Minnesota Airport Directory

2022

and Travel Guide

Minnesota Public Airports and Seaplane Bases by Associated City

● Public Airport × Public Seaplane Base

Notice to Directory Users

The information contained in this directory was current as of December 2020. This directory (along with up-to-date changes) is also available on our website. Please inform us of corrections and/or additions that come to your attention by phone, e-mail, or by marking the affected page and mailing to:

MnDOT Office of Aeronautics
Attn: Kelly Akhund
395 John Ireland Blvd, MS410
St. Paul, MN 55155-1800
1-800-657-3774
kelly.akhund@state.mn.us

The paper version of this directory was printed in Minnesota on Minnesota-milled paper. If you won't use your paper copy, please consider passing it along to someone who will or sharing with your local airport.

Online Versions Include:

- **PDF:** Visit www.dot.state.mn.us/aero to download and save a PDF. The PDF Airport Directory can be viewed on your computer, tablet or other mobile device.
- **ForeFlight Content Pack:** Visit www.dot.state.mn.us/aero to download a custom content pack to integrate the MN Airport Directory into your ForeFlight mobile app. You can access individual airport information pages directly through the airport procedure tab.
- **AirportFinder App:** Visit www.dot.state.mn.us/aero to access an online mapping application to interact with the Airport Directory information. Users can filter airports by features and amenities and view their relative location on a Minnesota map.

Cover Photo:

The 2022 cover photo was taken by Sada Wensmann, a student pilot. The Piper Apache is owned by Lakes Area Aviation based at Little Falls Airport. Sada's husband Kyle, who is finishing up his CFI, got her interested in aviation. The two of them enjoy flying as a hobby together and like going to EAA AirVenture and breakfast fly-ins during the summer.

This year's cover photo was voted as the winner by you, the users of Minnesota's airports. Follow us on Facebook for details about the 2023 cover photo contest.

Where in Minnesota is AvRep Kelly?

Need something fun to do while sitting at an airport? Flip through your copy of the MN Airport Directory and be on the lookout for MnDOT's own "AvRep Kelly". She's conducting an inspection at one of the airports. Can you find her?

Customs Procedures

Prior to conducting international flights between the United States and Canada, pilots are encouraged to become familiar with applicable requirements pertaining to documents, flight planning, and arrival notification, the transporting of articles, authorized airports, on-site inspection procedures, etc.

This information may be obtained from various sources, which include:

- Canada Border Service Agency – 1-888-CANPASS or www.cbsa.gc.ca

- Canada Flight Supplement and Canada Water Aerodrome Supplement – available from NAV CANADA: 1-866-731-PUBS or http://products.navcanada.ca

- U.S. Customs Service, Minneapolis, MN office – 612-725-3689 or www.cbp.gov

- Guide for Private Flyers and Know Before You Go – available from U.S. Customs and Border Protection at www.cbp.gov

Substantial penalties may be imposed for failure to comply with customs and immigration regulations.

Minnesota Weather Access System (MnWAS)

MnDOT provides computers for use in obtaining weather briefing information at airports throughout Minnesota. The homepage on these computers provides a list of suggested weather websites. However, users may also enter their preferred web address into the browser address bar. To access the MnWAS computer home page from any internet-enabled device, go to www.mndot.gov/aero and click on the "Pilots" tab and then "Weather Links".

The MnWAS homepage also has access to a form for reporting airport issues. Look for this "AvRep Kelly" logo and click on the link to let MnDOT know about concerns you might have at any Minnesota airport.

For questions about the MnWAS program or to report an issue with a MnWAS computers, please contact Mike Hartell at 651-485-3698, or email michael.hartell@state.mn.us.

MnWAS computers are now available at the following airports:

From an optimum location on the airport, these stations measure and report wind direction and speed, visibility, sky condition, temperature, dew point, type of precipitation, lightning strikes and barometric pressure which is converted into an altimeter setting. Current weather information can be obtained by telephoning the AWOS/ASOS site. A computer generated voice relays up-to-the-minute observations.

The data is visually displayed on a remote computer monitor at most airports, and is simultaneously broadcast over the local radio navigation aid or a VHF transmitter for in-flight use. Data is gathered in 20-minute intervals from each AWOS site (ASOS data is gathered hourly with specials) and distributed nationally over an FAA NADIN computer network, allowing these reports to become available through computer weather systems such as MnWAS.

Where installed, the AWOS or ASOS is an official weather reporting source, and is approved without restriction for FAR Part 121 and 135 operations. If you have questions regarding weather observation stations, please contact Mike Hartell at 651-485-3698.

Hot Spots

The FAA has turned a spotlight on Runway Incursions. Anytime an aircraft, person or vehicle gets into the active runway environment without clearance, there is the possibility of a collision and loss of life. The FAA has been collecting and analyzing data on Runway Incursions at tower-controlled airports. When they identify areas on an airport where there have been Runway Incursions or where pilots and vehicle operators have gotten disoriented, those spots are identified as "Hot Spots."

The most current information on hot spots can be found in FAA publications on the airport diagrams in the approach plates and in the back of the Chart Supplement/Airport Facility Directory.

Runway Incursions occur at non-towered airports and they are just as dangerous. There is no data for non-towered airports, but we can apply some of what we have learned about towered airports at non-towered fields. Runway Incursions are more common at complex intersections where more than two runways or taxiways intersect. Beware of obstructed intersections where the pilot cannot see the entire length of the runway they are entering or crossing. Be cautious when operating at airports with parallel runways.

At both tower-controlled and non-towered airports one of the best tools for fighting Runway Incursions is to use an airport diagram. The airport diagrams in this directory cover all the Minnesota public airports. This information was current when we went to press, and as we become aware of changes, we update the diagrams on our website at: www.mndot.gov/aero.

For airports outside of Minnesota, many airport diagrams can be found in the Airport Facility Directory or the Instrument Approach Procedures. Airport diagrams for these airports and many more can also be found on the Internet. We cannot guarantee the accuracy of the information found on this or any other website outside of our control.

To find the current FAA hot spots for Minnesota airports visit http://www.faa.gov/airports/runway_safety/hotspots

Partial Index

For locating airports whose names differ from that of the associated city.

Fire Danger

STAY CLEAR OF WILDFIRES AND SMOKE FOR YOUR SAFETY AND THE SAFETY OF FIREFIGHTING AIRCRAFT

Firefighting aircraft operate at wildfires throughout the United States. Fire aircraft fly from ground level to several thousand feet above wildfires with low visibility transiting to and from fires at a variety of altitudes.

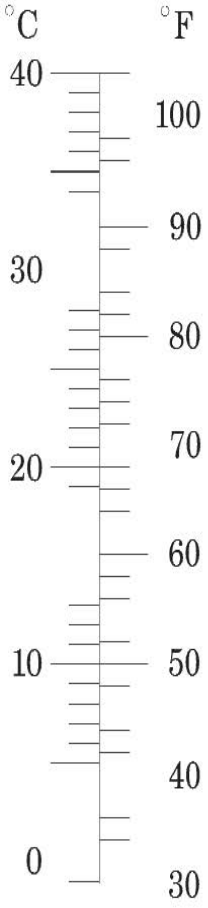

- **Check NOTAMs for temporary flight restrictions**
- **General Aviation pilots are asked to stay seven miles away from and 5,000 feet above all fire**
- **Even if no firefighting aircraft are visible, general aviators should assume they are in the airspace around a fire**
- **Flying to "check out the fire" could be disastrous**
- **To report a wildfire, contact ATC or the nearest flight service station or call 911**

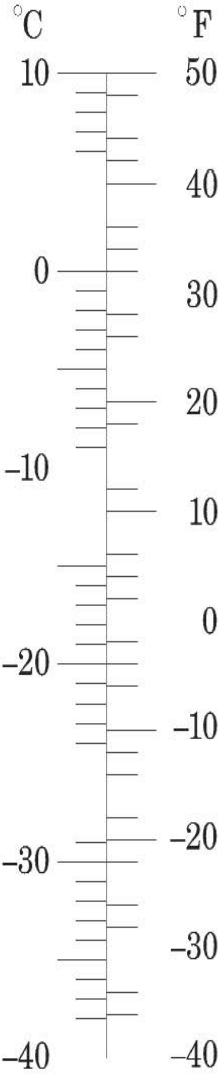

Produced by the Minnesota Interagency Fire Center ◊ 402 SE 11th Street, Grand Rapids, MN 55744

Worthington Municipal Airport

Public Seaplane Bases

The seaplane base diagrams include lake depth data and terrain data, obtained from the DNR. None of the seaplane bases have marked sea lanes, so it is recognized that seaplane pilots may choose to land in any direction. However, MnDOT felt that including the depth and terrain data would allow pilots to make safer decisions about the length of water available to them, and the obstructions along the shoreline and beyond.

Unfortunately there are gaps in the data. If you don't see water depth lines, the water is either very shallow or no data was available. If you don't see terrain shading, it may be because that data was not available. Moving forward MnDOT will look to provide better data as it becomes available.

The Minnesota Rules require that seaplanes clear all structures on the land by at least 100 feet. Clearance of all boats or persons on the surface of the water, whenever the body of water will permit, is required by not less than 300 feet, both laterally and vertically, or as close to 300 feet as the area of water will permit.

MnDOT wants to thank seaplane operators for the safe and professional flying they have exhibited in the past, and remind them to include these safety buffers in their future operations.

Seaplane Operations

State of Minnesota Department of Transportation

Compliance with Marine Traffic Rules: All seaplanes must comply with marine traffic rules to the extent that such rules do not interfere with the safe operations of aircraft. (Minnesota Rules 8800.2600).

Approaches and Takeoffs: All approaches and takeoffs from the water area shall be made in such a manner as to clear all structures on the land by at least 100 feet, and wherever the area of the body of water will permit, such landings and takeoffs shall be made at a distance of not less than 300 feet, both laterally and vertically, from any boat or person on the surface of the water, or as near to 300 feet as the area of the water will permit. (Minnesota Rules 8800.2700)

Seven-County Metro Area Operations: This part covers only seaplane operations on all public waters within the following counties: Anoka, Carver, Dakota, Hennepin, Ramsey, Scott and Washington. This part does not apply to aircraft equipped with either skis or wheels when public waters are frozen. See following tables for permissible public waters for seaplane operations within the seven-county metropolitan area and approximate coordinates. See Minnesota Rules 8800.2800 for full text and additional information on aircraft operations on lakes within the seven-county metropolitan area.

*St. Croix River		

*Pilots are requested to maintain 2000 feet above the terrain while flying over portions of the St. Croix River designated and depicted on the Federal charts as “National Scenic Riverway” administered by the National Park Service.

**All seaplane operations are prohibited from 11 AM (CDST) to 6 PM (CDST) on Saturdays, Sundays, and national legal holidays between June 1 and September 15 on the following public waters:

1. Lake Minnetonka and all bays and lakes therein.
2. White Bear Lake and all bays and lakes therein.
3. Lake Owasso and all bays and lakes therein.

This restriction does not apply to the holder of a private or personal-use seaplane base license while operating to and from the licensed base subject to the following conditions:

1. Such operations are limited to a maximum of one takeoff and one landing during these restricted hours; and
2. Such operations are authorized only when lake traffic and use permit such operations to be conducted in a safe and reasonable manner.

State of Minnesota Department of Natural Resources

It is unlawful for any person to land any aircraft on lands or waters totally within the boundaries of any State Park except by permit or on a designated airport or landing strip or in making an emergency landing, conducting rescue operations or in conducting or assisting in the conduct of official business of the United States of America, the State of Minnesota, or the County in which the park is located. (Minnesota Rules 6100.2200)

The list below includes lakes wholly contained within the boundaries of a State Park and may not be wholly inclusive. For possible additions or changes contact the Division of Parks and Recreation.

www.dnr.state.mn.us/state_parks

Migratory Waterfowl Sanctuary Order Number 30

It has been determined in the best interests of proper game management to have waters set aside for migratory waterfowl feeding and resting areas. Therefore, the Department of Natural Resources prescribes related regulations which can be found in Minnesota Rules 6240.2000 and the Minnesota Waterfowl Hunting Regulations Guide.

Motors prohibited on migratory waterfowl feeding and resting areas.

Annually a list of waters is designated by Commissioner's Order and by posting as migratory waterfowl feeding and resting areas during the open waterfowl season. No persons other than agents of the Commissioner in the performance of their duties may use any kind of motor propelled watercraft or aircraft on the listed water during the open migratory waterfowl season. For current information concerning the restricted water areas and Migratory Waterfowl Sanctuary Order Number 30, call the Department of Natural Resources at 651-296-6517 or 888-646-6367 or visit www.dnr.state.mn.us/wildlife/shallowlakes/refuges.html

Seaplane Operations and Federal Land

Regulations regarding flights over charted National Park Service Areas, U.S. Fish and Wildlife Service Areas, and U.S. Forest Service Areas.

The landing of aircraft is prohibited on lands or waters administered by the National Park Service, the U.S. Fish and Wildlife Service, or the U.S. Forest Service without authorization from the respective agency. Exceptions include:

1. When forced to land due to an emergency beyond the control of the operator.
2. At officially designated landing sites.
3. On approved official business of the United States Government.

All aircraft are requested to maintain a minimum altitude of 2000 feet above the terrain of the following: National Parks, Monuments, Seashores, Lakeshores, Recreation Areas and Scenic Riverways administered by the National Park Service, National Wildlife Refuges, Big Game Refuges, Game Ranges, and Wildlife Ranges administered by the U.S. Fish and Wildlife Service, and Wilderness and Primitive Areas administered by the U.S. Forest Service.

. . . . . Depicts boundaries of National Park Service Areas, U.S. Fish and Wildlife Service Areas, and U.S. Forest Service Wilderness Primitive Areas on NOAA Sectional Aeronautical Charts.

Some departments may have additional restrictions including:

1. Department of the Interior – National Parks, Forests

a. National Wildlife Refuge

Restrictions as printed on current NOAA Sectional Charts

Refuge	**Location**
Agassiz	Thief River Falls
Big Stone	Ortonville
Tamarac	Detroit Lakes
Rice Lake	Aitkin
Mille Lacs	Isle
Sherburne	Saint Cloud

b. *Voyageurs National Park*

Due to the presence of the spiney water flea an emergency closure was implemented effective May 10, 2007. Aircraft may be operated on the entire water surface and frozen lake surface of the following lakes, except as otherwise restricted in 36 CFR 7.33c or by special closure;

Rainy	Locator	Shoepack
Kabetogama	War Club	Little Trout

Approaches and landings shall not be made within 500 feet of any developed facility, boat dock, float, pier, ramp or beach.

Aircraft may taxi to and from a dock or ramp designated for their use for the purpose of mooring and must be operated with due care and regard for persons and property and in accordance with any posted signs or waterway markers.

Areas within the designated lakes may be closed to aircraft use by the Superintendent taking into consideration public safety, wildlife management, weather and park management objectives.

Pilots should contact the park to ensure no additional special closures.

Invasive Species Alert for Seaplane Pilots

Seaplane pilots are asked to be aware of the presence of invasive and exotic species in many bodies of water within and adjacent to the State of Minnesota. These include: Eurasian water milfoil, zebra mussels, and the spiny water flea to name a few. The Department of Natural Resources appreciates any efforts seaplane pilots can provide in preventing the spread of these damaging species. Pilots can help prevent the spread of these species via seaplanes by scrubbing the hull of the plane or floats while still in the water of the infected lake. This is especially important if the aircraft has been moored on an infested lake for more than a few hours. The removal of water from the float or bilge compartments prior to departure is encouraged to further limit the possibility of transporting these species which could infect other bodies of water. If possible, just prior to takeoff raise and lower your water rudders a number of times to help clear any aquatic hitchhikers. After takeoff at a safe altitude, if conditions permit, raise and lower your water rudders a number of times while still over the waters that you departed to clear aquatic plants from the water rudders and cables.

For the most current and complete list of lakes that harbor invasive species and how to do your part to prevent transporting them by seaplane, please visit the Minnesota Department of Natural Resources website at www.dnr.state.mn.us/invasives/aquatic for guidance. Remember, it is against Minnesota law to transport aquatic species from one body of water to another.

Help Prevent the Spread of Aquatic Invasive Species by Seaplanes

Many invasive species, such as zebra mussels and Eurasian watermilfoil, can be unintentionally transported from one water to another on the floats of seaplanes. Many state and federal agencies recommend that you include these procedures into the operation of your seaplane. However, plane safety should remain the first priority when considering and following these recommendations.

RECOMMENDED ACTIONS

Before entering the aircraft:

✓ ***Pump*** floats (note: this will also help avoid spreading fish diseases).

✓ ***Inspect*** for and ***remove*** aquatic plants and animals (e.g., zebra mussels and water fleas) from the floats, wires or cables, and water rudders.

Aircraft moored for extended periods in zebra mussel infested waters may have zebra mussels attached to the floats and should be checked specifically on the transom, chine, bottom, wheel wells, and the step area of floats (see diagram). If you see or feel zebra mussels on the floats (small zebra mussels feel gritty), one or more of the following should be used before leaving the waterbody when facilities are available:

• ***wash*** with hot water; or
• ***spray*** with high-pressure water; and/or
• ***dry*** all parts of the floats for at least 5 days

(A few days of hot summer temperatures will kill adult zebra mussels. Longer drying times of several days are required to kill adult mussels during cool, humid weather.

✓ In remote locations where zebra mussels are present, but where there are no provisions for drying or spraying — ***hand-cleaning*** the underside of floats with a scrub brush and physically removing adult mussels is the best option available option for preventing the spread of zebra mussels. A plastic scraper may be helpful to remove adult zebra mussels.

Pre take-off check:

✓ ***Avoid*** taxiing through heavy surface growths of aquatic plants before takeoff; and

✓ ***Raise and lower*** water rudders several times to clear off plants (this will also minimize cable stretch and improve the effectiveness of the rudders for steering).

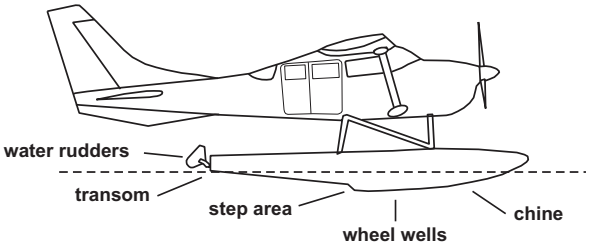

After take-off:

✓ Raise and lower water rudders several times to free aquatic plant fragments while over the waters you are leaving or while over land; and

✓ If aquatic plants remain attached, return to the lake and remove the plants.

For more information on aquatic invasive species contact the Minnesota Department of Natural Resource's Invasive Species Program at 651-259-5100, Minnesota Sea Grant's Invasive Species Information Center at 218-726-8712, or www.protectyourwaters.net.

Where to Check for Invasive Species on Floats

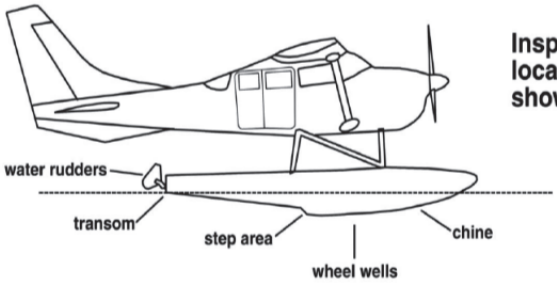

Remember: It is illegal to introduce nonnative species into Minnesota waters.

PLEASE HELP
STOP AQUATIC HITCHHIKERS!

BEFORE leaving / takeoff:

✔ **Inspect** the floats for aquatic invasive species

✔ **Remove** aquatic plants and aquatic animals from floats and rigging

✔ **Pump** the floats

It is illegal to introduce nonnative species into Minnesota waters.

Thank you! Minnesota Department of Natural Resources and MN Seaplane ● Pilots Association

Notice to Directory Users

The terrain and water depth data depicted on the seaplane base diagrams is for informational use only. Pilots can use this information as a supplement, but should follow all state and federal requirements, and use a pilot's operating handbook specific to their aircraft when calculating takeoff and landing performance.

Please use the following legend when referencing terrain elevations and water depths on the seaplane base diagrams. Note that elevations less than 25 feet have no color depicted, and water depths less than 5 feet do not show a contour.

Comments: MnWAS located at airport
Carey Lake Seaplane Base Restrictions:
1. Prior permission required by Airport Manager. Call 218-262-3452.
2. Seaplane traffic will monitor and make traffic calls on the Range Regional (Hibbing) Airport CTAF - 123.0
3. Aircraft landing at the airport shall have preference over seaplane traffic.
4. Seaplane traffic shall fly a 500 foot AGL traffic pattern and avoid conflict with traffic landing at the Range Regional (Hibbing) Airport.
5. Seaplane traffic departing to the South will make a left hand turn before Herman Road and remain north of the airport until safely clear of the airport traffic area.
