RE: Elective State Officers Retirement Plan

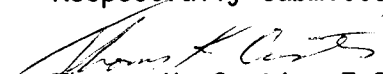

Commission Members:

Pursuant to the terms of our Actuarial Services Contract, we have performed an actuarial valuation of the Fund as of July 1, 1993.

The results of our calculations are set forth in the following report, as are the actuarial assumptions upon which our calculations have been made. We have relied on the basic employee data and asset figures as submitted by the Minnesota State Retirement System.

On the basis of the foregoing, we hereby certify that, to the best of our knowledge and belief, this report is complete and accurate and has been prepared in accordance with the requirements of Section 356.215, Minnesota Statutes, and the requirements of the Standards for Actuarial Work, adopted by the Commission on July 8, 1992.

Respectfully submitted,

  
 Thomas K. Custis, F.S.A., M.A.A.A.  
 Consulting Actuary

## ELECTIVE STATE OFFICERS RETIREMENT FUND

### COMMENTARY

#### Purpose

The purpose of this valuation is to determine the financial status of the Plan. In order to achieve this purpose, an actuarial valuation is made at the beginning of each fiscal year as required by Section 356.215 of Minnesota Statutes.

#### Report Highlights

The financial status of the Plan can be measured by three different funding ratios:

- The Accrued Benefit Funding Ratio is a measure of current funding status and, when viewed over a period of years, presents a view of the funding progress. It is based upon benefits which have been earned by service to the valuation date. This year's ratio is 12.64%. The corresponding ratio for the prior year was 14.72%.
- The Accrued Liability Funding Ratio is also a measure of funding status and funding progress. It is based on the actuarial cost method that has historically been used by the State. For 1993 the ratio is 11.97%, which is a decrease from the 1992 value of 14.03%.
- The Projected Benefit Funding Ratio is a measure of the adequacy or deficiency in the contribution level. This year's ratio of 19.46% shows that the current statutory contributions are inadequate.

Under current law, the state is required to fund the remaining full liability for retirements as they occur. The funding ratios shown here do not reflect the anticipated contributions arising from this requirement.

) Asset Information (Tables 1 and 2)

Minnesota Statutes require that the asset value used for actuarial purposes recognize only a third of the unrealized gains and losses. This requirement exists because market values (which include all unrealized gain and losses) are typically volatile and can produce erratic changes in the contribution requirements from year to year.

The calculation of the Actuarial Value of Assets is shown in Table 1 on lines F1 to F6. It combines the cost value of the Assets Available for Benefits and one-third of the difference between the market value and cost value of those assets. Both the market value and cost value of assets shown in Tables 1 and 2 include the value of member deposits with accumulated interest. Since these "Other Assets" are not separately held apart from the State's general fund it may be argued that these amounts are not assets.

) The term "Actuarial Value of Assets" is used to indicate that the value was determined for use in this actuarial valuation. Since Minnesota Statutes refer to this value as "Current Assets", the latter phrase will be used in the remainder of this report.

This Plan participates in the Minnesota Post Retirement Investment Fund (i.e. MPRIF). After the MPRIF liability has been calculated for each participating Plan, the State Board of Investments, (i.e. SBI), will determine each Plan's portion of the excess earnings for the January benefit increase as well as the Plan's allocated market share of MPRIF.

Actuarial Balance Sheet (Table 8)

An actuarial balance sheet provides a method for evaluating current and future levels of funding.

) The Current Benefit Obligation used to measure current funding levels is calculated in accordance with Statement No. 5 of the Governmental Accounting Standards Board (GASB). Those requirements are:

- For Active Members - salary and service are projected to retirement to determine benefits for each member and the ratio of credited service to total service establishes the portion of the projected benefit to be used in calculating the current funding level.
- For Non-active Members - the discounted value of benefits, including augmentation in cases where benefits have not commenced.

**GASB Disclosure**

The Current Benefit Obligation amounts in Table 8 are required to be disclosed by Statement No. 5 of the Governmental Accounting Standards Board (GASB). However, Statement No. 5 uses the terms "Actuarial Present Value of Credited Projected Benefits" and "Pension Benefit Obligation" rather than "Current Benefit Obligation".

The July 1, 1993 Pension Benefit Obligation reported in Table 8 is reformatted for GASB reporting purposes in the following table:

Retirees and beneficiaries currently receiving benefits and terminated employees not yet receiving benefits	\$1,611,000
Current Employees	
Accumulated employee contributions including allocated investment income	\$401,000
Employer-financed vested	429,000
Employer-financed nonvested	107,000
	-----
Total Pension Benefit Obligation	\$2,548,000
Net Assets Available for Benefits at Cost	\$322,000
Total Benefit Obligation less Assets	\$2,226,000
Funded Ratio	12.64%

)

Actuarial Cost Method (Table 9)

The approach used by the State of Minnesota to determine contribution sufficiency is the Entry Age Normal Actuarial Cost Method. The primary characteristic of this method is that it allocates costs as a level percentage of payroll.

A comparison of this actuarial method (Table 9) to the actuarial balance sheet (Table 8) illustrates the two techniques for allocating liabilities of active Members to past and future. As noted in the prior section, the balance sheet allocates benefits and the corresponding liabilities, on the basis of service. The method used in Table 9 allocates liabilities so that the cost each year will be a constant percentage of payroll. Both approaches, however, calculate the value of all future benefits the same way (see line F of Table 8 and line A6, column 1, of Table 9).

)

An Unfunded Actuarial Accrued Liability is computed under the Entry Age Normal Actuarial Cost Method by comparing the liabilities allocated to past service (Actuarial Accrued Liability) to the Current Assets. This amount, line B3, is funded over the remaining years to the amortization date by a series of payments that remain a constant percentage of payroll each year.

The payments will increase 6.5% each year because that is the assumed rate of increase in payroll. Although the payment schedule will be adequate to amortize the existing unfunded, the lower payments in the earlier years will not be sufficient to cover the interest on the unfunded liability. After a few years, the annual payment will cover the interest and also repay a portion of the unfunded.

Sources of Actuarial Gains and Losses (Table 10)

The assumptions used in making the calculations using the Entry Age Normal Actuarial Cost Method are based on long-term expectations. Each year the actual experience will deviate from the long-term expectation. For a detailed analysis of the major components, refer to Table 10.

)

**Contribution Sufficiency (Table 11)**

This report determines the adequacy of Statutory Contributions by comparing the Statutory Contributions to the Required Contributions.

The Required Contributions, set forth in Chapter 356, consist of:

- Normal costs based on the Entry Age Normal Actuarial Cost Method.
- A Supplemental Contribution for amortizing any Unfunded Actuarial Accrued Liability.
- An Allowance for Expenses.

Table 11 shows the Plan has a contribution deficiency since the Statutory Contribution Rate is 9.00% compared to the Required Contribution Rate of 38.64%. Under current law, the state is required to fund the remaining full liability for retirements as they occur. Therefore, this deficiency is theoretical only; technically, no deficiency exists under a terminal funding structure as long as current requirements are met.

)

It should be noted that if the "Other Assets" of Tables 1 and 2 are excluded from the Actuarial Value of Assets, the contribution deficiency would be larger.

**Changes in Actuarial Assumptions**

The actuarial assumptions listed in Table 12 are the same as those used in the prior valuation, however the allowance for expenses as part of the required contributions of Chapter 356 in Table 11 only reflect administrative expenses and not investment expenses. This did not reduce the required contribution.

**Changes in Plan Provisions**

There were no changes in plan provisions since the prior valuation which impacted funding costs.

**ELECTIVE STATE OFFICERS RETIREMENT FUND  
DETERMINATION OF CONTRIBUTION SUFFICIENCY  
(DOLLARS IN THOUSANDS)**

JULY 1, 1993

	<u>Percent of Payroll</u>	<u>Dollar Amount</u>
A. STATUTORY CONTRIBUTIONS - CHAPTER 352C		
1. Employee Contributions	9.00%	\$42
2. Employer Contributions	0.00%*	0 *
	-----	-----
3. Total	9.00%	\$42
	=====	=====
* Employer contributions are required to cover the portion of the benefit liabilities which are not funded by the member's accumulated contribution at the time of benefit commencement.		
B. REQUIRED CONTRIBUTIONS - CHAPTER 356		
1. Normal Cost		
a. Retirement Benefits	4.55%	\$21
b. Disability benefits	0.00%	0
c. Survivors	0.65%	3
d. Deferred Retirement Benefits	7.15%	33
e. Refunds Due to Death or Withdrawal	2.38%	11
	-----	-----
f. Total	14.73%	\$68
	-----	-----
2. Supplemental Contribution Amortization by July 1, 2020 of UAAL	23.48%	108
3. Allowance for Expenses	0.43%	2
	-----	-----
4. Total	38.64%	\$178
	-----	-----
C. CONTRIBUTION SUFFICIENCY (DEFICIENCY) [A3-B4]	-29.64%	(\$136)

Note: Projected Annual Payroll for Fiscal Year Beginning on July 1, 1993 is \$462.

The deficiency amount shown above is calculated based on reported assets which include a receivable of \$322 for member contributions that are held in the State's general fund. If this amount was not considered as an asset of the fund in these calculations, the deficiency would be 32.84%.

TABLE 12  
(Continued)

**ELECTIVE STATE OFFICERS RETIREMENT PLAN**  
**SUMMARY OF ACTUARIAL ASSUMPTIONS AND METHODS**

<b>Family Composition:</b>	85% of Members are assumed to be married. Female is three years younger than male. Each Member may have up to two dependent children depending on the Member's age. Assume first child born at Member's age 28 and second child born at Member's age 31.
<b>Social Security:</b>	N/A
<b>Benefit Increases After Retirement:</b>	Payment of earnings on retired reserves in excess of 5% accounted for by 5% post-retirement assumptions.
<b>Actuarial Cost Method:</b>	Entry Age Normal Actuarial Cost Method based on earnings and the date the employee entered the plan is applied to all plan benefits. Under this method, Actuarial Gains (Losses) reduce (increase) the Unfunded Actuarial Accrued Liability.
<b>Asset Valuation Method:</b>	Cost Value plus one-third Unrealized Gains or Losses.
<b>Payment on the Unfunded Actuarial Accrued Liability:</b>	A level percentage of payroll each year to the statutory amortization date assuming payroll increases of 6.5% per annum.

**ELECTIVE STATE OFFICERS RETIREMENT PLAN  
SUMMARY OF PLAN PROVISIONS**

<b>Eligibility:</b>	Employment as a "Constitutional Officer".
<b>Contributions</b>	
<b>Member:</b>	9% of salary.
<b>Employer:</b>	No specified statutory contribution rate. State must contribute an amount equal to the full annuity value at benefit commencement less accumulated member contributions.
<b>Allowable Service:</b>	Service while in an eligible position.
<b>Salary:</b>	Salary upon which Elective State Officers Retirement Plan contributions have been made.
<b>Average Salary:</b>	Average of the five highest successive years of salary.

**RETIREMENT**

**Normal Retirement Benefit**

<b>Eligibility:</b>	Age 62 and eight years of Allowable Service.
<b>Amount:</b>	2.5% of Average Salary for each year of Allowable Service.

**Early Retirement Benefit**

<b>Eligibility:</b>	Age 60 and eight years of Allowable Service.
<b>Amount:</b>	Normal Retirement Benefit based on Allowable Service and Average Salary at retirement date with reduction of 0.5% for each month the Member is under age 62 at time of retirement.

**Form of Payment:** Life annuity

**Benefit Increases:** Adjusted by MSRS to provide same increase as MPRIF.

ELECTIVE STATE OFFICERS RETIREMENT PLAN  
SUMMARY OF PLAN PROVISIONS

**DISABILITY** None

**DEATH**

**Surviving Spouse Benefit**

**Eligibility:** Death while active or after retirement or with at least eight years of Allowable Service.

**Amount:** Survivor's payment of 50% of the retirement benefit of the Member assuming the Member had attained age 62 and had a minimum of eight years of Allowable Service. Benefit is paid for life. A former Member's benefit is augmented the same as a De-ferred Annuity to date of death before determining the portion payable to the spouse.

**Surviving Dependent Child Benefit**

**Eligibility:** Same as spouse's benefit.

**Amount:** Benefit for first child is 25% of the retirement benefit (computed as for surviving spouse) with 12.5% for each additional child. Maximum payable (including spouse) is 100% of the retirement benefit. Benefits cease when a child marries or at-tains age 18 (22 if a full-time student).

**Benefit Increases:** Adjusted by MSRS to provide same increase as MPRIF.

**TERMINATION**

**Refund of Contributions**

**Eligibility:** Termination of service.

**Amount:** Member's contributions with 5% interest compounded annually if termination occurred before May 16, 1989 and 6% interest compounded annually if termi-nation occurred on or after May 16, 1989. A de-ferred annuity may be elected in lieu of a refund.

ELECTIVE STATE OFFICERS RETIREMENT PLAN  
SUMMARY OF PLAN PROVISIONS

Deferred Benefit

**Eligibility:**

Eight years of Allowable Service.

**Amount:**

Benefit computed under law in effect at termination and increased by the following annual percentage: 0% before 7/1/79; 5% from 7/1/79 to 1/1/81; and 3% until age 55; and 5% thereafter until the annuity begins. Amount is payable as a normal or early retirement.
