RE: 2018 Annual Transit Report

Dear Legislators:

I am pleased to present the Minnesota Department of Transportation's Annual Transit Report. This report includes information on transit service in Greater Minnesota as required by [Minn. Stat. 174.247](#).

Transit is a key component of Minnesota's multimodal transportation system, contributing to the health of people, the environment and the economy. In 2017, Minnesota had 40 public transit systems in 87 counties offering scheduled transportation services to the public. These transit services are funded through a financial partnership that includes local, state and federal participation.

As we look to the future, public transportation will be increasingly important in moving people throughout our state to access economic and social opportunities within their communities. MnDOT strives to make access to quality public transit systems available to citizens statewide. To ensure Minnesota is at the forefront of future transit strategies and financing, MnDOT will work proactively toward its mission to provide the highest quality, dependable multimodal transportation system.

Please contact me if you have any questions about this report, or you may contact Victoria Nill, Director of MnDOT's Office of Transit and Active Transportation at [victoria.nill@state.mn.us](mailto:victoria.nill@state.mn.us) or 651-366-41612.

Sincerely,

A handwritten signature in black ink that reads 'Margaret Anderson Kelliher'.

Margaret Anderson Kelliher  
Commissioner

## LEGISLATIVE REQUEST

This report is issued to comply with [Minnesota Statutes 174.24](#). The cost of preparing this report is \$12,000. The following table details where specific items requested in legislation are found in the report.

Legislative specifications	Report section	Page
By February 15 annually, the commissioner shall submit a report to the legislature on transit services outside the metropolitan area. The Metropolitan Council and any public transit system receiving assistance under section 174.24 shall provide assistance in creating the report, as requested by the commissioner. The report must include, at a minimum, the following:		
(1) a descriptive overview of public transit in Minnesota;	State of the Industry	5
(2) a descriptive summary of funding sources and assistance programs;	State of the Industry	5
(3) a summary of each public transit system receiving assistance under section 174.24;	Transit Fact Sheets	15
(4) financial data that identifies for each public transit system and for each transit system classification under section 174.24, subdivision 3b:		
(i) the operating and capital costs;	Financial Statistics	61
(ii) each of the funding sources used to provide financial assistance; and	Financial Statistics	61
(iii) for federal funds, the amount from each specific federal program under which funding is provided;	State of the Industry Financial Statistics	5, 61
(5) a summary of the differences in program implementation requirements and aid recipient eligibility between federal aid and state sources of funds;	State of the Industry	5

## State of the Industry

## PURPOSE OF THE TRANSIT REPORT

The Transit Report is published annually to give residents and elected officials an overview of public transit services in Greater Minnesota. The report includes fact sheets that describe each of these state-supported public transit systems, aggregated information about the previous calendar year expenditures, and next calendar year operating budgets.

This report complies with the requirements in Minn. Stat. 174.247 that MnDOT annually compile and publish financial information for state-supported transit systems. The chart on page 3 itemizes specific statutory guidelines for the report and indicates which sections meet the requirements.

## ABOUT GREATER MINNESOTA TRANSIT

In 2017, Minnesota had 40 public transit systems offering scheduled transportation service in 87 counties. These public transit systems provide transportation options that allow residents to participate fully in the state's communities and economy. In accordance with Minn. Stat. 174.247 this report only highlights information for the public transit and intercity bus systems in Greater Minnesota. Transit services offered in the seven-county Twin Cities metropolitan area are not included.

Minnesota has specific statutory goals directly related to transit under [Minn. Stat. 174.01](#) and [174.21](#).

Minnesota Statutes, Section 174.01 has the following goals:

- Provide transit services to all counties in the state to meet the needs of transit users
- Promote and increase the use of high-occupancy vehicles and low-emission vehicles

The statutory purpose of MnDOT's Public Transit Participation Program is in [Minn. Stat. 174.21](#):

- Provide access to transit for persons who have no alternative mode of transportation available
- Increase the efficiency and productivity of public transit systems
- Alleviate problems of automobile congestion and energy consumption and provide desirable land use where such activities are cost-effective
- Maintain a state commitment to public transportation
- Meet the needs of individual transit systems to the extent they are consistent with the other objectives stated above

Transit services are funded with a combination of local, state and federal funding. In the seven-county Twin Cities metropolitan area, the Metropolitan Council plans, coordinates and administers state and federal funding for public transit services. MnDOT's Office of Transit and Active Transportation administers state and federal financial assistance to public transit systems in Greater Minnesota, which includes all 80 counties outside the metropolitan area.

## Other Transit Opportunities

---

Previously MnDOT provided state funding for transit services offered by Tribal Nations in Minnesota. In recent years, MnDOT has not provided funding to Tribal Nations because they receive a direct annual apportionment of federal funds for transit services.

The Enhanced Mobility for Seniors and Individuals with Disabilities program (Section 5310), a program administered by MnDOT, seeks to improve mobility for these populations by removing barriers to transportation service and expanding transportation mobility options to seniors and individuals with disabilities. This program, while not specifically considered public transit, does support services planned, designed, and carried out to meet the special transportation needs of these individuals. Eligible projects include traditional capital investment and nontraditional investment beyond the Americans with Disabilities Act complementary paratransit services.

## FEDERAL AND STATE FUNDING FOR TRANSIT

This section outlines how federal and state funding is distributed among Greater Minnesota's public transit systems. Minn. Stat. 174.247 requires "a summary of the differences in program implementation requirements and aid recipient eligibility between federal aid and state sources of funds."

### Federal Funding Programs for Public Transit

---

Urbanized areas, defined by the U.S. Census Bureau as places with populations greater than 50,000 are eligible to receive Federal Transit Administration (Section 5307 Urbanized Area Formula Program) grant funds. The Section 5307 program allows areas with populations greater than 50,000, but less than 200,000, to spend funds on transit capital, planning and operations. Each of Minnesota's eight eligible Metropolitan areas receives these funds. These areas are: Fargo-Moorhead, Grand Forks-East Grand Forks, La Crosse-La Crescent, Rochester, Duluth, St. Cloud, Mankato and the

seven-county Twin Cities metropolitan area. Mankato's population surpassed 50,000 at the 2010 census and the city began receiving these funds in federal fiscal year 2013.

These Metropolitan areas receive all Section 5307 grant funds directly from the Federal Transit Administration. As direct recipients of federal funds, metropolitan areas are individually responsible to the FTA for compliance with federal laws and regulations.

Rural and small urban areas, defined by the U.S. Census Bureau as places with populations less than 50,000, are eligible for Section 5311 Rural Area Formula Program grant funds. These funds can be used for transit capital and operating assistance. Program funds are typically appropriated (i.e. awarded) to states or registered tribes and states administer funds to local governments, non-profit organizations or operators of public transportation or intercity bus service. In 2017, 30 awards were made to by MnDOT to sub-recipients of the Section 5311 funds.

Additionally, newly enacted provisions in federal law include a capital formula program - Section 5339 Bus and Bus Facilities Program. The Metropolitan Council receives Section 5339 formula funds for the Twin Cities metropolitan area and MnDOT receives and distributes the funds for Greater Minnesota.

## **Federal Programs Support Local Transit Operating and Capital Projects**

---

Federal programs constitute the majority of federal transit formula funding in Minnesota and provide operating and capital funds through grants to large urban, small urban and rural areas. In total, MnDOT provided \$14.5 million in Section 5311 fiscal year funding toward public transportation assistance in Greater Minnesota (Table 1). Federal Section 5307 and Tribal funds are directly appropriated and managed by the large urban systems and the tribal nations.

Table 1 depicts approximate Sections 5311 Greater Minnesota Transit assistance funding for fiscal year 2018.

Table 1: FY 2018 Federal Funding for Minnesota Transit

PROGRAM	DESCRIPTION	2018 TOTAL
5311	Non-urbanized Area Formula Program: Capital and operating funding for small urban and rural areas; includes intercity bus transportation and the Rural Transit Assistance Program: Research, training and technical assistance for transit operators in non-urbanized areas	\$14,500,000  (\$14.2M 5311/\$300K RTAP)
<b>Grand total</b>		<b>\$14,500,000</b>

## State Programs Support Public Transit

---

The amount of service that Minnesota transit systems can provide is closely tied to the amount of funding provided by the state. In 2017, state funding covered approximately 65 percent of transit system operating costs. The Minnesota State Legislature decides on the funding levels for the state's public transit system every two years. The amount covered by state funds in 2018 dropped significantly because no General Funds appropriated to cover transit system operating costs - a reduction of approximately \$16.5 million.

A percentage of funding from the Motor Vehicle Sales Tax is constitutionally dedicated to public transit. Sixty percent of the MVST tax stays in the Highway User Tax Distribution fund. Of the remaining 40 percent, the seven-county Twin Cities metro area receives 36 percent and Greater Minnesota receives 4 percent. Greater Minnesota also receives a portion of MVST revenues from leased vehicles, which are split among the state general fund and county state-aid highways.

MnDOT disburses funds for Greater Minnesota transit through the Public Transit Participation Program. Greater Minnesota public transit providers apply annually for operating, capital and planning activities. Eligibility is determined by Minn. Stat. 174.24, which states, "Any legislatively established public transit commission or authority, any county or statutory or home rule charter city providing financial assistance to or operating public transit, any private operator of public transit, or any combination thereof is eligible to receive financial assistance through the Public Transit Participation Program."

State law requires local participation in funding public transit services in Greater Minnesota. A statutory fixed-share funding formula sets a local share of operating costs by system classification as follows:

- Elderly and disabled system - 15 percent
- Rural (population less than 2,500) - 15 percent
- Small urban (population 2,500 - 50,000) - 20 percent
- Urbanized (population more than 50,000) - 20 percent

State and federal funding for public transit covers the remaining 80 or 85 percent of operating costs awarded through the Public Transit Participation Program.

## State Public Transit Assistance

The following table lists state transit funding in the 2017-2018 biennium.

Table 2: State Transit Funding for 2017-2018

SOURCE	2017	2018	TOTAL
Public transit assistance (general fund)	\$19,745,000	\$0	\$19,745,000
Greater MN transit account (MVST)	\$30,171,000	\$30,948,000	\$61,119,000
Greater MN transit account (leased MVST revenues )	\$33,388,000	\$36,670,000	\$70,058,000
<b>Greater Minnesota total</b>	<b>\$83,303,000</b>	<b>\$67,618,000</b>	<b>\$150,912,000</b>

## 2017 Major Accomplishments

### NEW SERVICE EXPANSION GRANTS (NSE)

In Fiscal Year 2017, MnDOT launched the Greater Minnesota Public Transit Service Expansion Program to encourage public transit service growth, system efficiency, and service effectiveness throughout Greater Minnesota. This new special discretionary grant program is intended to stimulate transit service growth in Greater Minnesota by reducing the local match requirement. This program was launched to meet the legislative target of 90 percent of public transit need in Greater Minnesota. A total of 500,000 new service hours must be added by 2025 to meet the targeted goal.

[The Greater Minnesota Transit Investment Plan](#), completed in April 2017, illustrates the types of service expansions needed to meet the targeted goal. In 2017, 23 transit systems were awarded NSE operating grants, 21 received NSE capital grants and two received facility NSE grants. In 2018, 23 transit systems were awarded NSE operating grants, 24 received NSE capital grants and one received a NSE facility grant.

### REGIONAL TRANSPORTATION COORDINATING COUNCILS (RTCC)

The Minnesota Department of Transportation and the Minnesota Department of Human Services collaborated with other state agencies, local governments and organizations through the Minnesota Council on Transportation Access, to create Regional Transportation Coordinating Councils (RTCCs) in Greater Minnesota. Increased coordination between transportation providers, service agents and the private sector helps fill transportation gaps, streamline access to transportation and provide people with more options to travel. The RTCCs are responsible for coordinating transportation services through a network

of existing public, private and non-profit transportation providers. RTCCs consist of stakeholders interested in improving mobility for people with limited transportation options including older adults, individuals with disabilities, individuals with low incomes and military veterans.

MnDOT's Office of Transit and Active Transportation is providing financial and technical support for the creation of the Greater Minnesota network of RTCCs. The RTCCs will be consistent in their development of increased cooperation but unique in operations to meet the needs and characteristics of each region.

## FIVE-YEAR TRANSIT SYSTEM PLANS

The goal of the five-year planning process is for each transit system to understand strengths and weaknesses, identify unmet needs and future transit service changes. The five-year plans will help MnDOT to understand the needs of transit and to articulate those needs to the legislature. The individual five-year plans will identify system-specific priorities based on themes from the Greater Minnesota Transit Investment Plan. The Five-year plans will help systems better deliver service and work toward overall goals such as:

- Improve coordination of services to meet transportation needs
- Increase ridership/usage across the network

Each five-year plan establishes a vision and details on service improvements, allowing transit systems to develop better year-to-year budgets. As the funding and service landscape evolves, there is an increasing need to consolidate transit services and cooperate with outside entities, including private providers and community-based services to realize economic and service efficiencies.

## TRANSIT ASSET MANAGEMENT

Transit Asset Management in MnDOT's Office of Transit and Active Transportation provides consistent, accountable, and transparent program guidance for all Greater Minnesota transit providers. The National TAM System final rule ([49 U.S.C. 625](#)) requires that all agencies that receive federal financial assistance under 49 U.S.C. Chapter 53 and own, operate, or manage capital assets used to provide public transportation create a TAM plan. TAM and the TAM Plan aid in the decision making process to balance asset needs and demands for rolling stock, facilities, and equipment. For OTAT, rolling stock mainly includes buses but not rail cars or vehicles. Vehicles used to indirectly deliver transit service, maintain revenue vehicles, and perform transit-oriented administrative activities. These vehicles include automobiles, trucks and other rubber tire vehicles. Equipment generally includes non-revenue service

vehicles. Facilities range from general purpose maintenance overnight storage facilities to combined administrative and maintenance facilities for actions such as service and inspection.

Maintenance plans for both facilities and vehicles are key to understanding and documenting how transit systems are maintaining their assets. Updated and relevant maintenance plans specific to the systems' assets are a key component to understanding transit systems operations and needs. Another key tool for making decisions about assets is the annual inspections conducted by MnDOT staff. Annual Inspections help MnDOT see firsthand how systems are maintaining their respective fleets in accordance with their vehicle maintenance plans and shows MnDOT the condition of the fleet in the field. The inspection keeps MnDOT informed about the issues the transit systems face in regards to their fleet. MnDOT staff visits federally-funded transit facilities and conducts an annual facility review. The review verifies the transit systems are maintaining their facilities in accordance with their facility maintenance plan.

To further enhance TAM, in 2017, MnDOT added a Transit Asset Management module to the BlackCat system, called the Grants Managements System, that allows greater tracking of assets. MnDOT completed an update to its TAM plan in 2018 that included:

- An inventory of the number and type of capital assets.
- A condition assessment of those inventoried assets for which a provider has direct capital responsibility.
- A description of analytical processes or decision-support tools that a provider uses to estimate capital investment needs over time and develop its investment prioritization.
- A discussion of prioritization investment direction, and plan implementation

## Conclusion

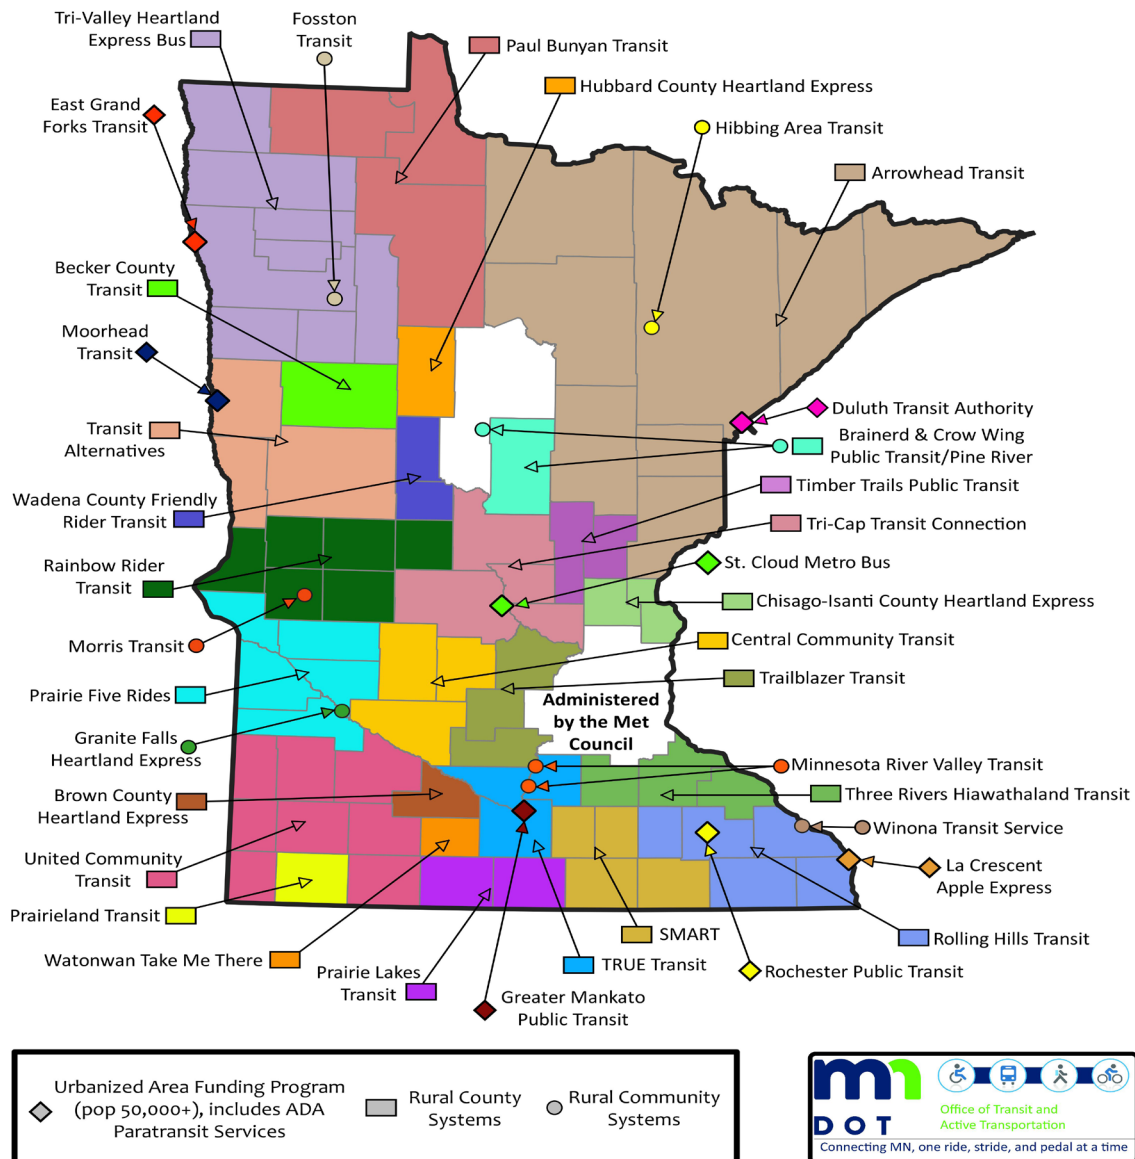

---

As we look to the future, public transportation is increasingly important to people in Greater Minnesota to access economic and social opportunities in their communities. Minnesota's commitments in the court-ordered Olmstead Plan magnify this importance. Population growth, an aging demographic and environmental considerations create even greater demands on public transit and MnDOT strives to make access to quality public transit systems available to citizens statewide. To assure that Minnesota is at the forefront of future transit strategies and financing, MnDOT will work proactively toward its mission to provide the highest quality, dependable multimodal transportation system.

## SYSTEM HIGHLIGHTS

- An additional Dial-A-Ride bus was added in Itasca County to serve the population of Grand Rapids. This service added an additional 1,200 service hours to the city and transported 6,581 rides in 2017. This added service was a key factor in a nearly 10 percent increase in total number of rides in 2017 versus 2016.
- In August of 2017, a new Dial-A-Ride service was started in the Hermantown. Arrowhead provided the residents of Hermantown 3,000 rides for the first five months. This has also allowed for a coordination effort with the Duluth Transit Authority to offer a free fare transfer program, allowing DTA riders to access the area within Hermantown and Hermantown riders to access areas within Duluth. This program has been very successful providing riders an opportunity for work, shopping and medical access in both neighboring cities.

# Glossary

# GLOSSARY

This glossary contains technical terms that may appear in the Greater Minnesota Transit Report. Many of these terms have multiple definitions; therefore, terms are defined as they are used in the context of this report.

## Accessible vehicle

---

A public transportation vehicle that does not restrict access, is usable and provides allocated space and/or priority seating for individuals who use wheelchairs.

## Americans with Disabilities Act

---

The Americans with Disabilities Act passed in July 1991 and gave direction to local transit agencies to ensure full access to transportation for persons with disabilities.

## Base fare

---

The price charged to one adult for one transit ride. It excludes transfer charges, zone charges, express service charges, peak period surcharges and reduced fares.

## Bus roadeo

---

An annual competition in which transit bus drivers demonstrate skills such as emergency stops and maneuvers.

## Capital cost

---

The cost of equipment and facilities required to support transportation systems: vehicles, radios, shelters, etc.

## Commuter service

---

Express transit service generally connecting residential areas and activity centers via a high speed, non-stop connection.

## Coordination

---

A cooperative arrangement among transportation providers and/or purchasers which is aimed at realizing increased benefits through the shared management and/or operation of one or more transportation-related functions.

## Dedicated funding source

---

A funding source which by law, is available for use only to support a specific purpose and cannot be diverted to other uses; e.g., the federal gasoline tax can only be used for highway investments and, since 1983, for transit capital projects.

---

## Demand response/dial-a-ride service

---

A transportation service characterized by flexible routing and scheduling of relatively small vehicles to provide door-to-door or point-to-point transportation at the user's demand.

## Fare

---

The payment for a ride on a passenger vehicle, whether cash, tokens, transfer or pass.

## Fare box

---

A device that accepts coins, bills, tickets and tokens given by passengers as payment for rides.

## Fare box recovery ratio

---

Total fare revenue divided by the total operating cost.

## Federal Transit Administration

---

An operating administration within the United States Department of Transportation that administers federal programs and provides financial assistance to public transit.

## Fixed route

---

Transportation service operated over a set route or network of routes on a regular time schedule.

## Flexible fixed route

---

See route deviation.

## Funding classification

---

Greater Minnesota public transit services are categorized according to the following classifications in [\*Minn. Stat. 174.22\*](#):

- Rural – A county or multi-county transit system serving a geographic area primarily with populations under 2,500 or a stand-alone transit system within a city of less than 2,500 people.
- Small Urban – A stand-alone transit system within a city of between 2,500 and 50,000 people.
- Urbanized – A transit system within a metropolitan area with populations greater than 50,000.
- ADA complementary paratransit – Demand response service for persons with disabilities in geographic areas where fixed route services are provided; provision of this service is required by the Americans with Disabilities Act. This is also described in Minnesota State Statutes as “Elderly and Disabled Service.”

## Intercity bus service

---

Transportation between metropolitan areas and rural areas, traveling over long distances, via an over-the-road coach with luggage space.

## Light rail transit

---

An electric railway system characterized by its ability to operate single cars or short trains along exclusive right-of-way at ground level, on aerial structures or in subways.

## MAP-21

---

Moving Ahead for Progress in the 21st Century Act, signed into law in July 2012. MAP-21 established surface transportation funding programs for federal fiscal years 2013 and 2014.

## Motor vehicle sales tax

---

A source of revenue for Minnesota public transit. The percentages of this revenue source designated for metropolitan area and Greater Minnesota transit are defined in Minn. Stat. 297B.09.

## Operating expenditures

---

The recurring costs of providing transit service; e.g., wages, salaries, fuel, oil, taxes, maintenance, depreciation, insurance, marketing, etc.

## Operating deficit

---

Total operating expenditures minus total operating revenue.

## Operating revenue

---

The total revenue earned by a transit agency through its transit operations. It includes passenger fares, advertising and other revenues.

## Total operating cost

---

The total of all operating costs incurred during the transit system calendar year, excluding expenses associated with capital grants.

## Paratransit

---

A flexible form of public transportation service that is not provided over a fixed-route; it is a demand responsive service typically for the disabled community.

## Park and ride facility

---

A common location; e.g., parking lot, for individuals to park their personal vehicle and board a high occupancy travel mode such as a commuter train or bus.

## Pass

---

A means of transit payment, usually a pre-paid card that is displayed to a bus driver in lieu of cash for the fare.

## Peak period

---

The hours when traffic or transit passenger demand is the greatest, typically during morning and afternoon commuting hours.

## Public transportation

---

Transportation service that is available to any person upon payment of the fare either directly, subsidized by public policy, or through some contractual arrangement, and which cannot be reserved for the private or exclusive use of one individual or group. "Public" in this sense refers to the access to the service, not to the ownership of the system that provides the service.

## Ridership

---

The total of all revenue passengers, transfer passengers on second/successive rides and free ride passengers.

## Passenger trip

---

A measure for one person making a one-way trip from origin to destination. One round trip equals two passenger trips.

## Revenue hours

---

The number of transit vehicle hours when passengers are being transported. Calculated by taking the total time when a vehicle is available to the general public and there is an expectation of carrying passengers. Excludes deadhead hours, when buses are moving but not carrying passengers, but includes recovery/layover time.

## Route deviation

---

Transportation service operating on a standard route along a public right of way, from which it may deviate from time to time, in response to a demand for its service or to take a passenger to a destination, after which it returns to its standard route.

## Rural Transit Assistance Program

---

The section of the Federal Transit Act of 1991, as amended, that provides funds for training, technical assistance, research and other support services for rural transit providers.

## Section 5307 (Urbanized Area Formula Program)

---

The section of the Federal Transit Act of 1991, as amended, that authorizes grants to public transit systems in urban areas with populations of more than 50,000 for both capital and operating projects. Based on population and density figures, these funds are distributed directly to the transit agency from the FTA.

## Section 5309 (Capital Program)

---

The section of the Federal Transit Act of 1991, as amended, that authorizes discretionary capital assistance for major capital needs, such as fleet replacement and construction of transit facilities.

## Section 5310 (Elderly and Persons with Disabilities Capital Program)

---

The section of the Federal Transit Act of 1991, as amended, that provides grant funds for the purchase of accessible vehicles and related support equipment for private non-profit organizations to serve elderly and/or disabled people, public bodies that coordinate services for elderly and disabled, or any public body that certifies to the state that non-profits in the area are not readily available to carry out the services.

## Section 5311 (Non-urbanized Area Formula Program)

---

The section of the Federal Transit Act of 1991, as amended, that authorizes grants to public transit systems in non-urbanized areas (fewer than 50,000 population). The funds initially go to the governor of each state. In Minnesota, MnDOT administers these funds.

## Service area

---

The geographic area that coincides with a transit system's legal operating limits; e.g., city limits, county boundary, etc.

## Service hours

---

See revenue hours.

## Service span

---

The duration of time that service is made available or operated during the course of the service day; e.g., 6 a.m. to 10 p.m.

## Subscription service

---

Transportation service in which routes and schedules are prearranged to meet the needs of riders who sign up for the service in advance.

---

## Transit

---

Transportation by bus, rail or other conveyance, either publicly or privately owned, that provides general or special service on a regular and continuing basis. The term includes fixed-route and paratransit services as well as ridesharing. Also known as mass transportation, mass transit, or public transit.

## Transit dependent

---

A description for a population or person who does not have immediate access to a private vehicle, or because of age or health reasons cannot drive and must rely on others for transportation.

## Vehicle Classification

---

MnDOT classifies transit vehicles according to the following categories:

- Class 300 – A small-size light-duty transit bus approximately 16-22 feet long with a raised roof and single or dual rear wheels (up to 12,500 lbs. gross vehicle weight rating).
- Class 400 – A medium-size light-duty transit bus approximately 20-30 feet long with a raised roof and dual rear wheels (12,300-16,000 lbs. gross vehicle weight rating).
- Class 500 – A medium-size medium-duty transit bus approximately 25-40 feet long (17,000-24,000 lbs. gross vehicle weight rating).
- Class 600 – A medium-size heavy-duty transit bus approximately 25-40 feet long (21,000-32,000 lbs. gross vehicle weight rating).
- Class 700 – A large-size heavy-duty transit bus/over-the-road bus approximately 30 feet and longer with a rear-mounted engine.
