Introduction

On any given day, you may find yourself using your credit card online to purchase a gift, applying by phone for a new credit card with your favorite merchant, or writing a check at your local convenience store. You may be unaware that in each instance you are revealing personal and unique information about yourself, such as your banking information, credit card number, and Social Security number (SSN), along with your name, birth date, address, phone number, and other contact information that uniquely identifies you. This information is a gold mine for identity thieves to use to commit fraud or theft without your knowledge. It has been estimated that four out of five victims of identity theft had no idea how an identity thief obtained their personal information.

According to one study, 15.4 million Americans were victims of identity theft in 2017 with an estimated loss of over \$16 billion. Further, more than half of all adults in America were notified that their personal information had been breached in 2017—nearly five times the number who had their information exposed just four years earlier. Identity theft is spurred on by lenders and creditors willing to grant thousands of dollars in credit in mere minutes with little or no proof of identity. In today's information age, an identity thief can easily, and sometimes legally, tap into your information with just the click of a button. Thieves may also swipe the contents of your mailbox or even rummage through your trash searching for account statements, pre-approved credit card offers, or credit receipts. Armed with this information, a thief can pose as you to acquire a credit card, or siphon money from your personal savings and checking accounts.

Identity theft may take months for you to detect and sometimes years or longer to unravel. This handbook provides important information on how to protect your privacy, safeguard your personal data, and avoid identity fraud.

What Is Personal Information and Identity Theft?

The Personal Information Trade

When we worry about who might be snooping in our private affairs, we often think about the government, “Big Brother,” monitoring our homes, telephone calls, or travels. Today there is another threat to our privacy: the network of commercial data brokers that collect and sell personal information about each one of us.

Profiling

The sale, collection, and integration of personal information about consumers is a big industry in the information age. There are countless numbers of private companies keeping comprehensive databases about individual consumers, including retailers, advertisers, and online companies, to name a few. According to a study published by the Data & Marketing Association, corporations spent over \$10 billion in 2017 for access to lists and databases with information on consumers.

These companies do not engage in the “mass marketing” of products or the researching of general demographic groups. Rather, they focus on gathering as much information as possible about specific people to engage in what is sometimes called “profiling” or “personal marketing.” Technology allows these businesses to gather a tremendous amount of information about consumers at almost no cost by obtaining purchase data, financial records, motor

vehicle records, credit card transactions, store savings cards, and other public records. The businesses then sort and categorize the data, sometimes called “data mining,” to create comprehensive profiles on specific people for “target marketing” purposes.

Personal Information

The information possessed by these companies goes far beyond mere demographic data and is limited only by the technology itself. Each electronically recorded transaction—from your use of credit, debit, or ATM cards to your payment of mortgage or student loans—provides a glimpse into your private life. When layered on top of one another, these pieces of information create a complete picture of you as an individual.

Here are a few examples of the personal information trade:

- One company maintains a database that gathers and processes information on more than 98 percent of American households. For a price, it will sort information based on more than 1,000 elements from “basic demographics” to “sophisticated psychographics.”
- Another company offers over 40 lists that include the name and address of people with particular medical conditions, such as asthma, diabetes, and clinical depression. It also sells lists of people with Alzheimer’s Disease, Multiple Sclerosis, Parkinson’s Disease, and cancer.
- A nonprofit organization offers the names of high school students according to GPA, religion, ethnicity, SAT range, and potential major.
- A medical-record company that has information on 100 million patients provides its software to clinics free of charge and then charges pharmaceutical companies a fee to send reminders to doctors that particular patients need vaccinations or that a test or treatment may be necessary.

No information appears to be too personal for companies to collect or too insignificant to sell. For instance, one company sells lists of “married moms,” “holiday car buyers,” consumers who plan to give candy for Valentine’s Day, and those likely to spend their tax refund on a vacation. Personal data is merged into a consumer tracking and information system that becomes larger every day and it is sold to whomever may be interested in buying. Each piece of information gathered, stored, and sorted by these large databases represents an erosion of your right to privacy.

The personal information trade also enables a special kind of telemarketing called “pre-acquired account telemarketing.” Pre-acquired account telemarketing occurs when a telemarketer calls you with the ability to charge your credit card or bank account already in their hand. Unlike most telemarketers, these companies have acquired the ability to charge your account for the product that they are selling before they call you. A typical telemarketing sale not involving pre-acquired accounts requires that you provide a credit card or other account number to the telemarketer, send a check, or sign a contract in a later transaction. Providing a signature or an account number—like paying cash—is a readily recognizable way for you, as the buyer, to give your consent or assent to a deal.

Pre-acquired account telemarketing removes your ability to control when you have agreed to a purchase. Instead, the telemarketer controls the method by which you provide “consent” to the transaction, making the determination

whether you have actually consented to the deal. This puts the telemarketer in a privileged position, such that he or she can charge your bank account or credit card in situations where you would never have voluntarily provided your account number to the caller.

Identity Theft

Identity theft occurs in a variety of ways and has different labels. Two key variations are commonly referred to by law enforcement as “true name” or “true party” frauds and “account takeover” frauds.

“True Name” or “True Party” Fraud

With “true name” or “true party” fraud, the thief pretends to be you. The thief uses pieces of your identity to obtain new credit cards from banks and retailers, open checking and savings accounts, apply for loans, establish accounts with utility companies, or rent an apartment. The thief can ultimately ring up a tab worth thousands of dollars—all in your name.

“Account Takeover” Fraud

In an “account takeover” fraud, the thief steals your money and/or assets. The thief obtains enough personal information about you to gain access to existing credit or bank accounts. Thieves impersonating you contact creditors and banks to order additional cards on the account and have the cards sent to their address instead of yours. The thief may also file a change of address with the postal service to divert any newly ordered credit cards or checks into his or her hands.

Identity theft is usually more complex than an ordinary case of credit card fraud. Armed with just one or two pieces of identifying information, such as your birth date or address, a thief can assume your financial identity, access your existing accounts, and obtain a wide range of services and benefits in your name.

Identity Thieves

Interviews with victims of identity theft and experts have revealed a wide range of thief profiles. Identity thieves may be friends, relatives, co-workers, employees at companies or organizations with personal information about you in their databases, and, worst of all, total strangers.

Victims of Identity Theft

Creditworthy consumers with high incomes are the preferred target of identity thieves, but almost anyone is a potential victim. It is impossible for you to totally eliminate the possibility of falling victim to identity fraud. To lessen the chance of becoming a victim, keep a tight rein on your personal information, get off telemarketing lists, stop businesses from sharing your private information, dispose of sensitive documents safely, and closely monitor your finances.

Legal Protections Against Identity Theft

Under Minnesota and federal law, a person who knowingly transfers, possesses, or uses an identity that is not the person’s own to further any unlawful activity is guilty of felony identity theft. In Minnesota, the maximum prison term and/or fine for violating the identity theft statute is 20 years, and the actual sentence varies depending on

the number and type of victims and amount of money stolen. Though laws exist to help prosecute identity theft, prevention is better. The following are some of the laws that provide protection against identity theft:

- **The Federal Fair Credit Reporting Act** establishes procedures for correcting mistakes on your credit report and requires that your record only be provided for legitimate business purposes.
- **The Fair Credit Billing Act** establishes procedures for resolving billing errors on your credit card accounts. The act provides the most important protection for victims of identity theft. If you notify your card issuer at the address given for “billing inquiries” within 60 days after you receive a bill with an error, the act allows you to dispute the erroneous charge.
- **The Truth in Lending Act** limits your liability for unauthorized credit card charges on lost or stolen cards to \$50 per account. If you notify your card issuer before the thief’s unauthorized use, your liability will be \$0. If a company tries to sell you a credit card “protection” against unauthorized charges, you don’t need it—federal law already protects you from significant monetary liability.
- **The Electronic Funds Transfer Act** provides protection for all transactions using your debit card or many other electronic means to debit or credit a bank account. It also limits your liability to \$500 for unauthorized electronic fund transfers.
- **The Identity Theft and Assumption Deterrence Act** was enacted to address identity theft. Specifically, the statute makes it a federal crime when a person “knowingly transfers, possesses, or uses, without lawful authority, a means of identification of another person with the intent to commit or to aid or abet or in connection with any unlawful activity that constitutes a violation of federal law or that constitutes a felony under any applicable state or local law.” Similarly, Minnesota Statutes section 609.527 makes identity theft a crime.

Your Personal Information Is Not as Safe as You Think

Today, personal financial information is widely accessible through a variety of sources. Identity thieves legally obtain much of the information they need to commit identity theft. Often, additional information is obtained illegally but at low risk and low cost.

Credit Bureaus

The three major credit bureaus—Experian, Equifax, and TransUnion—and other credit reporting agencies, produce hundreds of millions of credit reports each year. The reports include a wealth of personal information about you, including your date of birth, addresses, Social Security number, credit account information, public records, and employment data.

Credit reports are easy for unauthorized people to get. All a thief needs is your name, Social Security number, and a current or previous address. Credit bureaus, to their credit, only send reports to the current address displayed on the report. However, thieves anticipate this move by sending a creditor a pre-approved credit offer using your name and the thief’s address. The credit reporting system is designed to automatically update your file, so the report is sent to the thief instead of you. The thief then has all the information he needs to steal your identity.

Easy Access to Credit

In the United States today, credit is easier to obtain than ever. We expect quick loans, which enable us to grab a surprise bargain or finance an emergency. Easy credit makes for easy crime. The credit approval process often amounts to little more than matching two bits of information on an application—a name and a Social Security number—with a credit report.

Social Security Numbers as Universal Identifiers

When Social Security numbers were first issued in 1936, the federal government assured the public that use of the numbers would be limited to Social Security programs. Today, however, the Social Security number is the most frequently used recordkeeping number in the United States. Social Security numbers are used for employee files, medical records, health insurance accounts, credit and banking accounts, university ID cards, and many other purposes. In fact, a Social Security number is now required for dependents over one year of age.

Computer records have replaced paper filing systems in most organizations. Since more than one person may share the same name, accurate retrieval of information works best if each file is assigned a unique number. Many businesses and governmental agencies believe the Social Security number is tailor-made for this purpose. Because your Social Security number is frequently used as your identification number in business and government computer databases, information about you in one database is easily linked to other databases that contain different types of private information. Using your Social Security number as a universal identifier makes it possible for identity thieves to gain a more complete picture of your financial records and personal information.

Private Information Check List

What Is a Credit Bureau?

A credit bureau is a clearinghouse for credit history information. Creditors provide the bureaus with information about how their customers pay their bills. The bureaus assemble this information, along with public record information obtained from courthouses around the country, and turn this data into a “file” on each consumer. In return, creditors can obtain credit reports about consumers who wish to open accounts with their business or organization.

There are more than 400 local and regional credit bureaus throughout the United States. Most credit bureaus are either owned by, or are under contract with, one of the nation’s three major credit bureaus—Experian, TransUnion, and Equifax. These national agencies each maintain centralized databases containing the credit records of more than 200 million Americans. Credit bureaus generate more than 3 billion reports per year.

What Is in a Credit Report?

Credit reports are a gold mine of information about you. Your credit report is based on information supplied over time by creditors, including:

- **Identification and Employment Data:** Your name, address, birthdate, Social Security number, employer, and spouse’s name are commonly listed. The credit bureau may also include additional information, such as your employment history, home ownership, income, and previous addresses.

- **Credit History:** Your current and previous accounts are listed, along with your credit limits, balances, payment history, and how long the accounts have been open.
- **Inquiries:** The credit bureaus maintain a record of all creditors who have requested your credit report within the last six months.
- **Public Records:** Public information that relates to your credit-worthiness (bankruptcies or tax liens) are listed.

Federal and state laws restrict who has access to your sensitive information and how it can be used. Anyone with a “legitimate business purpose” can gain access to your credit history, including those considering granting you credit, landlords, insurance companies, employers and potential employers, and companies with which you have a credit account.

Certain pieces of information cannot be included in your credit report:

- Medical information (unless you give your consent);
- Negative information, including a bankruptcy that is more than 10 years old;
- Debts that are more than 7 years old; and
- Information about your gender, race, religion, or political affiliation.

How Do I Get My Free Annual Credit Report?

Experts recommend looking at your credit report every year and before making a major purchase. Every year, consumers can get a free credit report from each of the credit agencies—Equifax, TransUnion, and Experian. The credit bureaus have created a centralized website, toll-free telephone number, and mailing address for consumers to order their reports. Annual reports may be requested the following ways:

1. Log on to www.AnnualCreditReport.com
2. Call: (877) 322-8228
3. Write to: Annual Credit Report Request Service, P.O. Box 105281, Atlanta, GA 30348-5281

Although consumers can only receive their Free Annual Credit Report once per year, consumers may still request additional reports. Minnesota law allows you to purchase another credit report once a year for \$3 from each of the credit bureaus, separately. You are also entitled to one free copy of your report each year if:

1. You’re unemployed and plan to look for a job within 60 days;
2. You’re on welfare; or
3. Your report is inaccurate because of fraud.

In addition, there is no charge for the report if a company takes adverse action against you, such as denying your application for credit, insurance, or employment, and you request your report within 60 days of receiving notice of the action. To order your credit report, contact one or more of the three national credit bureaus:

Equifax
P.O. Box 749241
Atlanta, GA 30348
(800) 525-6285
www.equifax.com

Experian
P.O. Box 2002
Allen, TX 75013
(866) 200-6020
www.experian.com

TransUnion
P.O. Box 1000
Chester, PA 19022
(800) 888-4213
www.transunion.com

Beware of “Look-alike” Websites

Be alert for websites that claim to offer free credit reports, when their real purpose is to sign you up for a paid service. For example, some websites offer “free” credit reports but also enroll people in paid services, which, if not cancelled, will incur a recurring monthly fee. The official website for ordering your free credit report is www.AnnualCreditReport.com. There is no other official website for ordering your free credit report.

Dispute Errors in Your Credit Reports

Many credit reports contain mistakes, ranging from misspelled names to accounts that the consumer never opened. You should dispute such errors in writing with the company and the credit bureaus. Under the Fair Credit Reporting Act, the credit bureaus must investigate disputes within 30 days and must remove all inaccurate information. If you disagree with the results of the investigation, you may send a written statement explaining your side to the credit bureau, which will be included in future credit reports at your request.

What Is Your Social Security Statement?

Your Social Security statement provides a statement of past earnings and an estimate of future benefits you will receive from Social Security. The statement shows how much you’ve paid into Social Security over your working years. The statement also shows how much you can expect to receive when you retire or if you become disabled. You can also determine from the statement how much your family is entitled to receive if you die. The Social Security Administration recommends that you check your Social Security earnings at least once every three years. After that it becomes more difficult to trace the earnings. A Social Security statement is available upon request. To get a statement, call the Social Security Administration’s toll-free number at (800) 772-1213 or TTY: (800) 325-0778.

What Is on My Driving Record?

The Minnesota Department of Public Safety’s (DPS) Driver and Vehicle Services division keeps records on drivers (such as driver’s license and driver history information) and about vehicles (such as ownership information). Information stored about you includes your name, address, Social Security number, physical description (height, weight, eye color), date of birth, status of your driver’s license, whether corrective lenses are needed for driving, and if you are an organ donor. In addition, a record is kept of any moving violations that you are convicted of and whether you have medical conditions that may affect driving.

Who Can Get the Information in My Driving Record?

DPS restricts access to your driving record unless you expressly consent or federal law authorizes such access. You may allow entities, including businesses, to access your driving record by checking a box on your driver’s license or vehicle registration application. If you do not check the box, only those entities authorized by federal law may access your record.

Your driver's license photograph, Social Security number, and medical and disability information receive heightened protection. Without your consent, that information can be released only for use by government agencies (such as law enforcement), for use by insurers to investigate claims or fraud, for use by an employer to verify that you have a commercial driver's license, or for use in legal proceedings.

Most of the remaining data in your driving record is less protected. That data can be released without your consent not only to government agencies, insurers, employers, and in legal proceedings for the purposes above, but also to:

- Auto manufacturers, for uses related to auto safety, theft, emissions, alterations, recalls, advisories, market research, and performance monitoring;
- Legitimate businesses, but only in the normal course of business to verify the accuracy of personal information you submitted so as to prevent fraud or recover a debt;
- Researchers, to publish statistical reports that do not identify individuals;
- Towing companies, to notify owners of towed or impounded autos;
- Toll companies, to operate private toll transportation facilities (if Minnesota had such facilities);
- Licensed private investigators or security services, for any of these purposes; or
- Any person who has obtained your written consent.

However, if a person or business requests your driving record for a purpose other than one permitted above (by federal law), then DPS will not release your driving record unless you have expressly consented by checking a box on your license or ownership application renewal. Thus, without your consent, no commercial or business firms can access your record to add your name to direct-mail, telemarketing, or survey lists.

What Is in My Medical Information Report?

Medical records are created when you receive treatment from a health professional, such as a physician, nurse, dentist, chiropractor, or psychiatrist. Records may include your medical history, details about your lifestyle (such as smoking or involvement in high-risk sports), and family medical history. In addition, your records contain laboratory test results, medications prescribed, and the results of surgery and other medical procedures.

A wide range of people, in and out of the health care industry, may access your medical information. Generally, access to your records is obtained when you agree to let others see them. You probably signed a blanket waiver or general consent form at some point when you obtained medical care. When you sign such a waiver, you allow the health care provider to release your medical information to insurance companies, government agencies, and others.

MIB Group, Inc. (MIB) is an organization that compiles a central database of medical information about millions of Americans and Canadians. More than 400 insurance firms use the services of MIB, primarily to obtain information about life insurance and individual health insurance policy applicants. You are entitled to a free medical record disclosure once a year. You can get a copy by calling MIB toll-free at (866) 692-6901 or online at www.mib.com. For other questions or to correct your report, write to:

MIB Group, Inc.

50 Braintree Hill Park, Suite 400, Braintree, MA 02184-8734

(866) 692-6901

www.mib.com

Sale of Personal Information by State and Local Governments

Public records containing personal information such as homeowners' documents, police and court records, utility records, and marriage and divorce records have always been available for sale in paper form. Now these records can be obtained online and used for fraudulent purposes—all without leaving behind a paper trail. Public databases can also be accessed directly from many government computers and through commercial database vendors.

Businesses and Other Organizations with Information About You

It is not just the government or creditors that collect and distribute information about you and your buying practices. Banks, insurance companies, charities, and others have personal information about you that you may not want other people to know. You should compile a list of the businesses and organizations that have information about you. When forming new relationships with an organization or company, ask what will be done with your information and who will have access to it. Information is power in our society. Knowing who has what information about you allows you some control over how that information is used. Don't hesitate to let companies and organizations know you expect them to respect your privacy.

How to Lessen Your Risk of Being a Victim ———

Unfortunately, there is no way to completely protect yourself from having your identity stolen, but limiting access to your information can help reduce the risk. Follow these suggested steps to better protect your private data.

Remove Your Name from Marketing Lists

You may remove your name, or "opt-out," from marketing or promotional lists maintained by credit bureaus and other organizations with which you have a relationship.

Credit Bureaus

When reviewing your mail you probably noticed a number of pre-approved credit offers with other junk mail. The credit bureaus offer a toll-free number to "opt-out" of having pre-approved credit offers sent to you for five years or permanently. When credit offers are thrown in the trash, they are a potential target for thieves. To "opt-out" of receiving pre-approved credit offers you may call (888) 5-OPTOUT ((888) 567-8688) or log on to www.optoutprescreen.com for more information.

In addition, notify the three major credit bureaus that you do not want your personal information shared for promotional purposes. To limit the amount of information credit bureaus share about you, write your own letter or use the sample letter provided in the back of this publication on page 28 to notify the credit bureaus of your request. Send your letter to the following addresses:

Equifax
Information Services
P.O. Box 740123
Atlanta, GA 30374-0123

Experian
Attn: Opt-out Services
P.O. Box 80128
Lincoln, NE 68521

TransUnion
Opt Out Request
P.O. Box 505
Woodlyn, PA 19094

Data & Marketing Association

The Data & Marketing Association (DMA) is a trade association of catalogers, financial services firms, publishers, book and music clubs, online service companies, and others involved in direct and database marketing. To “opt out” of DMA mailing lists (other companies may continue to contact you) for up to three years, visit DMA’s website, www.dmachoice.org, or send your own request or use the sample letter on page 28 with your complete name (including variations), mailing address, email address, and signature, along with a check or money order made out to “DMA” in the amount of \$3 to:

Data & Marketing Association

DMAchoice
P.O. Box 900
Cos Cob, CT 06807
www.dmachoice.org

Federal law forbids a telemarketer to call you once you have asked to be put on that telemarketer’s “do not call” list. A telemarketer who ignores your request can be held responsible for up to \$500 in damages per call and \$1,500 per willful violation. Thus, if you do not want to be called in the future, you should tell the telemarketer that you want to be placed on that telemarketer’s “do not call” list and that you know you are entitled under federal law to \$500 per call after your request.

You should also take an inventory of banks, charities, and other organizations with which you do business. Write to these organizations telling them not to sell or give out your name. You may use the sample letter provided on page 28. If you think your name has been sold, send a letter to the company or organization and complain. Ask for the list of businesses or charities that bought your name and information. Then, write to these organizations and ask them to put you on their “do not mail” and “do not sell” lists.

The National Do Not Call Registry

The Federal Trade Commission registers consumers on a national “do not call” list. You may register up to three phone numbers at one time (including your cell phone number) by visiting www.donotcall.gov. You may register one phone number at a time (including your cell phone number) by calling (888) 382-1222, but you must call from the phone number you want to register. Your phone number will remain on the registry permanently unless you later delete it from the registry. Telemarketers covered by the National Do Not Call Registry have up to 31 days from the date you register to stop calling you.

Some calls are exempt from the Do Not Call law. Examples of exempt calls include:

1. Calls from—or on behalf of—political organizations, charities, and telephone surveyors;
2. Calls from companies with which you have an existing business relationship; and
3. Calls from companies you’ve given permission to call.

Don't Be an Easy Target

When you pay bills, don't leave the envelopes containing your checks at your home mailbox for the postal carrier to collect. If stolen, your checks can provide valuable information to a thief or be altered and cashed. Your credit card payments, if acquired by a thief, contain all the information needed to steal your identity. Also, consider installing a locked mailbox at your residence to reduce the possibility of mail theft. You should also take the following steps:

- When you order new checks from your financial institution, remove extraneous information such as your middle name, phone number, Social Security number, or driver's license number. The fewer pieces of identifying information you have on your checks the better.
- When creating passwords and personal identification numbers (PINs), do not use any combination of numbers that could be easily detected by thieves. Don't use the last four digits of your Social Security number, your birth date, middle name, mother's maiden name, address, or consecutive numbers.
- Don't toss credit card convenience checks or pre-approved credit offers in your trash or recycling bin without first tearing them into small pieces or shredding them. These solicitations can be used by "dumpster divers" to cash the checks or order credit cards in your name. Do the same with other sensitive information like credit receipts, bank statements, and important bills you do not retain for your records.
- Store your canceled checks in a secure place. In the wrong hands, checks could reveal a lot of information about you, including your account number, telephone number, and driver's license number. Never permit your credit card number to be written on your checks by a merchant. (It is illegal in Minnesota for any merchant to write your credit card number on your check when you are completing a purchase.)
- Carefully review your credit card statements and phone bills for unauthorized charges or fraudulent use. Scrutinize your local, long distance, and cell phone bills each month and report any unauthorized use to your service provider. You may contact your local telephone company to verify your long distance carrier and request a "PIC Freeze" on your account so it cannot be changed without your specific authorization. If you would like more information on a PIC Freeze, telephone billing, and how to avoid phone fraud, the Minnesota Attorney General's Office offers a free publication entitled *The Phone Handbook*.

Be Smart with Credit Cards

Check for fraudulent use of your credit accounts. The most important step to safeguarding your identity is to monitor your credit card statements and credit report.

- Once a year, order a free copy of your credit report from each of the three largest credit bureaus. Reduce the number of credit cards you actively use. Carry only one or two credit cards in your wallet or purse and cancel all others. Unused cards should be canceled because, even though you don't use them, the numbers are recorded on your credit report and can be used by identity thieves.

- Don't give out your credit card number or other personal information over the phone unless you know with whom you're doing business. Even then, before revealing any personal information, find out how it will be used or shared with others.
- Always take credit card and ATM receipts with you when you make a purchase or withdrawal. Monitor your mail when you are expecting a new credit card that you have applied for or a reissued credit card that has expired. Contact the issuer right away if the card does not arrive on the date expected.

Shop Smartly Online

The Internet puts vast information at your fingertips. With a click of a button, you buy an airline ticket, book a hotel, send flowers to a friend, or purchase stock. Before you shop, consider the following safety tips.

- **Use a secure browser.** A browser is software you use to navigate the Internet. Your browser should comply with industry security standards. These standards encrypt or scramble the purchase information you send over the Internet, ensuring the security of your transaction. Most computers come with a browser installed, though you may also download some browsers for free. Look for "https://" (the "s" is for secure) before the web address, because this indicates that the website and Internet connection are secure.
- **Shop with companies you know.** Anyone can set up shop online under almost any name. If you're not familiar with a merchant, ask for a paper catalog or brochure to get a better idea of their merchandise and services. Determine the company's refund and return policies before you place an order.
- **Check the company's online privacy policy.** Many companies post a "privacy policy" on their website. The privacy policy should disclose what information is being collected on the website, as well as how that information is being used. Before you provide any merchant with personal information, read its privacy policy. If you can't find a policy, send an email or written message to the merchant's site to get one.
- **Make sure you're at the correct website.** Online merchants may have links to other webpages selling the same product. For instance, you might go to an online bookstore to shop for a particular book and, in the course of your shopping, click on a link to "learn more about the author." The link might take you to the author's homepage where you can also order the book. You might inadvertently buy the book from the author rather than from the original bookstore, and then be bound by privacy and return policies you haven't read. Before you order a product online, be sure to check the URL (the address at the top of the page) to ensure that you are on the correct website.
- **Disclose only necessary personal information.** Don't disclose personal information, such as your name, address, telephone number, email address, or Social Security number, until you know who is collecting the information, why they are collecting it, and how they will use it. If disclosure of personal information is necessary (e.g. to deliver a product you buy), then disclose only the amount of personal information that is required to complete the transaction. If you have children, teach them to check with you before giving out personal or family information online.

- **Pay by credit or charge card.** If you pay by credit or charge card online, some companies let you pay bills and check your account status online. Before you sign up for any service, evaluate how the company is securing your financial and personal information. Many companies explain their security procedures on their website, often in their “privacy policy.” If you don’t see a security description, call or email the company and ask.
- **Keep a record.** Be sure to print a copy of your purchase order and confirmation number for your records. Since the Federal Mail or Telephone Order Merchandise Rule covers orders made online, your merchandise must be delivered to you within 30 days. If there are delays, the company must notify you.
- **Opt-out of information sharing.** Many companies now give you a choice on their website, often as part of their “privacy policy,” as to whether and how your personal information is used. These companies allow you to decline—or to “opt-out” of—having personal information such as your email address used or shared with other companies. Exercise this option to reduce access to your personal information.
- **Keep your passwords private.** Be creative when you establish a password, and never give it to anyone. Avoid using a telephone number, birth date, or a portion of your Social Security number. Instead use a combination of numbers, letters, and symbols.

Freezing Your Credit Report

Minnesota law helps consumers protect themselves from new account fraud by allowing any consumer to freeze his or her credit report by simply contacting a consumer reporting agency and requesting a credit report freeze. A credit report freeze will deny identity thieves access to the consumer’s credit history and prevent them from obtaining new credit cards or loans under the consumer’s name.

Any Minnesotan can impose such a freeze on his or her personal credit report for any reason. There is no charge for placing a security freeze. When a credit reporting agency receives a freeze request, it must place the freeze within three days of the request, and provide a unique PIN to the consumer within 10 days of the request.

The consumer may then use the PIN to temporarily lift or “thaw” his or her report for a specific period of time or for a specific creditor. For example, suppose that you are looking to purchase a new car. If you know that you want to buy the car from Dealership XYZ, you may contact the credit reporting agencies and allow that specific dealership to access your credit report. Or you may request that your credit report be accessible to any creditor for a specific period of time, such as 30 days, to give you time to shop at several dealerships. After the specified time, your credit report will automatically refreeze.

Be sure to keep the PIN in a safe place. If you forget your PIN, it may delay your ability to obtain credit.

Because different credit issuers may use different credit reporting agencies, you will need to freeze your credit report with each of the three major credit reporting agencies. Each of the three credit reporting agencies has its own process for taking credit freeze requests.

For instructions on how to request a credit freeze, consumers may contact the credit reporting agencies as follows:

Equifax Security Freeze

P.O. Box 105788
Atlanta, GA 30348
(800) 349-9960
www.freeze.equifax.com

Experian Security Freeze

P.O. Box 9554
Allen, TX 75013
(888) 397-3742
www.experian.com/freeze

TransUnion Security Freeze

P.O. Box 2000
Chester, PA 19016
(888) 909-8872
www.transunion.com/securityfreeze

Credit report freezes are helpful in the fight against identity theft. You can be proactive in protecting yourself from its expensive, time-consuming consequences by freezing your credit report.

Plan Ahead

When your credit file is frozen, no one will be approved for new credit in your name. In order for you to obtain new credit, you must use your PIN and contact the credit reporting agencies to thaw your file. While credit reporting agencies are to thaw credit reports in an expedited manner, thawing your file may take up to three business days. Be sure to plan ahead and temporarily thaw your credit file before applying for credit.

What To Do if You're a Victim

The harm to victims of identity theft can be significant and long lasting. The perpetrators of these crimes severely damage your good name and your credit rating. It's up to you to clean up the mess. Until you do, you may be denied loans, a mortgage, security clearances, promotions, and employment.

Act quickly and assertively to minimize the damage. When you deal with the authorities and financial institutions, keep a detailed log of all conversations, including dates, names, and phone numbers. Note the time spent and any expenses incurred. Confirm conversations in writing. Send all correspondence by certified mail (return receipt requested) and maintain copies of all letters and documents.

Take Action Immediately

It would be convenient if there was a central number you could call to correct problems once your identity has been stolen. In the absence of a cure-all, acting quickly is the best way to minimize the damage and get you back on the right track.

Place a Fraud Alert in Your Credit Reports

Waste no time in contacting the three major credit bureaus to request that a fraud alert be placed in your credit reports and that a note be included to inform potential creditors that you should be contacted before any additional accounts are opened. To request that a fraud alert be placed in your credit report, you may contact the three major credit bureaus toll-free as follows:

Equifax:
(800) 525-6285

Experian:
(888) 397-3742

TransUnion:
(800) 680-7289

Contact Banks and Creditors

Immediately contact the security or fraud divisions of any companies that maintain a credit or bank account for you. Close all accounts that you believe have been compromised by the identity thief and change account numbers for each account you don't cancel. Request that the creditors make your accounts accessible only through use of a password. Banks and creditors may ask you to complete and notarize fraud affidavits, which can be costly. If this is the case, ask for the bank or creditor to pay the notary fee, because the law does not require that you provide one. A written statement from you and supporting documentation should be sufficient. Report burdensome bank or creditor requirements to federal regulators.

Report the Crime

Report the crime and file a report with your local police or sheriff as soon as you are aware of the theft. Keep a copy of the incident reports you filed for your records. A law enforcement record of the incident is important because it will allow you to present your creditors and banks with proof of the crime. File a report with the Federal Bureau of Investigation and the U.S. Secret Service. Also file a complaint with the Federal Trade Commission (FTC) and ask for a complaint number for your records. The FTC monitors identity fraud and educates consumers about the crime. You may contact these agencies as follows:

Federal Bureau of Investigation

Minneapolis Office
1501 Freeway Boulevard
Brooklyn Center, MN 55430
(763) 569-8000
www.fbi.gov

United States Secret Service

Minnesota Electronic Crimes
Task Force
300 South Fourth Street, Suite 750
Minneapolis, MN 55415
(612) 348-1800
www.secretservice.gov

Federal Trade Commission

Identity Theft Data Clearinghouse
600 Pennsylvania Avenue NW
Washington, DC 20580
(877) 382-4357
TTY: (866) 653-4261
www.ftccomplaintassistant.gov

Keep Detailed Records

Keep detailed records of all interactions and contacts you have with businesses, creditors, and governmental agencies while you are reclaiming your identity. Be sure to follow up in writing and send all letters "return receipt requested" so you know your correspondence was received and by whom. Detailed records will be important later if you choose to bring an action in court to recover damages. Keeping good records also provides a written history of conversations so you don't forget important events.

Cancel Stolen Checks

If the thief steals your checks or sets up fraudulent bank accounts in your name, report it to each of the major check verification companies. Ask for stop payments on any outstanding checks that you dispute and cancel or obtain new numbers for your checking and savings accounts. Contact information for several companies that maintain files related to deposit accounts follows:

Chexsystems	Certegy Check Service	Global Payments	TeleCheck
Attn: Consumer Relations	(previously Equifax Check	6215 West Howard Street	Forgery Department
7805 Hudson Road,	Systems)	Niles, IL 60714	P.O. Box 4451
Suite 100	P.O. Box 30046	(800) 638-4600	Houston, TX 77210-4451
Woodbury, MN 55125	Tampa, FL 33630-3046		(800) 280-7196
(800) 428-9623	(800) 237-3826		

Cleaning Up the Mess

After you have completed the initial work to recover your identity, take control of the situation by completing this checklist to deal with the most common forms of identity theft.

Contact the Post Office

Check for fraudulent change of address requests and mail fraud. If you suspect that an identity thief has filed a change of address request for you with the post office, notify the U.S. Postal Inspector. Mail theft is a felony in the United States. You should request that the postal inspector forward all mail in your name to your address.

Review Regular Bills

Review your monthly bills, including utilities, cellular phone, long distance, gas, and electric, to ensure that you have not incurred any fraudulent charges. Contact each company and report the fraud. Again, be sure to follow up all contacts in writing and maintain a copy for your records.

Watch for Social Security Number Misuse

If you think someone may have misused your Social Security number, contact the Social Security Administration and request a copy of your Social Security statement. You should follow up with the Social Security Administration if you find any fraudulent use of your number that changes your earnings and benefit eligibility. As a final option, you may consider changing your Social Security number if you establish that someone else is using your number. The Social Security Administration will change your number only if you fit specific criteria. For more information about the criteria to change your Social Security number, request this federal government fact sheet: *Identity Theft And Your Social Security Number, SSA Pub. No. 05-10064*.

Report Passport Theft

If you are the victim of identity theft and have a passport, notify the passport office in writing. Ask the office to be vigilant for anyone using your name to fraudulently obtain a new passport.

Clear False Criminal or Civil Judgments

Sometimes victims of identity theft are wrongfully accused of crimes committed by the impostor. If a civil judgment has been entered against you for actions taken by the identity thief, contact the court where the judgment was entered and report that you have been a victim of identity theft. If you are wrongfully prosecuted for criminal charges, contact the Federal Bureau of Investigation (FBI). Request information from the FBI about how to clear your name.

Attack Credit Report Fraud

If you find that there has been unauthorized access or use of your credit report, contact the Federal Trade Commission to determine your rights under the Federal Fair Credit Reporting Act.

Federal Trade Commission
Consumer Response Center
600 Pennsylvania Avenue NW
Washington, D.C. 20580
(877) 382-4357
TTY: (866) 653-4261
www.ftccomplaintassistant.gov

Get Legal Help

You may want to consult a private attorney to determine what legal action to take against credit grantors and/or credit bureaus if they will not remove fraudulent entries from your credit report or if negligence is a factor. An attorney may be able to help you recover from the fraud and determine whether your rights have been violated. The Attorney General's Office offers a free publication entitled, *Hiring an Attorney*, which has more information. If you cannot identify an attorney to represent you, you may contact the Minnesota State Bar Association's Attorney Referral Service as follows:

Minnesota State Bar Association
Attorney Referral Service
www.mnfindalawyer.com

Residents of Dakota, Hennepin, and Ramsey counties may also call the following numbers for attorney referrals:

Dakota
(952) 431-3200

Hennepin
(612) 752-6666

Ramsey
(651) 224-1775

Contact Your Representatives

Additional laws dealing with privacy protection may currently be under consideration by the state legislature and Congress. If you are not happy with current privacy protections and fraud laws, contact your local, state, and federal representatives to voice your concerns. You may find contact information for your state and federal representatives by using the Legislative Coordinating Commission's lookup tool, which is available online at www.gis.leg.mn/iMaps/districts/.

Don't Give Up

Stand up for your rights. You cannot be held responsible for checks cashed or any bills that are the result of the theft of your identity. You should not live under the fear of legal action being brought against you. Your credit rating should not be affected permanently. Don't let businesses, collection agencies, or banks pressure you into paying any bill that is not your responsibility. Let them know you are willing to cooperate to resolve the situation, but don't let anyone take advantage of you.

Resources

Glossary of Terms

Account Takeover Fraud: A form of identity theft in which an identity thief impersonates you to steal money or assets from your existing credit or bank accounts.

Credit Bureau: A clearinghouse of credit history information. Credit bureaus assemble information provided by creditors regarding how their customers pay their bills into credit reports.

Credit History: A record of how you have used credit over time. This is usually reported by the credit bureaus in the form of a credit report.

Credit Report: Information provided by a credit bureau to someone with a legitimate business purpose. Your credit report details how you have borrowed and repaid debts.

Credit Report Freeze: A credit freeze denies identity thieves access to your credit history and prevents them from obtaining new credit cards or loans in your name. You can impose a credit report freeze for any reason.

Identity Theft: The use of another person's identity or personal information to commit fraud.

Mass Marketing: A form of marketing in which a product or service is advertised to a large, wide-ranging group of people.

Personal Information: Information that can be used to identify an individual (e.g., name, address, telephone number, date of birth, driver's license number, Social Security number, etc.).

Personal Marketing: A form of marketing in which a product or service is advertised to a small, targeted group of people.

Pre-Acquired Account Telemarketing: A form of telemarketing in which the telemarketer calls you with the ability to charge your credit card or bank account before they call you.

Pre-Approved Credit Offer: An offer of credit made to a consumer who meets certain criteria, such as a minimum credit score, based on information obtained from the credit bureaus. You may opt-out of such offers for five years or permanently.

Social Security Number: An individualized, nine-digit number used to track Social Security benefits. It is also the most frequently used number for recordkeeping in the United States.

Social Security Statement: A statement that provides a record of past earnings and an estimate of future benefits you will receive from Social Security.

True Party Fraud: A form of identity theft in which an identity thief uses your personal information to obtain new credit cards, open bank accounts, or apply for loan, among other things.

Sample Letter to Request a Security Freeze

You will need to freeze your credit report with each of the three major credit reporting agencies.

Date: _____

[Credit Reporting Agency and Address]

Dear [Credit Reporting Agency],

I would like to place a security freeze on my credit file.

My name is: _____

My former name was (if applies): _____

My current address is: _____

My address has changed in the past 5 yrs. My former addresses were:

My Social Security number is: _____

My date of birth is: _____

I have enclosed photocopies of a government issued identity card AND proof of residence such as a utility bill or phone bill

Attached is the required documentation.

Yours truly, [Your name]
