RE: I-94 Maple Grove to Rogers Design-Build Project

Dear Legislators:

Minnesota Statutes 161.3412, subdivision 3(b) requires the Commissioner of Transportation to notify the chairs of the Senate and House of Representatives committees with jurisdiction over transportation policy and transportation finance each time the commissioner decides to use the Design-Build method for procurement and explain why the method was chosen.

MnDOT has decided to use the Design-Build delivery method to design and construct the approximately \$120,000,000 I-94 Maple Grove to Rogers project. This project involves the replacement of pavement from the Fish Lake Interchange in Maple Grove to Highway 101 in Rogers. It also involves the construction of additional lanes on I-94 for portions of the corridor north of Highway 610. The project is planned for letting in October, 2019 with construction primarily occurring in 2020 and 2021. The staging will be coordinated with the other large lane additions to the west on I-94.

Design-Build was identified as the appropriate delivery system for the project due to its large size and MnDOT's desire to use the contractor's expertise to assist in reducing traffic impacts.

Please feel free to call the following programmatic and/or project contacts if you have questions:

Design-Build Program Manager: Peter Davich, 651-366-4233
I-94 Maple Grove Project Manager: Jerome Adams, 651-234-7611

Sincerely,

Susan M. Mulvihill, P.E.

Deputy Commissioner/Chief Engineer
