## Agnes Boulevard Reconstruction Project

Alexandria, MN

October 2020

## Agnes Blvd: Alexandria, MN

*Photo by Widseth*

Winding along beautiful Lake Agnes, the newly constructed multi-use trail and improved Agnes Boulevard connects neighborhoods on Alexandria's north side to the heart of the City. The half-mile-long trail provides several neighborhoods with safe and easy access to downtown and the Central Lakes State Trail.

*Photo by Widseth*

Residents and visitors can now enjoy the natural beauty of Lake Agnes while safely walking, biking, or running alongside the lake. Lighted bollards line the trail providing safety and charm. Landscaped with native grasses within the infiltration basins, this is truly a beautiful addition to the Alexandria Lakes Area.

# PREFACE

Fifty percent of the total apportionment will be distributed on prorated share of each city's population

Fifty percent of the total apportionment will be based on a prorated share of each city's Construction Needs (also called Money Needs)

The **2020 Municipal State Aid Street Needs Report** is presented to the Municipal Screening Board for use in making their annual construction (money) needs recommendation to the Commissioner of Transportation.

This submittal is required by MN Statute 162.13 and is to be made to the Commissioner on or before November 1st of each year.

The construction (money) needs data contained in this book were compiled after Needs updates and traffic updates were submitted for each municipality. Construction Needs are calculated by applying the unit prices (as determined by the Municipal Screening Board at their spring meeting in May 2020) to the quantities in the appropriate urban ADT group. These ADT groups and explanations for Needs Calculations are in the resolutions of the Municipal Screening Board.

Population data will be combined with the Commissioner's final construction Needs, then the results will be used to determine the *total* allocations which will be reported in the "**2021 Municipal State Aid Apportionment Data**" book to be published in January.

Ongoing Processes

# The State Aid Program Mission Study

---

## Mission Statement:

**The purpose of the state-aid program is to provide resources, from the Highway Users Tax Distribution Fund, to assist local governments with the construction and maintenance of community-interest highways and streets on the state-aid system.**

## Program Goals:

The goals of the state-aid program are to provide users of secondary highways and streets with:

- Safe highways and streets;
- Adequate mobility and structural capacity on highways and streets; and
- An integrated transportation network.

## Key Program Concepts:

*Highways and streets of community interest* are those highways and streets that function as an integrated network and provide more than only local access. Secondary highways and streets are those routes of community interest that are not on the Trunk Highway system.

A community interest highway or street may be selected for the state-aid system if it:

A. Is projected to carry a relatively heavier traffic volume or is functionally classified as collector or arterial

B. Connects towns, communities, shipping points, and markets within a county or in adjacent counties; provides access to rural churches, schools, community meeting halls, industrial areas, state institutions, and recreational areas; serves as a principal rural mail route and school bus route; or connects the points of major traffic interest, parks, parkways, or recreational areas within an urban municipality.

C. Provides an integrated and coordinated highway and street system affording, within practical limits, a state-aid highway network consistent with projected traffic demands.

The function of a road may change over time requiring periodic revisions to the state-aid highway and street network.

*State-aid funds* are the funds collected by the state according to the constitution and law, distributed from the Highway Users Tax Distribution Fund, apportioned among the counties and cities, and used by the counties and cities for aid in the construction, improvement and maintenance of county state-aid highways and municipal state-aid streets.

The *Needs* component of the distribution formula estimates the relative cost to build county highways or build and maintain city streets designated as state-aid routes.

**MINUTES**  
**MUNICIPAL SCREENING BOARD MEETING**  
**May 19<sup>th</sup> 2020 at 1pm to 2:30pm (WEBEX Meeting)**

**I. Call to Order, introductions and welcome by Chairman Femrite at 1:00pm**

- i. *Kristine Elwood*, MnDOT –State Aid Engineer
- ii. *Bill Lanoux*, MnDOT - Manager, Municipal State Aid Needs Unit
- iii. *Michael Thompson*, Vice President of the MSB
- iv. *DSAE's and others in attendance*

***Roll Call of Screening Board Members:***

- v. District 1                      Caleb Peterson, Cloquet
- vi. District 2                     Rich Clauson, Crookston
- vii. District 3                    Adam Nafstad, Albertville
- viii. District 4                  Brian Yavarow, Fergus Falls
- ix. Metro West                  Chad Millner, Edina
- x. District 6                      Kyle Skov, Owatonna
- xi. District 7                     Jeff Domras, St. Peter
- xii. District 8                    Owen Todd, Redwood Falls
- xiii. Metro East                 Brian Erickson, Rosemount
- xiv. Duluth                        Cindy Voigt
- xv. Minneapolis                Jenifer Hager
- xvi. Rochester                  Dillon Dombrovski
- xvii. St. Paul                      Paul Kurtz

**II. Review of the 2020 Municipal Screening Board Data book**

a. Introductory information

- i. Oct. Screening Board minutes Pages 6-12  
**Motion to approve minutes by Nafstad, Second by Erickson, Motion Carried 13-0**
- ii. UCFS meeting minutes from Jan. 2020 Pages 13-14 (the committee made their recommendation on the Trunk Hwy Turnback resolution to be presented later in the meeting)
- iii. Traffic Counts Page 15  
Discussion surrounded the current counting situation in the time of reduced travel related to COVID-19. Item is to be discussed in more depth at the fall and spring board meetings when more data is available. State Aid will bring 2020 *draft counts* in the Fall, if available. Any 2020 counts wouldn't be final until 2021. State Aid has recommended that local and state staff continue to count so we have data to analyze. We may have to make a determination in 2021 if counts from 2020 are equitable for cities being counted this year. Data should be reviewed before further discussing impacts and whether or not 2020 AADT counts should (or should not) be used in the Needs calculations. An additional question was asked about historic counts from 2005 to 2012, and were there any drastic changes

that were ever adjusted at that time. State Aid would look into it for the next screening board meeting.

- b. Lanoux discussed Unit Price Recommendations
  - i. Minutes of NSS meeting Pages 24-25
  - ii. Unit Price Recommendations of NSS Page 23
  - iii. Unit Prices Data and Graphs Pages 27-43

### **III. Take action on Unit Costs**

- a. Unit Price recommendations of the Needs Study Subcommittee are on Page 23 of the book.  
**Motion to approve by Todd, Second by Dombrovski, Motion Carried 13-0**

### **IV. UCFS Recommendation on Page 14**

UCFS Chair Culver explained the topic and recommendation

- a. At October meeting the MSB approved a motion for UCFS to make recommendation on the Trunk Hwy TB resolution. UCFS recommendation is to revoke the Trunk Hwy TB resolution. In doing so, Trunk Hwy Turnbacks will be treated as any other MSAS roadway.  
**Motion to revoke the Trunk Hwy TB Resolution by Nafstad, Second by Todd, Motion Carried 13-0**

### **V. UCFS Committee (vacant Chair position for 2021)**

- a. Glenn Olson is due to be chair 2021 (he has retired)
- b. Screening board asked to take action and have Marc Culver serve 2<sup>nd</sup> year as Chair of UCFS  
**Motion to approve by Millner, Second by Nafstad, Motion carried 13-0**

### **VI. Needs Presentation / Steve Bot (former Chair of MSB)**

Steve Bot gave some historical background on the needs change phase in period that was adopted in 2014. The phase in is set to expire per the current resolution after 7-years. Mr. Bot requested the screening board consider to have the UCFS review the topic and make a recommendation to the Screening Board at the fall meeting on its fate.

Kurtz asked what would happen if the Screening Board took no action. Lanoux said with no further action, State Aid would be done applying the restriction after this year as current resolutions state that the phase in period is seven years, beginning with the Jan. 2015 allocation and ending with the Jan. 2021 allocation.

Lee Gustafson, member of the needs study task force when the phase in was developed, also provided some historical context to the merits and intension of the phase in. Gustafson noted that if the phase in period was revised, that discontinuing the phase-in for some cities on the upper restriction could be a consideration.

After some discussion there was a **motion to have the UCFS study the topic and return to the fall screening board with a recommendation on the Phase in Period for consideration.**  
**Motion made by Nafstad, Second by Voigt, Motion carried 13-0**

**VII. Other Discussion items**

- a. Legislative Update- given by Anne Finn of the League of Minnesota Cities
- b. State Aid Report – Chris Kufner or Kristine Elwood
  - i. HUDTF forecast (early forecasts suggest a possible 15% reduction in the HUDTF)
  - ii. Other State Aid items

**VIII. Thank**

- a. All DSAE's and state aid staff
- b. Marc Culver, UCFS
- c. Steve Bot and Lee Gustafson
- d. Sean Christensen, NSS
- e. Screening Board Members
- f. Dave Sonnenberg for all his work over the years as our Legislative representative.

**IX. Entertain a motion to adjourn**

**Motion by Voigt, second by Nafstad, Motion Carried 13-0**

Minutes submitted by MSB Chair, Justin Femrite

# POPULATION DATA

## Becoming an MSAS Eligible City

If the population total from the decennial census is at least 5,000, or a population estimate (from either the Metropolitan Council or State Demographer) estimates that a city's population is at least 5,000.

## Being Dropped as an MSAS City

For a city to be *dropped* from the MSAS eligible list, the following scenario must occur:

- 1) The decennial census must show that a city's population has dropped below 5,000.
- 2) For five years after the census, annual population estimates must show that a city's population has stayed below 5,000.

## Notes on Population

According to the most recent population estimates, Chisholm (4,925) is below 5,000. The city remains eligible to be included in the MSAS distribution. **(State Statute 162.09 subd. 4)**

In addition to State Statute, Screening Board Resolutions also state that "*no city shall be dropped from the MSAS eligible list based on a population estimate*".

There are 148 MSAS cities. Their overall population has increased by 9.7% since 2010 (from 3,690,202 in 2010, to 4,049,896 in 2019)

In the last five years, these eight cities have seen their total population increase by more than 15% (since 2015): Isanti (15.2%), Waconia (15.2%), Medina (16.4%), Minnetrista (19.9%), Otsego (21.1%), Victoria (25.1%), Dayton (26.1%), and Lake Elmo (29.2%).

Eleven more cities have seen their populations increase by at least 10% since 2015.

Twelve cities have seen a decrease in population since 2015.

The State Demographer's estimated population for the City of North Oaks is 5,320. All residential roads in North Oaks are private roads, so the city is unable to establish a State Aid System. North Oaks is not a MSAS city at this time.

These cities were once MSAS cities: Ely (3,395), Eveleth (3,590), Luverne (4,796), and Pipestone (4,162).

# 2020 POPULATION SUMMARY

The populations used for 2021 Allocations are based on the 2010 Federal Census  
or the most recent State Demographer / Met Council estimates, **whichever are greater**

Municipality	2010 Census	Population used for the last Allocation	2019 Population Estimates (Released July 2020)	Population to be used for 2021 Allocation	% Change in Population used for 2020 & 2021 Allocation	% Change in Population from 2010 to 2019
Albert Lea	18,016	18,165	18,132	18,132	-0.2%	0.6%

# Percentage Change in Population for State Aid Cities, 2015 - 2020

## Legend

- State Growth: 4.2%
- State Aid Cities only: 5.5%

<span style="display: inline-block; width: 15px; height: 15px; border: 1px solid black; background-color: white;"></span>	less than 5.5%	(75)
<span style="display: inline-block; width: 15px; height: 15px; background-color: lightblue;"></span>	5.5 to 7.5%	(35)
<span style="display: inline-block; width: 15px; height: 15px; background-color: blue;"></span>	7.7 to 9.6%	(18)
<span style="display: inline-block; width: 15px; height: 15px; background-color: darkblue;"></span>	9.9% or more	(21)

# MSAS POPULATION & ALLOCATIONS

Fifty percent of the total apportionment sum is distributed on a prorated share of each city's population. The Met Council / State Demographer's most recent population estimates were released in July 2020 and will be used in determining each city's share of the 2021 population apportionment. (2010 Federal Census populations are used if a city's census figure is greater than their most recent population estimate)

Any adjustments made to the population estimates in this report would be released in December 2020. Those changes would be minor and will be presented in the January 2021 book. These changes could include population adjustments due to annexations, detachments, or any other minor revisions made by the State Demographer.

The distribution amount for the 2020 population apportionment was \$105,122,868. For 2021, we are forecasting a 15% reduction from that amount, so this report is distributing a tentative amount of \$89,354,438 for 2021. Based on this amount, each city will earn approximately \$22.05 per capita in apportionment (over \$4 less per person than in 2020). This projection will be revised when the actual revenue for the 2021 apportionment becomes available in January.

## TENTATIVE 2021 POPULATION ALLOCATIONS

Total population distribution for 2021 is estimated to be 15% less than the 2020 distribution

Municipality	Population used for 2020	Population used for 2021	2020 Population Allocations (last year)	2021 Population Allocations (this year)	Difference Between last two Allocations	Allocation % Change
Albert Lea	18,165	18,132	\$476,981	\$399,838	(\$77,143)	(16.2)

A city's **Population Allocation** equals *total population apportionment* divided by the *total population* multiplied by the city's *population used for 2020*.

2020	<u>\$105,122,868</u> 4,003,425	\$26.26 per person
2021	<u><b>\$89,354,438</b></u> 4,052,079	\$22.05 per person

The population increase from 2020 and 2021 for allocation purposes is **48,654** (1.2% increase overall)

0 Cities Increased their population allocation.  
148 Cities Decreased their population allocation.

## This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

## MILEAGE, NEEDS AND APPORTIONMENT

The cities' share of the *Highway User Tax Distribution Fund* will be announced in January when the Commissioner of Transportation makes a determination of the 2021 apportionment. Allocations in this report are tentative and will be based off an amount of **\$178,708,876**. This tentative amount is based on an estimated 15% reduction to the 2020 total apportionment amount of \$210,245,736. This report does not assume any other changes to revenue sources that make up the Highway User's Fund. (In a typical October Needs report, we'd use the previous year's apportionment total. This usually makes for a conservative January forecast and allows us to better see effects of changes in Construction Needs).

System wide mileage increases annually. This is due to the increasing number of eligible cities and to overall growth in local street mileage.

Tentative Maintenance and Construction allocations are not provided in this report. Cities have the option of receiving a minimum of \$1,500 per mile or a percentage up to 35% of their total allocation for Maintenance. If a city desires to receive more than minimum maintenance, or make a change to their request for future maintenance, the city should inform the Municipal State Aid Needs Unit prior to **December 15th**. A memo regarding Maintenance Requests will be sent to each city engineer around November 1st.

### MSAS MILEAGE, NEEDS, AND APPORTIONMENT 1958 to 2020

Appt. Year	Number of Municipalities	Needs Mileage	Actual Construction Needs	Total Apportionment	Adjusted Construction Needs	Total Apportionment Per Needs Mileage	Apportionment Per \$1000 of Adjusted Needs

Maximum of \$64.98 in 1989

## 2020 ITEMIZED TABULATION OF NEEDS

The 2020 Money Needs continued to increase over the last year. This increase is due to Needs updates, new designations, added mileage, changing AADT, and cost increases to most unit costs. (This year an inflation factor of 1.8% was applied to most of the unit costs in the Needs Study. See Screening Board Resolutions for all of the unit prices used in the 2020 Needs computation.)

The “*2020 item by item tabulation of Needs*” shows all construction items used in the Municipal State Aid Needs Study. (“After the fact” items are discussed later in this report). This tabulation is provided to give each city an opportunity to compare their Needs of the individual construction items to that of other cities.

Traffic Signals and Structures (bridges/culverts) draw Needs on a “per item” basis. There are several cities not drawing Needs for these costs because they do not have these items on their Municipal State Aid System.

The average cost per mile is \$2,133,851 (up from \$2,095,516 last year). East Bethel currently has the lowest cost per mile at \$1,407,311 while Minneapolis has the highest cost at \$2,927,977 per mile.

The five cities with the highest cost per mile are listed alphabetically as follows: Bloomington, Minneapolis, Moorhead, Rochester and Saint Paul.

The five cities with the lowest cost per mile are listed alphabetically as follows: East Bethel, Dayton, Ham Lake, Oak Grove and Saint Francis.

## 2020 Item By Item Tabulation Of Needs

METRO INSET

# COMPARISON OF NEEDS BETWEEN 2019 and 2020

2020 Needs are computed for the January 2021 distribution

Needs Item	2019	2020	Difference	% increase
Grading/Excavation	\$860,117,916	\$883,894,643	\$23,776,727	2.8
Total Storm Sewer	695,809,016	713,872,501	18,063,485	2.6
Gravel Base	960,175,366	988,054,186	27,878,820	2.9
Bituminous Surface	1,218,761,264	1,252,332,903	33,571,639	2.8
Curb and Gutter	703,053,169	720,611,187	17,558,018	2.5
Sidewalk Construction	1,071,077,832	1,100,148,815	29,070,983	2.7
Traffic Signals	318,585,878	325,379,730	6,793,852	2.1
Street Lighting	378,901,500	381,241,500	2,340,000	0.6
Structures	301,842,558	302,607,584	765,026	0.3
Engineering	1,431,831,560	1,466,991,439	35,159,879	2.5
<b>Total Unadjusted Money Needs</b>	<b>\$7,940,156,059</b>	<b>\$8,135,134,488</b>	<b>\$194,978,429</b>	<b>2.5</b>
Total Needs Miles	3,789.02	3,812.42	23.40	0.6
ATF Right of Way	\$84,776,726	\$81,578,538	(\$3,198,188)	(3.8)
ATF Retaining Wall	6,757,755	7,195,352	437,597	6.5
ATF RR Crossing	1,706,696	1,706,696	0	0.0
ATF Bridge over MSAS Route	378,684	378,684	0	0.0

# 2020 MILEAGE REPORT

The 2020 Mileage Report shows all categories of mileage used in the Municipal State Aid Needs Study. This report is provided to give cities an opportunity to view various mileage categories. The report can also be used as a reference when reviewing and comparing against your own local road inventory.

The **Total System Length** reflects an overall increase from last year. This increase of 23 miles is due new MSAS designations and to overall system growth.

Thirty-two cities added mileage to their system in 2020.

**'System Length'** and **'Needs Length'** are different in some cities. These categories differ when cities have designations that are "Outside City Limits" or "MSB approved One Way Mileage".

Total Needs Length for all cities is 3,812.42 miles.

Total System Length for all cities is 3,818.70 miles.

- The information on the Mileage Report may also be helpful as you fill out your 2020 Annual Certification of Mileage form (due January 2021). We expect that your **"Total Needs Length"** from this Mileage Report will match line 13 of the Certification of Mileage. Should there be a discrepancy, we ask that you provide an explanation on the backside of your Annual Certification of Mileage Form.

If a city has a system revision that occurred *after* their Needs were submitted by the spring deadline (*and* was approved by the Commissioner before December 31<sup>st</sup>) those revisions can also be included on your 2020 certification.

# 2020 CONSTRUCTION NEEDS & 2021 CONSTRUCTION NEEDS ALLOCATIONS

Fifty percent of the total apportionment is determined on a prorated share that each city's construction Needs bears to the total of all construction needs. The construction Needs shown in this report are computed from annual Needs Updates submitted by each city. Before determining each city's allocation, the following Municipal Screening Board mandated adjustments are applied to the "unadjusted" construction Needs.

- Determine which cities will have a "restriction" applied to their construction Needs
- Excess Unencumbered Construction Fund Balance Adjustment
- Low Balance Incentive
- After the Fact Right of Way Adjustment
- After the Fact Retaining Wall Adjustment
- After the Fact Railroad Crossing Adjustment
- After the Fact Railroad Bridge over MSAS Adjustment
- Excess Maintenance Account (none for 2020)
- ~~Trunk Highway Turnback Maintenance~~ (resolution revoked May 2020)

By applying these adjustments, the "Adjusted Restricted Construction Needs" are calculated for each city. These Needs figures will be used to determine the Construction Needs Allocations. The actual amount of the road user fund for distribution to the Municipal State Aid Account will not be available until January 2021.

The tentative 2021 Needs allocations in this book are based on a projected money needs apportionment of **\$89,354,438**. (This amount is based on a forecasted reduction of 15% from the 2020 money needs apportionment amount of \$105,122,868).

The Municipal Screening Board will make their Money Needs recommendation by Nov. 1<sup>st</sup>.

The data on the following pages are for the Screening Board's use in determining the Tentative 2021 Construction Needs. These tabulations show the impact of the individual adjustments and the tentative allocations to each city.

Step one is applying the Restriction.

## THE PHASE IN PROCESS – YEAR SEVEN

In 2014, the Screening Board approved a new method of Needs Calculations referred to as "Continuous Needs". Before these new Needs calculations were to be implemented for the 2015 apportionment, it was recognized that under this new method that some cities would see large changes to their new **25 Year Construction Needs figures**. In the first year, several cities saw significant decreases to their Needs (as much as -25%), while other cities saw significant increases (some more than 100%). To reduce the impact that the new Needs would have to the corresponding allocations for these cities, the Screening Board voted to implement a ***phase in period*** for this new Needs method. This "phase-in" (or *restriction*) gradually gives cities several years to adjust to the new Needs Calculations by preventing a city's Needs from varying too significantly from one year to the next. According to MSB Resolutions, the phase-in period is to last 7 years, so this is the last year of applying any restrictions to the Needs. *(For a full review of the Needs Study Task Force's recommendation to move to a new Needs System, please link to the [Needs Task Force Decision Chronicle](http://www.dot.state.mn.us/stateaid/msas.html) on the MSAS home page):*

<http://www.dot.state.mn.us/stateaid/msas.html>

Since the phase-in process began, we have seen the number of cities using *Restricted Needs* fall from 112 (for the 2015 distribution) to 15 (for the upcoming 2021 distribution). Of those 15 cities, 12 have had restricted Needs since the process started.

### STEPS TO COMPUTE PHASE IN (RESTRICTION)

- Compare this years Unadjusted Needs to last years Restricted Needs.
- Find the Statewide Percent of Change between the two.
- Determine each individual city's Percent of Change from last years Restricted Needs to this years Unadjusted Needs.
- If an individual city's change is more than 5 Percentage Points less than the Statewide Average Percent of Change, increase this year's Unadjusted Needs to 5 Percentage Points less than the Statewide Average Percent of Change to calculate its Restricted Needs.
- If an individual city's Percent of Change is more than 10 Percentage Points greater than the Statewide Average Percent of Change, decrease this year's Unadjusted Needs to 10 Percentage Points more than the Statewide Average Percent of Change to calculate its Restricted Needs.
- If an individual city's Percent of Change is between 5 Percentage Points less and 10 Percentage Points more than the Statewide Average Percent of Change, use the Unadjusted Needs as its Restricted Needs. (all adjustments are applied to the Restricted Needs)

# RESTRICTED NEEDS (PHASE IN) for 2020

Bandwidth is - 5.00% and +10.00% from the Statewide Average Percent of Change. State Average Percent of Change is **+2.47%**. Therefore the current Unadjusted Needs for each city must have a Percentage Change at least **-2.53%**, but not more than **+12.47%** from the Restricted Needs from January 2020. Otherwise a restriction is applied.

9 Cities received the Lower Restriction  
 6 Cities received the Upper Restriction  
 133 Cities received No Restriction

	Restricted Needs used for 2020 Distribution	Unadjusted Construction Needs for 2021 Distribution	Percent Change from 2020 to 2021	Lower Restriction (-2.53%)	Upper Restriction (+12.47%)	No Restriction	Restricted Needs For Jan. 2021 Distribution

## Unencumbered Construction Funds Subcommittee

Meeting Minutes: September 23rd, 2020

### Attendees

Marc Culver, UCFS / Roseville  
John Gorder, UCFS / Eagan  
Bill Lanoux, State Aid  
Julie Dresel, State Aid  
Marc Briese, State Aid

### Meeting Discussion

The UCFS met on Wednesday September 23rd, 2020 to discuss a motion from the Municipal Screening Board for the committee to review the seven year Phase-in Period. Resolutions regarding the Phase-in say the seven year period will begin with the January 2015 allocation and go through the January 2021 allocation. This makes 2020 the final year in which any restrictions would be applied to a city's 25 year Unadjusted Construction Needs. The Municipal Screening Board would like the committee to review the Phase-in and bring a recommendation to the Fall Screening Board meeting.

State Aid distributed a Phase-In report prior to the meeting for the UCFS to review.

Lanoux showed the upcoming 2020 Needs calculations. For this seventh & final year, nine cities are on lower restriction, and six cities are on the upper restriction. Of these 15 cities, only 12 have been "restricted" for all seven years. Lanoux noted the City of Buffalo as an example of a city that wasn't restricted the previous year, but is restricted this year because they added some system mileage in 2020. Lanoux added that this also happened to Faribault last year. The committee questioned whether it was the intent of the phase-in to restrict actual growth. Lanoux noted the restriction has been applied using the bandwidth as stated in resolutions.

The report showed specific data for the 12 cities that have been restricted from the start. Looking at how these cities have been "*phasing in*" over seven years, it's estimated that **only four of these cities for certain would still be restricted beyond 7 years:** ((Crookston (lower), Delano (lower), St. Francis (lower), and St. Joseph (upper)). The trend shows **four other cities that likely won't be restricted beyond 7 years:** ((Grand Rapids (lower), Litchfield (lower), Brooklyn Center (upper), and Byron (upper)). **The last 4 cities are noted as "possibly" being restricted beyond seven years.** ((Mound, St. Michael, Thief River Falls, (all lower), and Hastings (upper)).

Some details and comparisons of these cities' restrictions were reviewed. In comparing each city's "restricted needs" to their "unadjusted needs" (page 9), the report uses an estimate of \$12.50 per \$1000 of Needs to get an idea of the financial impact for each city being restricted this year.

In looking at all of the Needs Recommendations going back to 2011, Lanoux noted that figures for 2013 and 2014 were the same because the Needs were "frozen" that year as the Screening Board waited for the new Needs method to begin in 2015. Because of this, 2013 Needs figures become particularly significant, as these figures are basically the starting point for the seven year phase in. A city with low Needs in 2013 potentially had an unfavorable starting point to the phase-in.

During the seven year phase-in period, the most any city could increase their Needs annually has been 10% points more than State Average Growth. The committee agreed that restricting actual growth was likely not the intent.

In contrast, it was also possible for a city to have a favorable starting point in 2013. A city with strong Needs year in 2013 potentially benefitted from their kick-off point in the phase in.

The UCFS noted that while the phase-in may not have been perfect, it was close - and the plan laid out by the Needs Study Task Force years ago seems to have worked as intended. Most cities are no longer restricted and for the few cities left that still are being restricted, the gains / losses are mostly minimal, with few exceptions.

There are very few cities left on the he upper restriction, and this restriction may no longer be serving its' original intent. It appears that this restriction should retire one year ahead of schedule.

#### **RECOMMENDATION:**

**The UCFS recommends applying the *lower restriction* for the seventh (and final) year of the phase-in. Consistent with Screening Board resolutions, cities will have their 2020 unadjusted 25-year Construction Needs compared to their previous year's Restricted Needs: If an individual city's Percent of Change is greater than 5 Percentage Points *less than* the Statewide Average Percent of Change, the city's Unadjusted Needs will increase up to 5 Percentage Points less than the Statewide Average Percent of Change**

**The low restriction adjustment will only be applied to cities that have been on the lower restriction since the phase-in period began. Cities that were not restricted in any year since the phase-in began, but have seen their 25-year Construction Needs decline in the current year, cannot "fall-in" to receiving a low restriction adjustment.**

**The UCFS recommends eliminating the *upper restriction* for 2020. Any city that is not on the lower restriction should have their 2021 construction Needs allocation based off their unadjusted 25-year Construction Needs figures.**

**Per an action by the Fall 2013 Screening Board which recommended an annual review of the phase-in, the UCFS recommends this committee meet again in September 2021 and assess the ending of the Phase-in to see if any further recommendations regarding an extended period to the lower restriction are necessary.**

**Motion carried unanimously.**

Respectfully Submitted,

John Gorder / UCFS Secretary

# Adjustments to the Restricted Construction Needs

# **EXCESS UNENCUMBERED CONSTRUCTION FUND BALANCE ADJUSTMENT**

## **Screening Board Resolutions state:**

The December 31 construction fund balance will be compared to the annual construction allotment from January of the same year. If the December 31, 2020 construction fund balance exceeds 3 times the January construction allotment, and the construction fund balance is over \$1,500,000, then the negative adjustment to the Needs will be 1 times the December 31 construction fund balance. In each consecutive year the December 31 construction fund balance exceeds 3 times the January construction allotment (and the balance is over \$1,500,000), the negative adjustment to the Needs will be increased to 2, 3, 4, etc. times the December 31 construction fund balance until such time the Construction Needs are adjusted to zero.

If the December 31 construction fund balance drops below 3 times the January construction allotment and subsequently increases to over 3 times, the multipliers will start over with one.

## **LOW BALANCE INCENTIVE**

## **Screening Board Resolutions state:**

That the amount of the Excess Unencumbered Construction Fund Balance Adjustment shall be redistributed to the Construction Needs of all municipalities whose December 31 construction fund balance is less than one times their January construction allotment of the same year. This redistribution shall be based on a city's prorated share of its Unadjusted Construction Needs to the total Unadjusted Construction Needs of all participating cities times the total Excess Balance Adjustment.

**The August 17, 2020 balance is used for this report. The final adjustment will be made using the December 31, 2020 construction fund balances.**

## EXCESS BALANCE ADJUSTMENT REDISTRIBUTED AS LOW BALANCE INCENTIVE

For 2021 distribution

## AFTER THE FACT RAILROAD CROSSING ADJUSTMENT

### Screening Board Resolution:

Any Railroad Crossing improvements shall not be included in the Needs Calculations until the project has been completed and the actual cost established. At that time a Construction Needs adjustment shall be made by annually adding the local cost (which is the total cost less county or trunk highway participation) to the annual Construction Needs for a 15 year period. Only State Aid eligible items are allowed to be included in this adjustment, and all Railroad Crossing Needs adjustments must be input by the city and approved by the District State Aid Engineer.

Municipality	Eligible Railroad Crossing Expenditures	New Railroad Crossing Expenditures 2019	Expired Railroad Crossing Expenditures	Expire Date	Total Railroad Crossing Adjustment for 2020 Apportionment
Buffalo	\$528,566			2031	\$528,566
Cambridge	\$234,357			2031	\$234,357
Fergus Falls	\$299,555			2029	\$299,555
New Ulm	\$18,433			2030	\$18,433
Moorhead	\$258,980			2032	\$258,980
Moorhead	\$366,805			2032	\$366,805
<b>Total</b>	<b>\$1,706,696</b>	<b>\$0</b>	<b>\$0</b>		<b>\$1,706,696</b>

## AFTER THE FACT RAILROAD BRIDGE OVER MSAS ADJUSTMENT

### RR Bridge over MSAS Route Rehabilitation

Any structure that has been rehabilitated (Minnesota Administrative Rules, CHAPTER 8820, 8820.0200 DEFINITIONS, Subp. 8. Bridge rehabilitation) shall not be included in the Needs calculations until the rehabilitation project has been completed and the actual cost established. At that time a Construction Needs adjustment shall be made by annually adding the local cost (which is the total cost less county or trunk highway participation) for a 15-year period. Only State Aid eligible items are allowed to be included in this adjustment and all structure rehabilitation Needs adjustments must be input by the city and approved by the DSAE.

### RR Bridge over MSAS Route Construction/Reconstruction

Any structure that has been constructed/reconstructed (Minnesota Administrative Rules, CHAPTER 8820, 8820.0200 DEFINITIONS, Subp. 31. Reconstruction) shall not be included in the Needs calculations until the project has been completed and the actual cost established. At that time a Construction Needs adjustment shall be made by annually adding the local cost (which is the total cost less county or trunk highway participation) for a 35-year period. Only State Aid eligible items are allowed to be included in this adjustment and all structure construction/reconstruction Needs adjustments must be input by the city and approved by the District State Aid Engineer

(One city has this adjustment)

Municipality	Eligible Railroad Bridge over MSAS Expenditures	New RR Bridge over MSAS Expenditures	Type of Construction	Expire Date	Total RR Bridge over MSAS Adjustment for 2020 Apportionment
Thief River Falls	\$378,684		Construction/ Reconstruction	2049	\$378,684

October 27, 2020

Margaret Anderson Kelliher, Commissioner  
Mail Stop 100  
395 John Ireland Blvd.  
St. Paul, MN 55155

Dear Commissioner Anderson Kelliher:

We, the undersigned, as members of the 2020 Municipal Screening Board, having reviewed all information available in relation to the 25 year money needs of the Municipal State Aid Street System do hereby submit our findings as required by Minnesota Statutes.

We recommend that these findings be modified as required by Screening Board Resolutions, and that any new municipalities that become eligible for State Aid by special census, incorporation, annexation or population estimates have their mileage and resulting money needs established and included in our findings.

This Board, therefore, recommends that the money needs, as listed on the attached, be modified as required and used as the basis for apportioning to the urban municipalities the 2021 Apportionment Sum as provided by Minnesota Statutes, Chapter 162.13, Subdivision 1.

# TENTATIVE 2021 CONSTRUCTION NEEDS ALLOCATIONS

Needs Value: \$1,000 in Construction Needs = approximately \$10.86 in apportionment

The following table shows each municipality's *Tentative* Money Needs Allocation based on a projected apportionment amount of \$89,354,438. The actual amount of the Road User Fund for distribution to the Municipal State Aid account will not be available until January 2021. This summary provides data and shows the impact of the Restriction and Adjustments to each municipality for the Board's use in establishing the Money Needs Apportionment Determination.

<b>Municipality</b>	<b>Adjusted Restricted Construction Needs</b>	<b>Construction Needs Allocations</b>	<b>TH Turnback Main- tenance Allowance</b>	<b>2021 Construction Needs Allocations</b>	<b>% Of Total Dist.</b>

## **OTHER TOPICS**

# RESTRICTED NEEDS (PHASE IN) for 2020 (alternate)

Bandwidth is - 5.00% and +10.00% from the Statewide Average Percent of Change. State Average Percent of Change is **+2.47%**. Therefore the current Unadjusted Needs for each city must have a Percentage Change at least **-2.53%**, but not more than **+12.47%** from the Restricted Needs from January 2020. Otherwise a restriction is applied.

9 Cities received the Lower Restriction  
0 Cities received the Upper Restriction (no upper restriction applied)  
139 Cities received No Restriction

## TENT 2021 CONSTRUCTION NEEDS ALLOCATIONS (alternate)

Needs Value: \$1,000 in Construction Needs = approximately \$10.84 in apportionment

The following table shows each municipality's *Tentative* Money Needs Allocation based on a projected apportionment amount of \$89,354,438. The actual amount of the Road User Fund for distribution to the Municipal State Aid account will not be available until January 2021. This summary provides data and shows the impact of the Restriction and Adjustments to each municipality for the Board's use in establishing the Money Needs Apportionment Determination.

<b>Municipality</b>	<b>Adjusted Restricted Construction Needs</b>	<b>Construction Needs Allocations</b>	<b>TH Turnback Main- tenance Allowance</b>	<b>2021 Construction Needs Allocations</b>	<b>% Of Total Dist.</b>

## CERTIFICATION OF MSAS SYSTEM AS COMPLETE

A Certification of a Municipal State Aid Street System may occur when a City certifies to the Commissioner of Transportation that its state aid routes are improved to state aid standards or have no other needs beyond additional surfacing or shouldering needs as identified in the annual State Aid Needs Report. This authority exists under Minnesota Rules 8820.1800 subpart 2, which reads in part:

*When the county board or governing body of an urban municipality desires to use a part of its state aid allocation on local roads or streets not on an approved state aid system, it shall certify to the commissioner that its state aid routes are improved to state aid standards or are in an adequate condition that does not have needs other than additional surfacing or shouldering needs identified in its respective state aid needs report. That portion of the county or city apportionment attributable to needs must not be used on the local system.*

When a system is certified as complete, the certification shall be good for two years. The dollar amount eligible for use on local streets will be based on the population portion of the annual construction allocation. The beginning construction account figure for this calculation shall be the amount of the current year's construction account which is not generated by construction needs.

**The dollar amount eligible to be spent on local street systems is determined as follows:**

Determine what percentage the population allocation is of the total allocation. This percent is then multiplied times the construction allotment. This is the amount of the construction allotment that is generated by the population allocation. Only the construction allotment is used because the city has already received its maintenance allotment.

**Population Allocation / Total Allocation \* Construction Allotment = Local Amount Available.** (see allocation into 90p account on next page)

The following five cities are Certified Complete: Columbia Heights, Crookston, Falcon Heights, Fridley, and South St. Paul.

## LOCAL AMOUNT AVAILABLE AFTER JANUARY 2020 ALLOCATION

Prepared for the January 2020 book

The Maximum Local Amount Available may change upon receipt of any payment request.

	Fridley	Columbia Hgts	Falcon Hgts	South St. Paul	Crookston

## HISTORY OF ADMINISTRATIVE ACCOUNT

TWO PERCENT OF THE TOTAL FUNDS AVAILABLE ARE SET ASIDE FOR THE ADMINISTRATION OF STATE AID. THE ACCOUNT IS USED FOR EXPENSES OF SCREENING BOARD MEETINGS, VARIANCE MEETINGS, PRINTING OF STATE AID MATERIALS, ETC.

Year	January Allotment	Year End Balance	Spent		Year	January Allotment	unexpended balance	Spent
1958	\$113,220	\$48,310	\$64,910		2012	3,014,118	1,029,649	\$1,984,469
1970	252,736	147,968	104,768		2013	3,125,654	888,606	2,237,048
1980	521,544	171,544	350,000		2014	3,235,357	880,506	2,354,851
1990	1,248,109	218,586	1,029,523		2015	3,413,892	1,045,899	2,367,993
2000	1,583,411	1,230,268	353,143		2016	3,548,041	1,171,781	2,376,260
2008	1,750,808	29,487	1,721,321		2017	3,551,701	1,078,127	2,473,574
2009	1,866,306	95,764	1,770,542		2018	3,937,329	1,587,167	2,350,162
2010	2,614,101	680,404	1,933,697		2019	3,948,897	1,364,462	2,584,435
2011	2,858,585	762,419	2,096,166		<b>2020</b>	<b>4,321,254</b>		

The unexpended balance of the administration account at the end of the year is transferred back to the MSAS fund and redistributed the following year.

## HISTORY OF THE RESEARCH ACCOUNT

Each year the Screening Board, provided for in section 162.13, Subdivision 3, may recommend to the commissioner a sum of money that the commissioner shall set aside from the municipal state aid street fund and credit to a research account. The amount so recommended shall not exceed 1/2 of 1% of the preceding apportionment. Any balance remaining in the research account at the end of each year from sum set aside for the year immediately previous, shall be transferred to the MSAS fund.

**Be it resolved that an amount of \$1,051,228 (not to exceed 1/2 of 1% of the 2020 MSAS Apportionment sum of: \$210,245,736) shall be set aside from the 2021 Apportionment fund and be credited to the research account.**

## Enterprise MnDOT Mapping Application

[Launch application](#)

The Enterprise MnDOT Mapping Application (EMMA) references the most current version of Linear Referencing System (LRS) data. The LRS is a suite of Esri tools to manage and maintain route location information and roadway characteristic data. The data in this application is updated every weekend keeping current with the latest changes entered into the LRS.

- Step 1:** Launch application
- Step 2:** Enter City to search
- Step 3:** Click on the layer list icon and turn on “City Route System” layer.

# Municipal State Aid Construction Account Advance Guidelines

**Advance status is currently: Code RED - SEVERE**

## State Aid Advances

[Minnesota Statutes 162.14, Subd. 6](#) provides for municipalities to make advances from future year's allocations for the purpose of expediting construction. This process not only helps reduce the construction cash balance, but also allows municipalities to fund projects that may have been delayed due to funding shortages.

The formula used to determine if advances will be available is based on the current construction cash balance, expenditures trends, repayments and the \$20,000,000 recommended threshold in MSAS construction. The threshold can be administratively adjusted by the Chief Financial Officer and reported to the Screening Board at the next Screening Board meeting.

The process used for advancing is dependent on the code levels which are listed below. Code levels for the current year can be obtained from the [SAF Advances webpage](#).

## State Aid Advance Code Levels

**SEVERE**

**Code RED - SEVERE** – Construction cash balance too low. NO MORE ADVANCES - NO EXCEPTIONS

**GUARDED**

**Code YELLOW - GUARDED** – Construction cash balance low; balances reviewed monthly. Advancing money may not meet the anticipated needs. Priority system will be used. Resolution required. Reserve option is available only prior to bid advertisement.

**LOW**

**Code GREEN - LOW** – Construction cash balance at acceptable level to approve anticipated advances. Advances approved on first-come, first-serve basis while funds are available. Resolution required. High priority projects are reserved; others optional.

## General Guidelines for State Aid & Federal Aid Advance Construction

If a city requests an advance on future allotments they need to submit an Advance Resolution authorizing the advance by the board. This will "earmark" the funding for that city, but it will NOT hold the funds. Advanced funds will be paid out on a first come first serve basis as the construction accounts are spent down to zero. The correct resolution must be used for each advance type and there is a sample resolution for each on the State Aid Finance webpage. **Requests are good only for the year requested (cannot be submitted for multiple years) and void at 12/31 of that year.**

Advances are not limited to the projects listed on the resolution. Project payments are processed in the order received by SAF until the maximum advance amount is reached. Advances are repaid from next year's allocation until fully repaid.

Advance funding is not guaranteed. If the city finds they need a guarantee that the funds will be held specifically for them they can submit a "Request to Reserve Funds" to ensure funds will be available for their project. Once approved, a signed copy will be returned to the county. **Requests are good only for the year requested (cannot be submitted for multiple years) and void at 12/31 of that year.**

Sample Advance Resolutions and Request to Reserve Funds can be obtained from [SAF Forms & Resolutions webpage](#). E-mail completed forms to Mohamed Farah at [mohamed.m.farah@state.mn.us](mailto:mohamed.m.farah@state.mn.us) in State Aid Finance and your [DSAE](#) for review.

## Priority System

A Priority System will be required if the construction cash balances drop below an acceptable level which is Code Yellow. This process starts in early October proceeding the advance year. Each city will be required to submit projects to their DSAE for prioritization within the district. The DSAE will submit the prioritized list to SALT for final prioritization.

Requests should include a negative impact statement if project had to be delayed or advance funding was not available. In addition, include why the project is needed.

Priority projects include, but are not limited to projects where agreements have mandated the city's participation, or projects with advanced federal aid. Small overruns and funding shortfalls may be funded, but require State Aid approval.

## Advance Limitations

Statutory – None, reference [Minnesota Statutes 162.14, Subd 6](#).

State Aid Rules – None, reference [State Aid Rules 8820.1500, Subp. 10 & 10b](#) (PDF).

### State Aid Guidelines

Advance is limited to five times the municipalities' last construction allotment or \$4,000,000, whichever is less. Advance amount will be reduced by any similar outstanding obligations and/or bond principle payments due. The limit can be administratively adjusted by the Chief Financial Officer.

If a municipality has a negative balance and the status is Code Red – Severe: then State Aid Finance will not be able to pay the municipality for the local agency bond principal.

Limitation may be exceeded due to federal aid advance construction projects programmed by the ATP in the STIP where state aid funds are used in lieu of federal funds. Repayment will be made at the time federal funds are converted. Should federal funds fail to be programmed, or the project (or a portion of the project) be declared federally ineligible, the local agency is required to pay back the advance under a payment plan mutually agreed to between State Aid and the municipality.

## **COUNTY HIGHWAY TURNBACK** **POLICY**

### ***Definitions:***

County Highway – Either a County State Aid Highway or a County Road

County Highway Turnback- A CSAH or a County Road which has been released by the county and designated as an MSAS roadway. A designation request must be approved and a Commissioner's Order written. A County Highway Turnback may be either County Road (CR) Turnback or a County State Aid (CSAH) Turnback. (See Minnesota Statute 162.09 Subdivision 1). A County Highway Turnback designation has to stay with the County Highway turned back and is not transferable to any other roadways.

Basic Mileage- Total improved mileage of local streets, county roads and county road turnbacks. Frontage roads which are not designated trunk highway, trunk highway turnback or on the County State Aid Highway System shall be considered in the computation of the basic street mileage. A city is allowed to designate 20% of this mileage as MSAS. (See Screening Board Resolutions in the back of the most current booklet).

### ***MILEAGE CONSIDERATIONS***

#### ***County State Aid Highway Turnbacks***

A CSAH Turnback **is not** included in a city's basic mileage, which means it **is not** included in the computation for a city's 20% allowable mileage. However, a city may draw Construction Needs and generate allocation on 100% of the length of the CSAH Turnback

#### ***County Road Turnbacks***

A County Road Turnback **is** included in a city's basic mileage, so it **is** included in the computation for a city's 20% allowable mileage. A city may also draw Construction Needs and generate allocation on 100% of the length of the County Road Turnback.

### ***Jurisdictional Exchanges***

#### ***County Road for MSAS***

Only the **extra** mileage a city receives in an exchange between a County Road and an MSAS route **will be** considered as a County Road Turnback.

If the mileage of a jurisdictional exchange is **even**, the County Road **will not be** considered as a County Road Turnback.

If a city receives **less** mileage in a jurisdictional exchange, the County Road **will not be** considered as a County Road Turnback.

## ***CSAH for MSAS***

Only the **extra** mileage a city receives in an exchange between a CSAH and an MSAS route **will be** considered as a CSAH Turnback.

If the mileage of a jurisdictional exchange is **even**, the CSAH **will not be** considered as a CSAH Turnback.

If a city receives **less** mileage in a jurisdictional exchange, the CSAH **will not be** considered as a CSAH Turnback

### **NOTE:**

When a city receives **less** mileage in a CSAH exchange it will have less mileage to designate within its 20% mileage limitation and may have to revoke mileage the following year when it computes its allowable mileage.

*Explanation:* After this exchange is completed, a city will have more CSAH mileage and less MSAS mileage than before the exchange. The new CSAH mileage was included in the city's basic mileage when it was MSAS (before the exchange) but is not included when it is CSAH (after the exchange). So, after the jurisdictional exchange the city will have less basic mileage and 20% of that mileage will be a smaller number.

If a city has more mileage designated than the new, lower 20% allowable mileage, the city will be over designated and be required to revoke some mileage. **If a revocation is necessary, it will not have to be done until the following year after a city computes its new allowable mileage.**

## ***MSAS designation on a County Road***

County Roads can be designated as MSAS. If a County Road which is designated as MSAS is turned back to the city, it will not be considered as County Road Turnback.

## ***MISCELLANEOUS***

A CSAH which was previously designated as Trunk Highway turnback on the CSAH system and is turned back to the city will lose all status as a TH turnback and only be considered as CSAH Turnback.

A city that had previously been over 5,000 population, lost its eligibility for an MSAS system and regained it shall revoke all streets designated as CSAH at the time of eligibility loss and consider them for MSAS designation. These roads will not be eligible for consideration as CSAH turnback designation.

In a city that becomes eligible for MSAS designation for the first time all CSAH routes which serve only a municipal function and have both termini within or at the municipal boundary, should be revoked as CSAH and considered for MSAS designation. These roads will not be eligible for consideration as CSAH turnbacks.

For MSAS purposes, a County or CSAH that has been released to a city cannot be local road for more than two years and still be considered a turnback.

**CURRENT RESOLUTIONS  
OF THE  
MUNICIPAL SCREENING BOARD**

October 2020

**Bolded wording (except headings) are revisions since the last publication of the  
Resolutions**

**BE IT RESOLVED:**

**ADMINISTRATION**

**Appointments to Screening Board** - Oct. 1961 (Revised June 1981, May 2011)

The Commissioner of Mn/DOT will annually be requested to appoint three (3) new members, upon recommendation of the City Engineers Association of Minnesota, to serve three (3) year terms as voting members of the Municipal Screening Board. These appointees are selected from the MnDOT State Aid Districts as they exist in 2010, together with one representative from each of the four (4) cities of the first class.

**Screening Board Chair, Vice Chair and Secretary**- June 1987 (Revised June, 2002)

The Chair Vice Chair, and Secretary, nominated annually at the annual meeting of the City Engineers Association of Minnesota and subsequently appointed by the Commissioner of the Minnesota Department of Transportation will not have a vote in matters before the Screening Board unless they are also the duly appointed Screening Board Representative of a construction District or of a City of the first class.

**Appointment to the Needs Study Subcommittee** - June 1987 (Revised June 1993)

The Screening Board Chair will annually appoint one city engineer, who has served on the Screening Board, to serve a three year term on the Needs Study Subcommittee. The appointment will be made at the annual winter meeting of the City's Engineers Association. The appointed subcommittee person will serve as chair of the subcommittee in the third year of the appointment.

**Appointment to Unencumbered Construction Funds Subcommittee** – (Revised June 1979, May 2014)

The Screening Board past Chair will be appointed to serve a minimum three-year term on the Unencumbered Construction Fund Subcommittee. This appointment will continue to maintain an experienced group to follow a program of accomplishments. The most senior member will serve as chair of the subcommittee.

### **Appearance Screening Board** - Oct. 1962 (Revised Oct. 1982)

Any individual or delegation having items of concern regarding the study of State Aid Needs or State Aid Apportionment amounts, and wishing to have consideration given to these items, will send such request in writing to the State Aid Engineer. The State Aid Engineer with concurrence of the Chair of the Screening Board will determine which requests are to be referred to the Screening Board for their consideration. This resolution does not abrogate the right of the Screening Board to call any person or persons before the Board for discussion purposes.

### **Screening Board Meeting Dates and Locations** - June 1996

The Screening Board Chair, with the assistance of the State Aid Engineer, will determine the dates and locations for Screening Board meetings.

### **Research Account** - Oct. 1961

An annual resolution be considered for setting aside up to ½ of 1% of the previous years' Apportionment fund for the Research Account to continue municipal street research activity.

### **Population Apportionment** - October 1994, 1996

Beginning with calendar year 1996, the MSAS population apportionment will be determined using the latest available federal census or population estimates of the State Demographer and/or the Metropolitan Council. However, no population will be decreased below that of the latest available federal census, and no city will be dropped from the MSAS eligible list based on population estimates.

### **Improper Needs Report** - Oct. 1961

The State Aid Engineer and the District State Aid Engineer (DSAE) are requested to recommend an adjustment of the Needs reporting whenever there is a reason to believe that said reports have deviated from accepted standards and to submit their recommendations to the Screening Board, with a copy to the municipality involved, or its engineer.

### **New Cities Needs** - Oct. 1983 (Revised June 2005, May 2014)

Any new city having determined its eligible mileage, but has not submitted its Needs to the DSAE by December 1, will have its Needs based upon zero ADT assigned to the eligible mileage until the DSAE approves the traffic counts.

### **Certified Complete Cities** – May 2014 (Revised October 2014)

State Aid Operational Rule 8820.18 subp.2 allows cities to spend the population based portion of their Construction Allotment on non MSAS city streets if its MSAS system has been Certified Complete.

At the city's request, the District State Aid Engineer will review the MSAS system in that city and if the system has been completely built, may certify it complete for a period of two years. The same proportion of a city's total allocation based on population will be used to compute the population portion of its Construction Allotment.

If a payment request for a project on the MSAS system is greater than the amount available in the Needs based account, the remainder will come from the population based account, thereby reducing the amount available for non MSAS city streets.

A city may carry over any remaining amount in its population based account from year to year. However if a payment request for a project on a non MSAS city street is greater than the amount available in the population based account, the population based account will be reduced to zero and the city will be responsible for the remaining amount.

### **Construction Needs Components** – May 2014

For Construction Needs purposes, all roadways on the MSAS system will be considered as being built to Urban standards.

All segments on the MSAS system will generate continuous Construction Needs on the following items:

- Excavation/Grading
- Gravel Base
- Bituminous
- Curb and Gutter Construction
- Sidewalk Construction
- Storm Sewer Construction
- Street Lighting
- Traffic Signals
- Engineering
- Structures

### **Unit Price Study-** Oct. 2006 (Revised May, 2014)

The Needs Study Subcommittee will annually review the Unit Prices for the Needs components used in the Needs Study. The Subcommittee will make its recommendation to the Municipal Screening board at its annual spring meeting.

The Unit Price Study go to a 3 year (or triennial) cycle with the Unit Prices for the two 'off years' to be set using the Engineering News Record construction cost index on all items where a Unit Price is not estimated and provided by other MnDOT offices. The Screening Board may request a Unit Price Study on individual items in the 'off years' if it is deemed necessary.

### **Unit Costs** – May 2014, (Revised January 2015, May 2015)

The quantities which the Unit Costs for Excavation/Grading, Gravel Base, and Bituminous are based upon will be determined by using the roadway cross sections and structural sections in each of the ADT groups as determined by the Municipal Screening Board and shown in the following table 'MSAS Urban ADT Groups for Needs Purposes'.

**MSAS URBAN ADT GROUPS FOR NEEDS PURPOSES**

**Quantities Based on a One Mile Section**

EXISTING ADT	NEEDS WIDTH	NEEDS GENERATION DATA	GRADING DEPTH (inches)	GRADING QUANTITY (cubic yards)	CLASS 5 GRAVEL BASE DEPTH (inches)	CLASS 5 GRAVEL BASE QUANTITY (Tons)	TOTAL BITUMINOUS QUANTITY (TONS)
0 EXISTING ADT & NON EXISTING	26 FOOT ROADBED WIDTH	2- 11' TRAFFIC LANES 0 PARKING LANES 2- 2' CURB REACTION	22 INCHES	11,655	6 INCHES	4,346	2,917  4 INCHES
1-499 EXISTING ADT	28' FOOT ROADBED WIDTH	2- 12' TRAFFIC LANES 0 PARKING LANES 2- 2' CURB REACTION	22 INCHES	12,496	6 INCHES	4,691	3,182  4 INCHES
500-1999 EXISTING ADT	34 FOOT ROADBED WIDTH	2- 12' TRAFFIC LANES 1- 8' PARKING LANE 1- 2' CURB REACTION	26 INCHES	17,698	10 INCHES	10,176	3,978  4 INCHES
2000-4999 EXISTING ADT	40 FOOT ROADBED WIDTH	2-12' TRAFFIC LANES 2- 8' PARKING LANE	32 INCHES	25,188	16 INCHES	19,628	4,773  4 INCHES
5000-8999 EXISTING ADT	48 FOOT ROADBED WIDTH	4-11' TRAFFIC LANES 2- 2' CURB REACTION	35 INCHES	32,795	19 INCHES	27,907	5,834  4 INCHES
9000-13,999 EXISTING ADT	54 FOOT ROADBED WIDTH	4-11' TRAFFIC LANES 1- 8' PARKING LANE 1- 2' CURB REACTION	36 INCHES	37,918	19 INCHES	31,460	8,287  5 INCHES
14,000-24,999 EXISTING ADT	62 FOOT ROADBED WIDTH	4-11' TRAFFIC LANES 1- 14' CENTER TURN 2- 2' CURB REACTION	38 INCHES	45,838	20 INCHES	38,049	11,535  6 INCHES
GT 25,000 EXISTING ADT	70 FOOT ROADBED WIDTH	6-11' TRAFFIC LANES 0 PARKING LANES 2- 2' CURB REACTION	39 INCHES	53,172	21 INCHES	44,776	13,126  6 INCHES

The quantity used for **Curb and Gutter** Construction will be determined by multiplying the segment length times two if it is an undivided roadway and by four if it is divided. This quantity will then be multiplied by the Municipal Screening Board approved Unit Price to determine the Curb and Gutter Construction Needs.

The quantity used for **Sidewalk Construction** will be determined by multiplying the segment length times 26,400 (a five foot wide sidewalk on one side of a mile of roadway) in the lower two ADT groups (less than 500 ADT) and by 52,800 (two five foot wide sidewalks on a mile of roadway) in the upper ADT groups. This quantity will then be multiplied by the Municipal Screening Board approved Unit Price to determine the Sidewalk Construction Needs.

The Unit Cost per mile of **Storm Sewer** for the highest MSAS Urban ADT Group for Needs Purposes will be based on the average costs of all Storm Sewer Construction on the MSAS system in the previous year. To determine the Unit Cost for the highest ADT Group, average costs for Complete Storm Sewer projects and Partial Storm Sewer projects will be provided to State Aid by the MnDOT Hydraulics Office and then added together and divided by two to calculate a statewide average Unit Cost for all Storm Sewer Construction. The Unit Cost per mile for Storm Sewer Construction will be calculated for the highest MSAS Urban ADT Group and be prorated downward for the other ADT Groups. This proration has been determined based upon an engineering study requested by the Municipal Screening Board in 2011 and will be the basis for the Needs calculations.

The Unit Cost for **Street Lighting** will be determined by multiplying the Unit Price per mile by the segment length. This Unit Cost will remain at \$100,000 per mile. The Municipal Screening Board may request a study on this item on any year if it is deemed necessary.

The Unit Cost for **Traffic Signals** will be determined by the recommendation by the SALT Program Support Engineer and approved by the MSB. The Unit Cost for traffic signals will be based on a cost per signal leg, and for Needs purposes a signal leg will be defined as  $\frac{1}{4}$  of the signal cost. Only signal legs on designated MSAS routes will be included in the Needs study. Stand-alone pedestrian crossing signals will not be included in the Needs study.

The area in square feet used for **Structure Needs** (Bridges and Box Culverts) will be determined by multiplying the centerline length of the bridge, or the culvert width of the box culvert, times the Needs Width from the appropriate MSAS Urban ADT Group. This quantity will then be multiplied by the Municipal Screening Board Unit Price to determine the Structure Needs. The Unit Price for Structures will be determined by using one-half of the approved unit cost provided by the MnDOT State Aid Bridge Office.

The Unit Cost for **Engineering** will be determined by adding together all other Unit Costs and multiplying them by the MSB approved percentage. The result is added to the other Unit Costs.

## 2020 UNIT PRICE RECOMMENDATIONS

*for the January 2021 distribution*

Needs Item		Municipal Screening Board Approved Prices for the 2020 Distribution	Needs Study Subcommittee Recommended Prices for 2021 Distribution	Municipal Screening Board Approved Prices for the 2021 Distribution
Grading (Excavation)	Cu. Yd.	\$9.36	\$9.53	<b>\$9.53</b>
Aggregate Base	Ton	14.18	14.44	<b>14.44</b>
All Bituminous	Ton	65.00	66.17	<b>66.17</b>
Sidewalk Construction	Sq. Ft.	5.66	5.76	<b>5.76</b>
Curb and Gutter Construction	Lin.Ft.	16.36	16.65	<b>16.65</b>
Traffic Signals *	Per Sig	207,700	211,440	<b>211,440</b>
Street Lighting	Mile	100,000	100,000	<b>100,000</b>
Engineering	Percent	22	22	<b>22</b>
All Structures (includes both bridges and box culverts)				
	Sq. Ft.	95.20	95.67	<b>95.67</b>
<b>Storm Sewer (based on ADT)</b>	Per Mile			
0 ADT & Non Existing		162,400	165,500	<b>165,500</b>
1-499		165,500	168,700	<b>168,700</b>
500-1,999		174,800	178,100	<b>178,100</b>
2,000-4,999		184,000	187,500	<b>187,500</b>
5,000-8,999		196,400	200,100	<b>200,100</b>
9,000-13,999		205,600	209,500	<b>209,500</b>
14,000-24,999		218,000	222,100	<b>222,100</b>
25,000 and over		230,300	234,700	<b>234,700</b>

### **Mileage** - Feb. 1959 (Revised Oct. 1994. 1998)

The maximum mileage for Municipal State Aid Street designation will be 20 percent of the municipality's basic mileage - which is comprised of the total improved mileage of local streets, county roads and county road turnbacks.

Nov. 1965 – (Revised 1969, October 1993, October 1994, June 1996, October 1998, May 2014)

That the maximum mileage for State Aid designation may be exceeded to designate trunk highway turnbacks released to the Municipality after July 1, 1965.

The maximum mileage for State Aid designation may also be exceeded to designate both County Road and County State Aid Highways released to the Municipality after May 11<sup>th</sup>, 1994.

Nov. 1965 (Revised 1972, Oct. 1993, 1995, 1998)

The maximum mileage for Municipal State Aid Street designation will be based on the Annual Certification of Mileage current as of December 31<sup>st</sup> of the preceding year. Submittal of a supplementary certification during the year will not be permitted. Frontage roads not designated Trunk Highway, Trunk Highway Turnback or County State Aid Highways will be considered in the computation of the basic street mileage. The total mileage of local streets, county roads and county road turnbacks on corporate limits will be included in the municipality's basic street mileage. Any State Aid Street that is on the boundary of two adjoining urban municipalities will be considered as one-half mileage for each municipality.

All mileage on the MSAS system will accrue Needs in accordance with current rules and resolutions.

Oct. 1961 (Revised May 1980, Oct. 1982, Oct. 1983, June 1993, June 2003)

All requests for revisions to the Municipal State Aid System must be received by the District State Aid Engineer by March first to be included in that years Needs Study. If a system revision has been requested, a City Council resolution approving the system revisions and the Needs Study reporting data must be received by May first, to be included in the current year's Needs Study. If no system revisions are requested, the District State Aid Engineer must receive the Normal Needs Updates by March 31<sup>st</sup> to be included in that years' Needs Study.

**One Way Street Mileage** - June 1983 (Revised Oct. 1984, Oct. 1993, June 1994, Oct. 1997)

Any one-way streets added to the Municipal State Aid Street system must be reviewed by the Needs Study Sub-Committee, and approved by the Screening Board before any one-way street can be treated as one-half mileage in the Needs Study.

All Municipal Screening Board approved one-way streets be treated as one-half of the mileage and allow one-half complete Needs. When Trunk Highway or County Highway Turnback is used as part of a one-way pair, mileage for certification shall only be included as Trunk Highway or County Turnback mileage and not as approved one-way mileage.

## **Needs Adjustments**

### **Phase In (Restriction) May 2014**

The method of computing Needs is to be phased in over a period of seven years. This seven year period will begin with the January 2015 allocation and go through the January 2021 allocation.

The phase in will be reviewed annually by the Municipal Screening Board to determine if the Phase In period should be revised.

During the seven year period the phase in is being applied, a city's Restricted Needs will be

computed using the following steps:

- 1) Compare the current years Unadjusted Needs to the previous years Restricted Needs. In the first year of the phase in, the current years Unadjusted Needs will be compared to the previous years Unadjusted Needs.
- 2) Compute the Statewide Average Percent of Change between the two totals.
- 3) Determine each individual city's Percent of Change between last years Restricted Needs
- 4) and this years Unadjusted Needs.
- 5) If an individual city's Percent of Change is greater than 5 Percentage Points less than the Statewide Average Percent of Change, increase this year's Unadjusted Needs to 5 Percentage Points less than the Statewide Average Percent of Change.
- 6) If an individual city's Percent of Change is greater than 10 Percentage Points more than the Statewide Average Percent of Change, decrease this year's Unadjusted Needs to 10 Percentage Points more than the Statewide Average Percent of Change.
- 7) If an individual city's Percent of Change is between 5 Percentage Points less and 10 Percentage Points more than the Statewide Average Percent of Change, no restriction is made and the current year's Unadjusted Needs will be used as its Restricted Needs.

All Needs adjustments will be applied to the city's Restricted Needs.

In the event that an MSAS route earning "After the Fact" Needs is removed from the MSAS system, the "After the Fact" Needs will then be removed from the Needs Study, except if transferred to another state system. No adjustment will be required on Needs earned prior to the revocation.

**Excess Unencumbered Construction Fund Balance Adjustment** – Oct. 2002, (Revised Jan. 2010, May 2014, May 2019)

State Aid Payment Requests received before December 1st by the District State Aid Engineer for payment will be considered as being encumbered and the construction balances will be so adjusted.

The December 31 construction fund balance will be compared to the annual construction allotment from January of the same year. If the December 31 construction fund balance exceeds 3 times the January construction allotment, and the construction fund balance is over \$1,500,000, then the negative adjustment to the Needs will be 1 times the December 31 construction fund balance. In each consecutive year the December 31 construction fund balance exceeds 3 times the January construction allotment (and the balance is over \$1,500,000), the negative adjustment to the Needs will be increased to 2, 3, 4, etc. times the December 31 construction fund balance until such time the Construction Needs are adjusted to zero.

If the December 31 construction fund balance drops below 3 times the January construction allotment and subsequently increases to over 3 times, the multipliers will start over with one.

**Low Balance Incentive** – Oct. 2003 (Revised May, 2014)

The amount of the Excess Unencumbered Construction Fund Balance Adjustment will be redistributed as a positive adjustment to the Construction Needs of all municipalities whose December 31<sup>st</sup> construction fund balance is less than 1 times their January construction allotment of the same year. This redistribution will be based on a city's prorated share of its Unadjusted Construction Needs to the total Unadjusted Construction Needs of all participating

cities times the total Excess Balance Adjustment.

**After the Fact Right of Way Adjustment** - Oct. 1965 (Revised June 1986, 2000, May 2014)

Right of Way Needs will not be included in the Needs calculations until the right of way is acquired and the actual cost established. At that time a Construction Needs adjustment will be made by annually adding the local cost (which is the total cost less county or trunk highway participation) for a 15-year period. Only right of way acquisition costs that are eligible for State-Aid funding will be included in the right-of-way Construction Needs adjustment. This Directive is to exclude all Federal or State grants.

When "After the Fact" Needs are requested for right-of-way projects that have been funded with local funds, but qualify for State Aid reimbursement, documentation (copies of warrants and description of acquisition) must be submitted to the District State Aid Engineer. The City Engineer will input the data into the Needs Update program and the data will be approved by the DSAE.

**After the Fact Railroad Bridge over MSAS Route Adjustment** – May 2014

**RR Bridge over MSAS Route Rehabilitation**

Any structure that has been rehabilitated (Minnesota Administrative Rules, CHAPTER 8820, 8820.0200 DEFINITIONS, Subp. 8. Bridge rehabilitation) will not be included in the Needs calculations until the rehabilitation project has been completed and the actual cost established. At that time a Construction Needs adjustment will be made by annually adding the local cost (which is the total cost less county or trunk highway participation) for a 15-year period. Only State Aid eligible items are allowed to be included in this adjustment and all structure rehabilitation Needs adjustments must be input by the city and approved by the DSAE.

**RR Bridge over MSAS Route Construction/Reconstruction**

Any structure that has been constructed/reconstructed (Minnesota Administrative Rules, CHAPTER 8820, 8820.0200 DEFINITIONS, Subp. 31. Reconstruction) will not be included in the Needs calculations until the project has been completed and the actual cost established. At that time a Construction Needs adjustment will be made by annually adding the local cost (which is the total cost less county or trunk highway participation) for a 35-year period. Only State Aid eligible items are allowed to be included in this adjustment and all structure construction/reconstruction Needs adjustments must be input by the city and approved by the District State Aid Engineer.

**After the Fact Railroad Crossing Adjustment**

Any Railroad Crossing improvements will not be included in the Needs Calculations until the project has been completed and the actual cost established. At that time a Construction Needs adjustment will be made by annually adding the local cost (which is the total cost less county or trunk highway participation) to the annual Construction Needs for a 15 year period. Only State Aid eligible items are allowed to be included in this adjustment, and all Railroad Crossing Needs adjustments must be input by the city and approved by the District State Aid Engineer.

### **Excess Maintenance Account – June 2006**

Any city which requests an annual Maintenance Allocation of more than 35% of their Total Allocation, is granted a variance by the Variance Committee, and subsequently receives the increased Maintenance Allocation will receive a negative Needs adjustment equal to the amount of money over and above the 35% amount transferred from the city's Construction Account to its Maintenance Account. The Needs adjustment will be calculated for an accumulative period of twenty years, and applied as a single one-year (one time) deduction each year the city receives the maintenance allocation.

### **After the Fact Retaining Wall Adjustment Oct. 2006 (Revised May 2014)**

Retaining wall Needs will not be included in the Needs study until such time that the retaining wall has been constructed and the actual cost established. At that time a Needs adjustment will be made by annually adding the local cost (which is the total cost less county or trunk highway participation) for a 15 year period. Documentation of the construction of the retaining wall, including eligible costs, must be submitted to your District State Aid Engineer by July 1 to be included in that years Needs study. After the Fact needs on retaining walls will begin effective for all projects awarded after January 1, 2006. All Retaining Wall adjustments must be input by the city and approved by the District State Aid Engineer.

### **Trunk Highway Turnback - Oct. 1967 (Revised June 1989, May 2014; Revoked May 2020)**

~~Any trunk highway turnback which reverts directly to the municipality and becomes part of the Municipal State Aid Street system will not have its Construction Needs considered in the Construction Needs apportionment determination as long as the former trunk highway is fully eligible for 100 percent construction payment from the Municipal Turnback Account. During this time of eligibility, financial aid for the additional maintenance obligation, to the municipality imposed by the turnback will be computed on the basis of the current year's apportionment data and will be accomplished in the following manner.~~

~~The initial turnback maintenance adjustment when for less than 12 full months will provide partial maintenance cost reimbursement by adding said initial adjustment to the Construction Needs which will produce approximately 1/12 of \$7,200 per mile in apportionment funds for each month or part of a month that the municipality had maintenance responsibility during the initial year.~~

~~To provide an advance payment for the coming year's additional maintenance obligation, a Needs adjustment per mile will be added to the annual Construction Needs. This Needs adjustment per mile will produce sufficient apportionment funds so that at least \$7,200 in apportionment will be earned for each mile of trunk highway turnback on Municipal State Aid Street System.~~

~~Trunk Highway Turnback adjustments will terminate at the end of the calendar year during which a construction contract has been awarded that fulfills the Municipal Turnback Account Payment provisions.~~

**TRAFFIC** - June 1971 (Revised May 2014)

Beginning in 1965 and for all future Municipal State Aid Street Needs Studies, the Needs Study procedure will utilize traffic data developed according the Traffic Forecasting and Analysis web site at <http://www.dot.state.mn.us/traffic/data/coll-methods.html#TCS>

**Traffic Counting** - Sept. 1973 (Revised June 1987, 1997, 1999, Oct. 2014)

Traffic data for State Aid Needs Studies will be developed as follows:

- 1) The municipalities in the metropolitan area cooperate with the State by agreeing to participate in counting traffic every two or four years at the discretion of the city.
- 2) The cities in the outstate area may have their traffic counted and maps prepared by State forces every four years, or may elect to continue the present procedure of taking their own counts and have state forces prepare the maps.
- 3) Any city may count traffic with their own forces every two years at their discretion and expense, unless the municipality has made arrangements with the Mn/DOT district to do the count.
- 4) On new MSAS routes, the ADT will be determined by the City with the concurrence of the District State Aid Engineer until such time the roadway is counted in the standard MnDOT count rotation.
