GABRIEL, ROEDER, SMITH & COMPANY ACTUARIES & CONSULTANTS

2090 First National Building Detroit, Michigan 48226 Area 313: 961-3346

March 16, 1983

Board of Trustees

St. Louis Park Police Relief Association

St. Louis Park, Minnesota

<u>Submitted in this report</u> are the results of the 1982 <u>gain/loss analysis</u> of the financial experiences of the St. Louis Park Police Relief Association.

The <u>composite results</u> of this study are reported on Schedule 1, and comments regarding the results are on page 12.

The gain/loss analysis was based upon statistical data furnished by the Association regarding active and retired member changes and related financial transactions.

The actuarial assumptions used for regular valuation purposes and which produce "expected" experience data are shown in the appendix of this report. A brief summary of the Association's benefits is also included in the appendix.

Respectfully submitted,

Robert M. O'Keefe

Gary W. Findlay

PURPOSE OF GAIN/LOSS ANALYSIS

Actual financial experience will not coincide exactly with assumed financial experience—differences are to be expected since the future cannot be predicted with absolute precision. The changes in computed liabilities resulting from differences between actual and assumed experiences are called <u>actuarial gains</u>, if the experience was financially favorable and <u>actuarial losses</u>, if the experience was financially unfavorable. Actuarial gains result in decreases in contribution rates and actuarial losses result in increases.

Regular actuarial valuations provide information about aggregate computed liabilities. However, regular valuations do not develop the information needed to explain the year to year changes in computed liabilities attributable to each activity within the retirement system financial mechanism. The purpose of a gain/loss analysis is to determine the change in computed liabilities and contribution rates attributable to variations between actual and assumed experience.

Once a difference between actual and assumed experience in a risk area has been observed to be sizeable and persistent, the assumed experience should be changed to reflect the observed reality. However, gains and losses over a relatively short period of time may not be indicative of long term trends which provide the basis for selection of actuarial assumptions.

Age & Service Retirement.

If members retire at older ages than assumed, there is a gain. If retirements occur at younger ages than assumed there is a loss.

Disability & Death-in-Service.

If casualty claims are less than assumed, there is a gain. If there are more casualty losses than assumed, there is a loss.

Withdrawal.

If more liabilities are released by withdrawal than assumed, there is a gain.

If there are fewer withdrawals than assumed, there is a loss.

Salary Increases.

If there are smaller salary increases than assumed, there is a gain.

If salary increases are greater than assumed, there is a loss.

Investment Income.

If there is greater investment income than assumed, there is a gain.

If investment income is less than assumed, there is a loss.

Post Retirement Mortality.

If benefit recipients die at younger ages than assumed, there is a gain.

If they live longer than assumed, there is a loss.

Contribution.

Gains or losses arise due to the delay in implementing changes in the recommended contribution.

Miscellaneous.

Miscellaneous gains and losses include changes due to data adjustments, rounding and changes in the average age and service characteristics of the group.

Schedule 1.

Gains & Losses in Accrued Liabilities and Changes in Contribution Requirements During Calendar 1982

Type of Activity	(Gain) Active Members	Retirants & Beneficiaries n 1,000)	Contribution F (Gain) or Normal Cost % of Payroll	
Age & Service Retirements	\$ 72.6	\$ N/A	(0.08)%	\$ 4.8
Disability & Death-in-Service				
a. <u>Disability</u>	(12.7)	N/A	(0.02)	(0.8)
b. <u>Death-in Service</u>	(8.6)	N/A	(0.01)	(0.6)
Withdrawal	(24.5)	N/A	(0.00)	(1.6)
Salary Increases	182.6	256.4	N/A	29.3
Investment Income	(80.0)	(574.0)	N/A	(43.6)
Post Retirement Mortality	N/A	46.9	N/A	3.1
Contribution	(3.6)	4.3	N/A	0.0
Miscellaneous	0.9	3.8	N/A	0.3
EXPERIENCE RELATED (GAIN)/LOSS & CORRESPONDING CHANGE IN				
CONTRIBUTION REQUIREMENTS	\$126.7	\$(262.6)	(0.11)%	\$(9.1)
Changes due to plan amendments	0.0	0.0	0.00	0.0
TOTAL (GAIN)/LOSS DURING YEAR	\$126.7	\$(262.6)	(0.11)%	\$(9.1)

^{*} Accrued liabilities and contribution requirements are affected by gains and losses. Gains result in reductions in both and losses result in increases in both.

Schedule 2.

Gains & Losses in Accrued Liabilities From January 1, 1979 thru December 31, 1981

Type of Activity	Accrued (Gair Active Members	9 - 12/31/79 d Liabilities n) or Loss Retirants & Beneficiaries in 1,000)	Accrued (Gain Active Members	D - 12/31/80 I Liabilities a) or Loss Retirants & Beneficiaries n 1,000)	Accrued (Gain Active Members	- 12/31/81 Liabilities) or Loss Retirants & Beneficiaries n 1,000)

COMMENTS

Economic Assumptions and Financing Method

The economic assumptions of 5% annual investment return and 3 1/2% annual salary increases are established by state law. State law also specifies that the annual minimum obligation of the municipality shall be determined by adding (i) the employer normal cost percent times covered payroll to (ii) the <u>level dollar</u> amount required to amortize the unfunded accrued liability by December 31, 2010.

Over the past few years, both the actual rates of salary increase and investment return have generally exceeded the assumed rates, resulting in increases in the dollar amount of unfunded accrued liabilities. If the financial experiences of recent years persist, and the economic assumptions and financing method are not changed, it is reasonable to expect that unfunded accrued liabilities will increase in actual dollar amount for a number of years. This is true even though a level dollar amortization schedule is being followed. Accordingly, it is reasonable to expect that under the described conditions the actual dollar contributions required to make amortization payments will increase for a number of years. On the other hand, if inflation subsides and actual economic activity approaches assumed experience, it is reasonable to expect the dollar amount of the contribution to amortize the unfunded accrued liability to remain relatively constant. The notion that amortization dollar amounts may be increasing is not necessarily cause for alarm. If adjusted for changes in purchasing power, any future increases in the dollar contributions may or may not reflect increases in terms of real dollars (inflation adjusted dollars).

It is also worth noting that when the same assumptions and methods are applied to plans which differ in nature, the valuation results may not be comparable (for example, it is currently not valid to compare valuation results for a plan having full escalation to valuation results for a plan having a 3 1/2% cap on escalation.) Caution should be exercised when attempting to assess the financial condition of one Association relative to another on the basis of valuation results produced using the assumptions and methods mandated by state law.

Miscellaneous Loss

The loss shown under Retirants and Beneficiaries is due to a change in the method of reporting assets and correction in the date of birth of a spouse.

The change in the date of birth created a gain of \$14,500.

Assets were previously reported on a book value basis. They were reported for this analysis on a market value basis. This caused a loss of \$369,500.

St. Louis Park Police Relief Association Valuation Methods and Assumptions

The Entry Age Normal Cost method was used to determine the normal cost of all benefits.

The rate of investment return (interest) used in making the valuation was 5.0 percent per annum, compounded annually. State law requires use of this assumption.

The mortality table used was the United States Life Table, 1959-61, White Males and White Females.

Single Life Values:

Present Value of \$1 Monthly						
	Level		Increasing		Future Life	
Sample	For Life		3.5% Yearly		Expectancy	(Years)
Ages	Men	Women	Men	Women	Men	Women
45	\$169.61	\$186.84	\$263.23	\$304.86	27.33	32.52

Brief Summary (12/31/82) of Benefit Provisions Evaluated and/or Considered

Age & Service Retirement

Eligibility. 20 years of service and 50 years of age.

Amount. For first 20 years of service, 35/75 of base pay. For each year in excess of 20, an additional 1/75 is added, to a maximum of 42/75 of base pay for 27 or more years of service.

<u>Pay Used For Plan Purposes</u>. For benefit determination purposes "base pay" means the salary of a first grade patrolman for the second month of the previous fiscal year. For contribution purposes it means the present base pay of a first grade patrolman.

Disability Retirement

<u>Eligibility</u>. Disabled to the extent that no longer able to perform the duties of a police officer before being eligible for age & service retirement.

Amount. 36/75 of base pay.

Member's Death While Active, Or In Deferred Status Or Retired

Eligibility.

Spouse. Legally married to member at least oneyear prior to separation from service and residing with member at time of death. Benefits terminate upon remarriage.

Child. Younger than age 18.

Amount.

Spouse. 18/75 of base pay.

<u>Child</u>. 6/75 of base pay per child. Children's maximum is 18/75 if spouse is receiving or 36/75 if no spouse is receiving.

<u>Vested Deferred</u>. 10 years of service and separated before age 50. Maximum benefit is 42/75 of base pay. Payment beginning is deferred to attainment of age 50. For members with less than 20 years of service, benefit amount is 35/75 of base pay times years of service divided by 20. No survivor benefits. 75% of member contributions are refunded without interest if former member dies before age 50.

<u>Post Retirement Adjustments ("Escalator")</u>. Each time base pay is changed, payments to all benefit recipients are simultaneously changed by the same percent that base pay is changed.

Member Contributions. 8% of base pay. 75% of total member contributions is refundable, without interest, upon separation from service if no monthly benefit is payable.
