COMMISSION MEMBERS

Christopher Dietzen, Associate Supreme Court Justice (Retired), Chair and Designee of the Chief Justice of the Minnesota Supreme Court

Heidi Schellhas, Vice-Chair and Minnesota Court of Appeals Judge

Angela Champagne-From, Public Member

Valerie Estrada, Corrections Unit Supervisor, Hennepin County Community Corrections & Rehabilitation

Caroline Lennon, First Judicial District Court Judge

Cathryn Middlebrook, Chief Appellate Public Defender

Salim Omari, Saint Paul Police Sergeant

Peter Orput, Washington County Attorney

Paul Schnell, Commissioner of Corrections

Yamy Vang, Public Member

Mark Wernick, Senior Judge, Public Member

COMMISSION STAFF

Nathaniel J. Reitz, Executive Director

Nicole Jasperson, Research Analyst

Kathleen Madland, Research Analyst Intermediate

Linda McBrayer, Management Analyst 4

Jill Payne, Senior Research Analysis Specialist

Anne Wall, Senior Research Analysis Specialist

ABOUT THIS REPORT

This data report has been prepared by the research staff of the Minnesota Sentencing Guidelines Commission in fulfillment of the Commission's statutory role as a clearinghouse and information center for information on sentencing practices. This is not a policy document. Nothing in this report should be construed as a statement of existing policy or recommendation of future policy on behalf of the Commission itself, or as an authoritative interpretation of the Minnesota Sentencing Guidelines, Minnesota statutes, or case law.

Summary of 2017 Data

This report summarizes sentencing practices for felony criminal sexual conduct (CSC) offenses sentenced in 2017. Information on sentencing practices from 1988 to 2017 is provided in the tables beginning on page 24. This report also contains information on the use of special statutory sentencing provisions.

There were 509 offenders sentenced for CSC in 2017 (Table 1, p. 4), which was an increase of 5.8 percent from 2016 (481 offenders sentenced), which was the fewest number of CSC offenders sentenced since 1983. The number has fluctuated since 1981, peaking at 880 offenders in 1994 (42% greater than the number sentenced in 2017). Almost all of the growth since 1981 has been in the CSC child provisions (Intra-Familial Sex Abuse (IFSA) and provisions specifying the age of the victim).

Ninety-four percent of offenders sentenced for CSC received sentences that included incarceration in a state prison (42%) or local confinement (i.e., county jail or workhouse) (53%) (Figure 7, p. 11). The imprisonment rate is slightly lower than the 45 percent rate observed in 2016. In CSC cases in which the Guidelines recommended imprisonment, 75 percent of offenders received an executed prison sentence (Figure 7, “Presumptive Commits”). Ninety-two percent of offenders with a prior sex offense conviction received an executed prison sentence (Table 3, “CSC Offenders with True Prior CSC offense(s)”). The mitigated dispositional departure rate for offenders with a presumptive prison sentence was 25 percent (Figure 12, p. 18), a decrease from the 2015 rate of 26 percent. For executed prison sentences, aggravated durational departures occurred at the same rate as in 2016 (6%), while mitigated durational departures increased to 11 percent in 2017 from 10 percent in 2016 (Figure 15, p. 21).

For first- and second-degree offenses, the offender was more likely to be a family member; for third- and fourth-degree offenses, the offender was more likely to be an acquaintance. Five percent of cases involved strangers (Table 12, p. 36).

The average pronounced sentence across all degrees was 131 months in 2017 (down from 133 months in 2016). The average pronounced sentence for first-degree (the most serious offense category) was 190 months (Figure 9, p. 13). While average prison sentences have increased since implementation of the Sex Offender Grid in 2006, average pronounced local confinement (i.e., county jail or workhouse) (as a condition of a stayed sentence) had remained relatively consistent at between 180 and 190 days since 1989. In 2017, the average fell to 165 days. (Table 7, p. 24).

First-degree CSC offenses committed on or after August 1, 2000, are subject to a 144-month presumptive sentence by law. In 2017, 99 percent of all first-degree CSC offenders sentenced (not including attempts) were subject to this presumptive sentence. Two offenders sentenced in 2017 received life sentences. Three offenders received sentences that were double the duration of their presumptive sentences or more (Table 5, p. 15). Five other offenders received total sentences of 360 months (30 years) or more (Table 6, p. 15). In 2017, 491 (97%) of the 509 sex offenders were eligible for sentencing under the Sex Offender Grid, which is effective for offenses occurring on or after August 1, 2006 (Table 1). The Sex Offender Grid gives greater weight to prior sex offenses, and includes longer presumptive sentences for offenders with prior records.

Sex Offense Statutes & Sentencing Policy

Below is an explanation of Minnesota’s sex offense statutes and sentencing policy considerations.

Sex Offense Statutes: General Structure

Under Minnesota law,¹ criminal sexual conduct (CSC) offenses are categorized into five degrees, with first-degree being the most serious. The classification of offenses into degrees is based on a combination of factors:

- Whether the offense involved sexual penetration or contact;
- Age of the victim and offender;
- Relationship of the offender to the victim (e.g., position of authority, significant relationship, psychotherapist, etc.);
- Degree of injury or threat of injury;
- Weapon involvement; and
- Force or coercion.

Most of the provisions of **first-degree** CSC involve sexual penetration, together with personal injury, fear of great bodily harm, or the use of a dangerous weapon. First-degree CSC also includes offenses against young children—or, in some cases, somewhat older children, depending on the offender’s relationship to the victim—that may not require injury, force, or weapons. **Second-degree** offenses are similar, but involve sexual contact rather than penetration. Some non-penetration offenses involving more egregious forms of sexual contact² against young children are first-degree offenses.

Third-degree offenses involve sexual penetration and focus on children who are somewhat older, or cases in which there was force, coercion, or exploitation of the victim’s physical or mental condition. The use of a weapon or the threat of great bodily harm is not a necessary element of the offense. Third-degree offenses also include cases involving psychotherapists, health professionals, clergy, correctional employees, and others.

Fourth-degree offenses are similar, except that they involve sexual contact rather than penetration.

Fifth-degree offenses—gross misdemeanors involving nonconsensual sexual contact or indecent exposure to a minor—are enhanced to felonies for repeat sex offenders.

Table 13 (p. 37) and Table 14 (p. 40) display the volume of cases and sentencing practices by statutory provision.

¹ Minn. Stat. §§ [609.341](#)–[609.3451](#).

² “Sexual contact with a person under 13” has a far more limited definition than simple “sexual contact.” The touching must be bare, and contact between very few pairs of bodily parts qualifies. Minn. Stat. § [609.341](#), subd. 11(c).

Relationship-Based Classifications

Sentencing practices differ based on the relationship between the victim and the offender. To assist in analyzing and interpreting information on sentencing patterns, sex offense cases examined for this report were assigned, according to the statute of conviction, to one of the following categories:

- **IFSA** (Intra-Familial Sex Abuse): Conviction under a subdivision that specifies that the offender had a significant relationship (e.g., parent, sibling, first cousin, uncle, aunt, grandparent) to the victim.
- **Other Child**: Conviction under a subdivision that specifies that the victim is a minor, but does not specify that there was a significant relationship. Subdivisions that specify that the offender was in a position of authority over the victim are included here because these offenses include, in addition to parents, unrelated persons acting in a position of authority.
- **Force/Other**: Force or a weapon was involved, or the offense involved abuse by a psychotherapist, health care professional, clergy member or members of other specified occupations. The provisions do not specify the age of the victim or the relationship of the offender to the victim. Some of the victims of these offenses are also children.

Although each offense is assigned to only one category, an offense may, in fact, fit into another category as well. For example, many offenses categorized as “Other Child” or “Force/Other” involved family members (37% and 21%, respectively). Likewise, a substantial number of “Force/Other” cases involved victims under the age of 18 (20%). Figure 4 (p. 7) provides a breakdown of sex offenders sentenced by the relationship classification.

Sentencing Guidelines for Sex Offenders

The Commission adopted a Sex Offender Grid in 2006. All first-degree completed offenses are ranked at Severity Level A and have presumptive sentences that range from 144 months³ to 360 months. The Sex Offender Grid does not distinguish between first-degree contact⁴ and penetration.

Second- and third-degree offenses involving force are ranked at Severity Level B and Severity Level C. The second-degree force offenses have presumptive sentences that range from 90 months⁵ to 300 months. The third-degree force offenses have presumptive sentences that range from 48 months to 180 months.

Second- and third-degree offenses not involving force, and fourth-degree offenses, are ranked at severity levels for which some offenders are recommended probation based on their Criminal History Score. Recommendations

³ The legislatively presumed minimum sentence for first-degree CSC is 144 months. Minn. Stat. § [609.342](#), subd. 2(b); [2000 Minn. Laws Chap. 311](#), Art. 4, § 2.

⁴ “Sexual contact with a person under 13.” For discussion, see note 2.

⁵ The legislatively presumed minimum sentence for second-degree CSC force offenses is 90 months. Minn. Stat. § [609.343](#), subd. 2(b); [2002 Minn. Laws Chap. 381](#), § 2.

for prison begin at a Criminal History Score of 2 or 3, depending on the offense (see Appendix 3. Sex Offender Sentencing Guidelines Grid-Effective August 1, 2017, p. 49).

With the implementation of the Sex Offender Grid, longer sentences are recommended for offenders with a criminal history score. In addition, the Guidelines applicable to CSC offenses compute criminal history differently for sex offenses, increasing the weights assigned to some prior sex offenses and assigning two custody status points to repeat sex offenders who commit a new sex offense while on probation or supervised release for a prior sex offense.

Life Sentences for Certain Sex Offenders

Beginning in 2005, the Legislature required life sentences for offenders whose criminal behavior was determined to be so egregious that public safety demands incarceration for much, if not all, of their lives. See [Minn. Stat. § 609.3455](#), subds. 2, 3, & 4, and Table 15 (p. 43). Such offenses are excluded from the Sentencing Guidelines, because by law the sentence is mandatory life imprisonment.⁶ In 2017, two offenders were sentenced to life in prison under Minn. Stat. § 609.3455. These offenses are discussed further on page 13.

Applicable Grid

Section 3.G. of the Guidelines provides that modifications will be applied to offenders with a date of offense on or after the specified modification effective date. Therefore, the Sex Offender Grid enacted in 2006 is applicable to offenders with a date of offense on or after August 1, 2006. Of the 509 offenders sentenced for CSC in 2017, 491 (97%) were eligible for sentencing on the Sex Offender Grid. Table 1 provides a summary of cases by degree and applicable Grid. Ninety-six percent of first-degree offenders sentenced in 2017 were eligible for sentencing on the Sex Offender Grid (Table 1).

Table 1. Distribution of Cases by Degree, Severity Level and Applicable Grid, 2017

Degree	Statutory Provision	Cases Sentenced on Standard Grid			Cases Sentenced on Sex Offender Grid			Total Number of Cases Sentenced
		Severity Level	#	%	Severity Level	#	%	
First	Penetration: 609.342, all clauses	9	2	2	A	92	98	94
	Sexual Contact: 609.342, victim under 13 ⁷		3	10		28	90	31
Second	Contact w/ Force: 609.343 subd. 1(c)(d)(e)(f)(h)	8	4	14	B	25	86	29
	Contact w/ Minors: 609.343 subd. 1(a)(b)(g)	6	4	4	D	87	96	91

⁶ Nevertheless, in some of life-sentence cases, the court must refer to the Guidelines to establish a minimum term of imprisonment that must be served before the offender is supervised-release eligible. Minn. Stat. § 609.3455, subd. 5.

⁷ “Sexual contact with a victim under 13” was determined based on the Minnesota Offense Codes (MOCs), which accompany the charge on the complaint; see note 2 and “Victim Characteristics” discussion on page 8.

Degree	Statutory Provision	Cases Sentenced on Standard Grid			Cases Sentenced on Sex Offender Grid			Total Number of Cases Sentenced
		Severity Level	#	%	Severity Level	#	%	
Third	Penetration: Force or Prohibited Occupation, 609.344, subd. 1(c)(d)(g)-(n)	8	1	2	C	47	98	48
	Penetration w/ Minors: 609.344 subd. 1(b)(e)(f)	5	3	2	D/G*	133	98	136
Fourth	Contact: Force or Prohibited Occupation, 609.345, subd. 1(c)(d)(g)-(n)	6	0	---	E	41	100	41
	Contact w/ Minors: 609.345, subd. 1(b)(e)(f)	4	1	3	F	36	97	37
Fifth	Gross misdemeanor offenses with relevant priors	4	0	---	G	2	100	2
Total			18	3		491	97	509

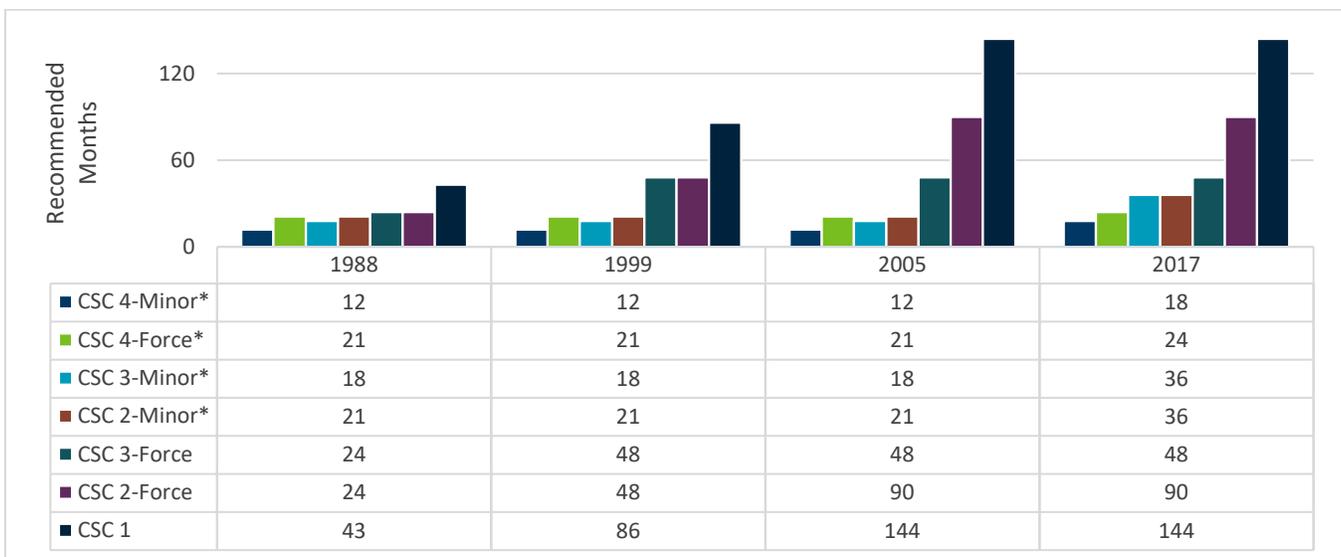

* Offenses where the actor is less than 48 months older than the victim are ranked at Severity Level G.

Presumptive Sentences over Time

Figure 1 is meant to illustrate the changes to the presumptive sentences over time at Criminal History Score 0, caused by changes to the presumptive Guidelines sentences, the implementation of the Sex Offender Grid, and statutory changes mandating presumptive sentences for sex offenders.

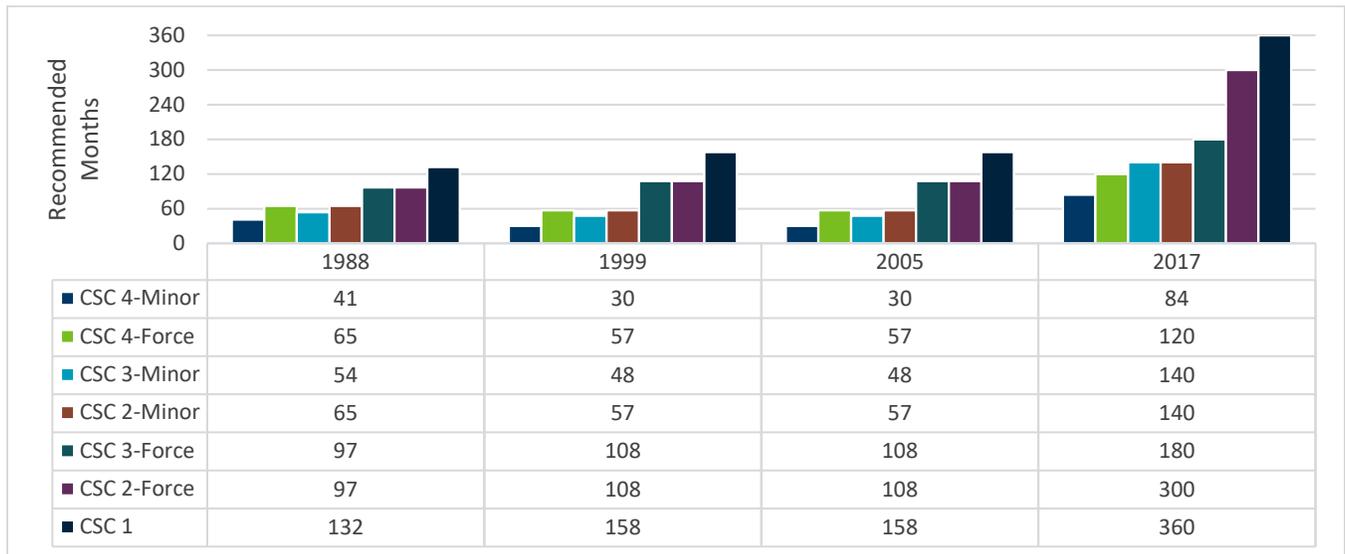

Figure 2 shows the same changes over time at Criminal History Score 6.

Figure 1. Presumptive Sentences by Degree over Time at Criminal History Score 0, 1988, 1999, 2005, & 2017

* Presumptive sentence = stayed (probationary) sentence. "12" = 12 months and 1 day.

Figure 2. Presumptive Sentences by Degree over Time at Criminal History Score 6, 1988, 1999, 2005 & 2017

Case Volume and Distribution⁸

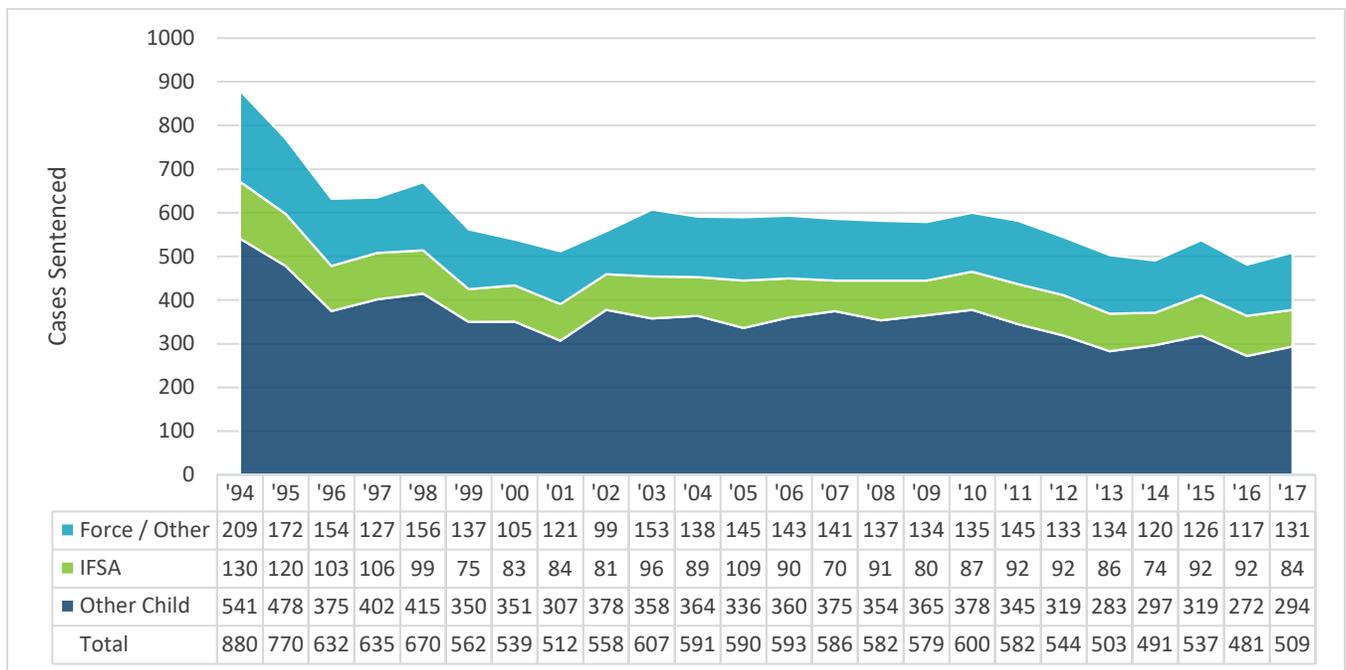

In 2016, 509 offenders were sentenced for CSC offenses, an increase of six percent from 481 offenders sentenced in 2017. As Figure 3 illustrates, the number of offenders sentenced for CSC offenses peaked in 1994 at 880 offenders. From 2004 until 2011, the number of offenders sentenced for CSC offenses had consistently ranged from 580 to 600. In 2014, the number sentenced dipped below 500 for the first time during this period. In 2015, the number sentenced again rose above 500. In 2016, the decline to 481 was a new low point and the lowest number sentenced since 1983. In 2017, the number of offender sentenced again rose above 500. See Table 7 (p. 24) for information on the number of offenders sentenced for sex offenses since 1988.

⁸ Minnesota Sentencing Guidelines Commission (MSGC) monitoring data are offender-based, meaning cases represent offenders rather than individual charges. Offenders sentenced within the same county in a one-month period are generally counted only once, based on their most serious offense.

Figure 3. Total Volume of CSC Cases, 1982-2017

Figure 4. Volume of Cases by Type of Offense, 1994-2017

Type of Offense

The distribution of cases between the relationship categories has remained fairly stable since 2003. In 2017, 131 (26%) of the cases sentenced were in the “Force/Other” category, which is slightly higher than the 24 percent

seen from 2014 to 2016, and just above the 23 to 25 percent range that was observed from 2003 to 2011. There were 84 (17%) “IFSA” cases and 294 (58%) “Other Child” offenses (Figure 4). In the “Force/Other” category, 123 of the 131 cases were offenses involving force; of the remaining eight cases, two involved correctional employees, one involved a clergy member, one involved a special transportation service employee, two involved massage therapists and two were fifth-degree offenses.

The distribution of cases among the five statutory degrees has also remained fairly consistent over the last ten years (Table 8, p. 25). The percentage of first-degree cases has consistently ranged between 21 and 26 percent since 2004, except for 2010 when it dipped to a low of 18 percent. In 2017, the distribution of cases was as follows: 25 percent of the cases sentenced were first-degree offenses, 24 percent were second-degree offenses, 36 percent were third-degree offenses, and 15 percent were fourth-degree offenses. There were two felony fifth-degree offenses sentenced in 2017.

Victim & Relationship Characteristics

The following overview of victim characteristics for the CSC offenses sentenced in 2017 was derived primarily from the Minnesota Offense Codes (MOCs), which accompany the charge on the criminal complaint. In cases for which the MOC information was unclear or missing, the information was, where possible, obtained from the statute of conviction. In 81 percent of the cases sentenced, the victims were minors: 35 percent involved victims under the age of 13; and 46 percent involved victims who were between the ages of 13 and 17. Nineteen percent involved victims who were adults. Ninety-two percent of the victims were female, and eight percent were male. (See Table 11, p. 35, for information on victim age.)

Table 12 (p. 36) displays the relationship between the victim and the offender by the offense degree and clause of conviction (clause specifying a child victim or clause specifying force or other). For first- and second-degree offenses, the offender was more likely to be a family member (58% and 68%, respectively); for third- and fourth-degree offenses, the offender was more likely to be an acquaintance (72% and 58%, respectively). Only a small percentage of cases (7%) involved strangers.

Prior Record of Sex Offenses

Most offenders sentenced for felony CSC do not have “true prior” sex offenses in their criminal record.⁹ Other priors may include multiple offenses charged in a single complaint and sentenced in successive order. Prior offenses that contribute to an offender’s criminal history score are listed on an offender’s worksheet. In 2017, five percent of sex offenders had a true prior felony sex offense listed on their sentencing worksheet. This figure varied slightly by the type of sex offense. (See Table 3, p. 11).

⁹ For purposes of this data report, a “true prior” is defined as an offense with a disposition date before the date of the current offense. “True prior,” within the meaning of this report, is not a statutory or Guidelines term, and may or may not correlate with statutory or Guidelines terms such as “prior,” “previous,” or “subsequent.”

Offender Characteristics

Sex offenders are more likely to be male than offenders sentenced for other offenses. Ninety-eight percent of CSC offenders were male, compared to 80 percent of non-CSC offenders. A higher percentage of sex offenders are sentenced in Greater Minnesota compared to other felony offenders (Figure 5). Sex offenders are also more likely to be Hispanic and slightly less likely to be black than other offenders (Figure 6, p. 10). The average offender age at the time of offense was 31 for CSC offenders and 32 for other offenders. Five percent of the offenders sentenced for CSC offenses were juveniles, compared to less than one percent of the offenders sentenced for non-CSC felonies. Twenty-nine percent of the offenders sentenced for CSC offenses were 21 and under compared to 14 percent of the offenders sentenced for other felonies (Table 2).

Figure 5. Distribution of Offenders by Region, CSC Offenders Compared to Non-CSC Offenders, 2017

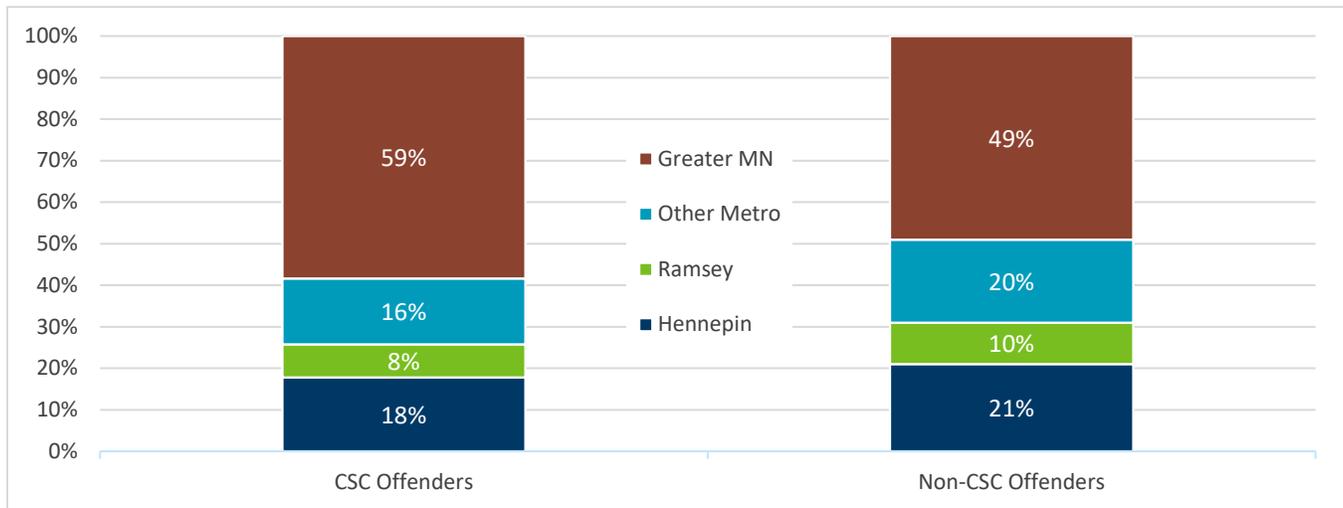

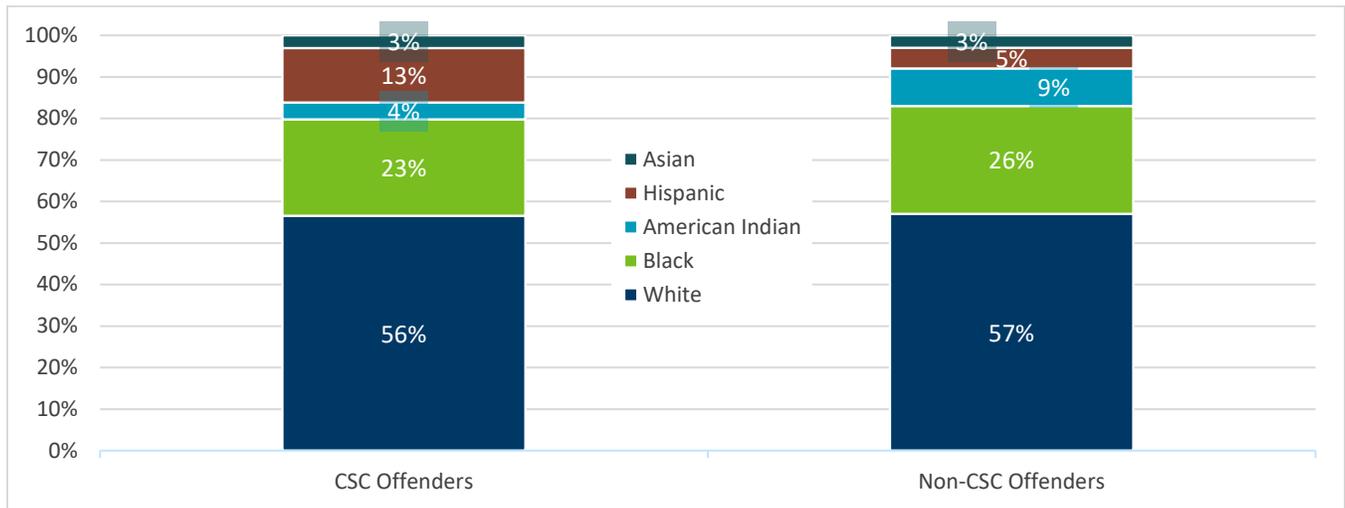

Table 2. Age Range of Offenders, CSC Offenders Compared to Non-CSC Offenders, 2017

Age Range	CSC Offenders		Non-CSC Offenders	
	Number	Percent	Number	Percent
Under 18	24	5	79	0.4
18–21	124	24	2,355	13
22–25	58	11	2,781	16
26–30	70	14	3,702	21
31–40	129	25	5,152	29
41–50	61	12	2,368	13
51 and over	43	8	1,342	8
Average Age	31.1		32.5	

Figure 6. Distribution of Offenders by Race, CSC Offenders Compared to Non-CSC Offenders, 2017

2017 Sentencing Practices

The recommended sentence under the Guidelines varies by the Severity Level of the conviction offense and the offender's Criminal History Score. These differences make it difficult to interpret sentencing information for CSC offenders. Therefore, in addition to reporting total statistics, this section of the report presents data for presumptive commitments (cases for which the Guidelines recommended prison) and for presumptive stays (cases for which the Guidelines recommended probation) separately. Information on sentence durations is presented by Severity Level and CSC type.

Incarceration Rates

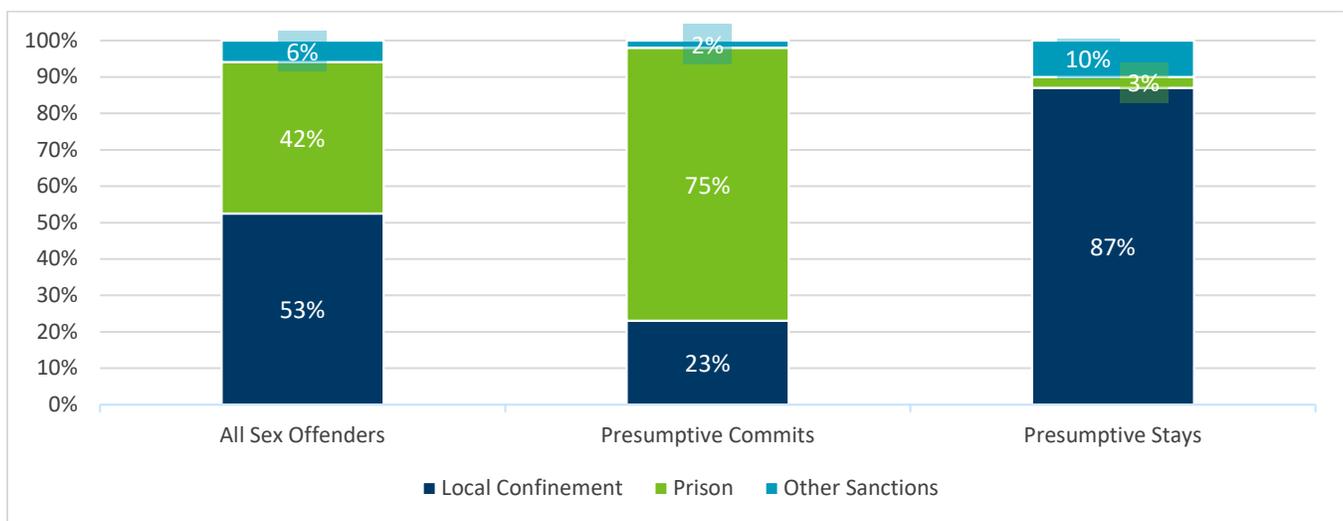

In both 2017 and 2016, the total incarceration rate for CSC offenders was 94 percent. In 2017, as seen in Figure 7 (p. 11), 42 percent of offenders received a prison sentence and 53 percent received local confinement as a condition of the stayed sentence. Except for 2010, the total incarceration rate has consistently exceeded 90 percent for the past 25 years. The 2017 imprisonment rate (42%) was slightly lower than the 2016 rate (45%), which was the highest ever observed. (See Table 7, p. 24, and Table 8, p. 25, for historical information on incarceration.)

The Guidelines recommended a presumptive sentence of imprisonment for 54 percent of the CSC offenders sentenced. Of those, 75 percent received a prison sentence. The imprisonment rate for offenders who had a true prior¹⁰ sex offense was 92 percent. Imprisonment rates for offenders with true priors were higher for those sentenced for the "IFSA" and "Force" offenses (100%) than for those sentenced for the "Other Child" offenses (85%) (Table 3).

Table 3. CSC Offenders with True Prior Sex Offenses, Number of Cases and Imprisonment Rates by Type of CSC Offense, 2017

Type of CSC Offense	CSC Offenders			CSC Offenders with True Prior ¹⁰ CSC Offense(s)			
	Number of Offenders	Received Prison		Number of Offenders	Percent	Received Prison	
		Number	Rate			Number	Rate
IFSA	84	43	51%	4	5%	4	100%
Other Child	294	90	31%	13	4%	11	85%
Force	123	77	63%	8	7%	8	100%
Other	8	2	25%	1	13%	1	100%
Total	509	212	42%	26	5%	24	92%

Figure 7. Incarceration Rates, 2017

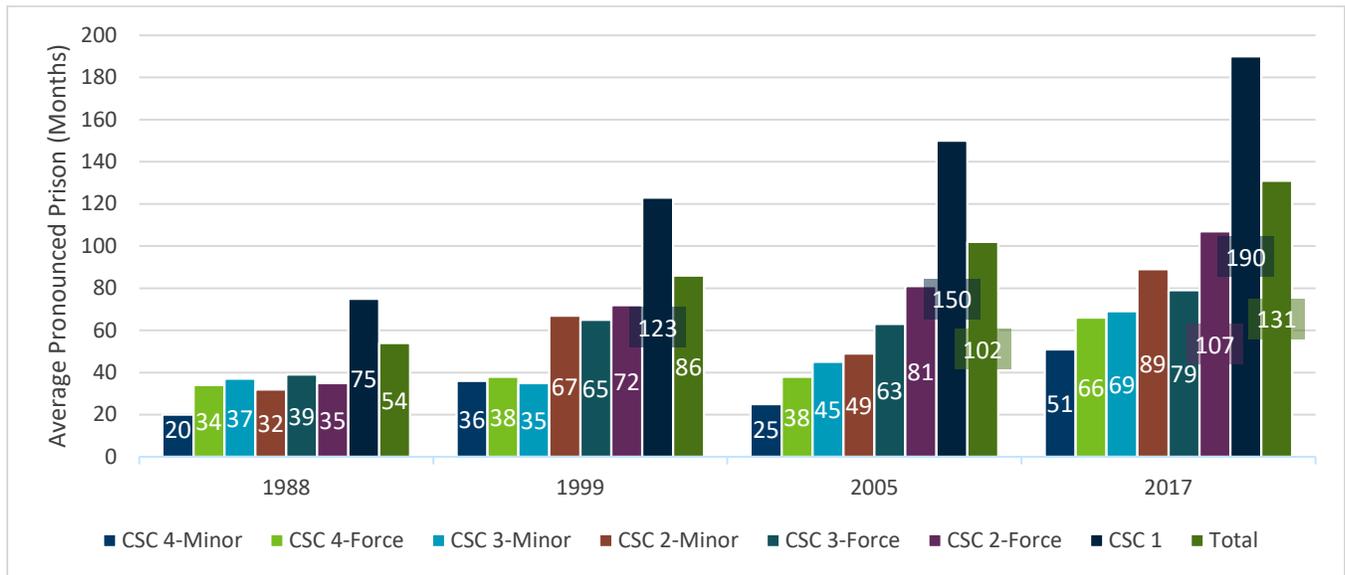

Sentence Durations: Prison Sentences

In 2017, the average pronounced prison sentence¹¹ was 131 months (Table 7, p. 24; see also Figure 9, p. 13). This was a slight decrease from 2016’s average pronounced duration of 133 months. Average pronounced durations have been impacted by the implementation of the Sex Offender Grid. In 2017, 97 percent of CSC offenders had offense dates on or after August 1, 2006, which made them eligible to be sentenced based on the Sex Offender Grid. The Sex Offender Grid includes longer presumptive sentences for offenders with prior records and also gives greater weight to prior sex offenses.

¹⁰ Refer to footnote 9 for a discussion of the meaning of “true prior” offenses

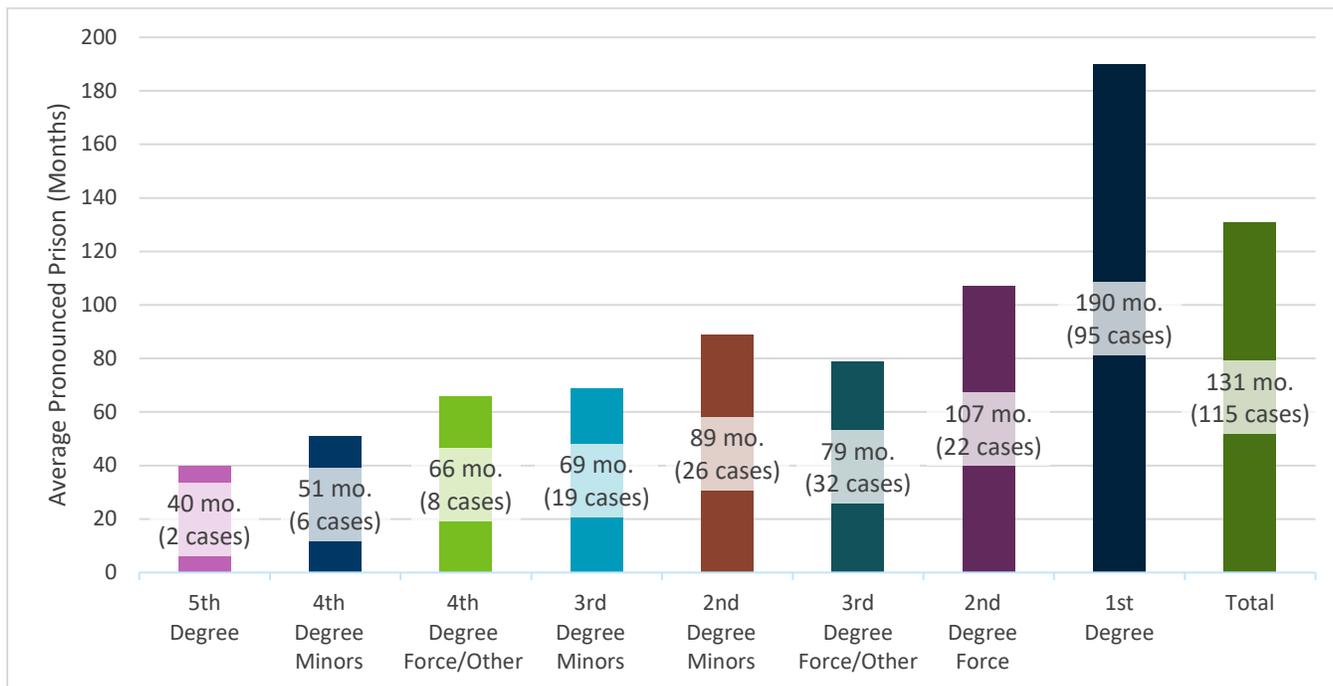

¹¹ The average pronounced duration is presented for offenders who received executed prison sentences.

Figure 8. Average Pronounced Prison Sentences by Offense, Executed Prison Sentences, 1988, 1999, 2005, & 2017

Offenders convicted of first-degree offenses received significantly longer sentences than those convicted of lesser severity-level offenses (Figure 9). The average pronounced sentence for those offenders was 190 months (identical to the 2016 average). Compared to 2016, the average pronounced sentence decreased for some offenses, but rose for others. The average pronounced duration was 107 months for second-degree offenses that involved force (greater than the 2016 average of 103 months), and 89 months for second-degree offenses with a minor victim (an increase from 77 months in 2016). Average sentence lengths increased for third-degree offenses: from 78 months in 2016 to 79 months in 2017 for offenses involving force; and from 55 months in 2016 to 69 months in 2017 for offenses with a minor victim. Average sentences for fourth-degree offenses involving force decreased from 79 months in 2016 to 66 months in 2017; and increased for fourth-degree offenses with a minor victim (from 33 months in 2016 to 51 months in 2017). (See Table 7, p. 24, and, p. 25, for historical information on past sentence durations.)

Figure 9. Average Pronounced Prison Sentence, Executed Prison Sentences by Offense Type, 2017

The average sentence durations shown in Figure 9 are affected both by departures from the Guidelines and by the use of consecutive sentences. When consecutive sentences are imposed for multiple current offenses—even if one of the offenses is not a CSC offense—the total pronounced sentence is reflected in Figure 9, which generally increases the total duration shown. For first-degree offenses not involving durational departures, the average pronounced sentence was 176 months for cases that did not involve consecutive sentences (69 cases) and 313 months for cases with consecutive sentences (seven cases). The average sentence for first-degree offenses involving aggravated durational departures was 291 months (eight cases) and 122 months for offenses involving mitigated durational departures (eleven cases).

Longer than Typical Prison Sentences

There are several statutes and provisions in the Guidelines that permit the court to impose sentences that are significantly longer than the presumptive sentence when the circumstances of the case so warrant. The Guidelines also establish presumptive sentences of 30 years (the statutory maximum) for first-degree CSC offenders with Criminal History Scores of 6 or more. This section describes the longer prison sentences pronounced and the use of life sentences since that provision was enacted.

Use of Life Sentences over Time

In 2005, the Legislature established mandatory life sentences for certain criminal sexual conduct offenses (Minn. Stat. § [609.3455](#)). For some provisions of the law, the life sentence is without the possibility of release. For other provisions, the court must specify the minimum time to be served before the offender may be considered for release. Table 15 (p. 43) outlines when these and other mandatory-minimum sentencing provisions apply in

criminal sexual conduct cases. Table 4 displays information about the 24 CSC offenders who have received life sentences since 2006. In 2016 and 2017, two offenders received life sentences each year.

Table 4. Pronounced Life Sentences for Criminal Sexual Conduct, 2006–2017

Year	Offense	Severity Level	Criminal History Score	Number of True Prior Sex Offenses	Grid Duration (months)	Pronounced Minimum Term to Serve (months)	Minn. Stat. § 609.3455 Life Sentence Subdivision
2017	1st Degree - Significant Relationship Vic. under 16 & Injury	A	0	0	144	No Release	2(a)(1)
	1st Degree - Significant Relationship Vic. under 16	A	3	1	180	180	4(a)(1)
2016	1st Degree - Fear Great Bodily Harm	A	4	0	234	No Release	2(a)(1)
	1st Degree - Force & Injury (attempt)	A	9	1	180	180	4(a)(2)(i)
2015	<i>No Cases</i>	---	---	---	---	---	---
2014	3rd Degree - Victim Incapacitated	C	5	1	153	153	4(a)(3)(ii)
2013	<i>No Cases</i>	---	---	---	---	---	---
2012	1st Degree - Force & Injury	A	0	0	144	144	3(a)
	3rd Degree - Force or Coercion	C	7	2	180	180	4(a)(1)
2011	1st Degree - Force & Injury	A	5	1	306	44	3(a)
	1st Degree - Pos. of Auth. & Vic. 13-16	A	4	1	234	234	4(a)(2)(ii)
	1st Degree - Pos. of Auth. & Vic. 13-16	A	3	2	180	300	4(a)(1)
	1st Degree - Pos. of Auth. & Vic. 13-16	9	3	2	144	144	4(a)(1)
	2nd Degree - Force & Injury	B	2	1	130	No Release	2(a)(2)
2010	1st Degree - Fear Great Bodily Harm	A	6	2	360	No Release	2(a)(2)
	3rd Degree - Force or Coercion	C	4	1	117	117	4(a)(2)(ii)
2009	1st Degree - Fear Great Bodily Harm	A	4	0	234	No Release	2(a)(1)
	1st Degree - Force & Injury	A	1	0	156	No Release	2(a)(1)
2008	1st Degree - Multiple Acts	A	3	1	180	206	4(a)(1)
	1st Degree - Fear Great Bodily Harm	9	5	2	146	No Release	2(a)(1)
	2nd Degree - Victim Under 13	D	9	4	140	140	4(a)(1)
2007	1st Degree - Fear Great Bodily Harm	9	0	0	144	144	unknown
	2nd Degree - Dangerous Weapon	8	4	1	98	180	4(a)(1)
	2nd Degree - Victim Under 13	6	8	1	60	360	4(a)(1)
	3rd Degree - Victim 13-16	D	4	3	91	240	4(a)(1)
2006	3rd Degree - Force or Coercion	8	2	1	68	136	unknown

Refer to footnote 9 above for a discussion of the meaning of “true prior” offenses.

Sentences at Least Double the Presumptive Sentence

Three offenders received prison sentences in 2017 that were double the length of their presumptive sentences or more. The presumptive sentences, pronounced sentences, criminal history score and sentence type for these cases are listed in Table 5.

Two of the cases were first-degree offenses and one was a third-degree offense. All three cases involved aggravated durational departures. One of the offenders received a total sentence of 648 months through consecutive sentences for multiple sexual assaults.

Table 5. Executed Sentences of Double the Presumptive Sentence or More, 2017

Offense	Severity Level	Criminal History Score	Number of True Prior Sex Offenses	Grid Duration (months)	Total Sentence (months)	Consecutive Sentence	Aggravated Duration
1st Degree- Victim Under 13	A	3	0	180	648	Yes	Yes
1st Degree- Victim Under 13	A	3	1	180	360	No	Yes
3rd Degree-Force or Coercion	C	0	0	48	96	No	Yes

Refer to footnote 9 above for a discussion of the meaning of “true prior” offenses.

Sentences with Durations of 30 Years or More

Five other offenders received prison sentences of at least 360 months (30 years), the statutory maximum for first-degree CSC offenses. These sentences are shown in Table 6. Unlike the sentences in Table 5, none of these sentences was a departure from the presumptive Guidelines sentence. Instead, each sentence was for a first-degree offender with a high criminal history score. In three cases, 360 months was the presumptive midpoint sentence; in two case, 360 months was the top of the upper range. One case, involving multiple current sex offenses, resulted in a sentence of 450 months through consecutive sentencing.

Table 6. Other Executed Sentences with Durations of 30 Years or More, 2017

Offense	Criminal History Score	Number of True Prior Sex Offenses	Multiple Current CSC	Grid Duration (months)	Total Sentence (months)	Consecutive Sentence	Aggravated Duration
1st Degree-Fear Great Bodily Harm	6	0	3	360	450	Yes	No
1st Degree-Force and Injury	5	0	0	306	360	No	No
1st Degree-Fear Great Bodily Harm	6	1	0	360	360	No	No
1st Degree-Force and Injury	5	0	0	306	360	No	No
1st Degree-Fear Great Bodily Harm	6	0	0	360	360	No	No

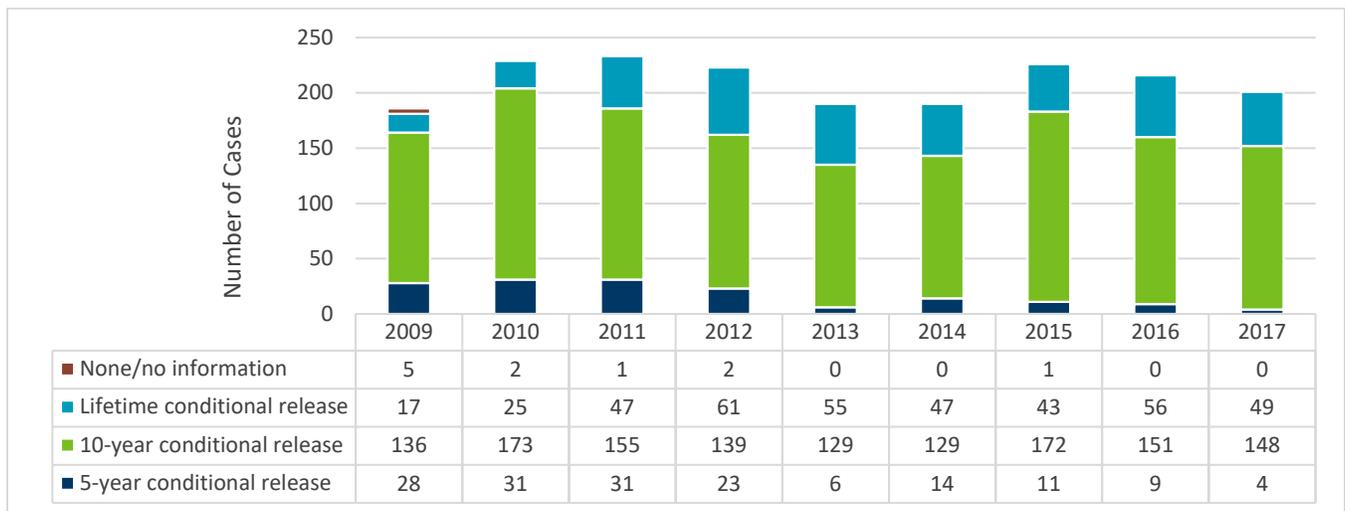

Refer to footnote 9 above for a discussion of the meaning of “true prior” offenses.

Conditional Release

In 1992, the Legislature required five- or ten-year conditional-release¹² periods for sex offenders who were committed to prison. The current law requires ten-year or lifetime conditional-release periods for sex offenders who are committed to prison.¹³

Figure 10 (p. 16) reflects the mandated conditional-release terms, as reflected on each case’s validated sentencing worksheet, for CSC cases with executed prison sentences. Figure 10 may differ somewhat from the actual conditional-release terms as pronounced, as the MSGC does not have data for the pronounced conditional-release terms. Moreover, revoked probationary sentences will also result in conditional-release terms, but those conditional-release terms are not reflected in Figure 10.

Figure 10. Mandatory Conditional Release Terms, CSC Cases with Executed Prison Sentences, 2009–2017

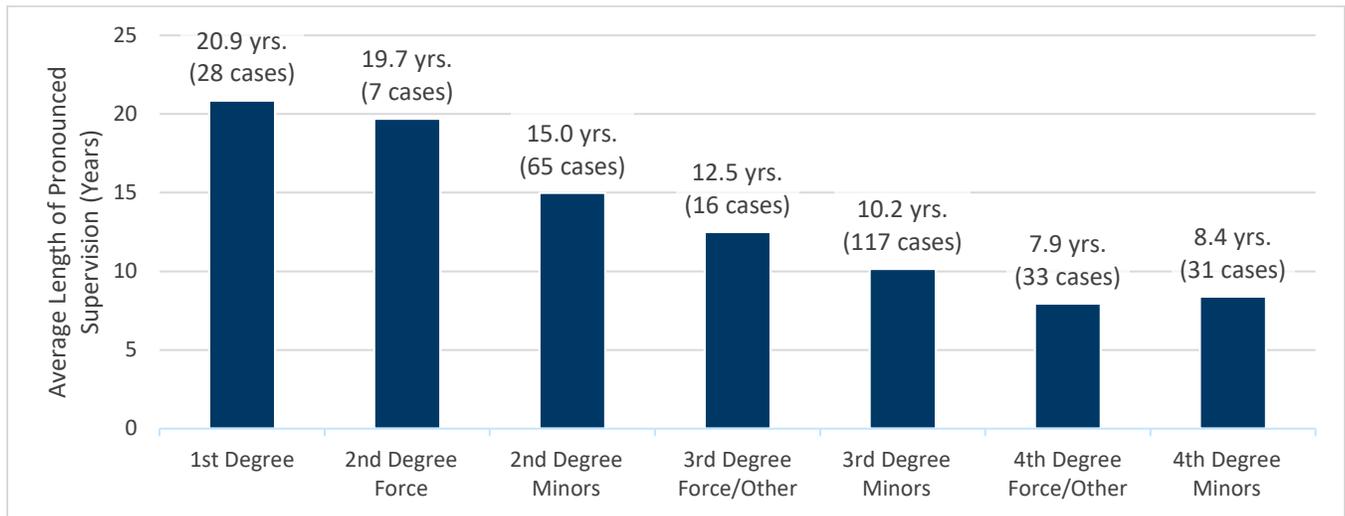

Sentence Durations: Probation Sentences

Fifty-eight percent of the CSC offenders sentenced in 2017 received a probation sentence. Of the offenders who were placed on probation, 77 percent received probation because it was the presumptive sentence and 23 percent received probation as a mitigated dispositional departure. The average pronounced period of probation for sex offenders was approximately 12 years. First-degree offenders generally received longer periods of probation than other offenders (Figure 11).

¹² Originally called “supervised release,” [1992 Minn. Laws chap. 571, art. 1, § 25](#), and renamed “conditional release” the following year, [1993 Minn. Laws ch. 326](#), art. 9, § 9.

¹³ [Minn. Stat. § 609.3455](#), subd. 6 & 7. See Table 15 for an outline of how these conditional release terms apply. Conditional-release statutes do not apply to attempted offenses unless explicitly stated in law. *State v. Noggle*, 881 N.W.2d 545 (Minn. 2016).

Figure 11. Average Pronounced Period of Supervision by Offense that Received a Stayed Sentence, 2017

Ninety percent of offenders who did not receive an executed prison sentence received local confinement time as a condition of their stayed sentence. The average pronounced local confinement for CSC offenders was 165 days (Table 7, p. 24). The pronounced local confinement time was significantly longer for offenders convicted of offenses for which the Guidelines recommended presumptive commitment to prison (276 days) than for offenders convicted of offenses for which the Guidelines recommended a presumptive stayed sentence (131 days).

Departures from the Guidelines

The Guidelines establish a presumptive sentence for felony offenses based on the Severity Level of the conviction offense and the offender's Criminal History Score. The presumptive sentence is based on the typical case; however, the court may depart from the Guidelines when there are substantial and compelling circumstances. A "departure" is a pronounced sentence other than that recommended in the appropriate cell of the applicable Grid. There are two types of departures—dispositional and durational—as further explained below. Since the presumptive sentence is based on "the typical case," the appropriate use of departures by the courts when substantial and compelling circumstances exist can actually enhance proportionality by varying the sanction in an atypical case.

While the court ultimately makes the sentencing decision, other criminal justice professionals and victims participate in the decision-making process. Probation officers make recommendations to the courts regarding whether a departure from the presumptive sentence is appropriate, and prosecutors and defense attorneys arrive at agreements regarding acceptable sentences for which an appeal will not be pursued. Victims are provided an opportunity to comment regarding the appropriate sentence as well. Therefore, these departure statistics should be reviewed with an understanding that, when the court pronounces a particular sentence, there is commonly agreement or acceptance among the other actors that the sentence is appropriate. Only a small percent of cases (1% to 2%) result in an appeal of the sentence pronounced by the court.

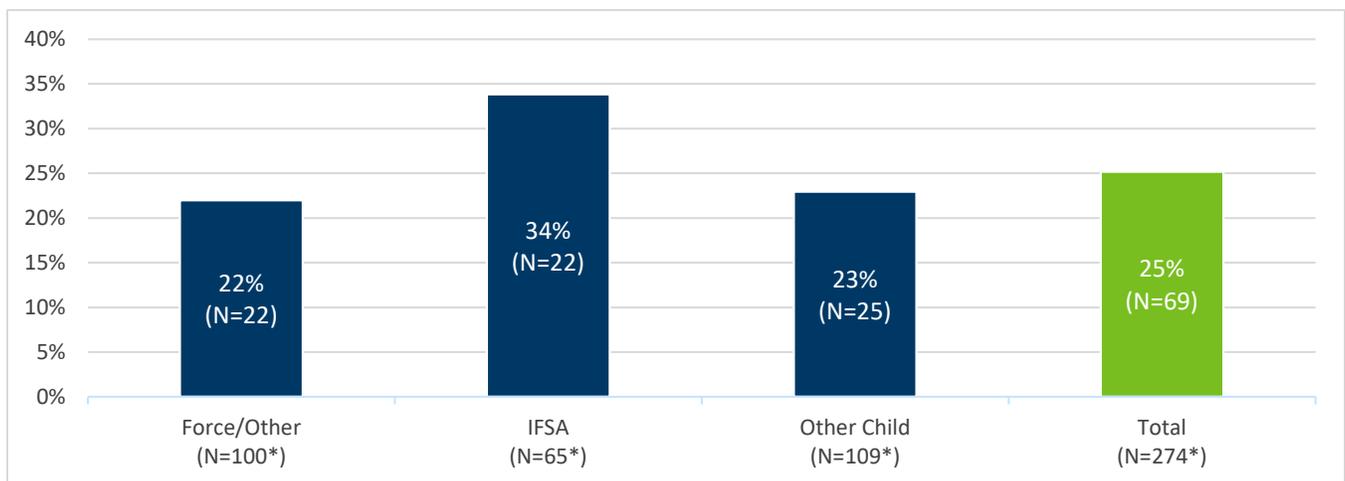

Dispositional Departures

A “dispositional departure” occurs when the court orders a disposition other than that recommended in the Guidelines. There are two types of dispositional departures: aggravated dispositional departures and mitigated dispositional departures. An aggravated dispositional departure occurs when the Guidelines recommend a stayed sentence but the court pronounces a prison sentence. A mitigated dispositional departure occurs when the Guidelines recommend a prison sentence but the court pronounces a stayed sentence.

Mitigated Dispositions

Figure 12 shows mitigated dispositional departure rates for cases in which the Guidelines recommend prison (“presumptive commitments”) by the type of CSC offense. The total mitigated dispositional departure rate was 25 percent, an increase from the rate of 24 percent in 2016, which was the lowest observed since at least 1988 (Table 9, p. 30). Previously, rates tended to vary by offense type, with “IFSA” cases historically showing the highest rate of departure. Throughout the 1990s, the mitigated dispositional departure rate usually exceeded 33 percent, once reaching 40 percent. Since 2000, the departure rate has usually been below 30 percent. The departure rate in 2017 was slightly below average for the “Force/Other” cases (22%) and the “Other Child” cases (23%), and above average for the “IFSA” cases (34%) (Figure 12).

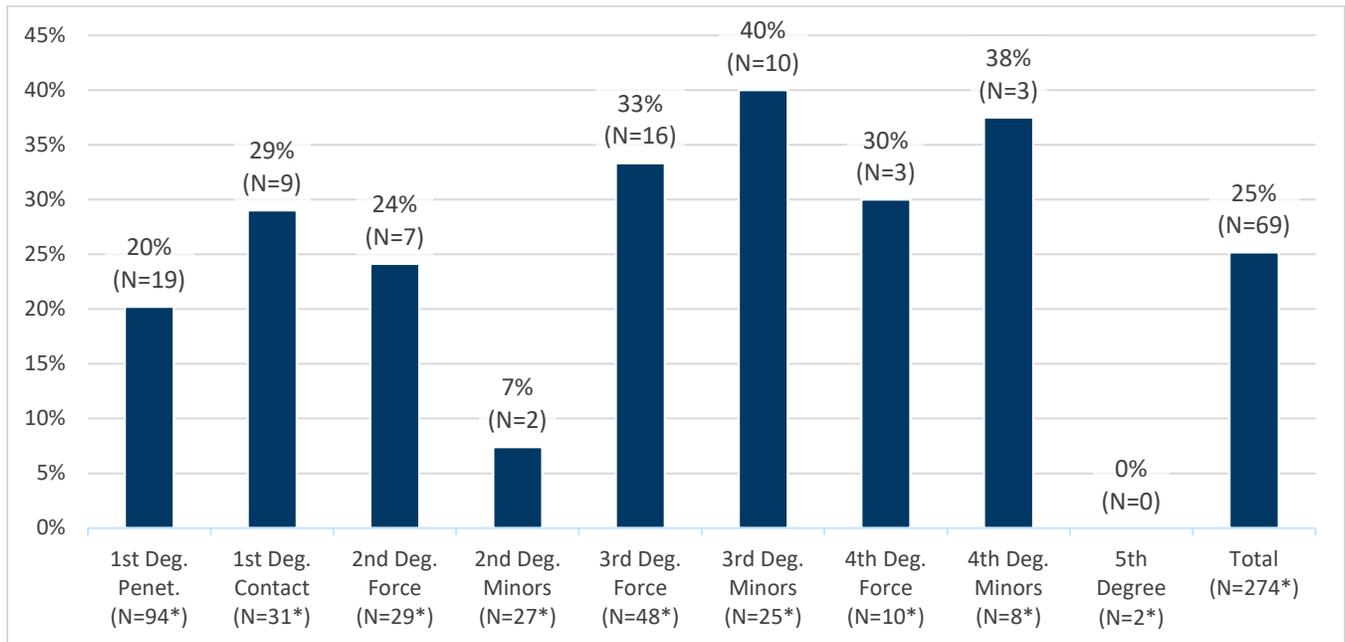

Figure 12. Mitigated Dispositional Departure Rates by Offense, Presumptive Commitment Cases, 2017

* Number of presumptive commitment cases.

Figure 13 shows mitigated dispositional departure rates by degree. The rates were lower for the first-degree penetration offenses and the second-degree minor offenses than for the other offenses.

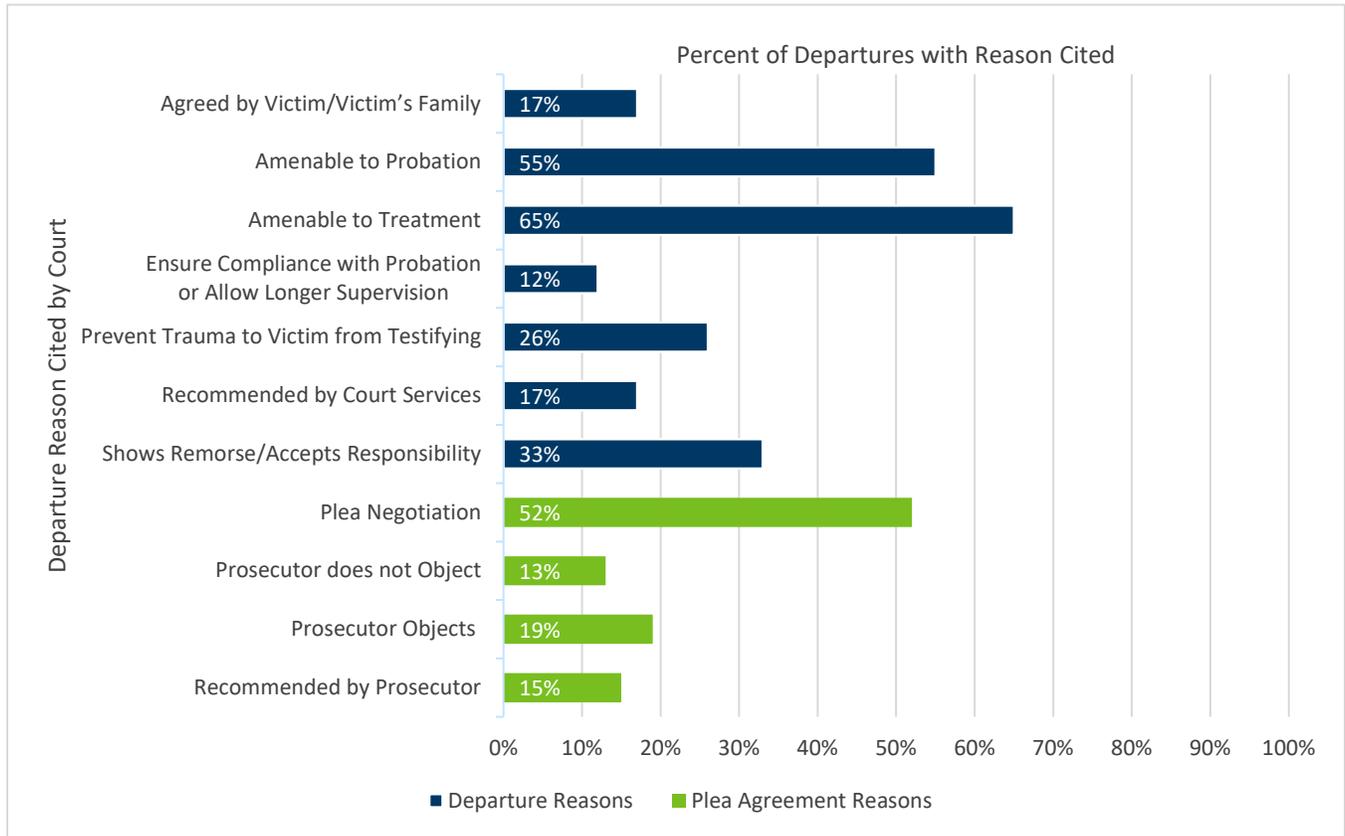

Figure 13. Mitigated Dispositional Departure Rates by Degree, Presumptive Commitment Cases, 2017

*Number of presumptive commitment cases.

The most common reasons cited for mitigated dispositional departures typically involves placement of the offender in sex offender treatment programs, placement in other types of treatment (e.g., chemical dependency), recommendations by court services, placement of the offender on long-term probation supervision to ensure compliance with conditions, amenability to probation and remorse or acceptance of responsibility on the part of the offender. For most years, the court indicates that the victim or victim's family agreed with the departure in about 15 percent of cases; in 2017, it was 17 percent. In 26 percent of the mitigated dispositions, the court indicated the departure was made to spare the victim from testifying. (Figure 14.) In 57 percent of the mitigated dispositions, the court indicated that there was either a plea agreement for the departure or that the prosecutor recommended or did not object to the departure. The court reported that the prosecutor objected to the departure in 19 percent of the mitigated dispositions. It should be noted that no plea information was provided by the courts in about 25 percent of the mitigated dispositions.

Figure 14. Most Frequently Cited Mitigated Dispositional Departure Reasons, 2017

This figure shows the most common reasons cited for mitigated dispositional departures, as submitted by the court and coded by MSGC staff. Up to four departure reasons and three plea agreement reasons are coded per case. A plea agreement alone is not a sufficient basis for departure. *State v. Misquadace*, 644 N.W.2d 65 (Minn. 2002). There were 64 mitigated dispositional departures.

Aggravated Dispositions

Four of the 235 offenders recommended probation received a prison sentence, an aggravated departure rate of two percent. In two (50%) of these cases, the court reported that the offender either agreed to the departure or requested a prison sentence.¹⁴ Prison may have been requested because the offender was already in prison or was going to prison on another case.

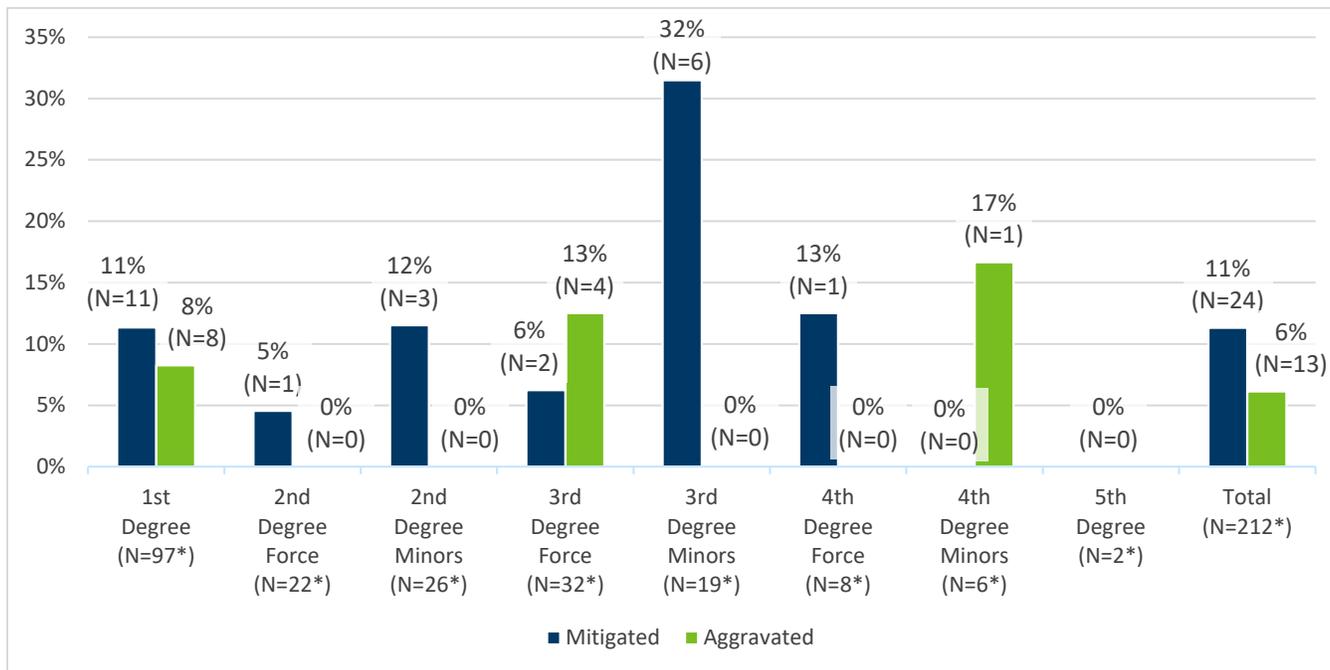

Durational Departures

A “durational departure” occurs when the court orders a sentence with a duration other than the presumptive fixed duration or range in the appropriate cell on the applicable Grid. There are two types of durational departures: aggravated durational departures and mitigated durational departures. An aggravated durational

¹⁴ For offenses committed after July 31, 2015, a sentence that is executed pursuant to an offender’s right to demand execution is not an aggravated dispositional departure (Minn. Sentencing Guidelines § 2.D.1.f).

departure occurs when the court pronounces a duration that is more than 20 percent higher than the fixed duration displayed in the appropriate cell on the applicable Grid. A mitigated durational departure occurs when the court pronounces a sentence that is more than 15 percent lower than the fixed duration displayed in the appropriate cell on the applicable Grid. Durational departure rates are presented by offense for executed sentences only (Figure 15).

Figure 15. Durational Departure Rates by Offense for Offenders Receiving an Executed Prison Sentence, 2017

* Number receiving an executed prison sentence.

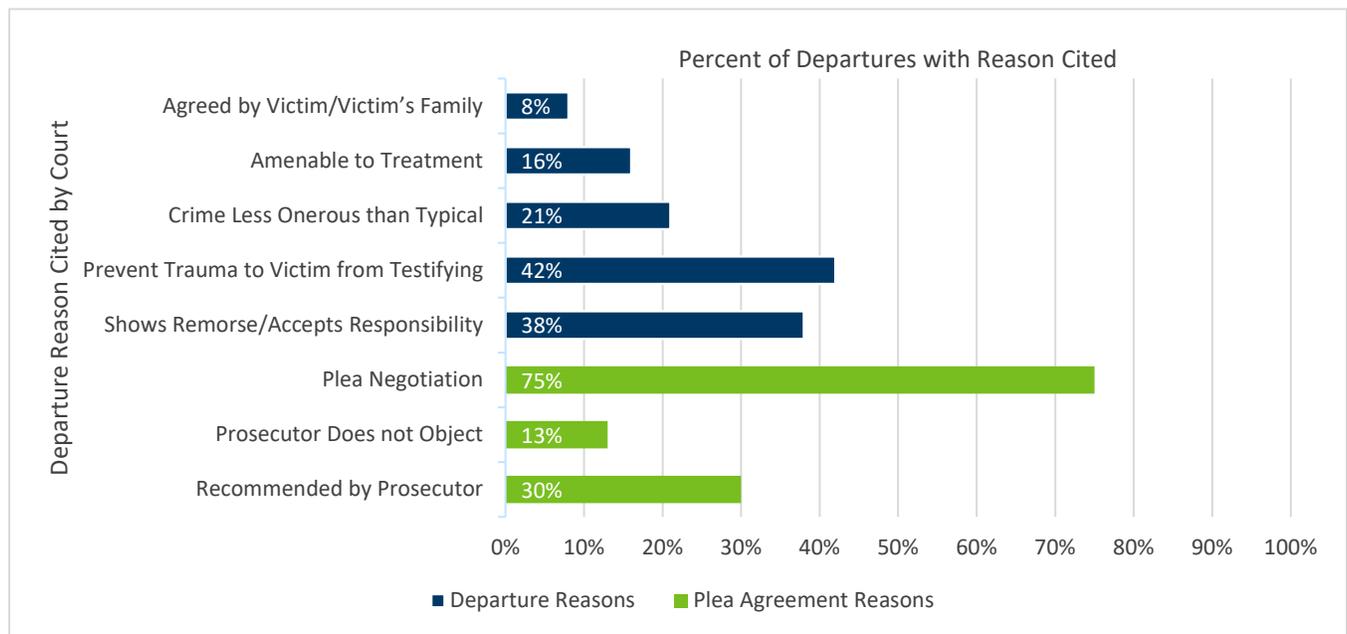

Durational departure rates are influenced by changes in presumptive sentences. Prior to 2006, CSC offenses were sentenced using the Standard Grid. Effective August 1, 2005, the ranges on the Standard Grid were increased to allow the court to pronounce a sentence without departure that is up to 20 percent greater than, or 15 percent less than, the presumptive number of months on the Standard Grid. The Sex Offender Grid is used for offenses committed on or after August 1, 2006. The Sex Offender Grid has longer presumptive sentences for repeat offenders and offenders with prior criminal history.

Mitigated Durations

Eleven percent (24 offenders) of the 212 offenders who received executed prison sentences were given shorter sentences than recommended, similar to the 10 percent rate in 2016 (Table 9, p. 18). The 2016 rate was the lowest mitigated durational departure rate observed since 1989. Mitigated durational departure rates were greatest for third-degree offenses involving minors (32%) and lowest for second-degree offenses involving force (5%). There were no mitigated durational departures for fourth-degree offenses involving minors and fifth-degree offenses, but both categories had few offenders receiving prison sentences.

The most frequently cited reasons for mitigated durational departures were: to prevent trauma to the victim from testifying (42%), and because the offender showed remorse or accepted responsibility (38%) (Figure 16). In two cases (8%), the court indicated that the victim or victim’s family agreed with the departure. In 83 percent of these cases, the court indicated either that there was a plea agreement for a mitigated duration or that the prosecutor recommended or did not object to the departure. In one case, the court indicated that the prosecutor objected to the mitigated durational departure. It should be noted that no plea information was provided for 13 percent of cases that received mitigated durational departures.

Figure 16. Most Frequently Cited Mitigated Durational Departure Reasons, 2017

This figure shows the most common reasons cited for mitigated durational departures, as submitted by the court and coded by MSGC staff. Up to four departure reasons and three plea agreement reasons are coded per case. A plea agreement alone is not a sufficient basis for departure. *State v. Misquadace*, 644 N.W.2d 65 (Minn. 2002). There were 21 mitigated durational departures.

Aggravated Durations

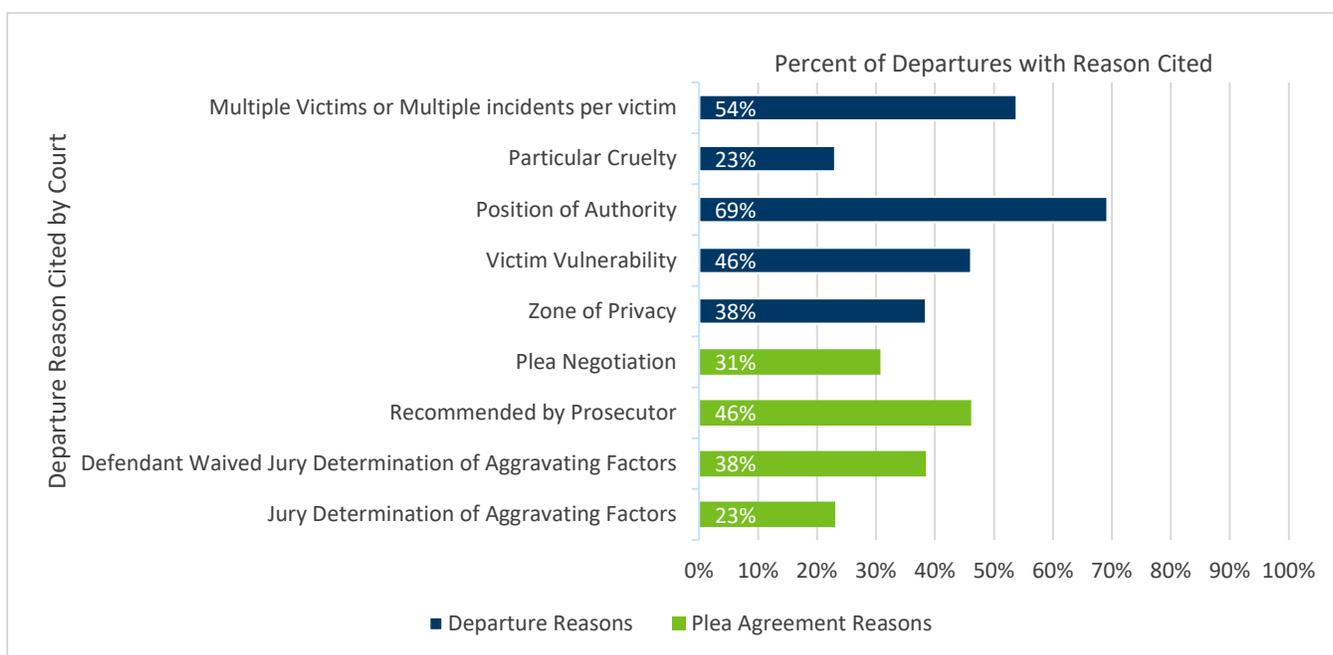

In 2017, six percent (13 offenders) of the 212 offenders who received executed prison sentences were given aggravated durational departures, i.e., longer prison sentences than recommended. This is the same rate observed in 2015 and 2016 (Table 10, p. 31). The three-percent rate observed in 2009 was the lowest aggravated durational departure rate ever observed for CSC offenses. Rates in the last six years have been lower than those observed in 2005 through 2008 (16%, 9%, 8%, and 8%, respectively). This rate has declined since the 1990s, when rates as high as 27 percent were seen. (For more detailed information on durational and dispositional departures over time, see Table 9, p. 30, and Table 10.)

A possible reason for some of the decline in the aggravated durational departure rate is that over time, more of the offenders sentenced for first-degree offenses and second-degree offenses with force were eligible for the

statutorily-set presumptive sentences and higher presumptive sentences on the 2006 Sex Offender Grid. Another possible explanation is the impact of the U.S. Supreme Court ruling in *Blakely v. Washington*, 542 U.S. 296 (2004), requiring that enhanced sentences generally be supported by jury findings.

The most frequently cited reasons for aggravated durational departures were: position of authority/trust over the victim (9 cases, 69%), multiple victims or multiple incidents (7 cases, 54%), and victim vulnerability (6 cases, 46%) (Figure 17). In 54 percent of these cases, the court indicated either that there was a plea agreement for an aggravated duration or that the prosecutor recommended the departure. The court indicated that the defendant waived jury determination of aggravating factors in five of the 13 cases. No information on the position of the prosecutor or defendant was cited in six of the aggravated durations.

Figure 17. Most Frequently Cited Aggravated Durational Departure Reasons, 2017

This figure shows the most common reasons cited for aggravated durational departures, as submitted by the court and coded by MSGC staff. Up to four departure reasons and three plea agreement reasons are coded per case. A plea agreement alone is not a sufficient basis for departure. *State v. Misquodace*, 644 N.W.2d 65 (Minn. 2002).

	Force/Other	28	21	2	2	7	5	72	55	21	16	1	1	131	26
	Total	196	39	33	7	7	1	234	46	35	7	4	1	509	100

Note: The "CSC Provision" column is based on statute and specifies the victim was a child or does not specify the victim's age. Except for "Occupation," the "Relationship between Victim and Offender" columns are based on the Minnesota Offense Codes (MOCs) that accompany the charge on the complaint; see note 2 and "Victim Characteristics" discussion on page 8. The "Occupation" category is provided in statute and specifies the occupation of the offender, e.g., psychotherapist, health care professional, clergy, correctional employee, or special transportation service employee. If one of the specified occupations was indicated by the MOC code, the offense is included regardless of how it was charged.

Table 13. Volume of Offenders Sentenced for CSC Offenses by Statutory Provision, 2013-2017

CSC Degree, Severity Level And Presumptive Duration at CHS 0	Statute Number	Offense	Number of Offenders Sentenced

Fifth Degree Severity Level 4/G 15 months, stayed Offense pre-7/31/2014	609.3451 subd. 3	5th Degree CSC – Violate 609.3451 subd. 1(2) after previous conviction	0	1	1	1	0	2

Note: The number/letter after “severity level” refers to the offense’s rankings on the standard grid/sex offender grid, respectively. Likewise, when two presumptive sentences are displayed, they refer to the pre- and post-sex offender grid durations.

The following table displays sentencing practices from 2015 to 2017 by the statutory provision for which the offender was sentenced. Included are the number of cases, number of cases for which prison was the presumptive sentence, number and percent receiving an executed prison sentence, the average pronounced sentence in months, and the number and rate of mitigated dispositional departures (percent of presumptive commitments receiving probation). Life sentences are excluded from the average durations.

Table 14. Sentencing Practices for Criminal Sexual Conduct Offenses by Statutory Provision, Combined Data 2015-2017

CSC Degree, Severity Level, and Presumptive Duration at CHS 0	Statute Number	Offense	Cases	Presump- tive Prison	Prison Sentence		Av. Prison Term (months)	Mitigated Dispositional Departures

Fifth Degree Severity Level 4/G 15 months, stayed Offense pre-7/31/2014	609.3451 subd. 3	5th Degree CSC – Violate 609.3451 subd. 1(2) after previous conviction	2	2	2	100	40	0	0

Note: The number/letter after “severity level” refers to the offense’s rankings on the standard grid/sex offender grid, respectively. Likewise, when two presumptive sentences are displayed, they refer to the pre- and post-sex offender grid durations.

Table 15. Outline of Mandatory Minimums Applicable to Criminal Sexual Conduct Offenses, 2017

If the current offense is ...	and ...	and ...	then the court must sentence offender to ...	per Minn. Stat. § ...
Criminal Sexual Conduct (CSC) 1st–4th Degree or Criminal Sexual Predatory Conduct (CSPC)	the court is committing offender to prison for the current offense	<i>[no additional requirements]</i>	a sentence that provides for a 10-year conditional release term upon release from prison	609.3455 , subd. 6.
		before the current conviction, offender was convicted of a prior completed/attempted CSC 1st–5th Degree (or CSC 1st–3rd Degree, if current offense is CSC 4th Degree) or CSPC, involving separate behavioral incident	a sentence that provides for lifetime conditional release term upon release from prison	609.3455, subd. 7(b) & (c); see also State v. Nodes , 863 N.W.2d 77 (Minn. 2015) (at one hearing, one conviction was entered “before” other).
CSC 1st–4th Degree	before the current offense date, offender was convicted of two prior felony violent crimes (see statutory list; includes CSC 1st–4th Degree & Controlled Substance Crime 1st & 2nd Degree)	offender was convicted of the first prior felony violent crime before committing the second prior felony violent crime	executed sentence of at least the presumptive Guidelines duration	609.1095 , subd. 3; see also subd. 2 (aggravated departures for dangerous offenders).
CSC 2nd Degree	the charge is not 2nd Degree based solely on age, age & position, or age & relationship not involving multiple incidents	<i>[no additional requirements]</i>	executed sentence of at least 90 months, unless the court finds substantial & compelling reasons justifying a Guidelines departure	609.343 , subd. 2(b).
CSC 1st Degree	<i>[no additional requirements]</i>	<i>[no additional requirements]</i>	executed sentence of at least 144 months, unless the court finds substantial & compelling reasons justifying a Guidelines departure	609.342 , subd. 2(b).
CSC 1st–4th Degree or CSPC	before the current offense date, offender was sentenced for a previously completed or attempted CSC 1st–5th Degree or CSPC	the current conviction date is within 15 years of previous conviction date	executed sentence of 3 years to statutory maximum, unless the court finds that a professional assessment indicates that offender is accepted by, and can respond to, approved long-term inpatient sex-offender treatment	609.3455, subd. 10.

If the current offense is ...	and ...	and ...	then the court must sentence offender to ...	per Minn. Stat. § ...
completed or attempted CSC 1st–4th Degree or CSPC for which the court is imposing an executed sentence	the factfinder finds that offender is a danger to public safety (based on a Guidelines aggravating factor; planning or preparation; or previously completing or attempting one of the following adult crimes, or committing one of the following juvenile offenses: murder, manslaughter, Assault 1st-3rd or 5th Degree, Domestic Assault, robbery, kidnapping, false imprisonment, witness tampering, Arson 1st Degree, or Burglary 1st Degree)	the factfinder finds that offender's criminal sexual behavior is so engrained that re-offense risk is great without intensive/long-term treatment/supervision beyond presumptive prison and supervised release	at least double the Guidelines sentence, but not more than the statutory maximum	609.3455, subd. 3a.
CSC 1st–4th Degree or CSPC	before the current offense date, offender was convicted of two previously completed or attempted CSC 1st–5th Degree (or CSC 1st–3rd Degree, in the case of a current CSC 4th Degree) or CSPC, and was sentenced for both offenses	offender was sentenced for the first previous sex offense before committing the second previous sex offense	life, with specified minimum term of imprisonment based on the Guidelines, and provide for lifetime conditional release	609.3455, subd. 4(a)(1), 4(b), 5, 7(a).
	before the current offense date, offender was sentenced for a previously completed or attempted CSC 1st–5th Degree (or CSC 1st–3rd Degree, in the case of a current CSC 4th Degree) or CSPC	the factfinder finds a Guidelines aggravating factor (other than repeat sex offender) that would justify a durational departure		609.3455, subd. 4(a)(2)(i), 4(b), 5, 7(a).
		the previous sentence was an upward durational departure		609.3455, subd. 4(a)(2)(ii), 4(b), 5, 7(a).
		the previous sentence was under Minn. Stat. § 609.3455 or the old patterned/predatory sex offender law		609.3455, subd. 4(a)(2)(iii), 4(b), 5, 7(a).

If the current offense is ...	and ...	and ...	then the court must sentence offender to ...	per Minn. Stat. § ...
CSC 1st–4th Degree or CSPC	before the current conviction (see <i>Nodes</i>), offender was twice convicted of CSC 1st–5th Degree (or CSC 1st–3rd Degree, in the case of a current CSC 4th Degree) or CSPC, provided each of the two prior offenses involved a separate behavioral incident from the current offense, and the three offenses involved at least three separate victims	the factfinder finds a Guidelines aggravating factor (other than repeat sex offender) that would justify a durational departure	life, with specified minimum term of imprisonment based on the Guidelines, and provide for lifetime conditional release	609.3455, subd. 4(a)(3)(i), 4(b), 5, 7(a).
		one of the prior sentences was an upward durational departure		609.3455, subd. 4(a)(3)(ii), 4(b), 5, 7(a).
		one of the prior sentences was under Minn. Stat. § 609.3455 or old patterned/predatory sex offender law		609.3455, subd. 4(a)(3)(iii), 4(b), 5, 7(a).
CSC 1st or 2nd Degree (other than charges based solely on age, age and position, or age and relationship not involving multiple incidents)	the factfinder finds a “heinous element” (torture, great bodily harm, mutilation, inhumane conditions, weapon used, multiple victims or perpetrators, removal of victim without safe release)	the heinous element is non-elemental (i.e., not already an element of the current offense)	life without the possibility of release	609.3455, subd. 3, 5, 7(a).
	the factfinder finds a non-elemental heinous element	before the current offense date, offender was sentenced for a previous CSC 1st–3rd Degree		609.3455, subd. 2(a)(2) & 2(b).
	the factfinder finds two non-elemental heinous elements	the two heinous elements are supported by different underlying facts		609.3455, subd. 2(a)(1) & 2(b).

This table is intended to provide context and explanation for the operation of various sentencing provisions discussed in this report. It is not intended as a stand-alone practitioner’s guide, as its terminology is not necessarily precise. Please refer to the note at the beginning of this report entitled, “About this Report.”

How the Guidelines Work

Minnesota's guidelines are based on a grid structure. The vertical axis of the Grid represents the **severity** of the offense for which the offender was convicted. The horizontal axis represents a measure of the offender's **criminal history**. The Commission has ranked felony level offenses into eleven severity levels. Offenses included in each severity level are listed in the **Severity Reference Table** in the *Minnesota Sentencing Guidelines and Commentary*.

The criminal history index measures the offender's prior record and consists of four measures of prior criminal behavior: (1) a weighted measure of prior felony sentences; (2) a limited measure of prior misdemeanor/gross misdemeanor sentences; (3) a limited measure of the prior serious juvenile record; and (4) a "custody status" measure which indicates if the offender was on probation or parole when the current offense was committed.

The recommended (presumptive) guideline sentence is found in the cell of the sentencing grid in which the offender's criminal history score and severity level intersect. The Guidelines recommend imprisonment in a state prison in the non-shaded cells of the grid.

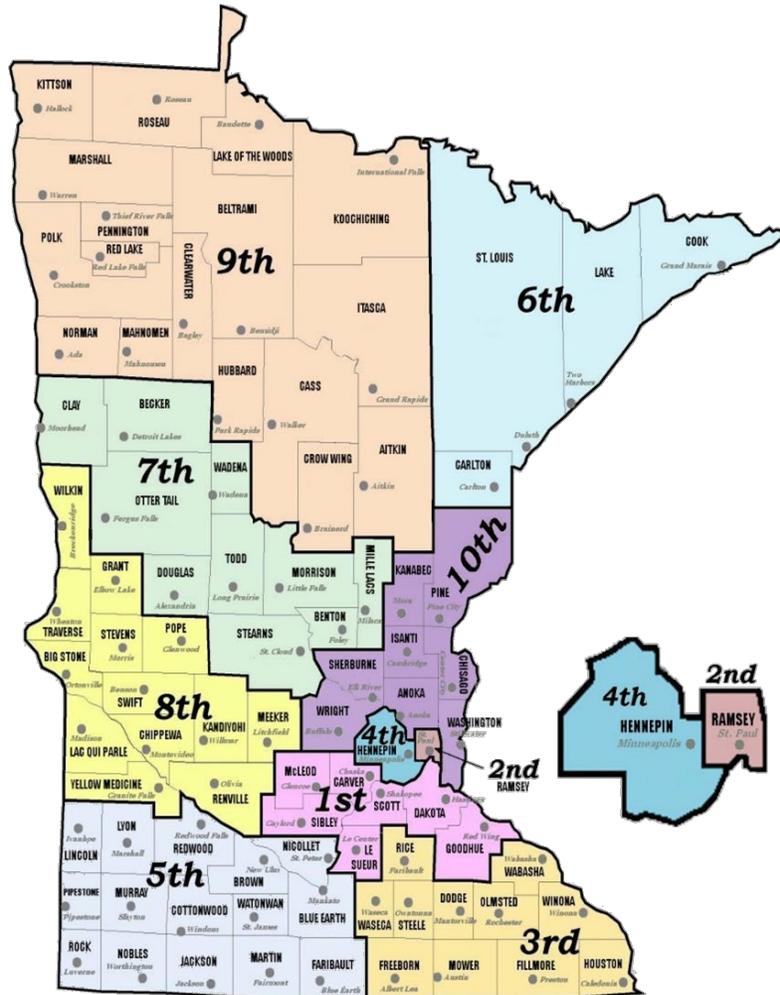

The Guidelines generally recommend a stayed sentence for cells in the shaded area of the applicable Grid. When a sentence is stayed, the court typically places the offender on probation and may require up to a year of local confinement (i.e., county jail or workhouse). Other conditions such as fines, restitution, community work service, treatment, house arrest, etc. may also be applied to an offender's sentence. There are, however, a number of offenses that carry a presumptive prison sentence regardless of where the offender is on the applicable Guidelines Grid (e.g., offenses involving dangerous weapons which carry mandatory minimum prison terms, and drug and burglary offenses).

The number in the cell is the recommended length of the prison sentence in months. As explained above, sentences in shaded boxes are generally stayed probationary sentences. For cases in the non-shaded cells of the applicable Grid, the Guidelines also provide a narrow range of months around the presumptive duration that a judge may pronounce and still be within the Guidelines.

It is not possible to fully explain all of the policies in this brief summary. Additional information on the Guidelines is available by contacting the Commission's office. *The Minnesota Sentencing Guidelines and Commentary* is available online at <http://mn.gov/sentencing-guidelines>.

<i>Assault, 4th Degree</i> <i>Fleeing a Peace Officer</i>	1	12 ¹	12 ¹	12 ¹	13	15	17	19 <i>17-22</i>

¹ 12¹=One year and one day

Presumptive commitment to state imprisonment. First-degree murder has a mandatory life sentence and is excluded from the Guidelines under Minn. Stat. § 609.185. See section 2.E, for policies regarding those sentences controlled by law.

Presumptive stayed sentence; at the discretion of the court, up to one year of confinement and other non-jail sanctions can be imposed as conditions of probation. However, certain offenses in the shaded area of the Grid always carry a presumptive commitment to state prison. See sections 2.C and 2.E.

² Minn. Stat. § 244.09 requires that the Guidelines provide a range for sentences that are presumptive commitment to state imprisonment of 15% lower and 20% higher than the fixed duration displayed, provided that the minimum sentence is not less than one year and one day and the maximum sentence is not more than the statutory maximum. See section 2.C.1-2.

Appendix 3. Sex Offender Sentencing Guidelines Grid-Effective August 1, 2017

Presumptive sentence lengths are in months. Italicized numbers within the grid denote the discretionary range within which a court may sentence without the sentence being deemed a departure. Offenders with stayed felony sentences may be subject to local confinement.

SEVERITY LEVEL OF CONVICTION OFFENSE		CRIMINAL HISTORY SCORE						
		0	1	2	3	4	5	6 or More

¹ 12¹=One year and one day.

 Presumptive commitment to state imprisonment. Sex offenses under Minn. Stat. § 609.3455, subd. 2, have mandatory life sentences and are excluded from the Guidelines. See section 2.E, for policies regarding those sentences controlled by law, including conditional release terms for sex offenders.

 Presumptive stayed sentence; at the discretion of the court, up to one year of confinement and other non-jail sanctions can be imposed as conditions of probation. However, certain offenders in the shaded area of the Grid may qualify for a mandatory life sentence under Minn. Stat. § 609.3455, subd. 4. See sections 2.C and 2.E.

² Minn. Stat. § 244.09 requires that the Guidelines provide a range for sentences that are presumptive commitment to state imprisonment of 15% lower and 20% higher than the fixed duration displayed, provided that the minimum sentence is not less than one year and one day and the maximum sentence is not more than the statutory maximum. See section 2.C.1-2.

³ Prostitution; Sex Trafficking is not subject to a 90-month minimum statutory presumptive sentence so the standard range of 15% lower and 20% higher than the fixed duration applies. (The range is 77-108).
