### Lessard-Sams Outdoor Heritage Council Laws of Minnesota 2013 <u>Final Report</u>

Date: December 16, 2019

Program or Project Title: RIM-WRP Partnership: Phase V

Funds Recommended: \$13,390,000

Manager's Name: Sharon Doucette Organization: Board of Water and Soil Resources Address: 520 Lafayette Road North City: St. Paul, MN 55155 Office Number: 651-539-2567 Email: sharon.doucette@state.mn.us Website: www.bwsr.state.mn.us

#### Legislative Citation: ML 2013, Ch. 137, Art. 1, Sec. 2, Subd. 4(a)

**Appropriation Language:** \$13,390,000 in the first year is to the Board of Soil and Water Resources to acquire permanent conservation easements and restore wetlands and associated upland habitat in cooperation with the United States Department of Agriculture Wetlands Reserve Program and Ducks Unlimited, including \$1,000,000 for an agreement with Ducks Unlimited to provide technical and bioengineering assistance. Up to \$120,000 is for establishing a monitoring and enforcement fund, as approved in the accomplishment plan and subject to Minnesota Statutes, section 97A.056, subdivision 17. A list of permanent conservation easements must be provided as part of the final report.

**County Locations:** Becker, Blue Earth, Clay, Freeborn, Le Sueur, Lincoln, Lyon, Meeker, Murray, Nobles, Redwood, Stevens, Todd, West Ottertail, and Wilkin.

#### Eco regions in which work was completed:

- Forest / Prairie Transition
- Prairie
- Metro / Urban

#### Activity types:

- Protect in Easement
- Restore

#### Priority resources addressed by activity:

- Wetlands
- Prairie
- Habitat

### **Summary of Accomplishments:**

The Reinvest in Minnesota (RIM) Wetlands Partnership Phase V protected and restored 2,041 acres of previously drained wetlands and adjacent native grasslands on 23 conservation easements. All easements have been recorded. \$35,000 of funds from other sources were also used.

#### **Process & Methods:**

The RIM Wetlands Partnership Phase V accelerated the restoration and protection of 2,041 acres of previously drained wetlands and associated upland native grassland wildlife habitat complexes via permanent conservation easements. The goal of the RIM Wetlands Partnership was to achieve the greatest wetland functions and values, while optimizing wildlife habitat on every acre enrolled in the partnership.

Twenty-three permanent conservation easements were recorded, protecting 2,041 acres in permanent RIM easements. These protected wetland and grassland complexes will provide critical habitat for migratory waterfowl and other wetland dependent wildlife species in Minnesota.

The RIM Wetlands Partnership utilized a local-state-federal partnership, delivered by Soil and Water Conservation Districts and the Board of Water and Soil Resources (BWSR). In addition, the project included collaboration with Ducks Unlimited, the Minnesota Waterfowl Association, Pheasants Forever, the Minnesota Department of Natural Resources and the United States Department of Interior - Fish and Wildlife Services.

Ducks Unlimited (DU) was a full partner in the RIM Wetlands Partnership. DU promoted RIM easements, and provided engineering services, technical assistance and project management services through DU specialists.

RIM Wetlands Partnership statewide sign-up was completed in early 2015. Applications were scored and ranked using the RIM Wetland Restoration Evaluation Worksheet. The worksheet determined which restoration projects provided the greatest wetland functions and values and optimized wildlife habitat. The highest scoring applications were funded.

#### Explain Partners, Supporters, & Opposition:

The project utilized a local-state-federal partnership, delivered by Soil and Water Conservation Districts and the Board of Water and Soil Resources. In addition, the partnership included collaboration with Ducks Unlimited (DU), the Minnesota Waterfowl Association, Pheasants Forever, the Minnesota Department of Natural Resources and the United States Department of Interior - Fish and Wildlife Services. DU promoted RIM easements, and provided engineering services, technical assistance and project management services.

#### **Additional Comments:**

#### Exceptional challenges, expectations, failures, opportunities, or unique aspects of program

All easements have been recorded and payment made. Weather has made final restoration of the 23 easements challenging. Less than half of the projects still need some portion of restoration or final seeding work completed.

#### **Other Funds Received:**

- Environmental and Natural Resource Trust Fund
- Clean Water Fund

#### How were the funds used to advanced the program:

BWSR received FY10-11 and FY12-13 funding of \$18.5 million through the Clean Water Fund to establish and restore permanent RIM riparian buffer and wellhead easements to keep water on the land; decrease sediment, pollutant and nutrient transport; reduce hydrological impacts to surface waters; and increase infiltration for groundwater recharge. BWSR also received funding in FY10-11 and FY12-13 totaling \$5 million for RIM easements for protection of high or very high vulnerability drinking water supply management areas.

# What is the plan to sustain and/or maintain this work after the Outdoor Heritage Funds are expended:

BWSR is responsible for monitoring and enforcement of RIM easements in perpetuity. BWSR partners with SWCDs to complete inspections of RIM easements. Easements are inspected annually for the first 5 years after easement recording. After the first 5 years, on-site inspections are completed every 3 years and compliance checks are completed the other 2 years. SWCDs report on each site inspection conducted, as well as results, to BWSR. A noncompliance procedure is implemented when potential violations are identified. The easement stewardship funding is intended for costs incurred for this monitoring and enforcement.

#### **Outcomes:**

#### The original accomplishment plan stated the program would

#### Programs in forest-prairie transition region:

- Increased availability and improved condition of riparian forests and other habitat corridors
- Protected, restored, and enhanced nesting and migratory habitat for waterfowl, upland birds, and species of greatest conservation need
- Wetland and upland complexes will consist of native prairies, restored prairies, quality grasslands, and restored shallow lakes and wetlands

• Water is kept on the land

#### How will the outcomes be measured and evaluated?

An increase of wetland and associated native grassland habitat acres occurred (2041 acres of land protected in easement) and this will increase the carrying capacity of wetland-dependent and grassland-dependent wildlife within that region. This would have a positive impact on both game and non-game species. We expect more abundant populations of endangered, threatened, special concern and game species as these complexes are restored. Restored wetlands keep water on the land and improve water quality in downstream receiving waters.

#### Programs in metropolitan urbanizing region:

• Protected, restored, and enhanced habitat for waterfowl, upland birds, and other species.

#### How will the outcomes be measured and evaluated?

An increase of wetland and associated native grassland habitat acres occurred (2041 acres of land protected in easement) and this will increase the carrying capacity of wetland-dependent and grassland-dependent wildlife within that region. This would have a positive impact on both game and non-game species. We expect more abundant populations of endangered, threatened, special concern and game species as these complexes are restored. Restored wetlands keep water on the land and improve water quality in downstream receiving waters.

#### Programs in prairie region:

- Expiring CRP lands are permanently protected
- Increased participation of private landowners in habitat projects
- Protected, restored, and enhanced habitat for waterfowl, upland birds, and species of greatest conservation need
- Protected, restored, and enhanced shallow lakes and wetlands
- Remnant native prairies and wetlands are permanently protected and are part of large complexes of restored prairie, grasslands, and large and small wetlands
- Water is kept on the land

#### How will the outcomes be measured and evaluated?

An increase of wetland and associated native grassland habitat acres occurred (2041 acres of land protected in easement) and this will increase the carrying capacity of wetland-dependent and grassland-dependent wildlife within that region. This would have a positive impact on both game and non-game species. We expect more abundant populations of endangered, threatened, special concern and game species as these complexes are restored. Restored wetlands keep water on the land and improve water quality in downstream receiving waters.

### **Budget Spreadsheet**

Final Budget line item reallocations are allowed up to 10% and do not need require an amendment to the Accomplishment Plan

#### Total Amount: \$13,390,000

#### Explain the success/shortage of acre goals:

The original accomplishment plan (numbers shown above), were proposed when this project was a RIM WRP Partnership. These numbers were revised in the 11/18/14 amendment request as a result of the WRP program no longer being available. The acre goal is at 82% of the amended goal - with 99% of the funding expended.
