March 27, 2023

Dear Ms. Cotton:

We have run the sales report for the state of Minnesota for both calendar year 2021 and 2022, and the total sales of rechargeable batteries into Minnesota was 33 units of Flex Mobile Power, [link to the product website](#). We have not received any requests for take back or collection for recycling, although we do have a warranty process where claims can be made and processed accordingly.

Please let me know if you have any questions or concerns.

Sincerely,

Heidi Frasure
Sustainability Manager
