August 30, 1982

Board of Trustees Red Wing Fire Department Relief Association

Red Wing, Minnesota

<u>Submitted in this report</u> are the results of the 1981 <u>gain/loss analysis</u> of the financial experiences of the Red Wing Fire Department Relief Association.

The <u>composite results</u> of this study are reported on Schedule 1, and comments regarding the results are on page 10.

The gain/loss analysis was based upon statistical data furnished by the Association regarding active and retired member changes and related financial transactions.

The actuarial assumptions used for regular valuation purposes and which produce "expected" experience data are shown in the appendix of this report. A brief summary of the Association's benefits is also included in the appendix.

Respectfully submitted,

Robert M. O'Keefe

ary W. Findlay

PURPOSE OF GAIN/LOSS ANALYSIS

Actual financial experience will not coincide exactly with assumed financial experience—differences are to be expected since the future cannot be predicted with absolute precision. The changes in computed liabilities resulting from differences between actual and assumed experiences are called <u>actuarial gains</u>, if the experience was financially favorable and <u>actuarial losses</u>, if the experience was financially unfavorable. Actuarial gains result in decreases in contribution rates and actuarial losses result in increases.

Regular actuarial valuations provide information about aggregate computed liabilities. However, regular valuations do not develop the information needed to explain the year to year changes in computed liabilities attributable to each activity within the retirement system financial mechanism. The purpose of a gain/loss analysis is to determine the change in computed liabilities and contribution rates attributable to variations between actual and assumed experience.

Once a difference between actual and assumed experience in a risk area has been observed to be sizeable and persistent, the assumed experience should be changed to reflect the observed reality. However, gains and losses over a relatively short period of time may not be indicative of long term trends which provide the basis for selection of actuarial assumptions.

Age & Service Retirement.

If members retire at older ages than assumed, there is a gain. If retirements occur at younger ages than assumed there is a loss.

Disability & Death-in-Service.

If casualty claims are less than assumed, there is a gain. If there are more casualty losses than assumed, there is a loss.

Withdrawal.

If more liabilities are released by withdrawal than assumed, there is a gain.

If there are fewer withdrawals than assumed, there is a loss.

Salary Increases.

If there are smaller salary increases than assumed, there is a gain.

If salary increases are greater than assumed, there is a loss.

Investment Income.

If there is greater investment income than assumed, there is a gain.

If investment income is less than assumed, there is a loss.

Post Retirement Mortality.

If benefit recipients die at younger ages than assumed, there is a gain.

If they live longer than assumed, there is a loss.

Contribution.

Gains or losses arise due to the delay in implementing changes in the recommended contribution.

Miscellaneous.

Miscellaneous gains and losses include changes due to data adjustments, rounding and changes in the average age and service characteristics of the group.

Schedule 1.

Gains & Losses in Accrued Liabilities and Changes in Contribution Requirements During Calendar 1981

Type of Activity	(Gain) Active Members	Liabilities or Loss * Retirants & Beneficiaries n 1,000)	Contribution (Gain) o Normal Cost % of Payroll	Requirements r Loss * \$ Payment on UAL (\$ in 1,000)
Age & Service Retirements	\$ 0.0	\$ N/A	(0.08)%	\$ 0.00
Disability & Death-in-Service				
a. <u>Disability</u>	(8.8)	N/A	0.00	(0.58)
b. <u>Death-in Service</u>	(6.1)	N/A	0.00	(0.40)
<u>Withdrawal</u>	4.0	N/A	0.00	0.26
Salary Increases	106.7	77.3	N/A	12.05
Investment Income	(10.0)	(31.5)	N/A	(2.72)
Post Retirement Mortality	N/A	(112.6)	N/A	(7.37)
Contribution	(10.0)	58.1	N/A	3.15
Miscellaneous	0.0	12.0	0.00	0.79
EXPERIENCE RELATED (GAIN)/LOSS & CORRESPONDING CHANGE IN CONTRIBUTION REQUIREMENTS	\$ 75 . 8	\$ 3.3	(0.08)%	\$ 5.18
Changes due to plan amendments	0.0	0.0	0.00	0.00
TOTAL (GAIN)/LOSS DURING YEAR	\$ 75.8	\$ 3.3	(0.08)%	\$ 5.18

^{*} Accrued liabilities and contribution requirements are affected by gains and losses. Gains result in reductions in both and losses result in increases in both.

Schedule 2.

Gains & Losses in Accrued Liabilities From January 1, 1979 thru December 31, 1981

Type of Activity	Accrued (Gain Active Members	- 12/31/79 Liabilities) or Loss Retirants & Beneficiaries n 1,000)	Accrued (Gain Active Members	- 12/31/80 Liabilities) or Loss Retirants & Beneficiaries n 1,000)	Accrued (Gain Active Members I	- 12/31/81 Liabilities) or Loss Retirants & Beneficiaries n 1,000)
Age & Service Retirements	\$ 0.0	\$ N/A	\$ 0.0	\$ N/A	\$ 0.0	\$ N/A

TOTALS	0	0.1393		0	0.1506	0	0.5442

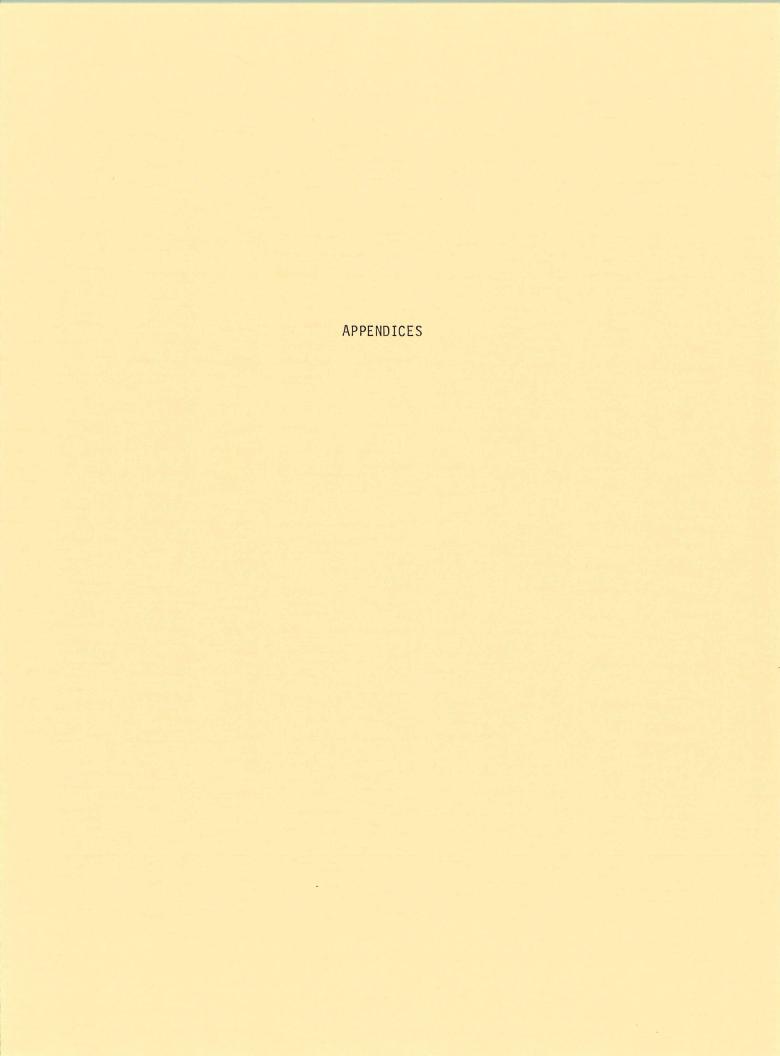

COMMENTS

Economic Assumptions and Financing Method

The economic assumptions of 5% annual investment return and 3 1/2% annual salary increases are established by state law. State law also specifies that the annual minimum obligation of the municipality shall be determined by adding (i) the employer normal cost percent times covered payroll to (ii) the <u>level dollar</u> amount required to amortize the unfunded accrued liability by December 31, 2010.

Over the past few years, both the actual rates of salary increase and investment return have generally exceeded the assumed rates, resulting in increases in the dollar amount of unfunded accrued liabilities. If the financial experiences of recent years persist, and the economic assumptions and financing method are not changed, it is reasonable to expect that unfunded accrued liabilities will increase in actual dollar amount for a number of years. This is true even though a level dollar amortization schedule is being followed. Accordingly, it is reasonable to expect that under the described conditions the actual dollar contributions required to make amortization payments will increase for a number of years. On the other hand, if inflation subsides and actual economic activity approaches assumed experience, it is reasonable to expect the dollar amount of the contribution to amortize the unfunded accrued liability to remain relatively constant. The notion that amortization dollar amounts may be increasing is not necessarily cause for alarm. If adjusted for changes in purchasing power, any future increases in the dollar contributions may or may not reflect increases in terms of real dollars (inflation adjusted dollars).

It is also worth noting that when the same assumptions and methods are applied to plans which differ in nature, the valuation results may not be comparable (for example, it is currently not valid to compare valuation results for a plan having full escalation to valuation results for a plan having a $3\ 1/2\%$ cap on escalation.) Caution should be exercised when attempting to assess the financial condition of one Association relative to another on the basis of valuation results produced using the assumptions and methods mandated by state law.

Red Wing Fire Department Relief Association Valuation Methods and Assumptions

The Entry Age Normal Cost method was used to determine the normal cost of all benefits.

The rate of investment return (interest) used in making the valuation was 5.0 percent per annum, compounded annually. State law requires use of this assumption.

The mortality table used was the United States Life Table, 1959-61, White Males and White Females.

Single Life Values:

	Pre	sent Value	of \$1 Mon	thly		
	Le	vel	Incre	asing	Future l	_ife
Sample	For	Life	3.5%	Yearly	Expectancy	(Years)

55	0.89

Brief Summary (12/31/81) of Benefit Provisions Evaluated and/or Considered

Full Time

Age & Service Retirement

Eligibility. 20 years of service and 50 years of age.

Amount. For first 20 years of service, 40% of average annual wage. For each year in excess of 20 but less than 25 an additional 2% is added and for each year in excess of 25 and additional 1 1/2% is added. (Of the additional 1 1/2% for years over 25, 1/2% is not subject to the post retirement adjustment provisions.)

Average Annual Wage. Average annual salary for 3 highest paid years.

Disability Retirement

<u>Eligibility.</u> Disabled to the extent that no longer able to perform the duties of a firefighter before being eligible for age & service retirement.

Amount.

Duty Related. 40% of average annual wage plus 2% for each year in excess of 20 to a maximum of 50%.

Non-duty Related. 2% of average annual wage for each year of service. Minimum of 10% and maximum of 40%.

Member's Death While Active, Or In Deferred Status, Or Retired

Eligibility.

Spouse. Married to member at least one year at separtion from service and residing with member at time of death. Benefits terminate upon remarriage.

Child. Younger than age 18.

Amount.

Spouse. 25% of average annual wage.

Child. 8% of average annual wage per child.

<u>Funeral Expenses.</u> Lump sum payment of \$1,000 at time of death of active or retired member.

<u>Vested Deferred.</u> 20 years of service and separated before age 50. Payment beginning is deferred to attainment of age 50.

<u>Post Retirement Adjustments ("Escalator").</u> Benefits are increased January 1 for all benefit recipients in accordance with the increase in the Consumer Price Index during the preceeding year.

<u>Member Contributions.</u> 8% of basic compensation. Total member contributions are refundable, without interest, if no monthly benefit is payable upon separation from service.

Volunteer

Age & Service Retirement

Eligibility. 20 years of service and 55 years of age.

Amount. For 20 years of service, \$192 per year. For 25 years of service, \$240 per year.

Death Benefit

\$1,000 lump sum payment for funeral expenses.

<u>Vesting.</u> 20 years of service and separated before age 55. Payment beginning is deferred to attainment of age 55.

Member Contributions. \$19.20 per year. Total member contributions are refundable without interest if no monthly benefit is payable upon separation from service.
