Municipal State Aid Street Needs Report

MnDOT

October 2022

PREFACE

Fifty percent of the total apportionment will be distributed on prorated share of each city's population

Fifty percent of the total apportionment will be based on a prorated share of each city's Construction Needs (also called Money Needs)

The **2022 Municipal State Aid Street Needs Report** is presented to the Municipal Screening Board for use in making their annual construction (money) needs recommendation to the Commissioner of Transportation.

This submittal is required by MN Statute 162.13 and is to be made to the Commissioner on or before November 1st of each year.

The construction needs data contained in this book were compiled after Needs updates were submitted for each municipality. Construction Needs are calculated by applying the unit prices (as determined by the Municipal Screening Board at their spring meeting in May 2022) to the quantities in the appropriate urban ADT group. These ADT groups and explanations for all Needs Calculations are in the resolutions of the Municipal Screening Board.

Population data, from the State Demographer and Met Council, will be combined with the Commissioner's final construction Needs, and the results will be used to determine the total allocations which will be reported in the "2023 Municipal State Aid Apportionment Data" book to be published in January.

MUNICIPAL SCREENING BOARD MEETING MAY 24TH & 25TH, 2022 CRAGUNS RESORT, BRAINARD, MN AND MS TEAMS

MINUTES

TUESDAY, MAY 24th, 2022

- I. Call to Order by Chair Desrude at 1:00 pm on Tuesday, May 24th, 2022
- II. Desrude introduced herself as Chair of the Municipal Screening Board (MSB) and explained that due to Paul Sandy accepting a position in the private sector, he had to resign his position as President of CEAM and Chair of the MSB and that she would be serving the remainder of Sandy's term and the next term.
 - a. Desrude then introduced the following:
 - i. Kristine Elwood, State Aid Engineer
 - ii. Bill Lanoux, Manager, Municipal State Aid Needs Unit
 - iii. Matt Wegwerth, Grand Rapids Chair: Needs Study Subcommittee (NSS)
 - iv. John Gorder, Eagan Past Chair of the MSB
 - v. Justin Femrite, Elk River Past Chair of the MSB
 - vi. Michael Thompson, Plymouth Past Chair of the MSB
 - b. Desrude introduced Mark DuChene, Secretary of the Municipal Screening Board. DuChene then conducted roll call of the screening board members:

i. District 1 Caleb Peterson, Cloquet

ii. District 2 Steve Emery, East Grand Forks (Online)

District 3 Layne Otteson, Big Lake iii. Tom Trowbridge, Moorhead District 4 İV. Will Manchester, Minnetonka Metro West ٧. District 6 Brandon Theobald, Kasson νi. Jeff Domras. St. Peter vii. District 7 Chuck DeWolf, Litchfield viii. District 8 Brian Erickson, Rosemount Metro East ix.

x. Duluth Cindy Voigtxi. Minneapolis Jenifer Hagerxii. Rochester Dillon Dombrovski

xiii. St. Paul Paul Kurtz

c. Desrude also recognized Screening Board Alternates:

i. District 1 Jason Fisher, International Falls (Online)

ii. District 7 Joe Stadheim, New Ulm (Online)iii. Metro-East Zach Johnson, Lakeville (Online)

d. Desrude recognized Department of Transportation personnel:

i. Ted Schoenecker Assistant Division Director State Aid

ii. Marc Briese State Aid Programs Engineer

iii. Krysten Saatela Foster Dist. 1 State Aid Engineer

ίV. Brian Ketring District 2 State Aid Engineer Angie Tomovic District 3 State Aid Engineer ٧. Nathan Gannon νi. District 4 State Aid Engineer vii. Fausto Cabral District 6 State Aid Engineer viii. Lisa Bigham District 7 State Aid Engineer Todd Broadwell District 8 State Aid Engineer ix. Dan Erickson Metro State Aid Engineer Χ. Julie Dresel Assistant Metro State Aid Engineer χi.

- e. Finally, Desrude recognized others in attendance:
 - i. Marc Culver, Roseville Chair, CEAM Legislative Committee (Online)
 - ii. Kyle Wallace, Minneapolis
 - iii. Mike Van Beusekom, St. Paul
- III. Review of the 2022 Municipal Screening Board Data book (Lanoux)
 - a. Lanoux gave overview of MSB and reviewed the NSS and UCFS. Lanoux noted a need to fill a spot on UCFS (action item for Wednesday) to have all members serve extra term due to Sandy's resignation.
 - b. Lanoux reviewed the Oct. 2021 Fall Screening Board minutes (Pages 6-13)
 - i. Desrude called for a motion to approve the minutes from the October 2021 MSB.
 - i. Motion to approve the minutes by Voigt, seconded by Manchester. Motion carried 13-0.
 - c. Lanoux discussed traffic counting and whether to freeze traffic counts another year as 2021 data also has issues and some Cities haven't been counted since 2016. This may be the last year traffic counting is still playing catch up. If no action from the MSB, the Needs will use whatever data is on hand. If MSB wants to change that, action needs to happen on Wednesday. Chair to ask for any discussion on traffic count data on Wednesday.
 - d. Lanoux reviewed the unit price recommendations and also noted that NSS Chair, Matt Wegwerth is here for any questions.
 - i. Unit Price Recommendations of NSS (Page 23) and the minutes of the NSS meeting (Page 24-27) were reviewed.
 - ii. Lanoux noted that this was a year were detailed cost studies were not done and that a 7.4% inflation factor was applied from ENR. Committee stayed pretty true to inflation factor. Starting on Page 23 will be what will be asked to be approved tomorrow (Wednesday). Unless any changes recommended by MSB this is what will be approved.
 - e. Lanoux reviewed the Structure Needs Recommendation (Page 25)
 - Recommendation of \$98.58/s.f. (half of bridge costs). This is a 5-year average and in 2021 costs went down because the 2016

data fell off. This year, the cost is back up by 8.7%. Lanoux gave a brief history of structure needs, noting that structure needs are calculated at half their actual costs because structures usually have other funding sources for bridges and curb/pavement/etc. also generate needs. The goal from the Needs Study Taskforce (NSTF) was to keep structures at about 5% of total needs which is in line with historical accounts and not everyone has structures. The NSS is not recommending any changes.

- f. Lanoux reviewed the Storm Sewer Needs Recommendation
 - i. The MnDOT Hydraulics Unit performed an analysis of storm sewer Costs for 2021. (137 Storm Sewer Plans were reviewed) Costs are \$437,639 for new construction, and \$127,679 for adjustments to existing systems. This is an average of \$282,659 per mile. Committee makes recommendation for the highest of eight sections. Committee's Recommendation for 2022 Needs - \$282,700 per mile the recommendation of \$282,700 per mile is for a 70-foot section. The cost per mile will be prorated down through the other seven ADT groups. Last year was a full study so costs jumped noticeably.
- g. Lanoux reviewed the Lighting Needs Recommendation (Page 26)
 - i. The NSS recommendation is \$100K per mile. The NSS asked for what the MSB wanted from their motion in the fall. Wegwerth and Lanoux said question was, why all roads, regardless of traffic use or even existence of street lighting, generates the same needs. See page 26 for street lighting options looked at by NSS.
 - ii. After discussion of the NSS concerns about making policy changes it was the consensus of the NSS that this issue needed more study. The UCFS was given heads up that this could come back to their committee. The NSS recommendation is to stay with current needs for street lighting which is consistent with current MSB resolutions but could be further studied.
 - iii. Lanoux briefly discussed screening board resolutions and noted for construction needs purposes, all roads will be considered built to urban standards (including non-existing roads) which is likely why non-existence roads get lighting needs.
- Lanoux reviewed the UCFS recommendation on revised language for the Excess Balance Adjustment. (Page 51) and also discussed the UCFS vacancy in 2023
 - i. MSB approved recommendation of UCFS except for last paragraph regarding exemptions. MSB wanted the exemptions to come to MSB not State Aid. Ultimately UCFS recommending language on Pg 51.
 - ii. Lanoux gave history of excess balance adjustment. Pg 53-56 (typically given in January book) shows new balance floor.
 - iii. Pg 64 is complete rewrite of excess unencumbered fund balance penalty.

- IV. Other Discussion items
 - a. Legislative Update- Culver, Chair
 - i. Not much to give an update on as the legislature adjourned without passing a transportation bill. A lot of business left unfinished at end of session after flurry of activity over the final weekend. There are rumors of special session but given the election year not a lot of momentum to get anything done. A lot of funding CEAM was supportive and interested in were in supplemental budgets so they were not required to keep state going. No bonding bill was ever publicly introduced from either chamber, which is disappointing. CEAM was supportive and testified on dedication of auto parts sales tax, \$200M for LBRP and LRIP and matching funds for IIJA funds. It was noted MnDOT still needs authority to spend some federal funds. The Senate bill to remove a street from MSAS if traffic lanes were reduced was also not passed which was one good thing.
 - ii. Elwood noted one big issue is budget authority for TH funds also includes local authority. The lack of action at the legislature leaves \$100M on table (50/50 MnDOT/locals). Need to figure out how this is budgeted. Elwood or Schoenecker working on memo to share with LMC to get to locals.
 - b. State Aid report
 - i. Elwood introduced Schoenecker.
- V. Being there were no additional topics Desrude entertained a motion to adjourn until 8:30 Wednesday morning
 - a. Motion to adjourn by Dombrovski, seconded by Erickson. Motion carried 13-0.

Meeting adjourned at 1:54 pm

WEDNESDAY, MAY 25th, 2022

- I. Call to Order by Chair Desrude at 8:30 am. The following members were present:
 - i. District 1 Caleb Peterson, Cloquet
 - ii. District 2 Steve Emery, East Grand Forks (Online)
 - iii. District 3 Layne Otteson, Big Lake
 - iv. District 4 Tom Trowbridge, Moorhead
 - v. Metro West Will Manchester, Minnetonka
 - vi. District 6 Brandon Theobald, Kasson
 - vii. District 7 Jeff Domras, St. Peter
 - viii. District 8 Chuck DeWolf, Litchfield (Online)
 - ix. Metro East Brian Erickson, Rosemount
 - x. Duluth Cindy Voigt
 - xi. Minneapolis Jenifer Hager
 - xii. Rochester Dillon Dombrovski
 - xiii.St. Paul Paul Kurtz
- II. Unit Price Recommendations

- a. Desrude asked for any discussion on the Unit Price recommendations of the Needs Study Subcommittee on Page 23 of the book.
 - Voigt stated that lighting cost averages from studies done by the MnDOT lighting office is much more than the NSS lighting recommendation. Why is gravel down to the penny but street lighting are needs are almost \$100K less than actual costs? Voigt stated she is fine with the costs and will vote to approve the NSS recommendation but thinks that lighting needs to be reconsidered in the future.
 - Desrude noted and Wegwerth confirmed that lighting needs are set at \$100K by resolution and if the MSB wants to change that the MSB needs to change the resolution as the NSS was uncomfortable changing the lighting needs amount without changing the resolution.
 - Otteson asked if the lighting costs affect anything other than needs such as how the governor and legislature view needs? Lanoux responded that was one of the items looked at with removing street lighting from needs. It does impact the needs. Statute says lighting "may" be used in needs calculations. It is used to show the need and funding gap. Otteson agreed with Voigt to keep this on the radar for next year.
 - Hager asked how difficult is it to update lighting in needs program? Lanoux responded that at this time it is unknown but that it could be up to a year or more. If lighting was done outside of needs such as after the fact, then it could be done faster, but may take time to determine eligible items and could potentially get complicated. Lanoux will need to verify time with programmers for any program enhancements.
 - Kurtz provided some history on his time on the Needs Study Taskforce (NSTF). The NSTF looked at all items and the reason for his motion in the fall to take lighting to NSS was it has been the same forever and there was a question if it is fair for city's that don't install lighting, to collect needs. Kurtz acknowledged it would be difficult to define what a street lighting system is.
 - After further discussion Desrude noted that the consensus seemed to be to go with price as is now and come back with more information in fall. Lanoux will come back in fall meeting with feedback from computer programming department.
 - Voigt brought up one more item for discussion and that is structures. Duluth in last 10 years only had half of bridges replaced used bridge bonding and the rest were all local. Seems like structures are being forced to fit the old 5% share of program. Bridges have gone down to 3% versus sidewalks going from 11% to 14%. Given the importance of structures regarding life safety, why are structures being forced down to 5%. Seems worth a discussion to look at structures and why they are slipping as a percentage.

- Kurtz again provided background from the NSTF. The NSTF talked about bridges a lot and were three-quarters of the way down the road of eliminating structures from needs altogether. But structures are a big part of demonstrating needs. Duluth and St. Paul had a lot of structures and since structures also draw roadway needs, having them draw full structure needs is kind of double dipping. That and the outside funding for bridges is why the rational from the NSTF was to have bridges draw 50% as that was what was determined to be fair and fairness was a guiding principle for the NSTF. Given current prices for bridges it's likely we'll see a significant rise in bridge needs in the future. Fine with work of NSS. Can't think of a better way, better to have them in at 50% than not in at all.
- Wegwerth again reminded the MSB that a big year in 2016 for structure costs just fell off. Going forward should get back to 5%.
- i. Desrude entertained a motion to take action on Unit Costs recommended by the NSS
 - 1. Manchester made a motion to approve the Unit Costs recommended by the NSS on page 23 of the book, motion seconded by Trowbridge.

Roll Call Vote:

District 1	Caleb Peterson (Cloquet)	Yes
District 2	Steve Emery (East Grand Forks/Online)	Yes
District 3	Layne Otteson (Big Lake)	Yes
District 4	Tom Trowbridge (Moorhead)	Yes
Metro West	Will Manchester (Minnetonka)	Yes
District 6	Brandon Theobald (Kasson)	Yes
District 7	Jeff Domras (St. Peter)	Yes
District 8	Chuck DeWolf (Litchfield/Online)	Yes
Metro East	Brian Erickson (Rosemount)	Yes
Duluth	Cindy Voigt	Yes
Minneapolis	Jenifer Hager	Yes
Rochester	Dillon Dombrovski	Yes
St. Paul	Paul Kurtz	Yes

Motion Carried 13-0

- III. UCFS Excess Balance Adjustment Recommendation
 - Desrude asked for discussion on the UCFS recommendation on revised language for the Excess Balance Adjustment. Being no discussion Desrude entertained a motion to accept new language on Page 51
 - Manchester made a motion to approve UCFS recommendation on revised language for the Excess Balance Adjustment on page 51 of the book, motion seconded by Otteson.

Roll Call Vote:

District 1	Caleb Peterson (Cloquet)	Yes
District 2	Steve Emery (East Grand Forks/Online)	Yes
District 3	Layne Otteson (Big Lake)	Yes
District 4	Tom Trowbridge (Moorhead)	Yes
Metro West	Will Manchester (Minnetonka)	Yes
District 6	Brandon Theobald (Kasson)	Yes
District 7	Jeff Domras (St. Peter)	Yes
District 8	Chuck DeWolf (Litchfield/Online)	Yes
Metro East	Brian Erickson (Rosemount)	Yes
Duluth	Cindy Voigt	Yes
Minneapolis	Jenifer Hager	Yes
Rochester	Dillon Dombrovski	Yes
St. Paul	Paul Kurtz	Yes

Motion Carried 13-0

IV. UCFS Three-Year Terms 9Pg 57)

- a. Desrude asked for discussion on the UCFS three-year terms to allow the three existing members to serve additional years in order to maintain a 3-person committee. It was noted that all three existing members were acceptable to serving additional years. Desrude entertained a motion to have members serve an extra year due to a gap in the MSB Chair position.
 - Erickson made a motion to have existing UCFS members serve an extra year due to a gap in the MSB Chair position. Seconded by by Voigt.

Roll Call Vote:

District 1	Caleb Peterson (Cloquet)	Yes
District 2	Steve Emery (East Grand Forks/Online)	Yes
District 3	Layne Otteson (Big Lake)	Yes
District 4	Tom Trowbridge (Moorhead)	Yes
Metro West	Will Manchester (Minnetonka)	Yes
District 6	Brandon Theobald (Kasson)	Yes
District 7	Jeff Domras (St. Peter)	Yes
District 8	Chuck DeWolf (Litchfield/Online)	Yes
Metro East	Brian Erickson (Rosemount)	Yes
Duluth	Cindy Voigt	Yes
Minneapolis	Jenifer Hager	Yes
Rochester	Dillon Dombrovski	Yes
St. Paul	Paul Kurtz	Yes

Motion Carried 13-0

V. Traffic Counting (Resolution on Pg 66)

a. Desrude reviewed the traffic counting practices for the NEEDS program and noted that all cities get counted at least every four years. However, due to COVID and a backlog in the MnDOT traffic counting office some cities have not been counted since 2016. State Aid updates the Needs annually with any available count data from previous year. Do we resume with this cycle or hold off?

- b. There was no discussion and no motion made
- VI. Last Call for Any Other Discussion Topics
 - a. Desrude asked for last call on any additional discussion topics.
 - b. Kurtz asked to just revisit street lighting and inquired if a poll can be sent out to see which cities do street lighting and which don't. After further discussion on what does the poll look like it was the consensus to have Lanoux to talk to peers and work with the NSS to develop a survey/poll regarding street lighting.
 - Dombrovski made a motion to have Lanoux work with the NSS to develop a poll regarding street lighting, seconded Domras.

Motion carried 13-0.

- VII. Desrude noted that the next Fall Screening Board meeting will be at Arrowwood Resort, Alexandria, MN on October 25 & 26, 2022
- VIII. Desrude thanked the following:
 - a. Matt Wegwerth, Chair of the NSS
 - b. Screening Board members
 - c. Bill Lanoux & Nancy Stone from MnDOT
 - d. Secretary of the MSB
- IX. Desrude entertained a motion for adjournment
 - a. Motion to adjourn by Theobald, Seconded by Trowbridge. Motion carried 13-0.

Meeting adjourned at 9:10 am

Respectfully submitted,

Mark DuChene, PE

Municipal Screening Board Secretary

Mule @ M

Faribault City Engineer

PORTION OF APRIL 2022 NEEDS STUDY SUBCOMMITTEE MINUTES

Lighting is the second item that the Municipal Screening Board requested this committee review and recommended possible changes. MSB resolutions currently state that Street Lighting will be determined by multiplying \$100,000 per mile, for all segments. The NSS group asked for detail on what the Screening Board was looking for in their motion: Is the issue with the unit cost itself, or with the way it's currently calculated? Wegwerth and Lanoux, who were both at the Fall Screening Board, believe the issue is with the calculation, and why do higher volume, busy roads draw the same lighting per mile as a lower volume road, or even a non-existing road. Why do we have a flat cost for lighting?

Lanoux shared information he received from the State Aid Lighting Engineer. General assumptions are that "residential roads" have 19 light fixtures per mile and "commercial roads" have 26 light fixtures per mile. For estimating & planning purposes (and today's cost of lighting) local commercial lighting would be approximately \$195,000/mile and the local residential would be \$142,500/mile. (note: there is a 36.8 % increase from residential to commercial in these two costs. If applying the same increase of 36.8% to the current cost of \$100,000, you could use a trial scenario of \$100,000 for residential lighting, and \$136,800 for commercial.)

Prior to the NSS meeting, the committee asked Bill for a few of different Lighting Scenarios to see how they would affect the distribution: Scenarios were, 1) get rid of lighting altogether. 2) make 5000 ADT the cutoff point for residential vs commercial lighting. And 3) do the same as #2 – but give "non-existing" segments zero dollars in lighting needs. Bill presented test distributions for these scenarios and used costs of \$100,000 for residential, \$136,800 for commercial:

- 1) Removing Lighting all together isn't a complete wash that has no effect on distribution. This is because removing Lighting also changes engineering (22% of everything) and Lighting is presently a bigger % of the Needs for cities with more low volume roads. Removing Lighting takes more Needs away from these cities than it does more urban type cities. The city that lost the most loses \$18,400 in distribution. The city that gains the most gains \$100,000.
- 2) Give AADT groups 1-4 lighting at \$100,000 per mile. Then give AADT groups 5-8 lighting at \$136,800 per mile. This scenario had a similar affect as #1, but the swings weren't as drastic. The city that loses the most loses \$4000. The city that gains the most gains \$15,000.
- 3) Similar result to method #2, but because this scenario gives zero lighting needs to "non-existing" segments, cities with the most non-existing routes lost the most money. (Greatest loss for a city was \$13,000)

The NSS discussed and gave consideration to all scenarios. After more conversation, committee members became concerned with the role of the NSS in this matter and in recommending a potential policy change. Yes—The NSS is the committee to recommend Unit Cost changes and could recommend an increase to the current lighting cost of \$100,000 per mile. But moving on a recommendation in which certain cities would draw more lighting Needs than others gets into the area of policy change—which might require more research and perhaps involvement of the UCFS? Question became—is the NSS the committee to recommend policy changes.

The NSS recommends that they be consistent with current screening board resolution and keep the current lighting needs cost of \$100,000 per mile. They would like more discussion on this this item with the Spring Screening Board.

NOTES ON POPULATION DATA

Fifty percent of the total apportionment is distributed on prorated share of population. The State Demographer & Metropolitan Council released their latest 2021 population estimates in July of 2022. These figures, or the 2020 Federal Census population figures (whichever are greater), will provide the basis for each city's upcoming 2023 apportionment.

There are 150 MSAS cities. Their overall population has increased by 0.7% since the 2020 Federal Census.

Twelve cities have had a percentage increase of over 4.0% in just the last year: Victoria (4.0%), Minnetrista (4.0%), Big Lake (4.1%), Medina (4.2%), Shakopee (4.3%), St. Michael (4.4%), Rogers (4.6%), Spring Lake Park (5.0%), Otsego (6.6%), Corcoran (8.1%), Dayton (10.5%), and Lake Elmo (11.6%)

In the last year, four cities have seen their populations decrease by at least -2.0%.

Chisholm has a population of 4,732. The city remains eligible to be included in the MSAS distribution. (see Minnesota Statute 162.09 subd.4)

The City of North Oaks has a population of 5,306. All residential roads in North Oaks are private roads, so the city is unable to establish a Municipal State Aid Street System. North Oaks is not a MSAS city as of this time.

These cities were once MSAS cities: Ely (3,209), Eveleth (3,469), Luverne (4,937), and Pipestone (4,138).

To Become an MSAS Eligible City

For a city that is not receiving a MSAS fund apportionment: If the city's population total from the decennial census is at least 5,000, or a population estimate, from either the Metropolitan Council or State Demographer, estimates that the city's population is at least 5,000, the city becomes MSAS eligible.

The City of Princeton passed 5,000 people this year and is a newly eligible MSAS city.

To Be Dropped as an MSAS City

For a city to be *dropped* from the MSAS eligible list, the following scenario must occur:

- 1) The decennial census must show that a city's population has dropped below 5,000.
- 2) For five years after the census, annual population estimates must show that a city's population has stayed below 5,000. (see Minnesota Statute 162.09 subd.4)

2022 POPULATION SUMMARY

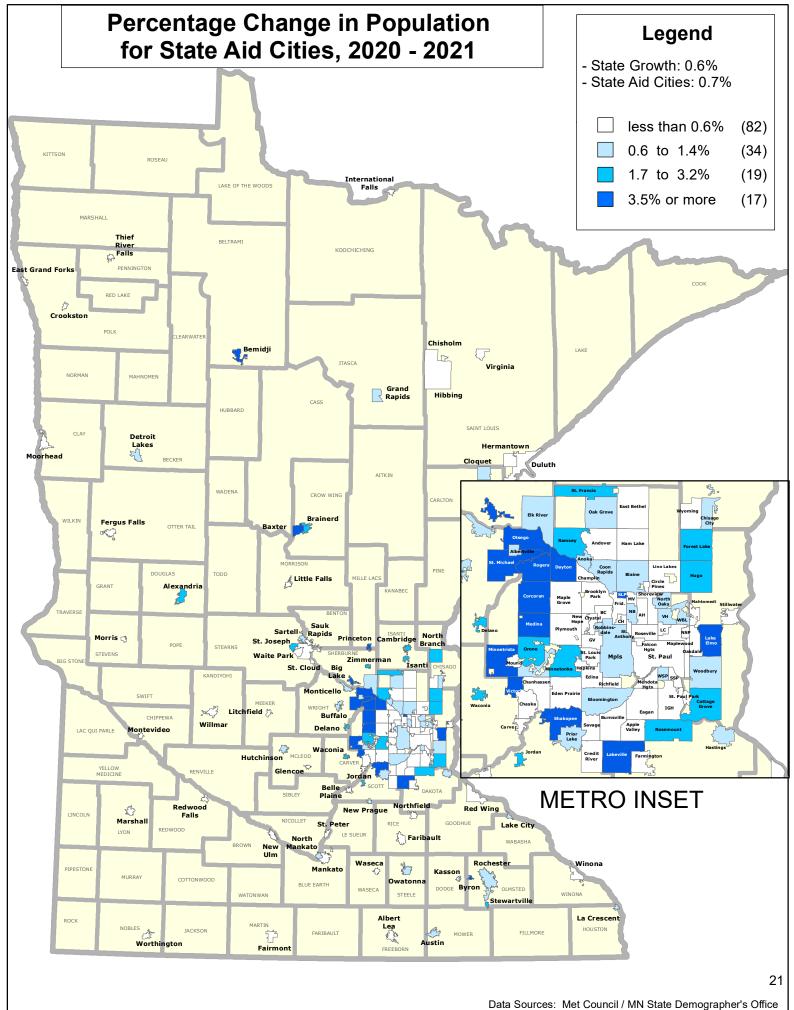

The populations used for 2023 Allocations are based on the 2020 Federal Census or the most recent State Demographer / Met Council estimates, whichever are greater

Municipality	2020 Census	Population used for the last Allocation	2021 Population Estimates (Released July 2022)	Population to be used for 2023 Allocation	% Change in Population used for 2022 & 2023 Allocations	% Change in Population over the last year

MSAS POPULATION & ALLOCATIONS

Fifty percent of the total apportionment sum is distributed on a prorated share of each city's population. The Met Council / State Demographer's most recent population estimates were released in July 2022 and will be used in determining each city's share of the 2023 population apportionment. (note that 2020 Federal Census populations are used if a city's last census figure is greater than their most recent population estimate).

Any adjustments made to the population estimates in this report would be released in December 2022. Those changes would be minor and will be presented in the January 2023 book. Changes could include population adjustments due to annexations, detachments, or any other minor revisions made by the State Demographer.

The distribution amount for the 2022 population apportionment was \$109,969,925. Using this same amount for 2023, each city would earn approximately \$26.70 per capita (a 23 cent drop from 2022). This projection will be revised when the actual revenue for the 2023 apportionment becomes available in January.

TENTATIVE 2023 POPULATION ALLOCATIONS

Municipality	Population used for 2022	Population used for 2023	2022 Population Allocations (last year)	2023 Population Allocations (this year)	Difference Between last two Allocations	Allocation % Change

Total	4,084,000	4,118,240	\$109,969,925	\$109,969,925	0	0.0

A city's **Population Allocation** equals the *total population apportionment* divided by the *total population of all cities,* multiplied by the city's *population used for 2023*.

2022 <u>\$109,969,925</u> \$26.93 per person 4,084,000

2023 <u>\$109,969,925</u> 4,118,240 \$26.70 per person

The population increase from 2022 and 2023 for allocation purposes is **34,240** (0.8% increase overall)

58 Cities Increased their population allocation.

92 Cities Decreased their population allocation.

MILEAGE, NEEDS AND APPORTIONMENT

The cities' share of the *Highway User Tax Distribution Fund* will be announced in January when the Commissioner of Transportation makes a determination of the 2023 apportionment. Allocations in this report are tentative and will be based off the 2022 total apportionment amount of **\$219,939,850**. Using last year's amount makes for a conservative January forecast and allows us to better see effects of changes in Construction Needs.

System wide mileage increases annually. This is due to the increasing number of eligible cities and to overall growth in local street mileage.

Tentative Maintenance and Construction allocations are not provided in this report. Cities have the option of receiving a minimum of \$1,500 per mile or a percentage up to 35% of their total allocation for Maintenance. If a city desires to receive more than the minimum maintenance, or make a change to their future maintenance request, the city should inform the Municipal State Aid Needs Unit prior to **December 15th**. A memo regarding Maintenance Requests will be sent to each city engineer around November 1st.

2022 ITEMIZED TABULATION OF NEEDS

The 2022 Money Needs continued to increase over the last year. This overall increase is due to added system mileage, two new cities, and an increase to most of unit costs in the Needs study. (The unit cost for street lighting remained the same. See Screening Board Resolutions for all unit prices used in the 2022 Needs computation.)

The "2022 item by item tabulation of Needs" shows all construction items used in the Municipal State Aid Needs Study. ("After the fact" items are discussed later in this report). This tabulation is provided to give each city an opportunity to compare their Needs of the individual construction items to that of other cities.

Most items in the tabulation are traffic based and draw continuous needs for cities. Traffic Signals and Structures (bridges/culverts) draw Needs on a "per item" basis. Therefore, several cities are not drawing Needs for these costs because they do not have these items on their Municipal State Aid System.

The average cost per mile is \$2,611,876 (up from \$2,449,768 last year). Credit River currently has the lowest cost per mile at \$1,595,412 while Minneapolis has the highest cost at \$3,506,366 per mile.

The five cities with the highest cost per mile are listed alphabetically as follows: Minneapolis, Moorhead, Rochester, Saint Louis Park, and Saint Paul.

The five cities with the lowest cost per mile are listed alphabetically as follows: Carver, Credit River, East Bethel, Ham Lake, and Saint Francis.

2022 MILEAGE REPORT

The 2022 Mileage Report shows all categories of mileage used in the Municipal State Aid Needs Study. This report is provided to give cities the opportunity to view various mileage categories and can also be used as a reference when reviewing and comparing against your city's local road inventory.

The **Total System Length** reflects an overall increase from last year. This increase of 37 miles is due to the addition of two new MSAS cities and to overall system growth.

In addition to adding two new cities, forty-three other cities made changes to their system mileage in 2022.

'Total System Length' and 'Total Needs Length' may differ within some cities. These categories are different when cities have designations that are either "Outside City Limits" or defined as "MSB approved One Way Mileage".

Total Needs Length for all cities is 3,871.44 miles.

Total System Length for all cities is 3,876.80 miles.

The category '**Total Needs Coded as Common Boundary**' is for shared MSAS roads on corporate limit boundaries. For these roadways, two adjacent cities are drawing Needs on half the actual roadway length.

The information on this Mileage Report may also be helpful as you fill out your upcoming 2022 Annual Certification of Mileage form (due January 2023). In general, we expect that your "Total Needs Length" from this Mileage Report will match line 13 of the 2022 Certification of Mileage. Should there be a discrepancy, we ask that you provide an explanation on the backside of your Annual Certification of Mileage Form.

One reason there could be a discrepancy, is if a city wishes to certify a mileage change due to a MSAS route realignment, or new construction, that occurred *after* the city submitted their 2022 Needs updates. In this case, the end of the year mileage certification would be "*ahead of the Needs*" until the corresponding mileage changes would get updated in the Needs the following spring.

Another reason for a discrepancy is if a city had an approved system revision that occurred *after* their Needs were submitted in 2022 (but approved by the Commissioner before December 31st). Revisions from such a system revision can be included on your upcoming 2022 mileage certification, and then updated in the Needs in the spring of 2023.

2022 CONSTRUCTION NEEDS & 2023 CONSTRUCTION NEEDS ALLOCATIONS

Fifty percent of the total apportionment is determined on a prorated share of each city's construction Needs. The construction Needs in this report are computed from annual Needs Updates submitted by each city. Before determining each city's allocation, the following Municipal Screening Board mandated adjustments are applied to the "unadjusted" construction Needs.

- Excess Unencumbered Construction Fund Balance Adjustment
- Low Balance Incentive
- After the Fact Right of Way Adjustment
- After the Fact Retaining Wall Adjustment
- After the Fact Railroad Crossing Adjustment
- After the Fact Railroad Bridge over MSAS Adjustment
- Excess Maintenance Account (none for 2022)

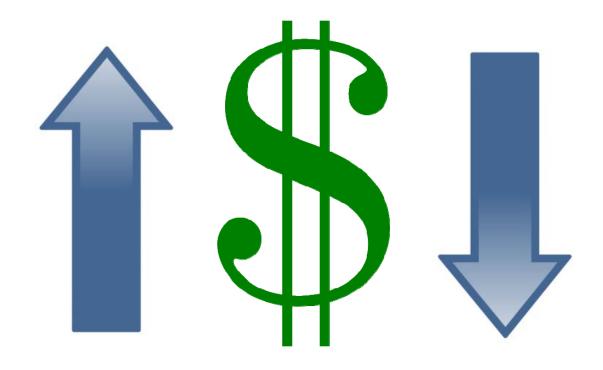

By applying these adjustments, the "Adjusted Construction Needs" are calculated for each city. These are the Needs figures used to determine the Construction Needs Allocations. The actual amount of the road user fund for distribution to the Municipal State Aid Account will not be available until January 2023.

The tentative 2023 Needs allocations in this book will be based on the 2022 money needs apportionment amount of \$109,969,925.

The Municipal Screening Board will make their Money Needs recommendation by Nov. 1st

The data on the following pages are for the Screening Board's use in determining the Tentative 2022 Construction Needs. These tabulations show the impact of any individual adjustments and the tentative allocations to each city.

Adjustments to the Restricted Construction Needs

EXCESS UNENCUMBERED CONSTRUCTION FUND BALANCE ADJUSTMENT

Screening Board Resolutions state:

The December 31 construction fund balance will be compared to the annual construction allotment from January of the same year. If the December 31 construction fund balance exceeds 3 times the January construction allotment, and the construction fund balance is over 3 times the average construction allotment for all cities excluding cities of the first class (hereinafter referred to as the adjusted average construction allotment), then the negative adjustment to the Needs will be 1 times the December 31 construction fund balance. In each consecutive year the December 31 construction fund balance exceeds 3 times the January construction allotment (and the balance is over 3 times the adjusted average construction allotment) the negative adjustment to the Needs will be increased to 2, 3, 4, etc. times the December 31 construction fund balance until such time the Construction Needs are adjusted to zero.

If the December 31 construction fund balance drops below 3 times the January construction allotment and subsequently increases to over 3 times, the multipliers will start over with one.

The adjusted average construction allotment used for this purpose shall not decrease in value from one year to the next.

If a city wishes to justify their balance in excess of said limits, and request an exemption to the excess balance adjustment, their request must be reviewed and approved by the Municipal Screening Board at their Annual Fall Meeting.

LOW BALANCE INCENTIVE

Screening Board Resolutions state:

The amount of the Excess Unencumbered Construction Fund Balance Adjustment will be redistributed as a positive adjustment to the Construction Needs of all municipalities whose December 31st construction fund balance is less than 1 times their January construction allotment of the same year. This redistribution will be based on a city's prorated share of its Unadjusted Construction Needs to the total Unadjusted Construction Needs of all participating cities times the total Excess Balance Adjustment.

The September 12, 2022 balance is used for this report. The final adjustment will be made using the December 31, 2021 construction fund balances.

EXCESS BALANCE ADJUSTMENT REDISTRIBUTED AS LOW BALANCE INCENTIVE

Balance floor for Dec. 31, 2022 is **\$2,744,754**. See Screening Board Resolutions

AFTER THE FACT RAILROAD CROSSING ADJUSTMENT

Screening Board Resolution:

Any Railroad Crossing improvements shall not be included in the Needs Calculations until the project has been completed and the actual cost established. At that time a Construction Needs adjustment shall be made by annually adding the local cost (which is the total cost less county or trunk highway participation) to the annual Construction Needs for a 15 year period. Only State Aid eligible items are allowed to be included in this adjustment, and all Railroad Crossing Needs adjustments must be input by the city and approved by the District State Aid Engineer.

Municipality	Eligible Railroad Crossing Expenditures	New Railroad Crossing Expenditures 2022	Expired Railroad Crossing Expenditures	Expire Date	Total Railroad Crossing Adjustment for 2023 Apportionment
Buffalo	\$528,566			2031	\$528,566

AFTER THE FACT RAILROAD BRIDGE OVER MSAS ADJUSTMENT

RR Bridge over MSAS Route Rehabilitation

Any structure that has been rehabilitated (Minnesota Administrative Rules, CHAPTER 8820, 8820.0200 DEFINITIONS, Subp. 8. Bridge rehabilitation) shall not be included in the Needs calculations until the rehabilitation project has been completed and the actual cost established. At that time a Construction Needs adjustment shall be made by annually adding the local cost (which is the total cost less county or trunk highway participation) for a 15-year period. Only State Aid eligible items are allowed to be included in this adjustment and all structure rehabilitation Needs adjustments must be input by the city and approved by the DSAE.

RR Bridge over MSAS Route Construction/Reconstruction

Any structure that has been constructed/reconstructed (Minnesota Administrative Rules, CHAPTER 8820, 8820.0200 DEFINITIONS, Subp. 31. Reconstruction) shall not be included in the Needs calculations until the project has been completed and the actual cost established. At that time a Construction Needs adjustment shall be made by annually adding the local cost (which is the total cost less county or trunk highway participation) for a 35-year period. Only State Aid eligible items are allowed to be included in this adjustment and all structure construction/reconstruction Needs adjustments must be input by the city and approved by the District State Aid Engineer

NOTES AND COMMENTS

October 26, 2022

Nancy Daubenberger, Commissioner Mail Stop 100 395 John Ireland Blvd. St. Paul, MN 55155

Dear Commissioner Daubenberger:

We, the undersigned, as members of the 2022 Municipal Screening Board, having reviewed all information available in relation to the 25 year money needs of the Municipal State Aid Street System do hereby submit our findings as required by Minnesota Statutes.

We recommend that these findings be modified as required by Screening Board Resolutions, and that any new municipalities that become eligible for State Aid by special census, incorporation, annexation or population estimates have their mileage and resulting money needs established and included in our findings.

This Board, therefore, recommends that the money needs, as listed on the attached, be modified as required and used as the basis for apportioning to the urban municipalities the 2023 Apportionment Sum as provided by Minnesota Statutes, Chapter 162.13, Subdivision 1.

2023 TENTATIVE CONSTRUCTION NEEDS ALLOCATIONS

Needs Value: \$1,000 in Construction Needs = approximately \$10.79 in apportionment

The following table shows each municipality's *Tentative* Money Needs Allocation based on a projected apportionment amount of \$109,969,925. The actual amount of the Road User Fund for distribution to the Municipal State Aid account will not be available until January 2023. This summary provides data and shows the impact of the adjustments to each municipality for the Board's use in establishing the Money Needs Apportionment Determination.

CERTIFICATION OF MSAS SYSTEM AS COMPLETE

A Certification of a Municipal State Aid Street System may occur when a City certifies to the Commissioner of Transportation that its state aid routes are improved to state aid standards or have no other needs beyond additional surfacing or shouldering needs as identified in the annual State Aid Needs Report. This authority exists under Minnesota Rules 8820.1800 subpart 2, which reads in part:

When the county board or governing body of an urban municipality desires to use a part of its state aid allocation on local roads or streets not on an approved state aid system, it shall certify to the commissioner that its state aid routes are improved to state aid standards or are in an adequate condition that does not have needs other than additional surfacing or shouldering needs identified in its respective state aid needs report. That portion of the county or city apportionment attributable to needs must not be used on the local system.

When a system is certified as complete, the certification shall be good for two years. The dollar amount eligible for use on local streets will be based on the population portion of the annual construction allocation. The beginning construction account figure for this calculation shall be the amount of the current year's construction account which is not generated by construction needs.

The dollar amount eligible to be spent on local street systems is determined as follows:

Determine what percentage the population allocation is of the total allocation. This percent is then multiplied times the construction allotment. This is the amount of the construction allotment that is generated by the population allocation. Only the construction allotment is used because the city has already received its maintenance allotment.

Population Allocation / Total Allocation * Construction Allotment = Local Amount Available. (see allocation into 90p account on next page)

The following five cities are Certified Complete: Columbia Heights, Crookston, Falcon Heights, Fridley, and South St. Paul.

90P ACCT - LOCAL AMOUNT AVAILABLE AFTER JANUARY 2022 ALLOCATION

Prepared for the January 2022 book

The Maximum Local Amount Available may change upon receipt of any payment request.

	Fridley	Columbia Hgts	Falcon Hgts	South St. Paul	Crookston
Total Apportionment	\$1,385,233	\$904,114	\$220,962	\$1,074,302	\$528,365
Population	\$796,770	\$591,667	\$144,571	\$558,978	\$201,468
Money Needs	\$588,463	\$312,447	\$76,391	\$515,324	\$326,897
% based on Pop.	57.5%	65.4%	65.4%	52.0%	38.1%

Allocation to 90p acct (amount of construction allotment based on Population)	\$517,900	\$443,750	\$108,428	\$419,233	\$151,101
Amount Remaining in 90p acct from 2021	\$17	\$0	\$403,388	\$423,964	\$944,220
* Maximum Local Unemcumbered Amount Available after January 2021 Allocation	\$517,917	\$443,750	\$511,816	\$843,197	\$1,095,321

^{*} This is the amount available to spend on city streets after the 2022 allotments have been received. To find out how much is available for spending on local streets as of a specific date, please log on to SAAS Reports, select State Aid County and Municipality Report, select SAAS Status and then select your city and the Reporting Year/Month. The report numbered 90p - Muni Const Pop shows the amount available for local projects.

2012	3,014,118	1,029,649	\$1,984,469	2022	4,524,750		

The unexpended balance of the administration account at the end of the year is transferred back to the MSAS fund and redistributed the following year.

HISTORY OF THE RESEARCH ACCOUNT

Each year the Screening Board, provided for in section 162.13, Subdivision 3, may recommend to the commissioner a sum of money that the commissioner shall set aside from the municipal state aid street fund and credit to a research account. The amount so recommended shall not exceed 1/2 of 1% of the preceding apportionment. Any balance remaining in the research account at the end of each year from sum set aside for the year immediately previous, shall be transferred to the MSAS fund.

Be it resolved that an amount of \$1,099,699 (not to exceed 1/2 of 1% of the 2022 MSAS Apportionment sum of: \$219,939,850) shall be set aside from the 2023 Apportionment fund and be credited to the research account.

Municipal State Aid Construction Account AdvanceGuidelines

State Aid Advances

<u>Minnesota Statutes 162.14, Subd. 6</u> provides for municipalities to make advances from future year's allocations for the purpose of expediting construction. This process not only helps reduce the construction cash balance, but also allows municipalities to fund projects that may have been delayed due to funding shortages.

The formula used to determine the annual amount available for advances will be between 20% and 25% of the January MSAS Construction allocation, influenced by the current construction cash balance, expenditures trends, repayments of previous advances, etc.

General Guidelines and Process for State Aid Advances from MSAS Construction Allocation

- 1. In October, the District State Aid Engineers (DSAE's) will solicit state aid cities for their preliminary proposed advances for the upcoming year. The DSAE's will prioritize the preliminary advance requests within their respective districts and submit to the Deputy State Aid Engineer, who will prioritize the requests on a statewide basis.
- 2. In early January, State Aid will determine the amount available for advances in that calendar year. The formula used to determine the annual amount available for advances will be between 20% and 25% of the January MSAS Construction allocation, influenced by the current construction cash balance, expenditures trends, repayments of previous advances, etc.
- 3. In mid-January, the Deputy State Aid Engineer will contact agencies that submitted preliminary advance requests with information on which preliminary advances likely can be approved. If all preliminary advance requests likely cannot be approved, this communication will be accompanied by a prioritized list of remaining preliminary advance requests. A generalized communication will also be sent to all state aid cities regarding the status of the advance program.
- 4. If all anticipated advances likely cannot be approved, the Deputy State Aid Engineer and District State Aid Engineers will convene monthly to review the available balance and consider approving additional advance requests based on the priority list. Local agencies can submit additional requests throughout the year, and they will be approved immediately if possible, or they will be prioritized along with the remaining advance requests.
- 5. The submittal of preliminary advance requests in October/November does not constitute an official advance request approval. Municipalities must submit a State Aid Advance Resolution authorizing the advance by their city council. The correct resolution must be used for each advance type and there are sample resolutions for each on the MnDOT State Aid Finance (SAF) webpage. Requests are good only for the year requested (cannot be submitted for multiple years) and void at 12/31 of that year.

Advances are not limited to the projects listed on the resolution, and the resolution itself does not guarantee that funds will be held. If a city decides they need a guarantee that the funds will be held (typically when a city is sure it will complete a project and is certain it will need an advance), it can submit a "Request to Reserve Advance Funds" to ensure funds will be available for their project. If a request to reserve funds is not submitted, project payments are processed in the order received by SAF until the maximum advance amount is reached. Advances are repaid from next year's allocation until fully repaid.

Sample Advance Resolutions and Request to Reserve Funds can be obtained from <u>SAF Forms & Resolutions</u> <u>webpage</u>. E-mail completed forms to your <u>DSAE</u> for review, and after DSAE approval, email to Mohamed Farah at <u>mohamed.m.farah@state.mn.us</u> in MnDOT State Aid Finance.

Prioritization

In general, priority projects include, but are not limited to, projects where agreements have mandated the city's participation, projects with advanced federal aid, bond principal payments, large agency projects which require multiple years of allocation, and other high priority projects. Small overruns and funding shortfalls may be funded but do require MnDOT State Aid approval. Municipalities with prior advances, and still repaying, will have their advance request considered a lower priority.

Advance Limitations

Statutory

None, reference Minnesota Statutes 162.14, Subd 6.

State Aid Rules

None, reference State Aid Rules 8820.1500, Subp. 10 & 10b (PDF).

State Aid Guidelines

Advance is limited to five times the municipalities' last construction allotment or \$4,000,000, whichever is less. Advance amount will be reduced by any similar outstanding obligations and/or bond principal payments due. The limit can be administratively adjusted by the MnDOT Chief Financial Officer.

Limitation may be exceeded due to federal aid advance construction projects programmed by the ATP in the STIP where state aid funds are used in lieu of federal funds. Repayment will be made at the time federal funds are converted. Should federal funds fail to be programmed, or the project (or a portion of the project) be declared federally ineligible, the local agency is required to pay back the advance under a payment plan mutually agreed to between MnDOT State Aid and the municipality.

Street Lighting Survey Results

Fall 2022

STREET LIGHTING SURVEY

City Engineers,

The current method of calculating street lighting needs is "\$100,000 per mile" for all roadway segments on the MSAS system. This current method does not assume any variation in street lighting costs among roadway segments. The Municipal Screening Board has requested that State Aid put together a survey on street lighting for MSAS cities. The goal of a survey would be to estimate a real-world cost of street lighting, and gauge variations in lighting costs among MSAS cities. After reviewing the survey, the Municipal Screening Board can determine if a change in how we calculate street lighting in the needs is warranted.

When it comes to street lighting (either city owned or local utility owned systems) there are presumed to be several areas of variation between cities: The percentage of each city's MSAS System that has some level of lighting; the cost for a typical lighting unit in each city; and the typical frequency (spacing) between units in a city. Because these items are variable, even within a city, we ask each city engineer to <u>best answer what is most typical</u> for the cost of lighting their city.

NOTE: some of the baseline costs used in this survey come from the following sources:

COST PER ONE UNIT: The State Lighting Engineer recently estimated that a 40-foot pole, with a Standard LED luminaire, costs about \$7500 per unit. (lighting units, foundation, cables, conduit). Additionally, a 2015 State Aid cost study of 15 lighting projects (on the MSAS system) came up with a statewide cost of \$5200 per unit.

FREQUENCY PER UNIT: For estimating and planning purposes, AASHTO estimates Local Commercial roads to

have about 26 lights per mile and Local Residential to have 19 per mile. So using costs above

\$7500 X 19 = \$142,500 per mile residential

\$7500 X 26 = \$195,000 per mile commercial

\$5200 X 19 = \$98,800 per mile residential

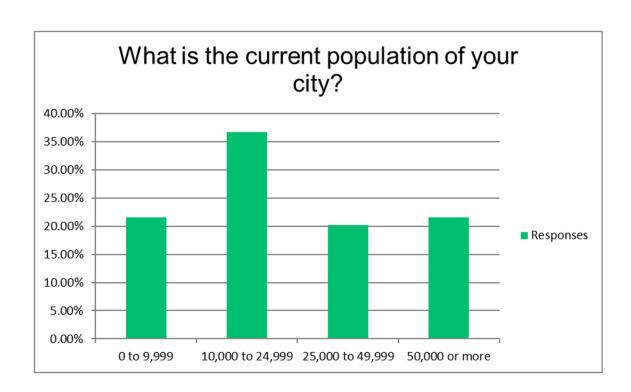

\$5200 X 26 = \$135,200 per mile commercial

SURVEY QUESTIONS

- 1. What is the current population of your city?
- 2. Is your city located in the Metro District or Outstate?
- 3. Approximately what percentage of your entire MSAS system has some level of street lighting?
- 4. In determining if a particular roadway in your city will have street lighting, rank the importance of the following criteria (1 lowest, 4 highest)
 - Commercial / Residential classification
 - Functional classification (arterial, collector, local)
 - Traffic Volume / AADT
 - Requests for lighting by residents
- 5. What is your best estimate for the typical "cost per mile" for standard street lighting in your city (foundations, poles, luminaires, cables, conduit and installation)?
- 6. What is your best estimated cost of a basic standard unit in your city today (foundation, pole, luminaire, cables, conduit and installation)?
- 7. In determining a "number of poles per mile" estimate, which range best describes a typical roadway in your city?
- 8. Do you agree that the current method of calculating street lighting should be changed?
- 9. If the current method of calculating street lighting should be changed, what new approach would you support?
- 10. Any other thoughts?

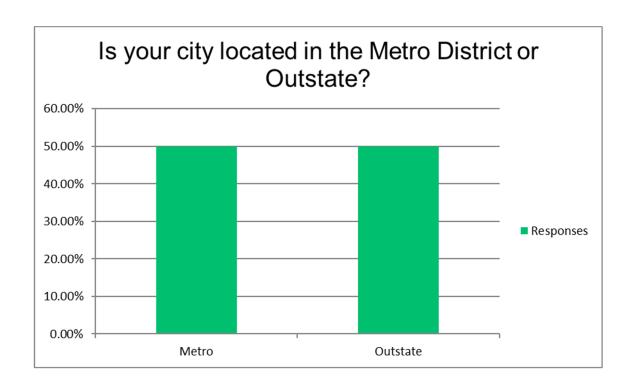

Question 1: What is the current population of your city?

Answer Choices	Responses
0 to 9,999	21.52% (17)
10,000 to 24,999	36.71% (29)
25,000 to 49,999	20.25% (16)
50,000 or more	21.52% (17)
	TOTAL (79)

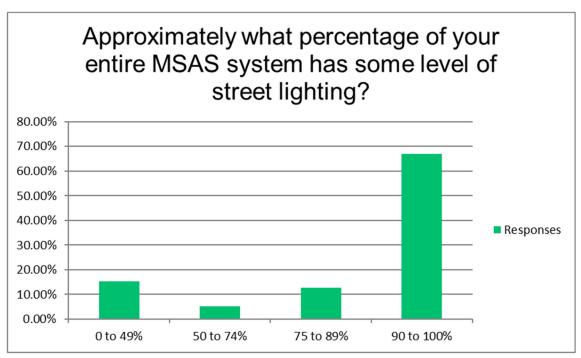

Question 2: Is your city located in the Metro District or Outstate?

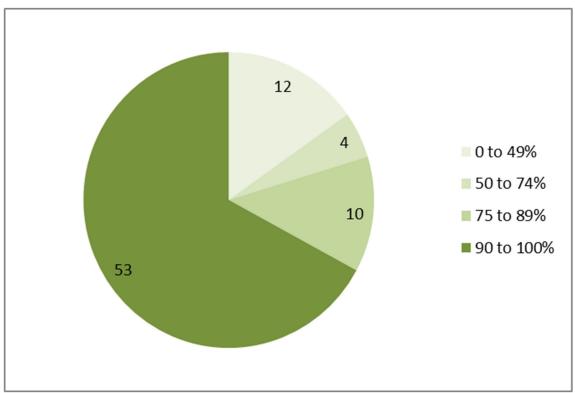

Answer Choices	Responses		
Metro	50.00% (39)		
Outstate	50.00% (39)		
Did not answer	(1)		
	TOTAL (79)		

Question 3: Approximately what percentage of your entire MSAS system has some level of street lighting?

Answer Choices	Responses	
0 to 49%	15.19% (12)	
50 to 74%	5.06% (4)	
75 to 89%	12.66% (10)	
90 to 100%	67.09% (53)	TOTAL (79)

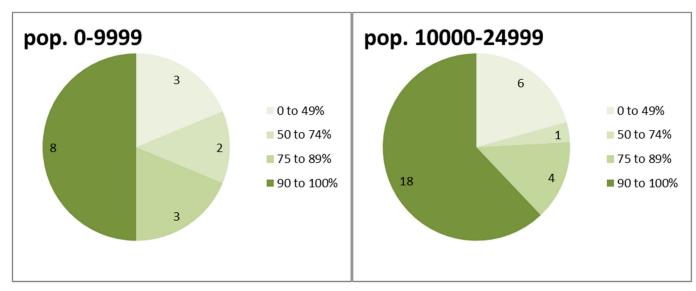

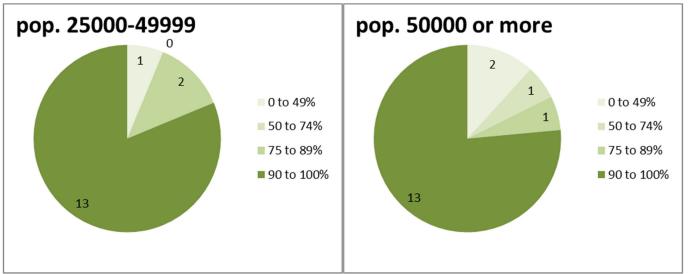

Question 3 (continued): Approximately what percentage of your entire MSAS system has some level of street lighting?

(answer breakdown by population category)

Population Categories

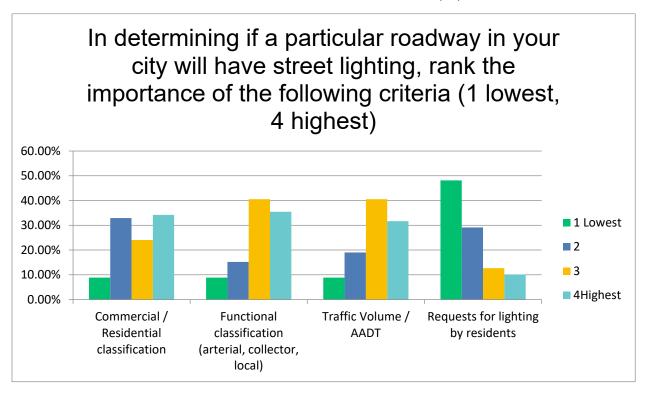

0 to 9,999 (17) (one city did not answer) 10,000 to 24,999 (29) 25,000 to 49,999 (16) 50,000 or more (17)

Question 4: In determining if a particular roadway in your city will have street lighting, rank the importance of the following criteria (1 lowest, 4 highest)

Answer Choices	Responses
Commercial / Residential classification	1 (7), 2 (26), 3 (19), 4 (27)
Functional classification (arterial, collector, local)	1 (7), 2 (12), 3 (32), 4 (28)
Traffic Volume / AADT	1 (7), 2 (15), 3 (32), 4 (25)
Requests for lighting by residents	1 (38), 2 (23), 3 (10), 4 (8)
	TOTAL (<i>79</i>)

Commercial / Residential Average Score	2.84
Functional classification Average Score	3.03
Traffic Volume / AADT Average Score	2.95
Requests for lighting by residents Average Score	1.80

Question 5: What is your best estimate for the typical "cost per mile" for standard street lighting in your city (foundations, poles, luminaires, cables, conduit and installation)?

Answer Choices	Responses	
\$0 to \$99,999	13.51% (10)	
\$100,000 to \$149,999	29.73% (22)	
\$150,000 to \$199,999	24.32% (18)	
\$200,000 to \$249,999	14.86% (11)	
\$250,000 or more	14.86% (11)	
NA	2.70% (2)	RESPONSES (74), SKIPPED (5), TOTAL (79)

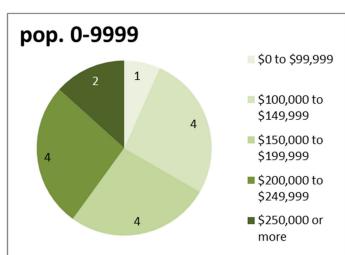

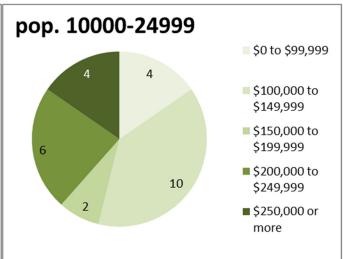

Question 5 (continued): What is your best estimate for the typical "cost per mile" for standard street lighting in your city (foundations, poles, luminaires, cables, conduit and installation)?

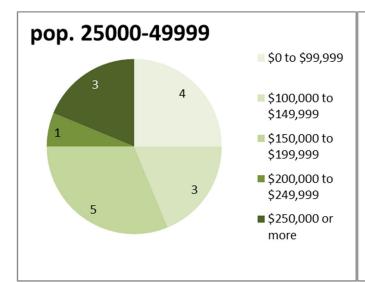

(answer breakdown by population category)

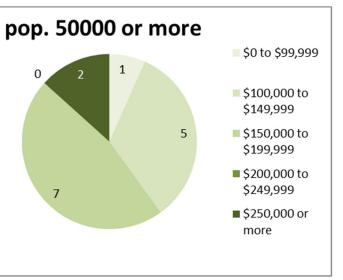

Population Categories

0 to 9,999 (17) (one city did not answer, one city responded "NA") 10,000 to 24,999 (29) (two cities did not answer, one city responded "NA") 25,000 to 49,999 (16) 50,000 or more (17) (two cities did not answer)

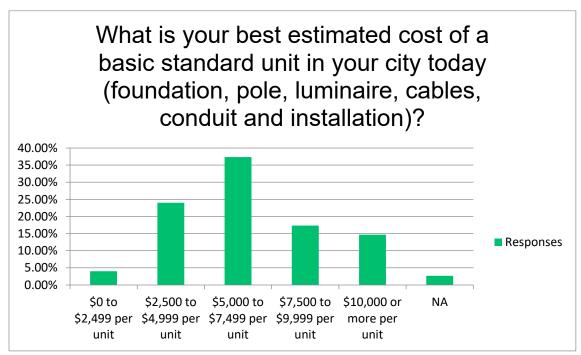

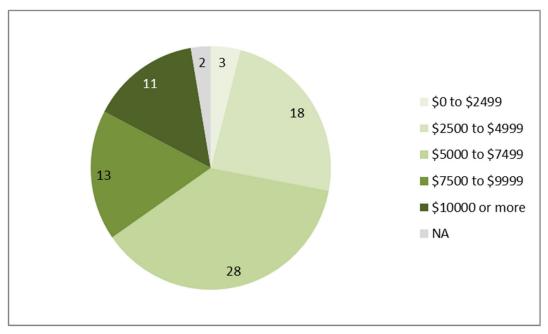

Question 6: What is your best estimated cost of a basic standard unit in your city today (foundation, pole, luminaire, cables, conduit and installation)?

Answer Choices	Responses	
\$0 to \$2,499 per unit	4.00% (3)	
\$2,500 to \$4,999 per unit	24.00% (18)	
\$5,000 to \$7,499 per unit	37.33% (28)	
\$7,500 to \$9,999 per unit	17.33% (13)	
\$10,000 or more per unit	14.67% (11)	
NA	2.67% (2)	RESPONSES (75), SKIPPED (4), TOTAL (79)

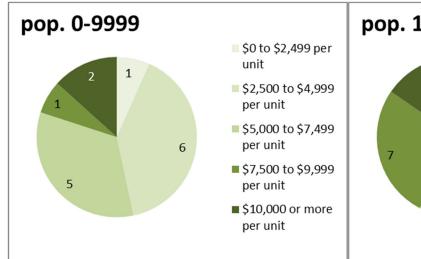

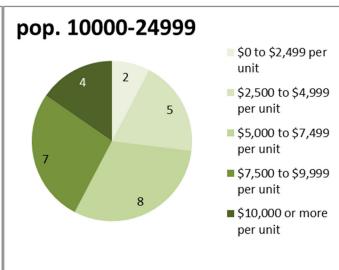

Question 6 (continued): What is your best estimated cost of a basic standard unit in your city today (foundation, pole, luminaire, cables, conduit and installation)?

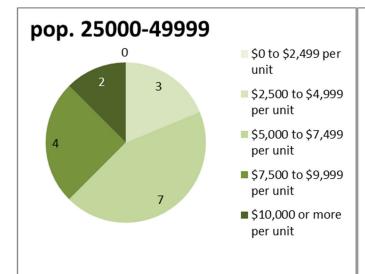

(answer breakdown by population category)

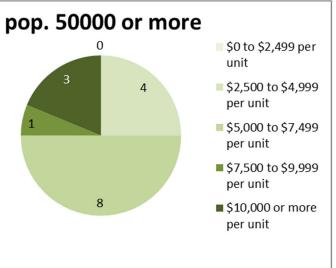

Population Categories

0 to 9,999 (17) (one city did not answer, one city responded "NA") 10,000 to 24,999 (29) (two cities did not answer, one city responded "NA") 25,000 to 49,999 (16) 50,000 or more (17) (one city did not answer)

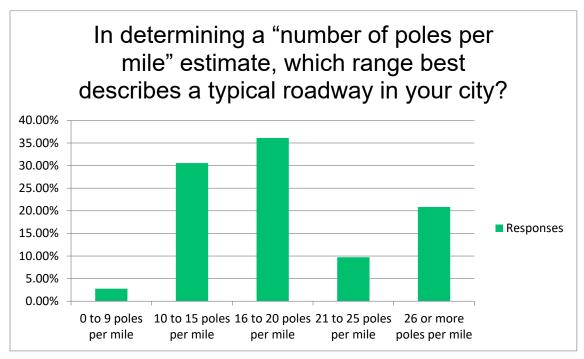

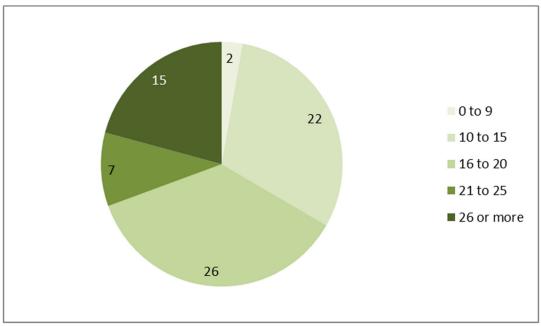

Question 7: In determining a "number of poles per mile" estimate, which range best describes a typical roadway in your city?

Answer Choices	Responses
0 to 9 poles per mile	2.78% (2)
10 to 15 poles per mile	30.56% (22)
16 to 20 poles per mile	36.11% (26)
21 to 25 poles per mile	9.72% (7)
26 or more poles per mile	20.83% (15)

RESPONSES (72), SKIPPED (7), TOTAL (79)

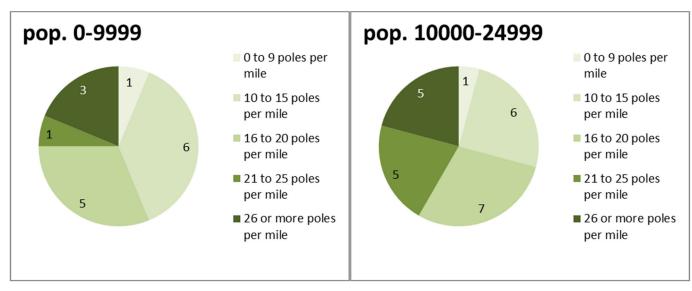

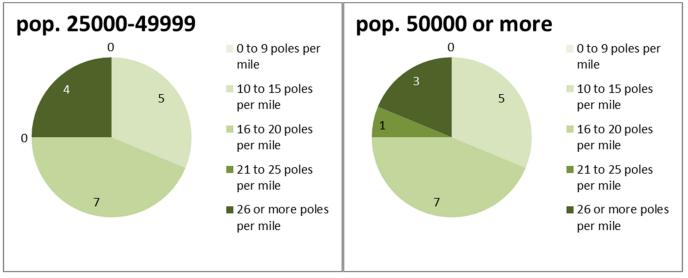

Question 7 (continued): In determining a "number of poles per mile" estimate, which range best describes a typical roadway in your city?

(answer breakdown by population category)

Population Categories

0 to 9,999 (17) (one city did not answer) 10,000 to 24,999 (29) (five cities did not answer) 25,000 to 49,999 (16) 50,000 or more (17) (one city did not answer)

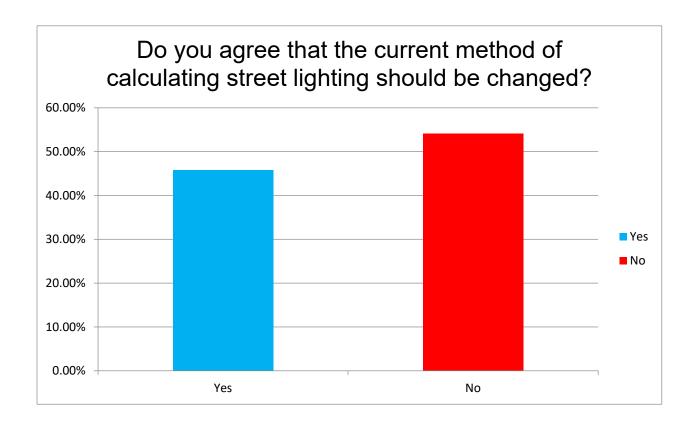

Question 8: Do you agree that the current method of calculating street lighting should be changed?

Answer Choices	Responses
Yes	45.83% (33)
No	54.17% (39)
Did not answer	(7)

RESPONSES (72), SKIPPED (7), TOTAL (79)

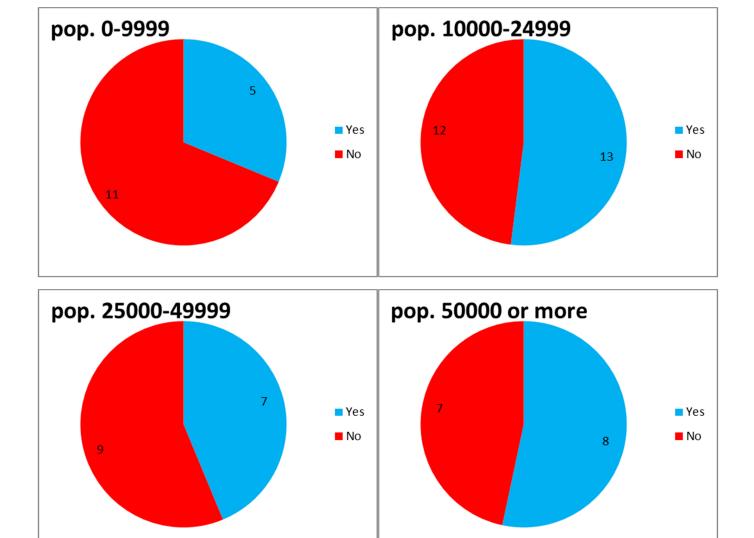

Question 8 (continued): Do you agree that the current method of calculating street lighting should be changed?

(answer breakdown by population category)

Population Categories

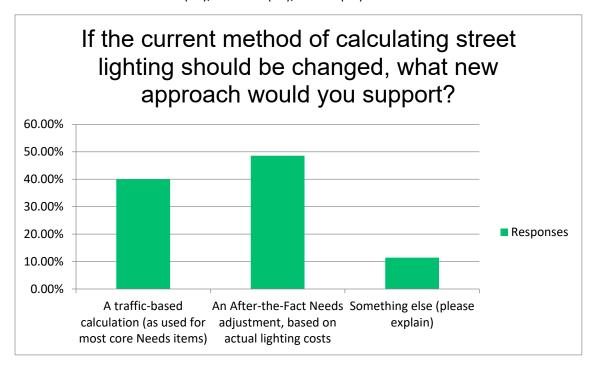

0 to 9,999 (17) (one city did not answer) 10,000 to 24,999 (29) (four cities did not answer) 25,000 to 49,999 (16) 50,000 or more (17) (two cities did not answer)

Question 9: If the current method of calculating street lighting should be changed, what new approach would you support?

Answer Choices	Responses
A traffic-based calculation (as used for most core Needs items)	40.00% (14)
An After-the-Fact Needs adjustment, based on actual lighting costs	48.57% (17)
Something else (please explain)	11.43% (4)

RESPONSES (35), SKIPPED (44), TOTAL (79)

"Something Else" responses:

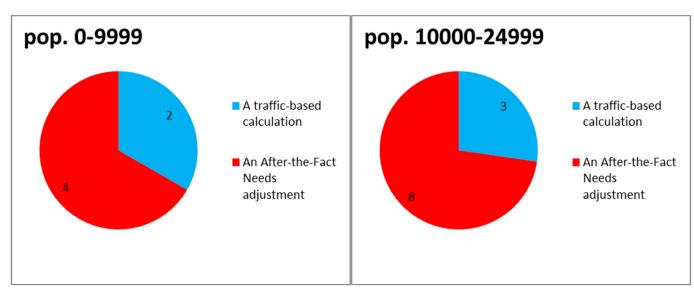

- Rather than giving every MSA Street segment a lighting need regardless if it includes street lights or not), suggest only applying a lighting need to MSA segments with lights. Also suggest modifying the \$100,000/mile need to something closer to actual.
- 2) Most of the cost is pass through from Xcel's contractors but it would be nice to see what those contractuals costs are, especially frost charges.
- 3) Number of street lights per mile is fine for commercial and residential roadways, but the amount per light is low. Recent bid prices are closer to \$9,000/street light unit.
- 4) Indifferent to how; our city installs with a set pole spacing for type of road to get good light coverage

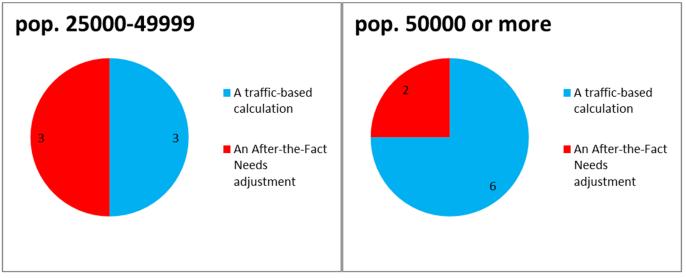

Question 9 (continued): If the current method of calculating street lighting should be changed, what new approach would you support?

(answer breakdown by population category)

Population Categories

0 to 9,999 (6 responses) 10,000 to 24,999 (11 responses) 25,000 to 49,999 (6 responses) 50,000 or more (8 responses)

Question 10: Any other thoughts? RESPONSES (13)

- 1) Street lighting can vary considerably by type. Very difficult to compare apples to apples with MnDOT freeway type systems.
- 2) The current system of calculating street lighting needs is simple and sufficient to provide those small cities with some ability to fund street lights in their communities. Urban communities pay much more for more elaborate and decorative street lighting systems, many of these have street lighting utilities that fund those costs. Increasing needs for street lighting, unless based on true requirements that will be established in state aid rules, artificially biases increased increment in state aid funding to mileage, and away from traffic-based needs calculations.
- 3) Last lighting project was in 2016, which was \sim 450k for a mile of roadway lighting costs have certainly increased since then.
- 4) Thanks for looking into this.
- 5) There is so little MSAS funding available that lighting is mostly funded by other means. Increasing lighting funding will simply shift the limited dollars from one pocket to the other. Some cities have more lighting than others as level of lighting is a preference. Keeping the lighting funding lower, keeps a more level playing field for everyone.
- 6) we have so little lighting on MSAS roads that the funding calculation doesn't really affect us
- 7) Lighting is independent of ADT and lighting standards/polices vary greatly among municipalities. A flat per mile rate applied equally to all ADT categories is believed to be the best method.
- 8) Street lighting varies greatly in our city based on functional classification and adjacent land uses.
- 9) Our city is a mix of rural and urban. Very few lights in the rural sections of town and expensive decorative lights in the urban sections. Therefore not sure a per mile basis makes the most sense in a setting like ours.
- 10) Very vague survey. In my opinion street lighting is the wrong term. As our ROW becomes multi-modal the lighting is going to change. Our organization is creating lighting plans with pedestrians and bikes in mind first. Vehicles have headlights. The emphasis, in our organization, is based the crossings.
- 11) I would not change the method of determining needs but I do believe that the amount per mile is too low.
- 12) The overall impact of street lighting should be a small factor. Whatever changes are considered, keep it simple.
- 13) Putting more MSA allocation to street lighting will just further dilute the pot for the true roadway needs everyone has. Unless Street Lighting becomes a requirement to have on MSA streets I see no reason to change the current system or allocation.

Enterprise MnDOT Mapping Application

http://www.dot.state.mn.us/tda/emma.html

Transportation Data and Analysis

Cartographic maps, GIS data, traffic monitoring programs, and LRS maintenance

Enterprise MnDOT Mapping Application

Launch application

The Enterprise MnDOT Mapping Application (EMMA) references the most current version of Linear Referencing System (LRS) data. The LRS is a suite of Esri tools to manage and maintain route location information and roadway characteristic data. The data in this application is updated every weekend keeping current with the latest changes entered into the LRS.

Step 1: Launch application

Step 2: Enter City to search

Step 3: Click on the layer list icon

and turn on "City Route System" layer.

CURRENT RESOLUTIONS OF THE MUNICIPAL SCREENING BOARD

October 2022

Bolded wording (except headings) are revisions since the last publication of the Resolutions

BE IT RESOLVED:

ADMINISTRATION

Appointments to Screening Board - Oct. 1961 (Revised June 1981, May 2011)

The Commissioner of Mn/DOT will annually be requested to appoint three (3) new members, upon recommendation of the City Engineers Association of Minnesota, to serve three (3) year terms as voting members of the Municipal Screening Board. These appointees are selected from the MnDOT State Aid Districts as they exist in 2010, together with one representative from each of the four (4) cities of the first class.

Screening Board Chair, Vice Chair and Secretary- June 1987 (Revised June, 2002)

The Chair Vice Chair, and Secretary, nominated annually at the annual meeting of the City Engineers Association of Minnesota and subsequently appointed by the Commissioner of the Minnesota Department of Transportation will not have a vote in matters before the Screening Board unless they are also the duly appointed Screening Board Representative of a construction District or of a City of the first class.

Appointment to the Needs Study Subcommittee - June 1987 (Revised June 1993)

The Screening Board Chair will annually appoint one city engineer, who has served on the Screening Board, to serve a three year term on the Needs Study Subcommittee. The appointment will be made at the annual winter meeting of the City's Engineers Association. The appointed subcommittee person will serve as chair of the subcommittee in the third year of the appointment.

<u>Appointment to Unencumbered Construction Funds Subcommittee</u> – (Revised June 1979, May 2014)

The Screening Board past Chair will be appointed to serve a minimum three-year term on the Unencumbered Construction Fund Subcommittee. This appointment will continue to maintain an experienced group to follow a program of accomplishments. The most senior member will serve as chair of the subcommittee

Appearance Screening Board - Oct. 1962 (Revised Oct. 1982)

Any individual or delegation having items of concern regarding the study of State Aid Needs or State Aid Apportionment amounts, and wishing to have consideration given to these items, will send such request in writing to the State Aid Engineer. The State Aid Engineer with concurrence of the Chair of the Screening Board will determine which requests are to be referred to the Screening Board for their consideration. This resolution does not abrogate the right of the Screening Board to call any person or persons before the Board for discussion purposes.

Screening Board Meeting Dates and Locations - June 1996

The Screening Board Chair, with the assistance of the State Aid Engineer, will determine the dates and locations for Screening Board meetings.

Research Account - Oct. 1961

An annual resolution be considered for setting aside up to ½ of 1% of the previous years' Apportionment fund for the Research Account to continue municipal street research activity.

Population Apportionment - October 1994, 1996

Beginning with calendar year 1996, the MSAS population apportionment will be determined using the latest available federal census or population estimates of the State Demographer and/or the Metropolitan Council. However, no population will be decreased below that of the latest available federal census, and no city will be dropped from the MSAS eligible list based on population estimates.

Improper Needs Report - Oct. 1961

The State Aid Engineer and the District State Aid Engineer (DSAE) are requested to recommend an adjustment of the Needs reporting whenever there is a reason to believe that said reports have deviated from accepted standards and to submit their recommendations to the Screening Board, with a copy to the municipality involved, or its engineer.

New Cities Needs - Oct. 1983 (Revised June 2005, May 2014)

Any new city having determined its eligible mileage, but has not submitted its Needs to the DSAE by December 1, will have its Needs based upon zero ADT assigned to the eligible mileage until the DSAE approves the traffic counts.

<u>Certified Complete Cities</u> – May 2014 (Revised October 2014)

State Aid Operational Rule 8820.18 subp.2 allows cities to spend the population based portion of their Construction Allotment on non MSAS city streets if its MSAS system has been Certified Complete.

At the city's request, the District State Aid Engineer will review the MSAS system in that city and if the system has been completely built, may certify it complete for a period of two years. The same proportion of a city's total allocation based on population will be used to compute the population portion of its Construction Allotment.

If a payment request for a project on the MSAS system is greater than the amount available in the Needs based account, the remainder will come from the population based account, thereby reducing the amount available for non MSAS city streets.

A city may carry over any remaining amount in its population based account from year to year. However if a payment request for a project on a non MSAS city street is greater than the amount available in the population based account, the population based account will be reduced to zero and the city will be responsible for the remaining amount.

Construction Needs Components – May 2014

For Construction Needs purposes, all roadways on the MSAS system will be considered as being built to Urban standards.

All segments on the MSAS system will generate continuous Construction Needs on the following items:

Excavation/Grading
Gravel Base
Bituminous
Curb and Gutter Construction
Sidewalk Construction
Storm Sewer Construction
Street Lighting
Traffic Signals
Engineering
Structures

Unit Price Study- Oct. 2006 (Revised May, 2014)

The Needs Study Subcommittee will annually review the Unit Prices for the Needs components used in the Needs Study. The Subcommittee will make its recommendation to the Municipal Screening board at its annual spring meeting.

The Unit Price Study go to a 3 year (or triennial) cycle with the Unit Prices for the two 'off years' to be set using the Engineering News Record construction cost index on all items where a Unit Price is not estimated and provided by other MnDOT offices. The Screening Board may request a Unit Price Study on individual items in the 'off years' if it is deemed necessary.

Unit Costs - May 2014, (Revised January 2015, May 2015)

The quantities which the Unit Costs for Excavation/Grading, Gravel Base, and Bituminous are based upon will be determined by using the roadway cross sections and structural sections in each of the ADT groups as determined by the Municipal Screening Board and shown in the following table 'MSAS Urban ADT Groups for Needs Purposes'.

MSAS URBAN ADT GROUPS FOR NEEDS PURPOSES

Quantities Based on a One Mile Section

EXISTING ADT	NEEDS WIDTH	NEEDS GENERATION DATA	GRADING DEPTH (inches)	GRADING QUANTITY (cubic yards)	CLASS 5 GRAVEL BASE DEPTH (inches)	CLASS 5 GRAVEL BASE QUANTITY (Tons)	TOTAL BITUMINOUS QUANTITY (TONS)
0 EXISTING ADT & NON EXISTING	26 FOOT ROADBED WIDTH	2- 11' TRAFFIC LANES 0 PARKING LANES 2- 2' CURB REACTION	22 INCHES	11,655	6 INCHES	4,346	2,917 4 INCHES
1-499 EXISTING ADT	28' FOOT ROADBED WIDTH	2- 12' TRAFFIC LANES 0 PARKING LANES 2- 2' CURB REACTION	22 INCHES	12,496	6 INCHES	4,691	3,182 4 INCHES
500-1999 EXISTING ADT	34 FOOT ROADBED WIDTH	2- 12' TRAFFIC LANES 1- 8' PARKING LANE 1- 2' CURB REACTION	26 INCHES	17,698	10 INCHES	10,176	3,978 4 INCHES
2000-4999 EXISTING ADT	40 FOOT ROADBED WIDTH	2-12' TRAFFIC LANES 2- 8' PARKING LANE	32 INCHES	25,188	16 INCHES	19,628	4,773 4 INCHES
5000-8999 EXISTING ADT	48 FOOT ROADBED WIDTH	4-11' TRAFFIC LANES 2- 2' CURB REACTION	35 INCHES	32,795	19 INCHES	27,907	5,834 4 INCHES
9000-13,999 EXISTING ADT	54 FOOT ROADBED WIDTH	4-11' TRAFFIC LANES 1- 8' PARKING LANE 1- 2' CURB REACTION	36 INCHES	37,918	19 INCHES	31,460	8,287 5 INCHES
14,000-24,999 EXISTING ADT	62 FOOT ROADBED WIDTH	4-11' TRAFFIC LANES 1- 14' CENTER TURN 2- 2' CURB REACTION	38 INCHES	45,838	20 INCHES	38,049	11,535 6 INCHES
GT 25,000 EXISTING ADT	70 FOOT ROADBED WIDTH	6-11' TRAFFIC LANES 0 PARKING LANES 2- 2' CURB REACTION	39 INCHES	53,172	21 INCHES	44,776	13,126 6 INCHES

The quantity used for **Curb and Gutter** Construction will be determined by multiplying the segment length times two if it is an undivided roadway and by four if it is divided.

This quantity will then be multiplied by the Municipal Screening Board approved Unit Price to determine the Curb and Gutter Construction Needs.

The quantity used for **Sidewalk Construction** will be determined by multiplying the segment length times 26,400 (a five foot wide sidewalk on one side of a mile of roadway) in the lower two ADT groups (less than 500 ADT) and by 52,800 (two five foot wide sidewalks on a mile of roadway) in the upper ADT groups.

This quantity will then be multiplied by the Municipal Screening Board approved Unit Price to determine the Sidewalk Construction Needs.

The Unit Cost per mile of **Storm Sewer** for the highest MSAS Urban ADT Group for Needs Purposes will be based on the average costs of all Storm Sewer Construction on the MSAS system in the previous year. To determine the Unit Cost for the highest ADT Group, average costs for Complete Storm Sewer projects and Partial Storm Sewer projects will be provided to State Aid by the MnDOT Hydraulics Office and then added together and divided by two to calculate a statewide average Unit Cost for all Storm Sewer Construction.

The Unit Cost per mile for Storm Sewer Construction will be calculated for the highest MSAS Urban ADT Group and be prorated downward for the other ADT Groups. This proration has been determined based upon an engineering study requested by the Municipal Screening Board in 2011 and will be the basis for the Needs calculations.

The Unit Cost for **Street Lighting** will be determined by multiplying the Unit Price per mile by the segment length. This Unit Cost will remain at \$100,000 per mile. The Municipal Screening Board may request a study on this item on any year if it is deemed necessary.

The Unit Cost for **Traffic Signals** will be determined by the recommendation by the SALT Program Support Engineer and approved by the MSB.

The Unit Cost for traffic signals will be based on a cost per signal leg, and for Needs purposes a signal leg will be defined as $\frac{1}{4}$ of the signal cost.

Only signal legs on designated MSAS routes will be included in the Needs study.

Stand-alone pedestrian crossing signals will not be included in the Needs study.

The area in square feet used for **Structure Needs** (Bridges and Box Culverts) will be determined by multiplying the <u>centerline length</u> of the bridge, or the <u>culvert width</u> of the box culvert, times the Needs Width from the appropriate MSAS Urban ADT Group. This quantity will then be multiplied by the Municipal Screening Board Unit Price to determine the Structure Needs. The Unit Price for Structures will be determined by using one-half of the approved unit cost provided by the MnDOT State Aid Bridge Office.

The Unit Cost for **Engineering** will be determined by adding together all other Unit Costs and multiplying them by the MSB approved percentage. The result is added to the other Unit Costs.

2022 UNIT PRICE RECOMMENDATIONS

for the January 2023 distribution

Needs Item		Municipal Screening Board Approved Prices for the 2022 Distribution	Needs Study Subcommittee Recommended Prices for 2023 Distribution	Municipal Screening Board Approved Prices for the 2023 Distribution
Grading (Excavation)	Cu. Yd.	\$10.64	\$11.43	\$11.43
Aggregate Base	Ton	18.00	19.33	19.33
All Bituminous	Ton	72.00	77.33	77.33
Sidewalk Construction	Sq. Ft.	7.24	7.78	7.78

3,000 10,000		240 400	267,600	267,600
14,000-24,999		249,100	201,000	<u> </u>

<u>Mileage</u> - Feb. 1959 (Revised Oct. 1994. 1998)

The maximum mileage for Municipal State Aid Street designation will be 20 percent of the municipality's basic mileage - which is comprised of the total improved mileage of local streets, county roads and county road turnbacks.

Nov. 1965 – (Revised 1969, October 1993, October 1994, June 1996, October 1998, May 2014)

That the maximum mileage for State Aid designation may be exceeded to designate trunk highway turnbacks released to the Municipality after July 1, 1965.

The maximum mileage for State Aid designation may also be exceeded to designate both County Road and County State Aid Highways released to the Municipality after May 11th, 1994.

Nov. 1965 (Revised 1972, Oct. 1993, 1995, 1998)

The maximum mileage for Municipal State Aid Street designation will be based on the Annual Certification of Mileage current as of December 31st of the preceding year. Submittal of a supplementary certification during the year will not be permitted. Frontage roads not designated Trunk Highway, Trunk Highway Turnback or County State Aid Highways will be considered in the computation of the basic street mileage. The total mileage of local streets, county roads and county road turnbacks on corporate limits will be included in the municipality's basic street mileage. Any State Aid Street that is on the boundary of two adjoining urban municipalities will be considered as one-half mileage for each municipality.

All mileage on the MSAS system will accrue Needs in accordance with current rules and resolutions.

Oct. 1961 (Revised May 1980, Oct. 1982, Oct. 1983, June 1993, June 2003)

All requests for revisions to the Municipal State Aid System must be received by the District State Aid Engineer by March first to be included in that years Needs Study. If a system revision has been requested, a City Council resolution approving the system revisions and the Needs Study reporting data must be received by May first, to be included in the current year's Needs Study. If no system revisions are requested, the District State Aid Engineer must receive the Normal Needs Updates by March 31st to be included in that years' Needs Study.

One Way Street Mileage - June 1983 (Revised Oct. 1984, Oct. 1993, June 1994, Oct. 1997)

Any one-way streets added to the Municipal State Aid Street system must be reviewed by the Needs Study Sub-Committee, and approved by the Screening Board before any one-way street can be treated as one-half mileage in the Needs Study.

All Municipal Screening Board approved one-way streets be treated as one-half of the mileage and allow one-half complete Needs. When Trunk Highway or County Highway Turnback is used as part of a one-way pair, mileage for certification shall only be included as Trunk Highway or County Turnback mileage and not as approved one-way mileage.

Needs Adjustments

In the event that an MSAS route earning "After the Fact" Needs is removed from the MSAS system, the "After the Fact" Needs will then be removed from the Needs Study, except if transferred to another state system. No adjustment will be required on Needs earned prior to the revocation.

<u>Excess Unencumbered Construction Fund Balance Adjustment</u> – Oct. 2002, (Revised Jan. 2010, May 2014, May 2019, October 2021, *June 2022*)

State Aid Payment Requests received before December 1st by the District State Aid Engineer for payment will be considered as being encumbered and the construction balances will be so adjusted.

The December 31 construction fund balance will be compared to the annual construction allotment from January of the same year. If the December 31 construction fund balance exceeds 3 times the January construction allotment, and the construction fund balance is over 3 times the average construction allotment for all cities excluding cities of the first class (hereinafter referred to as the adjusted average construction allotment), then the negative adjustment to the Needs will be 1 times the December 31 construction fund balance. In each consecutive year the December 31 construction fund balance exceeds 3 times the January construction allotment (and the balance is over 3 times the adjusted average construction allotment) the negative adjustment to the Needs will be increased to 2, 3, 4, etc. times the December 31 construction fund balance until such time the Construction Needs are adjusted to zero.

If the December 31 construction fund balance drops below 3 times the January construction allotment and subsequently increases to over 3 times, the multipliers will start over with one.

The adjusted average construction allotment used for this purpose shall not decrease in value from one year to the next.

If a city wishes to justify their balance in excess of said limits, and request an exemption to the excess balance adjustment, their request must be reviewed and approved by the Municipal Screening Board at their Annual Fall Meeting.

Low Balance Incentive – Oct. 2003 (Revised May, 2014)

The amount of the Excess Unencumbered Construction Fund Balance Adjustment will be redistributed as a positive adjustment to the Construction Needs of all municipalities whose December 31st construction fund balance is less than 1 times their January construction allotment of the same year. This redistribution will be based on a city's prorated share of its Unadjusted Construction Needs to the total Unadjusted Construction Needs of all participating cities times the total Excess Balance Adjustment.

After the Fact Right of Way Adjustment - Oct. 1965 (Revised June 1986, 2000, May 2014)

Right of Way Needs will not be included in the Needs calculations until the right of way is acquired and the actual cost established. At that time a Construction Needs adjustment will be made by annually adding the local cost (which is the total cost less county or trunk highway participation) for a 15-year period. Only right of way acquisition costs that are eligible for State-Aid funding will be included in the right-of-way Construction Needs adjustment. This Directive is to exclude all Federal or State grants.

When "After the Fact" Needs are requested for right-of-way projects that have been funded with local funds, but qualify for State Aid reimbursement, documentation (copies of warrants and

description of acquisition) must be submitted to the District State Aid Engineer. The City Engineer will input the data into the Needs Update program and the data will be approved by the DSAE.

After the Fact Railroad Bridge over MSAS Route Adjustment – May 2014

RR Bridge over MSAS Route Rehabilitation

Any structure that has been rehabilitated (Minnesota Administrative Rules, CHAPTER 8820, 8820.0200 DEFINITIONS, Subp. 8. Bridge rehabilitation) will not be included in the Needs calculations until the rehabilitation project has been completed and the actual cost established. At that time a Construction Needs adjustment will be made by annually adding the local cost (which is the total cost less county or trunk highway participation) for a 15-year period. Only State Aid eligible items are allowed to be included in this adjustment and all structure rehabilitation Needs adjustments must be input by the city and approved by the DSAE.

RR Bridge over MSAS Route Construction/Reconstruction

Any structure that has been constructed/reconstructed (Minnesota Administrative Rules, CHAPTER 8820, 8820.0200 DEFINITIONS, Subp. 31. Reconstruction) will not be included in the Needs calculations until the project has been completed and the actual cost established. At that time a Construction Needs adjustment will be made by annually adding the local cost (which is the total cost less county or trunk highway participation) for a 35-year period. Only State Aid eligible items are allowed to be included in this adjustment and all structure construction/reconstruction Needs adjustments must be input by the city and approved by the District State Aid Engineer.

After the Fact Railroad Crossing Adjustment

Any Railroad Crossing improvements will not be included in the Needs Calculations until the project has been completed and the actual cost established. At that time a Construction Needs adjustment will be made by annually adding the local cost (which is the total cost less county or trunk highway participation) to the annual Construction Needs for a 15 year period. Only State Aid eligible items are allowed to be included in this adjustment, and all Railroad Crossing Needs adjustments must be input by the city and approved by the District State Aid Engineer.

Excess Maintenance Account – June 2006

Any city which requests an annual Maintenance Allocation of more than 35% of their Total Allocation, is granted a variance by the Variance Committee, and subsequently receives the increased Maintenance Allocation will receive a negative Needs adjustment equal to the amount of money over and above the 35% amount transferred from the city's Construction Account to its Maintenance Account. The Needs adjustment will be calculated for an accumulative period of twenty years, and applied as a single one-year (one time) deduction each year the city receives the maintenance allocation.

After the Fact Retaining Wall Adjustment Oct. 2006 (Revised May 2014)

Retaining wall Needs will not be included in the Needs study until such time that the retaining wall has been constructed and the actual cost established. At that time a Needs adjustment will be made by annually adding the local cost (which is the total cost less county or trunk highway participation) for a 15 year period. Documentation of the construction of the retaining wall, including eligible costs, must be submitted to your District State Aid Engineer by July 1 to be included in that years Needs study. After the Fact needs on retaining walls will begin effective for all projects awarded after January 1, 2006. All Retaining Wall adjustments must be input by the city and approved by the District State Aid Engineer.

TRAFFIC - June 1971 (Revised May 2014)

Beginning in 1965 and for all future Municipal State Aid Street Needs Studies, the Needs Study procedure will utilize traffic data developed according the Traffic Forecasting and Analysis web site at http://www.dot.state.mn.us/traffic/data/coll-methods.html

<u>Traffic Counting</u> - Sept. 1973 (Revised June 1987, 1997, 1999, Oct. 2014)

Traffic data for State Aid Needs Studies will be developed as follows:

- 1) The municipalities in the metropolitan area cooperate with the State by agreeing to participate in counting traffic every two or four years at the discretion of the city.
- 2) The cities in the outstate area may have their traffic counted and maps prepared by State forces every four years, or may elect to continue the present procedure of taking their own counts and have state forces prepare the maps.
- Any city may count traffic with their own forces every two years at their discretion and expense, unless the municipality has made arrangements with the Mn/DOT district to do the count.
- 4) On new MSAS routes, the ADT will be determined by the City with the concurrence of the District State Aid Engineer until such time the roadway is counted in the standard MnDOT count rotation.
