AT A GLANCE

- 3,542 veterinarians served: 3,158 active licenses and 384 inactive licenses
- 60% of Minnesotans estimated to own animals
- Veterinarians renew licenses every two years
- Average of 170 new licensees yearly
- 91 complaints from the public investigated annually
- Two full time staff persons

PURPOSE

The mission of the Minnesota Board of Veterinary Medicine (BVM) is to promote, preserve, and protect the health, safety, and welfare of the public and animals. We achieve this through the effective control and regulation of the practice of veterinary medicine on behalf of animals and their owners. We ensure Minnesota veterinarians have the education and skills needed to become licensed, and that they will work to optimize animal health. We curb the unlicensed practice of veterinary medicine that endangers animals and the public.

We work effectively to maintain current standards for the practice of veterinary medicine in Minnesota. These services include assessment of veterinarians’ qualifications for licensure, investigation, and remediation of public complaints pertaining to veterinary medicine, and provision of public access to disciplinary and corrective actions. To prevent substandard veterinary care, we monitor veterinarians’ ongoing completion of continuing education and communicate strategies to optimize veterinarians’ professional conduct.

BUDGET

Source: Budget Planning & Analysis System (BPAS)

Source: Consolidated Fund Statement

The Board is funded by licensure fees and receives no general fund dollars. Minnesota Statutes section 214.06, subdivision 1(a) compels the Board to collect fees in the amount sufficient to cover direct and indirect expenditures. Funds are deposited as non-dedicated revenue into the state government special revenue fund.

From this fund, the Board receives a direct appropriation to pay for agency expenses such as salaries, rent, costs associated with disciplinary/contested cases and operating expenditures. It also pays statewide indirect costs through an open appropriation.

In addition to Board operations, licensure fees fund activities that support multiple boards and/or other agencies. Some of these are: the Administrative Services Unit (inter-board), Health Professionals Services Program (inter-board), Office of the Attorney General for legal services, and the Criminal Background Check Program (inter-board).

STRATEGIES

To accomplish our mission, we utilize the following strategies:

1. Regulatory:

- ensure license applicants are qualified to practice veterinary medicine in Minnesota by careful review of credentials, including the criminal background check
- examine each license applicant's knowledge of standards of veterinary practice, laws, and rules
- evaluate declarations of any criminal charges, license discipline or insufficient continuing education
- hold veterinarians accountable for their professional conduct based on legal, ethical and professional standards
- require veterinarians to stay updated on advances in veterinary medicine through continuing education
- investigate complaints pertaining to veterinarians or unlicensed practice of veterinary medicine
- take corrective or disciplinary action if a risk to human or animal safety is identified, and determine what course of action will improve a veterinarian's performance
- register professional firms practicing veterinary medicine and update the database via annual reports
- facilitate license application, license renewal, and filing of complaints via our interactive website
- provide other states with verification of the license status of a veterinarian when requested
- collaborate with the other MN government agencies: Board of Pharmacy, Board of Chiropractic Examiners, Criminal Background Check Program, Health Professionals Services Program, Board of Animal Health, Department of Health, Racing Commission, and Department of Revenue
- collaborate with federal government agencies: Drug Enforcement Administration, US Department of Agriculture, and Internal Revenue Service
- participate in committees and programs presented by the American Association of Veterinary State Boards pertaining to current regulatory issues and best practices to address these in Minnesota

2. Education:

- inform veterinarians of any regulatory changes that impact the practice of veterinary medicine
- provide education on regulatory issues via: written materials on our website, newsletters, direct mail, and presentations at veterinary conference, webinars, and the University of Minnesota
- assist the public by relaying information regarding the scope of practice of veterinary medicine, complaint process and past corrective and disciplinary action for veterinarians
- address questions posed by the media, legislature, veterinarians, public, agencies, firms, and associations
