

Comprehensive Annual Financial Report

For the Fiscal Year Ended June 30, 2019

Minnesota State Retirement System
Pension Trust Funds of the State of Minnesota

The State Employees Retirement Association, which later became the **Minnesota State Retirement System**, was established by the Legislature in 1929 when the State Employees Retirement Fund (or General Plan) was created. The enabling legislation was signed into law on April 15, 1929. The first meeting of the Board of Directors was held on June 10, 1929.

1929

State of Minnesota in 1929

- Theodore Christianson served as the 21st Governor of Minnesota.
- The Minnesota Highway Patrol was created. The initial force consisted of nine men, including the chief, Earle Brown.
- The Foshay Tower was completed, becoming the tallest building in the Midwest. It held that distinction until the 1970s.

United States in 1929

- Donald Duncan saw a yo-yo for the first time, and purchased the small California toy factory where they were produced. Sales soared as yo-yo professionals traveled the country, teaching and conducting contests.
- Babe Ruth hit his 500th career home run, becoming the first major league player to reach the milestone.
- After weeks of declining stock prices, the stock market crashed in October, with the Dow Jones Industrial Average losing half its value by mid-November. The Great Depression soon followed.

MSRS

In 1946, the State Employees Retirement Association had over 15,000 members, including almost 500 members receiving benefits.

1946

State of Minnesota in 1946

- Edward J. Thye served as the 26th Governor of Minnesota.
- After 126 years of service, Fort Snelling closed as a military post and stewardship transferred to the Veterans' Administration.
- The St. Paul Winter Carnival, held a dozen times since 1886, became an annual winter tradition.
- The Detroit Gems were founded, playing in the National Basketball League for a year before moving to Minneapolis and changing their name to the Lakers.

United States in 1946

- The first picture of Earth from space was captured from an altitude of 65 miles, taken from a rocket launched in New Mexico.
- President Truman signed Presidential Proclamation 2714, officially declaring the end of all hostilities in World War II.
- *It's a Wonderful Life* starring Jimmy Stewart and Donna Reed premiered in New York City, New York.

Achievement Awards

GFOA
Government
Finance Officers
Association

The Government Finance Officers Association (GFOA) recognizes public retirement systems that meet its rigorous reporting standards with its annual Certificate of Achievement for Excellence in Financial Reporting. It is the highest form of recognition for accounting and financial reporting in the public pension sector. MSRS received this award for our 2018 Comprehensive Annual Financial Report.

MSRS published its first Popular Annual Financial Report in 2018, and was recognized by the GFOA with an award for Outstanding Achievement in Popular Annual Financial Reporting. This award recognizes conformance with the highest standards of creativity, presentation, understandability and reader appeal in government popular reports.

PPCC
Public Pension
Coordinating
Council

The Public Pension Coordinating Council (PPCC) recognized MSRS for meeting its professional standards for plan design, funding, member communications and administrative practices. The standards serve as a benchmark by which all public defined benefit plans are managed.

Board Chairperson's Report

December 20, 2019

Dear Members, Benefit Recipients, and Employers:

Fiscal year 2019 was a successful year for the Minnesota State Retirement System (MSRS). Legislation passed during the 2018 legislative session continues to provide stable, sustainable and secure pension funds for all of our current and future benefit recipients. Even though MSRS had lower investment returns in fiscal year 2019, the impact on the retirement plans' funding status was minimal due to the 2018 legislation changes. In support of the commitment to governance best practices, the Board embarked this year on initiatives relating to reviewing Board policies. Finally, the Board also completed a competitive bid process regarding the Board's defined contribution fund recordkeeping service provider.

The 2018 legislative session ended with the Legislature unanimously passing the *2018 Omnibus Retirement Act*. This act was signed by the Governor on May 31, 2018. As of July 1, 2019, MSRS' largest retirement plan, the General Employees Retirement Plan, was 90.7 percent funded based on the market value of assets. The plan's funding status increased by 0.2 percent since July 1, 2018, due largely to legislative changes in plan provisions including increased contributions to the plan. A strong return of 10.3 percent in fiscal year 2018 was followed by a 7.3 percent investment return in fiscal year 2019, very close to the 7.5 percent assumed rate of return.

MSRS' fiduciary net position as of June 30, 2019, totaling almost \$25.1 billion, increased 5.0 percent from the prior year. Total assets of over \$26.3 billion grew 3.3 percent, while total liabilities decreased by almost \$357.4 million, or 22.9 percent, compared with our position on June 30, 2018. The Board monitors MSRS' financial position on an ongoing basis. Even in a year where the MSRS fiduciary net position increases, the Board continues to review proactive measures that ensure that MSRS provides financially secure retirement plans to pay promised retirement benefits now and in the future.

The Board approved a Funding Policy in fiscal year 2019. This policy uses guidelines to ensure that MSRS establishes appropriate actuarial methodologies, memorializes the agency's long-term funding goals and adopts baseline actuarial measurements to provide guidance for actuarial valuations performed. It also establishes guidelines to ensure that its retirement plans are well funded into the future and specifies conditions under which contribution and/or benefit modifications may be considered by the Board.

Additionally, the Board partnered with staff to perform a competitive bid process regarding the Board's defined contribution fund recordkeeping service provider in fiscal year 2019. Respondents were evaluated based on their qualifications, experience and overall workplan. A contract will be awarded in fiscal year 2020.

The Board remains committed to being a leader in public pension plan policy. We strive to fulfill our fiduciary duty to provide you with a secure, sustainable and reliable retirement plan. We truly appreciate your continued support.

Sincerely,

A handwritten signature in black ink that reads "Mary Benner". The signature is written in a cursive, flowing style.

Mary Benner, Chair
Board of Directors

Letter of Transmittal

December 20, 2019

Board of Directors
Minnesota State Retirement System
60 Empire Drive, Suite 300
St. Paul, MN 55103-3000

Dear Directors:

We are pleased to present this Comprehensive Annual Financial Report (CAFR) for the Minnesota State Retirement System (MSRS) for the fiscal year ended June 30, 2019, our 90th year of operation. The theme of this report celebrates 90 years by highlighting historical milestones in MSRS, Minnesota, and the United States of America during the past 90 years.

Report Contents and Structure

This CAFR is designed to meet the reporting requirements of Minnesota Statutes 356.20. The preparation of this report, including the financial statements contained within, is the result of a collaborative effort of the MSRS Executive Director and MSRS' Finance Division staff under the direction of its Chief Financial Officer.

Ultimate responsibility for the integrity of the data presented within this report and the fair presentation of the financial statements, in all material respects, lies with MSRS management. The MSRS Board of Directors provides an oversight role, and is assisted in this responsibility by its four-person Audit Committee. MSRS management is responsible for establishing and maintaining a system of internal controls over financial reporting. The objective of this internal control framework is to provide reasonable, not absolute, assurance that assets are safeguarded against loss or unauthorized disposition, financial records and reports are reliable, and MSRS has complied with all finance-related legal provisions. The concept of reasonable assurance recognizes the relationship between the cost of an internal control and the benefit likely to be derived, based on management's judgment. Management asserts, to the best of its knowledge and belief, that the internal controls over financial reporting are operating effectively as of June 30, 2019, to meet the purpose for which they were intended.

Inherent limitations exist in the effectiveness of any internal control system, including the possibility of human error, faulty decision making, fraud or management overriding the system. Accordingly, even a well-conceived and operating internal control system may not prevent or detect misstatements in the preparation of financial statements. Also, any projection of the evaluation of the effectiveness of internal controls to a future period is subject to risk that controls may become inadequate due to changing business conditions, or that the degree of MSRS compliance with established policies and procedures has deteriorated.

State law permits the Office of the Legislative Auditor (OLA), a professional, nonpartisan office in the legislative branch of Minnesota state government, to audit the financial statements and related note disclosures contained in this report. The OLA completed this audit in accordance with auditing standards generally accepted in the United States, and the standards applicable to financial audits contained in Government Auditing Standards. The OLA also reviewed the adequacy of our internal controls over financial reporting and compliance with certain legal provisions. The Legislative Auditor's opinion letters are presented in the *Financial Section* of this CAFR. The auditors reported no material weaknesses in our internal controls.

The *Financial Section* of this report also contains *Management's Discussion and Analysis*. This narrative presents financial highlights and an overview of MSRS' financial statements for fiscal year 2019, along with an analysis the MSRS defined benefit and defined contribution retirement funds. This letter of transmittal complements *Management's Discussion and Analysis* and these items should be read together.

MSRS' financial activities are also reflected in the pension trust fund financial statements included in the Fiduciary Funds section of the State of Minnesota's Comprehensive Annual Financial Report. This report is available online at <https://mn.gov/mmb/accounting/reports>.

About MSRS Funds

MSRS administers five defined benefit and four defined contribution funds. The fiduciary net position (total assets minus total liabilities) of these funds that is reserved for payments of pension benefits is almost \$25.1 billion as of June 30, 2019.

For the defined benefit funds, MSRS serves 57,854 active employees from 14 employers and component units, 47,632 benefit recipients, and 28,739 members who are no longer contributing, but are eligible for either future monthly benefits or a lump-sum distribution. The fiduciary net position for these funds is over \$15.9 billion as of June 30, 2019.

Alternatively, for the defined contribution funds, member participation and financial position as of June 30, 2019, varied significantly among the funds. MSRS serves 91,577 participants in the Minnesota Deferred Compensation Fund with a fiduciary net position totaling over \$7.5 billion. The Health Care Savings Fund has 129,467 participants and a fiduciary net position of almost \$1.2 billion. The Unclassified Employees Retirement Fund has 3,304 participants with a fiduciary net position of almost \$322.7 million. Finally, the Supplemental Retirement Fund for Hennepin County has 1,205 participants with a fiduciary net position of approximately \$160.7 million.

Major Initiatives

Fiscal year 2019 accomplishments included the completion of strategic initiatives in talent management, service delivery, participant success and financial sustainability. These accomplishments contributed to MSRS fulfilling its mission of *empowering Minnesota public employees to build a strong foundation for retirement*. The year also included MSRS kicking off new strategic projects that will carry on into the future. Accomplishments and goals are highlighted in the columns that follow.

Talent Management. MSRS had numerous fiscal year 2019 strategic accomplishments in talent management. Successes included:

- Updating the MSRS training policy;
- Hiring a planning director to oversee strategic goals and lead projects;
- Attending goal-setting training to improve performance reviews;
- Improving Labor Management Committee communications; and
- Using job fairs and career posting websites to fill open positions.

Service Delivery. Fiscal year 2019 service delivery successes included:

- Implementing information technology helpdesk service manager tools;
- Upgrading the software lifecycle management tools;
- Completing phishing, social engineering and security awareness training;
- Implementing a mass notification communications system; and
- Completing the Continuity of Operations Plan.

Participant Success. Participant success achievements in fiscal year 2019 included:

- Finalizing a recordkeeper request for proposal;
- Completing account online foundation work;
- Adding pre-recorded retirement seminars to the MSRS website; and
- Hiring a participant technology representative.

Financial Sustainability. MSRS also had numerous fiscal year 2019 strategic successes in financial sustainability. Accomplishments included:

- Finalizing an approved Board funding policy;
- Publishing a Popular Annual Financial Report; and
- Hiring a public relations consultant to implement a strategic communications plan.

Letter of Transmittal

Other notable MSRS accomplishments during fiscal year 2019 include:

- Scoring a 91 on the Cobalt Community Research customer satisfaction survey. This survey collects responses from new retirees. A score of 91 compares very favorably to MSRS peers.
- Completing several business continuity and disaster recovery exercises to gain assurance that our Continuity of Operations Plan is effective.
- Conducting team engagement meetings and training for all new staff to build upon the strengths-based culture at MSRS.
- Engaging with an internal audit contractor to provide internal audit reviews on behalf of the MSRS Audit Committee.

MSRS fiscal year 2020 goals continue to be based on the MSRS Strategic Plan categories of talent management, service delivery, participant success and financial sustainability.

Specific fiscal year 2020 objectives within talent management include:

- Reviewing and expanding the performance management process;
- Making work more flexible by updating the flexible schedule policy and exploring telecommuting;
- Encouraging cross-training across departments;
- Improving feedback by improving employee performance coaching plans;
- Completing an employee engagement survey; and
- Implementing an enterprise learning management system.

Fiscal year 2020 projects within service delivery include:

- Moving to cloud services and improving other technologies that support continuous software deployments;
- Improving internal business communications;
- Speeding up financial transactions;
- Improving and documenting workflows; and
- Implementing, enhancing and maintaining internal controls based on risk.

Participant success is a strategic objective with a goal of increasing retirement readiness of Minnesota public employees. Fiscal year 2020 projects for participant success include:

- Launching a retirement readiness campaign;
- Creating a outreach plan for new employees;
- Getting better participant feedback by identifying target groups; and
- Obtaining survey data and improving the MSRS website experience by creating user-centered interfaces.

Finally, objectives in fiscal year 2020 for financial sustainability include:

- Completing and implementing a multi-year strategic communications plan;
- Creating video handbooks; and
- Reviewing the potential of using social media at MSRS.

Financial Information

MSRS prepares its financial statements in accordance with generally accepted accounting principles promulgated by the Governmental Accounting Standards Board (GASB). Transactions are reported on the accrual basis of accounting. Contributions from members and employers are recognized as revenue when earned. Expenses are recorded when corresponding liabilities are incurred, regardless of when payment is made. Most financial transactions are processed through our accounting system, Microsoft Dynamics GP, and interfaced with the Statewide Integrated Financial Tools system under the oversight of the department of Minnesota Management and Budget.

Exhibit 1 is a comparative summary of total additions and total deductions that determine the change in fiduciary net position for MSRS' defined benefit and defined contribution funds for the fiscal years ended June 30, 2019 and 2018. Total additions represent employee and employer contributions and net investment income. Total deductions include annuity payments, refunds, health care reimbursements, ongoing deferred compensation and other defined contribution plan withdrawals, and administrative expenses. With a 7.3 percent investment return in fiscal year 2019, MSRS realized an increase of nearly \$1.2 billion in the fiduciary net position for all MSRS pension trust funds for fiscal year 2019. This amount includes an increase of over \$581.8 million for MSRS' defined benefit funds and an increase of over \$609.6 million for its defined contribution funds.

Exhibit 1: Summary Statement of Changes in Fiduciary Net Position for all MSRS Pension Trust Funds

For the Fiscal Years Ended June 30, 2019 and 2018

(Dollars in thousands)

Source	Defined Benefit Funds		Defined Contribution Funds	
	FY 2019	FY 2018	FY 2019	FY 2018
Total Additions	\$1,619,878	\$1,937,826	\$1,120,976	\$1,119,006
Total Deductions	1,038,051	984,134	511,359	461,849
Net Increase (Decrease) in Net Position	\$581,827	\$953,692	\$609,617	\$657,157
Fiduciary Net Position - beginning of year	15,339,863	14,386,171	8,568,452	7,911,295
Fiduciary Net Position - end of year	\$15,921,690	\$15,339,863	\$9,178,069	\$8,568,452

Actuarial Valuations

MSRS contracted with Gabriel Roeder Smith & Company (GRS) of Minneapolis, Minnesota to perform two annual actuarial valuations for each MSRS defined benefit fund and to provide other actuarial consulting and advisory services during fiscal year 2019.

The first set of actuarial valuations is the traditional funding valuations. These valuations report funding progress, the required contribution rate, contribution sufficiency or deficiency levels and other actuarial information necessary for monitoring each defined benefit retirement plan's funding status. The actuarial methods, assumptions and funding status of MSRS' defined benefit retirement plans are detailed in the *Actuarial Section* of this report.

The second set of actuarial valuations is to determine actuarial valuation information necessary to prepare financial reports in compliance with GASB Statements No. 67 and Statement No. 68, including the computation of the net pension liability, pension income or expense, enhanced note disclosures and expanded Required Supplementary Information. More detail regarding these financial reporting actuarial valuations may be found in the *Notes to the Financial Statements* in the *Financial Section* of this CAFR.

Retirement Plan Actuarial Position and Funding Status

The traditional funding actuarial valuations for each defined benefit fund measure current costs and contribution requirements to determine how much members and employers should contribute to maintain appropriate funding levels to pay future benefits. These funding actuarial valuations also measure assets and actuarial accrued liabilities to determine the funding status for each defined benefit plan that MSRS administers. Improvement in the funding status leads to

a larger ratio of assets to actuarial accrued liabilities and a greater level of investment income potential. A high funded ratio gives members assurance that their pensions are financially secure and that existing assets and projected investment earnings on those assets are sufficient to cover the liabilities for present and future annuities, survivor and disability benefits, refunds and administrative expenses.

Exhibit 2 on the next page highlights the actuarial value of assets, actuarial accrued liability, funded ratio and contribution deficiency (expressed as a percent of payroll except for Legislators Retirement Fund, which is expressed in dollars because it is a closed plan) for each defined benefit fund as of the latest actuarial valuation date, July 1, 2019.

For each of the defined benefit retirement funds, with the exception of the State Patrol Retirement Fund, the funded ratio, determined on an actuarial value of assets basis as of the July 1, 2019, valuation date, improved in comparison to the funded ratio as of July 1, 2018. For each of the defined benefit retirement funds, with the exception of the Judges Retirement Plan, the contribution sufficiency or deficiency, determined on an actuarial value of assets basis as of the July 1, 2019, valuation date, improved in comparison to the contribution sufficiency or deficiency as of July 1, 2018. The contribution sufficiency or deficiency and funded ratio improvements are primarily due to additional employee and employer contributions. Please refer to *Management's Discussion and Analysis* in the *Financial Section* for additional actuarial valuation details.

The MSRS Board of Directors continues to monitor funding status and contribution deficiency rates and will take appropriate action, as necessary, to ensure the financial security of the retirement funds.

Letter of Transmittal

Exhibit 2: Highlights of the 2019 Actuarial Valuations

(Dollars in thousands)

Defined Benefit Retirement Fund	Actuarial Value of Assets	Actuarial Accrued Liability	Funded Ratio	Contribution Sufficiency/ (Deficiency)
State Employees	\$13,489,773	\$15,179,140	88.87%	0.67%
State Patrol	737,700	959,964	76.85	1.74
Correctional Employees	1,160,399	1,579,374	73.47	(0.57)
Judges	208,012	391,146	53.18	(0.65)
Legislators ⁽¹⁾	0	200,982	0.00	\$(29,898)

⁽¹⁾ The Legislators Fund is closed to new hires and is funded on a pay-as-you-go basis by annual appropriations from the State's general fund. The deficiency is expressed as an annual dollar amount rather than a percent of payroll.

Investment Results

In accordance with the Minnesota Constitution, the State Board of Investment (SBI) invests the assets of MSRS' funds. The Board includes the Governor, Attorney General, Secretary of State and State Auditor. For all investments under the SBI's management, the Board, the 17-member Investment Advisory Council (IAC) to the board (which includes the MSRS executive director), and the SBI staff are governed by the prudent person rule and fiduciary standards detailed in Minnesota Statutes, Chapters 11A and 356A. The Board, in consultation with the IAC and the SBI staff, establishes asset allocation and other investment policies and guidelines, and conducts detailed investment analysis of the funds under its control.

MSRS does not own specific securities, but instead owns shares in various pools invested by the SBI. The Combined Funds, which represent all defined benefit pension assets under the SBI's control, reported a 7.3 percent return (net of fees) for the 2019 fiscal year. The Combined Funds generated a 10.9 percent return (net of fees) when annualized over the latest ten-year period, outperforming a composite market index by 0.4 percentage points.

During fiscal year 2019, the combined funds public equity investments, which include domestic and international equities, reported a 6.1 percent return (net of fees), performing worse than its benchmarks, the Russell 1000, Russell 2000, the Morgan Stanley Capital International World excluding USA and the Morgan Stanley Capital International Emerging Markets Indices, by 0.4 percentage points. The combined fixed income investments reported a return rate of 8.2 percent

(net of fees) for fiscal year 2019, 0.3 percentage points higher than the Bloomberg Barclays U.S. Aggregate Index. The combined fund treasury investments reported a return of 10.3 percent (net of fees) in fiscal year 2019, which was 0.1 percent less than the Bloomberg Barclays Treasury 5+ Years Index. Private markets returned a gain of 10.4 percent (net of fees) in fiscal year 2019.

Please refer to the *Investment Section* for additional details on the investment results of MSRS' largest defined benefit retirement funds for fiscal year 2019.

Exhibit 3: Combined Funds Asset Mix & Market Indices

Awards

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the Minnesota State Retirement System for its comprehensive annual financial report for the fiscal year ended June 30, 2018. This was the tenth consecutive year that MSRS has achieved this prestigious award. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements. We believe our current CAFR continues to meet the Certificate of Achievement Program's requirements, and we are submitting it to the GFOA to determine its eligibility for another certificate.

In addition, the GFOA has given an Award for Outstanding Achievement in Popular Annual Financial Reporting to MSRS for its Popular Annual Financial Report for the fiscal year ended June 30, 2018. This was the first year that MSRS applied for the award. The award is valid for one year. The Award for Outstanding Achievement in Popular Annual Financial Reporting is a prestigious national award recognizing conformance with the highest standards for preparation of state and local government popular reports. In order to receive an Award for Outstanding Achievement in Popular Annual Financial Reporting, a government unit must publish a Popular Annual Financial Report, whose contents conform to program standards of creativity, presentation, understandability, and reader appeal.

We are also very pleased to report that MSRS received the Public Pension Coordinating Council's (PPCC) Public Pension Standards 2019 Award, in recognition of meeting professional standards for plan finding and administration as set forth in the Public Pension Standards. These standards were developed by a coalition of three associations that represent public pension funds who cover the vast majority of public employees in the U.S. They are intended to reflect minimum expectations for public retirement systems management and administration, and serve as a benchmark by which all defined benefit public plans should be measured. The PPCC has offered this award program to public retirement systems for the past fourteen years. MSRS is proud to be a recipient of this award.

Membership Report

This report provides complete and reliable information on which management decisions may be based and through which compliance with statutory requirements may be assessed. It is reproduced, in its entirety, on MSRS' website at msrs.state.mn.us/annual-reports-fy-2019.

Acknowledgments

As the MSRS Chief Financial Officer, I wish to express my sincere appreciation to the team who have partnered with me to produce this CAFR including: Financial Reporting and Risk Management Director, Cheryl Jahnke; Accounting Director, Joan Weber; Accounting Officer, Jason White; and the entire MSRS Finance Division. It was truly a great privilege to work with this team to complete our MSRS CAFR together.

We would also like to thank the Board of Directors for your continued dedication to create funding policies and advocate for legislation that preserves our defined benefits plans. We are grateful for your commitment to advance initiatives to allow us to administer financially secure retirement plans, a low-cost deferred compensation plan, and a tax-free health savings plan.

Respectfully submitted,

Erin Leonard

Mission Statement

We empower Minnesota public employees to build a strong foundation for retirement.

The vision of MSRS is to be a nationally recognized leader in public retirement plans by leveraging our engaged workforce, customer-focused culture and innovative technologies to promote sustainable retirement options for Minnesota public employees.

Summary of Plan Provisions - Defined Benefit Plans

The following table is a summary of the major plan provisions for MSRS' defined benefit retirement plans. Within the General Employees Retirement Plan are three special groups: Military Affairs, Transportation Pilots, and Fire Marshals Retirement Plans. These special groups have the same plan provisions as the General Employees Retirement Plan, except as noted below.

Plan descriptions are not all inclusive, and provide general information only. Plan provisions specific to MSRS' defined contribution plans follow this section.

GENERAL EMPLOYEES	MILITARY AFFAIRS, TRANSPORTATION PILOTS, AND FIRE MARSHALS	STATE PATROL
BENEFIT FORMULA:		
<p>Employees hired before July 1, 1989:</p> <ul style="list-style-type: none"> The benefit formula is the greater of: <ol style="list-style-type: none"> 1.2 percent of high-five average salary for the first 10 years of allowable service, then 1.7 percent of high-five average salary for each subsequent year. The benefit is reduced for each month the member is under age 65 at the time of retirement, or reduced for each month the member is under age 62 with 30 years of allowable service. <p>OR</p> <ol style="list-style-type: none"> 1.7 percent of high-five average salary for each year of allowable service, with benefit reduced for each month the member is under age 65. <ul style="list-style-type: none"> There is no benefit reduction if the member's age plus years of allowable service total 90 or more. <p>Employees hired after June 30, 1989:</p> <ul style="list-style-type: none"> 1.7 percent of high-five average salary for each year of allowable service. The benefit is reduced for each month the member is under the normal retirement age. <p>For all benefit calculations:</p> <ul style="list-style-type: none"> Salary includes wages or other periodic compensation, but excludes lump sum payments at separation, employer contributions to deferred compensation and tax sheltered annuity plans, and benevolent vacation and sick leave donation programs. The high-five average salary is the average salary from the sixty successive month period with the highest gross salary. 	<p>Military Affairs:</p> <ul style="list-style-type: none"> Same as General Employees <p>Transportation Pilots:</p> <ul style="list-style-type: none"> Same as General Employees <p>Deputy Fire Marshals:</p> <ul style="list-style-type: none"> 2.0 percent of high-five average salary for each year of allowable service 	<ul style="list-style-type: none"> 3.0 percent of high-five average salary for each year of allowable service up to 33 years. Contributions above the service cap are refunded at retirement. Members with at least 28 years of service as of July 1, 2013, are not subject to the allowable service limit.

CORRECTIONAL EMPLOYEES

JUDGES

LEGISLATORS

BENEFIT FORMULA:

Employees hired before July 1, 2010:

- 2.4 percent of high-five average salary for each year of allowable service

Employees hired after June 30, 2010:

- 2.2 percent of high-five average salary for each year of allowable service

For all benefit calculations:

- Members have the option of choosing an accelerated annuity to age 62 or 65, with an actuarially-adjusted benefit thereafter. This will provide a higher benefit until the chosen age, then a lower, permanent amount to cover the remaining retirement years.

Tier 1 Benefit Program:

- 2.7 percent of high-five average salary for each year of allowable service prior to July 1, 1980, then 3.2 percent of high-five average salary for each year of allowable service after June 30, 1980
- The maximum benefit is capped at 76.8 percent of the high-five average salary.

Tier 2 Benefit Program:

Judges elected before July 1, 2013:

- 3.2 percent of high-five average salary for each year of allowable service prior to January 1, 2014, then 2.5 percent of high-five average salary for each year of allowable service after December 31, 2013

Judges elected after June 30, 2013:

- 2.5 percent of high-five average salary for each year of allowable service
- No maximum benefit limit applies to Tier 2 members.

Tier 1 and Tier 2 Benefit Programs:

- The high-five average salary is determined using only the final ten years of employment.

Legislators elected prior to January 1, 1979:

- 5.0 percent of high-five average salary for the first eight years of allowable service prior to January 1, 1979, then 2.5 percent for subsequent years

Legislators elected after December 31, 1978:

- 2.5 percent of high-five average salary

MSRS

In 1971, the Minnesota Deferred Compensation Plan (MNDCP) was created for Minnesota State employees. It is a voluntary savings plan and has grown to over 91,000 participants with almost \$7.5 billion invested.

1971

State of Minnesota in 1971

- Wendell Richard “Wendy” Anderson served as the 33rd Governor of Minnesota.
- The Walker Art Center in Minneapolis, designed by Edward Larrabee Barnes, opened to critical acclaim, becoming a national model for museum design.
- F. Scott Fitzgerald House, where the author completed his first novel, *This Side of Paradise*, was designated as a historic landmark.
- Legislation authorizing the establishment of Voyageurs National Park, a water-based park in northern Minnesota, was signed into law.

United States in 1971

- The NASDAQ (National Association of Securities Dealers Automated Quotations) began operations, becoming the world’s first electronic stock market.
- Amtrak railroad began operations, the result of legislation to consolidate 20 existing passenger railroads into one.
- The twenty-sixth amendment to the Constitution was ratified, lowering the voting age from 21 to 18.

Ms. Erin Leonard, Executive Director
Minnesota State Retirement System

Report on the Financial Statements

We have audited the accompanying financial statements of the Minnesota State Retirement System (MSRS), which included the Statement of Fiduciary Net Position as of June 30, 2019, the related Statement of Changes in Fiduciary Net Position, and Notes to the Financial Statements, as listed in the Financial Section of the Table of Contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal controls relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal controls relevant to MSRS's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of MSRS's internal controls. Accordingly, we express no such opinion.

An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of MSRS as of June 30, 2019, and the changes in financial position for the fiscal year then ended in conformity with accounting principles generally accepted in the United States of America.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that Management's Discussion and Analysis and the other Required Supplementary Information, as listed in the Financial Section of the Table of Contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, which considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to Management's Discussion and Analysis and the other required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information Included with the Financial Statements

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise MSRS's basic financial statements. The supporting schedules, including the Supplementary Schedules and GASB Statement No.68 Supplemental Employer Schedules, in the Financial Section and the Introductory, Investment, Actuarial, and Statistical Sections, as listed in the Table of Contents, are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The supporting schedules, as listed in the Financial Section of the Table of Contents, are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. The supporting schedules have been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supporting schedules are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

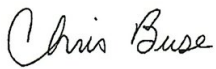

The Introductory, Investment, Actuarial, and Statistical Sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we will also issue a report on our consideration of MSRS's internal controls over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements, and other matters. The purpose of that report is to describe the scope and results of our testing of internal controls over financial reporting and compliance and not to provide an opinion on the internal controls over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

Management's Discussion and Analysis

We, the management of the Minnesota State Retirement System (MSRS), present this discussion and analysis of the financial activities of MSRS for the fiscal year ended June 30, 2019. We encourage you to read the information contained in this narrative in conjunction with the Letter of Transmittal that begins on page 10, the financial statements with explanatory notes, and required supplementary information contained in this section of the Comprehensive Annual Financial Report (CAFR).

Financial Highlights

- Overall, MSRS' financial condition improved during fiscal year 2019. MSRS' fiduciary net position for all pension trust funds increased \$1.19 billion, or 4.98 percent, from \$23.91 billion as of June 30, 2018, to almost \$25.10 billion as of June 30, 2019.
- For MSRS' defined benefit retirement funds, the investment rate of return, net of fees, decreased from 10.30 in 2018 to 7.30 percent in 2019. While the return is lower than it was in the previous year, it nearly met the assumed rate of return of 7.50 percent used in the annual actuarial valuations.
- For MSRS' defined contribution retirement funds, fiscal year 2019 investment performance varied depending upon the types of assets held in the securities portfolios of plan participants. The fiscal year 2019 rates of return ranged from a low of a 0.60 percent for the Vanguard Total International Stock Index to a high of 19.0 percent for the Vanguard Dividend Growth fund.
- Total additions to all MSRS pension trust funds decreased nearly \$315.98 million, or 10.34 percent, during fiscal year 2019, from almost \$3.06 billion for fiscal year 2018 to \$2.74 billion for fiscal year 2019. This decrease reflects the reduction in investment return, from 10.30 percent in 2018 to 7.30 percent in 2019.
- Total deductions from all MSRS pension trust funds increased almost \$103.43 million, or 7.15 percent, from just under \$1.45 billion for fiscal year 2018 to almost \$1.55 billion for fiscal year 2019. The increase was due mostly to defined benefit annuity payments, which increased \$51.86 million, or 5.42 percent, resulting from annual post-retirement benefit increases of 1.0 percent for most retirees, as well as the growth in the number of retirees. Plan member refunds increased \$26.35 million, or 8.75 percent.
- On an actuarial value of assets basis, MSRS' largest defined benefit retirement fund, the State Employees Retirement Fund, was 88.87 percent funded as of the July 1, 2019, actuarial valuation in comparison to 88.80 percent funded as of the July 1, 2018, actuarial valuation. On a market value of assets basis, this fund was 90.73 percent funded based on the 2019 actuarial valuation results, an improvement over the 90.56 percent funded ratio reported as of the 2018 actuarial valuation. The improvement can be attributed to increases in employee and employer contributions.
- Governmental Accounting Standards Board (GASB) Statements No. 67 and No. 68 actuarial valuation results indicated that on June 30, 2019, the governmental employers participating in the State Employees Retirement Fund incurred a net pension liability of almost \$1.41 billion, a \$20.80 million increase from the net pension liability of the previous year. The fiduciary net position as a percentage of the total pension liability was 90.73 percent, an increase of 0.17 percent over the 90.56 percent ratio as of June 30, 2018 due to additional employee and employer contributions.

Overview of the Financial Statements

MSRS administers five defined benefit retirement funds and four defined contribution funds. The defined benefit funds include the State Employees, State Patrol, Correctional Employees, Judges, and Legislators Retirement Funds. The defined contribution funds include the Unclassified Employees Retirement Fund, the Health Care Savings Fund, the Minnesota Deferred Compensation Fund, and the Hennepin County Supplemental Retirement Fund. All of these pension trust funds are fiduciary funds for governmental accounting and financial reporting purposes.

This CAFR includes two basic financial statements for MSRS' pension trust funds: the *Statement of Fiduciary Net Position*, and the *Statement of Changes in Fiduciary Net Position*.

Consistent with Minnesota Statutes, Chapter 356.20, the purpose of these financial statements, along with the accompanying *Notes to the Financial Statements* and *Required Supplementary Information*, is to present the financial position and results of MSRS operations

to our membership, participating employers, and other financial statements users. This CAFR also provides readers with financial information in a format that is reasonably comparable to that of other public employee pension trust funds. These financial statements and explanatory notes are prepared in conformance with generally accepted governmental accounting principles, and are reported using the accrual basis of accounting.

The *Statement of Fiduciary Net Position* provides a snapshot of the financial resources and obligations for all of MSRS' pension trust funds on June 30, the last day of each fiscal year. The assets available and the liabilities owed are reported at fair value as of that date. The difference between the sum of total assets and the sum of total liabilities is net position restricted for pensions. This amount is available for payment of future pension benefits or other obligations. Comparisons of total assets, total liabilities, and net position restricted for pensions as of June 30, 2019 and 2018 are depicted in the table below.

Summary Statement of Fiduciary Net Position - All MSRS Pension Trust Funds

As of June 30, 2019 and 2018

(Dollars in thousands)

	FY 2019	FY 2018	Change	Percent Change
Total Assets	\$26,302,314	\$25,468,269	\$834,045	3.27%
Total Liabilities	1,202,555	1,559,954	(357,399)	(22.91)
Net Position Restricted for Pensions	\$25,099,759	\$23,908,315	\$1,191,444	4.98%

Total assets as of June 30, 2019, totaling over \$26.30 billion, increased \$834.04 million, or 3.27 percent, from the prior year. This growth can be attributed to investment returns for fiscal year 2019, which resulted in net investment income for the year, net of fees, of over \$1.74 billion.

Total liabilities of \$1.20 billion as of June 30, 2019, decreased almost \$357.40 million, or 22.91 percent, from the prior year. This is due to a decrease of almost \$358 million in security lending cash collateral, a result of a migration towards non-cash collateral driven by changing regulatory requirements. A corresponding securities lending cash collateral asset is also recorded in the financial statements.

This fiscal year, the increase in the net position restricted for pensions was over \$1.19 billion, or 4.98 percent. This increase was due to investment income resulting from the 7.30 percent investment return for fiscal year 2019. While the investment return was lower than the 10.30 percent recognized in fiscal year 2018, it positively impacted net position restricted for pensions.

MSRS had no deferred outflows or inflows of resources as of June 30, 2019.

Management's Discussion and Analysis

The *Statement of Changes in Fiduciary Net Position* summarizes the financial transactions that occurred during the fiscal year. Additions include contributions, net investment income, and other revenue sources. Deductions include annuity benefit payments from our defined benefit retirement funds, ongoing withdrawals

from our defined contribution retirement funds, refunds, and other administrative expenses.

Total additions by major source and total deductions by type for the fiscal years ended June 30, 2019 and 2018 are depicted below.

Summary Statement of Changes in Fiduciary Net Position – All MSRS Pension Trust Funds				
For the Fiscal Years Ended June 30, 2019 and 2018				
(Dollars in thousands)				
	FY 2019	FY 2018	Change	Percent Change
Additions (by Major Source)				
Plan Member Contributions	\$680,151	\$635,250	\$44,901	7.07 %
Employer Contributions	259,598	231,659	27,939	12.06
Investment Income (Net)	1,742,753	2,142,208	(399,455)	(18.65)
Other	58,352	47,715	10,637	22.29
Total Additions	\$2,740,854	\$3,056,832	\$(315,978)	(10.34)%
Deductions (by Type)				
Benefits, Withdrawals and Reimbursements	\$1,156,256	\$1,091,907	\$64,349	5.89 %
Refunds	327,285	300,939	26,346	8.75
Recordkeeper Expenses	4,632	4,444	188	4.22
Administrative Expenses	18,075	16,601	1,474	8.88
Other	43,162	32,092	11,070	34.50
Total Deductions	\$1,549,410	\$1,445,983	\$103,427	7.15 %
Net Increase (Decrease) in Net Position Restricted for Pensions	\$1,191,444	\$1,610,849	\$(419,405)	(26.04)%

Total additions decreased 10.34 percent, over \$315.98 million, to just over \$2.74 billion. This decrease was primarily due to a lower investment return than was reported in the previous fiscal year. Total plan member and employer contributions increased \$72.84 million, or 8.40 percent, for fiscal year 2019. This slight increase is mostly due to increases in employee and employer contribution rates in the three largest defined benefit retirement funds and the Unclassified Employees Retirement Fund during fiscal year 2019, as well as increases in the number of active members in the two largest defined benefit plans and the Unclassified Plan.

Total deductions increased \$103.43 million, or 7.15 percent, from just under \$1.45 billion in fiscal year 2018 to nearly \$1.55 billion in fiscal year 2019. This change was largely due to an increase in annuity benefits and refunds. Increases in annuity benefits are the result of post-retirement benefit increases and to the growth in the number of benefit recipients, from 45,892 as of June 30, 2018, to 47,632 as of June 30, 2019. On January 1, 2019, retirees in the State Employees, State Patrol, and Legislators Retirement Funds received annual post-retirement benefit increases of 1.0 percent. Eligible members in the Correctional Employees Retirement Fund received a 1.5 percent annual post-retirement benefit increase, and retirees in the Judges Retirement Fund received a 1.75 percent annual post-retirement benefit increase.

The *Notes to the Financial Statements* are an integral part of the financial statements. They provide additional information relevant to obtain a full understanding of the financial statements. The notes are divided into six sections. Each section is described below

1. Description of Organization and Plans - This section describes MSRS as an organization, including key membership, contribution, and benefit or distribution provisions for each of its retirement funds.
2. Summary of Significant Accounting Policies - This section provides a summary of significant accounting policies, including the basis of financial statement presentation and accounting method applied in recording financial transactions, investment policies, and policies MSRS abides by in the valuation of assets, liabilities, revenue and expenses reported on the financial statements, where generally accepted accounting principles permit more than one approach.
3. Deposits and Investments - This section provides information about cash deposits and MSRS investments, including risks and fair value reporting.
4. Liabilities - This section provides information about certain liabilities reflected in the *Statement of Fiduciary Net Position*.
5. Capital Assets - This section of the notes provides information about capital assets.
6. Net Pension Liability of Participating Employers - This section provides information about the net pension liability of the employers participating in the MSRS retirement funds.

Required Supplementary Information (RSI) consists of three schedules with related notes.

- Schedule of Investment Returns
- Schedule of Changes in the Employer Net Pension Liability and Related Ratios
- Schedule of Employer Contributions

These schedules are intended to show information for the most recent 10 years. However, for all but the *Schedule of Employer Contributions*, only the information for the past six years is presented. Additional yearly data will be displayed as it becomes available. The presentation of multi-year data is designed to provide economic context regarding amounts reported in the financial statements, and to provide historical context for each pension fund's fiduciary net position related to the total pension liability. Significant assumptions used in the calculation of actuarially determined contributions and factors significantly affecting trends in the amounts reported are disclosed in the notes presented with each RSI schedule.

Supplementary schedules include the *Schedule of Administrative Expenses*, the *Schedule of Payments to Consultants*, and the *Schedule of Investment Expenses*. These schedules summarize the operating expenses MSRS incurred during fiscal year 2019 to administer its defined benefit and defined contribution retirement funds.

GASB Statements No. 67 and No. 68 require two schedules which MSRS includes in the *Financial Section* of this report: a *Schedule of Employer Allocations* for our cost-sharing pension funds (the State Employees and Correctional Employees Retirement Funds), and the *Schedule of Pension Amounts by Employer* for each defined benefit retirement fund. These schedules contain essential financial data, including net pension liability, deferred outflows and deferred inflows of resources, and pension income or pension expense for governmental employers participating in our defined benefit retirement funds to report in their own financial statements.

Management's Discussion and Analysis

Financial Analysis of MSRS' Funds

Each of MSRS' defined benefit and defined contribution retirement funds have some characteristics that are different from the others, such as membership served. The MSRS retirement funds also have some characteristics in common, such as shared investment pools. The following paragraphs highlight events or conditions that had a significant effect on each fund's financial position or results of operations during fiscal year 2019.

Analysis of the Defined Benefit Funds

The following two tables compare various performance measures to the previous fiscal year for the four largest MSRS defined benefit retirement funds. The Legislators Retirement Fund has been closed to new membership since July 1, 1997, and funding is primarily by annual General Fund appropriation from the State of Minnesota.

Summary Statement of Fiduciary Net Position – MSRS Defined Benefit Funds

State Employees Retirement Fund

Fiduciary Net Position Restricted for Pensions for the State Employees Retirement Fund, the largest MSRS defined benefit retirement fund, increased almost \$478.87 million, or 3.60 percent, to over \$13.77 billion as of June 30, 2019. Increases in employee and employer contributions, as well as a 7.30 percent investment return in the Combined Funds, outpaced the small increase in deductions during the fiscal year.

Though the fiduciary net position increased, total additions decreased \$283.01 million, or 17.37 percent, to just under \$1.35 billion. This change is largely attributable to the fiscal year 2019 investment return of 7.30 percent not matching the 10.30 return of the previous year. This reduction in the investment return resulted in a drop in investment income of \$328.18 million, or 25.71 percent. The higher employee and employer contribution rates led to contribution increases of \$34.19 million, an improvement of 10.33 percent over the previous year.

Total deductions increased over \$45.93 million to \$867.08 million, an increase of 5.59 percent. The increase is due almost entirely to increased annuity benefit distributions, which rose 5.61 percent to nearly \$841.78 million. The increase is the result of growth in the number of retirees, survivors and disabled members (up 3.80 percent to 42,373 members) and payment of a 1.0 percent post-retirement benefit increase to retirees and other benefit recipients in January 2019.

State Patrol Retirement Fund

The Fiduciary Net Position Restricted for Pensions for the State Patrol Retirement Fund increased during fiscal year 2019 by almost \$23.35 million, or 3.20 percent, largely due to investment returns.

Management's Discussion and Analysis

Total additions decreased \$13.74 million, or 14.01 percent, to \$84.34 million. Because of a lower investment return, investment income was not as large in fiscal year 2019 as in the previous year, dropping from \$70.47 million in fiscal year 2018 to \$51.82 million in fiscal year 2019, a reduction of 26.46 percent. As a result of contribution rate increases, employee and employer contributions increased to \$31.52 million, or 18.45 percent, during the fiscal year. Other income includes \$1.0 million of supplemental state aid that will continue to be received annually until this fund and the Public Employees Retirement Association's Police and Fire Fund both reach a 90.0 percent funded ratio.

Total deductions increased \$1.11 million, or 1.86 percent, to just under \$61.00 million. The slight increase is partially the result of higher annuity benefit distributions, which increased over \$721.59 thousand, or 1.21 percent, to \$60.37 million. The higher benefit distributions are due to the payment of a 1.0 percent post-retirement benefit increase to retirees and other benefit recipients in January 2019, and to the minor increase in retirees, to 1,078, a change of 0.65 percent. There was also a significant increase in the amount of refunds during the year, from \$38.51 thousand in 2018 to \$427.53 thousand in 2019.

Correctional Employees Retirement Fund

The Fiduciary Net Position Restricted for Pensions for the Correctional Employees Retirement Fund increased almost \$69.11 million, or 6.20 percent, to over \$1.18 billion. Like the other funds, investment returns and increased employee and employer contribution rates accounted for this increase.

Total additions decreased \$16.70 million, or 10.34 percent, to \$144.87 million. As in other funds, the decrease is the result of lower investment returns than were earned in the previous year. Investment income decreased 23.10 percent, from \$105.26 million to \$80.94 million. The increased contribution rates resulted in higher employee and employer contributions, up 13.53 percent to \$63.93 million.

Total deductions increased \$5.26 million, or 7.46 percent, to \$75.76 million, due to increased refunds and higher annuity benefit distributions. Annuity benefits increased \$4.80 million, or 7.09 percent, to \$72.42 million due to growth in the number of benefit recipients and to the payment of a 1.5 percent post-retirement benefit increase to retirees and other benefit recipients in January 2019. Retiree, survivor and disabled member counts in fiscal year 2019 increased 5.19 percent to 3,428.

Judges Retirement Fund

Fiduciary Net Position Restricted for Pensions for the Judges Retirement Fund increased \$10.51 million, or 5.21 percent, to \$212.26 million due to the favorable investment performance during fiscal year 2019.

Total additions decreased \$4.44 million, or 11.02 percent, to \$35.83 million. Investment income declined from \$19.26 million in fiscal year 2018 to \$14.49 million in fiscal year 2019 due to a lower investment return. Additions for the Judges Retirement Fund also includes an appropriation of \$6.0 million from the State's General Fund, which offset the decrease from investment income. Unlike other funds, there were no contribution rate increases in the Judges Retirement Fund.

Total deductions increased slightly, from \$23.65 million in fiscal year 2018 to \$25.32 million in fiscal year 2019, a change of 7.06 percent. Annuity benefits increased \$1.65 million, or 6.99 percent, to \$25.23 million due to payment of a 1.75 percent post-retirement benefit increase to retirees and other benefit recipients in January 2019 and to a 3.79 percent increase in the number of retirees, from 369 to 383.

Legislators Retirement Fund

There are no assets available for payment of benefits in the Legislators Retirement Fund, so the Fiduciary Net Position Restricted for Pensions remains at \$0. The Legislators Fund consists of two retirement plans closed to new membership. Benefit payments and administrative expenses are paid by contributions from the 17 remaining active members of the fund and by General Fund appropriation.

Total assets increased \$36.83 thousand, or 15.65 percent, to \$272.24 thousand. These assets will be used for payment of administrative expenses with any balance due back to the State's General Fund.

Total additions of \$8.89 million for fiscal year 2019 are down \$59.97 thousand, or 0.67 percent, from fiscal year 2018. Total additions consist of minimal plan member contributions of \$91.13 thousand, and a General Fund appropriation of \$8.80 million.

Total deductions decreased \$59.97 thousand, or 0.67 percent, to \$8.89 million during fiscal year 2019. Annuity benefits decreased \$58.89 thousand, or 0.66 percent, due to a decreasing number of benefit recipients.

Analysis of the Defined Contribution Funds

MSRS administers four defined contribution funds. Each of these funds was affected by the same investment market conditions that impacted the MSRS defined benefit retirement funds. However, because individual members select their own investment options, comparisons of net participant's investment income between fiscal years 2019 and 2018 for each defined contribution fund are not meaningful.

Certain non-investment related financial activities of MSRS' defined contribution funds merit mention.

Unclassified Employees Retirement Fund

The fiduciary net position for the Unclassified Employees Retirement Fund decreased \$1.24 million, 0.38 percent, to \$322.68 million as of June 30, 2019. While there was an increase in participant contribution rates during 2019, the contribution increase was not enough to offset transfers of \$32.26 million to the State Employees Retirement Fund. Fund transfers are variable and subject to member's individual decisions.

Health Care Savings Fund

For MSRS' fastest-growing fund, the Health Care Savings Fund, membership again grew during fiscal year 2019. Total participant counts increased 7,121, or 5.82 percent, to 129,467 participants as of June 30, 2019. Fiduciary Net Position Restricted for Pensions for the fund increased almost \$121.79 million, 11.38 percent, to \$1.19 billion as of June 30, 2019. Investment income of \$59.59 million, along with an increase in contributions, was the primary reason for the increase. Deductions remained relatively stable between fiscal year 2018 and 2019, with a total increase of \$6.98 million, due largely to an additional \$5.53 million in health care reimbursements during the year. The required federal tax to finance operations of the Patient-Centered Outcomes Research Institute increased from \$282.56 thousand in fiscal year 2018 to \$309.04 thousand in fiscal year 2019, an increase of 9.37 percent. This is the final year that the tax is required.

Minnesota Deferred Compensation Fund

Fiduciary Net Position Restricted for Pensions for the Minnesota Deferred Compensation Fund increased almost \$487.47 million, or 6.95 percent, from almost \$7.02 billion on June 30, 2018, to just over \$7.50 billion as of June 30, 2019. While there was an 7.63 percent increase in refunds, from \$277.22 million in fiscal year 2018 to \$298.38 million in fiscal year 2019, investment income continued to outpace the deductions. This is despite the fact that investment income was lower in fiscal year 2019, decreasing from \$560.52 million in 2018 to \$552.29 million in 2019, a change of \$8.23 million, or 1.47 percent. Member contributions increased by almost \$11.90 million, or 4.20 percent.

Hennepin County Supplemental Retirement Fund

Fiduciary Net Position Restricted for Pensions for the Hennepin County Supplemental Retirement Fund increased \$1.60 million in fiscal year 2019, or 1.01 percent, to \$160.66 million. As with other funds, investment returns were the reason for the improvement, resulting in investment income during fiscal year 2019 of almost \$12.04 million. Only Hennepin County employees who began employment prior to April 14, 1982, are eligible for this fund, so the number of active participants has been slowly declining, resulting in ongoing decreases in contributions from participants and the employers. Contributions decreased \$53 thousand, or 20.02 percent. Total deductions are minimal in this fund, increasing \$752.71 thousand, or 7.54 percent, due to a \$1.06 million increase in refunds.

Management's Discussion and Analysis

Actuarial Valuation Results

MSRS' consulting actuaries conduct two actuarial valuations for each MSRS defined benefit retirement fund on an annual basis: one for traditional "funding" purposes, and the other for GASB-compliant "financial reporting" purposes. Each valuation type is performed using a different set of actuarial methods and assumptions. Results of each are highlighted in the following paragraphs.

Funding Actuarial Valuations

The July 1, 2019, actuarial valuation results indicate the State Employees Retirement Fund was 88.87 percent funded, the State Patrol Retirement Fund was 76.85 percent funded, the Correctional Employees Retirement Fund was 73.47 percent funded, and the Judges Retirement Fund was 53.18 percent funded. These funded ratios are calculated using the actuarial value of assets. The three largest defined benefit funds had no assumption or plan provision changes during the year. The lack of changes, coupled with an actual investment return near the assumed investment return, resulted in the funding status remaining relatively stable compared to the status on July 1, 2018.

A brief discussion of the funding actuarial valuation results is below. Additional information about the funding actuarial valuation results for each defined benefit fund can be found in the *Actuarial Section* of this report.

State Employees Retirement Fund

For the State Employees Retirement Fund, the fiscal year 2018 contribution sufficiency of 0.10 percent improved to a contribution sufficiency of 0.67 percent reported in the July 1, 2019 valuation. Additional member and employer contributions were the reason for this improvement. For this same reason, funded ratios on both an actuarial and a market value of assets basis also improved from the previous year, from 88.80 percent to 88.87 percent for the actuarial value of assets, and from 90.56 percent to 90.73 percent for the market value of assets. There were no plan provision or assumption changes since the previous actuarial valuations.

State Patrol Retirement Fund

For the State Patrol Retirement Fund, the 0.96 percent contribution deficiency as of July 1, 2018, was eliminated, resulting in a contribution sufficiency of 1.74 percent as of July 1, 2019. The primary reason for the change from contribution deficiency to contribution sufficiency was additional employer contributions. The

actuarial value of assets funded ratio decreased slightly, from 76.95 percent on July 1, 2018, to 76.85 percent on July 1, 2019. On an actuarial value basis, gains or losses in asset value are smoothed over a five-year period, so a portion of the losses from the previous years have been included in the actuarial value of assets, thereby affecting the funded ratio. On a market value of assets basis, which is not subject to gain or loss smoothing, the funded ratio remained relatively stable, 78.44 percent on July 1, 2018 and 78.46 percent on July 1, 2019. There were no plan provision or assumption changes since the previous actuarial valuations.

Correctional Employees Retirement Fund

For the Correctional Employees Retirement Fund, the contribution deficiency decreased from 1.77 percent on July 1, 2018, to 0.57 percent on July 1, 2019. The improvement is the result of additional employer contributions. For the same reason, the actuarial value of assets funded ratio increased from 73.31 percent on July 1, 2018, to 73.47 percent on July 1, 2019, and the market value of assets funded ratio increased from 74.80 percent to 74.97 percent. There were no plan provision or assumption changes since the previous actuarial valuations.

Judges Retirement Fund

The Judges Retirement Fund showed a slight increase in contribution deficiency, from 0.40 percent on July 1, 2018, to 0.65 percent on July 1, 2019. The increase is due to demographic experience, including more retirements than expected. The demographic experience was partially offset by a change in assumption, which delayed increases in post employment benefit increases. The actuarial value of assets funded ratio increased from 52.35 percent on July 1, 2018, to 53.18 percent on July 1, 2019. The funded ratio calculated on a market value of assets also improved, from 53.38 percent to 54.27 percent.

Legislators Retirement Fund

The Legislators Retirement Fund is a closed plan, with only 17 active, contributing members. Remaining assets in the fund were depleted in the fiscal year ending June 30, 2016, and benefits are paid by annual appropriations from the state's General Fund.

GASB Statements No. 67 and No. 68 Actuarial Valuations

This is the sixth year since MSRS implemented pension accounting and financial reporting standards issued by the Governmental Accounting Standards Board (GASB). To comply with GASB Statement No. 67, *Financial Reporting for Pensions, an amendment of GASB Statement No. 25*, MSRS relied upon its consulting actuary to compute the total pension liability, net pension liability, pension income or expense, and deferred outflows and deferred inflows of resources for each of its defined benefit retirement funds as of June 30, 2019. MSRS' participating governmental employers are required to report their respective shares of these amounts in their financial statements in compliance with GASB Statement No. 68, *Accounting and Financial Reporting for Pensions, an amendment of GASB Statement No. 27*.

For MSRS' largest cost sharing, multiple-employer defined benefit fund, the State Employees Retirement Fund, the June 30, 2019, GASB-compliant actuarial valuation report revealed a net pension liability of almost \$1.41 billion, a \$20.78 million increase from the fiscal year 2018 net pension liability of \$1.39 billion. The increase is, in large part, the result of interest on the pension liability outpacing the investment income earned. Increased employee and employer contributions led to an increase in fiduciary net position, reflected in the fund fiduciary net position as a percentage of the total pension liability. As of the June 30, 2019 valuation, this ratio was 90.73 percent, increasing 0.17 percent from the ratio of 90.56 percent reported as of June 30, 2018.

Additional information on the GASB-compliant actuarial valuation results for MSRS' defined benefit retirement funds can be found in the *Actuarial Section* of this report, beginning on page 166.

Request for Information

Additional information about the funding actuarial valuation results for each defined benefit fund can be found in the *Actuarial Section* of this report.

This financial report is intended to provide a general overview of the financial position of MSRS as of June 30, 2019, and the results of financial activities for fiscal year 2019. If you have any questions or comments concerning the contents of this report, please contact Minnesota State Retirement System by mail at 60 Empire Drive, Suite 300, Saint Paul, MN 55103-3000, by telephone toll-free at 1-800-657-5757, or via e-mail at info@msrs.us.

Notes to the Financial Statements

These notes provide disclosures relevant to the basic financial statements on the preceding pages.

Note 1: Description of Organization and Plans

A. Organization

The Minnesota State Retirement System (MSRS) is the administrator of a multiple-employer, cost-sharing public employee retirement system. It consists of five defined benefit funds and four defined contribution funds. The defined benefit funds are listed below with parenthetical disclosure of the Minnesota Statutes (MS) that set forth criteria for benefit computations, obligations of members and participating employers to make contributions, and other plan provisions:

State Employees Retirement Fund

(MS Sections 352.01 - 352.87)

State Patrol Retirement Fund

(MS Chapter 352B)

Correctional Employees Retirement Fund

(MS Sections 352.90 - 352.955)

Judges Retirement Fund

(MS Chapter 490)

Legislators Retirement Fund

(MS Chapter 3A)

The defined contribution funds are listed below with parenthetical disclosure of the Minnesota Statutes pertinent to plan administration:

Unclassified Employees Retirement Fund

(MS Chapter 352D)

Health Care Savings Fund

(MS Chapter 352.98)

Minnesota Deferred Compensation Fund

(MS Sections 352.965 - 352.97)

Hennepin County Supplemental Retirement Fund

(MS Sections 383B.46 - 383B.52)

Minnesota Statutes Section 356.20 defines financial reporting requirements for the four largest MSRS defined benefit funds.

Responsibility for the organization is vested in MSRS' Board of Directors, which consists of eleven members. Four members are elected by the membership at large of the State Employees Retirement Plan and the Unclassified Employees Retirement Plan. Three members are appointed by the Governor, one of whom must be a constitutional officer or an appointed state official, and two of whom must be public members knowledgeable in pension matters. The remaining four members represent the State Patrol Retirement Plan, the Correctional Employees Plan, the Transit Division of the Metropolitan Council, and the retired and disabled members of all plans that MSRS administers. MSRS employees are ineligible for membership on the board of directors.

B. Participating Employers

MSRS members are employed by the State of Minnesota, the non-instructional employees at the University of Minnesota, approximately 77 counties, 305 cities and townships, 299 school districts and other educational entities, and 237 additional miscellaneous entities.

C. Reporting Entity

MSRS functions as a separate statutory entity. The system maintains rights to sue or be sued in its own name and to hold property in its own name. For financial reporting purposes, MSRS funds are considered pension trust funds of the State of Minnesota and are included in the State's Comprehensive Annual Financial Report with its fiduciary funds. MSRS does not have any component units and this report includes financial information for MSRS only.

D. Defined Benefit Retirement Funds – Membership Statistics, Contribution Information, and Plan Descriptions

Membership statistics as of June 30, 2019, for all MSRS defined benefit retirement funds are shown in **Exhibit 1** on the following page. Specific descriptions of each of these funds are contained in the narrative and schedules that follow.

Exhibit 1: Membership Statistics - MSRS Defined Benefit Funds

As of June 30, 2019	State Employees	State Patrol	Correctional Employees	Judges	Legislators	Totals
Members Receiving Benefits						
Retirees	36,432	863	2,879	293	287	40,754
Disabled Annuitants	1,801	60	308	16	0	2,185
Beneficiaries	4,140	155	241	74	83	4,693
Total Members Receiving Benefits	42,373	1,078	3,428	383	370	47,632
Deferred Members						
Vested, Not Receiving	17,154	56	1,386	19	32	18,647
Nonvested	9,110	31	950	1	0	10,092
Total Deferred Members	26,264	87	2,336	20	32	28,739
Active Members

Participating Employers	14	1	3	1	1	

Note: These retirement funds have no nonemployer contributing entities

State Employees Retirement Fund

The State Employees Retirement Fund includes the General Employees Retirement Plan (General Plan), a multiple-employer, cost-sharing plan, and three single-employer plans: the Military Affairs Plan, the Transportation Pilots Plan, and the Fire Marshals Plan. Only certain employees of the Department of Military Affairs, Department of Transportation, and the State Fire Marshals Office are eligible to be members of those plans, but all state of Minnesota employees who are not members of another plan are covered by the General Plan. The Transportation Pilots Plan has been closed to new entrants since July 1, 2008, and there are no active contributing members in the plan.

The General Plan provides retirement, disability, and death benefits to plan members and their beneficiaries.

As of June 30, 2019, all MSRS employees except for the Executive Director are members of the General Plan.

MSRS employee and employer contributions were funded at 100.0 percent of the required contributions set by statute. Total covered payroll for MSRS employees was approximately \$8.69 million for fiscal year 2019, with employee contributions of \$495,814 and employer contributions of \$508,373.

State Patrol Retirement Fund

The State Patrol Retirement Fund includes only the State Patrol Retirement Plan, a single-employer plan. Membership is limited to State of Minnesota employees who are state troopers, conservation officers, and certain crime bureau and gambling enforcement agents.

The State Patrol Retirement Plan provides retirement, disability, and death benefits to plan members and their beneficiaries.

Notes to the Financial Statements

Correctional Employees Retirement Fund

The Correctional Employees Retirement Fund includes only the Correctional Plan, a multiple-employer, cost-sharing plan. Membership is limited to State of Minnesota employees with 75 percent working time spent in direct contact with inmates or patients in Minnesota correctional facilities, the state-operated Forensic Services Program, or the Minnesota Sex Offenders Program. Additionally, employees on leave from eligible positions to work for a labor organization may also be covered.

The Correctional Employees Retirement Plan provides retirement, disability, and death benefits to plan members and their beneficiaries.

Judges Retirement Fund

The Judges Retirement Fund includes only the Judges Retirement Plan, a single employer plan. Membership is limited to Minnesota District, Appellate and Supreme Court judges. Retirees also include former municipal and county court judges.

The Judges Retirement Plan provides retirement, disability, and death benefits to plan members and their beneficiaries.

The Judges Retirement Plan provides both a Tier 1 and a Tier 2 benefit program depending upon a judge's appointment or election date. Tier 1 program judges are those first appointed or elected before July 1, 2013, and Tier 2 program judges are those first appointed or elected after June 30, 2013. Judges with less than five years of service as of December 31, 2013, may make a one-time irrevocable election into the Tier 2 benefit program.

Legislators Retirement Fund

The Legislators Retirement Fund includes two state of Minnesota General Fund plans: the Legislators Retirement Plan and the Elective State Officers Retirement Plan. Each is a single employer plan that is closed to new entrants. Effective July 1, 2013, these plans were merged for administrative cost-savings purposes.

The Legislators Retirement Plan includes members of the Minnesota State Legislature who were first elected to office before July 1, 1997, and who elected to retain coverage under this plan. Legislators elected after that date are participants in the Unclassified Employees Retirement Plan, a defined contribution plan. The Elective State Officers Retirement Plan includes constitutional officers (Governor, Lieutenant Governor, Secretary of State, Attorney General and State Auditor) who were first elected to office between July 1, 1967, and July 1, 1997, and chose to retain coverage under this plan. All members of the Elective State Officers Plan are in retirement status.

The General Fund plans provide retirement and death benefits to plan members and their beneficiaries.

Benefits for both plans are financed on a pay-as-you-go basis, funded primarily by annual appropriations from the state's General Fund.

Contribution Rates

Minnesota statutes require that eligible employees contribute a percentage of their total compensation to the retirement fund. Participating employers are also required to contribute a percentage to the funds. Contribution rates are reflected in **Exhibit 2**. The employer contribution for the State Patrol Retirement Fund includes a 1.75 percent supplemental employer contribution that will remain in place until the plan is fully funded. A similar supplemental contribution will be added for the Correctional Employees Retirement Fund beginning in fiscal year 2020. Details of future contribution increases are included in the *Summary of Plan Provisions* in the *Introductory Section* of this CAFR.

In addition to the contributions noted in the schedule on the next page, the State Patrol Retirement Fund and the Judges Retirement Fund receive further funding.

The State Patrol Retirement Fund receives a \$1 million supplemental state contribution on an annual basis until the earlier of July 1, 2048, or when the State Patrol Retirement Fund and the Public Employees Retirement Association Police and Fire Retirement Fund both reach a 90 percent funded level on a market value of assets basis.

The Judges Retirement Fund receives a general fund appropriation of \$6 million on an annual basis until the Judges Retirement Fund is fully funded or until July 1, 2048, whichever is earlier.

Exhibit 2: Fiscal Year 2019 Contribution Rates for MSRS Defined Benefit Retirement Funds

Retirement Plan	Employee Contribution Rate	Employer Contribution Rate	Statutory Authority
State Employees (General Plan)	5.75%	5.875%	M.S. 352.04
State Patrol	14.90	24.10	M.S. 352B.02
Correctional Employees	9.60	14.40	M.S. 352.92
Judges - Tier 1	9.00	22.50	M.S. 490.123
Contributions for Tier 1 Judges are redirected to the Unclassified Employees Retirement Plan after the judge's maximum retirement benefit is reached			
Judges - Tier 2	7.00	22.50	M.S. 490.123
Legislators	9.00 to the State's General Fund	Funded by State General Fund appropriation	M.S. 3A.03

Post-Retirement Benefit Increases

Post-retirement benefit increases are effective on January 1 of each year. Benefit increase rates are noted in **Exhibit 3**.

The Judges Plan post retirement increase may change in future years as the result of an improvement in the funding status of the plan, which is calculated annually. Minnesota statute stipulates that when the Judges

Retirement Fund reaches or exceeds a 70 percent funded ratio for two consecutive years (on a market value of assets basis), the post-retirement adjustment will increase from 1.75 percent to 2.0 percent each year. When the funding status reaches or exceeds 90 percent for two consecutive years, the post-retirement adjustment will increase to 2.5 percent each year.

Exhibit 3: Annual Post-Retirement Benefit Increases for MSRS Defined Benefit Retirement Plans

Retirement Plan	Benefit Increase Amount
State Employees (General Plan)	1.00 percent through 2023, 1.50 percent thereafter
State Patrol	1.00 percent
Correctional Employees	1.50 percent
Judges	1.75 percent
Legislators	1.00 percent through 2023, 1.50 percent thereafter

Optional Retirement Annuities

In the defined benefit funds, three joint-and-survivor annuity options are available: a 50.0 percent survivor benefit, a 75.0 percent survivor benefit, and a 100.0 percent survivor benefit to the beneficiary. Each option includes the right of reversion to the single-life amount if the beneficiary dies before the member. A

15-year period certain and life thereafter annuity is also available. By statute, the Legislators Retirement Fund automatically provides a 50 percent benefit continuance to a surviving spouse. Legislators can also choose a 100.0 percent survivor coverage with an actuarially reduced benefit.

Notes to the Financial Statements

Vesting and Retirement Ages

All active and deferred members are fully vested to the extent of their contributions plus interest at a rate of 6 percent through June 30, 2011, 4 percent through

June 30, 2018, and 3 percent thereafter. For monthly retirement benefits, members are vested in each plan as noted in **Exhibit 4**.

Exhibit 4: Fiscal Year 2019 Vesting and Retirement Ages for MSRS Defined Benefit Retirement Plans

Retirement Plan	Vesting Requirements	Full retirement Age	Reduced (Early) Retirement Age
State Employees (General Plan)	Hired before July 1, 2010: Three years of covered service Hired after June 30, 2010: Five years	Hired before July 1, 1989: - age 65, or - age 62 with 30 years of service, or - Rule of 90 eligible (age plus years of service equals 90 or more) Hired after June 30, 1989: - age 66	Age 55, if vested
State Patrol	Hired before July 1, 2013: Three years of covered service Hired after June 30, 2013: ten years for members, five years for survivor purposes	Age 55	Age 50
Correctional Employees	Hired before July 1, 2010: Three years of covered service Hired after June 30, 2010: must have a minimum of five years allowable service before a graded vesting schedule begins, which ranges from 50 percent vested after five years of allowable service to 100 percent vested after ten years of allowable service.	Age 55	Age 50
Judges - Tier 1	5 years of allowable service	Age 65, mandatory age 70	Age 60
Judges - Tier 2	5 years of allowable service	Age 66, mandatory age 70	Age 60
Legislators	6 years of allowable service	Age 62	Age 55

Benefit Formulas

Benefits are calculated based on years and months of service, member age, and the average salary from the sixty successive-month period (five years) with the

highest gross salary. Formulas for MSRS defined benefit plans are shown in **Exhibit 5**.

Exhibit 5: Benefit Formulas for MSRS Defined Benefit Retirement Plans

Retirement Plan	Benefit Formula
State Employees (General Plan)	<p>Members hired before July 1, 1989: Step or Level formula, whichever is greater.</p> <p>Members hired on or after July 1, 1989: Level formula.</p> <p>Step formula: 1.20 percent of the high-five average salary for each of the first 10 years of covered service, then 1.70 percent for each year thereafter. It also includes full benefits under the Rule of 90 (age plus years of allowable service equals 90).</p> <p>Level formula: 1.70 percent of the high-five average salary for all years of covered service, with full benefits at normal retirement age. Not Rule of 90 eligible.</p>
State Patrol	<p>3.00 percent of the high-five average salary for each year of allowable service.</p> <p>Allowable service used to determine benefits is limited to 33 years, with a refund of employee contributions for excess years of service. Members with at least 28 years of service as of July 1, 2013, are not subject to this service limit.</p>
Correctional Employees	<p>For employees hired before July 1, 2010: 2.40 percent of the high-five average salary for each year of allowable service, prorated for completed months.</p> <p>For employees hired after June 30, 2010: 2.20 percent of the high-five average salary for each year of allowable service, prorated for completed months.</p> <p>Monthly benefits can be received either as level lifelong payments or accelerated payments until a reversion age of 62 or 65. Upon attaining the reversion age, the benefit is adjusted actuarially to a lower, permanent amount.</p>
Judges - Tier 1	<p>2.70 percent of the high-five average salary for each year of allowable service prior to July 1, 1980, then 3.20 percent for each year of allowable service after June 30, 1980.</p> <p>The maximum benefit a Tier 1 program member receives is 76.80 percent of high-five average salary.</p>
Judges - Tier 2	<p>2.50 percent of the high-five average salary for each year of allowable service.</p> <p>There is no maximum benefit for Tier 2 program members.</p>
Legislators	<p>For members first elected prior to January 1, 1979: 5.00 percent of high-five average salary for the first eight years of service prior to January 1, 1979, then 2.50 percent for subsequent years.</p> <p>For members elected after December 31, 1978: 2.50 percent of the high-five average salary for each year of allowable service.</p>

Notes to the Financial Statements

E. Defined Contribution Retirement Funds Membership Statistics, Contribution Information, and Plan Descriptions

MSRS contracts with a third-party administrator, Empower Retirement™ (Great-West Life & Annuity Insurance Company), to provide various recordkeeping

services for the four MSRS defined contribution funds. Membership statistics as of June 30, 2019, are provided in **Exhibit 6**.

Exhibit 6: Membership Statistics – MSRS Defined Contribution Funds

(Dollars in thousands)

As of June 30, 2019	Unclassified Employees	Health Care Savings	MN Deferred Compensation	Hennepin County Supplemental	Totals
Active Members	1,520	67,711	51,781	124	121,136
Inactive Members	1,784	49,901	27,526	881	80,092
Withdrawing Members	0	11,855	12,270	200	24,325
Total Members	3,304	129,467	91,577	1,205	225,553
Annual Payroll	\$120,309	N/A	N/A	\$10,648	
Participating Employers	6	576	740	2	

Unclassified Employees Retirement Fund

The Unclassified Employees Retirement Fund is a tax-deferred, defined contribution fund entirely composed of a single, multiple-employer defined contribution plan, the Unclassified Employees Retirement Plan. Minnesota Statutes, Section 352D.01 authorized creation of this plan. Participation is limited to certain, specified employees of the State of Minnesota and various statutorily designated entities. As of June 30, 2019, the Executive Director is the only MSRS employee who is an active participant of the Unclassified Employees Retirement Plan.

It is considered a money purchase plan, with participants vesting only to the extent of the value of their accounts (employee contributions plus employer contributions plus/minus investment gains/losses, less administrative expenses), but functions as a hybrid of a defined contribution plan and a defined benefit plan.

Minnesota Statutes, Section 352D.04, subdivision 2, requires a contribution rate of 5.75 percent of salary from participating employees, which is equivalent to the employee contribution rate for members of the General Employees Retirement Plan. The employer contribution rate for the Unclassified Employees Retirement Plan is 6.0 percent of salary. These rates will increase in fiscal year 2020. Details about future increases can be found in the *Summary of Plan Provisions* in the *Introductory Section* of this CAFR.

Unclassified Employees Retirement Plan participants are eligible to apply for the balance in their account after termination of public service. There is no minimum employment requirement to qualify for this lump-sum payment. Since contributions made to this plan are not taxed, participants pay taxes when funds are withdrawn and may be subject to a ten percent tax penalty if funds are withdrawn in a lump sum before the member reaches age 59 1/2. Monthly benefits are available to terminated participants at age 55 or later, regardless of the individual's length of service. Participants age 55 or older may also apply for a portion of their account balance as a lump-sum payment and the remainder in lifetime, monthly benefits.

Retirement and disability benefits are available to some participants through conversion, at the participant's option, to the General Plan provided the employee has at least 10 years of allowable service in the Unclassified and/or the General Plan if hired prior to July 1, 2010, or has no more than seven years of service if hired after June 30, 2010. This conversion option is not available to judges, legislators and elected state officers. It is a contingent liability of the State Employees Retirement Fund and actuarially valued as of June 30, 2019, in the amount \$5,683,000.

Health Care Savings Fund

The Health Care Savings Fund is a defined contribution fund entirely composed of the Health Care Savings Plan. It is an employer-sponsored program authorized by Minnesota Statutes Section 352.98. The Health Care Savings Plan allows employees to save tax-free contributions in an investment account to be used to reimburse the plan participants for future medical expenses and medical insurance premiums after they terminate employment. As a result of various Internal Revenue Service (IRS) rulings and regulations, benefit payments are tax exempt. Program participation is mandated by either collective bargaining agreement or personnel policy. Contribution rates are determined by collective bargaining agreements or employer personnel policies. They are highly variable, ranging from a percentage of weekly earnings to lump sum contributions such as severance pay.

Minnesota Deferred Compensation Fund

The Minnesota Deferred Compensation Fund is a defined contribution fund entirely composed of the Minnesota Deferred Compensation Plan. Minnesota Statutes Section 352.965 establishes this plan. It is a voluntary plan offered to all state employees and political subdivisions located in Minnesota. Authorized under Section 457(b) of the Internal Revenue Code, contributions and investment earnings are tax sheltered until the time of withdrawal. Employee contributions may be as little as \$10 each paycheck. Some employer units or bargaining units may match a portion of an employee's contributions annually. All contributions are

subject to annual maximum limits determined by the IRS. All assets and income are held in trust for the sole benefit of plan participants and beneficiaries. Plan participants may only withdraw money from their account upon separation of service or retirement. Unlike many other supplemental retirement plans, Section 457(b) plan participants who take a distribution before reaching age 59 1/2 are not subject to the IRS ten percent early withdrawal penalty.

Hennepin County Supplemental Retirement Fund

MSRS provides recordkeeping services for the Hennepin County Supplemental Retirement Fund, a defined contribution fund. Only employees of Hennepin County who began employment prior to April 14, 1982, are eligible to participate in this tax-sheltered nonqualified plan. This plan was created in accordance with Minnesota Statutes Section 383B.46 and Section 6064(d)(2) and (3) of the Technical and Miscellaneous Revenue Act of 1988. Employee contributions of 1 percent of salary are matched by employer contributions of 1 percent of salary.

Plan Administrative Fees

Plan administrative fees in each defined contribution plan are collected near the middle of the month, and are based on each participant's account balance on that day. The fees are used to pay for recordkeeping and custodial services, and to reimburse MSRS for expenses incurred to administer the plan. The fiscal year 2019 plan administrative fee rate structure for each defined contribution fund is shown in **Exhibit 7**.

Exhibit 7: Fiscal Year 2019 Plan Administrative Fee Schedule for MSRS Defined Contribution Retirement Funds

Defined Contribution Retirement Fund	Administrative Fee Rate Schedule
Unclassified Employees	\$2 per month for an account balance up to \$10,000 \$4 per month for an account balance between \$10,000.01 and \$30,000 \$6 per month for an account balance between \$30,000.01 and \$90,000 \$8 per month for an account balance over \$90,000
Health Care Savings	0.65% or 65 basis points of a participant's account balance (\$140 annual maximum fee)
Minnesota Deferred Compensation	0.10% or 10 basis points of a participant's account balance (\$125 annual maximum fee)
Hennepin County Supplemental	0.05% or 5 basis points of a participant's account balance

Notes to the Financial Statements

Note 2: Summary of Significant Accounting Policies

A. Basis of Presentation and Basis of Accounting

Basis of Presentation

The accompanying financial statements were prepared in accordance with generally accepted accounting principles (GAAP). In doing so, MSRS adheres to accounting and financial reporting standards established by the Governmental Accounting Standards Board (GASB). GASB is the independent, not-for-profit, standards-setting organization and the official source of GAAP for state and local governmental entities in the United States of America.

MSRS' accounts are organized and presented on the basis of funds. All of the funds presented in the financial statements are fiduciary funds. These funds are classified as pension trust funds, and are maintained for the exclusive benefit of the members or their beneficiaries.

Basis of Accounting

The basis of accounting indicates the timing of transactions or events for recognition in the financial statements. MSRS' financial statements are reported using the accrual basis of accounting. Plan member contributions, employer contributions, and related receivables are recognized as revenues when due, pursuant to formal commitments and statutory requirements. Annuity benefits and refunds are recognized when due and payable in accordance with the terms of each plan. Administrative and other expenses, and the associated liabilities, are recognized when the liability is incurred.

Changes in Accounting Principles

There were no changes in accounting principles during fiscal year 2019.

B. Assets, Deferred Outflows of Resources, Liabilities, Deferred Inflows of Resources, and Net Position Restricted for Pensions

Cash and Cash Equivalents

For MSRS' defined benefit retirement funds, cash and cash equivalents include cash on deposit in the state's treasury, commingled with other state funds, and short-term investments. Cash on deposit consists of year-end receipts not yet processed as of the investment cutoff on June 30. Short-term investments, which the Minnesota State Board of Investment (SBI) staff manage, include U.S. Treasury issues, repurchase agreements, banker's acceptances, commercial paper, and certificates of deposit. For each MSRS defined contribution fund, cash equivalents represent the money market funds associated with a Plan Sponsor Account, or plan expense account. This is the account the recordkeeper uses to deposit monthly participant administrative fees and to pay authorized, allowable plan operating expenses.

Accounts Receivable

Accounts receivable represents plan member and employer contributions, calculated as a percentage of each employee's salary as specified in Minnesota Statutes, which is received after fiscal year-end for services rendered during the fiscal year.

For the defined contribution funds, accounts receivable includes any plan administrative fees, determined as a percentage of each participant's account balance, which were earned during the fiscal year, but received after fiscal year-end.

Interfund Receivables, Payables, and Transfers

The purpose of interfund receivables and payables is to accrue interfund obligations that are outstanding as of the fiscal year-end date, June 30. Most of these balances are the result of our reallocation of administrative expenses, which is done annually. The only balance that may not be completely liquidated during the ensuing fiscal year is the interfund payable from the Unclassified Employees Retirement Fund to the State Employees Retirement Fund.

Interfund transfers are primarily the result of elective membership eligibility changes that have occurred during the fiscal year.

Due From/To the State's General Fund

The Legislators Retirement Fund is primarily funded on a pay-as-you-go basis with an annual appropriation from the State's General Fund. This appropriation, reported as a General Fund contribution on the *Statement of Changes in Fiduciary Net Position*, is used to finance annuity benefits paid to retirees or their survivors, member refunds, and the Legislators Fund's share of MSRS' administrative expenses. The amount due from the State's General Fund as of fiscal year-end represents funds receivable to cover the Legislators Fund's share of administrative expenses for the fiscal year. The amount due to the State's General Fund as of fiscal year-end represents the unused portion of the full appropriation that MSRS is obligated to return to the state.

Investments

Investment Policy

The Minnesota State Board of Investment (SBI) is established by Article XI of the Minnesota Constitution to invest all state funds. The membership is made up of the Minnesota Governor (who is designated as chair of the Board), State Auditor, Secretary of State, and Attorney General. The legislature has also established a 17-member Investment Advisory Council (IAC) to advise the SBI and its staff on investment related matters. The MSRS Executive Director is a permanent member of the IAC.

All investments undertaken by the SBI are governed by the prudent person rule and other standards codified in Minnesota Statutes, Chapter 11A and Chapter 356A.

The SBI, with assistance of the SBI staff and the IAC, has the authority for establishing and amending investment policy for all funds under its control by majority vote of the Board. The policy outlines the investment philosophy and guidelines within which the Combined Fund's investments will be managed.

The state's public retirement fund assets are commingled in various pooled investment accounts, commonly referred to as the Combined Funds, as established in Minnesota Statutes Section 11A. Each participating retirement fund owns an undivided participation in all of the assets of the Combined Funds' pooled investment accounts.

Description of Significant Investment Policy Changes During the Year

In fiscal year 2019, the SBI Board made asset allocation changes to achieve the long-term asset allocation developed in fiscal year 2018. Changes were also made to the benchmark indices used for domestic and international equity investments.

In September 2018 the SBI Board changed the Domestic Equity benchmark from the Russell 3000 Index to the Russell 1000 Index (large cap) for 90.0 percent of the Domestic Equity benchmark, and the Russell 2000 Index (small cap) representing 10.0 percent of the total benchmark.

The SBI Board also changed the International Equity benchmark from MSCI ACWI ex USA to the MSCI World ex USA index (developing markets) representing 75.0 percent of the International Equity benchmark, and the MSCI Emerging Markets Index (emerging markets) for 25.0 percent of the benchmark.

In November 2018 the SBI Board changed the Fixed Income allocation from 24.0 to 22.0 percent. The Equity allocation moved from 49.0 to 51.0 percent.

In May 2019 the SBI Board changed the fixed income allocation from 22.0 to 20.0 percent, with 10.0 percent allocated to Treasury and 10.0 percent to Bonds. As a result, the Equity allocation became 53.0 percent, with 35.5 percent in US Equities and 17.5 percent in International Equities.

Valuation of Investments

Investments in the Combined Funds, the Defined Contribution Supplemental Investment Fund, and the Minnesota Deferred Compensation Plan are reported at fair value. Fair value is the proportionate share of the combined market value of the investment portfolio of the SBI investment pool in which the funds participate. All securities within the pools are valued at fair value except for U.S. government short-term securities and commercial paper, which are valued at fair value less accrued interest. Accrued interest is recognized as short-term income. The SBI values long-term fixed income securities by using various valuation systems which provide prices for both actively traded and privately placed bonds. For equity securities, the SBI uses various valuation services and fair value is the last reported sales price for securities traded on national or international exchanges. If a security is not actively traded, then the fair value is based on the analysis of financial statements, analysis of future cash flows and independent appraisals.

Notes to the Financial Statements

Assumptions made in valuing securities are as follows:

- Values of actively traded securities determined by recognized exchanges are objectively negotiated purchase prices between willing buyers and sellers, and are not subject to either undue influence or market manipulation. Securities traded on a national or international exchange are valued using the last reported trade price.
- Values of securities not actively traded are determined by objective appraisals by qualified professional analysts whose results would not vary materially from those of other similarly qualified professionals. The fair value of investments is based upon valuations provided by a recognized pricing service. Short-term investments are reported at cost, which approximates fair value. The fair value of real estate investments is based on independent yearly appraisals. Investments that do not have an established market are reported at estimated fair value.

The term “market value” is used when describing asset valuation methods for actuarial purposes, and is used consistently throughout the *Actuarial Section* and in other places in the CAFR when referring to funding status. “Market value” is equivalent to “fair value.”

Investment Income

Investment income is recognized as it is earned. Accrued investment income of the pooled investment accounts is included in participation in the accounts. Gains and losses on sales or exchanges are recognized on the transaction date.

Investment Expenses

For financial reporting purposes, the cost of security transactions is included in the transaction price. Investment expenses include administrative expenses of the SBI to manage the state’s comprehensive investment portfolio and investment management fees paid to the external money managers and the state’s master custodian for pension fund assets. These expenses are allocated proportionately to the funds participating in the pooled investment accounts. Details of these expenses are presented in the *Schedule of Investment Fees* found within the unaudited *Investment Section* of this comprehensive annual financial report. A more detailed schedule of fees and commissions the SBI paid to brokerage firms, along with the number of

shares traded, total commissions, commissions per share for the pooled investment accounts, and other investment information may be obtained from the Minnesota State Board of Investment at the Retirement Systems of Minnesota Building, 60 Empire Drive, Suite 355, Saint Paul, Minnesota 55103.

Investment expenses exclude the plan administrative fees, self-directed brokerage account fees, investment advisory service fees, and any fund redemption fees deducted from participants’ defined contribution retirement plan account balances. These investment-related fees are reported as Other Expenses in the *Statement of Changes in Fiduciary Net Position*.

Asset Allocation

To match the long-term nature of pension obligations, the SBI maintains a strategic asset allocation for the Combined Funds that includes allocations to public equity (both domestic and international), fixed income, private markets, and cash equivalents. The current long-term asset allocation shown in **Exhibit 8**.

If a 25 percent allocation to Private Markets cannot be achieved, the uncommitted allocation is invested in Public Equities. When the actual asset allocation deviates beyond specified ranges, assets are redistributed to achieve the long-term allocation targets.

The long-term expected rate of return is based on an asset allocation completed by the SBI in 2016. A new study, typically completed once every five years, has not been completed because the 25 percent Private Market allocation is still largely uninvested and remains in Public Equities.

The SBI’s long-term expected rate of return was determined using a building-block method. Best estimates of future real rates of return (expected returns, net of inflation) were developed for each asset class using both long-term historical returns and long-term capital market expectations from a number of investment management and consulting organizations. The asset class estimates and target allocations were then combined to produce a geometric, long-term expected real rate of return for the portfolio. Inflation expectations were applied to derive the nominal rate of return for the portfolio.

Exhibit 8: SBI Target Asset Allocations and Long Term Expected Real Rate of Return

Asset Class	Target Allocation	Long-term Expected Real Rate of Return (Geometric Mean)
Domestic Equity ⁽¹⁾	35.5%	5.10%
International Equity ⁽²⁾	17.5	5.30
Fixed Income ⁽³⁾	10.0	0.75
Treasuries	10.0	0.50
Private Markets ⁽⁴⁾	25.0	5.90
Cash	2.0	0.00
Total	100.0%	

⁽¹⁾ Domestic Equity includes U.S. Stock Actively Managed Pool and the U.S. Stock Index Pool.

⁽²⁾ International Equity includes Broad International Stock Pool.

⁽³⁾ Fixed Income includes the Bond Pool.

⁽⁴⁾ Private Markets includes the Alternative Investment Pool. If a 25 percent allocation cannot be achieved, the uncommitted allocation is invested in Domestic and International Equities.

Annual Money-Weighted Rate of Return

The annual money-weighted rate of return is a method of calculating period-by-period returns on pension fund investments that adjusts for the changing amounts actually invested. The money-weighted rate of return is calculated as the internal rate of return on pension fund investments, net of pension fund investment expenses. Because the pension funds each have different cash flows throughout the year, they have different money-weighted rates of return. The money-weighted rate of return for each MSRS retirement fund is presented in **Exhibit 9**. The Legislators Retirement Fund had no assets at June 30, 2019, and therefore no rate of return.

Exhibit 9: Money-weighted Rate of Return

For the Year Ended June 30, 2019

Retirement Fund	Money-weighted Rate of Return
State Employees	7.30%
State Patrol	7.29
Correctional Employees	7.34
Judges	7.20
Legislators	N/A

Capital Assets

Capital assets consist of land, building, building improvements, equipment, furniture, and fixtures, and internally developed software intended for MSRS use only. With the exception of internally developed or acquired computer software, capital assets are defined as assets with an initial, individual cost of more than \$5,000 and an estimated minimum useful life of two years. The capitalization threshold for internally developed or acquired software is \$30,000 per application. All assets were capitalized at historical cost at the date of acquisition, issuance, or completion. All assets, except land, are depreciated or amortized when placed into operation using the straight-line method over the estimated useful lives shown in **Exhibit 10**.

Exhibit 10: Capital Assets Estimated Useful Lives

Capital Asset Types	Useful Life (in Years)
Land	N/A
Building	30
Building Improvements and Equipment	10
Equipment, Furniture, and Fixtures	2-10
Internally Developed Software	4-10

Notes to the Financial Statements

Deferred Outflows/Inflows of Resources

In addition to assets, the *Statement of Fiduciary Net Position* may report a separate section for deferred outflows of resources. This separate financial statement element represents a consumption of net position that applies to future periods so will not be recognized as an outflow of resources (expense) until then. MSRS has no deferred outflows of resources in 2019.

In addition to liabilities, the *Statement of Fiduciary Net Position* also may report a separate section for deferred inflows of resources. This separate financial statement element represents an acquisition of net position that applies to future periods so will not be recognized as an inflow of resources (revenue) until that time. MSRS has no deferred inflows of resources in 2019.

Net Position Restricted for Pensions

Net position represents the sum of total assets and total deferred outflows of resources less the sum of total liabilities and total deferred inflows of resources. For each defined benefit and defined contribution retirement fund, the amount reported as net position is restricted for the future payment of benefits and refunds to members or their surviving spouses or beneficiaries, and administrative expenses.

Accrued Compensated Absences

In accordance with various collective bargaining unit agreements, MSRS employees earn vacation, sick, and compensatory leave benefits. Earned but unused benefits are eligible for payment upon separation from state government service. At fiscal year-end, MSRS recognizes an obligation for future payment to the extent that the right to receipt is vested or expected to become vested.

Other Income

Other income for MSRS' defined benefit retirement funds represents its proportionate ownership share (27.5 percent) of the Retirement Services Building office space lease income, room rental fees, and parking fee revenues. Other income for these funds also includes employer late fees submitted with payroll contributions and fees received for fulfilling data requests.

Other income for MSRS' defined contribution retirement funds represents participant plan administrative fee income earned during the fiscal year.

For all defined contribution funds, except the Supplemental Retirement Fund for Hennepin County, this revenue is primarily used to cover fees for recordkeeping and custodial services, and to reimburse MSRS for administrative costs incurred to counsel members, adjudicate health care reimbursement claims, and perform various business support services. For the Supplemental Retirement Fund for Hennepin County, the excess of participant plan administrative fee income over recordkeeping and MSRS' administrative expenses is returned to the county.

Refunds

For defined benefit plans, refunds represent distributions to members, separated from service, of their retirement deductions with interest compounded daily at 6 percent through June 30, 2011, 4 percent through June 30, 2018, and 3 percent thereafter. It excludes employer contribution amounts. When a member takes a refund, the member forfeits the right to retirement, survivor, and disability benefits. Refunds also include rollovers to an individual retirement account or another qualified retirement plan.

For defined contribution funds, refunds represent distributions to plan participants equal to all or a portion of their account balances, which are composed of contributions plus any investment gains or losses. Refunds may be in the form of cash withdrawals or rollovers to other qualified plans.

Administrative Expenses

MSRS administrative expenses are disbursed from the State Employees Retirement Fund. At fiscal year-end, these expenses are allocated pursuant to an approved cost reallocation plan to the various funds administered. Each fund then reimburses the State Employees Retirement Fund for their allocated portion of administrative expenses.

Note 3: Deposits and Investments

A. Risks

Custodial Credit Risk

Custodial credit risk for cash deposits and investments is the risk that, in the event of a bank or custodian failure, MSRS will not be able to recover the value of its investments or collateral securities. Minnesota Statutes, Section 9.031, requires that deposits be secured by depository insurance or a combination of depository insurance and collateral securities held in the state's name by an agent of the state. Such insurance and collateral shall be in amounts sufficient to ensure that deposits do not exceed 90 percent of the sum of the insured amount and the fair value of the collateral. Throughout fiscal year 2019, the combined depository insurance and collateral was sufficient to meet legal requirements and secure all MSRS deposits, eliminating exposure to custodial credit risk.

Credit Risk

Credit risk is the risk that an issuer or counterparty to an investment will be unable to fulfill its obligations. The SBI has policies designed to minimize credit risk. They may invest funds in governmental obligations provided the issue is backed by the full faith and credit of the issuer, or that the issue is rated among the top four quality rating categories by a nationally recognized rating agency. They may invest funds in corporate obligations provided the issue is rated among the top four quality categories by a nationally recognized rating agency. They may also invest in unrated corporate obligations or in corporate obligations that are not rated among the top four quality categories provided that:

- The aggregate value of these obligations may not exceed 5.0 percent of the fund for which the SBI is investing;
- Participation is limited to 50.0 percent of a single offering; and
- Participation is limited to 25.0 percent of an issuer's obligations.

The SBI may also invest in banker's acceptances, deposit notes of U.S. banks, certificates of deposit, mortgage securities, and asset-backed securities rated in the top four quality categories by a nationally recognized rating agency. Commercial paper must be rated in the top two quality categories.

As of June 30, 2019, MSRS' proportionate share of the SBI's exposure to credit risk, based on the lower of Standard and Poor's or Moody's Quality Ratings for debt securities and short-term investments, is shown in **Exhibit 11**. For clarity of reporting, Moody's ratings are displayed in this exhibit using the comparable Standard and Poor's rating. If only one rating exists, that rating is used.

Quality Rating	Fair Value as of June 30, 2019
AAA	\$155,475
AA	2,607,634
A	102,988
BBB	381,874
BB	198,557
B	13,641
CCC	6,336
CC	3,755
C	705
D	176
Unrated	657,245
Total	\$4,128,386

Concentration of Credit Risk

Concentration of credit risk is the risk of loss that may be attributed to the magnitude of a government's investment in a single issuer. The SBI determined the concentration of credit risk based on security identification number. MSRS' defined benefit retirement funds do not have exposure to a single issuer that equals or exceeds 5.0 percent of the MSRS fiduciary net position. Therefore, there is no concentration of credit risk.

Notes to the Financial Statements

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates of debt instruments could adversely affect the fair value of an investment. The SBI controls interest rate risk through guidelines established for each portfolio. The

MSRS share of debt securities is held in external investment pools and as of June 30, 2019, had the weighted-average maturities shown in **Exhibit 12**.

Exhibit 12: Interest Rate Risk

As of June 30, 2019

(Dollars in thousands)

Security Type	Defined Benefit Funds		Defined Contribution Funds	
	Fair Value	Weighted Average Maturity in Years	Fair Value	Weighted Average Maturity in Years

Portfolio Weighted-Average Maturity		9.35		7.38

Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates between the U.S. dollar and foreign currencies could adversely affect the fair value of an investment. Most foreign currency risk resides within the SBI's international equity investment holdings. To reduce foreign currency risk, the SBI implements several policies. Government obligations, including guaranteed or insured issues of the International Bank for Reconstruction and Development, the Inter-American

Development Bank, the Asian Development Bank, and the African Development Bank, must pay interest and principal in U.S. dollars. The principal and interest of obligations of corporations, including those corporations incorporated or organized under the laws of the Dominion of Canada or any province thereof, must also be paid in U.S. dollars. The MSRS share of foreign security investments at June 30, 2019, was distributed among the currencies shown in **Exhibit 13**.

Notes to the Financial Statements

Derivative Financial Instruments and Credit Risk

On behalf of MSRS, the SBI invests in various types of derivative financial instruments. Derivatives are defined as any financial arrangement between two parties that has value based on or derived from future price fluctuations. The derivative financial instruments that the SBI enters into include futures, options, stock warrants and rights, currency forwards, and synthetic guaranteed investment contracts.

Minnesota Statutes, Section 11A.24, provides that any agreement for put and call options and futures contracts may only be entered into with a fully

offsetting amount of cash or securities. This applies to foreign currency forward contracts used to offset the currency risk of a security. All other derivatives are exchange-traded. The purpose of the SBI's derivative activity is to equitize cash in the portfolio, to adjust the duration of the portfolio, or to offset current futures positions.

The fair value balances and notional (face value) amounts at June 30, 2019, classified by derivative instrument type, and the changes in fair value for fiscal year 2019 are shown in **Exhibit 14**.

Exhibit 14: Derivative Financial Instruments

As of June 30, 2019

(Dollars in thousands)

Derivative Instrument Type Explanations

Futures

Futures are contract commitments to purchase (asset) or sell (liability) at a future date. The net change in the values of futures contracts is settled on a regular basis. Gains and losses are included in investment income.

Options

Options are contracts that give buyers or sellers the right to buy (calls) or sell (puts) a security at a predetermined price on a future date. Gains and losses result from variances in the fair value of the security that is the subject of the contract that occur prior to or on the contract specified date. The gains and losses are included in investment income.

Currency Forward Contracts

Foreign currency forward contracts are used to manage portfolio foreign currency risk. The provisions of the contract vary based on what is negotiated between the two parties to the contract.

Stock Warrants and Rights

Stock warrants, similar to options, are the right to purchase shares of a stock at a certain price by a certain date. They usually have five years or more before expiration. When exercised, the company issues new shares. Rights are similar but are issued to current stock owners to enable them to retain their relative ownership share. Gains and losses from the sale or exercise of stock warrants and rights are included in investment income.

The SBI maintains a fully benefit-responsive synthetic guaranteed investment contract for the Supplemental Investment Fund - Stable Value Fund. The investment objective of the Stable Value Fund is to protect investors from loss of their original investment and to provide a competitive interest rate. On June 30, 2019, the SBI's portfolio of well-diversified, high quality, investment grade fixed income securities had a fair value of \$1,589,082,988 that is \$30,619,079 above the value protected by a wrap contract. The Stable Value Fund also includes liquid investment pools with a combined fair value of \$27,176,432.

Derivative Credit Risk

The SBI is exposed to credit risk through multiple counter-parties in foreign currency forward contracts that are used to offset the currency risk of a security. MSRS' proportionate share of the maximum loss that the SBI would have recognized as of June 30, 2019, if all counterparties failed to perform as contracted is \$602,136. These counterparties have Standard and Poor's ratings of A- or better.

B. Securities Lending Transactions

MSRS does not own specific securities, but instead owns shares in various pooled funds invested by the SBI. The amounts shown on the financial statements are MSRS' proportionate share of securities loaned, collateral pledged and loan income that resulted from the lending activity of the investment managers, retained by the SBI, of these investment pools. The types and amounts of securities loaned are presented in **Exhibit 15**.

Exhibit 15: Securities Loaned

(Dollars in thousands)

Investment Type	Amount as of June 30, 2019
Domestic Equities	\$1,226,490
U.S. Government Bonds	168,765
International Equities	84,799
Domestic Corporate Bonds	152,211
Total	\$1,632,265

Minnesota Statutes, section 356A.06, subdivision 7, allows the SBI to participate in securities lending transactions. The SBI has, by way of a Securities Lending Authorization Agreement, authorized State Street Bank and Trust Company (State Street) to lend its securities to broker-dealers and banks pursuant to a form of loan agreement.

During the fiscal year, State Street lent, on behalf of the SBI, certain securities held by State Street as custodian and received cash or other collateral including securities issued or guaranteed by the United States government. State Street does not have the ability to pledge or sell collateral securities delivered absent a borrower default. Borrowers were required to deliver collateral for each loan equal to at least 100 percent of the fair value of the loaned securities.

Pursuant to the Securities Lending Authorization Agreement, State Street had an obligation to indemnify the SBI in the event of default by the borrower. There were no failures by any borrowers to return loaned securities or pay distributions during the fiscal year that resulted in a declaration or notice of default of the borrower.

During the fiscal year, the SBI and the borrowers maintained the right to terminate securities lending transactions upon notice. The cash collateral received on each loan was invested, together with the cash collateral of other qualified tax-exempt plan lenders, in a collective investment pool. As of June 30, 2019, the investment pool had an average duration of 14.42 days and an average weighted final maturity of 83.43 days for U.S. dollars. Because the loans were terminable at will, their duration did not generally match the duration of the investments made with cash collateral. On June 30, 2019, the SBI had no credit risk exposure to borrowers. MSRS' share of the collateral held and the fair value of securities on loan (in U.S. dollars) as of June 30, 2019, was \$1,677,485,051 and \$1,632,265,588 respectively. Cash collateral totaling \$1,181,870,591 is reported on the *Statement of Fiduciary Net Position* as an asset and as a corresponding liability.

Notes to the Financial Statements

C. Fair Value Reporting

GASB Statement No. 72, *Fair Value Measurement and Application*, sets forth the framework for measuring the fair value of investments based on a hierarchy of valuation inputs. The hierarchy has three levels:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity can access at the measurement date.

Level 2: Inputs other than quoted prices included in level 1 that are observable for the asset or liability, either directly or indirectly. Inputs for level 2 include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability; and
- Inputs derived principally from or corroborated by observable market data by correlation or other means.

Level 3: Unobservable inputs for the asset or liability. Unobservable inputs reflect the SBI's assumptions about the inputs that market participants would use in pricing an asset or liability.

Net Asset Value (NAV): Investments that do not have a readily determinable fair value are measured using the net asset value per share (or its equivalent) as a practical expedient, and are not classified in the fair value hierarchy.

All non-cash investments, including derivative investments that are not hedging derivatives, are required to be measured at fair value on a recurring basis. The SBI maintains investment pools that participants can invest in; participants own a proportionate share of the investment pools. The fair value of the investment pools is priced daily by the SBI custodian, when a daily price is available, by using independent pricing sources.

In **Exhibit 16** on the following page, Level 3 investments primarily consist of assets where the asset is distressed, or there is not an active market. The fair value of the assets measured at NAV have been determined using the March 31, 2019, values, adjusted for cash flows. The investments measured at NAV are typically not eligible for redemption. Distributions are received as underlying investments within the funds are liquidated, which occur over the life of the investment. Cash and a portion of short-term investments are not leveled under GASB Statement No. 72, and therefore are not included in the exhibit.

The SBI has 57 investments that are valued at NAV that are currently in the liquidation mode, totaling 3.0 percent of the NAV value. MSRS' proportionate share of the unfunded commitments to the investments valued at NAV totals \$2,300,869,958. Unfunded commitments are funds that have been committed to an investment but not yet transferred to investors.

Explanations of investment types follow the exhibit.

Exhibit 16: Fair Value of MSRS Investments

As of June 30, 2019

(Dollars in thousands)

Investments	Fair Value	Level 1	Level 2	Level 3

Real Estate	185,034	26	8	302,299
Resource	445,520	36	20	209,001
Yield-Oriented	230,916	36	10	239,831
NAV Total	\$2,282,798	248	100%	\$2,300,870

Note: Cash, a portion of cash equivalents, and derivative futures (hedge type instruments) are not leveled under GASB Statement No. 72, so are not included in the exhibit.

Equity

Common Stock: Securities representing equity ownership in a corporation, providing voting rights, and entitling the holder to a share of the company's success through dividends and/or capital appreciation.

Real Estate Investment Trust (REIT): An investment pool established by a group of investors for the purpose of investing in real estate or mortgages. REITs are generally exempt from federal taxes, provided that 95 percent of earned income is distributed and that the various investors are not treated differently.

Other Equity: Includes Preferred Stock, Depository Receipts, Limited Partnership Units, Common Stock Units, and Mutual Funds.

Fixed Income

Asset-Backed Securities: Bonds or notes backed by financial assets, including auto loans and credit card receivables.

Mortgage-Backed Securities: An asset-backed security that is secured by a mortgage or collection of mortgages. The mortgages are sold to a government agency or investment bank that will package the loans together into a security that can be purchased by investors.

Notes to the Financial Statements

Corporate Bonds: Debt obligations issued by corporations as an alternative to offering equity ownership by issuing stock. Like most municipal bonds and Treasuries, most corporate bonds pay semi-annual interest and promise to return their principal when they mature. Maturities range from 1 to 30 years.

Government Issue: Securities or bonds issued by any of the fifty states, the territories and their subdivisions, counties, cities, towns, villages, school districts, agencies (such as authorities and special districts created by the states), and certain federally sponsored agencies such as local housing authorities.

Other Debt Instruments: Includes STIF (Short Term Investment Funds) type instruments.

Investment Derivatives

Options - Futures: A contract that gives the holder the right to buy from or sell to the writer a specified amount of securities at a specified price, good for a specified period of time.

NAV

Private Equity: The private equity investment strategy is to establish and maintain a broadly diversified private equity portfolio composed of investments that provide diversification by industry type, stage of corporate development, and location.

Real Estate: The real estate investment strategy calls for the establishment and maintenance of a broadly diversified real estate portfolio composed of investments that provide overall diversification by property type and location. The main components of this portfolio consist of investments in closed-end commingled funds. The

remaining portion of the portfolio may include investments in less diversified, more focused (specialty) commingled funds, and REITs.

Resource Funds: The strategy for resource investments is to establish and maintain a portfolio of resource investment vehicles that provide an inflation hedge and additional diversification. Resource investments include oil and gas investments and energy service industry investments that are diversified by geographic area as well as by type.

Yield-Oriented: The strategy for yield-oriented investments is to target funds that typically provide a current return and may have an equity component. Structures such as subordinated debt investments and mezzanine investments are typical yield-oriented investments.

Note 4: Liabilities

A. Lease Obligations

MSRS' main office is in the Retirement Systems of Minnesota building located in St. Paul. MSRS, Public Employees Retirement Association (PERA), and Teachers Retirement Association (TRA), jointly own this building under the terms of a co-tenancy agreement. MSRS also leases space for branch offices in Detroit Lakes and Mankato. MSRS has interagency agreements to reimburse TRA for office space located in the Duluth and St. Cloud branch offices.

As of June 30, 2019, future obligations under the terms of the MSRS leases are scheduled in **Exhibit 17**.

Locations	Fiscal Year				Total
	2020	2021	2022	2023	
Detroit Lakes	\$18,009	\$4,502	\$0	\$0	\$22,511
Mankato	83,542	83,542	83,542	13,925	264,551
Totals	\$101,551	\$88,044	\$83,542	\$13,925	\$287,062

B. Long-term Debt

Legislation was passed in 1999 allowing MSRS, TRA and PERA to purchase land and construct a 140,000 square foot building to house all three retirement systems. Ownership of the facility is prorated based on the proportionate share of the building's usable space in square feet. On June 1, 2000, the state Department of Finance (currently known as Minnesota Management and Budget) issued \$29,000,000 in 30-year revenue bonds to finance the building construction.

In the fall of 2012, the remaining bonds were refunded with the proceeds of a new, lower-interest rate bond issue. The bonds are secured by the value of the total assets of the largest defined benefit plans in the three statewide retirement systems. Through the issuance of the refunding bonds, which received an AAA rating in late July 2012, the bond term was reduced by five years and the present value of the savings to the three

systems was \$9,582,538. The MSRS portion of the savings was \$2,568,120.

Exhibit 18 shows the debt service amounts for which MSRS is directly responsible. Pursuant to the joint and several liability clause in the bond sale official statement, in the event of default, MSRS could be liable for the entire remaining outstanding principal and premium balances of the bonds, plus the interest accrued for the month of June, a total of \$10,843,016. Bonds Payable on the *Statement of Fiduciary Net Position* is the MSRS share of the outstanding debt, calculated at MSRS' building ownership percentage on June 30, 2019, of 27.50 percent. Bonds Payable includes the principal balance as of June 30, 2019, the premium balance as of June 30, 2019, and interest accrued for the month of June.

Exhibit 18: Debt Repayment Schedule by Fiscal Year

Fiscal Year	Principal	Interest	Premium	Total Principal, Interest, and Premium
2020	490,875	46,759	35,824	573,458
2021	504,625	38,620	34,145	577,390
2022	515,625	30,253	32,420	578,298

Totals	\$2,820,125	\$154,867	\$157,808	\$3,132,800
Total Unpaid Principal, June 30, 2019			\$2,820,125	
Total Unpaid Premium, June 30, 2019			157,808	
Accrued Interest for June 2019			3,897	
Bonds Payable per Statement of Fiduciary Net Position			\$2,981,830	

C. Reemployed Retirees' Earnings Limitations

MSRS members whose age is under the Social Security full retirement age, and who return to work in an MSRS covered position after their retirement, are subject to an annual earnings limitation for the calendar year unless hired under a Post-Retirement Option agreement. The maximum earnings limits for calendar years 2018 and 2019 for individuals under the full retirement age is \$17,040 and \$17,640, respectively. For individuals that reach full retirement age during 2018 or 2019, the

maximum earnings limits are \$45,360 and \$46,920, respectively.

Benefit payments for members exceeding the earnings limit are stopped for the remainder of the calendar year and held in abeyance for later distribution to the retiree. Through December 31, 2010, any funds held in abeyance accrued 6.0 percent interest. Effective January 1, 2011, funds held in abeyance no longer accrue interest.

Notes to the Financial Statements

Funds held in abeyance are included in Other Payables in the respective fund's *Statement of Fiduciary Net Position*. As of June 30, 2019, MSRS had 53 reemployed retirees with funds held in abeyance, which totaled \$1,066,802 (\$598,922 for the State Employees Retirement Fund and \$467,880 for the Correctional Employees Retirement Fund).

Retirees must wait one year following termination of their post-retirement employment to be eligible to receive a

distribution of these funds. At the time of distribution, the retiree may choose a lump-sum payment or a direct rollover to an eligible retirement plan as defined by section 402(c) of the Internal Revenue Code. MSRS processed 16 distributions of these funds, totaling \$707,807 during fiscal year 2019 (\$502,374 for the State Employees Retirement Fund and \$205,433 for the Correctional Employees Retirement Fund).

Note 5: Capital Assets

Capital asset activity for the year ended June 30, 2019, is reported in **Exhibit 19**.

Total Capital Assets, Net of Depreciation or Amortization	\$17,082	\$(1,336)	\$0	\$15,746

Note 6: Net Pension Liability of Participating Employers

Two actuarial valuations for each MSRS defined benefit retirement fund are performed annually: a traditional funding actuarial valuation and a GASB-compliant actuarial valuation. The purpose of the traditional funding actuarial valuation is to measure funding progress, and to determine the required contribution rate, contribution sufficiency or deficiency, and other actuarial information necessary for monitoring funding position. The purpose of the GASB-compliant actuarial valuation is to determine actuarial information necessary to prepare financial reports in compliance

with GASB Statements No. 67 and No. 68. This includes computation of the net pension liability. Net pension liability is computed as the total pension liability for each MSRS defined benefit retirement fund less the fiduciary net position of the respective fund.

Exhibit 20 presents the components of the net pension liability of the participating employers for each MSRS defined benefit retirement fund as of June 30, 2019. This exhibit also depicts each retirement fund's net position as a percentage of the total pension liability.

Exhibit 20: Net Pension Liability of MSRS Participating Employers

As of June 30, 2019

(Dollars in thousands)

Component of Net Pension Liability	Defined Benefit Retirement Fund				
	State Employees	State Patrol	Correctional Employees	Judges	Legislators
Total Pension Liability (TPL)	\$15,179,140	\$959,964	\$1,579,374	\$391,146	\$140,185
Fiduciary Net Position (FNP)	13,772,289	753,144	1,183,995	212,262	0
Employers' Net Pension Liability	\$1,406,851	\$206,820	\$395,379	\$178,884	\$140,185
FNP as a percentage of the TPL	90.73%	78.46%	74.97%	54.27%	0.00%

Notes to the Financial Statements

Actuarial Methods and Assumptions

The total pension liability for each MSRS defined benefit retirement fund was determined by an actuarial valuation as of June 30, 2019, using the key actuarial assumptions

shown in **Exhibit 21**, applied to all prior periods included in the measurement.

Exhibit 21: Summary of Key Actuarial Methods and Assumptions for GASB-Compliant Valuations

	Defined Benefit Retirement Fund			
	State Employees	State Patrol	Correctional Employees	Judges
Actuarial Valuation Date	June 30, 2019 for all funds			
Actuarial Cost Method	Entry Age Normal for all funds			
Asset Valuation Method	Fair Value for all funds			
Long-Term Expected Rate of Return	7.50 percent for all funds			
Inflation	2.50 percent for all funds			
Salary Increases	Service related rates		2.50 percent	4.50 percent
Payroll Growth	3.25 percent		2.50 percent	NA
Mortality Rates	<p>State Employees and Legislators: RP-2014 generational mortality tables projected with mortality improvement scale MP-2015 from a base year of 2014</p> <p>All Other Funds: RP-2014 generational mortality tables projected with mortality improvement scale MP-2015 from a base year of 2006.</p> <p>All of the tables are set back or set forward to match fund experience.</p>			
Annual Post-Retirement Benefit Increases	NA - Fixed rate established in MN statute. No assumption required		1.75% through 2039; 2.00% from 2040 through 2056; 2.50% thereafter	NA
Retirement	Age-related rates			
Withdrawal	Rates based on actual experience	Select and Ultimate rates based on experience	None	Rates based on actual experience
Disability	Age-related rates based on experience			None
Single Discount Rate	7.50 percent			3.13 percent

Actuarial assumptions are based on experience studies, generally conducted every four years for the State Employees Retirement Fund, and every six to eight years for the smaller MSRS defined benefit funds. The most recent studies reflected in actuarial valuations and the periods covered are presented in **Exhibit 22**.

An experience study was completed for the State Employees Retirement Fund in June 2019. Results of this study are expected to affect actuarial assumptions for the valuations performed for fiscal year 2020. Experiences studies for the State Patrol, Correctional Employees, and Judges Retirement Plans are expected to be completed in June 2020.

Exhibit 22: MSRS Experience Study Dates

Retirement Fund	Fiscal Years Covered
State Employees	2008 - 2014
State Patrol	2011 - 2015
Correctional Employees	2011 - 2015
Judges	2011 - 2015

In addition to the experience studies listed above, a study of economic assumptions took place in the fall of 2014. This study reviewed assumptions for inflation, salary increases, payroll growth, and the long-term expected rate of return, which are central to the calculations of the net pension liability for each fund.

Long-Term Expected Rate of Return on Investments

The long-term expected rate of return used in the determination of the net pension liability is 7.50 percent.

During fiscal year 2016, the SBI hired an outside consultant to perform an asset and liability study. Based on the study, the SBI staff proposed an update to the asset allocation, which yields a lower nominal expected return. As a result of this study, and keeping in mind the national trends towards lower investment rate assumptions, the MSRS Board of Directors approved the use of a 7.50 percent long term expected rate of return assumption beginning with the fiscal year 2017 actuarial valuations.

Single Discount Rate

Projected benefit payments are discounted to their actuarial present values using a single discount rate. The single discount rate reflects the long-term expected rate of return on pension plan investments for the period in which assets are projected to be available to pay

benefits, and a tax-exempt municipal bond rate based on an index of 20-year general obligation bonds with an average AA credit rating for the remaining years.

As long as assets are projected to be on hand to pay future benefits, the long-term expected rate of return is used as the discount rate. In years where assets are not projected to be sufficient to meet benefit payments, the use of a “risk-free” municipal bond rate is required in the calculation of the single discount rate. The single discount rate is the equivalent to applying these two rates to the benefits that are projected to be paid during the different time periods.

All MSRS defined benefit funds use a long-term expected rate of return assumption of 7.50 percent, and a municipal bond rate of 3.13 percent, as published by the Fidelity Index in June 2019.

The projection of cash flows used to determine the single discount rates assumes that plan member and employer contributions will be made at the current statutory contribution rates.

Based on the selected assumptions, the fiduciary net position for the four largest MSRS plans was projected to be available to make all future benefit payments of current plan members through fiscal year 2119.

Therefore, the discount rate is the long-term expected rate of return on pension plan investments, which was applied to all periods of projected benefit payments to determine the total pension liability. The discount rate used to measure the total pension liability was 7.50 percent, the same single discount rate that was used for the four funds in fiscal year 2018.

For the Legislators Retirement Fund, assets are not sufficient to pay benefits in any future year, so the municipal bond rate of 3.13 percent was used in all years. In the previous fiscal year, the municipal bond rate of 3.62 percent was used to calculate the total pension liability.

Further detail on the calculation of the single discount rates can be found in the unaudited *Actuarial Section* of this comprehensive annual financial report beginning on page 166.

Notes to the Financial Statements

Sensitivity Analysis

GASB Statement No. 67 requires the disclosure of the sensitivity of the net pension liability to changes in the discount rate. **Exhibit 23** presents the June 30, 2019, net pension liability for each of MSRS' defined benefit retirement funds calculated using the current single discount rate, as well as what each fund's net pension liability would be if it

were calculated using a single discount rate that is one percentage-point lower or one percentage-point higher than the current rate. The actuaries believe that an 8.50 percent discount rate, one of the rates reflected in the table below, does not comply with Actuarial Standards of Practice.

Exhibit 23: Sensitivity of the FY2019 MSRS Net Pension Liability to Changes in the Discount Rate

(Dollars in thousands)

Retirement Fund	With 1% Decrease		Current Discount Rate		With 1% Increase	
	Rate	Net Pension Liability	Rate	Net Pension Liability	Rate	Net Pension Liability
State Employees	6.50%	\$3,276,681	7.50%	\$1,406,851	8.50%	\$(145,311)
State Patrol	6.50	323,003	7.50	206,820	8.50	110,562
Correctional Employees	6.50	618,679	7.50	395,379	8.50	213,220
Judges	6.50	218,593	7.50	178,884	8.50	144,878
Legislators	2.13	155,860	3.13	140,185	4.13	127,040

Required Supplementary Information

Notes to Schedule of Changes in the Employers' Net Pension Liability and Related Ratios

State Employees Retirement Fund

Fiscal Year 2019 Changes Since the Fiscal Year 2018 Actuarial Valuation

Actuarial Assumptions and Plan Provisions:

- There have been no changes since the previous valuation.

Fiscal Year 2018 Changes Since the Fiscal Year 2017 Actuarial Valuation

Actuarial Assumptions:

- The single discount rate changed from 5.42 percent to 7.50 percent.

Plan Provisions:

- The augmentation adjustment in early retirement factors is eliminated over a five-year period starting July 1, 2019, resulting in actuarial equivalence after June 30, 2024.
- Member contributions increased from 5.50 percent to 5.75 percent of pay, effective July 1, 2018, and 6.00 percent of pay effective July 1, 2019.
- Employer contributions increased from 5.50 percent to 5.875 percent of pay, effective July 1, 2018, and 6.25 percent of pay effective July 1, 2019.
- Interest credited on member contributions will decrease from 4.0 to 3.0 percent, beginning July 1, 2018.
- Deferred augmentation was changed to 0.0 percent for future accruing benefits effective January 1, 2019.
- Contribution stabilizer provisions were repealed.
- Post-retirement benefit increases were changed from a 2.0 to 2.5 percent per year increase based upon funded ratio, to a fixed rate of 1.0 percent for five years beginning January 1, 2019, and 1.5 percent per year thereafter.
- For retirements on or after January 1, 2024, the first benefit increase is delayed until the retiree reaches Normal Retirement Age.

Fiscal Year 2017 Changes Since the Fiscal Year 2016 Actuarial Valuation

Actuarial Assumptions:

- The Combined Service Annuity loads were changed from 1.2 percent for active members and 40.0 percent for deferred members, to 0.0 percent for active members, 4.0 percent for vested deferred members, and 5.0 percent for non-vested deferred members.
- The single discount rate changed from 4.17 percent to 5.42 percent.

Plan Provisions:

- Actuarial equivalent factors were updated to reflect current mortality and interest assumptions, effective January 1, 2017.

Fiscal Year 2016 Changes Since the Fiscal Year 2015 Actuarial Valuation

Actuarial Assumptions:

- Assumed salary increase rates were changed to rates that average 0.2 percent greater than the previous rates.
- Assumed rates of retirement were changed, resulting in fewer unreduced retirements and fewer Rule of 90 retirements. Distinct rates for reduced (Early) retirements were adopted for members hired prior to July 1, 1989, and members hired after June 30, 1989.
- Assumed rates of termination were changed, with new rates generally greater than the previous rates for years 3 through 9 and less than the previous rates after 15 years.

- Assumed rates of disability for females were reduced to 75.0 percent of previous rates. Rates for male members were lowered by utilizing the same disability rates as for females.
- The base mortality table for healthy annuitants and employees was changed from the RP-2000 fully generational table to the RP-2014 fully generational table (with a base year of 2014), white collar adjustments, with age adjustments. The mortality improvement scale was changed from Scale AA to Scale MP-2015. The base mortality table for disabled annuitants was changed from the RP-2000 disabled mortality table (no projection for future mortality improvement) to the RP-2014 disabled annuitant mortality table (with future mortality improvement according to Scale MP-2015), with age adjustments.
- The percent married assumption was changed from 85 percent of active male members and 70 percent of female members to 80 percent of active male members and 65 percent of active female members.
- The assumed number of married male new retirees electing the 75 percent Joint & Survivor option changed from 10 percent to 15 percent. The assumed number of married female new retirees electing the 75 percent and 100 percent Joint & Survivor options changed from 0 percent to 10 percent and from 25 percent to 30 percent, respectively. The corresponding number of married new retirees electing the Life annuity option was adjusted accordingly.
- The assumed post-retirement benefit increase rate was changed from 2.0 percent per year through 2043 and 2.5 percent per year thereafter, to 2.0 percent per year for all future years.
- The long-term expected rate of return on pension plan investments was changed from 7.90 percent to 7.50 percent.
- The single discount rate changed from 7.90 percent to 4.17 percent.
- The inflation assumption was changed from 2.75 percent to 2.50 percent.
- The payroll growth assumption was changed from 3.50 percent to 3.25 percent.

Plan Provisions:

- There have been no changes since the previous valuation.

Fiscal Year 2015 Changes Since the Fiscal Year 2014 Actuarial Valuation

Actuarial Assumptions:

- The assumed post-retirement benefit increase rate was changed from 2.0 percent per year through 2015 and 2.5 percent per year thereafter, to 2.0 percent per year through 2043 and 2.5 percent per year thereafter.

Plan Provisions:

- The Contribution Stabilizer statutes were revised to make changes to contribution rates less prescriptive and more flexible.
- Effective July 1, 2015, if the 2.5 percent post-retirement benefit increase is triggered and the funded ratio subsequently drops below 80.0 percent for the most recent valuation year or 85.0 percent for two consecutive years, the post-retirement benefit increase will change to 2.0 percent until the plan again reaches a 90.0 percent funded ratio for two consecutive years.

Fiscal Year 2014 Changes Since the Fiscal Year 2013 Actuarial Valuation

Actuarial Assumptions:

- The assumed post-retirement benefit increase rate was changed from 2.0 percent per year indefinitely, to 2.0 percent per year through 2015 and 2.5 percent per year thereafter.
- The long-term expected rate of return on pension plan investments changed from 6.63 percent to 7.90 percent.

Plan Provisions:

- The member and employer contribution rates increased from 5.0 percent to 5.5 percent of pay.
- The funded ratio threshold that must be attained to pay a 2.5 percent post-retirement benefit increase to benefit recipients was changed from 90.0 percent for one year to 90.0 percent for two consecutive years.

Notes to Schedule of Changes in the Employers' Net Pension Liability and Related Ratios

State Patrol Retirement Fund

Fiscal Year 2019 Changes Since the Fiscal Year 2018 Actuarial Valuation

Actuarial Assumptions and Plan Provisions:

- There have been no changes since the previous valuation.

Fiscal Year 2018 Changes Since the Fiscal Year 2017 Actuarial Valuation

Actuarial Assumptions:

- The single discount rate changed from 6.38 percent to 7.50 percent.

Plan Provisions:

- Member contributions increased from 14.4 to 15.4 percent of pay over three years, effective July 1, 2018.
- Regular employer contributions increased from 21.6 percent to 23.1 percent of pay over two years, effective July 1, 2018.
- Supplemental employer contributions totaling 7.0 percent of pay will be phased in through fiscal year 2022; the supplemental employer contributions remain in effect until the plan is 100.0 percent funded.
- Interest credited on member contributions will decrease from 4.0 to 3.0 percent, beginning July 1, 2018.
- Deferred augmentation was changed to 0.0 percent for future accruing benefits effective January 1, 2019.
- Contribution stabilizer provisions were repealed.
- Post-retirement benefit increases were changed from a 1.0 to 2.5 percent per year increase based upon funded ratio, to a fixed rate of 1.0 percent per year.
- An end date of July 1, 2048, was added for the \$1 million annual state contribution.

Fiscal Year 2017 Changes Since the Fiscal Year 2016 Actuarial Valuation

Actuarial Assumptions:

- Assumed salary increase rates were changed to rates that average 0.26 percent greater than the previous rates.
- Assumed rates of retirement were changed, resulting in slightly more unreduced (normal) retirements and fewer reduced (early) retirements.
- Assumed rates of termination were changed, with new rates decreased for the first three years of employment.
- Disability rates for ages 35 to 51 were increased.
- The base mortality table for healthy and disabled annuitants and employees was changed from the RP-2000 fully generational table to the RP-2014 fully generational table (with a base year of 2006), with white collar adjustments. The mortality improvement scale was changed from Scale AA to Scale MP-2015.
- The assumed percentage of members electing joint and survivor annuities was increased. The form of payment assumptions are now the same for males and females.
- The assumed post-retirement benefit increase rate was changed from 1.00 percent per year for all years, to 1.00 percent per year through 2064, and 1.50 percent per year thereafter.
- The Combined Service Annuity loads were changed from 30 percent for vested and non-vested deferred members, to 13 percent for vested deferred members, and 0 percent for non-vested deferred members.
- The single discount rate changed from 5.31 percent to 6.38 percent.

Plan Provisions:

- There have been no changes since the previous valuation.

Fiscal Year 2016 Changes Since the Fiscal Year 2015 Actuarial Valuation

Actuarial Assumptions:

- The assumed post-retirement benefit increase rate was changed from 1.0 percent per year through 2031, 1.5 percent per year from 2032 to 2052, and 2.5 percent per year thereafter, to 1.0 percent per year indefinitely.
- The long-term expected rate of return on investments was changed from 7.9 percent to 7.5 percent.
- The assumed future salary increases, payroll growth, and inflation rates were decreased by 0.25 percent.
- The single discount rate changed from 7.90 percent to 5.31 percent.

Plan Provisions:

- There have been no changes since the previous valuation.

Fiscal Year 2015 Changes Since the Fiscal Year 2014 Actuarial Valuation

Actuarial Assumptions:

- The assumed post-retirement benefit increase rate was changed from 1.0 percent per year through 2018, 1.5 percent per year from 2019 to 2045, and 2.5 percent per year thereafter, to 1.0 percent per year through 2031, 1.5 percent per year from 2032 to 2052, and 2.5 percent per year thereafter.

Plan Provisions:

- The contribution stabilizer statutes were revised to make changes to contribution rates less prescriptive and more flexible.
- Effective July 1, 2015, if the 1.5 percent post-retirement benefit increase is triggered and the funded ratio subsequently drops below 75 percent for one year or 80 percent for two consecutive years, the post-retirement benefit increase will change to 1.5 percent until the plan again reaches an 85 percent funded ratio for two consecutive years.
- The age that disabilitants change from disabled status to retired status changed from age 65 to age 55 for disabilities after June 30, 2015.

Fiscal Year 2014 Changes Since the Fiscal Year 2013 Actuarial Valuation

Actuarial Assumptions:

- The assumed post-retirement benefit increase rate was changed from 1.0 percent per year indefinitely, to 1.0 percent per year through 2018, 1.5 percent per year from 2019 through 2045, and 2.5 percent per year thereafter.

Plan Provisions:

- The funded ratio threshold that must be attained to pay a 1.5 percent post-retirement benefit increase to benefit recipients was changed from 85 percent for one year to 85 percent for two consecutive years. The funded ratio threshold that must be attained to pay a 2.5 percent post-retirement benefit increase to benefit recipients was changed from 90 percent for one year to 90 percent for two consecutive years.
- The interest assumption used to determine optional form conversion factors was changed from an actuarial equivalent rate consistent with the post-retirement discount rate to a fixed rate of 6.5 percent.

Notes to Schedule of Changes in the Employers' Net Pension Liability and Related Ratios

Correctional Employees Retirement Fund

Fiscal Year 2019 Changes Since the Fiscal Year 2018 Actuarial Valuation

Actuarial Assumptions and Plan Provisions:

- There have been no changes since the previous valuation.

Fiscal Year 2018 Changes Since the Fiscal Year 2017 Actuarial Valuation

Actuarial Assumptions:

- The single discount rate changed from 5.02 percent to 7.50 percent.

Plan Provisions:

- Member contributions increased from 9.1 percent to 9.6 percent of pay effective July 1, 2018.
- Regular employer contributions increased from 12.85 to 14.40 percent of pay effective July 1, 2018.
- Supplemental employer contributions totaling 4.45 percent of pay will be phased in through fiscal year 2022; the supplemental employer contributions remain in effect until the plan is 100 percent funded.
- Interest credited on member contributions will decrease from 4.0 to 3.0 percent, beginning July 1, 2018.
- Deferred augmentation was changed to 0.0 percent for future accruing benefits effective January 1, 2019.
- Contribution stabilizer provisions were repealed.
- Post-retirement benefit increases were changed from a 2.0 to 2.5 percent per year increase based upon funded ratio, to a fixed rate of 1.5 percent per year.

Fiscal Year 2017 Changes Since the Fiscal Year 2016 Actuarial Valuation

Actuarial Assumptions:

- Assumed salary increase rates were changed to rates that average 0.60 percent greater than the previous rates.
- Assumed rates of retirement were changed, resulting in slightly fewer expected unreduced (normal) retirements.
- Assumed rates of termination were decreased for the first two years of employment and increased for the third year of service. For rates beyond the first three years, male rates for ages less than 43 were increased; female rates for ages less than 35 and between ages 42 to 44 were increased.
- Disability rates for ages 39 and over were decreased.
- The base mortality table for healthy annuitants and employees was changed from the RP-2000 fully generational table to the RP-2014 fully generational table (with a base year of 2006), with white collar adjustments and with age adjustments. The mortality improvement scale was changed from Scale AA to Scale MP-2015. The base mortality table for disabled annuitants was changed from the RP-2000 disabled mortality table (no projection for future mortality improvement) to the RP-2014 disabled annuitant mortality table (with future mortality improvement according to MP-2015).
- The assumed percentage of married members was changed from 85 percent to 75 percent.
- The assumed age difference for members and their spouse was lowered from 3 years to 2 years.
- The assumed percentage of members electing joint and survivor annuities was increased and the assumed percentage of members electing the single life annuity was decreased.
- The Combined Service Annuity loads were changed from 30 percent for vested and non-vested deferred members, to 17 percent for vested deferred members, and 6 percent for non-vested deferred members.
- The single discount rate changed from 4.24 percent to 5.02 percent.

Plan Provisions:

- There have been no changes since the previous valuation.

Fiscal Year 2016 Changes Since the Fiscal Year 2015 Actuarial Valuation

Actuarial Assumptions:

- The single discount rate changed from 6.25 percent to 4.24 percent.
- The long-term expected rate of return on investments was reduced from 7.90 percent to 7.50 percent.
- The assumed future salary increases, payroll growth, and inflation rates were decreased by 0.25 percent.

Plan Provisions:

- There have been no changes since the previous valuation.

Fiscal Year 2015 Changes Since the Fiscal Year 2014 Actuarial Valuation

Actuarial Assumptions:

- The single discount rate changed from 6.82 percent to 6.25 percent.
- The assumed post-retirement benefit increase rate was changed from 2.0 percent through 2065 and 2.5 percent thereafter, to 2.0 percent indefinitely.

Plan Provisions:

- The Contribution Stabilizer statutes were revised to make changes to contribution rates less prescriptive and more flexible.
- Effective July 1, 2015, if the 2.5 percent post-retirement benefit increase is triggered and the funded ratio subsequently drops below 80 percent for one year or 85 percent for two consecutive years, the post-retirement benefit increase will change to 2.0 percent until the plan again reaches a 90 percent funded ratio for two consecutive years.

Fiscal Year 2014 Changes Since the Fiscal Year 2013 Actuarial Valuation

Actuarial Assumptions:

- The single discount rate changed from 6.08 percent to 6.82 percent.
- The assumed post-retirement benefit increase rate was changed from 2.0 percent indefinitely, to 2.0 percent per year through 2065, and 2.5 percent per year thereafter.

Plan Provisions:

- Member contribution rates increased from 8.6 percent to 9.1 percent of pay.
- Employer contribution rates increased from 12.10 percent to 12.85 percent of pay.
- The funded ratio threshold that must be attained to pay a 2.5 percent post-retirement benefit increase to benefit recipients was changed from 90 percent for one year to 90 percent for two consecutive years.

Fiscal Year 2019 Changes Since the Fiscal Year 2018 Actuarial Valuation

Actuarial Assumptions:

- The assumed post-retirement benefit increase rate was changed from 1.75 percent through 2037, 2.00 percent for 2038 through 2051, and 2.50 percent thereafter, to 1.75 percent through 2039, 2.00 percent for 2040 through 2056, and 2.50 percent thereafter.

Plan Provisions:

- There have been no changes since the previous valuation.

Fiscal Year 2018 Changes Since the Fiscal Year 2017 Actuarial Valuation

Actuarial Assumptions:

- The assumed post-retirement benefit increase rate was changed from 1.75 percent through 2038, 2.00 percent for 2039 through 2053, and 2.50 percent thereafter, to 1.75 percent through 2037, 2.00 percent for 2038 through 2051, and 2.50 percent thereafter.

Plan Provisions:

- Interest credited on member contributions will decrease from 4.0 to 3.0 percent, beginning July 1, 2018.
- An end date of July 1, 2048, was added for the \$6 million annual state contribution.

Fiscal Year 2017 Changes Since the Fiscal Year 2016 Actuarial Valuation

Actuarial Assumptions:

- Assumed rates of retirement were changed, resulting in more unreduced (normal) retirements and slightly fewer reduced (early) retirements.
- Male disability incidence rates were decreased to equal female disability incidence rates.
- The base mortality table for healthy and disabled annuitants and employees was changed from the RP-2000 fully generational table to the RP-2014 fully generational table (with a base year of 2006), with white collar adjustments. The mortality improvement scale was changed from Scale AA to Scale MP-2015.
- The assumed post-retirement benefit increase rate was changed from 1.75 percent through 2041, 2.00 percent for 2042 through 2054, and 2.50 percent thereafter, to 1.75 percent through 2038, 2.00 percent for 2039 through 2053, and 2.50 percent thereafter.

Plan Provisions:

- There have been no changes since the previous valuation.

Fiscal Year 2016 Changes Since the Fiscal Year 2015 Actuarial Valuation

Actuarial Assumptions:

- The assumed post-retirement benefit increase rate was changed from 1.75 percent for all years, to 1.75 percent per year through 2041, 2.00 percent per year from 2042 through 2054, and 2.50 percent per year thereafter.
- The long-term expected rate of return on investments was changed from 7.90 percent to 7.50 percent.
- The assumed future salary increases, payroll growth, and inflation rates were decreased by 0.25 percent.
- The single discount rate was changed from 5.25 percent to 7.50 percent.

Plan Provisions:

- Legislation provides state contributions equal to \$3,000,000 for the fiscal year ending June 30, 2017, and \$6,000,000 per year thereafter until the plan is fully funded.

Fiscal Year 2015 Changes Since the Fiscal Year 2014 Actuarial Valuation

Actuarial Assumptions:

- The single discount rate was changed from 5.78 percent to 5.25 percent.

Plan Provisions:

- There have been no changes since the previous valuation.

Fiscal Year 2014 Changes Since the Fiscal Year 2013 Actuarial Valuation

Actuarial Assumptions:

- The single discount rate was changed from 5.57 percent to 5.78 percent.

Plan Provisions:

- Effective July 1, 2014, the funded ratio threshold that must be attained to pay a 2.0 percent post-retirement benefit increase to benefit recipients was changed from 70 percent for one year to 70 percent for two consecutive years. The funded ratio threshold that must be attained to pay a 2.5 percent post-retirement benefit increase to benefit recipients was changed from 90 percent for one year to 90 percent for two consecutive years.
- The 10-year certain and life thereafter optional form of payment is no longer available.

Notes to this schedule may be found on the following pages.

Schedule is intended to show information for 10 years. Additional years will be displayed as available.

Required Supplementary Information

Notes to Schedule of Changes in the Employers' Net Pension Liability and Related Ratios

Legislators Retirement Fund

Fiscal Year 2019 Changes Since the Fiscal Year 2018 Actuarial Valuation

Actuarial Assumptions:

- The single discount rate changed from 3.62 percent to 3.13 percent.

Plan Provisions:

- There have been no changes since the previous valuation.

Fiscal Year 2018 Changes Since the Fiscal Year 2017 Actuarial Valuation

Actuarial Assumptions:

- The single discount rate changed from 3.56 percent to 3.62 percent.

Plan Provisions:

- Interest credited on member contributions will decrease from 4.0 to 3.0 percent, beginning July 1, 2018.
- Deferred augmentation was changed to 0.0 percent for future accruing benefits effective January 1, 2019.
- Post-retirement benefit increases were changed from a 2.0 to 2.5 percent per year increase based upon funded ratio, to a fixed rate of 1.0 percent for five years beginning January 1, 2019, and 1.5 percent per year thereafter.
- For retirements on or after January 1, 2024, the first benefit increase is delayed until the retiree reaches Normal Retirement Age.

Fiscal Year 2017 Changes Since the Fiscal Year 2016 Actuarial Valuation

Actuarial Assumptions:

- The Combined Service Annuity loads were changed from 30 percent for terminated members, to 0 percent for all members.
- The base mortality table for healthy annuitants and employees was changed from the RP-2000 fully generational table to the RP-2014 fully generational table (with a base year of 2014), with white collar adjustments and with age adjustments. The mortality improvement scale was changed from Scale AA to Scale MP-2015.
- The single discount rate changed from 2.85 percent to 3.56 percent.

Plan Provisions:

- Actuarial equivalent factors were updated to reflect current mortality and interest assumptions, effective January 1, 2017.

Fiscal Year 2016 Changes Since the Fiscal Year 2015 Actuarial Valuation

Actuarial Assumptions:

- The single discount rate changed from 3.80 percent to 2.85 percent.
- The long-term expected rate of return on investments was reduced from 7.90 percent to 7.50 percent.
- The assumed salary increases and inflation rates were decreased by 0.25 percent.
- The assumed post-retirement benefit increase rate was changed from 2.0 percent per year through 2043 and 2.5 percent thereafter, to 2.0 percent for all years.

Plan Provisions:

- There have been no changes since the previous valuation.

Fiscal Year 2015 Changes Since the Fiscal Year 2014 Actuarial Valuation

Actuarial Assumptions:

- The single discount rate changed from 4.29 percent to 3.80 percent.
- The assumed post-retirement benefit increase rate was changed from 2.0 percent per year through 2015 and 2.5 percent thereafter, to 2.0 percent per year through 2043 and 2.5 percent thereafter.

Plan Provisions:

- Effective July 1, 2015, if the 2.5 percent post-retirement benefit increase is triggered and the State Employees Retirement Fund funded ratio declines to less than 80 percent for the most recent year or 85 percent for two consecutive years, the benefit increase will decrease to 2.0 percent until the plan reaches a 90 percent funded ratio for two consecutive years.

Fiscal Year 2014 Changes Since the Fiscal Year 2013 Actuarial Valuation

Actuarial Assumptions:

- The single discount rate changed from 4.63 percent to 4.29 percent.
- The assumed post-retirement benefit increase rate was changed from 2.0 percent per year indefinitely, to 2.0 percent per year through 2015, and 2.5 percent per year thereafter.

Plan Provisions:

- The funded ratio threshold that must be attained in the State Employees Retirement Fund to pay a 2.5 percent post-retirement benefit increase to benefit recipients in the Legislators Retirement Fund was changed from 90 percent for one year to 90 percent for two consecutive years.

Notes to Schedule

⁽¹⁾The Actuarially Determined Contribution rates are calculated as of June 30 each year and apply to the fiscal year beginning on the day after the measurement date.

⁽²⁾ Assumption: Actual member contributions divided by employee contribution rate from 2012 through 2019.

Valuation Date:	June 30, 2018
Actuarial Cost Method:	Entry age normal
Amortization Method:	Level percentage of payroll, closed period
Remaining Amortization Period:	30 years
Asset Valuation Method:	Market value smoothed over 5 years
Investment Rate of Return:	7.50%
Projected Salary Increases:	Service-related rates ranging from 13.75% (one year of service) to 3.25% (25 or more years of service), including inflation
Inflation Rate:	2.50%
Payroll Growth:	3.25%
Retirement Age:	Experience-based table of rates that are specific to the type of eligibility condition
Healthy Post-Retirement Mortality:	RP-2014 annuitant generational mortality table, projected with mortality improvement MP-2015 from a base year of 2014, white collar adjustment, set forward 2 years for males and no age adjustment for females
Post-Retirement Benefit Increases:	1.00% per year through 2023, 1.50% per year thereafter

MSRS does not directly pay any investment fees or commissions. All investment expenses are paid by the Minnesota State Board of Investment. These are the proportionate share of the expenses charged to the investment pools in which MSRS participates.

The Legislators Retirement Fund has no assets, and therefore no investment expenses.

GASB Statement No. 68 Supplemental Employer Schedules

The schedules on the following pages are provided for financial reporting purposes for the employer units of the defined benefit plans of MSRS.

Independent Auditor's Report

OFFICE OF THE LEGISLATIVE AUDITOR
STATE OF MINNESOTA • James Nobles, Legislative Auditor

Independent Auditor's Report

Members of the Board of Directors
Minnesota State Retirement System

Ms. Erin Leonard, Executive Director
Minnesota State Retirement System

Report on Schedules

We have audited the accompanying Schedule of Employer Allocations of the Minnesota State Retirement System (MSRS) as of and for the fiscal year ended June 30, 2019. We have also audited the total for all entities of the columns titled net pension liability, total deferred outflows of resources, total deferred inflows of resources, and total pension expense (specified column totals) included in the accompanying Schedule of Pension Amounts by Employer of MSRS as of and for the year ended June 30, 2019.

Management's Responsibility for the Schedules

Management is responsible for the preparation and fair presentation of these schedules in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal controls relevant to the preparation and fair presentation of the schedules that are free from material misstatement, due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on the Schedule of Employer Allocations and the specified column totals included in the Schedule of Pension Amounts by Employer based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the Schedule of Employer Allocations and specified column totals included in the Schedule of Pension Amounts by Employer are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts in the Schedule of Employer Allocations and specified column totals included in the Schedule of Pension Amounts by Employer. The procedures selected depend on the auditor's judgment, including the assessment of risks of material misstatement within the schedules, whether due to fraud or error. In making those risk assessments, the auditor considers internal controls relevant to the entity's preparation and fair presentation of the schedules in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal controls. Accordingly, we express no such opinion.

Room 140 Centennial Building, 658 Cedar Street, St. Paul, Minnesota 55155-1603 • Phone: 651-296-4708 • Fax: 651-296-4712

Independent Auditor's Report

MSRS Board of Directors
Ms. Erin Leonard, MSRS Executive Director
Page 2

An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the Schedule of Employer Allocations and specified column totals included in the Schedule of Pension Amounts by Employer. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the schedules referred to above present fairly, in all material respects, the employer allocations and net pension liability, total deferred outflows of resources, total deferred inflows of resources, and total pension expense for the total of all participating entities for MSRS as of and for the year ended June 30, 2019, in accordance with accounting principles generally accepted in the United States of America.

Other Matter

We have audited, in accordance with auditing standards generally accepted in the United States of America, the financial statements of MSRS as of and for the year ended June 30, 2019, and our report thereon, also dated December 19, 2019, expressed an unmodified opinion on those financial statements.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we will also issue a report on our consideration of MSRS's internal controls over the preparation of these schedules and on our tests of compliance with certain provisions of laws, regulations, and other matters. The purpose of that report is to describe the scope of our testing of internal controls and compliance and not to provide an opinion on internal controls over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards*.

Restriction on Use

Our report is intended solely for the information and use of MSRS's Board of Directors and its management to support the financial reporting needs of employers participating in MSRS's plans and their auditors for the year ended June 30, 2019. It is not suitable for any other purpose.

Christopher Buse, CPA

MSRS

In 1983, the assets of the Minnesota State Retirement System pension plans crossed the \$1 billion mark. This has grown to over \$25 billion in 2019.

1983

State of Minnesota in 1983

- Albert H. Quie served as the 35th Governor of Minnesota.
- St. Paul's Mickey's Diner, the art deco railroad car diner in continuous operation since 1939, was listed on the National Register of Historic Places. Breakfast is available all day.
- The Minnesota Twins played their final game at Metropolitan Stadium, moving to the Metrodome the following season.

United States in 1983

- Sally Ride became the first American woman in space aboard the Space Shuttle Challenger.
- Kilauea Volcano in Hawaii began erupting, continuing until 2018.
- The arcade game Mario Bros, featuring Mario and his brother Luigi, was released.

**An Equal Opportunity
Employer**

INVESTMENT AUTHORITY

The assets of the Minnesota State Retirement System (MSRS) are invested along with the assets of the Public Employees Retirement Association and the Teachers Retirement Association under the direction and authority of the State Board of Investment (SBI) in accordance with Minnesota Statutes, Chapters 11A and 356A. The SBI includes Minnesota's governor, auditor, secretary of state and attorney general. The Legislature has established a 17-member Investment Advisory Council (IAC) to advise the SBI and its staff on investment related matters. MSRS's executive director is a member of the IAC.

INVESTMENT POLICY

Investment policy states that the SBI will operate within standard investment practices of the prudent person. The SBI is to "exercise that degree of judgment and care, under circumstances then prevailing, which persons of prudence, discretion, and intelligence exercise in the management of their own affairs, not for speculation, but for investment, considering the probable safety of their capital as well as the probable income to be derived therefrom." (See M.S., section 11A.09.) The SBI is authorized to own government obligations, corporate obligations, various short-term obligations, corporate stocks, venture capital interests, resource investments, and real estate interests subject to specific constraints. (See M.S., section 11A.24.) In particular, pension fund assets are to be invested for the exclusive benefit of the members of the fund.

INVESTMENT OBJECTIVES AND PERFORMANCE

MSRS's pension contributions from employees and employers are invested in the Combined Funds. The Combined Funds include the assets of active and retired public employees who participate in the defined benefit plans administered by MSRS, the Minnesota Teachers Retirement Association, and the Public Employees Retirement Association. MSRS does not own any underlying assets, but instead owns a participation in the pooled Combined Funds. Because these assets normally accumulate for thirty to forty years, SBI's objective is to take advantage of the long investment time horizon offered by equities and alternative assets in order to meet its actuarial return target and ensure that sufficient funds are available to finance promised benefits at the time of retirement. The 2018 Legislature reduced the actuarial interest rate assumption for MSRS to 7.5%.

The long term objectives of the Combined Funds are:

- Provide returns that are 3-5 percentage points greater than inflation over the latest 20-year period; and
- Outperform a composite market index weighted in a manner that reflects the actual asset mix of the Combined Funds over the latest 10-year period.

Consistent with these objectives, the SBI maintains a long-term strategic asset allocation policy target for the Combined Funds as follows:

- Public Equity 53%
- Fixed Income 20%
- Private Markets 25%
- Cash 2%

Based on values on June 30, 2019, the Combined Funds returned 4.4 percentage points above the CPI over the last 20 years and returned 0.4 percentage point above the composite index over the past 10 years. Investment returns ranked in the top 12th percentile over the past five years and in the top 7th percentile over the past 10 years, compared to other public and corporate plans with over \$1 billion in assets in the Trust Universe Comparison Service.

INVESTMENT PRESENTATION

Investment returns were prepared using time-weighted rate of return methodology based upon fair market value, net of investment expenses.

Respectfully submitted,

Mansco Perry III
Executive Director
Minnesota State Board of Investment
November 12, 2019

Schedule of Investment Results

Funds	Rates of Return (Annualized)			
	FY 2019	Three-Year	Five-Year	Ten-Year
Combined Funds	7.3 %	10.9%	7.3%	10.9%
Combined Funds-Composite Index	7.6	10.5	7.3	10.5
Difference	(0.3)%	0.4%	0.0%	0.4%

Investment Return percentages are the time-weighted rate of return, net of all management fees.

The composite index is composed of the market indicators listed below, weighted according to asset allocation.

Investment Type	Market Indicator
Public Equity	Russell 1000 (60.3%)
	Russell 2000 (6.7%)
	Morgan Stanley Capital International World ex-U.S. (24.75%)
	Morgan Stanley Capital International Emerging Markets (8.25%)
Domestic Bonds	Bloomberg Barclays U.S. Aggregate Index
Private Markets	Private Markets
Treasuries	Bloomberg Barclays Treasury 5+ Years
Cash	90 Day Treasury Bills

Asset Allocation

Asset allocation can have a significant effect on investment returns. To achieve the best results, allocations are periodically reviewed and adjusted to reflect changing market conditions and revised investment objectives.

Investment Type	Combined Funds	
	Actual Asset Mix 06/30/2019	Long-Term Policy Target
Domestic Equity	41.7%	35.5%
International Equity	20.5	17.5
Domestic Bonds	10.2	10.0
Treasuries	10.1	10.0
Private Markets ⁽¹⁾	14.6	25.0
Cash	2.9	2.0
Totals	100.0%	100.0%

⁽¹⁾ If a 25 percent allocation cannot be achieved, the uncommitted allocation in Private Markets is invested in Domestic and International Equities. Private Markets include Private Equity, Private Credit, Resources, and Real Estate.

MSRS

In 2001, the Minnesota State Retirement System moved into a new building in St. Paul, and the Health Care Savings Plan (HCSP) was created. The tax-free medical savings account for employees of Minnesota public entities now has over \$1 billion in assets.

2001

State of Minnesota in 2001

- Jesse Ventura served as the 38th Governor of Minnesota.
- In his first year of eligibility, Kirby Puckett was elected into the baseball Hall of Fame. He played his entire career with the Minnesota Twins, winning two World Series.

United States in 2001

- Apple released the iPod and Microsoft introduced the first Xbox.
- An attack on the United States struck the World Trade Center in New York, the Pentagon and a field in Pennsylvania. Patriot Day is now observed annually on September 11 to commemorate the lives lost that day.

Actuarial Section

The following section is divided into two parts:

Actuarial Valuation information for funding purposes.

Typically, these valuations include the calculations for funded ratio and annual required contribution, which are necessary for developing and monitoring funding policy. The Executive Director, staff and advisors develop funding policy recommendations for review and approval by the MSRS Board of Directors. The Board of Directors is responsible for establishing and maintaining funding policy for all MSRS defined benefit retirement plans.

The valuation results can be found on pages 136-161.

Actuarial Valuation information for GASB-compliant accounting and financial reporting purposes.

These valuations provide information necessary for the MSRS governmental employers to record pension related transactions in their accounting system and financial statements, including year-end actuarially determined pension amounts and related note disclosures.

The valuation results can be found on pages 166-172.

Re: 2019 Comprehensive Annual Financial Report (CAFR)

Dear Members of the Board:

We have previously prepared and presented to you our annual actuarial valuation of the State Employees Retirement Fund (SERF), the State Patrol Retirement Fund (SPRF), the Correctional Employees Retirement Fund (CERF), the Judges Retirement Fund (JRF) and the Legislators Retirement Fund (LRF) as of July 1, 2019.

In this Comprehensive Annual Financial Report (CAFR), MSRS prepared all supporting schedules in the Actuarial Section based on the information included in the annual actuarial valuation prepared by Gabriel, Roeder, Smith & Company (GRS). Specifically, these exhibits are:

- Summary of Actuarial Methods and Assumptions
- Changes in Actuarial Assumptions
- Changes in Plan Provisions
- Other Assumptions
- Actuarial Tables
- Actuarial Accrued Liability (AAL)
- Actual Contribution Rates Compared to Actuarially Recommended Rates
- Schedule of Changes in Unfunded Actuarial Accrued Liabilities (UAAL)
- Schedule of Actuarial and Market Value Funding Progress
- Schedule of Contributions from Employers and Other Contributing Entities
- Schedule of Active Member Valuation Data
- Schedule of Retirees and Beneficiaries
- Solvency Test
- Summary of Unfunded Actuarial Accrued Liabilities (UAAL)

Reading the CAFR is not a substitute for reading the actuarial reports. In order to gain a full understanding of the actuarial condition of the Fund, it is important to read and understand the full actuarial reports and potentially other relevant information in addition to this CAFR for each of the aforementioned funds. Annual actuarial valuation reports for funding purposes as well as for accounting and financial reporting purposes are available on the MSRS website, along with online copies of this and previous CAFRs.

Page 2

Valuation Results

The results of the valuations are summarized in the following table. For all plans, except LRF, because the asset returns are smoothed over five years in the valuation, the actuarial value of assets is lower than the market value of assets. LRF assets have been zero since July 1, 2016.

Plan	Accrued Liability Funded Ratio		Contribution Deficiency/ (Sufficiency) (% of Pay)		Statutory Amortization Date	Future Contribution Increases (% of Pay)
	Actuarial Value of Assets	Market Value of Assets	Actuarial Value of Assets	Market Value of Assets		
SERF	88.87%	90.73%	(0.67)%	(1.19)%	2048	N/A
SPRF	76.85%	78.46%	(1.74)%	(2.82)%	2048	4.50%
CERF	73.47%	74.97%	0.57%	0.06%	2048	3.00%
JRF	53.18%	54.27%	0.65%	0.11%	2048	N/A
LRF*	0.00%	0.00%	\$29,898,000*	\$29,898,000*	2026	N/A

* This fund is closed to new hires and currently funded on a pay-as-you-go basis by annual appropriations from the State's General Fund. The deficiency is expressed as an annual dollar amount rather than a percent of payroll.

SERF and SPRF currently have contribution sufficiencies. CERF currently shows a contribution deficiency but has a contribution sufficiency when future contribution increases are taken into account. A contribution sufficiency means that the fund is expected to meet the goal of full funding by the statutory amortization date. JRF has a small contribution deficiency, which means that the plan is not expected to achieve full funding by the statutory amortization date. LRF is funded on a pay-as-you-go basis.

The fundamental financing objective of the fund is to establish contribution rates which will remain approximately level as a percentage of active member payroll from generation to generation and meet the required deadline for full funding.

The funded ratio measurements shown above are not appropriate for assessing the sufficiency of plan assets to cover the estimated cost of settling the plan's benefit obligations (of transferring the obligations to an unrelated third party in an arm's length market value transaction). The measurements also are dependent upon the actuarial cost method which, in combination with the plan's amortization policy, affects the timing and amounts of future contributions. The amounts of future required contributions will be different from those calculated in the actuarial reports due to future actual experience differing from assumed experience based upon the actuarial assumptions. A funded status measurement of 100% would not be synonymous with no required future contributions. If the funded status were 100%, the plan would still require future normal cost contributions (i.e., contributions to cover the cost of the active membership accruing an additional year of service credit).

For JRF, based on a projection of the plan's funding ratios, the assumed benefit increase was changed from 1.75% per year through 2037, 2.00% per year from 2038 to 2051 and 2.50% thereafter to 1.75% per year through 2039, 2.00% per year from 2040 to 2056 and 2.50% thereafter. There have been no other changes in actuarial assumptions or plan provisions since the most recent valuation.

GRS performed a basic review of the basic financial and membership data provided to us as of June 30, 2019 by MSRS, and determined that the data appears reasonable in comparison to last year. We did not audit the data. We have relied upon the data as submitted in performing the actuarial valuation and in preparing trend data schedules. The actuarial cost method and the assumptions related to asset valuation, investment return, earnings progression and active member payroll growth are specified by State Statute. All other assumptions are based on actual experience, with changes adopted by the MSRS Board, and approved by the Legislative Commission on Pensions and Retirement (LCPR). The assumptions and methods meet the parameters established by Actuarial Standards of Practice.

In a 2019 analysis of long-term rate of investment return and inflation assumptions, GRS determined that an investment return assumption of 7.50% was reasonable. Please see our State Employees Retirement Fund experience study report dated June 27, 2019 for additional information. This report also concluded that the probability of exceeding the current 7.50% assumption over 10 years is 44%. If capital market assumptions decline from present levels, the 7.50% return assumption might not comply with actuarial standards for the July 1, 2020 valuation.

Actuarial standards do not require the actuary to evaluate the ability of the plan sponsor or other contributing entity to make required contributions to the plan when due. Such an evaluation was not within the scope of this project and is not within the actuary's domain of expertise. Consequently, the actuary performed no such evaluation.

To the best of our knowledge and belief, the valuations were performed in accordance with generally accepted actuarial principles and procedures, the requirements of Minnesota Statutes, Section 356.215, and the requirements of the Standards for Actuarial Work established by the LCPR. In our opinion, the results of the valuations reflect the actuarial position of the plans on an ongoing basis under the prescribed assumptions, methods, and procedures.

Brian B. Murphy and Bonita J. Wurst are Members of the American Academy of Actuaries (MAAA) and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained in this report. In addition, Mr. Murphy meets the requirements of "approved actuary" under Minnesota Statutes, Section 356.215, Subdivision 1, Paragraph (c). The signing actuaries are independent of the plan sponsor. We are not aware of any relationship that would impair the objectivity of our work.

Respectfully submitted,

Brian B. Murphy, FSA, EA, FCA, MAAA, PhD

Bonita J. Wurst, ASA, EA, FCA, MAAA

BBM/BJW:sc

Summary of Actuarial Methods and Assumptions

The actuarial methods and assumptions that follow are prescribed by Minnesota Statutes, the Legislative Commission on Pensions and Retirement (LCPR), and the MSRS Board of Directors. MSRS uses these methods and assumptions to monitor funding progress and the sufficiency of plan member and employer contribution rates. Methods and assumptions used for financial reporting purposes, if they differ, are found in the *Actuarial Section* on page 172.

Additional actuarial methods and assumptions used in the July 1, 2019, funding actuarial valuations can be found online at www.msrs.state.mn.us/annual-reports-fy-2019.

State Employees Retirement Fund

Actuarial Methods

- 1. Actuarial Cost Method:** Entry age normal, with the unfunded actuarial accrued liability amortized over the statutory period using a level percent of payroll assuming payroll increases.
- 2. Asset Valuation Method:** Market value smoothed over five years.
- 3. Funding Objective:** Establish contribution rates which, when expressed as a percentage of active member payroll, will remain approximately level from generation to generation and meet the required deadline for full funding.
- 4. Change in Methods since the 7/1/2018 Valuation:** None.

Actuarial Assumptions⁽¹⁾

- 1. Investment Return:** 7.50% per year (2018)
- 2. Salary Increases:** Service-related rates as shown in the table on page 143 (2018)
- 3. Inflation:** 2.50% per year (2018)
- 4. Payroll Growth:** 3.25% per year (2018)
- 5. Mortality Rates:**
 - a. Healthy Pre-retirement: RP-2014 employee generational mortality table projected with mortality improvement scale MP-2015 from a base year of 2014; white collar adjustment; males - set forward one year; females - no adjustment (2016)
 - b. Healthy Post-retirement: RP-2014 annuitant generational mortality table projected with mortality improvement scale MP-2015 from a base year of 2014; white collar adjustment; males - set forward two years; females - no adjustment (2016)
 - c. Disabled: RP-2014 disabled mortality table projected with mortality improvement scale MP-2015 from a base year of 2014; males - set forward two years; females - set forward four years (2016)
- 6. Retirement:** Age-based rates as shown in the table on page 147 (2016)
- 7. Withdrawal:** Service-related rates based on experience as shown in the table on page 148 (2016)
- 8. Disability:** Age-related rates based on actual experience as shown in the table on page 149 (2016)
- 9. Allowance for Combined Service Annuity:** Liabilities for former vested members are increased by 4%, and liabilities for former, non-vested members are increased by 5% to account for the effect of some participants having eligibility for a Combined Service Annuity (2017)
- 10. Administrative Expenses:** Prior year administrative expenses expressed as a percentage of prior year projected payroll (1994)
- 11. Refund of Contributions:** Employees who withdraw are assumed to take the larger of their contributions accumulated with interest or the value of their deferred benefit (1978)

State Patrol Retirement Fund

Actuarial Methods

1. **Actuarial Cost Method:** Entry age normal, with the unfunded actuarial accrued liability amortized over the statutory period using a level percent of payroll assuming payroll increases
2. **Asset Valuation Method:** Market value smoothed over five years
3. **Funding Objective:** Establish contribution rates which, when expressed as a percentage of active member payroll, will remain approximately level from generation to generation and meet the required deadline for full funding
4. **Change in Methods since the 7/1/2018 Valuation:** None.

Actuarial Assumptions⁽¹⁾

1. **Investment Return:** 7.50% per year (2018)
2. **Salary Increases:** Service-related rates as shown in the table on page 143 (2017)
3. **Inflation:** 2.50% per year (2018)
4. **Payroll Growth:** 3.25% per year (2018)
5. **Mortality Rates:**
 - a. Healthy Pre-retirement: RP-2014 employee generational mortality table projected with mortality improvement scale MP-2015, from a base year of 2006; white collar adjustment (2017)
 - b. Healthy Post-retirement: RP-2014 annuitant generational mortality table projected with mortality improvement scale MP-2015, from a base year of 2006; white collar adjustment (2017)
 - c. Disabled: RP-2014 annuitant generational mortality table projected with mortality improvement scale MP-2015, from a base year of 2006; white collar adjustment (2017)
6. **Retirement:** Age-based rates as shown in the table on page 147 (2017)
7. **Withdrawal:** Select and Ultimate rates based on actual experience; 2.5% in year 1, 2% in year 2, and 1.5% in year 3; Age-based rates after the third year are shown on page 147 (2017)
8. **Disability:** Age-related rates based on experience as shown in the table on page 149. All incidences are assumed to be duty-related (2017)
9. **Allowance for Combined Service Annuity:** Liabilities for former, vested members are increased by 13% to account for the effect of some participants having eligibility for a Combined Service Annuity (2017)
10. **Administrative Expenses:** Prior year administrative expenses expressed as a percentage of prior year projected payroll (1994)
11. **Refund of Contributions:** Employees who withdraw are assumed to take the larger of their contributions accumulated with interest or the value of their deferred benefit (1978)

- 10. Administrative Expenses:** Prior year administrative expenses expressed as a percentage of prior year projected payroll
- 11. Refund of Contributions:** Account balances for deferred members accumulate interest until normal retirement date and are discounted back to the valuation date

⁽¹⁾ Year in parentheses is the date of adoption.

Summary of Actuarial Methods and Assumptions

Legislators Retirement Fund

Actuarial Methods

- 1. Actuarial Cost Method:** Entry age normal, with the unfunded actuarial accrued liability amortized over 30 years as a level percent of payroll
- 2. Asset Valuation Method:** Market value
- 3. Funding Objective:** Pay-as-you-go, with annual benefit payments and administrative expenses financed primarily by State of Minnesota General Fund appropriations
- 4. Change in Methods since the 7/1/2018 Valuation:** None.

Actuarial Assumptions⁽¹⁾

- 1. Investment Return:** 0% per year (2011)
- 2. Salary Increases:** 5.00% annually (1994)
- 3. Inflation:** 2.50% per year (2018)
- 4. Payroll Growth:** Not applicable; closed plan with decreasing payroll
- 5. Mortality Rates:**
 - a. Healthy Pre-retirement: RP-2014 employee generational mortality table projected with mortality improvement scale MP-2015, from a base year of 2014; white collar adjustment; males - set forward one year; females - no adjustment (2017)
 - b. Healthy Post-retirement: RP-2014 annuitant generational mortality table projected with mortality improvement scale MP-2015, from a base year of 2014; white collar adjustment; males - set forward two years; females - no adjustment (2017)
 - c. Disabled: Not applicable
- 6. Retirement:** Age-based rates as shown in the table on page 147 (2012)
- 7. Withdrawal:** Ultimate rates based on actual experience as shown on page 148
- 8. Disability:** No disability benefits
- 9. Allowance for Combined Service Annuity:** None (2017)
- 10. Administrative Expenses:** Prior year administrative expenses expressed as a percentage of prior year projected payroll (1994)
- 11. Refund of Contributions:** Employees who withdraw are assumed to take the larger of their contributions accumulated with interest or the value of their deferred benefit (1978)

⁽¹⁾ Year in parentheses is the date of adoption.

Changes in Actuarial Assumptions

The following changes in funding actuarial assumptions have occurred since the July 1, 2018, actuarial valuations:

State Employees, State Patrol, Correctional Employees, and Legislators Retirement Funds

There have been no changes in assumptions since the previous valuation.

Judges Retirement Fund

The assumed benefit increase was changed from 1.75 percent per year through 2037, 2.00 percent per year from 2038 to 2051, and 2.50 percent per year thereafter, to 1.75 percent per year through 2039, 2.00 percent per year from 2040 to 2056, and 2.50 percent per year thereafter.

Changes in Plan Provisions

There have been no changes in plan provisions since the July 1, 2018, actuarial valuations. A description of the system and plans may be found in the *Notes to the Financial Statements* beginning on page 54. Additional plan provisions are summarized in the *Introductory Section* beginning on page 18.

Other Assumptions

June 30, 2019

Member Information

Retirement Fund	Active Member Percentage Married and Beneficiary Age		Age of Beneficiaries for:	
	Percent Married ⁽¹⁾		Males	Females
	Males	Females		
State Employees	80%	65%	3 years younger	2 years older
State Patrol	85	85	2 years younger	2 years older
Correctional Employees	75	75	2 years younger	2 years older
Judges	marital status as indicated in member data file		3 years younger	3 years older
Legislators	85	85	3 years younger	3 years older

⁽¹⁾ Actual marital status is used for members in payment status in the four largest plans. Legislators in payment status are assumed to be 100% married for purposes of a death benefit, except if reported with a joint and survivor benefit. 100% of Elective State Officers members are assumed to be eligible for the automatic survivor benefit.

Other Assumptions

June 30, 2019

Contribution Sufficiency / (Deficiency)

As of June 30, 2019
(Dollars in thousands)

Retirement Fund	Actuarial Valuation Date	Actual Contribution Rates				Recommended Rate	Sufficiency/ (Deficiency)
		Employee	Employer	State	Total		
State Employees	July 1, 2019	6.00%	6.25%	NA	12.25%	11.58%	0.67%
State Patrol ⁽¹⁾	July 1, 2019	14.90	26.10	1.17%	42.17	40.43	1.74
Correctional Employees	July 1, 2019	9.60	15.85	NA	25.45	26.02	(0.57)
Judges ^{(2) (3)}	July 1, 2019	8.00	22.50	11.82	42.32	42.97	(0.65)
Legislators	July 1, 2019	9.00	NA	NA	9.00	\$29,984,000	\$(29,898,000)

⁽¹⁾ Annual state contribution of \$1 million is statutorily required until the earlier of July 1, 2048, or until the Public Employee Retirement Association Police and Fire Retirement Fund and the MSRS State Patrol Retirement Fund both reach a 90 percent funded ratio on a market value of assets basis.

⁽²⁾ Annual state appropriation of \$6 million is statutorily required until the earlier of July 1, 2048, or until the Judges Retirement Fund is fully funded.

⁽³⁾ The statutory contribution rate for Judges in the Tier 1 benefit program is 9 percent of salary. The statutory contribution rate for Judges in the Tier 2 benefit program is 7 percent of salary. The employee and total rates on the schedule reflect the fact that member contributions for Tier 1 Judges at the maximum benefit are directed to the Unclassified Employees Retirement Fund. If these contributions were not directed to the Unclassified Employees Retirement Fund, the employee and total rates would be 8.20 percent and 42.52 percent, respectively, instead of 8.00 and 42.32 percent as shown above. The distinction between the Tier 1 and Tier 2 benefit programs is explained in the *Notes to the Financial Statements*.

Schedule of Changes in Unfunded Actuarial Accrued Liabilities (UAAL)

For the Fiscal Year Ended June 30, 2019
(Dollars in thousands)

	Defined Benefit Retirement Funds

GASB Statements No. 67 and No. 68 Actuarial Valuation Results

The following pages contain information specific to the actuarial valuations performed to determine the pension liability and pension expense reported in the *Notes to the Financial Statements* in this CAFR. In addition, each employer participating in a MSRS defined benefit retirement plan will be allocated their proportionate share of these liability and expense amounts. State and local government employers will be required to recognize their share of the pension expense and pension liability in their financial statements.

These valuations have no bearing on measurement of pension plan funding status, or in decisions regarding contribution requirements for any plan.

Re: 2019 Comprehensive Annual Financial Report (CAFR)

Dear Members of the Board:

We have previously prepared and presented to you our actuarial valuations for accounting and financial reporting purposes for the State Employees Retirement Fund (SERF), the State Patrol Retirement Fund (SPRF), the Correctional Employees Retirement Fund (CERF), the Judges Retirement Fund (JRF) and the Legislators Retirement Fund (LRF) as of June 30, 2019. These annual reports provide information that is intended to comply with the Governmental Accounting Standards Board (GASB) Statements No. 67 and No. 68. These calculations have been made on a basis that is consistent with our understanding of these accounting standards.

GASB Statement No. 67 is the accounting standard that applies to the financial reports issued by retirement systems. GASB Statement No. 68 establishes accounting and financial reporting requirements for state and local government employers who provide their employees (including former employees) pension benefits through a trust.

In this Comprehensive Annual Financial Report (CAFR), MSRS was responsible for preparing the Schedule of Employer Allocations and the Schedule of Pension Amounts by Employer. MSRS prepared the following exhibits in the Financial Section and the Actuarial Section based on information included in the annual actuarial valuation prepared by Gabriel, Roeder, Smith & Company (GRS):

- Schedule of Changes in the Employers' Net Pension Liability and Related Ratios
- Schedule of Employer Contributions (and Notes to Schedule)
- Summary of GASB Statements No. 67 and No. 68 Actuarial Valuation Results
- Summary of Deferred Outflows (Inflows) of Resources Arising from Current Reporting Period
- Summary of Pension Expense (Income)
- Summary of Actuarial Methods and Assumptions

Reading the CAFR is not a substitute for reading the actuarial reports. In order to gain a full understanding of the actuarial condition of the System, it is important to read and understand the full actuarial reports for each of the aforementioned funds. Annual actuarial valuation reports for funding purposes, as well as for accounting and financial reporting purposes, are available on the MSRS website.

Valuation Results

The results of the June 30, 2019 GASB Statements No. 67 and No. 68 valuations are summarized in the following table (Dollars in Thousands).

Plan	Total Pension Liability	Plan Fiduciary Net Position	Net Pension Liability	Ratio ⁽¹⁾	Pension Expense/ (Income)	Single Discount Rate
	(a)	(b)	(a) – (b)	(b) / (a)		
SERF	\$15,179,140	\$13,772,289	\$1,406,851	90.73%	\$295,915	7.50 %
SPRF	959,964	753,144	206,820	78.46	28,189	7.50
CERF	1,579,374	1,183,995	395,379	74.97	(2,734)	7.50
JRF	391,146	212,262	178,884	54.27	8,656	7.50
LRF ⁽²⁾	140,185	0	140,185	0.00	9,692	3.13

⁽¹⁾ Plan Fiduciary Net Position as a Percentage of Total Pension Liability.

⁽²⁾ The Legislators Retirement Fund is currently funded on a pay-as-you-go basis.

The following changes were recognized this year in the valuations for GASB Statements No. 67 and 68 purposes:

- The Single Discount Rate for the LRF was changed from 3.62% to 3.13%.
- The assumed post-retirement benefit increase rate was changed from 1.75% per year through 2037, 2.00% per year for 2038 through 2051, and 2.50% thereafter to 1.75% per year through 2039, 2.00% per year for 2040 through 2056, and 2.50% thereafter.

GRS performed a basic review of the basic financial and membership data provided to us as of June 30, 2019 by MSRS, and determined that the data appears reasonable in comparison to last year. We did not audit the data. We have relied upon the data as submitted in performing the actuarial valuation and in preparing trend data schedules. The actuarial cost method and the assumptions related to asset valuation, investment return, earnings progression and active member payroll growth are specified by State Statute. All other assumptions are based on actual experience, with changes adopted by the MSRS Board, and approved by the Legislative Commission on Pensions and Retirement (LCPR). The assumptions and methods meet the parameters established by Actuarial Standards of Practice.

To the best of our knowledge and belief, the methods and assumptions used in the actuarial valuations comply with Actuarial Standards of Practice (ASOPs), generally accepted accounting principles (GAAP) applicable in the United States, the requirements of Minnesota Statutes, Section 356.215, and the requirements of the Standards for Actuarial Work established by the LCPR. In our opinion, the results of the reports reflect the actuarial position of the plans on an ongoing basis under these assumptions, methods, and procedures.

Board of Directors
December 9, 2019

Brian B. Murphy and Bonita J. Wurst are Members of the American Academy of Actuaries (MAAA) and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained in this report. In addition, Mr. Murphy meets the requirements of "approved actuary" under Minnesota Statutes, Section 356.215, Subdivision 1, Paragraph (c). The signing actuaries are independent of the plan sponsor. We are not aware of any relationship that would impair the objectivity of our work.

Respectfully submitted,

Brian B. Murphy, FSA, EA, FCA, MAAA, PhD

Bonita J. Wurst, ASA, EA, FCA, MAAA

- Details regarding the Net Pension Liability may be found in *Required Supplementary Information* on pages 82-101 of the *Financial Section* of this report.
- Details regarding the Single Discount Rate may be found in the *Notes to the Financial Statements* beginning on page 79.
- Details for all other information in this schedule are on the pages that follow.

Summary of Deferred Outflows (Inflows) of Resources Arising from the Current Reporting Period

For the Fiscal Year Ended June 30, 2019
(Dollars in thousands)

Changes in the net pension liability from one fiscal year to the next are recognized as a pension expense, except in specific situations as outlined in GASB Statement No. 68, and presented here. In the situations noted in the schedule below, the change in net pension liability is considered a deferred outflow of resources or a deferred inflow of resources. The deferred outflows and inflows of resources are amortized on a straight-line basis over a specified period of time, and recognized as an expense (or income) partially in the current period and partially in future periods.

State Employees Retirement Fund

Deferred Outflows (Inflows) of Resources Due to Differences Between Expected and Actual Experience

Total Difference between Expected and Actual Experience	\$23,180
Recognition Period: Average of the expected remaining service lives of all employees	5 years
Deferred Outflows (Inflows) of Resources to be recognized in the current pension expense	\$4,636
Deferred Outflows (Inflows) of Resources to be recognized in the future pension expense	\$18,544

Deferred Outflows (Inflows) of Resources Due to Changes in Actuarial Assumptions

Total Assumption Change (Gains) or Losses	\$0
Recognition Period: Average of the expected remaining service lives of all employees	5 years
Deferred Outflows (Inflows) of Resources to be recognized in the current pension expense	\$0
Deferred Outflows (Inflows) of Resources to be recognized in the future pension expense	\$0

Deferred Outflows (Inflows) of Resources Due to Differences Between Expected and Actual Earnings on Pension Plan Investments

Total Difference between between projected and actual earnings on pension plan investments	\$31,034
Recognition Period	5 years
Deferred Outflows (Inflows) of Resources to be recognized in the current pension expense	\$6,207
Deferred Outflows (Inflows) of Resources to be recognized in the future pension expense	\$24,827

State Patrol Retirement Fund	Correctional Employees Retirement Fund	Judges Retirement Fund	Legislators Retirement Fund

Summary of Actuarial Methods and Assumptions

For the Year Ended June 30, 2019

Actuarial Methods

1. Actuarial Cost Method: Entry age normal

2. Asset Valuation Method: Fair value of assets

3. Valuation of Future Post-Retirement Benefit Increases (Judges Plan only):

Benefit recipients receive a future annual 1.75 percent post-retirement benefit increase. If the funded ratio (determined on a market value of assets basis) reaches 70 percent (based on a 2.0 percent post-retirement benefit increase assumption) for two consecutive years, the benefit increase will increase to 2.0 percent; if the funded ratio reaches 90 percent (based on a 2.5 percent post-retirement benefit increase assumption) for two consecutive years, the benefit increase will revert to 2.5 percent.

Projections⁽¹⁾ indicate that this plan is expected to pay 1.75 percent annually through 2039, attain the funded ratio threshold required to pay a 2.0 percent post-retirement benefit increase in the years 2040 through 2056, and a 2.5 percent increase thereafter.

⁽¹⁾ To determine assumptions regarding a future change in the post-retirement benefit increase, liabilities and assets were projected based on the following methods and assumptions:

- Future investment returns of 7.5 percent
- Liabilities and normal cost based on statutory funding assumptions (discount rate of 7.50 percent and statutory salary increases of 2.50 percent)
- Open group, stable active population (new members, if applicable, based on average new members hired in recent years)
- Post-retirement benefit increases are assumed at the current rate until each successive funded ratio threshold required for a change is reached.
- Contributions are at the current statutory rate

Actuarial Assumptions

Most assumptions used for GASB-compliant financial reporting purposes are the same as those used for the purposes of measuring funding progress and determining the required contribution rate, as noted on pages 136-149 of this section. Only the assumptions that differ are listed below, and the funds to which they pertain are noted parenthetically.

1. Single Discount Rate as of the June 30, 2019 Measurement Date:	7.50 percent (State Employees, State Patrol, Correctional Employees, Judges)
	3.13 percent (Legislators)

MSRS

In 2019, the Minnesota State Retirement System celebrates 90 years of serving all members of MSRS plans.

2019

State of Minnesota in 2019

- Tim Walz is serving as the 41st Governor of Minnesota.
- Allianz Field, the new home of the professional soccer team Minnesota United FC, opened.
- The Polar Vortex resulted in frigid air temperatures, including -56 degrees Fahrenheit in Cotton, and -28 degrees Fahrenheit in the Twin Cities. Wind chills amplified the temperatures, with over 12 hours of -50 degree Fahrenheit wind chill in the Twin Cities.

United States in 2019

- Microsoft became the 3rd US firm to surpass a market value of \$1 trillion dollars, after Apple and Amazon.
- New York City officially named a street "Sesame Street" at the intersection of West 63rd Street and Broadway in honor of the show's 50th anniversary.
- For the first time in 94 years, the Scripps National Spelling Bee competition officials crowned 8 co-champions. After twenty consecutive rounds of perfect spelling, Scripps announced they would soon run out of challenging words.

Introduction

GASB Statement No. 44, *Economic Condition Reporting: The Statistical Section*, issued in May 2004, established the requirements for the information presented in this section of the comprehensive annual financial report. The information that follows is intended to provide financial statement users with additional historical perspectives, context, and details. The information contained in this section supplements the financial information provided in the preceding sections and displays trends where they exist, to help readers gain a better understanding of the overall financial condition of MSRS.

The *Schedule of Changes in Fiduciary Net Position* shows a 10-year history of the asset growth of the

various funds. This data allows readers to review trends in revenue sources and expense categories for all MSRS defined benefit and defined contribution funds.

The *Schedule of Benefits and Refunds by Type* displays in detail the growth of benefits disbursed, whereas the *Schedule of Revenues by Source* provides a 10-year history of the resources received along with the corresponding member payroll contributions and rate information. The *Schedule of Expenses by Type* summarizes the application of those resources over the past ten years.

The remaining schedules provide demographic information about the memberships and information

Schedule of Changes in Fiduciary Net Position

Total Deductions	\$489,296	\$526,168	\$570,221	\$607,294
Change in Fiduciary Net Position	\$795,413	\$1,503,706	\$(98,140)	\$935,402

about the employers that participate in the funds. The *Membership Summary* reports member counts, average age, and service credit over a 10-year period. The *Schedule of New Retirees and Average Benefit Payments* reflects the number of new retirees and their average monthly benefits, also over a 10-year period. The *Schedule of Retired Members by Type of Benefit* reports the June 30, 2019, retirees, monthly benefit amount, and various benefit options selected.

The schedules in this section can be used together to gain a broader historical picture of the activities at MSRS. For instance, when service credit increases on the *Membership Summary*, the average benefit shown

on the *Schedule of New Retirees and Average Benefit Payments* will similarly increase for members with comparable years of service. Consequently, higher average benefits will be reflected in larger annuity benefit payment amounts reported in the *Schedule of Changes in Fiduciary Net Position* and *Schedule of Expenses by Type*.

All the information contained in the schedules of this section was extracted from the database records of MSRS and summarized in the formats shown. There were no estimates or assumptions used in compiling this data.

⁽¹⁾ Actual employer contributions may exceed the statutorily required percentage due to employer-paid interest, penalties, and leaves of absence.

⁽²⁾ Percentage excludes statutorily required annual supplemental state contribution of \$1 million.

⁽³⁾ Other income for the Legislators Retirement Fund and the Elective State Officers Retirement Fund include appropriations from the State's General Fund.

⁽⁴⁾ Percentage excludes statutorily required general fund appropriation of \$3 million in 2017, and \$6 million annually in future years.

	Average Monthly Benefit	\$607	\$1,391	\$1,814	\$2,676	\$2,317	\$3,401	\$4,547	\$2,100
	Number of New Retirees	7	22	37	13	8	6	8	101
	Average Final Average Salary	\$7,513	\$4,974	\$4,708	\$5,004	\$3,527	\$5,549	\$4,571	\$4,944

The number of new retirees added in the *Schedule of Retirees and Beneficiaries* in the *Actuarial Section* is greater than the number of new retirees here because it includes benefit restarts and qualified domestic relations order starts.

The Average Final Average Salary is equivalent to the average of the five highest consecutive years of salary, based on service during which member contributions were made.
