Options for General Education Formula Changes to Limit Revenue Disparities

Statutory Directive: Minnesota Statutes, section 127A.51, reads as follows:

127A.51 Statewide Average Revenue.

By December 1 of each year the commissioner must estimate the statewide average adjusted general revenue per adjusted pupil unit and the disparity in adjusted general revenue among pupils and districts by computing the ratio of the 95th percentile to the fifth percentile of adjusted general revenue. The commissioner must provide that information to all districts.

If the disparity in adjusted general revenue as measured by the ratio of the 95th percentile to the fifth percentile increases in any year, the commissioner shall recommend to the legislature options for change in the general education formula that will limit the disparity in adjusted general revenue to no more than the disparity for the previous school year. The commissioner must submit the recommended options to the education committees of the legislature by February 1.

For purposes of this section and section 126C.10, adjusted general revenue means the sum of basic revenue under section 126C.10, subdivision 2; referendum revenue under section 126C.17; local optional revenue under section 126C.10, subdivision 2e; and equity revenue under section 126C.10, subdivisions 24a and 24b.

Introduction

The December 2019 calculations under Minnesota Statutes, section 127A.51, given in the table below, show an increase in the projected ratio of the 95th percentile to the fifth percentile of adjusted general revenue from 1.2292 in Fiscal Year (FY) 2020 to 1.2391 in FY 2021 (*two shaded cells found in the 95th-5th Ratios row/FY 2020 and FY 2021 columns*). The projected increase in the disparity ratio for FY 2021 triggers the statutory requirement for the commissioner to "recommend to the legislature options for change in the general education formula that will limit the disparity in adjusted general revenue to no more than the disparity for the previous school year." FY 2021 data was used to model the options presented in this report; however, since the levies for FY 2021 have already been calculated, the options presented would take effect beginning in FY 2022.

Analysis

Minnesota Department of EducationGeneral Education Revenue Disparity Report (Minn. Stat. § 127A.51)School Finance Division11/21/2019

- Estimated General Revenue per Weighted ADM (average daily membership).
- Definition of "General Revenue" varies over time.
- Current definition includes Basic Revenue, Referendum Revenue, Local Optional Revenue and Equity Revenue.
- Because of changes in pupil weights, revenues for FY 2015 and later are not comparable to revenues for earlier years.

	FY 2015	FY 2016	FY 2017	FY 2018	FY 2019	FY 2020	FY 2021

Options to Limit Revenue Disparities

Three options to limit revenue disparities are offered for consideration. The first option would increase total equity revenue, which is targeted to low revenue districts, and simplify equity revenue calculations. The other two options simplify equity revenue calculations, and would limit revenue disparities by rolling a portion of referendum revenue either into basic general education revenue or into local optional revenue (LOR). A detailed description of each option is outlined below. Runs showing the district-by-district impact of each option based on FY 2021 data are included in the <u>Appendix</u>. Draft bill language is available upon request.

Current Equity Revenue Formula

The current equity revenue formula has five components:

- 1. A flat allowance of \$14 per pupil unit for districts whose referendum revenue per pupil unit falls below the regional (Twin Cities metro or nonmetro) 95th percentile.
- 2. A variable amount, ranging up to \$80 per pupil unit on a sliding scale, depending on the ratio of (1) the gap between the sum of the district's basic revenue, transition revenue, first tier local optional revenue, referendum revenue per pupil unit, and the sum of these revenues per pupil unit for the district at the 95th percentile of school districts in its equity region to (2) the gap between the sum of these revenues per pupil unit for districts at the 95th and fifth percentiles in the equity region.
- 3. An additional amount for districts with low referendum plus first tier LOR revenue per pupil unit (below 10 percent of the state average referendum plus first tier LOR revenue per pupil unit—estimated at \$114 for FY 2021), equal to the amount by which the district's referendum plus first tier LOR allowance falls below 10 percent of the state average, but not to exceed \$100,000 per district.
- 4. An additional amount equal to 25 percent of the sum of the first three components for all districts.
- 5. An additional \$50 per pupil unit for all districts.

Minneapolis, Saint Paul and Duluth are ineligible for the first four components of equity revenue, but are eligible for the fifth component.

Recent Law Changes to the Equity Revenue Formula

The 2019 Legislature enacted changes to the referendum and LOR revenue to simplify calculations and improve the transparency of those funding formulas. The changes also have implications for the equity revenue formulas and the general education revenue disparity gap.

Among the changes that were made, the maximum LOR allowance for all districts was increased from \$424 to \$724. The LOR allowance increase was offset by permanently subtracting \$300 from the referendum allowance. The \$300 in referendum allowance is the amount that could be authorized by school board approval rather thanvoter approval. This new tier 1 of LOR was added to the equity revenue formula, making the impact to the equity formula revenue neutral. The provision making school districts with no referendum revenue ineligible for the sliding scale component of equity revenue (item number 2 above) was repealed. Since tier 1 of LOR is included in the sliding scale portion of the equity formula and all school districts are entitled to LOR, this provision no longer applies with this law change.

Analysis of Current Equity Revenue Formula

With the recent law changes, the low referendum provision (item number 3 above) no longer has even a minimal impact on districts. All districts that previously had no voter-approved or board-approved referendum levies are now entitled to \$300 per pupil unit in first tier LOR revenue. Even with no referendum allowance, a district's revenue per pupil unit will exceed 10 percent of the state average, based on their first tier LOR alone.

The exclusion of Minneapolis, Saint Paul and Duluth from receiving the first four components of equity revenue reduces the equity revenue available to Saint Paul and Duluth. With the passage of a recent referendum, Minneapolis is above the 95th percentile for the Twin Cities metro region. The exclusion of these districts does not contribute to the gap between the 95th and fifth percentiles of adjusted general revenue, because none of the three districts has referendum revenue allowances falling below the fifth percentile.

Use of the regional 95th and fifth percentiles of basic, referendum, first tier LOR, and transition revenue per pupil unit in the equity formula creates a potential disparity between Twin Cities metro and nonmetro districts in access to equity revenue. This also makes it difficult for the state and school districts to budget for equity revenue, since the regional 95th and fifth percentiles are a moving target until data for the fiscal year are finalized after year-end.

Simplifying the Equity Revenue Formula

Based on November 2019 forecast data, the 95th percentiles are estimated to be \$8,647 for the nonmetro region and \$8,704 for the Twin Cities metro region, while the fifth percentiles are estimated to be \$6,867 for the nonmetro region and \$6,878 for the metro region. Equity revenue calculations could be simplified and potential future disparities between Twin Cities metro and nonmetro districts eliminated by eliminating the use of the regional 95th and fifth percentiles, and calculating the divisor for the equity gap calculation for all districts using 100 percent of the standard referendum allowance limit (\$1,779.50 for FY 2021). This simplification and disparity reduction could be accomplished since \$8,647 and \$8,704 are very close, approximately 490 percent of the standard referendum allowance limit (under Minn. Stat. § 126C.17, subd. 2 (a) (1)). There would be essentially no losers and the average district would receive an increase of \$2 per pupil unit. By leveling up the nonmetro sliding scale equity gap calculation to what would correspond to the metro region, a good portion of the disparity gap would be closed. Total state aid for school districts would increase by \$242,000 and levy would increase by \$1,429,000 statewide. In addition, eliminating the calculation of added revenue for districts with referendum allowances below 10 percent of the state average would simplify calculations and have no impact on revenues. These changes are incorporated as the starting point for the options for limiting general revenue disparity outlined below.

Options for Limiting General Revenue Disparity

Three options for limiting general revenue disparities for FY 2021 to the level computed for FY 2020 are:

Option 1 – Equity Sliding Scale Revenue

Increase the multiplier for the sliding scale portion of the equity revenue formula from \$80 to \$83. This option would proportionately increase the sliding scale portion of equity revenue for all districts eligible to receive the sliding scale revenue. Districts with basic revenue, transition revenue, first tier local optional revenue, and referendum revenue per pupil unit at or above 489.2 percent of the standard referendum allowance limit (currently \$8,704) would receive no increase. Districts with the lowest revenue per pupil unit would receive the highest amount per pupil unit, reducing the disparity to the FY 2020 level. This option would increase state total equity aid entitlements by \$799,000 and the equity levy by \$2.9 million, for a total increase of \$3.7 million in equity revenue.

Option 2 – Referendum Roll-in to Local Optional Revenue (LOR)

Increase the local optional revenue (LOR) allowance from \$724 to \$774 by rolling \$50 per pupil of referendum revenue into the first tier of LOR. This option would provide additional revenue for districts with less than \$50 per pupil of referendum revenue, and reduce revenue disparity. The additional LOR revenue would be equalized at the current tier 1 equalizing factor of \$880,000, based on referendum market value, thus improving equalization for all districts. The referendum equalization tier and revenue caps would be adjusted to reflect the lower referendum allowances.

Although charter schools are not eligible for LOR revenue, they receive referendum and tier 1 LOR aid. The improved equalization would increase this aid to charter schools an average \$14 per pupil.

Under this option, school districts with more than \$50 per pupil of referendum revenue would receive no increase. All districts with less than \$50 per pupil of referendum revenue would receive additional revenue. Districts with the lowest revenue per pupil unit would receive the highest amount per pupil unit, reducing the disparity to the FY 2020 level. This option would increase state total net referendum, LOR and equity aid entitlements by \$13.3 million, and reduce the total net referendum, LOR and equity levy by -\$2.6 million, for a total increase of \$10.7 million in net revenue.

Option 3 – Roll-in to Basic Formula Allowance

Increase the basic formula allowance from \$6,567 to \$6,617 by rolling \$50 per pupil of referendum revenue into the basic formula allowance. Like Option 2, this option would provide additional revenue for districts with less than \$50 per pupil of referendum revenue, and reduce revenue disparity.

Other formulas linked to the general education formula (e.g., compensatory, transportation sparsity, sparsity, shared time, postsecondary enrollment options, nonpublic pupil, nonpublic transportation, private alternative and early childhood family education), would be adjusted to neutralize the impact of the formula allowance change on those formulas.

The first tier of referendum revenue equalization would be eliminated, and referendum equalization tiers and revenue caps would be adjusted to reflect the lower referendum allowances.

The net reduction in the referendum, LOR and equity levies would be neutralized, and a portion of the new revenue would be funded by re-establishing the student achievement levy as 0.00502 percent of each district's referendum market value (RMV); this would raise \$28.4 million, which is similar in scale to the student

achievement levy before it was phased out after FY 2018. The rate was set to provide an equivalent amount of property tax relief statewide, as is provided in Option 2.

The increase in general education revenue for charter schools from the \$50 roll-in of referendum revenue into the basic formula would be a revenue increase for all charter schools, which would be partially offset by the loss of the corresponding referendum aid for some charter schools. This increase could be partially neutralized by adjusting the charter school lease aid formula to require a slightly higher contribution from general education revenue to cover lease costs. Charter school lease aid currently covers 90 percent of lease costs up to \$1,314 per pupil unit.

Under this option, school districts with more than \$50 per pupil of referendum revenue would receive no increase. All districts with less than \$50 per pupil of referendum revenue would receive additional revenue. Districts with the lowest revenue per pupil unit would receive the highest amount per pupil unit, reducing the disparity to the FY 2020 level. This option would increase state total general education aid entitlements by \$15.9 million and reduce the total net referendum, LOR and equity levy by -\$2.6 million, for a total increase of \$13.2 million in net revenue.
