Background

The Medical Education and Research Costs (MERC) Program was established in 1996 in recognition of the need to invest in medical education to ensure a high-quality health care system for all Minnesotans. Training health care clinicians is costly, and in the past, teaching institutions recovered some of their costs through higher charges for patient care. In Minnesota's competitive health care market, payers became increasingly unwilling to pay for the extra costs associated with the purchase of health care services at teaching facilities. Teaching facilities were forced to compete with non-teaching facilities, leading to greater difficulty in funding teaching activities. The MERC program provides support and funding for these teaching activities under the guidance of a committee of stakeholders and medical education professionals.

The Commissioner of Health has been responsible for administering the MERC program since 1998. Since its first year of funding in 1997, the MERC program has distributed over \$993 million to hospitals, clinics, and other clinical training facilities throughout Minnesota to help cover the cost of training health professionals.

Grants are determined through a distribution formula established in Minnesota Statutes, section 62J.692. The current formula calculates the total Medicaid revenue pool across all eligible sites and then determines the percentage of total Medicaid revenue associated with each clinical training facility. This percentage is then applied to the amount of available funding to calculate each facility's grant. The grants to clinical training facilities cannot exceed the facility's reported clinical training expenditures, nor can they exceed the 95th percentile grant per FTE cap. Facilities must provide at least 0.1 FTE (208 clinical hours) of training. Facilities that would receive grants of less than \$5,000 do not qualify for MERC funding, and their funding is redistributed among those that qualify.

The formula has changed over the years due to varying perspectives and priorities, with debate generally centered on whether the program is designed to support clinical training wherever it occurs versus facilities that have a larger share of the Medicaid business. The former argument (funding where training occurs) is driven by a cost-based formula that allows grant funds to flow to the facilities that train the highest number of students or residents and thus face the highest costs. The latter argument is driven by the use of Medicaid funds as a major source of the program's appropriation, and therefore funds should be directed primarily to those facilities that have a larger share of the Medicaid business.

Additional background information and details on past distributions can be found at <http://www.health.state.mn.us/divs/hpsc/hep/merc/publications/index.html>.

Reporting

Throughout this report, the current funding year reflects state fiscal year 2020; the 'data year' reflects fiscal year 2018 clinical training, which is the reference year for data in the MERC application. Numbers are rounded for reporting purposes.

Funding: State Fiscal Year 2020

The MERC grant was funded in state fiscal year 2020 through a carve-out from the Prepaid Medical Assistance Program (PMAP) rates, an appropriation from Minnesota’s cigarette tax and federal matching funds, and appropriations from the state General Fund and the Health Care Access Fund. The distribution to clinical training facilities totaled \$59,127,000.

Table 1 - MERC Grant Funds

MERC Grant Funds	Amount
PMAP Funds	\$49,552,000
Cigarette Tax Funds	\$7,575,000
Cigarette tax appropriation	\$3,937,000
Less administration*	-\$149,500
Federal match	\$3,787,500
General Fund	\$1,000,000
Health Care Access Fund	\$1,000,000
Overall Funding	\$59,127,000

* A maximum of \$150,000 of the funds dedicated to the commissioner under section [297F.10, subdivision 1](https://www.revisor.leg.state.mn.us/statutes?id=297F.10#stat.297F.10.1) (<https://www.revisor.leg.state.mn.us/statutes?id=297F.10#stat.297F.10.1>), clause (2), may be used by the commissioner for administrative expenses associated with implementing the MERC program.

Application Process

As defined in Minnesota Statutes, section 62J.692, grant applications for clinical training are submitted to the Minnesota Department of Health by *sponsoring institutions* that coordinate applications on behalf of their accredited clinical medical education *teaching programs* and the clinical *training facilities* hosting the program’s trainees. Applications have a statutory deadline of October 31.

Grant Distribution

Distribution by Sponsoring Institution

Sponsoring institutions submitted applications on behalf of their accredited programs that had students or residents at clinical training facilities in Minnesota during the teaching programs’ 2018 fiscal year.

Medical Education and Research Cost (MERC) Grant Distribution

In total, 26 sponsoring institutions submitted grant applications. These sponsoring institutions were applying on behalf of 306 teaching programs whose students/residents received clinical training in 2018.

The grant payments listed in Table 2 were distributed to sponsoring institutions in April 2020. As specified by statute, sponsoring institutions are required to pass available funds on to eligible clinical training facilities within 60 days of receipt. Many entities in Minnesota are both sponsoring institutions and training sites.

MERC Provider Types

Fifteen provider types are eligible to apply for MERC funding:

Advanced Dental Therapists	Dental Residents	Medical Students
Advanced Practice Nurses	Dental Students	Pharmacy Residents
Clinical Social Workers	Dental Therapists	Pharmacy Students
Community Health Workers	Doctors of Chiropractic	Physician Assistants
Community Paramedics	Medical Residents	Psychologists

During the period covered by this report, four eligible provider types did not apply: community health workers, community paramedics, dental therapists, and doctors of chiropractic programs.

Applicants encompassed teaching programs that train students and residents in a wide variety of clinical settings. Many clinical training facilities support trainees from multiple sponsoring institutions, programs and provider types.

Total	2,140.5	727.6	197.8	50.4	35.7

Distribution by County

Similar to the county's share of Medicaid, the largest grants were paid to facilities in Hennepin County and Ramsey County, while the bulk of clinical training occurred in Hennepin County and Olmsted County. This result is largely due to the relatively small share of Medicaid funding at clinical training facilities in Olmsted County.

Figure 1 Top Ten Counties Funded

Grants to Clinical Training Facilities

MDH received applications from 26 sponsoring institutions that submitted an application on behalf of their teaching programs and the facilities where their students or residents received clinical training. The applications included funding requests for 618 distinct clinical training facilities that hosted trainees from multiple teaching disciplines.

To qualify for MERC funding, a training facility must have a minimum of 0.1 FTE trainees, submit clinical training expenditures that meet or exceed \$5,000 (the minimum grant amount), and have Medical Assistance revenue during the training year. A total of 171 distinct facilities did not meet these initial qualifications; of these, 117 did not meet the FTE minimum.

Of the 447 training facilities that met the initial qualifications, 363 received grants. The other 84 facilities did not qualify under the formula, which determined their grant amount was less than the \$5,000 minimum facility grant. Because the formula is based on Medical Assistance revenue, facilities that do not meet the minimum grant amount typically have a smaller share of Medical Assistance revenue compared to other grant applicants.

In 2018, MERC training sites provided clinical training to just over 3,212 FTE trainees. Facilities hosting the trainees can change from year to year; some facilities that hosted trainees in 2018 did not host trainees in the prior training period. Table 6 outlines the total number of facilities that qualified in 2018 and FTEs within the specific grant range.

Medical Education and Research Cost (MERC) Grant Distribution

Table 6 - Grant Ranges

Grant	Facilities	FTE Trainees
\$5,000,000 to \$9,999,999	3	912.9
\$1,000,000 to \$4,999,999	10	1,057.8
\$500,000 to \$999,999	8	583.9
\$100,000 to \$499,999	37	111.6
\$50,000 to \$99,999	34	229.4
\$20,000 to \$49,999	90	110.5
\$10,000 to \$19,999	98	68.7
\$5,000 to \$9,999	83	47.5
Below Minimum Grant	84	58.1
Under FTE Minimum	117	6.3
Expenditures Not Submitted/Withdrew Application	24	12.5
Expenditures Under Minimum Grant	14	4.3
No MA/PMAP Revenue for Formula	16	8.9
Total Distinct Applicants	618	3,212.2

A total of 255 sites did not qualify for a grant due to either the \$5,000 minimum or not meeting the initial qualifications.

Table 7 includes the top 20 grant recipients, who together received nearly 75 percent of the total grant and hosted over 79 percent of the trainees.

Table 7 - Top 20 Grant Recipients

Mayo Clinic Health System - Mankato	Mankato	Hospital	7.3	\$673,327
Mayo Clinic	Rochester	Physician	503.4	\$647,256

A relatively small number of clinical training sites are responsible for most of the training that is supported by MERC. Twenty-two facilities hosted at least 10 FTEs. These facilities represented nearly 86 percent of the qualifying FTEs trained in Minnesota and received just over 72 percent of the available MERC funds. Six facilities hosted more than 165 FTEs, accounting for just over 73 percent of the qualifying trainees in Minnesota and receiving just under 36 percent of the available funding. Because grants are based on relative Medicaid volume, rather than on number of FTEs, the grant per FTE varies widely across facilities.

Training Expenditures

The MERC formula caps the amount of funding that an organization can receive to ensure that grants do not exceed the organization's costs of providing clinical training to eligible trainees. This provision of the program, which was enacted in 2013, is an important way to ensure that funding is appropriately targeted to support the costs of training. The expenditure limits can provide an incentive for training facilities to take on additional trainees when their Medicaid volume is high, and their prior trainee count is low. However, larger facilities that already have expenditures beyond their grant amounts will not see an increase in their grant by taking on new provider types or additional trainees.

Currently, expenditures are gathered directly from eligible facilities during the application process. Grantees are required to submit actual clinical training expenditures associated with the trainee FTEs in the MERC application. Prior to FY2016, grantees were allowed to submit estimated costs based on historical average clinical training cost data collected by provider type, with the eventual goal of reporting actual costs. Although there had been some improvement in the percentage of facilities submitting actual expenditures, beginning in FY2016, all grantees were required to report actual costs.

Medical Education and Research Cost (MERC) Grant Distribution

In the current grant cycle, eligible facilities that met the FTE minimum and submitted expenditure data reported more than \$415 million in training-related expenses. Based on this data, in a typical grant cycle, MERC supports between 14-17% of the overall reported health professions expenditures.

For the current grant distribution, there were 148 facilities whose share of the grant pool, based on their Medicaid revenue, exceeded their training expenditures. Consequently, their grant was capped at their reported expenditure amount as required by statute. If the expenditure cap on grant amounts had not been in place, the formula would have led to them receiving higher grants ranging from an additional \$75 to \$1.6 million.

Conclusion and Next Steps

The program now operates more efficiently through the implementation of an application portal that rolled out in August 2019. The portal collects all data electronically. This has streamlined the process tremendously. In the past, 2,186 paper applications would have been sent from clinical training sites to 306 teaching programs across 26 sponsoring institutions. The application portal makes it possible for applications, approvals, and reporting to take place electronically, increasing productivity and transparency. The reporting of clinical training expenditures also ensures that funds received do not exceed training costs.

For over 20 years, the MERC program has played a critical role in providing funding to clinical training sites across Minnesota. The MERC grant is part of a comprehensive set of initiatives designed to ensure that Minnesota's health care workforce is robust and responsive to a changing payment, care delivery and training landscape.

The way the formula works, however, can make it difficult to know whether it is increasing the volume (or changing the type or location) of training, especially in newer areas of focus, or serving as a support to help sustain existing training capacity. Currently, the grant that a facility receives won't necessarily increase when a new provider type begins training at a facility; the facility's costs may increase, but unless their Medicaid revenue increases at the same time, there will not likely be an increase in their grant amount. Larger facilities that already have expenditures beyond their grant amounts also will not see an increase by taking on new provider types or additional trainees.

In the coming years, MDH will continue to work with stakeholders to 1) identify opportunities to improve expenditure reporting, 2) streamline the application and distribution processes, and 3) explore how MERC can support a more robust, forward-thinking, and responsive system of providing clinical training to health professions to help meet Minnesota's future health workforce needs.
