1982 Minnesota Directory of Fruits and Vegetables

Dear Friend:

The abundance of Minnesota agriculture is evident in the wide variety of fresh fruits and vegetables, and bedding plants grown in Minnesota for the fresh produce market. Apples, bedding plants, berries, broccoli, cauliflower, greens, sweet corn and tomatoes are only a few of the Minnesota produce offered to you.

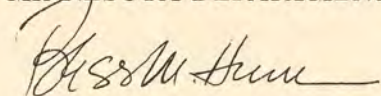

The direct farmer-to-consumer sale of these crops represents an important marketing alternative for Minnesota farmers and consumers. Direct farmer-to-consumer marketing not only provides fresh fruits and vegetables and bedding plants, but can be an educational and enjoyable family outing. This industry helps the consumer obtain fresh, nutritious produce at reasonable prices and helps the Minnesota farmer retain a greater share of the food dollar.

Could you please fill out the form on page 23 and let us know the benefits this publication has provided for you? We are always trying to improve our service to you.

Treat yourself, family and friends today to the open air and sunshine. Take a "break" to smell the delicious country air, to enjoy the unbeatable fresh flavor of MINNESOTA GROWN PRODUCE and to view the unsurpassed landscape of Minnesota's countryside!

ENJOY! ENJOY! ENJOY!

MINNESOTA DEPARTMENT OF AGRICULTURE

Bess M. Hum, Marketing Specialist
