Laws of Minnesota 2013 Final Report

Date: April 09, 2019

Program or Project Title: Accelerating the Waterfowl Production Area Program, Phase 5

Funds Recommended: \$6,830,000

Manager's Name: Eran Sandquist Title: MN State Coordinator Organization: Pheasants Forever, Inc. Address: 410 Lincoln Ave Address 2: PO Box 91 City: South Haven, MN 55382 Office Number: 763-242-1273 Mobile Number: 763-242-1273 Fax Number: 320-236-7755 Email: esandquist@pheasantsforever.org Website: www.pheasantsforever.org

Legislative Citation: ML 2013, Ch. 137, Art. 1, Sec. 2, Subd. 4(b)

Appropriation Language: \$6,830,000 in the first year is to the commissioner of natural resources for an agreement with Pheasants Forever to acquire land in fee to be designated and managed as waterfowl production areas in Minnesota, in cooperation with the United States Fish and Wildlife Service. A list of proposed land acquisitions must be provided as part of the required accomplishment plan.

County Locations: Becker, Douglas, Jackson, Kandiyohi, Lyon, Mahnomen, Martin, McLeod, Murray, Polk, and Stearns.

Eco regions in which work was completed:

- Forest / Prairie Transition
- Prairie
- Metro / Urban

Activity types:

- Restore
- Protect in Fee

Priority resources addressed by activity:

- Wetlands
- Prairie

Summary of Accomplishments:

The program was to accelerate the protection of 1,230 acres of prairie grassland, wetland, and other wildlife habitat as Waterfowl Production Areas open to public hunting in Minnesota. Over the course of the appropriation, we acquired 14 parcels for a total of 1,240.79 acres which exceeded our total acre goal of 1,230 acres by 10.79 acres. Breaking down acres by ecological section we acquired 160 acres in the forest/prairie and 1,080.79 acres in the prairie. We have a balance that will be returned to the Fund despite exceeding our acre goals.

In total, we under spent on our budget, over delivered on acre goals, and over delivered on match leverage received.

Process & Methods:

The loss of grassland and wetland habitats in Minnesota is well documented. One of the primary ways to reverse this downward trend is to permanently acquire and restore previously converted wetland and grassland habitats on those properties. The U.S. Fish and Wildlife Service (USFWS) and their partners have been employing this strategy for over 50-years with the Small Wetlands Acquisition Program (SWAP). This acceleration program acquired and restored 205.77 acres of wetland and 1,035.02 acres of grassland habitats which are now permanently protected as Waterfowl Protection Areas managed by the Service. Using landscape level planning tools [e.g. Thunderstorm Maps produced by the Service's Habitat and Population Evaluation Team (HAPET)], Pheasants Forever (PF) has acquired these strategically identified properties. Based on HAPET evaluation strategies, modeling predictions can be made on the numbers of nesting waterfowl, grassland nesting birds, and other wildlife the acres affected by this grant application will produce. Besides the obvious wildlife benefits the lands acquired through this grant will provide additional water quality, groundwater recharge, and flood abatement benefits. These strategies are well tested and are supported by the greater conservation community here in Minnesota. Hunting and fishing stakeholders are very interested in increasing opportunities for hunting and fishing public access and have used WPA's extensively in the past. To address concerns related to the erosion of county tax revenues due to public land, the Service and PF notified counties prior to acquisition of lands. Once acquired, the Service will make a one-time Trust Fund payment to the County where the property is located. In addition, the Service will make annual Refuge Revenue Sharing payments for all fee lands within the respective Counties.

Explain Partners, Supporters, & Opposition:

We worked in close collaboration with USFWS to find and evaluate the best properties to peruse based on the criteria listed in the process and methods section. During the process, we also worked with many other partners to gauge interest levels and determine if the property is suitable for a Waterfowl Production Area.

Additional Comments:

Exceptional challenges, expectations, failures, opportunities, or unique aspects of program

There were no exceptional failures or challenges that were encountered. This is due in part to our high level of collaboration and efficiency. We also strive to be respectful and accommodating in helping to facilitate landowners wishes when working with willing sellers as many see this as leaving their own habitat legacy.

Other Funds Received:

• Not Listed

How were the funds used to advanced the program:

Not Listed

What is the plan to sustain and/or maintain this work after the Outdoor Heritage Funds are expended:

All parcels acquired have been transferred to the USFWS for enrollment into the Waterfowl Production Area program. All parcels were acquired then restored as part of this effort. The long-term management & maintenance of these new WPAs will be the responsibility of the USFWS. Pheasants Forever is also active in additional habitat enhancement and restoration activities on existing public lands where there is a need.

Outcomes:

The original accomplishment plan stated the program would

Programs in forest-prairie transition region:

- Increased availability and improved condition of riparian forests and other habitat corridors
- Protected, restored, and enhanced nesting and migratory habitat for waterfowl, upland birds, and species of greatest conservation need
- Wetland and upland complexes will consist of native prairies, restored prairies, quality grasslands, and restored shallow lakes and wetlands
- Water is kept on the land
- Improved access to public lands

How will the outcomes be measured and evaluated?

Improved access to public lands- Together with partners we have added 160 acres of new permanently protected WPAs in the forest-prairie transition region which are now open to public access.

Programs in metropolitan urbanizing region:

- A network of natural land and riparian habitats will connect corridors for wildlife and species in greatest conservation need
- Protected habitats will hold wetlands and shallow lakes open to public recreation and hunting
- Improved access to public lands

How will the outcomes be measured and evaluated?

Improved access to public lands- No acquisitions occurred in the metropolitan region

Programs in prairie region:

- Core areas protected with highly biologically diverse wetlands and plant communities, including native prairie, Big Woods, and oak savanna
- Expiring CRP lands are permanently protected
- Improved condition of habitat on public lands
- Protected, restored, and enhanced habitat for waterfowl, upland birds, and species of greatest conservation need
- Remnant native prairies and wetlands are permanently protected and are part of large complexes of restored prairie, grasslands, and large and small wetlands
- Water is kept on the land
- Improved access to public lands

How will the outcomes be measured and evaluated?

Improved access to public lands- Together with partners we have added 1,080.79 acres of new permanently protected WPAs in the prairie region which are now open to public access.

Budget Spreadsheet

Final Budget line item reallocations are allowed up to 10% and do not need require an amendment to the Accomplishment Plan

Total Amount: \$6,830,000

Explain any budget challenges or successes:

Pheasants Forever and our partners are happy to bring in over \$3,813,000 of non-state match dollars to this effort. While coming in under budget we were able to buy more acres than our original proposal. This demonstrates the efficiently of Pheasants Forever as the economical provider for building Wildlife Management Areas. No challenges were encountered and PF achieved and exceeded all outlined goals within the budget.

All revenues received by the recipient that have been generated from activities on land with money from the OHF:

Explain the success/shortage of acre goals:

The proposal was to accelerate the protection of 1,230 acres of prairie grassland, wetland, and other wildlife habitat as Waterfowl Production Areas open to public hunting in Minnesota. Over the course of the appropriation, we acquired 14 parcels for a total of 1,240.79 acres which exceeded our total acre goal of 1,230 acres by 10.79 acres. Breaking down acres by ecological section we acquired 160 acres in the forest/prairie and 1,080.79 acres in the prairie. We have a balance of \$141,868 that will be returned to the Fund despite exceeding our acre goals.

In total, we under spent on our budget, over delivered on acre goals, and over delivered on match leverage received.
