing Maintenance and Operation

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	12,582	16,060	16,060	16,060
Revenues	14,667	16,000	16,000	16,000
Net Fiscal Impact = (Expenditures – Revenues)	(2,085)	60	60	60
FTEs	0	0	0	0

Recommendation:

The Governor recommends a \$2.00 transaction fee on vehicle and driver transactions to support the ongoing operation and maintenance costs of the new driver system and the vehicle system. This ongoing maintenance budget is needed to support secure, reliable, and stable information systems that are responsible for collecting more than \$1 billion in fees annually and provide Minnesotans with necessary driver and vehicle services. The fee would be effective starting August 1, 2019 to allow sufficient time for programming and notifying customers of the fee in their renewal notices. Because the fee will be collected for only eleven months in FY20, there will be less revenue in the first year than in subsequent years.

Rationale/Background:

The project to replace and modernize DPS Driver and Vehicle Services (DVS) 1980-era information systems was initially funded in 2008 by a \$1.75 technology surcharge on vehicle registration renewals. In 2012 this fee became \$1.00 and then it expired on June 30, 2016. The amount collected from the technology surcharge was dedicated to the development of new motor vehicle and driver services information systems. These systems have launched and now require ongoing maintenance and support; however, there is no funding mechanism to support the ongoing operations of these systems. Since the systems are not complete, there are still some applications that remain in the legacy system. The legacy system is scheduled to be decommissioned by June 2021.

The recently implemented Driver Services system is a vendor-based solution that includes a state obligation for annual maintenance costs and computer software hosting charges at MNIT. Without this funding, DPS and MNIT will not be able to keep either system operational. A stable funding source will enable effective long-range project planning, updates to the systems needed to enact legislative changes, hosting, data storage, security, and disaster recovery. Because these are complex systems critical to performing required services for Minnesotans, they require a team of skilled technical staff and contractors and a robust technical infrastructure to assure an accurate, reliable, and secure system available to meet the needs of DVS, its business partners, and all Minnesotans. The maintenance and operation of information systems must adhere to legal requirements, government and industry standards, and best practices, while ensuring security to withstand cyber-attacks. Ongoing systems maintenance funding is necessary to operate within these standards and ensure continuous operation of these systems that generate more than \$1 billion annually in fee revenue for the state.

Proposal:

The Governor recommends reinstating the technology surcharge on vehicle and driver transactions at a rate of \$2.00. The revenue raised from the fee would support the ongoing costs of maintaining the driver and vehicle systems including staffing and infrastructure such as hosting, software development, and security.

This recommendation includes funding for the ongoing licensing, maintenance, and operational costs for staffing and infrastructure of driver and vehicle systems. The fees will also support current MNIT staff and FAST contractors necessary to provide ongoing security, hosting, database management, user credentials control, monitoring, technical support, data storage, network, and disaster recovery.

Equity and Inclusion:

Driver and vehicle services are provided equally to all Minnesotans.

IT Related Proposals:

This proposal funds approximately 30 existing MNIT FTE positions to support these systems, and 8 additional MNIT FTEs for the driver system.

Department of Public Safety

FY 2020-21 Biennial Budget Change Item

Change Item Title: Deputy Registrar Reimbursement

Fiscal Impact (\$000s)	FY 2019	FY 2020	FY 2021	FY 2022
General Fund				
Expenditures	10,000	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	10,000	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$10 million from the general fund in FY19 to reimburse deputy registrars adversely affected by the roll out of the Minnesota Licensing and Registration System (MNLARS) in 2017.

Rationale/Background:

The roll out of MNLARS in 2017 caused a loss of business to deputy registrars across the state. This proposal works to address those losses by providing an opportunity for reimbursement.

Proposal:

The Governor recommends funding to reimburse deputy registrars whose businesses were adversely affected by the roll out of MNLARS.

Equity and Inclusion:

Affects Deputy Registrars across the state of Minnesota.

IT-Related Proposals:

Not applicable.

Results:

Type of Measure	Name of Measure	Previous	Current	Dates

Department of Public Safety

FY 2020-21 Biennial Budget Change Item

Change Item Title: Soft Body Armor (Vest) Reimbursement Deficiency

Fiscal Impact (\$000s)	FY 2019	FY 2020	FY 2021	FY 2022
General Fund				
Expenditures	374	0	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	374	0	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends onetime general funds of \$374,000 in FY19 to fund the backlog of reimbursement requests from local law enforcement agencies for the cost of soft body armor.

Rationale/Background:

Minnesota Statute 299A.38 requires the Department of Public Safety (DPS) to reimburse peace officers and local governments for up to one-half, not to exceed an annually adjusted maximum, for soft body armor purchases. The current general fund appropriation of \$600,000 per year has not covered the cost of the requests from local law enforcement agencies, and DPS continues to receive reimbursement requests that cannot be filled. If the current rate of reimbursement requests continues, the FY19 need will be \$374,000.

The current average cost of a vest reimbursement is \$509, which has increased 12 percent since 2014. DPS projects the average reimbursement cost of a vest in FY20 will increase to \$524 and the agency will receive 1,231 reimbursement requests.

Proposal:

The Governor recommends onetime general funds to meet the remaining vest reimbursement requests for FY19.

Equity and Inclusion:

This request would affect all Minnesotans equally.

IT-Related Proposals:

Not applicable.

*HUTD Transfers out include transportation funds only.				

Recommendation:

The Governor recommends the state commit to a major transportation investment plan to fund the estimated \$6 billion dollar gap that exists between funding needs and available revenues over the next 10 years. The Governor proposes filling the \$6 billion gap in road and bridge funding by:

- Initiating a 20 cent gas tax increase, including fuel in distributor storage at the start time of each increase (phased-in over two years in October and April in FY20 and FY21)
- Indexing the gas tax to inflation (beginning in FY23)
- Increasing the registration tax, effective January 1, 2020 (increase tax rate from 1.25 percent to 1.5 percent and base tax fee from \$10 to \$45; change the depreciation schedule; amend base value calculation by removing destination charge and hold harmless provision of statute)
- Increasing the motor vehicle sales tax from 6.5 percent to 6.875 percent, effective December 1, 2019
- Authorizing \$2 billion in trunk highway bonds over 8 years starting in 2022

The gas tax, registration tax, and motor vehicle sales tax increases will fund roads and bridges for the state trunk highways, county state aid highways, and municipal state aid streets. In the FY22-23 biennium, when revenue changes are completely phased in, the increased revenue from the gas tax, motor vehicle sales tax, and registration fees are forecast to increase available resources for each transportation fund by 30 percent.

To help lower- and middle-income Minnesotans pay for transportation investments, the governor proposes an increase to the Working Family Credit of \$100 for each single or head of household recipient and \$200 for each married filing jointly recipient. This proposal is described in the Tax Aids, Credits and Refunds section. In addition, while the gas tax increase would impact how our rate compares to neighboring states, the existing qualifying service station tax credit would ensure Minnesota service stations within 7.5 miles of the state border receive refunds that effectively reduce the rate to not more than three cents per gallon above the rate of the neighboring state.

Other Components:

In addition to the new funding above, the Governor recommends:

- Returning the auto parts sales tax, 9.2 percent motor vehicle rental tax, and 6.5 percent sales tax on motor vehicle rentals currently deposited into the Highway User Tax Distribution (HUTD) Fund as of FY2018 back to the General Fund beginning in FY2020. This results in an increase to the General Fund of \$395 million in FY20-21 and \$404 million in FY22-23.
- Restoring the motor vehicle lease sales tax to the pre-2018 distribution levels. This results in \$32 million returned to the General Fund, annually.
- In total, the General Fund would receive \$459 million in FY20-21 and \$468 million in FY22-23.

General fund revenues are reduced by \$8 million in the FY20-21 biennium due to increased petroleum refunds and income tax interactions with the registration tax. General fund expenditures decrease by \$170,000 for the biennium for increased aid to counties with casinos under [M.S. 270C.19](https://www.revisor.mn.gov/statutes/cite/270C.19) (<https://www.revisor.mn.gov/statutes/cite/270C.19>) due to the increase in gas tax.

Authorization for the sale of \$2 billion in trunk highway bonds over 8 years starting in 2022 (\$250 million per year). Debt service for these bonds is estimated to be \$22.2 million for the FY22-23 biennium.

Several components in this proposal require changes to the Minnesota Licensing and Registration System (MNLARS). Costs associated with changes to MNLARS will be funded through the Department of Public Safety's MNLARS budget recommendation.

Rationale/Background:

Minnesota cannot preserve and improve quality and performance of the state's transportation systems under the combined limitations of current investment levels and current lifecycle replacement practices. The consequences of underinvesting in the state's transportation system will include deterioration in service, increases in congestion, failing infrastructure and diminished ability to remain economically competitive. This is because transportation systems facilitate the efficient movement of people and goods and create the opportunity for economic development, enhanced productivity, job formation and sustainable growth. Without additional investment, the transportation system will not be able to expand to accommodate expected population and job growth. In addition, alternatives to driving alone must play a larger role in satisfying growing transportation demand - roads, transit and other transportation modes must work together as one system.

Road and Bridge Funding

The 2018 Minnesota Statewide Highway Investment Plan (MnSHIP) determined additional funding was needed for transportation, due largely to aging infrastructure and construction costs exceeding the growth of existing revenues. Overall, the department faces a \$6 billion gap in revenue over the next ten years above current fund

balance projections to fund needed investments in state road construction. Of this total gap, roughly \$4 billion is needed for preservation and modernization, and \$2 billion is needed for strategic expansion.

Without additional revenue, there will be:

- Increasing deterioration of pavement and bridges on state system. The percent of highway pavement considered in poor condition (rough driving surface) and the percent of bridge deck pavement considered in poor condition it is estimated to increase significantly in the next 20 years.
- Very little expansion to address population and economic growth
- Reductions in high priority products and service delivery

In addition, more operations and maintenance dollars are recommended, calculated at 5 percent of new Trunk Highway Fund revenues. This additional funding will be spent on snow plowing, fixing pot holes and guard rails, etc. Investing in operations and maintenance is needed due to declining asset conditions, increased snow and ice requirements, and the need for more timely maintenance.

Proposal:

Road and Bridge funding components

New revenues and bonding would be identified to help close the funding gap over the next ten years. The goal is an integrated transportation system that optimizes the movement of people and goods across the state. With new funding, we can:

- Improve asset management - preserve and modernize the existing system
- Invest in strategic mobility enhancements, including MnPASS and other intelligent transportation tools
- Complete strategic expansion on key corridors throughout the state
- Complete Main Street improvements

The benefits for Minnesotans will include:

- Reduced wear and tear on their cars
- Fewer stops at the fuel pump due to smoother roads and reduced congestion
- Fewer accidents
- More time doing what they need to do
- Reduced impacts on our environment

MnDOT has identified pavement and bridge needs as well as mobility projects that are not currently being addressed through its 10-year work plan. These unmet needs and projects will be given priority. These funds will provide for capital costs of construction as well as project development and engineering activities with contractor support, allowing the department to utilize this funding in the most efficient manner.

MnDOT proposes to utilize the increased operating appropriations for our highest-priority products and services. Some of these include:

- Snow and Ice - keeping the roads clear of snow and ice
- System Roadway Structures Maintenance – repair potholes (pavement repair)
- Bridges and Structures Inspection and Maintenance
- Intelligent transportation systems for improved safety and mobility

The Governor's proposal provides constitutionally dedicated funding increases that can be relied on over the long term and can only be used for transportation purposes. Returning auto parts and other taxes to the general fund results in the availability of funding for other state priorities.

Department of Natural Resources Funding Components

The Governor's proposal provides constitutionally dedicated funding increases that can be relied on over the long term and can only be used for transportation purposes. Returning auto parts and other taxes to the general fund results in the availability of funding for other state priorities.

The Department of Natural Resources (DNR) receives a portion of the unrefunded gasoline tax, which has supported the state's recreational motorized vehicle activities and forest roads since 1961. This funding is dedicated to the DNR with the broader goal that the unrefunded gasoline proceeds should support programs related to non-highway gasoline use.

This revenue enables additional investment in Minnesota's water recreation facilities and services. The proposal funds \$3.35 million annually for increased operations and maintenance of public water access sites and state trails (\$1.35 million) and increasing boating access site rehabilitation (\$2 million). Additionally, this proposal increases grants to local sheriff offices by \$300,000 annually to reimburse for search and rescue efforts.

This proposal also increases revenues to DNR's forest road account by \$170,000 in FY20, \$506,000 in FY21, \$670,000 in FY22, and \$705,000 in FY23. The state and counties (with a land commissioner) split this revenue 52% and 48% respectively. This increase funds additional graveling, grading, and drainage projects to maintain the state's 2,340-mile forest road network used by the forest industry, emergency responders and outdoor enthusiasts.

Transit Funding Components

Revenue from the motor vehicle sales tax is split between the HUTD (60 percent) and the Transit Assistance Fund (40 percent). The Metropolitan Council receives 90 percent of the motor vehicle sales tax revenue in the Transit Assistance Fund and MnDOT receives the remaining 10 percent for greater Minnesota transit.

Over the long-term, greater Minnesota transit revenues will increase from the proposed increased MVST rate. However, restoring the motor vehicle lease sales tax to the pre-2018 distribution levels results in a short-term reduction in revenue. To offset the decrease in revenue between FY20-23, MnDOT is amending internal accounting practices to allow additional spending of the motor vehicle lease tax revenue in the current year (current accounting practices involve carrying forward all of this revenue each year, and planning spending in the subsequent year).

Equity and Inclusion:

A safe, reliable and multimodal system of transportation is vital to ensuring equity and inclusion by connecting communities statewide. This needed funding will also provide additional contracting opportunities to certified small businesses and opportunities to work towards enterprise-wide goals of equity and inclusion.

IT Related Proposals:

N/A

Results:

Currently, Minnesota's total state gasoline taxes are 28th highest in the country, including District of Columbia. Since 2013, Minnesota has dropped from 19th highest state gasoline taxes, as a result of other states increasing their gasoline tax rate. Over a 10-year period, the inflation-adjusted tax on gasoline is projected to add an additional 28 cents to the price of a gallon of gasoline.

These investments would provide additional long-term sustainable and dedicated funding. MnDOT would plan to rehabilitate the system for the 21st century by:

- Improving an additional 1,800 miles of pavement and repair or replace an additional 300 bridges on state highways
- Accelerate progress toward the state goal of zero highway deaths with targeted installation of rumble strips, median barriers, lighting and other safety improvements. The Minnesota Toward Zero Death program has helped decrease injuries and deaths on the highway
- Keep roadside infrastructure in a state of good repair

In addition, MnDOT has operating performance measures that will be impacted by this proposal. All are anticipated to decline without additional funding; and this would reduce the decline. They include:

- Snow Plowing Performance – meet clearance targets
- Smooth Roads – percent of pavement patching addressed
- Percent of projects let in the year scheduled

Vehicle Registration Taxes: M.S. 168.013

Motor Vehicle Sales Tax: M.S. 297B.02

Motor Vehicle Lease Sales Tax: 297A.815

General Fund Transfers: M.S. 297A.94 and 297A.64

Department of Public Safety

FY 2020-21 Biennial Budget Change Item

Change Item Title: Rail Grade Crossing Safety

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Trunk Highway Fund				
Expenditures	0	0	0	0
Revenues	(750)	(1,500)	(1,500)	(1,500)
Special Revenue Fund				
Expenditures	750	1,500	1,500	1,500
Revenues	750	1,500	1,500	1,500
Net Fiscal Impact = (Expenditures – Revenues)	750	1,500	1,500	1,500
FTEs	0	0	0	0

Recommendation:

The Governor recommends increasing the funding for the Department of Transportation's rail grade crossing safety account from \$1 million to \$2.5 million per year in response to increasing needs for rail safety improvements on the trunk highway and local road system. This will be phased in over two years: \$750,000 increase in FY20 and \$1.5 million in subsequent years. This account is derived from a portion of State Patrol fine revenues (deposited in a Department of Public Safety account), and the increase in grade crossing funding would result in an equivalent decrease in the Trunk Highway Fund.

Rationale/Background:

There is an increasing need for safety improvements at rail grade crossings. Safety improvements at highway and rail grade crossings help motorists and pedestrians make safe decisions about crossing railroad tracks. These funds will allow for a significant increase in the number of small safety projects that can be programmed and delivered rapidly, such as sign replacements, crossing closures, roadway enhancements and signal circuitry upgrades. The funds can be used at any of Minnesota's rail crossings of public roadways.

Proposal:

The fine structure will not change; the increase of \$750,000 and then \$1.5 million will result in a corresponding reduction in the amount of fines deposited in the Trunk Highway Fund. This funding source is used statewide on an as-needed basis.

Equity and Inclusion:

This proposal is not expected to impact equity or inclusion. However, this investment may provide additional contracting opportunities to certified small businesses.

IT Related Proposals:

N/A

Results:

This initiative would be measured through increases in rail safety and will be documented to provide before and after measurements.

Statutory Change(s):

[M.S. 299D.03 subd. 5\(a\)\(1\)](https://www.revisor.mn.gov/statutes/cite/299D.03) (<https://www.revisor.mn.gov/statutes/cite/299D.03>)

Department of Public Safety

FY 2020-21 Biennial Budget Change Item

Change Item Title: Capitol Security Increase

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures	500	500	500	500
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	500	500	500	500
FTEs	3	3	3	3

Recommendation:

The Governor recommends a general fund increase of \$500,000 for the State Patrol to ensure sufficient staffing for the security of the Capitol Complex, the Governor's residence, and executive protection.

Rationale/Background:

The State Patrol secures events occurring on the Capitol Complex and the Governor's residence in Saint Paul and provides executive protection. Events have grown in frequency, size, and with greater passion both from permitted groups, counter groups, and impromptu groups over the past few years. These changing dynamics require additional permanent staffing and utilizing overtime to augment the staff available for security purposes.

Proposal:

The Governor recommends funding to increase the staff assigned to Capitol Security and Executive Protection and provide sufficient funding for overtime to ensure appropriate security levels for those who work and visit the Capitol Complex, the Governor's residence, and for executive protection.

Equity and Inclusion:

Security is provided to all communities, groups, and individuals working and visiting the Capitol Complex, the Governor's residence, and engaging with the state's executive leadership.

Results:

Department of Public Safety

FY 2020-21 Biennial Budget Change Item

Change Item Title: Electric Vehicle Infrastructure

Fiscal Impact (\$000s)	FY 2020	FY 2021	FY 2022	FY 2023
General Fund				
Expenditures (MPCA)	1,500	0	0	0
Highway Users Tax Distribution				
Revenues (DPS)	50	50	50	50
Transfer Out (DPS)	50	50	50	50
Special Revenue Fund				
Transfer In (MPCA)	50	50	50	50
Expenditures (MPCA)	50	50	50	50
Net Fiscal Impact = (Expenditures – Revenues)	1,500	0	0	0
FTEs	0	0	0	0

Request

The Governor recommends appropriating \$1.5 million from the general fund in FY20 to the Minnesota Pollution Control Agency (MPCA) and dedicating an ongoing \$25 electric vehicle (EV) registration fee increase to grants from MPCA for EV charging infrastructure. The annual registration fee for EVs will increase from \$75 to \$100, and the Department of Public Safety (DPS) will transfer the additional revenue from the Highway Users Tax Distribution Fund to the Other Miscellaneous Special Revenue Fund at the MPCA. MPCA's Resource Management and Assistance Division will distribute the grants. The one-time \$1.5 million increase in spending represents an 11 percent increase to MPCA's general fund FY20-21 base budget. The ongoing transfer of \$50,000 from the fee increase is new to the MPCA.

Rationale/Background

The transportation sector has eclipsed the electricity generation sector as the largest emitter of greenhouse gases (GHG) in Minnesota. Light-duty vehicles account for nearly 70 percent of the total GHG emissions for the transportation sector, representing a significant opportunity to realize the climate benefits of electrification in the transportation sector. Additionally, the EV market is at a tipping point where consumers other than early adopters are considering making the switch to an EV. However, a barrier to further EV adoption for many consumers is the current state of the charging network. While Minnesota's EV infrastructure is growing, demand for increased charging options remains high among EV owners and potential EV owners. Potential EV owners want to know they can travel to and from their favorite places in Minnesota without having to worry about range.

As part of its Volkswagen Settlement agreement the MPCA engaged in a robust stakeholder process, conducting nine public meetings and four stakeholder meetings to discuss use of the settlement funds. During these meetings one of the most common comments the agency heard was the desire for increased EV charging infrastructure. However, the MPCA is only allowed to spend 15 percent of Volkswagen Settlement funds on EV charging infrastructure.

In 2018 the MPCA issued Requests for Proposals (RFP) for both Direct Current Fast Chargers (DCFC) and Level 2 chargers. Under the RFPs, MPCA will provide grants to entities that will install charging infrastructure. Proposals seeking DCFCs were required to provide a 20 percent cash match and proposals seeking Level 2 chargers were required to provide a 20 percent or 40 percent cash match depending on the location of the Level 2 charger. The MPCA received requests for approximately \$3.2 million for DCFCs, greatly exceeding the available \$1.4 million.

Additionally, the agency received approximately \$500,000 in requests for Level 2 chargers while only \$158,000 was available.

Proposal

This proposal will increase financial support needed to accelerate deployment of EV charging infrastructure. The proposal will leverage funding from grant recipients through grant match requirements. This approach ensures that more funds are available for EV infrastructure buildout and users also contribute.

The \$1.5 million one-time appropriation of general funds and \$50,000 annually from the fee increase will be distributed via the agency's existing EV charging infrastructure grant program. Use of MPCA's existing programs will ensure use of the funds is solely for infrastructure development and that monies are distributed in a timely manner to the public. The DCFC grants will be distributed along highway corridors previously identified for infrastructure buildout by the MPCA and Minnesota Department of Transportation. Alignment with these corridors will ensure EV infrastructure is deployed to Greater Minnesota and the Metro.

Using the \$1.4 million distributed by the MPCA's Phase 1 Volkswagen EV Infrastructure Grants as a benchmark, the \$1.55 million in appropriations will provide grants for approximately 45 Level 2 chargers and 20 DCFCs in FY 2020 and approximately one Level 2 charger and one DCFC in FY 2021.

The fee increase requires changes to the Minnesota Licensing and Registration System (MNLARS). Costs associated with MNLARS changes are accommodated in the Department of Public Safety's MNLARS budget recommendation.

Equity and Inclusion

All Minnesotans would benefit from cleaner air under this proposal, including communities of color, low-income communities, and indigenous communities. Low-income communities, communities of color and indigenous communities are more likely to be near higher levels of air pollution. In these communities, high levels of traffic often contribute to the air pollution and any reduction in air pollution along high-traffic corridors will be an important step.

Additionally, points are awarded during the grant evaluation process for small businesses that are certified as veteran-owned, economically disadvantaged, or targeted group businesses in Minnesota based on ownership by a woman, a minority, or a person with a substantial physical disability.

Results

This proposal will accelerate the deployment of EV charging infrastructure and hopefully help spur the adoption of EVs. Even when charged on the electric power grid EVs are much cleaner than gasoline-powered vehicles. On average a gasoline-fueled car will emit (based on a well-to-wheel analysis) 11,000 pounds of carbon dioxide equivalent, 6.5 pounds of nitrogen oxides, and 0.4 pounds of particulate matter 2.5 annually. An EV charged on the grid will emit 4,000 pounds of CO₂ equivalent, 2.3 pounds of NO_x, and 0.4 pounds of PM_{2.5}.

Program: Admin and Related Services

Activity: Office of Communications (OCC)

dps.mn.gov/divisions/ooc/

AT A GLANCE

- Workforce: 13 employees
 - These include a chief public information officer (director), assistant director, public information officers (PIOs), staff writer, web information officer, video production coordinator, social media specialist, graphic designer and administrative assistant.
- PIOs serve department divisions and include specialized positions in Web management, social media, video production and graphic design.

PURPOSE & CONTEXT

The Office of Communications (OOC) contributes to the Department of Public Safety's mission by providing public information to media and the public, promoting programming and initiatives, preparing public education campaigns and material, and managing website content and social media. The OOC also manages the Joint Information Center when the State Emergency Operations Center is activated during emergencies or large events.

SERVICES PROVIDED

The OOC's services include:

- Fulfilling media and data requests and coordinating interviews with DPS staff when necessary.
- Maintaining relationships with media and serving as subject matter experts for public safety issues.
- Coordinating media availabilities and news conferences.
- Maintaining the DPS website and all 20 DPS social media channels.
- Designing informational collateral (brochures, annual reports, signs, and posters, etc.).
- Writing blogs, speeches, articles, and other communication pieces on public safety topics.
- Creating videos on public safety topics.
- Providing communication support and expertise to DPS divisions, including: outreach events, communications planning, media training and coaching, and development of communications resources.

Program: Admin and Related Services

Activity: Public Safety Support

dps.mn.gov/

AT A GLANCE

- Workforce: 76 staff serving 2,042 DPS employees (not including MN.IT employees)
- 55,082 payment vouchers processed
- 323 job classifications represented at DPS
- 13,476 SEMA4 personnel transactions
- 589 FMLA cases managed
- Responded to 30 reasonable accommodation requests

PURPOSE & CONTEXT

The Department of Public Safety's (DPS) Public Safety Support provides leadership and support to all divisions within DPS to aid in ensuring that people are safe in Minnesota. We work in partnership with all DPS divisions to provide solutions in the areas of: human resource management, including internal affairs and affirmative action; fiscal responsibility and resource management; as well as department information dissemination and transparency. DPS Admin and Related Services help guide the work of the 2,042 employees of the agency who serve nearly every person in Minnesota.

Public Safety Support also administers the soft body armor program to reimburse law enforcement for body armor vest purchases. In addition, Public Safety Support administers the Public Safety Officer and Survivor Benefit account for line of duty death benefits and statutorily defined continued health benefits for dependents.

SERVICES PROVIDED

Public Safety Support provides support to all of DPS through the following services and strategies:

- Recruit, train, and retain top quality employees.
- Ensure safe work environments, manage worker's compensation claims effectively, and provide professional development opportunities.
- Manage all employee relations matters.
- Administer all benefits to employees.
- Investigate allegations of employee misconduct.
- Ensure compliance with Americans with Disabilities Act, including reasonable accommodation requests.
- Tribal consultation coordination.
- Provide communication and outreach to the public, media, stakeholders, and legislature in order to deliver life safety information, support transparency, and ensure compliance with the Data Practices Act.
- Properly manage all accounting, purchasing, and payroll functions of the department.

Program: Admin & Related Services**Activity: Technology and Support Services (OTSS)**mn.gov/mnit/government/services/exec/**AT A GLANCE**

- MNIT staff providing centralized technology services for the Department of Public Safety.
- Providing and supporting LAN, WAN, Voice and Computing services billed to the Department of Public Safety through monthly invoices.

PURPOSE & CONTEXT

The Department of Public Safety's (DPS) Technology and Support Services staff are MNIT Services (MNIT) employees who support the work of DPS by providing administrative, development, operations, security, and service desk support. MNIT provides routine management of systems, networks, software updates, and hardware that keep the Department running. DPS relies on technology to manage the services and support it provides to the citizens of Minnesota.

SERVICES PROVIDED

Technology and Support Services provide support to DPS through the following services:

- Desktop and laptop support including workstation management and protection packages with antivirus, firewalls, security patching, and encryption.
- Application and web development and support with licensing, storage, platform support, and professional services.
- Database services provide hosting and support services to manage and secure environments for DPS databases.
- Hosting services for DPS applications and systems.
- Mainframe Services.
- LAN, WAN, voice, and computing services to support DPS functions.

This funding does not cover the cost for all Information Technology activities at DPS.

RESULTS

MNIT/DPS maintain more than 100 applications for DPS. The DPS technology systems have been up 99% of the time except for scheduled routine maintenance.

Program: State Patrol

Activity: Patrolling Highways

dps.mn.gov/divisions/msp

AT A GLANCE

- Workforce: 628 employees, 546 sworn officers
- More than 650,000 enforcement contacts annually
- More than 28,000 crashes investigated annually
- More than 6,000 impaired driving arrests annually
- More than 18.2 million miles traveled by State Troopers annually
- More than 80,000 assists to the public annually
- More than 25,000 assists to local law enforcement annually
- More than 60,000 driving complaints received from the motoring public annually

PURPOSE & CONTEXT

The State Patrol enforces traffic and criminal laws on Minnesota's public highways and on state property. These law enforcement services provide for the safe and efficient movement of traffic and the protection of our citizens through enforcement, education, and assistance.

SERVICES PROVIDED

Our primary role is the enforcement of laws regulating the use of Minnesota's highways with special emphasis on removing impaired drivers, encouraging seat belt use, ensuring safe speeds, and enforcing distracted driving laws. We work closely with our allied agencies to increase public safety in our state by providing law enforcement services.

In addition to traditional traffic-law enforcement, troopers:

- Investigate motor vehicle crashes.
- Provide life-saving first aid at crash scenes.
- Assist stranded motorists.
- Educate the public on traffic safety issues.
- Partner with stakeholders to increase traffic safety awareness.
- Provide aviation-law enforcement services.
- Investigate motor vehicle title and dealer law crimes.
- Assist local and federal law enforcement agencies.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Enforcement contacts with the public	646,515	650,537	2016/2017
Quantity	Number of impaired driving arrests	5,476	5,782	2016/2017
Quality	Number of sustained external complaints investigated by internal affairs as a result of enforcement contacts	0	1	2016/2017

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quality	Percentage of voluntary seat belt compliance	93.2	92	2016/2017
Results	Number of fatal crashes per 100 million vehicle miles traveled	0.67	0.70	2016/2017
Results	Percentage of fatal crashes involving alcohol	31.7%	31.7%	2016/2017

The State Patrol's legal authority is found in Minn. Stat. 299D.01 (<https://www.revisor.mn.gov/statutes/?id=299D.01>).

- Over 22,000 school bus safety inspections annually
- Reportable commercial motor vehicle crashes 4,581 annually; Fatalities: 61 annually
- Commercial motor vehicle drivers placed out of service: 2,244 annually
- Commercial motor vehicles placed out of service: 5,306 annually
- More than 300 outreach presentations to the industry annually
- More than 1.4 million commercial motor vehicles weighed annually

PURPOSE & CONTEXT

The State Patrol Commercial Vehicle Enforcement Section exists to enforce laws regulating the operation and movement of commercial motor vehicles. The goal is to reduce the number of commercial vehicle crashes through enforcement and education, as well as reduce damage to roadways caused by overweight vehicles. There are no other law enforcement agencies dedicated to this type of enforcement for the State of Minnesota.

SERVICES PROVIDED

Enforcement of state and federal laws regulating the size, weight, and operation of commercial motor vehicles includes the following services:

- Staff six fixed-site weigh stations to ensure compliance with roadway weight limits.
- Provide mobile enforcement through random patrols and planned saturations.
- Inspect school buses and other passenger-carrying vehicles at fixed sites and during saturations.
- Conduct traffic enforcement on passenger cars operating unsafely around commercial vehicles.
- Provide training to other agencies and industry on safe commercial vehicle operation/maintenance.
- Develop, administer, and audit the Mandatory Inspection Program to prevent unsafe vehicles from being operated.
- Enforce laws related to the prohibited use of non-taxed, red-dyed fuel.
- Provide industry and stakeholder education aimed at voluntary compliance.
- Assist all law enforcement agencies with crash investigations involving commercial motor vehicles.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of commercial motor vehicle and driver inspections	37,262	37,931	2016/2017
Quantity	Number of school bus safety inspections	20,839	22,096	2016/2017

Program: State Patrol

Activity: Vehicle Crimes Unit

<https://dps.mn.gov/divisions/msp/about/Pages/special-assignments-vehicle-crime-units.aspx>

AT A GLANCE

- Workforce: 6 employees
- Established and funded by the Minnesota Legislature in 2010
- New cases received in 2016 and 2017: 1,015
- Cases from 2016 and 2017 closed: 776

PURPOSE & CONTEXT

The State Patrol Vehicle Crimes Unit (VCU) is comprised of six state troopers to enforce: 1) registration tax and motor vehicle sales tax liabilities owed by individuals and businesses 2) and illegal or improper activity related to the sale, transfer, titling, and registration of motor vehicles. The VCU is the only dedicated unit of its kind in Minnesota and serves as a statewide resource.

SERVICES PROVIDED

The VCU investigates the following, but is not limited to, these types of cases:

- Identification of stolen and cloned vehicles, restoration of mutilated vehicle identification numbers.
- Investigations involving Dealer Violations: Improper use of license plates issued to dealers, non-licensed dealer activity, vehicle sales financing violations, and DVS licensing and franchise violations.
- Consumer Protection: Odometer fraud, theft, and swindle violations.
- Unlawful use of license plates: failure to register vehicles and the use of license plates on improper vehicles.
- Sales tax violations: registering vehicles to non-existent out-of-state companies, collecting sales tax from consumers and failing to remit to the State, improper sales agreements, reporting lower sales price to the state, and foreign state registration violations to avoid paying Minnesota taxes.
- Title violations: failure to transfer title and failure to report appropriate disclosures (salvage, prior salvage, flood, or title brands).
- Auto auction violations
- Scrap dealer violations

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of Victims Assisted	314	550	2016/2017
Quantity	Total amount lost by victims	\$2,772,712*	\$2,933,607*	2016/2017
Quantity	Total amount lost by the State of Minnesota (i.e., taxes)	\$3,453,385*	\$1,368,939*	2016/2017
Quantity	Number of odometer miles unlawfully altered	4,013,670*	1,851,596*	2016/2017

* There are currently 239 cases assigned or pending from among those received in 2016/2017. These numbers will increase when the cases are closed.

The Minnesota State Patrol's Vehicle Crimes Unit legal authority is found in Minn. Stat. 299D.03 (<https://www.revisor.mn.gov/statutes/?id=299D.03>)

Activity: Capitol Complex Security

dps.mn.gov/divisions/msp/

AT A GLANCE

- Workforce: 83 employees
- Assists to the public: 15,703 annually
- Security checks completed: 24,326 annually
- Employees on the Capitol Complex: 14,000 annually
- Visitors to the Capitol Complex: More than one million annually
- Permitted special events on the Capitol Complex: More than 900 annually

PURPOSE & CONTEXT

The State Patrol Capitol Security section provides law enforcement, safety, and security services for the entire State Capitol Complex as well as the protection of the Governor and Governor's residence.

SERVICES PROVIDED

In addition to an overall law enforcement and security presence, the following services are provided:

- State troopers provide patrols and security on the capitol complex.
- Non-sworn Capitol security officers provide patrols, fixed site security, parking enforcement, and employee/visitor security escorts.
- State troopers protect the Governor and other dignitaries and the Governor's residence.
- Officers and troopers respond to alarms, medical calls, disturbances, and other police calls for service.
- The communications center answers calls from the public; dispatches officers and troopers; and monitors 854 security cameras and 93,108 environmental, fire, and security alarm points 24 hours a day, 365 days a year.
- The Capitol Security section manages 12,578 access key cards.

Program: Driver and Vehicle Services (DVS)

Activity: Vehicle Services Division

dps.mn.gov/divisions/dvs/

AT A GLANCE

- Workforce: 210 employees
- FY18 Revenue Collected: \$1.3 billion
- Registrations processed annually:
 - 1.7 million vehicle titles
 - 6 million vehicle registrations
 - 3,587 auto dealers
- Annual testing and inspections:
 - More than 2,300 dealer inspections
 - More than 15,000 vehicle inspections

PURPOSE & CONTEXT

The Vehicle Services Division of Driver and Vehicle Services (DVS) maintains the integrity of the Minnesota motor vehicle title issuance process and the vehicle registration process in order to ensure accuracy and security, prevent fraud, and protect public safety. DVS ensures the proper collection of fees and taxes that support the state's transportation system and other state programs designed to protect the safety of the public.

SERVICES PROVIDED

- Collect revenue and perform audits to ensure the correct payment of taxes and fees. The state uses this revenue to improve highway safety and roadway standards.
- Issue license plates which are produced to make roadways safer through improved accuracy, readability, and reflectivity.
- Issue certificates of title to provide evidence of ownership, mileage, and the existence titling in order to protect consumers and financial institutions.
- Regulate 3,587 auto dealers and 174 deputy registrars and ensure that the correct payment of taxes and fees are received in order to protect consumers.
- Audit motor vehicle data users to determine if access to restricted information is in statutory compliance.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quality	Vehicle inspections performed	13,443	15,455	FY 16/FY 17
Quality	Dealer Inspections performed	2,199	2,383	FY 16/FY 17
Quantity	Deputy registrar audits performed	147	7*	FY 16/FY 17
Quantity	International Registration Plan and International Fuel Tax Agreement audits performed	169	136	FY 16/FY 17
Quantity	Vehicle registrations issued	4,749,433	6,068,118	FY 16/FY 17
Quantity	Motor vehicle titles produced	1,522,438	1,708,766	FY 16/FY 17

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quality	Percentage of titles issued within 30 days (turnaround time)	0	0	FY 16/FY 17

*The deputy liaison team has deliberately not conducted audits of deputy offices within the last year in order to focus on providing support to deputies following the release of Minnesota Licensing and Registration System (MNLARS).

The legal authority for the Vehicle Services Division of DVS is found in Minnesota Statutes:

Chapter 168 Vehicle Registration, Taxation, Sale (<https://www.revisor.mn.gov/statutes/cite/168>)

Chapter 168A Vehicle Titles (<https://www.revisor.mn.gov/statutes/cite/168A>)

Program: Driver and Vehicle Services (DVS)

Activity: Driver Services Division

dps.mn.gov/divisions/dvs/

AT A GLANCE

- Workforce: 302 employees
- FY18 Revenue Collected: \$42.2 million
- Licenses processed annually:
 - 1.8 million driver license cards
 - 172,000 identification cards
- Testing and inspections:
 - More than 623,000 driver license knowledge and skill exams annually
- Driving privilege sanctions:
 - Suspended, canceled, or revoked driving privileges of more than 22,000 drivers annually
 - Enrolled over 8,700 participants in the Ignition Interlock Program currently

PURPOSE & CONTEXT

The Driver Services Division of Driver and Vehicle Services (DVS) maintains the integrity of Minnesota driver licenses (DL), and the identification (ID) issuance process in order to ensure accuracy and security, prevent fraud, and protect public safety. DVS ensures the proper collection of fees and taxes that support the state's transportation system and other state programs designed to protect the safety of the public.

SERVICES PROVIDED

- Test driving knowledge and skills to measure the competence of driver educators and DL applicants to protect the public's safety.
- Issue DLs after verification of identity and residency to ensure one driver, one license, and one driving record.
- Deny or withdraw driving privileges from those drivers who do not qualify or violate the law in order to keep unsafe drivers off the road.
- Audit driver license data users to determine if access is in statutory compliance.
- Regulate 127 DL agents and ensure that the correct payment of fees is received in order to protect consumers.

RESULTS

Program: Driver and Vehicle Services (DVS)

Activity: Support Services Division

dps.mn.gov/divisions/dvs/

AT A GLANCE

- Workforce: 105 employees
- FY18 Revenue Collected: \$51.6 million
- Licensing and registrations processed annually:
 - 1.26 million license plates
 - 136,366 disability parking certificates

PURPOSE & CONTEXT

The Support Services Division of Driver and Vehicle Services (DVS) maintains the integrity of Minnesota driver licenses, the identification issuance process, the motor vehicle title issuance process, and the vehicle registration process in order to ensure accuracy and security, prevent fraud, and protect public safety. DVS ensures the proper collection of fees and taxes that support the state's transportation system and other state programs designed to protect the safety of the public.

The DVS Contact Center includes 24 phone lines and several email channels which allows the public, deputy registrars, and law enforcement to contact DVS with their questions and concerns regarding motor vehicles and driver's licenses.

DVS Support Services also maintains the technology account that is used to fund the development of the DVS motor vehicle system and driver license system.

SERVICES PROVIDED

DVS Support Services processes the revenue collected for the state through special fees and surcharges as well as:

- Issue special plates, disability parking certificates, plate impound, and deputy allocation of plates, stickers, and title packs.
- Process refunds for citizens as well as providing copies of DVS records in accordance with State and Federal Data Privacy Statutes and ensuring record retention policies are met.
- Manage access to DVS data through online applications as well as auditing usage by all users.
- Prepare, scan, index, and verify driver license and motor vehicle documents and images.
- Perform mailroom and print room tasks.
- Answers inquiries and provides assistance to all Minnesotans, stakeholders, and business partners.

Program: Office of Traffic Safety (OTS)dps.mn.gov/divisions/ots/**AT A GLANCE**

- Workforce: 20 employees
- Administer \$16.5 million in grants from the National Highway Traffic Safety Administration. Provide 200 grants to 310 units of government and nonprofit agencies to improve motorists' behavior.
- Provide expertise in critical traffic safety program areas.
- Provide research analysis and program evaluation to determine project effectiveness, traffic crash trends, and emerging issues.
- Administer the Motorcycle Safety and Child Seats for Needy Families programs supported by state special revenue funds.

PURPOSE & CONTEXT

The Office of Traffic Safety (OTS) provides statewide leadership, guidance, and support for all aspects of traffic safety in Minnesota. OTS accomplishes this by supporting programs to reduce traffic fatalities and serious injuries through increasing seat belt use, decreasing impaired driving, moderating speeds, and reducing distracted driving behavior. These programs serve Minnesota citizens, local units of government and nonprofit agencies. OTS also provides leadership on the Toward Zero Deaths (TZD) program in partnership with the Minnesota Department of Transportation and Minnesota Department of Health.

SERVICES PROVIDED

OTS provides funding and support for public education and outreach, traffic enforcement, policy development, and community traffic safety programs through partnerships with the Minnesota State Patrol, Driver and Vehicle Services, Bureau of Criminal Apprehension, Minnesota Department of Transportation, Minnesota Department of Health, county and municipal governments, and traffic safety advocate organizations.

OTS strategies:

- Utilize research-based, data-driven countermeasures on traffic crashes that include high-visibility enforcement coupled with public outreach and education.
- Promote traffic safety laws, such as primary seat belt, graduated driver's license, driver license sanctions, and ignition interlock.
- Maintain partnerships with other state agencies and local stakeholders to address traffic safety in a collaborative statewide effort.

OTS staff serve as grant coordinators and key resource experts on impaired driving, teen drivers, motorcycle safety, occupant protection, child passenger safety, pedestrian and bicycle safety, distracted driving, older drivers, traffic records, and program evaluation.

OTS researchers analyze Minnesota traffic crash data and identify traffic safety problem areas and crash trends, conduct program evaluation, and develop the Minnesota Motor Vehicle Crash Facts and the Minnesota Impaired Driving Facts publications. OTS responds to the crash data needs of the general public, the media, legislative members, the Governor's office, and all stakeholders. OTS also supports Minnesota's participation in the Fatal Analysis Reporting System, a national database on fatal motor vehicle crashes.

Program: Office of Pipeline Safety (OPS)

dps.mn.gov/divisions/ops/

AT A GLANCE

- Workforce: 20 employees
- Inspection of over 65,000 miles of interstate and intrastate pipelines
- Pipeline operators: 94
- Education provided to over 6,300 utility operators and excavators throughout Minnesota. Education provided to more than 800 emergency responders annually
- Over 7,000 hours of inspection and operator training annually

PURPOSE & CONTEXT

The OPS ensures pipelines are safe and works statewide to prevent underground utility damage.

There are over 65,000 miles of natural gas and hazardous liquid pipelines in Minnesota. These pipelines run throughout the state, delivering natural gas and other petroleum products to homes, industry, and businesses.

OPS employees protect lives and the environment through natural gas and hazardous liquid pipeline inspections, enforcement, accident and incident investigations, and education. We also investigate and enforce state excavation laws.

SERVICES PROVIDED

OPS has three major program areas:

- **Inspection program:** OPS routinely reviews pipeline operator procedures, training, and records. In addition, OPS observes practices and conditions in the field to ensure compliance with state and federal regulations. Inspections are conducted to ensure pipeline systems are operated safely.
- **Investigations:** In the event of a pipeline incident, OPS conducts investigations to ensure the pipeline operator followed proper procedures, maintained regulatory compliance, and takes steps to prevent future recurrence.
- **Damage prevention program:** OPS is the education and enforcement authority for the "Call Before You Dig" law. The law requires any individual or company to call the Gopher State One Call Center at least 48 hours before digging so that operators can be notified to mark underground utilities. Education activities throughout Minnesota aim to prevent excavation-related damage to pipelines and other underground facilities.

RESULTS

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quality	Pipeline inspection, investigation and training hours provided	7,550	7,730	2016/2017
Quantity	Number of natural gas distribution pipeline excavation-related damages	1,504	1,449	2016/2017
Quantity	Number of significant pipeline incidents in Minnesota	4	6	2016/2017

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Number of damage prevention statute noncompliance cited	103	126	2016/2017
Results	Number of fatalities at pipeline incidents in Minnesota	0	2	2016/2017

The following statutes grant authority to MNOPS to conduct the programs noted above: Excavation Notice System in Minn. Stat. 216D (<https://www.revisor.mn.gov/statutes/?id=216D>), Natural Gas Pipeline Safety in Minn. Stat. 299F.56 (<https://www.revisor.mn.gov/statutes/?id=299F.56>), the Office of Pipeline Safety Legal Authority in Minn. Stat. 299J (<https://www.revisor.mn.gov/statutes/?id=299J>)

Narrative

The Department of Public Safety receives federal funds for a wide variety of operations and projects impacting the Safety of Minnesota citizens. These grants come from a variety of federal agencies, each with their own application, award, expenditure, reporting and reimbursement processes and procedures. Most of the federal funds are ongoing grants that serve specific operations and projects implemented by the Department of Public Safety. The Department relies on these funds in managing their budget.

Larger grants include funds for Highway Traffic Safety (NHTSA), Disaster Assistance, Homeland Security, Motor Carrier Safety (MCSAP), Impaired Driving, and Victims of Crime (VOCA). Other grants the Department receives include funds for Law Enforcement, Internet Crimes Against Children, Distracted Driver, and Violence Against Women (VAWA).

Several of the federal grants require matching funds, or maintenance of effort commitments. These vary by federal agency and specific grant. The Department agrees to these commitments when accepting the federal grant award. Matches are covered with existing Department budgets and in some cases by local governments. Maintenance of effort commitments are managed within the budget and require tracking of certain expenditures and a related reporting process. Department federal awards that require a match or maintenance of effort commitment are identified in the table above.

Award estimates are based on past experience and current communication with the Department division staff and federal contacts. We do not estimate federal disaster funds for future years since it is impossible to accurately predict future disasters and their financial impact. We do not anticipate any major trends that impact funding at this time.

AT A GLANCE

The Public Utilities Commission:

- Regulates the rates and services of three cornerstone industries in Minnesota's economy: electricity, natural gas and telephone utilities.
- Determines need for and location of large energy facilities.
- Manages an average of 1,400 utility filings annually.
- Closes over 3,500 consumer complaint cases per year.
- Has a staff size and budget that is, per capita, among the lowest nationally.

PURPOSE

The Minnesota Public Utilities Commission's mission is to create and maintain a regulatory environment that ensures safe, reliable and efficient utility services at fair and reasonable rates. The Commission is a quasi-judicial body whose authority, powers and functions resemble those of a court or a judge. Commission decisions are based on a set of guidelines or statutory criteria applied to the factual and legal record developed in the particular proceeding to assess the relief sought. Commission Orders are enforceable under the law. Accordingly, the Commission must be objective in determining facts and drawing conclusions of law that justify its decisions or official actions.

The PUC contributes to the following statewide outcomes:

- **People in Minnesota are safe**
- **A clean, healthy environment with sustainable uses of natural resources**
- **Efficient and accountable government services**

BUDGET

**Spending by Program
FY 17 Actual**

Source: Budget Planning & Analysis System (BPAS)

Historical Spending

Source: Consolidated Fund Statement

The Commission has a total annual General Fund budget of approximately \$7.4 Million. Nearly 100% of the agency's expenditures are recovered through special assessment authority (Minnesota Statutes, Sections 216B.62 and 237.295). The agency also administers the Telephone Assistance Program from a special revenue fund.

Reimbursement grants are provided to telephone companies who assist their low income customers with reduced rates.

STRATEGIES

The Commission emphasizes several strategies to fulfill its mission. These include:

- Court-like decision-making process according to formal rules of evidence which relies on active engagement by other state agencies and regulated companies, as well as a very diverse stakeholder base.
- Active engagement with all stakeholders to anticipate conditions affecting the provision of necessary services.
- Public outreach to support orderly and informed decision-making, as well as provide consumer assistance and understanding.
- Extensive use of technology to increase transparency; e.g., all record documents publically accessible through web site; web-cast all Commission meetings; public comments submitted via an online platform.
- Active engagement in regional and national forums affecting Minnesota's interests.

RESULTS

The Commission's strategies, combined with state policies, Minnesota's natural advantages, and active engagement by industry and a diverse group of stakeholders, have produced important results. These include:

- Minnesota's overall natural gas rates are below the national average for 2016 (\$6.76 versus \$7.51/MMBtu). ¹ The state's electric rates remain competitive with other states. ²
- Minnesota is a leader in generation from renewable energy. It ranks 8th in the nation in net electricity generation from wind energy in 2017. ³
- Minnesota continues to lead in energy efficiency. Despite its winters, it ranks 20th nationally in residential per capita energy use; surpassing 7 other Northern Tier States. ⁴
- Minnesota ranks 6th in terms of accessibility to telephone service. ⁵
- Minnesota's state regulatory staff size remains well below states of comparable size, while its work-load is equal to other states of comparable population size.
- Minnesota regulators' leadership in regional and national forums have enhanced Minnesota's stature among the states and protected its vital interests.

Recommendation:

The Governor recommends a base increase of \$300,000 per year for the Public Utilities Commission. This increase is for one utility technical analyst senior position and one staff attorney position. Additional staff resources are needed to handle an increased workload, expedite processing of utility filings and ensure compliance with statutory requirements and policies. As the Commission has assessment authority, all expenditures are recovered for the General Fund. This change represents a 4.8% increase in the agency's current operating budget.

Rationale/Background:

The volume and complexity of the Commission's work has increased over the last several years, and this trend is expected to continue due to several factors: a) additional state energy policy initiatives increasing the breadth of Commission responsibilities; b) intensifying momentum to modernize the electric delivery grid, which has given rise to a new distribution system planning process; c) the increasing frequency of utility rate cases, including what is expected to be seven rate case filings in the upcoming fiscal year; and d) the need to develop new and updated methods of implementing applicable laws and legislative policies in the rapidly changing electric utility environment.

Moreover, this work involves issues of legal interpretation, which increases the risk of challenges and incurrence of the considerable cost (in dollars and time) that goes with them. The Commission functions primarily as a quasi-judicial body that makes decisions based on a formal record of evidence, developed through proper legal process, which must comply with the requirements of statutes and judicial case law. It is critical that the Commission's day to day decision-making duties are supported and informed by staff that have the latitude and ability to clearly explain the technical and legal frame-work upon which that process must function. Efforts to utilize improved technology and reorganize existing staff resources have been used to address these challenges, but the limits of those measures have been reached.

As part of this request additional staff positions will be used to manage the increased quantity and intensity of the workload to allow the agency to maintain a standard of performance required by the industries it regulates. Without these resources, there is considerable risk that performance will decline.

Proposal:

The Governor recommends an increase of \$300,000 to the Public Utilities Commission's base in order to carry out its fundamental duty to render well-informed and balanced decisions relating to the provision of utility services. This increase will result in well-informed, legally sound, and balanced decisions relating to the provision of utility services; timelier decision-making; reduced risk of appeal; and enhanced ability to manage workload in an orderly

fashion. Additional new staff positions will be used to manage the greater intensity of workload the Commission has experienced in recent years and expects over the next 5 or more years.
